Subject Draft Voting Fraud and Voter Intimidation Report

History: This message has been replied to

Commissioners and Tom,

I have attached a draft version of the EAC Voting Fraud and Voter Intimidation report. **Please have your comments ready no later than Tuesday , Nov. 28, COB, so that I will be prepared to discuss them at our briefing on Wednesday , Nov. 29 at 10:30.**

You will note that there are appendixes referenced in the report. These documents are quite lengthy. Thus, I did not attach them to this email. If, however, you want to read the documents, DeAnna has access to them in my absence and can either email them to you or print them for you.

I think that the report is fairly self-explanatory. However, there are two questions that we need to address and that the Commissioners need to comment on:

1. The consultants provided summaries of articles, books, and reports that they read, as well as summaries of the interviews that they conducted. Peggy created two tables summarizing the consultants' summaries of books, article and reports as well as interviews. We need to make a determination of which summaries we want to attach as appendixes. The only issue that I am aware of (and I have a question pending to Peggy about the quality of these summaries) is a significant disagreement over the summaries of interviews with Craig Donsanto and John Tanner of the Dept. of Justice. They disagree with the characterization given by the consultants to what they said in the interview. Obviously, this matter would have to be resolved if we decide to use the consultants' summaries.

2. Tom and I had a conversation with Tova and Job about the fact that we are going to issue a report. Tova was quite insistent about being able to see the report before it is released. I am NOT inclined to give her a copy of the report before it is released. Neither Tova nor Job are still on contract with the EAC. Thus, they are just like any other member of the public. I believe that if we release it to them, then we may have a significant problem withholding the document from others that may ask for it via FOIA request. I believe that the course of action should be to release it to all persons simultaneously.

Happy reading and Happy Thanksgiving!

Voter Fraud & Intimidation Report.doc

Juliet Thompson Hodgkins

**EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY****INTRODUCTION**

Voting fraud and voter intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and voter intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the existence and enforcement of election crimes in the United States.

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and the need to assure a bipartisan representation in this study. The consultants and EAC staff were charged with (1) researching the current state of information on the topic of voting fraud and voter intimidation; (2) developing a uniform definition of voting

---

<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

fraud and voter intimidation; and (3) proposing recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**

Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**

Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**

Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**

Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**

Partner, Patton Boggs LLP  
Counsel to National Republican  
Campaign Committees and Republican  
candidates

**Robert Bauer**

Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**

Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**

Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**

Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### **Reports and Studies of Voting fraud and Intimidation**

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, “A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law,” The Sentencing Project, November 2005.
- American Center for Voting Rights “Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election,” August 2, 2005.
- The Advancement Project, “America’s Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy” November 7, 2001
- The Brennan Center and Professor Michael McDonald “Analysis of the September 15, 2005 Voting fraud Report Submitted to the New Jersey Attorney General,” The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, “Democracy at Risk: The November 2004 Election in Ohio,” DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at [http://www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html)
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.

- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

### Books

- John Fund, *Stealing Elections: How Voting fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 Presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, including legal practices that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. For example, a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### **Interviews with Experts**

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Pat Rogers**  
Attorney, New Mexico

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

**Tracey Campbell**

Author, *Deliver the Vote*

**Douglas Webber**

Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**

Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**

Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**

Commissioner of Elections,  
Pennsylvania

**Tony Sirvello**

Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Sandler**

Counsel  
Democratic National Committee

**John Ravitz**

Executive Director  
New York City Board of Elections

**Sharon Priest**

Former Secretary of State, Arkansas

**Kevin Kennedy**

Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**

Justice  
Supreme Court of Ohio

**Joseph Rich**

Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**

Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**

Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it is the most likely type of fraud to be discovered, there are stiff penalties associated with this type of fraud, and it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state’s attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix “3”.

### **Case Law and Statutes**

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “4”.

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

“Voting” is the act of casting votes to decide an issue or contest. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed to influence the act of voting. Thus, a voter who intentionally impersonates another registered voter and attempts to

vote for that person would be committing “voting fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voting fraud” does not capture a myriad of other criminal acts that are related to elections which are not related to the act of voting and/or do not involve an act of deception. For example, “voting fraud” does not capture actions or willful inaction in the voter registration process. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the act of voting nor an act of deception.

To further complicate matters, the phrases “voting fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as “voting fraud” and “voter intimidation” that would serve as the basis for a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined “election crimes,” a phrase that captures all crimes related to the voter registration and voting processes.

### **The Definition of an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or on election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

### *Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making or knowingly possessing a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a materially false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

### *Acts of Coercion*

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;

- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes,” and actions that do not rise to the level of criminal activity, such as a misdemeanor, relative felony or felony, are not “election crimes.”

## **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such

activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

### **Accepted Recommendations**

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### ***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition

of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from

areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

## **CONCLUSION**

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

Subject FOIA Request

Hello everyone,

I need each of you to respond affirmatively or negatively to the FOIA request below. **If you have no documents in your possession related to this request , please reply to me with the words "no records."** If you have records, please identify them in an e-mail reply and attach them to the e-mail. If the document is not electronic, hand deliver them to me. Also, if you believe any of these related documents should be withheld, please provide a brief memo stating the reason for your position.

I need this information and/or a response by **COB December 5, 2006**. If you cannot comply by this date, please provide notification and an estimated time when you will provide the information and the reason why you cannot comply by the original deadline. Thanks for your cooperation. See request below:

Wendy Weiser of the Brennan Center for Justice has submitted a FOIA request for the voting fraud report prepared by our consultants and the voter ID report, as well as the following information:

"In the event that the EAC denies my renewed request for the voter ID and voting fraud reports or delays another week in providing those materials, we respectfully request copies of (1) all requests for proposals and contracts relating to the voter ID and voting fraud reports; and (2) all written and electronic communications concerning the voter ID and voting fraud reports between the EAC and (a) the Eagleton Institute of Politics, (b) the Moritz College of Law, (c) Tova Wang, (d) Job Serebrov, and (e) any other individuals or entities, including but not limited to outside reviewers."

Please let me know if you would like a copy of the FOIA request.

**EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY****INTRODUCTION**

Voting fraud and voter intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and voter intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the lawful application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a working definition of election crimes and adopted research methodology on how to assess the existence and enforcement of election crimes in the United States.

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. The initial study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and the need to assure a bipartisan representation in this study. The consultants and EAC staff were charged with (1) researching the current state of information on the topic of voting fraud and voter intimidation; (2) developing a uniform definition of voting

---

<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

fraud and voter intimidation; and (3) proposing recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to National Republican  
Campaign Committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### **Reports and Studies of Voting fraud and Intimidation**

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.

- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.
- Alec Ewald, “A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law,” The Sentencing Project, November 2005.
- American Center for Voting Rights “Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election,” August 2, 2005.
- The Advancement Project, “America’s Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy” November 7, 2001
- The Brennan Center and Professor Michael McDonald “Analysis of the September 15, 2005 Voting fraud Report Submitted to the New Jersey Attorney General,” The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, “Democracy at Risk: The November 2004 Election in Ohio,” DNC Services Corporation, 2005
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."
- Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."
- Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at [http://www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html)
- People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>
- Craig Donsanto, "Prosecution of Electoral Fraud under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.

- General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," Report to Congressional Requesters, September 2005.
- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

### **Books**

- John Fund, *Stealing Elections: How Voting fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 Presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, including legal practices that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. For example, a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### **Interviews with Experts**

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Pat Rogers**  
Attorney, New Mexico

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

**Tracey Campbell**

Author, *Deliver the Vote*

**Douglas Webber**

Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**

Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**

Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**

Commissioner of Elections,  
Pennsylvania

**Tony Sirvello**

Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Sandler**

Counsel  
Democratic National Committee

**John Ravitz**

Executive Director  
New York City Board of Elections

**Sharon Priest**

Former Secretary of State, Arkansas

**Kevin Kennedy**

Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**

Justice  
Supreme Court of Ohio

**Joseph Rich**

Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**

Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**

Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it is the most likely type of fraud to be discovered, there are stiff penalties associated with this type of fraud, and it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix "3".

### **Case Law and Statutes**

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix "4".

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters on voter registration list and/or voting,
- multiple voting,
- felons voting,

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future. As a result, EAC has adopted the use of the term “election crimes” for its future study.

### Current Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud**, n. 1. A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu[ally] a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

“Voting” is the act of casting votes to decide an issue or contest. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed to influence the act of voting.

Thus, a voter who intentionally impersonates another registered voter and attempts to vote for that person would be committing “voting fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voting fraud” does not capture a myriad of other criminal acts that are related to elections which are not related to the act of voting and/or do not involve an act of deception. For example, “voting fraud” does not capture actions or willful inaction in the voter registration process. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the act of voting nor an act of deception.

To further complicate matters, the phrases “voting fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

### **New Terminology**

The goal of this study was to develop a common definition of what is generically referred to as “voting fraud” and “voter intimidation” that would serve as the basis for a future, comprehensive study of the existence of these problems. Because the current terminology has such a variety of applications and meanings, “voting fraud” and “voter intimidation” can be read to encompass almost any bad act associated with an election. Such broad terminology is not useful in setting the boundaries of a future study. A definition must set parameters for future study by applying limitations on what is included in the concepts to be studied. The current terminology applies no such limitations.

Thus, EAC has adopted the use of the phrase “election crimes” to limit the scope of its future study. This term captures all crimes related to the voter registration and voting processes and excludes civil wrongs and non-election related crimes. EAC adopted this definition because it better represents the spectrum of activities that we are able to and desire to study. In addition, we recognize that the resources, both financial and human capital, needed to study all “voting fraud” and “voter intimidation,” including criminal acts, civil actions, as well as allegations of voter suppression through the use of legal election processes are well beyond the resources available to EAC. Finally, by limiting this definition to criminal acts, EAC can focus its study on a set of more readily measurable data. Criminal behavior is readily defined through state and federal statutes and is prosecuted by government agencies. This is not the case with civil matters. Civil actions can be prosecuted by individuals and/or government entities. Furthermore, what constitutes civil action is far less defined, subject to change, and can vary from case to

case. A more complete discussion of the concept of “election crimes” follows along with a list of excluded actions.

### **The Definition of an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or on election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

#### ***Acts of Deception***

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter’s precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making or knowingly possessing a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;

- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a materially false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

***Acts of Coercion***

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;

- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

**What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Last, violations of ethical provisions and the Hatch Act are not “election crimes.” Similarly, civil or other wrongs that do not rise to the level of criminal activity (i.e., a misdemeanor, relative felony or felony) are not “election crimes.”

## **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

### ***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

### ***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys’ Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys’ Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such

practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

**Accepted Recommendations**

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator

being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

*Analyze Survey Data in Light of State Laws and Procedures*

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

**CONCLUSION**

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

Subject Draft Fraud/Intimidation Report with Executive Summary

Commissioners,

The draft attached below contains the Executive Summary as well as the suggestions made by Commissioner Hillman. Please let me know if you have any additional changes by COB Monday, Dec. 4, so that I can incorporate these and have this document ready for consideration at Thursday's meeting.

Voter Fraud & Intimidation Report - 120106.doc

In addition, I have had another request from Tova Wang for an embargoed copy of this report. I have not heard from any of you on this matter. I assume that this means that you agree with my opinion that we cannot release this document to her since she is no longer under contract with us, as it would be tantamount to releasing this document to the public. Please let me know ASAP if this is not your understanding and belief.

**EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY****EXECUTIVE SUMMARY**

The Help America Vote Act of 2002 (HAVA) requires the U.S. Election Assistance Commission (EAC) to study a host of topics, including “voting fraud” and “voter intimidation.” In 2005, EAC embarked on an initial review of the existing knowledge of voting fraud and voter intimidation. The goal of that study was to develop a working definition of “voting fraud” and “voter intimidation” and to identify research methodology to conduct a comprehensive, nationwide study of these topics.

EAC staff along with two, bipartisan consultants reviewed the existing information available about voting fraud and voter intimidation, including reading articles, books and reports; interviewing subject matter experts; reviewing media reports of fraud and intimidation; and studying reported cases of prosecutions of these types of crimes. It is clear from this review that there is a great deal of debate on the pervasiveness of fraud in elections as well as what constitute the most common acts of fraud or intimidation. There is also no apparent consensus on the meaning of the phrases “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal activities.

In order to facilitate future study of these topics, EAC developed a working definition of “election crimes.” “Election crimes” are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

From EAC’s review of existing information on the issue, it was apparent that there have been a number of studies that touched on various topics and regions of the country concerning voting fraud and intimidation, but that there had never been a comprehensive, nationwide study of these topics. EAC will conduct further research to provide a comprehensive, nationwide look at “election crimes.” Future EAC study of this topic will focus on election-related, criminal activity and will not include acts that are exclusively civil wrongs, campaign finance violations, and violations of ethical provisions. EAC will study these concepts by surveying the states’ chief election officials about complaints they received through their administrative complaint processes, election crime investigation units regarding complaints received and those referred to law enforcement, and law enforcement and prosecutorial agencies regarding complaints received and charges filed.

## INTRODUCTION

Voting fraud and voter intimidation are phrases familiar to many voting-aged Americans. However, they mean different things to different people. Voting fraud and voter intimidation are phrases used to refer to crimes, civil rights violations, and, at times, even the lawful application of state or federal laws to the voting process. Past study of these topics has been as varied as its perceived meaning. In an effort to help understand the realities of voting fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a working definition of election crimes and adopted research methodology on how to assess the existence and enforcement of election crimes in the United States.

## PURPOSE AND METHODOLOGY OF THE EAC STUDY

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the EAC to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voting fraud and voter intimidation are topics that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voting fraud and voter intimidation and devising a plan for a comprehensive study of these issues. The initial study was not intended to be a comprehensive review of existing voting fraud and voter intimidation actions, laws, or prosecutions. To conduct that type of extensive research, a basic understanding had to first be established regarding what is commonly referred to as voting fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voting fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang,<sup>1</sup> who worked with EAC staff and interns to conduct the research that forms the basis of this report. The consultants were chosen based upon their experience with the topic and the need to assure a bipartisan representation in this study. The consultants and EAC staff were charged with (1) researching the current state of information on the topic of voting fraud and voter intimidation; (2) developing a uniform definition of voting fraud and voter intimidation; and (3) proposing recommended strategies for researching this subject.

---

<sup>1</sup> Biographies for Job Serebrov and Tova Wang, the two consultants hired by EAC, are attached as Appendix "1".

EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field. EAC consultants and staff then presented their initial findings to a working group that provided feedback. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to National Republican  
Campaign Committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voting fraud and voter intimidation, EAC consultants reviewed the current body of information on voting fraud and voter intimidation. The information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voting fraud and voter intimidation.

### **Reports and Studies of Voting fraud and Intimidation**

Over the years, there have been a number of studies conducted and reports published about voting fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voting fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “2”:

#### **Articles and Reports**

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voting fraud and voter intimidation. None of the studies or reports was based on a comprehensive, nationwide study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voting fraud or voter intimidation in the United States. Most reports focused on a limited number of case studies or instances of alleged voting fraud or voter intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection program during the 2004 Presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voting fraud and voter intimidation. Some reports, such as

“Building Confidence in U.S. Elections,” suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” produced by the Milwaukee Police Department, Milwaukee County District Attorney’s Office, FBI and U.S. Attorney’s Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, including legal practices that allegedly cause vote suppression.

One point of agreement is that absentee voting and voter registration by nongovernmental groups create opportunities for fraud. For example, a number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of persons affiliated with a certain political party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### **Interviews with Experts**

In addition to reviewing prior studies and reports on voting fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voting fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**  
Executive Director,  
Leadership Conference for Civil Rights

**Wendy Weiser**  
Deputy Director,  
Democracy Program, The Brennan  
Center

**William Groth**  
Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Lori Minnite**  
Barnard College, Columbia University

**Neil Bradley**  
ACLU Voting Rights Project

**Pat Rogers**  
Attorney, New Mexico

**Nina Perales**  
Counsel,  
Mexican American Legal Defense and  
Education Fund

**Rebecca Vigil-Giron**  
Secretary of State, New Mexico

**Sarah Ball Johnson**  
Executive Director,  
State Board of Elections, Kentucky

**Stephen Ansolobhere**  
Massachusetts Institute of Technology

**Chandler Davidson**  
Rice University

**Tracey Campbell**

Author, *Deliver the Vote*

**Douglas Webber**

Assistant Attorney General, Indiana

**Heather Dawn Thompson**

Director of Government Relations,  
National Congress of American Indians

**Jason Torchinsky**

Assistant General Counsel,  
American Center for Voting Rights

**Robin DeJarnette**

Executive Director,  
American Center for Voting Rights

**Harry Van Sickle**

Commissioner of Elections,  
Pennsylvania

**Tony Sirvello**

Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Joseph Sandler**

Counsel  
Democratic National Committee

**John Ravitz**

Executive Director  
New York City Board of Elections

**Sharon Priest**

Former Secretary of State, Arkansas

**Kevin Kennedy**

Executive Director  
State Board of Elections, Wisconsin

**Evelyn Stratton**

Justice  
Supreme Court of Ohio

**Joseph Rich**

Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Craig Donsanto**

Director, Public Integrity Section  
U.S. Department of Justice

**John Tanner**

Chief  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by nongovernmental groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud because it is the most likely type of fraud to be discovered, there are stiff penalties associated with this type of fraud, and it is an inefficient method of influencing an election.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws,

voter identification laws, polling place locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voting fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state's attorney general. Regardless, voting fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and can only prosecute election crimes perpetrated in elections with a federal candidate on the ballot or perpetrated by a public official under the color of law. Those interviewed differed on the effectiveness of the current system of enforcement. Some allege that prosecutions are not sufficiently aggressive. Others feel that the current laws are sufficient for prosecuting fraud and intimidation.

A summary of the each of the interviews conducted is attached as Appendix "3".

### **Case Law and Statutes**

Consultants reviewed more than 40,000 cases that were identified using a series of search terms related to voting fraud and voter intimidation. The majority of these cases came from courts of appeal. This is not surprising, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix "4".

### **Media Reports**

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voting fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters on voter registration list and/or voting,
- multiple voting,
- felons voting,

- non-citizens voting,
- vote buying,
- deceptive practices, and
- fraud by election officials.

While these reports showed that there were a large number of allegations of voting fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voting fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charges and prosecutions of voting fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voting fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what constitutes “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal activities. To arrive at a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future. As a result, EAC has adopted the use of the term “election crimes” for its future study.

### Current Terminology

The phrase “voting fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud, n. 1.** A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu[ally] a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

“Voting” is the act of casting votes to decide an issue or contest. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voting fraud,” it means fraudulent or deceptive acts committed to influence the act of voting.

Thus, a voter who intentionally impersonates another registered voter and attempts to vote for that person would be committing “voting fraud.” Similarly, a person who knowingly provides false information to a voter about the location of the voter’s polling place commits fraud on the voter.

The phrase “voting fraud” does not capture a myriad of other criminal acts that are related to elections which are not related to the act of voting and/or do not involve an act of deception. For example, “voting fraud” does not capture actions or willful inaction in the voter registration process. When an election official willfully and knowingly refuses to register to vote a legally eligible person it is a crime. This is a crime that involves neither the act of voting nor an act of deception.

To further complicate matters, the phrases “voting fraud” and “voter intimidation” are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the Civil Rights Division of the Department of Justice may become involved.

### **New Terminology**

The goal of this study was to develop a common definition of what is generically referred to as “voting fraud” and “voter intimidation” that would serve as the basis for a future, comprehensive study of the existence of these problems. Because the current terminology has such a variety of applications and meanings, “voting fraud” and “voter intimidation” can be read to encompass almost any bad act associated with an election. Such broad terminology is not useful in setting the boundaries of a future study. A definition must set parameters for future study by applying limitations on what is included in the concepts to be studied. The current terminology applies no such limitations.

Thus, EAC has adopted the use of the phrase “election crimes” to limit the scope of its future study. This term captures all crimes related to the voter registration and voting processes and excludes civil wrongs and non-election related crimes. EAC adopted this definition because it better represents the spectrum of activities that we are able to and desire to study. In addition, we recognize that the resources, both financial and human capital, needed to study all “voting fraud” and “voter intimidation,” including criminal acts, civil actions, as well as allegations of voter suppression through the use of legal election processes are well beyond the resources available to EAC. Finally, by limiting this definition to criminal acts, EAC can focus its study on a set of more readily measurable data. Criminal behavior is readily defined through state and federal statutes and is prosecuted by government agencies. This is not the case with civil matters. Civil actions can be prosecuted by individuals and/or government entities. Furthermore, what constitutes civil action is far less defined, subject to change, and can vary from case to

case. A more complete discussion of the concept of “election crimes” follows along with a list of excluded actions:

### **The Definition of an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Election crimes can be committed by voters, candidates, election officials, or any other members of the public who desire to criminally impact the result of an election. However, crimes that are based upon intentional or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or on election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

#### ***Acts of Deception***

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter’s precinct or polling place, the date and time of the election or a candidate;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance to possess a ballot outside of the polling location;
- Making or knowingly possessing a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate in one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once during the same election;

- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a materially false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

***Acts of Coercion***

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of value to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;
- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or to delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of value in exchange for registering to vote.

***Acts of Damage or Destruction***

- Destroying completed voter registration applications;
- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments;
- Removing, tearing down, or defacing election materials, instructions or ballots;

- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;
- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction;
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

**What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Last, violations of ethical provisions and the Hatch Act are not “election crimes.” Similarly, civil or other wrongs that do not rise to the level of criminal activity (i.e., a misdemeanor, relative felony or felony) are not “election crimes.”

## **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed as a part of this study provided the following recommendations.

### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation. Similarly, some of the articles contained information about investigations into such activities or even charges brought. Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

### ***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

### ***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a toll-free voter hotline that voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in more than 200,000 calls received and more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 56,000 complaints may provide insight into the problems voters may have experienced, especially issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety of ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voting fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys’ Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys’ Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voting fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. The survey sample should be large in order to be able to get the necessary subsets, and it must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation, and concerns regarding how the observers themselves may inadvertently or deliberately influence the occurrence of election crimes.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers will use that risk analysis to rank the types of fraud based on the “ease of commission” and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased or if felons are noted as having voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such

practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

**Accepted Recommendations**

There has never been a comprehensive, national study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine the volume and type of election crimes being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes and the laws and procedures used to identify and prosecute them, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator

being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

*Analyze Survey Data in Light of State Laws and Procedures*

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

**CONCLUSION**

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

Subject Fraud Report Executive Summary

Attached are my suggested edits to the Executive Summary. (I am still reviewing the report and may comment on other sections.)

EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY.doc

025975

EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION STUDY

**EXECUTIVE SUMMARY**

The Help America Vote Act of 2002 (HAVA) requires the U.S. Election Assistance Commission (EAC) to study a host of topics, including “voting fraud” and “voter intimidation.” In 2005, EAC embarked on an initial review of the existing knowledge of voting fraud and voter intimidation. The goal of that study was to develop a working definition of “voting fraud” and “voter intimidation” and to identify research methodology to conduct a comprehensive, nationwide study of these topics.

EAC staff along with two, bipartisan consultants reviewed the existing information available about voting fraud and voter intimidation, including reading articles, books and reports; interviewing subject matter experts; reviewing media reports of fraud and intimidation; and studying reported cases of prosecutions of these types of crimes. It is clear from this review that there is a great deal of debate on the pervasiveness of fraud in elections as well as what constitute the most common acts of fraud or intimidation. There is also no apparent consensus on the meaning of the phrases “voting fraud” and “voter intimidation.” Some think of voting fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal activities.

In order to facilitate future study of these topics, EAC developed a working definition of “election crimes.” “Election crimes” are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process; eligible persons to be excluded from the election process; ineligible votes to be cast in an election; eligible votes not to be cast or counted; or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

From EAC’s review of existing information on the issue, it was apparent that there have been a number of studies that touched on various topics and regions of the country concerning voting fraud and intimidation, but that there had never been a comprehensive, nationwide study of these topics. EAC will conduct further research to provide a comprehensive, nationwide look at “election crimes.” Future EAC study of this topic will focus on election-related, criminal activity and will not include acts that are exclusively civil wrongs, campaign finance violations, and violations of ethical provisions. EAC will study these concepts by surveying the states’ chief election officials about complaints they received, election crime investigation units regarding complaints received and those referred to law enforcement, and law enforcement and prosecutorial agencies regarding complaints received, charges filed, and final disposition of each complaint.

**Comment [GH1]:** Ethical provisions of what?

**Comment [GH2]:** We should learn about all complaints received by election officials, not just those received through the admin complaint process.

**Deleted:** through their administrative complaint processes

**Comment [GH3]:** Our study should also include final disposition of each case where charges were filed.

**Deleted:** and

Subject Edits to the Fraud Report

I offer edits to two sections of the report, on pages 14 and 19. Please see the attached one pager. I did a copy and paste of the two sections rather than resending back to you the entire report.

What is not an Election Crime for Purposes of this Study.doc

025977

**What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of "election crimes." All criminal or civil violations related to campaign finance contribution limitations, prohibitions, and reporting either at the state or federal level are not "election crimes" for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not "election crimes," even when those offenses occur in a polling place, voter registration office, or a candidate's office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate's office is not an election crime. Last, violations of ethical provisions and the Hatch Act are not "election crimes." Similarly, civil or other wrongs that do not rise to the level of criminal activity (i.e., a misdemeanor, relative felony or felony) are not "election crimes."

.....

Comment [GH1]: Ethical provisions of what?

***Survey Chief Election Officers Regarding Administrative Complaints***

Likely sources of complaints concerning election crimes are the administrative complaint processes that states were required to establish to comply with Section 402 of HAVA. These complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints alleging violations of HAVA Title III provisions under these procedures with the state's chief election official. Those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims. Some states have expanded this process to include complaints of other violations, such as election crimes.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. The data collected will also include complaints that have been filed outside of the administrative complaint procedures. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses will be collected.

Comment [GH2]: We can be pretty certain that legitimate complaints will be filed outside of the Admin Complaint Procedure.

Subject Research Grants

Dear Commissioners:

On August 18 I sent you an email raising serious concerns over the awarding of a contract to the Moritz College of Law given its clearly demonstrated pre-existing opinions about provisional balloting and voter identification. Unfortunately, nothing was apparently done about this situation.

I have just learned that a similar situation has occurred. I understand that another research grant has been awarded to Tova Wang for research into "voter fraud and voter intimidation." Ms. Wang has an even more pronounced partisan and one-sided view of these issues than was present in the situation involving Moritz College. She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few examples illustrate this:

"It is truly shocking how, given all the problems in the voting system and

continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor of the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

There are numerous more examples of her partisan opinions and attacks and demonstrably false claims against Republicans and election officials in general, such as her baseless charge in another article that "partisan election officials and party leaders usurped the process and manipulated the new federal voting law in ways that disenfranchised voters." Election 2004: A Report Card, 1/1/2005. The idea that she will write an objective report on issues that she has already expressed such strong opinions on ("there is no evidence that such election fraud is a serious problem") is hard to accept. I find it surprising that the EAC would award her a research grant or expect that election officials around the country would accept as valid a report written by an individual who asserts that "[a]t every step of the way, election officials in key states threw up unnecessary barriers to voting." Id. This gratuitous remark is an insult to the many hard-working election officials that we all know through our work who did everything they could during the last election to improve the election process and in large part succeeded.

Whatever procedures the EAC has set up to screen individuals and entities applying for research grants is obviously not working. I have no doubt that I could today, based on reading Ms. Wang's prior opinions, predict exactly what her report will conclude on the issues of voter fraud and voter intimidation. This situation needs to be corrected so that research is not being conducted by partisan individuals with preset opinions and views on issues. As with my prior email, I strongly recommend that the EAC reconsider the awarding of this contract.

Subject Re: Research Grants

Hans,

I wish you would have shown us the decency to have spoken to someone at the EAC before you sent this e-mail. Had you done so, you might have discovered that Ms. Wang was paired with Job Serebrov, a conservative attorney who, like you, has served on a local election board (Washington, Co, AK -Fayetteville). He has also worked on voting issues and election law in his practice, including voter fraud. He was counsel to the Arkansas GOP on ballot integrity issues and was the ballot protection specialist for Mike Hucabee in his campaign for Lt. Governor. In addition, Job formed and ran "Arkansans for Fair Elections", a non-partisan group that looked to investigate and prevent voter fraud issues. He headed that group for 8 years. Job served the Republican Party of Arkansas as the Chairman of the Committee for the Revision of the State Constitution.

Thor Hearne called me last week to indicate that Job had called him to be on the working group that Job and Ms. Wang are putting together to look at the voter fraud/voter intimidation issues.

Job was recommended to the EAC for this work by Julie Thompson. His references included two US 8th Circuit judges appointed by GOP presidents: Morris Arnold and Lavenski Smith.

You may recall that the Advisory Board made it clear to the EAC that they thought the Voter Fraud/Voter Intimidation issues should be studied together. That's why Ms. Wang has been paired with Mr. Serebrov to do this study.

Julie tells me that she had a wide-ranging discussion with you last week but you never brought this issue up. It's too bad, as it may have prevented you from sending an e-mail to so many people that contains only half the story.

In addition, Job formed and ran "Arkansans for Fair Elections", a non-partisan group that looked to investigate and prevent voter fraud issues. He headed that group for 8 years. Job served the Republican Party of Arkansas as the Chairman of the Committee for the Revision of the State Constitution.

Thor Hearne called me last week to indicate that Job had called him to be on the working group that Job and Ms. Wang are putting together to look at the voter fraud/voter intimidation issues.

Job was recommended to the EAC for this work by Julie Thompson. His references included two US 8th Circuit judges appointed by GOP presidents: Morris Arnold and Lavenski Smith.

You may recall that the Advisory Board made it clear to the EAC that they thought the Voter Fraud/Voter Intimidation issues should be studied together. That's why Ms. Wang has been paired with Mr. Serebrov to do this study.

025989

Julie tells me that she had a wide-ranging discussion with you last week but you never brought this issue up. It's too bad, as it may have prevented you from sending an e-mail to so many people that contains only half the story.

Subject

Research Grants

Dear Commissioners:

On August 18 I sent you an email raising serious concerns over the awarding of a contract to the Moritz College of Law given its clearly demonstrated pre-existing opinions about provisional balloting and voter identification. Unfortunately, nothing was apparently done about this situation.

I have just learned that a similar situation has occurred. I understand that another research grant has been awarded to Tova Wang for research into "voter fraud and voter intimidation." Ms. Wang has an even more pronounced partisan and one-sided view of these issues than was present in the situation involving Moritz College. She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few examples illustrate this:

025990

"It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor of the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

There are numerous more examples of her partisan opinions and attacks and demonstrably false claims against Republicans and election officials in general, such as her baseless charge in another article that "partisan election officials and party leaders usurped the process and manipulated the new federal voting law in ways that disenfranchised voters." Election 2004: A Report Card, 1/1/2005. The idea that she will write an objective report on issues that she has already expressed such strong opinions on ("there is no evidence that such election fraud is a serious problem") is hard to accept. I find it surprising that the EAC would award her a research grant or expect that election officials around the country would accept as valid a report written by an individual who asserts that "[a]t every step of the way, election officials in key states threw up unnecessary barriers to voting." Id. This gratuitous remark is an insult to the many hard-working election officials that we all know through our work who did everything they could during the last election to improve the election process and in large part succeeded.

Whatever procedures the EAC has set up to screen individuals and entities applying for research grants is obviously not working. I have no doubt that I could today, based on reading Ms. Wang's prior opinions, predict exactly what her report will conclude on the issues of voter fraud and voter intimidation. This situation needs to be corrected so that research is not being conducted by partisan individuals with preset opinions and views on issues. As with my prior email, I strongly recommend that the EAC reconsider the awarding of this contract.

**Subject:** NEED APPROVAL: Brennen Cen. letter

Commissioners,

I have not received input from everyone regarding the attached letter. It is a response to Wendy Weiser of the Brennan Center, who requested the staff voter fraud status report and the provisional voting draft report, both of which were presented to the Standards Bd. and the Bd. of Adv. at the May meeting. She also requested the draft voter ID report, which was not released at the May meeting. If possible, I'd like to get your input by the end of the day. The letter would go out under Tom's signature. Thank you.

**MEMORANDUM FOR THE RECORD**

**Date: November 1, 2005**

**From: Karen Lynn Dyson**

**Re: Communication of Award of Contracts EAC 05-66 and EAC 05-67, Personal Services Contracts with Tova Wang and Job Serebrov**

In late August and early September 2005 a series of emails and phone calls were exchanged with Job Serebrov and Tova Wang in order to communicate the details of personal services contracts that were awarded to them. The substance of these e-mails and phone calls related to Mr. Serebrov and Ms. Wang's contracts, described the various services they would perform for EAC related to researching and possibly developing a future project that would study and analyze voting fraud and intimidation. These emails included transmitting a statement of work that would govern their work as well as emails and phone calls to establish a kick-off meeting that would provide information to them so that Mr. Serebrov and Ms. Wang could begin work.

Since that time, Ms. Wang and Mr. Serebrov have engaged in substantial work on this project. This has included developing, outlining and providing to EAC staff, a work plan for the project, meeting and conversing with one another to discuss the focus and work of the project, interviewing prospective persons who would serve on the project's review panel and presenting this initial list of persons to the EAC to be considered as members of this project review panel who would assess and review the project's work.

**EAC CONTRACT #05-66 Consulting Services to Assist EAC  
in the Development of a Voting Fraud and Voter Intimidation Project**

**Background**

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b) (6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this consultant to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. If so, the consultant would also be tasked to define the scope of the project and prepare a Statement of Work for the EAC to use for a subsequent competitive procurement. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two consultants, who will work jointly to perform the work described below.

**Nature of the Appointment**

The EAC enters into this contract pursuant to its authority to contract for consultants under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). As a result of this unique relationship, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information, travel and conduct. All research, information, documents and any other intellectual property, (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express permission of the EAC.

**Supervision and Management.**

The EAC Project Manager for this effort is Margaret Sims, EAC Research Specialist. Ms. Sims will provide taskings, and supervise, review and approve all work and performance.

### **Period of Appointment, Compensation and Travel.**

The period of appointment under this contract is estimated at six months. The appointment shall constitute intermittent appointment (without a regularly scheduled tour of duty) per 5 C.F.R. §340.401(b). The consultant shall not incur overtime. The consultants shall not receive automatic adjustments of pay based upon 5 U.S.C. 5303. The consultants are not eligible for sick and annual leave, nor compensation for work performed on federal holidays. The Consultant is expected to work 450 hours during the estimated six month appointment period. These hours must be distributed evenly over the period so that the Consultant is working approximately, but no more than 20 hours per week. The consultant shall be paid at a rate of \$111 per hour. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. The project at issue is sought to be completed within the sixth month period. The period of appointment shall continue until the project, outlined below, is completed.

Consultant's duty station shall be his/her home or place of business. The consultant has access to and shall supply common office equipment to include telecommunications, internet, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word and Excel). Other resources will be provided by the EAC as needed and at its discretion.

The Consultant is required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC per Federal Travel Regulations and EAC policy. The Consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel.

### **Areas of Responsibility**

1. Develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections.
2. Using the description developed above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.
3. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of the consultant's research (discussed in 1 and 2, above) as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.

4. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future research resulting from this effort.
5. Should the EAC decide to pursue one or more of the recommendations made in the report noted above, the consultant will be responsible for defining the appropriate project scope(s) and preparing Statement(s) of Work sufficient for use in a competitive procurement.

**Compensation Procedures**

Compensation shall be made for work done by submitting invoices. Invoices shall be submitted on a monthly basis. These invoices shall state the number of labor hours that have been expended. Invoices shall be delivered to Ms. Margaret Sims for review and Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005. Compensation for travel shall be submitted by travel voucher consistent with federal travel regulation and EAC requirements.

**Termination**

This consultant contract can be terminated without cause in advance of the current end date by two weeks' notice in writing by either of the parties.

**Estimated Project Timetable.**

Deliverable	Due Date
Project work plan	10 days after contract award
Progress reports	monthly
Description of voting fraud and voter intimidation	October 2005
Summary of background research and associated source documentation	January 2006
Convene working group	February 2006
Summary report describing findings and recommendations for future EAC research	March 2006
Statement(s) of Work for future research project(s)	TBD

**U.S. ELECTION ASSISTANCE COMMISSION**  
1225 New York Ave. NW - Suite 1100  
Washington, DC 20005

**MEMORANDUM FOR THE RECORD**

**Date:**

**From: Gracia Hillman, Chair**  
**On Behalf of the Commission**

**Re: Ratification of Personal Services Contract with Tova Wang (EAC Contract No. 05-66; ACT No. E4019697)**

The purpose of this memorandum is to document the ratification of the above referenced agreement. Ratification is the process proscribed by the Federal Acquisition Regulation (FAR) to approve, by an official with the authority to do so, an agreement that was not binding on an agency because the Government representative who made it lacked authority to enter into the agreement on behalf of the government (unauthorized commitment). (FAR 1.602-3(a)).

**Background.** Information was brought to the attention of the Commission late in the week of October 10. This information suggested that communication of award for the above referenced agreement may not have been made by an individual with authority to bind the government. As such, the agreement may be viewed as an unauthorized commitment. The above referenced personal services agreement was to assist EAC in researching and developing a Fraud and Voter Intimidation Project. This was needed by the Commission in order to fulfill its research responsibilities under Sections 241(b)(6) and (7) of HAVA.

The Commission has considered Ms. Wang's qualifications and found her to be experienced in matters involving voter fraud and intimidation. (Attachment "1", Resume) In addition, the Commission has agreed to a six-month period of performance, from September 2005 through February 2006. (Attachment "2", Statement of Work). An award was made by full vote of the EAC Commissioners on September 19, 2005 (Attachment "3", Tally Vote Certification and Memorandum). The award was announced by the Commission on the record at a public meeting on September 27, 2005.

Prior to the time that the formal award was made by vote of the Commission, award was communicated by an EAC employee through a series of telephone calls and emails in early September 2005. (Attachment "4", Statement from Karen Lynn Dyson). Work began on the contract following award notification. This was evidenced by a kickoff meeting between EAC employees and the contractor which took place on September 7, 2005. Also, the contractor provided services in meeting with the other contractor engaged to provide similar assistance, developing a work plan for the voter fraud and intimidation project, interviewing and considering members to serve as a review panel for the work of the consultants on this project, and

026001

developing a preliminary list of panelists. (Attachment "4", Statement of Karen Lynn Dyson). Ultimately, ratification of this agreement will result in the Commission receiving all of the deliverables identified in the contract.

Funding was available in fiscal year 2005 (FY 05) for the services at issue. And, it appears based upon a review of the law that funding this contract from FY05 funds would be proper. These FY 05 funds remain available. The funds were in fact obligated to the agreement, in the amount of \$50,000.00 on September 21, 2005. This was done under the belief that a legal obligation had been created. The agreement approved for award by the Commissioners had a total estimated cost of \$50,000.00.

**Requirements.** FAR 1.602-3 (b) and (c) set federal ratification policy and requirements. These sections note:

- (1) Agencies should take action to prevent the need for ratification actions. Ratification procedures should not be used in a manner that encourages unauthorized commitments being made by government personnel.  
(FAR 1.602-3(b)(1)).
- (2) The head of an agency's contracting activity, unless the authority is designated higher, may ratify an unauthorized agreement. This authority may be delegated with limitations.  
(FAR 1.602-3(b)(2) & (3)).
- (3) Agencies should process unauthorized commitments consistent with FAR 1.602-3. Such actions should not be forwarded to the General Accounting Office for resolution unless they are subject to a Contracts Dispute Act Claim or are not otherwise ratifiable under the subsection. (FAR 1.602-3(b)(4)-(5) & (d)).
- (4) Consistent with FAR 1.602-3(c)(1)-(7), ratification authority may be exercised only when:
  - a. *Supplies or services have been provided to and accepted by the Government, or the Government otherwise has obtained or will obtain a benefit resulting from performance of the unauthorized commitment;*
  - b. *The ratifying official has the authority to enter into a contractual commitment;*
  - c. *The resulting contract would otherwise have been proper if made by an appropriate contracting officer;*
  - d. *The contracting officer reviewing the unauthorized commitment determines the price to be fair and reasonable;*
  - e. *The contracting officer recommends payment and legal counsel concurs in the recommendation, unless agency procedures expressly do not require such concurrence; and*
  - f. *Funds are available and were available at the time the unauthorized commitment was made.*

**Analysis.** The commitment at issue began as a routine contracting effort. EAC, unlike many government agencies, has the express statutory authorization to enter into personal services contracts under 5 U.S.C. Section 3109. That authority is provided by the Help America Vote Act

Section 204(b). Section 3109 and the regulations promulgated by the Office of Personnel Management concerning personal services contracts allows these contracts only where a specific statute authorizes it and where it meets the terms as specified in the statute and regulation for type of appointment and rate of pay. The agreement with Ms. Wang appoints her in an intermittent capacity and establishes a rate of \$111 per hour, a rate which falls within the limits prescribed by 5 CFR Part 304.105.

In reviewing the fiscal law, it appears that the type of the contract is not dispositive as to whether the services provided by that contract are severable and must be funded in the fiscal year in which the services are rendered. While personal services contracts are generally considered severable (and payable in the fiscal year the work is performed), there must be an analysis of the nature of the work performed under the contract. The GAO Red Book, Vol. I sites one case which notes that legal administrative services were considered severable where there was no final report or final product produced from the contractual agreement. Another, case determined that substantive legal services procured from attorney's was non-severable. Thus, appears to be a distinction made between perennial, clerical work and substantive, project-based work. In the instant case, the consultant is providing project associated services that will result in a final report and final product in the form of a report and an RFP for a future study of voter fraud and voter intimidation.

Issues regarding the agreement's unauthorized nature arose near the end of the award process. While the contract authority (Commissioners) properly took action to make an award determination, they relied on EAC employees to communicate this fact to the contractor. In doing so, the Commission failed to realize that it is the communication of acceptance and award by the appropriate person that serves to obligate the government. EAC personnel seem to have viewed the Commissioners' concurrence as granting them the authority to communicate award in a manner that would obligate the agency. The bottom line is that the EAC employee believed her efforts to notify the contractor of award obligated the EAC by accepting the contractor's proposal. Based upon this, the contractor began performance on the agreement and the EAC has and will receive benefit.

Looking specifically at the requirements for ratification noted in FAR 1.602-3(c) and the facts outlined, above, the Commission finds:

- a. Services Accepted or Benefit Received. Services under this agreement have been accepted by the government. Moreover the government has and will obtain needed benefit from the services provided and upon completion of the unauthorized agreement.
- b. Contract Authority. The undersigned, as the chair of the EAC, has the authority to contract on behalf of the agency. Furthermore, the Chair's signature represents the decision of the full Commission to take this ratification action. This is documented by the attached Tally Vote. (Attachment "5", Tally Vote). EAC's four Commissioners have the legal authority to contract and otherwise bind the agency per the specific authority of the Help America Vote Act (42 U.S.C. §15325(e)) and, generally, as agency heads (see FAR 1.601).

- c. Contract Otherwise Proper. This agreement, having previously been initiated, processed, and awarded by full vote of the Commission was proper, but for the unauthorized communication of award made by an individual without authority to bind the agency. As stated previously, EAC is specifically authorized by statute to enter into personal services contracts. HAVA Section 204(b). This agreement falls within the statute and regulations governing personal services contracts. See specifically 5 U.S.C. 3109 and 5 CFR Part 304.
- d. Price Fair and Reasonable. The rate at which this contractor is providing services is within the amount allowable under 5 CFR Part 304.105. In addition, the contractor works regularly as Senior Program Officer and Democracy Fellow for The Century Foundation. The rate provided is commensurate with her regular rate for consulting services.
- e. Payment of Funds Recommended. After consultation with the General Counsel, the Commission recommends payment of funds.
- f. Funds Available. Consistent with the facts noted above, the Commission finds that funds are available and were available at the time of the unauthorized commitment.

**Prevention.** Unfortunately, there are a number of agreements which have suffered from the same deficiencies as discussed above. FAR 1.602(b)(1) makes it clear that agencies should take steps to prevent the need for ratifications and avoid using the process in a way that would encourage unauthorized commitments. The EAC must determine why these unauthorized commitments occurred and how to prevent them in the future. An initial review of EAC's contract process showed deficiencies in (1) the contracting procedure, (2) training of employees on contracting process and procedure, (3) coordination with the General Counsel's office, and (4) communication amongst contracting officers and staff that resulted in an unauthorized commitment. No new contracting should occur until issues surrounding the process have been resolved. EAC is in the process of negotiating with another government agency to handle its procurement process, thereby relieving the EAC staff of the responsibility of processing these procurements.

Gracia Hillman  
Chair  
On Behalf of the Commission

I Concur.

Juliet Thompson  
General Counsel

026004

## **Statement of Work**

### **Assistance with developing an Election Assistance Commission (EAC) Voting Fraud and Voter Intimidation Project**

#### **Background**

Section 241 of HAVA enumerates a number of periodic studies of election administration issues in which the U.S. Election Assistance Commission may elect to engage. In general "On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b)"

Sections 241(b) (6) and (7) list the following election administration issues:

(6) Nationwide statistics and methods of identifying, deterring and investigating voting fraud in election for Federal offices.

(7) Identifying, deterring and investigating methods of voter intimidation.

Building on this HAVA reference to studies of voting fraud and voter intimidation, the EAC Board of Advisors has indicated that further study of these issues to determine how the EAC might respond to them is a high priority.

The U.S. Election Assistance Commission (EAC) seeks to identify one or more senior-level project consultants to develop various project activities and studies related to voting fraud and voter intimidation affecting Federal elections.

The consultant(s) must of have knowledge of voting fraud and voter intimidation along with an understanding of the complexities, nuances and challenges which surround the topics. The EAC is particularly interested in candidates with experience in elections, with public policy and with the law. The consultant (s) must be able to demonstrate an ability to approach the issues of voting fraud and voter intimidation in a balanced, nonpartisan fashion.

## Duties

The consultant(s), whose contract would run for the period September-February, 2005, would be responsible for the following.

1. Identifying what constitutes voting fraud and voter intimidation affecting Federal elections.
2. Performing background research, including Federal and state-by state administrative and case law review related to voting fraud and voter intimidation, and a review of current voting fraud and voter intimidation activities taking place with key government agencies, civic and advocacy organizations. A written summary of this research, and a copy of any source documentation used, will be presented to EAC.
3. Identifying, in consultation with EAC, and convening a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The working group's goals and objectives and meeting agendas will be vetted with key EAC staff.
4. Developing a project scope of work and a project work plan related to voting fraud and voter intimidation. The consultants (s) will develop a draft scope of work and project work plan for EAC's consideration based on research into the topics, the deliberations and findings of the working group, and the consultants' understanding of EAC's mission and agency objectives.
5. Authoring a report summarizing the key findings of this preliminary study of voting fraud and voter intimidation. The report will also include suggestions for specific activities that EAC may undertake to address these topics.

From this initial research and exploration of these topics the consultant (s) may be retained to help oversee follow-on research projects and contracts EAC may pursue on the topics of voting fraud and voter intimidation.

## Special Considerations

Work for Hire. The services performed under the terms of this agreement are considered "work for hire," and any intellectual property or deliverables, including but not limited to, research, policies, procedures, manuals, and other works submitted; or which are specified to be delivered; or which are developed or produced and paid for by EAC, shall be owned exclusively by EAC, including copyright. EAC or its assignees have the exclusive right to reproduce all work products from this agreement without further payment to the Contractor.

### Terms and Conditions

The period of performance for this consulting contract is six months, with a fixed price ceiling of \$50,000 for labor. The consultant (s) is expected to work at least 450 hours in performing this work. The EAC estimates that the most efficient distribution of these hours would be for the consultant to work 20 hours per week. The period of performance and level of effort can be revised in writing by mutual agreement of the EAC and the consultant, as required.

The Consultant is required to travel to the EAC Washington, D.C. offices on a periodic, as needed basis, throughout the duration of the contract. The Consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, other approved incidental expenses, and per diem costs while working on-site at the EAC offices. A fixed price ceiling of \$5,000 has been allocated for reimbursement for travel and other allowable expenses.

### Invoicing

Invoices may be submitted monthly in equal payments for labor. Expenses claimed for reimbursement shall be itemized with appropriate receipts provided. Invoices shall be delivered to Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005.

### Deliverables and Timetable

Deliverable	Due Date
Draft project work plan (Phase I)	ASAP after award
Progress Reports to Contracting Officer's Representative (COR)	Monthly
A written summary of background research on voting fraud and voter intimidation.	TBD
Identifying and convening a working group knowledgeable about voting fraud and voter intimidation.	TBD
Developing a project scope of work and project work plan (Phase II)	TBD
Summary report describing key findings of this preliminary study of voting fraud and voter intimidation	TBD

**TALLY VOTE MEMORANDUM**

TO: EAC Commissioners Hillman, DeGregorio, Martinez, Davidson  
FROM:  Thomas Wilkey, EAC Executive Director  
DATE: September 16, 2005  
RE: Consulting assistance with developing an Election Assistance Commission (EAC) Voting Fraud and Voter Intimidation Project

**Background**

"On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b)" Sections 241(b) (6) and (7) list the following election administration issues:

- (6) Nationwide statistics and methods of identifying, deterring and investigating voting fraud in election for Federal offices.
- (7) Identifying, deterring and investigating methods of voter intimidation.

Building on this HAVA reference to studies of voting fraud and voter intimidation, the EAC Board of Advisors has indicated that further study of these issues, to determine how the EAC might respond to them, is a high priority.

The U.S. Election Assistance Commission (EAC) has identified two senior-level project consultants to develop various project activities and studies related to voting fraud and voter intimidation affecting Federal elections. The consultants, whose contracts would run for the period September-February, 2005, would be responsible for helping the EAC identify what constitutes voting fraud and voter intimidation affecting Federal elections.

To accomplish this the consultants will: perform background research, including Federal and state-by state administrative and case law review related to voting fraud and voter intimidation, along with a review of current voting fraud and voter intimidation activities taking place with key government agencies, civic and advocacy organizations; in consultation with EAC, identify and convene, a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation; develop an EAC project scope of work and a project work plan related to voting fraud and voter intimidation and; author a report summarizing the key findings of this preliminary study of voting fraud and voter intimidation.

**Recommendation**

Attached is the Statement of Work for the voting fraud and voter intimidation project consultants. The consultant contract fees total \$110,000 (\$55,000 per person). An additional \$10,000 is allotted for the voting fraud and intimidation project working group. The total project amount is \$120,000.

FROM JULIET THOMPSON, GENERAL COUNSEL

026015

**U.S. ELECTION ASSISTANCE COMMISSION**  
**1225 New York Ave. NW - Suite 1100**  
**Washington, DC 20005**

MEMORANDUM

**TO:** Commissioners Hillman, DeGregorio, Martinez and Davidson

**FROM:** Juliet Thompson

**DATE:** November 1, 2005

**RE:** **Personal Services Contract with Tova Wang (EAC Contract No. 05-66; ACT No. E4019697)**

**BACKGROUND:**

On or about October 7, 2005, the Chair of the EAC requested that the Office of General Counsel review 19 contracts for procurement of goods and services. As a part of the review, we examined contract file documents and spoke with EAC staff and representatives involved in each stage of the contracting process.

In reviewing the contract with Ms. Tova Wang to provide services in researching and developing a voter fraud and intimidation project for EAC, we determined that the agreement had been entered through a legally permissible process, that a vote was taken by the Commission to award this agreement, that the award was communicated by an EAC staff member to Ms. Wang, work has begun under the agreement, and that EAC has and will receive a benefit from the provision of these services by Ms. Wang. The review revealed that the commitment was made by a person who was not the contracting officer of EAC and who was not authorized to make such commitment. Therefore, this agreement was made by a person who did not have the authority to bind the Commission. Because the contract was otherwise proper and EAC has and will continue to receive benefits from the completion of this contract, the agreement and facts surrounding it fit within the framework for ratification set forth in the Federal Acquisition Regulation (FAR).

Ratification is the process proscribed by the FAR to approve, by an official with the authority to do so, an agreement that was not binding on an agency because the Government representative who made it lacked authority to enter into the agreement on behalf of the government (unauthorized commitment). (FAR 1.602-3(a)).

## REQUIREMENTS FOR RATIFICATION:

FAR 1.602-3 (b) and (c) set federal ratification policy and requirements. These sections note:

- (1) Agencies should take action to prevent the need for ratification actions. Ratification procedures should not be used in a manner that encourages unauthorized commitments being made by government personnel. (FAR 1.602-3(b)(1)).
- (2) The head of an agency's contracting activity, unless the authority is designated higher, may ratify an unauthorized agreement. This authority may be delegated with limitations. (FAR 1.602-3(b)(2) & (3)).
- (3) Agencies should process unauthorized commitments consistent with FAR 1.602-3. Such actions should not be forwarded to the General Accounting Office for resolution unless they are subject to a Contracts Dispute Act Claim or are not otherwise ratifiable under the subsection. (FAR 1.602-3(b)(4)-(5) & (d)).
- (4) Consistent with FAR 1.602-3(c)(1)-(7), ratification authority may be exercised only when:
  - a. *Supplies or services have been provided to and accepted by the Government, or the Government otherwise has obtained or will obtain a benefit resulting from performance of the unauthorized commitment;*
  - b. *The ratifying official has the authority to enter into a contractual commitment;*
  - c. *The resulting contract would otherwise have been proper if made by an appropriate contracting officer;*
  - d. *The contracting officer reviewing the unauthorized commitment determines the price to be fair and reasonable;*
  - e. *The contracting officer recommends payment and legal counsel concurs in the recommendation, unless agency procedures expressly do not require such concurrence; and*
  - f. *Funds are available and were available at the time the unauthorized commitment was made.*

## ANALYSIS:

The commitment at issue began as a routine contracting effort. EAC, unlike many government agencies, has the express statutory authorization to enter into personal services contracts under 5 U.S.C. Section 3109. That authority is provided by the Help America Vote Act Section 204(b). Section 3109 and Office of Personnel Management regulations implementing the statute allow personal services contracts only when they meet the terms specified in the statute and regulation for type of appointment and rate of pay. The agreement with Mr. Serebrov properly appoints him in an intermittent capacity and establishes a rate of \$111 per hour, a rate which falls within the limits prescribed by 5 CFR Part 304.105.

In reviewing the fiscal law, it appears that the type of the contract is not dispositive as to whether the services provided by that contract are severable and must be funded in the fiscal year in

which the services are rendered. While personal services contracts are generally considered severable (and payable in the fiscal year the work is performed), there must be an analysis of the nature of the work performed under the contract. The GAO Red Book, Vol. I sites one case which notes that legal administrative services were considered severable where there was no final report or final product produced from the contractual agreement. Another, case determined that substantive legal services procured from attorney's was non-severable. Thus, appears to be a distinction made between perennial, clerical work and substantive, project-based work. In the instant case, the consultant is providing project associated services that will result in a final report and final product in the form of a report and an RFP for a future study of voter fraud and voter intimidation.

Issues regarding the agreement's unauthorized nature arose near the end of the award process. While the contract authority (Commissioners) properly took action to make an award determination, they relied on EAC employees to communicate this fact to the contractor. In doing so, the Commission failed to realize that it is the communication of acceptance and award by the appropriate person that serves to obligate the government. EAC personnel seem to have viewed the Commissioners' concurrence as granting them the authority to communicate award in a manner that would obligate the agency. The bottom line is that the EAC employee believed her efforts to notify the contractor of award obligated the EAC by accepting the contractor's proposal. Based upon this, the contractor began performance on the agreement and the EAC has and will receive benefit.

**RECOMMENDATION:**

- (1) Review the contract, contract materials and statements of persons involved in the contracting process;
- (2) Ratify the contract by voting affirmatively to take such action;
- (3) Authorize the Chair on behalf of the Commission, with concurrence by the General Counsel, to document such ratification through a memorandum for the record to become a permanent part of the contract file on this contract;
- (4) Execute the contract and transmit the signed contract to the contractor.

**Cc:** Sheila Banks; Amie Sherrill; Adam Ambrogi; Elieen Collver; Gavin Gilmour

**Subject:** RESPONSE REQUESTED-Working Group for Voting Fraud and Voter  
Intimidation Project

Dear Commissioners:

The consultants' contracts for EAC's voting fraud and voter intimidation project require Tova Wang and Job Serebrov to work in consultation with EAC staff and the Commissioners "to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation". The contracts do not specify the number of working group members but, as EAC has to pay for the group's travel and we want the size of the group to be manageable, I recommend that we limit the number to 6 or 8. **Please let me know if you think that this limit is too conservative** .

Attached for your review and comment are two lists of potential working group members for this project. One list was submitted by Job, the other by Tova. Tova and Job have provided brief summaries of each candidate's relevant experience and have placed asterisks next to the names of the individuals whom they particularly recommend. I can provide more extensive biographies of these individuals, if you need them. If EAC agrees that the recommended working group members are acceptable, an equal number may be selected from each list in order to maintain a balanced perspective.

Absent from the attached lists is the name of a representative from the U.S. Department of Justice's Election Crimes Branch. At this time, I am working through the DOJ bureaucracy to determine to what degree Craig Donsanto will be permitted to participate. If he cannot be named as a working group member, we may still be able to use him as a resource.

**Please provide your feedback to me no later than Monday , November 28.** I am available to meet with you if you would like to discuss this matter further.

Peggy Sims  
Research Specialist

026019

Possible Working Group Members -Serebrov.doc Possible Working Group Members- Wang.doc

## Possible Working Group Members - Serebrov

I recommend the first four with an \*

\***Mark (Thor) Hearne II**-Counsel to Republican National Committee; National Counsel to American Center for Voting Rights; National election counsel to Bush-Cheney, '04; Testified before U.S. House Administration Committee hearings into conduct of Ohio presidential election; Academic Advisor to Commission on Federal Election Reform (Baker-Carter Commission).

\***Todd Rokita**-Secretary of State, Indiana; Secretary Rokita strives to reform Indiana's election practices to ensure Indiana's elections are as fair, accurate and accessible as possible; Secretary Rokita serves on the nine-member Executive Board of the Election Assistance Commission Standards Board, charged by federal law to address election reform issues.

\***Patrick J. Rogers**-Partner/Shareholder, Modrall, Sperling, Roehl, Harris and Sisk, P.A., Albuquerque, New Mexico; 1991-2003 General Counsel to the New Mexico Republican Party; Election cases: *The Coalition to Expose Ballot Deception, et al v. Judy N. Chavez, et al*; Second Judicial District Court of Bernalillo County, New Mexico (2005); represented plaintiffs challenging petition procedures; *Miguel Gomez v. Ken Sanchez and Judy Chaves*; Second Judicial District Court of Bernalillo County, New Mexico (2005); residency challenge; *Moises Griego, et al v. Rebecca Vigil-Giron v. Ralph Nader and Peter Miguel Camejo*, Supreme Court for the State of New Mexico (2004); represented Ralph Nader and Peter Camejo, ballot access issues; *Larry Larrañaga, et al v. Mary E. Herrera and Rebecca Vigil-Giron*, Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *Decker, et al v. Kunko, et al*; District Court of Chaves County, New Mexico (2004); voter identification and fraudulent registration issues; *Kunko, et al v. Decker, et al*; Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *In the Matter of the Security of Ballots Cast in Bernalillo County in the 2000 General Election*; Second Judicial District Court of Bernalillo County, New Mexico (2000); voting and counting irregularities and fraud.

\***David A. Norcross**- Partner, Blank Rome LLP, Trenton NJ, Washington D.C; Chairman, New Jersey Republican State Committee, 1977 – 1981; General Counsel, Republican National Committee, 1993 – 1997; General Counsel, International Republican Institute; Counsel, The Center for Democracy; Vice Chairman, Commission on Presidential Debates; Executive Director, New Jersey Election Law Enforcement Commission

**Benjamin L. Ginsberg**-Served as national counsel to the Bush-Cheney presidential campaign; He played a central role in the 2000 Florida recount; He also represents the campaigns and leadership PACs of numerous members of the Senate and House, as well as the Republican National Committee, National Republican Senatorial Committee and

National Republican Congressional Committee; His expertise is more in campaign finance.

**Cleta Mitchell**-Partner in the Washington, D.C. office of Foley & Lardner LLP; She advises corporations, nonprofit organizations, candidates, campaigns, and individuals on state and federal election and campaign finance law, and compliance issues related to lobbying, ethics and financial disclosure; Ms. Mitchell practices before the Federal Election Commission and similar federal and state enforcement agencies; Her expertise is more in campaign finance law.

**Mark Braden**-Of counsel at Baker & Hostetler; He concentrates his work principally on election law and governmental affairs, including work with Congress, the Federal Election Commission, state campaign finance agencies, public integrity issues, political broadcast regulation, contests, recounts, the Voting Rights Act, initiatives, referendums and redistricting; His expertise is mainly outside of the voter fraud area.

To: Peggy Sims  
From: Tova Wang  
Re: Working Group Recommendations  
Date: November 12, 2005

\*Wendy R. Weiser, Associate Counsel in the Democracy Program at the Brennan Center for Justice at NYU School of Law and an expert in federal and constitutional law, has done a great deal of research, writing, speaking, and litigating on voting rights and election law issues. As part of the Brennan Center's wide ranging activities in the area of democracy, Ms. Weiser is currently overseeing an analysis and investigation of recent allegations of voter fraud throughout the country.

\*Barbara Arnwine is Executive Director of the Lawyers Committee for Civil Rights Under Law, an organization that for four decades has been at the forefront of the legal struggle to secure racial justice and equal access to the electoral process for all voters. Notably, Ms. Arnwine and the organization have led the Election Protection program for the last several years, a nationwide grassroots education and legal effort deploying thousands of volunteers and using a nationally recognized voter hotline to protect voters' rights on election day.

\*Daniel Tokaji, professor and associate director of the Election Law Center at the Moritz College of Law at the Ohio State University, is one of the nation's foremost experts in election law and reform and ensuring equality in the voting system. Professor Tokaji frequently writes and speaks on democracy related issues at academic and practitioner conferences, on such issues as voting technology, fraud, registration, and identification requirements, as well as the interplay between the election administration practices and voting rights laws.

Donna Brazile is Chair of the Democratic National Committee's Voting Rights Institute, the Democratic Party's major initiative to promote and protect the right to vote created in response to the irregularities of the 2000 election, and former Campaign Manager for Gore-Lieberman 2000 (the first African American to lead a major presidential campaign.) Brazile is a weekly contributor and political commentator on CNN's Inside Politics and American Morning, a columnist for Roll Call Newspaper and a contributing writer for Ms. Magazine.

Wade Henderson is the Executive Director of the Leadership Conference on Civil Rights (LCCR) and Counsel to the Leadership Conference on Civil Rights Education Fund (LCCREF), an organization at the forefront of defending voting rights for the last fifty years. Prior to his role with the Leadership Conference, Mr. Henderson was the Washington Bureau Director of the National Association for the Advancement of Colored People (NAACP)

Robert Bauer is the Chair of the Political Law Practice at the law firm of Perkins Coie, National Counsel for Voter Protection, Democratic National Committee, Counsel to the Democratic Senatorial and Congressional Campaign Committees and Co-Author, Report

of Counsel to the Senate Rules and Administration Committee in the Matter of the United States Senate Seat from Louisiana in the 105<sup>th</sup> Congress of the United States, (March 27, 1997). He is the author of *United States Federal Election Law*, and one of the foremost attorneys in the country in the area of federal/state campaign finance and election laws.

Laughlin McDonald has been the executive director of the Southern Regional Office of the ACLU since 1972 and as the Director of the ACLU Voting Rights Project, McDonald has played a leading role eradicating discriminatory election practices and protecting the gains in political participation won by racial minorities since passage of the 1965 federal Voting Rights Act. During the past two decades, McDonald has broken new ground by expanding ACLU voting rights cases to include representation of Native Americans in various western states, and written innumerable publications on voting rights issues.

Joseph E. Sandler is a member of the firm of Sandler, Reiff & Young, P.C., in Washington, D.C., concentrating in campaign finance and election law matters, and general counsel to the Democratic National Committee. As an attorney he has handled campaign finance and election law matters for Democratic national and state party organizations, Members of Congress, candidates and campaigns. He served as general co-counsel of the Association of State Democratic Chairs, as general counsel for the Democratic Governors' Association and as counsel to several state Democratic parties.

Cathy Cox is serving her second term as Georgia's Secretary of State, having first been elected in 1998. In 2002 she earned re-election with over 61 percent of the vote, winning 146 out of 159 counties. Because of Secretary Cox's efforts Georgia has become a national leader in election reform. Her initiative made Georgia the first state in America to deploy a modern, uniform electronic voting system in every county

Paul,

Two comments:

1) There is a sentence on page 2 that doesn't make sense. I have copied the text below.

. While others consider any form of ineligible voter as fraud.

2) I am pretty sure that we have received the final product from our voter fraud/intimidation contractors. However, that product is pending staff review. So, if Tova is in the audience and she likely will be, she may challenge the statement in the speech that we await their report.

Ms. Tova Wang  
(Address)  
(Address)

Dear Ms. Wang:

The U.S. Election Assistance Commission believes that voting fraud and voter intimidation are very important, complex topics that should be studied and reported on fairly and accurately. As a clearinghouse of election administration information, EAC is committed to providing complete and comprehensive information to the election community and the public.

In its December 2006 report on voting fraud and voter intimidation, EAC honored this commitment by providing the readers of its report with the full and complete summaries of every interview conducted as well as every book, article, report or case that was reviewed. It is incumbent upon us to provide them with the best and most complete data and research that we can. Rather than provide only the synopsis of these interviews, EAC provided the readers with the entire summaries created by the consultants so readers could reach their own conclusions about the substance of the interviews.

With regard to the interviews of two of the personnel from the Department of Justice, EAC made clarifying edits. Upon reviewing initial information about their interviews contained in the status report provided to the EAC Standards Board and EAC Board of Advisors and the information provided by the consultants at the working group meeting, those persons interviewed did not agree with certain characterizations of their statements contained in these materials. The Department of Justice is an important prosecutorial agency engaged in enforcing Federal anti-fraud and anti-intimidation laws. Thus, it was important to EAC to assure that the summary of their comments did not lend confusion to an already complex and hotly-debated topic.

Because of the lack of organization and cohesion in the draft provided by the consultants, that document would have led to greater confusion and division regarding the issues of voting fraud and voter intimidation. As such, EAC revised the draft report and provided the entirety of the supporting documentation to the public.

For these reasons, the report on voting fraud and voter intimidation will stand as adopted on December 7, 2006.

Julie,

The letter is good, but don't you want to point out that in every report we issue that the research provided by paid consultants/organizations is provided under contract to the EAC, who by law is ultimately responsible for any final report issued to the public. And that such reports always takes into consideration the research provided but the EAC is obligated to consider all factors when making determinations to insure fairness and integrity of the process.

Paul

Julie and Jeannie:

Thank you for the quick turn around on drafting a response to Tova Wang.

I have made substantial edits because I think the first draft offered too much information, which is not germane to Tova's complaint. Additionally, too much verbiage masks the strength of our good report and seemed to obscure the main points in our response.

I hope you will find the attached helpful.

BTW, who will sign the letter ?

Ms. Tova Wang  
(Address)  
(Address)

Dear Ms. Wang:

We are writing in response to your December 7, 2006 memorandum. As you know, the U.S. Election Assistance Commission (EAC) issued its first report on election crimes last week, based in large part on the work that was done for EAC by Job and you. The report contains the full and complete summaries of every interview conducted as well as every book, article, report or case that was reviewed. Rather than provide the synopsis of these interviews, EAC provided the individual summaries so readers could reach their own conclusions about the substance of the interviews.

Upon reviewing initial information about the Department of Justice interviews contained in the status report that was provided to the EAC Standards Board and EAC Board of Advisors and the information provided at the working group meeting in May 2006, those persons interviewed at the Department of Justice did not agree with certain characterizations of their statements contained in these materials. Therefore, EAC exercised its responsibility to make clarifying edits. The Department of Justice is an important prosecutorial agency engaged in enforcing Federal anti-fraud and anti-intimidation laws. Thus, it was important to EAC to assure that the summary of their comments did not lend confusion to an already complex and hotly-debated topic.

The report on voting fraud and voter intimidation will stand as adopted on December 7, 2006. Again, we thank you for the contributions you made to the EAC's initial research of these important issues.

Sincerely,

**Deleted:** The U.S. Election Assistance Commission believes that voting fraud and voter intimidation are very important, complex topics that should be studied and reported on fairly and accurately. Julie,

I am ok with the edits Commissioner made to the letter; however, I do think that because of the tone of Tova's letter, which is likely to be supplied to others (as was their report to us). that we need a paragraph in the letter that makes it clear that the process used in producing this final report was consistent with the process we have used in all the reports and studies we have issued to date. What she needs to know (in writing) is that while we review the work of our researchers and consultants on a topic closely to draw various conclusions, our staff and the commissioners themselves have input into the final product that becomes the public report issued by a majority vote of the EAC. Since I've been on the EAC, we have consistently questioned statistics, statements and conclusions drawn by those doing work for the EAC. We have also drawn upon our collect resources and wisdom to produce the best report possible. I think that was true in this case as it has been with all the other reports we have issued. In the end, it is the EAC--and the commissioners in particular--who are held accountable for what we adopt and release; not our paid consultants or organizations we contract with to do studies.

Dear Ms. Wang:

We are writing in response to your December 7, 2006 memorandum. As you know, the U.S. Election Assistance Commission (EAC) issued its first report on election crimes last week, based in large part on the work that was done for EAC by Job and you. The report contains the full and complete summaries of every interview conducted as well as every book, article, report or case that was reviewed. Rather than provide the synopsis of these interviews, EAC provided the individual summaries so readers could reach their own conclusions about the substance of the interviews.

As the agency responsible for these final reports, it is incumbent upon EAC to assure that the information contained in the reports is accurate and fairly presented. With each of the reports, best practices documents, quick start guides, and other documents that EAC publishes, EAC makes changes as needed to make certain that our constituents are receiving the best and most complete information. This due diligence process is observed regardless of whether the document was created in-house or was created by consultants or contractors.

Upon reviewing initial information about the Department of Justice interviews contained in the status report that was provided to the EAC Standards Board and EAC Board of Advisors and the information provided at the working group meeting in May 2006, those persons interviewed at the Department of Justice did not agree with certain characterizations of their statements contained in these materials. Therefore, EAC exercised its responsibility to make clarifying edits. The Department of Justice is an important prosecutorial agency engaged in enforcing Federal anti-fraud and anti-intimidation laws. Thus, it was important to EAC to assure that the summary of their comments did not lend confusion to an already complex and hotly-debated topic.

John Weingart:  
Eagleton Institute of Politics  
Rutgers University

Dear John:

During its bi-weekly meeting the four EAC Commissioners met, discussed and reviewed possible next steps with the provisional voting and voter identification studies as well as the Eagleton contract which is scheduled to conclude on June 30, 2006.

The four Commissioners were in agreement that Eagleton's work on the EAC contract should conclude, as scheduled, by June 30, 2006. In preparation for this conclusion the Commissioners have asked that the comments and suggestions which were noted during the EAC's recent Board of Advisors and Standards Boards meeting (and were described in your June xxx letter to Chairman DeGregorio) be included in the final report on provisional which Eagleton will deliver to the EAC on or about June 30, 2006. The Commissioners have determined that they will take this final report and, from it, develop guidance and best practice recommendations that will be presented to the Board of Advisors and Standards Boards for further review.

The EAC Commissioners have also reviewed and considered next steps with the voter identification draft report which Eagleton has prepared. While the final disposition of the results and findings of this study, on the part of the EAC, are still unclear, the Commissioners have asked that the final report of this study also be prepared and submitted to the EAC not later than June 30, 2006.

We look forward to receiving these reports. On behalf of the EAC thank you for the considerable time and energy which the Eagleton/Moritz team has devoted to these critical election issues during the last eighteen months.

Sincerely,

Thomas Wilkey

Subject Report

Caroline,

You may have read some news articles regarding a "report" we did not release publicly regarding a study we are conducting on vote fraud/voter intimidation issues. The report in question is a May 17 status report on the study that was given to our Advisory and Standards Boards at a meeting they had in Washington. Someone obviously leaked it to the media and some have now made suggestions that it was not released to keep its contents quiet. We had to give it to the media because it was a public document that we shared with our boards at a public meeting. I have attached a copy of the report and a letter that I sent today to Barbara Arnwine of the Lawyer's Committee for Civil Rights that explains what this is all about (she was quite misinformed in the letter she sent to the EAC last Friday). Staff and counsel are now reviewing more information, data and feedback that has come in since the May 17 status report and we are not likely to issue any final report on the initial study on this issue for a month or so.

Paul

U.S. ELECTION ASSISTANCE COMMISSION  
1225 NEW YORK AVENUE, N.W., SUITE 1100  
WASHINGTON, D.C. 20005

OFFICE OF THE CHAIRMAN

October 12, 2006

Ms. Barbara R. Arnwine  
Executive Director  
Lawyers' Committee for Civil Rights Under Law  
1401 New York Avenue, NW  
Suite 400  
Washington, DC 20005-2124

RE: October 6, 2006 Letter

Dear Ms. Arnwine:

Your letter of October 6, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors, a group of which you are now a member, during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants, the working group meeting transcript, and data sources provided by the consultants as a part of their working papers. However, it is important to remember the purpose of this study – finding a uniform definition of voter fraud and making recommendations on how

to study the existence, prosecution and deterrence of voter fraud -- as it will serve as the basis of the EAC report on this study.

Thank you for your letter. Please continue to contact us with any concerns that you may have. You and your colleagues on the Board of Advisors are important to the EAC process. As such, you can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be provided to all members of the EAC Board of Advisors.

Sincerely,

A handwritten signature in cursive script that reads "Paul DeGregorio". The signature is written in black ink and is positioned above the printed name.

Paul S. DeGregorio, Chairman  
Designated Federal Officer, EAC Board of Advisors

1401 New York Avenue, NW

As a member of the Election Assistance Commission (EAC) Board of Advisors and a member of the EAC's Working Group on Voter Fraud and Voter Intimidation, I write requesting the release of the EAC's Voter Fraud and Voter Intimidation Report. This report was commissioned over a year ago and has yet to be released. In May, 2006 the Working Group met to discuss the project and was told that the final report would be released shortly thereafter. Five months later, and on the heels of another national election, election officials, policy makers and advocates are without guidance from the EAC on this critical subject. Across the country and at all levels of government, legislative and judicial debates that should be informed by the report's findings continue. The EAC has had ample time to research and release this critical report. There is no reasonable explanation for this delay.

Please immediately release the Election Assistance Commission's Voter Fraud and Voter Intimidation report. If immediate release is not possible, please provide me with an explanation of the delay and a detailed time line for the report's release.

Thank You,

Barbara R. Arnwine  
Executive Director  
Lawyers' Committee for Civil Rights Under Law

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

026052

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

### NEWS ARTICLES

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

#### **Absentee Ballots**

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio, and Pennsylvania.

#### **"Dead Voters and Multiple Voting"**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

Subject Interview request

Mr. Chairman,

Chuck McCutchen of Newhouse News Service wants to interview you tomorrow at 11:30 regarding absentee voting, and your thoughts about whether this presents more opportunities for fraud. He asked for and I sent him the status report on fraud, but he's focused on the absentee voting angle. He knows you were a former elections official and have first hand experience with this issue. The interview would last about 15 min. Newhouse owns about 25 newspapers scattered throughout the nation. Please let me know if you can accomodate him. If so, we are to call him at 202-383-7801.

RE: October 19, 2006 Letter

Dear Mr. Reynolds:

Your letter of October 19, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study – finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud -- as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

Paul S. DeGregorio  
Chairman

Subject Last Submission from Vote Fraud-Voter Intimidation  
Consultants

History:  This message has been replied to

Dear Mr. Chairman:

The last submission from the Vote Fraud-Voter Intimidation Study consultants is dated August 8. At this time, EAC staff are reviewing all items submitted for the report to the Commission with an eye toward the best way of presenting the information to the Commissioners for their consideration. There has been some delay in this staff review process, for which I take full responsibility.

Subject Media request - USA Today

All

Richard Wolf of USA Today called and asked for the following. Jeannie and I ask that you consider this carefully and let us know ASAP what to provide .

- (1) The status report on voter fraud and consultant update that was presented to the advisory boards in May, 2006.
- (2) The status of the required guidance document on provisional voting and voter ID that is referenced in the following passage in today's Electionline Weekly by Doug Chapin.

In addition to the EAC's considerable election management responsibilities (especially in the area of voting equipment certification and testing), the agency has key policy issues to resolve in the immediate to near-term future, including a required guidance document on provisional voting and voter ID (now nearly two years overdue) and continued regulatory oversight over state implementation of "motor voter". This latter issue will almost certainly involve questions about the intersection of state and federal laws on voter registration - questions which divided the Commission when applied to Arizona, and could divide it again as Republicans and Democrats continue their traditional struggle to balance access to the franchise with concerns about the potential for fraud at the polls.

Thanks,  
Bryan

Subject draft text for USA Today

History

 This message has been replied to.

Commissioners,

As you requested, I provided Tom and Julie a draft response to USA Today to accompany the docs requested by Richard Wolf . Julie revised it as follows and Tom agrees. Please let me know ASAP if you concur.

Rich,

As we discussed, here are the docs you asked about that were presented at the board meetings in May and links to the meeting agenda. There are two reports: (1) a draft report produced by Eagleton Institute concerning provisional voting; and (2) a status report produced by EAC contractors regarding research being conducted on voter fraud and intimidation. The reports were presented by the contractors to the Standards Board and Board of Advisors for their input. This type of input is required for any guidance issued by EAC and is desired for any product that we provide to the election community and the public. Based on the input that was received from these boards, particularly regarding the questionable information contained in Eagleton's provisional voting report, EAC has not issued the Eagleton draft report as a final EAC document. As for the voter fraud and intimidation status report, it is merely an update on the status of the research conducted by the EAC contractors. A report and recommendations on future actions regarding this topic will be produced after EAC review of the preliminary research.

Subject Job Description for a Voter Fraud Project Consultant

Commissioners-

Attached please find a first draft of a short job description outlining EAC's expectations for a project consultant on voter fraud.

As you are aware, Julie has shared with me the resume of someone with an interest in the position. Ray has indicated that he participates in a legal list-serve group that has recently focused on voter fraud issues. This list-serve is probably a good place to "advertise" the consultant opportunity.

Let me know your thoughts on next steps. I look forward to getting this project up and running.

Regards-

K

**Job Description****U.S. Election Assistance Commission (EAC) Voter Fraud Project Consultant**

The U.S. Election Assistance Commission (EAC) seeks to identify a senior-level project consultant to assist with the oversight and development of a study and possible project examining U.S. election voter fraud.

The consultant must of have a knowledge of voter fraud and an understanding of the complexities, nuances and challenges which surround the topic. The EAC is particularly interested in candidates with experience in elections, with public policy and the law. The consultant must be able to demonstrate an ability to approach the issue of voter fraud in a balanced, nonpartisan fashion.

This consultant, whose contract would run for the period June-November, 2005, would be responsible for conceptualizing a project scope of work around the issue and from that, developing a statement of work for a research project around the topic.

In consultation with EAC staff, EAC Commissioners, and other key EAC stakeholders, the consultant will develop a project plan around voter fraud. The consultant will recommend certain EAC project activities related to voter fraud and will develop a scope of work for an EAC research study on voter fraud. The consultant will oversee and manage various processes related to EAC contracts awarded for work related to voter fraud.

EAC's consultant fees are competitive and are awarded based on the candidates' relevant background and experience.

Subject Meeting with Craig DonSanto

Hi-

I've scheduled a meeting with Craig DonSanto for Tuesday, May 17th at 10:00 am in his offices.

We'll be discussing voter fraud and what the EAC might do regarding research on the issue. As you may know, Craig's office is issuing a major report/manual on the topic. He will share the draft of this effort with us at the meeting next week.

As you know, I'm hoping one of our interns will be working on this project for us this summer. In the meantime, I'm hoping at least one of the folks from the EAC legal team can come tho this meeting. BTW, Craig's office is just down the street.

Let me know your availability, and which intern you can assign to this effort.

Thanks

K

**Job Description****U.S. Election Assistance Commission (EAC) Voter Fraud and Voter Intimidation Project Consultant**

The U.S. Election Assistance Commission (EAC) seeks to identify a senior-level project consultant to develop various project activities and studies related to U.S. election voter fraud and voter intimidation.

The consultant must have knowledge of voter fraud and intimidation along with an understanding of the complexities, nuances and challenges which surround the topics. The EAC is particularly interested in candidates with experience in elections, with public policy and the law. The consultant must be able to demonstrate an ability to approach the issues of voter fraud and intimidation in a balanced, nonpartisan fashion.

This consultant, whose contract would run for the period June-November, 2005, would be responsible for:

- Identifying and convening a working group of key individuals and organizations knowledgeable about the topics of voter fraud and intimidation;
- Developing a project scope of work and a project work plan related to voter fraud and intimidation;
- Authoring a report summarizing the key findings of this preliminary study of voter fraud and intimidation. The report will also include suggestions for specific activities the EAC may undertake around these topics.

From this initial research and exploration of these topics the consultant may be retained to help oversee research projects and contracts EAC may develop on the topics of voter fraud and intimidation.

EAC's consultant fees are competitive and are awarded based on the candidate's relevant background and experience.

Subject Eagleton draft press release

Commissioners,

Below is a draft of a press release Eagleton wants to distribute regarding the EAC contract. (It's also attached.) Please let me know if you have edits/changes. Also, take a close look at the language regarding the scope for the voter ID study to make sure it is acceptable.

DRAFT FOR APPROVAL

## **EAGLETON INSTITUTE OF POLITICS WINS \$560,000 CONTRACT FROM U.S. ELECTION ASSISTANCE COMMISSION**

### **Rutgers Institute to Study Provisional Voting, Voter Identification Procedures**

NEW BRUNSWICK/PISCATAWAY, N.J. – The U.S. Election Assistance Commission (EAC) has awarded the Eagleton Institute of Politics at Rutgers, The State University of New Jersey, a \$560,000 contract to study provisional voting and voter identification procedures based on experiences from the 2004 election.

Under the national contract, the institute will develop recommendations for EAC to issue as guidance to the states to use in 2006, according to Eagleton Director Ruth B. Mandel, the study's principal investigator. She added that the Moritz College of Law at Ohio State University, Eagleton's partner in the contract application, will be responsible for the legal analysis of the competitively bid, seven-month project.

Eagleton already is home to an extensive civic education and political participation program, with several projects aimed at increasing voter turnout, political participation and Americans' involvement in civic life.

EAC was established by the Help America Vote Act (HAVA) of 2002. It is an independent, bipartisan agency and provides federal funds to states to upgrade voting systems and improve election administration. It publishes voluntary guidelines for the states and serves as a national clearinghouse of information regarding election administration.

The Eagleton project team, led by Mandel, includes Ingrid W. Reed, John Weingart and consultant Thomas O'Neill, retired president of the Partnership for New Jersey, who will serve as project director. The project will address key questions related to provisional voting and voter identification in the context of effective election administration, voter access and ballot security.

Questions include:

- Did the states have in place clear and uniform written procedures, guidelines and instructions to govern the casting and counting of provisional ballots?

026078

- Did local procedures reflect the state's uniform procedures?
- Did all states and election jurisdictions make these procedures available to the public, political parties and candidates before the election?
- To what extent were poll workers appropriately trained on how to administer provisional ballots, including establishing the identity of the potential voter seeking a provisional ballot?
- How were federal funds under the Help America Vote Act used to educate voters about their rights to cast a provisional ballot and where such provisional ballots must be cast to be counted?
- In states where a provisional ballot had to be cast at the voter's assigned polling place or precinct, was information available to poll workers to allow them to determine the voter's assigned precinct and polling place?
- Did states have mechanisms in place to inform voters casting provisional ballots whether their vote was counted and whether they are now registered for subsequent elections?

Eagleton will address these questions by examining the nation's experience with provisional voting and voter identification requirements and practices in 2004 through extensive research including a survey of local election officials across the country. In addition, the work will be informed by scrutiny from a panel of peer reviewers as well as by comments offered at public hearings to be held in conjunction with the project.

At the contract's conclusion, the team will present a narrative on both topics, indexed databases of major articles on provisional voting and voter identification requirements, summaries of case law on each subject, analyses of provisional voting procedures from around the country and of voter participation and vote fraud under various voter ID requirements, and a report of alternatives to existing practices and procedures.

Subject Re: Eagleton draft press release

I have some concerns about the press release. In paragraph two, I am not comfortable with the following language in what I believe is paragraph two: Under the national contract, the institute will develop recommendations for EAC to issue as guidance to the states to use in 2006.

It seems to me that EAC will develop the guidance based on Eagleton's findings.

Also, I do not think the press release should contain the list of questions. Are they/we trying to float a trial balloon and elicit initial reaction at this early stage of the study??

Subject Eagleton press release

History: This message has been replied to.

Following is the Eagleton press release including revisions from the chair and Carol. If anyone else has changes or edits, please let me know by tomorrow morning so Eagleton can get this out. Thank you.

DRAFT FOR APPROVAL

**EDITOR'S NOTE: ATTENTION POLITICAL, ASSIGNMENT EDITORS**

**EAGLETON INSTITUTE OF POLITICS WINS \$560,000 CONTRACT  
FROM U.S. ELECTION ASSISTANCE COMMISSION**

**Rutgers Institute to Study Provisional Voting, Voter Identification Procedures**

NEW BRUNSWICK/PISCATAWAY, N.J. – The U.S. Election Assistance Commission (EAC) has awarded the Eagleton Institute of Politics at Rutgers, The State University of New Jersey, a \$560,000 contract to study provisional voting and voter identification procedures based on experiences from the 2004 election.

Under the national contract, the institute will develop recommendations for EAC to consider in the development of its guidance to the states for the 2006 elections, according to Eagleton Director Ruth B. Mandel, the study's principal investigator. She added that the Moritz College of Law at Ohio State University, Eagleton's partner in the contract application, will be responsible for the legal analysis of the competitively bid, seven-month project.

Eagleton already is home to an extensive civic education and political participation program, with several projects aimed at increasing voter turnout, political participation and Americans' involvement in civic life.

EAC was established by the Help America Vote Act (HAVA) of 2002. It is an independent, bipartisan agency and provides federal funds to states to upgrade voting systems and improve election administration. Subject Fw: Peer Review Group

Commissioners-

Enclosed please find a preliminary list of Peer Review Group members, whom Eagleton is considering for their Peer Review Group. **Tom Wilkey will be bringing this item to you for discussion and input at Monday's Commissioner's meeting.**

Eagleton envisions this Peer Review Group as the body that will review the draft analysis that it will prepare on provisional voting and on voter identification. The Group would also provide comment on the development of alternative approaches to provisional voting and voter identification which Eagleton will develop for the EAC.

I have included the e-mail from the Eagleton Project Director, Tom O'Neil, so that you could get a feel for his approach/philosophy to assembling the Group.

Subject Peer Review Group

Karen,

As you probably recall, one of the features of our proposal was the creation of a Peer Review Group to look over our findings, conclusions and draft reports before we prepare final drafts for the EAC's review. The EAC asked that before recruiting members of the PRG we submit names for EAC's review. The aim, course, is to assemble a panel that is experienced, informed, and balanced.

Attached is a list of potential PRG members drawn from academia, the law, and non-profit organizations with interests in this area. Please look it over.

We may conclude that the PRG should also include two or three former government officials now in

025087

academia or related fields. We have a conference call with our partners at Moritz planned for tomorrow or Friday to decide a) if former officials should be included in the PRG and b)if so, who they should be. I'll keep you informed of our thinking as it develops.

Tom

PROPOSED MEMBERS OF PEER REVIEW GROUP.doc

## PROPOSED MEMBERS OF PEER REVIEW GROUP

### **R. Michael Alvarez, Ph.D.**

Professor of Political Science  
California Institute of Technology  
[REDACTED]

Alvarez has taught political science at Caltech since 1992. He received his B.A. in political science from Carleton College; his M.A. and Ph.D. from Duke University. Alvarez focuses on the study of electoral politics. He has published many articles on electoral behavior and public opinion. Support for his research has come from the National Science Foundation, The IBM Corporation, the Carnegie Corporation, of New York, and the Knight Foundation. Alvarez edits the Analytical Methods for Social Research book series and is on the editorial boards of a number of academic journals. He is Co-Director of the Caltech-MIT Voting Technology Project

### **Deborah Goldberg, Ph.D**

Program Director, Democracy Program  
Brennan Center for Justice at NYU School of Law  
161 Avenue Of The Americas, 12th Floor  
New York, NY 10013  
[REDACTED]

Goldberg supervises the Democracy Program's litigation, scholarship, and public education. She was the principal author of *Writing Reform: A Guide to Drafting State & Local Campaign Finance Laws*, and was lead counsel to the intervenor in the Supreme Court case *Nixon v. Shrink Missouri Government PAC*. She serves on the Steering Committee of a coalition to restore voting rights to persons with past felony convictions. Goldberg is a graduate of Harvard Law School. Before joining the Brennan Center, she was in private practice. She holds a Ph.D. in philosophy and taught ethics at Columbia University.

### **Martha E. Kropf, Ph.D.**

Assistant Professor of Political Science  
University of Missouri-Kansas City  
[REDACTED]

Kropf has been on the faculty at Missouri since 1999. She received her BA Summa Cum Laude, Phi Beta Kappa from Kansas State University and her PhD in Political Science from American University. Her work concentrates on Research Methods, Urban Politics, American Government, and Political Behavior. Before joining the faculty at Missouri, she was Project Coordinator at the University of Maryland Survey Research Center. She has published recent on undervoting in presidential elections, and on invalidated ballots in the 1996 presidential election, and on the incremental process of election reform in Missouri.

### **Wade Henderson, Esq.**

Executive Director  
Leadership Conference on Civil Rights  
1629 K Street, NW, 10<sup>th</sup> Floor  
Washington, DC 20006

Wade Henderson is the Executive Director of the LCCR and Counsel to the Leadership Conference on Civil Rights Education Fund (LCCREF), and leads the organizations' work on issues involving nationwide election reform. He is a graduate of Howard University and the Rutgers University School of Law. During its over 50 years of existence, LCCR has worked to redefine civil rights issues in broad and inclusive ways. Today, it includes over 180 national organizations. Previously Henderson served as Washington Bureau Director of the NAACP. He began his career as a legislative counsel of the ACLU.

### **Kay Maxwell**

President  
League of Women Voters of the U.S.  
1730 M Street NW, Suite 1000

Washington, DC 20036-4508  
[REDACTED]

Kay J. Maxwell has been a member of the League since 1976. She attended Smith College and earned a B.A. in International Relations from the University of Pennsylvania. She has conducted civic participation training for women leaders in Bosnia, Israel, the West Bank, Rwanda, Kuwait and Jamaica. She has also served as vice president at the International Executive Service Corps (IESC), an international economic development organization. She is a board member of DC Vote, and the New Voters Project.

**Tim Storey**

Program Principal  
Legislative Management Program  
National Conference of State Legislatures  
7700 East First Place  
Denver, CO 80230

[REDACTED]

or  
444 North Capitol Street, N.W., Suite 515  
Washington, D.C. 20001  
[REDACTED]

**Peter G. Veniero, Esq.**

Counsel  
Sills, Cummis, Epstein and Gross, PC  
One Riverfront Plaza  
Newark, New Jersey 07102  
[REDACTED]

Veniero chairs the firm's Appellate Practice Group. He earned his B.A. at Drew University, Phi Beta Kappa, and his J.D. (with honors) at the Duke University School of Law. In 1999, he was appointed a justice of the New Jersey Supreme Court, where he served for 7 years before re-entering private practice. Before his appointment to the Supreme Court, he served as New Jersey's Attorney General, and in that capacity oversaw the state's election laws. He also served as Chief of Staff and Chief Counsel to Governor Christine Todd Whitman.

Job-

Thanks ever so much for following up. Indeed, the Commissioners have reviewed the issue and have agreed in principle, to an approach that would entail hiring a consultant or consultants to help the EAC study and frame the issues of voter fraud and intimidation.

The idea would be that after a period of time, the consultants, and, perhaps, a working group of the EAC, would make a series of recommendations on next steps for the agency to take regarding voter fraud and intimidation.

Thanks for your patience; I hope to have a definitive answer for you by mid-July at the latest.

Job-

I write to see if you might be available to come to Washington on Monday, August 1 to meet with several EAC staff and Commissioners to discuss the voter fraud/voter intimidation project and your possible work as a consultant on the project.

I'd like to schedule this 1-2 hour meeting for sometime between 1 and 3 in the afternoon.

Might you be available to come to Washington for this ?

Tom-

I will be in touch shortly with possible dates in very late August or early September, when EAC staff might be available to meet with Eagleton to discuss the project's research results and next steps.

In the meantime, I thought it was important to follow up on the issues Vice Chair DeGregorio raised while we were in Pasadena.

To be certain that I have the latest information, could you send to me the final list of the Eagleton/Moritz Peer Review Group and the list of organizations that Eagleton will be contacting for input?

Regards-

Subject Research Contracts

Dear Commissioners:

At the meeting of the Board of Advisors in Portland, Oregon, our notebooks included an EAC Information Research Update, dated July 18, 2005. The Update indicates that the EAC has awarded a contract to the Eagleton Institute / Moritz College of Law ("Moritz") to conduct research into "Provisional Voting / ID Requirements."

Obviously, the duty of the EAC as outlined in Section 241 to conduct research on election issues is a very important one. That is why it is clearly an absolute necessity that the researchers who are awarded contracts to conduct that research be objective and nonpartisan in their work. It would be inappropriate and potentially very damaging and embarrassing to the EAC (and the Board of Advisors) if this research is conducted by entities that have a preconceived opinion or bias on the issue being researched or are, in fact, advocates on the issue. Any findings or recommendations such biased entities put in their final report would be open to question and could cause great harm.

Unfortunately, hiring the faculty at Moritz to conduct research on provisional balloting and voter identification provisions calls into question whether the research can be conducted in an objective manner and reach conclusions that are not pre-determined by the public and pre-existing views of the researchers. This is crystal clear from an easily-conducted review of the Moritz website.

The Associate Director of the Election Law program at Moritz, Daniel Tokaji, is an outspoken opponent of voter identification requirements and commentator on provisional voting. Here is a brief summary of some of his recent comments, taken from the Moritz website:

It's therefore questionable at best whether an ID requirement is really necessary to combat voting fraud. Supporters of the ID requirement have yet to make a convincing case that existing methods of discouraging and punishing fraud are insufficient. While the anti-fraud benefits of stricter ID laws are dubious, there is evidence that an ID requirement would impose a severe burden on many voters, particularly those of low income....In their present form, the ID bills presently on the table are likely unconstitutional.... (ID and the Right to Vote, April 12, 2005)

"Ohio's election reform is a mixed bag. Establishing a clear rule for provisional ballots is a good idea, but I don't think there's a good reason for refusing to count provisional ballots cast out of precinct, given that a statewide registration database (which should allow for easy verification of eligibility) has to be in place by 2006. It would be much better to move to in-precinct early voting than mail-in absentee voting, but it seems that Ohio doesn't want to spend the money." (Reform Comes to Ohio, May 20, 2005).

"Nevertheless, DOJ seems likely to sign off on this [Arizona's proposition 200

026096

implementing rules], given that they've take the position - quite clearly an erroneous one, in my view - that voters need not even be given a provisional ballot if they lack ID." (Arizona Voter ID, July 18, 2005).

"It remains to be seen, of course, whether DOJ will rigorously enforce Section 5 of the Voting Rights Act, when it comes to practices - like the Georgia ID law - that threaten to result in the denial of minority votes...." (Preclearance, Preclearance, Preclearance, July 20, 2005).

"...I tend to doubt that the preclearance process will prove to be an effective remedy for measures like the Georgia ID law. Even though this law will have a "retrogressive" effect, by serving as a barrier to minority voters' participation...." (The Voting Rights Act, Then and Now, July 31, 2005)

"We should remember that, at the turn of the 20th Century, allegations of "good government" were used by white Democrats in a remarkably successful strategy to suppress the black vote. The result of those very successful efforts was to impose barriers like the literacy test, which excluded African Americans from voting throughout the South for the better part of the century, until after the Voting Rights Act of 1965. If you go back and read some of the documents from the late 1800's and early 1900's, as I've recently been doing, the similarity to the sort of arguments being advanced now in support of photo ID laws is frightening. It is beyond unfortunate to see the same sort of tactics, albeit dressed up in more respectable garb, being employed at the start of the 21st Century." (Vote Suppression, Fraud and Voter ID, August 3, 2005)

In addition to these postings, Dr. Tokaji is acting as an advocate on voter identification issues, having submitted a comment letter to the Department of Justice dated August 18, 2005, along with a number of other professors, urging an objection to a voter identification provision currently before the Department for review under Section 5 of the Voting Rights Act. Obviously, this advocacy is occurring after the EAC awarded this contract and during the pendency of the research work.

The issue here is not whether Dr. Tokaji's opinions are correct or incorrect, or the appropriateness of his submitting a comment letter to the Department of Justice. The point is the strongly held, pre-existing notions about both provisional balloting and voter identification espoused by the Associate Director of Moritz's election law program and his advocacy on these issues. This raises serious concerns about the propriety of Moritz being provided with federal tax dollars to conduct non-partisan and impartial research into such a sensitive and high profile area of election law. We cannot be certain that data collected and conclusions reached by this research project will not be predetermined to comport with the views of Moritz's officials.

I would strongly recommend that this contract be reconsidered by the EAC. Under these circumstances, any report issued by Moritz will be open to serious questions as to its validity and objectivity.

Subject Re: Research Contracts

Hans:

I'm currently at the Seattle airport awaiting a return flight to D.C., so I apologize if my response below is somewhat incomplete. I think the issue you raise certainly deserves our full consideration, so I will look forward to additional responses and dialogue from others included in this distribution list.

A couple of quick points in response to your concerns (and I am speaking for myself below, and not for the entire commission):

- (1) The RFP that was issued by the EAC pertaining to the research on provisional voting and voter ID requirements was widely advertised (as all our RFP's are). We did so because we wanted to receive a wide range of possible contractors to conduct this important research. This was a competitive RFP process which, if my memory serves me correct, produced a good number of responses from interested entities.
- (2) Carol Paquette assembled a review panel (I'm not sure how many persons were involved in the review panel) to score the responses to this RFP...the submission by the Eagleton Institute included, as a part of their proposal, the Moritz School of Law at Ohio State University as a partner in conducting the legal research required for Eagleton to provide a final report (due in October) to the EAC. The review panel scored the Eagleton submission as best, considering a variety of factors.
- (3) The lead entity in this project is the Eagleton Institute. While the project manager's name from Eagleton escapes me right now, the lead from Moritz is not Dan Tokagi, but Ned Foley, who directs the election law section (or something to that effect) at Moritz. Certainly it is true that Professor Tokagi is contributing to the work product being assemble by Moritz, which consists primarily of reviewing election and administrative codes from all 50 states to ascertain how each state deals with provisional voting and voter ID requirements.
- (4) As is the case with all federal contractors, both Eagleton Institute and Moritz are contractually obligated to produce objective, sound and unbiased research and analysis on this project. While it is certainly prudent to consider the potential bias of any prospective contractor(s), after receiving the recommendation from the review panel and Carol Paquette (at the time, the acting EAC Executive Director), we unanimously agreed among the commissioners that the recommendation was worthy of support. At the time, we were aware, for example, that the Eagleton Institute had been involved last year in some litigation involving provisional ballots. We were also aware, as you point out, of Professor Tokagi's personal views regarding the issue of voter ID and provisional voting. Nevertheless, there was unanimous agreement in supporting the staff (and review panel) recommendation to move forward with the proposal submitted by Eagleton Institute.
- (5) Finally, to ensure that the final workproduct from both Eagleton and Moritz is objective and representative of all view points on these important issues, Eagleton proposed early in the process -- and we enthusiastically agreed -- to the formation of a balanced peer review panel which will review the work, on an on-going basis, of Eagleton and Moritz. All EAC commissioners have had an opportunity to provide names to Eagleton to ensure appropriate political balance on this peer review panel and Eagleton has been responsive to our various suggestions.

026099

By way of summary, let me say that I believe we have an obligation to closely scrutinize the conduct of all of our federal contractors. If things come to light that bring into question the objectivity of any of our contractors, I believe the EAC ought to conduct its due diligence and deal with such matters accordingly, including the possibility of contract termination.

I would be happy to conduct such due diligence with regard to this particular contract. However, I must say, with all due respect, that I do not think any breach has occurred, either by Eagleton or Moritz, which would necessitate termination of this contract. I think appropriate checks and balances have been accounted for in this contract, and I believe these checks and balances will ensure an objective and sound final product from Eagleton.

I welcome your continued feedback, Hans.

Kindest regards,

Subject Eagleton

In his note regarding the Eagleton contract, Hans has raised some of the same concerns I raised from the beginning of any discussions I had regarding this contract with our staff, and at our first formal meeting with Eagleton. In reviewing their work product from time to time, I continue to have concerns about a lack of balanced input and have repeatedly voiced them with staff and with Eagleton. I did this when the initial peer review group was proposed and again during their presentation at our meeting in Pasadena (the outreach slide in their public presentation showed outreach to seven groups, of which only one could be considered conservative-leaning). Now, as I have just had the opportunity to read their July progress report, it appears that Eagleton seems to be going into a larger analysis of the voter fraud issue than was authorized in the contract. My suspicion is that Dan Tokaji is injecting his views into this to dismiss or diminish the concerns some people may have about voter fraud. I could be wrong, but his previous writings lead me to believe otherwise.

I only found one mention of voter fraud in the contract with Eagleton. It is in Section 3.5 regarding provisional voting, where it discusses "minimizing opportunity for voter fraud." Yet, on page 4 of the July progress report from Eagleton, in describing their work plan for the next month it states: "we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms." This clearly seems to be going beyond the mandate we gave them as I thought they were going to be looking at voter fraud relating to provisional voting (as the contract calls for), not voter fraud as it relates to election reforms. While voter fraud was never mentioned in the contract regarding the voter ID issue, page 5 of their July report indicates that their narratives "will include an appraisal of the prevalence and nature of vote fraud." In addition to this, page 6 describes a look into the "relationship between voter ID regime and vote fraud."

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to be studied by the EAC using a balanced group of consultants--not Eagleton and Moritz, who are likely to focus on just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of \$500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions from congressional staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against

026101

Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to be studied by the EAC using a balanced group of consultants--not Eagleton and Moritz, who are likely to focus on just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review

026103

Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of \$500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions from congressional staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

Subject Eagleton

Paul:

I am directing this email only to the commissioners, because I don't think we should air our disagreements among staff until we have at least had a chance to discuss controversial issues with each other in person. It appears from Gracia's email that we will have a chance do so next week in Denver.

In the meantime, I feel compelled to respond to your email regarding Eagleton.

(1) As I stated last night in my email to Hans, we have an on-going responsibility to monitor the expenditure of all our federal funds, including to government contractors who are contractually obligated to deliver unbiased research. However, I will remind you that we did not contract with Eagleton merely to provide a compilation of state laws and procedures. Rather, we contracted with Eagleton (and indirectly with Moritz through Eagleton) to provide both research AND analysis of provisional voting and voter ID. Invariably, the analysis portion of their final product will be from a professional (and institutional) perspective, and will NOT represent any one researcher's personal point of view. If it does, then Eagleton and Moritz risk damaging their credibility not just with the EAC, but with other federal government agencies which undoubtedly contract with their respective institutions on other projects. I doubt seriously that either institution would risk such damage and allow one team member to inject bias into the work. Moreover, the peer review group that is (or has) been assembled by Eagleton is designed to cure any lingering concerns about potential insitutional or personal bias...Eagleton has been responsive to your feedback on this issue, to the point where they have removed all perspective representatives of the advocacy community on the peer review group (because they felt they could not achieve political "balance" from the advocacy groups). If there is some person (or persons) which you would like to see Eagleton include in the review group, it is my understanding that such inclusion is but a mere phone call away.

(2) You will recall that at our meeting last week, I raised the exact same concern about the Eagleton progress report, and asked for clarification from staff regarding the details of this particular work (i.e., fraud) on the part of Eagleton. I expect staff (or us directly) to ask questions of Eagleton (as we would any contractor) and determine if their work in this area is within the scope of work (and contract) we all agreed to. If it isn't then we re-direct them, just as we have done, for example with Kim Brace and EDS.

(3) Finally, I must express my disappointment, Paul, regarding your comments on Professor Tokagi that you chose to include in your email. While I may disagree with Hans on his particular analysis of the perceived personal bias of this contract, at least his allegations regarding Professor Tokagi's potential bias are grounded in fact (and he recited them as such in his email). You, on the other hand, have chosen to accuse Professor Tokagi of manipulating the work on this project based on your "suspicion." With all due respect, that unfortunate accusation borders, in my view, on a breach of professional decorum and I cannot let it go without response.

We clearly have some political issues that are increasingly being injected into nearly every discussion at the EAC table. I have stated both to you and Gracia individually that I believe this trend in part represents a "maturation" of the EAC and I am not uncomfortable with it. However, if we are going to bring accusations of subjectivity and bias to the table, then I will expect that such a filter will be applied across the board to ALL projects undertaken by the EAC, and that such a filter will be based solidly on fact, and not on innuendo, personal hunches or suspicions.

026105

I send this email, as always, with the highest degree of respect and friendship toward you. And yet, my disappointment is evident in your comments regarding an esteemed and respected member of the legal academic community (and someone whom I regard as a personal friend.)

I look forward to our continued discussion on this matter. And as for the substance of Hans' concern regarding Moritz, I stand by my email which I sent to everyone last night.

Regards,

Tom-

Thank you for sharing this list of your Peer Review Group members, to-date. I will share this list with the Commissioners and will be certain to let your know of their feedback, if any.

I will also be back in touch regarding Eagleton's research around voter fraud and the research project EAC will be undertaking, this fall, around voting fraud and voter intimidation. The EAC is presently in the process of finalizing a work and staff plan for this project and once it is completed, I will be certain to brief you on it.

In the meantime, EAC staff and several of the Commissioners looks forward to meeting with the Eagleton/Moritz team on September 6 at 1:30 PM.

Commissioner-

I thought you would find of particular interest, the attached short description that one of our consultants who will be working on the voting fraud, voter participation issues, has provided.

I think Job will be a wonderful addition to our group of consultants and will bring a wealth of practical knowledge and political balance to our review of the voting fraud and voter intimidation issue. Job is very, very excited about working on this topic and looks forward to meeting the EAC staff, when we bring them together for a meeting in early September.

Best-

Summary of Election Activities of Job Serebrov

Background to Election Problems in Arkansas

Ever since Reconstruction, Arkansas has had a history of election problems. The election fraud that gave

026110

rise to the Brooks-Baxter War in Arkansas in the 1870s involved people from both sides of the aisle voting more than once, the dead rising to cast a ballot or two, destroying ballots, creating ballots and making ballot boxes disappear. A strong one-party system perpetuated this tradition into modern times.

In 1995, I met with Arkansas Supreme Court Justice Tom Glaze to discuss voting issues and my efforts to clean up the electoral process. Although supportive, Justice Glaze encouraged me to proceed with caution. Before being elected to the Supreme Court, Justice Glaze had been employed in the 1960s by Gov. Win Rockefeller to clean up ballot fraud throughout Arkansas. He was nearly disbarred in the process by those involved in ballot fraud in a small, rural county.

Shortly after my discussion with Justice Glaze, I discovered how pervasive the election problems were in the state. For instance, ballot boxes were stuffed or disappeared into the night only to return altered. Contrary to state law, county sheriffs running in contested elections maintained custody of the ballot boxes. In one instance, 20 voted ballot boxes were found in the attic of a sheriff's deputy after he died.

#### Attorney (1991-2004)

In my private practice as an attorney, I represented numerous clients in county election contests throughout Arkansas. I also represented clients in matters before the Federal Election Commission. I have never lost an election case. Finally, I was hired as a consultant to a major nonprofit legal organization to review and summarize the 2002 amendments to federal election laws and apply the new law to 10 scenarios.

#### Member, Washington County Board of Election Commissioners, Fayetteville, Arkansas (1990-1996)

This board consisted of three commissioners; I was the lone Republican. We were charged with supervising the training of poll workers, evaluating voting systems and then purchasing an optical scan system to be used countywide, preparing and justifying our annual budget before the Washington County Quorum Court, hiring and supervising staff and sitting as an administrative tribunal.

When I first came on the board, Washington County was primarily a one-party county and the Democrats were used to running elections according to tradition rather than the law. I had to battle with the two Democrats on the board to enforce election laws within the county. As I started to force the issue in the courts, the Republican Party gained strength. Four years later and after outlasting eight Democrat commissioners, I was able to work with new Democrat

commissioners who recognized the need to enforce the law. At this point, the commission requested that I draft administrative regulations for the board. These remain in place today.

Founder, President, General Counsel; Arkansans for Fair Elections (1994-1999)

In 1994, Gov. Mike Huckabee (R), then a candidate for lieutenant governor, asked me to serve as his general counsel for ballot fraud protection. Thinking it best to act independently of any candidate, I formed Arkansans for Fair Elections. I served as the organization's president and, later, general counsel. This group launched a statewide educational campaign to train poll watchers to recognize irregular or fraudulent electoral procedures; this included the creation of literature and a video. Our extensive public relations campaign brought media attention to the issue. We also organized a statewide team of citizen poll watchers and attorneys to ensure that the election laws were fairly enforced. We were so successful in the lieutenant governor's race that Arkansans for Fair Elections was asked to continue the effort until 1999 when I moved to Louisiana.

General Counsel - Ballot Fraud Protection Committee, Republican Party of Arkansas (1995-1999)

In late 1995, Asa Hutchinson, chairman of the Republican Party of Arkansas, appointed me as general counsel for the newly formed Ballot Fraud Protection Committee of the state party. I retained this position until 1999. I was responsible for coordinating statewide enforcement efforts and directing a legal team to respond to problematic situations prior to and on election day.

(Through my role with Arkansans for Fair Elections and the Ballot Fraud Protection Committee, I successfully sued or negotiated a settlement in more than two-thirds of the 75 counties in Arkansas over electoral irregularities.)

Legal Consultant to Republican Members of the Arkansas General Assembly (1994-1996)

Republicans in the General Assembly requested that I review and draft suggested changes to Arkansas election law. Based on my personal experience as an election commissioner and as an election attorney, I identified a number of areas of concern and drafted new statutes modeled on the best examples that I could find from other states. My proposal was not passed by the Democrat-controlled General Assembly as a package, however, several of its components were passed into law.

Consultant to the Arkansas Court of Appeals  
Redistricting Commission (1996-1999)

I drafted five redistricting bills and maps for the constitutionally required redistricting of the Arkansas Court of Appeals. These bills were based on current U.S. Supreme Court precedent regarding gerrymandering. I had to present each bill and give supporting testimony to the commission.

Director of International Development - Louisiana  
State University, Baton Rouge, Louisiana (2000-2003)

Part of my duties as director was to develop international cooperative projects. The theme of several of these proposals was democratization. In each case, I required review of the national election code of the country involved.

My activities in Namibia led to a request by the director of the Namibian Election Commission, Joram Rukambe and the Speaker of the Namibian National Assembly, Dr. Mose Tjitendero to review and suggest changes to the Namibian election code. This review took three months and resulted in proposed alterations a number of code sections. These suggestions were considered by the Namibian National Assembly and a number were incorporated into the code revisions. Additionally, I drafted legislation for the Speaker to guarantee voting rights to agricultural workers that were being denied by the owners of the farms. This legislation also was passed into law.

During this time, I was qualified as an election expert and placed on an election consultant list by the United Nations, IFES and the Electoral Institute of Southern Africa.

Subject Eagleton Peer Review Group

Karen,

I have reviewed the Eagleton Peer Review Group recruitment list that you recently provided. Based on what I or Amie can determine from the bio's provided or an Internet search, it appears that at least 4 of the 7 people who have said yes to be on the group seem to have a liberal perspective, or have had a history of working on that side of the political spectrum. I could only identify one as being a Republican, and a moderate one at that (Verniero). Mike Alvarez has conducted a lot of research into election issues and generally seems to do it in a neutral way. I have been unable to obtain a bio or background information on Tim Storey, who is not an academic. The only person that I could identify on their list as being conservative was Brad Clark, who has declined to participate.

Therefore, based on this information regarding the Peer Review Group, I am not satisfied that they will provide Eagleton with the balanced review that I thought they would receive from such a group. I would urge you to ask them to seek the input of more conservative academics so that whatever study we receive from them will have the benefit of a balanced review. I am going to have Amie provide you with the background sheet on Professor Tim O'Rourke of Salisbury University in Maryland, whom they may want to consider for this panel. We have some calls into others who could suggest some conservative academics for this review panel.

Thanks.

## **TALLY VOTE MEMORANDUM**

TO: EAC Commissioners Hillman, DeGregorio, Martinez, Davidson  
FROM: Thomas Wilkey, EAC Executive Director  
DATE: September 16, 2005  
RE: Consulting assistance with developing an Election Assistance Commission (EAC) Voting Fraud and Voter Intimidation Project

### **Background**

“On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b)” Sections 241(b) (6) and (7) list the following election administration issues:

(6) Nationwide statistics and methods of identifying, deterring and investigating voting fraud in election for Federal offices.

(7) Identifying, deterring and investigating methods of voter intimidation.

Building on this HAVA reference to studies of voting fraud and voter intimidation, the EAC Board of Advisors has indicated that further study of these issues, to determine how the EAC might respond to them, is a high priority.

The U.S. Election Assistance Commission (EAC) has identified two senior-level project consultants to develop various project activities and studies related to voting fraud and voter intimidation affecting Federal elections. The consultants, whose contracts would run for the period September-February, 2005, would be responsible for helping the EAC identify what constitutes voting fraud and voter intimidation affecting Federal elections.

To accomplish this the consultants will: perform background research, including Federal and state-by state administrative and case law review related to voting fraud and voter intimidation, along with a review of current voting fraud and voter intimidation activities taking place with key government agencies, civic and advocacy organizations; in consultation with EAC, identify and convene, a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation; develop an EAC project scope of work and a project work plan related to voting fraud and voter intimidation and; author a report summarizing the key findings of this preliminary study of voting fraud and voter intimidation.

### **Recommendation**

Attached is the Statement of Work for the voting fraud and voter intimidation project consultants. The consultant contract fees total \$110,000 (\$55,000 per person). An additional \$10,000 is allotted for the voting fraud and intimidation project working group. The total project amount is \$120,000.

Subject Couple of Items

Paul; I know I relayed this message to you through Aimee but just double checking to let you know that Eagleton put from FEC Commissioner Brad Smith on the peer review group. We have had a devil of a time getting anyone someone to return are calls from FEMA and have tried several places including the woman you recommended. I am having Donetta call her contact at the White House to see what he can do. We also extended an invitation to them to attend. And finally did you know you are a celebrity now. If you received the Carter/Baker report look under the section on Administration and there is a picture of a couple of guys from the EAC Safe Travels

Subject Eagleton's September Progress Report

Dear Ms. Karen Lynn Dyson:

My name is Johanna Dobrich and I have taken over the responsibility of sending the Eagleton Institute of Politics Monthly Progress Reports to you, in place of Lauren Vincelli.

Attached in this email you will find the Eagleton Institute of Politics monthly Progress Report for September 2005. Also attached, is a document called "PRG Summary Comments" which is an attachment to September's Progress Report.

Please email me at [jdobrich@eden.rutgers.edu](mailto:jdobrich@eden.rutgers.edu) to confirm that you have received this email. If you prefer I send a hard copy of these documents, in addition to the electronic version, please let me know.

Sincerely,

Johanna Dobrich

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.5
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from September 1 through September 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

We focused in September on refining our Provisional Voting research. This refinement was necessary to prepare a strong final analysis paper and develop alternative approaches to Provisional Voting based on the analysis. An important part of this refinement involved reconciling sometimes conflicting data on Provisional Voting from different sources, including the Election Day Study, which finally became available in September. With a clearer understanding of our data, we began the critical work of selecting alternatives to recommend to the EAC as guidance or best practices responsive to both our research and the needs of the Commission.

Three meetings this month helped us accomplish the necessary refinement. We briefed the EAC on our work on September 6, held the first meeting of the Peer Review Group (PRG) on September 21, and gained the benefit of the EAC's reaction to the September 6 briefing in a conference call on September 30.

The completion of our work on Provisional Voting has been delayed by the time needed to absorb and incorporate the findings of the EAC Election Day Study, to recruit and receive the comments of the PRG, and to receive the Commission's comments on the September 6 briefing. The schedule called for the release of the Election Day Study last spring, the submission of the Preliminary Guidance Document to the EAC's advisory boards in mid-September, and a public hearing on the Guidance Document in late October. We now plan to submit to the EAC a final draft of our report, a preliminary guidance document, and draft

best practices before the end of October. And we understand that after review of those materials, the EAC will decide whether to issue a guidance document or recommend best practices. Projecting a late November date for those decisions seems reasonable. If the EAC does decide to issue a Guidance Document on Provisional Voting, the time needed for a review by the advisory boards is likely to delay a public hearing until January.

While we have made a good start on the Voter ID sections of our research, most time and resources this month were dedicated to resolving issues involved in Provisional Voting.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to Tom O'Neill at: [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or (908) 794-1030.

## **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, and Task 3.5 is well underway.

**Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of Provisional Voting and develop alternative means to achieve the goals of Provisional Voting.**

### **LEGISLATION, REGULATIONS, AND LITIGATION**

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with Provisional Voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on Provisional Voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and is near completion with this research.

**Progress:** We have completed the memorandum outlining Provisional Voting legislative changes since the 2004 election and we are continuing to clarify the laws prior to these changes.

**Challenges:** The variety in the form and frequency of Provisional Voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The analysis of the information, data, and survey results concerning Provisional Voting was completed in September, on schedule. We are now revising it in response to comments by the Peer Review Group (PRG). We are also revising the alternatives document to reflect the critique of the PRG and the guidance from the EAC in response to the September 6 briefing.

### **PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING**

The Eagleton team has researched and compiled a narrative of each state's experience with Provisional Voting in 2004. The report findings from the survey of 400 local election officials are now complete. The survey results have proven to be instrumental in shaping our

understanding of actual practice in administering Provisional Voting, including the steps local officials took to prepare for the election.

### **PROVISIONAL VOTING NARRATIVES**

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with Provisional Voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to Provisional Voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** We completed a state-by-state narrative of developments in Provisional Voting and distributed it to the EAC and the PRG. This work has been helpful in understanding the context of the data collected on provisional voting from the states.

**Challenges:** The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent several revisions to incorporate up-to-date and reliable information. Now that so many other analyses, including the Election Day Survey, have been released, we were challenged by different interpretations of the same basic facts. But the reconciliation of interpretation and data collection has been invaluable in establishing rigor in our report.

**Work Plan:** We completed revisions of the narratives incorporating comments from the PRG.

### **PROVISIONAL VOTING STATISTICAL ANALYSIS**

**Description:** Throughout September the Eagleton research team revised and clarified its statistical analysis, and worked to reconcile the classifications of this analysis (such as states counting only those provisional ballots cast within the proper precinct versus states that counted ballots cast within the proper county) with the classification made in other parts of this study or in other studies (such as the Election Day Study or *Electionline* reports).

**Progress:** In response to comments from the PRG, we have clarified and sharpened the presentation on the methods used and results achieved in the statistical analysis. We have double checked the classification of variables upon which the study is based and reconciled differences in various areas of the overall study. This effort is nearing completion.

**Challenges:** The difficulties encountered have been a result of communication delays and time constraints. Overall, these are not problems or hindrances, but simply slow down the process.

026132

**Work Plan:** In mid-October we aim to complete a final revision of the statistical analysis and a full reconciliation of all data within the study.

### **SURVEY OF COUNTY ELECTION OFFICIALS**

**Description:** The Eagleton Center for Public Interest Polling (CPIP) conducted a national survey of county election officials to measure several aspects of Provisional Voting.

**Progress:** The analysis of the survey results and findings report is complete. As a result of the critique by the PRG, the research team is revising and clarifying the descriptions of the survey design and sample selection process to make the research methods more transparent.

**Work Plan:** We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5. We will include necessary clarifications regarding survey design and sample selection in the final analysis and alternatives document.

### **Peer Review Group**

Most members of the PRG met by telephone conference on September 21 to comment on all the research described above. Participating in the meeting were Michael Alvarez, Martha Kropf, Dan Lowenstein, Peter Verniero, Brad Smith, and Tim Storey. Timothy O'Rourke contributed his comments separately. The group provided a detailed critique of our approach, methods, and conclusions, and we are now revising each document in response to the comments and suggestions. It praised the quality of the work and the rigor of much of the analysis. A summary of the suggestions from the members of the PRG is attached to this report.

### **Challenges and Work Plan**

Making arrangements for review of drafts by the PRG and by the EAC has taken longer than anticipated by the Work Plan. The schedule called for all research and analysis to have been completed and incorporated into a Draft Preliminary Guidance Document by mid September. The review process by the EAC and PRG took longer than contemplated by the Work Plan. And we now understand that the EAC will make a separate decision—that will require additional time—whether to issue a Guidance Document or recommendations for best practices. It has not, therefore, been possible to schedule a public hearing or arrange for review of our work by the EAC's advisory boards, as called for in the Work Plan. We now aim to complete our reports and recommendations for guidance by the end of October, and to then await a response from the EAC before scheduling submission to the advisory boards or making arrangements for a hearing.

026133

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is becoming the principal focus of our research.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The 50 State (plus the District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** Analysis of voter identification data will begin now.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with increasing the rigor of voter ID requirements. We understand that the EAC has issued a

research contract that will focus on vote fraud and vote suppression. Our research in this area will be limited to developing an understanding of the tradeoffs between ballot security and access to the ballot. We have completed the basic database on voter identification issues has been completed, and the next key step will be drafting the first narratives.

### VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also utilized exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout.

**Challenges:** The analysis of these data has been postponed until the data reconciliation of Provisional Voting is complete. The main challenge now is an issue of time management. As a result of the extensive revision and data reconciliation efforts aimed at the Provisional Voting section of our work VID has been temporarily placed on hold.

**Work Plan:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed by early November.

026135

## **PROJECT MANAGEMENT**

### **PEER REVIEW GROUP**

**Description:** A feature of our proposal was the creation of a PRG. It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

**Progress:** The research team held its first conference call with PRG members on September 19, 2005. The research team will hold a workshop meeting on October 19, 2005 to address the PRG's comments.

**Challenges:** To date we still have not heard back from two PRG Members.

**Projections:** Revisions and clarifications to our reports on Provisional Voting will be resolved by the end of October. We will need to schedule a second conference call to review our research with regard to Voter Identification Requirements in late November. As noted earlier, a summary of the comments we have received from the PRG is attached to this report.

### **COORDINATION AND INFORMATION MANAGEMENT**

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

#### **INFORMATION SYSTEM**

**Description:** The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

**Progress:** At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole.

**Projections:** The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

#### **INTRANET**

026136

**Description:** All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

**Progress:** Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has helped team members and serves as an internal website with announcements and important documents readily available to all team members.

## FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project September 1- September 30, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

026137

*Peer Review Group  
Summary of Comments  
To the Eagleton/Moritz Group  
Under Contract to Provide Research Assistance to the EAC*

*October 15, 2005*

The Peer Review Group (PRG) met by telephone conference on September 21. Those participating included: Michael Alvarez, John C. Harrison, Martha Kropf, Dan Lowenstein, Peter Verniero, Brad Smith, and Tim Storey. This summary also includes additional written remarks submitted by Martha Kropf and additional remarks from a follow-up phone call with Timothy O'Rourke. We are now addressing all the comments including, in some cases, returning to members of the group to seek further elaboration or clarification.

We encouraged the members of the PRG to comment about any aspect of the project. We furnished them with these materials before the meeting.

1. Survey of local (mainly county) officials conducted in June 2005.
2. State-by-state narrative of developments in provisional voting
3. Statistical Analysis of state provisional voting
4. Memorandum on Provisional Voting Litigation
5. Memorandum on Provisional Ballot Litigation by State
6. July Memorandum on Provisional Ballot Litigation by Issue

We suggested that PRG members rank our draft responses to each of the six key questions posed by the EAC along these lines:

- 1- Research supports conclusions well.
- 2- Research supports some conclusions. Specific questions are:
- 3- Research does not support conclusions. Major problems are:

On the Alternatives paper, we asked PRG members to list up to three items they found questionable in light of the research and their own knowledge of provisional voting and election administration and to give us their thoughts on alternative policies that we had no included.

General Suggestions

1. Make transparently clear the meaning of 'old' versus 'new' states. It is not enough to categorize the states as such, we need to determine why specific states were considered 'old' or 'new' (i.e. clarify what conditions were met by old states).

2. Be **clear** in our report about the **data that we were unable to obtain** and perhaps speculate on why that data was not available. (For example, do we have the documentation the state election boards gave the localities regarding counting practices? If not, why not? Indicate the states for which it was difficult to obtain data.

3. Prescribe less and **describe more** (tell what voters/administrators have done, not what they should have done or ought to do).

4. Questioned our assumption about public trust – How do we know that decreases in disputes/challenges signify an increase in public trust? We need to explain this assertion.

#### Specific Review by Area of Analysis/Document

##### **Response to Statistical Review:**

- Challenged our emphasis on the number of provisional ballots counted as a percentage of those cast as an indication of success of Provisional Voting. Suggested alternative relationships to consider (PB v. Turnout, PB v. Registered Voters, and PB v. Voting age Population).
- Wanted the inclusion of variation within states among counties (and geographical considerations).
- The report needs to address the quality and validity of the data used in the analysis.
- On Page 8, cautioned using the estimate of 280,000 disenfranchised voters who would have voted if outside precinct voting was permitted.

##### **Response to Question Four:**

- Remove the comments in the footnote (p. 1) that offers an alternative way of analyzing the question relating to the possible increase in voter participation as a result of provisional voting because the margin of error in the Census survey does not support a conclusion at this level of significance.
- Address the alternative explanation for why old states may enfranchise more voters than new states (i.e. Kropf 's Failsafe option).
- Include a statistical summary of the relationship between the length of time a state has had PV and the rate at which votes are counted.

##### **Response to Question Five:**

- Is it possible to draw any conclusions about the local differences within and among states broken down by county (presumably 20 states worth)?

- Clarify what is meant by “design” and say how many states have/had provisional ballots that are designed differently and look different. Why is design important?
- Page 17 indicates that states with statewide voter databases end up validating fewer PVs. This is important & should be addressed in more detail.

#### **Response to Question Six:**

- On the usefulness of instructions, 98% said the instructions were useful. Make it clear that this represents 98% of the officials who got instruction.
- Is the passive voice the best means to communicate this information (for ex. "Second, objectively how well did the process appear to be managed?")

#### **Response to State Narratives:**

- When in doubt about whether we have data to support a sentence it is important to be careful about the language we use (say ‘doing XYZ would have revealed’ as opposed to ‘most of what we know about XYZ revealed’ ...)
- Clarify for the readers what is meant by "provisional vote/total vote". Does that mean provisional votes cast? Counted? Make it clear right at the beginning of every document?
- Footnote states that do not list poll sites or tell people where to vote with the fact that many cities/counties do have a poll finder.

#### **Election Official Survey**

- Clarify how we determined who to include in the sample and how we developed the questions in the survey (was a focus group an initial step?) Why were 3,800 election officials deemed eligible to participate (out of how many? 5,000 or so?)
- Clarify old and new states on pg. 2 in National Survey. Comment on how to assess fraud in provisional voting? What is the relationship between PV and turnout?
- Explore more issues about citizenship (18% non-citizen voting in CA)?
- Appendix A says survey was random, but it’s not. How was the data weighted for small, medium and large counties, and for other issues? Clarify this in the report.

- Why doesn't the total of new and old states equal 50 (25 and 18) and why does the National Survey of Election Officials have different numbers? Is FL an 'old' state?
- Are the New England states underrepresented in the survey? If so, why?
- Report should offer more information about the response rate.

#### **. Alternatives Document**

- The importance of clarity in state processes for both administrators and voters needs to be better articulated.  
(Better training of poll workers, clarity whether failure to check boxes disqualifies voters, access to better info. at polling locations)
- Cautions the use of definitive statements (such as A-3, perhaps say "This raises the question of...").
- Have other EAC Guidelines been tested in court yet?
- On page 3: the 'tracking number' in # 6 is not feasible. Also, "the information" in # 12 should be changed to "the website and 800 numbers" for clarification.
- Page 6, there were disagreements about # 1 and # 2 of options in Sec. F regarding the installation of a separate body to rule on PV for the integrity process; a motion was made to get rid of them.
- Page 6, Sec. E option # 1 should be eliminated or clarified
- Add to Sec. F a '# 5' requiring states to provide detailed public info. on PV

Subject Research Grants

History: This message has been replied to and forwarded.

Dear Commissioners:

On August 18 I sent you an email raising serious concerns over the awarding of a contract to the Moritz College of Law given its clearly demonstrated pre-existing opinions about provisional balloting and voter identification. Unfortunately, nothing was apparently done about this situation.

I have just learned that a similar situation has occurred. I understand that another research grant has been awarded to Tova Wang for research into "voter fraud and voter intimidation." Ms. Wang has an even more pronounced partisan and one-sided view of these issues than was present in the situation involving Moritz College. She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few examples illustrate this:

"It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor of the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

There are numerous more examples of her partisan opinions and attacks and demonstrably false claims against Republicans and election officials in general, such as her baseless charge in another article that

026142

"partisan election officials and party leaders usurped the process and manipulated the new federal voting law in ways that disenfranchised voters." Election 2004: A Report Card, 1/1/2005. The idea that she will write an objective report on issues that she has already expressed such strong opinions on ("there is no evidence that such election fraud is a serious problem") is hard to accept. I find it surprising that the EAC would award her a research grant or expect that election officials around the country would accept as valid a report written by an individual who asserts that "[a]t every step of the way, election officials in key states threw up unnecessary barriers to voting." Id. This gratuitous remark is an insult to the many hard-working election officials that we all know through our work who did everything they could during the last election to improve the election process and in large part succeeded.

Whatever procedures the EAC has set up to screen individuals and entities applying for research grants is obviously not working. I have no doubt that I could today, based on reading Ms. Wang's prior opinions, predict exactly what her report will conclude on the issues of voter fraud and voter intimidation. This situation needs to be corrected so that research is not being conducted by partisan individuals with preset opinions and views on issues. As with my prior email, I strongly recommend that the EAC reconsider the awarding of this contract.

Subject Job Serebrov

Voter Fraud experience

Worked for Mike Hucaby (sp??) in his Lieutenant Gov's race as counsel for ballot fraud protection

Formed and worked for Arkansans for Fair Elections (non-profit -- unofficial effort of the Rep. party) working on voter fraud issues (approximately 8 years). That included organizing a state ballot protection campaign, a video and written materials protection plan, and working on a variety of fraud issues (ballot stuffing, voting system fraud, counting issues), and handling legal issues.

Appointed by Asa Hutchinson to be counsel for ballot issues.

Federal election attorney for Fay (sp) Bozeman in the failed campaign.

Subject Re: Research Grants

Hans,

I wish you would have shown us the decency to have spoken to someone at the EAC before you sent this e-mail. Had you done so, you might have discovered that Ms. Wang was paired with Job Serebrov, a conservative attorney who, like you, has served on a local election board (Washington, Co, AK -Fayetteville). He has also worked on voting issues and election law in his practice, including voter fraud. He was counsel to the Arkansas GOP on ballot integrity issues and was the ballot protection specialist for Mike Huckabee in his campaign for Lt. Governor. In addition, Job formed and ran "Arkansans for Fair Elections", a non-partisan group that looked to investigate and prevent voter fraud issues. He headed that group for 8 years. Job served the Republican Party of Arkansas as the Chairman of the Committee for the Revision of the State Constitution.

Thor Hearne called me last week to indicate that Job had called him to be on the working group that Job and Ms. Wang are putting together to look at the voter fraud/voter intimidation issues.

Job was recommended to the EAC for this work by Julie Thompson. His references included two US 8th Circuit judges appointed by GOP presidents: Morris Arnold and Lavenski Smith.

You may recall that the Advisory Board made it clear to the EAC that they thought the Voter Fraud/Voter Intimidation issues should be studied together. That's why Ms. Wang has been paired with Mr. Serebrov to do this study.

Julie tells me that she had a wide-ranging discussion with you last week but you never brought this issue up. It's too bad, as it may have prevented you from sending an e-mail to so many people that contains only half the story.

She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few examples illustrate this:

026155

"It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor of the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

There are numerous more examples of her partisan opinions and attacks and demonstrably false claims against Republicans and election officials in general, such as her baseless charge in another article that "partisan election officials and party leaders usurped the process and manipulated the new federal voting law in ways that disenfranchised voters." Election 2004: A Report Card, 1/1/2005. The idea that she will write an objective report on issues that she has already expressed such strong opinions on ("there is no evidence that such election fraud is a serious problem") is hard to accept. I find it surprising that the EAC would award her a research grant or expect that election officials around the country would accept as valid a report written by an individual who asserts that "[a]t every step of the way, election officials in key states threw up unnecessary barriers to voting." Id. This gratuitous remark is an insult to the many hard-working election officials that we all know through our work who did everything they could during the last election to improve the election process and in large part succeeded.

Whatever procedures the EAC has set up to screen individuals and entities applying for research grants is obviously not working. I have no doubt that I could today, based on reading Ms. Wang's prior opinions, predict exactly what her report will conclude on the issues of voter fraud and voter intimidation. This situation needs to be corrected so that research is not being conducted by partisan individuals with preset opinions and views on issues. As with my prior email, I strongly recommend that the EAC reconsider the awarding of this contract.

Hans,

I wish you would have shown us the decency to have spoken to someone at the EAC before you sent this e-mail. Had you done so, you might have discovered that Ms. Wang was paired with Job Serebrov, a conservative attorney who, like you, has served on a local election board (Washington, Co, AK -Fayetteville). He has also worked on voting issues and election law in his practice, including voter fraud. He was counsel to the Arkansas GOP on ballot integrity issues and was the ballot protection specialist for Mike Hucabee in his campaign for Lt. Governor. In addition, Job formed and ran "Arkansans for Fair Elections", a non-partisan group that looked to investigate and prevent voter fraud issues. He headed that group for 8 years. Job served the Republican Party of Arkansas as the Chairman of the Committee for the Revision of the State Constitution.

Thor Hearne called me last week to indicate that Job had called him to be on the working group that Job and Ms. Wang are putting together to look at the voter fraud/voter intimidation issues.

Job was recommended to the EAC for this work by Julie Thompson. His references included two US 8th Circuit judges appointed by GOP presidents: Morris Arnold and Lavenski Smith.

You may recall that the Advisory Board made it clear to the EAC that they thought the Voter Fraud/Voter Intimidation issues should be studied together. That's why Ms. Wang has been paired with Mr. Serebrov to do this study.

Julie tells me that she had a wide-ranging discussion with you last week but you never brought this issue up. It's too bad, as it may have prevented you from sending an e-mail to so many people that contains only half the story.

Research Grants

Dear Commissioners:

On August 18 I sent you an email raising serious concerns over the awarding of a contract to the Moritz College of Law given its clearly demonstrated pre-existing opinions about provisional balloting and voter identification. Unfortunately, nothing was apparently done about this situation.

I have just learned that a similar situation has occurred. I understand that another research grant has been awarded to Tova Wang for research into "voter fraud and voter intimidation." Ms. Wang has an even more pronounced partisan and one-sided view of these issues than was present in the situation involving Moritz College. She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few examples illustrate this:

"It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor or the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

Subject Call from Paul Vinovich

I took a telephone call this morning from Paul Vinovich. He had attempted to reach Gracia, but since she was not here, he asked Sheila if I was in the office so he spoke to me.

Paul was very upset with comments that Tova Wang had made at yesterday's AEI's meeting in which she basically indicated that voter fraud did not exist in the USA. He asked how a person who believes that voter fraud does not exist--or not seem at least willing to listen to both sides--can be hired by the EAC to do a study on voter fraud/voter intimidation. I explained to Paul (as I have now had to explain to many others) that Tova was "balanced" on the study with Job Severbrov. He did not know Job but was well-aware of Tova's positions and was concerned that her public comments indicate that she will not be fair in looking at this issue. I explained to Paul that we were monitoring the work of our consultants on this study and no report would be issued publicly without the support of at least three commissioners. I sent him some background information on Job. I think this study will need close monitoring.

Subject Receipt of Eagleton Voter Identification paper by tomorrow at  
9:00 AM

Commissioners-

I just received a call from Tom O'Neill, Project Manager for the Eagleton/Moritz contract, indicating that the peer review team has not completed their final review of the Voter Identification paper. They are scheduled to have a conference call at 9:00 PM tonight to go over the final review.

I am told I will receive the final Voter Id paper by 9:00 AM, tomorrow morning .

**U.S. ELECTION ASSISTANCE COMMISSION  
STANDARDS BOARD**

**RESOLUTION 2006-01**

WHEREAS, the U.S. Election Assistance Commission is conducting studies and research on a wide variety of subjects related to elections.

RESOLVED that the Standards Board recommends—

- The EAC carefully review each study and recommendation of researchers to ensure that findings are based on facts that are clearly defended by quantitative data, rather than suspicions or assumptions;
- The EAC require researchers to study and report on the practicality and expense of implementing each recommendation;
- Election Day survey questions be considered and completed and noticed to states no later than two years before the election in which the data is to be collected.

Subject The "Fraud/Intimidation" Report

Tom:

In light of your announcement this morning about Peg's continued illness, I am asking who has taken the responsibility to complete EAC internal review of the information that was submitted to us by the consultants and what is the timeline for completion of that review?

I am taking far too much criticism on this to just idly sit by saying "I don't know" when EAC will release the information.

Thank you,  
Gracia

Subject Meeting with EAC Staff

History

This message has been replied to

FYI - Donetta and I had a good session with EAC staff this morning. We took the liberty of saying that our comments reflected your sentiments as well.

We thanked the staff for its hard work and continued dedication. We discussed the need for EAC to have a rapid response capability when issues arise that warrant an EAC response. We talked about how details matter; the importance of all press calls being routed to Jeannie (or Bryan) and all inquiries from Congress being routed to Julie; and not reporting or answering questions on another staff person's area of responsibility. We also discussed that everything we do is governed by HAVA and EAC policies and procedures and that staff should be diligent to check this information as they work on their projects.

We briefed about the Fraud Report firestorm; the news reports of Sequoia; and asked Tom to make sure that staff receive copies of the information that we are sending to Election Officials about the Sequoia story.

We emphasized that we know that the commissioners set the culture for the staff's work environment and that we wanted them to know what we are saying and how and why we respond the way we do to various inquiries.

I also briefed about upcoming changes in the members of the commission, explaining that while we know there will be changes, we don't know exactly when the new commissioners will come on board. I explained that I am in hold over status.

I think this summary covers the main points pretty well. The feedback I received is that the session was appreciated and well received by staff

Subject Urgent-- FOIA Request Eagleton materials

All-

As everyone knows, we have a FOIA request which involves, in part, materials from the Eagleton/Moritz contract.

In an effort to pull these materials together I have gone to the EAC Contracts file (located outside of Tom's office) only to discover one of the binders is missing. The binder was there last week and is now missing.

If you have this Eagleton Contract Binder 1 (4 inches thick) please return to me ASAP.

Thanks

EAC News Release ( 12-7-06 ) Cert Program Adopted - 1.doc

**Draft Q&A - EAC's Testing and Certification Program for Voting Systems (internal reference only)**

Revised Certification QA v2 ( BH rev ).doc

###

**Draft Press Release - EAC Releases Findings of Voting Fraud and Voter Intimidation Study**

No consensus on the regularity of voting fraud and voting intimidation found  
Agency accepts recommendations to conduct a comprehensive study on elections crimes

WASHINGTON - The United States Election Assistance Commission (EAC) today voted on the findings of the "Voting Fraud and Voter Intimidation Study" and accepted recommendations to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

The study represents the first phase of the information gathering process. The second phase, which the EAC voted to proceed with, is a more comprehensive data-driven survey and study of elections crimes and voter intimidation and will also offer consistency to the study and the public dialogue of the issue identifying a common definition of the issue for the use of elections officials, civil rights and voter advocacy groups, law enforcement officials and attorneys.

The recommendations accepted by EAC today include:

- Survey Chief Elections Officers to Review and Assess Administrative Complaints: EAC will survey the states' chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004.

026170

- **Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred:** EAC will gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004.
- **Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes:** EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges, or indictments, and pleas or convictions of election crimes since January 1, 2004.
- **Analyze Survey Data in Light of State Laws and Procedures:** EAC will use the reliable data gathered from each survey group to analyze the effectiveness of fraud prevention and reporting measures.

In order to arrive at the findings, EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field regarding their experiences and research. According to the findings, while there is currently no consensus on the frequency of voting fraud and voter intimidation, most participants agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud.

Following today's vote to approve the survey recommendations, EAC will begin a comprehensive survey and subsequent study on voting fraud and voter intimidation based on hard data. Section 241 of the Help America Vote Act of 2002 (HAVA) mandates that EAC research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC in consultation with the Standards Board and Board of Advisors selected voting fraud and voter intimidation from a list of potential research topics that serve to improve the administration of elections for federal office.

For the EAC's full report on the Voting Fraud and Voter Intimidation Study or to view testimony from today's hearing, visit [www.eac.gov](http://www.eac.gov).

###

### **Draft Press Release - EAC Approves Voting System Testing & Certification Program Standards**

**New Program is First for Federal Government**

WASHINGTON - The United States Election Assistance Commission (EAC) today voted to approve a new voluntary program for the testing and certification of voting systems. Today's approval marks the first time that the Federal Government will have the authority to provide certification, decertification and recertification of voting system hardware and software used during the federal election process, and the accreditation of testing laboratories. The new program is scheduled for implementation beginning in January 2007.

"Election reform has made great improvements since the enactment of the Help America Vote Act in 2002," said Paul DeGregorio, Chairman of the Election Assistance Commission. "EAC's new testing and certification program is one more step in the federal election process to ensure the integrity and reliability of voting system operation."

A webcast of today's meeting can be accessed Friday at [www.eac.gov](http://www.eac.gov).

The new program which provides information and procedures to manufacturers for the testing and certification of voting systems consistent with the requirements of the Help America Vote Act (HAVA), also supports state certification programs and provides information and support to state elections officials for acceptance testing and pre-election system verification, and increased quality control in voting system manufacturing and increased voter confidence in the use of electronic voting systems.

**026171**

Under the new program the National Institute of Standards and Technology (NIST) will assist EAC through the National Voluntary Laboratory Accreditation Program (NVLAP), which will provide recommendations to EAC for final determination regarding the accreditation of laboratories used to test voting systems.

While participation in EAC's new voting system testing and certification program is voluntary, states and manufacturers are encouraged to send their machines through the new program to ensure an added layer of security and protection against voting irregularities. States and voting system manufacturers that choose to participate in the program must comply with the program's mandatory procedural requirements, which will include random reviews and spot checks of voting systems currently used in the field through EAC's Quality Monitoring Program to ensure that those systems match the records of systems certified by EAC.

Voting systems that do not meet the requirements of the EAC Voluntary Voting System Guideline standards risk being decertified and will be removed from EAC's list of certified voting systems. Additionally, laboratories will be held accountable under the accreditation requirements and international lab standards and could risk losing accreditation by both EAC and NVLAP if a violation of those standards occurs.

Prior to the passage of HAVA, voting systems were assessed and qualified by the National Association of State Elections Directors (NASSED), a non-partisan association consisting of elections directors nationwide. EAC developed the new voting system testing and certification program in response to required mandates under HAVA, which was enacted in 2002. To date, approximately 40 states currently require voting systems to be certified at the national level.

###

**Draft Q&A - EAC's Testing and Certification Program for Voting Systems (internal reference only)**

#### **EAC's Testing and Certification Program for Voting Systems**

Prior to the passage of The Help America Vote Act (HAVA), voting systems were assessed and qualified by The National Association of State Election Directors (NASSED), a nonpartisan association consisting of election directors nationwide. These voting systems were tested against the 1990 and 2002 voting system standards.

In 2005, the Election Assistance Commission (EAC) adopted the first set of voluntary voting system guidelines, as mandated under HAVA. HAVA also requires that EAC provide certification, decertification, and recertification of voting systems and the accreditation of testing laboratories, marking the first time the federal government will be responsible for these activities. Under HAVA, NIST will assist the EAC with the certification program through its National Voluntary Laboratory Accreditation Program (NVLAP), and will provide recommendations to the EAC regarding laboratory accreditation. EAC will make the final decision to accredit laboratories based upon the information provided by NVLAP. Participation by states in EAC's certification program is voluntary; however, most states currently require national certification for the voting systems used in their jurisdictions.

#### **EAC's Voting System Testing and Certification Program**

In July 2006, EAC adopted a two phase implementation of its Voting System Testing and Certification Program. The two phases consist of (1) the pre-election or interim phase, and (2) the full testing and certification program. The interim phase began in July, and covers only modifications to voting systems. EAC Commissioners will vote today to approve adoption of the full program. If approved, implementation of the full program will begin in January 2007.

The purpose of EAC's national voting system certification program is to independently verify that voting systems comply with the functional capabilities, accessibility, and security requirements necessary to

026172

ensure the integrity and reliability of voting system operation.

## Frequently Asked Questions

Q: How long has the federal government tested voting equipment?

A: The Help America Vote Act (HAVA) ushered in federal assistance for the certification of voting equipment for the first time, tasking EAC and the National Institute of Standards and Technology (NIST) to partner in implementing and administering the program.

Q: Who had the authority to certify voting equipment in the past?

A: In the past, voting systems have been reviewed and certified by the National Association of State Election Directors (NASSED). NASSED performed this service on a volunteer basis and received no federal funding. Most of the voting systems in use today were qualified by NASSED.

Q: How will the certification process work?

A: Under HAVA, NIST and the EAC are jointly responsible for creating the voluntary voting system guidelines. These guidelines include a set of specifications and requirements against which voting systems can be tested to determine if the systems provide all of the basic functionality, accessibility and security capabilities required of these systems. In addition, the guidelines establish evaluation criteria for the national certification of voting systems. NIST assists the EAC with the certification program through its National Voluntary Laboratory Accreditation Program (NVLAP), which will provide recommendations to the EAC regarding laboratory accreditation. After EAC receives the recommendations from NVLAP, the agency's executive director will make the final determination regarding test lab accreditation.

Q: Why will manufacturers be allowed to pay test labs directly?

A: EAC does not have the legal authority to collect money from voting system manufacturers to pay for the testing of voting systems. (see 31 U.S.C. §3302(b), Miscellaneous Receipts Act). However, if Congress grants the EAC statutory authority to collect and use such funds, we would certainly consider alternative approaches.

Q: Why will manufacturers be allowed to choose which test lab to use?

A: Regardless of which lab conducts the work, all labs will be held accountable under the accreditation requirements and international lab standards. If a lab violates either EAC policy or the international standards, it could risk losing its accreditation by both EAC and NVLAP. The concept of manufacturers contracting with independent test labs is consistent with numerous other federal government and private sector testing programs.

Q: Will the source code be available to the public?

A: EAC will make all information available to the public consistent with federal law. EAC is prohibited under the Trade Secrets Act (18 U.S.C. §1905) from making the source code information available to the public. However, as necessary, the test labs and EAC's technical reviewers will examine the source code to ensure compliance with the voluntary voting system guidelines.

Q: What does EAC's interim accreditation program cover?

A: EAC's interim program issued temporary accreditation to test labs to check modifications to voting systems currently in use. In order to participate in the program, labs applying for interim certification had to attest to a set of EAC required laboratory conditions and practices. EAC requirements for these labs included certifying the integrity of personnel; no conflicts of interest, which covers not only personnel but also their immediate family; as well as the financial stability of the laboratory. EAC hired a NVLAP-trained assessor to verify that these labs successfully met the 17025 standards set by the International Standards Organization. Interim accreditation was necessary to ensure there was no interruption in this process leading up to the November 2006 elections, as NVLAP is currently completing the process of accrediting labs under the HAVA-required program.

Q: Will EAC track problems that occur in the field?

A: Absolutely. EAC's certification program establishes accountability through its Quality Monitoring Program which ensures, through various check points, that the voting systems used in the field are in fact the same systems EAC has certified. For instance, under the program, EAC has the ability to conduct site visits to production facilities to determine whether systems produced are consistent with those that have received EAC certification. EAC will collect reports from election officials regarding voting system anomalies. After reviewing the reports, EAC will share credible information with election officials. In addition, upon invitation or with permission from election officials, EAC will conduct reviews of systems that are in use in the field.

Q: Did EAC track problems that occurred during the November 2006 election?

A: EAC's full certification program will be implemented in early 2007; however, EAC did work with elections officials throughout the country to track potential issues and concerns. As we move forward with implementation of the full program, we will continue to work with election officials to share information and provide assistance.

Q: Why didn't EAC vote to adopt the full certification program prior to the November 2006 election?

A: EAC began its first year of operation in 2004, and the first priority under HAVA was the adoption of voluntary voting system guidelines. EAC adopted the guidelines in 2005, meeting the HAVA-mandated deadline. Resources and staff allocation dictated that EAC begin developing the certification program immediately following the adoption of the guidelines.

Q: Will EAC make test reports available to the public?

A: EAC will make test reports and all related information available to the public consistent with federal law.

Q: Under the EAC certification program, will there be any repercussions for a manufacturer that misrepresents its product or refuses to address valid system failures?

A: For the first time, manufacturers will be held accountable through not only the Quality Monitoring Program, but also under the decertification process, which would be the ultimate sanction against a manufacturer. If a system is decertified, the manufacturer may not represent the system as being certified, may not label the system as certified, and the system will be removed from the EAC's list of certified voting systems. Election officials will be notified about the decertification.

Q: Do states have to use voting systems that have been certified by the EAC?

A: According to HAVA, participation in EAC's certification program is voluntary. However, approximately 40 states have required that voting systems used in their jurisdictions to have a national certification.

## **EAC Releases Findings of Voting Fraud and Voter Intimidation Study**

*No consensus on the regularity of voting fraud and voting intimidation found  
Agency accepts recommendations to conduct a comprehensive study on elections crimes*

**WASHINGTON** – The United States Election Assistance Commission (EAC) today voted on the findings of the “Voting Fraud and Voter Intimidation Study” and accepted recommendations to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

The study represents the first phase of the information gathering process. The second phase, which the EAC voted to proceed with, is a more comprehensive data-driven survey and study of elections crimes and voter intimidation and will also offer consistency to the study and the public dialogue of the issue identifying a common definition of the issue for the use of elections officials, civil rights and voter advocacy groups, law enforcement officials and attorneys.

The recommendations accepted by EAC today include:

- **Survey Chief Elections Officers to Review and Assess Administrative Complaints:** EAC will survey the states’ chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004.
- **Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred:** EAC will gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004.
- **Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes:** EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges, or indictments, and pleas or convictions of election crimes since January 1, 2004.
- **Analyze Survey Data in Light of State Laws and Procedures:** EAC will use the reliable data gathered from each survey group to analyze the effectiveness of fraud prevention and reporting measures.

026175

In order to arrive at the findings, EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field regarding their experiences and research. According to the findings, while there is currently no consensus on the frequency of voting fraud and voter intimidation, most participants agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud.

Following today's vote to approve the survey recommendations, EAC will begin a comprehensive survey and subsequent study on voting fraud and voter intimidation based on hard data. Section 241 of the Help America Vote Act of 2002 (HAVA) mandates that EAC research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC in consultation with the Standards Board and Board of Advisors selected voting fraud and voter intimidation from a list of potential research topics that serve to improve the administration of elections for federal office.

For the EAC's full report on the Voting Fraud and Voter Intimidation Study or to view testimony from today's hearing, visit [www.eac.gov](http://www.eac.gov).

EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The three EAC commissioners are Paul DeGregorio, chairman; Donetta Davidson and Gracia Hillman. One vacancy currently exists.

## **EAC Approves Voting System Testing & Certification Program Standards** *New Program is First for Federal Government*

**WASHINGTON** – The United States Election Assistance Commission (EAC) today voted to approve a new voluntary program for the testing and certification of voting systems. Today’s approval marks the first time that the Federal Government will have the authority to provide certification, decertification and recertification of voting system hardware and software used during the federal election process, and the accreditation of testing laboratories. The new program is scheduled for implementation beginning in January 2007.

“Election reform has made great improvements since the enactment of the Help America Vote Act in 2002,” said Paul DeGregorio, Chairman of the Election Assistance Commission. “EAC’s new testing and certification program is one more step in the federal election process to ensure the integrity and reliability of voting system operation.”

*A webcast of today’s meeting can be accessed Friday at [www.eac.gov](http://www.eac.gov).*

The new program which provides information and procedures to manufacturers for the testing and certification of voting systems consistent with the requirements of the Help America Vote Act (HAVA), also supports state certification programs and provides information and support to state elections officials for acceptance testing and pre-election system verification, and increased quality control in voting system manufacturing and increased voter confidence in the use of electronic voting systems.

Under the new program the National Institute of Standards and Technology (NIST) will assist EAC through the National Voluntary Laboratory Accreditation Program (NVLAP), which will provide recommendations to EAC for final determination regarding the accreditation of laboratories used to test voting systems.

While participation in EAC’s new voting system testing and certification program is voluntary, states and manufacturers are encouraged to send their machines through the new program to ensure an added layer of security and protection against voting irregularities. States and voting system manufacturers that choose to participate in the program must comply with the program’s mandatory procedural requirements, which will include random reviews and spot checks of voting systems currently used in the field through EAC’s Quality Monitoring Program to ensure that those systems match the records of systems certified by EAC.

026177

Voting systems that do not meet the requirements of the EAC Voluntary Voting System Guideline standards risk being decertified and will be removed from EAC's list of certified voting systems. Additionally, laboratories will be held accountable under the accreditation requirements and international lab standards and could risk losing accreditation by both EAC and NVLAP if a violation of those standards occurs.

Prior to the passage of HAVA, voting systems were assessed and qualified by the National Association of State Elections Directors (NASED), a non-partisan association consisting of elections directors nationwide. EAC developed the new voting system testing and certification program in response to required mandates under HAVA, which was enacted in 2002. To date, approximately 40 states currently require voting systems to be certified at the national level.

EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The three EAC commissioners are Paul DeGregorio, chairman; Donetta Davidson and Gracia Hillman. One vacancy currently exists.

###

026178

## **EAC's Testing and Certification Program for Voting Systems**

Prior to the passage of The Help America Vote Act (HAVA), voting systems were assessed and qualified by The National Association of State Election Directors (NASSED), a nonpartisan association consisting of election directors nationwide. These voting systems were tested against the 1990 and 2002 voting system standards.

In 2005, the Election Assistance Commission (EAC) adopted the first set of voluntary voting system guidelines, as mandated under HAVA. HAVA also requires that EAC provide certification, decertification, and recertification of voting systems and the accreditation of testing laboratories, marking the first time the federal government will be responsible for these activities. Under HAVA, NIST will assist the EAC with the certification program through its National Voluntary Laboratory Accreditation Program (NVLAP), and will provide recommendations to the EAC regarding laboratory accreditation. EAC will make the final decision to accredit laboratories based upon the information provided by NVLAP. Participation by states in EAC's certification program is voluntary; however, most states currently require national certification for the voting systems used in their jurisdictions.

### **EAC's Voting System Testing and Certification Program**

In July 2006, EAC adopted a two phase implementation of its Voting System Testing and Certification Program. The two phases consist of (1) the pre-election or interim phase, and (2) the full testing and certification program. The interim phase began in July, and covers only modifications to voting systems. EAC Commissioners will vote today to approve adoption of the full program. If approved, implementation of the full program will begin in January 2007.

The purpose of EAC's national voting system certification program is to independently verify that voting systems comply with the functional capabilities, accessibility, and security requirements necessary to ensure the integrity and reliability of voting system operation.

## Frequently Asked Questions

**Q: How long has the federal government tested voting equipment?**

A: The Help America Vote Act (HAVA) ushered in federal assistance for the certification of voting equipment for the first time, tasking EAC and the National Institute of Standards and Technology (NIST) to partner in implementing and administering the program.

**Q: Who had the authority to certify voting equipment in the past?**

A: In the past, voting systems have been reviewed and certified by the National Association of State Election Directors (NASED). NASED performed this service on a volunteer basis and received no federal funding. Most of the voting systems in use today were qualified by NASED.

**Q: How will the certification process work?**

A: Under HAVA, NIST and the EAC are jointly responsible for creating the voluntary voting system guidelines. These guidelines include a set of specifications and requirements against which voting systems can be tested to determine if the systems provide all of the basic functionality, accessibility and security capabilities required of these systems. In addition, the guidelines establish evaluation criteria for the national certification of voting systems. NIST assists the EAC with the certification program through its National Voluntary Laboratory Accreditation Program (NVLAP), which will provide recommendations to the EAC regarding laboratory accreditation. After EAC receives the recommendations from NVLAP, the agency's executive director will make the final determination regarding test lab accreditation.

**Q: Why will manufacturers be allowed to pay test labs directly?**

A: EAC does not have the legal authority to collect money from voting system manufacturers to pay for the testing of voting systems. (see 31 U.S.C. §3302(b), *Miscellaneous Receipts Act*). However, if Congress grants the EAC statutory authority to collect and use such funds, we would certainly consider alternative approaches.

**Q: Why will manufacturers be allowed to choose which test lab to use?**

A: Regardless of which lab conducts the work, all labs will be held accountable under the accreditation requirements and international lab standards. If a lab violates either EAC policy or the international standards, it could risk losing its accreditation by both EAC and NVLAP. The concept of manufacturers contracting with independent test labs is consistent with numerous other federal government and private sector testing programs.

**Q: Will the source code be available to the public?**

A: EAC will make all information available to the public consistent with federal law. EAC is prohibited under the Trade Secrets Act (18 U.S.C. §1905) from making the source code information available to the public. However, as necessary, the test labs and EAC's technical reviewers will examine the source code to ensure compliance with the voluntary voting system guidelines.

**Q: What does EAC's interim accreditation program cover?**

**A:** EAC's interim program issued temporary accreditation to test labs to check modifications to voting systems currently in use. In order to participate in the program, labs applying for interim certification had to attest to a set of EAC required laboratory conditions and practices. EAC requirements for these labs included certifying the integrity of personnel; no conflicts of interest, which covers not only personnel but also their immediate family; as well as the financial stability of the laboratory. EAC hired a NVLAP-trained assessor to verify that these labs successfully met the 17025 standards set by the International Standards Organization. Interim accreditation was necessary to ensure there was no interruption in this process leading up to the November 2006 elections, as NVLAP is currently completing the process of accrediting labs under the HAVA-required program.

**Q; Will EAC track problems that occur in the field?**

**A:** Absolutely. EAC's certification program establishes accountability through its Quality Monitoring Program which ensures, through various check points, that the voting systems used in the field are in fact the same systems EAC has certified. For instance, under the program, EAC has the ability to conduct site visits to production facilities to determine whether systems produced are consistent with those that have received EAC certification. EAC will collect reports from election officials regarding voting system anomalies. After reviewing the reports, EAC will share credible information with election officials. In addition, upon invitation or with permission from election officials, EAC will conduct reviews of systems that are in use in the field.

**Q: Did EAC track problems that occurred during the November 2006 election?**

**A:** EAC's full certification program will be implemented in early 2007; however, EAC did work with elections officials throughout the country to track potential issues and concerns. As we move forward with implementation of the full program, we will continue to work with election officials to share information and provide assistance.

**Q: Why didn't EAC vote to adopt the full certification program prior to the November 2006 election?**

**A:** EAC began its first year of operation in 2004, and the first priority under HAVA was the adoption of voluntary voting system guidelines. EAC adopted the guidelines in 2005, meeting the HAVA-mandated deadline. Resources and staff allocation dictated that EAC begin developing the certification program immediately following the adoption of the guidelines.

**Q: Will EAC make test reports available to the public?**

**A:** EAC will make test reports and all related information available to the public consistent with federal law.

**Q: Under the EAC certification program, will there be any repercussions for a manufacturer that misrepresents its product or refuses to address valid system failures?**

**A:** For the first time, manufacturers will be held accountable through not only the Quality Monitoring Program, but also under the decertification process, which would be the ultimate sanction against a manufacturer. If a system is decertified, the manufacturer may not represent the system as being certified, may not label the system as certified, and the system will be removed from the EAC's list of certified voting systems. Election officials will be notified about the decertification.

**Q: Do states have to use voting systems that have been certified by the EAC?**

**A:** According to HAVA, participation in EAC's certification program is voluntary. However, approximately 40 states have required that voting systems used in their jurisdictions to have a national certification.

**EAC Releases Findings of Voting Fraud and Voter  
Intimidation Study**

***No consensus on the regularity of voting fraud and voting intimidation found  
Agency accepts recommendations to conduct a comprehensive study on elections crimes***

**WASHINGTON** - The United States Election Assistance Commission (EAC) today voted on the findings of the "Voting Fraud and Voter Intimidation Study" and accepted recommendations to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

The study represents the first phase of the information gathering process and includes a working definition of election crimes. EAC will now proceed with the second phase, a more comprehensive data-driven survey and study of elections crimes and voter intimidation. The new phase will offer consistency to the study and will identify a common definition of the issue for dialogue among elections officials, civil rights and voter advocacy groups, law enforcement officials, attorneys and the public.

026183

The recommendations accepted by EAC today include:

**Survey Chief Elections Officers to Review and Assess Administrative Complaints:** EAC will survey the states' chief election officers regarding complaints that have been filed, investigated and resolved since January 1, 2004.

**Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred:** EAC will gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004.

**Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes:** EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges, or indictments, and pleas or convictions of election crimes since January 1, 2004.

**Analyze Survey Data in Light of State Laws and Procedures:** EAC will use the reliable data gathered from each survey group to analyze the effectiveness of fraud prevention and reporting measures.

In order to arrive at the findings, EAC consultants reviewed existing studies, articles, reports and case law on voting fraud and intimidation and conducted interviews with experts in the field regarding their experiences and research. According to the findings, while there is currently no consensus on the frequency of voting fraud and voter intimidation, most participants agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud.

Following today's vote to approve the survey recommendations, EAC will begin a comprehensive survey and subsequent study on voting fraud and voter intimidation based on hard data. Section 241 of the Help America Vote Act of 2002 (HAVA) mandates that EAC research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC in consultation with the Standards Board and Board of Advisors selected voting fraud and voter intimidation from a list of potential research topics that serve to improve the administration of elections for federal office.

Subject Vote fraud in NL

There is one topic that we did not mention in the report in any depth that is probably worth mentioning. It leads me to wonder if we overstated our positive confidence in the system.

Irina Shirokova and I met with Robert Loeb, member of the Council of State. He said that there is fraud in the Netherlands but that it is usually at the municipal level. He said that in 20 years, electronic voting had never led to any judicial questions.

However, that same day, Irina and I met with people from the Netherlands Committee of Jurists for Human Rights. There, we heard the story of a case that is currently being prosecuted. My notes from that meeting on this subject read as follows:

> They began with a comment on Rop Gonggrijp's work. Then they  
> presented a case of municipal corruption, in which a member  
> of the council in the town of Zeeland in Brabant was a polling  
> place worker and spent the election day standing not behind  
> but in front of the voting machine at the polling place. At  
> the end of the day, with about 1000 votes cast on that machine,  
> the totals showed 181 votes for him. A journalist from a  
> small local paper was suspicious and phoned a number of voters.  
> Only one admitted to voting for the man in question. The  
> prosecution of this case began in August, all voters were asked  
> how they voted, and 800 to 800 responded to the reply, few  
> indicating a vote for the man. A paper trail might have helped  
> in this case. TNO and Nedap have both checked the computer and  
> concluded that there is nothing wrong with it. One speculation  
> is that the man used the key switch to force the machine to  
> indicate "voting complete" (or some such) prematurely, allowing  
> him to slip into the booth and cast extra votes. The court  
> case will not mention the man's name unless he is convicted,  
> but in newspaper reports, the name is Mr. Te Meerman.

I did a web search on keywords from this incident and found significant coverage, all in Dutch. The keywords I used in Google were: zeeland brabant 181 meerman.

http:// [REDACTED]  
Brabants Dagblad  
(there are a total of 12 articles in this paper)

http:// [REDACTED]  
BITS OF FREEDOM Nieuwsbrief -- item 2 in this blog  
discusses this case, with several links.

Subject EAC Fraud Report 

Dear Bruce,

I hope this note finds you well. I wanted you to know that the EAC recently released our initial study on voter fraud and intimidation. I have attached it to this e-mail. It can also be found, along with the four appendices, at our website: [www.eac.gov](http://www.eac.gov)

As you will see, the report brings the focus to a discussion of election crimes, along with some definitions. It also begs for more study in this area. I thought you might find the report and the appendices useful in your research on this topic.

I recently spent a two weeks in the Netherlands on an OSCE EAM mission to the Netherlands. Our leader was your good friend Julian Peel Yates. He did a fantastic job as head of the delegation.

Please give my best wishes to your wife. If the holidays take you to St. Louis, please let me know so that

we can meet again. [EAC Voter Fraud and Intimidation Report Dec 2006.pdf](#)

Subject FYI-another "non-partisan" conference on election reform

*Please join the Leadership Conference on Civil Rights, Common Cause, the Center for American Progress Action Fund, and the Century Foundation for the first comprehensive review of problems that plagued voters in the 2006 election and a discussion of potential legislative solutions.*

## **ELECTIONS: LOOKING AHEAD**

During the 2006 elections, more than 50,000 voters called national election hotlines with troubles, while the press reported hundreds of additional voting problems, ranging from 18,000 missing votes in a Florida congressional race still being litigated, to long lines and voter intimidation tactics. Following on the heels of similar crisis-ridden elections of 2000 and 2004, voting problems in 2006 have created a public outcry for reform.

Election reform advocates will talk about the problems and release an agenda of solutions endorsed by numerous national organizations representing millions of voters.

### **Monday, February 12, 2007**

**Program:** 9:00am to 12:00pm

*Admission is free.*

Breakfast will be served at 8:30 a.m.

#### **Program:**

Introduction 9:00am - 9:15

**Wade Henderson**, President and CEO, The Leadership Conference on Civil Rights

Panel 1: Reporting on Problems in 2006 9:15am - 10:30am

**Moderator: Cassandra Butts**, Senior Vice President for Domestic Policy, Center for American Progress

**Ralph Neas**, President and CEO, People for the American Way

*Findings from the Election Protection Hotline*

**Melanie Campbell**, Executive Director and CEO, Coalition for Black Civic Participation

*Findings from 1-866-MY VOTE1 Voter Alert Line*

**Efrain Escobedo**, Director of Voter Engagement, National Association of Latino Elected and Appointed Officials

*Election Day Problems in the Latino Community*

**Dan Seligson**, Editor, Electionline.org

*Review of the 2006 Election*

**Heather Smith**, Executive Director, Young Voter Strategies

*Election Day Problems Among Young Voters*

Second Panel - Critical Election Reform Issues for the 110th Congress 10:45am - 12:00pm

**Moderator: Tova Wang**, Democracy Fellow, The Century Foundation

**Jonah Goldman**, Director of the National Campaign for Fair Elections, Lawyer's Committee for Civil Rights Under Law

Subject: Fraud Book Introduction  
t

026190

At the fraud conference in Salt Lake City, I mentioned to both of you that Mike, Susan Hyde and I would be very interested in having the two of you co-author a relatively short introduction to the book. We think that this will help to show the interest that exists among policy makers in the topic and help to bring the book to the center of the debate over election fraud. Would you both be able to do this? We can give you a draft copy of the volume to work with while the book is being reviewed at Brookings Institution Press so you would not need to have anything to us for probably 2 months.

Let me know if you have any questions.

Thanks to you both!

Thad

Subject FYI - Today's media inquiries ( 2-16-07, Frid )

Commissioners:

Today we had the following media inquiries:

(1) The chair was interviewed by Rich Wolfe of USA Today about the voter ID research. She said we discussed the initial findings about voter ID at a public meeting b/c this is such an important issue that impacts voters in every corner of this country. She noted that the new voter ID laws have been enacted in many states in just a few short years, and that the initial work done by Eagleton only covered one election cycle, and she believed we must study this issue over at least two like elections (presidential) to determine if these new laws have had any impact. The chair said based on the initial work conducted by Eagleton, I've instructed staff to present to the commission w/n 30 days a plan for moving forward to continue studying the impact of voter ID. We will immediately release this plan to the public. He then asked about some of the election reform bills in Congress, specifically the points brought up during Sen. Feinstein's hearing. The chair pointed out that we need to make sure timelines are realistic -- election officials need to have time to make sure new laws will work. Implementation doesn't happen overnight. She said we need to make sure we can actually accomplish initiatives within the timeframes prescribed. She said states are always aware that they must first meet certification requirements, conduct mock elections and train staff before introducing new equipment.

(2) Dick Smolka of Election Administration Reports asked if EAC's meeting with voting equipment vendors on Tuesday was in response the Board of Advisors Resolution that EAC collect certain information from them. Brian Hancock replied that this was not the topic of the meeting and that he had not yet been instructed to collect the information requested in the resolution.

(3) Cara Matthews of Gannett News in Albany called to ask the latest about the possible loss of HAVA 102 funds by New York. We said that we are continuing to review the responses from all the states in the order they were received.

Subject FYI - Today's media inquiries ( 2-20-07, Tues )

Commissioners:

Today we had the following media inquiries:

(1) Ken Vogel of Politico.com had questions about the new commissioners. He asked for background info on how the appointment/nomination process works, their terms of service, and their salaries, which we provided. We also provided background on EAC and our role per HAVA. He interviewed the chair regarding her opinion whether Ms. Hunter should have election admin. experience. The chair explained that 3 out of the original 4 commishes did not have this experience, but that they certainly had extensive knowledge of elections, including registration issues and election laws. She said Ms. Hunter was very familiar with election laws at both state and national levels, and that knowledge plus her training as an attorney would be especially beneficial to EAC. He asked if they had resigned their positions, and we said Ms. Hunter left the White House in late Oct., and Ms. Rodriguez is still serving on the City Council, and she would step down when she officially comes on board. He wanted to know if Ms. Rodriguez had election admin. experience, and we said yes, as a former clerk. He requested an interview with them, and after conferring w/Ms. Hunter and Ms. Rodriguez, we told him they would be glad to speak with him after they are officially on board. He asked how long that would be, and we referred him to the WH. He asked if we were talking weeks or months, and we said probably weeks. He wanted to know why we decertified Ciber, and we said we had not decertified Ciber. We explained the process, both interim and full. We then recounted all of the public meetings we'd had on the subject, and said we would continue to notify the public about this process, just as we always have.

(2) The chair was interviewed by Chris Drew of the NYT about the status of the voter ID research. She explained that based upon the preliminary findings of Eagleton, she had directed the staff to provide recommendations to the commission about how to proceed. She reiterated that this was an important subject, and that it was imperative to take a more comprehensive look since there are so many new voter ID laws in the states.

(3) Dick Smolka of Election Administration Reports asked the following questions regarding the EAC Standards Board and Board of Advisors. Q&A as follows:

Standards Board - What attendance do we expect for the Standards Board meeting ? 87 members have RSVP'd. What kind of notice did we give the new chief state election officials about their responsibilities for appointing SB members ? A letter was sent on January 9, 2007 with a notification of representation form. If so, what kind of notice and when did we give it? We asked members to respond with New appointment(s) information or to indicate No Change by January 17. All changes coming in after that date have been honored. The latest to be received is from Nevada.

Board of Advisors - How will appointments to the Board of Advisors and their length of terms be affected by the change in congressional leadership ? The members of the board will serve their terms, as they were reappointed recently. Also the majority and minority have equal representation so even though there was a change in the Congressional makeup, the members appointed by the former majority leaders may be appointed by the new minority members. It is written in the charter of the Board of Advisors which designates the distribution of the members equally by minority and majority. Did EAC give a heads up to the new congressional leadership about their role and responsibilities in appointing members to the Board of Advisors ? All of the members of the Board of Advisors have been reappointed to date. Their terms are for two years. The leadership will be made aware of their

026193

new responsibilities to appoint. However, we also have another election coming up next year which could potentially change things again. But barring a power shift in Congress, the current members will retain their appointment responsibility. If so, what kind of notice and when did we give it? They will receive a letter from the office of the designated federal officer of the Board of Advisors, which is currently the Chair, Donetta Davidson.

DeGregorio  
**Subject:** Best Practices Tool Kit on Voter ID, Polling Place Signage, etc.

Attached below is the draft best practices document that Brian Hancock has drafted. He has informed me that Peggy is reviewing the administrative complaint procedure section so there may still be some additional edits from her. Brian has several examples of polling place signage that was sent to him in hard copy. They are all very large in size. He is checking to see if the states have an electronic copy and if they do not, he will prepare an electronic copy of many of them to add additional examples as links to the document. He will also draft a table of contents and introductory letter to go along with this document before it is finalized. Please review the attached and provide me any comments. Thank you.

## HAVA Best Practices Tool Kit on Voter Identification, Polling Place Signage and State Administrative Complaint Procedures

### Voter ID

Section 303(b) of the Help America Vote Act requires most individuals who register by mail and who have not previously voted in an election for Federal office in the state or who have not previously voted in such an election in the jurisdiction if the State is without a HAVA compliant statewide voter registration database, to present certain identification (ID) documents. Under this section, a voter may show either a current and valid photo identification to the appropriate election official when voting in person or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter. If voting by mail, a copy of these documents must be submitted with the ballot.

Although state ID requirements vary somewhat, the 5 most common forms of photo identification required by states are:

1. a valid and current driver's license
2. a valid and current state ID card
3. a valid U.S. Passport
4. a valid and current Federal agency or military ID card
5. a valid student ID card

In addition, the 5 most common forms of non-photo ID required by states are:

1. a current utility bill with name and address
2. a current bank statement with name and address
3. a current paycheck with name and address
4. a Social Security Card
5. a valid voter registration card or certificate

States have also found a number of distinctive forms of identification which voters may show to meet the requirements of this section of HAVA. Ten (10) unique forms of ID documentation allowed by states are:

1. a valid tribal government ID card
2. a valid state license to carry a pistol or revolver
3. a valid pilots license
4. a certified copy of the electors birth certificate

5. a health club ID card
6. a public transportation authority senior citizens discount card issued by a government agency
7. a drug prescription issued by a government doctor or other government health care provider
8. a Buyer's Club ID card
9. a neighborhood association ID card
10. a retirement center ID card

Some states have also found other alternative methods of verifying a voter's identity. The state of Montana implemented their Voter Verification Service in the recent June 2004 Primary Election. Those individuals who arrived to vote without having the proper identification documentation were asked to fill out a form containing their last name, address, date-of-birth, driver's license number or the last 4 digits of their social security number. The election judge then calls the local election office which is able to access the State driver's services program via the internet to search the state drivers' database in order to find a match. State officials noted that over 600 individuals were able to vote a regular ballot after being verified by the system, and very few provisional ballots were required.

Many states report that they have not yet had enough experience implementing the voter ID provisions of HAVA to cite specific lessons learned. For those states that have had experience implementing these provisions, many of those who report no significant problems attribute their success to a proactive approach to collecting the required voter identification documentation. In New Mexico, individuals who failed to submit the proper ID documentation when they registered by mail are sent a letter reminding them of the required documentation and including a postage paid return envelope to enable the registrant to easily forward the required identification document prior to election day. A sample letter from San Juan County, New Mexico is included as *Attachment A* at the end of this report.

Maryland has also taken a proactive approach to collecting ID documentation by sending at least two letters about the new requirements to voters before the March 2004 Primary Election. The State Board of Elections also issued a press release and did some media outreach to inform the public of the new requirements.

Other states having experience implementing the voter ID requirements in recent state primary elections have observed some inconsistencies among their counties in the handling of voter ID documentation and with some poll workers asking all voters for ID documentation before voting. These states acknowledge that these types of issues can and will be addressed through more rigorous training for poll workers and through better communications between the state election office and the local election offices.

## Polling Place Signage

Section 302(b) of the Help America Vote Act requires the appropriate State or local election official to publicly post certain voting information at each polling place on the day of each Federal election. This information includes a sample ballot, information regarding the date of the election and the hours polling places will be open, instructions on how to cast a vote and how to cast a provisional ballot, instructions for mail-in registrants and first-time voters under section 303(b) of HAVA, general information on voting rights under Federal and state laws, including how to contact the appropriate officials to report violations of these rights, and general information on Federal and state laws regarding voter fraud and misrepresentation.

Most states have implemented these provisions through the production of posters or wall hangings ranging in size from 1/2" x 14" to as large as 3' x 4'. Several states are quite specific not only in describing which documents must be posted at the polling place, but also how many of each document must be posted. Arizona, for example requires that the following informational items are posted at each polling place:

- Two sample ballots
- Two copies of instruction
- Names of and write-in candidates
- Three 75-foot limit signs
- Vote marking polling place sign
- Four "Vote Here" signs
- Three "Instructions for Voter" signs
- Five instructions to voters and election officials signs regarding the right to vote a provisional ballot

In most states, the office of the chief state election official produces the informational materials required under HAVA, while the local election officials ensure that these materials are posted at all polling places in their jurisdictions. Sample ballot information, unlike most of the other required postings, changes from election to election and generally requires local election officials to both produce and post this election specific information.

Readability experts as well as most election officials agree that it is not enough to simply post information on the walls of a polling place and hope the voters are able to read and understand the important messages that these materials convey. In order for voters to effectively utilize the posted information, the materials must be designed with readability and usability in mind.

The following general principals of good design and readability contribute significantly in getting the intended message read and understood by the voting public.

### Document Layout

- Avoid producing a “sea of text.” A long uninterrupted page of text can be overwhelming for marginal readers and tiring for all readers.
- Break up the text with white space, headings and subheadings, space between paragraphs, bullets and numbering.
- Include wide margins at each side of your text to give the readers’ eye some “breathing room.”
- Avoid straight (“justified”) margins on both sides. With justified text every line is the same length and so they all look alike. “Ragged right” margins make it easier for readers to keep their place, and pace.

### Type Styles

- Long stretches of *italic type* or of **boldface type** or of underlined type are harder to read than normal type. These are good treatments for words or phrases you want to emphasize, but don’t use either one too often or they become very distracting.
- Sentences that are written all in CAPITAL LETTERS are hard to read even for good readers because every capital letter has nearly the same height and shape.
- Use dark ink. Some readers may have trouble reading text that is screened or in light ink. Long lines of “reversed” type (white type on a black background) can also be hard on the eyes, and therefore difficult for persons who are not strong readers.

## Readability

- Use shorter words. Use words with the least number of syllables, whenever you can. To marginal readers, there is a big difference between a two-syllable word and a four or five syllable word. For example, use *help* instead of *assistance*; use *copy* instead of *duplicate*; use *question* instead of *inquiry*.
- Use a word (or two) instead of a phrase. This practice is easier on all readers. For example use *about* instead of *with regard to*; use *if* instead of *in the event that*; use *under* instead of *in accordance with*.
- Keep sentences short. As a rule of thumb, fewer than ten words is ideal, up to fifteen words is more realistic, more than twenty words is too long. One way to keep sentences short is to cut needless words.
- Keep paragraphs to six or fewer sentences. In many instances, it is better to avoid formal paragraphs and instead turn text to a list of items with *bullets*, 1-2-3, or *a-b-c* order.
- Write in the active voice. Make the subject of your sentence do the action. For example, "*The application must be signed by the voter.*" is in the passive voice, while "*You must sign the application.*" is in the active voice. The active voice is shorter, more personal and more readable.

Additional information on how to improve the readability and usability of election forms and signage is available in *Innovations in Election Administration 13: Simplifying Election Forms and Materials*. This document was originally published by the Federal Election Commission in 1996, and is now available from the U.S. Election Assistance Commission by calling 1-866-747-1471.

Another resource for election officials seeking to improve the effectiveness of their polling place signage and election materials is the American Institute of Graphic Arts (AIGA). Through their initiative called Design for Democracy, AIGA has created a nonprofit organization dedicated to improving the quality, legibility and effectiveness of election materials. The design for Democracy team has worked extensively with election officials in Cook County, Illinois and with the state of Oregon to develop prototypes for improved ballot design, polling place signage, poll worker training and recruitment material, provisional voting documents and voter education materials.

A link to AIGA page on designing effective polling place signage can be accessed at: [http://electiondesign.org/pdf/d4d\\_polling\\_place\\_signage.pdf](http://electiondesign.org/pdf/d4d_polling_place_signage.pdf)

Several other steps are also worth considering when developing polling place signage.

- Any signs or similar materials produced in English must also be produced in the language of a qualified language minority group if the jurisdiction is covered by the bilingual election requirements of the Voting Rights Act. (42 U.S.C. 1973aa – 1a & 1973b(f)(4)).
- North Dakota notes that the posters they produce are also available in Braille to assist some blind voters, and some are available in an audio version through the State Library's Radio Reading Service.
- Washington State has also produced a video to supplement the information provided on poster size polling place signage. Each county has its own video filmed within that county explaining how to cast a ballot on the particular type of voting system used within that jurisdiction, and taking the voter through the entire voting process. These videos can also be accessed on the Washington Secretary of State's website at:  
[http://www.secstate.wa.gov/elections/voting\\_video.aspx](http://www.secstate.wa.gov/elections/voting_video.aspx)

## Administrative Complaint Procedures

Section 402 of the Help America Vote Act requires the establishment of specific State-based administrative complaint procedures to remedy grievances.

HAVA requires that:

- The procedures are uniform and non-discriminatory
- The procedures are limited to violations of title III of HAVA (unless expanded by the state)
- The complaint be in writing, notarized, and signed and sworn by the individual filing the complaint
- The state hold a hearing on the records requested by the complainant
- The state provide the appropriate remedy if there is a violation
- The state dismiss the complaint and publish the results of the procedures if no violation is found
- The state shall make a final determination on the complaint within 90 days of the complaint being filed unless the complainant agrees to a longer period
- If the state fails to meet the 90 day deadline, the complaint shall be resolved within 60 days by alternative dispute resolution procedures containing all materials from any previous proceedings

Section 402 lists, in broad terms, what states must do to develop these procedures. States have initiated specific implementation strategies which add the necessary detail to the statutory requirements and allow these procedures to function as intended.

### Hearings

If a complainant requests a hearing pursuant to the statute, a number of states have taken the prudent step of requiring that the hearing be recorded in some manner.

*Nevada* - State regulations state that: "The hearing will be recorded on audiotape by and at the expense of the Office of the Secretary of State. The recording will not be transcribed but the Secretary of State, a local board of elections or any party to the hearing may obtain a transcript of the hearing at its own expense. If

a board or party obtains a transcript of the hearing, the board or party shall file a copy of the transcript as a part of the record and any other interested party may examine the copy of the transcript on the record.”

*New Mexico* - State code provides that: “(t)he (elections) bureau shall provide a tape recording of any on-the-record hearing. If a party wants a court reporter, that party must pay the cost.”

*Kentucky* - State law requires that: “Hearings shall be tape recorded and a transcript of the hearing shall not be made except upon request of a party who shall bear the cost of transcription. Any other party may request a copy of the transcription at their own expense.” Kentucky law also provides that “Hearings may be held and testimony taken by teleconference or video conference with notice to the parties.” No mention is made as to the availability of the video for use by other parties.

### **Investigation**

Although few states go into great detail as to what steps should be taken in investigating a complaint outside the hearing process, the *New Mexico* Bureau of Elections describes the steps to follow in an investigation as deemed appropriate under the circumstances:

- Sending an acknowledgment letter to the complainant
- Seeking a response from the election official against whom a complaint is made
- Providing the complainant with a copy of any response received from the election official against whom a complaint is made and give the complainant an opportunity to reply
- Engaging in informal resolution with the parties through a meeting, teleconference, or other means, or
- Dismissing the complaint based on its clear failure to allege a Title III violation

### **Determination**

Once a final determination has been reached relating to a complaint, most states appear to favor an internet posting as the most cost effective and expeditions way of disseminating the results

*Kentucky* - The state requires that all final determinations be posted on the internet homepage of the State Board of Elections and be retained in the permanent archival records of the Board by attaching a copy of the determination to the minutes of the monthly meeting of the Board.

*Michigan* - State election law requires the Bureau of Elections to publish the results of its final determination on its website.

*Nevada* - Nevada law requires that the final determination be mailed to the complainant, each respondent and any interested person who has requested in writing to be advised of the final determination; posted on the website of the Secretary of State; and made available by the Secretary of State, upon request, to any interested person.

*North Carolina* - Procedures of the State Board of Elections require that the final determination be mailed, faxed, e-mailed, or otherwise delivered to the complainant and each respondent.

## **Remedy**

State laws and procedures appear to give election authorities significant latitude when prescribing remedies for violations found through the administrative complaint process. One common element found in many state procedures is the specification that in no case shall the remedy involve the payment of money to the complainant and in no case shall the election official be subject to any type of civil penalty.

*Kentucky* - State regulations require that "the remedy awarded shall be directed at the improvement of processes and procedures governed by Title III, consistent with federal and state law. In addition, "(t)he remedy provided shall not include money damages, costs, or attorney fees and shall be limited to bringing the election practice or election system complained of into compliance with Title III."

*Michigan* - The remedy provided by the Bureau of Elections for any complaint may include, but is not limited to: "Sending a written finding of a Title III violation to the authority; requiring a written response from the election authority, detailing how it will remedy a Title III violation; additional election training for the election authority."

"A remedy shall not, under any circumstances, include a financial penalty."

*New Mexico* - "An appropriate remedy may include, but is not limited to any or all of the following: written finding that Title III has been violated; a plan for rectifying the particular violation; an assurance that additional training will be provided to election officials so as to ensure compliance with HAVA Title III and

the New Mexico Election Code; and a commitment to better inform voters of their rights.”

### **Alternative Dispute Resolution**

As required by HAVA, states have also designed and implemented alternative dispute resolution procedures for those cases in which the state fails to render a determination within the statutorily mandated 90 day period after a complaint is filed.

*Kentucky* - “If a final determination of a complaint is not made within ninety (90) days of the filing of the complaint, and the complainant did not agree to an extension, then the complaint shall be referred to a review panel comprised of three (3) members of the (State) board (of Elections). The review panel shall issue a final determination on the complaint within sixty (60) days of the referral.

*Michigan* - “The Legal and Regulatory Services Administration shall appoint a hearing officer to review the record. The hearing officer shall render a final determination within sixty (60) days after receiving the record.”

*Nevada* - Alternative dispute resolution procedures are initiated by the Secretary of State by, “(r)etaining an independent professionally certified person to act as the arbitrator, if the complainant consents in writing to his appointment as the arbitrator at the time of his appointment.” In addition, the Secretary of State may “designate in writing to the complainant the name of an arbitrator to serve on an arbitration panel to resolve the complaint. If proceedings for alternative dispute resolution are initiated pursuant to this paragraph, not later than 3 business days after the complainant receives such a designation from the Secretary of State, the complainant shall designate in writing to the Secretary of State the name of a second arbitrator. Not later than 3 business days after such a designation by the complainant, the two arbitrators so designated shall select a third arbitrator to complete the panel.” The arbitrator or arbitration panel may review the record compiled in connection with the complaint, including, and without limitation, the audio recording of the hearing, any transcript of the hearing and any briefs or memoranda submitted by the parties but shall not receive any additional testimony or evidence unless the arbitrator or arbitration panel requests that the parties present additional briefs or memoranda.” “The arbitrator or arbitration panel shall issue a written resolution of the complaint not later than 60 days after the final determination of the Secretary of State was due pursuant to section 11 of this regulation. This period for issuing a written resolution will not be extended.”

*North Carolina* - State law requires that “(o)n or before the 5<sup>th</sup> business day after a final Board determination is was due, the Board shall designate in writing to the complainant the name of a proposed arbitrator, knowledgeable in election matters, to resolve the complaint. Within 3 business days after the complainant

receives this proposal, the complainant shall either agree to the proposed arbitrator or counter with the name of a different proposed arbitrator, also knowledgeable in election matters. Within 3 days the Board shall indicate if the proposed arbitrator of the complainant is acceptable. If it is not, then the names of both proposed arbitrators shall be placed in a container and the arbitrator shall be determined by lot drawn by the complainant. The Board shall be responsible for any reasonable costs (not to exceed the rate of \$75 per hour) and expenses generated by the arbitrator in determining the complaint. The arbitrator may review the record compiled in connection with the complaint and any briefs or memoranda previously filed in the action, but shall not receive any additional testimony or evidence. The arbitrator must issue a written resolution within 60 days after the final Board determination was due. This 60 day period may not be extended.....Under no circumstances may the final determination of an arbitrator order action to be performed except in the complaint at hand or order a change in state law, federal law or Board policies, procedures or rules."

In addition to these very specific procedural mechanisms, states must also be concerned with several more practical aspects of implementing their administrative complaint procedures.

### **Pre-Clearance**

States covered under Section 5 of the Voting Rights Act must get the administrative complaint procedures pre-cleared by the Voting Section of the Civil Rights Division of the U.S. Department of Justice before they implement the procedures. In addition, those states and jurisdictions covered under the language minority provisions of the Voting Rights Act must make sure that all forms and materials provided for the administrative complaint process are also provided in the appropriate language of the minority group or groups. Arbitrators and any other individuals fluent in the appropriate languages should also be made available to those participating in the administrative complaint procedure hearing or alternative dispute resolution process.

### **Voter Education**

Adopting and implementing administrative complaint procedures without informing the voting public on how to use these procedures is contrary to the spirit and intent of the Help America Vote Act. States should, at a minimum, post their administrative complaint procedures and forms prominently on their website and encourage all local election administrators with a web presence to do likewise.

Other methods for making these procedures available to the public include posting the information at each polling place, each "official" voter registration site in the jurisdiction and in the office of the local election official.

*Delaware* has developed brochures describing the “who, when, how, and why” of the administrative complaint process. These brochures are sized so that they can be included with sample ballot or other election mailings to voters, or they can be used as handouts at the polling places on election day in order to ease some of the burden of providing this information from the poll workers.

### **Transmission**

If voters are given the option of filing an administrative complaint with a local election official, the state should establish a timely period for the transmission of these complaints from the local official to the state election office.

*Delaware*, for example, requires that if one of the county election departments receives a complaint, the county must forward it to the state Commissioner of Elections on the same business day that it is received.

### **Tracking**

In order to meet the specific deadlines for responding to and making a determination on an administrative complaint, states should establish a tracking procedure to handle all complaints. *Delaware* is currently in the process of developing an internet based tracking system in which all complaints will be assigned a unique identifier number. The status of each complaint can then be tracked by the complainant via a secure login on the state website using the assigned number.

### **State Experiences Using the Administrative Complaint Procedure**

Two states report having experience responding to administrative complaints as of the date of this report.

Maryland had two administrative complaints filed after their March 2, 2004 Primary Election. Both Maryland complaints dealt with whether the voters' provisional ballots should have been counted by the local board of canvassers. Both complaints requested a hearing on the record and final determinations can be accessed on the State Board of Elections' website at:

[http://www.elections.state.md.us/pdf/hearing\\_liss.pdf](http://www.elections.state.md.us/pdf/hearing_liss.pdf)

and

<http://www.elections.state.md.us/citizens/hava/Kolbe Howard Co final determination.pdf>

The State Board of Election stated that the hearings for these two complaints lasted over two hours and required significant amounts of staff time in preparation for the hearing and in drafting the final determination. These two initial complaints have led the State Board to conclude that the procedures have the potential to be administratively difficult if a high volume of complaints are filed as a result of a particularly large voter turnout in a high profile election.

The Colorado Secretary of State received an administrative complaint as a result of the November 2003 general election in Garfield County. The complaint questioned whether all ballots in the jurisdiction were counted in accordance with HAVA and state law, whether first time voters who registered by mail showed or submitted the proper ID, and whether the county central count optical scan tabulator was functioning properly.

The report and final determination from the Colorado complaints can be accessed at: <http://www.sos.state.co.us/pubs/hava/garfield.pdf>

As was the case in Maryland, the Colorado Secretary of State's office found that these procedures took significant amounts of staff time, particularly when drafting the final 248 page Garfield County report. Colorado intends to try and keep potentially costly and time consuming administrative complaints to a minimum by conducting thorough training and education programs for both election officials and the general public.

**DRAFT**

Dear Voter,

**CONGRATULATIONS!!!** You are now a registered voter in San Juan County, New Mexico.

Enclosed is your Voter Information Card. Please look it over carefully to make sure all the information is accurate. If it is not, please contact our office immediately so corrections can be made.

The information card shows your polling place. If you determine that you do not want to travel the distance to that polling place on election day, you can vote on a paper ballot in your home or go to an early voting site before election day. If you would like additional information about these methods of voting, please call our office.

The polling place listed is the one that is established for the precinct in which you live. It is your designated polling place for State and Federal elections. When cities, school districts, the college and the county have elections they often will combine precincts to cut down on the cost of elections. When this happens, your polling place may be different from the one listed on your information card. *Please do not be confused when this happens.* Look at the information provided about the election, find your precinct number and you will be at the correct polling place.

If our voter information card indicates that your party is DTS (Declined To State), it means that you have not chosen a party and will NOT be able to vote in the June primary election of even numbered years. You will, however, be able to vote in any other election.

Please be advised that a newly enacted Federal Law "Help America Vote Act" or "HAVA" requires that first-time registrants in our county, who register by mail, must provide a copy of their identification before voting.

As a new voter, who registered by mail, you must provide identification at the time you register to vote, prior to Election Day or at your polling place on Election Day.

The following forms of identification are acceptable:

1. Current and valid photo identification.
2. A current utility bill.
3. A current bank statement.
4. A current government check, or
5. Any other government document that shows your name and address.

Enclosed for your convenience is a postage paid, return envelope for you to send a copy of your identification to our office. If you have any questions regarding your voter registration, upcoming elections or any other function of the County Clerk's office, please feel free to call or come by our office. It is located at 100 South Oliver in Aztec. Our office hours are 7 AM to 5:30 PM Monday through Friday.

As your County Clerk, I would like to encourage you to vote in all elections. Your vote **DOES** count and is important.

Sincerely,

Fran J. Hanhardt  
San Juan County Clerk

Subject Best Practices ToolKit II

Attached is the 2nd draft of the Best Practice II document that Brian Hancock developed. Gracia asked me to review the first draft and what you see is the result of some recommendations I (and Dan Murphy) made. The document focuses on the key areas of Voter ID, Polling Place Signage and State Administrative Complaint Procedures. While I realize we may be approaching a time when election officials can't make any more changes for this election, it still is probably worth getting this information distributed. There are samples of ID's, signage and the State's complaint procedures with the document. It is hoped that by mid-October we can post on our website information on each State's complaint procedure and how a voter can file a complaint in their state. It could be a drop-down list like our "be a pollworker" site.

Diane has received a cost estimate of \$3600 from our web folks to have this posted on our web site.

If we are ready to move on this (and can afford the \$3600), the next step is to have Gracia run it by our Standards/Advisory Boards for comment. I assume that process can occur from Sept. 3-10 and we can get this on our web site by mid-September.

We can discuss on Thursday.

## Voter Identification

Section 303(b) of the Help America Vote Act requires most individuals who register by mail and who have not previously voted in an election for Federal office in the state or who have not previously voted in such an election in the jurisdiction if the State is without a HAVA compliant statewide voter registration database, to present certain identification (ID) documents. Under this section, a voter may show either a current and valid photo identification to the appropriate election official when voting in person or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the voter. If voting by mail, a copy of these documents must be submitted with the ballot.

Although state ID requirements vary somewhat, the 5 most common forms of photo identification required by states are:

1. a valid and current driver's license
2. a valid and current state ID card
3. a valid U.S. Passport
4. a valid and current Federal agency official ID card
5. a valid student ID card

In addition, the 5 most common forms of non-photo ID required by states are:

1. a current utility bill with name and address
2. a current bank statement with name and address
3. a current paycheck with name and address
4. a Social Security Card
5. a valid voter registration card or certificate

States have also found a number of distinctive forms of identification which voters may show to meet the requirements of this section of HAVA. Ten (10) unique forms of ID documentation allowed by states are:

1. a valid tribal government ID card
2. a valid state license to carry a pistol or revolver
3. a valid pilot's license
4. a certified copy of the elector's birth certificate
5. a health club ID card
6. a public transportation authority senior citizen's discount card issued by a government agency

7. a drug prescription issued by a government doctor or other government health care provider
8. a buyer's club ID card
9. a neighborhood association ID card
10. a retirement center ID card

## **State Approaches**

Some states have found other alternative methods of verifying a voter's identity. The state of Montana implemented their Voter Verification Service in the recent June 2004 Primary Election. Those individuals who arrived to vote without having the proper identification documentation were asked to fill out a form containing their last name, address, date of birth, driver's license number or the last 4 digits of their social security number. The election judge then calls the local election office which is able to access the State driver's services program via the internet to search the state drivers' database in order to find a match. State officials noted that over 600 individuals were able to vote a regular ballot after being verified by the system, and very few provisional ballots were required. For more information on this program, contact the Montana Election Bureau by phone at 406-444-4732, or via email at [seselection@state.mt.us](mailto:seselection@state.mt.us).

Many states report that they have not yet had enough experience implementing the voter ID provisions of HAVA to cite specific lessons learned. For those states that have had experience implementing these provisions, many of those who report no significant problems attribute their success to a proactive approach to collecting the required voter identification documentation. In New Mexico, individuals who fail to submit the proper ID documentation when they registered by mail are sent a letter reminding them of the required documentation and including a postage paid return envelope to enable the registrant to easily forward the required identification document prior to election day. A sample letter from San Juan County, New Mexico is included as *Attachment A* at the end of this report.

Maryland has also taken a proactive approach to collecting ID documentation by sending at least two letters about the new requirements to voters before the March 2004 Primary Election. The State Board of Elections also issued a press release and did some media outreach to inform the public of the new requirements.

Other states having experience implementing the voter ID requirements in recent state primary elections have observed some inconsistencies among their counties in the handling of voter ID documentation and with some poll workers asking all voters for ID documentation before voting. These states acknowledge that these types of issues can and will be addressed through more rigorous

training for poll workers and through better communications between the state election office and the local election offices.

## Polling Place Signage

Section 302(b) of the Help America Vote Act requires the appropriate State or local election official to publicly post specific voting information at each polling place on the day of each Federal election. For this section of HAVA, the term "voting information" means:

- A sample version of the ballot that will be used for that election;
- information regarding the date of the election and the hours during which polling places will be open
- Instructions on how to vote, including how to cast a vote and how to cast a provisional ballot;
- Instructions for mail-in registrants and first-time voters under section 303(b);
- General information on voting rights under applicable Federal and State laws, including information on the right of an individual to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights have been violated; and
- General information on Federal and State laws regarding prohibitions on acts of fraud and misrepresentation.

Most states have implemented these provisions through the production of posters or wall hangings ranging in size from 8 1/2" x 11" to as large as 3' x 4'. Several states are quite specific not only in describing which documents must be posted at the polling place, but also how many of each document must be posted. Arizona, for example requires that the following informational items are posted at each polling place:

- Two sample ballots
- Two cards of instruction
- Names of and write-in candidates
- Three 75 foot limit signs
- Voter parking /polling place sign
- Four "Vote Here" signs
- Three "Instructions for Voter" signs
- Five instructions to voters and election officials signs regarding the right to vote a provisional ballot

In most states, the office of the chief state election official produces the informational materials required under HAVA, while the local election officials

ensure that these materials are posted at all polling places in their jurisdictions. Sample ballot information, unlike most of the other required postings, changes from election to election and generally requires local election officials to both produce and post this election specific information.

Readability experts as well as most election officials agree that it is not enough to simply post information on the walls of a polling place and hope the voters are able to read and understand the important messages that these materials convey. In order for voters to effectively utilize the posted information, the materials must be designed with readability and usability in mind, and posted in a visible location that can be found easily by the voters.

The following general principals of good design and readability contribute significantly in getting the intended message read and understood by the voting public.

### **Document Layout**

- Avoid producing a “sea of text.” A long uninterrupted page of text can be overwhelming for marginal readers and tiring for all readers.
- Break up the text with white space, headings and subheadings, space between paragraphs, bullets and numbering.
- Include wide margins at each side of your text to give the readers eye some “breathing room.”
- Avoid straight (“justified”) margins on both sides. With justified text every line is the same length and so they all look alike. “Ragged right” margins make it easier for readers to keep their place, and pace.

### **Type Styles**

- Long stretches of *italic type* or of **boldface type** or of underlined type are harder to read than normal type. These are good treatments for words or phrases you want to emphasize, but don’t use either one too often or they become very distracting.

- Sentences that are written all in CAPITAL LETTERS are hard to read even for good readers because every capital letter has nearly the same height and shape.
- Use dark ink. Some readers may have trouble reading text that is screened or in light ink. Long lines of “reversed” type (white type on a black background) can also be hard on the eyes, and therefore difficult for persons who are not strong readers.

## Readability

- Use shorter words. When possible, use fewer syllables. To marginal readers, there is a big difference between a two-syllable word and a four or five syllable word. For example, use *help* instead of *assistance*; use *copy* instead of *duplicate*; use *question* instead of *inquiry*.
- Use a word (or two) instead of a phrase. This practice is easier on all readers. For example, use *about* instead of *with regard to*; use *if* instead of *in the event that*; use *under* instead of *in accordance with*.
- Keep sentences short. As a rule of thumb, fewer than ten words is ideal, up to fifteen words is more realistic, more than twenty words is too long. One way to keep sentences short is to avoid needless words.
- Keep paragraphs to six or fewer sentences. In many instances, it is better to avoid formal paragraphs and instead turn text to a list of items with *bullets*, *1-2-3*, or *a-b-c* order.
- Write in the active voice. Make the subject of your sentence do the action. For example, “*The application must be signed by the voter.*” is in the passive voice, while “*You must sign the application.*” is in the active voice. The active voice is shorter, more personal and more readable.

Additional information on how to improve the readability and usability of election forms and signage is available in *Innovations in Election Administration 13: Simplifying Election Forms and Materials*. This document was originally published by the Federal Election Commission in 1996, and is now available from the U.S. Election Assistance Commission by calling 1-866-747-1471.

Another resource for election officials seeking to improve the effectiveness of their polling place signage and election materials is the American Institute of Graphic Arts (AIGA). Through their initiative called Design for Democracy, AIGA has created a nonprofit organization dedicated to improving the quality, legibility and effectiveness of election materials. The design for Democracy team has worked extensively with election officials in Cook County, Illinois and with the state of Oregon to develop prototypes for improved ballot design, polling place signage, poll worker training and recruitment material, provisional voting documents and voter education materials. For information on how to contact an AIGA Chapter in your area, use the interactive map on the AIGA web site at: <http://www.aiga.org/content.cfm/chaptermap>

A link to AIGA page on designing effective polling place signage can be accessed at: [http://electiondesign.org/pdf/d4d\\_polling\\_place\\_signage.pdf](http://electiondesign.org/pdf/d4d_polling_place_signage.pdf)

Several other steps are also worth considering when developing polling place signage.

- Any signs or similar materials produced in English must also be produced in the language of a qualified language minority group if the jurisdiction is covered by the bilingual election requirements of the Voting Rights Act. (42 U.S.C. 1973aa – 1a & 1973b (f) (4)). Additional information on the language minority provisions can be accessed on the web site of the Civil Rights Division of the U.S. Department of Justice at: [http://www.usdoj.gov/crt/voting/sec\\_203/activ\\_203.htm](http://www.usdoj.gov/crt/voting/sec_203/activ_203.htm)
- North Dakota notes that the posters they produce are also available in Braille to assist some blind voters, and some are available in an audio version through the State Library's Radio Reading Service.
- Washington State has also produced a video to supplement the information provided on poster size polling place signage. Each county has its own video filmed within that county explaining how to cast a ballot on the particular type of voting system used within that jurisdiction, and taking the voter through the entire voting process. These videos can also be accessed on the Washington Secretary of State's website at: [http://www.secstate.wa.gov/elections/voting\\_video.aspx](http://www.secstate.wa.gov/elections/voting_video.aspx)

## **Examples of Polling Place Signage**

## **Administrative Complaint Procedures**

Section 402 of the Help America Vote Act requires the establishment of specific State-based administrative complaint procedures to remedy grievances.

HAVA requires that:

- The procedures are uniform and non-discriminatory
- The procedures are limited to violations of title III of HAVA (unless expanded by the state)
- The complaint be in writing, notarized and signed and sworn by the individual filing the complaint
- The state hold a hearing on the record if requested by the complainant
- The state provide the appropriate remedy if there is a violation

- The state dismiss the complaint and publish the results of the procedures if no violation is found
- The state shall make a final determination on the complaint within 90 days of the complaint being filed unless the complainant agrees to a longer period
- If the state fails to meet the 90 day deadline, the complaint shall be resolved within 60 days by alternative dispute resolution procedures containing all materials from any previous proceedings

Section 402 lists, in broad terms, what states must do to develop these procedures. States have initiated specific implementation strategies which add the necessary detail to the statutory requirements and allow these procedures to function as intended.

## **Hearings**

If a complainant requests a hearing pursuant to the statute, a number of states have taken the prudent step of requiring that the hearing be recorded in some manner.

**Nevada** - Regulations state that: "The hearing will be recorded on audiotape by and at the expense of the Office of the Secretary of State. The recording will not be transcribed but the Secretary of State, a local board of elections or any party to the hearing may obtain a transcript of the hearing at its own expense. If a board or party obtains a transcript of the hearing, the board or party shall file a copy of the transcript as a part of the record and any other interested party may examine the copy of the transcript on the record."

**New Mexico** - State code provides that: "[t]he (elections) bureau shall provide a tape recording of any on-the-record hearing. If a party wants a court reporter, that party must pay the cost."

**Kentucky** - State law requires that: "Hearings shall be tape recorded and a transcript of the hearing shall not be made except upon request of a party who shall bear the cost of transcription. Any other party may request a copy of the transcription at their own expense." Kentucky law also provides that "Hearings may be held and testimony taken by teleconference or video conference with notice to the parties." No mention is made as to the availability of the video for use by other parties.

## ***Investigation***

Although few states go into great detail as to what steps should be taken in investigating a complaint outside the hearing process, the *New Mexico* Bureau of Elections describes the steps to follow in an investigation as deemed appropriate under the circumstances:

- Sending an acknowledgement letter to the complainant
- Seeking a response from the election official against whom a complaint is made
- Providing the complainant with a copy of any response received from the election official against whom a complaint is made and give the complainant an opportunity to reply
- Engaging in informal resolution with the parties through a meeting, teleconference, or other means, or
- Dismissing the complaint based on its clear failure to allege a Title 11 violation

## ***Determination***

Once a final determination has been reached relating to a complaint, most states appear to favor an internet posting as the most cost effective and expeditious way of disseminating the results.

***Kentucky*** - The state requires that all final determinations be posted on the internet homepage of the State Board of Elections and be retained in the permanent archival records of the Board by attaching a copy of the determination to the minutes of the monthly meeting of the Board.

***Michigan*** - State election law requires that the Bureau of Elections to publish the results of its final determination on its website.

***Nevada*** - Nevada law requires that the final determination be mailed to the complainant, each respondent and any interested person who has requested in writing to be advised of the final determination; posted on the website of the Secretary of State; and made available by the Secretary of State, upon request, to any interested person.

**North Carolina** - Procedures of the State Board of Elections require that the final determination be mailed, faxed, e-mailed, or otherwise delivered to the complainant and each respondent.

## **Remedy**

State laws and procedures appear to give election authorities significant latitude when prescribing remedies for violations found through the administrative complaint process. One common element found in many state procedures is the specification that in no case shall the remedy involve the payment of money to the complainant and in no case shall the election official be subject to any type of civil penalty.

**Kentucky** - State regulations require that "the remedy awarded shall be directed at the improvement of processes or procedures governed by Title III, consistent with federal and state law." In addition, "[t]he remedy provided shall not include money damages, costs, or attorney fees and shall be limited to bringing the election practice or election system complained of into compliance with Title III."

**Michigan** - The remedy provided by the Bureau of Elections for any complaint may include, but is not limited to: "Sending a written finding of a Title III violation to the authority; requiring a written response from the election authority, detailing how it will remedy a Title III violation; additional election training for the election authority."

"A remedy shall not, under any circumstances, include a financial penalty."

**New Mexico** - An appropriate remedy may include, but is not limited to any or all of the following: written finding that Title III has been violated; a plan for rectifying the particular violation; an assurance that additional training will be provided to election officials so as to ensure compliance with HAVA Title III and the New Mexico Election Code; and a commitment to better inform voters of their rights."

## **Alternative Dispute Resolution**

As required by HAVA, states have also designed and implemented alternative dispute resolution procedures for those cases in which the state fails to render a determination within the statutorily mandated 90 day period after a complaint is filed.

**Kentucky** - "If a final determination of a complaint is not made within ninety (90) days of the filing of the complaint, and the complainant did not agree to an extension, then the complaint shall be referred to a review panel comprised of

three (3) members of the (State) board (of Elections). The review panel shall issue a final determination on the complaint within sixty (60) days of the referral.

**Michigan** - "The Legal and Regulatory Services Administration shall appoint a hearing officer to review the record. The hearing officer shall render a final determination within sixty (60) days after receiving the record."

**Nevada** - Alternative dispute resolution procedures are initiated by the Secretary of State by, "[r]etaining an independent professionally qualified person to act as the arbitrator, if the complainant consents in writing to his appointment as the arbitrator at the time of his appointment." In addition, the Secretary of State may "designate in writing to the complainant the name of an arbitrator to serve on an arbitration panel to resolve the complaint. If proceedings of alternative dispute resolution are initiated pursuant to this paragraph, not later than 3 business days after the complainant receives such a designation from the Secretary of State, the complainant shall designate in writing to the Secretary of State the name of a second arbitrator. Not later than 3 business days after such a designation by the complainant, the two arbitrators so designated shall select a third arbitrator to complete the panel." The arbitrator or arbitration panel may review the record compiled in connection with the complaint, including and without limitation, the audio recording of the hearing, any transcript of the hearing and any briefs or memoranda submitted by the parties but shall not receive any additional testimony or evidence unless the arbitrator or arbitration panel requests that the parties present additional briefs or memoranda." "The arbitrator or arbitration panel shall issue a written resolution of the complaint not later than 60 days after the final determination of the Secretary of State was due pursuant to section 11 of this regulation. This period for issuing a written resolution will not be extended."

**North Carolina** - State law requires that "[o]n or before the 5<sup>th</sup> business day after a final Board determination is due, the Board shall designate in writing to the complainant the name of a proposed arbitrator, knowledgeable in election matters, to resolve the complaint. Within 3 business days after the complainant receives this proposal, the complainant shall either agree to the proposed arbitrator or counter with the name of a different proposed arbitrator, also knowledgeable in election matters. Within 3 days the Board shall indicate if the proposed arbitrator of the complainant is acceptable. If it is not, then the names of both proposed arbitrators shall be placed in a container and the arbitrator shall be determined by lot drawn by the complainant. The Board shall be responsible for any reasonable costs (not to exceed the rate of \$75 per hour) and expenses generated by the arbitrator in determining the complaint. The arbitrator may review the record compiled in connection with the complaint and any briefs or memoranda previously filed in the action, but shall not receive any additional testimony or evidence. The arbitrator must issue a written resolution within 60 days after the final Board determination was due. This 60 day period may not be extended.....Under no circumstances may the final determination of an arbitrator

order action to be performed except in the complaint at hand or order a change in state law, federal law or Board policies, procedures or rules.”

In addition to these very specific procedural mechanisms, states must also be concerned with several more practical aspects of implementing their administrative complaint procedures.

### ***Pre-Clearance***

States covered under Section 5 of the Voting Rights Act must get the administrative complaint procedures pre-cleared by the Voting Section of the Civil Rights Division of the U.S. Department of Justice before they implement the procedures. In addition, those states and jurisdictions covered under the language minority provisions of the Voting Rights Act must make sure that all forms and materials provided for the administrative complaint process are also provided in the appropriate language of the minority group or groups. Arbitrators and any other individuals fluent in the appropriate languages should also be made available to those participating in the administrative complaint procedure hearing or alternative dispute resolution process.

### ***Voter Education***

Adopting and implementing administrative complaint procedures without informing the voting public on how to use these procedures is contrary to the spirit and intent of the Help America Vote Act. States should, at a minimum, post their administrative complaint procedures and forms prominently on their website and encourage local election administrators with a web presence to do likewise.

Other methods for making these procedures available to the public include posting the information at each polling place, each “official” voter registration site in the jurisdiction and in the office of the local election official.

**Delaware** has developed brochures describing the “who, when, how, and why” of the administrative complaint process. These brochures are sized so that they can be included with sample ballot or other election mailings to voters, or they can be used as handouts at the polling places on election day in order to ease some of the burden of providing this information from the poll workers.

## ***Transmission***

If voters are given the option of filing an administrative complaint with a local election official, the state should establish a timely period for the transmission of these complaints from the local official to the state election office.

**Delaware**, for example, requires that if one of the county election departments receives a complaint, the county must forward it to the state Commissioner of Elections on the same business day that it is received.

## ***Tracking***

In order to meet the specific deadlines for responding to and making a determination on an administrative complaint, states should establish a tracking procedure to handle all complaints. **Delaware** is currently in the process of developing an internet based tracking system in which all complaints will be assigned a unique identifier number. The status of each complaint can then be tracked by the complainant via a secure login on the state website using the assigned number.

## ***State Experiences Using the Administrative Complaint Procedure***

Two states report having experience responding to administrative complaints as of the date of this report.

Maryland had two administrative complaints filed after their March 2, 2004 Primary Election. Both Maryland complaints dealt with whether the voters' provisional ballots should have been counted by the local board of canvassers. Both complaints requested a hearing on the record and final determinations can be accessed on the State Board of Elections' website at:

[http://www.elections.state.md.us/pdf/hearing\\_liss.pdf](http://www.elections.state.md.us/pdf/hearing_liss.pdf)

and

<http://www.elections.state.md.us/citizens/hava/Kolbe Howard Co final determination.pdf>

The State Board of Election stated that the hearings for these two complaints lasted over two hours and required significant amounts of staff time in preparation for the hearing and in drafting the final determination. These two initial complaints have led the State Board to conclude that the procedures have the potential to be administratively difficult if a high volume of complaints are filed as a result of a particularly large voter turnout in a high profile election.

The Colorado Secretary of State received an administrative complaint as a result of the November 2003 general election in Garfield County. The complaint questioned whether all ballots in the jurisdiction were counted in accordance with HAVA and state law, whether first time voters who registered by mail showed or submitted the proper ID, and whether the county central count optical scan tabulator was functioning properly.

The report and final determination from the Colorado complaints can be accessed at: <http://www.sos.state.co.us/pubs/hava/garfield.pdf>

As was the case in Maryland, the Colorado Secretary of State's office found that these procedures took significant amounts of staff time, particularly when drafting the final 248 page Garfield County report. Colorado intends to try and keep potentially costly and time consuming administrative complaints to a minimum by conducting thorough training and education programs for both election officials and the general public.

DRAFT

## Attachment A

Dear Voter,

**CONGRATULATIONS!!!** You are now a registered voter in San Juan County, New Mexico.

Enclosed is your Voter Information Card. Please look it over carefully to make sure all the information is accurate. If it is not, please contact our office immediately so corrections can be made.

The information card shows your polling place. If you determine that you do not want to travel the distance to that polling place on election day, you can vote on a paper ballot in your home or go to an early voting site before election day. If you would like additional information about these methods of voting, please call our office.

The polling place listed is the one that is assigned for the precinct in which you live. It is your designated polling place for State and Federal elections. When cities, school districts, the college and the county have elections they often will combine precincts to cut down on the cost of elections. When this happens, your polling place may be different from the one listed on your information card. *Please do not be confused when this happens.* Look at the information provided about the election, find your precinct number and you will be at the correct polling place.

If our voter information card indicates that your party is DTS (Declined To State), it means that you have not chosen a party and will **NOT** be able to vote in the June primary election of even numbered years. You will, however, be able to vote in any other election.

Please be advised that a newly enacted Federal Law "Help America Vote Act" or "HAVA" requires that first time registrants in our county, who register by mail, must provide a copy of their identification before voting.

As a new voter, who registered by mail, you must provide identification at the time you register to vote, prior to Election Day at your polling place on Election Day.

The following forms of identification are acceptable:

1. Current and valid photo identification.
2. A current utility bill.
3. A current bank statement.
4. A current government check, or
5. Any other government document that shows your name and address.

Enclosed for your convenience is a postage paid, return envelope for you to send a copy of your identification to our office. If you have any questions regarding your voter registration, upcoming elections or any other function of the County Clerk's office, please feel free to call or come by our

office. It is located at 100 South Oliver in Aztec. Our office hours are 7 AM to 5:30 PM Monday through Friday.

As your County Clerk I would like to encourage you to vote in all elections. Your vote **DOES** count and is important.

Sincerely,

Fran J. Hanhardt  
San Juan County Clerk

Subject preparing for post-election issues

In a recent conversation with the Chair, he stated a requirement for the EAC to be prepared for a possible scenario where there is no concession by Thursday (11/4). We also touched on this topic briefly in a Commissioners discussion meeting. His view of the EAC role in this circumstance is to be a narrator - to keep people informed and explain (without interpreting or interjecting ourselves) what's going on (law suits, recounts, etc.). He drew the analogy to Rudy Guiliano's role after 9/11. EAC can be a source of impartial information without slanting or interjecting ourselves into situations. He also referred to using a "teach-in" approach. THE PURPOSE OF THIS EMAIL is to collect your lists of potential issues that we may need to address. Some obvious ones are provisional balloting, voter ID requirements, voter registration/voter fraud, absentee balloting, military balloting, electoral college, election processes dealing with tabulation and its aftermath, court cases. Please provide any additional topics. Kay will oversee the collection of basic materials on these topics, so we can prepare in advance to respond quickly if there is a need or desire for an EAC statement, comments from the Commissioners, press interviews, etc. Thanks!

Subject Elections Reform Task Force

History: This message has been forwarded

Commissioners:

This is a Heads UP notice: The Election Center is calling its National Task Force on Election Reform (which we utilized to review Election 2000) back into existence. Even though this election went exceedingly well from a public perception, we noticed many areas that need the attention of state and local election officials and especially state legislatures. To keep this brief, I won't go into great detail now (I will send you a more detailed outline in a few weeks) but we saw enough problems in Voter Registration, Absentee Balloting, Provisional Balloting, voter ID, Poll Watchers, early voting issues and even some problems with voting systems, to warrant coming back together. We will publish a set of recommendations as to what election officials think needs to be fixed and why and even at what level of government.

That Task Force is very likely to meet on January 4 and 5 in Washington, DC, at the Westin Embassy Row. You are welcome to sit in on any and all discussions of the Task Force. On January 6 and 7 at the same hotel, the Joint Election Officials Liaison Committee, which is comprised of the six national elections organizations, will meet. You are also welcome for the two days of meetings that will encompass known legislative initiatives of the House and Senate, along with a review of how Election 2004 went in their states.

I wanted to let you know so that you don't hear it as a surprise, and we welcome your participation.

Subject starting on the same page - NEED RESPONSE BY MONDAY

Commissioners -

Wanted to make sure we are all on the same page regarding the 5 guidance topics and the studies that we know we will be doing this year. This is the information I will recommend for your vote at the public meeting next week. Here's what I think they are, but need confirmation.

Guidance topics:

1. Voluntary voting system standards - this was voted on at last public meeting as public hearing topic
2. Voter registration, including statewide database, voter ID, related matters - this was voted on at last public meeting as public hearing topic
3. Provisional balloting - this was voted on at last public meeting as public hearing topic
4. Voting system auditability, voter verification - in notes from Commissioners' discussions, emphasized at last public meeting as a special topic under voting system standards
5. Voter education, including administrative complaint procedures, voter's rights, signage, voter ID, "civics 101" - in notes from Commissioners discussions, emphasized at last public meeting

Studies:

1. Section 244 - impact of 303(b) voter ID requirements on voters who register by mail, due July 2005
2. Section 245 - electronic (Internet) voting, due July 2004
3. Section 246 - free absentee ballot postage, due 11/2003
4. Election Day, UOCAVA and NVRA surveys
5. college and corporate poll worker programs

Subject Commissioners Discussion Topics - Feb. 15, 2005

Commissioners -

Here is agenda for tomorrow's discussion. Briefing books will be provided in advance.

Information items

1. EAC letter to Congressman Domenici - Julie (Tab 1)
2. Senate and House Appropriations Committees Strategy - Chair & Julie
3. Public meetings and hearings - Julie (Tab 2)
  - 2/23 Columbus weather contingency plan
  - March 22 public meeting
  - April 26 public meeting/hearing
  - open mikes at public hearings

Decision items

4. NIST Software Reference Library - Commissioner Soaries & Carol (Tab 3)
5. NIST & standards work - Carol (Tab 4)
  - subject matter expert
  - other recommendations
    - collect RFPs
    - working group to develop voting system management guidelines
    - working group to develop electoral process outcome measures
    - white paper on enhanced quality control for voting system acceptance
6. Provisional voting/voter ID research approach - Carol (Tab 5)

Subject Gentle reminder for feedback on SOW for Provisional Voting  
and Voter ID, and on a working group meeting on State wide  
VR databases

Commissioners-

You'll recall that I sent you two e-mails related to various projects that need to get under way, and that I need input regarding them by COB tomorrow ( Friday).

1. Carol Paquette and I need your approval of the statement of work for the provisional voter and voter ID project. You will recall that we are recommending that these two projects be combined ( for contracting purposes); the two projects are inter-related and the workplans and timelines for deliverables would be staggered for the two projects. Baring any major concerns or issues heard from the Commissioners, Carol and I will be posting the RFP for this work on Monday.

2. We also need your approval for the workplan for the Statewide VR database project. It is our hope that the new research analyst will take major responsibility for this project in early March. In the event that this is not possible, I am soliciting names of consultants who could be hired to do this work. Thus far, Tom Ferguson is the only consultant who has been recommended.

Thanks for getting back to me.

Regards

Subject: RFP

Julie,

I noticed your RFP on the website yesterday for provisional voting and voter ID. I am concerned over the description of provisional voting entitlement because it may lead to confusion and increase a misunderstanding that I have already found exists in the election community. Under "Background," it states that Section 302(a) "requires that all States allow the casting of provisional ballots in instances where a voter declares his/her eligibility to vote, but his/her name does not appear on the official list of eligible voters, or an election official asserts that a voter is not eligible to vote." This is an incorrect summary of the law.

To be entitled to a provisional ballot in the first case, the voter must declare not only that he is eligible to vote, but also that he is registered. This is not a minor point. As you are well aware, while a voter may be eligible to vote under state law because he is over 18 and resides in the precinct where he is trying to vote, he cannot vote unless he went through the state's voter registration process. If he did not try to register, he is not entitled to a provisional ballot. This provision does not mandate election day registration but this summary could be interpreted to require that result. Congress was clearly trying to fix a problem that occurs when individuals take all of the necessary steps to register to vote, but some kind of administrative error by the state (such as DMV not forwarding the registration to election officials) prevents the voter's name from getting on the registration list. It was not meant to gut state registration requirements or to allow individuals to vote who do not bother to register.

Subject Surprise DOJ Opinion on Voter ID in AZ

Commissioners:

Attached is a letter opinion that was issued on Friday by DOJ (Office of Civil Rights) regarding the very question that was posed to me by Congressman Ed Pastor on Thursday at our budget hearing. This comes to me as a major (and unwelcomed) surprise.

This is a very serious issue. DOJ has taken the position that AZ may impose ID requirements on all voters, including those casting a provisional ballot. While the underlying rationale of the DOJ opinion is one which I vigorously disagree with, the more serious transgression, from my perspective, is that there was absolutely no coordination (or at least a "heads up") between DOJ and EAC on this matter (despite the fact that we are including DOJ in every discussion dealing with our guidance authority). Clearly something has gone awry here. My recollection is that Hans clearly stated early in our tenure that now that the EAC was up and running, we were to assume the responsibility of interpreting HAVA, while DOJ was the enforcement agency. This is the first time (other than filing the amicus brief during the provisional voting litigation back in October) where DOJ has taken it upon themselves to insert their opinion as the interpreter of HAVA, despite the presence of the EAC.

I think the procedural issue regarding this matter requires a discussion among the four of us as soon as possible. The substance of the issue will require some analysis by our counsel, but nevertheless, I believe there are serious flaws with the DOJ opinion.

U. S. Department of Justice

Civil Rights Division

Deputy Assistant Attorney General

Washington, D.C. 20530

April 15, 2005

**VIA FACSIMILE AND REGULAR MAIL**

Honorable Janice K. Brewer  
Secretary of State  
State of Arizona  
1700 West Washington Street, 7<sup>th</sup> Floor  
Phoenix, Arizona 85007-2888

Dear Secretary Brewer:

I am writing in response to your letter of April 5 to Steven G. Bradbury, Principal Deputy Assistant Attorney General in the Office of Legal Counsel, requesting a formal opinion from the Department of Justice on certain issues relating to the Help America Vote Act of 2002 ("HAVA"), 42 U.S.C. 15301-15545. Because the Office of Legal Counsel is not authorized to provide legal advice to persons outside the Executive Branch of the federal government, Mr. Bradbury has forwarded the request to the Civil Rights Division.

Although the Department of Justice states its formal positions with respect to the statutes it enforces only through case-by-case litigation, we do on occasion offer our general views on the manner in which we intend to enforce a particular statute or set of laws. As you know, HAVA vests the Attorney General with the responsibility of enforcing Title III of HAVA, which imposes uniform and nondiscriminatory election technology and administration requirements on the 55 States and Territories. The Attorney General, in turn, has delegated those enforcement functions to the Civil Rights Division. In light of this authority, we will attempt to answer the question posed in your letter to the extent we can, although it must be emphasized that the opinions expressed here are not binding.

Your letter focuses on the requirements of HAVA Section 302(a), 42 U.S.C. 15482(a), as that section relates to provisional ballots. Specifically, you question whether, under this section, it is permissible for a state to mandate that potential voters show identification at the polls prior to receiving a provisional ballot.

Section 302(a) of HAVA requires that a provisional ballot be given to individuals (i) whose eligibility is challenged by election officials, or (ii) whose name does not appear on the

official list of eligible voters for the polling place, if the "individual declares that such individual is a registered voter in the jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an election for Federal office." Section 302(a) then provides a series of steps that should be taken by poll officials to transmit the ballot and voter information to election officials for "prompt verification." Whether the individual is eligible to vote, and whether the provisional ballot will be counted, are matters to be determined by state and local election officials "in accordance with State law." See HAVA Section 302(a)(4).

Two other sections of HAVA are also relevant to your question. Section 304, 42 U.S.C. 15484, specifically states that "[t]he requirements established by this title are minimum requirements and nothing in this title shall be construed to prevent a State from establishing election technology and administration requirements that are more strict." Further, Section 305, 42 U.S.C. 15485, provides that "[t]he specific choices on the methods of complying with the requirements of this title shall be left to the discretion of the State."

Taken together, all of these provisions make it clear that the determination of an individual's eligibility to vote is left to the states, and while Title III establishes minimum standards, states may impose stricter requirements as long as those requirements are uniform and nondiscriminatory. If a state such as Arizona wishes to impose identification requirements that are stricter than HAVA, it may do so without violating the statute. This flexibility includes the right to impose stricter requirements for voter eligibility (including eligibility to receive a provisional ballot).

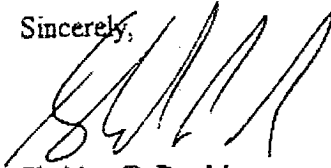

The major purpose of Section 302(a) is to allow individuals to vote who have taken all necessary steps to register to vote but whose registrations were not completed by election officials (or whose names were not added to the voter registration list) due to some administrative error. If a State requires a provisional voter, who has affirmed that he is registered and eligible to vote, to provide additional information (e.g., residence address, birth date, location where he attempted to register to vote, etc.) that may be needed for the jurisdiction to verify that the individual actually did register and is truly eligible to vote, nothing in HAVA would stand in the State's way. In other words, a State may refuse to issue a provisional ballot to an individual who refuses to provide such information.

While HAVA was passed by Congress to regulate federal elections, Sections 304 and 305 illustrate that Congress was well aware that the Constitution -- in particular, Art. I, § 4, cl. 1 -- explicitly commits the regulation of voting to the states. Indeed, a State may "provide a complete code for congressional elections, not only as to times and places, but in relation to notices, registration, supervision of voting, protection of voters, prevention of fraud and corrupt practices, counting of votes, duties of inspectors and canvassers, and making and publication of election returns." *Roudebush v. Hartke*, 405 U.S. 15, 23 (1972); see also *Tashjian v. Republican Party of Conn.*, 479 U.S. 208, 217 (1986) (States exercise "broad power to prescribe the 'Time, Places and Manner of holding Elections for Senators and Representatives,' which power is matched by state control over the election process for states offices."). In light of this broad grant of power, "state legislatures may without transgressing the Constitution impose extensive restrictions on voting." *Griffin v. Roupas*, 385 F.3d 1128, 1130 (7th Cir. 2004).

In conclusion, it is our considered judgment that neither HAVA nor any other provision of federal law preempts states from imposing identification requirements at the polls, including identification requirements for the receipt of provisional ballots. In fact, insuring the security and integrity of elections is a logical and entirely legitimate objective of state regulation of the election process, which an identification requirement naturally facilitates.

We hope that this is responsive to your questions. If you have any additional concerns, please do not hesitate to contact us.

Sincerely,

Sheldon T. Bradshaw  
Principal Deputy Assistant Attorney General

Subject Eagleton

In his note regarding the Eagleton contract, Hans has raised some of the same concerns I raised from the beginning of any discussions I had regarding this contract with our staff, and at our first formal meeting with Eagleton. In reviewing their work product from time to time, I continue to have concerns about a lack of balanced input and have repeatedly voiced them with staff and with Eagleton. I did this when the initial peer review group was proposed and again during their presentation at our meeting in Pasadena (the outreach slide in their public presentation showed outreach to seven groups, of which only one could be considered conservative-leaning). Now, as I have just had the opportunity to read their July progress report, it appears that Eagleton seems to be going into a larger analysis of the voter fraud issue than was authorized in the contract. My suspicion is that Dan Tokaji is injecting his views into this to dismiss or diminish the concerns some people may have about voter fraud. I could be wrong, but his previous writings lead me to believe otherwise.

I only found one mention of voter fraud in the contract with Eagleton. It is in Section 3.5 regarding provisional voting, where it discusses "minimizing opportunity for voter fraud." Yet, on page 4 of the July progress report from Eagleton, in describing their work plan for the next month it states: "we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms." This clearly seems to be going beyond the mandate we gave them as I thought they were going to be looking at voter fraud relating to provisional voting (as the contract calls for), not voter fraud as it relates to election reforms. While voter fraud was never mentioned in the contract regarding the voter ID issue, page 5 of their July report indicates that their narratives "will include an appraisal of the prevalence and nature of vote fraud." In addition to this, page 6 describes a look into the "relationship between voter ID regime and vote fraud."

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to be studied by the EAC using a balanced group of consultants--not Eagleton and Moritz, who are likely to focus on just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of \$500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions from congressional staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against

026244

Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

Commissioners:

The following items are in the news.

- Fred Lucas of the *Danbury News Times* in Connecticut provides more details on the story involving the state's reaction to EAC's advisory on lever machines. Lucas provides more details on the advisory itself as well as the role of EAC and DOJ in HAVA as follows.

"Lever voting machines were not banned in the federal law. The new ruling is an advisory decision from the commission in response to a question from election officials in Pennsylvania....Though the commission's rulings do not have the force of legislative decisions, the U.S. Supreme Court has held that administrative commissions carry deferential weight when courts interpret laws....EAC spokeswoman Jeanie Layson said it's up to the U.S. Department of Justice to decide whether to enforce the ruling. A U.S. Justice Department spokesman on voting matters reached Thursday said he would research the decision, but did not call back and could not be reached later for comment."

- The *Washington Post* and the *New York Times* report on the recommendations released by the Carter-Baker Commission. Among other issues dealing with photo ID, voter identification numbers and registration, the Post mentions recommendations regarding EAC as follows.

"The panel recommended that the U.S. Election Assistance Commission oversee a system to allow easy sharing of state voter databases as well as requiring the use of a uniform identifier -- the voter's Social Security number -- to help eliminate duplicate registrations....Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission."

Commission on Federal Election Reform: Final Commission Report: Building Confidence in U.S. Elections  
<http://www.american.edu/ia/cfer/>

- Gerald Witt of the *Danville Register and Bee* in Virginia reports on the end of lever machine voting in

026246

Danville, VA. The old lever machines were auctioned off on Saturday. Brian Hancock is quoted as follows.

"In Florida some used them to sink offshore for artificial reefs," said Brian Hancock, research specialist for the U.S. Election Assistance Commission, about the old voting machines that are being replaced by lighter, smaller computerized systems.

- James Quirk of the *Asbury Park Press* reports on fraud allegations contained in a report by the New Jersey Republican State Committee. John Weingart of Eagleton Institute of Politics questions the magnitude of the charges and EAC is mentioned as follows.

"The Eagleton Institute is in the middle of a study with the U.S. Election Assistance Commission to determine both if voter fraud exists on a level that could be prevented with tighter identification requirements at the polls, and if such increased requirements would cause lower-income voters ... usually registered Democrats ... to avoid the polls. So far, Weingart said, there is no data to support either theory."

- The *Toledo Blade* reports on the appointment of Keith Cunningham, director of the Allen County Board of Elections in Ohio to EAC's Board of Advisors.

## Voting machines may be history

<http://news.newstimeslive.com/story.php?id=74485&category=Local>

Federal panel finds Connecticut's lever booths inaccessible to the disabled, prone to error  
By Fred Lucas

THE NEWS-TIMES

Friday, September 16, 2005

Connecticut's voting machines are prone to error, and lack accessibility for disabled and non-English speaking voters. Because of that finding by a federal panel, the state's 3,500 lever machines could be junked before the 2006 election.

They would have to be replaced with new machines that cost between \$5,000 and \$20,000 each.

State officials are scrambling to find out the ruling by the U.S. Election Assistance Commission is binding.

Many don't want to change from the old machines, which have worked fine so far, said Danbury Republican Registrar of Voters Mary Ann Doran.

"These machines do not break down and are dependable," Doran said in defense of the lever machines. "We've had no floating chads. We've had no power outages. These work."

Connecticut is spending \$33 million in federal money to buy new electronic voting machines. The state plans to ensure each polling place in the state has one electronic machine accessible to disabled people, with a Spanish ballot available and a paper voting receipt to ensure accuracy. The 769 new voting machines are supposed to be available in time for the 2006 election.

The new mandates from the federal election panel were issued under the auspices of the 2002 federal Help America Vote Act, or HAVA, passed in light of the debacle of the 2000 presidential race, when massive malfunction of the counting process in Florida the the outcome of the George W. Bush-Al Gore

race into question for two months. The commission was established to implement rules to guarantee voting would be fair and accessible throughout the country.

"The state looks to the EAC to give us guidance in meeting HAVA and they have given us none," said Secretary of the State Susan Bysiewicz Thursday. "The \$33 million is enough to provide one machine per polling place. We don't know if it will be enough to replace the 3,500 lever machines."

Lever voting machines were not banned in the federal law. The new ruling is an advisory decision from the commission in response to a question from election officials in Pennsylvania.

Disability advocates are ready to say good riddance to the lever voting machines, said Danbury resident Chris Kuell, vice president of the state's chapter of the National Federation of the Blind.

"They are not accessible," Kuell said. "The United States has 54 million disabled people. People who are visually impaired, are in a wheelchair, or have problems with motor skills can think and vote, but they can't operate these machines."

Kuell said he was satisfied that Connecticut is at least getting one specific machine per precinct that is accessible, but hopes for the day when every district has more than one.

"California, Nevada, Kentucky and Texas have used electronic voting machines for years," Kuell said. "More states are going to having more accessible machines. This country's government is based on accurate voting and the right to vote."

Though the commission's rulings do not have the force of legislative decisions, the U.S. Supreme Court has held that administrative commissions carry deferential weight when courts interpret laws.

EAC spokeswoman Jeanie Layson said it's up to the U.S. Department of Justice to decide whether to enforce the ruling. A U.S. Justice Department spokesman on voting matters reached Thursday said he would research the decision, but did not call back and could not be reached later for comment.

The EAC decision faulted lever machines for not having a permanent paper record for "audit capacity" of votes.

Also, the machines do not have a documented test to show they have an error rate of less than one in 500,000. Further, the machines are not accessible to the handicapped, and have no alternate language accessibility.

Attorney General Richard Blumenthal said the commission's opinion is only advisory and not binding on any state.

"The authority to decide whether, when, and how to enforce the statute belongs to the Department of Justice," Blumenthal said. "Regarding the central issue – what constitutes an adequate paper trail or audit capacity under the statute – we believe that the DOJ will carefully and objectively consider the Secretary of the State's position, and accept good-faith compliance with the law."

Many local officials hope Blumenthal is right.

"I would like to know how they are going to implement this," said Brookfield Republican Registrar Karen Nindorf. "Who's going to pay for all this? The federal government is good at mandating things and not funding them. This is amazing to me."

Doran, the Danbury registrar, has a problem with forcing cities and towns to have ballots in an alternate language.

"Every voter should read English," Doran said. "How can you be an intelligent voter if you cannot read

English? All the campaign literature is in English."

Under federal law, if a city or town has more than 1 percent of the population that predominantly speaks another language, it must provide a ballot in that language at each polling place. Seven municipalities in Connecticut, including Danbury, must provide ballots in Spanish.

Doran said local officials still do not know for certain what machines the federal government will and won't accept, so it would be tough to know the cost of replacing 42 voting machines.

Newtown has 25 voting machines, one for every 900 people. But with electronic machines, traffic is expected to move slower, as many voters are unfamiliar with the machines. That could mean the town would have to buy 75 machines to replace its lever machines, and that would cost about \$300,000, said Newtown First Selectman Herb Rosenthal, the president of the Connecticut Conference of Municipalities.

Rosenthal, town clerks and registrars of voters will meet with Bysiewicz at 10 a.m. Wednesday to determine how the ruling might affect towns.

"I don't see how we could comply with that now," said Newtown First Selectman Herb Rosenthal, president of the Connecticut Conference of Municipalities. "It's unclear who's going to pay for this. If the federal government tries to force this, I hope the state will try to get an injunction. We've never had a problem with voting as far as I'm concerned and now the federal government says the machines are no good."

## Carter-Baker Panel to Call for Voting Fixes

<http://www.washingtonpost.com/wp-dyn/content/article/2005/09/18/AR2005091801364.html>

Election Report Urges Photo IDs, Paper Trails And Impartial Oversight

By Dan Balz  
Washington Post Staff Writer  
Monday, September 19, 2005; A03

Warning that public confidence in the nation's election system is flagging, a commission headed by former president Jimmy Carter and former secretary of state James A. Baker III today will call for significant changes in how Americans vote, including photo IDs for all voters, verifiable paper trails for electronic voting machines and impartial administration of elections.

The report concludes that, despite changes required under the Help America Vote Act of 2002, far more must be done to restore integrity to an election system that suffers from sloppy management, treats voters differently not only from state to state but also within states, and that too often frustrates rather than encourages voters' efforts to participate in what is considered a basic American right.

The 2002 federal legislation grew out of the disputed election of 2000 and is not yet fully implemented. But the Carter-Baker commission said that even with some important changes in place, the 2004 election was marred by many of the same errors as the 2000 election. "Had the margin of victory for the [2004] presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated," the report states.

Disputes over the counting of provisional ballots, the accuracy of registration lists, long lines at some polling places, timely administration of absentee ballots and questions about the security of some electronic voting machines tarnished the 2004 elections.

Many complaints came in Ohio, where President Bush narrowly defeated Sen. John F. Kerry (D-Mass.) to secure his reelection victory. Although there has been no credible evidence of partisan manipulation of the election in Ohio, the criticisms there and elsewhere have renewed calls for a more uniform, trustworthy and nonpartisan election system across the country.

Commission leaders say the goal of the panel's 87 recommendations -- at an estimated cost of \$1.35 billion -- is to make participation easier while also enhancing ballot integrity, a careful balancing of the long-standing argument between Democrats and Republicans in the administration of elections.

The most controversial recommendation calls for all voters to produce a standard photo identification card before being allowed to vote. The commission proposes that, by 2010, voters be required to use either the Real ID card, which Congress this spring mandated as the driver's license of the future in all states. For about 12 percent of eligible voters who do not have a driver's license, the commission says states should provide at no cost an identification card that contains the same key information.

Critics of voter ID cards say the requirement could raise privacy issues and intimidate or discourage some Americans, particularly the elderly, the poor and minorities, from participating in elections. To alleviate those concerns, the Carter-Baker commission urges states to make it easy for non-drivers to obtain such cards and seeks measures to ensure privacy and security for all voters. The commission report states that by adopting a uniform voter ID card, minorities would be better protected from shifting identification standards at individual polling places.

Still, the proposed ID card drew sharp dissent from some commissioners, among them former Senate Democratic leader Thomas A. Daschle (S.D.). In a dissent joined by two other commissioners, Daschle likened the ID to a "modern day poll tax."

Both parties engaged in massive voter registration drives in 2004, but inaccurate voter lists produced many of the disputes on Election Day. The 2002 election reform act mandated states to oversee voter lists, but the commission said that some states are still relying too much on the counties to produce the data and called on states to take responsibility for the lists' accuracy.

The 2002 act required the use of provisional ballots for any eligible voter who shows up at a polling place but whose name is not on a registration list, but the 2004 election produced disparate standards for determining which of those ballots were counted. Alaska counted 97 percent of its provisional ballots, but Delaware counted 6 percent, according to the commission. The group recommends that states set uniform standards.

Approximately 9 million Americans move from one state to another in any given year. The commission cited news reports asserting that almost 46,000 voters from New York City were also registered in Florida. The panel recommended that the U.S. Election Assistance Commission oversee a system to allow easy sharing of state voter databases as well as requiring the use of a uniform identifier -- the voter's Social Security number -- to help eliminate duplicate registrations.

The Florida recount in 2000 etched the image of the "hanging chad" in the minds of many Americans and spurred the shift to electronic, rather than paper, ballots. But flaws in these new computerized systems have led to doubts about their accuracy. The commission calls on Congress to require that all electronic machines include the capacity for a paper trail that voters can use to verify their vote. Beyond that, to alleviate concerns that machines can be maliciously programmed or hacked, the commission calls for new standards to verify that machines are secure.

Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission.

The integrity of the Ohio system was challenged in part because the chief election official, Secretary of State J. Kenneth Blackwell, also served as the Ohio co-chairman for the Bush-Cheney campaign.

The commission also included other recommendations that have been proposed before, including free television time for political candidates, a request that broadcast networks refrain from projecting any results until the polls have closed in the 48 contiguous states and that both parties shift to a system of four regional primaries to pick their nominees.

The Commission on Federal Election Reform was created under the auspices of American University's Center for Democracy and Election Management. The group was funded by several foundations, and Robert A. Pastor of American University served as executive director. Its membership included Republicans, Democrats and independents.

#####

## Bipartisan commission proposes election reforms

<http://www.contracostatimes.com/mld/cctimes/news/12684624.htm>

Posted on Mon, Sep. 19, 2005

By David E. Rosenbaum

NEW YORK TIMES

WASHINGTON - A private commission led by former President Jimmy Carter and former Secretary of State James Baker is proposing new steps to strengthen state election procedures and recommending that Congress require the political parties to hold four regional presidential primaries in election years rather than allowing states to hold primaries whenever they wish.

The bipartisan panel, called the Commission on Federal Election Reform, said it was responding to flaws in the system exposed by the elections of 2000 and 2004.

"We should have an electoral system where registering to vote is convenient, voting is efficient and pleasant, voting machines work properly, fraud is deterred and disputes are handled fairly and expeditiously," the commission declared.

Carter and Baker, a top official under presidents Ronald Reagan and George H.W. Bush, plan to deliver the report today to President Bush and congressional leaders.

It went to news organizations last week with the understanding that the material would not be published until today.

"The American people are losing confidence in the system, and they want electoral reform," Carter said in a statement.

These are the main recommendations:

- States, not local jurisdictions, should be in charge of voter registration, and registration lists in different states should be interconnected so voters could be purged automatically from the rolls in one state when they registered in another.
- Voters should be required to present photo ID cards at the polls, and states should provide free cards to voters without driver's licenses.
- States should make registration and voting more convenient with such innovations as mobile registration vans and voting by mail and on the Internet.

026251

- Electronic voting machines should make paper copies for auditing.
- In presidential election years, after the Iowa caucuses and New Hampshire primaries, the other states should hold regional primaries and caucuses at monthly intervals in March, April, May and June, with the order rotated.

The recommendations sought to strike a balance between the parties' priorities. Republicans worry about voter fraud and favor photo IDs. Democrats support easier registration and ballot access.

In the aftermath of the debacle in Florida in 2000, which put the outcome of the presidential election in doubt for more than a month, a public commission headed by Carter and former President Gerald Ford recommended an overhaul of the nation's election system.

Many of the commission's proposals, including provisional ballots for those whose eligibility was challenged, became part of the Help America Vote Act, which Congress approved and Bush signed in 2002.

But the 2004 election exposed more flaws.

Some election offices did not properly process registration applications or mail absentee ballots on time. There were reports of voter intimidation and complaints that registration lists had been improperly purged. Computers malfunctioned. Evidence of voter fraud arose.

Accusations of fraud and misconduct were rife after the race for governor in Washington. Christine Gregoire finished ahead by 129 votes, and the legal challenge was not resolved until June.

Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission.

The integrity of the Ohio system in 2004 was challenged in part because the chief election official, Secretary of State Kenneth Blackwell, also served as the Ohio co-chairman for the Bush-Cheney campaign.

The new panel was organized by American University to address those problems. Its 21 members include politicians from both parties and others with elections experience.

In the 2004 campaign, state primaries and caucuses were held earlier than ever, and the nominees were effectively chosen by March.

Everything happens so quickly now in primary campaigns, the commission asserted, that "most Americans have no say in the selection of presidential nominees."

The commission said it was worthwhile for Iowa and New Hampshire to continue to vote first because "they test the candidates by genuine retail, door-to-door campaigning."

But four regional contests afterward, the panel said, would "expand participation in the process" and "give voters the chance to closely evaluate the presidential candidates over a three- to four-month period."

026252

&cid=1031785144388

By GERALD WITT  
Register & Bee staff writer  
Monday, September 19, 2005

DANVILLE, Va. - Some of them wind up at the bottom of the ocean, but Danville is going to auction its retired voting machines on Saturday.

Since the 2002 Help America Vote Act requires localities to get updated polling systems, the question of what to do with the old lever machines arises.

"In Florida some used them to sink offshore for artificial reefs," said Brian Hancock, research specialist for the U.S. Election Assistance Commission, about the old voting machines that are being replaced by lighter, smaller computerized systems.

For their part, Danville officials hope to sell the city's 46 machines - alongside old fleet cars, a bus, dump trucks and lawn mowers - at a surplus auction at 10 a.m. on Sep. 24.

The voting machines are the same behemoths with curtains that were bought in 1957 and used for decades in the city, according to David Parrish, management analyst for Danville.

"They stopped making the machines in 1980," Parrish said. "And I've seen pictures of other machines that are from the '50s and '60s that are identical to what we have."

Manufactured by Automatic Voting Machine Corp. of Jamestown, N.Y., the lever machines were used in elections throughout the United States by the mid-1900s.

In 1944 the company's advertising claimed that 12 million voters used their machines, according to a Web site maintained by Douglas W. Jones, associate professor for the University of Iowa's Department of Computer Science and a principal investigator with ACCURATE - A Center for Correct, Usable, Reliable, Auditable and Transparent Elections, funded by the National Science Foundation.

When the machines were taken out of production they were cannibalized for parts. Some of Danville's units are refurbished with those parts, Parrish said.

But after the 2000 election and the following HAVA legislation, the machines had to go. The lever machines were last used in Danville for the 2004 election, he said. They still contain cards showing presidential candidates George W. Bush and John Kerry.

When expanded, the machines are about 7 feet tall and weigh more than 500 pounds. The new electronic touch-screen polling machines can fit in a suitcase.

As the old ones are removed from service, they end up being used in a number of ways. Most are just trashed, Parrish said, suggesting that they could be stripped to make a small workstation or other enclosed space.

Given some creativity, the lighted units could have a variety of second lives.

Or a history buff could show up at the Danville auction and have one loaded on a truck as a memento of one hotly contested election.

"In 10, 15 or 20 years there's not going to be very many of them left at all," Parrish said. "Everybody's getting rid of them."

No opening bid has been set, but it seems the machines may go cheap.

026253

"If they don't sell, we'll call up Florida and see if they want some more reefs," he said.

## County election boards question voter-fraud study

<http://www.app.com/apps/pbcs.dll/article?AID=/20050917/NEWS/50917001>

Published in the Asbury Park Press 09/17/05

BY JAMES A. QUIRK  
FREEHOLD BUREAU

The Monmouth and Ocean County boards of elections are questioning the findings of a study by the Republican State Committee that alleges potentially widespread voter fraud, including a claim that 4,755 votes were cast throughout the state last November in the names of dead people.

Officials with both boards say they want the committee's data for their own verification purposes. They said Friday that they have received no response from the state GOP committee.

At a Trenton press conference Thursday, Republican State Committee Chairman Tom Wilson said that in the 2004 election, 92 double votes were cast in Monmouth County, and 450 votes were cast in the names of those who are dead.

In Ocean County, Wilson said, the GOP study found that 79 people voted twice<sup>11</sup> and that 271 votes were cast in the names of dead people. The study found that overall, 6,572 people registered in both New Jersey and another state appeared to have voted twice in the 2004 election.

"We haven't seen that in Ocean County, that kind of duplicate voting," said Robert Giles, executive supervisor of the Ocean County Board of Elections. "The occasional duplication that may happen is a person getting an absentee ballot, not thinking they sent it, and sending a second . . . We want to see if this is just a misinterpretation of data."

Wilson said the committee has so far verified only "a handful" of the names of duplicate or dead voters that emerged from its study. Despite this, Wilson said he stands behind the study's findings.

"We gave (the state Attorney General's Office) close to 20,000 cases where double ballots were cast," Wilson said. "That's fraud ... you can't vote twice" or if you're dead.

An Asbury Park Press review of 697,000 active voters in Monmouth and Ocean counties found that 794 shared the same names and dates of birth. Of those 794, five appeared to have voted twice ... once in Monmouth and once in Ocean ... during the 2004 presidential election.

But those voters could have been different individuals who just happened to share the same names and birthdays. For example, one woman in Ocean County lived at the same address with a man who was most likely her husband. But in Monmouth County, a woman with the same name had a spouse with a different first name and age.

Both Wilson and Steve Berlin, a consultant for the Republican State Committee who formulated most of the voter data, said the limited depth of their study did not reveal a clear pattern of statewide voter fraud.

"But what we did find presented a whole room of smoke, and we brought it to (state Attorney General) Peter Harvey and asked if there's any fire there," Wilson said.

Lee Moore, a spokesman for Harvey, would only say that the Attorney General's Office is looking into the

GOP committee's allegations.

"Once we have assessed the situation, the determination will be made as to what, if any, action is required," Moore said.

Officials admit there are flaws in New Jersey's county voter registration rolls and the general election process. For example, Franklin Goldstein, administrative assistant with the Monmouth County Board of Elections, said people often do not notify the county when a loved one dies, so the deceased may remain on the county's voter registration roll for years as "inactive" until that person is verified as dead.

The same problem exists when people move from one county to another without informing the county they've left, Giles said. This problem should be eliminated, he said, when New Jersey moves to a statewide registration system, which is to happen in January, as required by the federal Help America Vote Act.

Even with these problems, John Weingart, associate director at the Eagleton Institute of Politics at Rutgers University and a former state Department of Environmental Protection assistant commissioner, said the GOP committee's finding of 54,601 duplicate voters, 4,397 double votes and 4,755 votes cast in the names of dead people is "a dramatic allegation" that's hard to believe.

The Eagleton Institute is in the middle of a study with the U.S. Election Assistance Commission to determine both if voter fraud exists on a level that could be prevented with tighter identification requirements at the polls; and if such increased requirements would cause lower-income voters ... usually registered Democrats ... to avoid the polls. So far, Weingart said, there is no data to support either theory.

"The notion that a lot of people would get together and figure out a way to vote more than once, all for a specific candidate, and have no one know about it, is hard to picture," Weingart said.

Investigations editor Paul D'Ambrosio contributed to this story.

## Allen elections director named to U.S. vote panel

<http://toledoblade.com/apps/pbcs.dll/article?AID=/20050919/NEWS09/50919010/-1/NEWS>

Article published September 19, 2005

The Toledo Blade

LIMA, Ohio – Keith Cunningham, director of the Allen County Board of Elections, has been appointed to a two-year term on the board of advisers of the U.S. Election Assistance Commission.

The 37-member commission, which was created by the Help America Vote Act of 2002, serves as a national clearinghouse and a resource for information and review of procedures relating to the administration of federal elections.

Mr. Cunningham has been director of the Allen County elections board since 1998 and is president of the Ohio Association of Election Officials.

Subject Voter ID Paper --Final Draft

Karen,

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary comments you would like us to consider, that meeting would be a most convenient occasion to discuss them.

Tom O'Neill

## REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

---

### 1. Introduction and Report Background

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve implementation of the requirements for voters to show identification pursuant to [statute or regulation citation] It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

### 2. Voter Identification –Background and Approach of the Study

Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The burden of providing required ID documents on the voter may be greater at the polls on Election Day than at the time of registration. The burden of checking ID, even as simple as a signature match, can be much greater on election workers at the polls than on those registering voters. Poll workers may be faced with long lines and limited time. This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>1</sup> The emphasis here is on Voter ID on Election Day and afterwards as election judges evaluate provisional

---

<sup>1</sup> As the Carter-Baker Commission noted, photographic ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify identification. Commission on Federal Election Reform, pp 46-47.

## FINAL D R A F T

ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

This analysis takes a view of voter ID issues broader than the rather narrow identification requirements in HAVA. Much of the national ferment over voter ID goes beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those casting a ballot for the first time who had not registered in person. The controversy in the states over voter ID stems from the HAVA requirements, goes beyond those requirements, and sets the context for the analysis here.<sup>2</sup>

Identification is often described as the critical step in protecting the integrity of the ballot, the process that ensures that the potential voter is eligible and permitted to cast a ballot and one ballot only. In fact, ensuring ballot integrity requires a perspective that takes in the entire voting process. Protecting the integrity of the ballot requires more than preventing the ineligible from voting. It also should ensure that all those who are eligible and want to vote can cast a ballot that counts, and that they can effectively cast a ballot for the candidate of their choice. The protection effort must take into account all forms of voting, including absentee ballots, and embrace each step in the process. A voting system that establishes onerous requirements for voters to identify themselves may prevent the ineligible from voting, but it may also prevent the eligible from casting a ballot. If the ID requirements of a ballot protection system block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or forget to bring to the polls the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This analysis does not include consideration of the incidence of vote fraud, the forms that it takes, nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. The EAC has commissioned a separate study of vote fraud and instructed us not to address that issue in this research.

---

<sup>2</sup> Harvard Law Review 119:1127. "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA. . . . HAVA makes explicit that it shall not 'be construed to prevent a State from establishing election technology and administration requirements that are more strict than' HAVA itself provides. The states have accepted the invitation. "

## FINAL D R A F T

Nonetheless, a broad view of ballot integrity is needed to appreciate the background and context of this narrower study. We explore the inter-relationships between Voter ID requirements and Provisional Voting and estimate the effects of various voter id requirements on turnout and on the casting of provisional ballots.

Voters lacking required ID, or who have ID that does not reflect their current address, may be able to vote only by casting a provisional ballot.<sup>3</sup> To the extent that stricter voter ID requirements divert more voters to the provisional ballot, voter ID requirements can put stress on the already pressured management of the polling place. Administering provisional ballots is more expensive than the normal ballot. Scrutiny of ID can create lines at the polling places, lines made longer as voters are diverted to the provisional voting line. Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle that will keep more citizens from the polls. A review of voter identification practices should keep in mind that America's problem may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes will be more effective if based on clear standards –legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

- Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?
- How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>4</sup>
- How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity

---

<sup>3</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>4</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

## FINAL D R A F T

that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>5</sup>

- How cost-effective is the system? Does it increase the security of the ballot at an affordable cost, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.
- If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>6</sup>
- Does it comply with the letter and spirit of Voting Rights Act?
- The seventh question is more difficult to measure than those described in the 6 questions outlined above. The Voter ID requirements should have a neutral result on the composition of the qualified electorate. That is, those requirements should not be designed to reduce the turnout of particular groups of voters who may have a propensity to support one party over another. Whatever the requirement may be, all citizens should be able to comply with it easily and at no or minimal cost.

### Summary of findings and conclusions

Voter turnout at the state level in 2004 declined where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Including other factors beyond voter id requirements diminishes the influence of voter ID on turnout. But the analysis still offers some support for the hypothesis that as the burden of voter identification

---

<sup>5</sup> In New York, in 2004, disparities in training and voting information were made all too apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>6</sup> For example, the Carter-Baker Commission accompanied its recommendation for a national voter ID card with a recommendations for an affirmative effort by the states to reach out and register the unregistered, to use the new Voter ID regime as a means to enroll more voters.

## FINAL D R A F T

requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>7</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

### Recommendations for consideration and action by the EAC

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice that before states adopt a change described as increasing ballot security, states should publish an analysis of the number of eligible, potential voters that the new requirement may keep away from the polls or be permitted to cast only a provisional ballot as well as an estimate of the number of ineligible voters who will be prevented from voting.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. The data should be analyzed to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent and should describe the dynamics of voter ID in preserving the security of the ballot?

---

<sup>7</sup> Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.

## FINAL D R A F T

- Useful information could be supplied by exit polling. It would identify those who had cast a provisional ballot and ask why they were unable to cast a regular ballot. Answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
- Polling to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter id requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three criteria: the convenience of the voter, the total time allowed to evaluate ballots<sup>8</sup>, and the safe harbor provision in presidential elections.

---

<sup>8</sup> Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

**FINAL D R A F T**

**3. Voter ID and Turnout**

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility.

**TABLE 1 -- Voter ID Requirements**

State	Forms of ID Required 2004	Current ID Requirement for First-Time Voters	Current ID Requirements for All Other Voters	Verification Method for Provisional Ballots

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

\*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

\*\*State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

\*\*\*Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

\*\*\*\*Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\*\*\*\*\*Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

\*\*\*\*\*Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

In 9 states, voters were required merely to state their names so that poll workers could locate them in the registration book. In 14 states, voters signed their names. In 8 states, voters' signatures were matched with a specimen signature. In 15 states voters had to show some form of ID, not necessarily an official picture ID. And in 5 states, voters were required to show an official photo ID, although in 2004 voters who lacked a picture ID could execute an affidavit and vote a regular ballot.

## FINAL D R A F T

This neat assignment of each state to one of a few categories may fail to reflect actual practice at a polling place. Like any system run by fallible people it is subject to wide variation in practice. Voters may be confronted with demands for identification at variance with state statutes or legislation. Other voters may be waved through the process without a look at any document, no matter what the regulations may say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters may encounter.

It is not practical to attempt to capture the wide variety of how voter ID requirements may be actually implemented across the nation's tens of thousands of polling places. Recognizing that means that the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

### Effect of Voter ID requirements on Turnout

#### Summary of Findings and Conclusions

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.<sup>9</sup>

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each

---

<sup>9</sup> See Appendix \_\_\_\_ for the full report on voter ID and turnout.

## FINAL D R A F T

level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

### Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous. a form of identification, and providing a form of photo identification.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

## FINAL D R A F T

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political– also affect voter participation. Multivariate models that take into account other predictors place the effects of voter identification in a more accurate context. To consider that broader context, our multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground for president, governor or senate voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-

## FINAL D R A F T

Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line.

In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line.

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. (Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting.) Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age in years, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note

## FINAL D R A F T

that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

### Discussion and Conclusions of the Analysis

The results presented here give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

## FINAL D R A F T

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.
- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements range from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

The data examined in this analysis could not capture the dynamics of how identification requirements might lower turnout. Do these requirements dampen turnout because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most

**FINAL D R A F T**

effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

#### 4. Litigation over Voter ID Requirements

There have been a handful of cases challenging identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether or not laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on cases challenging requirements that voters present some form of identifying documents if the photo identification is the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

## FINAL D R A F T

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

**FINAL D R A F T**

suggest that best practice may be to conform to the NVRA's limitation on requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

## FINAL D R A F T

### 5. Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

This information would allow a more informed judgment to be brought to bear in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

## FINAL D R A F T

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### 6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.<sup>10</sup> The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That research might address that, so far as may be

---

<sup>10</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." The exclusion of voters through restrictive ID requirements could affect election outcomes as much as fraud by voters at the polls. *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

## FINAL D R A F T

necessary to reduce vote fraud, could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended by our colleague Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.<sup>11</sup>

---

<sup>11</sup> "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. These electronic photos should satisfy the anti-fraud concerns of conservatives as much as printed photos that citizens would be required to bring to the polls. . . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier. "

## APPENDIX –Court Decisions and Literature on Voter Identification and Related Issues

### Court Decisions

#### Summary of Relevant Cases:

#### Challenges Prevailed:

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### Challenges Rejected:

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters’ identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions’ purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

## FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

### *McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

### *Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

### *Perez v. Rhiddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

### **Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

#### ***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

## FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

### ***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

### **Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

#### ***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

#### ***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

## FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

### ***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

### ***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

## FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>12</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>12</sup> As of January 2, 2006

## FINAL D R A F T

### **Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>13</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>14</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

### **Indiana** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>14</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

## FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>15</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>15</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

Subject RE: Voter ID Paper --Final Draft

Karen,

Glad the paper arrived. Sorry it was a bit later than promised, but we reworked the statistical analysis on the basis of some insightful suggestions by the Peer Review Group. . .that took a few extra days (and nights). Looking back at my email to you, I realize the full statistical analysis was not attached as it should have been. It is appendix to the paper that will be of interest to those who want the details of our methodology. It is attached to this email.

I will be away, without access to email, until late Monday afternoon, but if you need to, you can reach me by cell phone at 908-794-1030.

Tom O'Neill

**Subject:** Re: Voter ID Paper --Final Draft

Tom-

Thanks for getting this to me. I've forwarded it on to the Commissioners.

026297

Will try to see if I can get feedback next week.

Regards-

**Analysis of Effects of Voter Identification Requirements on Turnout**  
**Tim Vercellotti**  
**Eagleton Institute of Politics**  
**Rutgers University**

**Introduction**

A key area of disagreement in the policy debate over voter identification requirements concerns how such requirements affect voter turnout. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

Deleted: , such as a driver's license.

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. It draws on two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

**Types of voter identification requirements**

Each state is classified as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (nine states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (eight states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>1</sup> It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

Deleted: ID

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus

<sup>1</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

### Analysis of aggregate data

If one treats maximum voter identification requirements as an ordinal variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with voter identification requirements ( $r = -.21$ ,  $p < .0001$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, voter identification also is negatively correlated with turnout ( $r = -.16$ ,  $p < .0001$ ). Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

Differences in voter turnout at the state level in 2004 varied based on voter identification requirements.<sup>2</sup> Taking into account the maximum requirements, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof.

Voter identification requirements alone, however, do not determine voter turnout. Multivariate models that take into account other predictors of turnout can place the effects of voter identification in a more accurate context. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. To capture electoral context I included whether the county was in a presidential battleground state (any state in which the

<sup>2</sup> Voter turnout is defined here as the percentage of the adult voting-age population that voted in November 2004, based on county vote totals reported by the states and U.S. Census population projections for the counties from 2003. McDonald and Popkin (2001) contend that using the voting-age population to calculate turnout understates turnout for a number of reasons. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the percentage of individuals who fell below the poverty line in each county in the 2000 Census.

I estimated a series of random intercept models to account for the likelihood that data from counties were correlated within each state (for further explanation of random intercept and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).<sup>3</sup> The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, those requirements had a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. Both contextual factors (whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate) increased voter turnout. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-Americans in the county had no effect, but the percentage of Hispanic adults exerted a negative effect on voter turnout, as did the percentage of individuals living below the poverty line.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities and the poor, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum voter identification requirements and the percentage of African-Americans, Hispanics, and poor individuals in the counties. The interaction involving African-Americans was not significant, but those involving Hispanics and poor individuals were significant.<sup>4</sup> Thus voter identification requirements have a greater effect for Hispanics and those living below the poverty line. A chi-square test of the difference in the deviance for each model (represented by  $-2 \log$  likelihood in Table 2), shows that the model with interactions provides a better fit to the data ( $p = 0.0003$ ).

Comment [01]

I also estimated the effects of the minimum voter identification requirements holding constant the effects of electoral context and the demographic variables.

<sup>3</sup> The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .40, indicating considerable variation between the states.

<sup>4</sup> The interactions are labeled in Tables 2 and 3 as VID\*African-American, VID\*Hispanic, and VID\*Poverty. To calculate the effects of voter identification requirements for a specific group, one must add the estimates for voter identification, the group, and the interaction. Doing so for Hispanic adults results in an estimate of  $-0.36 [-0.04 (\text{voter id}) - 0.38 (\text{Hispanic}) + 0.06 (\text{voter id X Hispanic})]$ .

[Table 3 here]

The effects of the minimum requirements are not statistically significant ( $p = 0.15$ ). The battleground state variable continues to exert a positive influence on turnout, while the presence of a competitive race for governor and/or U.S. Senate has no statistically significant effect. As in the maximum identification requirements models, as the percentage of the population that is Hispanic or poor increases, turnout declines. As the percentage of elderly increases, so does turnout. The proportion of African-Americans in the population does not affect turnout. Adding interactive effects to the model results in a statistically significant and negative effect of minimum voter identification requirements on turnout. But one must interpret this estimate with caution. A chi-square test for the difference in fit between the two models shows no significant difference ( $p = 0.08$ ), and thus no improvement to the fit when adding the interactions between voter identification requirements and the percentages of the county that is Hispanic or lives below the poverty line.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line. But aggregate data cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

#### Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm-Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>5</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the

Deleted:

<sup>5</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens.

It is important to note here that the voter turnout rate for the CPS sample is much higher than the turnout rates presented in the aggregate data analysis. The U.S. Census Bureau reported that 89 percent of registered voters in the CPS sample said they voted (U.S. Census Bureau 2005). Turnout among the voting-age population was 58 percent in 2004, according to the aggregate data analysis. The difference is a result of several factors. One factor consists of the different denominators in calculating the turnout rate – registered voters versus the much larger voting-age population. Also, previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of a level of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be much higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election. In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a competitive gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less. At the individual level, I controlled for gender, age in years, education, household income, and dummy variables representing whether a voter was Black/non-Hispanic, Hispanic, or another non-white race (with white/non-Hispanic voters as the omitted category for reference purposes). Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

Deleted: In addition, I eliminated from the sample respondents who said they were not U.S. citizens.¶

Deleted: ¶

**Results**

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, and estimated robust standard errors to control for correlated error terms for observations from within the same state.

[Table 4 here]

The two models in Table 4 use either the maximum or minimum voter identification requirements in each state. The two models generate virtually identical results. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters to say they had cast a ballot, while those of other non-white races were less likely than white voters to say they had turned out. Hispanic voters were not statistically different from white voters in terms of reported turnout. Consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>7</sup> I calculated the probabilities taking into account both maximum and minimum requirements, with photo identification serving as the most demanding of the maximum requirements and affidavits as the most demanding minimum requirement.

[Table 5 here]

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification under the maximum requirements. In other words, the probability of voting dropped with each level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Deleted: .025, or
Deleted: ,

Among the key variables of interest in the debate over voter identification requirements are race, age, income, and education. Given the large sample size (54,973 registered voters), it was possible to break the sample into sub-samples along those demographic lines to explore

<sup>7</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

variation in predicted probability by group. I disaggregated the sample by the variable of interest (such as race, for example), omitting that variable while I re-ran the probit model with the remaining predictors of voter turnout, including the voter identification requirements.<sup>8</sup> If the analysis showed that the voter identification requirements had a statistically significant effect on turnout, I used the probit coefficients from the model to calculate the predicted probability of voting for each group across the five requirements while holding the other variables in the model constant.

[Table 6 here]

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent.

The effects of voter identification requirements also varied by age, with the greatest variation occurring among voters ages 18 to 24.

[Table 7 here]

Voters in that age group had a predicted probability of 83.9 percent if the maximum requirement would be to state one's name, and the probability drops 8.9 percentage points if voters would have to provide photo identification. The range was from 83.1 percent to 75.4 percent under the minimum requirements. The gap in probability narrowed in older age groups (4.8 percent for the maximum requirements and 5.8 percent for the minimum requirements for those ages 25 to 44; 1.8 percent for the minimum requirements for those ages 45 to 64, and 2.4 percent for the minimum requirements for those ages 65 and older).

Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.<sup>9</sup>

[Table 8 here]

While the maximum set of requirements did not have a statistically significant effect for voters living below the poverty line, the minimum set of requirements had a significant and negative effect. The probability of voting was .784 for poor voters if they would have to identify

**Comment [o2]:** The turnout figures shown in the analysis of the aggregate data range of 57.3% turnout to 63.1% turnout. When using the individual data based on self-reports, the turnout figures approach 90%. I think a couple of sentences explaining the difference in the data between the two different analyses would be helpful here, even for readers comfortable with the statistical techniques used.

<sup>8</sup> See Nagler 1991 for a similar approach in analyzing the effects of registration closing dates broken down by education levels.

<sup>9</sup> I coded respondents as being above or below the U.S. Census Bureau's 2004 poverty line based on respondents' reported annual household income and size of the household.

themselves by giving their name, and the probability declined to .731 if they would have to provide an affidavit attesting to their identity. Both the maximum and minimum sets of requirements had a significant and negative effect on voters living above the poverty line, but the difference in probability across the effects was narrower (2.3 percent for the maximum requirements and 3.1 percent for the minimum requirements).

The effects of voter identification requirements varied across education levels as well, with those lowest in education demonstrating the widest variation in probabilities as identification requirements ranged from least to most demanding.

[Table 9 here]

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The difference from the lowest to the highest requirement among the minimum requirements was 7.4 percent. The difference in probabilities ranged from 3.3 percent for the maximum requirements to 4.5 percent for the minimum requirements for voters with a high school diploma. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

**Discussion and conclusion**

The results presented here provide evidence that as the level of demand associated with voter identification requirements increases, voter turnout declines. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election.

Deleted: n

The effects of voter identification requirements were more pronounced for specific subgroups. Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.

Deleted: ed

Deleted: as

Deleted: ere

Deleted: s

Deleted: ied

Effects of voter requirements also varied with education. Registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name. Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.

Deleted: ere

Deleted: say they

Deleted: d

Deleted: as the maximum requirements ranged from stating one's name to providing photo identification.

Deleted: ere

Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements range from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

Deleted: d

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?<sup>10</sup> Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers, to handle questions about, and potential disputes over, voter identification requirements.

Deleted: is

Deleted: election judges

<sup>10</sup> The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Neither the maximum nor minimum array of voter identification requirements had a statistically significant effect on the probability that a survey respondent was registered to vote.

Subject Eagleton ID report

## Comments regarding the Eagleton Report on Voter ID

While the report is generally acceptable, I found some parts of it to be misleading and at times appearing biased to support a view that imposing ID requirements at the polls should be discouraged. As an example, on the first page they write about poll workers facing “long lines and limited time,” suggesting that may be a problem for them to check ID. I am not sure what their point may be as poll workers in states that require ID checking will still have to do so no matter how long the voter lines they have. Some states may not have long lines at the polls and voters may not have the “limited time” suggested in the report.

They selectively quote the Carter-Baker Commission study to suggest that “photographic ID requirements for in-person voting do little to address the problem of registration by mail” even though the Carter-Baker study actually promotes the idea of a photographic ID requirement at the polls. To be fair, they need to state that fact.

Their table on page 7 indicates that Missouri’s current ID requirement for first-time voters relies on HAVA requirements. It is my understanding that Missouri law requires that all voters must show some type of ID at the polls (therefore it should state “Provide ID” as they did in listing CO, CN and LA).

On page 9 and in subsequent pages they make reference to “voting age population” (VAP) data issued by the Census Bureau. Is all the data they represent in their analysis based on the VAP or do they take into consideration the Citizen Voting Age Population (CVAP), which takes into account the number of non-citizens who may be included in the VAP. It wasn’t clear. You may remember that Kim Brace talked about the VAP vs. CVAP issue with us extensively and indicated that the CVAP figure is always the better one to use when analyzing Census Bureau data against voting data. He also said that many of the non-citizens included in the VAP figures tend to be Hispanic. And since the Eagleton study is making conclusions that indicate that ID requirements may tend to reduce Hispanic voter turnout, it becomes important to understand which figures Eagleton uses.

I would like to know if the new Census report on the 2004 election released this week changes any of their perspectives.

On page 12 they make reference to the CPS data and indicate that it reported a voter turnout rate of 89%, which is much higher than other data reported (which is also explained in their narrative). However, while the report indicates that the CPS data is “widely-accepted,” it does make clear by whom. I think for credibility reasons they need more supporting language since there is a significant difference between a self-reported turnout of 89% and the reality of 63%.

Subject RE: Voter ID Paper --Final Draft

Karen,

Glad the paper arrived. Sorry it was a bit later than promised, but we reworked the statistical analysis on the basis of some insightful suggestions by the Peer Review Group. . .that took a few extra days (and nights). Looking back at my email to you, I realize the full statistical analysis was not attached as it should have been. It is appendix to the paper that will be of interest to those who want the details of our methodology. It is attached to this email.

I will be away, without access to email, until late Monday afternoon, but if you need to, you can reach me by cell phone at 908-794-1030.

Tom O'Neill

Subject Voter ID Paper --Final Draft

Karen,

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary comments you would like us to consider, that meeting would be a most convenient occasion to discuss them.

Mr. Chairman,

We're in business. He had decided to go a different direction for the story he interviewed you for... it ended up being about voter ID, and he didn't quote you. So, he's going to do a piece about you that will run the Wednesday before the meeting. He's going to call Blount & Aiken for quotes, and said the St. Louis folks will talk to people there. He said it will also help promote the meeting. He liked the hook about you going out doing two things you've always wanted to do: 1) having a meeting in your hometown and 2) at your alma matter. I told him off the record you were being courted and could possibly end up working for the current administration.

He wants to talk to you on Tuesday, so I'll get with Amie to figure out a time. Also, do you mind if I send him your latest CV?

## **EAC Statement on Future Study of Voter Identification Requirements**

### **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic which are detailed in the attached report.

### **EAC Recommendations for further study and next steps**

EAC finds this initial review of States' voter identification requirements, state laws and litigation surrounding the implementation of voter identification requirements an important beginning step in its consideration of voter identification requirements. From this study and compilation of data EAC considers it advisable to engage in a longer-term, systematic review of voter identification requirements and is recommending that at a minimum the agency engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements.
- A review and study of how voter identification requirements are implemented and how these practices may vary from state law and statute.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into how voter identification requirements have had an impact over time on factors such as voter turnout and voter registration.

EAC believes that the findings from this initial study of voter identification requirements are helping inform additional studies it is conducting on a variety of related topics. The EAC study on first time voters who have registered to vote by mail and several forthcoming studies related to voter registration processes will provide necessary additional data to help inform discussions and debate related to ballot access and ballot security. The EAC also anticipates that follow-on study it does related to election crimes and various aspects of voting accessibility will also help inform and guide these ballot security and ballot access discussions.

Finally, EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout and voter registration figures;
- A research study which examines, in greater detail, the relationship between race and voter turnout, and race and methods for registering voters;
- Studies on the inter-relationship between various voter registration processes, voter turnout and number of election crimes reported or litigated;
- Publication of a series of case studies which detail a particular state's or jurisdiction's experiences with various voter identification and voter registration regimes;
- A policy paper or memorandum exploring the alternatives to current voter identification processes and regimes.

## The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

### **Peer Review Group**

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

# **REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES**

---

## **Report Background**

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

## **EXECUTIVE SUMMARY AND RECOMMENDATIONS**

### Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

- Opponents seek to forestall more stringent identification requirements, such as government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate. It inquires whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout. That analysis would constitute an important first step in assessing tradeoffs between ballot security and ballot access. The aim of this research is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis examined the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information (such as the specific reasons some potential voters are not allowed to cast a regular ballot) that that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on

turnout and on vote fraud is to collect more information on both topics systematically and regularly.

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:<sup>1</sup> the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.<sup>2</sup> Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, the different statistical methods and two different sets of data on turnout in 2004 election used in the study point to the same general finding. Stricter voter identification requirements (for example, requiring voters to present non-photo ID compared to simply stating their names) were correlated with reduced turnout in the models employed, as described in detail in Appendix C.<sup>3</sup> As explained below, these models find that a statistically

---

<sup>1</sup> See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. *Political Behavior*, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

<sup>2</sup> The EAC has contracted with other researchers to study vote fraud issues.

<sup>3</sup> Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*. Using the aggregate data, photo ID did not have a significant effect on turnout, possibly because in the

significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. (But note that in the model using the aggregate data, photo ID did not have a significant effect on turnout. The reason may have been that in this election, each state with a photo ID requirement provided an alternate way for those without a photo ID to cast a regular ballot.) Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible voters, however, the tradeoffs between ballot security and ballot access cannot be assessed.

### Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.<sup>4</sup> The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be asked to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be *required* to do or show, in order to cast regular ballot (again leaving aside a state

---

2004 election every state requiring photo ID provided an alternative way to cast a regular ballot for those voters who lacked photo identification. The individual data from the Current Population Survey did show a significant effect, but only for the overall sample and for white voters, which may be an artifact of the large sample size.

<sup>4</sup> Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

challenge process). We have included “maximum” requirements in our analysis, and not simply “minimum” requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the “maximum” of being asked to show photo ID may deter some voters even though the “minimum” would allow them to vote without photo ID.

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

#### Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis’s aggregate data and the individual-level data, although not always

for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, for the maximum ID requirements, the match-signature requirement and the provide-a- non-photo-ID requirement, but not the photo ID requirement, were all correlated with lower turnout compared to requiring that voters state their names. When the registration closing deadline was added as an independent variable in the aggregate analysis, signature match and non-photo id remained significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such

knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>5</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

#### Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls-- are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

---

<sup>5</sup> Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. A "Voter Impact Statement" would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.
3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC might also use the information reported by the states to encourage further assessment by the states of the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
  - I. Useful information could be supplied by state-sponsored surveys of voters conducted by local election officials. Such surveys would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
  - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
  - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks

statutory or regulatory requirements. Such reports should be available to the public.

4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots<sup>6</sup>, and the safe harbor provision in presidential elections.
5. Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is less certain.

## **SUMMARY OF RESEARCH**

### **Background and Approach of the Study**

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

---

<sup>6</sup> Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.
- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.
- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.
- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

#### Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>7</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

---

<sup>7</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>8</sup>

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>9</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that

---

<sup>8</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

<sup>9</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>10</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>11</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

---

<sup>10</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>11</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest seven questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>12</sup>
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>13</sup>
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>14</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>15</sup> A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

---

<sup>12</sup> "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

<sup>13</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>14</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>15</sup> "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>16</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it, intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

### **Voter ID and Turnout**

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>17</sup> Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.<sup>18</sup>

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the

---

<sup>16</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

<sup>17</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

<sup>18</sup> As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.<sup>19</sup> Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

<sup>19</sup> One state election official told us that, "We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is."

\* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

<sup>1</sup> Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

<sup>2</sup> Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

<sup>3</sup> Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

<sup>4</sup> Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

<sup>5</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>6</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>7</sup> Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

<sup>8</sup> Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

### Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ( $r = -.30, p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20, p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	64.2 %	State Name	63.0 %
Sign Name	61.1 %	Sign Name	60.4 %
Match Signature	60.9 %	Match Signature	61.7 %
Provide Non-Photo ID	59.3 %	Provide Non-Photo ID	59.0 %
Provide Photo ID	58.1 %	Swear Affidavit	60.1 %
<i>Average Turnout (All States)</i>	<b>60.9 %</b>		

**This table displays the mean turnout using the aggregate county level data for each state in 2004.**

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables.<sup>21</sup>(Dichotomous variables reflect either the presence or absence of a characteristic. In the dummy variable for non-photo ID, a state would be coded as 1 if it required non-photo ID, and 0 otherwise.)

Voter identification requirements are just one factor that might affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American <sup>22</sup>
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering

---

<sup>21</sup> The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

<sup>22</sup> The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

The dependent variable in each model using the aggregate data was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that the stricter voter identification requirements of matching one's signature to a signature on file with election authorities or presenting a non-photo ID are associated with lower turnout compared to turnout in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. (A "dummy variable" represents a particular attribute and has the value zero or one for each observation, e.g. 1 for male and 0 for female.) Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.<sup>23</sup>

---

<sup>23</sup> This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum requirements, a signature match and non-photo identification –but not photo identification-- were correlated at a significant level with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.<sup>24</sup> Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

#### Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>25</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens, who in this survey were not asked the voter registration and turnout questions. In

---

<sup>24</sup> For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>24</sup> Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

<sup>25</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have influenced turnout in 2004.<sup>26</sup> The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>27</sup>

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.<sup>28</sup> Table 3 below shows predicted probabilities (calculated from the probit

---

<sup>26</sup> The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

<sup>27</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>28</sup> A probit model is a popular specification of a generalized linear regression model, using the probit link function.

coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>29</sup>

<b>Table 3. Predicted probability of voter turnout – all voters</b>		
	<b>Maximum requirement</b>	<b>Minimum requirement</b>
<b>State name</b>	91.7%	91.5%
<b>Sign name</b>	89.9%	90.2%
<b>Match signature</b>	Not significant	Not significant
<b>Non-photo ID</b>	89.0%	89.0%
<b>Photo ID</b>	88.8%	----
<b>Affidavit</b>	----	87.5%
<b>Total difference from “state name” to “photo ID” or “affidavit”</b>	<b>2.9%</b>	<b>4.0%</b>
<b>N</b>	54,973	
Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies from stating one’s name to providing photo identification or an affidavit , with all other variables held constant.		
Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one’s name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>30</sup> In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those with fewer years of education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum

<sup>29</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

<sup>30</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter ID requirements.<sup>31</sup> The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

More rigorous voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

#### Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data,

---

<sup>31</sup> Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

In the aggregate data, the match-signature requirement and the provide-a-non-photo ID requirement were correlated with lower turnout compared to requiring that voters state their names. But the photo-ID requirement did not have an effect that was statistically significant, possibly because in 2004 each state requiring a photo-ID provided an alternative way to cast a regular ballot for voters who lacked that document.

In the model using the individual-level data the signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names (in the entire sample and for white voters, but the statistical significance may be an artifact of the very large sample size). That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

## Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*). Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.<sup>32</sup> Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a

---

<sup>32</sup> Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a

balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

#### **Developments since 2004**

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgement in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### **State Voter Databases and Voter ID**

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the

Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### **Conclusions**

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.<sup>33</sup>

---

<sup>33</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents with them to the polls, while assuring that each voter who casts a ballot is eligible and votes only once.

---

difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

## **EAC Report on Voter Identification**

### **Executive Summary**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data, aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau, the contractor found the overall relationship between the stringency of ID requirements and turnout to be fairly small, but statistically significant.

Based on The Eagleton Institute year-long inquiry into voter identification requirements EAC will implement one or more of the following recommendations:

- Further research into the connection between voter ID requirements and the number of ballots cast and counted;
- A state-by-state review of the impact that voter ID requirements are having on voter's participation;
- A state-by-state review of the relationship between ballot access and ballot security and the number of voters whose ballot is counted;
- A state-by-state review of time periods between voters casting of provisional ballots and the time allowed to return with an ID as well as a review of acceptable forms of identification other than photo ID.

## **Introduction**

This study was conducted at a time in which considerable attention is being paid to the issue of voter identification. Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for multiple voting or voting by those who are not eligible. The goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. Opponents of stricter ID requirements seek to ensure board access to a regular ballot. There is a fear that some voters -- racial and ethnic minorities, young and elderly voters-- lack convenient access to required ID documents, or that these voters may be fearful of submitting their ID documents for official scrutiny.

This report considers policy issues associated with the voter ID debate. It examines the relationships between voter ID requirements and voter turnout along with the various policy implications of the issue.

## **Methodology of the Study**

In May 2005, under contract with the EAC, the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University undertook a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. The contract also included research and study related to provisional voting requirements. These research findings were submitted and reviewed by the EAC as a separate study.

The Eagleton Institute of Politics gathered information on the voter identification requirements in 50 states and the District of Columbia for 2004. Based on interpretations of state statutes and supplemental information provided through conversations with state election officials, state ID requirements were divided into five categories, with each category of identification more rigorous than the one preceding: stating name, signing name, signature match, presenting an ID, and the most rigorous, presenting a government photo ID. The Eagleton Institute also categorized and identified each state according to maximum and minimum identification requirements. Maximum requirements refer to the most that voters may be asked to do or show at the polling place. Minimum requirements refer to the most that voters can be required to do or show in order to cast a regular ballot. These definitions and the subsequent state-by-state analysis of voter identification requirements omitted those cases in which a particular voter's eligibility might be questioned using a state's voter ballot challenge process.

Two data sets were used to apply the criteria (variables) that were developed above: aggregate voter turnout data at the county level which was gathered from the EAC's 2004 Election Day Survey and; reports of individual voters collected through the November 2004 Current Population Survey administered by the U.S. Census Bureau. Use of EAC

survey data and Census Bureau CPS data provided a way to cross-check the validity of the analysis and conclusions that would be drawn regarding the effect of voter ID requirements on voter turnout.

## **Study Oversight and Methodological Review**

A draft of the Eagleton Institute report and findings on voter identification requirements was critiqued by a peer review group convened by the Eagleton Institute. A second review of the study's research and statistical methodologies was conducted using a group of research and statistical experts independently convened by the EAC. Comments and insights of the peer review group members were taken into account in the drafting of a study report although there was not unanimous agreement among the individual reviewers regarding the study findings and recommendations.

## **Summary of the Research**

### **Maximum and Minimum Voter Identification Requirements**

In order to analyze what, if any, correlation may exist between a State's voter identification requirements and voter turnout, the Eagleton Institute first coded a state according to how demanding its voter ID requirement was. The voter ID requirement, ranked from lowest to highest was as follows: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification and, providing a form of photo identification. Several possible caveats to this ranking system were noted. For all states which had photo identification requirements in 2004, voters

without a photo ID were permitted to cast a regular ballot after signing an affidavit regarding his or her identity and eligibility. These voters were also allowed to provide other forms of ID. The researchers also noted that while each state may be assigned to a category, that categorization may not reflect the actual practice related to voter identification that may or may not have taken place at many polling places.

Research performed for this study by the Moritz College of Law found that states had five different types of **maximum** identification requirements in place on Election Day 2004. For the purposes of this study a requirement that called for a signed affidavit or the provision of other forms of ID was considered the most rigorous or the “maximum” requirement. At the polling place voters were asked to:

- State his or her name (10 states)
- Sign his or her name (13 states and the District of Columbia)
- Sign his or her name, which would be matched to a signature on file (seven states)
- Provide a form of identification that did not necessarily include a photo (15 states)
- Provide a photo identification (five states)

Using the same criteria, but applying them as **minimum** rather than maximum criteria for voting the research showed: **(check this section- it doesn't really make sense)**

- State his or her name (12 states)
- Sign his or her name (14 states and the District of Columbia)
- Matching the voter's signature to the signature on file (6 states)
- Provide a non-photo identification (14 states)
- Swear by an affidavit (4 states)

The results of the research are summarized in Table 1.

Election laws in several states offer exceptions to these ID requirements if potential voters lack the necessary form of identification. Laws in these states set a minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. In 2004 none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID were allowed to vote in all states, if he or she was able to meet another ID requirement.

### **The Relationship of Voter Identification Requirements to Voter Turnout**

A statistical analysis examining the variation in turnout rates based on the type of voter ID required by each state in the 2004 election was conducted using two sets of data: 1) aggregate turnout data at the county level for each state (compiled by the Eagleton Institute of Politics-**footnote about how they collected the data**) and 2) individual level survey data included in the November 2004 Current Population Survey (CPS), conducted by the U.S. Census Bureau.

The analysis looked at the voter identification requirements as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements were ranked according to how demanding they were judged to be, with photo identification considered to be the most demanding requirement (**what about affidavit?????**). Used as discrete variable, the statistical analysis considered stating the name as the least demanding ID requirement; the other ID requirements were then compared to that requirement.

### **Aggregate-level statistical analysis**

The statistical analysis performed by the Eagleton Institute of Politics found that when averaging across counties in each state, statewide turnout is negatively correlated to maximum voter identification requirements ( $r=-.30$ ,  $p$  less than  $.05$ ). When a statistical analysis is performed on the other minimum voter ID requirements (with affidavit being the most demanding requirement), the correlation between voter identification and turnout is negative, but not statistically significant ( $r=-.20$ ,  $p=.16$ ). These findings would suggest that the relationship between turnout rates and minimum requirements may not be linear.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend was found when analyzing minimum ID requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their name, compared to 60.1 percent in states that required an affidavit from voters. This analysis showed there was not a clear, consistent linear relationship between turnout and minimum identification requirements.

**(insert table 2- Variation in 2004 State Turnout Based on Voter Identification Requirements)**

### **Multivariate models of analysis using aggregate-level data**

The Eagleton Institute of Politics performed an additional analysis that would estimate the effects of voter identification requirements, that took into account the electoral context in 2004 and, the demographic characteristics of the population in each county. The model also considers such variables as whether or not the county was 1) in a presidential battleground state, 2) if the county was in a state with a competitive race for government and/or the U.S. Senate, 3) the percentage of voting-age population in each county that was Hispanic or African-American 4) the percentage of county residents age 65 and older, 5) the percent of county residents below the poverty line, and 6) the number of days between each state's registration deadline and the election.

The results of this statistical modeling and subsequent analysis indicated that the stricter voter ID requirements of matching a voter's signature to a signature on file or with presenting a non-photo identification are associated with lower voter turnout when compared to voter turnout in states that required voters to simply state his or her name. These conclusions were reached when variables 1-5 listed above were held constant.

Other results from the Eagleton Institute analysis of stricter voter identification requirements showed that:

- Increased voter turnout was associated with whether the county was in a battleground state or whether that state have a competitive race for governor and/or U.S.Senate.
- A slight negative effect on turnout was correlated with those state's with a longer time between the closing date for registration and the election.
- Voter turnout declined as the percentage of Hispanics in a county's population increased.
- Higher turnout (and a positive correlation) was associated with a higher percentage of senior citizens and household median income.
- The percentage of African-Americans in the county did not have a significant effect on turnout.

The Eagleton Institute analysis of minimum voter identification requirements showed that:

- A relationship between minimum voter ID requirements and turnout was not demonstrated.
- Battleground states and those with competitive state races had a significant and positive correlation to turnout.
- A higher percentage of senior citizens in the county and higher household median income were associated with higher turnout and showed a positive correlation to turnout.
- The percentage of Hispanics in the county was associated with reduced turnout.
- The increased number of days between the closing date for registration was associated with reduced turnout.

The analysis of these aggregate, county-level data showed a significant correlation, between maximum voter identification requirements (a signature match and non-photo

identification, but not a photo identification) and lower turnout in the 2004 election. This correlation was also significant when compared to the minimum voter ID requirement of the voter simply having to state his or her name.

### **Multivariate analysis using individual level turnout data**

This analysis which used November 2004 Current Population Survey data conducted by the U.S. Census Bureau is based on reports from self-described registered voters. Not included in the analysis are persons who said they are not registered to vote, those who said they cast absentee ballots and those who said they were not U.S. citizens. The CPS' Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. (**why is the N is Table 3 54,973?**)

In addition to the five maximum voter identification requirements (enumerated on page XX) the analysis performed included other socioeconomic, demographic and political factors that could have influenced turnout in the 2004 election. These independent variables were analyzed against the dependent variable of whether or not the respondent said he or she voted in the November 2004 election.

In this analysis three of the voter identification requirements were shown to have a statistically significant correlation with whether or not the survey respondents said they have voted in 2004. Lower voter turnout was associated with:

- those states with maximum voter requirements to sign one's name,
- those states with maximum voter requirements to provide a non-photo ID or photo ID, or
- those states with the minimum voter requirement to swear by an affidavit in order to cast a ballot without the state-required identification

Increased voter turnout showed:

- A significant correlation with the competitiveness of the Presidential race (**explain**).
- African-American voters were more likely than white or other voters to say they have voted.
- Income and marital status were positive predictors of voting (**high income or low income, single, married?**),
- Women were more likely to say they voted than men.
- Those ages 45 to 64 and 65 and older were more likely to say they voted than those ages 18 to 24.
- Those who earned a high school diploma, attended some college, graduated from college or attended graduate school were more likely to say they have voted than those who had not finished high school.

## **Analysis of the predicted probability of voter turnout using the individual data**

Using this Census Bureau Current Population Survey data the Eagleton Institute of Politics performed an additional statistical analysis in which they calculated the effect of various independent variables on the probability that a respondent said he or she voted. This analysis, involving 54,973 voters cross-tabulated the maximum and minimum voter identification requirements in each state with the five levels of voting requirements: stating name, signing name, matching the signature, a non-photo ID, photo-ID signing an affidavit. The results of these **Predicted Probability of Voter Turnout for all Voter** tabulations are summarized in Table 3 below:

From this analysis, the Eagleton Institute of Politics found that three of the voter identification requirements (**which ones?**) exerted a statistically significant, negative effect on whether or not the CPS survey respondents said they had voted in 2004. That is, compared to states that require voters to only state their name, those states which require the voter to sign his or her name, to provide a non-photo ID, or to provide a photo ID as a maximum requirement, were shown to have a negative influence on turnout. Also, a negative influence on turnout was found when comparing those states that require voters to only state their name, as compared to those states which have as a minimum requirement for verifying voter ID, signing an affidavit.

This probability analysis also found that the competitiveness of the presidential race had a significant effect on turnout as well as some significant demographic and educational effects. For the entire voting population signature, non-photo identification and photo identification requirements were all associated with lower turnout rates compared to the requirements that voter simply state their names. The analysis further found that:

- The predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names and that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to only having to state one's name.
- Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. African American and Asian-American voters were about 6 percent less likely, while white voters were about 2 percent less likely.
- Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, while they were 6.1

percent less likely to vote where non-photo identification was the minimum requirement.

- For those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in those states that required an affidavit as the minimum requirement. These percentages were arrived at when comparing these states to ones that use as a minimum or maximum requirement, the voter to merely state his or her name.

### **Conclusions from the statistical analysis**

The statistical analysis found that as voter identification requirements vary, so do voter turnout rates. These findings were borne out through analyses conducted on aggregate data and individual-level data. There were, however, some distinctions found depending upon whether or not the state's particular voter identification requirements were set as minimums or maximums.

- The overall relationship between voter identification requirements and turnout for all registered voters was found to be small but statistically significant.
- Using the aggregate data the signature match and the non-photo identification requirement correlated with lower turnout. The photo identification requirement did not have a statistically significant effect.
- In the individual-level data the signature, no-photo identification and photo identification requirement were all correlated with lower turnout when compared to the requirements that voter simply state their names.
- Across various demographic groups (African-Americans, Asian-Americans and Hispanics) a statistically significant relationship was found between the non-photo identification requirement and voter turnout

### **Caveats to the Analysis**

The Eagleton Institute for Politics and the EAC make note that while this analysis is a good beginning, significant questions remain regarding the relationship between voter identification requirements and turnout. These analyses are unable, for example, to capture how or why identification requirements might lower turnout. That is, is it because voters are aware of the identification requirements and stay away from the polls because of them? Alternatively, do the requirements result in some voters being turned away when they cannot provide the identification, or must cast a provisional ballot?

Knowing more about the “on the ground” experience of voters regarding various identification requirements will guide state and local level policy makers in their efforts to educate voters about the requirements. These experiences could also help instruct election judges on how to handle questions and possible disputes over voter identification requirements.

## **Public Policy and Administrative Considerations**

Voter Identification, often described as the critical step in protecting the integrity of the ballot, is a process which can ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot. A voting system that requires voters to produce an identification document or documents may prevent the ineligible from voting, but also may prevent the eligible from casting a ballot.

Evaluating the effect of different voter identification regimes can be most effective when based on clear legal, equitable and practical standards. The questions outlined below might point policymakers to standards that can be created around voter identification requirements.

1. Is the voter ID system designed on the basis of valid and reliable empirical studies that will address concerns regarding certain types of voting fraud?
2. Does the voter ID requirement comply with the letter and spirit of the Voting Rights Act?
3. How effective is the voter ID requirement on increasing the security of the ballot and can it be coordinated with the statewide voter registration database?
4. How feasible is the voter identification requirement? That is, are there administrative or budgetary considerations or concerns? How easy or difficult will it be for pollworkers who must administer the requirement?
5. How cost effective is the voter ID system? That is, what are the monetary and non-monetary costs to the voter and to the state for implementing the ID system?
6. If voter ID requirements are shown to reduce voter turnout (generally, or with some particular groups), what possible steps should be taken to ameliorate this problem?

## **Recommendations and Next Steps**

As the Federal agency charged with informing election officials and the public about various issues related to the administration of elections EAC believes it should, in its capacity as a supporter of elections research, undertake additional study into the topic of voter identification requirements and the implementation of them in the following ways:

- Longitudinal studies of jurisdictions that have changed voter identification requirements.

- State-by-state and precinct-level analyses that will examine the correlations between various voter identification requirements and voter registration and turnout
- Alternative forms and methods for verifying a voter's identity.
- Continuing research into the connection between various voter identification requirements and the number of ballots cast and counted
- A continuing state-by-state update on changes to voter identification requirements.
- Continued collection of state-by-state data which will help examine the impact that voter identification requirements are having on the number of voters who are casting provisional ballots because of voter identification verification issues.

## **VOTER ID REPORT TALKING POINTS**

### **Public Meeting**

**February 8, 2007**

#### **I. Chair Davidson's Opening Comments for Eagleton Portion of Public Meeting**

- This has been a highly anticipated report.
- We received the Eagleton draft in June 2006.
- We immediately realized that the data presented more questions than answers.
- Since we have limited staff and resources, we were unable to immediately resolve these questions. Our top priorities at the time were the lab accreditation and the voting system certification programs.
- In addition, we had to focus our efforts on getting information to election officials and the public concerning the November elections, especially because so many jurisdictions were using new voting equipment.
- Now that we have launched those programs, we are once again turning our attention to this research project.
- Let me introduce Tom O'Neil and Tim Vercellotti. They are here today to pick up where we left off, and to give us a brief overview of the research they conducted regarding voter identification.

#### **II. Karen Lynn-Dyson Testimony**

#### **III. Eagleton Testimony**

#### **IV. Commissioners Q&A**

#### **V. Chair Closes Eagleton Portion of Public Meeting**

- Obviously many questions have been raised today.
- Next step is for EAC to determine how to move forward.
- I request that Tom instruct staff to provide recommendations on how to proceed within the next 30 days.
- Once we determine how to move forward and what the final culmination of this initial research will be, we will notify everyone.
- Thank you Tom and Tim for your hard work and efforts in the study of this important topic.

Karen Lynn-Dyson/EAC/GOV  
02/06/2007 04:46 PM

## **VOTER ID REPORT TALKING POINTS**

### **Public Meeting**

**February 8, 2007**

#### **I. Chair Davidson's Opening Comments for Eagleton Portion of Public Meeting**

- This has been a highly anticipated report.
- We received the Eagleton draft in June 2006.
- We immediately realized that the data presented more questions than answers.
- Since we have limited staff and resources, we were unable to immediately resolve these questions. Our top priorities at the time were the lab accreditation and the voting system certification programs.
- In addition, we had to focus our efforts on getting information to election officials and the public concerning the November elections, especially because so many jurisdictions were using new voting equipment.
- Now that we have launched those programs, we are once again turning our attention to this research project.
- Let me introduce Tom O'Neil and Tim Vercellotti. They are here today to pick up where we left off, and to give us a brief overview of the research they conducted regarding voter identification.

#### **II. Karen Lynn-Dyson Testimony**

#### **III. Eagleton Testimony**

#### **IV. Commissioners Q&A**

#### **V. Chair Closes Eagleton Portion of Public Meeting**

- Obviously many questions have been raised today.
- Next step is for EAC to determine how to move forward.
- I request that Tom instruct staff to provide recommendations on how to proceed within the next 30 days.
- Once we determine how to move forward and what the final culmination of this initial research will be, we will notify everyone.
- Thank you Tom and Tim for your hard work and efforts in the study of this important topic.

## **Remarks for Thursday's Public Meeting**

In late May, 2005 this research contract awarded to The State University of New Jersey at Rutgers-- The Eagleton Institute of Politics using the Ohio State University Moritz School of Law, as its subcontractor.

The portion of the contract that was awarded related to the study and analysis of voter identification requirements was to :

- Collect and analyze state legislation, administrative procedures and court cases.
- Create a state-by-state compendium of the legislation, procedures, and litigation reviewed.
- Perform an analysis of how voter identification requirements were implemented around the country and to
- Recommend alternative approaches related to the future implementation of HAVA voter identification requirements. These recommendations were to be based on a literature review of research results, a review of data on voter identification and a diagnosis of the problems and challenges related to voter identification.

This contract was extended on two occasions to allow for additional review, including an EAC-initiated review conducted by an independently convened panel of experts who provided input to Eagleton on the first draft of its statistical analysis of voter identification requirements.

The Eagleton Institute of Politics submitted its draft report to the EAC on Best Practices to Improve Voter Identification Requirements on June 28, 2006. Findings from Eagleton's study of provisional voting (that was a part of Eagleton's overall study) were included in EAC's Best Practices on Provisional Voting, which were published by EAC in October 2005.

Subject FYI - Today's media inquiries ( 2-21-07, Wed )

Commissioners:

Today we had the following media inquiries:

(1) Commissioner Hillman was interviewed by Charles Edwards of NPR in Atlanta about the Standards Bd. meeting. She explained the role of the board, talked about the agenda, including the visit to Kennesaw, and told him GA SOS Handel is on the board. She provided an overview of our voting system standards setting process and our programs to accredit labs and to test and certify systems. She also talked about the importance of gaining public confidence in the voting equipment they use, and talked about our responsibility to bring more accountability to the process.

(2) Jim Galloway of the Atlanta Journal Constitution wanted the report on voter ID. We explained that we had been working with the Eagleton Institute to study issues related to voter ID. We held a public meeting earlier this month in which we discussed this project to provide an update on progress being made. At the meeting, EAC commissioners asked the researchers questions about what they'd found so far, methodology, etc. At the conclusion of the questions, EAC Chair Donetta Davidson instructed EAC staff to take a look at Eagleton's recommendations for moving forward and w/n 30 days present the commissioners with suggestions for further research about voter ID laws. She noted that she thought it was important to study more than one election cycle, since some of these ID laws are so new. We sent him the Eagleton testimony. He requested info about the paper presented by Eagleton that referenced the statistics they collected for us, and we sent it to him.

(3) Josh Stager of Congressional Quarterly asked for the Eagleton report on voter ID. We referred him to the testimony on our website and explained that the presentation by Eagleton consisted of a briefing to EAC on their research. We said that the commissioners did not vote on or decide anything with regard to the research. We said that the chair asked the executive director to develop staff recommendations regarding the research to present to the commissioners within thirty days.

(4) Ken Vogel of Politico called Curtis and asked if the OIG had researched the qualifications of the two new commissioners. Curtis said no, that was part of the nomination process. The reporter asked if the OIG was looking into the Ciber issue, and Curtis said he could not comment on that.

Subject Re: Research Grants 

Hans,

I wish you would have shown us the decency to have spoken to someone at the EAC before you sent this e-mail. Had you done so, you might have discovered that Ms. Wang was paired with Job Serebrov, a conservative attorney who, like you, has served on a local election board (Washington, Co, AK -Fayetteville). He has also worked on voting issues and election law in his practice, including voter fraud. He was counsel to the Arkansas GOP on ballot integrity issues and was the ballot protection specialist for Mike Hucabee in his campaign for Lt. Governor. In addition, Job formed and ran "Arkansans for Fair Elections", a non-partisan group that looked to investigate and prevent voter fraud issues. He headed that group for 8 years. Job served the Republican Party of Arkansas as the Chairman of the Committee for the Revision of the State Constitution.

Thor Hearne called me last week to indicate that Job had called him to be on the working group that Job and Ms. Wang are putting together to look at the voter fraud/voter intimidation issues.

Job was recommended to the EAC for this work by Julie Thompson. His references included two US 8th Circuit judges appointed by GOP presidents: Morris Arnold and Lavenski Smith.

You may recall that the Advisory Board made it clear to the EAC that they thought the Voter Fraud/Voter Intimidation issues should be studied together. That's why Ms. Wang has been paired with Mr. Serebrov to do this study.

Julie tells me that she had a wide-ranging discussion with you last week but you never brought this issue up. It's too bad, as it may have prevented you from sending an e-mail to so many people that contains only half the story.

Subject Research Grants

Dear Commissioners:

On August 18 I sent you an email raising serious concerns over the awarding of a contract to the Moritz College of Law given its clearly demonstrated pre-existing opinions about provisional balloting and voter identification. Unfortunately, nothing was apparently done about this situation.

I have just learned that a similar situation has occurred. I understand that another research grant has been awarded to Tova Wang for research into "voter fraud and voter intimidation." Ms. Wang has an even more pronounced partisan and one-sided view of these issues than was present in the situation involving Moritz College. She has many posted opinions available on the Internet that make it clear that she will not be able to conduct research in an objective fashion on these issues. Just a few examples illustrate this:

"It is truly shocking how, given all the problems in the voting system and continued disenfranchisement, the terms of the debate have shifted to that of so-called 'ballot integrity.' It is reminiscent of how conservatives have misappropriated the concept of patriotism and the American flag, and used the power of language and messaging to distort the discussion, by using terms such as 'partial birth abortion' or death tax.'"

"This stands in stark contrast to the entire tenor of the Carter-Baker report, which presumes that fraud committed by voters is the biggest problem confronting our election system. There is simply no strong evidence of this, and some of the remedies proposed will take us backwards in the fight to increase voter participation."

"...voters are individually disenfranchised by continued, often race based, voter intimidation and deceptive practices..."

Carter-Baker Report: Some Bad Fixes for the Wrong Problem, 9/19/2005

"The data is also mounting that identification requirements have disproportionately disenfranchising impacts on certain communities...Given all this piling on of negative evidence, both in terms of the efficacy of ID requirements in fulfilling the goal their advocate's claim and their impact on voting rights, it is somewhat mind boggling that so many state officials, as well as other groups working on this issue, are still vigorously pushing for greater expansion of what seems to be a rather useless yet dangerous tool. Shouldn't the burden of proof now shift to the advocates of more voter ID to demonstrate the value of their cause?"

Voter ID and Fraud: Prove It, 7/28/2005

There are numerous more examples of her partisan opinions and attacks and demonstrably false claims against Republicans and election officials in general, such as her baseless charge in another article that "partisan election officials and party leaders usurped the process and manipulated the new federal voting law in ways that disenfranchised voters."

026381

Election 2004: A Report Card, 1/1/2005. The idea that she will write an objective report on issues that she has already expressed such strong opinions on ("there is no evidence that such election fraud is a serious problem") is hard to accept. I find it surprising that the EAC would award her a research grant or expect that election officials around the country would accept as valid a report written by an individual who asserts that "[a]t every step of the way, election officials in key states threw up unnecessary barriers to voting." Id. This gratuitous remark is an insult to the many hard-working election officials that we all know through our work who did everything they could during the last election to improve the election process and in large part succeeded.

Whatever procedures the EAC has set up to screen individuals and entities applying for research grants is obviously not working. I have no doubt that I could today, based on reading Ms. Wang's prior opinions, predict exactly what her report will conclude on the issues of voter fraud and voter intimidation. This situation needs to be corrected so that research is not being conducted by partisan individuals with preset opinions and views on issues. As with my prior email, I strongly recommend that the EAC reconsider the awarding of this contract.

Subject Re: Research Grants - Response 

Dear Hans:

I am writing in response to your email in which you took exception to our retaining Ms. Tova Wang as a part-time consultant to help EAC explore the issues of voter fraud and voter intimidation. I know that you have heard directly from Vice Chairman DeGregorio and Commissioner Martinez on the matter but I thought it important that I write back to make certain that everyone had the same information.

As you now know, Ms. Wang is only one consultant who is working with us on these issues. When EAC determined that we should explore our options on how to study the issues of voter fraud and voter intimidation, as required under HAVA Section 241 (b), we made a conscious decision to retain consultants who would work part-time for a defined and limited period of time to provide broad and diverse perspectives, across the political spectrum, from right to left and including the middle.

EAC conducted broad outreach to identify a strong pool of consultant candidates. We reached agreement to retain 3 highly qualified people -- Stephen Ansolabehere, Job Serebrov and Tova Wang -- to work with us as we try to determine the scope of any project we might do on these issues.

Unfortunately, Dr. Ansolabehere's teaching assignments unexpectedly precluded him from being able to work as a part-time consultant but he has expressed his desire and in fact has agreed to continue working with us in an unpaid capacity as we explore our options and frame the issues. In the meantime, Mr. Serebrov and Ms. Wang have agreed to provide the consultant services that we sought. We believe that all three individuals will bring great value, careful thought and important perspectives to our work on these issues.

I hope this clarifies this part of EAC's extensive research and study agenda. EAC engages thoughtful deliberation and undertakes careful consideration of all of its activities. We value inclusiveness and know that we are best served when we have broad and diverse perspectives to inform our work. I am happy to talk with you at any time that you might have questions or concerns about our work.

Best Regards,

Gracia M. Hillman

Subject FYI ONLY: Today's media inquiries

1. Alexandria Burris of the Daily Advertiser (LA) wanted to know the mandatory requirements of HAVA, and I sent them to her. She then said a local clerk says even though HAVA only applies to equipment bought for federal elections, they ended up buying new equipment for state and local elections too, and isn't that just a sneaky way/blurring of the lines to impose mandates at the state level? I told her according to LA law, all voting machines used in the state are purchased by the secretary of state. I told her HAVA only applies to federal elections, and that it is up to each state whether to apply those same requirements to its local and state elections. Therefore, this is a question for the Louisiana secretary of state regarding what kind of equipment they purchase for local and state elections. I suggested that she call Marietta Norton (who I spoke to first) in the Louisiana secretary of state's office.

2. Zach Goldfarb of the Washington Post interviewed the chairman about the findings of the Brennan Center report, issued today. The chairman told him that equipment is only half of the equation, that officials had to have solid management guidelines in place, and told him about Quick Start and gave him a few examples. (We also sent him a link to Quick Start.) He also talked about the Election Management Guidelines we were working on. He also pointed out the security work we'd done with the VVSG, and noted that we asked for an increase from \$2.8M to \$5M for NIST to work on future iterations. He also talked about our certification program, and that it would be rigorous, thorough and transparent. Regarding efforts to make equipment like VVPAT mandatory, the chairman said it was important to recognize that this is a diverse country with diverse election needs, and that one size doesn't fit all. He said election officials were taking the security concerns very seriously and that they were implementing procedures at the local level. He encouraged the reporter to talk to election officials about this issue, since there were none listed on the Brennan Center's task force for this report. We suggested Dana DeBeauvoir in TX.

3. Commissioner Davidson was interviewed by several media outlets in Utah, and she attributed the success of the elections to the state's efforts to increase training and provide more education about the process for voters.

4. Scott Michels of US News and World Report heard about our voting fraud and voter intimidation research, and he had the following questions. The following responses were provided after conferring with Peg and Tom. 1. When will EAC receive the preliminary report on voter intimidation and voting fraud? We anticipate that we will have a draft final report from our consultants in 2-3 weeks, after our consultants have had time to review the transcript from the project Working Group meeting, which was not available until last week. This transcript will provide the comments made during the Working Group meeting. 2. When we receive the preliminary report, what is the EAC process to formulate a final product that will be made public?

First, Commissioners and EAC staff will review the preliminary draft. Then a draft will be submitted to the EAC Standards Board and EAC Advisory Board for review and comment. This second step is taken in accordance with the Help America Vote Act (HAVA) §247, which requires EAC to carry out its duties under Title II, Subtitle C (Studies and Other Activities to Promote Effective Administration of Federal Elections) in consultation with the Standards Board and the Board of Advisors. 3. When will we make this research available to the public? What form will it be in? The final report cannot be made public until it has been accepted by the Commissioners. Normally, this does not happen until the researcher(s) submit a final report that has been revised to address clarifications and corrections deemed necessary through the review process described above. The time it takes for the researchers to produce this final report will depend, somewhat, on the number of clarifications and corrections deemed necessary.

I also told him that the researchers were charged with conducting preliminary background research and that they will summarize the preliminary research as well as the deliberations of our project Working Group. It also will include recommendations for future EAC activity related to the development of: (1)

026391

methods of identifying, deterring, and investigating voting fraud and voter intimidation; and (2) nationwide statistics on voting fraud. I told him that EAC initiated this preliminary research on voting fraud and voter intimidation in accordance with HAVA §241, which requires EAC to conduct research on election administration issues, including the development of: 1) nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [§241(b)(6)]; and 2) ways of identifying, deterring, and investigating methods of voter intimidation [§241(b)(7)]. And I pointed out that at its 2005 meeting, EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

I think it's a no big deal situation if another reporter or anyone else (Hill staff or otherwise) asks about it... it was a preliminary report that we shared with our advisory boards. When the final report is done, we'll release it. Also, I shared this media inquiry and the fact that we gave Rich the info with the entire staff and commishes in an Oct. 5 media log, if anyone feigns surprise.

Yes. I was worried when I saw the headline. The article gives the impression that we are hiding the report. I told Wolf that it was only preliminary and that we were waiting for another but that the staff member overseeing it had been out a lot due to illness.

## Report refutes fraud at poll sites

Updated 10/11/2006 8:05 AM ET

By Richard Wolf, USA TODAY

WASHINGTON — At a time when many states are instituting new requirements for voter registration and identification, a preliminary report to the U.S. Election Assistance Commission has found little evidence of the type of polling-place fraud those measures seek to stop.

USA TODAY obtained the report from the commission four months after it was delivered by two consultants hired to write it. The commission has not distributed it publicly.

### **NEW LAWS: Thousands of voters shut out**

At least 11 states have approved new rules for independent voter-registration drives or requirements that voters produce specific forms of photo ID at polling places. Several of those laws have been blocked in court, most recently in Arizona last week. The House of Representatives last month approved a photo-ID law, now pending in the Senate.

The bipartisan report by two consultants to the election commission casts doubt on the problem those laws are intended to address. "There is widespread but not unanimous agreement that there is little polling-place fraud, or at least much less than is claimed, including voter impersonation, 'dead' voters, non-citizen voting and felon voters," the report says.

The report, prepared by Tova Wang, an elections expert at the Century Foundation think tank, and Job Serebrov, an Arkansas attorney, says most fraud occurs in the absentee ballot process, such as through coercion or forgery. Wang declined to comment on the report, and Serebrov could not be reached for comment.

Others who reviewed the report for the election commission differ on its findings. Jon Greenbaum of the liberal Lawyers' Committee for Civil Rights Under Law says it was convincing. The committee wrote to the commission Friday seeking its release.

Conservatives dispute the research and conclusions. Thor Hearne, counsel to the American Center for Voting Rights, notes that the Justice Department has sued Missouri for having ineligible voters registered, while dead people have turned up on the registration rolls in Michigan. "It is just wrong to say that this isn't a problem," he says.

That's one reason the commission decided not to officially release the report. "There was a division of opinion here," Chairman Paul DeGregorio says. "We've seen places where fraud does occur."

The consultants found little evidence of that. Barry Weinberg, former deputy chief of the voting section in the Justice Department's civil rights division, reviewed their work. "Fraud at the polling place is generally difficult to pull off," he says. "It takes a lot of planning and a lot of coordination."

Subject Interview Request

History:  This message has been replied to

Mr. Chairman,

Will Lester of the Associated Press wants to interview you briefly via phone about the preliminary fraud report. I recommend you accomodate him, as he has dutifully covered EAC, and plans to include us in a story next week about the election lanscape. He has requested a copy of the preliminary report, which I am sending to him. He only needs a few minutes, and as we discussed, i think the message is that these are preliminary findings that we presented to our advisory boards to get their input. When the final report is complete, we will release it. You can also use some of the talking pts from your speech, such as the challenge related to the very definition of the term "fraud," as people define it differently. How about I set it up for noon?

The only question he asked that I don't know the answer to is when we expect the final report. Peg... please weigh in on this.

Subject Re: Voting Fraud-Voter Intimidation Report 

Just a note to clarify that we are not releasing the preliminary report on voting fraud and voter intimidation (Tova & Job's report) because the draft report is going through EAC review. The only document we can offer at this time is the status report on the research project, which was delivered to our boards and which apparently is considered public information. The status report does not address any recommendations for future EAC action.

I am using some of my work at home time on the draft report. Hopefully, I can meet with Julie and Tamar next week. After that, we will have a better idea of when it will be ready for a Commissioner briefing. ---

**U.S. ELECTION ASSISTANCE COMMISSION**

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

### **NEWS ARTICLES**

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

#### **Absentee Ballots**

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio, and Pennsylvania.

#### **“Dead Voters and Multiple Voting”**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

Subject Interview request

Mr. Chairman,

Chuck McCutchen of Newhouse News Service wants to interview you tomorrow at 11:30 regarding absentee voting, and your thoughts about whether this presents more opportunities for fraud. He asked for and I sent him the status report on fraud, but he's focused on the absentee voting angle. He knows you were a former elections official and have first hand experience with this issue. The interview would last about 15 min. Newhouse owns about 25 newspapers scattered throughout the nation. Please let me know if you can accomodate him. If so, we are to call him at [REDACTED]

I think it's good idea, especially considering the media coverage and controversy. I spoke with Todd Rokita today and he was not happy at all about what he has read and feels the status report was misleading as the working group session held the day after the report was given came to different conclusions.

We also should make mention on Thursday about the 4th anniversary of HAVA, which is this Friday. It could give us an opportunity to talk about the positive things that have happened in election reform since its passage. Much of the talking points our media advisors drafted talk about this.

Subject Interview Requests for Tomorrow

Mr. Chairman,

Two more interview requests for tomorrow:

1. NPR's News and Notes would like to have you as a guest on their program tomorrow morning at 8 a.m. EST for five to eight minutes. Topic: Your thoughts on the states that are cracking down on voter fraud through voter ID laws, registration policies, etc. Also, they want your take on the Fed. Election Integrity Act, the bill sponsored by Hyde regarding voter ID which will be dropped this week. The interview would be taped, and it would run at 9 a.m. EST. News and Notes explores issues that impact the African American community. You will be interviewed by Farai Chideya (Fah-rah Chu-day-ah). Go here <http://www.npr.org/templates/story/story.php?storyId=11> to read more about the program and the host. You are to call 310-815-4302 from a land line. Backup: Producer Devin Robbins at 310-815-4379.

2. Mary Ann McGee of Information Week is working on a story about voting system security. I talked to her about our efforts to help election officials focus on the entire process, not just the voting machine. I sent her the Quick Start guide. She's interested in hearing more about this from you. This is a good opportunity to get the message out that the real challenges we face in Nov. are having enough people and making sure they are properly trained. She wants to talk to you at 10:30 am EST. You are to call her at 508-697-0083.

Please let me know if you will be able to accomodate these reporters, and I'll take it from there. Thank you.

CPPA  
Voting Fraud-Voter Intimidation Remarks

Good afternoon, ladies and gentlemen. My name is Paul DeGregorio and I am the acting Chairman of the U.S. Election Assistance Commission. It is a pleasure to be a part of this conference and be offered a chance to briefly address you today. I would also like to extend my thanks to Michael Alvarez, Thad Hall and Susan Hyde for organizing this fantastic conference.

My remarks today will focus on Voter Fraud and Voter Intimidation and how HAVA and the EAC combat these issues.

The subject of voter fraud and intimidation is a highly contentious issue. Since the 2004 election there has been a lot of discourse and writing about what constitutes election fraud and intimidation and how prevalent each is in our society. While there are no clear numbers on the incidents of voter fraud and intimidation what is clear is that the American public is concerned about both issues and something needs to be done to combat them.

The EAC was created by The Help America Vote Act or "HAVA". HAVA represents the first major piece of federal legislation on national election reforms. Among other provisions, Section 241 of HAVA requires the EAC to conduct research on election administration issues. Among the tasks the EAC is to execute is the development of nationwide statistics and methods of identifying, deterring, and investigating voting fraud and intimidation in elections for Federal office.

In September of 2005 the Commission hired consultants to begin a comprehensive study of election fraud and intimidation. This

research project is charged with the development of a clear definition of what constitutes voting fraud and voter intimidation in Federal elections, identifying current activities of key government agencies, civic advocacy groups, and other organizations regarding these topics, the establishment of a working group of experts to discuss these issues, and production of a report to the EAC summarizing the findings that includes recommendations for future research if any. We are eagerly awaiting the final report from the working group so that we can gain a better understanding of the form that voter fraud and intimidation is taking and what can be done to combat those practices.

The lack of any solid statistics regarding voter fraud and intimidation can be attributed to two major factors. First is because there is wide disagreement about the definitions for the terms “fraud” and “intimidation.” Some only consider it fraud if it falls under the criminal definitions of fraud. While others consider any form of ineligible voter as fraud. The term intimidation is also wrought with ambiguity. Some only consider it intimidation if there is a physical or mental advantage of one party over the other, while others consider any difficulty in the voting process as being intimidation. Because of these definitional differences there has been no clear way to study the amount of fraud or intimidation because everyone is using a different definition to help shape the statistics.

Also skewing the statistics about election fraud and voter intimidation is the political agenda or bias from both sides that accompanies much of the literature about the topic. As a result of this political bias and the ambiguity that accompanies the terms “fraud” and “intimidation” it is difficult to know when something has risen to the level to be considered fraud or simply is an accusation with no backing.

HAVA has several provisions that not only help to combat fraud but also make voting easier. Most notably section 303 of HAVA which requires each state to create "... a single, uniform, official, centralized, interactive, computerized statewide voter registration list..." This database is to be maintained at the state level and is to contain the name and registration information of every legally registered voter in the State.

The Voter Database is to serve as the single system for storing and managing the official list of registered voters throughout the state. It will be coordinated with other agencies databases within the state in order to insure the residence status of the voter.

This Voter Database will serve two purposes. First it helps to prevent voter fraud by allowing state election officials to check their registration information against the databases of other agencies in order to insure the status of the voters. This would eliminate the problem of the use of dead person's names to vote, or the use of inmate's names to vote. Under HAVA state election officials are given the right to remove those names that have been checked against inmate lists and state agency records on death.

Second, the Voter Database will ease the burden on voters by allowing them to easily check their voting status and update their information when necessary. Therefore a person who moves within the state from one county to another can easily check their voting status i.e. what county they are registered in and update that information via a new registration if necessary.

Also according to HAVA section 303 State election officials are required to regularly update the Voter Database removing only those individuals who are ineligible to vote in that election while updating the status of those eligible to vote. It is in this way that HAVA is helping to crack down on fraud by eliminating ineligible

voters from registration lists, while easing the process for those voters who are eligible.

Another issue that has become particularly contentious is the issue of voter identification to combat voter fraud. As many of you know voter identification laws have lead to suits in Georgia, Indiana, Missouri, Ohio and Arizona with more to follow as states pass more identification laws.

In May of 2005 the EAC contracted with an independent group of scholars to conduct a study on voter identification practices in the 2004 election and recommend some best practices for voter identification laws for upcoming elections. To the surprise of no one the study found a lot of disagreement regarding the need for voter identification laws and the way these laws should be applied.

Those in favor of voter identification laws argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. They propose stricter voter identification requirements to prevent one form of voter fraud -- that being multiple voting or voting by those who are not eligible.

However, opponents argue that stricter ID laws interfere with legitimate voter's access to the ballot. They fear that some voters most notably racial and ethnic minorities, the young, and elderly voters, may lack convenient access to the required ID documents. Both sides assert that their policy will engender faith in the electoral process among citizens.

At the heart of this entire debate is the balance that needs to be struck between allowing those who are eligible to vote the ability to vote while preventing those who are not eligible to vote from voting.

The first step that needs to be taken in order to find this balance is more research needs to be conducted on the issue of voter identification. As was noted by the EAC's 2005 study the amount of evidence available on how voter identification laws impacted both voter turnout and voter fraud is scant at best. As more and more states implement these laws more information needs to be gathered in order to discover if these laws are preventing fraud, and what their impact is on voter turnout.

Courts have also greatly disagreed on the impact of voter identification laws. A recent decision in Georgia granted a preliminary injunction to enjoin the State of Georgia from requiring photo identification to be able to cast a ballot in person. The court in reaching its decision concluded that the injury to a voter who couldn't get the proper identification in time to vote was great and could not be tolerated. The court did point out that a State has a legitimate and important interest in attempting to combat voter fraud and in turn ensure the integrity of its elections.

In sharp contrast to the Georgia decision was a case involving a challenge to Indiana's voter identification law. In this case a Federal District Court found no basis for the plaintiffs challenge to an Indiana statute requiring picture ID in order to vote in person. In its judgment the court held that the State of Indiana had a legitimate and important interest in protecting the integrity of its elections. The court explained further that any burden placed on voters to obtain ID was not unduly burdensome and was necessary in order to provide a fair and just election. The court saw no indication of bias or discrimination and felt the law to be necessary to achieve the states goal of a fair election.

These two cases are a perfect example of the struggle that legislatures, election officials, and courts are having with the issue of voter fraud and voter identification. Where some see fraud others do not, and where some see discrimination others do not.

Most, if not all, recognize voter fraud as something that compromises the integrity of elections, but to what level are we willing to burden the legitimate voter to prevent this fraud from occurring?

The EAC's 2005 study recognized these problems and in its best practices guidelines made several suggestions on how to deal with them:

First, as stated above the study suggested further research to clarify the connection the connection of the relationship requirements and the number of potential voters actually able to cast a ballot that is actually counted.

Second, the study suggested as a best practice the publication of a "Voting Impact Statement" by States as they assess their voter ID requirements to protect the integrity of the ballot. This analysis will help to ensure that efforts to increase ballot security have a neutral effect on electoral participating by eligible voters.

Finally, starting with the 2006 election states should collect and report reliable, credible information on the relationship between ballot access and ballot security. In turn the EAC can use this data to publish an analysis of this information to provide sound factual data as a basis for the states to consider as they estimate the incidence of the kinds of vote fraud that stricter voter ID laws may prevent.

The problem of in person voter fraud is often debated. Many feel it is not a problem at all. While others, like the citizens of Arizona when they passed Proposition 200 a voter ID law requiring ID to both register and vote, feel it is a big enough problem to vote in favor of laws to prevent it. The only way to clear up this debate and provide real answers to our questions thorough clear analysis

of the issues without the ambiguity of terms or political biases that have corrupted this entire discussion.

In conclusion, the EAC is working on compiling data on voter fraud and intimidation to help aid states in their assessment of voter issues. With the release of EAC's working group on voter fraud final report the EAC will be better prepared to help states understand the extent of voter fraud and the next steps to be taken to combat it. While legitimate data still does not exist to combat these issues there are measures that states can take to counteract voter fraud. The first step is to follow the HAVA mandated requirement of forming a voter registration database. This will allow states to know who is and is not eligible to vote and will allow voters to easily access their registration status. Finally with the passage of more voter ID laws throughout the states it is important for state election officials to remain up to date on the holdings of the court cases involving these laws and the effect that these laws are having on voter turnout and voter fraud issues.

I thank you all for your time and patience. If should need any further information on the EAC, HAVA or other voting issues please feel free to check our web site at [www.eac.gov](http://www.eac.gov).

Thank you.

It is a pleasure to be a part of this conference and be offered a chance to briefly address you today. I would also like to extend my thanks to Michael Alvarez, Thad Hall and Susan Hyde for organizing this conference.

My remarks today will focus on Voter Fraud and Voter Intimidation and how HAVA and the EAC address these issues.

The subject of voter fraud and voter intimidation is a highly contentious issue. Since the 2004 election there has been a lot of discourse and writing about what constitutes election fraud and voter intimidation and how prevalent each is in our society. While there are no clear numbers on the incidents of voter fraud and voter intimidation what is clear is that the many groups are concerned about both issues and it is imperative that we continue to study and address them.

The EAC was created by The Help America Vote Act or "HAVA". HAVA represents the first major piece of federal legislation on national election reforms. Among other provisions, Section 241 of HAVA requires the EAC to conduct research on election administration issues. Among the tasks the EAC is to execute is the development of nationwide statistics and methods of identifying, deterring, and investigating voting fraud and intimidation in elections for Federal office.

In September of 2005 the Commission hired consultants to begin a comprehensive study of election fraud and intimidation. This research project is charged with the development of a clear definition of what constitutes voting fraud and voter intimidation in Federal elections; identifying current activities of key government agencies, civic advocacy groups, and other organizations regarding these topics; the establishment of a working group of experts to discuss these issues; and production of a report to the EAC summarizing the findings that includes recommendations for future research if any. We are eagerly awaiting the final report from the working group so that we can gain a better understanding of the form that voter fraud and intimidation is taking and what can be done to combat those practices.

The lack of any solid statistics regarding voter fraud and intimidation can be attributed to two major factors. First is because there is wide disagreement about the definitions for the terms “fraud” and “intimidation.” Some only consider it fraud if it falls under the criminal definitions of fraud. While others consider any form of ineligible voter as fraud. The term intimidation is also wrought with ambiguity. Some only consider it intimidation if there is a physical or mental advantage of one party over the other, while others consider any difficulty in the voting process as being intimidation. Because of these definitional differences there has been no clear way to study the amount of fraud or intimidation because everyone is using a different definition to help shape the statistics.

Also skewing the statistics about election fraud and voter intimidation is the political agenda or bias from both sides that accompanies much of the literature about the topic. As a result of this political bias and the ambiguity that accompanies the terms “fraud” and “intimidation” it is difficult to know when something

has risen to the level to be considered fraud or simply is an accusation with no backing.

HAVA has several provisions that not only help to combat fraud but also make voting easier. Most notably section 303 of HAVA which requires each state to create "... a single, uniform, official, centralized, interactive, computerized statewide voter registration list..." This database is to be maintained at the state level and is to contain the name and registration information of every legally registered voter in the State.

The Statewide voter registration database is to serve as the single system for storing and managing the official list of registered voters throughout the state. It will be coordinated with other agencies databases within the state in order to insure the residence status of the voter.

The Statewide Voter Database serves a very important and specific function. It helps to prevent opportunities for fraud by allowing state election officials to check their registration information against the databases of other agencies in order to insure the status of the voters. This would eliminate the problem of the use of a deceased person's name to vote. Under HAVA state election officials are given the right to remove those names that have been checked against state agency records on death.

Also according to HAVA section 303 State election officials are required to regularly update the registration list removing only those individuals who are ineligible to vote in that election while updating the status of those eligible to vote. It is in this way that HAVA is helping to eliminate opportunities for fraud by eliminating ineligible voters from registration lists, while easing the process for those voters who are eligible.

One issue that has become particularly contentious is the issue of voter identification to combat voter fraud. As many of you know voter identification laws have lead to suits in Georgia, Indiana, Missouri, Ohio and Arizona with more to follow as states pass more identification laws.

In May of 2005 the EAC contracted with an institution to conduct a study on voter identification practices in the 2004 election and recommend some best practices for voter identification laws for upcoming elections. To the surprise of no one the study found a lot of disagreement regarding the need for voter identification laws and the way these laws should be applied.

Those in favor of voter identification laws argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. They propose stricter voter identification requirements to prevent one form of voter fraud -- that being multiple voting or voting by those who are not eligible.

However, opponents argue that stricter ID laws interfere with legitimate voter's access to the ballot. They fear that some voters most notably racial and ethnic minorities, the young, and elderly voters, may lack convenient access to the required ID documents. Both sides assert that their policy will engender faith in the electoral process among citizens.

At the heart of this entire debate is the balance that needs to be struck between allowing those who are eligible to vote the ability to vote while preventing those who are not eligible to vote from voting.

From my own personal experience in traveling the world observing elections, especially in emerging democracies, I witnessed little if any resistance to ID requirements including photo ID requirements. In Haiti...

The first step that needs to be taken in order to find this balance is more research needs to be conducted on the issue of voter identification. As was noted by the EAC's 2005 study the amount of evidence available on how voter identification laws impacted both voter turnout and voter fraud is scant at best. As more and more states implement these laws more information needs to be gathered in order to discover if these laws are preventing fraud, and what their impact is on voter turnout.

Courts have also greatly disagreed on the impact of voter identification laws. A recent decision in Georgia granted a preliminary injunction to enjoin the State of Georgia from requiring photo identification to be able to cast a ballot in person. The court in reaching its decision concluded that the injury to a voter who couldn't get the proper identification in time to vote was great and could not be tolerated. The court did point out that a State has a legitimate and important interest in attempting to combat voter fraud and in turn ensure the integrity of its elections.

This case is a perfect example of the struggle that legislatures, election officials, and courts are having with the issue of voter fraud and voter identification. Most, if not all, recognize voter fraud as something that compromises the integrity of elections, but to what level are we willing to burden the legitimate voter to prevent this fraud from occurring?

Recognizing this struggle the EAC's study on voter identification made suggestions on how to better understand the need for these laws and how best to implement them:

First, as stated above the study suggested further research to clarify the connection the connection of the relationship requirements and the number of potential voters actually able to cast a ballot that is actually counted.

Second, the study suggested as a best practice the publication of a “Voting Impact Statement” by States as they assess their voter ID requirements to protect the integrity of the ballot. This analysis will help to ensure that efforts to increase ballot security have a neutral effect on electoral participating by eligible voters.

Finally, starting with the 2006 election states should collect and report reliable, credible information on the relationship between ballot access and ballot security. In turn the EAC can use this data to publish an analysis of this information to provide sound factual data as a basis for the states to consider as they estimate the incidence of the kinds of vote fraud that stricter voter ID laws may prevent.

Voter intimidation also has little valuable statistical information available. Again this is because “voter intimidation” is difficult to define and can rarely be prosecuted. Like voter fraud it is a widely held belief that most alleged incidents of voter intimidation continue to be focused on minority and underprivileged communities.

Many of the accusations of voter intimidation are brought against poll workers many of whom are unaware of the possible intimidation taking place. For instance many of the accusations of intimidation by poll workers stem from poll workers making improper demands for identification, or poll workers questioning voters in what is a manner perceived as aggressive or intimidating. The solution to this problem is simple, proper poll worker training. Through proper training poll workers will know when and how ID is to be presented and the proper way to question voters at the polls. Also revisions to challenger laws can bring about more clarity about appropriate challenges and therefore less accusations of voter intimidation.

As more statistics are kept and the form and frequency of voter intimidation is better understood states will be better prepared to prevent instances of voter intimidation and further improve the integrity of their elections.

Finally, I would like to take just a brief moment to discuss the immense accomplishments of the EAC since I became a commissioner in December of 2003:

First, we have distributed more than 3 Billion Dollars to states to improve their voting equipment and processes.

Also, the EAC delivered the HAVA mandated voluntary voting system guidelines (VVSG) within the 9 month deadline. We are currently working on future versions of the VVSG. In developing these future versions we are looking into the use of wireless technology in voting and testing future software and hardware that might be used in future elections.

We have issued guidance to states on statewide databases, accessibility and how to use HAVA funds. On a daily basis we answer questions and offer guidance every day for election officials all over the world.

In order to further support local election officials we recently released our quick start guide to help officials who are introducing new voting systems. This guide provides a snapshot of processes and procedures for local election administrators to use when implementing new voting systems. It includes tips on receiving and testing equipment, poll worker training, security, and Election Day operations.

In addition to the research project that we have begun regarding election fraud and intimidation we have several other research projects underway that will provide election officials and the

public with valuable data to be used to improve the integrity of our elections. Already underway are studies on a number of topics including effective designs for ballots and polling places, best practices for poll worker training, recruitment and retention and a study on vote count and recount procedures.

The HAVA College Poll Worker Program has awarded a total of almost \$1 Million in grants. Research is underway to find the best ways to recruit train and retain college poll workers.

We are also working hard to make sure the public is kept up to date on the future of elections and how it will affect the voting process. Already in 2006 we have held six public meetings throughout the country. The topics that we have covered in these meetings include: How voting systems are certified, The National Voter Registration Act, Vote Count and Recount Procedures, Poll Workers, Effective management guidelines for voting systems, effective ballot and polling place designs, better ways to serve military and other overseas voters, public access portals, and the EAC certification program.

In conclusion, the past four years have seen significant changes in the electoral process. New voting systems have been purchased, replacing the antiquated systems that had been in place for decades. As discussed earlier states should now have a single list of registered voters to better identify those who are eligible to vote, and provisional voting is now available throughout the nation. As these changes take place the EAC is working hard every day to smooth the transition from old to new and bring about a more efficient and fair electoral process for all Americans.

Thank You.

Subject draft text for USA Today

Commissioners,

As you requested, I provided Tom and Julie a draft response to USA Today to accompany the docs requested by Richard Wolf. Julie revised it as follows and Tom agrees. Please let me know ASAP if you concur.

Rich,

As we discussed, here are the docs you asked about that were presented at the board meetings in May and links to the meeting agenda. There are two reports: (1) a draft report produced by Eagleton Institute concerning provisional voting; and (2) a status report produced by EAC contractors regarding research being conducted on voter fraud and intimidation. The reports were presented by the contractors to the Standards Board and Board of Advisors for their input. This type of input is required for any guidance issued by EAC and is desired for any product that we provide to the election community and the public. Based on the input that was received from these boards, particularly regarding the questionable information contained in Eagleton's provisional voting report, EAC has not issued the Eagleton draft report as a final EAC document. As for the voter fraud and intimidation status report, it is merely an update on

026441

the status of the research conducted by the EAC contractors. A report and recommendations on future actions regarding this topic will be produced after EAC review of the preliminary research.

Subject Re: draft text for USA Today 

I don't really know how to respond to his misconception without us sounding somewhat defensive. The reality is that the provisional voting guidance was due before we existed and that for all intents and purposes provisional voting was implemented prior to our existence. Thus, the deadline became irrelevant. So, how do we say that without sounding defensive?

The other study is one in a laundry list that has not specific date. So, we could say that, but, again, that seems to beg the question if we only talk about the voter fraud timeline and avoid the provisional voting timeline.

Isn't it better to just remain silent on that point?

Subject Re: draft text for USA Today 

History:  This message has been replied to

Mr. Chairman,

I recommend that we not address the issue of deadlines in this particular response. I found the following information in the FY 03 and 04 annual reports. I've indicated the sections where provisional voting is referenced.

####

#### Fiscal Year 2004 Annual Report

At the same time, the delayed establishment of EAC and operating budget constraints restricted its ability to conduct some HAVA-mandated activities within the prescribed timeline. EAC was forced to postpone or limit the following work:...Issuance of HAVA Title III guidance on voting systems standards, statewide voter registration systems, provisional voting, voter education, and voters who register by mail;...

####

#### Fiscal Year 2003 Annual Report

HAVA required that EAC be established in February 2003, but the appointment of EAC Commissioners did not occur until December 13, 2003. While other federal agencies and the States carried out their responsibilities under HAVA, the delay in establishing EAC meant that certain HAVA mandated activities could not be completed in a timely fashion, including :

Guidance on the implementation of the uniform and nondiscriminatory election technology and administration requirements in HAVA Title III, including voting systems standards, computerized statewide voter registration lists, and information on provisional voting, voter education, and for voters who register by mail;

**Responsibilities of EAC** HAVA requires EAC to serve as a national clearinghouse and resource for the compilation of information and the review of procedures relevant to the administration of federal elections. The Act also requires the Commission to: ...Produce voluntary guidance on the implementation of HAVA Title III requirements (voting systems standards, computerized statewide voter registration lists, and public information on provisional voting, voter education, and for voters who register by mail).

#### Missed Deadlines Caused By The Delay In The Appointment Of EAC Commissioners

EAC has missed several HAVA deadlines, primarily because it was not established until mid-December 2003. EAC continues to be challenged to meet these deadlines due to FY04 budget constraints. Further, EAC's ability to make up for lost time in meeting these and its ability to meet other responsibilities is fully dependent on receiving the \$10 million that is requested in the President's budget submission for FY 2005. **Statutory Deadline Action Required by the EAC** October 1, 2003 Adopt recommendations and voluntary guidance on HAVA Section 302 requirements for provisional voting and voting information (HAVA Section 311(b)(2))

Subject Fw: Board agenda docs

Mr. Chairman,

Below is the info that was sent to Rich last week. He asked about the status of our vote fraud and voter intimidation study. Peg and Edgardo presented an update on the project at the May public meeting, and the attached reports were presented to the St. Bd. and the BoA, making them public documents. Sec. 241 requires us to study both topics, and the BoA requested that we make this a research priority. Basically, your speech outlines what has been identified so far -- that there is little solid evidence on both of these topics, and even the definition of these terms varies widely. Our consultants basically conclude that more research needs to be done, and that it will involve a combination of examining local laws, enforcement activities as well as the implementation of the new statewide voter reg. lists.

There are two reports: (1) a draft report produced by Eagleton Institute concerning provisional voting; and (2) a status report produced by EAC contractors regarding research being conducted on voter fraud and intimidation. The reports were presented by the contractors to the Standards Board and Board of Advisors for their input. This type of input is required for any guidance issued by EAC and is desired for any product that we provide to the election community and the public. Based on the input that was received from these boards, particularly regarding the questionable information contained in Eagleton's provisional voting report, EAC has not issued the Eagleton draft report as a final EAC document. As for the voter fraud and intimidation status report, it is merely an update by EAC staff on the status of the research conducted by the EAC contractors. A report and recommendations on future actions regarding this topic will be produced after EAC review of the preliminary research.

Please do not hesitate to contact me if I can be of further assistance.

**U.S. ELECTION ASSISTANCE COMMISSION**

**Status Report on the  
Voting Fraud-Voter Intimidation Research  
Project**

**May 17, 2006**

**026454**

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots "for cause" only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

### NEWS ARTICLES

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

#### **Absentee Ballots**

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio, and Pennsylvania.

#### **"Dead Voters and Multiple Voting"**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

026462

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

The Research Team

This research report on Provisional Voting in the 2004 election is part of a broader analysis that also includes a study of Voter Identification Requirements, a report on which is forthcoming. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

### EXECUTIVE SUMMARY

#### Background and Methodology

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005.

The Help America Vote Act of 2002 (HAVA, (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient. Section 302(a) of HAVA required states to establish provisional balloting procedures by January 2004.<sup>1</sup> The process HAVA outlined left considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voter eligible to cast a provisional ballot that will be counted and in what jurisdiction (precinct or larger unit) the ballot must be cast in order to be counted.<sup>2</sup>

The general requirement for provisional voting is that, if a registered voter appears at a polling place to vote in an election for Federal office, but either the potential voter's name does not appear on the official list of eligible voters for the polling place, or an election official asserts that the individual is not eligible to vote, that potential voter must be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the EAC's Election Day Survey, "first-time voters who registered by mail without identification and cannot provide identification, as required under HAVA. . ." <sup>3</sup> HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. Election administrators are required by HAVA to notify individuals of their opportunity to cast a provisional ballot.

<sup>1</sup>The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See [www.electioncenter.org](http://www.electioncenter.org).

<sup>2</sup>The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6<sup>th</sup> Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

<sup>3</sup>The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Our research began in late May 2005. It focused on six key questions raised by the EAC.

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, we:

1. Surveyed 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Reviewed the EAC's Election Day Survey, news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.<sup>4</sup>
3. Analyzed statistically provisional voting data from the 2004 election to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification.
4. Collected and reviewed the provisional voting statutes and regulations in all 50 states.
5. Analyzed litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Our research is intended to provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states move forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly those states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

### KEY FINDINGS

#### Variation among the states

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63%, were counted. Provisional ballots accounted for a little more than 1% of the final vote tally. These totals obscure the wide variation in provisional voting among the states.<sup>5</sup>

---

<sup>4</sup> Attachment 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures. It also describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

<sup>5</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Six states accounted for two-thirds of all the provisional ballots cast.<sup>6</sup>
- The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
- The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.
- States with voter registration databases counted, on average, 20% of the provisional ballots cast.
- States without databases counted ballots at more than twice that rate: 44%.<sup>7</sup>
- States that provided more time to evaluate provisional ballots counted a greater proportion of those ballots. Those that provided less than one week counted an average of 35.4% of their ballots, while states that permitted more than 2 weeks, counted 60.8%.

An important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>8</sup>

### Variation within states

Within states, too, there was little consistency among different jurisdictions. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors (including the training of election judges or poll workers) beyond statewide factors, such as experience or the existence of voter registration databases, also influence the use of provisional ballots.

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot.

Resources available to administer provisional voting varied considerably among and within states. Differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.

<sup>6</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>7</sup> As the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without." Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

<sup>8</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.

In precincts located in districts where many voters live in poverty and have low levels of income and education, the voting process, in general, may be managed poorly. Provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

### **The lessons of litigation**

Successful legal challenges highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. Most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots. This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

### **States move to improve their processes**

Shortly after the 2004 election, several states came to the conclusion that the administration of their provisional voting procedures needed to be improved, and they amended their statutes. The new legislation highlights areas of particular concern to states about their provisional voting process.

- Florida, Indiana, Virginia, and Washington have clarified or extended the timeline to evaluate the ballots.
- Colorado, New Mexico, North Carolina, and Washington have passed legislation focused on improving the efficacy and consistency of the voting and counting process.
- Colorado, Arkansas, and North Dakota took up the issue of counting provisional ballots cast in the wrong precinct.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices that draw on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting. The important effect of experience on the administration of the provisional ballot process indicates that the states have much they can learn from each other.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### SUMMARY OF RECOMMENDATIONS FOR BEST PRACTICES

State efforts to improve the provisional voting process have been underway since the 2004 election. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states.

#### Take a quality-improvement approach

Defining what constitutes a successful provisional voting system is difficult. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. A first step is for states to recognize that improving quality begins with seeing the provisional voting process as a system and taking a systems approach to regular evaluation through standardized metrics with explicit goals for performance. EAC can facilitate action by the states by recommending as a best practice that:

- Each state collect data systematically on the provisional voting process to permit evaluation of its voting system and assess changes from one election to the next. The data collected should include: provisional votes cast and counted by county; reasons why provisional ballots were not counted, measures of variance among jurisdictions, and time required to evaluate ballots by jurisdiction

#### Emphasize the importance of clarity

Above all else, the EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. As state legislators and election officials prepare for the 2006 election, answers to the questions listed in the recommendation section of this report could be helpful. Among those questions are:

- Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
- Do the procedural requirements of the system permit cost-efficient operation?
- How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

#### Court decisions suggest areas for action

The court decisions following the 2004 election also suggest procedures for states to incorporate into their procedures for provisional voting. EAC should recommend to the states that they:

- Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
- Provide effective materials to be used by local jurisdictions in training poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
- Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.

#### Assess each stage of the provisional voting process

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Beyond the procedures suggested by court decisions, states should assess each stage of the provisional voting process. They can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process.

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot. Our recommendations for best practices to avoid error at the polling place include:

- The layout and staffing of the multi-precinct polling place is important. States should ensure that training materials distributed to every jurisdiction make poll workers familiar with the options available to voters.
- The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting and include take-away information for the voter on the steps in the ballot evaluation process.
- Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. Best practice would be for states should provide guidelines (as do Connecticut and Delaware) to estimate the supply of provisional ballots needed at each polling place.

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted.

- State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Kansas allows voters to proffer their ID by electronic means or by mail, as well as in person.
- More provisional voters have their ballots counted in those states that count ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence.
- If a state does require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. While the best practice might be for poll workers to direct the voter to correct precinct poll workers' advice is not always correct, and the voter should be protected against ministerial error.
- Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.

In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. Our research did not identify an optimum division of the five weeks available.

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

- The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

After the election, timely information to voters about the disposition of their provisional ballot can enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

- Best practice for the states is to establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### Final observation

The detailed examination of each stage in the provisional voting process can lay the foundation each state needs to improve its system. Efforts to improve provisional voting may be most effective as part of a broader effort by state and local election officials to strengthen their systems. Collecting and analyzing data about those systems will enable states to identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as ways to reduce the need for voters to cast their ballots provisionally.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### Provisional Voting in 2004

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.

These totals obscure the wide variation in provisional voting among the states.<sup>9</sup> Six states accounted for two-thirds of all the provisional ballots cast.<sup>10</sup> State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted provisional ballots at more than twice that rate, 44%.

An important source of variation was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>11</sup>

- The percentage of the total vote cast as provisional ballots averaged more than 2% in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.<sup>12</sup>
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states had their ballots counted more frequently than those in the new states. This experience effect is evidence that there is room for improvement in provisional balloting procedures, especially in those states new to the process.<sup>13</sup> That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

<sup>9</sup> HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

<sup>10</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>11</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

<sup>12</sup> To compensate for the wide differences in vote turnout among the 50 states the average figures here are calculated as the mean of the percent cast or counted rather than from the raw numbers of ballots cast or counted.

<sup>13</sup> Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time limit to process provisional ballots was very challenging and unrealistic. To overcome this challenge, *the entire department's employees were mobilized to process provisional ballots.*" (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from "new" states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC can facilitate the exchange of experience among the states and can offer all states information on more effective administration of provisional voting.

Concluding optimistically that experience will make all the difference, however, may be unwarranted. Only if the performance of the "new" states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Our current understanding of how provisional voting worked in 2004 is not sufficient to determine unambiguously which view is correct.

1. "New" states may have a political culture different from "old" states. That is, underlying features of the "new" states political system may be the reason they had not adopted some form of provisional voting before HAVA. The "new" states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. The training they offer poll workers about provisional ballots may not be as frequent or effective as in other states. If the inconsistent performance in the "new" states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots -- as measured by intrastate consistency in administration--- will be harder and take longer to achieve.<sup>14</sup>
2. "Old" states may devote fewer resources to updating their registration files or databases because they consider provisional ballots as a reasonable fall safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

---

<sup>14</sup> Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, "no state gave the voter the right to find out the status of their ballot after the election." Now all offer that opportunity. See Bali and Silver, "The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000," manuscript, Department of Political Science, Michigan State University. Resisting HAVA's mandates through foot-dragging lacks any legitimate foundation in law or policy.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- The more rigorous the verification requirements, the smaller the percentage of provisional ballots that were counted. Some states verified provisional ballots by comparing the voter's signature to a sample, some matched such identifying data as address, birth date, or social security number, others required voters who lacked ID at the polling place to return later with the ID to evaluate the provisional ballot, and some required provisional voters to execute an affidavit.<sup>15</sup>
  - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
  - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
  - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
  - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office
- Voter registration databases provided information that reduced the number of provisional ballots counted.<sup>16</sup> In states using provisional voting for the first time, states with registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.
- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.<sup>17</sup>

<sup>15</sup> See Table 2 in Appendix 2 for information on the verification method used in each state.

<sup>16</sup> The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.

<sup>17</sup> The Election Day Survey concluded that: "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In experienced states, the disparity was even more pronounced: 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.
- If all states had counted out-of-precinct ballots, perhaps 290,000 more provisional ballots would have been counted across the country.<sup>18</sup>
- States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.<sup>19</sup>
  - Fourteen states permitted less than one week to evaluate provisional ballots, 15 states permitted between one and two weeks, and 14 states permitted greater than two weeks<sup>20</sup>.
  - Those states that permitted less than one week counted an average of 35.4% of their ballots.
  - States that permitted between one and two weeks counted 47.1%.
  - States that permitted more than 2 weeks, counted 60.8% of the provisional ballots cast<sup>21</sup>.
  - The effect of allowing more time for evaluation is felt most strongly in states where more than 1% of the overall turnout was of provisional ballots. In states where provisional ballots were used most heavily, those that permitted less than one week to evaluate ballots counted 58.6% while those that permitted one to two weeks counted 65.0% of ballots, and those states that permitted greater than three weeks verified the highest proportion of provisional ballots, at 73.8%.

### Variation Within States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors beyond statewide factors, such as verification requirements or the time provided for ballot evaluation, also influence the provisional voting process. Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."<sup>22</sup>

Election Line reported that:

---

<sup>18</sup> This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

<sup>19</sup> See Appendix \_\_, Relationship Between Time Allotted to Verify Provisional Ballots and the Level of Ballots that are Verified, David Andersen, The Eagleton Institute of Politics

<sup>20</sup> Many thanks to Ben Shepler, of the Moritz College of Law, for assembling complete data on the time requirements states permitted for the counting of provisional ballots.

<sup>21</sup> 43 states are included in this analysis, including Washington D.C. The 7 election-day registration states are omitted, as is Mississippi, which never provided data on provisional ballots. North Carolina is also omitted from the regressions, as it does not have a statewide policy on how it verifies provisional ballots.

<sup>22</sup> Recommendation 2.3.2 of the Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report also observed that, "...different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important in such districts. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

### **Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of the complexity of the problem and a lack of important information. An ideal assessment of how well provisional ballots worked in 2004 would require knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. Information needed about the eligibility or registration status of provisional voters is also not available.

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots allowed 1.2 million citizens to vote, citizens who would otherwise have been turned away from the polls.

Since we do not know the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

<b><i>Votes Lost (Millions)</i></b>	<b><i>Cause</i></b>
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

***Table 1 Cal Tech – MIT Voting Technology Project Estimates***  
4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. In 2004, about 1.2 million provisional voters were counted. A rough estimate, then, of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)<sup>23</sup>. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

### **Legislative Response**

Indeed, several states<sup>24</sup> came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

<sup>23</sup> Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems. After each election the CPS asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or they were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

<sup>24</sup> Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.<sup>25</sup>

Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

### Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second --and significantly-- the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right --the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to

<sup>25</sup> The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots "very challenging and unrealistic. To overcome this challenge, the *entire department's employees were mobilized to process provisional ballots.*" The report also found that in Los Angeles County, "staff had to prepare duplicate ballots to remove ineligible or invalid contests when voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots." In a close, contested election, "duplicate" ballots would doubtless receive long and careful scrutiny." See Appendix 7, GAO, "Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote," September 2005. (GAO Report-05-997)

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

### **RECOMMENDATIONS**

Because every provisional ballot counted represents a voter who, if the system had worked perfectly, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use of provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. The statewide voter registration database will facilitate verifying that ballot, but the voter will still have voted provisionally. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and particularly within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

#### **Recommendations for Best Practices**

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

#### **Self-evaluation of Provisional Voting –4 Key Questions**

The first need to achieve greater consistency within each state is to think about provisional voting systematically. As legislators, election officials, and citizens in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
2. Is the provisional voting system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and litigation looms?
3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

### Best Practices For Each Step In The Process

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention to reduce the inconsistencies noted in our analysis. We offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

#### The Importance of Clarity

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result-- well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."<sup>26</sup>

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.<sup>27</sup> Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide poll workers standard information resources for the training of poll workers by local jurisdictions. Training materials might include, for example, maps or databases with instruction on how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.<sup>28</sup>

<sup>26</sup> The Century Foundation, *Balancing Access and Integrity*, Report of the Working Group on State Implementation of Election Reforms, July 2005.

<sup>27</sup> See *Washington State Republican Party v. King County Division of Records*, 103 P3d 725, 727-728 (Wash. 2004)

<sup>28</sup> See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

- State training materials provided to local jurisdictions should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.<sup>29</sup> Recent legislation in Arizona indicates that recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers may need appropriate training to understand their duty to give such voters a provisional ballot.<sup>30</sup>

### A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency."<sup>31</sup>
2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.<sup>32</sup>
3. State or county websites for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

### B. At the Polling Place

---

wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

<sup>29</sup> *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6<sup>th</sup> Cir. 2004)

<sup>30</sup> *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

<sup>31</sup> Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina) they can verify their registration on the website.

<sup>32</sup> The Century Foundation, *op. cit.*

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.<sup>33</sup> Many states require training of poll workers. In some states that requirement is recent: after the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."<sup>34</sup> A state statutory requirement for training could facilitate uniform instruction of poll workers in those states that do not already provide it.
2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.
3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."<sup>35</sup> At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.<sup>36</sup> States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the number of provisional ballots actually cast in recent elections.
4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. All states should examine their chain-of-custody requirements for clarity. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.

<sup>33</sup> 8 Colo. Code Regs. § 1505-1, Rule 7.1.

### C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. Public recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underlines the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation."<sup>37</sup> Nonetheless, the *Panio v. Sutherland*<sup>38</sup> decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.<sup>39</sup>
2. More provisional ballots are counted in those states that verify ballots cast outside the correct precinct.<sup>40</sup> While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the

<sup>37</sup> The Century Foundation, *op. cit.*

<sup>38</sup> 4 N.Y.3d 123, 824 N.E.2d 488 (N.Y. 2005) and Memorandum (LaPlante—Foley) Provisional Ballot Cases by State, July 19, 2005.

<sup>39</sup> In Kansas, the voter can provide ID to a County Election Officer any time before the County Board of Canvassers meets to count provisional ballots. KS. ST. 25-1122(d). ID can be presented in person, OR via mail or electronic means. *Id.* The Board must meet either on the Friday or Monday following a Tuesday election. *Id.* at 25-3104. Deadlines in other states are: Alabama -- 5:00 P.M. on the Monday following the election AL ST § 17-10A-2(c)(1) Florida: until 5:00 P.M. on the third day following the election. Fla. Stat. Ann. § 101.048 (adopted after the 2004 election); Georgia—no later than 2 days after the election. GA ST § 21-2-417; 419. Illinois- 2 days to submit additional information 10 Ill. Comp. Stat. Ann. 5/18A-15(d); Indiana— in 2004 the deadline was the close of the polls IN. ST. §. 3-11.7-5-2(a). The time period was extended to 13 days by the adoption of Indiana Code 3-11-8, Section 25, Subsection (l); Maryland—until the meeting of the Election Board; MD ELEC LAW § 11-303. New Jersey— until the close of business on the second day after the election 19:53C-3(i). Nevada— until 5:00 P.M. on the Friday following the election NV ST 293.3085; New Mexico—until 7:00 P.M. on Election Day NM ADC 1.10.22 (B) (H).

<sup>40</sup> See Andersen, *op. cit.*, pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, "Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions."

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence. One option for states is to involve the voters in the decision by pointing out that voters who cast their provisional ballots in the wrong precinct may not be able to participate in the local election. The voter could then decide to go to the correct precinct or vote provisionally for the higher offices at the top of the ticket only.

3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location.<sup>41</sup> Ideally the voter could be directed to the correct machine, but poll worker advice will not always be correct. One way to assess the balance of issues here is to consider that, if a voter in a multi-precinct polling place is sent to the wrong machine, the error is probably the poll worker's, and the voter should not be penalized.
4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.<sup>42</sup>

### Colorado Rejection Codes (Any ballot given a rejection code shall not be counted):

- RFS (Rejection federal or state) No federal or state candidates or issues to duplicate.
- RNS (Rejection not signed) Provisional Ballot Affidavit not signed.
- RIN (Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter's eligibility.
- RNR (Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
- REE (Rejection envelope empty) Provisional ballot envelope is empty.
- RAB (Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
- REV (Rejection based on ballot cast in early voting) Voter voted early.
- RIP (Rejection based on incorrect party) Incorrect Party in Primary Election.
- RFE (Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
- RWC (Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
- RID (Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who

<sup>41</sup> Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.

<sup>42</sup> 8 CCR 1505-1, at 26.5.4, adopted August 4, 2005. See also 1-2-509(3) C.R.S.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.

RRD (Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter's eligibility cannot be established.

### **D. Verification of Provisional Ballots**

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections
2. In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The prudent course here would be to encourage states to consider the issue and then make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

### **E. Post-election Information for Voters**

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

### **F. State Laws Governing Litigation over Provisional Voting**

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

### **Broader Considerations**

#### **G. Integrity and the Appearance of Integrity**

1. State laws or regulations providing for non-partisan or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public, while protecting the names of those who voted provisionally.

### H. Continuous Assessment of the Provisional Ballot -- Process and Performance

Defining what makes for a successful provisional voting system is difficult. The most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations or processes, such as Six Sigma<sup>43</sup> or the Baldrige Quality process<sup>44</sup> to evaluate the provisional ballot process. Pending such a review, the EAC can recommend that states take the following actions.

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.
2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:
  - Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (lack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
  - Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
  - Measures of variance among jurisdictions.
  - Number of poll workers trained in administration of provisional voting by polling place
  - Number of jurisdictions posting information on provisional voting in the polling place
  - Time required to evaluate ballots by jurisdiction

---

<sup>43</sup> Six Sigma is a measure of quality that strives for near perfection. Six Sigma is a disciplined, data-driven approach and methodology for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process -- from manufacturing to transactional and from product to service.

<sup>44</sup> The Baldrige Criteria for Performance Excellence provide a systems perspective for understanding performance management. They reflect validated, leading-edge management practices against which an organization can measure itself. With their acceptance nationally and internationally as the model for performance excellence, the Criteria represent a common language for communication among organizations for sharing best practices. The Criteria are also the basis for the Malcolm Baldrige National Quality Award process.

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### ATTACHMENT 1 – Data Sources for Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The variables used to analyze a state's use of provisional ballots:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and included it in our analysis.

#### New vs. Old States

We classified states as "new" or "old" based on the 2001 Electionline study of provisional voting,<sup>45</sup> but condensed its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (UNA)

We included in the list of "Old States" all states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots. States in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as "new" states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they

---

<sup>45</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf>.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline's map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct's list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter's name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island's first use of provisional voting was in 2004 and, therefore, classified the state as "new" to the system of provisional balloting.

<b>Old States</b>	<b>New States</b>	<b>HAVA Exempt or NA</b>
Alaska	Connecticut	Idaho
Alabama	Delaware	Maine
Arkansas	Georgia	Minnesota
California	Hawaii	New Hampshire
Colorado	Illinois	North Dakota
DC	Indiana	Wisconsin
Florida	Louisiana	Wyoming
Iowa	Massachusetts	
Kansas	Missouri	
Kentucky	Montana	
Maryland	Nevada	
Michigan	Oklahoma	
Mississippi	Pennsylvania	
Nebraska	Rhode Island	
New Jersey	South Dakota	
New Mexico	Tennessee	
New York	Utah	
North Carolina	Vermont	
Ohio		
Oregon		
South Carolina		
Texas		
Virginia		
Washington		
West Virginia		
26	18	7

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>46</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found it had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

### Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as "out-of-precinct." States that invalidated such ballots were categorized as "In-precinct only."

<b>Out-of-Precinct</b>	<b>In-Precinct Only</b>	<b>HAVA EXEMPT OR NA</b>
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi
Delaware	Connecticut	New Hampshire
Georgia	District of Columbia	North Dakota
Illinois <sup>47</sup>	Florida	Wisconsin
Kansas	Hawaii	Wyoming
Louisiana	Indiana	
Maryland	Iowa	
New Mexico	Kentucky	
North Carolina	Massachusetts	
Oregon	Michigan	
Pennsylvania	Missouri	
Rhode Island	Montana	
Utah	Nebraska	
Vermont	Nevada	
Washington	New Jersey	
	New York	
	Ohio	
	Oklahoma	
	South Carolina	
	South Dakota	
	Tennessee	
	Texas	
	Virginia	
	West Virginia	
17	26	7

<sup>46</sup> "Election Preview 2004: What's changed, What Hasn't and Why". This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

<sup>47</sup> In Illinois, it is not clear that all counties followed this procedure. Some counties may not have counted out-of-precinct ballots.

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

**Table 3**  
**CATEGORIZATION OF STATES -- Ballot Evaluation Methods**

Signature Match	Data Match	Affidavit	Return with ID	NA
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina*
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### Data Collection

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

<b>Received Updated Data</b>	<b>Did Not Receive Updated Data</b>
California	Alabama
District of Columbia	Alaska <sup>48</sup>
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland <sup>49</sup>	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska <sup>50</sup>	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
<b>26 States</b>	<b>25 States</b>

<sup>48</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>49</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>50</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

## FINAL DRAFT

For Review by the Standards Board and Board of Advisors

### Data Differences

The data used in this study differ from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

State	EDS Numbers Cast/Counted	Our Numbers Cast/Counted	Differences	Updated Info from State? <sup>51</sup>
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No
Colorado	51,529/39,086	51,477/39,163	52/77	No
Georgia	12,893/4,489	12,893/3,839	0/650	No
Hawaii	346/25	348/25	2/0	Yes
Iowa	15,406/8,038	15,454/8,048	48/10	Yes
Kansas	45,535/32,079	45,563/31,805	28/274	Yes
Montana	688/378	653/357	35/21	Yes
Nebraska	17,421/13,788	17,003/13,298	418/490	Yes
Nevada	6,153/2,446	6,154/2,447	1/1	Yes
New Mexico	6,410/2,914	15,360/8,767	8,950/5,853	Yes
N. Carolina	77,469/50,370	77,469/42,348	0/8,022	No
Ohio	157,714/123,902	158,642/123,548	928/354	Yes
Pennsylvania	No data	53,698/26,092	53,698/26,092	Yes
Texas	35,282/7,156	36,193/7,770	911/614	Yes
Vermont	121/30	101/37	20/7	No
Virginia	4,608/728	4,609/728	1/0	Yes
Washington	92,402/73,806	86,239/69,273	6,163/4,533	Yes
Wisconsin	374/119	373/120	1/1	No

<sup>51</sup> Data not provided by the state itself is taken from Electionline figures.

Subject Re: Request for input on new CRS survey

Dear Paul: It was a delight to see you last week, and very informative as well. I'm only sorry we didn't have more time to talk. Thank you for your excellent points and for taking the time to respond. We do plan to explore at least several of the points you raise, and your comments should help us focus the questions nicely. Of course, we face the dilemma that if we ask all the questions we think would be useful, the questionnaire will be too long and response rates will go down. So we are going to have to make some hard choices. I am forwarding your email immediately to my colleagues so we can discuss it this week, since A&M will be sending us the first draft of the questionnaire on Friday. Speaking on the 2nd day of the conference, I found that much of what I had originally planned to say was already covered by others. A few points some folks seemed to find interesting:

1. There's not been much talk about what kinds of fraud might be perpetrated using voter ID (we all seem to think it will only reduce the risk of fraud, but as you know, any system has its own vulnerabilities, and the bad guys will try to exploit them).
2. Since the voter ID and regn debates seem to be heavily colored by partisan wrangling, it might be useful to try to change the question. For example, rather than posing the registration problem as a dilemma with access and integrity the two horns, it might be helpful to think about it as something like "What level of uncertainty regarding eligibility is acceptable in a decision whether to add a voter to or keep a voter on a registration list?" Of course, there are probably better ways to phrase it...
3. There is a lot of focus on registration as a database problem, with the risk that technology is being overemphasized and the two other main dimensions--people and process--are not getting enough attention. For example, it could be very productive to focus more on the usability--for voters, pollworkers, and administrators--of voter registration systems.
4. If we adopt universal voter identification, do we really need voter registration?
5. It might be useful if process engineers were to look at the entire election cycle to determine how it can be improved. It seems to me, as both policy analyst and pollworker, that it is overly complex, and that actually increases the risk of failure and mischief. Similar concerns have long been raised about the healthcare industry, often only to fall on deaf ears, although that seems to be changing at last, to good effect.
6. There is now a core group of preeminent researchers in election administration, and forward-thinking, preeminent election administrators who understand the importance of research. It might therefore be useful to consider the possibility of a consortium of interested members the two groups to identify research needs (including such basics as what data should be collected and how) and working together to do the studies. If I were in academia, I'd certainly be exploring that.

So there you have it!

I hope to see you again soon, and thanks again for your help.

-Eric

>>> <pdegregorio@eac.gov> 10/08/06 4:06 PM >>>  
Eric,

Good to see you in Boston. Sorry I couldn't say for your session, but I did read what you submitted.

I looked over your topics. I also did a quick glance of your post-2004 survey. While you list your topics and make reference to your 2004 survey, I could not tell from your topics whether you are going to ask most of the same questions from your previous survey. Some of them would certainly be worth repeating to detect trends.

Since only 17% indicated in your last survey that they had replaced equipment (while 40% said they had planned to), I wonder if that question needs to be further defined since all jurisdictions have to have devices that allow HAVA 301a compliance (disability privacy and independence). Perhaps you can ask if they replaced equipment or if they kept their equipment and added a voting device for people with disabilities at each polling place.

Also, it may be helpful to know if the LEO receives adequate funding from local, state and the federal government for their operations (on some kind of 1-5 scale). I don't know how deeply you want to get into poll worker pay or training but finding out the mean pay of poll workers and the mean number of hours they are trained could be helpful.

While 81% of LEOs reported in your last survey that they were adequately trained as an election official, I wonder how many feel mandatory state LEO training or certification should be required. Should it be tied to pay increases for LEOs?

What about questions on how they are served by the media? Does the media do an adequate job in providing correct information to the voters?

Do they believe the federal government should set higher standards for voting equipment or are the present standards adequate?

Do you plan to ask a question again this year on the adequacy of the service they are provided by vendors?

There was very little mention of fraud in your last survey and I don't see it listed as a topic, which I know has been a concern to many members of Congress (especially in the passage by the House of the ID law). Do you plan to ask any questions on that topic? It would be interesting to know

026500

if LEOs uncovered any fraud in their jurisdiction, what type of fraud (registration, petition, absentee, voting, vote-buying), whether they referred it to local or federal prosecutors and whether the prosecutors did anything about it. When it comes to fraud, many LEOs complain to me that they see (especially with bogus registrations and on petitions) it but local prosecutors do not prosecute it.

I know I have made quite a few suggestions and that this survey is probably more limited than what you did in 2004.

Hope this helps.

Subject  
Request for input on new CRS survey

Dear Paul:

I am writing to ask for your help in preparing a list of survey questions.

The purpose of the survey is to help the 110th Congress as it considers further action in election reform, especially, for what issues is it most important that Congress know the perspectives of local election officials?

Below is a draft list of topics that we are considering. It would be very helpful if you could let me know if there are any additional topics

we should consider for the survey, or if any of those on the current list do not seem relevant to you. Please keep in mind that we are interested

026501

in the perspectives of election officials, not details about how they administer elections (other surveys cover those matters). Also, the survey focuses on election administration, not other election issues such as redistricting or campaign finance.

I will greatly appreciate any feedback you can give us, and it will be most helpful if you can respond by Monday, October 9.

Here are the topics:

Background Information

- General Information on Respondent
- Training and Experience of Respondent
- Voting Systems Used in Jurisdiction

The Help America Vote Act (HAVA)

- Voting Accessibility
- Voter Registration Database
- Voter ID
- Provisional Ballots
- Funding
- Election Assistance Commission
- Other Major Provisions
- Implementation and Compliance Issues

Computer-Assisted Voting

- DREs versus Optical Scan
- Security Issues
- Usability Issues
- Paper Trail and Audits

Conducting Elections

- Effects of HAVA on Voters, Poll Workers, and

Administrators

- Poll Worker Recruitment and Training
- Back-up and Contingency Plans
- Partisanship and Election Administration

In case you have not seen it, I have attached a copy of our CRS report from the 2004 survey. This year, we are once again working with the Bush School at Texas A&M University to do the survey. Here is link to a paper by them that includes details on the questions and responses from 2004:

/academics/mpsa/capstone/projects/VotingSystemsReport.pdf

I look forward to hearing from you.

Sincerely,

Eric A. Fischer, PhD  
Senior Specialist, Science and Technology

Buster,

I don't know if you ever saw the e-mail that follows below. It was sent around last summer, and, because I am on so many lists, I got a copy. I think it will show you some of the partisan push that is driving some of this debate on DRE's and security. These people actually believe that it was massive fraud that put Bush and the GOP congress in place. This is utter nonsense and we have to be careful not to be a party to promoting the cause of those who continue to promote this train of thought. I know the EAC has taken great steps and you have shown great leadership to deal with this issue in a responsible manner. Getting Drs. Rubin and Williams together was that kind of leadership. Having the May 5 hearing was another. I know that we are likely to see an increase in conspiracy theories in the coming months. It will be a challenge for all of us.

## Democracy Imperiled

America's election problems.

By John Fund

**EDITOR'S NOTE:** This is the introduction of John Fund's new book, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, released today from Encounter Books.

Our nation may be on the brink of repeating the 2000 Florida election debacle, but this time in several states, with allegations of voter fraud, intimidation and manipulation of voting machines added to the generalized chaos that sent our last presidential contest into overtime. There is still time to reduce the chance of another electoral meltdown, both this year and in future years. But this will not happen unless we acknowledge that the United States has a haphazard, fraud-prone election system befitting an emerging Third World country rather than the world's leading democracy.

With its hanging chads, butterfly ballots and Supreme Court intervention, the Florida fiasco compelled this country to confront an ugly reality: that we have been making do with what noted political scientist Walter Dean Burnham has called "the modern world's sloppiest electoral systems." How sloppy? Lethally so. At least eight of the nineteen hijackers who attacked the World Trade Center and the Pentagon were actually able to register to

026511

vote in either Virginia or Florida while they made their deadly preparations for 9/11.

The 2000 recount was more than merely a national embarrassment; it left a lasting scar on the American electoral psyche. A recent Zogby poll found that 38 percent of Americans still regard the 2000 election outcome as questionable. Many Republicans believe that Democratic judges on the Florida Supreme Court tried to hand their state to Al Gore based on selective partisan recounts and the illegal votes of felons and aliens. Many Democrats feel that the justices of the U.S. Supreme Court tilted toward Bush, and they refuse to accept his victory as valid. But this issue transcends "red state" vs. "blue state" partisan grievances. Many Americans are convinced that politicians can't be trusted to play by the rules and will either commit fraud or intimidate voters at the slightest opportunity.

Indeed, the level of suspicion has grown so dramatically that it threatens to undermine our political system. Nearly 10 percent of Americans believe their votes are not counted accurately, and almost as many worry that this is the case, according to a July 2004 poll by John Zogby. A Rasmussen Research poll in June found that 44 percent of Americans were either very or somewhat worried that a Florida-style mess could happen again in 2004. This growing cynicism diminishes respect for the nation's institutions and lowers voter participation. Only 11 percent of the 18- to 19-year-olds eligible to vote for the first time now bother to go to the polls. The United States ranks 139th out of 163 democracies in the rate of voter participation. The more that voting is left to the zealous or self-interested few, the more we see harshly personal campaigns that dispense with any positive vision of our national future. "If this escalates, we're in horrendous shape as a country," says Curtis Gans, who runs the Committee for the Study of the American Electorate. "If election results are followed by lawsuits, appeals, fire and counterfire, many people who are already saying to hell with the process are going to exit."

The 2000 election resulted in some modest reforms, such as the federal Help America Vote Act, but the implementation has been so slow. Only \$670 million of the promised \$3.9 billion in grants to upgrade technology, cull voter rolls and enhance training had been dispersed to the states as of May 2004. This means that the nation's voting systems will be in no better shape this November than they were in 2000, when about 2 percent of all votes for

president nationwide weren't counted for one reason or another, the vast majority because of voter error or outdated machines.

America's election problems go beyond the strapped budgets of many local election offices. More insidious are flawed voter rolls, voter ignorance, lackadaisical law enforcement and a shortage of trained volunteers. All this adds up to an open invitation for errors, miscounts or fraud.

Reform is easy to talk about, but difficult to bring about. Many of the suggested improvements, such as requiring voters to show ID at the polls, are bitterly opposed. For instance, Maria Cardona, spokeswoman for the Democratic National Committee, claims that "ballot security and preventing voter fraud are just code words for voter intimidation and suppression." Even improved technology is controversial. This November, around fifty million Americans will be using electronic voting machines similar to ATM machines, and some computer scientists are alarmed by the possibility that hackers could change the software to cast multiple votes or do other kinds of mischief. Both Democratic senator Hillary Clinton and GOP representative Steve King of Iowa are backing separate pieces of legislation to require that machines issue paper receipts for voters to verify before casting their ballots. But the legislation hasn't even had a hearing and only Nevada will have paper receipts in place by the fall 2004 election.

Confusion and claims of fraud are likely this time around, especially if the election is as close as it was in 2000. Can the nation take another Florida-style controversy?

Indeed, we may be on the way to turning Election Day into Election Month through a new legal quagmire: election by litigation. Every close race now carries with it the prospect of demands for recounts, lawsuits and seating challenges in Congress. "We're waiting for the day that pols can just cut out the middleman and settle all elections in court," jokes Chuck Todd, editor of the political tip sheet *Hotline*. Such gallows humor may be entirely appropriate given the predicament we face. The 2000 election may have marked a permanent change in how elections can be decided, much as the battle over the Supreme Court nomination of Robert Bork changed, apparently forever, the politics of judicial appointments. On April 19, 2004, John Kerry campaigned in Florida with Senator Joe Lieberman, the 2000 Democratic vice presidential candidate, and vowed — six months

before a single ballot was cast, counted or disputed — that he was ready to take the 2004 election to court. "We are going to bring legal challenge to those districts that make it difficult for people to register. We're going to bring challenge to those people that disenroll people," he told a rally. "And we're going to challenge any place in America where you cannot trace the vote and count the votes of Americans. Period!" Democrats plan to have over ten thousand lawyers on the ground in all states this November, ready for action if the election is close and they see a way to contest it. "If you think of election problems as akin to forest fires, the woods are no drier than they were in 2000, but many more people have matches," says Doug Chapin of Electionline.org, an Internet clearinghouse of election news. If the trend toward litigation continues, winners in the future may have to hope not only that they win but that their margins are beyond "the margin of litigation."

Some of the sloppiness that makes fraud and foul-ups in election counts possible seems to be built into the system by design. The "Motor Voter Law," the first piece of legislation signed into law by President Clinton upon entering office, imposed fraud-friendly rules on the states by requiring driver's license bureaus to register anyone applying for licenses, to offer mail-in registration with no identification needed, and to forbid government workers to challenge new registrants, while making it difficult to purge "deadwood" voters (those who have died or moved away). In 2001, the voter rolls in many American cities included more names than the U.S. Census listed as the total number of residents over age eighteen. Philadelphia's voter rolls, for instance, have jumped 24 percent since 1995 at the same time that the city's population has declined by 13 percent. CBS's *60 Minutes* created a stir in 1999 when it found people in California using mail-in forms to register fictitious people, or pets, and then obtaining absentee ballots in their names. By this means, for example, the illegal alien who assassinated the Mexican presidential candidate Luis Donaldo Colosio was registered to vote in San Pedro, California — twice.

Ironically, Mexico and many other countries have election systems that are far more secure than ours. To obtain voter credentials, the citizen must present a photo, write a signature and give a thumbprint. The voter card includes a picture with a hologram covering it, a magnetic strip and a serial number to guard against tampering. To cast a ballot, voters must present the card and be certified by a thumbprint scanner. This system was

instrumental in allowing the 2000 election of Vicente Fox, the first opposition party candidate to be elected president in seventy years.

But in the United States, at a time of heightened security and mundane rules that require citizens to show ID to travel and even rent a video, only seventeen states require some form of documentation in order to vote. "Why should the important process of voting be the one exception to this rule?" asks Karen Saranita, a former fraud investigator for a Democratic state senator in California. Americans agree. A Rasmussen poll finds that 82 percent of Americans, including 75 percent of Democrats, believe that "people should be required to show a driver's license or some other form of photo ID before they are allowed to vote."

The reason for such support is that citizens instinctively realize that some people will be tempted to cut corners in the cutthroat world of politics. "Some of the world's most clever people are attracted to politics, because that's where the power is," says University of Virginia political scientist Larry Sabato. "So they're always going to be one step ahead of the law."

Election fraud, whether it's phony voter registrations, illegal absentee ballots, shady recounts or old-fashioned ballot-box stuffing, can be found in every part of the United States, although it is probably spreading because of the ever-so-tight red state/blue state divisions that have polarized the country and created so many close elections lately. Although most fraud is found in urban areas, there are current scandals in rural South Dakota and Texas. In recent years, Baltimore, Philadelphia, New Orleans and Milwaukee have all had election-related scandals. Wisconsin officials convicted a New York heiress working for Al Gore of giving homeless people cigarettes if they rode in a van to the polls and voted. The *Miami Herald* won a Pulitzer Prize in 1999 for uncovering how "vote brokers" employed by candidate Xavier Suarez stole a mayoral election by tampering with 4,740 absentee ballots. Many were cast by homeless people who didn't live in the city and were paid \$10 apiece and shuttled to the elections office in vans. All of the absentee ballots were thrown out by a court four months later and Mr. Suarez's opponent was installed as mayor.

But such interventions are rare, even when fraud is proven. In 1997, the House of Representatives voted along partisan lines to demand that the Justice Department prosecute Hermandad

Mexicana Nacional, a group that investigators for the House Administration Committee say registered hundreds of illegal voters in a razor-thin congressional race in Orange County, California. But federal immigration officials refused to cooperate with the probe, citing "privacy" concerns, and nothing was done beyond yanking a federal contract that paid Hermandad to conduct citizenship classes. The same year, a U.S. Senate probe into fraud in a Senate race in Louisiana found more than 1,500 cases in which two voters used the same Social Security number. But further investigations collapsed after Democratic senators walked off the probe, calling it unfair, and then Attorney General Janet Reno removed FBI agents from the case because the probe wasn't "bipartisan."

A note about partisanship: Since Democrats figure prominently in the vast majority of examples of election fraud described in *Stealing Elections*, some readers will jump to the conclusion that this is a one-sided attack on a single party. I do not believe Republicans are inherently more virtuous or honest than anyone else in politics, and I myself often vote Libertarian or independent. Voter fraud occurs in both Republican strongholds such as Kentucky hollows and Democratic bastions such as New Orleans. When Republicans operated political machines such as Philadelphia's Meehan dynasty up until 1951 or the patronage mill of Nassau County, New York, until the 1990s, they were fully capable of bending — and breaking — the rules. Earl Mazo, the journalist who exhaustively documented the election fraud in Richard Daley's Chicago that may have handed Illinois to John F. Kennedy in the photo-finish 1960 election, says there was also "definitely fraud" in downstate Republican counties "but they didn't have the votes to counterbalance Chicago."

While they have not had the control of local and administrative offices necessary to tilt the rules improperly in their favor, Republicans have at times been guilty of intimidation tactics designed to discourage voting. In the 1980s, the Republican National Committee hired off-duty policemen to monitor polling places in New Jersey and Louisiana in the neighborhoods of minority voters, until the outcry forced them to sign a consent decree forswearing all such "ballot security" programs in the future.

In their book *Dirty Little Secrets*, Larry Sabato and co-author Glenn Simpson of the *Wall Street Journal* noted another factor in why Republican election fraud is less common. Republican base

voters are middle-class and not easily induced to commit fraud, while "the pool of people who appear to be available and more vulnerable to an invitation to participate in vote fraud tend to lean Democratic." Some liberal activists that Sabato and Simpson interviewed even partly justified fraudulent electoral behavior on the grounds that because the poor and dispossessed have so little political clout, "extraordinary measures (for example, stretching the absentee ballot or registration rules) are required to compensate." Paul Herrison, director of the Center for American Politics at the University of Maryland, agrees that "most incidents of wide-scale voter fraud reportedly occur in inner cities, which are largely populated by minority groups."

Democrats are far more skilled at encouraging poor people — who need money — to participate in shady vote-buying schemes. "I had no choice. I was hungry that day," Thomas Felder told the *Miami Herald* in explaining why he illegally voted in a mayoral election. "You wanted the money, you were told who to vote for." Sometimes it's not just food that vote stealers are hungry for. A former Democratic congressman gave me this explanation of why voting irregularities more often crop up in his party's back yard: "When many Republicans lose an election, they go back into what they call the private sector. When many Democrats lose an election, they lose power and money. They need to eat, and people will do an awful lot in order to eat."

Investigations of voter fraud are inherently political; and because they often involve race, they are often not zealously pursued or prosecuted. Attorney General John Ashcroft did launch a Voter Integrity Program in 2002, which dramatically reduced both Republican allegations of fraud and Democratic complaints of suppressed minority votes. But many federal and state prosecutors remain leery of tackling fraud or intimidation. After extensive research, I can report that while voting irregularities are common, the number of people who have spent time in jail as a result of a conviction for voter fraud in the last dozen years can be counted on the fingers of one hand.

The U.S. attorney for northern Louisiana, Donald Washington, admits that "most of the time, we can't do much of anything [about ballot-box improprieties] until the election is over. And the closer we get to the election, the less willing we are to get involved because of just the appearance of impropriety, just the appearance of the federal government somehow shading how this election ought to occur." Several prosecutors told me they fear

charges of racism or of a return to Jim Crow voter suppression tactics if they pursue touchy fraud cases. Wade Henderson of the Leadership Conference on Civil Rights calls efforts to fight election fraud "a solution in search of a problem" and "a warmed-over plan for voter intimidation."

But when voters are disfranchised by the counting of improperly cast ballots or outright fraud, their civil rights are violated just as surely as if they were prevented from voting. The integrity of the ballot box is just as important to the credibility of elections as access to it. Voting irregularities have a long pedigree in America, stretching back to the founding of the nation — though most people thought the "bad old days" had ended in 1948 after pistol-packing Texas sheriffs helped stuff Ballot Box 13, stealing a U.S. Senate seat and setting Lyndon Johnson on his road to the White House. Then came the 2004 primary election, when Representative Ciro Rodriguez, a Democrat, charged that during a recount, a missing ballot box appeared in south Texas with enough votes to make his opponent the Democratic nominee by 58 votes.

Political bosses such as Richard Daley or George Wallace may have died, but they have successors. A one-party machine in Hawaii intimidates critics and journalists who question its vote harvesting among noncitizens. In 1998, a former Democratic congressman named Austin Murphy was convicted in Pennsylvania of absentee ballot fraud. The Democratic county supervisor who uncovered this scandal, Sean Cavanaugh, was so ostracized by his party that he re-registered as an independent.

Even after Florida 2000, the media tend to downplay or ignore stories of election incompetence, manipulation or theft. Allowing such abuses to vanish into an informational black hole in effect legitimates them. The refusal to insist on simple procedural changes, such as requiring a photo ID at the polls, combined with secure technology and more vigorous prosecutions accelerates our drift toward banana-republic elections.

In 2002, Miami election officials hired the Center for Democracy, which normally observes voting in places like Guatemala or Albania, to send twenty election monitors to south Florida. In 2004, there will be even more observers on the ground. Scrutinizing our own elections the way we have traditionally scrutinized voting in developing countries is, unfortunately, a step in the right direction. But before we can get the clearer laws and

better protections we need to deal with fraud and voter mishaps,  
we have to get a sense of the magnitude of the problem we face.

Subject Panelists for Feb. 23

I have spoken to John Lott of the American Enterprise Institute regarding folks who might be available to testify on provisional balloting at our Feb. 23rd hearing. Lott said that he is available to testify so long as we can get him on a plane to Philly by 4 PM (his son is graduating from scouts that night). Lott testimony is likely to cite laws/data which support the narrow approach to provisional voting. He would also probably talk about problems with fraud and provisional voting.

Lott recommended that we contact Bob Williams, who is President and senior research analyst with the Evergreen Freedom Foundation, a conservative think tank based in Seattle that has studied voting issues and made recommendations to the state legislature. Williams has done a lot of work on provisional voting and is just completing a survey from all the counties in Washington State on provisional voting regarding the Nov. 2004 election. He can cite statistics that show the inconsistency in one state when rules/procedures on provisional voting are not applied equally in every county (in Washington State the counting rate for provisionals ranged from 44% to 94%). Williams, who's testimony would probably fit better on the NGO panel, can be contacted at 360-956-3482. His web site is: <http://www.effwa.org/>

Lott said that Yoo of Berkeley was good but he did not know him to be an expert on provisional voting.

I'm waiting to hear back from another person on some other possibilities to consider for the academic panel.

As to the election officials panel, My preference for the 3 State/SOS positions would be Blackwell, Vigil-Giron, Hood, and then Cortes (in that order; I realize we are likely to only have 3 from this group but assume someone may decline); my preference for local would be: Clark (D) and Blevins (R), they could both talk about their experiences with provisional voting at the local level. I don't know Vu or Damschroeder but I there are liberal blogs that believe Damschroeder stole the election in Ohio (not based on provisional voting but on faulty voting machines). If we want another calm-speaking westerner then Helen Purcell might work (although she might be tired of traveling).

Subject First Choice Panelists for Provisional Voting Hearing

According to your comments, the following are the first choices for panelists at the Provisional Voting Hearing. We are attempting to find one more academic who would represent a middle ground position since the likelihood of Eagleton or any other contractor being on board and prepared for that hearing is not strong. I will begin making calls to invite these persons today. Some will be attending functions this weekend wherein I will offer an in-person invitation.

### **Provisional Voting Presentations (Introductions by Chair Hillman)**

#### **Panel 1: Election Officials**

Secretary Kenneth Blackwell, Ohio  
Secretary Glenda Hood, Florida  
Secretary Rebecca Vigil-Giron, New Mexico  
Bradley J. Clark, Alameda County, Registrar of Voters (CA)  
Helen Purcell, Maricopa County Recorder (AZ)

#### **Panel 2: Advocacy Organizations/Non-government Sector**

026523

Kay Maxwell, League of Women Voters  
Bob Williams, President and Senior Research Fellow, Evergreen Freedom Foundation  
Miles Rapoport, Demos

**Panel 3: Academics**

Professor Dan Tokaji, Moritz School of Law, Ohio State University  
John Lott, Senior Fellow AEI  
Professor Edward Foley, Moritz School of Law, Ohio State University

Subject Next steps on EAC's research agenda

Vice Chair-

I'm very excited to hear all about your trip. How extraordinary it must have been. My trip is now just three weeks away and I'm wondering if I'll be in the middle of the Consecration, when I arrive!

While next week is very busy for you in terms of the testifying on the Hill, I'd like to spend some time with you discussing ideas around research related to voter fraud. As you know, we have money we must spend, and I think this is an issue that you may want to take the lead on? I'd like to brainstorm with you regarding some ideas for EAC guidance we might issue around the subject matter, between May and September.

I'll ask Holland to find a time to meet.

Thanks

Subject Question re: Bond bill

History:  This message has been replied to.

Paul,

Thanks for all your help with our voter fraud project. Also, it sounds like Kerry and you had a fantastic time on your Italian vacation. Great to hear.

Question in re: the Bond-McConnell bill: I note that this measure includes a provision to require polling sites to have lists of those who already voted and those who requested an absentee ballot. In other words, in some states or jurisdictions, can people now come into a polling place and vote without being checked off a list (and thereby inviting repeated, and fraudulent, voting)? Amazing to me if this is the case.

Thanks, and best regards.

Subject Control of procurement sensitive information - FYI

History:  This message has been replied to.

Commissioners -

I am very disturbed because I just listened to a voice mail from Dick Smolka that was left sometime after 3 p.m. today stating he had heard we had just awarded a contract to Eagleton Institute and he wants to know what for and the amount of the contract award. We have a legal obligation under the Federal Acquisition Regulations to not release any information about procurements until final decisions have been made and the parties duly notified. I haven't even received confirmation that the Tally vote has been completed and certified, much less completed the paperwork with Diana for contract award. I have repeatedly stressed with staff our obligation to not talk about procurements. I am disappointed that someone apparently does not understand that this is not optional.

Subject Re: Control of procurement sensitive information - FYI 

Carol,

Mea culpa. I was the one who inadvertently gave Dick Smolka the information on the Eagleton Institute award. He called me about another matter this afternoon and then at the end of the conversation he switched to the subject of whether we were going to put out more RFPs for research work and whether we had made any recent awards, as he wanted to publicize it in his newsletter. I told Dick that he needed to contact you about this but in the process I told him I had just voted to award a contract to Eagleton for some of our research work, and that he could get the details from you once it was finalized (I gave him none).

I apologize for giving him this information and have just called Dick to ask him to not disclose to anyone what I told him until he heard from you that it was official. Dick said he would honor that request.

It won't happen again. Thanks for bringing it to our attention (especially mine!).

Subject Control of procurement sensitive information - FYI

Commissioners -

I am very disturbed because I just listened to a voice mail from Dick Smolka that was left sometime after 3 p.m. today stating he had heard we had just awarded a contract to Eagleton Institute and he wants to know what for and the amount of the contract award. We have a legal obligation under the Federal Acquisition Regulations to not release any information about procurements until final decisions have been made and the parties duly notified. I haven't even received confirmation that the Tally vote has been

026531

completed and certified, much less completed the paperwork with Diana for contract award. I have repeatedly stressed with staff our obligation to not talk about procurements. I am disappointed that someone apparently does not understand that this is not optional.

Subject contract award to EAgleton Institute

Commissioners -

Just a note to clarify where we are on the Eagleton contract award. The Tally vote has been completed and certified. Julie and I are completing the contract documentation for signature by the Chair. Under the federal acquisition process, we cannot publish any information about the contract award until the contract is signed and accepted by the contractor. I have notified Eagleton that you have voted to award the contract to them and that paperwork is forthcoming. Asked them to get ready to begin work and to contact me to schedule a project kickoff meeting. Advised them that they may not make any announcements regarding contract award until after the EAC does, and that we would notify them when that occurs.

Subject project kickoff meeting with EAgleton Institute

Commissioners -

We have tentatively scheduled May 26 at 2:30 for a kickoff meeting here with Eagleton Institute. What will happen at this meeting is Eagleton will introduce their key people and make a brief presentation on their approach to performing the provisional voting and voter ID studies. It will be an opportunity to ask questions, raise any concerns, and/or provide guidance as they begin this work. Please advise if you wish to attend this meeting. I expect it will last about an hour.

## STATEMENT OF WORK

### Research assistance to the Election Assistance Commission (EAC) for the development of voluntary guidance on vote count and recount procedures

**0.0 BACKGROUND:** Sec. 241 (b)(13) of HAVA allows the Commission to study the laws and procedures used by each State that govern: recounts of ballots cast in elections for Federal office; contests of determinations regarding whether votes are counted in such elections; and standards that define what will constitute a vote on each type of voting equipment used in the State to conduct elections for Federal office. For the latter, the State Plans will be reviewed to identify the definitions provided in them regarding what constitutes a vote. A chart is provided along with this document for the Contractor to use as a baseline. This study also includes the identification of best practices (as identified by the Commission) that are used by States with respect to the recounts and contests described earlier, and whether or not there is a need for more consistency among State recount and contest procedures used with respect to elections for Federal office.

**1.0 OBJECTIVE:** The objective of this contract is for the EAC to obtain assistance with the collection, analysis, and interpretation of information regarding vote count and recount procedures for the purpose of developing best practices on these topics in time for implementation for the 2006 Federal elections.

**2.0 SCOPE:** In general, the Contractor shall be responsible for all research and analysis activities, including the conduct of public hearings for fact finding and public comment purposes. Notice of public meetings and hearings is required to be published in the Federal Register. The Contractor shall be responsible for preparing the notice documents, and the EAC will submit the notices and cover the cost of publication. In addition, best practices documents must be published in the Federal Register to obtain public comment prior to their adoption. Again, the Contractor will work with the EAC to prepare the draft documents for publication, which the EAC will submit and pay for the cost of publication. Comments received will be provided to the Contractor for analysis and incorporation into the final best practices documents, as appropriate.

#### **3.0 SPECIFIC TASKS:**

**3.1 Update the project work plan.** The Contractor shall update and deliver the Project Plan no later than ten (10) days after the contract is awarded. The plan shall describe how the Contractor will accomplish each of the project tasks, and it shall include a timeline indicating major milestones, and the staff responsible for each task. The updated Project Plan shall be formally briefed to the EAC Project Manager and lead Commissioner.

**3.2 Submit monthly progress reports.** The Contractor shall submit a monthly progress report within two (2) weeks of the end of each month. This report shall provide a brief summary of the activities performed and it will indicate progress against the

026536

timeline provided in the Project Plan. Any issues that could adversely affect the schedule should be identified for resolution. Budget status shall also be provided.

- 3.3** Conduct periodic briefings for the EAC. The Contractor shall periodically meet with the EAC Project Manager and the lead Commissioner for this project to discuss research findings and work progress. The Project Plan should make allowance for this activity. The number and frequency of briefings will be determined by the Contractor's Project Manager and the EAC Project Manager as the work progresses. The Contractor may also be required to periodically brief the full Commission on their work.

### **Vote Count**

- 3.4** Collect and analyze State legislation, administrative procedures, and court cases. An understanding of standards that define what constitutes a vote on each type of voting equipment used in the States to conduct elections for Federal office around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

Topics of particular interest include:

- Are vote counting methods and definitions uniform and consistent among the States for each type of voting equipment used? Within a State? If they are not uniform and consistent, explain how they differ from one another;
- Define what constitutes a vote on each type of voting equipment used in the States to conduct elections for Federal office. Refer to the chart provided as a baseline. Provide a complete chart listing the States and their definitions of what constitutes a vote in general and then by voting system.
- Circumstances in which a ballot would be partially or completely invalidated;
- How are voters educated about what constitutes a vote for the type of equipment they use?
- Is there polling place signage posted on Election Day educating voters about what constitutes a vote for the type of voting equipment used?
- When is a vote count officially certified?

- 3.5** Review literature for methodologies used to establish best practices, and develop definitions of what shall constitute a best practice with respect to vote counts. Utilizing the methodology and definitions developed, identify best practices that are used by States with respect to standards that define what will constitute a vote on each type of voting equipment used in the State to conduct elections for Federal office.

- 3.6** Prepare preliminary best practices document. Based on the feedback received from the Commission, the Contractor shall prepare a draft best practices document for review and comment by the EAC Board of Advisors and Standards Board. EAC will convene a meeting or teleconference of the Boards for the discussion of this

document. The Contractor shall provide the document in advance and participate in the meeting to answer questions and record comments.

- 3.7 Revise best practices document for publication in the Federal Register. The Contractor shall revise the document as appropriate to reflect the comments of the EAC, the Board of Advisors and the Standards Board, and prepare the draft best practices for publication in the Federal Register.
- 3.8 Arrange one public hearing for receiving public comment on the best practices. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. The Commission will handle publicity for the meeting.
- 3.9 Prepare final best practices document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise document as appropriate. Provide final version to EAC for adoption.

### **Recount**

- 3.10 Collect and analyze State legislation, administrative procedures, and court cases. An understanding of how recounts of ballots and contests of determinations regarding whether votes are counted in such elections are conducted around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

Topics of particular interest are:

- Type of recount provided by State law: automatic (regardless of margin of victory), candidate initiated, voter initiated, or close election (takes place if the margin of victory falls beneath a prescribed numerical threshold);
- Grounds for contest; persons authorized to contest;
- Application process for requesting a recount;
- Procedures for conducting a recount (detail how votes in such an election are counted in each voting system used);
- Standards for determining whether a vote counted in such an election;
- Procedures for stopping a recount;
- Charges for recount; funding source for conducting a recount;
- Actions by board of election upon discrepancy between initial canvass of votes and results of the recount of ballots

- 3.11 Recommend alternative approaches for future implementation of procedures for recounting ballots and contests of determinations. The Contractor shall conduct a literature review to identify other research results and data available on this topic. Based on their analysis of available research and the results of Task 3.5, the Contractor shall diagnose the problems and challenges of recounts of ballots and contest determination procedures and hypothesize alternative approaches.

- 3.12 Review literature for methodologies used to establish best practices, and develop definitions of what shall constitute a best practice with respect to recounts and

contests of determinations. Utilizing the methodology and definitions developed, identify best practices that are used by States with respect to the recounts and contests described in clause (i) of Section 241b (13)(A) of HAVA.

- 3.13 Identify whether or not there is a need for more consistency among State recount and contest procedures used with respect to elections for Federal office.
- 3.14 Prepare preliminary best practices document. Based on the feedback received from the Commission, the Contractor shall prepare a draft best practices document for review and comment by the EAC Board of Advisors and Standards Board. EAC will convene a meeting or teleconference of the Boards for the discussion of this document. The Contractor shall provide the document in advance and participate in the meeting to answer questions and record comments.
- 3.15 Revise best practices document for publication in the Federal Register. The Contractor shall revise the document as appropriate to reflect the comments of the EAC, the Board of Advisors and the Standards Board, and prepare the draft best practices for publication in the Federal Register.
- 3.16 Arrange one public hearing for receiving public comment on the best practices. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. The Commission will handle publicity for the meeting.
- 3.17 Prepare final best practices document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise document as appropriate. Provide final version to EAC for adoption.

**4.0 CONTRACT TYPE:** The contract type will be a time and materials contract in the amount of \$00,000.

**5.0 PLACE OF PERFORMANCE:** The principal place of performance will be the Contractor's place of business. Meetings and occasional work efforts may also be conducted at the EAC offices.

**6.0 PERIOD OF PERFORMANCE:** The period of performance is from date of award until October 28, 2005.

**7.0 SCHEDULE OF DELIVERABLES:**

- |                                |                             |
|--------------------------------|-----------------------------|
| • Project Plan                 | 10 days after date of award |
| • Progress Reports             | monthly                     |
| • Briefings                    | TBD                         |
| • Study Design and Methodology | TBD                         |
| • Administration of Survey     | TBD                         |
| • Prepare and Analyze Data     | TBD                         |
| • Analysis Report (draft)      | TBD                         |
| • Analysis Report (final)      | TBD                         |

**8.0 INSPECTION AND ACCEPTANCE CRITERIA:** Final inspection and acceptance of all work performed, reports, and other deliverables will be performed at the offices of the EAC.

**9.0 INVOICING:** Invoices may be submitted monthly using Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal. Invoices shall be mailed to the attention of:

Ms. Diana Scott  
Administrative Officer  
U.S. Election Assistance Commission  
1225 New York Avenue, N.W., Suite 1100  
Washington D.C. 20005.

**10.0 ACCOUNTING AND APPROPRIATION DATA:** Funding in the amount of \$00,000 has been allocated to this contract.

**11.0 GENERAL PROVISIONS:**

**11.1 INSPECTION / ACCEPTANCE:** The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The EAC reserves the right to inspect and review any services that have been tendered for acceptance. The EAC may require correction or re-performance of nonconforming services at no increase in contract price. The EAC must exercise its post-acceptance rights within five (5) days after the defect was discovered or should have been discovered.

**11.2 CHANGES:** Changes in the terms and conditions of this contract may be made only by written agreement signed by authorized representatives of both parties.

**11.3 DISPUTES:** This contract is subject to the Contract Disputes Act of 1978, as amended (41 U.S.C. 601-613). The Contractor shall proceed diligently with performance of services, pending final resolution of any dispute arising under the contract.

**11.4 EXCUSABLE DELAYS:** The Contractor shall be liable for defaults unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as acts of God or the public enemy, acts of Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the EAC, in writing, as soon as possible after the beginning of an excusable delay. The Contractor shall explain the basis for the excusable delay, and correct the problem as soon as possible. The Contractor shall notify the EAC, in writing, at the end of the delay.

**11.5 OTHER COMPLIANCES:** The Contractor shall comply with all applicable Federal, State, and local laws, executive orders, rules and regulations applicable to its performance under this contract.

**11.6 COMPLIANCE WITH LAWS UNIQUE TO GOVERNMENT CONTRACTS:** The Contractor agrees to comply with 31 U.S.C. 1352 relating to limitations on the use of appropriated funds to influence certain Federal contracts; 18 U.S.C. 431 relating to

officials not to benefit; 40 U.S.C. 327 et seq., Contract Work Hours and Safety Standards Act; 41 U.S.C. 51-58, Anti-Kickback Act of 1986; 41 U.S.C. 265 and 10 U.S.C. 2409, relating to whistle blower protections, 49 U.S.C. 40118, and 41 U.S.C. 423 relating to procurement integrity.

- 11.7 LIMITATION OF GOVERNMENT LIABILITY:** In performing this contract, the Contractor is not authorized to make expenditures or incur obligations exceeding the total amount of the contract amount.
- 11.8 TERMINATION OF CONVENIENCE:** The EAC, by written notice, may terminate this contract, in whole or in part, when it is in the best interest of the Government. If this contract is terminated, the rights, duties, and obligations of the parties, including compensation to the Contractor, shall be in accordance with Part 49 of the Federal Acquisition Regulations in effect on the date of this contract.

**Subject:** Project documents for your consideration

Paul-

Enclosed please find my revisions to the job description for the Voter Fraud and Voter Intimidation Project Consultant who would work with us to help us define our work around these issues. Please revise/edit and you see fit.

Also enclosed is a draft Statement of Work for EAC project work related to vote counts and vote recounts. I'm hoping that you will be willing to serve as lead Commissioner on this project, since I believe this is an area you have expressed an interest in and are concerned about.

Let me know your thoughts on these documents and how you would like me to proceed.

Hope the weekend was restful, and look forward to seeing you tomorrow.

Regards-

Subject Re: Eagleton press release 

Jeannie,

The news release (latest version) is OK.

I did get cornered by one of our advisory board members in San Diego who asked me why we had hired "left-wing pro-Democrat institutions--Eagleton and Moritz--to do our research". This person was concerned that they would give us biased research and issue a biased report. I told the person that I was monitoring their work closely and they were advised to do balanced work.

Subject Your recommendations for consultants to help frame EAC's  
work on voter fraud and intimidation

Ray-

As was discussed yesterday- you will get me the names of consultants and organizations who you think will be good for us to consider employing as consultants to help us frame our work around voter fraud and intimidation.

Once I have a list of names and resumes, I will work with Tom Wilkey to come up with a recommendation of a consultant or consultants to use on this project.

Thanks for your input.

Subject Voter Fraud

Karen:

Per our discussion, I should have some names later today of possible academic researchers for the voter fraud/voter intimidation study. I assume you are collecting names from the other commissioners as well. Additionally, I ran across the article below in today's Seattle Times...

Wednesday, June 22, 2005, 12:00 A.M. Pacific

## **6 accused of casting multiple votes**

**By Keith Ervin**  
*Seattle Times staff reporter*

Criminal charges have been filed against six more King County voters for allegedly casting more than one ballot under a variety of circumstances in last November's election, prosecutors said yesterday.

Two defendants, William A. Davis of Federal Way and Grace E. Martin of Enumclaw, were accused of casting absentee ballots in the names of their recently deceased spouses, Sonoko Davis and Lawrence Martin, respectively.

A mother and daughter were also charged with casting a ballot in the name of the mother's dead husband. The mother, Harline H.L. Ng, and her daughter, Winnie W.Y. Ng, both of Seattle, signed their names as witnesses to the "X" marked on the ballot of Jacob Ng, who had died in February 2004.

Jared R. Hoadley of Seattle was accused of casting a ballot in the name of Hans Pitzen, who had lived at the same Seattle address as Hoadley and who died last May.

Dustin S. Collings, identified as a homeless Seattle resident, was charged with casting two ballots, both using the alias of Dustin Ocoilain, a name that was listed twice on the voter-registration rolls.

The defendants are charged with repeat voting, a gross misdemeanor that carries possible jail time of up to one year and a fine of up to \$5,000.

026547

Election officials asked prosecutors to investigate the voters after news reporters and a blogger reported that they may have voted twice. The voters will be arraigned July 5 in King County District Court.

Two other voters previously received deferred sentences — and avoided jail time — after they pleaded guilty to charges of repeat voting.

The King County Sheriff's Office is investigating several other cases, prosecutors reported yesterday. The investigations resulted from the intense scrutiny surrounding the governor's election in which Democrat Christine Gregoire defeated Republican Dino Rossi by 129 votes after he narrowly won two earlier vote counts.

After the November election, prosecutors also successfully challenged the voter registrations of 648 felons whose right to vote had not been restored.

## Vote Buying a Way of Life in W.Va. County

By LAWRENCE MESSINA

The Associated Press

Monday, June 20, 2005; 5:09 PM

HAMLIN, W.Va. -- According to political lore, just before John F. Kennedy's momentous win in the 1960 West Virginia primary, the Democratic boss of Logan County asked the Kennedy campaign for "35" \_ meaning \$3,500 \_ to buy votes for the presidential candidate. In an apparent misunderstanding, Kennedy's people delivered \$35,000 in cash in two briefcases.

West Virginia's coal country has a long and rich history of vote-buying \_ which explains why many folks in Lincoln County all but shrugged over the indictment last month of five people on federal charges they secured votes for liquor or a \$20 bill or two.

Sharrell Lovejoy, 83, said he has heard rumors of vote-buying since he opened his Bobcat Restaurant on Hamlin's main drag, in 1948.

"It's gone on for ages," said Lovejoy, behind his diner's hand-cranked register. "I'm sure they're still doing it. They're just more careful about it."

As with past election fraud probes, the latest case targets solely Democrats, who dominate the voter rolls and local governments through the region. In Lincoln County, population 22,100, Democrats outnumber Republicans 4-to-1; the indictment focuses largely on the party's primary elections, going back to 1990.

Not that the GOP has clean hands. Republican former Gov. Arch Moore pleaded guilty to five corruption-related charges in 1990, including one that alleged he spent \$100,000 in unreported campaign cash during his successful 1984 campaign.

"This seems to be something that is just in the blood of people in southern West Virginia. They're always looking for ways to get away with this," said Ken Hechler, who fielded election fraud complaints as West Virginia's secretary of state from 1985 to 2000.

With Hechler's help, a state-federal task force secured more than two dozen election-related

026549

convictions in Mingo County in the 1980s. Ensnared officials included a former sheriff, a county commissioner, a school board president and a Democratic Party chairman.

In the 1990s, politicians in neighboring Logan County found themselves on the defensive. Two state legislators, the county assessor and a Circuit Court judge, among others, went to jail on corruption charges that included vote-buying.

Federal investigators revisited Logan County last year. The sheriff and a city police chief resigned and pleaded guilty to exchanging money for votes. Three other people were convicted on related charges.

The current case targets Circuit Court clerk Greg Stowers, 48, the son of Lincoln County's longtime Democratic Party chairman; his deputy, Clifford Odell "Groundhog" Vance, 49; Jackie David Adkins, 36, a state highway worker; Wandell "Rocky" Adkins, 49, no relation; and Toney "Zeke" Dingess, 34.

All five have pleaded not guilty. The defense alleges that two convicted felons used by the government as informants lied to investigators to avoid stiff sentences on weapons charges.

The defense also says the government used illegal tactics during its investigation, intimidating voters by filming at polling places and trailing voters home. Prosecutors countered that the U.S. Justice Department's Public Integrity Section approved the investigators' techniques.

Prosecutors allege the defendants enlisted precinct captains to pay off voters and hand out slates listing the preferred candidates. Most votes were bought for \$20 apiece, prosecutors said. The indictment also said Stowers drove to Kentucky and filled his pickup truck with booze for distribution to voters during the 1994 primary.

The indictment cites 16 voters who were allegedly paid off. Prosecutors have not said just how many voters, all told, were supposedly bought or how much was spent, but said the conspirators assembled \$25,000 for one election alone to bribe voters.

The evidence includes footage from a hidden camera and microphone that informant Wayne Watts wore during the 2004 primary as he tried to get people to talk about buying votes.

"Man," Watts is heard muttering as he walks away from one group of locals who professed to know nothing about money and candidate lists changing hands, "this ain't no way to run an election."

Subject Meeting with Sen Bennett

History: This message has been replied to.

It was short. He politely asked how things were going, listened for a couple of minutes and then made it clear that his interest was fraud. We never discussed the appropriation even though we all knew why we were there.

The Senator wanted to know what EAC was doing about fraud and if we had authority to do anything about his concerns, which are listed below.

His concerns ran the gamut of over populated voter roles to election officials who cast ballots after the polls close to intimidation of legitimate poll watchers to poorly trained poll workers in Calif whose homes are polling sites and who are therefore entrusted with hundreds of blank ballots but no training. As he said, those were his concerns.

I didn't have a clue that fraud was the hot button topic for the Senator. I think he is supportive of EAC. He didn't say anything to the contrary and wasn't critical of HAVA.

Abbie Platt is the Senator's Leg Asst who sat in on the meeting. It would probably be wise if Julie or Carol followed up with her to discuss our 06 approp and the 4 FTEs. Her number is 202-224-5444.

Subject Public meeting

There are a few needed adjustments to the agenda for the public meeting. Several of the speakers have declined, including Marci Andino, Senator Robson, and Senator Heinold. We are still awaiting confirmation from several other speakers.

Probably the most difficult to replace is Marci Andino, who was asked to speak from the perspective of a state that had both an ID requirement and a statewide voter registration database in 2004. There are only a very few states that had both of those elements: South Carolina, Kentucky, Virginia, and Louisiana. Having heard from Sarah Ball Johnson and knowing that Jean Jensen has been invited to speak on the wireless panel of the VVSG hearing, I recommend that we invite Debbie Hudnall, Clerk of Court, East Feliciana Parish, Louisiana to provide this testimony. Clerks are responsible for training poll workers on all voting requirements, including identifying voters. She can speak on how the new HAVA ID requirement differed from the ID requirement in LA, how she trained poll workers to identify voters, and how the statewide voter registration database played a role in assisting the poll workers in identifying voters.

Upon the recommendation of Secretary Rokita, we invited one of the co-sponsors of the Indiana bill to replace Senator Heinold, specifically Rep. Steve Heim. We are awaiting confirmation on that invitation. A possible alternate for Senator Robson, is Representative Tommy Reynolds, (D-MS).

If we are unable to secure a reasonable number of speakers for the meeting, we can always expand our discussion of the statewide voter registration list guidance which hopefully you all have had an opportunity to read and comment on, or we can ask Eagleton to report on their progress on Voter ID research.

Please let me know as soon as possible if it is acceptable to pursue these alternatives.

Subject Re: Public meeting

Julie:

My first thought is to ask why so many have declined? Is it the distance they have to travel for the brief bit of time they would appear before us?

Is it that they don't want to be on the record?

Is it because they had a previous obligation?

Beyond that, I support anything that gives us the opportunity to hear testimony that addresses different aspects and gives us different perspectives. Assuming other invitees won't decline for the reasons I raised in the questions above.

Subject: Kick-off meeting with the Voting Fraud Project Consultants

Tom and Diana-

This week I'm going to put the finishing touches on the consultant contracts for the three voting fraud/voter intimidation consultants.

I will be sending you the final statement of work for each of them, and the fees schedules for each, based on Diana's calculation of a daily fee for a GS 15.

Once you all sign off, I'd like to push ahead to have the three meet with the Commissioners sometime during the week of September 12.

Let me know if this plan sounds workable and if you have further recommendations about the process.

Thanks

Subject Kick off activities for the EAC Voting fraud/voter intimidation project

Greetings-

Tom Wilkey and I have just completed a series of very informative and productive conversations with each of you and are anxious to move to the next step of this process.

We hope to assemble our consultant team on this project, within the next three weeks and are presently awaiting final approval of your contracts from our Commissioners. We anticipate this will take place in the next week to ten days.

We would like to assemble the team- Steve Ansolabehere of MIT, Tova Wang from The New Century Foundation and Job Serebrov, who has worked extensively on these issues for the State of Arkansas, during the week of September 11. Please get back to us with some tentative dates during that week that might work with your schedule.

We look forward to working with all of you and appreciate your efforts on behalf of the EAC.

Subject Work with Eagleton

I will do what I can to help us reach a meeting of the minds on what "balance" means for the study being conducted by Eagleton. In the meantime, I've asked Tom to discuss same with each of you.

It is important that we work to reach this meeting of the minds before the upcoming meeting with Eagleton. So, I am asking Tom to put this on the agenda for our Sept 6 discussion.

Once we reach agreement, then I think that Tom should share same with Karen so she can know where we are. It is very difficult when staff hears varied points of view from individual commissioners with no commissioner consensus or agreement.

Subject Re: e-mail from Jack Bartling

Hans,

First of all, I do not agree to "deals," especially when it comes to an interpretation of the law. What I did tell you at the time that we discussed this issue was that a plan was already in the works for us to correct our position on the checkbox issue regarding our best practices, and that we would do so when we do another reiteration of our best practices documents. There was no deal to do so immediately. To my knowledge this delay has nothing to do with our Chairman--at least she has never said anything to what you have suggested in your e-mail to me.

The letter from our assistant General Counsel was not a "threat". It is, in fact, a courtesy we are extending to DOJ, since our positions are currently different on this issue. Had DOJ extended the same courtesy to us back when you sent your original letter to AZ, perhaps we would not be in this position. I believe that our staff has taken great pains to have good communications with DOJ on HAVA issues, and that DOJ has not extended to the EAC the same level of courtesy or communication. Perhaps a discussion with John Tanner or his boss is in order.

To assure you that I am not being "railroaded" by anyone on this Commission, I thought I would share the attached internal memos with you regarding the Eagleton contract and others, so that you can see for yourself that I take my job seriously and work to insure that we are getting proper balance in the work that

we receive. Since they are internal, they are for your eyes only. August 19 memo regarding Eagleton.doc

Subject Re: e-mail from Jack Bartling

You and I should talk before any official call. We did not agree that your position was correct. If you will recall, we had a deal where I told you we would consider taking the position you were pushing even though we think it is too strict if you would correct the obviously wrong position on the citizenship checkbox. You agreed to that. However, instead of contacting me and telling me you are pulling out of the deal, I get an email from your assistant counsel threatening DOJ with this letter - with nothing about the citizenship issue. Are you aware that the Arizona AG, SOS, and governor have finally agreed on how to implement the ID rules? Your letter will blow that agreement out of the water. You and I are obviously both angry about this. I suggest a quick phonecall this morning to see if there has been some kind of miscommunication here. The fact that your chairman does not want to do this because she does not want to anger her friends at the league of women voters is no reason for you to be railroaded into this.

Subject: e-mail from Jack Bartling

Hans,

Is the e-mail below from Jack Bartling a product of some phone calls you have made regarding the AZ case? Is it an attempt by you to put pressure on me--and the EAC? If so, I do not appreciate it. As you may know, Donetta and I have scheduled a telephone call with you on Tuesday afternoon to discuss this issue. You are well aware our legal staff has done considerable research on this issue and, if I recall correctly, you told me and Julie Thompson several weeks ago that our position that HAVA requires a state to give someone a provisional ballot, even if they do not show an ID when requesting the provisional ballot, was the correct legal position and HAVA interpretation. You also indicated that the previous DOJ position on this issue was to be withdrawn. We have given Arizona and DOJ all summer to act on this issue to correct the previous position they have taken so that there would not be conflicting interpretations of HAVA by two federal agencies. To me HAVA is very clear on this issue. Our interpretation is a strict interpretation of HAVA. No more--no less. Our opinion also makes its very clear that if a state wants to require an ID for a provisional to be counted, it has every right to do so. If it is you who have contacted Jack, I'm disappointed that you feel you have to resort to this kind of tactics to get us to change our mind. I don't appreciate it. Perhaps if DOJ would have shared their AZ letter with us prior to it being sent, we would not be in this situation.

Paul,

Just heard the EAC is seriously considering taking a position against DOJ on the Arizona issue. Didn't the parties reach a political compromise agreement?

Nonetheless, certainly seems DOJ has it right. What is going on with this?

Jack

August 19, 2005

To Gracia, Ray, Donetta, Tom, Julie, Karen

In his note regarding the Eagleton contract, Hans has raised some of the same concerns I raised from the beginning of any discussions I had regarding this contract with our staff, and at our first formal meeting with Eagleton. In reviewing their work product from time to time, I continue to have concerns about a lack of balanced input and have repeatedly voiced them with staff and with Eagleton. I did this when the initial peer review group was proposed and again during their presentation at our meeting in Pasadena (the outreach slide in their public presentation showed outreach to seven groups, of which only one could be considered conservative-leaning). Now, as I have just had the opportunity to read their July progress report, it appears that Eagleton seems to be going into a larger analysis of the voter fraud issue than was authorized in the contract. My suspicion is that Dan Tokaji is injecting his views into this to dismiss or diminish the concerns some people may have about voter fraud. I could be wrong, but his previous writings lead me to believe otherwise.

I only found one mention of voter fraud in the contract with Eagleton. It is in Section 3.5 regarding provisional voting, where it discusses "minimizing opportunity for voter fraud." Yet, on page 4 of the July progress report from Eagleton, in describing their work plan for the next month it states: "we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms." This clearly seems to be going beyond the mandate we gave them as I thought they were going to be looking at voter fraud relating to provisional voting (as the contract calls for), not voter fraud as it relates to election reforms. While voter fraud was never mentioned in the contract regarding the voter ID issue, page 5 of their July report indicates that their narratives "will include an appraisal of the prevalence and nature of vote fraud." In addition to this, page 6 describes a look into the "relationship between voter ID regime and vote fraud."

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to be studied by the EAC using a balanced group of consultants--not Eagleton and Moritz, who are likely to focus on just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of \$500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions

026562

from congressional staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

Commissioners:

The following items are in the news.

- Fred Lucas of the *Danbury News Times* in Connecticut provides more details on the story involving the state's reaction to EAC's advisory on lever machines. Lucas provides more details on the advisory itself as well as the role of EAC and DOJ in HAVA as follows.

"Lever voting machines were not banned in the federal law. The new ruling is an advisory decision from the commission in response to a question from election officials in Pennsylvania.... Though the commission's rulings do not have the force of legislative decisions, the U.S. Supreme Court has held that administrative commissions carry deferential weight when courts interpret laws.... EAC spokeswoman Jeanie Layson said it's up to the U.S. Department of Justice to decide whether to enforce the ruling. A U.S. Justice Department spokesman on voting matters reached Thursday said he would research the decision, but did not call back and could not be reached later for comment."

- The *Washington Post* and the *New York Times* report on the recommendations released by the Carter-Baker Commission. Among other issues dealing with photo ID, voter identification numbers and registration, the Post mentions recommendations regarding EAC as follows.

"The panel recommended that the U.S. Election Assistance Commission oversee a system to allow easy sharing of state voter databases as well as requiring the use of a uniform identifier -- the voter's Social Security number -- to help eliminate duplicate registrations.... Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission."

Commission on Federal Election Reform: Final Commission Report: Building Confidence in U.S. Elections  
<http://www.american.edu/ia/cfer/>

- Gerald Witt of the *Danville Register and Bee* in Virginia reports on the end of lever machine voting in

026566

Danville, VA. The old lever machines were auctioned off on Saturday. Brian Hancock is quoted as follows.

"In Florida some used them to sink offshore for artificial reefs," said Brian Hancock, research specialist for the U.S. Election Assistance Commission, about the old voting machines that are being replaced by lighter, smaller computerized systems.

- James Quirk of the *Asbury Park Press* reports on fraud allegations contained in a report by the New Jersey Republican State Committee. John Weingart of Eagleton Institute of Politics questions the magnitude of the charges and EAC is mentioned as follows.

"The Eagleton Institute is in the middle of a study with the U.S. Election Assistance Commission to determine both if voter fraud exists on a level that could be prevented with tighter identification requirements at the polls, and if such increased requirements would cause lower-income voters ... usually registered Democrats ... to avoid the polls. So far, Weingart said, there is no data to support either theory."

- The *Toledo Blade* reports on the appointment of Keith Cunningham, director of the Allen County Board of Elections in Ohio to EAC's Board of Advisors.

## Voting machines may be history

<http://news.newstimeslive.com/story.php?id=74485&category=Local>

Federal panel finds Connecticut's lever booths inaccessible to the disabled, prone to error  
By Fred Lucas

THE NEWS-TIMES

Friday, September 16, 2005

Connecticut's voting machines are prone to error, and lack accessibility for disabled and non-English speaking voters. Because of that finding by a federal panel, the state's 3,500 lever machines could be junked before the 2006 election.

They would have to be replaced with new machines that cost between \$5,000 and \$20,000 each.

State officials are scrambling to find out the ruling by the U.S. Election Assistance Commission is binding.

Many don't want to change from the old machines, which have worked fine so far, said Danbury Republican Registrar of Voters Mary Ann Doran.

"These machines do not break down and are dependable," Doran said in defense of the lever machines. "We've had no floating chads. We've had no power outages. These work."

Connecticut is spending \$33 million in federal money to buy new electronic voting machines. The state plans to ensure each polling place in the state has one electronic machine accessible to disabled people, with a Spanish ballot available and a paper voting receipt to ensure accuracy. The 769 new voting machines are supposed to be available in time for the 2006 election.

The new mandates from the federal election panel were issued under the auspices of the 2002 federal Help America Vote Act, or HAVA, passed in light of the debacle of the 2000 presidential race, when massive malfunction of the counting process in Florida the the outcome of the George W. Bush-Al Gore

race into question for two months. The commission was established to implement rules to guarantee voting would be fair and accessible throughout the country.

"The state looks to the EAC to give us guidance in meeting HAVA and they have given us none," said Secretary of the State Susan Bysiewicz Thursday. "The \$33 million is enough to provide one machine per polling place. We don't know if it will be enough to replace the 3,500 lever machines."

Lever voting machines were not banned in the federal law. The new ruling is an advisory decision from the commission in response to a question from election officials in Pennsylvania.

Disability advocates are ready to say good riddance to the lever voting machines, said Danbury resident Chris Kuell, vice president of the state's chapter of the National Federation of the Blind.

"They are not accessible," Kuell said. "The United States has 54 million disabled people. People who are visually impaired, are in a wheelchair, or have problems with motor skills can think and vote, but they can't operate these machines."

Kuell said he was satisfied that Connecticut is at least getting one specific machine per precinct that is accessible, but hopes for the day when every district has more than one.

"California, Nevada, Kentucky and Texas have used electronic voting machines for years," Kuell said. "More states are going to having more accessible machines. This country's government is based on accurate voting and the right to vote."

Though the commission's rulings do not have the force of legislative decisions, the U.S. Supreme Court has held that administrative commissions carry deferential weight when courts interpret laws.

EAC spokeswoman Jeanie Layson said it's up to the U.S. Department of Justice to decide whether to enforce the ruling. A U.S. Justice Department spokesman on voting matters reached Thursday said he would research the decision, but did not call back and could not be reached later for comment.

The EAC decision faulted lever machines for not having a permanent paper record for "audit capacity" of votes.

Also, the machines do not have a documented test to show they have an error rate of less than one in 500,000. Further, the machines are not accessible to the handicapped, and have no alternate language accessibility.

Attorney General Richard Blumenthal said the commission's opinion is only advisory and not binding on any state.

"The authority to decide whether, when, and how to enforce the statute belongs to the Department of Justice," Blumenthal said. "Regarding the central issue – what constitutes an adequate paper trail or audit capacity under the statute – we believe that the DOJ will carefully and objectively consider the Secretary of the State's position, and accept good-faith compliance with the law."

Many local officials hope Blumenthal is right.

"I would like to know how they are going to implement this," said Brookfield Republican Registrar Karen Nindorf. "Who's going to pay for all this? The federal government is good at mandating things and not funding them. This is amazing to me."

Doran, the Danbury registrar, has a problem with forcing cities and towns to have ballots in an alternate language.

"Every voter should read English," Doran said. "How can you be an intelligent voter if you cannot read

English? All the campaign literature is in English."

Under federal law, if a city or town has more than 1 percent of the population that predominantly speaks another language, it must provide a ballot in that language at each polling place. Seven municipalities in Connecticut, including Danbury, must provide ballots in Spanish.

Doran said local officials still do not know for certain what machines the federal government will and won't accept, so it would be tough to know the cost of replacing 42 voting machines.

Newtown has 25 voting machines, one for every 900 people. But with electronic machines, traffic is expected to move slower, as many voters are unfamiliar with the machines. That could mean the town would have to buy 75 machines to replace its lever machines, and that would cost about \$300,000, said Newtown First Selectman Herb Rosenthal, the president of the Connecticut Conference of Municipalities.

Rosenthal, town clerks and registrars of voters will meet with Bysiewicz at 10 a.m. Wednesday to determine how the ruling might affect towns.

"I don't see how we could comply with that now," said Newtown First Selectman Herb Rosenthal, president of the Connecticut Conference of Municipalities. "It's unclear who's going to pay for this. If the federal government tries to force this, I hope the state will try to get an injunction. We've never had a problem with voting as far as I'm concerned and now the federal government says the machines are no good."

## Carter-Baker Panel to Call for Voting Fixes

<http://www.washingtonpost.com/wp-dyn/content/article/2005/09/18/AR2005091801364.html>

Election Report Urges Photo IDs, Paper Trails And Impartial Oversight

By Dan Balz

Washington Post Staff Writer

Monday, September 19, 2005; A03

Warning that public confidence in the nation's election system is flagging, a commission headed by former president Jimmy Carter and former secretary of state James A. Baker III today will call for significant changes in how Americans vote, including photo IDs for all voters, verifiable paper trails for electronic voting machines and impartial administration of elections.

The report concludes that, despite changes required under the Help America Vote Act of 2002, far more must be done to restore integrity to an election system that suffers from sloppy management, treats voters differently not only from state to state but also within states, and that too often frustrates rather than encourages voters' efforts to participate in what is considered a basic American right.

The 2002 federal legislation grew out of the disputed election of 2000 and is not yet fully implemented. But the Carter-Baker commission said that even with some important changes in place, the 2004 election was marred by many of the same errors as the 2000 election. "Had the margin of victory for the [2004] presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated," the report states.

Disputes over the counting of provisional ballots, the accuracy of registration lists, long lines at some polling places, timely administration of absentee ballots and questions about the security of some electronic voting machines tarnished the 2004 elections.

Many complaints came in Ohio, where President Bush narrowly defeated Sen. John F. Kerry (D-Mass.) to secure his reelection victory. Although there has been no credible evidence of partisan manipulation of the election in Ohio, the criticisms there and elsewhere have renewed calls for a more uniform, trustworthy and nonpartisan election system across the country.

Commission leaders say the goal of the panel's 87 recommendations -- at an estimated cost of \$1.35 billion -- is to make participation easier while also enhancing ballot integrity, a careful balancing of the long-standing argument between Democrats and Republicans in the administration of elections.

The most controversial recommendation calls for all voters to produce a standard photo identification card before being allowed to vote. The commission proposes that, by 2010, voters be required to use either the Real ID card, which Congress this spring mandated as the driver's license of the future in all states. For about 12 percent of eligible voters who do not have a driver's license, the commission says states should provide at no cost an identification card that contains the same key information.

Critics of voter ID cards say the requirement could raise privacy issues and intimidate or discourage some Americans, particularly the elderly, the poor and minorities, from participating in elections. To alleviate those concerns, the Carter-Baker commission urges states to make it easy for non-drivers to obtain such cards and seeks measures to ensure privacy and security for all voters. The commission report states that by adopting a uniform voter ID card, minorities would be better protected from shifting identification standards at individual polling places.

Still, the proposed ID card drew sharp dissent from some commissioners, among them former Senate Democratic leader Thomas A. Daschle (S.D.). In a dissent joined by two other commissioners, Daschle likened the ID to a "modern day poll tax."

Both parties engaged in massive voter registration drives in 2004, but inaccurate voter lists produced many of the disputes on Election Day. The 2002 election reform act mandated states to oversee voter lists, but the commission said that some states are still relying too much on the counties to produce the data and called on states to take responsibility for the lists' accuracy.

The 2002 act required the use of provisional ballots for any eligible voter who shows up at a polling place but whose name is not on a registration list, but the 2004 election produced disparate standards for determining which of those ballots were counted. Alaska counted 97 percent of its provisional ballots, but Delaware counted 6 percent, according to the commission. The group recommends that states set uniform standards.

Approximately 9 million Americans move from one state to another in any given year. The commission cited news reports asserting that almost 46,000 voters from New York City were also registered in Florida. The panel recommended that the U.S. Election Assistance Commission oversee a system to allow easy sharing of state voter databases as well as requiring the use of a uniform identifier -- the voter's Social Security number -- to help eliminate duplicate registrations.

The Florida recount in 2000 etched the image of the "hanging chad" in the minds of many Americans and spurred the shift to electronic, rather than paper, ballots. But flaws in these new computerized systems have led to doubts about their accuracy. The commission calls on Congress to require that all electronic machines include the capacity for a paper trail that voters can use to verify their vote. Beyond that, to alleviate concerns that machines can be maliciously programmed or hacked, the commission calls for new standards to verify that machines are secure.

Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission.

The integrity of the Ohio system was challenged in part because the chief election official, Secretary of State J. Kenneth Blackwell, also served as the Ohio co-chairman for the Bush-Cheney campaign.

The commission also included other recommendations that have been proposed before, including free television time for political candidates, a request that broadcast networks refrain from projecting any results until the polls have closed in the 48 contiguous states and that both parties shift to a system of four regional primaries to pick their nominees.

The Commission on Federal Election Reform was created under the auspices of American University's Center for Democracy and Election Management. The group was funded by several foundations, and Robert A. Pastor of American University served as executive director. Its membership included Republicans, Democrats and independents.

## Bipartisan commission proposes election reforms

<http://www.contracostatimes.com/mld/cctimes/news/12684624.htm>

Posted on Mon, Sep. 19, 2005

By David E. Rosenbaum

NEW YORK TIMES

WASHINGTON - A private commission led by former President Jimmy Carter and former Secretary of State James Baker is proposing new steps to strengthen state election procedures and recommending that Congress require the political parties to hold four regional presidential primaries in election years rather than allowing states to hold primaries whenever they wish.

The bipartisan panel, called the Commission on Federal Election Reform, said it was responding to flaws in the system exposed by the elections of 2000 and 2004.

"We should have an electoral system where registering to vote is convenient, voting is efficient and pleasant, voting machines work properly, fraud is deterred and disputes are handled fairly and expeditiously," the commission declared.

Carter and Baker, a top official under presidents Ronald Reagan and George H.W. Bush, plan to deliver the report today to President Bush and congressional leaders.

It went to news organizations last week with the understanding that the material would not be published until today.

"The American people are losing confidence in the system, and they want electoral reform," Carter said in a statement.

These are the main recommendations:

- States, not local jurisdictions, should be in charge of voter registration, and registration lists in different states should be interconnected so voters could be purged automatically from the rolls in one state when they registered in another.
- Voters should be required to present photo ID cards at the polls, and states should provide free cards to voters without driver's licenses.
- States should make registration and voting more convenient with such innovations as mobile registration vans and voting by mail and on the Internet.

026573

- Electronic voting machines should make paper copies for auditing.
- In presidential election years, after the Iowa caucuses and New Hampshire primaries, the other states should hold regional primaries and caucuses at monthly intervals in March, April, May and June, with the order rotated.

The recommendations sought to strike a balance between the parties' priorities. Republicans worry about voter fraud and favor photo IDs. Democrats support easier registration and ballot access.

In the aftermath of the debacle in Florida in 2000, which put the outcome of the presidential election in doubt for more than a month, a public commission headed by Carter and former President Gerald Ford recommended an overhaul of the nation's election system.

Many of the commission's proposals, including provisional ballots for those whose eligibility was challenged, became part of the Help America Vote Act, which Congress approved and Bush signed in 2002.

But the 2004 election exposed more flaws.

Some election offices did not properly process registration applications or mail absentee ballots on time. There were reports of voter intimidation and complaints that registration lists had been improperly purged. Computers malfunctioned. Evidence of voter fraud arose.

Accusations of fraud and misconduct were rife after the race for governor in Washington. Christine Gregoire finished ahead by 129 votes, and the legal challenge was not resolved until June.

Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission.

The integrity of the Ohio system in 2004 was challenged in part because the chief election official, Secretary of State Kenneth Blackwell, also served as the Ohio co-chairman for the Bush-Cheney campaign.

The new panel was organized by American University to address those problems. Its 21 members include politicians from both parties and others with elections experience.

In the 2004 campaign, state primaries and caucuses were held earlier than ever, and the nominees were effectively chosen by March.

Everything happens so quickly now in primary campaigns, the commission asserted, that "most Americans have no say in the selection of presidential nominees."

The commission said it was worthwhile for Iowa and New Hampshire to continue to vote first because "they test the candidates by genuine retail, door-to-door campaigning."

But four regional contests afterward, the panel said, would "expand participation in the process" and "give voters the chance to closely evaluate the presidential candidates over a three- to four-month period."

By GERALD WITT  
Register & Bee staff writer  
Monday, September 19, 2005

DANVILLE, Va. - Some of them wind up at the bottom of the ocean, but Danville is going to auction its retired voting machines on Saturday.

Since the 2002 Help America Vote Act requires localities to get updated polling systems, the question of what to do with the old lever machines arises.

"In Florida some used them to sink offshore for artificial reefs," said Brian Hancock, research specialist for the U.S. Election Assistance Commission, about the old voting machines that are being replaced by lighter, smaller computerized systems.

For their part, Danville officials hope to sell the city's 46 machines - alongside old fleet cars, a bus, dump trucks and lawn mowers - at a surplus auction at 10 a.m. on Sep. 24.

The voting machines are the same behemoths with curtains that were bought in 1957 and used for decades in the city, according to David Parrish, management analyst for Danville.

"They stopped making the machines in 1980," Parrish said. "And I've seen pictures of other machines that are from the '50s and '60s that are identical to what we have."

Manufactured by Automatic Voting Machine Corp. of Jamestown, N.Y., the lever machines were used in elections throughout the United States by the mid-1900s.

In 1944 the company's advertising claimed that 12 million voters used their machines, according to a Web site maintained by Douglas W. Jones, associate professor for the University of Iowa's Department of Computer Science and a principal investigator with ACCURATE - A Center for Correct, Usable, Reliable, Auditable and Transparent Elections, funded by the National Science Foundation.

When the machines were taken out of production they were cannibalized for parts. Some of Danville's units are refurbished with those parts, Parrish said.

But after the 2000 election and the following HAVA legislation, the machines had to go. The lever machines were last used in Danville for the 2004 election, he said. They still contain cards showing presidential candidates George W. Bush and John Kerry.

When expanded, the machines are about 7 feet tall and weigh more than 500 pounds. The new electronic touch-screen polling machines can fit in a suitcase.

As the old ones are removed from service, they end up being used in a number of ways. Most are just trashed, Parrish said, suggesting that they could be stripped to make a small workstation or other enclosed space.

Given some creativity, the lighted units could have a variety of second lives.

Or a history buff could show up at the Danville auction and have one loaded on a truck as a memento of one hotly contested election.

"In 10, 15 or 20 years there's not going to be very many of them left at all," Parrish said. "Everybody's getting rid of them."

No opening bid has been set, but it seems the machines may go cheap.

026575

"If they don't sell, we'll call up Florida and see if they want some more reefs," he said.

## County election boards question voter-fraud study

<http://www.app.com/apps/pbcs.dll/article?AID=/20050917/NEWS/50917001>

Published in the Asbury Park Press 09/17/05

BY JAMES A. QUIRK  
FREEHOLD BUREAU

The Monmouth and Ocean County boards of elections are questioning the findings of a study by the Republican State Committee that alleges potentially widespread voter fraud, including a claim that 4,755 votes were cast throughout the state last November in the names of dead people.

Officials with both boards say they want the committee's data for their own verification purposes. They said Friday that they have received no response from the state GOP committee.

At a Trenton press conference Thursday, Republican State Committee Chairman Tom Wilson said that in the 2004 election, 92 double votes were cast in Monmouth County, and 450 votes were cast in the names of those who are dead.

In Ocean County, Wilson said, the GOP study found that 79 people voted twice<sup>11</sup> and that 271 votes were cast in the names of dead people. The study found that overall, 6,572 people registered in both New Jersey and another state appeared to have voted twice in the 2004 election.

"We haven't seen that in Ocean County, that kind of duplicate voting," said Robert Giles, executive supervisor of the Ocean County Board of Elections. "The occasional duplication that may happen is a person getting an absentee ballot, not thinking they sent it, and sending a second . . . We want to see if this is just a misinterpretation of data."

Wilson said the committee has so far verified only "a handful" of the names of duplicate or dead voters that emerged from its study. Despite this, Wilson said he stands behind the study's findings.

"We gave (the state Attorney General's Office) close to 20,000 cases where double ballots were cast," Wilson said. "That's fraud ... you can't vote twice" or if you're dead.

An Asbury Park Press review of 697,000 active voters in Monmouth and Ocean counties found that 794 shared the same names and dates of birth. Of those 794, five appeared to have voted twice ... once in Monmouth and once in Ocean ... during the 2004 presidential election.

But those voters could have been different individuals who just happened to share the same names and birthdays. For example, one woman in Ocean County lived at the same address with a man who was most likely her husband. But in Monmouth County, a woman with the same name had a spouse with a different first name and age.

Both Wilson and Steve Berlin, a consultant for the Republican State Committee who formulated most of the voter data, said the limited depth of their study did not reveal a clear pattern of statewide voter fraud.

"But what we did find presented a whole room of smoke, and we brought it to (state Attorney General) Peter Harvey and asked if there's any fire there," Wilson said.

Lee Moore, a spokesman for Harvey, would only say that the Attorney General's Office is looking into the

GOP committee's allegations.

"Once we have assessed the situation, the determination will be made as to what, if any, action is required," Moore said.

Officials admit there are flaws in New Jersey's county voter registration rolls and the general election process. For example, Franklin Goldstein, administrative assistant with the Monmouth County Board of Elections, said people often do not notify the county when a loved one dies, so the deceased may remain on the county's voter registration roll for years as "inactive" until that person is verified as dead.

The same problem exists when people move from one county to another without informing the county they've left, Giles said. This problem should be eliminated, he said, when New Jersey moves to a statewide registration system, which is to happen in January, as required by the federal Help America Vote Act.

Even with these problems, John Weingart, associate director at the Eagleton Institute of Politics at Rutgers University and a former state Department of Environmental Protection assistant commissioner, said the GOP committee's finding of 54,601 duplicate voters, 4,397 double votes and 4,755 votes cast in the names of dead people is "a dramatic allegation" that's hard to believe.

The Eagleton Institute is in the middle of a study with the U.S. Election Assistance Commission to determine both if voter fraud exists on a level that could be prevented with tighter identification requirements at the polls, and if such increased requirements would cause lower-income voters ... usually registered Democrats ... to avoid the polls. So far, Weingart said, there is no data to support either theory.

"The notion that a lot of people would get together and figure out a way to vote more than once, all for a specific candidate, and have no one know about it, is hard to picture," Weingart said.

Investigations editor Paul D'Ambrosio contributed to this story.

## Allen elections director named to U.S. vote panel

<http://toledoblade.com/apps/pbcs.dll/article?AID=/20050919/NEWS09/50919010/-1/NEWS>

Article published September 19, 2005

The Toledo Blade

LIMA, Ohio – Keith Cunningham, director of the Allen County Board of Elections, has been appointed to a two-year term on the board of advisers of the U.S. Election Assistance Commission.

The 37-member commission, which was created by the Help America Vote Act of 2002, serves as a national clearinghouse and a resource for information and review of procedures relating to the administration of federal elections.

Mr. Cunningham has been director of the Allen County elections board since 1998 and is president of the Ohio Association of Election Officials.

Commissioners:

The following items are in the news.

- Fred Lucas of the *Danbury News Times* in Connecticut provides more details on the story involving the state's reaction to EAC's advisory on lever machines. Lucas provides more details on the

026578

advisory itself as well as the role of EAC and DOJ in HAVA as follows.

"Lever voting machines were not banned in the federal law. The new ruling is an advisory decision from the commission in response to a question from election officials in Pennsylvania.... Though the commission's rulings do not have the force of legislative decisions, the U.S. Supreme Court has held that administrative commissions carry deferential weight when courts interpret laws.... EAC spokeswoman Jeanie Layson said it's up to the U.S. Department of Justice to decide whether to enforce the ruling. A U.S. Justice Department spokesman on voting matters reached Thursday said he would research the decision, but did not call back and could not be reached later for comment."

- The *Washington Post* and the *New York Times* report on the recommendations released by the Carter-Baker Commission. Among other issues dealing with photo ID, voter identification numbers and registration, the Post mentions recommendations regarding EAC as follows.

"The panel recommended that the U.S. Election Assistance Commission oversee a system to allow easy sharing of state voter databases as well as requiring the use of a uniform identifier -- the voter's Social Security number -- to help eliminate duplicate registrations.... Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission."

Commission on Federal Election Reform: Final Commission Report: Building Confidence in U.S. Elections  
<http://www.american.edu/ia/cfer/>

- Gerald Witt of the *Danville Register and Bee* in Virginia reports on the end of lever machine voting in Danville, VA. The old lever machines were auctioned off on Saturday. Brian Hancock is quoted as follows.

"In Florida some used them to sink offshore for artificial reefs," said Brian Hancock, research specialist for the U.S. Election Assistance Commission, about the old voting machines that are being replaced by lighter, smaller computerized systems.

- James Quirk of the *Asbury Park Press* reports on fraud allegations contained in a report by the New Jersey Republican State Committee. John Weingart of Eagleton Institute of Politics questions the magnitude of the charges and EAC is mentioned as follows.

"The Eagleton Institute is in the middle of a study with the U.S. Election Assistance Commission to determine both if voter fraud exists on a level that could be prevented with tighter identification requirements at the polls, and if such increased requirements would cause lower-income voters ... usually registered Democrats ... to avoid the polls. So far, Weingart said, there is no data to support either theory."

- The *Toledo Blade* reports on the appointment of Keith Cunningham, director of the Allen County Board of Elections in Ohio to EAC's Board of Advisors.

## Voting machines may be history

<http://news.newstimeslive.com/story.php?id=74485&category=Local>

Federal panel finds Connecticut's lever booths inaccessible to the disabled, prone to error  
By Fred Lucas

THE NEWS-TIMES

026579

Friday, September 16, 2005

Connecticut's voting machines are prone to error, and lack accessibility for disabled and non-English speaking voters.

Because of that finding by a federal panel, the state's 3,500 lever machines could be junked before the 2006 election.

They would have to be replaced with new machines that cost between \$5,000 and \$20,000 each.

State officials are scrambling to find out the ruling by the U.S. Election Assistance Commission is binding.

Many don't want to change from the old machines, which have worked fine so far, said Danbury Republican Registrar of Voters Mary Ann Doran.

"These machines do not break down and are dependable," Doran said in defense of the lever machines. "We've had no floating chads. We've had no power outages. These work."

Connecticut is spending \$33 million in federal money to buy new electronic voting machines. The state plans to ensure each polling place in the state has one electronic machine accessible to disabled people, with a Spanish ballot available and a paper voting receipt to ensure accuracy. The 769 new voting machines are supposed to be available in time for the 2006 election.

The new mandates from the federal election panel were issued under the auspices of the 2002 federal Help America Vote Act, or HAVA, passed in light of the debacle of the 2000 presidential race, when massive malfunction of the counting process in Florida the the outcome of the George W. Bush-Al Gore race into question for two months. The commission was established to implement rules to guarantee voting would be fair and accessible throughout the country.

"The state looks to the EAC to give us guidance in meeting HAVA and they have given us none," said Secretary of the State Susan Bysiewicz Thursday. "The \$33 million is enough to provide one machine per polling place. We don't know if it will be enough to replace the 3,500 lever machines."

Lever voting machines were not banned in the federal law. The new ruling is an advisory decision from the commission in response to a question from election officials in Pennsylvania.

Disability advocates are ready to say good riddance to the lever voting machines, said Danbury resident Chris Kuell, vice president of the state's chapter of the National Federation of the Blind.

"They are not accessible," Kuell said. "The United States has 54 million disabled people. People who are visually impaired, are in a wheelchair, or have problems with motor skills can think and vote, but they can't operate these machines."

Kuell said he was satisfied that Connecticut is at least getting one specific machine per precinct that is accessible, but hopes for the day when every district has more than one.

"California, Nevada, Kentucky and Texas have used electronic voting machines for years," Kuell said. "More states are going to having more accessible machines. This country's government is based on accurate voting and the right to vote."

Though the commission's rulings do not have the force of legislative decisions, the U.S. Supreme Court has held that administrative commissions carry deferential weight when courts interpret laws.

EAC spokeswoman Jeanie Layson said it's up to the U.S. Department of Justice to decide whether to enforce the ruling. A U.S. Justice Department spokesman on voting matters reached Thursday said he

would research the decision, but did not call back and could not be reached later for comment.

The EAC decision faulted lever machines for not having a permanent paper record for "audit capacity" of votes.

Also, the machines do not have a documented test to show they have an error rate of less than one in 500,000. Further, the machines are not accessible to the handicapped, and have no alternate language accessibility.

Attorney General Richard Blumenthal said the commission's opinion is only advisory and not binding on any state.

"The authority to decide whether, when, and how to enforce the statute belongs to the Department of Justice," Blumenthal said. "Regarding the central issue – what constitutes an adequate paper trail or audit capacity under the statute – we believe that the DOJ will carefully and objectively consider the Secretary of the State's position, and accept good-faith compliance with the law."

Many local officials hope Blumenthal is right.

"I would like to know how they are going to implement this," said Brookfield Republican Registrar Karen Nindorf. "Who's going to pay for all this? The federal government is good at mandating things and not funding them. This is amazing to me."

Doran, the Danbury registrar, has a problem with forcing cities and towns to have ballots in an alternate language.

"Every voter should read English," Doran said. "How can you be an intelligent voter if you cannot read English? All the campaign literature is in English."

Under federal law, if a city or town has more than 1 percent of the population that predominantly speaks another language, it must provide a ballot in that language at each polling place. Seven municipalities in Connecticut, including Danbury, must provide ballots in Spanish.

Doran said local officials still do not know for certain what machines the federal government will and won't accept, so it would be tough to know the cost of replacing 42 voting machines.

Newtown has 25 voting machines, one for every 900 people. But with electronic machines, traffic is expected to move slower, as many voters are unfamiliar with the machines. That could mean the town would have to buy 75 machines to replace its lever machines, and that would cost about \$300,000, said Newtown First Selectman Herb Rosenthal, the president of the Connecticut Conference of Municipalities.

Rosenthal, town clerks and registrars of voters will meet with Bysiewicz at 10 a.m. Wednesday to determine how the ruling might affect towns.

"I don't see how we could comply with that now," said Newtown First Selectman Herb Rosenthal, president of the Connecticut Conference of Municipalities. "It's unclear who's going to pay for this. If the federal government tries to force this, I hope the state will try to get an injunction. We've never had a problem with voting as far as I'm concerned and now the federal government says the machines are no good."

## Carter-Baker Panel to Call for Voting Fixes

<http://www.washingtonpost.com/wp-dyn/content/article/2005/09/18/AR2005091801364.html>

Election Report Urges Photo IDs, Paper Trails And Impartial Oversight

By Dan Balz  
Washington Post Staff Writer  
Monday, September 19, 2005; A03

Warning that public confidence in the nation's election system is flagging, a commission headed by former president Jimmy Carter and former secretary of state James A. Baker III today will call for significant changes in how Americans vote, including photo IDs for all voters, verifiable paper trails for electronic voting machines and impartial administration of elections.

The report concludes that, despite changes required under the Help America Vote Act of 2002, far more must be done to restore integrity to an election system that suffers from sloppy management, treats voters differently not only from state to state but also within states, and that too often frustrates rather than encourages voters' efforts to participate in what is considered a basic American right.

The 2002 federal legislation grew out of the disputed election of 2000 and is not yet fully implemented. But the Carter-Baker commission said that even with some important changes in place, the 2004 election was marred by many of the same errors as the 2000 election. "Had the margin of victory for the [2004] presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated," the report states.

Disputes over the counting of provisional ballots, the accuracy of registration lists, long lines at some polling places, timely administration of absentee ballots and questions about the security of some electronic voting machines tarnished the 2004 elections.

Many complaints came in Ohio, where President Bush narrowly defeated Sen. John F. Kerry (D-Mass.) to secure his reelection victory. Although there has been no credible evidence of partisan manipulation of the election in Ohio, the criticisms there and elsewhere have renewed calls for a more uniform, trustworthy and nonpartisan election system across the country.

Commission leaders say the goal of the panel's 87 recommendations -- at an estimated cost of \$1.35 billion -- is to make participation easier while also enhancing ballot integrity, a careful balancing of the long-standing argument between Democrats and Republicans in the administration of elections.

The most controversial recommendation calls for all voters to produce a standard photo identification card before being allowed to vote. The commission proposes that, by 2010, voters be required to use either the Real ID card, which Congress this spring mandated as the driver's license of the future in all states. For about 12 percent of eligible voters who do not have a driver's license, the commission says states should provide at no cost an identification card that contains the same key information.

Critics of voter ID cards say the requirement could raise privacy issues and intimidate or discourage some Americans, particularly the elderly, the poor and minorities, from participating in elections. To alleviate those concerns, the Carter-Baker commission urges states to make it easy for non-drivers to obtain such cards and seeks measures to ensure privacy and security for all voters. The commission report states that by adopting a uniform voter ID card, minorities would be better protected from shifting identification standards at individual polling places.

Still, the proposed ID card drew sharp dissent from some commissioners, among them former Senate Democratic leader Thomas A. Daschle (S.D.). In a dissent joined by two other commissioners, Daschle likened the ID to a "modern day poll tax."

Both parties engaged in massive voter registration drives in 2004, but inaccurate voter lists produced many of the disputes on Election Day. The 2002 election reform act mandated states to oversee voter lists, but the commission said that some states are still relying too much on the counties to produce the data and called on states to take responsibility for the lists' accuracy.

The 2002 act required the use of provisional ballots for any eligible voter who shows up at a polling place but whose name is not on a registration list, but the 2004 election produced disparate standards for determining which of those ballots were counted. Alaska counted 97 percent of its provisional ballots, but Delaware counted 6 percent, according to the commission. The group recommends that states set uniform standards.

Approximately 9 million Americans move from one state to another in any given year. The commission cited news reports asserting that almost 46,000 voters from New York City were also registered in Florida. The panel recommended that the U.S. Election Assistance Commission oversee a system to allow easy sharing of state voter databases as well as requiring the use of a uniform identifier -- the voter's Social Security number -- to help eliminate duplicate registrations.

The Florida recount in 2000 etched the image of the "hanging chad" in the minds of many Americans and spurred the shift to electronic, rather than paper, ballots. But flaws in these new computerized systems have led to doubts about their accuracy. The commission calls on Congress to require that all electronic machines include the capacity for a paper trail that voters can use to verify their vote. Beyond that, to alleviate concerns that machines can be maliciously programmed or hacked, the commission calls for new standards to verify that machines are secure.

Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission. The integrity of the Ohio system was challenged in part because the chief election official, Secretary of State J. Kenneth Blackwell, also served as the Ohio co-chairman for the Bush-Cheney campaign.

The commission also included other recommendations that have been proposed before, including free television time for political candidates, a request that broadcast networks refrain from projecting any results until the polls have closed in the 48 contiguous states and that both parties shift to a system of four regional primaries to pick their nominees.

The Commission on Federal Election Reform was created under the auspices of American University's Center for Democracy and Election Management. The group was funded by several foundations, and Robert A. Pastor of American University served as executive director. Its membership included Republicans, Democrats and independents.

## Bipartisan commission proposes election reforms

<http://www.contracostatimes.com/mld/cctimes/news/12684624.htm>

Posted on Mon, Sep. 19, 2005

By David E. Rosenbaum

NEW YORK TIMES

WASHINGTON - A private commission led by former President Jimmy Carter and former Secretary of State James Baker is proposing new steps to strengthen state election procedures and recommending that Congress require the political parties to hold four regional presidential primaries in election years rather than allowing states to hold primaries whenever they wish.

The bipartisan panel, called the Commission on Federal Election Reform, said it was responding to flaws in the system exposed by the elections of 2000 and 2004.

"We should have an electoral system where registering to vote is convenient, voting is efficient and pleasant, voting machines work properly, fraud is deterred and disputes are handled fairly and expeditiously," the commission declared.

Carter and Baker, a top official under presidents Ronald Reagan and George H.W. Bush, plan to deliver the report today to President Bush and congressional leaders.

It went to news organizations last week with the understanding that the material would not be published until today.

"The American people are losing confidence in the system, and they want electoral reform," Carter said in a statement.

These are the main recommendations:

- States, not local jurisdictions, should be in charge of voter registration, and registration lists in different states should be interconnected so voters could be purged automatically from the rolls in one state when they registered in another.
- Voters should be required to present photo ID cards at the polls, and states should provide free cards to voters without driver's licenses.
- States should make registration and voting more convenient with such innovations as mobile registration vans and voting by mail and on the Internet.
- Electronic voting machines should make paper copies for auditing.
- In presidential election years, after the Iowa caucuses and New Hampshire primaries, the other states should hold regional primaries and caucuses at monthly intervals in March, April, May and June, with the order rotated.

The recommendations sought to strike a balance between the parties' priorities. Republicans worry about voter fraud and favor photo IDs. Democrats support easier registration and ballot access.

In the aftermath of the debacle in Florida in 2000, which put the outcome of the presidential election in doubt for more than a month, a public commission headed by Carter and former President Gerald Ford recommended an overhaul of the nation's election system.

Many of the commission's proposals, including provisional ballots for those whose eligibility was challenged, became part of the Help America Vote Act, which Congress approved and Bush signed in 2002.

But the 2004 election exposed more flaws.

Some election offices did not properly process registration applications or mail absentee ballots on time. There were reports of voter intimidation and complaints that registration lists had been improperly purged. Computers malfunctioned. Evidence of voter fraud arose.

Accusations of fraud and misconduct were rife after the race for governor in Washington. Christine Gregoire finished ahead by 129 votes, and the legal challenge was not resolved until June.

Another change designed to restore confidence in elections calls for moving to nonpartisan and independent administration of elections, in the states and on the U.S. Election Assistance Commission.

The integrity of the Ohio system in 2004 was challenged in part because the chief election official, Secretary of State Kenneth Blackwell, also served as the Ohio co-chairman for the Bush-Cheney campaign.

The new panel was organized by American University to address those problems. Its 21 members include politicians from both parties and others with elections experience.

In the 2004 campaign, state primaries and caucuses were held earlier than ever, and the nominees were effectively chosen by March.

Everything happens so quickly now in primary campaigns, the commission asserted, that "most Americans have no say in the selection of presidential nominees."

The commission said it was worthwhile for Iowa and New Hampshire to continue to vote first because "they test the candidates by genuine retail, door-to-door campaigning."

But four regional contests afterward, the panel said, would "expand participation in the process" and "give voters the chance to closely evaluate the presidential candidates over a three- to four-month period."

## Wanna buy a bus? A voting booth?

[http://www.registerbee.com/servlet/Satellite?pagename=DRB/MGArticle/DRB\\_BasicArticle&c=MGArticle&cid=1031785144388](http://www.registerbee.com/servlet/Satellite?pagename=DRB/MGArticle/DRB_BasicArticle&c=MGArticle&cid=1031785144388)

By GERALD WITT  
Register & Bee staff writer  
Monday, September 19, 2005

DANVILLE, Va. - Some of them wind up at the bottom of the ocean, but Danville is going to auction its retired voting machines on Saturday.

Since the 2002 Help America Vote Act requires localities to get updated polling systems, the question of what to do with the old lever machines arises.

"In Florida some used them to sink offshore for artificial reefs," said Brian Hancock, research specialist for the U.S. Election Assistance Commission, about the old voting machines that are being replaced by lighter, smaller computerized systems.

For their part, Danville officials hope to sell the city's 46 machines - alongside old fleet cars, a bus, dump trucks and lawn mowers - at a surplus auction at 10 a.m. on Sep. 24.

The voting machines are the same behemoths with curtains that were bought in 1957 and used for decades in the city, according to David Parrish, management analyst for Danville.

"They stopped making the machines in 1980," Parrish said. "And I've seen pictures of other machines that are from the '50s and '60s that are identical to what we have."

Manufactured by Automatic Voting Machine Corp. of Jamestown, N.Y., the lever machines were used in elections throughout the United States by the mid-1900s.

In 1944 the company's advertising claimed that 12 million voters used their machines, according to a Web

site maintained by Douglas W. Jones, associate professor for the University of Iowa's Department of Computer Science and a principal investigator with ACCURATE - A Center for Correct, Usable, Reliable, Auditable and Transparent Elections, funded by the National Science Foundation.

When the machines were taken out of production they were cannibalized for parts. Some of Danville's units are refurbished with those parts, Parrish said.

But after the 2000 election and the following HAVA legislation, the machines had to go. The lever machines were last used in Danville for the 2004 election, he said. They still contain cards showing presidential candidates George W. Bush and John Kerry.

When expanded, the machines are about 7 feet tall and weigh more than 500 pounds. The new electronic touch-screen polling machines can fit in a suitcase.

As the old ones are removed from service, they end up being used in a number of ways. Most are just trashed, Parrish said, suggesting that they could be stripped to make a small workstation or other enclosed space.

Given some creativity, the lighted units could have a variety of second lives.

Or a history buff could show up at the Danville auction and have one loaded on a truck as a memento of one hotly contested election.

"In 10, 15 or 20 years there's not going to be very many of them left at all," Parrish said. "Everybody's getting rid of them."

No opening bid has been set, but it seems the machines may go cheap.

"If they don't sell, we'll call up Florida and see if they want some more reefs," he said.

## County election boards question voter-fraud study

<http://www.app.com/apps/pbcs.dll/article?AID=/20050917/NEWS/50917001>

Published in the Asbury Park Press 09/17/05  
BY JAMES A. QUIRK  
FREEHOLD BUREAU

The Monmouth and Ocean County boards of elections are questioning the findings of a study by the Republican State Committee that alleges potentially widespread voter fraud, including a claim that 4,755 votes were cast throughout the state last November in the names of dead people.

Officials with both boards say they want the committee's data for their own verification purposes. They said Friday that they have received no response from the state GOP committee.

At a Trenton press conference Thursday, Republican State Committee Chairman Tom Wilson said that in the 2004 election, 92 double votes were cast in Monmouth County, and 450 votes were cast in the names of those who are dead.

In Ocean County, Wilson said, the GOP study found that 79 people voted twice<sup>11</sup> and that 271 votes were cast in the names of dead people. The study found that overall, 6,572 people registered in both New Jersey and another state appeared to have voted twice in the 2004 election.

"We haven't seen that in Ocean County, that kind of duplicate voting," said Robert Giles, executive supervisor of the Ocean County Board of Elections. "The occasional duplication that may happen is a person getting an absentee ballot, not thinking they sent it, and sending a second . . . We want to see if this is just a misinterpretation of data."

Wilson said the committee has so far verified only "a handful" of the names of duplicate or dead voters that emerged from its study. Despite this, Wilson said he stands behind the study's findings.

"We gave (the state Attorney General's Office) close to 20,000 cases where double ballots were cast," Wilson said. "That's fraud ... you can't vote twice" or if you're dead.

An Asbury Park Press review of 697,000 active voters in Monmouth and Ocean counties found that 794 shared the same names and dates of birth. Of those 794, five appeared to have voted twice ... once in Monmouth and once in Ocean ... during the 2004 presidential election.

But those voters could have been different individuals who just happened to share the same names and birthdays. For example, one woman in Ocean County lived at the same address with a man who was most likely her husband. But in Monmouth County, a woman with the same name had a spouse with a different first name and age.

Both Wilson and Steve Berlin, a consultant for the Republican State Committee who formulated most of the voter data, said the limited depth of their study did not reveal a clear pattern of statewide voter fraud.

"But what we did find presented a whole room of smoke, and we brought it to (state Attorney General) Peter Harvey and asked if there's any fire there," Wilson said.

Lee Moore, a spokesman for Harvey, would only say that the Attorney General's Office is looking into the GOP committee's allegations.

"Once we have assessed the situation, the determination will be made as to what, if any, action is required," Moore said.

Officials admit there are flaws in New Jersey's county voter registration rolls and the general election process. For example, Franklin Goldstein, administrative assistant with the Monmouth County Board of Elections, said people often do not notify the county when a loved one dies, so the deceased may remain on the county's voter registration roll for years as "inactive" until that person is verified as dead.

The same problem exists when people move from one county to another without informing the county they've left, Giles said. This problem should be eliminated, he said, when New Jersey moves to a statewide registration system, which is to happen in January, as required by the federal Help America Vote Act.

Even with these problems, John Weingart, associate director at the Eagleton Institute of Politics at Rutgers University and a former state Department of Environmental Protection assistant commissioner, said the GOP committee's finding of 54,601 duplicate voters, 4,397 double votes and 4,755 votes cast in the names of dead people is "a dramatic allegation" that's hard to believe.

The Eagleton Institute is in the middle of a study with the U.S. Election Assistance Commission to determine both if voter fraud exists on a level that could be prevented with tighter identification requirements at the polls, and if such increased requirements would cause lower-income voters ... usually registered Democrats ... to avoid the polls. So far, Weingart said, there is no data to support either theory.

"The notion that a lot of people would get together and figure out a way to vote more than once, all for a specific candidate, and have no one know about it, is hard to picture," Weingart said.

Investigations editor Paul D'Ambrosio contributed to this story.

## Allen elections director named to U.S. vote panel

<http://toledoblade.com/apps/pbcs.dll/article?AID=/20050919/NEWS09/50919010/-1/NEWS>

Article published September 19, 2005

The Toledo Blade

LIMA, Ohio – Keith Cunningham, director of the Allen County Board of Elections, has been appointed to a two-year term on the board of advisers of the U.S. Election Assistance Commission.

The 37-member commission, which was created by the Help America Vote Act of 2002, serves as a national clearinghouse and a resource for information and review of procedures relating to the administration of federal elections.

Mr. Cunningham has been director of the Allen County elections board since 1998 and is president of the Ohio Association of Election Officials.

Subject August Progress Report - Eagleton Institute of Politics

Hi Karen,

Attached is the August progress report in fulfillment of our Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures. Please note, as per your instructions earlier this month, that the financial report will be sent via Fedex under separate cover to: Ms. Dianna Scott, Administrative Officer, EAC. Also attached to the progress report is a finalized list of our Peer Review Group members. If you have any questions regarding this report, please contact Tom O'Neill at (908) 794-1030 or [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net).

Have a great day,

Subject Please Make Note

Commissioners:

I thought it would be prudent to summarize in one email the days, times and agenda items that have been organized for us to discuss several important items between now and Boulder:

Thursday, 9/22: No Regularly Scheduled Discussion

Friday, 9/23: Efforts are being made to organize a conference call for Friday afternoon so that we can discuss 1) TGDC Timeline; 2) EAC Presentation at TGDC in Boulder; 3) Calif Special Audit; 4) Response to Pastor's request to brief EAC Commissioners on the Carter Baker Commission Report. To the best of my knowledge, I have not heard back from any of you to my Sept 16 email about this. I need to respond to Pastor one way or the other.

Monday, 9/26: 1:30 - 3:30 p.m. We will all be in the office and will get together with Tom and Julie to discuss (in no particular order of importance):

- Consensus and guidance to staff on focus of EAC Activities for 06 and 07
- VVPAT
- Continuation of our self-imposed prohibition of contributions to and involvement in political campaigns. Does this include contributions to PACs?
- EAC approach to issuing Best Practices
- Rotation of Chair/Vice Chair among commissioners by party affiliation

Monday, 9/26: Karen Lynn-Dyson needs time with us to discuss the Eagleton recommendation on Guidance to Provisional Voting and she is working to see if we are available to do this immediately following our 1:30 - 3:30 session.

I think I have covered all of the pending items. Please let me know if I have overlooked anything.

Subject Eagleton Draft

We have received and are in the process of reviewing a draft of the Eagleton Report.  
This is to be considered an internal working document and should not be released to anyone without the approval of the Commissioners.  
Thank You  
Tom Wilkey

Hey Bert-

Do you have the info to complete this task for the Chair?

I don't have the latest contracts grid, but imagine either you, Gaylin or Julie do.

Also, to my knowledge, I'm responsible for:

Vote Count/Recount ( University of Utah ) ,  
Provisional Voting/Voter ID (Eagleton/Moritz)  
Election Day Survey, NVRA and UOCAVA ( Election Data Services)

Let me know if you need further help with getting this to the Commissioners.

Subject RESPONSE REQUESTED-Working Group for Voting Fraud  
and Voter Intimidation Project

Dear Commissioners:

The consultants' contracts for EAC's voting fraud and voter intimidation project require Tova Wang and Job Serebrov to work in consultation with EAC staff and the Commissioners "to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation". The contracts do not specify the number of working group members but, as EAC has to pay for the group's travel and we want the size of the group to be manageable, I recommend that we limit the number to 6 or 8. **Please let me know if you think that this limit is too conservative** .

Attached for your review and comment are two lists of potential working group members for this project. One list was submitted by Job, the other by Tova. Tova and Job have provided brief summaries of each candidate's relevant experience and have placed asterisks next to the names of the individuals whom they particularly recommend. I can provide more extensive biographies of these individuals, if you need them. If EAC agrees that the recommended working group members are acceptable, an equal number may be selected from each list in order to maintain a balanced perspective.

Absent from the attached lists is the name of a representative from the U.S. Department of Justice's Election Crimes Branch. At this time, I am working through the DOJ bureaucracy to determine to what degree Craig Donsanto will be permitted to participate. If he cannot be named as a working group member, we may still be able to use him as a resource.

**Please provide your feedback to me no later than Monday , November 28.** I am available to meet with you if you would like to discuss this matter further.

Possible Working Group Members -Serebrov.doc Possible Working Group Members- Wang.doc

026596

## Possible Working Group Members - Serebrov

I recommend the first four with an \*

\***Mark (Thor) Hearne II**-Counsel to Republican National Committee; National Counsel to American Center for Voting Rights; National election counsel to Bush-Cheney, '04; Testified before U.S. House Administration Committee hearings into conduct of Ohio presidential election; Academic Advisor to Commission on Federal Election Reform (Baker-Carter Commission).

\***Todd Rokita**-Secretary of State, Indiana; Secretary Rokita strives to reform Indiana's election practices to ensure Indiana's elections are as fair, accurate and accessible as possible; Secretary Rokita serves on the nine-member Executive Board of the Election Assistance Commission Standards Board, charged by federal law to address election reform issues.

\***Patrick J. Rogers**-Partner/Shareholder, Modrall, Sperling, Roehl, Harris and Sisk, P.A., Albuquerque, New Mexico; 1991-2003 General Counsel to the New Mexico Republican Party; Election cases: *The Coalition to Expose Ballot Deception, et al v. Judy N. Chavez, et al*; Second Judicial District Court of Bernalillo County, New Mexico (2005); represented plaintiffs challenging petition procedures; *Miguel Gomez v. Ken Sanchez and Judy Chaves*; Second Judicial District Court of Bernalillo County, New Mexico (2005); residency challenge; *Moises Griego, et al v. Rebecca Vigil-Giron v. Ralph Nader and Peter Miguel Camejo*, Supreme Court for the State of New Mexico (2004); represented Ralph Nader and Peter Camejo, ballot access issues; *Larry Larrañaga, et al v. Mary E. Herrera and Rebecca Vigil-Giron*, Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *Decker, et al v. Kunko, et al*; District Court of Chaves County, New Mexico (2004); voter identification and fraudulent registration issues; *Kunko, et al v. Decker, et al*; Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *In the Matter of the Security of Ballots Cast in Bernalillo County in the 2000 General Election*; Second Judicial District Court of Bernalillo County, New Mexico (2000); voting and counting irregularities and fraud.

\***David A. Norcross**- Partner, Blank Rome LLP, Trenton NJ, Washington D.C; Chairman, New Jersey Republican State Committee, 1977 – 1981; General Counsel, Republican National Committee, 1993 – 1997; General Counsel, International Republican Institute; Counsel, The Center for Democracy; Vice Chairman, Commission on Presidential Debates; Executive Director, New Jersey Election Law Enforcement Commission

**Benjamin L. Ginsberg**-Served as national counsel to the Bush-Cheney presidential campaign; He played a central role in the 2000 Florida recount; He also represents the campaigns and leadership PACs of numerous members of the Senate and House, as well as the Republican National Committee, National Republican Senatorial Committee and

National Republican Congressional Committee; His expertise is more in campaign finance.

**Cleta Mitchell**-Partner in the Washington, D.C. office of Foley & Lardner LLP; She advises corporations, nonprofit organizations, candidates, campaigns, and individuals on state and federal election and campaign finance law, and compliance issues related to lobbying, ethics and financial disclosure; Ms. Mitchell practices before the Federal Election Commission and similar federal and state enforcement agencies; Her expertise is more in campaign finance law.

**Mark Braden**-Of counsel at Baker & Hostetler; He concentrates his work principally on election law and governmental affairs, including work with Congress, the Federal Election Commission, state campaign finance agencies, public integrity issues, political broadcast regulation, contests, recounts, the Voting Rights Act, initiatives, referendums and redistricting; His expertise is mainly outside of the voter fraud area.

From: Tova Wang  
Re: Working Group Recommendations  
Date: November 12, 2005

\*Wendy R. Weiser, Associate Counsel in the Democracy Program at the Brennan Center for Justice at NYU School of Law and an expert in federal and constitutional law, has done a great deal of research, writing, speaking, and litigating on voting rights and election law issues. As part of the Brennan Center's wide ranging activities in the area of democracy, Ms. Weiser is currently overseeing an analysis and investigation of recent allegations of voter fraud throughout the country.

\*Barbara Arnwine is Executive Director of the Lawyers Committee for Civil Rights Under Law, an organization that for four decades has been at the forefront of the legal struggle to secure racial justice and equal access to the electoral process for all voters. Notably, Ms. Arnwine and the organization have led the Election Protection program for the last several years, a nationwide grassroots education and legal effort deploying thousands of volunteers and using a nationally recognized voter hotline to protect voters' rights on election day.

\*Daniel Tokaji, professor and associate director of the Election Law Center at the Moritz College of Law at the Ohio State University, is one of the nation's foremost experts in election law and reform and ensuring equality in the voting system. Professor Tokaji frequently writes and speaks on democracy related issues at academic and practitioner conferences, on such issues as voting technology, fraud, registration, and identification requirements, as well as the interplay between the election administration practices and voting rights laws.

Donna Brazile is Chair of the Democratic National Committee's Voting Rights Institute, the Democratic Party's major initiative to promote and protect the right to vote created in response to the irregularities of the 2000 election, and former Campaign Manager for Gore-Lieberman 2000 (the first African American to lead a major presidential campaign.) Brazile is a weekly contributor and political commentator on CNN's Inside Politics and American Morning, a columnist for Roll Call Newspaper and a contributing writer for Ms. Magazine.

Wade Henderson is the Executive Director of the Leadership Conference on Civil Rights (LCCR) and Counsel to the Leadership Conference on Civil Rights Education Fund (LCCREF), an organization at the forefront of defending voting rights for the last fifty years. Prior to his role with the Leadership Conference, Mr. Henderson was the Washington Bureau Director of the National Association for the Advancement of Colored People (NAACP)

Robert Bauer is the Chair of the Political Law Practice at the law firm of Perkins Coie, National Counsel for Voter Protection, Democratic National Committee, Counsel to the Democratic Senatorial and Congressional Campaign Committees and Co-Author, Report

of Counsel to the Senate Rules and Administration Committee in the Matter of the United States Senate Seat from Louisiana in the 105<sup>th</sup> Congress of the United States, (March 27, 1997). He is the author of *United States Federal Election Law*, and one of the foremost attorneys in the country in the area of federal/state campaign finance and election laws.

Laughlin McDonald has been the executive director of the Southern Regional Office of the ACLU since 1972 and as the Director of the ACLU Voting Rights Project, McDonald has played a leading role eradicating discriminatory election practices and protecting the gains in political participation won by racial minorities since passage of the 1965 federal Voting Rights Act. During the past two decades, McDonald has broken new ground by expanding ACLU voting rights cases to include representation of Native Americans in various western states, and written innumerable publications on voting rights issues.

Joseph E. Sandler is a member of the firm of Sandler, Reiff & Young, P.C., in Washington, D.C., concentrating in campaign finance and election law matters, and general counsel to the Democratic National Committee. As an attorney he has handled campaign finance and election law matters for Democratic national and state party organizations, Members of Congress, candidates and campaigns. He served as general co-counsel of the Association of State Democratic Chairs, as general counsel for the Democratic Governors' Association and as counsel to several state Democratic parties.

Cathy Cox is serving her second term as Georgia's Secretary of State, having first been elected in 1998. In 2002 she earned re-election with over 61 percent of the vote, winning 146 out of 159 counties. Because of Secretary Cox's efforts Georgia has become a national leader in election reform. Her initiative made Georgia the first state in America to deploy a modern, uniform electronic voting system in every county

Subject Final Best Practices Document

Dear Ms. Karen Lynn-Dyson:

Attached please find the final draft 'Best Practices to Improve Provisional Voting Report' completed by the Eagleton Institute of Politics, and Mortiz College of Law.

Please note that our report has two attachments, the first of which is appended directly within the text of the report, and the second of which is a separate excel document. In addition to this electronic submission I will be sending you a hard copy, via FedEx of these materials later today.

Please let me know if you have any difficulty opening the files.

Sincerely,

Johanna Dobrich

Background of the Research

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning provisional voting, a sample survey of local election officials, and a statistical analysis of provisional voting in the 2004 election. Also consulted as a basis for these recommendations were other studies, notably the EAC's Election Day Survey.<sup>1</sup>

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

Section 302(a) of HAVA requires states to establish the process of provisional balloting by January 2004.<sup>3</sup> The process HAVA outlined leaves considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voters eligible to cast a provisional ballot that will be counted and, arguably, in what jurisdiction (precinct or larger unit) that the ballot must be cast in order to be counted.<sup>4</sup>

The general requirement is that, if a registered voter appears at a polling place to vote in an election for Federal office, but the potential voter's name does not appear on the official list of eligible voters for the polling place, or if an election official asserts that the individual is not eligible to vote, that potential voter be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the Election Day Survey, include first-time voters who cannot provide identification, as required under HAVA, and voters who were

<sup>1</sup> Appendix 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures and describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

<sup>3</sup>The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See [www.electioncenter.org](http://www.electioncenter.org).

<sup>4</sup> The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6<sup>th</sup> Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

11/23/2005

challenged at the poll.<sup>5</sup> HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. HAVA also requires election administrators to notify individuals of their opportunity to cast a provisional ballot.

Provisional Ballots in the 2004 Election

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.<sup>6</sup>

These totals obscure the tremendous variation in provisional voting among the states. HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted. Six states accounted for two-thirds of all the provisional ballots cast.<sup>7</sup> State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000, from a high of 7% in Alaska's to Vermont's .006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted ballots at more than twice that rate: 44%. (Or, as the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without."<sup>8</sup>)

The wide variations in the use of provisional ballots argue for the promulgation of best practices that states can use to determine how to make procedures clearer to both officials and voters could improve the implementation of provisional voting across the country.

One important source of variation among states was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.<sup>9</sup>

<sup>5</sup> The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

<sup>6</sup> These figures differ slightly from those in the Election Day Survey. Data used for this study include complete voting data for New Mexico, for which the Election Day Survey had only partial data, and vote totals for Pennsylvania, which was not included in the provisional voting analysis in the Election Day Survey. See the appendix to this report for a full explanation of the differences in data between this research and the Election Day Survey.

<sup>7</sup> California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

<sup>8</sup> Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

<sup>9</sup> See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

- The percentage of the total vote cast as provisional ballots averaged more than 2% (2.17%) in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Deleted: average

Deleted: less than half a percent (

Deleted: )

Deleted: of

Those voting with provisional ballots in experienced states were enfranchised more frequently than those in the new states, another indication that there is room for improvement in provisional balloting procedures.<sup>10</sup> That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from "new" states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC should consider providing the "new" states with information on more effective administration of provisional voting. EAC could also consider convening a national meeting for state and county election officials to share experiences and best practices from their own jurisdictions.

But the optimistic conclusion that experience will make all the difference may be unwarranted. Only if the performance of the "new" states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Current understanding of the provisional voting processes in use in 2004 is not sufficient to determine unambiguously which view is correct.

1. "New" states may have a political culture different from "old" states. That is, underlying features of the "new" states political system may be the reason they had not adopted some form of provisional voting before HAVA. The "new" states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such

<sup>10</sup> Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time frame for processing the provisional ballots was very challenging and unrealistic. To overcome this challenge, the entire department's employees were mobilized to process provisional ballots." (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. If the inconsistent performance in the "new" states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots -- as measured by intrastate consistency in administration-- will be harder and take longer to achieve.<sup>11</sup>

Formatted: Indent: Left: 18 pt

- 2. "Old" states may devote fewer resources to updating their registration files or databases because they are comfortable with provisional ballots as a fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

Deleted: increasing variation

Deleted: d

- The more rigorous the verification requirements of the voter's identity and registration status, the smaller the percentage of provisional ballots that were counted. Some states merely require a voter's signature, some match signatures, some require identity documents, others require an affidavit, and a few require photo identification.<sup>12</sup>
  - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
  - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
  - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
  - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office.
- Voter registration databases provided information that reduced the number of provisional ballots counted.<sup>13</sup> In states using provisional voting for the first time, states with

Deleted: erified

Deleted: erified

<sup>11</sup> Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, "no state gave the voter the right to find out the status of their ballot after the election. " Now all offer that opportunity. See Bali and Silver, "The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000," manuscript, Department of Political Science, Michigan State University. Resisting HAVA's mandates through foot-dragging lacks any legitimate foundation in law or policy.

registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.

- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted ballots cast only in the proper precinct counted an average of 42% of provisional ballots.<sup>14</sup>

Deleted: allowed

Deleted: recognized only

Deleted: cast.

- In experienced states, the disparity was even more pronounced, 52% of provisional ballots cast were counted in states requiring in-district ballots, while 70% were counted in those allowing out-of-precinct ballots.
- If all states had counted out-of-precinct ballots, perhaps 290,000 more voters would have been enfranchised across the country.<sup>15</sup>

Deleted: is

Deleted: .

Variation With-in States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors outside of the statewide factors analyzed here also influence the use of provisional ballots.<sup>16</sup> Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."<sup>17</sup>

Deleted: way

Deleted: were used in 2004

Election Line reported that:

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.

Deleted: ¶

Deleted: ¶

<sup>14</sup> The Election Day Survey concluded that : "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

Deleted: Election Day Study

<sup>15</sup> This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

Formatted: Normal, Don't adjust space between Latin and Asian text, Don't adjust space between Asian text and numbers, Tabs: 396 pt, Left

<sup>16</sup> For example, The Election Day Survey also found that "the reported rate of provisional ballots cast increases with population size, from 0.10 percent for voter registration in jurisdictions under 1,000 voting age population (VAP), to 2.51 percent in jurisdictions over one million VAP. It also calculated that, "The highest reported rate of counting provisional ballots was also among predominantly Hispanic jurisdictions, 79.30 percent, followed by predominantly non-Hispanic White areas, 62.60 percent; predominantly non-Hispanic Black communities, 58.60 percent; and predominantly non-Hispanic Native American jurisdictions, 48.70 percent.

Deleted: ¶

<sup>17</sup> Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report observed that, ". . .different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."

- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, high mobility, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

**Effectiveness of Provisional Voting**

The certainty of our conclusions about the effectiveness of provisional voting is limited because of a fundamental challenge of methodology and the lack of important information. An ideal assessment of how well provisional ballots served the needs of voters and the public interest requires knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting, their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. And information needed about the eligibility or registration status of provisional voters is also not available.

Deleted: Our recommendations for best practices are based on research into the legal framework, the national sample survey of local election officials, and statistical analysis of the use of provisional ballots in 2004. While we are confident in the quality of the research, we recognize that t

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect an accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots enfranchised 1.2 million citizens, who would otherwise have been turned away from the polls.

Not knowing the total number of registered voters who might have voted but could not makes a precise, quantitative estimate of the effectiveness of provisional voting impossible. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the 2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

**Estimates of Votes Lost In 2000 Presidential Election**

Votes Lost (Millions)	Cause
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

**Table 1 Cal Tech – MIT Voting Technology Project Estimates**  
4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

FINAL DRAFT

11/23/2005

Deleted: 15

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. A rough estimate of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost). Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

Legislative Response

Indeed, several states<sup>20</sup> came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

Deleted: by amending

Deleted: The resulting legislative activity is evidence that states were less than satisfied with the effectiveness of their processes.

Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called "wrong precinct issue" – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

\* Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems after each election when it asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second –and significantly– the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right –the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

Deleted: First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA. (A state's decision not to count wrong-precinct provisional ballots, however, was found by the court not to violate HAVA. ¶

Formatted: Bullets and Numbering

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted an absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

Deleted: Because every provisional ballot counted represents a voter who, if the system had worked really well, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly. EAC's guidance and recommendations for best practices will provide information to allow states to adopt procedures likely to strengthen their systems.

**Need for Promulgation of Best Practices**

Because every provisional ballot counted represents a voter who, if the system had worked really well, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

Deleted: They offer

Deleted:

Deleted: turn to

Deleted: from each state

**Recommendations for Best Practices**

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

Deleted: for consideration by all committee members. State action in response to the EAC's recommendations for best practices would be voluntary.

**Self-evaluation of Provisional Voting –4 Key Questions**

The first recommendation is not for a specific procedure, but rather for a way of thinking about provisional voting. As legislators and election officials in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

- 1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
- 2. Is the system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and with litigation looming?
- 3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?
- 4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

Deleted: with the

Deleted: process

Deleted: by and

Deleted: the possibility of

Deleted:

Deleted: is

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

**Best Practices For Each Step In The Process**

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention, and we offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

Deleted: We examined each step of the provisional voting process to identify specific areas where the states should focus their attention, and we offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.]]

**The Importance of Clarity**

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result— well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."<sup>22</sup>

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

Deleted: own

<sup>22</sup> The Century Foundation, Balancing Access and Integrity, Report of the Working Group on State Implementation of Election Reforms, July 2005.

FINAL DRAFT

11/23/2005

Deleted: 15

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant recanvassing.<sup>23</sup> Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide poll workers the training and information resources they need, as for example, how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.<sup>24</sup>
- States should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.<sup>25</sup> Recent legislation in Arizona indicates that the EAC's recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.<sup>26</sup>

Deleted: ideally by legislation

A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency."<sup>27</sup>

<sup>23</sup> See *Washington State Republican Party v. King County Division of Records*, 103 P3d 725, 727-728 (Wash. 2004)

<sup>24</sup> See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

<sup>25</sup> *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6<sup>th</sup> Cir. 2004)

<sup>26</sup> *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

<sup>27</sup> Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina), they can verify their registration on the website.

Deleted: ment for  
Deleted: process

3. A state website for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

Deleted: For example,

B. At the Polling Place

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.<sup>29</sup> After the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."<sup>30</sup> Such statutory direction could help other states ensure uniform instruction of poll workers.

Deleted: This  
Deleted: prove  
Deleted: ful for  
Deleted: ing  
Deleted: , and other states can benefit from this example.

2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.

3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."<sup>31</sup> At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the

number of provisional ballots actually cast in recent elections. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.<sup>32</sup>

- 4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.<sup>33</sup>

C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. The recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underline the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation."<sup>34</sup> Nonetheless, the *Panio v. Sutherland*<sup>35</sup> decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

- 1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted

and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.<sup>37</sup>

Deleted: n individual

- 2. More provisional voters are enfranchised in those states that count ballots cast outside the correct precinct.<sup>38</sup> The best practice may be to count provisional ballots even if they are cast in the wrong precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. See the experience in Los Angeles County with the difficulties in evaluating out-of-precinct ballots described earlier in this report.
- 3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot correct polling site even if at the wrong precinct within that location.<sup>39</sup>
- 4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box "unregistered voter"; "lack of signature match" "wrong precinct," etc.) Those forms should be disclosed publicly when completed. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.<sup>40</sup>

Deleted: define "jurisdiction" more broadly than the precinct.

Deleted: but

Deleted: in footnote 14 above.

Colorado Rejection Codes (Any ballot given a rejection code shall not be counted):

- RFS (Rejection federal or state) No federal or state candidates or issues to duplicate.
- RNS (Rejection not signed) Provisional Ballot Affidavit not signed.
- RIN (Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter's eligibility.
- RNR (Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
- REE (Rejection envelope empty) Provisional ballot envelope is empty.
- RAB (Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
- REV (Rejection based on ballot cast in early voting) Voter voted early.

<sup>38</sup> See Andersen, op. cit, pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, "Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions."

<sup>39</sup> Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.

- RIP (Rejection based on incorrect party) Incorrect Party in Primary Election.
- RFE (Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
- RWC (Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
- RID (Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.
- RRD (Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter's eligibility cannot be established.

## D. Verification of Provisional Ballots

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections
2. The time by which election officials must complete their eligibility evaluations is critical, particularly in presidential elections. States should consider in particular how to divide the time allowed them by the safe-harbor provisions that apply in presidential elections to the certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

## E. Post-election Information for Voters

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

## F. State Laws Governing Litigation over Provisional Voting

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot

**Broader Considerations**

**G. Integrity and the Appearance of Integrity**

1. State laws or regulations providing for non or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.
2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public.

**H. Continuous Assessment of the Provisional Ballot -- Process and Performance**

Defining what constitutes a successful provisional voting system is difficult. As noted earlier, the most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Deleted: (  
Deleted: )

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations to evaluate the provisional ballot process within the broader context of the electoral system. Pending such a review, the EAC can recommend that states take the following actions.

Deleted: it can  
Deleted: the

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.

2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:

Deleted: systematically  
Deleted: in a form that would enable them to  
Deleted: This

- Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (Jack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
- Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
- Measures of variance among jurisdictions.
- Number of poll workers trained in administration of provisional voting by polling place
- Number of jurisdictions posting information on provisional voting in the polling place
- Time required to evaluate ballots by jurisdiction

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

**Conclusion -- Research-based, continuing improvements for provisional voting are needed**

The recommendations above are based on research that began in late May 2005. Our research focused on six key questions raised by the EAC. The answers to those questions provided the foundation for our policy recommendation. Those questions are:

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, the Eagleton-Moritz team undertook the following research efforts:

Formatted: Bullets and Numbering

1. Survey of 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Review of news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.
3. Statistical analysis of provisional voting to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification
4. Collection and review of the provisional voting statutes and regulations in all 50 states.
5. Analysis of litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Deleted: ¶

Our research-based recommendations provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states moved forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

Deleted: ¶

**ATTACHMENT 1 – Characteristics of the Provisional Voting Process****Classification of the States**

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The categories analyzed here are:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

Formatted: Bullets and Numbering

Comment [01]:

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

Please note that:

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and did include it in our analysis.

New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting<sup>41</sup> and condensing its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

Comment [o2]: It would be useful here to insert a table showing our classification as old or new.

Formatted: Bullets and Numbering

We collapsed all of the states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots as “old” states, because the states in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Comment [o3]: Under this criterion, how did Florida become an “old” state?

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline’s map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct’s list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter’s name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island’s first use of provisional voting was in 2004 and, therefore, classified the state as “new” to the system of provisional balloting.

#### Statewide List of Registered Voters

The Electionline preview of the 2004 Election<sup>42</sup> was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found they had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

<sup>42</sup> "Election Preview 2004: What's changed, What Hasn't and Why". This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

Minnesota has a statewide database but was excluded from the analysis because it did not offer provisional ballots and was exempt from the HAVA requirements.

Comment [04]:

Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election<sup>2</sup>. States that evaluated ballots cast in a precinct where the voter was not registered were categorized as “out-of-precinct.” States that invalidated such ballots were categorized as “In-precinct only.”

**Voter Identification**

We relied on Electionline studies, including the Voter Identification study<sup>43</sup> and the 2004 Election Preview, to classify the states on their requirements for voter identification. Each state's categorization is taken directly from the Electionline studies except Hawaii.<sup>44</sup> The five different, and increasingly rigorous, categories are: Give Name (8 states), Sign Name (14 states), Match Signature (8 states), Provide ID (15 states), and Photo ID (5 states).

**Table 4  
CATEGORIZATION OF STATES -- Forms of Identification Required**

<sup>43</sup> This study can be found at: <http://electionline.org/Portals/1/Publications/Voter%20Identification.pdf>  
<sup>44</sup> In 2004, ElectionLine listed Hawaii as requiring identification. Our review of statutes revealed that Hawaii could require photo ID. Since that is the most rigorous form of identification that may be required of voters, we classified Hawaii under this category.

FINAL DRAFT

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<u>Give Name</u>	<u>Sign Name</u>	<u>Match Signature</u>	<u>Provide ID</u>	<u>Photo ID</u>
<i>Maine</i>	<i>California</i>	<i>Illinois</i>	<i>Alabama</i>	<i>Florida</i>
<i>Massachusetts</i>	<i>DC</i>	<i>Nevada</i>	<i>Alaska</i>	<i>Hawaii</i>
<i>New Hampshire</i>	<i>Idaho</i>	<i>New Jersey</i>	<i>Arizona</i>	<i>Louisiana</i>
<i>North Carolina</i>	<i>Indiana</i>	<i>New York</i>	<i>Arkansas</i>	<i>South Carolina</i>
<i>Rhode Island</i>	<i>Iowa</i>	<i>Ohio</i>	<i>Colorado</i>	<i>South Dakota</i>
<i>Utah</i>	<i>Kansas</i>	<i>Oregon</i>	<i>Connecticut</i>	
<i>Vermont</i>	<i>Maryland</i>	<i>Pennsylvania</i>	<i>Delaware</i>	
<i>Wisconsin</i>	<i>Michigan</i>	<i>West Virginia</i>	<i>Georgia</i>	
<i>Wyoming</i>	<i>Minnesota</i>		<i>Kentucky</i>	
	<i>Mississippi</i>		<i>Missouri</i>	
	<i>Nebraska</i>		<i>Montana</i>	
	<i>New Mexico</i>		<i>North Dakota</i>	
	<i>Oklahoma</i>		<i>Tennessee</i>	
	<i>Washington</i>		<i>Texas</i>	
			<i>Virginia</i>	
<u>9</u>	<u>14</u>	<u>8</u>	<u>15</u>	<u>5</u>

South Dakota complicates the effort to assign each state to a category. It permits voters to sign an affidavit that would allow them to vote without presenting photo ID. While Hawaii did not normally require photo ID, its statutes gave challenged voters the opportunity to respond by producing a photo ID.

Comment [05]: Again, this would work better as a table.

Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

**Table 5**

**CATEGORIZATION OF STATES -- Ballot Evaluation Methods**

*States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.*

<u>Signature Match</u>	<u>Data Match</u>	<u>Affidavit</u>	<u>Return with ID</u>	<u>NA</u>
<u>Alaska</u>	<u>Alabama</u>	<u>Connecticut</u>	<u>Indiana</u>	<u>Idaho</u>
<u>California</u>	<u>Arizona</u>	<u>Delaware</u>	<u>Iowa</u>	<u>Maine</u>
<u>Florida</u>	<u>Arkansas</u>	<u>Georgia</u>	<u>Kansas</u>	<u>Mississippi</u>
<u>Oregon</u>	<u>Colorado</u>	<u>Hawaii</u>	<u>Maryland</u>	<u>Minnesota</u>
	<u>DC</u>	<u>Illinois</u>	<u>Michigan</u>	<u>New Hampshire</u>
	<u>Louisiana</u>	<u>Kentucky</u>	<u>Montana</u>	<u>N. Carolina</u>
	<u>Missouri</u>	<u>Massachusetts</u>	<u>New Jersey</u>	<u>N. Dakota</u>
	<u>Ohio</u>	<u>Nebraska</u>	<u>New Mexico</u>	<u>Wisconsin</u>
	<u>Oklahoma</u>	<u>Nevada</u>	<u>Texas</u>	<u>Wyoming</u>
	<u>Pennsylvania</u>	<u>New York</u>	<u>Utah</u>	
	<u>Rhode Island</u>	<u>South Dakota</u>		
	<u>S. Carolina</u>	<u>Tennessee</u>		
	<u>Washington</u>	<u>Vermont</u>		
	<u>West Virginia</u>	<u>Virginia</u>		
<u>4</u>	<u>14</u>	<u>14</u>	<u>10</u>	<u>9</u>

**Data Collection**

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

\* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

<b>Table 6</b>	
<b>Updated information by State</b>	
<b><u>Received Updated Data</u></b>	<b><u>Did Not Receive Updated Data</u></b>
<u>California</u>	<u>Alabama</u>
<u>District of Columbia</u>	<u>Alaska<sup>45</sup></u>
<u>Florida</u>	<u>Arizona</u>
<u>Hawaii</u>	<u>Arkansas</u>
<u>Indiana</u>	<u>Colorado</u>
<u>Iowa</u>	<u>Connecticut</u>
<u>Kansas</u>	<u>Delaware</u>
<u>Louisiana</u>	<u>Georgia</u>
<u>Maryland<sup>46</sup></u>	<u>Idaho</u>
<u>Missouri</u>	<u>Illinois</u>
<u>Montana</u>	<u>Kentucky</u>
<u>Nebraska<sup>47</sup></u>	<u>Maine</u>
<u>Nevada</u>	<u>Massachusetts</u>
<u>New Jersey</u>	<u>Michigan</u>
<u>New Mexico</u>	<u>Minnesota</u>
<u>Ohio</u>	<u>Mississippi</u>
<u>Oklahoma</u>	<u>New Hampshire</u>
<u>Oregon</u>	<u>New York</u>
<u>Pennsylvania</u>	<u>North Carolina</u>
<u>Rhode Island</u>	<u>North Dakota</u>
<u>South Dakota</u>	<u>South Carolina</u>
<u>Tennessee</u>	<u>Utah</u>
<u>Texas</u>	<u>Vermont</u>
<u>Virginia</u>	<u>Wisconsin</u>
<u>Washington</u>	<u>Wyoming</u>
<u>West Virginia</u>	
<b><u>26 States</u></b>	<b><u>25 States</u></b>

<sup>45</sup> Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

<sup>46</sup> Maryland reported provisional ballots that were counted per county, but not number cast.

<sup>47</sup> Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

FINAL DRAFT

Deleted: 15

Data Differences

The data used in this study differs from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished, on the schedule laid out in our work plan. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

Table with 5 columns: State, EDS Numbers Cast/Counted, Our Numbers Cast/Counted, Differences, Updated Info from State? Rows include Alabama, Alaska, Colorado, Georgia, Hawaii, Iowa, Kansas, Montana, Nebraska, Nevada, New Mexico, N. Carolina, Ohio, Pennsylvania, Texas, Vermont, Virginia, Washington, Wisconsin.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. A rough estimate of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)\*. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

---

\* Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems after each election when it asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

Subject Thursday Comm Discussion

For our private time discussions, I propose that we add the composition of the Voter Fraud/Voter Intimidation Working Group to our list of topics to discuss.

As you will recall, we did not complete the discussion because Paul was not able to participate.

Subject Working Group for Voter Fraud/Intimidation Project

Peg:

Following is the guidance that the commissioners are providing with respect to the composition of the working group for the Voter Fraud/Voter Intimidation project and the selection process.

### 8 Member Working Group

Participants to be chosen by the two consultants in consultation with you. There are two slots that will require consensus. If consensus can't be reached, then you should make the decision. If there is real disagreement among the three of you, then the commissioners will make the selection.

The participation process prescribed below provides for political balance. As always, we ask that the group be diverse with respect to participation of men, women and minorities.

**4 people from the Academic , Legal and Advocacy sectors** - 2 to be chosen by Tova and 2 to be chosen by Job. We support your recommendation that there be at least one academic in the working group to help advise and comment on the construct of the database and you should provide that guidance to Tova and Job.

**2 State Level Election Officials** - 1 selected by Tova and 1 selected by Job

**1 Nonpartisan local election official** (selected by you or by consensus among the 3 of you)

**1 Representative from DOJ** - you had recommended a man who was retired from the Voting Section or perhaps someone else with similar credentials to be selected by you or by consensus among the three of you. We assume that Craig Dosantos (?sp) will participate in this project as an "advisor" and therefore would not take up a slot on the working group.

I will be on travel on Friday (tomorrow), however please feel free to call me on my cell should you have questions or need additional clarification.

Many thanks for your terrific work.

Subject Federal standards violations by election fraud industry will  
not be tolerated

Mr. Tony Prokott  
4017 Upton Av. S #2  
Minneapolis, MN 55410-1260

January 10, 2006

Commissioners, Election Assistance Commission and  
Brian Hancock, ITA Secretariat  
United States Election Assistance Commission  
1225 New York Avenue N.W. Suite - 1100  
Washington, DC 20005

Dear Commissioners and Secretariat:

As a citizen and voter, I am writing to request that the Federal Independent Testing Authority (ITA) who inspected, for federal qualification, the software used on Diebold Optical Scan and Direct Recording Electronic (DRE) voting machines be ordered to reinspect all source code, including any code used on memory cards, looking in particular for 'interpreted' code.

'Interpreted' code is expressly banned for use on any voting systems as per the 2002 Federal Election Commission Voting System Standards Volume 1, Section 4.2.2, yet Diebold Elections Systems Inc. has admitted, in California, that they use 'interpreted' code in their AccuBasic software and it may be used elsewhere in their code.

This revelation from Diebold representatives and from documents obtained by "Freedom Of Information Act" from various sources points to a failure on the part of the ITA to use due diligence in their inspection of Diebold source code and software.

It is because of this failure on the part of the ITA and Diebold's revelations that we ask that all Diebold software/source code be reinspected by the ITA. The ITA should then report back whether the software/source code includes any 'interpreted' code and if that is the case, as Diebold has admitted, the EAC must direct that all Diebold software be decertified until such time as they can show that they have removed all such prohibited software.

This action must not stop with the Diebold products alone, as there is ample evidence that other voting systems also contain 'interpreted' code.

It must be made clear that the Voting System Standards were written by experts in the field of computer sciences and elections. The ITA have been tasked with ensuring that the voting machine vendors follow those standards or be denied federal qualification. I demand that the rules be followed by everyone.

Sincerely,

026637

Tony Prokott

# **Presented to: ELECTION ASSISTANCE COMMISSION**

## **Management Guidelines for Election Administration**

### **Outline of Proposed 2006 Priorities**

#### **INTRODUCTION**

#### **CERTIFICATION**

- EAC federal certification process and procedures
- State certification – summary of processes – in non-state specific format

#### **SECURITY**

##### **System Security**

- Election tabulation computer hardware configuration
- Password maintenance
- Log in books
- Video cameras
- Hash code on ITA version/validation against systems in the field – NSRL procedures
- Software escrow
- Backups
- Tamper tape
- Tamper-resistant transport bags
- Seals, individually-keyed locks
- Ballot printing security and quality control

##### **Physical Security**

- Facility
- Security Cages
- Supply distribution
- Chain of Custody
- Blank ballot stock
- Ballot on Demand
- Voted Ballots
- Accessories, pieces and parts
- Inventory control

## **PRE-ELECTION TESTING**

**Logic & Accuracy** – Public observation (definitions, instructions, public handout)  
(small scale parallel test)

### **Optical scan**

- Vendor provided ballot deck and results
- Calibration tests
- Pen/pencil specific
- Oval/ballot markings – (will they count or not count)
- Ballot stock (storage of paper) (toner residue)
- Folds on ovals
- Timing Marks – markings outside of ovals
- Precinct count
  - Over/under votes
  - Blank ballots
  - Pattern vote testing
- Central count

### **Direct Recording Electronic (DRE) Voting Machines**

- Audit trail (description and sample forms)
- Manual L&A on each machine
- Pattern vote testing
- Audio Ballot

### **End-to-end system testing**

- Backup copy
- Audit trail
- Tamper-proof seals
- Security for storage

### **Hardware testing**

- Optical Scan
- DRE

### **Parallel testing**

- Optical Scan
- DRE

**First draft tentatively due 6/1/06**

**Final release after EAC approval tentatively scheduled for 8/1/06**

Subject Eagleton close-out meeting

A close out meeting with the folks from Rutgers and the Eagleton Institute is being scheduled for April 3, 2006.

After a preliminary survey of your availability with your Special Assistants the time slot of 2:30-4:30 has been chosen for this meeting.

Please confirm that you are able to attend this meeting here at the EAC office if it is held at this time.

Regards,

Nicole K. Mortellito

Subject Re: Eagleton close-out meeting 

Commissioner-

Given travels costs and the number of persons involved from the Eagleton/Moritz team, the idea was to do the two meetings in the same day.

However, I could ask Nicole to determine if there is a day in March that might work with your schedule.

I am very reluctant to schedule a meeting later in April as the contract is technically over March 31 (a Friday). April 3 is the following Monday.

Please advise. Thanks

Commissioner-

I believe an earlier and a later meeting time on the same day can be accommodated.

I will ask Nicole to arrange for a morning briefing and an afternoon one.  
I will also ask her to check on Commissioners' availability for the morning slot.

Subject Eagleton close-out meeting

A close out meeting with the folks from Rutgers and the Eagleton Institute is being scheduled for April 3, 2006.

After a preliminary survey of your availability with your Special Assistants the time slot of 2:30-4:30 has been chosen for this meeting.

Please confirm that you are able to attend this meeting here at the EAC office if it is held at this time.

Subject Eagleton Close-Out Meeting

Commissioners:

The **Eagleton Close -Out Meeting** has been scheduled for Monday, **April 3, 2006**. As requested, the delegation from Eagleton will give **two** presentations so that you may choose to attend the briefing which most readily jibes with your schedule.

Please advise as to which session you will attend. The meetings should last approximately 45 minutes plus discussion/question and answer time.

The meeting times are either **11:00am or 2:30pm**. And will be held in the small conference room.

Regards,

Nicole K. Mortellito

Subject Voter ID Paper --Final Draft

Karen,

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary

026655

comments you would like us to consider, that meeting would be a most convenient occasion to discuss them.

Tom O'Neill

ReportFinalDraft.doc

# **REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES**

---

## **1. Introduction and Report Background**

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve implementation of the requirements for voters to show identification pursuant to [statute or regulation citation] It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

## **2. Voter Identification –Background and Approach of the Study**

Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The burden of providing required ID documents on the voter may be greater at the polls on Election Day than at the time of registration. The burden of checking ID, even as simple as a signature match, can be much greater on election workers at the polls than on those registering voters. Poll workers may be faced with long lines and limited time. This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>1</sup> The emphasis here is on Voter ID on Election Day and afterwards as election judges evaluate provisional

---

<sup>1</sup> As the Carter-Baker Commission noted, photographic ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify identification. Commission on Federal Election Reform, pp 46-47.

## FINAL D R A F T

ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

This analysis takes a view of voter ID issues broader than the rather narrow identification requirements in HAVA. Much of the national ferment over voter ID goes beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those casting a ballot for the first time who had not registered in person. The controversy in the states over voter ID stems from the HAVA requirements, goes beyond those requirements, and sets the context for the analysis here.<sup>2</sup>

Identification is often described as the critical step in protecting the integrity of the ballot, the process that ensures that the potential voter is eligible and permitted to cast a ballot and one ballot only. In fact, ensuring ballot integrity requires a perspective that takes in the entire voting process. Protecting the integrity of the ballot requires more than preventing the ineligible from voting. It also should ensure that all those who are eligible and want to vote can cast a ballot that counts, and that they can effectively cast a ballot for the candidate of their choice. The protection effort must take into account all forms of voting, including absentee ballots, and embrace each step in the process. A voting system that establishes onerous requirements for voters to identify themselves may prevent the ineligible from voting, but it may also prevent the eligible from casting a ballot. If the ID requirements of a ballot protection system block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or forget to bring to the polls the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This analysis does not include consideration of the incidence of vote fraud, the forms that it takes, nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. The EAC has commissioned a separate study of vote fraud and instructed us not to address that issue in this research.

---

<sup>2</sup> Harvard Law Review 119:1127. "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA. . . . HAVA makes explicit that it shall not 'be construed to prevent a State from establishing election technology and administration requirements that are more strict than' HAVA itself provides. The states have accepted the invitation. "

## FINAL D R A F T

Nonetheless, a broad view of ballot integrity is needed to appreciate the background and context of this narrower study. We explore the inter-relationships between Voter ID requirements and Provisional Voting and estimate the effects of various voter id requirements on turnout and on the casting of provisional ballots.

Voters lacking required ID, or who have ID that does not reflect their current address, may be able to vote only by casting a provisional ballot.<sup>3</sup> To the extent that stricter voter ID requirements divert more voters to the provisional ballot, voter ID requirements can put stress on the already pressured management of the polling place. Administering provisional ballots is more expensive than the normal ballot. Scrutiny of ID can create lines at the polling places, lines made longer as voters are diverted to the provisional voting line. Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle that will keep more citizens from the polls. A review of voter identification practices should keep in mind that America's problem may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes will be more effective if based on clear standards --legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

- Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?
- How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>4</sup>
- How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity

---

<sup>3</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>4</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

## FINAL D R A F T

that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>5</sup>

- How cost-effective is the system? Does it increase the security of the ballot at an affordable cost, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.
- If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>6</sup>
- Does it comply with the letter and spirit of Voting Rights Act?
- The seventh question is more difficult to measure than those described in the 6 questions outlined above. The Voter ID requirements should have a neutral result on the composition of the qualified electorate. That is, those requirements should not be designed to reduce the turnout of particular groups of voters who may have a propensity to support one party over another. Whatever the requirement may be, all citizens should be able to comply with it easily and at no or minimal cost.

### Summary of findings and conclusions

Voter turnout at the state level in 2004 declined where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Including other factors beyond voter id requirements diminishes the influence of voter ID on turnout. But the analysis still offers some support for the hypothesis that as the burden of voter identification

---

<sup>5</sup> In New York, in 2004, disparities in training and voting information were made all too apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>6</sup> For example, the Carter-Baker Commission accompanied its recommendation for a national voter ID card with a recommendations for an affirmative effort by the states to reach out and register the unregistered, to use the new Voter ID regime as a means to enroll more voters.

## FINAL D R A F T

requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>7</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

### Recommendations for consideration and action by the EAC

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice that before states adopt a change described as increasing ballot security, states should publish an analysis of the number of eligible, potential voters that the new requirement may keep away from the polls or be permitted to cast only a provisional ballot as well as an estimate of the number of ineligible voters who will be prevented from voting.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. The data should be analyzed to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent and should describe the dynamics of voter ID in preserving the security of the ballot?

---

<sup>7</sup> Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.

## FINAL D R A F T

- Useful information could be supplied by exit polling. It would identify those who had cast a provisional ballot and ask why they were unable to cast a regular ballot. Answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
- Polling to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter id requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three criteria: the convenience of the voter, the total time allowed to evaluate ballots<sup>8</sup>, and the safe harbor provision in presidential elections.

---

<sup>8</sup> Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

**FINAL D R A F T**

**3. Voter ID and Turnout**

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility.

**TABLE 1 -- Voter ID Requirements**

State	Forms of ID Required 2004	Current ID Requirement for First-Time Voters	Current ID Requirements for All Other Voters	Verification Method for Provisional Ballots

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

\*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

\*\*State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

\*\*\*Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

\*\*\*\*Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

\*\*\*\*\*Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

\*\*\*\*\*Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

---

In 9 states, voters were required merely to state their names so that poll workers could locate them in the registration book. In 14 states, voters signed their names. In 8 states, voters' signatures were matched with a specimen signature. In 15 states voters had to show some form of ID, not necessarily an official picture ID. And in 5 states, voters were required to show an official photo ID, although in 2004 voters who lacked a picture ID could execute an affidavit and vote a regular ballot.

## FINAL D R A F T

This neat assignment of each state to one of a few categories may fail to reflect actual practice at a polling place. Like any system run by fallible people it is subject to wide variation in practice. Voters may be confronted with demands for identification at variance with state statutes or legislation. Other voters may be waved through the process without a look at any document, no matter what the regulations may say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters may encounter.

It is not practical to attempt to capture the wide variety of how voter ID requirements may be actually implemented across the nation's tens of thousands of polling places. Recognizing that means that the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

### Effect of Voter ID requirements on Turnout

#### Summary of Findings and Conclusions

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.<sup>9</sup>

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each

---

<sup>9</sup> See Appendix \_\_\_ for the full report on voter ID and turnout.

## FINAL D R A F T

level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

### Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous. a form of identification, and providing a form of photo identification.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

**FINAL D R A F T**

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political-- also affect voter participation. Multivariate models that take into account other predictors place the effects of voter identification in a more accurate context. To consider that broader context, our multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground for president, governor or senate voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-

## FINAL D R A F T

Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line.

In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line.

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. (Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting.) Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age in years, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note

## FINAL D R A F T

that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

### Discussion and Conclusions of the Analysis

The results presented here give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

## FINAL D R A F T

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.
- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements range from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

The data examined in this analysis could not capture the dynamics of how identification requirements might lower turnout. Do these requirements dampen turnout because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most

**FINAL D R A F T**

effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

#### 4. Litigation over Voter ID Requirements

There have been a handful of cases challenging identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether or not laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on cases challenging requirements that voters present some form of identifying documents if the photo identification is the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

## FINAL DRAFT

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

**FINAL D R A F T**

suggest that best practice may be to conform to the NVRA's limitation on requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

## FINAL D R A F T

### 5. Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

This information would allow a more informed judgment to be brought to bear in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

## FINAL D R A F T

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

### 6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.<sup>10</sup> The dynamics of Voter ID requirements – how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That research might address that, so far as may be

---

<sup>10</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." The exclusion of voters through restrictive ID requirements could affect election outcomes as much as fraud by voters at the polls. *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

## FINAL D R A F T

necessary to reduce vote fraud, could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended by our colleague Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.<sup>11</sup>

---

<sup>11</sup> "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. These electronic photos should satisfy the anti-fraud concerns of conservatives as much as printed photos that citizens would be required to bring to the polls. . . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier. "

- b. Analysis of Effects of Voter ID Requirements on Turnout (attached as a separate document)
- c. Indexed database of major articles on Voter ID Requirements and related topics (included with this draft)
- d. Compendium of states' legislation, procedures, and litigation

## FINAL D R A F T

### APPENDIX –Court Decisions and Literature on Voter Identification and Related Issues

#### Court Decisions

#### **Summary of Relevant Cases:**

#### **Challenges Prevailed:**

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### **Challenges Rejected:**

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters’ identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions’ purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

## FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

### *McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

### *Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

### *Perez v. Rhiddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

### **Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

#### ***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

026680

## FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

### ***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

### **Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

#### ***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

#### ***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

025881

## FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

### ***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

### ***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

## FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

### ***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

### ***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

### **Current Litigation Concerning Voter ID Issues<sup>12</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>12</sup> As of January 2, 2006

## FINAL D R A F T

### Georgia (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>13</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>14</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

### **Indiana** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>14</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

## FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>15</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>15</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

Subject Voter ID Paper --Final Draft

Karen,

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary comments you would like us to consider, that meeting would be a most convenient occasion to discuss them.

Subject Eagleton ID report

## Comments regarding the Eagleton Report on Voter ID

While the report is generally acceptable, I found some parts of it to be misleading and at times appearing biased to support a view that imposing ID requirements at the polls should be discouraged. As an example, on the first page they write about poll workers facing “long lines and limited time,” suggesting that may be a problem for them to check ID. I am not sure what their point may be as poll workers in states that require ID checking will still have to do so no matter how long the voter lines they have. Some states may not have long lines at the polls and voters may not have the “limited time” suggested in the report.

They selectively quote the Carter-Baker Commission study to suggest that “photographic ID requirements for in-person voting do little to address the problem of registration by mail” even though the Carter-Baker study actually promotes the idea of a photographic ID requirement at the polls. To be fair, they need to state that fact.

Their table on page 7 indicates that Missouri’s current ID requirement for first-time voters relies on HAVA requirements. It is my understanding that Missouri law requires that all voters must show some type of ID at the polls (therefore it should state “Provide ID” as they did in listing CO, CN and LA).

On page 9 and in subsequent pages they make reference to “voting age population” (VAP) data issued by the Census Bureau. Is all the data they represent in their analysis based on the VAP or do they take into consideration the Citizen Voting Age Population (CVAP), which takes into account the number of non-citizens who may be included in the VAP. It wasn’t clear. You may remember that Kim Brace talked about the VAP vs. CVAP issue with us extensively and indicated that the CVAP figure is always the better one to use when analyzing Census Bureau data against voting data. He also said that many of the non-citizens included in the VAP figures tend to be Hispanic. And since the Eagleton study is making conclusions that indicate that ID requirements may tend to reduce Hispanic voter turnout, it becomes important to understand which figures Eagleton uses.

I would like to know if the new Census report on the 2004 election released this week changes any of their perspectives.

On page 12 they make reference to the CPS data and indicate that it reported a voter turnout rate of 89%, which is much higher than other data reported (which is also explained in their narrative). However, while the report indicates that the CPS data is “widely-accepted,” it does make clear by whom. I think for credibility reasons they need more supporting language since there is a significant difference between a self-reported turnout of 89% and the reality of 63%.

Subject Comments regarding the Eagleton Report on Voter ID

Karen,

As you requested, here are my comments regarding the final draft Eagleton report on Voter ID.

While the report is generally acceptable, I don't believe the current draft is ready to be released.

I found some parts of the report to be misleading and, at times, appearing biased to support a view that imposing ID requirements at the polls should be discouraged. As an example, on the first page they write about poll workers facing "long lines and limited time," suggesting that may be a problem for the workers to check ID. I am not sure what their point may be, as poll workers in states that require ID checking will still have to do so, no matter how long the voter lines they have. Many states and their polling places may not have long lines at the polls, and thus voters may not have the "limited time" suggested in the report. They don't support their suggestion with hard data on long voter lines and time limits on poll workers.

They selectively quote the Carter-Baker Commission study to suggest that "photographic ID requirements for in-person voting do little to address the problem of registration by mail" even though the Carter-Baker study actually promotes the idea of a photographic ID requirement at the polls. To be fair, they need to state that fact and the reasons why the Carter-Baker Commission comes to that conclusion.

Their table on page 7 indicates that Missouri's current ID requirement for first-time voters relies on HAVA requirements. It is my understanding that Missouri law requires that all voters must show some type of ID at the polls (therefore it should state "Provide ID" as they did in listing CO, CN and LA requirements).

On page 9 and on subsequent pages they make reference to "voting age population" (VAP) data issued by the Census Bureau. Is all the data they represent in their analysis based on the VAP or do they take into consideration the Citizen Voting Age Population (CVAP), which takes into account the number of non-citizens who may be included in the VAP? It is not clear from the report. You may remember that Kim Brace discussed the VAP vs. CVAP issue with us extensively, and he indicated that the CVAP figure is always the better one to use when analyzing Census Bureau data against voting data. He also said that many of the non-citizens included in the VAP figures tend to be Hispanic. And since the Eagleton study is making conclusions that indicate that more stringent ID requirements may tend to reduce Hispanic voter turnout, it becomes important to understand which figures Eagleton uses, as Kim told us that VAP figures do not compensate for the non-citizen Hispanic voters that are included at a higher rate in the VAP (because as Kim stated most of the non-citizen population in the USA tends to be Hispanic).

I would like to know if the new Census report data on the 2004 election released on March 15, 2006 changes any of their perspectives. <http://www.census.gov/prod/2006pubs/p20-556.pdf>

On page 12 they make reference to the CPS data and indicate that it reported a voter turnout rate of 89%, which is much higher than other data reported (which is also explained in their narrative). However, while the report indicates that the CPS data is "widely-accepted," it does make clear by whom. I think for credibility reasons they need more supporting language since there is a significant difference between a self-reported turnout of 89% and the reality of 63%.

Considering that the beginning of the document reveals a bias towards lesser ID requirements, I believe that it is important to highlight earlier in the report the conclusion found on page 14 that concerns by critics of voter identification requirements for African-American and elderly voters "are not borne out by the results." This will provide at least some balance to the reader.

026703

On page 20 they indicate they lack good data on why voters must cast their ballots provisionally. I thought that our Election Day Survey captured some of that data.

It appears that a preponderance of their citations are from organizations or groups that support liberal positions on election issues, or take selective information from reports to support a more liberal interpretation of views on voter ID issues. Examples would include: Carter-Baker on page 1; Tova Wang on page 4; Carter-Baker on page 4; Brennan Center page 20. While many of published articles cited on pages 30 and 31 provide relatively neutral information, those that appear to take positions (read from the description of the articles) appear to favor a liberal position on most ID issues. I would have hoped they would have provided a more balanced approach. I don't see conservative writers, such as Thor Hearne, of the American Center for Voting Rights, quoted or cited once in the report. Mr. Hearne has testified before Congress and has had several articles that address voter identification issues.

I was pleased that they cited (on page 5) a recent March 15, 2006 article from the Arizona Republic that indicated that their stricter voter ID law went smoothly in its first use.

They might want to be aware (and perhaps mention) that the recommendation from Edward Foley cited on the bottom of page 21 was actually used in Haiti's recent February 7, 2006 presidential election. In addition to each voter being provided a picture ID by the election commission, that same picture was found next to the voters' name on the voter rolls that were used at the polling places. Perhaps they want to contact Scott Lansell of IFES for confirmation. The picture ID project for Haiti's election was financed and implemented by the Organization for American States (OAS). I believe turnout for that election was over 60% of those eligible.

Please let me know if you or anyone from Eagleton has questions regarding these comments. Thanks.

Subject Providing feedback to Eagleton prior to next Monday's  
close-out meeting

Commissioners-

I have gotten feedback on the Eagleton provisional identification research report/document and would like to pass on the general comments and questions to them **not later than COB tomorrow** .

Several of you have also suggested that **it would be good to go over , at your Thursday Commissioners meeting**, how the Commissioners will conduct the Monday meetings. You will recall that the Eagleton will conduct two sessions to accommodate the four Commissioners.

Subject Voting Fraud-Voter Intimidation Working Group Meeting

Dear Commissioners:

This is to let you know that the Working Group for our Voting Fraud and Voter Intimidation preliminary research project is scheduled to meet in EAC's large conference room the afternoon of Thursday, May 18. I will provide more information about this meeting to you later.

Peggy Sims  
Election Research Specialist

Subject Voting Fraud-Voter Intimidation Project Briefing

Dear Commissioners:

Attached is our consultants' analysis of the literature reviewed for the Voting Fraud-Voter Intimidation preliminary research project. It was not included in the information packets delivered to you on Friday, May 12, because we did not receive it until today. I thought you might be interested in having it prior to tomorrow's briefing.

Literature-Report Review Summary.doc

026716

## Existing Research Analysis

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the "second phase" of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book. Again, this is something that it is hoped will be addressed in the "second phase" of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.
- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.

- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

- e.** Compendium of states' legislation, procedures, and litigation (available as an electronic document)

## Appendix A Summary of Voter Identification Requirements By State

Prepared by  
Sara A. Sampson, Reference Librarian,  
The Ohio State University Moritz College of Law.

### Voter ID Requirements

State	Forms of ID Required 2004	Statutory Language	Statutory Citation
Alabama	Provide ID	<p>(b) Each elector shall provide identification to an appropriate election official prior to voting. A voter required to show identification when voting in person shall present to the appropriate election official either of the following forms of identification:</p> <p>(1) A current valid photo identification.</p> <p>(2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. The term "other government document" may include, but is not limited to, any of the following:</p> <p>a. A valid identification card issued by a branch, department, agency, or entity of the State of Alabama, any other state, or the United States authorized by law to issue personal identification.</p> <p>b. A valid United States passport.</p> <p>c. A valid Alabama hunting or fishing license.</p> <p>d. A valid Alabama permit to carry a pistol or revolver.</p> <p>e. A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States.</p> <p>f. A valid United States military identification card.</p> <p>g. A certified copy of the elector's birth certificate.</p> <p>h. A valid Social Security card.</p> <p>i. Certified naturalization documentation.</p> <p>j. A certified copy of court records showing adoption or name change.</p> <p>k. A valid Medicaid card, Medicare card, or an Electronic Benefits Transfer Card (formerly referred to as a "food stamp card").</p> <p>(c) For voters required to show identification when voting by mail, the voter shall submit with the ballot a copy of one of the forms of identification listed in subsection (b).</p> <p>(e) An individual required to present identification in accordance with this section who is unable to meet the identification requirements of this section shall be permitted to vote by a challenged or provisional ballot, as provided for by law.</p> <p>(f) In addition, an individual who does not have identification in his or her possession at the polls shall be permitted to vote if the individual is positively identified by two election officials as a voter on the poll list who is eligible to vote and the election official signs the voters list by where the voter signs.</p> <p>Effective Date: June 24, 2003</p>	Ala. Code § 17-11A-1
Alaska	Provide ID	<p>(a) Before being allowed to vote, each voter shall exhibit to an election official one form of identification, including</p> <p>(1) an official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, or hunting or fishing license; or</p> <p>(2) an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document; an item exhibited under this</p>	Alaska Stat. § 15.15.225

		<p>paragraph must show the name and current address of the voter.</p> <p>(b) An election official may waive the identification requirement if the election official knows the identity of the voter. The identification requirement may not be waived for voters who are first-time voters who initially registered by mail or by facsimile or other electronic transmission approved by the director under <u>AS 15.07.050</u>, and did not provide identification as required in <u>AS 15.07.060</u>.</p> <p>(c) A voter who cannot exhibit a required form of identification shall be allowed to vote a questioned ballot.</p> <p>effective June 17, 2003</p>	
Arizona	Provide ID	<p>B. If a statewide voter registration database is not yet operational, for any person who has registered to vote by mail for the first time in this state after January 1, 2003 or who is reregistering by mail after January 1, 2003 after moving from one county to another county in this state, the person shall comply with the following in order to be issued a ballot:</p> <p>1. The person shall present either one of the following:</p> <p>(a) A current form of identification that bears a photograph of the person and the name of the person.</p> <p>(b) A current utility bill, bank statement, paycheck, government issued check or other government document that shows the name and registration address of the person.</p> <p>2. If the person does not present a document that complies with paragraph 1, the person is only eligible to vote a provisional ballot as prescribed by <u>§ 16-584</u>.</p> <p>Effective Dec. 1, 2003</p>	Ariz. Rev. Stat. Ann. § 16-579
Arkansas	Provide ID	<p>7-5-305. Requirements.</p> <p>(a) Before a person is permitted to vote, the election official shall:</p> <p>(1) Request the voter to identify himself in order to verify the existence of his name on the precinct voter registration list;</p> <p>(2) Request the voter, in the presence of the election official, to state his address and state or confirm his date of birth;</p> <p>(3) Determine that the voter's date of birth and address are the same as those on the precinct voter registration list;</p> <p>(4) If the date of birth given by the voter is not the same as that on the precinct voter registration list, request the voter to provide identification as the election official deems appropriate;</p> <p>(5)(A) If the voter's address is not the same as that on the precinct voter registration list, verify with the county clerk that the address is within the precinct.</p> <p>(B) If the address is within the precinct, request the voter to complete a voter registration application form for the purpose of updating county voter registration record files.</p> <p>(C) If the address is not within the precinct, instruct the voter to contact the county clerk's office to determine the proper precinct;</p> <p>(6) If the voter's name is not the same as that on the precinct voter registration list, request the voter to complete a voter registration application form for purposes of updating county voter registration record files;</p> <p>(7) Request the voter, in the presence of the election official, to sign his name, including his given name, his middle name or initial, if any, and his last name in the space provided on the precinct voter registration list. If a person is unable to sign his signature or make his mark or cross, the election official shall enter his initials and the voter's date of birth in the space for the person's signature on the precinct voter registration list; and</p>	Arkansas Code Annotated § 7-5-305

		<p>(8)(A) Request the voter for purposes of identification to provide a valid driver's license, photo identification card issued by a governmental agency, voter card, social security card, birth certificate, United States passport, employee identification card issued by a governmental agency containing a photograph, employee identification card issued in the normal course of business of the employer, student identification card, Arkansas hunting license, or United States military identification card.</p> <p>(B)(i) If a voter is unable to provide this identification, the election official shall indicate on the precinct voter registration list that the voter did not provide identification.</p> <p>(ii) Following each election, the county board of election commissioners may review the precinct voter registration lists and may provide the information of the voters not providing identification at the polls to the prosecuting attorney.</p> <p>(iii) The prosecuting attorney may investigate possible voter fraud; and</p> <p>(9) Follow the procedures under §§ 7-5-310, 7-5-311, and 7-5-523, if the person is a disabled voter and presents himself or herself to vote.</p> <p>Effective: July 16, 2003</p>	
California	Sign Name	<p>Any person desiring to vote shall announce his or her name and address in an audible tone of voice, and when one of the precinct officers finds the name in the index, the officer shall in a like manner repeat the name and address. The voter shall then write his or her name and residence address or, if the voter is unable to write, shall have the name and residence address written by another person on a roster of voters provided for that purpose, whereupon a challenge may be interposed as provided in this article.</p> <p>(Enacted in 1994, no amendments since)</p>	Cal. Elec. Code § 14216
Colorado	Provide ID	<p>(1) Except as provided in subsection (4) of this section, any eligible elector desiring to vote shall show his or her identification as defined in <u>section 1-1-104(19.5)</u>, write his or her name and address on the signature card, and give the signature card to one of the election judges, * * *</p> <p>(4) An eligible elector who is unable to produce identification may cast a provisional ballot in accordance with article 8.5 of this title.</p> <p>(19.5)(a) "Identification" means:</p> <p>(I) A valid Colorado driver's license;</p> <p>(II) A valid identification card issued by the department of revenue in accordance with the requirements of part 3 of article 2 of title 42, C.R.S.;</p> <p>(III) A valid United States passport;</p> <p>(IV) A valid employee identification card with a photograph of the eligible elector issued by any branch, department, agency, or entity of the United States government or of this state, or by any county, municipality, board, authority, or other political subdivision of this state;</p> <p>(V) A valid pilot's license issued by the federal aviation administration or other authorized agency of the United States;</p> <p>(VI) A valid United States military identification card with a photograph of the eligible elector;</p> <p>(VII) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the elector;</p> <p>(VIII) A valid medicare or medicaid card issued by the United States health care</p>	Colo. Rev. Stat. Ann. § 1-7-110; Colo. Rev. Stat. Ann. § 1-1-104

		<p>financing administration;</p> <p>(IX) A certified copy of a birth certificate for the elector issued in the United States; or</p> <p>(X) Certified documentation of naturalization.</p> <p>(b) Any form of identification indicated in paragraph (a) of this subsection (19.5) that shows the address of the eligible elector shall be considered identification only if the address is in the state of Colorado.</p> <p>Effective 5/28/2004</p>	
Connecticut	Provide ID	<p>(a) In each primary, election or referendum, when an elector has entered the polling place, the elector shall announce the elector's street address, if any, and the elector's name to the checkers in a tone sufficiently loud and clear as to enable all the election officials present to hear the same. Each elector who registered to vote by mail for the first time on or after January 1, 2003, and has a "mark" next to the elector's name on the official registry list, as required by <u>section 9-23r</u>, shall present to the checkers, before the elector votes, either a current and valid photo identification that shows the elector's name and address or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the elector. Each other elector shall (1) present to the checkers the elector's Social Security card or any other preprinted form of identification which shows the elector's name and either the elector's address, signature or photograph, or (2) on a form prescribed by the Secretary of the State, write the elector's residential address and date of birth, print the elector's name and sign a statement under penalty of false statement that the elector is the elector whose name appears on the official checklist. Such form shall clearly state the penalty of false statement. A separate such form shall be used for each elector. If the elector presents a preprinted form of identification under subdivision (1) of this subsection, the checkers shall check the name of such elector on the official checklist. If the elector completes the form under subdivision (2) of this subsection, the assistant registrar of voters shall examine the information on such form and either instruct the checkers to check the name of such elector on the official checklist or notify the elector that the form is incomplete or inaccurate.</p> <p>Effective May 10., 2004</p>	Conn. Gen. Stat. Ann. § 9-261
Delaware	Provide ID	<p>(a) A voter, upon entering the room where an election is being held, shall announce his or her name and address and provide proof of identity, whereupon the clerks shall place a mark or make a notation of his or her name upon the election district record. In the event the voter does not have proof of identity with them, he or she shall sign an affidavit of affirmation that he or she is the person listed on the election district record.</p> <p>Effective: July 9, 2002</p>	15 Del. Code § 4937
D.C.	Sign Name	<p>(i)(1) A person shall be entitled to vote in an election in the District of Columbia if he or she is a duly registered voter. A qualified elector shall be considered duly registered in the District if he or she has met the requirements for voter registration and, on the day of the election, either resides at the address listed on the Board's records or files an election day change of address pursuant to this subsection.</p> <p>(2) Each registered voter who changes his or her place of residence from that listed on the Board's records shall notify the Board, in writing, of the new residence address. A change of address shall be effective on the date the notification was mailed as shown by the United States Postal Service postmark. If not postmarked, the notification shall be effective on the date of receipt by the Board. Change of address notifications from registrants shall be accepted pursuant to subsection (g) of this section, except that any registrant who has not notified the Board of his or her current residence address by the deadline established by subsection (g) of this section may be permitted to vote at the</p>	D.C. Code § 1-1001.07

		<p>polling place that serves the current residence address by filing an election day change of address notice pursuant to paragraph (4) of this subsection.</p> <p>(3) Each registered voter who votes at a polling place on election day shall affirm his or her residence address as it appears on the official registration roll for the precinct. The act of signing a copy of the official registration roll for the precinct shall be deemed affirmation of the voter's address as it appears on the Board's registration records.</p> <p>(Effective April 3, 2001)(not added as part of 2005 amendment)</p>	
Florida	Photo ID	<p>101.043 (1) The precinct register, as prescribed in s. 98.461, shall be used at the polls in lieu of the registration books for the purpose of identifying the elector at the polls prior to allowing him or her to vote. The clerk or inspector shall require each elector, upon entering the polling place, to present a current and valid picture identification as provided in s. 97.0535(3)(a). If the picture identification does not contain the signature of the voter, an additional identification that provides the voter's signature shall be required. The elector shall sign his or her name in the space provided, and the clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.</p> <p>(2) Except as provided in subsection (3), if the elector fails to furnish the required identification, or if the clerk or inspector is in doubt as to the identity of the elector, such clerk or inspector shall follow the procedure prescribed in s. 101.49.</p> <p>97.0535 (3)(a) The following forms of identification shall be considered current and valid if they contain the name and photograph of the applicant and have not expired:</p> <ol style="list-style-type: none"> <li>1. Florida driver's license.</li> <li>2. Florida identification card issued by the Department of Highway Safety and Motor Vehicles.</li> <li>3. United States passport.</li> <li>4. Employee badge or identification.</li> <li>5. Buyer's club identification.</li> <li>6. Debit or credit card.</li> <li>7. Military identification.</li> <li>8. Student identification.</li> <li>9. Retirement center identification.</li> <li>10. Neighborhood association identification.</li> <li>11. Entertainment identification.</li> <li>12. Public assistance identification.</li> </ol> <p>(b) The following forms of identification shall be considered current and valid if they contain the name and current residence address of the applicant:</p> <ol style="list-style-type: none"> <li>1. Utility bill.</li> </ol>	West's Fla. Stat. Ann. § 101.043 & West's Fla. Stat. Ann. § 97.0535

		<p>2. Bank statement.</p> <p>3. Government check.</p> <p>4. Paycheck.</p> <p>5. Other government document (excluding voter identification card).</p> <p>Version effective 1/1/2005-12/31/2005</p>	
Georgia	Provide ID	<p>(a) Each elector shall present proper identification to a poll worker at or prior to completion of a voter's certificate at any polling place and prior to such person's admission to the enclosed space at such polling place. Proper identification shall consist of any one of the following:</p> <p>(1) A valid Georgia driver's license;</p> <p>(2) A valid identification card issued by a branch, department, agency, or entity of the State of Georgia, any other state, or the United States authorized by law to issue personal identification;</p> <p>(3) A valid United States passport;</p> <p>(4) A valid employee identification card containing a photograph of the elector and issued by any branch, department, agency, or entity of the United States government, this state, or any county, municipality, board, authority, or other entity of this state;</p> <p>(5) A valid employee identification card containing a photograph of the elector and issued by any employer of the elector in the ordinary course of such employer's business;</p> <p>(6) A valid student identification card containing a photograph of the elector from any public or private college, university, or postgraduate technical or professional school located within the State of Georgia;</p> <p>(7) A valid Georgia license to carry a pistol or revolver;</p> <p>(8) A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States;</p> <p>(9) A valid United States military identification card;</p> <p>(10) A certified copy of the elector's birth certificate;</p> <p>(11) A valid social security card;</p> <p>(12) Certified naturalization documentation;</p> <p>(13) A certified copy of court records showing adoption, name, or sex change;</p> <p>(14) A current utility bill, or a legible copy thereof, showing the name and address of the elector;</p> <p>(15) A bank statement, or a legible copy thereof, showing the name and address of the elector;</p> <p>(16) A government check or paycheck, or a legible copy thereof, showing the name and address of the elector; or</p> <p>(17) A government document, or a legible copy thereof, showing the name and address of the elector.</p> <p>(b) If an elector is unable to produce any of the items of identification listed in subsection (a) of this Code section, he or she shall sign a statement under oath in a form approved by the Secretary of State, separate and distinct from the elector's voter certificate, swearing or affirming that he or she is the person identified on the elector's voter certificate. Such person shall be allowed to vote without undue delay; provided, however, that an elector who registered for the first time in this state by mail and did not provide one of the forms of identification set forth in subsection (a) of this Code section at the time of registration and who is voting for the first time may vote a provisional ballot pursuant to Code Section 21-2-418 upon swearing or affirming that the elector is the person identified in the elector's voter certificate. Such provisional ballot shall only be counted if the registrars are able to verify current and valid identification of the elector as provided in this Code section within the time period for verifying provisional ballots pursuant to Code Section 21-2-419. Falsely swearing or affirming such statement under oath shall be punishable as a felony, and the penalty shall be distinctly set forth on the face of the statement."</p> <p>effective June, 2003</p>	Ga. Code. Ann. § 21-2-417

Hawaii	Photo ID	<p>(b) The voter shall present valid identification to the official in charge of the pollbook.</p> <p><i>Do I Need an I.D. to Vote on Election Day?</i>  <b>Yes.</b> Be sure to have an I.D. with a picture and signature (such as a Hawaii driver's license or state I.D. card) when you go to vote. The NVRAC card is not an acceptable form of identification.</p> <p>From the 2004 version of the administrative code.</p> <p><b>§ 11-136 Poll book, identification, voting.</b></p> <p>Every person upon applying to vote shall sign the person's name in the poll book prepared for that purpose. This requirement may be waived by the chairperson of the precinct officials if for reasons of illiteracy or blindness or other physical disability the voter is unable to write. Every person shall provide identification if so requested by a precinct official. A poll book shall not contain the social security number of any person.</p> <p>After signing the poll book and receiving the voter's ballot, the voter shall proceed to the voting booth to vote according to the voting system in use in the voter's precinct. Idaho	Sign Name	<p>(1) An elector desiring to vote shall state his name and address to the judge or clerk in charge of the combination election record and poll book.</p> <p>(2) Before receiving his ballot, each elector shall sign his name in the combination election record and poll book following his name therein.</p> <p>(5) The elector shall then be given the appropriate ballots which have been stamped with the official election stamp and shall be given folding instructions for such ballots.</p> <p>(Last amended in 1972)</p>	Id. St. §34-1106
Illinois	Give Name	<p>Any person desiring to vote shall give his name and, if required to do so, his residence to the judges of election, one of whom shall thereupon announce the same in a loud and distinct tone of voice, clear, and audible; the judges of elections shall check each application for ballot against the list of voters registered in that precinct to whom absentee or early ballots have been issued for that election, which shall be provided by the election authority and which list shall be available for inspection by pollwatchers. A voter applying to vote in the precinct on election day whose name appears on the list as having been issued an absentee or early ballot shall not be permitted to vote in the precinct. All applicable provisions of Articles 4, 5 or 6 shall be complied with and if such name is found on the register of voters by the officer having charge thereof, he</p>	10 Ill. Comp. Stat. 5/17-9

		<p>shall likewise repeat said name, and the voter shall be allowed to enter within the proximity of the voting booths, as above provided. One of the judges shall give the voter one, and only one of each ballot to be voted at the election, on the back of which ballots such judge shall indorse his initials in such manner that they may be seen when each such ballot is properly folded, and the voter's name shall be immediately checked on the register list. In those election jurisdictions where perforated ballot cards are utilized of the type on which write-in votes can be cast above the perforation, the election authority shall provide a space both above and below the perforation for the judge's initials, and the judge shall endorse his or her initials in both spaces. Whenever a proposal for a constitutional amendment or for the calling of a constitutional convention is to be voted upon at the election, the separate blue ballot or ballots pertaining thereto shall, when being handed to the voter, be placed on top of the other ballots to be voted at the election in such manner that the legend appearing on the back thereof, as prescribed in Section 16-6 of this Act, shall be plainly visible to the voter. At all elections, when a registry may be required, if the name of any person so desiring to vote at such election is not found on the register of voters, he or she shall not receive a ballot until he or she shall have complied with the law prescribing the manner and conditions of voting by unregistered voters. If any person desiring to vote at any election shall be challenged, he or she shall not receive a ballot until he or she shall have established his right to vote in the manner provided hereinafter; and if he or she shall be challenged after he has received his ballot, he shall not be permitted to vote until he or she has fully complied with such requirements of the law upon being challenged. Besides the election officer, not more than 2 voters in excess of the whole number of voting booths provided shall be allowed within the proximity of the voting booths at one time. The provisions of this Act, so far as they require the registration of voters as a condition to their being allowed to vote shall not apply to persons otherwise entitled to vote, who are, at the time of the election, or at any time within 60 days prior to such election have been engaged in the military or naval service of the United States, and who appear personally at the polling place on election day and produce to the judges of election satisfactory evidence thereof, but such persons, if otherwise qualified to vote, shall be permitted to vote at such election without previous registration.</p>

Michigan	Sign Name	<p>(1) At each election, before being given a ballot, each registered elector offering to vote shall identify himself or herself by presenting an official state</p>	Mich. Comp. Laws Ann. §

		<p>identification card issued to that individual pursuant to Act No. 222 of the Public Acts of 1972, being sections 28.291 to 28.295 of the Michigan Compiled Laws, an operator's or chauffeur's license issued to that individual pursuant to the Michigan Vehicle Code, Act No. 300 of the Public Acts of 1949, being sections 257.1 to 257.923 of the Michigan Compiled Laws, or other generally recognized picture identification card and by executing an application showing his or her signature or mark and address of residence in the presence of an election official. If the voter registration cards are used in the precinct, the election official in charge of the precinct registration file shall compare the signature upon the application with the signature upon the registration card. If voter registration lists are used in the precinct, the election inspector shall determine if the name on the application to vote appears on the voter registration list. If the name appears on the voter registration list, the elector shall provide further identification by giving his or her date of birth or other information stated upon the voter registration list. In precincts using voter registration lists, the date of birth may be required to be placed on the application to vote. If the signature or an item of information does not correspond, the vote of the person shall be challenged, and the same procedure shall be followed as provided in this act for the challenging of an elector. If the person offering to vote has signed the registration card or application by making a mark, the person shall identify himself or herself by giving his or her date of birth, which shall be compared with the date of birth stated upon the registration card or voter registration list, or shall give other identification as may be referred to upon the registration card or voter registration list. If the elector does not have an official state identification card, operator's or chauffeur's license as required in this subsection, or other generally recognized picture identification card, the individual shall sign an affidavit to that effect before an election inspector and be allowed to vote as otherwise provided in this act. However, an elector being allowed to vote without the identification required under this subsection is subject to challenge as provided in section 727.</p> <p>(2) If, upon a comparison of the signature or other identification, it is found that the applicant is entitled to vote, the election officer having charge of the registration list shall approve the application and write his or her initials on the application, after which the number on the ballot issued shall be noted on the application. The application shall serve as 1 of the 2 poll lists required to be kept as a record of a person who has voted. The application shall be filed with the township, city, or village clerk. If voter registration cards are used in the precinct, the date of the election shall be noted by 1 of the election officials upon the precinct registration card of each elector voting at an election. If voter registration lists are used in the precinct, the election official shall clearly indicate upon the list each elector voting at that election. The clerk of a city, village, or township shall maintain a record of voting participation for each registered elector.</p> <p>The Attorney General declared that this statute violated the Equal Protection Clause of the Fourteenth Amendment. Op. Atty. Gen. 1997, No. 6930. That decision is binding on all state agencies.</p> <p>(Effective March 31, 1997)</p>	<p>168.523</p>
<p>Minnesota</p>	<p>Sign Name</p>	<p>(a) An individual seeking to vote shall sign a polling place roster which states that the individual is at least 18 years of age, a citizen of the United States, has resided in Minnesota for 20 days immediately preceding the election, maintains residence at the address shown, is not under a guardianship in which the court order revokes the individual's right to vote, has not been found by a court of law to be legally incompetent to vote or convicted of a felony without having civil rights restored, is registered and has not already voted in the election. The roster must also state: "I understand that deliberately providing false information is a felony punishable by not more than five years imprisonment and a fine of not</p>	<p>Minn. Stat. § 204C.10</p>

		<p>more than \$10,000, or both."</p> <p>(b) A judge may, before the applicant signs the roster, confirm the applicant's name, address, and date of birth.</p> <p>(c) After the applicant signs the roster, the judge shall give the applicant a voter's receipt. The voter shall deliver the voter's receipt to the judge in charge of ballots as proof of the voter's right to vote, and thereupon the judge shall hand to the voter the ballot. The voters' receipts must be maintained during the time for notice of filing an election contest.</p> <p>(Effective January 1, 2004)</p>	
Mississippi	Sign Name	<p>***</p> <p>When any person entitled to vote shall appear to vote, he shall first sign his name in a receipt book or booklet provided for that purpose and to be used at that election only and said receipt book or booklet shall be used in lieu of the list of voters who have voted formerly made by the managers or clerks; whereupon and not before, the initialing manager or, in his absence, the alternate initialing manager shall indorse his initials on the back of an official blank ballot, prepared in accordance with law, and at such place on the back of the ballot that the initials may be seen after the ballot has been marked and folded, and when so indorsed he shall deliver it to the voter, which ballot the voter shall mark in the manner provided by law, which when done the voter shall deliver the same to the initialing manager or, in his absence, to the alternate initialing manager, in the presence of the others, and the manager shall see that the ballot so delivered bears on the back thereof the genuine initials of the initialing manager, or alternate initialing manager, and if so, but not otherwise, the ballot shall be put into the ballot box; and when so done one (1) of the managers or a duly appointed clerk shall make the proper entry on the pollbook. If the voter is unable to write his name on the receipt book, a manager or clerk shall note on the back of the ballot that it was receipted for by his assistance.</p> <p>(Effective January 1, 1987)</p>	Miss. Code Ann. § 23-15-541
Missouri	Provide ID	<p>1. Before receiving a ballot, voters shall identify themselves by presenting a form of personal identification from the following list:</p> <p>(1) Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;</p> <p>(2) Identification issued by the United States government or agency thereof;</p> <p>(3) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;</p> <p>(4) A copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter;</p> <p>(5) Driver's license or state identification card issued by another state; or</p> <p>(6) Other identification approved by the secretary of state under rules promulgated pursuant to subsection 3 of this section other identification approved by federal law. Personal knowledge of the voter by two supervising election judges, one from each major political party, shall be acceptable voter identification upon the completion of a secretary of state-approved affidavit that is signed by both supervisory election judges and the voter that attests to the personal knowledge of the voter by the two supervisory election judges. The secretary of state may provide by rule for a sample affidavit to be used for such purpose.</p> <p>(Last amended in 2002)</p>	Mo. Rev. Stat. §115.427.1

Montana	Provide ID	<p>(1) (a) Before an elector is permitted to receive a ballot or vote, the elector shall present to an election judge a current photo identification showing the elector's name. If the elector does not present photo identification, including but not limited to a valid driver's license, a school district or postsecondary education photo identification, or a tribal photo identification, the elector shall present a current utility bill, bank statement, paycheck, notice of confirmation of voter registration issued pursuant to 13-2-207, government check, or other government document that shows the elector's name and current address.</p> <p>(From 2004 version of the Montana Code Annotated; No updates in 2004, only in 2005 [ Unrelated section was amended in 2005])</p>	Mont. Code. Ann. §13-13-114(1)(a)
Nebraska	Sign Name	<p>(1) The clerks of election shall have a list of registered voters of the precinct and a sign-in register at the polling place on election day. The list of registered voters shall be used for guidance on election day and may be in the form of a computerized, typed, or handwritten list or precinct registration cards. Registered voters of the precinct shall place and record their signature in the sign-in register before receiving any ballot. The list of registered voters and the sign-in register may be combined into one document.</p> <p>(Last amended in 2003)</p> <p>Official ballots shall be used at all elections. No person shall receive a ballot or be entitled to vote unless and until he or she is registered as a voter except as provided in section 32-914.01, 32-914.02, 32-915, 32-915.01, or 32-936. Except as otherwise specifically provided, no ballot shall be handed to any registered voter at any election until (1) he or she announces his or her name and address to the clerk of election, (2) the clerk has found that he or she is a registered voter at the address as shown by the precinct list of registered voters unless otherwise entitled to vote in the precinct under section 32-328, 32-914.01, 32-914.02, 32-915, or 32-915.01, (3) if the voter registered by mail after January 1, 2003, and has not previously voted in an election for a federal office within the county, the clerk shall ask the registered voter to present a photographic identification which is current and valid or a copy of a utility bill, bank statement, government check, paycheck, or other government document that is current and that shows the name and address of the voter, (4) the clerk has instructed the registered voter to personally write his or her name in the precinct sign-in register on the appropriate line which follows the last signature of any previous voter, and (5) the clerk has listed on the precinct list of registered voters the corresponding line number and name of the registered voter.</p> <p>(Last updated in 2003)</p>	<p>Neb. Rev. Stat. § 32-913</p> <p>Neb. Rev. Stat. § 32-914</p>
Nevada	Match Sig.	<p>1. Except as otherwise provided in <u>NRS 293.541</u>, if a person's name appears in the election board register or if he provides an affirmation pursuant to <u>NRS 293.525</u>, he is entitled to vote and must sign his name in the election board register when he applies to vote. His signature must be compared by an election board officer with the signature or a facsimile thereof on his original application to register to vote or one of the forms of identification listed in subsection 2.</p> <p>2. Except as otherwise provided in <u>NRS 293.2725</u>, the forms of identification which may be used individually to identify a voter at the polling place are:</p> <p>(a) The card issued to the voter at the time he registered to vote;</p> <p>(b) A driver's license;</p> <p>(c) An identification card issued by the Department of Motor Vehicles;</p> <p>(d) A military identification card; or</p>	Nev. Rev. Stat. § 293.277

		(e) Any other form of identification issued by a governmental agency which contains the voter's signature and physical description or picture.  Last Amendment Effective Jan. 1, 2004.	
NH	Give Name	A person desiring to vote shall, before being admitted to the enclosed space within the guardrail, announce his or her name to one of the ballot clerks who shall thereupon repeat the name; and, if the name is found on the checklist by the ballot clerk, the ballot clerk shall put a checkmark beside it and again repeat the name. The ballot clerk shall state the address listed on the checklist for the voter, and ask if the address is correct; if the address on the checklist is not correct, the ballot clerk shall correct the address in red on the checklist. The voter, if still qualified to vote in the town or ward and unless challenged as provided for in <u>RSA 659:27-33</u> , shall then be allowed to enter the space enclosed by the guardrail. After the voter enters the enclosed space, the ballot clerk shall give the voter one of each ballot to be voted on in that election which shall be folded as it was upon receipt from the secretary of state.  Last Amendment Effective July 2, 2002.	N.H. Rev. Stat. Ann. 659:13
New Jersey	Match Sig.	19:15-17. Comparison of signatures or statements made openly; provisional ballots for newly registered voters without proper identification  a. The comparison of signatures of a voter made upon registration and upon election day, and if the voter alleges his inability to write, the comparison of the answers made by such voter upon registration and upon election day, shall be had in full view of the challengers.  b. If a voter has registered by mail after January 1, 2003 to vote for the first time in his or her current county of residence and did not provide personal identification when registering pursuant to section 16 of P.L.1974, c. 30 (C.19:31-6.4), the voter shall be permitted to vote starting at the first election held after January 1, 2004 at which candidates are seeking federal office after displaying one of the following items: (1) a current and valid photo identification card; (2) a current utility bill, bank statement, government check or pay check; (3) any other government document that shows the voter's name and current address; or (4) any other identifying document that the Attorney General has determined to be acceptable for this purpose. If the voter does not display one of these documents, the voter shall not be permitted to vote by machine but shall instead be provided with a provisional ballot, pursuant to the provisions of P.L.1999, c. 232 (C.19:53C-1 et seq.). This subsection shall not apply to any voter entitled to vote by absentee ballot under the "Uniformed and Overseas Citizens Absentee Voting Act" (42 U.S.C. 1973ff-1 et seq.) or to any voter who is provided the right to vote other than in person under section 3 of Pub.L.98-435, the "Voting Accessibility for the Elderly and Handicapped Act," or any other voter entitled to vote otherwise than in person under any other federal law. This subsection shall also not apply to any person who registers to vote by appearing in person at any voter registration agency or to any person whose voter registration form is delivered to the county commissioner of registration or to the Attorney General, as the case may be, through a third party by means other than by mail delivery.  c. Each county commissioner of registration shall collect and maintain, in the manner prescribed by the Attorney General, the information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31-6.4). Access to the personal identification information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31-6.4) shall be prohibited, in accordance with subsection a. of section 6 of P.L.2001, c. 404 (C.47:1A-5).  Last Amendment Effective July 9, 2004	N.J. Stat. Ann. 19:15-17
New Mexico	Sign Name	D. The judge assigned to the voter list used for confirmation of registration and voting shall determine that each person offering to vote is registered and, in the	N.M. Stat. Ann §1-5-10

		<p>case of a primary election, that the voter is registered in a party designated on the primary election ballot. If the person's registration is confirmed by the presence of his name on the voter list or if the person presents a certificate under the seal and signature of the county clerk showing that he is entitled to vote in the election and to vote in that precinct, the judge shall announce to the election clerks the list number and the name of the voter as shown on the voter list.</p> <p>E. The election clerk shall locate that list number and name on the signature roster and shall require the voter to sign his usual signature or, if unable to write, to make his mark opposite his printed name. If the voter makes his mark, it shall be witnessed by one of the judges of the precinct board. If the signature roster indicates that the voter is required to present a form of identification before voting, the election judge shall ask the voter for a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows and matches the name and address of the voter as indicated on the signature roster. If the voter does not provide the required identification, he shall be allowed to vote on a provisional paper ballot.</p> <p>G. A voter shall not be permitted to vote until he has properly signed his usual signature or made his mark in the signature roster.</p> <p>(From 2004 version of New Mexico Annotated Statutes, amended in 2005 to require presentation of ID)</p>	<p>(Recompiled as §1-12 -7.1 by L. 2005, Ch. 270, §63, effective July 1, 2005)</p>
<p>New York</p>	<p>Match Sig.</p>	<ol style="list-style-type: none"> <li>1. A person before being allowed to vote shall be required, except as provided in this chapter, to sign his name on the back of his registration poll record on the first line reserved for his signature at the time of election which is not filled with a previous signature, or on the line of the computer generated registration list reserved for his signature. The two inspectors in charge shall satisfy themselves by a comparison of this signature with his registration signature and by comparison of his appearance with the descriptive material on the face of the registration poll record that he is the person registered. If they are so satisfied they shall enter the other information required for the election on the same line with the voter's latest signature, shall sign their names or initials in the spaces provided therefor, and shall permit the applicant to vote. Any inspector or inspectors not satisfied shall challenge the applicant forthwith.</li> <li>2. If a person who alleges his inability to sign his name presents himself to vote, the board of inspectors shall permit him to vote, unless challenged on other grounds, provided he had been permitted to register without signing his name. The board shall enter the words "Unable to Sign" in the space on his registration poll record reserved for his signature or on the line of the computer generated registration list reserved for his signature at such election. If his signature appears upon his registration record or upon the computer generated registration list the board shall challenge him forthwith, except that if such a person claims that he is unable to sign his name by reason of a physical disability incurred since his registration, the board, if convinced of the existence of such disability, shall permit him to vote, shall enter the words "Unable to Sign" and a brief description of such disability in the space reserved for his signature at such election. At each subsequent election, if such disability still exists, he shall be entitled to vote without signing his name and the board of inspectors, without further notation, shall enter the words "Unable to Sign" in the space reserved for his signature at such election.</li> <li>3. The voter's signature made by him upon registration and his signature made at subsequent elections shall be effectively concealed from the voter by a blotter or piece of opaque paper until after the voter shall have completed his signature.</li> <li>4. In any case where a person who has heretofore voted has placed his voting signature on the back of his registration poll record on the first or any succeeding line or lines at the time or times of an election, instead of on the last line of the</li> </ol>	<p>N.Y. Law § 8-304 (McKinney)</p>

		<p>space thereon required to be reserved for such voting signatures and on any lines next running upward therefrom, the inspectors of election shall obliterate such misplaced signature or signatures, initial the obliteration and require such voter to sign his name again in the correct place on such registration poll record.</p> <p>5. Any person who has heretofore registered and who at such time placed his or her registration signature on the back of the registration poll record otherwise than in the space required to be provided therefor at the bottom of such poll record, shall, before being permitted to vote at any election thereafter, subscribe a new registration signature for himself on the last line at the bottom of such poll record, and, at the same time, if the inspectors of election are satisfied that the signatures were made by the same person, obliterate his original registration signature placed elsewhere than on the bottom of such record. Such obliterations may be made by crossing out the signature so as to completely efface the same or by affixing thereover a piece of gummed tape of a size sufficient only to cover such signature and of a type adequate to fully conceal the same Last Amended 1986</p>	
North Carolina	Give Name	<p>(a) Checking Registration. --A person seeking to vote shall enter the voting enclosure through the appropriate entrance. A precinct official assigned to check registration shall at once ask the voter to state current name and residence address. The voter shall answer by stating current name and residence address. In a primary election, that voter shall also be asked to state, and shall state, the political party with which the voter is affiliated or, if unaffiliated, the authorizing party in which the voter wishes to vote. After examination, that official shall state whether that voter is duly registered to vote in that precinct and shall direct that voter to the voting equipment or to the official assigned to distribute official ballots. If a precinct official states that the person is duly registered, the person shall sign the pollbook, other voting record, or voter authorization document in accordance with subsection (c) of this section before voting.</p>	N.C. Gen. Stat. Ann. § 163-166.7
North Dakota	Provide ID	<p>16.1-05-07 Poll clerks to check identification and verify eligibility -- Poll clerks to request, correct, and update incorrect information contained in the pollbook.</p> <p>1. Before delivering a ballot to an individual according to section 16.1-13- 22, the poll clerks shall request the individual to show a driver's license issued by the state, another form of identification displaying a photograph of the individual and the individual's date of birth, or another appropriate form of identification prescribed by the secretary of state. If an individual offering to vote fails or refuses to show an appropriate form of identification, the individual may be allowed to vote without being challenged according to section 16.1-05-06 if the individual provides to the election board the individual's date of birth and if a member of the election board or a clerk knows the individual and can personally vouch that the individual is a qualified elector of the precinct. After verifying that the individual's name is contained in the pollbook generated from the central voter file, poll clerks shall verify the individual's residential address and mailing address, if different from the individual's residential address.</p> <p>(From 2003 version of N.D. Century Code; only amendment to this statute that became effective in 2003 was in 2005)</p>	N.D. Cent. Code § 16.1-05-07

Ohio	Match Sig.	<p>When an elector appears in a polling place to vote he shall announce his full name and address to the precinct election officials. He shall then write his name and address at the proper place in the poll lists or signature pollbooks provided therefore, except that if, for any reason, an elector shall be unable to write his name and address in the poll list or signature pollbook, the elector may make his mark at the place intended for his name and a precinct official shall write the name of the elector at the proper place on the poll list or signature pollbook following the elector's mark, upon the presentation of proper identification. The making of such mark shall be attested by the precinct official who shall evidence the same by signing his name on the poll list or signature pollbook as a witness to such mark.</p> <p>The elector's signature in the poll lists or signature pollbooks shall then be compared with his signature on his registration form or a digitized signature list as provided for in section 3503.13 of the Revised Code, and if, in the opinion of a majority of the precinct election officials, the signatures are the signatures of the same person, the clerks shall enter the date of the election on the registration form or shall record the date by such other means as may be prescribed by the secretary of state. If the right of the elector to vote is not then challenged, or, if being challenged, he establishes his right to vote, he shall be allowed to proceed into the voting machine. If voting machines are not being used in that precinct, the judge in charge of ballots shall then detach the next ballots to be issued to the elector from Stub B attached to each ballot, leaving Stub A attached to each ballot, hand the ballots to the elector, and call his name and the stub number on each of the ballots. The clerk shall enter the stub numbers opposite the signature of the elector in the pollbook. The elector shall then retire to one of the voting compartments to mark his ballots. No mark shall be made on any ballot which would in any way enable any person to identify the person who voted the ballot.</p> <p>(Effective at time of last update, 1992 H 182, eff. 4-9-93)</p>	Ohio Rev. Penn.	Match Sig.	<p>(a.3) All electors, including any elector that shows identification pursuant to subsection (a), shall subsequently sign a voter's certificate, and, unless he is a State or Federal employee who has registered under any registration act without declaring his residence by street and number, he shall insert his address therein, and hand the same to the election officer in charge of the district register. Such election officer shall thereupon announce the elector's name so that it may be heard by all members of the election board and by all watchers present in the</p>	25 Pa. Stat. Ann. § 3050

		<p>polling place and shall compare the elector's signature on his voter's certificate with his signature in the district register. If, upon such comparison, the signature upon the voter's certificate appears to be genuine, the elector who has signed the certificate shall, if otherwise qualified, be permitted to vote: Provided, That if the signature on the voter's certificate, as compared with the signature as recorded in the district register, shall not be deemed authentic by any of the election officers, such elector shall not be denied the right to vote for that reason, but shall be considered challenged as to identity and required to make the affidavit and produce the evidence as provided in subsection (d) of this section. When an elector has been found entitled to vote, the election officer who examined his voter's certificate and compared his signature shall sign his name or initials on the voter's certificate, shall, if the elector's signature is not readily legible, print such elector's name over his signature, and the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes shall also be entered by one of the election officers or clerks. As each voter is found to be qualified and votes, the election officer in charge of the district register shall write or stamp the date of the election or primary, the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes, and shall sign his name or initials in the proper space on the registration card of such voter contained in the district register.</p> <p>(In effect at time of, and unaltered by: 2004, Oct. 8, P.L. 807, No. 97, § 5.1 (changes procedure for first time voters, not established voters))</p>	
<p>Rhode Island</p>	<p>Give Name</p>	<p>(a) Each person desiring to vote shall state his or her name and residence, including that person's street address, if he or she has any, to one of the first pair of bi-partisan supervisors, who shall then announce the name and residence in a loud and distinct voice, clear and audible. As each voter's name is announced, the voter shall be handed a ballot application in the following form:  <b>BALLOT APPLICATION</b></p> <p>(Poll List)          Senatorial District _____          Representative District _____          Voting District _____</p> <p>Election          Date _____</p> <p>I hereby certify that I am a registered and qualified elector in the above voting district of          City of _____</p> <p>and hereby make application for ballots to be voted at this election.</p> <p>_____</p> <p>(Signature of Voter)</p> <p>_____</p> <p>(Residence Address)</p> <p>Number Approved _____</p> <p>(Supervisor of Election)</p>	<p>R.I. Gen. Laws § 17-19-24</p>

		<p>(b) The voter shall sign the application in the presence and view of a bipartisan pair. They shall locate the voter's name on the certified voting list for the voting district. Upon finding the voter's name on the certified voting list for the district, they shall initial the ballot application in the place provided next to the word "Approved" and shall enter on the certified list of voters a proper notation that the applicant has voted in the election. They shall then return the ballot application to the voter who shall pass down the line and present it to the clerk. After the voter has handed the approved ballot application to the clerk, the clerk shall provide the voter with the appropriate computer ballot and security sleeve, the warden shall direct the voter to the voting booth which the voter shall use, and unless the voter needs instruction or assistance as provided in this chapter, the voter shall cast his or her vote, and if he or she desires place the voted computer ballot in a security sleeve, and shall proceed to the optical scan precinct count unit and shall personally place his or her voted ballot into the designated ballot slot on the unit, and after doing so, shall leave the enclosure at once. No voter shall remain within the voting booth longer than ten (10) minutes, and if the voter refuses to leave after the lapse of ten (10) minutes, the voter shall be removed from the voting booth by order of the warden. Except for the election officials and the election inspector, not more than two (2) voters in excess of the number of voting booths shall be permitted within the enclosed space at any time.</p> <p>(Last amended 2004, Current through January 2005 Session)</p>	
South Carolina	Photo ID	<p><b>§ 7-13-710. Proof of right to vote; signing poll list; comparison of signatures.</b></p> <p>When any person presents himself to vote, he shall produce his valid South Carolina driver's license or other form of identification containing a photograph issued by the Department of Motor Vehicles, if he is not licensed to drive, or the written notification of registration provided for by §§ 7-5-125 and 7-5-180 if the notification has been signed by the elector. If the elector loses or defaces his registration notification, he may obtain a duplicate notification from his county board of registration upon request in person, or by telephone or mail. After presentation of the required identification, his name must be checked by one of the managers on the margin of the page opposite his name upon the registration books, or copy of the books, furnished by the board of registration. The managers shall keep a poll list which must contain one column headed "Names of Voters". Before any ballot is delivered to a voter, the voter shall sign his name on the poll list, which must be furnished to the appropriate election officials by the State Election Commission. At the top of each page the voter's oath appropriate to the election must be printed. The signing of the poll list or the marking of the poll list is considered to be an affirmation of the oath by the voter. One of the managers shall compare the signature on the poll list with the signature on the voter's driver's license, registration notification, or other identification and may require further identification of the voter and proof of his right to vote under this title as he considers necessary. If the voter is unable to write or if the voter is prevented from signing by physical handicap, he may sign his name to the poll list by mark with the assistance of one of the managers.</p> <p>Last amended: 1968</p>	S.C. Code Ann. § 7-13-710
South Dakota	Photo ID	<p>When a voter is requesting a ballot, the voter shall present a valid form of personal identification. The personal identification that may be presented shall be either:</p> <ol style="list-style-type: none"> <li>(1) A South Dakota driver's license or nondriver identification card;</li> <li>(2) A passport or an identification card, including a picture, issued by an agency of the United States government;</li> <li>(3) A tribal identification card, including a picture; or</li> <li>(4) An identification card, including a picture, issued by a high school or an accredited institution of higher education, including a university, college, or</li> </ol>	S.D. 		<p>technical school, located within the State of South Dakota.</p> <p>Last amended March 2004</p>	
Tennessee	Provide ID	<p>Identification of eligible voters</p> <p>(a)(1) A voter shall sign an application for ballot, indicate the primary in which the voter desires to vote, if any, and present it to a registrar. The application for ballot shall include thereon a space for the address of the voter's current residence, and the voter shall write or print such address on the application when the voter signs it. The registrar shall compare the signature and information on the application with the signature and information on the duplicate permanent registration record. The registrar shall make a determination whether the voter's address is different from the address on the voter's permanent registration record or if the registration is in inactive status. If the voter has changed residence, or the voter's registration is inactive, the registrar shall follow the procedures for voting pursuant to § 2-7-140. If, upon comparison of the signature and other identification, it is found that the applicant is entitled to vote, the registrar shall initial the application and shall note on the reverse side of the voter's duplicate permanent registration record the date of the election, the number of the voter's ballot application, and the elections in which the voter votes. If the applicant's signature is illegible, the registrar shall print the name on the application. The registrar shall give the voter the ballot application which is the voter's identification for a paper ballot or ballots or for admission to a voting machine. The voter shall then sign the duplicate poll lists without leaving any lines blank on any poll list sheet.</p> <p>(2) In any computerized county, the county election commission shall have the option of using an application for a ballot as provided in this section, or using the computerized voter signature list. A computerized voter signature list shall include the voter's name, current address of residence, social security number or registration number, birth date and spaces for the voter's signature, elections voted, ballot number and precinct registrar's initials. The following procedures shall be followed in the case of computerized voter signature lists:</p> <p>(A) The voter shall sign the signature list and indicate the election or elections the voter desires to vote in and verify the voter's address in the presence of the precinct registrar;</p> <p>(B) The registrar shall compare the voter's signature and information on the signature list with other evidence of identification supplied by the voter. If, upon comparison of the signature and other evidence of identification, it is found that the applicant is entitled to vote, the registrar shall initial the signature list;</p> <p>(C) If the applicant's signature is illegible, the registrar shall print the name of the applicant on the voter list; and</p> <p>(D) If a voter is unable to present any evidence of identification specified in subsection (c), the voter shall be required to execute an affidavit of identity on a form provided by the county election commission.</p> <p>Last amended 2003</p>	Tenn. Code Ann. § 2-7-112

## APPENDIX B – Court Decisions and Literature on Voter Identification and Related Issues

### Court Decisions

#### **Summary of Relevant Cases:**

#### **Challenges Prevailed:**

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### **Challenges Rejected:**

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters’ identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions’ purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

*McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

*Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

*Perez v. Riddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

**Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

**Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

**Current Litigation Concerning Voter ID Issues<sup>1</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>1</sup> As of January 2, 2006

**Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>2</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>3</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

***Indiana*** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>2</sup> Litigation documents are available at the Election Law @ Moritz website.  
<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

<sup>3</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>4</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>4</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

## Appendix C

### Analysis of Effects of Voter Identification Requirements on Turnout

Tim Vercellotti  
 Eagleton Institute of Politics  
 Rutgers University  
 May 16, 2006

#### Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns whether such requirements dampen turnout among those eligible to vote. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics of voter identification requirements contend that the effect is greater based on specific types of requirements. Critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card, such as a driver's license. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. This report draws from two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

#### Types of voter identification requirements

Based on research by the Moritz College of Law, states had one of five types of requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (10 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>5</sup> It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

---

<sup>5</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). For the purposes of this analysis I also tested the array of minimum identification requirements to assess whether they posed increasing levels of demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

### **Estimating turnout among citizens in the voting-age population**

This report examines turnout among U.S. citizens of voting age in both the aggregate- and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000.<sup>6</sup>

### **Analysis of aggregate data**

If one treats maximum voter identification requirements as a continuous variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter

---

<sup>6</sup> McDonald and Popkin (2001) recommend an even more stringent approach to voter turnout calculations. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

identification requirements ( $r = -.30$ ,  $p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20$ ,  $p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.2 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, I opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>7</sup>

Voter identification requirements alone do not determine voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county.

I coded the voter identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

To capture electoral context I included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus I added a variable to reflect the number of days between each state's registration deadline and the election.<sup>8</sup>

<sup>7</sup> Treating maximum voter identification requirements as a continuous variable yielded results in which voter identification requirements were negatively related to aggregate turnout. Those results can be found in Table A-1 in the Appendix to this report.

<sup>8</sup> For states that had Election Day registration or no registration requirement (North Dakota), I assigned a value of zero to this variable.

Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the median household income for 2002 in each county.<sup>9</sup>

I estimated a series of random effects models to account for the likelihood that data from counties were correlated within each state (for further explanation of random effects and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).<sup>10</sup> I allowed the median income variable to have both fixed and random effects in each state to take into account variation in the cost of living in each state. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the estimated citizen voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, two of the four requirements had a small and negative effect on turnout in 2004: matching one's signature and providing a non-photo identification. Taking into account the reference variable of stating one's name, the results indicate that turnout was lower in states that required signature matches or a non-photo identification than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Two contextual factors -- whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate-- increased voter turnout. The time between the closing date for registration and the election had a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income had positive effects on turnout. The percentage of African-Americans in the county did not have a significant effect.

The effects of the minimum voter identification requirements were non-existent. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to have a negative effect on turnout, as did the number of days between the closing date for registration and the election.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. A chi-square test of the difference in the deviance for each model (represented by  $-2 \log$  likelihood in Table 2),

<sup>9</sup> To bring the income figures into a scale comparable to those of the other variables, I used the natural log of median household income.

<sup>10</sup> The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .43, indicating considerable variation between the states.

showed no significant improvement by including the interactions ( $p > 0.05$ ). I report the coefficients for the models with the interactions in the Appendix in tables A-2 and A-3.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the identification requirements for voting vary, so does turnout. Specifically, in terms of the maximum requirements, the results suggest that requiring a signature match or non-photo identification is negatively related to turnout compared to requiring that a voter state his or her name. But the analysis showed that adding interactions between identification requirements and the percentage of the county that was African-American or Hispanic did not improve the fit of the model to the data.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>11</sup> Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

### Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>12</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens because the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>13</sup> As in the analysis of aggregate data, I coded the voter

<sup>11</sup> A reviewer for an earlier version of this paper recommended adding an education variable to the aggregate model. One version of the aggregate model not reported here included the percentage of adults in the county who had at least a college degree. The measure was highly collinear with the percentage of residents living below the poverty line, necessitating removal of the college degree variable from the model.

<sup>12</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

<sup>13</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown

identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.<sup>14</sup>

In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate data analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less.<sup>15</sup> At the individual level, I controlled for gender, household income, and dummy variables for race/ethnicity, age and education. In terms of race and ethnicity, I created dummy variables to represent whether a voter was Black/non-Hispanic, Hispanic, or Asian (with white/non-Hispanic/other voters as the omitted category for reference purposes). I separated education into five dummy variables: less than high school, high school diploma, some college, college graduate, and graduate training. I omitted the "less than high school" variable from the model for reference purposes. Regarding age, I created four dummy variables to represent 18 to 24 years of age, 29 to 44, 45 to 64, and 65 years and older. I omitted the 18-to-24 category as the reference variable in the model.

Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

## Results

---

that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>14</sup> Earlier versions of this paper included an individual-level analysis that included the five maximum voter identification requirements combined into a continuous variable. The results of that analysis, which found that voter identification requirements had a negative relationship with turnout, can be found in table A-4 in the Appendix.

<sup>15</sup> Given that the individual-level analysis focused on registered voters (as opposed to the citizen voting-age population in the aggregate analysis), I did not include the closing date for registration as a predictor of turnout in the individual-level analysis.

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted. I estimated the models using robust standard errors to control for correlated error terms for observations from within the same state.

[Table 3 here]

The two models in Table 3 use either the maximum or minimum voter identification requirements in each state. The two models generate similar results. In each model, three of the voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. In other words, compared to states that require voters only to state their names, the requirements to sign one's name, provide a non-photo identification, photo identification in the maximum requirements or affidavit in the minimum requires exert a negative influence on turnout.

Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had finished high school. Respondents who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>16</sup> I calculated the probabilities taking into account both maximum and minimum requirements.

[Table 4 here]

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability appear to decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>17</sup> In terms of the

<sup>16</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

<sup>17</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of

minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter identification requirements. But incorporating dummy variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, I divided the sample into sub-samples and re-ran the probit models.

[Table 5 here]

The effects of voter identification requirements were similar for white voters compared to the entire sample, which was not surprising given that white voters comprised 81 percent of the sample. Voters in states where the maximum requirement involved signing one's name, providing a non-photo identification or photo identification were less likely to vote than those in a state that required voters to give their names. Taking into consideration the minimum requirements, this was true only for voters in states that require a non-photo identification or an affidavit. White voters in photo identification states were 3.7 percent less likely to vote than were white voters in states where respondents gave their names. The difference in probability was 4.4 percent for voters in states where an affidavit was the minimum requirement.

Voter identification requirements also influenced turnout among Black voters, but to a lesser extent relative to white voters.

[Table 6 here]

Of the maximum voter identification requirements, only the non-photo identification requirement reduced turnout compared to turnout in states that required voters to state their names. The predicted probability of voting was 5.7 percent lower for Black respondents in states that required non-photo identification. In terms of age, only African-Americans age 65 and older were more likely to vote than respondents in the 18 to 24 referent group. Respondents in all levels of education were more likely to vote than respondents without a high school diploma. Gender, income, living in a battleground state, being a part of the workforce and having been born in the United States also were positive predictors. Recent mobility tended to lower the probability of voting. None of the minimum identification requirements had a significant effect on voting, while most of the remaining variables had effects similar to those in the maximum requirement model.

---

all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

Hispanic voters also were less likely to vote in states that required non-photo identification as opposed to stating one's name.

[Table 7 here]

Using the coefficients from Table 7 to calculate predicted probabilities, for both the maximum and minimum requirements, Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. Hispanic voters ages 45 to 64 and 65 and over were more likely to vote than their 18-to-24-year-old counterparts. Education and income also were positive predictors of voting. Interestingly, being a native-born citizen lowered the probability of voting, while native-born citizenship was a positive predictor for African-American voters and was not a predictor at all for white voters. It may be that naturalized citizens of Hispanic descent are more conscious of the value of voting rights than other groups.

Varying voter identification requirements influenced Asian-American voters as well. As with Hispanic and Black voters, Asian-American voters were less likely to turn out in states with non-photo identification requirements than in states where voters gave their names.

[Table 8 here]

Using the probit coefficients to calculate predicted probabilities, Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement. Asian-American voters also were 2.2 percent less likely to vote when signatures were the maximum requirement compared to stating one's name.

In terms of other predictors, there were no significant differences in terms of age or income. In contrast to Hispanic voters, where one was a naturalized or natural-born citizen did not affect the probability of voting. Those with high school or college diplomas or graduate training were more likely to turn out than those with less than a high school diploma. Women and married voters also were more likely to turn out than men and voters who were not married.

## **Discussion and conclusion**

The results presented here provide evidence that as voter identification requirements vary, voter turnout does as well. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant.

In the aggregate data, requirements that voters match signatures on file, provide a non-photo identification or photo identification had negative effects on turnout compared to requiring that voters state their names. Interactions with specific groups – African-Americans and Hispanics – did not improve the fit of the aggregate data to the models. But differences emerged among specific groups in the individual-level data. The signature, non-photo identification and photo identification requirements all had negative effects compared to the requirement that voters simply state their names. These effects translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For

example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters (the gap widened to 3.7 percent for white voters when comparing photo identification to simply stating one's name).

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This begs the question as to why photo identification requirements did not have a greater influence in 2004. It may have been due to the fact that photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?<sup>18</sup> Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

---

<sup>18</sup> The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using the November 2004 Current Population Survey data and voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Of all of the voter identification requirements, only requiring signatures or matching signatures had a significant effect on whether a respondent said he or she was registered to vote in 2004. In each instance the effect was negative.

## The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

## REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

---

### Report Background

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

### EXECUTIVE SUMMARY AND RECOMMENDATIONS

#### Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

- Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:<sup>1</sup> the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.<sup>2</sup> Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed.<sup>3</sup> As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible

---

<sup>1</sup> See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. *Political Behavior*, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

<sup>2</sup> The EAC has contracted with other researchers to study vote fraud issues.

<sup>3</sup> Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.<sup>4</sup> The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be *asked* to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be *required* to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included "maximum" requirements in our analysis, and not simply "minimum" requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the "maximum" of being asked to show photo ID may deter some voters even though the "minimum" would allow them to vote without photo ID.

---

<sup>4</sup> Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis's aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

significant predictor of turnout. Signature match and non-photo id remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>5</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls– are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a “Voting Impact Statement” by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls

---

<sup>5</sup> Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, “New Voter ID Law Goes Smoothly in Chandler,” *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
  - I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
  - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
  - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.
4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

the convenience of the voter, the total time allowed to evaluate ballots<sup>6</sup>, and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends.

Requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

## **SUMMARY OF RESEARCH**

### **Background and Approach of the Study**

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the

---

<sup>6</sup> Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.
  
- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.
  
- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>7</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>8</sup>

---

<sup>7</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

<sup>8</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>9</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter

---

<sup>9</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>10</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>11</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>12</sup>

---

<sup>10</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>11</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

<sup>12</sup> "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>13</sup>
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>14</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>15</sup> A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.
5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>16</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

---

<sup>13</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>14</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>15</sup> "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

<sup>16</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

**Voter ID and Turnout**

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>17</sup> Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.<sup>18</sup>

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum

---

<sup>17</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

<sup>18</sup> As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a “minimum” requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.<sup>19</sup> Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

<sup>19</sup> One state election official told us that, “We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is.”

\* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

<sup>1</sup> Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

<sup>2</sup> Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

<sup>3</sup> Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

<sup>4</sup> Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

<sup>5</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>6</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>7</sup> Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

<sup>8</sup> Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ( $r = -.30, p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20, p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	64.2 %	State Name	63.0 %
Sign Name	61.1 %	Sign Name	60.4 %
Match Signature	60.9 %	Match Signature	61.7 %
Provide Non-Photo ID	59.3 %	Provide Non-Photo ID	59.0 %
Provide Photo ID	58.1 %	Swear Affidavit	60.1 %
<i>Average Turnout (All States)</i>	<b>60.9 %</b>		

**This table displays the mean turnout using the aggregate county level data for each state in 2004.**

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>21</sup>

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American<sup>22</sup>
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

---

<sup>21</sup> The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

<sup>22</sup> The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.<sup>23</sup>

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

---

<sup>23</sup> This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.<sup>24</sup> Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

#### Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>25</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

---

<sup>24</sup> For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>24</sup> Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

<sup>25</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

influenced turnout in 2004.<sup>26</sup> The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>27</sup>

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.<sup>28</sup> Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>29</sup>

---

<sup>26</sup> The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

<sup>27</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>28</sup> A probit model is a popular specification of a generalized linear regression model, using the probit link function.

<sup>29</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

<b>Table 3. Predicted probability of voter turnout – all voters</b>		
	<b>Maximum requirement</b>	<b>Minimum requirement</b>
<b>State name</b>	91.7%	91.5%
<b>Sign name</b>	89.9%	90.2%
<b>Match signature</b>	Not significant	Not significant
<b>Non-photo ID</b>	89.0%	89.0%
<b>Photo ID</b>	88.8%	----
<b>Affidavit</b>	---	87.5%
<b>Total difference from “state name” to “photo ID” or “affidavit”</b>	<b>2.9%</b>	<b>4.0%</b>
<b>N</b>	54,973	
<p>Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one's name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.</p> <p>Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.</p>		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>30</sup> In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

<sup>30</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Race and ethnicity have generated particular interest in the debate over voter ID requirements.<sup>31</sup> The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

---

<sup>31</sup> Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day , or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

### **Litigation Over Voter ID Requirements**

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*).. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.<sup>32</sup> Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL

---

<sup>32</sup> Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

**Developments since 2004**

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

**Conclusions**

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.<sup>33</sup>

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents

---

<sup>33</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

**REVISED FINAL D R A F T**

Subject Voter ID, Fraud & Intimidation--Need your input

Hello all,

A columnist from the WaPo has asked for info about both the voter ID and the fraud and intimidation reports. This was prompted by the accusation that the president was concerned that the fired prosecutors were not aggressively pursuing voter fraud cases. She had heard that we were refusing to release this information, so I am trying to demonstrate otherwise, as well as show that we have discussed these projects numerous times in public meetings. Please take a look at my draft email to her and let me know if you have any suggestions. She needs to hear back from me by 4 p.m. Thanks for your help with this.

Ms. Cocco,

Per your questions, go [here](#) to view the testimony regarding voter ID from our Feb. 2 public meeting. As I mentioned, at this meeting EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. Currently, staff is working to finalize the voter ID report.

Regarding the voter fraud and intimidation research, at a May 2006 public meeting of our Standards Board and Board of Advisors, the EAC project manager for this research presented a staff update on the project. Go [here](#) to view the agenda, page 3. The document you referred to was the update the project manager gave at this public meeting, and it has been made available to anyone who asked for it. The final culmination of this project can be found [here](#), and links to the attachments provided by the consultants are available by going to page 24 of this report. The commissioners adopted this report at a [public meeting in](#)

026821

Dec. 2006.

As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for these projects. After EAC receives the initial data, the agency reviews the data for accuracy and then releases a final report.

John-

At the present, I envision my role will merely be to provide a chronology of the project and to provide a context to what has happened with the project and the reports, thus far.

All of the Commissioners will have read your final June 28, 2006 report on Voter Identification and will be addressing their questions to the material contained in that 32 page report and the appendices.

When, or if, I get additional information on the substance of the meeting I'll be certain to pass that information along.

Regards-

Subject February 8th EAC meeting

Karen - I understand you will be a panelist on the Eagleton/Moritz Voter ID study along with Tom O'Neill and Tim Vercellotti at next Thursday's EAC meeting. Could you let us know what you will be covering so we prepare comments that will not be redundant.

Thanks. I hope your new year is off to a good start.

John

Subject FOIA Request

History:

 This message has been replied to:

Hello everyone,

I need each of you to respond affirmatively or negatively to the FOIA request below. If you have no documents in your possession related to this request, please reply to me with the words "no records." If you have records, please identify them in an e-mail reply and attach them to the e-mail. If the document is not electronic, hand deliver them to me. Also, if you believe any of these related documents should be withheld, please provide a brief memo stating the reason for your position.

I need this information and/or a response by COB December 5, 2006. If you cannot comply by this date, please provide notification and an estimated time when you will provide the information and the reason why you cannot comply by the original deadline. Thanks for your cooperation. See request below:

Wendy Weiser of the Brennan Center for Justice has submitted a FOIA request for the voting fraud report prepared by our consultants and the voter ID report, as well as the following information:

"In the event that the EAC denies my renewed request for the voter ID and voting fraud reports or delays another week in providing those materials, we respectfully request copies of (1) all requests for proposals and contracts relating to the voter ID and voting fraud reports; and (2) all written and electronic communications concerning the voter ID and voting fraud reports between the EAC and (a) the Eagleton Institute of Politics, (b) the Moritz College of Law, (c) Tova Wang, (d) Job Serebrov, and (e) any other individuals or entities, including but not limited to outside reviewers."

Please let me know if you would like a copy of the FOIA request.

Commissioners,

I have not received input from everyone regarding the attached letter. It is a response to Wendy Weiser of the Brennan Center, who requested the staff voter fraud status report and the provisional voting draft report, both of which were presented to the Standards Bd. and the Bd. of Adv. at the May meeting. She also requested the draft voter ID report, which was not released at the May meeting. If possible, I'd like to get your input by the end of the day. The letter would go out under Tom's signature. Thank you.

Subject FW: Voter ID Law

History

This message has been forwarded.

Donetta--- this is the person to whom the EAC is paying taxpayer money to perform dispassionate research on voter fraud? No wonder she has concluded for all of us that voter fraud (in person) really does not exist, except for maybe a few isolated places in the Midwest. If her report sees the light of day, I can almost guaranty problems. The fact that the report may have a co-writer does not solve this problem. She should not even be paid. There is a clear agenda behind her conclusions. I believe the credibility of the EAC is in question with your decision to hire this person and allow her to report on behalf of the EAC on either election fraud or voter intimidation. I would like a response from the Chairman that addresses this article. Thanks

---

## Rumble in the Desert

Civil rights groups are challenging Arizona's Prop 200, which endangers voting rights for citizens.

**Tova Andrew Wang**

June 01, 2006

*Article created by The Century Foundation.*

Without a lot of fanfare, a very important lawsuit was filed last week by the Lawyers Committee for Civil Rights and other groups in Arizona. Finally, two years after the passage of the quite pernicious Prop 200, groups are finally taking serious action to combat it.

Basically an anti-immigrant measure, Prop 200 set out a bunch of restrictions on access to services for immigrants. However, with respect to voting rights, Prop 200 set up a situation blocking the right to vote for many *citizens* by requiring every person registering to vote to prove citizenship.

As the Lawyer's Committee describes it, Proposition 200 requires that that counties reject any voter registration application that does not include satisfactory proof of citizenship, such as a copy of the applicant's birth certificate, passport, a driver's license or non-operating identification license, but only if issued after October 1, 1996, a tribal identification card or naturalization documents. This even applies to voters who must re-register simply because they moved across county lines.

This measure is at least as damaging as many of the voter identification laws being passed and contemplated across the country. This stops someone from being part of the

026826

process before they've even gotten to square one. As I have repeatedly discussed with respect to ID laws, many voters are unlikely to have the required documentation and efforts to obtain the documentation will take time and money, therefore amounting to an unconstitutional poll tax.

Ironically, it has proven to be eligible voters who have been caught in the snare of this act. Last year in Maricopa County, home to Phoenix, more than 10,000 people trying to register were rejected for being unable to prove their citizenship. A spokeswoman for the recorder's office said most are probably U.S. citizens whose married names differ from the ones on their birth certificates or who have lost documentation. In Pima County, home to Tucson, 60 percent of those who tried to register initially could not. The elections chief said that all appeared to be U.S. citizens, but many had moved to Arizona recently and couldn't get their birth certificates or passports.

Moreover, Prop 200 is based on the idea that noncitizens are coming to the polling place and voting illegally. The premise is false. There is no evidence of any number of immigrants knowingly voting in the past in Arizona, and certainly it would seem unlikely when the last thing immigrants want to do in these times is draw official attention to themselves.

Finally, as the lawsuit persuasively argues, the measure also makes it virtually impossible for groups to conduct voter registration drives in Arizona. How many people go to the supermarket with their birth certificate?

The recent decision in Indiana upholding its draconian ID bill and the intolerance toward immigrants being displayed right now makes me worry about how the Arizona courts will respond. They upheld the Proposition in another context once before. But anyone who cares about the right to vote—for qualified, U.S. citizens—should hope that the law is struck down as the unconstitutional and anti-democratic measure it is.

Subject FYI - Today's media inquiries ( 5-10-07, Thurs )

Commissioners:

Today we had the following media inquiries:

(1) Leslie Robinson, a reporter for the news blog, ColoradoConfidential.com inquired about the rules and regulations that EAC board members must adhere to. She said that one of the EAC members from Colorado, Dan Kopelman, has recently been cited by the Secretary of State for his business of selling voter lists and consulting partisan candidates. She asked if these infractions cause Kopelman to withdraw from the EAC board. We explained that, according to SEC. 213 of the Help America Vote Act of 2002 (HAVA), there are two EAC Standards Board representatives from each state, that one is a local official, one is a state official and that both individuals represent their state on the Board. We said that the state representatives are selected by the Chief State election official from each state. We said that, with respect to Colorado, Mr. Kopelman was selected to serve on the Board by Colorado Secretary of State Michael Coffman. We suggested Ms. Robinson contact their office for questions regarding the appointment of state representatives from Colorado.

(2) Rose Marie Berger, Associate Editor of Sojourners/Call to Renewal, asked for the document on voter fraud authored by Tova Wang and Job Serebrov. We replied that our Inspector General is currently reviewing the circumstances surrounding this research and noted page two of the following memo from the chair. We said that when that process is complete we'll be glad to discuss it further. 04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects

Subject FYI - Today's media inquiries ( 5-11-07, Frid )

Commissioners:

Today we had the following media inquiries:

(1) Meg Cox, a freelance journalist in Chicago is working on an article about voter fraud and voter ID laws. She asked the following two questions:

- 1) Is the EAC still sending its "Elections Crimes" report to journalists who request the report on voter fraud and intimidation authored by Wang and Serebrov?
- 2) If the answer to #1 is yes, is the EAC still sending the "Election Crimes" report in these cases without comment--in other words, without indicating that it is not the Wang/Serebrov report?

We forwarded her questions to Curtis and replied to Ms. Cox that the chair has asked our Inspector General to review the circumstances surrounding this research project, as well as research done about voter ID. We said he has requested that EAC not comment on either one of these projects while his review is ongoing. We referred her to the following link: [here](#). and said we'd be glad to make sure she receives the IG's review when it is completed.

(2) Jenna Portnoy of the Doylestown Intelligencia in Bucks Co., PA called again to ask about EAC's progress in determining the status of Pennsylvania's 102 funds. She wants to know the amount of money, if any, that they will have to return. We said that EAC is still reviewing the certifications submitted by the states and we hope to have this process completed as soon as possible. We said we are also evaluating all the reports submitted by the states regarding their 101 and 251 funds expenditures.

Subject FYI - Today's media inquiries ( 5-14-07, Mon )

Commissioners:

Today Meg Cox, a freelance journalist in Chicago, sent us the same two questions she sent us last Friday (see below). She had not been satisfied with our response. She is working on an article about voter fraud and voter ID laws. She said she is concerned that journalists are receiving a substitute report from EAC and not the real thing. We replied that we directed her to the one and only report adopted by EAC -- Election Crimes: An Initial Review and Recommendations for Future Study -- We noted that it contains clear language about the role of the consultants, identifies them by name and that their bios are included in the EAC report as Appendix D here. We said we would notify her when the IG has completed his review of this subject. We also noted the following contents of the report:

- Page one: "EAC staff along with two, bipartisan consultants reviewed the existing information available about voting fraud and voter intimidation, including reading articles, books and reports; interviewing subject matter experts; reviewing media reports of fraud and intimidation; and studying reported cases of prosecutions of these types of crimes.
- Page three: To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang, who worked with EAC staff and interns to conduct the research that forms the basis of this report.
- Page four: The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

###

**BACKGROUND: Last Friday's Q&A.**

Meg Cox, a freelance journalist in Chicago is working on an article about voter fraud and voter ID laws. She asked the following two questions:

- 1) Is the EAC still sending its "Elections Crimes" report to journalists who request the report on voter fraud and intimidation authored by Wang and Serebrov?

Subject: Feinstein and Durbin letter

Commissioners and Tom,

There are several questions in the Feinstein and Durbin letter that I need your assistance responding to. Particularly, I need your responses as to question 1 for both the Voter ID study (page 4 -- numbered at the top) and Voting Fraud and Intimidation (page 5 -- numbered at the top). While these two questions actually say the same exact thing, I believe that the question under Voter ID was intended to refer to the Voter ID study and not the Voting Fraud and Voter Intimidation Study.

In addition, please look at questions 5 and 9 under Voting Fraud and Voter Intimidation. Each of these questions require information and documents that you may have. Last, if you have any input on the response to Question 10 under Voting Fraud and Voter Intimidation, please let me know.

I am currently working on the response and anticipate working on it tomorrow and Friday. I would appreciate any information that you may have.

**United States Senate**  
WASHINGTON, DC 20510

April 12, 2007

The Honorable Donetta Davidson  
Chairman  
U.S. Election Assistance Commission  
1225 New York Avenue, N.W.  
Suite 1100  
Washington, DC 20005

Dear Commissioner Davidson:

We are writing to seek a response to very troubling news reports that included allegations that the Commission may have altered or delayed release of two taxpayer-funded studies of election issues for political purposes.

While the Commission is within its rights to decide what guidance it issues to election officials, it is critical that its actions are not perceived as politically motivated and it is imperative that you provide full documentation about the Commission's proceedings on these matters.

On Wednesday, the *New York Times* reported that a bipartisan team of election law experts hired by the Commission to research voter fraud in federal elections found that there was little such fraud around the nation, but the Commission revised the report to say that the pervasiveness of voter fraud was still open to debate.

On Monday, *Roll Call* reported that the Commission two weeks ago rejected the findings of a report, prepared as part of a \$560,000 contract with Rutgers University's Eagleton Institute and Ohio State University's Moritz College of Law. That report found that voter identification laws may reduce election turnout, especially by minorities.

Commissioner Davidson

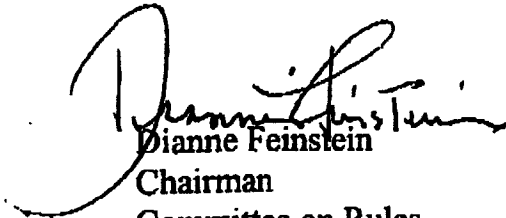

- 2 -

April 12, 2007

It is imperative that the Commission's actions and deliberations are unbiased, free from political influence and transparent. While the Commission does not have to agree with the experts who perform its research, it should make the research available unfettered and unfiltered.

Attached are a series of questions, we would like the Commission to address. We look forward to your timely response.

Sincerely,

Dianne Feinstein  
Chairman  
Committee on Rules  
and Administration

Richard J. Durbin  
Chairman  
Subcommittee on Financial  
Services and General  
Government  
Committee on Appropriations

026833

We request information and documentation from the Commission that answer the following questions:

**COMMISSION'S OVERSIGHT ON EAGLETON CONTRACT TO PERFORM A STUDY ON VOTER IDENTIFICATION**

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Would you please provide a copy of the approved Request For Proposals, as well as any contract modifications that were agreed to between the Commission and Eagleton Institute and subcontractors?
3. Can you provide the names and qualifications of Election Assistance Commission staff that worked on the Eagleton Institute project?
4. Please indicate how many project meetings occurred during the term of the Eagleton contract, including in-person meetings, conference calls regarding the status of the report, and any meeting where Commissioners were present for at least part of the meeting. Please provide copies of any minutes from those meetings.
5. Please identify the names and affiliations of members of the Peer Review group or groups that examined the Eagleton Institute drafts. Please also indicate the dates upon which any such review of the Eagleton research was conducted, and the specific concerns or complaints that were raised by members of the Peer Review group as to either the analysis or statistical methodology, if any. Please provide copies of any minutes from those meetings.
6. If certain members of the Peer Review groups had concerns with the data or methodology of the Eagleton study, was that information communicated to Eagleton, and were any changes made to the study based on Peer Review group concerns with methodology or data?
7. Who were the individuals (and what were their academic qualifications) that advised the Commission that the data, methodology, or the results of the Eagleton Contract were so flawed that the Commission should reject the report? At what point did the Commission receive input from those individuals?

8. The Commission previewed its research on the Eagleton Institute's study on Provisional Voting at its May 2006 Advisory Board meetings—why was the Voter Identification Draft Study not discussed at that time? What is the status of the Provisional Voting report?
9. In rejecting the Eagleton report, the Commission indicated concerns that there was only one year's worth of data. Given that this was the first year that Commission had studied the results, isn't "one year" what was originally contemplated in the Eagleton contract? Isn't the reason for having a major research institute conduct this study is so they can draw initial assessments from that data—even though that data can be augmented in future years? Because of the rejected report, will the Commission start anew for research in the 2008 elections?
10. What was the final, total cost of the Eagleton contract, and what was produced or released by that Commission as a result of that contract?

#### **COMMISSION'S OVERSIGHT OVER VOTER FRAUD/INTIMIDATION STUDY**

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Given the bipartisan nature of the Working Group that guided the Voter Fraud/Intimidation report, and the bipartisan nature of the contracted experts who uniformly support the results of this report, what concerns lead the Commission to determine the report should not be released?
3. If there were points in the report that the Commission objected to, were there attempts to work with the contractors to deal with specific concerns? If there were such attempts, please describe them.

4. Who drafted the Commission summary (released in December, 2006) of the Voter Fraud/Intimidation report, and what were their credentials and involvement in the original research process? Were there instructions or guidance given from Commissioners or senior staff as to what portions of the research should be emphasized? Who at the Commission reviewed the summarized report? Since the contracted experts are referred to in the Commission's released report, were the contractors allowed a chance to review or edit that Commission's final report that was released in December, 2006?
5. Please provide copies of any electronic or written communications between Commission employees that relate to the editing of the Voter Fraud/Intimidation report.
6. Please explain what Mr. Job Serebrov was referring to in his email referenced in the *New York Times* article of April 11, 2007. Please provide any documents in the Commission's possession where employees or contracted experts discussed pressure, political sensitivities, or the failure of the Commission to adopt the Voter Fraud/Intimidation report from March 1, 2006 to present.
7. While we realize that the Commission voted to release its summary report in December 2006, was there a public vote taken to reject the Draft Voter Fraud/Intimidation report? Such a monumental decision to reject the contract experts' work is a policy decision, and one that should be done in public. When was the decision made to reject the original report, and what notice was provided to the public that the Commission would reject that report?
8. Prior to the Draft Voter Fraud/Intimidation report's release, had other organizations requested a copy of that original report? Please include copies of your responses to those organizations, if any.
9. Had any States requested that the Commission or staff provide guidance related to voter identification requirements in the Help America Vote Act, or identification requirements generally? Please provide those requests, and any responses from the Commission.
10. Please indicate what steps the Commission is taking to ensure that political considerations do not impact the agency's research and that decisions are handled in a public and transparent manner.

Memorandum

To: Donetta Davidson  
Chair, U.S. Elections Commission

From: Curtis Crider   
Inspector General

Subject: U.S. Election Assistance Commission Activities Pending the Office of Inspector  
General Investigation of the Voting Fraud and Voter Intimidation Report

In your letter of April 23, 2007, you requested my comments concerning several activities that the Election Assistance Commission (EAC) was considering to undertake pending our review of the Voting Fraud and Voter Intimidation Study and on related questions. My responses to your proposed activities and questions follow:

1. The EAC would like to prepare a summary of the differences between the draft report prepared by the consultants and the final report adopted by the EAC.

Answer: We believe that such a summary will be helpful to our investigation. Please provide us with a copy of the summary of differences upon its completion.

2. Would there be any prohibition against the Director of Communications speaking with EAC employees, consultants or working group members when questions arise from members of the press or under the Freedom of Information Act?

Answer: We are not aware of any prohibition. However, we suggest that EAC not comment or limit its comments on this matter because of the ongoing investigation. Any FOIA requests should be promptly responded to stating that the matter is under investigation. Once the investigation is completed, appropriate information should be made available to the FOIA requester.

3. Would there be any prohibition against EAC briefing members of the EAC Standards Board and the EAC Board of Advisors.

Answer: We are not aware of any prohibition. Our preference, however, would be that EAC allow the investigation to be completed before conducting any briefings.

4. Would there be any prohibition against gathering information related to this project in order to respond to inquiries that have been made by members of Congress?

026838

Answer: We are not aware of any prohibition. As previously stated, our preference is that there are no public comments while the investigation is in process or that comments be limited. However, we appreciate the sensitivity of Congressional requests, EAC must decide how best to proceed in this matter. We ask that you share any proposed responses with us prior to their release and that you provide us with a copy of final responses and any attachments.

5. Would there be any prohibition against responding to an inquiry that the Commission has received from an attorney engaged by one of the consultants?

Answer: It is the EAC's decision whether to respond to the attorney for the consultant. We prefer that the consultants not be released from the confidentiality clause of their contracts until the OIG has completed its investigations.

We understand that EAC will want to respond to criticism of its handling of the Voter Fraud and Intimidation Study, and that management must ultimately decide how best to proceed. Our preference would be that you attempt to defer commenting until we have finished our investigation.

I appreciate you raising these matters to me before acting. Please feel free to contact me if you have any questions about this memorandum.

Subject documentation for evaluation

All:

The Office of Inspector General has initiated an evaluation of the contracting process used by the EAC for the voter fraud and voter intimidation projects. In order for us to complete our evaluation, we need copies of all e-mails or other documents that you have regarding either project. Electronic documents can be sent to an e-mail account that we have set up- [eacon@eac.gov](mailto:eacon@eac.gov). If you have any hard copy documents, please let me know.

If you do not have any documents or e-mails, please send me an e-mail to that effect.

Thank you,

Curtis Crider

#### Election Board Facing Votes of No Confidence

CQ WEEKLY - IN FOCUS  
Congressional Quarterly  
April 23, 2007 - Page 1164  
By David Nather, CQ Staff

After the turmoil over the 2000 presidential election, Congress created a bipartisan commission that was supposed to do nice, non-controversial things: hand out some federal grants, do some studies, certify voting machines, promote voting practices that seem to work well.

Instead, the Election Assistance Commission is now surrounded by controversy and tough questions. And the same lawmakers who could barely be bothered to pay attention to its creation four years ago are putting it under the microscope now.

Democrats were enraged by the commission's handling of a report on voter fraud – the panel ordered up the report (which found little evidence of fraud), sat on the document for several months, then released a rewritten version that concluded “there is a great deal of debate” about how much voter fraud takes place. Republicans have contended that voter fraud is a big problem and benefits Democrats.

A second commission report on voter identification laws found that the laws can reduce turnout, particularly among Hispanics. The panel delayed releasing that report for months, then made it public even while refusing to endorse its conclusions.

Voting rights groups have criticized the commission's handling of the reports, and two powerful Democratic senators – Dianne Feinstein of California, who chairs the Rules and Administration Committee, and Majority Whip Richard J. Durbin of Illinois, who chairs the Appropriations subcommittee that funds the commission – have asked the panel to answer a barrage of questions. More than anything, they want to know whether the commission received “any outside communication or pressure” to delay or change the reports.

The controversy has put a harsh spotlight on the commission in recent weeks, but it's hardly the only case where the panel's actions have gotten it into trouble. Last year, the commission angered Arizona's secretary of state when it refused to grant the state permission to require voters to provide proof of citizenship when they registered by mail using federal forms. Secretary of State Jan Brewer, a

026841

Republican, called the decision “inexcusably wrong” because Arizona’s voters called for the requirement in Proposition 200 and because the Department of Justice had approved it.

On top of it all, secretaries of state have been suspicious of the commission all along, fearing that it would turn into yet another federal regulatory agency. The National Association of Secretaries of State called for the commission to be abolished after the 2006 election, since its three-year authorization expired at the end of fiscal 2005. New Hampshire Secretary of State William Gardner, a Democrat, urged the group to take that position because, he said, “I could see what could potentially be coming. . . . I remember when the Federal Election Commission was basically a clearinghouse as well.”

These are a lot of pressures for a four-member commission with a staff of 19 and an operating budget of just over \$11 million, which got so little attention from Congress that it took a year before its first four members won Senate confirmation. The commission also has strict limits on what it can do under the 2002 election overhaul law that created it. Among other things, it’s not supposed to be a regulatory agency – though it does have some authority under the National Voter Registration Act of 1993, the “motor voter” law that was at issue in the Arizona dispute.

### ‘We Took On Too Much’

Donetta L. Davidson, the Republican who in January became the commission’s third chairman, says she takes seriously the questions about the reports on voter fraud and voter identification. The commission has referred the issue to its own inspector general, asking him to take a hard look at the panel’s contracting procedures for outside research projects. “We want to be as transparent as possible,” Davidson said.

But Davidson, who was previously Colorado’s secretary of state, says the biggest problem was that the commission may have been trying to move too many reports with a small staff that mostly works with outside contractors rather than producing its own research. “I think that was our biggest mistake – being too aggressive,” she said. “We just took on too much.”

That explanation won’t quiet the criticism. House Majority Leader Steny H. Hoyer, a Maryland Democrat and one of the authors of the 2002 law, is concerned that the commission “may have mishandled taxpayer-financed reports” and has called for hearings, said spokeswoman Stacey Farnen Bernards. Feinstein’s committee already has an oversight hearing tentatively scheduled for June.
