

1201 18<sup>TH</sup> STREET, SUITE 210 DENVER, COLORADO 80202

December 12, 2012

Ms. Jessica Myers  
Computer Engineer  
US Election Assistance Commission  
1201 New York Avenue NW, Suite 300  
Washington, DC 20005

Ms. Myers:

Dominion Voting Systems hereby makes a request to your office for an update to the Democracy Suite system version 4.9 Application for System Testing. I have taken the parts of the Application form from the EAC website and noted below which sections are unchanged from the 4.9 Application, and for sections requiring update I have provided that updated information. See particularly numbers five and ten in the list of items for an Application. In short, we seek two changes to the Application:

- To add the DRS brand PhotoScribe scanners currently certified under the ASSURE voting system to Democracy Suite, and
- To bring the system version of the candidate voting system to 4.14.

This request references *2.02-System Configuration and Overview*, part of the Technical Documentation Package for this voting system. I will send it to you via separate email. Dominion Voting thanks you in advance for your consideration of this request.

Sincerely,

A handwritten signature in black ink that reads "Edwin B. Smith, III". The signature is written in a cursive, flowing style with a prominent initial "E" and a clear "III" at the end.

Edwin B. Smith, III  
Vice President, Certification and Compliance

- 1. Manufacturer Name:** unchanged from Dominion Voting
- 2. Manufacturer Code:** unchanged from DVS
- 3. Version of Standards to be Used for Testing:** unchanged from VVSG 2005 v1.0
- 4-5** the candidate voting system name is unchanged-- Democracy Suite. The system version is changed to 4.14.
- 6. EAC Accredited VSTL:** unchanged, Wyle Laboratories
- 7. Requested EAC Certification Number:** unchanged
- 8. Configuration:** unchanged from the approved Application. In short, the ImageCast Evolution is the accessible voting station for this system, along with ImageCast Precinct when used in its audio enabled configuration. To make a voting system per EAC requirements, a jurisdiction must utilize any combination of these accessible voting stations along with the election management software. Please see *2.02-System Configuration and Overview* for further details.
- 9. Coding Convention Declaration:** unchanged from the approved 4.9 Application.
- 10. Brief Description of the System or System Modification:** this is an Application for a modification to the May 10<sup>th</sup> certified 4.0 Democracy Suite. The basic components are:  
  
Election Management System version 4.14.8  
ImageCast Central 4.14.4 (includes two COTS scanners, Canon and DRS)  
ImageCast Precinct 4.14.4  
ImageCast Evolution 4.14.4.13
- 11. Implementation Statement:** Please see *2.02-System Configuration and Overview* for the Implementation Statement
- 12. Functional Diagram:** Please see *2.02-System Configuration and Overview* for the Functional Diagram.
- 13. System Overview:** Please see *2.02-System Configuration and Overview* for this overview. It has been submitted to Wyle Laboratories and has undergone review by their staff.
