Re: Amendment for OpenElect 1.3 Test Report and Scope of Certification

It was determined that the Scope of Certification document did not correctly reflect the system as tested.

In the **Components Included** section of the Scope of Certification:

In **System Components** section of table:
- Component EOS Operating System should be Linux CentOS version 5.7 and 6.5.

In **COTS Components** section of table:
- CentOS Linux should be versions 5.0, 5.7, 6.3, 6.5
- MySQL Database should be versions 5.0.45-7, 5.1.71-1
    - Note: 5.0.45-7 is used in CentOS 5.7 and 5.1.71-1 is used in CentOS 6.5

This change is the result of adjustments requested to the NTS Test Report to accurately represent the tested system. Specifically in **Table 2-9 Unisyn OVS 1.3 COTS Operating System Software Descriptions.**

In row two (Linux CentOS Distribution used for OCS and OVCS) – Filename column and Hash Value (MD5) column should be changed to reflect the 5.7 version. Software version is correct.

CentOS-5.7-i386-bin-DVD-1of2.iso f64544635a0e1198899eb756072622f5

An additional row should be added for the EOS (OCS and OVCS) that indicates the newer CentOS version.

Linux CentOS Distribution used for OCS and OVCS	6.5	CentOS-6.5-i386-bin-DVD1.iso	`c98e8040b9ac107153fc1757b4874198`

If you have any questions or need further clarifications please don't hesitate to let me know.
