**U.S. ELECTION ASSISTANCE COMMISSION**

*2008 Election Administration & Voting Survey*

***Statutory Overview***

In order to better understand state laws governing federal elections, the U.S. Election Assistance Commission, as part of its biennial Election Administration and Voting Survey, is collecting information on state election laws and procedures. These answers will help us to better understand the quantitative data relating to the 2008 general election that we are collecting from all U.S. states and territories.

We understand that responding to this Statutory Overview may require significant staff time on the part of your office. Please be assured that we have attempted to minimize the burden, and we appreciate your cooperation in this very important project.

## SECTION B: VOTER REGISTRATION

B1. Is your state's voter registration database system best described as a bottom-up, a top-down, or a hybrid? (Note: A bottom-up system generally uploads information retained at the local level and compiled at regular intervals to form the statewide voter registration list. A top-down system is hosted on a single, central platform/mainframe and is generally maintained by the state with information supplied by local jurisdictions. A hybrid is some combination of both systems described above.)

[Begin response to above question (B1) below this line.]

The Nebraska Voter Registration System is a "top-down" statewide voter registration system that is used throughout all 93 counties in Nebraska. The architecture is based on the "one voter, one record" principle. When a voter moves to another county, the record is transferred and retains all history from the previous county. The voter registration system is provided by a single vendor, Elections System and Software (ES&S).

[End response to above question (B1) above this line.]

If your state has a bottom-up or hybrid system, how often do local jurisdictions transmit registration information to the state list?

[Begin response to above clarification question to B1 below this line.]

[End response to above clarification question to B1 above this line.]

B2. Please describe the process used in your state to move voters from the active list to the inactive list, and from the inactive list to the active list. Is a different process used for UOCAVA voters?

[Begin response to above question (B2) below this line.]

Voters are moved to the NVRA process and confirmation notices are sent if, the state initiates the NCOA process, ID/Acknowledgement cards or VR forms are returned as undeliverable or non-forwardable or if there is information of a change from a third party ( ex. jury notices, utility companies, etc.) The process is the same for UOCAVA voters

[End response to above question (B2) above this line.]

B3. Please describe your state's process for removing voters from the voter registration rolls (not merely moving them from active to inactive). Please include information regarding notices and confirmations. Are these procedures the same for UOCAVA voters?

[Begin response to above question (B3) below this line.]

Every 6 months the database is run against NCOA a confirmation notice is generated  
Voters are made removable if they have not voted in two general elections, and have not  
responded to 2 NCOA confirmation mailings. The process is the same for UOCAVA  
voters

[End response to above question (B3) above this line.]

B4. Can your state's voter registration database (or equivalent) share information electronically with your state's drivers license agency (for example, to match records or trace changes in address)? Can your voter registration database be similarly linked with databases in any other state or federal agencies? Please describe these links, including any use of database matching to verify voter registration applications.

[Begin response to above question (B4) below this line.]

The system was implemented in response to HAVA, and has interfaces to the Department of Motor Vehicles (DMV), the Social Security Administration (SSA), death records, and felon records. These interfaces can best be described as one way transfers of data from these agencies. We can incorporate this data into our system and check against the registrations (ex. NCOA, and death record checks).

The database can be "linked" in this fashion with other agencies.

[End response to above question (B4) above this line.]

B5. Please describe how your state uses National Change of Address (NCOA). What has been your state's experience with using NCOA?

[Begin response to above question (B5) below this line.]

The state hires a vendor. The vendor compares the Voter Registration list with USPS address changes. The USPS information is merged with the state Database, and the state sends conformation notices. These notices are returned to each individual county election office and they use the information provided on the cards to update their registration records. This process has been an efficient way to maintain a clean list.

[End response to above question (B5) above this line.]

B6. Please describe your state's voting eligibility requirements as they relate to individuals with a felony conviction. (For example, are convicted felons allowed to vote while in prison or while on parole or probation? Are voting rights automatically restored or does the individual have to apply for a pardon, certificate of eligibility or other similar certificate? Does an individual whose voting rights have been restored have to produce documentation of his/her status when registering to vote?)

[Begin response to above question (B6) below this line.]

32-313 Persons convicted of a felony can re-register to vote 2 years after the completion of the sentence. This includes any probation or restitution payments. The voter does not have to produce documentation when re-registering.

[End response to above question (B6) above this line.]

B7. Does your state currently use the Internet in any way to facilitate voter registration? If yes, please describe how your state allows voters to use the Internet in the registration

process (e.g., entire registration completed online; completed online but then must be printed, signed, and mailed by voter, etc.).

[Begin response to above question (B7) below this line.]

Yes, we provide a PDF file of our Voter Registration Application online. This file can be filled out online, but must be printed and mailed. Also, we provide registration documentation online. This includes new voter information, FAQ's, and guides for registering and voting.

[End response to above question (B7) above this line.]

## SECTION C: ELECTION ADMINISTRATION

C1. Please describe how all votes cast at a place other than the voter's precinct of registration are tabulated (for example, please include descriptions of such votes as absentee ballots, mail-in ballots, votes cast at vote centers, provisional ballots, early voting locations, etc.).

a. Are the votes counted centrally or at the precincts?

[Begin response to above question (a) below this line.]

Centrally

[End response to above question (a) above this line.]

b. If centrally tabulated, are the votes redirected to the appropriate precinct for reporting in the canvass?

[Begin response to above question (b) below this line.]

No, all are recorded as EV and in one precinct.

[End response to above question (b) above this line.]

c. Are the absentee, mail, etc., votes reported separately for each precinct, or are they added to the in-precinct results and reported as just a single number?

[Begin response to above question (c) below this line.]

No, they are reported in separate EV precincts.

[End response to above question (c) above this line.]

d. How are UOCAVA ballots counted and reported?

[Begin response to above question (d) below this line.]

UOCAVA ballots are reported separate as to location, but vote totals are included in EV totals.

[End response to above question (d) above this line.]

C2. Does your state require a reason for voting absentee, or does your state allow no-excuse absentee voting? (If a reason is required, please provide the legal citation.)

[Begin response to above question (C2) below this line.]

32-938 - no excuse absentee voting

[End response to above question (C2) above this line.]

C3. Does your state provide for in-person early voting? If so, how is early voting defined? When early voting is used, are the ballots counted at the precinct or at a central location? How are these votes reported?

[Begin response to above question (C3) below this line.]

Yes, in person early voting begins 35 days prior to the General Election.

[End response to above question (C3) above this line.]

C4. Do any jurisdictions in your state use a vote-by-mail system to replace (and not merely supplement) at-the-precinct voting in any elections?

[Begin response to above question (C4) below this line.]

Yes – 22 precincts in Nebraska use a vote by mail system.

[End response to above question (C4) above this line.]
