Voting rights groups are highly suspicious of the commission’s actions, though there is no evidence the administration interfered with the reports. Jonah Goldman, director of the Lawyers’ Committee for Civil Rights Under Law, said it “just seems a little too convenient that there’s no political motive” given that the administration reportedly fired some U.S. attorneys because they were not aggressive in prosecuting alleged voter fraud.

And even those who don’t subscribe to a political conspiracy find fault with the commission’s handling of the reports. “I think they’re just trying to avoid controversy, and trying to avoid controversy is not what we need right now,” said Richard L. Hasen, an election-law expert at Loyola Law School in Los Angeles. “With all the problems we’re having with elections in this country, we need bold leadership, and they’re not providing it.”

### Congressional Alarm Bells

Davidson insists that the commission doesn’t shy away from controversial subjects. “That’s our job,” she said. Indeed, the law spells out a list of reports the commission is supposed to produce, and they touch on nearly every hot-button election issue imaginable: ballot designs, voter registration methods, recount procedures, the handling of misinformation about election times and locations, and even proposals to make Election Day a holiday.

Much of the commission’s other work is advice and testing of voting systems. In 2005, it published

guidelines that dealt with security issues, paper audit trails, and accommodations for voters with disabilities. And last year, it started testing and certifying voting systems in preparation for the 2008 election.

Still, the way the voter fraud and identification reports were handled and the possibility that the Justice Department influenced the reports have alarmed some members of Congress.

That issue won't be settled until the hearings have been held and the inspector general's office has issued its report. But the back story of one incident with the voter fraud report – in which two Justice officials secured changes to the summaries of their interviews for the report – suggests the department was more than a bystander in the voter fraud study.

In the appendix, which summarizes all of the expert interviews conducted for the fraud report, two Justice officials' interviews are included: Craig Donsanto, director of the Election Crimes Branch of the Public Integrity Section, and John Tanner, chief of the Civil Rights Division's Voting Section. In both cases, a footnote declares that "this interviewee did not agree with the consultants' interpretation of his interview comments" and that the commission made "clarifying edits." No such note accompanies any of the other expert interviews.

Donsanto got to see the summary of his interview because he was a technical adviser to the working group. He thought the summary erroneously implied that his unit didn't pursue systematic fraud schemes anymore, only individual cases like voting by felons and non-citizens. He worried that civil rights groups would think their constituencies were being singled out. Peggy Sims, an election research specialist at the commission who managed the project, agreed and had it changed.

Tanner took issue with the suggestion that he had said the Department of Justice wasn't pursuing voter-suppression cases anymore, and provided examples of cases where it was doing just that. His remarks were corrected.

Sims said that neither Donsanto nor Tanner got to weigh in on the entire report before it was released.

Such controversies are inevitable given that some lawmakers are worried about political influence on the commission and others are concerned it might grow too powerful. Elections are emotional, and even a bipartisan panel will have disagreements. When the four commissioners tried to revisit the Arizona decision, for instance, they deadlocked on party lines, something that also happens periodically to the bipartisan Federal Election Commission.

But the commission can go a long way, voting rights groups say, simply by operating with more transparency and establishing more written procedures for making decisions. "It is a relatively young agency," said Wendy R. Weiser of the Brennan Center for Justice at the New York University School of Law. "But they've been around long enough that this is no longer acceptable."

Davidson said more transparency and better procedures are her goals as well. "Definitely I hear what Congress is saying," she said. "We're a bipartisan commission, and we want to do the right thing." Now, in a year when lawmakers say they're trying to improve oversight, it's up to Congress to decide whether it is interested enough in its own creation to help the commissioners do the right thing.

## Who's Who on the Commission

The Election Assistance Commission was created in 2002 to help states comply with federal rules and to set standards and distribute grants for voting equipment. Its members, two from each party, are nominated by the president and confirmed by the Senate to four-year terms that are renewable once.

**Donetta L. Davidson** (Republican) was appointed in 2005 and is the current chairwoman. She had been Colorado's secretary of state for six years and before that state elections director and a county clerk in suburban Denver. Her term expires in December.

**Gracia M. Hillman** (Democrat) is a longtime figure in the voting rights movement and a former executive director of the League of Women Voters. She was president of a Washington consulting company when appointed in 2003. Her term expired in 2005, but she is serving until a replacement is named.

**Caroline C. Hunter** (Republican) was deputy director of the White House Office of Public Liaison when President Bush appointed her in 2007. She is a former attorney for the Republican National Committee and ombudsman for the Bureau of Citizenship and Immigration Services. Her term expires in February 2011.

**Rosemary E. Rodriguez** (Democrat) was finishing her third year on the Denver City Council when she was appointed in 2007 to replace Ray Martinez, who resigned. She had previously been Denver's city clerk and director of boards and commissions for the mayor. Her term expires in December.

Subject Today's press inquiries (04-17-07)

1. I spoke with St. Louis editorial board members Christine Bertelson and Kevin Korrigan regarding an editorial that ran today, asserting that we'd worked on the vote fraud/voter intimidation study for five years, and that the administration/White House edited the report. I told them both of these assertions were false, and I requested a correction. I gave them the details about how this project was conceived and managed. I explained that the vote fraud and voter intimidation project began in Sept. 2004. As I said, the statement that this project had been five years in the making is incorrect -- that predates the creation of the EAC. Commissioners were appointed in Dec. 2003, and the agency's first year of operations was 2004 with a \$1.2 million operating budget. I said the assertion that the administration edited the document was false, and said that at no point in the process did the administration play any role. I also pointed out that the chair requested the IG to fully review the matter. They are going to run a correction. The editorial follows.

#### **Snipe hunting in Jeff City**

*Tuesday, Apr. 17 2007*

The Missouri Legislature's dogged efforts to crack down on voter fraud call to mind the hallowed tradition of the snipe hunt.

In a snipe hunt, gullible kids are taken out to the woods, handed sticks and gunny sacks and told to track down the elusive snipe. Meanwhile, their pals, who know a snipe is a bird of marsh and shore generally found nowhere near the woods, yuck it up.

Voter fraud is about as rare as snipe in most parts of the country, including Missouri. As evidence of that we have the testimony of (a) a five-year study by the federal Election Assistance Commission; (b) a report from the Missouri Secretary of State showing nobody in the state tried to vote with a fake I.D. in 2006; (c) Department of Justice statistics showing only 86 people were convicted of voter fraud-related crimes in the last five years, many of them on trivial errors; and (d) a federal judge's ruling last week that the justice department had failed to demonstrate that voter fraud had occurred in Missouri last year.

Undaunted by these facts, Republicans in the Legislature lurk about like Elmer Fudd with their gunny sacks and sticks, promoting bills to require voters to present photo identification before they're allowed to cast a ballot. They passed such a bill last year, but the courts threw it out as unfair to those who couldn't afford the cost and hassle involved in getting a photo I.D. card.

026845

This year's versions of the photo I.D. bills would allow voters without photo I.D. to cast "provisional ballots," which may or may not get counted. So, despite the fact that a photo I.D. requirement would disenfranchise many voters in the cause of solving a problem that doesn't exist, the Missouri House could pass such a bill this week.

Evidence continues to mount that the hunt master for the national voter I.D. snipe hunt is none other than Karl Rove, President George W. Bush's deputy chief of staff and political guru. As The New York Times suggested Sunday, "The more we learn about the White House purge of United States attorneys, the more a single thread runs through it: the Bush administration's campaign to transform the minor problem of voter fraud into a supposed national scourge."

Not only did the administration suggest that some of the eight fired prosecutors had been insufficiently aggressive in pursuing voter fraud cases, it changed the wording of the Election Assistance Commission's findings on the voter fraud issue. What originally read, "there is widespread but not unanimous agreement that there is little polling place fraud" became "there is a great deal of debate on the pervasiveness of fraud."

Moreover, the release of the commission's report was delayed for nine months, during which period eight states, including Missouri, dealt with voter I.D. laws. Since the 3 percent to 4 percent of the electorate who don't have photo I.D.s tend to be poor, disabled or elderly voters, suppressing their vote would tend to help Republican candidates.

Investigators looking for evidence of fraud need look no further than the e-mail messages emanating from Mr. Rove's offices. Alas, thousands, perhaps millions, of those messages are now "missing." Perhaps Attorney General Alberto Gonzales will shed some light on the problem when his testimony before the Senate Judiciary Committee is rescheduled. In the meantime, Missouri lawmakers should put down the sticks and gunny sacks and back slowly out of the woods before their constituents realize they've been snookered, too.

Subject FYI - Today's media inquiries ( 4-19-07, Thurs )

Commissioners:

Jeannie issued the following media inquiries log for today:

(1) I asked Rick Hasen of Election Law Blog to please post info about our Spanish language glossary of election terms, and he did.

(2) Eliza Carney, National Journal columnist, interviewed the chair today about the recent challenges EAC has encountered. She asked about CIBER, and the chair explained the interim process, the way we modeled our interim process after NVLAP. Eliza wanted to know what EAC was doing to address some of the criticism, and the chair talked about the bipartisan subcommittees and her request to the IG. She said Rep. Hinchey told her the only reason we released the voter ID report was because he asked for it at a hearing. The chair pointed out that in Feb. she asked staff to bring the commission recommendations for wrapping it up w/n 30 days. She asked the chair about the voter fraud report, and the chair said staff reviewed it for accuracy, as we have a responsibility to do. I sent her background info on the history of certification and the voluntary nature of the guidelines and our certification program. She also asked for info about our budgets, and our employee cap, which I sent to her.

(3) David Nather of Congressional Quarterly interviewed the chair about how the agency is standing up against all of the recent criticism. She talked about the bipartisan subcommittees and the IG review request. She said if the IG identifies things that need to be changed, we'll change them. He had emails b/w Peggy and Craig Donsanto about discrepancies with his interview. Peggy talked with the reporter about the issue. She explained that she sat in on the interview, and that she agreed with Craig that they had gotten something wrong -- they stated that DOJ had moved from focusing on fraud conspiracies to individual cases. Peg and Craig agreed that what he'd said was that DOJ used to only focus on conspiracies, now they also focus on individual cases too. Peg said Craig learned of the inaccurate portrayal during his role as the technical advisor to the working group. She said none of the people interviewed were given the opportunity to review the summaries. Craig found out about his through the working group, and Tanner learned about his interview summary after the boards were briefed on the project in May. He asked me if we were finished with the following research projects: -- ballot designs, voter registration methods, recount procedures, misinformation about election times and locations, and proposals to make election day a holiday. I told him all of that research is underway. HAVA-mandated research that's been completed includes Election Crimes (vote fraud), the 2004 Uniformed and Overseas Citizens Absentee Voting Act Survey, and the 2003-2004 National Voter Registration Act Survey. We've also released the 2004 Election Day Survey. And we've issued a series of quick management start guides to election officials throughout the nation, addressing voting system security, introducing a new voting system, ballot preparation, and poll workers. Yesterday, the commission adopted the Spanish language glossary of election terms, the first project released under EAC's Language Accessibility Program, which consists of working groups comprised of local election officials, national advocacy groups and research and public policy organizations to advise the commission on how to best meet language accessibility requirements. Next we will translate the glossary in five Asian languages. We also are working on a Legal Resources Clearinghouse, which will be a web-based database containing statutes, regulations, rules, and fed. and state court decisions related to election administration. It will provide the public and election officials a central location to conduct election administration research. I pointed out to him that we have already met two of the biggest HAVA mandates -- VVSG and the certification program. He asked for the ages of all the commissioners, and I gave it him.

026847

(4) Philip Burrowes of Congressional Quarterly asked for photos of all commissioners and their length of terms which we provided. He also asked for the names of the members of Congress who made recommendations to the White House regarding appointments. We provided the text of HAVA regarding recommendations and said he would need to ask the White House for names.

(5) Marc Songini of Computer World had the following questions, and my responses follow.

A. Is the EAC doing enough to strengthen voluntary voting system guidelines and voting system certification? EAC, the National Institute of Science and Technology (NIST), and the Technical Guidelines Development Committee (TGDC) have already completed an initial update of the 2002 standards. First, it is important to note that these guidelines are voluntary, and it is up to states whether to adopt them. The 2005 guidelines update and augment the 2002 voting system standards, as required by HAVA, to address advancements in election practices and computer technologies. After December of this year, voting systems will no longer be tested against the 2002 standards. The major changes from 2002 to 2005 fall in the areas of accessibility and usability. The changes made to these sections include a usability section which was not in the 2002 standards and increase the number of accessibility requirements from 29 to 120 and increase language accessibility requirements. The 2005 guidelines also created greater security requirements based on the new technology used in the voting machines, increasing standards in the areas of data transmission and voter verification. The 2005 guidelines also include a section on conformance testing that was not in the previous standards and included more requirements regarding wireless components. It also provides an overview of the requirements for Independent Verification systems, including requirements for a voter verified paper audit trail for states that require this feature for their voting systems. The VVSG includes the requirement that all voting system vendors submit software to a national repository, which will allow local election officials to make sure the voting system software they purchase is the same software that was certified. In addition, NIST and the TGDC are working on the next iteration of guidelines as we speak, and have said they expect to provide their recommendations to EAC by this summer. You may also want to contact Jan Kosko at NIST. Her number is 301-975-2767.

B. Regarding EAC resources, please see our operating budgets below. Note that the National Institute of Standards and Technology (NIST) receives a pass through in our budget, so that amount is not part of EAC's operating budget.

FY 2004 -- \$1.2 million

FY 2005 -- \$13.8 million (\$2.8 million of which was a pass through for NIST)

FY 2006 -- \$14 million (\$2.8 million of which was a pass through for NIST)

FY 2007 -- \$16.2 million (\$4.95 million of which was a pass through for NIST)

C. Regarding your inquiry about what EAC is doing to strengthen the certification program, the most important issue is that it is now a role the federal government has assumed for the very first time. In the past, this was done by the National Association of State Election Directors (NASSED) on a volunteer basis. NASSED is not a federal agency, and it did not receive any federal funds in its efforts. EAC made the decision not to grandfather any systems certified by NASSED. So any system seeking an EAC certification must be tested end to end. Under EAC's program, which is laid out in our Testing and Certification Program Manual, the federal government will not only operate a more rigorous testing and certification process, it will also have a Quality Monitoring Program in place. For the first time manufacturers will be held accountable through not only this program, but also under the decertification process, which would be the ultimate sanction against a manufacturer. If a system is decertified, the manufacturer may not represent the system as being certified, may not label the system as certified, and the system will be removed from the EAC's list of certified voting systems. Election officials will be notified about the decertification. The Quality Monitoring Program will allow election officials to report anomalies. EAC will visit facilities for quality control purposes, and we will perform site reviews per states' requests. In addition, this program will be transparent. Information about the process and the manufacturers and test labs that participate will be posted on the agency's website. Go [here](#) for the list of documents and information we will provide. In addition to holding the manufacturers accountable, any federal employees involved with this program will have their financial holdings reviewed for potential conflicts of interest.

Subject Chair requests internal review

History: This message has been forwarded.

Hello everyone,

I wanted to notify you that Chair Davidson, in agreement with the other three commissioners, has requested that our IG -- Curtis Crider -- conduct a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. Very shortly, I will distribute her request along with a press release to the media and to all our stakeholders. However, she wanted to make sure the staff was fully informed about this action before we make this news public.

The chair's request, the press release and all of the materials referenced in her request will be available on the home page under Announcements very shortly. Please direct anyone with questions about this action to the website. And let me know if you have questions about any of this information or if I can be of assistance answering questions from the public about this issue.

The chair wants to convey to everyone how much she appreciates your hard work, and that she is confident in our ability to work with Curtis to resolve this issue. Tom would like staff to join him at 3:30 today in the large conf. room upstairs to answer any questions you have.

## **EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects**

For Immediate Release  
April 16, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission’s inspector general to conduct a review of the commission’s contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair’s memo to the inspector general is attached.

“The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter,” said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary E. Rodriguez, Caroline Hunter and Gracia Hillman.*

###

026850

April 16, 2007

**MEMORANDUM**

**To:** EAC Inspector General Curtis Crider  
**Fr:** EAC Chair Donetta Davidson  
**Cc:** Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins  
**RE:** EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues – Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter – agreed with my recommendation that we issue the following formal request to the Commission’s Office of Inspector General to review the circumstances surrounding two recent EAC research projects – vote fraud and voter intimidation and voter identification.

**Background**

The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.

EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.

The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission’s clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.

The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics (“Contractor”). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted

unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.

The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov (“Consultants”). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.”

### **Review Request**

The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and the public have suggested that political motivations may have been part of the Commission’s decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff’s top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
7. Circumstances surrounding Commission discussion and deliberation of final adoption of *Election Crimes: An Initial Review and Recommendation for Further Study*.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.

11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the \$3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.

**United States Senate**  
**WASHINGTON, DC 20510**

April 12, 2007

The Honorable Donetta Davidson  
Chairman  
U.S. Election Assistance Commission  
1225 New York Avenue, N.W.  
Suite 1100  
Washington, DC 20005

Dear Commissioner Davidson:

We are writing to seek a response to very troubling news reports that included allegations that the Commission may have altered or delayed release of two taxpayer-funded studies of election issues for political purposes.

While the Commission is within its rights to decide what guidance it issues to election officials, it is critical that its actions are not perceived as politically motivated and it is imperative that you provide full documentation about the Commission's proceedings on these matters.

On Wednesday, the *New York Times* reported that a bipartisan team of election law experts hired by the Commission to research voter fraud in federal elections found that there was little such fraud around the nation, but the Commission revised the report to say that the pervasiveness of voter fraud was still open to debate.

On Monday, *Roll Call* reported that the Commission two weeks ago rejected the findings of a report, prepared as part of a \$560,000 contract with Rutgers University's Eagleton Institute and Ohio State University's Moritz College of Law. That report found that voter identification laws may reduce election turnout, especially by minorities.

Commissioner Davidson

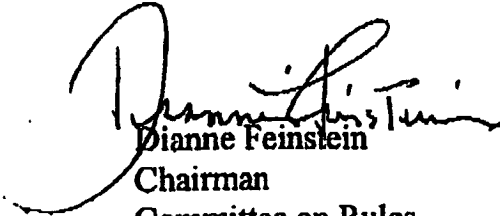

- 2 -

April 12, 2007

It is imperative that the Commission's actions and deliberations are unbiased, free from political influence and transparent. While the Commission does not have to agree with the experts who perform its research, it should make the research available unfettered and unfiltered.

Attached are a series of questions, we would like the Commission to address. We look forward to your timely response.

Sincerely,

Dianne Feinstein  
Chairman  
Committee on Rules  
and Administration

Richard J. Durbin  
Chairman  
Subcommittee on Financial  
Services and General  
Government  
Committee on Appropriations

We request information and documentation from the Commission that answer the following questions:

**COMMISSION'S OVERSIGHT ON EAGLETON CONTRACT TO PERFORM A STUDY ON VOTER IDENTIFICATION**

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Would you please provide a copy of the approved Request For Proposals, as well as any contract modifications that were agreed to between the Commission and Eagleton Institute and subcontractors?
3. Can you provide the names and qualifications of Election Assistance Commission staff that worked on the Eagleton Institute project?
4. Please indicate how many project meetings occurred during the term of the Eagleton contract, including in-person meetings, conference calls regarding the status of the report, and any meeting where Commissioners were present for at least part of the meeting. Please provide copies of any minutes from those meetings.
5. Please identify the names and affiliations of members of the Peer Review group or groups that examined the Eagleton Institute drafts. Please also indicate the dates upon which any such review of the Eagleton research was conducted, and the specific concerns or complaints that were raised by members of the Peer Review group as to either the analysis or statistical methodology, if any. Please provide copies of any minutes from those meetings.
6. If certain members of the Peer Review groups had concerns with the data or methodology of the Eagleton study, was that information communicated to Eagleton, and were any changes made to the study based on Peer Review group concerns with methodology or data?
7. Who were the individuals (and what were their academic qualifications) that advised the Commission that the data, methodology, or the results of the Eagleton Contract were so flawed that the Commission should reject the report? At what point did the Commission receive input from those individuals?

8. The Commission previewed its research on the Eagleton Institute's study on Provisional Voting at its May 2006 Advisory Board meetings—why was the Voter Identification Draft Study not discussed at that time? What is the status of the Provisional Voting report?
9. In rejecting the Eagleton report, the Commission indicated concerns that there was only one year's worth of data. Given that this was the first year that Commission had studied the results, isn't "one year" what was originally contemplated in the Eagleton contract? Isn't the reason for having a major research institute conduct this study is so they can draw initial assessments from that data—even though that data can be augmented in future years? Because of the rejected report, will the Commission start anew for research in the 2008 elections?
10. What was the final, total cost of the Eagleton contract, and what was produced or released by that Commission as a result of that contract?

#### **COMMISSION'S OVERSIGHT OVER VOTER FRAUD/INTIMIDATION STUDY**

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Given the bipartisan nature of the Working Group that guided the Voter Fraud/Intimidation report, and the bipartisan nature of the contracted experts who uniformly support the results of this report, what concerns lead the Commission to determine the report should not be released?
3. If there were points in the report that the Commission objected to, were there attempts to work with the contractors to deal with specific concerns? If there were such attempts, please describe them.

4. Who drafted the Commission summary (released in December, 2006) of the Voter Fraud/Intimidation report, and what were their credentials and involvement in the original research process? Were there instructions or guidance given from Commissioners or senior staff as to what portions of the research should be emphasized? Who at the Commission reviewed the summarized report? Since the contracted experts are referred to in the Commission's released report, were the contractors allowed a chance to review or edit that Commission's final report that was released in December, 2006?
5. Please provide copies of any electronic or written communications between Commission employees that relate to the editing of the Voter Fraud/Intimidation report.
6. Please explain what Mr. Job Serebrov was referring to in his email referenced in the *New York Times* article of April 11, 2007. Please provide any documents in the Commission's possession where employees or contracted experts discussed pressure, political sensitivities, or the failure of the Commission to adopt the Voter Fraud/Intimidation report from March 1, 2006 to present.
7. While we realize that the Commission voted to release its summary report in December 2006, was there a public vote taken to reject the Draft Voter Fraud/Intimidation report? Such a monumental decision to reject the contract experts' work is a policy decision, and one that should be done in public. When was the decision made to reject the original report, and what notice was provided to the public that the Commission would reject that report?
8. Prior to the Draft Voter Fraud/Intimidation report's release, had other organizations requested a copy of that original report? Please include copies of your responses to those organizations, if any.
9. Had any States requested that the Commission or staff provide guidance related to voter identification requirements in the Help America Vote Act, or identification requirements generally? Please provide those requests, and any responses from the Commission.
10. Please indicate what steps the Commission is taking to ensure that political considerations do not impact the agency's research and that decisions are handled in a public and transparent manner.

April 12, 2007

Chairwoman Donetta Davidson  
 United States Election Assistance Commission  
 1225 New York Avenue N.W., Suite 1100  
 Washington, DC 20005

Dear Chairwoman Davidson:

As Chairwoman of the Committee on House Administration Subcommittee on Elections, which has oversight over the Election Assistance Commission, I was alarmed at what appears to be an emerging pattern by the EAC to hold off on publicly releasing reports as well as modifying reports that are released. Two recent instances have brought to light the increased politicalization of the EAC and this lack of transparency.

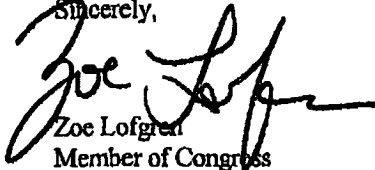

First, the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released. The EAC released report "Election Crimes: An Initial Review and Recommendations for Future Study" does not accurately reflect the research in the original report "Voting Fraud and Voter Intimidation."

Second, in addition to this report on voter fraud and intimidation, the EAC recently released a report by The Eagleton Institute of Politics at Rutgers University on voter identification. Again, the EAC did not endorse the report, citing methodological concerns, and only released it after pressure from Congress.

The EAC is charged with conducting nonpartisan research and to advise policy makers. How are we to rely on advice if instead of full and accurate reporting, we are provided an inaccurate modified version which negates clear evidence to the contrary in the original research? I am outraged that the election process is being threatened by a lack of transparency and limited discussion.

In order to preempt any further problems with the release of reports from the EAC, I request all versions of the Absentee Ballot report and the Military and Overseas report, as well as any other overdue reports, including supporting documents and research, be provided to my office by close of business Monday, April 16, 2007. These reports are overdue and I want to ensure that the delay is no way related to what appears to be an ongoing problem of politicalization of the EAC.

Sincerely,

  
 Zoe Lofgren  
 Member of Congress

For Immediate Release

April 11, 2007

## **Hinchey, Serrano Urge Non-Partisanship, Greater Transparency at Election Assistance Commission**

**Washington, DC** - Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during a subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate."

"The EAC is charged with helping to ensure our elections are trustworthy and administered fairly," said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. "I'm concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant."

"I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people's faith in it, is far more important than any short-term political advantage."

The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

FOR IMMEDIATE  
RELEASE:  
Apr 11, 2007

# SERRANO, HINCHEY URGE NON-PARTISANSHIP, GREATER TRANSPARENCY AT ELECTION ASSISTANCE COMMISSION

Washington, DC – April 11, 2007 – Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

“The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner,” **said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during a subcommittee hearing last month.** “The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate.”

“The EAC is charged with helping to ensure our elections are trustworthy and administered fairly,” **said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget.** “I’m concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant.”

“I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people’s faith in it, is far more important than any short-term political advantage.”

025861

The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

Subject Draft letter to Congresswoman Lofgren

History: This message has been forwarded

Commissioners,

Attached is a draft letter to respond to Congresswoman Lofgren's letter regarding the voting fraud and voter intimidation and voter identification studies as well as requesting information regarding our studies on Free Absentee Ballot Postage and Military and Overseas Voting (Internet Voting). I have not attached the appendixes as I have those in hard copy and will be assembling them in the morning into the appendixes. Congresswoman Lofgren has asked for this information by COB Monday. As such, I would appreciate your comments as early as possible tomorrow, but no later than 2:00 p.m. -- so that I can consolidate the comments and get the information to the Congresswoman's office by her deadline.

Thanks in advance for your quick review of this letter. Please let me know if you have any questions.

letter to Congresswoman Lofgren re studies - draft - 041507.doc

RE: EAC Research Efforts

Dear Congresswoman Lofgren:

Thank you for your letter of April 12, 2007 and the opportunity to provide valuable information about the research efforts being undertaken by the U.S. Election Assistance Commission. Your letter referenced four studies that have been or are being conducted by EAC through contracts and contracted employees. I will address each in turn, below.

**Voting Fraud and Voter Intimidation Study**

The first study about which you inquired is the voting fraud and voter intimidation study. This study was conducted by contract employees of the EAC for the EAC. In the fall of 2005, EAC hired two contract employees to conduct an initial review of the existing information available about voting fraud and voter intimidation. From that review, the employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were reviewed by the contract employees. In addition, they provided a draft report for EAC's review and consideration.

EAC, as a Federal agency, is the policy and decision making body. Consultants, contractors and employees do not make policy for EAC. Their recommendations were only one part of a deliberative process that precedes any agency decision. The Freedom of Information Act, a Federal statute governing the release of documents to the public, creates an exemption to protect pre-decisional, draft documents.

The report requested by House Appropriations Committee is a draft, representing one phase of the deliberative process—before the document was vetted by staff, approved by the Executive Director and reviewed and approved by the Commissioners (the relevant policy makers). Ultimately, the draft document was created by contract employees in order to aid the EAC's Commissioners in their decisions regarding voting fraud and voter

intimidation. The contract employees had no personal interest in their submissions and had no agency decision-making authority. Each was tasked with simply providing pre-decisional research and information to the EAC. Their efforts were limited to creating a truthful, comprehensive, and unbiased draft report. Only when the report is finalized and is adopted by EAC does it constitute an EAC decision or a policy determination.

In keeping with this concept, EAC reviews and vets all draft products or recommendations delivered by its consultants, contractors and employees. It would be irresponsible for EAC to accept the product of contracted employees and publish that information without exercising due diligence in vetting the product of the employees' work and the veracity of the information used to produce that product. EAC conducted this review of the draft voting fraud and intimidation report provided by the contracted employees. EAC found that the draft report failed to provide a definition of the terms as required, contained conclusions that were not sought under the terms of the contract or were not supported by the underlying research, and contained allegations that showed bias. EAC also found that the research provided by the contracted employees was a good body of data concerning the existing knowledge of voting fraud and intimidation. EAC staff developed a subsequent draft report to correct the problems mentioned above, to address the questions that this study sought to answer, and to address inconsistencies between the contracted employees' draft report and the research that was provided. The staff report included all of the contracted employees' and working group's recommendations. The staff report was adopted by EAC on December 7, 2007 during its public meeting and became the final and decisional report of the Commission on this issue. The final report as well as all of the underlying research conducted by the contracted employees are available on EAC's Web site, [www.eac.gov](http://www.eac.gov).

### **Voter Identification Study**

The second study about which you inquired was a study conducted by Rutgers University in conjunction with Moritz College of Law. Rutgers and Moritz served as contractors to EAC and produced this draft document pursuant to the provisions of the contract governing that relationship. A draft report was created by Rutgers University in conjunction with the Moritz College of Law (Ohio State University) to "...provide research assistance to the EAC for the development of voluntary guidance on provisional voting and voter identification procedures." The stated objective of the contract was to:

...obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics... The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were provided guidance, information, and were directed by EAC personnel. The final product they delivered (draft report sought) was identified as "a guidance document for EAC

adoption.” Clearly, as noted by the contract, the issuance of Federal guidance to states is a matter of government policy and limited to official EAC action.

EAC reviewed and vetted of the draft document provided by Eagleton. Review of that document revealed data and analysis that caused EAC concern. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as “state your name.” The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.<sup>4</sup>

On March 30, 2007, EAC decided not to adopt Eagleton’s study and not to issue an EAC report based upon this study. The Commission did release all of the material provided by Eagleton at that time. In addition, EAC voted to engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

### **Free Absentee Ballot Postage Study**

Pursuant to Section 246 of the Help America Vote Act of 2002 (HAVA), EAC was directed to study and produce a report on the feasibility and advisability of a program that would provide absentee ballots that could be returned by the voter postage-free. HAVA directed that this report be delivered one year after the passage of HAVA, that is not later than October 29, 2003.

EAC was not able to complete this study within the original deadline set forth in HAVA, but EAC currently has a pending research project to provide information for a report on this subject. On the deadline set forth in HAVA, EAC Commissioners had not yet been appointed and confirmed to fill their positions and to form the agency that is now EAC. After the formation of EAC in December 2003, Congress provided an appropriation for FY 2004 in the amount of \$1.2 million dollars, which did not include sufficient funding for research activities. EAC received operational funding including some funding for research in its FY 2005 budget. Thus, in FY 2005, EAC developed an issued a request for proposals for a research contract to study this issue. No responsible bidders responded to the request for proposals and the request was ultimately withdrawn by the Commission due to the failure to receive any responsible bids.

Because this research report was required by HAVA and the deadline for the completion of the project had passed, EAC issued a subsequent request for proposals in FY 2006. EAC received proposals and awarded a contract for the study of this issue. The statement of work for that project has been attached as Appendix "1" to this letter for your review and convenience. As you will see, the statement of work sets forth several requirements for the contractor, including conducting a survey of registered voters to gather information from them regarding their voting behavior and whether the implementation of a national program for free absentee ballot postage would change that behavior. The contractor was further asked to conduct a series of focus groups comprised of potential beneficiaries of free or reduced absentee ballot postage.

The EAC and its contractors are subject to the Paperwork Reduction Act (PRA) and thus all information collection instruments must be published prior to issuance to obtain public

comment regarding the questions asked, the necessity of the collection, and the burden that will be imposed on respondents. EAC published the survey instrument to be used as a part of this study in the Federal Register on November 14, 2006. See Federal Register, Vol. 71, No. 219, Page 66321. A copy of the Federal Register notice and request for comments is attached as Appendix "2" to this letter. In keeping with the PRA, a notice for comments to be provided to the Office of Management and Budget (OMB) was published in the Federal Register on January 23, 2007. See Federal Register, Vol. 72, No. 14, Page 2875. A copy of that notice is attached as Appendix "3" to this letter. In addition for your convenience a copy of the actual survey instrument has been attached as Appendix "4" to this letter.

In keeping with the statement of work, the contractor has also developed discussion guides for the focus groups that it has planned involving senior citizens, disabled voters, and low income voters. These guides have been attached as Appendix "5" to this letter. This research project requires coordination with the United States Postal Service (USPS) as implementation of such a program would undoubtedly have a significant impact on that agency. Through that participation, USPS has suggested that additional focus groups be added to the original work plan for this study. The contractor communicated that request to EAC and the proposal for additional working groups has been attached as Appendix "6" to this letter. EAC believes that these additional focus groups would be helpful for this research project and is working with the contracting officer on this contract to determine whether the contract can be amended to add these additional focus groups.

You will note from the attached work plan that this project has a current project completion date of November 1, 2007. See Attachment "7", Work Plan. Progress reports updating progress on the work plan are also attached as Appendix "7" to this letter. However, additional focus groups would require additional time to complete the proposed, expanded statement of work. See Attachment "6", Proposal for Adding Focus Groups to the Free/Reduced Postage for Absentee Ballots Research Project. Progress reports updating progress on the work plan are also attached as Appendix "7" to this letter.

### **Military and Overseas Voting Study**

Section 245 of HAVA directs EAC to study the risks and benefits of using the Internet to conduct voting. The only area in which this type of electronic technology has been used at all to administer voting is for military and overseas citizens. As such, EAC has focused on using that experience as instructive for the possibility of Internet voting on a larger scale.

This study was directed to be completed within 20 months of the passage of HAVA, or no later than June 30, 2004. EAC was unable to complete this study by the original deadline, but currently has a pending research project to provide information regarding the use of electronic means for voting in military and overseas citizen voting.

Much like the Free Absentee Ballot Postage Study, the majority of time allotted in the original deadline for research passed prior to the existence of EAC and during the time of its initial budget which did not allow for research spending. In FY 2005, EAC approached the Technical Guidelines Development Committee (TGDC), the Federal advisory committee that researches and proposes voting system standards to EAC, to provide guidelines on security, core requirements and usability requirements for the use of the Internet in voting. The TGDC declined to include these as a part of their recommendations for voting system guidelines. TGDC considered the possibility of using the Internet for voting too risky and further believed that any voting system, Internet-based or not, must conform to the standards established by EAC based upon their research and recommendation.

Following this set back, EAC opted to seek a contractor to provide research in this area. We first conferred with the Federal Voting Assistance Program of the Department of Defense that several years ago worked on a substantial project aimed at establishing Internet voting for military members. In those conversations, we learned that there are many obstacles at the state and local level to implementing Internet-based voting. Based on this information, EAC determined that the best course of action was to find out what the current state of readiness and willingness is among state and local election jurisdictions to implement Internet-based voting. We can only develop standards for an appropriate system if we know what needs that system will have to serve and what obstacles it will have to overcome. A request for proposals was issued in FY 2006 and a contract was awarded.

A copy of the statement of work for this study has been attached as Appendix "8" to this letter. As you will see, that statement tasks the contractor with conducting case studies of election jurisdictions with experience in this area, conducting a survey of military and overseas voters, and a conducting a conference on Internet voting. The contractor has developed an outline for their case studies. This outline has been attached as Appendix "9" to this letter. In addition, the contractor has developed and distributed a survey instrument in keeping with the emergency provisions of the PRA. A copy of that survey instrument is attached as Appendix "10" to this letter. The conference is planned for August 2007 in New Orleans. The progress reports from the contract showing their progress on completing tasks as set forth in the statement of work are attached as Appendix "11" to this letter.

Thank you for your requests and your interest in election administration. I trust that the information that we have provided will give you a complete picture of the status of the pending research projects about which you inquired as well as valuable information concerning EAC's previous research projects regarding voting fraud and voter intimidation and voter identification. However, if you have further questions, please do not hesitate to contact me.

**Subject:** FOIA Request

Today I will circulate a formal FOIA request to all of you. Please note that this request is from a journalist. The information I circulate will include a copy of the original request, which was made by the DC bureau of McClatchy Newspapers. An abbreviated version of the request follows:

"Copies of all emails between Job Serebrov and Election Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for EAC."

Some of you have provided similar information in the past, but I will need another complete submission that includes any related files that may have been generated since your last submission.

Please anticipate a formal request to be distributed to everyone today, and take note that the deadline to provide this information is April 30. Thank you.

**Subject:** FOIA Request

Today I will circulate a formal FOIA request to all of you. Please note that this request is from a journalist. The information I circulate will include a copy of the original request, which was made by the DC bureau of McClatchy Newspapers. An abbreviated version of the request follows:

"Copies of all emails between Job Serebrov and Election Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for EAC."

Some of you have provided similar information in the past, but I will need another complete submission that includes any related files that may have been generated since your last submission.

Please anticipate a formal request to be distributed to everyone today, and take note that the deadline to provide this information is April 30. Thank you.

Subject Re: FOR YOUR REVIEW: Draft letter to Bds

History:

This message has been forwarded

Jeannie:

I noticed the following factual errors in the draft letter, which we may want to correct:

- The consultants were asked to do 4 things (not 2): (1) provide a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; (2) perform background research (including Federal and State administrative and case law review) and identify current activities of key government agencies, civic and advocacy organizations regarding voting fraud and voter intimidation; (3) establish and convene a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation to review the definition of what constitutes voting fraud and voter intimidation and the results of the background research, and to make recommendations on future EAC research on the topic; and (4) report to EAC on the preliminary research effort, working group deliberations, and recommendations for future research.
- The project working group met and offered its feedback and recommendations just before the 2006 meetings of the Standards and Advisory Boards, but after the May 2006 status report had been prepared. EAC staff orally updated the boards on the results of this meeting.

EAC Board of Advisors  
EAC Standards Board

RE: EAC Election Crimes Study

Dear Members of the EAC Standards Board and EAC Board of Advisors:

The U.S. Election Assistance Commission has recently come under fire for not releasing a draft report from EAC's Voting Fraud and Voter Intimidation project that was submitted by two contracted employees, Tova Wang and Job Serebrov. That draft report, which is attached to this letter, is a compilation of summaries of the work that they conducted. We thought it was important to explain the circumstances surrounding this project.

In 2005, the EAC Board of Advisors helped EAC prioritize its research efforts. As a result, EAC developed a research agenda that included studying voting fraud and voter intimidation. In the fall of 2005, EAC hired the two contract employees to conduct an initial review of the information available about voting fraud and voter intimidation. The employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted.

In May 2006, a status report regarding this study was presented at both public meetings of the Standards Board and Board of Advisors. Each group provided feedback on the progress of the study and the direction that it should take. Following those meetings, the employees convened a working group that likewise provided feedback on the study. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were reviewed by the contract employees. In addition, they provided a draft report for EAC's review and consideration. EAC adopted a final report on voting fraud and voter intimidation, *Election Crimes: An Initial Review and Recommendations for Future Study*, in December 2006.

After the release of EAC's final report there was some debate about whether EAC should release the draft version provided by our contracted employees. The Board of Advisors considered, but did not pass, a resolution urging the release of that document. Recently, EAC testified before a Congressional committee that requested the draft report. A copy was provided to the committee, and the committee released the draft report this week.

There has been much discussion surrounding EAC's review process of the material provided by the contract employees, and how much was included in the final report. After receiving the information from the consultants, EAC conducted due diligence to make sure the information was accurate, as both boards encouraged us to do regarding this project as well as all research we receive from third parties. During our review, we

closely examined any claims regarding existing voter fraud and intimidation or the lack thereof. Due to the small scope of the project, we wanted to be very sure any claims could be fully supported by data.

The consultants interviewed 24 people with experience in these issues. As you will see in the consultants' draft, they reached conclusions in their summaries that were based solely on these interviews, not on the entire body of work they collected. While individual accounts are certainly useful and instruct us on what issues to examine in moving forward, we did not feel these interviews provided the kind of extensive data upon which to draw these conclusions.

We understand that the topics of voter fraud and voter intimidation are hotly debated and sometimes divisive. We assure you that the process we took to review all of the materials and adopt a final report was not motivated by partisan politics, but by a responsibility and desire to issue data and findings that EAC could stand firmly behind and defend.

To avoid even the appearance of partisan influence in future research endeavors, EAC has established a bipartisan commission panel to oversee all research. We will also review our contracting policy and internal procedures to make sure consultants provide data that can be fully supported and substantiated. We will also take a hard look at our internal review process to determine if we can make further improvements as well as identify ways to expedite the process in which we complete these projects.

We take input from our advisory boards, Congress, and the public very seriously, and we pledge to you that we will continue to provide you with accurate, complete, and supported research, whether that research is conducted by consultants or by EAC staff.

Thank you for your service and for your continued commitment to the election process. We know that you in the election community rely on us to supply you with reliable information and we will strive to provide you with the very best information available on election administration issues.

We have attached a copy of EAC's statement on this issue, as well as a statement issued by Congressmen Maurice Hinchey and José Serrano. If you have any questions regarding this study or on any other matter, please don't hesitate to contact us.

Sincerely,

Donetta Davidson, Chair

Gracia Hillman, Commissioner

Caroline Hunter, Commissioner

Rosemary Rodriguez, Commissioner

Donetta,

I have attached a draft of a letter that we might use to respond to the request from Zoe Lofgren. I wanted to get it to you for you to start reviewing. It is rather lengthy. It also assumes that we are not going to release the fraud and intimidation report (a matter which came under some debate this afternoon). If that decision changes, I will have to alter the letter. You will also note that there are a number of blanks in the document, which I will fill in as soon as I have the information from Karen.

RE: EAC Research Efforts

Dear Congresswoman Lofgren:

Thank you for your letter of April 12, 2007 and the opportunity to provide valuable information about the research efforts being undertaken by the U.S. Election Assistance Commission. Your letter referenced four studies that have been or are being conducted by EAC through contracts and contracted employees. I will address each in turn, below.

**Voting Fraud and Voter Intimidation Study**

The first study about which you inquired is the voting fraud and voter intimidation study. This study was conducted by contract employees of the EAC for the EAC. In the fall of 2005, EAC hired two contract employees to conduct an initial review of the existing information available about voting fraud and voter intimidation. From that review, the employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were reviewed by the contract employees. In addition, they provided a draft report for EAC's review and consideration.

EAC, as a Federal agency, is the policy and decision making body. Consultants, contractors and employees do not make policy for EAC. Their recommendations are only one part of a deliberative process that precedes any agency decision. The Freedom of Information Act, a Federal statute governing the release of documents to the public, creates an exemption to protect pre-decisional, draft documents.

As you may know, the deliberative process privilege protects intra-agency documents that are (1) pre-decisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter or governmental decision before that matter is finally decided. It is a well settled matter of law that the work of contract employees and

contractors (“consultants”) constitute intra-agency documents.<sup>1</sup> This is true even where the consultants are deemed to be independent contractors and are not subject to the degree of control that agency employment entails.<sup>2</sup> The courts have made this determination after recognizing that agencies have a special need for the opinions and recommendations of temporary consultants.<sup>3</sup> Ultimately, deliberative documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) to protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.<sup>4</sup>

The report requested by House Appropriations Committee is a draft, representing one phase of the deliberative process—before the document was vetted by staff, approved by the Executive Director and reviewed and approved by the Commissioners (the relevant policy makers). Ultimately, the draft document was created by contract employees in order to aid the EAC’s Commissioners in their decisions regarding voting fraud and voter intimidation. The contract employees had no personal interest in their submissions and had no agency decision-making authority. Each was tasked with simply providing pre-decisional research and information to the EAC. Their efforts were limited to creating a truthful, comprehensive, and unbiased draft report. Only when the report is finalized and is adopted by EAC does it constitute an EAC decision or a policy determination.

The determination of this document as predecisional is born out in the facts surrounding the project at issue, including the contract documents that gave rise to research and writing of this draft report. First, the voter fraud and intimidation study that was requested is a draft of a final document that has already been released after being vetted by staff and approved by the EAC Commissioners. It is available in its final form on EAC’s Web site, [www.eac.gov](http://www.eac.gov). The draft document at issue was created by two contract employees hired pursuant to 5 U.S.C. §3109 (see 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees were supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. As stated by their contracts, these consultants were hired so that the EAC could “...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation.”

---

<sup>1</sup> Department of the Interior v. Klamath Water Users Protective Association, 532 U.S. 1, 9-11 (2001) (Citing Harry E. Hoover v. Dept. of the Interior, 611 F.2d 1132, at 1138 (1980); Lead Industries Assn. v. OSHA, 610 F.2d 70, 83 (C.A.5 1980) (applying exemption 5 to draft reports prepared by contractors); and Government Land Bank v. GSA, 671 F.2d 663, 665 (CA1 1982)); See also Hertzberg v. Veneman, 273 F. Supp. 2d 67, 76 n.2 (D.D.C. 2003).

<sup>2</sup> Klamath, at 10.

<sup>3</sup> Hoover, 611 F.2d at 1138.

<sup>4</sup> NLRB v. Sears, Roebuck & Co., 41 U.S. at 151.

Moreover, the contracts clearly forbid the consultants from releasing the draft they created consistent with the privilege covering the draft report. The contract states

All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Finally, the purpose or subject of the draft report at issue was to make an EAC determination on how voter fraud should be studied by the agency. This was to be done by (1) assessing the nature and quality of the information that presently exists on the subject matter, (2) defining the terms and scope of EAC study as proposed by HAVA, (3) determining what is to be studied and (4) determining how it is to be studied. In addition, the Consultants were asked to develop a definition of the phrases "voting fraud" and "voter intimidation."

In keeping with this concept, EAC reviews and vets all draft products or recommendations delivered by its consultants, contractors and employees. It would be irresponsible for EAC to accept the product of contracted employees and publish that information without exercising due diligence in vetting the product of the employees' work and the veracity of the information used to produce that product. EAC conducted this review of the draft voter fraud and intimidation report provided by the contracted employees. EAC found that the draft report failed to provide a definition of the terms as required, contained conclusions that were not sought under the terms of the contract or were not supported by the underlying research, and contained allegations that showed bias. EAC also found that the research provided by the contracted employees was a good body of data concerning the existing knowledge of voting fraud and intimidation. EAC staff developed a subsequent draft report to correct the problems mentioned above, to address the questions that this study sought to answer, and to address inconsistencies between the contracted employees' draft report and the research that was provided. The staff report included all of the contracted employees' and working group's recommendations. The staff report was adopted by EAC on December 7, 2007 during its public meeting and became the final and decisional report of the Commission on this issue. The final report as well as all of the underlying research conducted by the contracted employees are available on EAC's Web site, [www.eac.gov](http://www.eac.gov).

EAC understands and appreciates that the a request from a Congressional committee is exempt from the provisions of FOIA, and as such, EAC provided the draft document despite the fact that the deliberative process exemption clearly applies to its contents.

### **Voter Identification Study**

The second study about which you inquired was a study conducted by Rutgers University in conjunction with Moritz College of Law. Rutgers and Moritz served as contractors to EAC and produced this draft document pursuant to the provisions of the contract governing that relationship. A draft report was created by Rutgers University in conjunction with the Moritz College of Law (Ohio State University) to "...provide research assistance to the EAC for the development of voluntary guidance on provisional voting and voter identification procedures." The stated objective of the contract was to:

...obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics... The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were provided guidance, information, and were directed by EAC personnel. The final product they delivered (draft report sought) was identified as "a guidance document for EAC adoption." Clearly, as noted by the contract, the issuance of Federal guidance to states is a matter of government policy and limited to official EAC action.

EAC reviewed and vetted of the draft document provided by Eagleton. Review of that document revealed data and analysis that caused EAC concern. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.<sup>4</sup>

On March 30, 2007, EAC decided not to adopt Eagleton's study and not to issue an EAC report based upon this study. The Commission did release all of the material provided by Eagleton at that time. In addition, EAC voted to engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

#### **Free Absentee Ballot Postage Study**

Pursuant to Section 246 of the Help America Vote Act of 2002 (HAVA), EAC was directed to study and produce a report on the feasibility and advisability of a program that would provide absentee ballots that could be returned by the voter postage-free. HAVA directed that this report be delivered one year after the passage of HAVA, that is not later than October 29, 2003. On that date, EAC Commissioners had not yet been appointed and confirmed to fill their positions and to form the agency that is now EAC.

After the formation of EAC in December 2003, Congress provided an appropriation for FY 2004 in the amount of \$1.2 million dollars, which did not include sufficient funding for research activities. EAC received operational funding including some funding for research in its FY 2005 budget. Thus, in FY 2005, EAC developed an issued a request for proposals for a research contract to study this issue. No responsible bidders responded to the request for proposals. As such, EAC issued a subsequent request for

proposals in FY 2006. EAC received proposals and awarded a contract for the study of this issue. The work plan for this study shows that EAC expects to receive a final product from the contractor around \_\_\_\_\_. Documents related to this study including \_\_\_\_\_ are attached as Appendix "1" to this letter.

### **Military and Overseas Voting Study**

Section 245 of HAVA directs EAC to study the risks and benefits of using the Internet to conduct voting. The only area in which this type of technology has been used at all to administer elections is for military and overseas citizens. As such, EAC has focused on using that experience as instructive for the possibility of Internet voting on a larger scale.

This study was directed to be completed within 20 months of the passage of HAVA, or no later than June 30, 2004. Again, the majority of this period for research passed prior to the existence of EAC and during the time of its initial budget which did not allow for research spending. In FY 2005, EAC approached the Technical Guidelines Development Committee (TGDC), the Federal advisory committee that researches and proposes voting system standards to EAC, to provide guidelines on security, core requirements and usability requirements for the use of the Internet in voting. The TGDC declined to include these as a part of their recommendations for voting system guidelines. TGDC considered the possibility of using the Internet for voting too risky and further believed that any voting system, Internet-based or not, must conform to the standards established by EAC based upon their research and recommendation.

Following this set back, EAC opted to seek a contractor to provide research in this area. We first conferred with the Federal Voting Assistance Program of the Department of Defense that several years ago worked on a substantial project aimed at establishing Internet voting for military members. In those conversations, we learned that there are many obstacles at the state and local level to implementing Internet-based voting. Based on this information, EAC determined that the best course of action was to find out what the current state of readiness and willingness is amongst state and local election jurisdictions to implement Internet-based voting. We can only develop standards for an appropriate system if we know what needs that system will have to serve and what obstacles it will have to overcome. A request for proposals was issued in FY 2006 and a contract was awarded. The work plan for that contract shows that a product from the contractor should be available to EAC around \_\_\_\_\_. Documents related to ongoing work on this study including \_\_\_\_\_ are attached as Appendix "2" to this letter.

Thank you for your requests and your interest in election administration. If you have further questions, please do not hesitate to contact me.

Sincerely,

Donetta Davidson  
Chair

Subject FOIA Request

Today I will circulate a formal FOIA request to all of you. Please note that this request is from a journalist. The information I circulate will include a copy of the original request, which was made by the DC bureau of McClatchy Newspapers. An abbreviated version of the request follows:

"Copies of all emails between Job Serebrov and Election Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for EAC."

Some of you have provided similar information in the past, but I will need another complete submission that includes any related files that may have been generated since your last submission.

Please anticipate a formal request to be distributed to everyone today, and take note that the deadline to provide this information is April 30. Thank you.

Subject FYI - Today's media inquiries ( 4-11-07, Wed )

Commissioners:

Today we had the following media inquiries:

(1) Commissioner Hillman was interviewed by Allison Keyes of NPR about the fraud report. Commissioner Hillman explained the scope of the contract and that we asked the contractors to do two things: define voter fraud and intimidation and provide recommendations for future study on these topics. The commissioner pointed out that we did not ask them for conclusions. The reporter asked if it was true that EAC was trying to suppress information about voter intimidation among minorities. The commissioner said she had worked all her life to prevent minorities from being intimidated at the polls, and that she was very anxious to embark upon a more expansive study on this very topic. The commissioner said the agency was transparent, and talked about our public meetings and the transcripts and testimony that were available to the public through our website.

**NOTE:** The interview will be aired repeatedly this evening on the five minute newscast at the top and bottom of the hour. To listen, tune into WAMU 88.5 FM American University Radio or Listen Live.

(2) Laura Strickler of CBS News wanted to know how much we spent on the fraud report and the voter ID report. We told her the fraud and intimidation research contract was for \$147,106, and the voter ID and provisional voting research contract was \$560,002. We explained that voter ID was only part of the contract. It also tasked Eagleton to provide information about provisional voting practices. In Oct. 2006, the Commission issued provisional voting best practices.

(3) Rich Wolfe of USA Today is working on a story on what states will have to do if Rush Holt's bill is enacted. He asked for details on what states and vendors are currently facing in order to transition from the 2002 to the 2005 voting system guidelines which we provided. Brian Hancock also spoke with him on background about the testing and certification program. Mr. Wolf wanted to know more details regarding the differences in the VSS 2002 and the VVSG 2005. Brian explained that the most significant changes related to accessibility and usability. His real concern was what practical effect the VVSG would have on elections 2008. We noted that more than the VVSG, the changes brought about by the EAC implementation of our Testing and Certification Program might have just as big an impact. We noted that we would not be grandfathering any NASED systems, and that if State law required EAC certification, the manufacturers would need to bring their voting systems through the EAC program for full testing. We also explained the implementation date of December 2005 and that as of that date, no systems could apply for testing to the 2002 VSS. We also made sure that Mr. Wolf understood that the EAC program was voluntary and that participation in the EAC certification program would be driven ultimately by the statutes, regulations or procedures in each of the States.

(4) Paul DeGregorio called to let us know he was interviewed by Adam Stichko of the St. Louis Post Dispatch about the fraud report. The reporter wanted to know if the reaction was a major setback for the agency. Paul said no, and that as EAC noted in its statement, it was going to improve its internal operations. He pointed out that sometimes EAC makes tough decisions that both sides of the aisle might not agree upon. But regardless, he said the agency has a responsibility to conduct due diligence, and make the tough decisions. He talked about what we have accomplished and the assistance we provide -- best practices, quick starts, VVSG and certification program.

(5) Meg Cox a freelance writer in Chicago asked what prompted EAC's Statement Regarding Research &

026896

Contracting Policies and whether something new happened in Congress to prompt the statement. We said that the statement contains the information.

(6) Ross Tuttle of Los Angeles was in town today and is working on a documentary series titled "The Freedom Files" which includes an episode on voting rights. He asked for EAC's statement in response to the NYT article on the release of the report. We sent him today's statement.

(7) Kat Zambon of electionline.org asked if other states have a similar partnership arrangement that the Secretary of State in Georgia has with Kennesaw State University to provide technical support for the state's voting machines, as well as outreach, education, ballot design, training and consultation. We said this is the only one that we are aware of.

(8) John Gideon of Voters Unite and Brad Blog had the following questions, and Jeannie's responses follow:

A. How does the EAC see their position as a "clearinghouse" of information as required by HAVA? We follow the mandates of HAVA regarding our responsibilities to conduct studies about election administration issues. The results of those studies make up the "clearinghouse." B. What responsibility does the EAC have with regard to warning states about what may be security vulnerabilities in specific voting systems? The EAC certification program will collect anomaly reports (go here to view the form), which we will then investigate and share with election officials and the public. C. Chairwoman Davidson has said that the EAC's middle name is "Assistance". How does ignoring potential security issues fit into that theme? As I mentioned above, monitoring anomalies is part of our certification program. As we've discussed before, the system you are referring to was not certified by EAC. If the manufacturer of this system wants an EAC certification for this system, it would have to successfully complete our certification process and adhere to all of its rules. EAC did not grandfather any systems already in use (meaning that we did not automatically issue certifications or transfer NASED qualifications to existing systems), including the one you referenced. Mr. Gideon replied that he was amazed that instead of answering the questions I conflated the certification of voting systems with a security vulnerability that is in existence across the country. He asserted this issue had nothing to do with the EAC certification program. I replied that the very fact that we have set up a system to track voting system anomalies is evidence that we think monitoring performance is very important. Again, as we have discussed many times, we did not certify this voting system. If it successfully completes EAC's certification program in the future, then it would be subject to our rules and conditions, and if a problem occurs we would notify the election community and the public.

Subje Indiana Secretary of State Rokita , the EAC Controversy, and the Incidence of  
ct Voter Fraud

<http://electionlawblog.org/archives/008228.html>

## Indiana Secretary of State Rokita , the EAC Controversy, and the Incidence of Voter Fraud

At a recent AEI-Brookings Election reform project event, I tangled a bit with Indiana Sec. of State Todd Rokita, including over the question whether the National Association of Secretaries of State will continue to take its unfortunate position that the EAC should be disbanded. Sec. Rokita has also been a strong supporter of voter identification laws, and his state's law has been subject to challenge in the Crawford case (see some of my analysis of the cert. possibilities for this case).

I did not realize until now (or perhaps I forgot) that Sec. Rokita was a member of the EAC's working group on vote fraud issues (see page 4 of pdf).

In the draft Seberov/Wang report leaked to the NY Times, Sec. of State Rokita is quoted as making some troubling remarks about conducting research into possible voter fraud, a key empirical question not only for the constitutional issue in *Crawford* but for election administration more generally. On page 28 of the report, Sec. Rokita is quoted as saying *both* that he believes the EAC should be in business of designing its own methodology for figuring out the incidence of voter fraud (rather than relying on existing assessments of the amount of fraud) *and* that the EAC should be "very careful" not to make the "wrong selection in the eyes of some group" of a political scientist to conduct such a study.

026898

In my view, there's no way that the EAC can design a sound methodology for a new study of voter fraud without the help of well-trained political scientists (or other social scientists well trained in appropriate research methods). It cannot subject the selection of such a political scientist to some kind of litmus test that excludes a good political scientist whose choice offends some interest group. This is part of the EAC's new pathology generally: it is afraid to release any data that might offend some group or take a side. (Under pressure, the EAC has now released that Eagleton/Moritz study on voter id and turnout that it has disowned).

In the end, I get the sense that no amount of evidence from the most eminent political scientist would convince Sec. Rokita that voter fraud at the polling place is not a major problem. From the report: "Mr. Rokita stated that, 'We're not sure that fraud at the polling place doesn't exist. We can't conclude that.'"

With the apparent demise of the American Center for Voting Rights (whose Thor Hearne was also in the EAC working group), Mr. Rokita appears to be fighting this battle alone on the EAC.

A more general lesson from the EAC controversy: There has been much writing in recent years by Chris Elmendorf, Heather Gerken, and myself on the use of election reform commissions and other devices to get changes in election administration rules. I fear that we will be studying the EAC's failures for many years to understand how *not* to engage in meaningful election administration reform.

Subject EAC Statement

History This message has been forwarded.

Hello everyone,  
I'm sure you have read the article in today's NYT about the voter fraud report this agency issued. Today, Congressmen Hinchey and Serrano have issued the following statement. Very shortly, EAC will post and distribute the attached statement to articulate our role and approach to conducting research and the steps we will take to improve our process. Please let me know if you have any questions about this, as I am sure we will all receive phone calls today about this issue. You may also direct people with questions to the statement that will be on the website. I will keep everyone informed as this situation evolves.

2007-11 ( 4-11-07 ) Statement on Research & Contracting Policies.pdf

For  
Immediate  
Release

April 11, 2007

## **Hinchey, Serrano Urge Non-Partisanship, Greater Transparency at Election Assistance Commission**

**Washington, DC** - Today, Congressmen Maurice Hinchey (NY-22) and José E Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring

026899

that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate."

"The EAC is charged with helping to ensure our elections are trustworthy and administered fairly," said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. "I'm concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information was an analysis that undermines the notion that voter fraud is rampant."

"I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people's faith in it, is far more important than any short-term political advantage."

The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW – Suite 1100  
Washington, DC 20005

## **EAC Statement Regarding Research and Contracting Policies**

### ***Commission to Review Internal Procedures***

For Immediate Release  
April 11, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The Help America Vote Act of 2002 (HAVA) directs the Election Assistance Commission (EAC) to serve as a national clearinghouse and resource by, among other things, conducting studies with the goal of improving the administration of federal elections. To fulfill this mandate, the EAC has entered into contracts with a variety of persons and entities. Reports adopted by the EAC, a bipartisan federal entity, are likely to be cited as authoritative in public discourse. Prior to the EAC's adopting a report submitted by a contractor, the EAC has the responsibility to ensure its accuracy and to verify that conclusions are supported by the underlying research.

The Commission takes input and constructive criticism from Congress and the public very seriously. We will take a hard look at the way we do business. Specifically, we will examine both the manner in which we have awarded contracts and our decision-making process regarding the release of research and reports. The EAC takes its mandates very seriously, and we will continue to move forward in a bipartisan way to improve the way America votes.

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Subject NEED YOUR APPROVAL: Statement for tomorrow

Commissioners,

As you know, the NYT will run an article tomorrow about EAC, and I think the focus will be on our recent stumbles, and it will speculate about what kind of role you've been assuming. I think it will portray us as under fire and struggling to regain our footing due to mismanagement and a late start. Also, tomorrow Hinchey and Serrano will release the draft fraud report along with a press release. I'd like to release and post the following statement as soon as their press release hits the street. Please let me know if you agree with this statement. Press log follows.

"EAC's policy is to thoroughly review any information submitted by contractors. That review involves due diligence to ensure that every report EAC adopts and issues is based on accurate information. We have a responsibility to take the time to get things right, and to make sure we can stand behind and each and every report we issue.

"However, we take input from Congress and the public very seriously, and we will take a hard look at the way we do business. If changes need to be made to increase transparency or speed up our review process, we will make those changes. EAC takes its responsibilities very seriously, and we will continue to move forward in a bipartisan way to improve the way America votes."

1. Ian Urbina of the NYT interviewed commissioners Davidson and Hillman about the fraud report. Both told him that EAC has a responsibility to make sure information we release is accurate, and that means conducting due diligence. The chair pointed out that we now have bi-partisan subcommittees to review research, budget issues and certification. She pointed out that we have a responsibility to take the time to get things right. Comm. Hillman answered his questions about specific passages, and explained why we made changes and how some of the comparisons he was making wasn't germane. Ray Martinez called and wanted us to know that he was also interviewed by Ian, and Ray told him he has always thought the agency should make final contractor reports available to the public. My responses to additional questions he posed follow:

A. In the draft on page 7, sec. bullet, it says "there is widespread but not unanimous." In the final, page one, it says "It is clear from the review that there is a great deal of debate on the pervasiveness of fraud in elections as well as what constitute the most common acts of fraud or intimidation." Reason for the change from draft to final language -- The statement in the draft report is based on the interviews only, not on the entire body of research that was conducted. The latter statement in the final report is based upon the entire body of research, including the articles, books and cases which constitute the appendices. Also, the sentence from the draft is in the section that describes the interviews. The sentence in the final version is in the executive summary, which focuses on the entire project, not just the interviews.

B. In the draft on page 7 it says there is "evidence of some intimidation." In the final, page 7, it says "voter intimidation is also a topic of some debate because there is little agreement concerning what constitutes actionable voter intimidation." Reason for the change from draft to final language -- After reviewing all of the data provided by the consultants, EAC determined that there is little agreement as to what constitutes "voter intimidation." There is a difference between actionable intimidation (criminal) and civil issues and activities that are legal in both the criminal and civil context. No one is debating that there is some evidence of intimidation. The question is how intimidation is defined (criminal, civil, both, neither).

C. In the draft on page 7, second bullet, it says "most people believe that false registration forms have not resulted in fraud." This sentence wasn't supported by the entire body of research. Regarding the sentence in the final report: "For example, the interviewees largely agreed that absentee balloting is subject to the

026902

greatest proportion of fraudulent acts, following by voting buying and voter registration fraud." This language was taken from the first bullet on page seven of the draft report, which begins "There is virtually universal agreement that absentee ballot fraud is the biggest problem..."

D. In the draft, the consultants offered conclusions up front. In the final version, these conclusions either ended up in the appendices or elsewhere in the document. Why? EAC organized the content of the document in the manner that seemed most suitable. For instance, all of the recommendations (consultants' and working group's) are grouped together. We added language that reflected the commission's decision to adopt six of the recommendations.

E. Was this voted on in public? Was it unanimous? Three commissioners -- Paul DeGregorio, Gracia Hillman, and Donetta Davidson unanimously approved the final report at a public meeting on Dec. 7, 2006. Go here for details.

F. Who managed this project? Initially, the project was managed by EAC Dir. of Research Karen Lynn-Dyson, but early on the project was shifted to EAC Election Research Specialist Margaret Sims.

G. When did the work begin and when was it concluded? The consultants began work in Sept. 2005. They delivered sections of the draft document in phases (all dates are 2006). Interview conclusions were delivered to EAC in April; future suggestions in June; everything else (except next item) delivered in July; and literature review arrived in August.

H. What are the political affiliations of Karen and Margaret? Who appointed them? I don't know Karen's or Margaret's political affiliation. They are not political appointees -- they are federal employees, not appointed by the commission but hired by the executive director.

I. What about Julie Thompkins? Julie was appointed by the commission. Go here to read the press release about her appointment. The last person she worked for was a Republican, but Julie's appointment to the EAC was not on a partisan basis. She was appointed by a unanimous vote of the full (four commissioners) commission.

J. Explain the circumstances surrounding the only commission vote that wasn't unanimous. HAVA gave EAC the mandate under the National Voter Registration Act (previously held by FEC) to develop a federal voter registration form that must be accepted and used by states covered under the Act. As part of that mandate, EAC routinely updates the state instructions on the form. Instructions provide information about voting rules and laws in the states.

Arizona requested a change to the federal form's state instructions reflecting Prop. 200. Staff routinely reviews and approves state requests regarding changes to the instructions. In this case, the executive director denied Arizona's request. Paul DeGregorio (R), who was EAC chair at the time, put the matter to a vote, proposing that the Commission accommodate Arizona's proof of citizenship procedure by amending the state specific portion of the federal voter registration form. The vote failed along party lines, 2 - 2. HAVA requires any measure to be carried by at least three votes. Therefore, the measure failed.

Subject FYI ONLY: Today's media inquiries (04-06-07)

1. I confirmed for Matt Murray of Roll Call that Comm. Hunter is a Republican and that she came to EAC in March. He asked for our FY budget figures, which I sent to him. He asked if it was true that we bungled the certification of voting systems in reference to the CIBER situation. I said that it had nothing to do with certifying voting systems, and explained the entire interim process and the reason we had to implement after NIST told us they wouldn't get labs accredited until late 2006 and NASED's termination of its program. I said we announced this program and our decision to invite the three labs to apply at a public meeting in 2005, and that we've had several public meetings about the interim program, as well as sending updates to our stakeholders. He asked me how I would characterize the criticism surrounding CIBER, and I said the feedback we received was that we should have been more proactive in reminding people that CIBER had not received interim certification, that it was still pending. I emphasized that we have not certified any voting systems, so it would be incorrect to state that we had "bungled" that process. He asked if we released the Eagleton data after Hinchey urged us to, and I said yes, but told him that the chair announced that we would complete this project w/n 30 days at a public meeting in Feb. in which Eagleton testified and answered questions about their methodology. I also gave him the following quote: We have a responsibility to take the time to get things right. However, we understand the criticism and we are taking a hard look at our internal processes. We will identify what changes need to be made, and we will make them. We take comments from Congress very seriously, and we appreciate their input and their willingness to give us what we need to get the job done.

2. The chair was interviewed by Pam Zubeck of the Gazette (CO) about what she's seeing regarding voting by mail. The chair talked about the trends in the NW, and how it was important to make sure states have accurate and up to date lists. She noted that the introduction of statewide databases will be especially helpful to those states. The reporter asked if CO sends out ballots to inactive voters, and the chair said yes, and told her it is a federal requirement that voters must be notified before they are removed from voter rolls.

3. Freelance journalist Meg Cox, who is writing an article for Op-Ed News, had the following questions, and my responses follow: a) You said that the Wang/Serebrov report has not been released because it was predecisional. Was the Moritz/Eagleton report released because it was not predecisional? The Moritz/Eagleton report was a predecisional document. The commissioners took an action not to adopt a final report based upon the Moritz/Eagleton report, but to release all the predecisional information (the draft report).

b) I understood you to say that the December EAC report includes all of the Wang/Serebrov recommendations but not all of the Wang/Serebrov findings. Is that correct? The report does include all of their recommendations, as well as the research they reviewed, which includes books and articles and court cases. The contract with the consultants did not ask them to produce findings. It was an initial effort to identify what relevant information is available, define voter fraud and voter intimidation, and make recommendations to EAC regarding future study.

c) I understood you to say that EAC staff added results of their own research to the December EAC report. Is that correct? Yes, EAC conducted additional research to further clarify the definitions of "voter fraud" and "voter intimidation." On page 13, you will see the results of the EAC research, which resulted in defining the scope of future study and new terminology for these topics -- election crimes. EAC staff reviewed the report for accuracy, for grammar and added language that reflected the commission's decision to adopt the final version based upon the initial research provided by the consultants. New language was also added to communicate the commission's decision adopt six of the 16 recommendations put forth by the consultants.

d) If I'm correct on questions 2 and 3, would it be accurate to say that readers of the December report

026904

cannot tell how much of that report does and does not reflect the original Wang/Serebrov findings? Again, the contract with the consultants did not ask them to produce findings, nor was that the scope of the contract. It was an initial effort that tasked them to identify what relevant information is available, define voter fraud and voter intimidation, and make recommendations to EAC regarding future study. The research (Appendix D, 197 pages; and Appendix B, 57 pages) and all of their recommendations are included in the final report.

e) I called earlier today requesting the Wang/Serebrov report, and you sent me the December EAC report. I am concerned that if I had not already been researching this closely, I would have thought that you'd sent me the Wang/Serebrov report and would have reported incorrectly that you had. Does the EAC have any comment on this manner of repoding to press inquiries? (I contacted you to request the report after I read in the Statesman Journal of Salem, Oregon, an article by Marie Cocco that says: "The bipartisan commission didn't widely release the consultants' review, but makes it available on request." Did the EAC indeed give Ms. Cocco a copy of the "consultants' review"? Or has she misunderstood you in the way I'm concerned about?) I sent you a link to the "EAC report" because it is what was adopted by the commission based upon the research conducted by the consultants. The final report clearly states how it was compiled, includes bios for both of the consultants, their research and summaries of their interviews. Regarding Ms. Cocco, I explained the entire process to her. I provided the staff update on the project which was presented at a public meeting in May 2006 and the final report, which is posted on the EAC website. Regarding "this manner of responding to press inquiries," I have forwarded your comments to my supervisor so he can review my performance regarding the handling of your inquiry.

f) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for research projects. After EAC receives the initial data, the agency reviews the data for accuracy. What form of due diligence does the EAC's staff routinely conduct on research that is contracted out to experts before that research is released? You mentioned "vetting" the research. What does that vetting entail? It depends on the project, but in every case, the agency has a responsibility to make sure the information it receives from any contractor is accurate. In this case, EAC staff read every article cited by the consultants and reviewed the contents of every interview they conducted. Appendix C contains the interview summaries, and the changes EAC made are clearly footnoted. Regarding other research projects, if it is information directly related to a mandate within the Help America Vote Act (HAVA), staff will make sure that the information is consistent with the law. If the research focuses on election laws throughout the country, we make sure the laws are cited correctly and that state legislatures haven't changed or amended these laws since the research was conducted. (As you probably know, there have been many new election laws introduced at the state level since 2004.) Throughout the process, we review for grammar as well as make sure the document flows and is arranged logically -- the basic tenets of editing.

Subject NYT Interview Request

History:

✉ This message has been replied to.

Commissioners,  
Ian Urbina of the NYT is working on a story about our fraud report. He has the original, and he's asking questions about how we arrived at the final version, as well as wanted to confirm that there were intense discussion among the commissioners about whether to release everything.

Madam Chair--I need to know if you can speak with him in the next 30 min. If not, I need to know which commish would be available to speak with Ian. We are under seige, and I think it's very important to have a commish perspective/input in this piece.

Subject FYI - Today's media inquiries ( 4-4-07, Wed )

Commissioners:

For the second time in a month, Dan Seligson of Electionline.org requested the same document on voter fraud that was requested of EAC by the House Appropriations Subcommittee on Financial Services. Again, we said that the document that was requested by the subcommittee is considered predecisional under the Freedom of Information Act (FOIA), but that of course we provided it to the subcommittee because they are exempt from FOIA. We noted however, that the EAC adopted a final report on election crimes at our Dec. 7, 2006 public meeting. We said that the final report was based on the research provided by the consultants and additional information gathered by EAC staff and that it is available on our website [here](#). We said that the report includes all of the data reviewed by the consultants. (links on page 24.) and that it also includes all of the recommendations for further study that the consultants put forth. We said that ultimately, the commission adopted four of those recommendations and provided the press release link [here](#). We said that as a small agency, EAC often works with contractors, consultants and experts to gather data and conduct research. After the commission receives the initial data or information, staff then works to incorporate this information into a final EAC report.

Elle,

I need a more complete TGDC roster, including their titles and affiliations. Please see last year's annual report, page 45. Again, I need a complete list of those who served in Fiscal Year 2006, which covers Oct. 1, 2005 through Sept. 30, 2006. Anyone who was not serving as of Sept. 30, I will list them as former members. Please let me know if you have any questions.

Subject: Need info from you for annual report

Elle,

Per Bryan's earlier emails, I need several things from you ASAP for the Annual Report, which covers everything from Oct. 1, 2005 to Sept. 30, 2006. 1) A list of cities the commissioner visited during that time period; 2) The TGDC roster as of Oct. 1, 2005. I also need a list of members who resigned during that time period so I can note their service, even though they won't be listed on the roster. In addition, please make sure her bio on the website is current, as that is what will be in the annual report.

Also, my records indicate that I did not receive a response from you regarding my FOIA request. Please note that it specifically asks for a response from everyone, even if the response is "no records." I'm assuming you have checked with the commissioner to see if she has any responsive records. Original request is below. Please let me know if you have any questions or need clarification about any of this. Thank you.

Hello everyone,

I need each of you to respond affirmatively or negatively to the FOIA request below. If you have no documents in your possession related to this request, please reply to me with the words "no records." If you have records, please identify them in an e-mail reply and attach them to the e-mail. If the document is not electronic, hand deliver them to me. Also, if you believe any of these related documents should be withheld, please provide a brief memo stating the reason for your position.

026909

I need this information and/or a response by COB December 5, 2006. If you cannot comply by this date, please provide notification and an estimated time when you will provide the information and the reason why you cannot comply by the original deadline. Thanks for your cooperation. See request below:

Wendy Weiser of the Brennan Center for Justice has submitted a FOIA request for the voting fraud report prepared by our consultants and the voter ID report, as well as the following information:

"In the event that the EAC denies my renewed request for the voter ID and voting fraud reports or delays another week in providing those materials, we respectfully request copies of (1) all requests for proposals and contracts relating to the voter ID and voting fraud reports; and (2) all written and electronic communications concerning the voter ID and voting fraud reports between the EAC and (a) the Eagleton Institute of Politics, (b) the Moritz College of Law, (c) Tova Wang, (d) Job Serebrov, and (e) any other individuals or entities, including but not limited to outside reviewers."

Please let me know if you would like a copy of the FOIA request.

Subject EAC Statement

Hello everyone,

I'm sure you have read the article in today's NYT about the voter fraud report this agency issued. Today, Congressmen Hinchey and Serrano have issued the following statement. Very shortly, EAC will post and distribute the attached statement to articulate our role and approach to conducting research and the steps we will take to improve our process. Please let me know if you have any questions about this, as I am sure we will all receive phone calls today about this issue. You may also direct people with questions to the statement that will be on the website. I will keep everyone informed as this situation evolves.

2007- 11 ( 4-11-07 ) Statement on Research & Contracting Policies.pdf

For  
Immediate  
Release

April 11, 2007

## **Hinchey, Serrano Urge Non-Partisanship, Greater Transparency at Election Assistance Commission**

**Washington, DC** - Today, Congressmen Maurice Hinchey (NY-22) and José E Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just

026917

some of them. The EAC must never limit discussion and debate.”

“The EAC is charged with helping to ensure our elections are trustworthy and administered fairly,” said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. “I’m concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information was an analysis that undermines the notion that voter fraud is rampant.

“I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people’s faith in it, is far more important than any short-term political advantage.”

The draft report was written by outside experts under contract with the EAC. The final report was entitled “Election Crimes: An Initial Review and Recommendations for Future Study” and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

## **EAC Statement Regarding Research and Contracting Policies**

### *Commission to Review Internal Procedures*

For Immediate Release  
April 11, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The Help America Vote Act of 2002 (HAVA) directs the Election Assistance Commission (EAC) to serve as a national clearinghouse and resource by, among other things, conducting studies with the goal of improving the administration of federal elections. To fulfill this mandate, the EAC has entered into contracts with a variety of persons and entities. Reports adopted by the EAC, a bipartisan federal entity, are likely to be cited as authoritative in public discourse. Prior to the EAC's adopting a report submitted by a contractor, the EAC has the responsibility to ensure its accuracy and to verify that conclusions are supported by the underlying research.

The Commission takes input and constructive criticism from Congress and the public very seriously. We will take a hard look at the way we do business. Specifically, we will examine both the manner in which we have awarded contracts and our decision-making process regarding the release of research and reports. The EAC takes its mandates very seriously, and we will continue to move forward in a bipartisan way to improve the way America votes.

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Subject FYI - Today's media inquiries ( 4-11-07, Wed )

Commissioners:

Today we had the following media inquiries:

(1) Commissioner Hillman was interviewed by Allison Keyes of NPR about the fraud report. Commissioner Hillman explained the scope of the contract and that we asked the contractors to do two things: define voter fraud and intimidation and provide recommendations for future study on these topics. The commissioner pointed out that we did not ask them for conclusions. The reporter asked if it was true that EAC was trying to suppress information about voter intimidation among minorities. The commissioner said she had worked all her life to prevent minorities from being intimidated at the polls, and that she was very anxious to embark upon a more expansive study on this very topic. The commissioner said the agency was transparent, and talked about our public meetings and the transcripts and testimony that were available to the public through our website.

**NOTE:** The interview will be aired repeatedly this evening on the five minute newscast at the top and bottom of the hour. To listen, tune into WAMU 88.5 FM American University Radio or Listen Live.

(2) Laura Strickler of CBS News wanted to know how much we spent on the fraud report and the voter ID report. We told her the fraud and intimidation research contract was for \$147,106, and the voter ID and provisional voting research contract was \$560,002. We explained that voter ID was only part of the contract. It also tasked Eagleton to provide information about provisional voting practices. In Oct. 2006, the Commission issued provisional voting best practices.

(3) Rich Wolfe of USA Today is working on a story on what states will have to do if Rush Holt's bill is enacted. He asked for details on what states and vendors are currently facing in order to transition from the 2002 to the 2005 voting system guidelines which we provided. Brian Hancock also spoke with him on background about the testing and certification program. Mr. Wolf wanted to know more details regarding the differences in the VSS 2002 and the VVSG 2005. Brian explained that the most significant changes related to accessibility and usability. His real concern was what practical effect the VVSG would have on elections 2008. We noted that more than the VVSG, the changes brought about by the EAC implementation of our Testing and Certification Program might have just as big an impact. We noted that we would not be grandfathering any NASED systems, and that if State law required EAC certification, the manufacturers would need to bring their voting systems through the EAC program for full testing. We also explained the implementation date of December 2005 and that as of that date, no systems could apply for testing to the 2002 VSS. We also made sure that Mr. Wolf understood that the EAC program was voluntary and that participation in the EAC certification program would be driven ultimately by the statutes, regulations or procedures in each of the States.

(4) Paul DeGregorio called to let us know he was interviewed by Adam Stichko of the St. Louis Post Dispatch about the fraud report. The reporter wanted to know if the reaction was a major setback for the agency. Paul said no, and that as EAC noted in its statement, it was going to improve its internal operations. He pointed out that sometimes EAC makes tough decisions that both sides of the aisle might not agree upon. But regardless, he said the agency has a responsibility to conduct due diligence, and make the tough decisions. He talked about what we have accomplished and the assistance we provide -- best practices, quick starts, VVSG and certification program.

(5) Meg Cox a freelance writer in Chicago asked what prompted EAC's Statement Regarding Research &

026926

Contracting Policies and whether something new happened in Congress to prompt the statement. We said that the statement contains the information.

(6) Ross Tuttle of Los Angeles was in town today and is working on a documentary series titled "The Freedom Files" which includes an episode on voting rights. He asked for EAC's statement in response to the NYT article on the release of the report. We sent him today's statement.

(7) Kat Zambon of electionline.org asked if other states have a similar partnership arrangement that the Secretary of State in Georgia has with Kennesaw State University to provide technical support for the state's voting machines, as well as outreach, education, ballot design, training and consultation. We said this is the only one that we are aware of.

(8) John Gideon of Voters Unite and Brad Blog had the following questions, and Jeannie's responses follow:

A. How does the EAC see their position as a "clearinghouse" of information as required by HAVA? We follow the mandates of HAVA regarding our responsibilities to conduct studies about election administration issues. The results of those studies make up the "clearinghouse." B. What responsibility does the EAC have with regard to warning states about what may be security vulnerabilities in specific voting systems? The EAC certification program will collect anomaly reports (go here to view the form), which we will then investigate and share with election officials and the public. C. Chairwoman Davidson has said that the EAC's middle name is "Assistance". How does ignoring potential security issues fit into that theme? As I mentioned above, monitoring anomalies is part of our certification program. As we've discussed before, the system you are referring to was not certified by EAC. If the manufacturer of this system wants an EAC certification for this system, it would have to successfully complete our certification process and adhere to all of its rules. EAC did not grandfather any systems already in use (meaning that we did not automatically issue certifications or transfer NASED qualifications to existing systems), including the one you referenced. Mr. Gideon replied that he was amazed that instead of answering the questions I conflated the certification of voting systems with a security vulnerability that is in existence across the country. He asserted this issue had nothing to do with the EAC certification program. I replied that the very fact that we have set up a system to track voting system anomalies is evidence that we think monitoring performance is very important. Again, as we have discussed many times, we did not certify this voting system. If it successfully completes EAC's certification program in the future, then it would be subject to our rules and conditions, and if a problem occurs we would notify the election community and the public.

From the variety of comments it is not clear to me that there is a common understanding on how to proceed and what we should say -- or at least I am not comfortable that I understand how you all want this letter to read. So, I would suggest we spend a bit more time on the theme this morning so that I can efficiently and accurately edit the letter so that we can get it out timely today.

Keeping it narrow to the current controversy is ok with me, but I think we cannot assume people know how the recent events unfolded, ie Cong released, NYT wrote, etc.

It appears there will be a substantive rewrite so I will save my edits for that version.

However, my original suggestion was to communicate with the boards about the current controversy, not just research in general. Otherwise it looks like we are sidestepping the problem at hand, which is why we are writing to the boards in the first place.

Subject FOIA Request

History:  This message has been replied to.

Today I will circulate a formal FOIA request to all of you. Please note that this request is from a journalist. The information I circulate will include a copy of the original request, which was made by the DC bureau of McClatchy Newspapers. An abbreviated version of the request follows:

"Copies of all emails between Job Serebrov and Election Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for EAC."

Some of you have provided similar information in the past, but I will need another complete submission that includes any related files that may have been generated since your last submission.

Please anticipate a formal request to be distributed to everyone today, and take note that the deadline to provide this information is April 30. Thank you.

Subject FYI ONLY: Today's media inquiries (04-06-07)

1. I confirmed for Matt Murray of Roll Call that Comm. Hunter is a Republican and that she came to EAC in March. He asked for our FY budget figures, which I sent to him. He asked if it was true that we bungled the certification of voting systems in reference to the CIBER situation. I said that it had nothing to do with certifying voting systems, and explained the entire interim process and the reason we had to implement after NIST told us they wouldn't get labs accredited until late 2006 and NASED's termination of its program. I said we announced this program and our decision to invite the three labs to apply at a public meeting in 2005, and that we've had several public meetings about the interim program, as well as sending updates to our stakeholders. He asked me how I would characterize the criticism surrounding CIBER, and I said the feedback we received was that we should have been more proactive in reminding people that CIBER had not received interim certification, that it was still pending. I emphasized that we have not certified any voting systems, so it would be incorrect to state that we had "bungled" that process. He asked if we released the Eagleton data after Hinchey urged us to, and I said yes, but told him that the chair announced that we would complete this project w/n 30 days at a public meeting in Feb. in which Eagleton testified and answered questions about their methodology. I also gave him the following quote: We have a responsibility to take the time to get things right. However, we understand the criticism and we are taking a hard look at our internal processes. We will identify what changes need to be made, and we will make them. We take comments from Congress very seriously, and we appreciate their input and their willingness to give us what we need to get the job done.

2. The chair was interviewed by Pam Zubeck of the Gazette (CO) about what she's seeing regarding voting by mail. The chair talked about the trends in the NW, and how it was important to make sure states have accurate and up to date lists. She noted that the introduction of statewide databases will be especially helpful to those states. The reporter asked if CO sends out ballots to inactive voters, and the chair said yes, and told her it is a federal requirement that voters must be notified before they are removed from voter rolls.

3. Freelance journalist Meg Cox, who is writing an article for Op-Ed News, had the following questions, and my responses follow: a) You said that the Wang/Serebrov report has not been released because it was predecisional. Was the Moritz/Eagleton report released because it was not predecisional? The Moritz/Eagleton report was a predecisional document. The commissioners took an action not to adopt a final report based upon the Moritz/Eagleton report, but to release all the predecisional information (the draft report).

b) I understood you to say that the December EAC report includes all of the Wang/Serebrov recommendations but not all of the Wang/Serebrov findings. Is that correct? The report does include all of their recommendations, as well as the research they reviewed, which includes books and articles and court cases. The contract with the consultants did not ask them to produce findings. It was an initial effort to identify what relevant information is available, define voter fraud and voter intimidation, and make recommendations to EAC regarding future study.

c) I understood you to say that EAC staff added results of their own research to the December EAC report. Is that correct? Yes, EAC conducted additional research to further clarify the definitions of "voter fraud" and "voter intimidation." On page 13, you will see the results of the EAC research, which resulted in defining the scope of future study and new terminology for these topics -- election crimes. EAC staff reviewed the report for accuracy, for grammar and added language that reflected the commission's decision to adopt the final version based upon the initial research provided by the consultants. New language was also added to communicate the commission's decision adopt six of the 16 recommendations put forth by the consultants.

d) If I'm correct on questions 2 and 3, would it be accurate to say that readers of the December report

026924

cannot tell how much of that report does and does not reflect the original Wang/Serebrov findings? Again, the contract with the consultants did not ask them to produce findings, nor was that the scope of the contract. It was an initial effort that tasked them to identify what relevant information is available, define voter fraud and voter intimidation, and make recommendations to EAC regarding future study. The research (Appendix D, 197 pages; and Appendix B, 57 pages) and all of their recommendations are included in the final report.

e) I called earlier today requesting the Wang/Serebrov report, and you sent me the December EAC report. I am concerned that if I had not already been researching this closely, I would have thought that you'd sent me the Wang/Serebrov report and would have reported incorrectly that you had. Does the EAC have any comment on this manner of replying to press inquiries? (I contacted you to request the report after I read in the Statesman Journal of Salem, Oregon, an article by Marie Cocco that says: "The bipartisan commission didn't widely release the consultants' review, but makes it available on request." Did the EAC indeed give Ms. Cocco a copy of the "consultants' review"? Or has she misunderstood you in the way I'm concerned about?) I sent you a link to the "EAC report" because it is what was adopted by the commission based upon the research conducted by the consultants. The final report clearly states how it was compiled, includes bios for both of the consultants, their research and summaries of their interviews. Regarding Ms. Cocco, I explained the entire process to her. I provided the staff update on the project which was presented at a public meeting in May 2006 and the final report, which is posted on the EAC website. Regarding "this manner of responding to press inquiries," I have forwarded your comments to my supervisor so he can review my performance regarding the handling of your inquiry.

f) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for research projects. After EAC receives the initial data, the agency reviews the data for accuracy. What form of due diligence does the EAC's staff routinely conduct on research that is contracted out to experts before that research is released? You mentioned "vetting" the research. What does that vetting entail? It depends on the project, but in every case, the agency has a responsibility to make sure the information it receives from any contractor is accurate. In this case, EAC staff read every article cited by the consultants and reviewed the contents of every interview they conducted. Appendix C contains the interview summaries, and the changes EAC made are clearly footnoted. Regarding other research projects, if it is information directly related to a mandate within the Help America Vote Act (HAVA), staff will make sure that the information is consistent with the law. If the research focuses on election laws throughout the country, we make sure the laws are cited correctly and that state legislatures haven't changed or amended these laws since the research was conducted. (As you probably know, there have been many new election laws introduced at the state level since 2004.) Throughout the process, we review for grammar as well as make sure the document flows and is arranged logically -- the basic tenets of editing.

Subject FYI ONLY: Today's media inquiries (04-05-07)

1. Matthew Murray of Roll Call interviewed Commissioner Hunter about the voter ID report. He asked her why the commission declined to adopt it, and she explained that we thought it was important to look at more than one year and that the commission had questions about the methodology -- two analyses produced two conclusions and the state comparisons (reading from the commission statement). She said it was the EAC's responsibility to conduct due diligence and make sure the data was accurate. He asked why it took so long to reach a decision, and that some groups were saying we purposely did not act before the Nov. elections. The commissioner explained that we were reviewing the data and during that time several independent experts also reviewed the information. He wanted to know if Eagleton discussed their methodology with us, and the commissioner said yes. He asked how much it cost, the commissioner told him \$560,000, and explained that the contract also included research on provisional voting which resulted in a set of best practices. He asked how EAC will prevent this kind of thing from happening in the future, and the commissioner said we are going to take a much more thorough approach, including making sure the methodology is approved by everyone before the process begins and that we will be constantly updated as the research progresses. He asked if the research didn't produce what we thought it would, and she said the issue was that we had concerns about the methodology. She pointed out that the commission voted to make it public so people could examine it and come to their own conclusions. He asked if we had refused to release this in the past, and I explained that while we were reviewing the information it was a pre-decisional document, but that along with the commission's decision not to adopt the report, they took action to make it public. I pointed out to him that this was an unanimous decision reached by two dems and two reps, and that they also unanimously decided to make it public. I told him we had public meetings about this project, in which the consultants were asked questions about the methodology.

**Cc:** Thomas Wilkey; Karen Lynn-Dyson; Juliet Hodgkins  
**Subject:** Roll Call Interview Request for Tomorrow

Commissioners,

Matt Murray of Roll Call wants to interview one of you tomorrow via phone (he's available all day) about the voter ID report. Commissioner Rodriguez - as the vice chair, you would be up, but since you're out tomorrow, do you want Commissioner Hunter to do the interview? The reporter has the following questions:

1. What fiscal year money did we use to pay for the study? A: Fiscal Year 2005
2. What was the EAC's budget during that fiscal year? A: \$13.8 million

We should assume that his angle is that this was a waste of money -- what does EAC have to show for two years of work and \$560,000 out of a budget of \$13.8 million? He also mentioned that the interest groups are not pleased that we delayed releasing this information, and they are not happy we did not adopt a report. I recommend that we stick with the talking points I circulated last week, which are attached.

The bottom line is that we did receive value from this contract, which included provisional voting research, which culminated in a set of best practices. And yes, the commission decided that the voter ID data provided more questions than answers, and that's why it voted to conduct a much more expansive look at this important topic. However, it also made all of the information available to the public.

Remember, many voter ID laws have changed since 2004, and that also has instructed us how to move forward.

EAC should stand firm on its decision, talk about our next steps to conduct a more extensive study, and stress that we released everything to the public.

Please let me know if you agree with this approach.

Subject Hinchey statement

Hinchey Statement on U.S. Election Assistance Commission's

Release of Report on Voter Identification Issues

Washington, DC - Congressman Maurice Hinchey (D-NY) today released the following report in response to the U.S. Election Assistance Commission's (EAC) release of a report on voter identification issues that was submitted to them by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, and Ohio State University's Moritz College of Law. Hinchey directly requested the release of the report when EAC Chairwoman Donetta Davidson appeared earlier this month before the House Appropriations Subcommittee on Financial Services, of which the congressman is a member. Davidson told Hinchey at the hearing that she would provide the subcommittee with the report that is being released to the public today. Hinchey also requested the release of a separate report on voter fraud and intimidation. The Help America Vote Act (HAVA) requires the EAC to conduct and make available to the public studies regarding certain voting issues.

"I am very pleased that following Chairwoman Davidson's appearances before Congress the EAC decided to do the right thing and make public the Eagleton Institute of Politics study on voter identification issues. I hope that this decision signals a new day of transparency and sets a precedent for all future and previous studies and reports submitted to the EAC.

"When Chairwoman Davidson came before our subcommittee a few weeks ago, I also requested that the EAC make public another report about voter fraud and voter intimidation submitted to them by two outside consultants. It is my hope they will release this report to the public as well. The EAC has the responsibility to keep the public informed on any findings it has with regards to voter fraud, intimidation, and any other electoral issues.

"As we work to increase voter turnout and make our democracy function more effectively, it is imperative that potential voters are assured that they will be able to cast their votes fairly and in an environment free of intimidation. To achieve that goal, the EAC must be open with the information it receives in order to help identify voting problems and make recommendations on fixing them."

Subject FOIA Request

Today I will circulate a formal FOIA request to all of you. Please note that this request is from a journalist. The information I circulate will include a copy of the original request, which was made by the DC bureau of McClatchy Newspapers. An abbreviated version of the request follows:

"Copies of all emails between Job Serebrov and Election Assistance Commission staff or members and all emails between Tova Wang and commission staff or members pertaining to a voter fraud study the two were contracted to perform for EAC."

Some of you have provided similar information in the past, but I will need another complete submission that includes any related files that may have been generated since your last submission.

Please anticipate a formal request to be distributed to everyone today, and take note that the deadline to provide this information is April 30. Thank you.

Subject Chair Requests Internal Review

Commissioners,

The chair has asked me to provide you with the memo she just submitted to Curtis Crider, requesting a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. She has asked me to write a press release about this decision, which I will send to you shortly. She requests that we incorporate the commission's request into the letter to the advisory boards and to Congresswoman Lofgren. She also requests that we respond to Sen. Feinstein's letter, letting her know that we are working to comply with her request, but we wanted to alert her to the action we've taken.

I am going to circulate this to the staff so everyone will be aware of this action. Please let me know if you have any questions, and I will have a press release for your review shortly. Attached to the press release will be this memo, letters from Members of Congress regarding this issue, and the recent statements from Congressmen Hinchey and Serrano.

**April 16, 2007**

**MEMORANDUM**

**To:** EAC Inspector General Curtis Crider  
**Fr:** EAC Chair Donetta Davidson  
**Cc:** Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins  
**RE:** EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues – Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter -- agreed with my recommendation that we issue the following formal request to the Commission’s Office of Inspector General to review the circumstances surrounding two recent EAC research projects – vote fraud and voter intimidation and voter identification.

**Background**

The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.

EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.

The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission’s clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.

The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics (“Contractor”). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted

unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.

The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov ("Consultants"). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

### **Review Request**

The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and the public have suggested that political motivations may have been part of the Commission's decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff's top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
7. Circumstances surrounding Commission discussion and deliberation of final adoption of *Election Crimes: An Initial Review and Recommendation for Further Study*.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.

11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the \$3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.

Subject IG Press Release

Commissioners,

Per the chair's request, I have drafted the following press release to communicate the commission's decision to ask the IG to review our contract procedures. Please let me know if this is okay with all of you. I would like this to go out ASAP, so if you could get back to me with any comments before noon, I would appreciate it. Sorry for the short turnaround, but I think circumstances demand that this get out immediately. Thank you.

After you give me the okay on the press release, I will send everything to staff before releasing it.

## **EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects**

For Immediate Release  
April 16, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission’s inspector general to conduct a review of the commission’s contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair’s memo to the inspector general is attached.

“The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter,” said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov).

At a public meeting in December 2006, the commission adopted *Election Crimes: An Initial Review and Recommendations for Further Study*, available at [www.eac.gov](http://www.eac.gov). This report was the culmination of research conducted by Tova Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort.”

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Commissioners,

Per the chair's request, I have drafted the following press release to communicate the commission's decision to ask the IG to review our contract procedures. Please let me know if this is okay with all of you. I would like this to go out ASAP, so if you could get back to me with any comments before noon, I would appreciate it. Sorry for the short turnaround, but I think circumstances demand that this get out immediately. Thank you.

After you give me the okay on the press release, I will send everything to staff before releasing it.

## EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects

For Immediate Release  
April 16, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

WASHINGTON – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission's inspector general to conduct a review of the commission's contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair's memo to the inspector general is attached.

"The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter," said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov).

At a public meeting in December 2006, the commission adopted *Election Crimes: An Initial Review and Recommendations for Further Study*, available at [www.eac.gov](http://www.eac.gov). This report was the culmination of research conducted by Tova Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Subject Chair requests internal review

Hello everyone,

I wanted to notify you that Chair Davidson, in agreement with the other three commissioners, has requested that our IG -- Curtis Crider -- conduct a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. Very shortly, I will distribute her request along with a press release to the media and to all our stakeholders. However, she wanted to make sure the staff was fully informed about this action before we make this news public.

The chair's request, the press release and all of the materials referenced in her request will be available on the home page under Announcements very shortly. Please direct anyone with questions about this action to the website. And let me know if you have questions about any of this information or if I can be of assistance answering questions from the public about this issue.

The chair wants to convey to everyone how much she appreciates your hard work, and that she is confident in our ability to work with Curtis to resolve this issue. Tom would like staff to join him at 3:30 today in the large conf. room upstairs to answer any questions you have.

**WASHINGTON** – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission’s inspector general to conduct a review of the commission’s contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair’s memo to the inspector general is attached.

“The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter,” said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary E. Rodriguez, Caroline Hunter and Gracia Hillman.*

###

026958

**April 16, 2007**

**MEMORANDUM**

**To:** EAC Inspector General Curtis Crider  
**Fr:** EAC Chair Donetta Davidson  
**Cc:** Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins  
**RE:** EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues – Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter -- agreed with my recommendation that we issue the following formal request to the Commission’s Office of Inspector General to review the circumstances surrounding two recent EAC research projects – vote fraud and voter intimidation and voter identification.

**Background**

The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.

EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.

The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission’s clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.

The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics (“Contractor”). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted

unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.

The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov ("Consultants"). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for "creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort."

### **Review Request**

The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and the public have suggested that political motivations may have been part of the Commission's decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff's top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
7. Circumstances surrounding Commission discussion and deliberation of final adoption of *Election Crimes: An Initial Review and Recommendation for Further Study*.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.

11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the \$3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.

**United States Senate**  
WASHINGTON, DC 20510

April 12, 2007

The Honorable Donetta Davidson  
Chairman  
U.S. Election Assistance Commission  
1225 New York Avenue, N.W.  
Suite 1100  
Washington, DC 20005

Dear Commissioner Davidson:

We are writing to seek a response to very troubling news reports that included allegations that the Commission may have altered or delayed release of two taxpayer-funded studies of election issues for political purposes.

While the Commission is within its rights to decide what guidance it issues to election officials, it is critical that its actions are not perceived as politically motivated and it is imperative that you provide full documentation about the Commission's proceedings on these matters.

On Wednesday, the *New York Times* reported that a bipartisan team of election law experts hired by the Commission to research voter fraud in federal elections found that there was little such fraud around the nation, but the Commission revised the report to say that the pervasiveness of voter fraud was still open to debate.

On Monday, *Roll Call* reported that the Commission two weeks ago rejected the findings of a report, prepared as part of a \$560,000 contract with Rutgers University's Eagleton Institute and Ohio State University's Moritz College of Law. That report found that voter identification laws may reduce election turnout, especially by minorities.

Commissioner Davidson

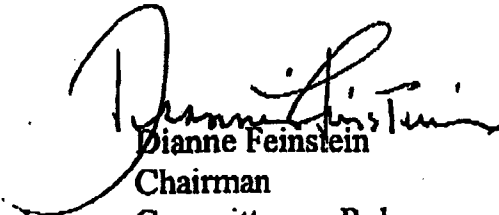

- 2 -

April 12, 2007

It is imperative that the Commission's actions and deliberations are unbiased, free from political influence and transparent. While the Commission does not have to agree with the experts who perform its research, it should make the research available unfettered and unfiltered.

Attached are a series of questions, we would like the Commission to address. We look forward to your timely response.

Sincerely,

Dianne Feinstein  
Chairman  
Committee on Rules  
and Administration

Richard J. Durbin  
Chairman  
Subcommittee on Financial  
Services and General  
Government  
Committee on Appropriations

We request information and documentation from the Commission that answer the following questions:

**COMMISSION'S OVERSIGHT ON EAGLETON CONTRACT TO PERFORM A STUDY ON VOTER IDENTIFICATION**

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Would you please provide a copy of the approved Request For Proposals, as well as any contract modifications that were agreed to between the Commission and Eagleton Institute and subcontractors?
3. Can you provide the names and qualifications of Election Assistance Commission staff that worked on the Eagleton Institute project?
4. Please indicate how many project meetings occurred during the term of the Eagleton contract, including in-person meetings, conference calls regarding the status of the report, and any meeting where Commissioners were present for at least part of the meeting. Please provide copies of any minutes from those meetings.
5. Please identify the names and affiliations of members of the Peer Review group or groups that examined the Eagleton Institute drafts. Please also indicate the dates upon which any such review of the Eagleton research was conducted, and the specific concerns or complaints that were raised by members of the Peer Review group as to either the analysis or statistical methodology, if any. Please provide copies of any minutes from those meetings.
6. If certain members of the Peer Review groups had concerns with the data or methodology of the Eagleton study, was that information communicated to Eagleton, and were any changes made to the study based on Peer Review group concerns with methodology or data?
7. Who were the individuals (and what were their academic qualifications) that advised the Commission that the data, methodology, or the results of the Eagleton Contract were so flawed that the Commission should reject the report? At what point did the Commission receive input from those individuals?

8. The Commission previewed its research on the Eagleton Institute's study on Provisional Voting at its May 2006 Advisory Board meetings—why was the Voter Identification Draft Study not discussed at that time? What is the status of the Provisional Voting report?
9. In rejecting the Eagleton report, the Commission indicated concerns that there was only one year's worth of data. Given that this was the first year that Commission had studied the results, isn't "one year" what was originally contemplated in the Eagleton contract? Isn't the reason for having a major research institute conduct this study is so they can draw initial assessments from that data—even though that data can be augmented in future years? Because of the rejected report, will the Commission start anew for research in the 2008 elections?
10. What was the final, total cost of the Eagleton contract, and what was produced or released by that Commission as a result of that contract?

#### **COMMISSION'S OVERSIGHT OVER VOTER FRAUD/INTIMIDATION STUDY**

1. Did the Commissioners or Commission senior staff receive any outside communication or pressure to change or not release the entire draft report or portions of the draft language on the voter fraud report? If so, who made those requests?
2. Given the bipartisan nature of the Working Group that guided the Voter Fraud/Intimidation report, and the bipartisan nature of the contracted experts who uniformly support the results of this report, what concerns lead the Commission to determine the report should not be released?
3. If there were points in the report that the Commission objected to, were there attempts to work with the contractors to deal with specific concerns? If there were such attempts, please describe them.

4. Who drafted the Commission summary (released in December, 2006) of the Voter Fraud/Intimidation report, and what were their credentials and involvement in the original research process? Were there instructions or guidance given from Commissioners or senior staff as to what portions of the research should be emphasized? Who at the Commission reviewed the summarized report? Since the contracted experts are referred to in the Commission's released report, were the contractors allowed a chance to review or edit that Commission's final report that was released in December, 2006?
5. Please provide copies of any electronic or written communications between Commission employees that relate to the editing of the Voter Fraud/Intimidation report.
6. Please explain what Mr. Job Serebrov was referring to in his email referenced in the *New York Times* article of April 11, 2007. Please provide any documents in the Commission's possession where employees or contracted experts discussed pressure, political sensitivities, or the failure of the Commission to adopt the Voter Fraud/Intimidation report from March 1, 2006 to present.
7. While we realize that the Commission voted to release its summary report in December 2006, was there a public vote taken to reject the Draft Voter Fraud/Intimidation report? Such a monumental decision to reject the contract experts' work is a policy decision, and one that should be done in public. When was the decision made to reject the original report, and what notice was provided to the public that the Commission would reject that report?
8. Prior to the Draft Voter Fraud/Intimidation report's release, had other organizations requested a copy of that original report? Please include copies of your responses to those organizations, if any.
9. Had any States requested that the Commission or staff provide guidance related to voter identification requirements in the Help America Vote Act, or identification requirements generally? Please provide those requests, and any responses from the Commission.
10. Please indicate what steps the Commission is taking to ensure that political considerations do not impact the agency's research and that decisions are handled in a public and transparent manner.

April 12, 2007

Chairwoman Donetta Davidson  
 United States Election Assistance Commission  
 1225 New York Avenue N.W., Suite 1100  
 Washington, DC 20005

Dear Chairwoman Davidson:

As Chairwoman of the Committee on House Administration Subcommittee on Elections, which has oversight over the Election Assistance Commission, I was alarmed at what appears to be an emerging pattern by the EAC to hold off on publicly releasing reports as well as modifying reports that are released. Two recent instances have brought to light the increased politicalization of the EAC and this lack of transparency.

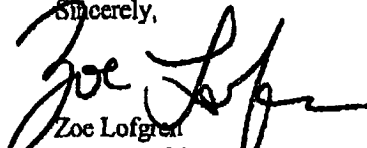

First, the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released. The EAC released report "Election Crimes: An Initial Review and Recommendations for Future Study" does not accurately reflect the research in the original report "Voting Fraud and Voter Intimidation."

Second, in addition to this report on voter fraud and intimidation, the EAC recently released a report by The Eagleton Institute of Politics at Rutgers University on voter identification. Again, the EAC did not endorse the report, citing methodological concerns, and only released it after pressure from Congress.

The EAC is charged with conducting nonpartisan research and to advise policy makers. How are we to rely on advice if instead of full and accurate reporting, we are provided an inaccurate modified version which negates clear evidence to the contrary in the original research? I am outraged that the election process is being threatened by a lack of transparency and limited discussion.

In order to preempt any further problems with the release of reports from the EAC, I request all versions of the Absentee Ballot report and the Military and Overseas report, as well as any other overdue reports, including supporting documents and research, be provided to my office by close of business Monday, April 16, 2007. These reports are overdue and I want to ensure that the delay is no way related to what appears to be an ongoing problem of politicalization of the EAC.

Sincerely,

  
 Zoe Lofgren  
 Member of Congress

For Immediate Release

April 11, 2007

## **Hinchey, Serrano Urge Non-Partisanship, Greater Transparency at Election Assistance Commission**

**Washington, DC** - Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

"The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner," said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during a subcommittee hearing last month. "The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it is has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate."

"The EAC is charged with helping to ensure our elections are trustworthy and administered fairly," said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget. "I'm concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant."

"I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people's faith in it, is far more important than any short-term political advantage."

The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

026968

Congressman José E. Serrano  
Representing the Sixteenth District of New York

FOR IMMEDIATE  
RELEASE:  
Apr 11, 2007

# SERRANO, HINCHEY URGE NON-PARTISANSHIP, GREATER TRANSPARENCY AT ELECTION ASSISTANCE COMMISSION

Washington, DC – April 11, 2007 – Today, Congressmen Maurice Hinchey (NY-22) and José E. Serrano (NY-16) urged the Election Assistance Commission (EAC) to act with greater transparency and without partisanship. The comments from the congressmen came as the House Appropriations Subcommittee on Financial Services and General Government released a draft version of an EAC report on voter fraud and intimidation that shows significant changes were made to the findings of outside experts before the final report was released.

“The EAC has an obligation to be forthright with the American people and operate transparently and in a non-partisan manner,” **said Congressman Hinchey, who requested the draft report from EAC Commissioner Donetta L. Davidson during a subcommittee hearing last month.** “The draft report was commissioned with taxpayer dollars upon a mandate from Congress so that we could learn more about voter fraud and intimidation. The need for this report is even more clear when we see the way in which the Bush administration is carrying out the electoral process and how this system is sliding towards corruption. In hiding a draft report from the public that is significantly different from the final version, the EAC has created a lot more questions than it has answered while stunting debate on the issue. In order for our democracy to function properly it is essential that our elections are free of any corruption and that includes ensuring that the EAC does not work to benefit one political party over the other. To achieve that goal we must have all the facts and opinions on the table, not just some of them. The EAC must never limit discussion and debate.”

“The EAC is charged with helping to ensure our elections are trustworthy and administered fairly,” **said Congressman Serrano, who is Chair of the Appropriations Subcommittee that oversees the EAC budget.** “I’m concerned if changes were made to the report on voter fraud because of partisan bias rather than impartial analysis. When you read the draft report side-by-side with the final version, it is clear that important conclusions of the experts who wrote the draft report were excluded from the final product. Among the excluded information is an analysis that undermines the notion that voter fraud is rampant.”

“I am concerned that the EAC did not publicly release the taxpayer-funded draft report, and I worry that political considerations may have played a role. We cannot have a politicized EAC, or one that yields to outside pressure. Our democracy, and the American people’s faith in it, is far more important than any short-term political advantage.”

026969

The draft report was written by outside experts under contract with the EAC. The final report was entitled "Election Crimes: An Initial Review and Recommendations for Future Study" and was issued on December 7, 2006.

The EAC is an independent bipartisan commission created by the 2002 Help America Vote Act in order to disburse funds to the states for the purchase of new voting systems, certify voting technologies, develop guidelines and serve as an information resource for election administration.

## **EAC Statement Regarding Research and Contracting Policies**

### ***Commission to Review Internal Procedures***

For Immediate Release  
April 11, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The Help America Vote Act of 2002 (HAVA) directs the Election Assistance Commission (EAC) to serve as a national clearinghouse and resource by, among other things, conducting studies with the goal of improving the administration of federal elections. To fulfill this mandate, the EAC has entered into contracts with a variety of persons and entities. Reports adopted by the EAC, a bipartisan federal entity, are likely to be cited as authoritative in public discourse. Prior to the EAC's adopting a report submitted by a contractor, the EAC has the responsibility to ensure its accuracy and to verify that conclusions are supported by the underlying research.

The Commission takes input and constructive criticism from Congress and the public very seriously. We will take a hard look at the way we do business. Specifically, we will examine both the manner in which we have awarded contracts and our decision-making process regarding the release of research and reports. The EAC takes its mandates very seriously, and we will continue to move forward in a bipartisan way to improve the way America votes.

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Subject Today's press inquiries (04-17-07)

1. I spoke with St. Louis editorial board members Christine Bertelson and Kevin Korrigan regarding an editorial that ran today, asserting that we'd worked on the vote fraud/voter intimidation study for five years, and that the administration/White House edited the report. I told them both of these assertions were false, and I requested a correction. I gave them the details about how this project was conceived and managed. I explained that the vote fraud and voter intimidation project began in Sept. 2004. As I said, the statement that this project had been five years in the making is incorrect -- that predates the creation of the EAC. Commissioners were appointed in Dec. 2003, and the agency's first year of operations was 2004 with a \$1.2 million operating budget. I said the assertion that the administration edited the document was false, and said that at no point in the process did the administration play any role. I also pointed out that the chair requested the IG to fully review the matter. They are going to run a correction. The editorial follows.

### **Snipe hunting in Jeff City**

*Tuesday, Apr. 17 2007*

The Missouri Legislature's dogged efforts to crack down on voter fraud call to mind the hallowed tradition of the snipe hunt.

In a snipe hunt, gullible kids are taken out to the woods, handed sticks and gunny sacks and told to track down the elusive snipe. Meanwhile, their pals, who know a snipe is a bird of marsh and shore generally found nowhere near the woods, yuck it up.

Voter fraud is about as rare as snipe in most parts of the country, including Missouri. As evidence of that we have the testimony of (a) a five-year study by the federal Election Assistance Commission; (b) a report from the Missouri Secretary of State showing nobody in the state tried to vote with a fake I.D. in 2006; (c) Department of Justice statistics showing only 86 people were convicted of voter fraud-related crimes in the last five years, many of them on trivial errors; and (d) a federal judge's ruling last week that the justice department had failed to demonstrate that voter fraud had occurred in Missouri last year.

Undaunted by these facts, Republicans in the Legislature lurk about like Elmer Fudd with their gunny sacks and sticks, promoting bills to require voters to present photo identification before they're allowed to cast a ballot. They passed such a bill last year, but the courts threw it out as unfair to those who couldn't afford the cost and hassle involved in getting a photo I.D. card.

029972

This year's versions of the photo I.D. bills would allow voters without photo I.D. to cast "provisional ballots," which may or may not get counted. So, despite the fact that a photo I.D. requirement would disenfranchise many voters in the cause of solving a problem that doesn't exist, the Missouri House could pass such a bill this week.

Evidence continues to mount that the hunt master for the national voter I.D. snipe hunt is none other than Karl Rove, President George W. Bush's deputy chief of staff and political guru. As The New York Times suggested Sunday, "The more we learn about the White House purge of United States attorneys, the more a single thread runs through it: the Bush administration's campaign to transform the minor problem of voter fraud into a supposed national scourge."

Not only did the administration suggest that some of the eight fired prosecutors had been insufficiently aggressive in pursuing voter fraud cases, it changed the wording of the Election Assistance Commission's findings on the voter fraud issue. What originally read, "there is widespread but not unanimous agreement that there is little polling place fraud" became "there is a great deal of debate on the pervasiveness of fraud."

Moreover, the release of the commission's report was delayed for nine months, during which period eight states, including Missouri, dealt with voter I.D. laws. Since the 3 percent to 4 percent of the electorate who don't have photo I.D.s tend to be poor, disabled or elderly voters, suppressing their vote would tend to help Republican candidates.

Investigators looking for evidence of fraud need look no further than the e-mail messages emanating from Mr. Rove's offices. Alas, thousands, perhaps millions, of those messages are now "missing." Perhaps Attorney General Alberto Gonzales will shed some light on the problem when his testimony before the Senate Judiciary Committee is rescheduled. In the meantime, Missouri lawmakers should put down the sticks and gunny sacks and back slowly out of the woods before their constituents realize they've been snookered, too.

Subject evaluation of contracting

To complete our evaluation of the contracting process and related issues for the voter fraud research and voter intimidation and voter identification research projects, we will need copies of all e-mails and a number of documents related to the projects including copies of all of the various drafts (versions) of the reports. I am requesting that all EAC personnel be notified that they are to preserve all of the documents including e-mails related to the projects. We are in the process of setting up an e-mail account to receive the documents, It is imperative that all documents related to the projects be preserved. As soon as the account is set up we will notify you of the address.

In addition, we are requesting access to the backup e-mail files maintained by GSA and EAC. As a result, we are requesting that no backup tapes or files be destroyed.

Subject memo

History:

 This message has been replied to.

Hello Curtis:

I was reviewing the memo that you brought to the Chair today regarding the research on Voting Fraud and Voter Intimidation. I have sent electronic and hard copies to the commissioners and senior staff. However, I was wondering if there is going to be a separate memo addressing the Voter ID issues. Per your request the staff is in the process of sending emails to your designated inbox and all of those issues. Please advise.

Many thanks,  
Elle

Subject Voter ID and Vote Fraud and Voter Intimidation IG Review  
Update

Hello everyone,

The chair wanted to distribute the attached memo from the IG, which contains guidance about how we proceed during the review of the voter ID and the vote fraud and voter intimidation research projects. She will continue to keep staff informed as this review moves forward, and she thanks everyone for their continued cooperation and hard work.

April 27, 2007

**Memorandum**

**To: Donetta Davidson  
Chair, U.S. Elections Commission**

**From: Curtis Crider *Curtis Crider*  
Inspector General**

**Subject: U.S. Election Assistance Commission Activities Pending the Office of Inspector  
General Investigation of the Voting Fraud and Voter Intimidation Report**

In your letter of April 23, 2007, you requested my comments concerning several activities that the Election Assistance Commission (EAC) was considering to undertake pending our review of the Voting Fraud and Voter Intimidation Study and on related questions. My responses to your proposed activities and questions follow:

1. The EAC would like to prepare a summary of the differences between the draft report prepared by the consultants and the final report adopted by the EAC.

Answer: We believe that such a summary will be helpful to our investigation. Please provide us with a copy of the summary of differences upon it is completion.

2. Would there be any prohibition against the Director of Communications speaking with EAC employees, consultants or working group members when questions arise from members of the press or under the Freedom of Information Act?

Answer: We are not aware of any prohibition. However, we suggest that EAC not comment or limit its comments on this matter because of the ongoing investigation. Any FOIA requests should be promptly responded to stating that the matter is under investigation. Once the investigation is completed, appropriate information should be made available to the FOIA requester.

3. Would there be any prohibition against EAC briefing members of the EAC Standards Board and the EAC Board of Advisors.

Answer: We are not aware of any prohibition. Our preference, however, would be that EAC allow the investigation to be completed before conducting any briefings.

4. Would there be any prohibition against gathering information related to this project in order to respond to inquiries that have been made by members of Congress?

026984

Answer: We are not aware of any prohibition. As previously stated, our preference is that there are no public comments while the investigation is in process or that comments be limited. However, we appreciate the sensitivity of Congressional requests, EAC must decide how best to proceed in this matter. We ask that you share any proposed responses with us prior to their release and that you provide us with a copy of final responses and any attachments.

5. Would there be any prohibition against responding to an inquiry that the Commission has received from an attorney engaged by one of the consultants?

Answer: It is the EAC's decision whether to respond to the attorney for the consultant. We prefer that the consultants not be released from the confidentiality clause of their contracts until the OIG has completed its investigations.

We understand that EAC will want to respond to criticism of its handling of the Voter Fraud and Intimidation Study, and that management must ultimately decide how best to proceed. Our preference would be that you attempt to defer commenting until we have finished our investigation.

I appreciate you raising these matters to me before acting. Please feel free to contact me if you have any questions about this memorandum.

Subject FYI - Today's media inquiries ( 5-10-07, Thurs )

Commissioners:

Today we had the following media inquiries:

(1) Leslie Robinson, a reporter for the news blog, ColoradoConfidential.com inquired about the rules and regulations that EAC board members must adhere to. She said that one of the EAC members from Colorado, Dan Kopelman, has recently been cited by the Secretary of State for his business of selling voter lists and consulting partisan candidates. She asked if these infractions cause Kopelman to withdraw from the EAC board. We explained that, according to SEC. 213 of the Help America Vote Act of 2002 (HAVA), there are two EAC Standards Board representatives from each state, that one is a local official, one is a state official and that both individuals represent their state on the Board. We said that the state representatives are selected by the Chief State election official from each state. We said that, with respect to Colorado, Mr. Kopelman was selected to serve on the Board by Colorado Secretary of State Michael Coffman. We suggested Ms. Robinson contact their office for questions regarding the appointment of state representatives from Colorado.

(2) Rose Marie Berger, Associate Editor of Sojourners/Call to Renewal, asked for the document on voter fraud authored by Tova Wang and Job Serebrov. We replied that our Inspector General is currently reviewing the circumstances surrounding this research and noted page two of the following memo from the chair. We said that when that process is complete we'll be glad to discuss it further. 04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects

Subject FYI - Today's media inquiries ( 5-11-07, Frid )

Commissioners:

Today we had the following media inquiries:

(1) Meg Cox, a freelance journalist in Chicago is working on an article about voter fraud and voter ID laws. She asked the following two questions:

- 1) Is the EAC still sending its "Elections Crimes" report to journalists who request the report on voter fraud and intimidation authored by Wang and Serebrov?
- 2) If the answer to #1 is yes, is the EAC still sending the "Election Crimes" report in these cases without comment--in other words, without indicating that it is not the Wang/Serebrov report?

We forwarded her questions to Curtis and replied to Ms. Cox that the chair has asked our Inspector General to review the circumstances surrounding this research project, as well as research done about voter ID. We said he has requested that EAC not comment on either one of these projects while his review is ongoing. We referred her to the following link: [here](#). and said we'd be glad to make sure she receives the IG's review when it is completed.

(2) Jenna Portnoy of the Doylestown Intelligencia in Bucks Co., PA called again to ask about EAC's progress in determining the status of Pennsylvania's 102 funds. She wants to know the amount of money, if any, that they will have to return. We said that EAC is still reviewing the certifications submitted by the states and we hope to have this process completed as soon as possible. We said we are also evaluating all the reports submitted by the states regarding their 101 and 251 funds expenditures.

Subject FYI - Today's media inquiries ( 5-14-07, Mon )

Commissioners:

Today Meg Cox, a freelance journalist in Chicago, sent us the same two questions she sent us last Friday (see below). She had not been satisfied with our response. She is working on an article about voter fraud and voter ID laws. She said she is concerned that journalists are receiving a substitute report from EAC and not the real thing. We replied that we directed her to the one and only report adopted by EAC -- Election Crimes: An Initial Review and Recommendations for Future Study -- We noted that it contains clear language about the role of the consultants, identifies them by name and that their bios are included in the EAC report as Appendix D here. We said we would notify her when the IG has completed his review of this subject. We also noted the following contents of the report:

- Page one: "EAC staff along with two, bipartisan consultants reviewed the existing information available about voting fraud and voter intimidation, including reading articles, books and reports; interviewing subject matter experts; reviewing media reports of fraud and intimidation; and studying reported cases of prosecutions of these types of crimes.
- Page three: To accomplish these tasks, EAC employed two consultants, Job Serebrov and Tova Wang, who worked with EAC staff and interns to conduct the research that forms the basis of this report.
- Page four: The consultants drafted a report for EAC that included their summaries of relevant cases, studies and reports on voting fraud and voter intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voting fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

###

**BACKGROUND: Last Friday's Q&A.**

Meg Cox, a freelance journalist in Chicago is working on an article about voter fraud and voter ID laws. She asked the following two questions:

- 1) Is the EAC still sending its "Elections Crimes" report to journalists who request the report on voter fraud and intimidation authored by Wang and Serebrov?
- 2) If the answer to #1 is yes, is the EAC still sending the "Election Crimes" report in these cases without comment--in other words, without indicating that it is not the Wang/Serebrov report?

We forwarded her questions to Curtis and replied to Ms. Cox that the chair has asked our Inspector General to review the circumstances surrounding this research project, as well as research done about voter ID. We said he has requested that EAC not comment on either one of these projects while his review is ongoing. We referred her to the following link: here. and said we'd be glad to make sure she receives the IG's review when it is completed.

If we announced it, maybe we could stem the flow. We should discuss. And I do appreciate how stressful things are for you right now. My Mayor used to say that press was the hardest job in the ofc. He was under siege his first term (he served 3) and it feels for me a little like deja vu all over again because he was very misunderstood

Best.

History:  This message has been replied to.

It's already been set up on the redesigned website which Jeannie hopes to unveil next week when we get out from under this paper.

The FOIA regulations have been on the Counsel's "to do" list but with everything else going on has not been completed.

We have two law clerks coming on for the summer in a couple weeks and this will be an excellent project for them to do.

Thanks  
Tom

EAC Board of Advisors  
EAC Standards Board

RE: EAC Election Crimes Study

Dear Members of the EAC Standards Board and EAC Board of Advisors:

The U.S. Election Assistance Commission has recently come under fire for not releasing a draft report from EAC's Voting Fraud and Voter Intimidation project, which was submitted by two contracted employees, Tova Wang and Job Serebrov. That draft report, which is attached to this letter, is a compilation of summaries from the work that they conducted. We thought it was important to explain the circumstances surrounding this project.

In 2005, the EAC Board of Advisors helped EAC prioritize its research efforts. As a result, EAC developed a research agenda that included studying voting fraud and voter intimidation. In the fall of 2005, EAC hired the two contract employees to conduct an initial review of the information available about voting fraud and voter intimidation. The employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted.

In May 2006, a status report regarding this study was presented at the public meetings of the EAC Standards Board and EAC Board of Advisors. Each board provided feedback on the progress of the study and the direction that it should take. Following those meetings, the project's working group convened and likewise provided feedback on the study. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were compiled and reviewed by the contract employees. In addition, they provided a draft report of the summaries of the interviews for EAC's review and consideration.

EAC staff reviewed the material, briefed the commissioners, including at our October public meeting and presented for commissioner consideration a report, *Election Crimes: An Initial Review and Recommendations for Future Study*, which was adopted at our December 2006 public meeting.

After the release of EAC's report there was some debate about whether EAC should release the draft provided by our contracted employees. The Board of Advisors considered, but did not pass, a resolution urging the release of that document. Recently, EAC testified before a Congressional committee that requested the draft report. A copy was provided to the committee, which released the draft report this week.

Recently, there has been much discussion surrounding EAC's review process of the material provided by the contract employees, and how much was included in our election crimes report. After receiving the information from the consultants, EAC conducted due diligence. As you will see in the consultants' draft,

they reached conclusions in their summaries that were based almost entirely on the interviews they conducted with 24 people, not on the entire body of work they collected. EAC found the individual accounts were informative and they helped define what issues we should examine in moving forward.

We understand that the topics of voter fraud and voter intimidation are hotly debated and often divisive. We assure you that the process we took to review all of the materials and adopt a final report was not motivated by partisan politics, but by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

To avoid even the appearance of partisan influence in future research endeavors, EAC has established a bipartisan commission panel to oversee all research. We are currently reviewing our contracting policy and internal procedures to make certain that EAC and its consultants are clear on the products to be delivered. We will also expedite the process in which we complete these projects.

We have always taken input from our advisory boards, Congress, and the public very seriously, and we will continue to provide you with accurate, complete, and supported research, whether that research is conducted by consultants or by EAC staff.

Thank you for your service, your commitment to the election process and your support of EAC.

Also attached is a copy of EAC's statement on this issue, as well as a statement issued by Congressmen Maurice Hinchey and José Serrano. If you have any questions regarding this study or on any other matter, please don't hesitate to contact us.

Sincerely,

EAC Board of Advisors  
EAC Standards Board

RE: EAC Election Crimes Study

Dear Members of the EAC Standards Board and EAC Board of Advisors:

The U.S. Election Assistance Commission has recently come under fire for not releasing a draft report from EAC's Voting Fraud and Voter Intimidation project, which was submitted by two contracted research consultants, Tova Wang and Job Serebrov. That draft report, which is attached to this letter, is a compilation of summaries from the work that they conducted. We thought it was important to explain the circumstances surrounding this project.

In 2005, the EAC Board of Advisors helped EAC prioritize its research efforts. As a result, EAC developed a research agenda that included studying voting fraud and voter intimidation. In the fall of 2005, EAC hired the two contract employees to conduct an initial review of the information available about voting fraud and voter intimidation. The employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted.

In May 2006, a status report regarding this study was presented at the public meetings of the EAC Standards Board and EAC Board of Advisors. Each board provided feedback on the progress of the study and the direction that it should take. Following those meetings, the project's working group convened and

likewise provided feedback on the study. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were compiled and reviewed by the contract employees. In addition, they provided a draft report of the summaries of the interviews for EAC's review and consideration.

EAC staff reviewed the material, briefed the commissioners, including at our October public meeting and presented for commissioner consideration a report, *Election Crimes: An Initial Review and Recommendations for Future Study*, which was adopted at our December 2006 public meeting.

After the release of EAC's report there was some debate about whether EAC should release the draft provided by our contracted employees. A member of the Board of Advisors, Ms. Barbara Arnwine, went so far as to propose a resolution recommending that the EAC release the original "Voter Fraud and Intimidation Report" to the public, or, alternatively, to the Board of Advisors. The Board of Advisors rejected the resolution, persuaded by argument that the EAC should have complete control of the use of its commissioned research. This is an issue that the EAC, in light of recent events, must necessarily resolve with input from its Congressional Committees of Reference, and the Board of Advisors.

On March \_\_, 2007, EAC testified before a Congressional committee that requested the draft report. A copy was provided to the committee, which released the draft report this week. The release of the draft report by members of Congress has made it widely available. Thus we attach it to this letter. We value your service on the Board of Advisors and believe that you should receive the draft directly from the EAC, and not a secondary source.

Recently, there has been much discussion surrounding EAC's review process of the material provided by the contract employees, and how much was included in our election crimes report. After receiving the information from the consultants, EAC conducted due diligence. As you will see in the consultants' draft, they reached conclusions in their summaries that were based almost entirely on the interviews they conducted with 24 people, not on the entire body of work they collected. EAC found the individual accounts were informative and they helped define what issues we should examine in moving forward.

We understand that the topics of voter fraud and voter intimidation are hotly debated and often divisive, even among members of the EAC. We assure you that we believe the process we took to review all of the materials and adopt a final report was motivated by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

To avoid even the appearance of partisan influence in future research endeavors, EAC has established a bipartisan commission panel to oversee all research. We are currently reviewing our contracting policy and internal procedures to make certain that EAC and its consultants are clear on the products to be delivered. We will also expedite the process in which we complete these projects.

We will continue to take input from our advisory boards, Congress, and the public very seriously, and we will continue to provide you with accurate, complete, and supported research, whether that research is conducted by consultants or by EAC staff.

Thank you for your service, your commitment to the election process and your support of EAC.

Also attached is a copy of EAC's statement on this issue, as well as a statement issued by Congressmen

Maurice Hinchey and José Serrano. If you have any questions regarding this study or on any other matter, please don't hesitate to contact us.

EAC Board of Advisors  
EAC Standards Board

RE: EAC Election Crimes Study

Dear Members of the EAC Standards Board and EAC Board of Advisors:

The U.S. Election Assistance Commission has recently come under fire for not releasing a draft report from EAC's Voting Fraud and Voter Intimidation project, which was submitted by two contracted employees, Tova Wang and Job Serebrov. That draft report, which is attached to this letter, is a compilation of summaries from the work that they conducted. We thought it was important to explain the circumstances surrounding this project.

In 2005, the EAC Board of Advisors helped EAC prioritize its research efforts. As a result, EAC developed a research agenda that included studying voting fraud and voter intimidation. In the fall of 2005, EAC hired the two contract employees to conduct an initial review of the information available about voting fraud and voter intimidation. The employees were asked to provide two things: (1) a definition of voting fraud and voter intimidation that could be used in a future and comprehensive study of these topics; and (2) a series of recommendations on how such a future, comprehensive study could be conducted.

In May 2006, a status report regarding this study was presented at the public meetings of the EAC Standards Board and EAC Board of Advisors. Each board provided feedback on the progress of the study and the direction that it should take. Following those meetings, the project's working group convened and likewise provided feedback on the study. In July 2006, EAC received a body of research including summaries of the articles, books, interviews, and media reports that were compiled and reviewed by the contract employees. In addition, they provided a draft report of the summaries of the interviews for EAC's review and consideration.

EAC staff reviewed the material, briefed the commissioners, including at our October public meeting and presented for commissioner consideration a report, *Election Crimes: An Initial Review and Recommendations for Future Study*, which was adopted at our December 2006 public meeting.

After the release of EAC's report there was some debate about whether EAC should release the draft provided by our contracted employees. The Board of Advisors considered, but did not pass, a resolution urging the release of that document. Recently, EAC testified before a Congressional committee that requested the draft report. A copy was provided to the committee, which released the draft report this week.

Recently, there has been much discussion surrounding EAC's review process of the material provided by the contract employees, and how much was included in our election crimes report. After receiving the information from the consultants, EAC conducted due diligence. As you will see in the consultants' draft,

they reached conclusions in their summaries that were based almost entirely on the interviews they conducted with 24 people, not on the entire body of work they collected. EAC found the individual accounts were informative and they helped define what issues we should examine in moving forward.

We understand that the topics of voter fraud and voter intimidation are hotly debated and often divisive. We assure you that the process we took to review all of the materials and adopt a final report was not motivated by partisan politics, but by a responsibility, especially as a federal agency, to issue findings only when they are supported by data that can enable EAC to firmly defend its conclusions.

To avoid even the appearance of partisan influence in future research endeavors, EAC has established a bipartisan commission panel to oversee all research. We are currently reviewing our contracting policy and internal procedures to make certain that EAC and its consultants are clear on the products to be delivered. We will also expedite the process in which we complete these projects.

We have always taken input from our advisory boards, Congress, and the public very seriously, and we will continue to provide you with accurate, complete, and supported research, whether that research is conducted by consultants or by EAC staff.

Thank you for your service, your commitment to the election process and your support of EAC.

Commissioner Rodriguez,

Gavin's Blackberry is not working properly so he asked that I forward to you all the following response:

Julie,

My Blackberry keeps freezing up, again. Perhaps you could forward my comments.

Peggy was proposed as the point of contact for Ms. Wang because she was the original project manager and Tova's prior supervisor/COTR. Peggy would obviously staff requests. As for Peggy's status, I was under the impression that she was still an active employee, but obviously defer that issue to Tom.

**Deliberative Process  
Privilege**

April 17, 2007

James P. Joseph  
Arnold & Porter L.L.P.  
655 Twelfth Street, NW  
Washington, DC 20004-1206

Mr. Joseph:

This letter is in response to your April 16, 2007 inquiry in which you request that your client, Ms. Tova Wang, be authorized by the U.S. Election Assistance Commission (EAC) to discuss certain matters pertaining to her prior employment with the agency.

As I am sure you are aware, Ms. Wang was employed by the EAC under its authority to hire experts and consultants pursuant to 42 U.S.C. §3109 (as implemented by 5 C.F.R. §304). As such, her agreement with the EAC created a limited employee/employer relationship. This is clearly stated in her contract. As an employee Ms. Wang has a duty to the Commission. Without direction from the EAC, Ms. Wang has no authority to speak for the EAC, release non-public information or discuss privileged matters with third parties. As you note in your letter, this concept is also clearly stated in her employment contract. The duties and responsibilities that come with Federal service are essential to the proper functioning of our government.

Ultimately, however, Ms. Wang's responsibilities should not have a significant impact on her ability to discuss her personal opinions on voter fraud. Per her employment contract, the project she worked on was focused on collecting existing information, defining terms and proposing future research methodology so that EAC could conduct a future research project on voter fraud and intimidation. As a result, the information gathered by Ms. Wang and other EAC employees is nothing more than a collection of articles, books and opinions that are publicly available. In fact, the EAC has published much of this information as an attachment to the final report which is available on our Web site. Ms. Wang is free to provide her personal opinion on voter fraud to anyone she wishes. Her only limitation is in speaking for the EAC or releasing privileged documents or information.

If Ms. Wang has questions concerning specific requests for information, or is requested to speak

027027

on behalf of the EAC, she may contact her prior supervisor, Ms. Peggy Sims at (202)566-3127 for assistance.

Sincerely,

Gavin S. Gilmour  
Deputy General Counsel

Subject IG Press Release

Commissioners,

Per the chair's request, I have drafted the following press release to communicate the commission's decision to ask the IG to review our contract procedures. Please let me know if this is okay with all of you. I would like this to go out ASAP, so if you could get back to me with any comments before noon, I would appreciate it. Sorry for the short turnaround, but I think circumstances demand that this get out immediately. Thank you.

After you give me the okay on the press release, I will send everything to staff before releasing it.

## **EAC Requests Review of Voter ID, Vote Fraud and Voter Intimidation Research Projects**

For Immediate Release  
April 16, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – U.S. Election Assistance Commission (EAC) Chair Donetta Davidson today issued a formal request to the commission’s inspector general to conduct a review of the commission’s contracting procedures, including a review of two recent projects focusing on voter identification and vote fraud and voter intimidation. The chair’s memo to the inspector general is attached.

“The actions taken by the commission regarding these research projects have been challenged, and the commissioners and I agree that it is appropriate and necessary to ask the inspector general to review this matter,” said EAC Chair Davidson.

Chair Davidson has requested that the inspector general specifically review the circumstances surrounding the issuance and management of the voter identification research project and the vote fraud and voter intimidation research project.

Last month, the commission voted unanimously to launch a comprehensive study focused on voter identification

laws after concluding that initial research it received in a report was not sufficient to draw any conclusions. The commission declined to adopt the report, but released all of the data to the public. The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov).

At a public meeting in December 2006, the commission adopted *Election Crimes: An Initial Review and Recommendations for Further Study*, available at [www.eac.gov](http://www.eac.gov). This report was the culmination of research conducted by Tova Wang and Job Serebrov, who were tasked with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and working group deliberations. This report should include any recommendations for future EAC research resulting from this effort.”

*EAC is an independent bipartisan commission created by HAVA. It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.*

Subject evaluation of contracting

History

✉ This message has been forwarded.

To complete our evaluation of the contracting process and related issues for the voter fraud research and voter intimidation and voter identification research projects, we will need copies of all e-mails and a number of documents related to the projects including copies of all of the various drafts (versions) of the reports. I am requesting that all EAC personnel be notified that they are to preserve all of the documents including e-mails related to the projects. We are in the process of setting up an e-mail account to receive the documents, It is imperative that all documents related to the projects be preserved. As soon as the account is set up we will notify you of the address.

In addition, we are requesting access to the backup e-mail files maintained by GSA and EAC. As a result, we are requesting that no backup tapes or files be destroyed.

Subject Fw: Fraud Report

Commissioners & Tom,

After having received this request, reviewed it and discussed it with the Inspector General and Gavin, I believe that it is ill-advised to continue such a request in light of the pending investigation of this matter by the Inspector General. While I am certain that this was not the intent of this request, the inevitable appearance of this request would suggest that the Commission is seeking to influence an ongoing investigation of the IG. This appearance of inappropriate influence would arise because two employees, who will undoubtedly be contacted by and interviewed as a part of the ongoing IG investigation, are being asked to provide a statement to their supervisors prior to interviews of those persons by the IG. Furthermore, this situation could appear as an attempt by employees and/or the agency to collude on a statement prior to making a formal statement in the investigation of the IG.

This IG's investigation was requested to address issues of public perception. Thus, it is critical that this investigation proceed in a manner that leaves no room for question. As such, I believe that it is inappropriate to proceed with this request.

Subject Fraud Report

After much discussion today among the Commissioners would like you both to prepare an in depth overview of the work you did on this report. This would include all of the details of your work on the both the draft report and the final report adopted by the Commissioners, Jeannie has offered to help you in any way. I will discuss this further with each of you between now and tomorrow. I have been at the damn conference all day and have not been able to go to a single session or spend time with people.

Thanks  
Tom

Attorney-Client  
Privilege

April 17, 2007

James P. Joseph  
Arnold & Porter L.L.P.  
655 Twelfth Street, NW  
Washington, DC 20004-1206

Mr. Joseph:

This letter is in response to your April 16, 2007 inquiry in which you request that your client, Ms. Tova Wang, be authorized by the U.S. Election Assistance Commission (EAC) to discuss certain matters pertaining to her prior employment with the agency.

As I am sure you are aware, Ms. Wang was employed by the EAC under its authority to hire experts and consultants pursuant to 42 U.S.C. §3109 (as implemented by 5 C.F.R. §304). As such, her agreement with the EAC created a limited employee/employer relationship. This is clearly stated in her contract. As an employee Ms. Wang has a duty to the Commission. Without direction from the EAC, Ms. Wang has no authority to speak for the EAC, release non-public information or discuss privileged matters with third parties. As you note in your letter, this concept is also clearly stated in her employment contract. The duties and responsibilities that come with Federal service are essential to the proper functioning of our government.

Ultimately, however, Ms. Wang's responsibilities should not have a significant impact on her ability to discuss her personal opinions on voter fraud. Per her employment contract, the project she worked on was focused on collecting existing information, defining terms and proposing future research methodology so that EAC could conduct a future research project on voter fraud and intimidation. As a result, the information gathered by Ms. Wang and other EAC employees is nothing more than a collection of articles, books and opinions that are publicly available. In fact, the EAC has published much of this information as an attachment to the final report which is available on our Web site. Ms. Wang is free to provide her personal opinion on voter fraud to anyone she wishes. Her only limitation is in speaking for the EAC or releasing privileged documents or information.

If Ms. Wang has questions concerning specific requests for information, or is requested to speak

on behalf of the EAC, she may contact her prior supervisor, Ms. Peggy Sims at (202)566-3127 for assistance.

Sincerely,

Gavin S. Gilmour  
Deputy General Counsel

We have received your letter dated May 9, 2007, on behalf of your client, the Brennan Center for Justice ("Brennan Center"): We disagree with your client's perception that any EAC search of its records was unreasonable. While the Election Assistance Commission ("EAC") is a tiny agency and often struggles to meet the numerous requests it receives for agency documents, we take each request seriously and strive to be responsive. The EAC takes exception to the procedural, substantive and legal conclusions and representations made in your letter. We believe our search for records was conducted reasonably. Nevertheless, the EAC has decided that the best way to accommodate your request is to perform a new search for documents responsive to your request. We believe a new search will lay to rest your client's perception that our initial search was unreasonable.

Formatted: Font: 14 pt

Deleted: are 1  
troubled over

The EAC has no desire to withhold information properly releasable under FOIA. Based upon the distribution of your letter, it is important for our agency to demonstrate its existing and continued policy of responsiveness by going beyond what is required and re-conducting the search that you allege was unreasonable. ✓ The EAC will essentially start over with regard to this request. As you know, Ms. Jeannie Layson has been in constant contact with Ms. Wendy Weiser of the Brennan Center during

See comments  
on next  
page.

Comment [s1]: Does "constant" accurately represent Jeannie's communication with Ms. Weiser?

the pendency of its FOIA request. In fact, Ms. Layson recently contacted Ms. Weiser to inform her that that she had found additional responsive information in the course of EAC records reviews for similar requests for information. Additionally, Ms. Layson and Ms. Weiser were working together to provide any e-mail attachments or similar documents desired by the Brennan Center which were identified, but omitted in the original response. Due to the procedural and substantive confusion and disagreements surrounding this matter, we will terminate these piecemeal activities in order to prevent any future misunderstandings.

Deleted: 1

The EAC will conduct a second search and review of its documents. We will not charge the Brennan Center for the document collection, review or copying. For the purpose of clarity and to avoid any confusion, based upon the Brennan Center's previous requests it is seeking:

ALSO, I believe this is a great opportunity to address the larger audience by including our desire (if it exists) to improve EAC transparency by setting up - in the very near future - a FOIA reading room. I implore you to turn this correspondence into a progressive step for the agency!

Subject Re: Please review my responses 

Julie has already raised the point that most concerned me: I don't think it is accurate to say the consultant's recommendations were their findings. The recommendations were a combination of consultant recommendations and working group recommendations for future EAC action. We did not ask the consultants to provide "findings" because this research was never supposed to be the definitive study on the subject. Instead, it was supposed to be an initial effort to see what relevant information is available, to define voting fraud and voter intimidation, and to make recommendations to EAC regarding how to pursue the subject (next steps). --- Peggy

t

This are questions from a "freelance" reporter who is very hot about the "Tova Wang report." Please let me know if my answers are accurate, and I welcome any suggestions you may have. I need to get your input by COB tomorrow. I am also looking for more clarification on what didn't make it into the fraud report. She is asking if we included all of their "findings" and their "research."

Thanks.

1) You said that the Wang/Serebrov report has not been released because it was predecisional. Was the Moritz/Eagleton report released because it was not predecisional? The Moritz/Eagleton report was a predecisional document. The commissioners took an action not to adopt a final report based upon the Moritz/Eagleton report, but to release all the predecisional information (the draft report).

027054

2) I understood you to say that the December EAC report includes all of the Wang/Serebrov recommendations but not all of the Wang/Serebrov findings. Is that correct? The report does include all of their recommendations, which were their findings, and all of the research they conducted.

3) I understood you to say that EAC staff added results of their own research to the December EAC report. Is that correct? What I said was EAC staff reviewed the report for accuracy, for grammar and added language that reflected the commission's decision to adopt the final version based upon the initial research provided by the consultants.

4) If I'm correct on questions 2 and 3, would it be accurate to say that readers of the December report cannot tell how much of that report does and does not reflect the original Wang/Serebrov findings? The consultants' recommendations are their findings. All of the recommendations are included in the final report, so readers can make the determination regarding the recommendations.

5) I called earlier today requesting the Wang/Serebrov report, and you sent me the December EAC report. I am concerned that if I had not already been researching this closely, I would have thought that you'd sent me the Wang/Serebrov report and would have reported incorrectly that you had. Does the EAC have any comment on this manner of replying to press inquiries? (I contacted you to request the report after I read in the Statesman Journal of Salem, Oregon, an article by Marie Cocco that says: "The bipartisan commission didn't widely release the consultants' review, but makes it available on request." Did the EAC indeed give Ms. Cocco a copy of the "consultants' review"? Or has she misunderstood you in the way I'm concerned about?) I sent you a link to the "EAC report" because it is what was adopted by the commission based upon the research conducted by the consultants. The final report clearly states how it was compiled and includes bios for both of the consultants. Regarding Ms. Cocco, I explained the entire process to her. I provided the staff update on the project which was presented at a public meeting in May 2006 and the final report, which is posted on the EAC website. Regarding "this manner of responding to press inquiries," I have forwarded your comments to my supervisor so he can review my performance regarding the handling of your inquiry.

6) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for research projects. After EAC receives the initial data, the agency reviews the data for accuracy. What form of due diligence does the EAC's staff routinely conduct on research that is contracted out to experts before that research is released? You mentioned "vetting" the research. What does that vetting entail? It depends on the project. For instance, if it is information directly related to a mandate within the Help America Vote Act (HAVA), staff will make sure that the information is consistent with the law. In addition, we often ask for input from our Standards Board and Board of Advisors, which combined consist of more than 147 members. If we are using research that will eventually become guidance, we are required by HAVA to seek the input of these boards. Go here for more information about these boards and its members. If the board members have feedback, then we must make the determination whether to incorporate it, and, if so, how to incorporate their changes. If the research is focused on election laws throughout the country, we make sure the laws are cited correctly and that state legislatures haven't changed or amended these laws since the research was conducted. (As you probably know, there have been many new election laws introduced at the state level since 2004.) Throughout the

027055

process, we review for grammar as well as make sure the document flows and is arranged logically -- the basic tenets of editing.

Subject Re: Please review my responses

With regard to # 3 we did add our own research, because theirs was insufficient on the definition of voting fraud and voter intimidation.

On #6, you might want to include is written in a consistent voice. This might seem elementary, but not in this case. The comments about the boards may be confusing, here, since this was not vetted through those boards.

I am comfortable with the idea that their recommendations were their findings, although I am sure that Tova would disagree. These consultant/employees were asked to provide two things: 1) a definition of the phrases "voting fraud" and "voter intimidation" and 2) recommendations on a research methodology to conduct a comprehensive review in this area. To accomplish this, we asked them to review existing information on voting fraud and voter intimidation. They wholly failed to provide a definition -- they provided a compilation -- a statement which would cover every possible connotation of those phrases. No logic or limitation was applied. A definition is by its very nature a limitation. So, we had to completely rework that -- hence the additional research referred to above. We reviewed state laws concerning voting fraud and voter intimidation to come up with a definition of "voting crimes." With regard to the second part of their charge, the consultants, as well as their working group and some of the interviewees, provided recommendations. All 16 of them were included in the final report. We did not adopt all of them, obviously, but we did adopt all or part of 6 of those recommendations.

Other statements that were contained in the report were just that ... statements, summaries, or opinions ... concerning the existing research that was out there on this topic. I would not classify those as "findings."

Regarding "this manner of responding to press inquiries," I have forwarded your comments to my supervisor so he can review my performance regarding the handling of your inquiry.

6) I understood you to say that the EAC did not release the Wang/Serebrov report in its original form because the EAC has to do due diligence and its staff is small. Do I understand you correctly? As a small agency of 23 employees, including the four commissioners, it is necessary for the agency to contract with consultants to gather the initial data for research projects. After EAC receives the initial data, the agency reviews the data for accuracy. What form of due diligence does the EAC's staff routinely conduct on research that is contracted out to experts before that research is released? You mentioned "vetting" the research. What does that vetting entail? It depends on the project. For instance, if it is information directly related to a mandate within the Help America Vote Act (HAVA), staff will make sure that the information is consistent with the law. In addition, we often ask for input from our Standards Board and Board of Advisors, which combined consist of more than 147 members. If we are using research that will eventually become guidance, we are required by HAVA to seek the input of these boards. Go [here](#) for more information about these boards and its members. If the board members have feedback, then we must make the determination whether to incorporate it, and, if so, how to incorporate their changes. If the research is focused on election laws throughout the country, we make sure the laws are cited correctly and that state legislatures haven't changed or amended these laws since the research was conducted. (As you probably know, there have been many new election laws introduced at the state level since 2004.) Throughout the process, we review for grammar as well as make sure the document flows and is arranged logically -- the basic tenets of editing.

## Where's the Voter Fraud?

Tova Andrea Wang, The Century Foundation, 12/4/2006

Over the past month, the silence has been deafening.

For the past few years, many on the Right have been vociferously propagating the myth that voter fraud at the polling place is a rampant problem of crisis proportions. But we haven't heard from them lately. In fact, as far as my research can discover (Nexis and Google news searches of multiple relevant terms), there has not been one confirmed report of any of these types of incidents in the 2006 election. Not one. Even the Republican National Committee's vote fraud watch operation in their list of complaints from the 2006 election could not come up with one such case.

If you've been listening to the likes of John Fund, Thor Hearne, Ken Mehlman, and John Lott, you would think non-citizens are lining up to vote at the polls, mischievous partisans are voting multiple times by impersonating other voters, and dead people are voting in polling places across the country. In order to justify their argument that we need all voters to present government issued photo identification at the polls, they claim that this type of fraud is the biggest problem our electoral system confronts. They have been building and building this argument, hammering and hammering away at it to the point that it has now become the prevailing belief of the American public.

I won't go into the recitation of all of the previous research that has been done on what a nonexistent problem polling place fraud is and the fraudulent disenfranchisement narrow voter identification requirements cause among perfectly eligible voters— disproportionately minorities, the poor, the elderly, and voters with disabilities (who by the way, according to conventional wisdom, are also all disproportionately Democratic voters). However, confronted with this continuously growing mountain of evidence undermining their case, it has been interesting to observe the evolution of the Right's spinning of this issue of late.

In recent months, even before this election, slowly recognizing the remarkable weakness of their substantive argument, conservatives' new tack has been to say that even if its true that there is not much polling place fraud, the simple fact that the American people *believe* it is occurring is a problem itself in that it is causing them to lose confidence in the election system. Well, no wonder they have the misguided belief that this is a problem— that's the message the Right has been hammering away at them over the last few years. In any case, the argument goes that we need identification requirements not because they will in actuality do anything to enhance the integrity of the voting process, but because we need to reassure people who have the perception the process is corrupt.

Let me provide just a few examples of this. In their answer in the identification litigation in Indiana, the state outright admitted that there had never been a single, solitary case of polling place fraud in the history of the state. Nevertheless, the state argued. A state may take action to avoid the appearance of fraud as well as its actual occurrence. A Rasmussen Report poll found that 58% of Americans believed that there was a lot or some fraud in American elections, and a Gallup poll after the 2000 election showed that 67% of adults nationally had only some or very little confidence in the way votes are cast and counted in our country. Public perceptions, grounded on publicly reported evidence of fraud such as

that identified above [by the people I mentioned earlier] are a further justification for fraud prevention requirements like Indiana's photo ID law.

During the argument over photo identification before the Supreme Court in Michigan, the assistant attorney general conceded there is no evidence of widespread voter fraud but rather "a concern about it." The esteemed Carter-Baker Commission wrote [http://www.brennancenter.org/stack\\_detail.asp?key=97&subkey=9857](http://www.brennancenter.org/stack_detail.asp?key=97&subkey=9857), "There is no evidence of extensive fraud in US elections or of multiple voting . . . but the electoral system cannot inspire confidence if no safeguards exist to deter or detect fraud or confirm the identity of voters. . . . The problem is not the magnitude of fraud . . . the perception of possible fraud contributes to low confidence in the system."

The Supreme Court may even be starting to buy into this rhetoric. In the recent *Purcell* case regarding Arizona's identification law, Justice Kennedy wrote, "Confidence in the integrity of our electoral processes is essential to the functioning of our participatory democracy. Voter fraud drives honest citizens out of the democratic process and breeds distrust of our government. Voters who fear their legitimate votes will be outweighed by fraudulent ones will feel disenfranchised."

Georgia has twice passed voter identification requirements, in 1997 and 2005, basing the need for such barriers to the vote on instances of vote buying and absentee ballot fraud—two methods of voting that identification would do nothing about. More myths.

Basing voting rights laws upon purposely created misunderstandings of what the issues are is not a sound way to develop public policy. Rather than creating fake problems and then passing disenfranchising laws that purport to address them, we might do a better job of educating the American electorate as to what the real problems are in our voting system, and what they are not. It is only then that we will begin to address the flaws in the election systems that disenfranchise tens of thousands of voters in every major election.

**Deliberative Process  
Privilege**

March 15, 2007

Congressman Jose Serrano, Chairman  
House Appropriations Committee  
Subcommittee on Financial Services  
And General Government  
2227 Rayburn House Office Building  
Washington, DC 20515

**Via Hand Delivery**

RE: Documents requested during March 7, 2007 Hearing

Dear Chairman Serrano:

On March 7, 2007, the United States Election Assistance Commission (EAC) participated in a hearing on the issue of election integrity. During that hearing, Congressman Hinchey, a member of your subcommittee, requested that certain documents be provided to the Committee. We appreciate the Committee's interest in EAC's activities, and we are pleased to respond to the request. Congressman Hinchey requested three documents: EAC's assessment report on CIBER, Inc., the draft report submitted to EAC regarding voter fraud and intimidation, and the draft report submitted to EAC concerning voter identification. For your information, the assessment report on CIBER, Inc. and the final culmination of the voter fraud and intimidation research – Election Crimes: An Initial Review and Recommendations for Further Study -- are available at [www.eac.gov](http://www.eac.gov). However, we have provided hard copies of these reports as well as the additional information requested.

**Assessment Report for CIBER, Inc.**

The first requested document was the report of EAC's contracted laboratory assessor concerning the assessment and review of CIBER, Inc. under EAC's Interim Laboratory Accreditation Program. It is important to explain the purpose and process of EAC's Interim Accreditation Program, which was put in place after the National Institute of Standards and Technology (NIST) informed EAC that it would not complete its lab assessments until late 2006 or early 2007.

**HAVA Accreditation Program Requirement.** As you know, the Help America Vote Act of 2002 (Section 231(a)(1)) mandates EAC "... provide for the certification, de-certification and re-certification of voting system hardware and software by accredited laboratories." Additionally, the statute provides that laboratories are generally to be accredited in a two step process. First, NIST conducts an evaluation of independent non-Federal test laboratories. NIST selects those laboratories technically qualified to test voting systems to federal standards (2002 Voting System Standards and 2005 Voluntary

027064

Voting System Guidelines currently) and recommends them to EAC for accreditation. NIST has determined that it will utilize its preexisting National Voluntary Laboratory Accreditation Program (NVLAP) to perform its HAVA evaluation. Second, after receipt of NIST's recommendation, HAVA requires EAC issue a laboratory accreditation through a vote of its commissioners. As part of this process, EAC will conduct a review of its own to address non-technical issues such as conflict of interest, financial stability and recordkeeping.

HAVA required that NIST deliver its first set of recommended labs to the EAC "[n]ot later than 6 months after the Commission first adopts the voluntary voting system guidelines." This deadline passed in June 2006. Four laboratories applied to NIST for evaluation prior to the HAVA deadline, but the required technical reviews and on-site assessments were not completed by the deadline. The first set of NIST recommended laboratories were not received by the EAC until January 18, 2007.

**The Need for EAC Interim Accreditation of Laboratories.** Obviously, the need for EAC to provide accredited laboratories arose well before NIST's January 18 recommendation. First, towards the end of 2005 NIST informed the EAC that the expected timeline to complete required document collection and review, pre-assessment and formal on-site assessments of applicants made it highly unlikely that it would be able to provide a list of recommended laboratories before the end of 2006. This determination made it clear that the EAC would need to have an alternative process in place to provide accredited laboratories if it wished to implement its certification program before that time. Furthermore, in July of 2006, the National Association of State Election Directors (NASED) informed EAC that the organization was terminating its voting system qualification program. NASED is a non-governmental, private organization that accredited laboratories and qualified voting systems to federal standards for more than a decade. The organization's decision to terminate its voting system qualification program just before the 2006 general election required EAC to take immediate action. Without an entity to approve required voting system modifications for the 2006 election, some state election officials would be unable to field their HAVA-compliant systems. To address these situations, EAC was compelled to do two things (1) provide for interim accreditation of testing laboratories and (2) initiate a preliminary, pre-election phase of its voting system testing and certification program.<sup>1</sup> ?

---

<sup>1</sup> The pre-election phase of EAC's certification program was not originally planned, but was ultimately required to serve election officials and the public. The program began on July 24, 2006. The purpose of the pre-election phase of the program is to provide voting system manufacturers with a means to obtain a Federal Certification of voting system modifications during the vital period immediately prior to the November 2006 General Elections. Many states require a Federal or national certification as a condition of state certification. Historically, the three to four month period immediately preceding a General Election produces a number of emergent situations that require the prompt modification of voting systems. These changes are often required by state or local election officials and must be made prior to Election Day. To this end, the pre-election phase of the EAC's Certification Program is designed to meet the immediate needs of election officials from the date NASED terminated its qualification program until after the November General Election. The pre-election requirements of the certification program are narrowly tailored to meet these needs. Additionally, the pre-election phase of the program was drastically limited in

2006

Jul 1 2006

027065

EAC needed to provide accredited labs on a temporary, interim basis to ensure that the agency had the means to implement its certification program. Additionally, EAC would be compelled to implement a provisional, pre-election certification program to replace services offered by NASED. EAC could not wait for NIST to recommend laboratories. Fortunately, HAVA provided a mechanism for EAC to take such action in Section 231(b)(2)(B). This section requires that EAC publish an explanation when accrediting a laboratory without a NIST recommendation. A notice was published on EAC's Web site to satisfy this requirement.

**EAC's Interim Accreditation Program.** At a public meeting in August 2005 held in Denver, the commissioners received a staff recommendation outlining the details of the interim accreditation program. The staff recommendation included a process in which the three laboratories previously accredited by NASED – CIBER, SysTest Labs, and Wyle Laboratories – would be allowed to apply for interim accreditation. In December of 2005, EAC officially began accepting applications for a limited interim accreditation program. As stated in the letters, the purpose of the interim accreditation program was to provide accredited laboratories to test voting systems to federal standards, until such time as NIST/NVLAP was able to present its first set of recommended laboratories. This accreditation was limited in scope to the 2002 Voluntary Voting System Standards and required the laboratory to apply to the NVLAP program to receive a permanent accreditation. The letters also sought variety of administrative information from the laboratories and required them to sign a Certification of Laboratory Conditions and Practices. This certification required the laboratories to affirm, under penalty of law, information regarding laboratory personnel, conflict of interest policies, recordkeeping, financial stability, technical capabilities, contractors, and material changes.

In order to accredit a laboratory (even on an interim basis), EAC needed to contract with a competent technical expert to serve as a laboratory assessor. EAC sought a qualified assessor with real-world experience in the testing of voting systems. Ultimately, only one individual responded to EAC's solicitation. The individual was (at the time) the only individual known to have the requisite experience and assessor qualifications. The contractor reviewed each of the laboratories that applied. The review was performed in accordance with international standards, the same standards used by NVLAP and other laboratory accreditation bodies. This standard is known as International Standard ISO/IEC 17025, *General Requirements for the Competence of Testing and Calibration Laboratories*. In addition, the EAC assessor (who also currently serves as a NVLAP assessor) applied NIST Handbooks 150, *Procedures and General Requirements* and NIST Handbook 150-22, *Voting System Testing*.

CIBER, SysTest Labs, and Wyle Laboratories applied for accreditation under the interim program. Each, as required, had previously received a NASED accreditation. EAC's

---

scope, (1) it did not certify voting systems, just modifications and (2) the certification was provisional and, thus, expired.

↳ when?

assessor visited each of the labs and conducted a review consistent with the standards noted above. The assessor reviewed laboratory policies, procedures and capabilities to determine if the laboratories could perform the work required. Laboratory assessments do not make conclusions regarding past laboratory work product. Two of the applicant laboratories, SysTest Laboratories, L.L.C., and Wyle Laboratories, Inc. received an interim accreditation. The assessor's reports and EAC action regarding these laboratories are available on the EAC Web site.<sup>2</sup> EAC promptly published on its Web site information regarding its decision on accreditation (August and September of 2006). This notice provides some brief background on the interim accreditation process, starting with the fact that three previously NASED accredited laboratories were invited to apply to the program, including information on the program's requirements and limitations and ending with the identity and contact information of the two laboratories accredited. Information was also electronically forwarded to EAC's list of stakeholders via e-mail. The EAC stakeholders e-mail list includes almost 900 election officials and interest groups, nationwide. Staff members for EAC oversight and appropriations committees are included in this list of stakeholders. In addition to EAC's Web site and e-mail announcements, on September 21, 2006 EAC's Executive Director reiterated the Commission's decision at a public meeting Web cast to the EAC Web site. This announcement identified the interim accredited labs by name. Furthermore, in October 26, 2006, the two interim accredited laboratories testified at a nationally televised public hearing.

**The Interim Accreditation Program and CIBER.** The third laboratory, CIBER, has yet to satisfy the requirements of the interim accreditation program. The initial assessment of CIBER revealed a number of management, procedural and policy deficiencies that required remedial action before the laboratory could be considered for accreditation. These deficiencies are identified in the initial CIBER/Wyle report. They were also brought to the attention of CIBER's President of Federal Solutions in a letter from EAC's Executive Director dated September 15, 2006. The letter outlines, consistent with recommendation of EAC's assessor, the steps the laboratory must take to achieve compliance. The letter requires CIBER to:

- a. *Assign resources, adopt policies and implement systems for developing standardized tests to be used in evaluating the functionality of voting systems and voting system software. Neither ITA Practices, CIBER nor any of its partners will be permitted to rely on test plans suggested by a voting system manufacturer.*
- b. *Assign resources, adopt policies and implement systems for quality review and control of all tests performed on voting systems and the report of results from those tests. This shall include provisions to assure that all*

---

<sup>2</sup> Note: The Wyle and CIBER assessment was completed as a joint report. The two labs have a cooperative agreement to work together in test voting systems (Wyle performing hardware testing and CIBER software testing).

*required tests have been performed by ITA Practices, CIBER or its accredited partner lab.*

Finally, the letter required an additional "follow-up" assessment of the laboratory.

The follow-up assessment of CIBER was performed by EAC's assessor in December of 2006. The findings of this assessment were documented in a report, which is available on the EAC Web site. In the findings, the assessor recognized significant changes CIBER had made to its program in response to the initial assessment, including new policies regarding test procedures, management and personnel. The report also noted a number of non-conformities that had yet to be addressed by the laboratory.

In a letter dated January 3, 2007, CIBER provided a written response to EAC's follow-up assessment and report. The response sought to address the deficiencies noted in the December assessment. Additionally, CIBER officials requested to meet with EAC staff to discuss their January 3 response. This meeting took place at EAC on January 10, 2007. At the meeting, EAC staff informed CIBER that their report could not serve as the basis of accreditation because it failed to resolve all outstanding issues. A number of CIBER responses to noted deficiencies were listed as "TBD." EAC's assessor and Certification Program Director formally reviewed CIBER's response. EAC provided CIBER notice of the deficiencies that remain outstanding and informed them of the steps they must take to come into compliance by a letter dated February 1, 2007. Due to the fact that the purpose and usefulness of the interim accreditation program is coming to a close, EAC allowed CIBER 30 days in which to document their full compliance. After this time, the program will be closed and no further assessment actions will be performed under the interim program. CIBER was notified of this procedure by letter dated January 26, 2007, and on February 8, 2007, EAC voted to close its interim laboratory accreditation program effective March 5, 2007.

Information related to CIBER's status in the EAC interim accreditation program was not released prior to January 26, 2007. It was EAC's belief, in consultation with NIST, that it would be improper to release information regarding an incomplete assessment. However, on January 25, 2007, CIBER took the affirmative action of making this information available to a third party, the New York State Board of Elections. With this action, CIBER made the information public and EAC believed it was incumbent to provide this information to the public. As such, on January 26, 2007, EAC posted on its Web site assessment reports, correspondence, and responses from CIBER related to their progress in the EAC interim accreditation program.

Copies of the two reports issued by the EAC assessor concerning CIBER's laboratory accreditation assessments are attached as Appendixes 1 and 2 to this letter.

### **Draft Voter Fraud and Voter Intimidation Report**

The second document requested by Congressman Hinchey was the draft report prepared by Job Serebrov and Tova Wang as contracted employees to the EAC. This document was produced by contract employees of the EAC for the EAC. Thus, this draft report was and is considered predecisional under the deliberative process exemption to the Freedom of Information Act (FOIA).

As you may know, the Deliberative Process Privilege protects intra-agency documents that are (1) pre-decisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter or governmental decision before that matter is finally decided. It is a well settled matter of law that the work of contract employees and contractors ("consultants") constitute intra-agency documents.<sup>3</sup> This is true even where the consultants are deemed to be independent contractors and are not subject to the degree of control that agency employment entails.<sup>4</sup> The courts have made this determination after recognizing that agencies have a special need for the opinions and recommendations of temporary consultants.<sup>5</sup> Ultimately, deliberative documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) to protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.<sup>6</sup>

The report requested by Congressman Hinchey is a draft, representing one phase of the deliberative process—before the document was vetted by staff, approved by the Executive Director and reviewed and approved by the Commissioners (the relevant policy makers). Ultimately, the draft document was created by contract employees in order to aid the EAC's Commissioners in their decisions regarding voting fraud and voter intimidation. The contract employees had no personal interest in their submissions and had no agency decision-making authority. Each was tasked with simply providing pre-decisional research and information to the EAC. Their efforts were limited to creating a truthful, comprehensive, and unbiased draft report. Only when the report is finalized and is adopted by EAC does it constitute an EAC decision or a policy determination.

The determination of this document as predecisional is born out in the facts surrounding the project at issue, including the contract documents that gave rise to research and writing of this draft report. First, the voter fraud and intimidation study that

Dept. of the Interior, 611 F.2d 1132, at 1138 (1980); Lead Industries Assn. v. OSHA, 610 F.2d 70, 83 (C.A.5 1980) (applying exemption 5 to draft reports prepared by contractors); and Government Land Bank v. GSA, 671 F.2d 663, 665 (CA1 1982)); See also Hertzberg v. Veneman, 273 F. Supp. 2d 67, 76 n.2 (D.D.C. 2003).

<sup>4</sup> Klamath, at 10.

<sup>5</sup> Hoover, 611 F.2d at 1138.

<sup>6</sup> NLRB v. Sears, Roebuck & Co., 41 U.S. at 151.

was requested is a draft of a final document that has already been released after being vetted by staff and approved by the EAC Commissioners. It is available in its final form on EAC's Web site, [www.eac.gov](http://www.eac.gov). The draft document at issue was created by two contract employees hired pursuant to 5 U.S.C. §3109 (see 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees were supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. As stated by their contracts, these consultants were hired so that the EAC could "...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation." Moreover, the contracts clearly forbid the consultants from releasing the draft they created consistent with the privilege covering the draft report. The contract states

All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Finally, the purpose or subject of the draft report at issue was to make an EAC determination on how voter fraud should be studied by the agency. This was to be done by (1) assessing the nature and quality of the information that presently exists on the subject matter, (2) defining the terms and scope of EAC study as proposed by HAVA, (3) determining what is to be studied and (4) determining how it is to be studied. In addition, the Consultants were asked to develop a definition of the phrases "voting fraud" and "voter intimidation."

EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. It would be irresponsible for EAC to accept the product of contracted employees and publish that information without exercising due diligence in vetting the product of the employees' work and the veracity of the information used to produce that product. EAC conducted this review of the draft voter fraud and intimidation report provided by Ms. Wang and Mr. Serebrov. EAC found that the draft report failed to provide a definition of the terms as required, contained conclusions that were not sought under the terms of the contract or were not supported by the underlying research, and allegations that showed bias. EAC staff edited the draft report to correct the problems mentioned above and included all of the consultants' and working groups' recommendations. The final report was adopted by EAC on December 7, 2007 during its public meeting. The final report as well as all of

the underlying research conducted by Mr. Serebrov and Ms. Wang are available on EAC's Web site, [www.eac.gov](http://www.eac.gov).

EAC understands and appreciates that the a request from a Congressional committee is exempt from the provisions of FOIA, and as such, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 3 to this letter.

**Draft Voter Identification Report**

The third document requested is the draft report prepared by Rutgers University in conjunction with Moritz College of Law. Rutgers and Moritz served as contractors to EAC and produced this draft document pursuant to the provisions of the contract governing that relationship. This draft report, like the draft voter fraud and voter intimidation report, is predecisional under the deliberative process exemption to FOIA.

With regard to the Voter Identification draft report, it was created by Rutgers University in conjunction with the Moritz College of Law (Ohio State University) to "...provide research assistance to the EAC for the development of voluntary guidance on provisional voting and voting identification procedures." The stated objective of the contract was to:

...obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics... The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were provided guidance, information, and were directed by EAC personnel. The final product they delivered (draft report sought) was identified as "a guidance document for EAC adoption." Clearly, as noted by the contract, the issuance of Federal guidance to states is a matter of government policy and limited to official EAC action. EAC has not completed review and vetting of this document. However, initial review of this document reveals data and analysis that causes EAC concern. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists

and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>7</sup> After this review process is completed, EAC will make a decision whether to adopt or reject the draft report.

Again, recognizing that a request from a Congressional committee is exempt from the provisions of FOIA, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 4 to this letter.

Thank you for your requests and your interest in election administration. If you have further questions, please do not hesitate to contact me.

Sincerely,

Donetta Davidson  
Chair

Commissioners & Tom,

After having received this request, reviewed it and discussed it with the Inspector General and Gavin, I believe that it is ill-advised to continue such a request in light of the pending investigation of this matter by the Inspector General. While I am certain that this was not the intent of this request, the inevitable appearance of this request would suggest that the Commission is seeking to influence an ongoing investigation of the IG. This appearance of inappropriate influence would arise because two employees, who will undoubtedly be contacted by and interviewed as a part of the ongoing IG investigation, are being asked to provide a statement to their supervisors prior to interviews of those persons by the IG. Furthermore, this situation could appear as an attempt by employees and/or the agency to collude on a statement prior to making a formal statement in the investigation of the IG.

This IG's investigation was requested to address issues of public perception. Thus, it is critical that this investigation proceed in a manner that leaves no room for question. As such, I believe that it is inappropriate to proceed with this request.

Subject Draft Voting Fraud and Voter Intimidation Report

Commissioners and Tom,

I have attached a draft version of the EAC Voting Fraud and Voter Intimidation report. **Please have your comments ready no later than Tuesday , Nov. 28, COB, so that I will be prepared to discuss them at our briefing on Wednesday , Nov. 29 at 10:30.**

You will note that there are appendixes referenced in the report. These documents are quite lengthy. Thus, I did not attach them to this email. If, however, you want to read the documents, DeAnna has access to them in my absence and can either email them to you or print them for you.

I think that the report is fairly self-explanatory. However, there are two questions that we need to address and that the Commissioners need to comment on:

1. The consultants provided summaries of articles, books, and reports that they read, as well as summaries of the interviews that they conducted. Peggy created two tables summarizing the consultants' summaries of books, article and reports as well as interviews. We need to make a determination of which summaries we want to attach as appendixes. The only issue that I am aware of (and I have a question pending to Peggy about the quality of these summaries) is a significant disagreement over the summaries

027091

of interviews with Craig Donsanto and John Tanner of the Dept. of Justice. They disagree with the characterization given by the consultants to what they said in the interview. Obviously, this matter would have to be resolved if we decide to use the consultants' summaries.

2. Tom and I had a conversation with Tova and Job about the fact that we are going to issue a report. Tova was quite insistent about being able to see the report before it is released. I am NOT inclined to give her a copy of the report before it is released. Neither Tova nor Job are still on contract with the EAC. Thus, they are just like any other member of the public. I believe that if we release it to them, then we may have a significant problem withholding the document from others that may ask for it via FOIA request. I believe that the course of action should be to release it to all persons simultaneously.

Happy reading and Happy Thanksgiving!

Subject An unsolicited thought/statement

*The stated purpose of the EAC's recently released "fraud report" was not to draw conclusions about fraud, but determine how the subject should be studied by the EAC. As such, it would inappropriate for the EAC to make unsupported conclusions regarding fraud in its preliminary report. Such speculative statements would only serve to compromise its future effort to study this matter in a nonpartisan fashion.*

Subject FYI - Today's media inquiries ( 4-30-07, Mon )

Commissioners,

(1) Leslie Clark of the Miami Herald plans to attend tomorrow's public meeting. Today she asked whether Florida is required to abide by EAC reply to their request. We said that EAC is the cognizant agency for most of the HAVA funding programs. We said that EAC therefore has the responsibility to advise and instruct states regarding the appropriate use of these funds consistent with the provisions of HAVA as well as circulars developed by OMB Circulars A-87 which governs the use of federal funds to purchase goods for state and local governments.

(2) Dana Burke, News Editor for the Citizen in Webster, TX is working on a story regarding voter identification requirements in Texas. She said Democrats opposed to the new legislation have referred to EAC's voter ID study and point to a correlation between more stringent voter id requirements and lower voter turnout, especially among minority groups. She noticed EAC's statement regarding a request for review, asked if the study is considered valid and whether the assessment by opponents of the legislation is correct. We sent her the following two links and replied that our Inspector General is currently reviewing the circumstances surrounding this research and that when that process is complete we'll be glad to discuss it further.

04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects

News Release: 3/30/07 - EAC to Launch Comprehensive Study of Voter ID Laws

History: [REDACTED] This message has been forwarded [REDACTED]

Thank you, Julie for turning this around so quickly. I believe this is the 1st communication with the boards on research issues. I think we need to discuss research in general, then explain what has happened in the past few weeks with the voter id and fraud studies. Don't we need to explain what has happened - Cong released, NYT, etc. Also, I believe the Advisory Bd provided comment and or action on one or both of the studies and I think that should be noted. Finally, do we think the graph with the pledge to provide accurate research would preclude our releasing the Eagleton report the way we did?

From the variety of comments it is not clear to me that there is a common understanding on how to proceed and what we should say -- or at least I am not comfortable that I understand how you all want this letter to read. So, I would suggest we spend a bit more time on the theme this morning so that I can efficiently and accurately edit the letter so that we can get it out timely today.

Keeping it narrow to the current controversy is ok with me, but I think we cannot assume people know how the recent events unfolded, ie Cong released, NYT wrote, etc.

It appears there will be a substantive rewrite so I will save my edits for that version.

However, my original suggestion was to communicate with the boards about the current controversy, not just research in general. Otherwise it looks like we are sidestepping the problem at hand, which is why we

027096

are writing to the boards in the first place.

Subject FYI - Today's media inquiries ( 3-29-07, Thurs )

Commissioners:

Today we had the following media inquiries:

(1) Pam Fessler of NPR wanted to know what Congressman Hinchey requested, and whether we complied. We told her we sent everything he requested to the House Appropriations Committee, Subcommittee on Financial Services and General Government. We explained that most of what they requested was available on our website. Regarding the voter ID research project, we said that at our Feb. public meeting EAC Chair Donetta Davidson requested that staff review the initial research provided by Eagleton and produce a final report, which would include recommendations for further study on this subject. However, we provided the Committee the initial information Eagleton provided to EAC. We then explained the chronology regarding the voter fraud and intimidation, and pointed out that the final report includes all of the recommendations put forth by the consultants as well the research they provided.

(2) John Gideon of Voters Unite wanted to know why we haven't investigated the equipment used in the FL-13 CD race. We explained that EAC's voting system certification program was implemented in January of this year. Until that time, voting systems were evaluated by NASED, which is not a federal agency. We went on to explain as follows - When the Commission adopted its certification program, it decided not to grandfather or transfer any voting systems that had been qualified by NASED. The Commission felt it was important to conduct its own evaluation of voting systems that had been qualified by NASED. That's why any NASED-qualified voting system, including the one he referenced, that wants an EAC certification must be submitted for end-to-end testing. The system he referenced has not been through EAC's certification program. If and when it does, it will be our responsibility to make sure the manufacturer adheres to the terms of our program. Also, when a system comes to us for certification, relevant substantiated reports or reviews of the voting system may be taken into account. And if an instance such as this were to arise regarding an EAC-certified system, we would certainly investigate. In addition, we will make public the systems that have received EAC certification upon completion of the appropriate review process, as well as those manufacturers that have registered with EAC and those voting systems that have been submitted for certification, and we sent him to our website for a list of the information we will post.

Subject Questions for hearing

History: This message has been forwarded.

All--

I received a call from the minority staff of the appropriations subcommittee. I was informed that they are thinking of asking the following questions:

1. Have states spent the \$3.1 billion that we distributed under HAVA and what are we doing to monitor their spending of Federal funds?
2. Quoting from the Cal-Tech/MIT study, it appears that HAVA is improving voting and turn out, do we agree?
3. Does greater state involvement in elections equate to better election management?
4. How prevalent is voter fraud?
5. Has there ever been a documented incident of voting system tampering during an election?
6. Describe how the implementation of HAVA mandates increases voting security.
7. Will states participate in the voluntary voting system testing and certification program?
8. If the College Poll Worker program is funded, how will we determine which schools get the money?
9. Do paper trails (VVPATs) improve the security of voting systems?

Subject FYI--Letter from Serrano

All,

Today we received a faxed copy of a letter signed by Jose Serrano as Chair of the Financial Services and General Government Appropriations Subcommittee. The Chairman urges the EAC to publicly release the full draft version of the Provisional Voting report prepared by Eagleton. The letter states that the Congressman was pleased with our decision to engage our Inspector General and to release the draft version of the Voter ID study (though he was disappointed that we did not adopt it).

Chairman stated in his letter that if we do not decide to release the draft report, he would like an update regarding the study's status, time line for release and a statement regarding why the EAC would deviate from the "precedent" it has now set in releasing draft studies.

It is my understanding that this report was made public at the Board of Advisor and Standards Board meetings in May 2006. I do not know if any changes were made to the document after that time. Perhaps Karen can provide additional information regarding this concern. It is also my understanding that this document has been released to third parties upon request under FOIA. Additionally, I believe a best practices document was created by the EAC based on the research. That document is on our website. Also, Stephanie informed me (and Karen confirmed) that the study is posted on Eagleton's website.

A copy of Serrano's letter is attached.

The Honorable Donetta Davidson  
 Chair  
 United States Election Assistance Commission  
 1225 New York Avenue Northwest, Suite 1100  
 Washington, DC 20005

Dear Chairwoman Davidson:

I am writing to urge the Election Assistance Commission to publicly release the full draft version of its commissioned report on provisional voting. Given the concern by members of this subcommittee, as well as other members of Congress, over the issue of transparency at the EAC, I believe that it is in the best interest of the taxpayers that they be able to see the full draft report on this topic.

As you know, the EAC commissioned a report from the Eagleton Institute of Politics at Rutgers on both voter identification and provisional voting. At some point, these two reports were split from one another. On March 30, 2007, the EAC released the draft report on voter identification, entitled "Best Practices to Improve Voter Identification Requirements."

I was pleased with the positive precedent set by the EAC with the release of the draft report on voter identification. Although I was disappointed that the Commission did not endorse the results of the study, I strongly believe that releasing the full draft helped dispel concerns of transparency and partisanship, and allowed the public at large to help identify areas that need more in depth review. I also believe that you have made the right decision in asking the Inspector General to conduct a review of the Commission's contracting procedures with respect to recent reports. I am hopeful that the review will conclude that greater openness and transparency is of utmost importance.

Given your request to the Inspector General and the recent controversies over the release of the draft voter identification report, as well as the draft voter fraud and intimidation report, it would

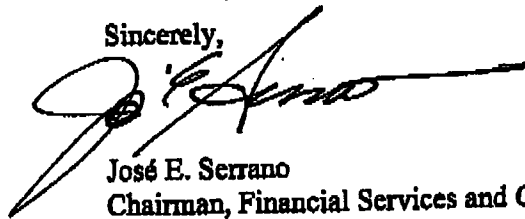

Page 2  
April 17, 2007

be in the best interest of the Commission to release the draft report on provisional voting. Releasing the full draft version of this report would help to ensure that the EAC remains a transparent organization and dispel concerns that the Commission has been acting in a partisan manner.

Should the Commission decide not to release the draft report, I would then request an update as to the status of this report, a timeline for its release, as well as any compelling reasons as to why the EAC should deviate from the precedent you have now set. The public deserves the opportunity to decide whether the report is both rigorous and accurate.

As I mentioned in the hearing we held just over a month ago, I strongly believe that the EAC will be one of the most important government entities in the run up to the 2008 elections. It is of vital importance that we ensure that the EAC remains, in appearance and in fact, a bipartisan, independent agency- so that voters and election administrators across the country can trust its efforts to ensure that federal elections are safe, secure, accurate, and fair. Releasing the provisional voting report would go a long way towards that goal, and I look forward to your response.

Sincerely,

José E. Serrano  
Chairman, Financial Services and General  
Government Appropriations Subcommittee

Subject Re: FYI-Letter from Serrano

If we release every single thing that comes in the door every contractor will have a platform to shop their "research" as they see fit at taxpayers expense. Further, I see no need for a Commission, there would only be a need for a research director to dole out government contracts. I am amazed that a "respected" academic institution would behave in this manner.

Chairman stated in his letter that if we do not decide to release the draft report, he would like an update regarding the study's status, time line for release and a statement regarding why the EAC would deviate from the "precedent" it has now set in releasing draft studies.

It is my understanding that this report was made public at the Board of Advisor and Standards Board meetings in May 2006. I do not know if any changes were made to the document after that time. Perhaps Karen can provide additional information regarding this concern. It is also my understanding that this document has been released to third parties upon request under FOIA. Additionally, I believe a best practices document was created by the EAC based on the research. That document is on our website. Also, Stephanie informed me (and Karen confirmed) that the study is posted on Eagleton's website.

A copy of Serrano's letter is attached.

Subject: FYI--Letter from Serrano

All,

Today we received a faxed copy of a letter signed by Jose Serrano as Chair of the Financial Services and General Government Appropriations Subcommittee. The Chairman urges the EAC to publicly release the full draft version of the Provisional Voting report prepared by Eagleton. The letter states that the Congressman was pleased with our decision to engage our Inspector General and to release the draft version of the Voter ID study (though he was disappointed that we did not adopt it).

Chairman stated in his letter that if we do not decide to release the draft report, he would like an update regarding the study's status, time line for release and a statement regarding why the EAC would deviate from the "precedent" it has now set in releasing draft studies.

It is my understanding that this report was made public at the Board of Advisor and Standards Board meetings in May 2006. I do not know if any changes were made to the document after that time. Perhaps Karen can provide additional information regarding this concern. It is also my understanding that this document has been released to third parties upon request under FOIA. **Vulnerabilities**

➤ **Provisional Voting & Voter ID**

- There is media interest in this report but internal EAC officials express concern over the potential for a perceived lack of data or “meat” in the report, which is likely to invite criticism.
- Important Dates:
  - Final reports in EAC staff review
  - Commissioner statement that this report would be out on March 8, 2007

➤ **Cost of Studies**

- EAC needs to be prepared to answer questions about the cost of two studies.
  - Voter Fraud and Intimidation - \$100,000
    - Report is completed, next steps under review at EAC
  - Effective Design for Election Administration - \$681,400
    - Final report due from contractor March 30, 2007

➤ **HAVA Funds State Reports**

- In its first review of the state reports EAC discovered widespread mistakes. Corrections requests were mailed in December and EAC is currently reviewing resubmitted reports.
- Deadline for reports covering last year:
  - Title I – End of February 2007
  - Title II – End of March 2007
- State funds reports have not been made readily available, they have only been given out through FOIA requests.
  - Moving forward EAC should consider making the reports available on the EAC website.

➤ **Report to Congress on State Spending**

- Report will cover what the states have spent, and what they have done with the money, over the past three years.
- Important Date:
  - Due to Congress end of April 2007

➤ **State Audits**

- States are audited under three types of audits – the Single Audit, the Regular Audit and the Special Audit.
- Currently the Inspector Generals Office puts all audits on the EAC website, and EAC is working to make audit resolution documents function as stand alone documents.
  - Doing so is important and could be especially helpful for media and stakeholder outreach providing a clear and concise “here’s the problem, these issues were identified, these resolutions were issued.”

➤ **Title I. Section 102 Payments**

- States had to send certification documents to EAC to prove spending, and upon review of certifications some states were required to pay money back. EAC needs to be prepared for two possible challenges:
  - Certifications
    - Certifications are scheduled to be issued by the end of May, and states can appeal EAC decisions.
    - To meet its goal of processing appeals by end of the summer, EAC must stick to submission deadlines and its own internal deadlines.
    - Decisions will be posted online after they are sent to the states and EAC needs to be prepared to conduct state official outreach.
  - There are currently three states that EAC must prepare for in terms of possible negative media coverage.
    - Arizona - EAC may face more dialogue with AZ due to its disagreement over a proof of citizenship requirement when registering to vote. Arizona does not realize yet that they will have to repay Title I funds – approximately \$250,000 due to GSA miscalculating their precinct numbers. EAC was not aware until they filed their certification documents. This situation will require significant commissioner outreach.
    - New York - Did not meet deadline for spending and will have to repay all of their funds – approximately \$50 million. The state has not been cooperative in the past; DOJ has sued them over HAVA compliance. EAC foresees problem getting the funding back which may lead to media/stakeholder scrutiny.
    - \$53 million coming back to EAC - EAC believes that Congress did not anticipate such a large amount; 1/3 of states that received the funds have amounts to pay back. May face media/stakeholder scrutiny over program functionality.
- **Title I. Section 102 Funds Redistribution to Title II**
- EAC will tell states, based on a formula, how much funding they will be receiving from the redistribution of Section 102 funds, and states will have to revise their state plans to account for the new funding.
  - Once EAC has total funds from states needing to repay, it will take approximately 4 months to redistribute those funds under Title II.
  - As the process could prove lengthy and complicated, EAC needs to be prepared for media and stakeholder outreach.
- **National Voter Registration Act**
- EAC is required to issue regulations about registration form design but has not as of this time. Issuing regulations on registration forms is a lengthy process, so EAC needs to start immediately to address the issue before the beginning of the Presidential primaries.
  - NVRA says that EAC has to develop a form and submit to Congress every two years a report assessing the impact of the Act. EAC did a report in '05 and will be issuing another report this year but has not addressed form changes.

- Form redesign has the potential to have a huge impact on the process. FEC held regional hearings when a new form was developed, and EAC would most likely need to do the same.
  - Delay could produce several negative outcomes if not addressed quickly:
    - Media coverage – Why has this taken so long? Why now?
    - Changes right before the primaries could produce controversy
- **Labs and Systems Certification**
- To leverage labs certification EAC should institute a notification and preparation policy with Burson-Marsteller for the 30-day accreditation window once EAC receives info from NIST.
  - EAC has the opportunity through CYSTECH labs in Denver to conduct proactive media outreach.
    - The test lab has agreed to open itself to media - a good opportunity to create some “sunshine” on the testing process.
  - EAC needs to prevent late system accreditation problems and possible blame in the public eye and with stakeholder groups. To do so, the following issues need to be addressed/actions need to be taken:
    - System accreditation takes approximately 6-8 months. EAC must set a hard deadline of June 2007 to avoid last minute system certification issues.
    - Engage the media
      - Work with the vendor community to conduct media outreach to counter the negative news cycle and leverage those vendors that have positive stories to tell and are open to press outreach.
      - Show what and how EAC is doing its testing. Use program examples such as FCC cell phone emissions testing and FAA airplanes testing.
      - Engage the blogger community
    - Engage the Secretaries of State
      - EAC needs to be particularly cognizant of the California Secretary of State who appears to be anti-voting system change; may want to focus on California-specific outreach program.
      - EAC should leverage possible positive stories/third party-spokespeople through the states of: Washington – Sam Reid; Texas – Ann McGeehan, Director of Elections; Maryland – Linda Lamone, Elections Office.
    - Leverage Cost-to-Test public education meeting with elections officials, NIST, manufacturers, legislators and advocacy groups.
      - Meeting TBD late April/early May
    - Leverage semi-annual vendor community/test lab meetings to focus outreach to Secretaries of State, election directors associations and election centers.
      - TBD Summer

➤ **Testing and Certification - National Association of State Elections Directors**

- Prior to EAC, the National Association of State Elections Directors handled the testing of voting machines. EAC has some of the testing results but does not currently have a thorough inventory of what documents they have, where the documents are located and what exactly the testing results say.
- These testing results, and a lack of information internally, is a serious vulnerability and it is imperative that an accurate inventory and a thorough analysis of the reports be completed as soon as possible.

➤ **Systems and Labs Transparency Issues**

- EAC not releasing source codes can be problematic for the agency.
  - EAC should develop a clear and concise public statement on source codes to be used for media questions and stakeholder questions.
- Lab accreditation conflict of interest questions have been raised. EAC needs to address this question with outreach to media and stakeholders, specifically on legislation introduced in the House.
  - HR 811 – U.S. Rep. Rush Holt
  - Possible Senate companion bill to be introduced by Feinstein or Nelson

Subject Rep. Serrano

He is quoted in this article as saying the situation surrounding our fraud report could be another Watergate, and wonders if we got our marching orders from the WH. I think we should respond directly to Rep. Serrano regarding his allegation. Say what you will about the way this has been handled, but one thing I'm sure of is that the WH did not edit or was in any way involved in this project. I suggest someone picking up the phone and calling him or his CoS. This is a serious allegation that is starting to really catch on, but now we have a member of Congress saying it.

## The Fraudulence of Voter Fraud

The Bush administration purged U.S. attorneys for failing to prosecute crimes that didn't occur

By Joel Bleifuss

April 18, 2007

On April 6, 2006, in Washington, D.C., Karl Rove gave a speech to the Republican National Lawyers Association and issued this dire warning:

We are, in some parts of the country, I'm afraid to say, beginning to look like we have elections like those run in countries where the guys in charge are, you know, colonels in mirrored sunglasses. I mean, it's a real problem, and I appreciate all that you're doing in those hot spots around the country to ensure that the ballot--the integrity of the ballot--is protected, because it's important to our democracy.

When Rove talks about protecting "ballot integrity," that is shorthand for disenfranchising Democratic Party voters. Over the last several years, the Justice Department, with the help of White House operatives, has sought to boost GOP electoral fortunes by orchestrating a national campaign against voter fraud. But the administration overreached on Dec. 7, when President George W. Bush fired eight U.S. attorneys, a political scandal that some say could become this president's Watergate.

When Republicans talk about *voter* fraud they are referring to illegal voting by individuals, as opposed to *vote* fraud--systematic attempts to steal an election by an organized group of partisans. This emphasis on voter fraud has convinced eight states to pass laws requiring voters to present official photo identification in order to cast a ballot--laws that studies have shown suppress Democratic turnout among voters who are poor, black, Latino, Asian-American or disabled.

Understanding that one way to win closely contested elections is to keep Democratic voters away

027119

from the polls, the Republican Party has tried to stoke public fears of voter fraud. On Feb. 15, 2005, the U.S. Senate Republican Policy Committee issued a report, "Putting an End to Voter Fraud," which said, "Voter fraud continues to plague our nation's federal elections, diluting and canceling out the lawful votes of the vast majority of Americans." To remedy the situation, the Senate Republicans advised Congress to "require that voters at the polls show photo identification."

But voting experts maintain that voter fraud is not a national problem. In March, Lorraine C. Minnite, a professor of political science at Columbia University, released "The Politics of Voter Fraud," a report she prepared for Project Vote, an advocacy group based in Arkansas. She writes:

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. ... The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor, fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to vote.

This is borne out by a study from the Eagleton Institute of Politics at Rutgers University, which found that in the 2004 election, voters in states that required documentation of identity were 2.7 percent less likely to vote than voters in states where documentation was not required. Specifically, the study, commissioned by the U.S. Election Assistance Commission, found that Latinos were 10 percent less likely to vote, Asian-Americans 8.5 percent less likely to vote and blacks 5.7 percent less likely to vote.

What's more, despite GOP claims to the contrary, voter fraud is a very rare occurrence. In 2002 the Justice Department established the Ballot Access and Voting Integrity Initiative to ferret out fraudulent voters. On Oct. 4, 2005, Attorney General Alberto Gonzales, with great fanfare, proclaimed, "We've made enforcement of election fraud and corrupting offenses a top priority." Yet according to an April 12 *New York Times* article, only 120 people have been charged with the crime over the past five years, leading to 86 convictions. Furthermore, the *Times* noted, federal attorneys say that most of the transgressions have been mistakes by immigrants and felons who simply misunderstood eligibility requirements.

The extent of voter fraud is further complicated by the fact that earlier this year the Election Assistance Commission changed the conclusions of a report it had commissioned. The original report by outside election experts concluded, "There is widespread but not unanimous agreement that there is little polling place fraud." The commission deleted that sentence and replaced it with, "There is a great deal of debate on the pervasiveness of fraud."

Rep. José Serrano (D.-N.Y.), who chairs the House Appropriations subcommittee that oversees the commission, is disturbed by this apparently politically motivated substitution. He told *In These Times*

This possibly could be another Watergate. We have to ask the questions, "Why was this report doctored, and how does this play into the larger picture of voter suppression and

intimidation?" By directing public attention to voter fraud you divert attention from the fact that Americans in certain communities are not able to cast their votes properly and that their votes are not being counted. Is this something that this small new agency thought of by themselves or did they get marching orders from somewhere else, perhaps as far up as the White House?

### **Firing prosecutors**

It appears that, under Rove's direction the White House has been planning to use U.S. attorneys to fan national fears of voter fraud. In his speech to the GOP lawyers, Rove listed 11 states that would play a pivotal role in the 2008 elections. Since 2005, Bush has appointed new U.S. attorneys in nine of those states: Florida, Colorado, Wisconsin, Minnesota, Iowa, Michigan, Nevada, Arkansas and New Mexico.

What's more, the firings of U.S. attorneys in New Mexico, Arkansas and Washington appear directly related to this Republican plan to exploit the issue of voter fraud and suppress Democratic turnout.

In Arkansas, Bush fired a sitting U.S. attorney in order to appoint Rove protégé Tim Griffin. (See "The Talented Mr. Griffin" by Greg Palast on page 31.)

In Washington, fired U.S. Attorney John McKay had refused to prosecute alleged voter fraud in the 2004 Washington governor's race, in which Democrat Chris Gregoire beat Republican Dino Rossi by 129 votes.

On March 6, McKay testified before the Senate that after the election Republicans pressured him to open an investigation. He said his office had examined the allegations of voter fraud and decided there was not enough evidence to pursue a case.

"Had anyone at the Justice Department or the White House ordered me to pursue any matter criminally in the 2004 governor's election, I would have resigned," McKay told the *Seattle Times*. "There was no evidence, and I am not going to drag innocent people in front of a grand jury."

In New Mexico, David C. Iglesias was equally suspect in the eyes of the GOP. Recall that in 2000, Gore beat Bush by 377 votes in New Mexico. Consequently, in 2004, Democrat-affiliated groups initiated voter registration campaigns in New Mexico. As a result, two boys, age 13 and 15, received voter cards in the mail. Iglesias responded by setting up a bipartisan task force to investigate. This didn't satisfy attorney Mickey D. Barnett, who represented the 2004 Bush-Cheney campaign in New Mexico. He told Iglesias he should bring federal charges against a canvasser who forged their signatures, which he refused to do.

In a *New York Times* op-ed, Iglesias wrote:

What the critics, who don't have any experience as prosecutors, have asserted is reprehensible--namely that I should have proceeded without having proof beyond a reasonable doubt. The public has a right to believe that prosecution decisions are made on legal, not political grounds.

## **Manufacturing voter fraud**

The issue of fraudulent voters undermining American democracy did not spontaneously erupt. To promote national concern about voter fraud, in March 2005 GOP operatives with ties to the White House established a 501(c)4 organization called the American Center for Voting Rights Legislative Fund (ACVR). The group went public by establishing a Web site, ac4vr.com. (The site has since been taken down for unknown reasons.)

According to its 990 tax forms, ACVR is based in Midlothian, Va., and its executive director is Robin DeJarnette, who is also the founder and executive director of the Virginia Conservative Action PAC. However, according to the registration form for its Internet domain name, the group's address is a mailbox at a UPS Store in Dallas. The chairman of ACVR is Brian Lunde, a former Democratic National Committee official from Texas, who in 2004 was head of Democrats for Bush.

ACVR specializes in issuing studies that purport to document a host of voter fraud cases, like the report titled: "Democrat operatives far more involved in voter intimidation and suppression in 2004 than Republicans."

On March 21, 2005, four days after ACVR went public, Rep. Bob Ney (R-Ohio), then chair of the Committee on House Administration, opened hearings on 2004 election irregularities. One person who testified was ACVR National Counsel Mark "Thor" Hearne II, who described himself as "a longtime advocate of voter rights and an attorney experienced in election law." In the aftermath of the 2000 presidential campaign, Hearne was dispatched to Florida as a Republican observer in Broward County's manual recount, and in 2004 he worked as the national general counsel for Bush/Cheney '04 Inc.

In his testimony, Hearne described ACVR as "committed to defending the rights of voters and working to increase public confidence in the fairness of the outcome of elections." And he submitted to the committee a copy of the ACVR's "Ohio Election Report," of which he was the lead author. That report read in part:

This [Democratic] voter registration effort was not limited to registration of legal voters but, criminal investigations and news reports suggest, that this voter registration effort also involved the registration of thousands of fictional voters such as the now infamous Jive F. Turkey, Sr., Dick Tracy and Mary Poppins. Those individuals registering these fictional voters were reportedly paid not just money to do but were, in at least one instance, paid in crack cocaine.

And in testimony on Dec. 7, 2006, the same day the prosecutors were fired, Hearne told the Election Assistance Commission: "Recent press reports suggest that voter registration fraud remains a significant issue in the recent mid-term elections."

The press contact for ACVR is Jim Dyke, who was the communications director of the Republican National Committee during the 2004 election. In the fall of 2005 he was working in the White House trying to get Harriet Miers on the Supreme Court, before moving on to work in Vice President Dick

Cheney's office. Brad Friedman of [BradBlog.com](http://BradBlog.com) reported that according to internet records, Dyke registered the ACVR Internet domain name, ac4vr.com, in December 2004. Those records have since disappeared from public view. (The source of ACVR's funding is also mysterious. According to the *Pittsburgh Tribune-Review*, "When asked to name any contributors to his nonprofit, Hearne claimed he did not know but said Lunde did. When Lunde was asked, he claimed he did not know but said Hearne did.")

Dyke is a good friend of his fellow Arkansan Tim Griffin, the new U.S. attorney in Arkansas. In 2004, both worked at the Republican National Committee helping Bush get re-elected. Dyke has been a vocal defender of Griffin's appointment as U.S. Attorney. "He has a real passion for the law," Dyke told the *Arkansas Democrat-Gazette*.

Rounding out the GOP operatives is Pat Rogers, who sits on the board of ACVR. An attorney for the Republican Party in New Mexico, he has been a vocal critic of fired U.S. Attorney Iglesias. According to the *Albuquerque Tribune*, Rogers is on the short list to replace Iglesias.

### **Rove's role**

Minnite, who did the study on voter fraud, has read through the reports prepared by ACVR and presented by Hearne at various official hearings. She noticed that the claims follow a predictable script. "It all starts to look the same," she says. "There is a pattern in the way the documents that claim to show voter fraud are put together. It is usually a compilation of news reports on allegations. There is no follow up, no research done, no analysis."

"As I delved into it, I was faced with the question: 'Why do people think there is a lot of fraud when there isn't any real evidence?' I think people are being manipulated by politics, which takes the form of these reports that are dumped on the public. It is as if you get a big enough pile maybe you will convince people that the volume of fraud is quite large and that we have a serious problem."

Wisconsin provides a case in point. At a March 13 press conference, White House Counsel Dan Bartlett identified Wisconsin as one of the states from which the White House had "received complaints about U.S. attorneys."

In 2005, U.S. Attorney Steve Biskup, who was appointed by Bush, investigated these allegations of voter fraud and reported that he found no evidence on which to press charges.

It turns out that early in 2005, Republican officials in Wisconsin prepared a report titled "Fraud in Wisconsin 2004: A Timeline/Summary." The document, which was found in White House and Justice Department records released by the House Judiciary Committee, was written by Chris Lato, the former communications director for the state Republican Party, on orders from Rick Wiley, the party's executive director. The 30-page report, which covers Aug. 31, 2004 to April 1, 2005, contains 65 entries detailing voter fraud. The final example is titled: "RPW [Republican Party of Wisconsin] News Release: Evidence of Election Fraud Piles Up."

The information contained in this Wisconsin compilation, made its way into a 78-page report released on July 21, 2005, by ACVR: "Vote Fraud, Intimidation & Suppression in the 2004

Presidential Election." In the introduction, the ACVR's Hearne and Lunde wrote that the report "documents hundreds of incidents and allegations from-around the country. ... [T]housands of Americans were disenfranchised by illegal votes cast on Election Day 2004 ... [P]aid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts. ... [R]equiring government-issued photo ID at the polls ... will help assure ... that no American is disenfranchised by illegal votes."

And who was behind this trail of misinformation? On April 7, Daniel Bice, a columnist for the *Milwaukee Journal Sentinel*, reported that a source familiar with the document told him, "The report was prepared for Karl Rove. Rick [Wiley] wanted it so he could give it to Karl Rove."

On April 6, 2006, in Washington, at the aforementioned speech to Republican Party attorneys, Rove began with a joke: "I ran into [AVCR's] Thor-Hearne as I was coming in. He was leaving; he was smart, and he was leaving to go out and enjoy the day." Rove then told the assembled party lawyers, "We have, as you know, an enormous and growing problem with elections in certain parts of America today."

Rove should know. He helped grow the problem.

Subject Re: Rep. Serrano

I think someone should call Serrano but I think we should issue a press release that explains what transpired with the Eagleton and fraud study. We should note that the EAC is an independent federal entity, not part of the Admin and that the WH was not involved in any way in our decision to remove conclusions not supported by the underlying data.

**Subject:** Rep. Serrano

He is quoted in this article as saying the situation surrounding our fraud report could be another Watergate, and wonders if we got our marching orders from the WH. I think we should respond directly to Rep. Serrano regarding his allegation. Say what you will about the way this has been handled, but one thing I'm sure of is that the WH did not edit or was in any way involved in this project. I suggest someone picking up the phone and calling him or his CoS. This is a serious allegation that is starting to really catch on, but now we have a member of Congress saying it.

## The Fraudulence of Voter Fraud

The Bush administration purged U.S. attorneys for failing to prosecute crimes that didn't occur

By Joel Bleifuss

April 18, 2007

On April 6, 2006, in Washington, D.C., Karl Rove gave a speech to the Republican National Lawyers Association and issued this dire warning:

We are, in some parts of the country, I'm afraid to say, beginning to look like we have elections like those run in countries where the guys in charge are, you know, colonels in mirrored sunglasses. I mean, it's a real problem, and I appreciate all that you're doing in those hot spots around the country to ensure that the ballot--the integrity of the ballot--is protected, because it's important to our democracy.

When Rove talks about protecting "ballot integrity," that is shorthand for disenfranchising Democratic Party voters. Over the last several years, the Justice Department, with the help of White House operatives, has sought to boost GOP electoral fortunes by orchestrating a national campaign

027125

against voter fraud. But the administration overreached on Dec. 7, when President George W. Bush fired eight U.S. attorneys, a political scandal that some say could become this president's Watergate.

When Republicans talk about *voter* fraud they are referring to illegal voting by individuals, as opposed to *vote* fraud--systematic attempts to steal an election by an organized group of partisans. This emphasis on voter fraud has convinced eight states to pass laws requiring voters to present official photo identification in order to cast a ballot--laws that studies have shown suppress Democratic turnout among voters who are poor, black, Latino, Asian-American or disabled.

Understanding that one way to win closely contested elections is to keep Democratic voters away from the polls, the Republican Party has tried to stoke public fears of voter fraud. On Feb. 15, 2005, the U.S. Senate Republican Policy Committee issued a report, "Putting an End to Voter Fraud," which said, "Voter fraud continues to plague our nation's federal elections, diluting and canceling out the lawful votes of the vast majority of Americans." To remedy the situation, the Senate Republicans advised Congress to "require that voters at the polls show photo identification."

But voting experts maintain that voter fraud is not a national problem. In March, Lorraine C. Minnite, a professor of political science at Columbia University, released "The Politics of Voter Fraud," a report she prepared for Project Vote, an advocacy group based in Arkansas. She writes:

The claim that voter fraud threatens the integrity of American elections is itself a fraud. It is being used to persuade the public that deceitful and criminal voters are manipulating the electoral system. ... The exaggerated fear of voter fraud has a long history of scuttling efforts to make voting easier and more inclusive, especially for marginalized groups in American society. With renewed partisan vigor, fantasies of fraud are being spun again to undo some of the progress America has made lowering barriers to vote.

This is borne out by a study from the Eagleton Institute of Politics at Rutgers University, which found that in the 2004 election, voters in states that required documentation of identity were 2.7 percent less likely to vote than voters in states where documentation was not required. Specifically, the study, commissioned by the U.S. Election Assistance Commission, found that Latinos were 10 percent less likely to vote, Asian-Americans 8.5 percent less likely to vote and blacks 5.7 percent less likely to vote.

What's more, despite GOP claims to the contrary, voter fraud is a very rare occurrence. In 2002 the Justice Department established the Ballot Access and Voting Integrity Initiative to ferret out fraudulent voters. On Oct. 4, 2005, Attorney General Alberto Gonzales, with great fanfare, proclaimed, "We've made enforcement of election fraud and corrupting offenses a top priority." Yet according to an April 12 *New York Times* article, only 120 people have been charged with the crime over the past five years, leading to 86 convictions. Furthermore, the *Times* noted, federal attorneys say that most of the transgressions have been mistakes by immigrants and felons who simply misunderstood eligibility requirements.

The extent of voter fraud is further complicated by the fact that earlier this year the Election Assistance Commission changed the conclusions of a report it had commissioned. The original report

by outside election experts concluded, "There is widespread but not unanimous agreement that there is little polling place fraud." The commission deleted that sentence and replaced it with, "There is a great deal of debate on the pervasiveness of fraud."

Rep. José Serrano (D.-N.Y.), who chairs the House Appropriations subcommittee that oversees the commission, is disturbed by this apparently politically motivated substitution. He told *In These Times* :

This possibly could be another Watergate. We have to ask the questions, "Why was this report doctored, and how does this play into the larger picture of voter suppression and intimidation?" By directing public attention to voter fraud you divert attention from the fact that Americans in certain communities are not able to cast their votes properly and that their votes are not being counted. Is this something that this small new agency thought of by themselves or did they get marching orders from somewhere else, perhaps as far up as the White House?

### **Firing prosecutors**

It appears that, under Rove's direction the White House has been planning to use U.S. attorneys to fan national fears of voter fraud. In his speech to the GOP lawyers, Rove listed 11 states that would play a pivotal role in the 2008 elections. Since 2005, Bush has appointed new U.S. attorneys in nine of those states: Florida, Colorado, Wisconsin, Minnesota, Iowa, Michigan, Nevada, Arkansas and New Mexico.

What's more, the firings of U.S. attorneys in New Mexico, Arkansas and Washington appear directly related to this Republican plan to exploit the issue of voter fraud and suppress Democratic turnout.

In Arkansas, Bush fired a sitting U.S. attorney in order to appoint Rove protégé Tim Griffin. (See "The Talented Mr. Griffin" by Greg Palast on page 31.)

In Washington, fired U.S. Attorney John McKay had refused to prosecute alleged voter fraud in the 2004 Washington governor's race, in which Democrat Chris Gregoire beat Republican Dino Rossi by 129 votes.

On March 6, McKay testified before the Senate that after the election Republicans pressured him to open an investigation. He said his office had examined the allegations of voter fraud and decided there was not enough evidence to pursue a case.

"Had anyone at the Justice Department or the White House ordered me to pursue any matter criminally in the 2004 governor's election, I would have resigned," McKay told the *Seattle Times* . "There was no evidence, and I am not going to drag innocent people in front of a grand jury."

In New Mexico, David C. Iglesias was equally suspect in the eyes of the GOP. Recall that in 2000, Gore beat Bush by 377 votes in New Mexico. Consequently, in 2004, Democrat-affiliated groups initiated voter registration campaigns in New Mexico. As a result, two boys, age 13 and 15, received voter cards in the mail. Iglesias responded by setting up a bipartisan task force to investigate. This

didn't satisfy attorney Mickey D. Barnett, who represented the 2004 Bush-Cheney campaign in New Mexico. He told Iglesias he should bring federal charges against a canvasser who forged their signatures, which he refused to do.

In a *New York Times* op-ed, Iglesias wrote:

What the critics, who don't have any experience as prosecutors, have asserted is reprehensible--namely that I should have proceeded without having proof beyond a reasonable doubt. The public has a right to believe that prosecution decisions are made on legal, not political grounds.

### **Manufacturing voter fraud**

The issue of fraudulent voters undermining American democracy did not spontaneously erupt. To promote national concern about voter fraud, in March 2005 GOP operatives with ties to the White House established a 501(c)4 organization called the American Center for Voting Rights Legislative Fund (ACVR). The group went public by establishing a Web site, ac4vr.com. (The site has since been taken down for unknown reasons.)

According to its 990 tax forms, ACVR is based in Midlothian, Va., and its executive director is Robin DeJarnette, who is also the founder and executive director of the Virginia Conservative Action PAC. However, according to the registration form for its Internet domain name, the group's address is a mailbox at a UPS Store in Dallas. The chairman of ACVR is Brian Lunde, a former Democratic National Committee official from Texas, who in 2004 was head of Democrats for Bush.

ACVR specializes in issuing studies that purport to document a host of voter fraud cases, like the report titled: "Democrat operatives far more involved in voter intimidation and suppression in 2004 than Republicans."

On March 21, 2005, four days after ACVR went public, Rep. Bob Ney (R-Ohio), then chair of the Committee on House Administration, opened hearings on 2004 election irregularities. One person who testified was ACVR National Counsel Mark "Thor" Hearne II, who described himself as "a longtime advocate of voter rights and an attorney experienced in election law." In the aftermath of the 2000 presidential campaign, Hearne was dispatched to Florida as a Republican observer in Broward County's manual recount, and in 2004 he worked as the national general counsel for Bush/Cheney '04 Inc.

In his testimony, Hearne described ACVR as "committed to defending the rights of voters and working to increase public confidence in the fairness of the outcome of elections." And he submitted to the committee a copy of the ACVR's "Ohio Election Report," of which he was the lead author. That report read in part:

This [Democratic] voter registration effort was not limited to registration of legal voters but, criminal investigations and news reports suggest, that this voter registration effort also involved the registration of thousands of fictional voters such as the now infamous Jive F. Turkey, Sr., Dick Tracy and Mary Poppins. Those individuals registering these fictional

voters were reportedly paid not just money to do but were, in at least one instance, paid in crack cocaine.

And in testimony on Dec. 7, 2006, the same day the prosecutors were fired, Hearne told the Election Assistance Commission: "Recent press reports suggest that voter registration fraud remains a significant issue in the recent mid-term elections."

The press contact for ACVR is Jim Dyke, who was the communications director of the Republican National Committee during the 2004 election. In the fall of 2005 he was working in the White House trying to get Harriet Miers on the Supreme Court, before moving on to work in Vice President Dick Cheney's office. Brad Friedman of [BradBlog.com](http://BradBlog.com) reported that according to internet records, Dyke registered the ACVR Internet domain name, ac4vr.com, in December 2004. Those records have since disappeared from public view. (The source of ACVR's funding is also mysterious. According to the *Pittsburgh Tribune-Review*, "When asked to name any contributors to his nonprofit, Hearne claimed he did not know but said Lunde did. When Lunde was asked, he claimed he did not know but said Hearne did.")

Dyke is a good friend of his fellow Arkansan Tim Griffin, the new U.S. attorney in Arkansas. In 2004, both worked at the Republican National Committee helping Bush get re-elected. Dyke has been a vocal defender of Griffin's appointment as U.S. Attorney. "He has a real passion for the law," Dyke told the *Arkansas Democrat-Gazette*.

Rounding out the GOP operatives is Pat Rogers, who sits on the board of ACVR. An attorney for the Republican Party in New Mexico, he has been a vocal critic of fired U.S. Attorney Iglesias. According to the *Albuquerque Tribune*, Rogers is on the short list to replace Iglesias.

#### **Rove's role**

Minnite, who did the study on voter fraud, has read through the reports prepared by ACVR and presented by Hearne at various official hearings. She noticed that the claims follow a predictable script. "It all starts to look the same," she says. "There is a pattern in the way the documents that claim to show voter fraud are put together. It is usually a compilation of news reports on allegations. There is no follow up, no research done, no analysis."

"As I delved into it, I was faced with the question: 'Why do people think there is a lot of fraud when there isn't any real evidence?' I think people are being manipulated by politics, which takes the form of these reports that are dumped on the public. It is as if you get a big enough pile maybe you will convince people that the volume of fraud is quite large and that we have a serious problem."

Wisconsin provides a case in point. At a March 13 press conference, White House Counsel Dan Bartlett identified Wisconsin as one of the states from which the White House had "received complaints about U.S. attorneys."

In 2005, U.S. Attorney Steve Biskup, who was appointed by Bush, investigated these allegations of voter fraud and reported that he found no evidence on which to press charges.

It turns out that early in 2005, Republican officials in Wisconsin prepared a report titled "Fraud in Wisconsin 2004: A Timeline/Summary." The document, which was found in White House and Justice Department records released by the House Judiciary Committee, was written by Chris Lato, the former communications director for the state Republican Party, on orders from Rick Wiley, the party's executive director. The 30-page report, which covers Aug. 31, 2004 to April 1, 2005, contains 65 entries detailing voter fraud. The final example is titled: "RPW [Republican Party of Wisconsin] News Release: Evidence of Election Fraud Piles Up."

The information contained in this Wisconsin compilation, made its way into a 78-page report released on July 21, 2005, by ACVR: "Vote Fraud, Intimidation & Suppression in the 2004 Presidential Election." In the introduction, the ACVR's Hearne and Lunde wrote that the report "documents hundreds of incidents and allegations from around the country. ... [T]housands of Americans were disenfranchised by illegal votes cast on Election Day 2004 ... [P]aid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts. ... [R]equiring government-issued photo ID at the polls ... will help assure ... that no American is disenfranchised by illegal votes."

And who was behind this trail of misinformation? On April 7, Daniel Bice, a columnist for the *Milwaukee Journal Sentinel*, reported that a source familiar with the document told him, "The report was prepared for Karl Rove. Rick [Wiley] wanted it so he could give it to Karl Rove."

On April 6, 2006, in Washington, at the aforementioned speech to Republican Party attorneys, Rove began with a joke: "I ran into [ACVR's] Thor Hearne as I was coming in. He was leaving; he was smart, and he was leaving to go out and enjoy the day." Rove then told the assembled party lawyers, "We have, as you know, an enormous and growing problem with elections in certain parts of America today."

Rove should know. He helped grow the problem.

Subject FYI - Today's media inquiries ( 4-19-07, Thurs )

Commissioners:

Jeannie issued the following media inquiries log for today:

(1) I asked Rick Hasen of Election Law Blog to please post info about our Spanish language glossary of election terms, and he did.

(2) Eliza Carney, National Journal columnist, interviewed the chair today about the recent challenges EAC has encountered. She asked about CIBER, and the chair explained the interim process, the way we modeled our interim process after NVLAP. Eliza wanted to know what EAC was doing to address some of the criticism, and the chair talked about the bipartisan subcommittees and her request to the IG. She said Rep. Hinchey told her the only reason we released the voter ID report was because he asked for it at a hearing. The chair pointed out that in Feb. she asked staff to bring the commission recommendations for wrapping it up w/n 30 days. She asked the chair about the voter fraud report, and the chair said staff reviewed it for accuracy, as we have a responsibility to do. I sent her background info on the history of certification and the voluntary nature of the guidelines and our certification program. She also asked for info about our budgets, and our employee cap, which I sent to her.

(3) David Nather of Congressional Quarterly interviewed the chair about how the agency is standing up against all of the recent criticism. She talked about the bipartisan subcommittees and the IG review request. She said if the IG identifies things that need to be changed, we'll change them. He had emails b/w Peggy and Craig Donsanto about discrepancies with his interview. Peggy talked with the reporter about the issue. She explained that she sat in on the interview, and that she agreed with Craig that they had gotten something wrong -- they stated that DOJ had moved from focusing on fraud conspiracies to individual cases. Peg and Craig agreed that what he'd said was that DOJ used to only focus on conspiracies, now they also focus on individual cases too. Peg said Craig learned of the inaccurate portrayal during his role as the technical advisor to the working group. She said none of the people interviewed were given the opportunity to review the summaries. Craig found out about his through the working group, and Tanner learned about his interview summary after the boards were briefed on the project in May. He asked me if we were finished with the following research projects: -- ballot designs, voter registration methods, recount procedures, misinformation about election times and locations, and proposals to make election day a holiday. I told him all of that research is underway. HAVA-mandated research that's been completed includes Election Crimes (vote fraud), the 2004 Uniformed and Overseas Citizens Absentee Voting Act Survey, and the 2003-2004 National Voter Registration Act Survey. We've also released the 2004 Election Day Survey. And we've issued a series of quick management start guides to election officials throughout the nation, addressing voting system security, introducing a new voting system, ballot preparation, and poll workers. Yesterday, the commission adopted the Spanish language glossary of election terms, the first project released under EAC's Language Accessibility Program, which consists of working groups comprised of local election officials, national advocacy groups and research and public policy organizations to advise the commission on how to best meet language accessibility requirements. Next we will translate the glossary in five Asian languages. We also are working on a Legal Resources Clearinghouse, which will be a web-based database containing statutes, regulations, rules, and fed. and state court decisions related to election administration. It will provide the public and election officials a central location to conduct election administration research. I pointed out to him that we have already met two of the biggest HAVA mandates -- VVSG and the certification program. He asked for the ages of all the commissioners, and I gave it him.

027131

(4) Philip Burrowes of Congressional Quarterly asked for photos of all commissioners and their length of terms which we provided. He also asked for the names of the members of Congress who made recommendations to the White House regarding appointments. We provided the text of HAVA regarding recommendations and said he would need to ask the White House for names.

(5) Marc Songini of Computer World had the following questions, and my responses follow.

A. Is the EAC doing enough to strengthen voluntary voting system guidelines and voting system certification? EAC, the National Institute of Science and Technology (NIST), and the Technical Guidelines Development Committee (TGDC) have already completed an initial update of the 2002 standards. First, it is important to note that these guidelines are voluntary, and it is up to states whether to adopt them. The 2005 guidelines update and augment the 2002 voting system standards, as required by HAVA, to address advancements in election practices and computer technologies. After December of this year, voting systems will no longer be tested against the 2002 standards. The major changes from 2002 to 2005 fall in the areas of accessibility and usability. The changes made to these sections include a usability section which was not in the 2002 standards and increase the number of accessibility requirements from 29 to 120 and increase language accessibility requirements. The 2005 guidelines also created greater security requirements based on the new technology used in the voting machines, increasing standards in the areas of data transmission and voter verification. The 2005 guidelines also include a section on conformance testing that was not in the previous standards and included more requirements regarding wireless components. It also provides an overview of the requirements for Independent Verification systems, including requirements for a voter verified paper audit trail for states that require this feature for their voting systems. The VVSG includes the requirement that all voting system vendors submit software to a national repository, which will allow local election officials to make sure the voting system software they purchase is the same software that was certified. In addition, NIST and the TGDC are working on the next iteration of guidelines as we speak, and have said they expect to provide their recommendations to EAC by this summer. You may also want to contact Jan Kosko at NIST. Her number is 301-975-2767.

B. Regarding EAC resources, please see our operating budgets below. Note that the National Institute of Standards and Technology (NIST) receives a pass through in our budget, so that amount is not part of EAC's operating budget.

FY 2004 -- \$1.2 million

FY 2005 -- \$13.8 million (\$2.8 million of which was a pass through for NIST)

FY 2006 -- \$14 million (\$2.8 million of which was a pass through for NIST)

FY 2007 -- \$16.2 million (\$4.95 million of which was a pass through for NIST)

C. Regarding your inquiry about what EAC is doing to strengthen the certification program, the most important issue is that it is now a role the federal government has assumed for the very first time. In the past, this was done by the National Association of State Election Directors (NASSED) on a volunteer basis. NASSED is not a federal agency, and it did not receive any federal funds in its efforts. EAC made the decision not to grandfather any systems certified by NASSED. So any system seeking an EAC certification must be tested end to end. Under EAC's program, which is laid out in our Testing and Certification Program Manual, the federal government will not only operate a more rigorous testing and certification process, it will also have a Quality Monitoring Program in place. For the first time manufacturers will be held accountable through not only this program, but also under the decertification process, which would be the ultimate sanction against a manufacturer. If a system is decertified, the manufacturer may not represent the system as being certified, may not label the system as certified, and the system will be removed from the EAC's list of certified voting systems. Election officials will be notified about the decertification. The Quality Monitoring Program will allow election officials to report anomalies. EAC will visit facilities for quality control purposes, and we will perform site reviews per states' requests. In addition, this program will be transparent. Information about the process and the manufacturers and test labs that participate will be posted on the agency's website. Go [here](#) for the list of documents and information we will provide. In addition to holding the manufacturers accountable, any federal employees involved with this program will have their financial holdings reviewed for potential conflicts of interest.

### Election Board Facing Votes of No Confidence

CQ WEEKLY - IN FOCUS  
Congressional Quarterly  
April 23, 2007 - Page 1164  
By David Nather, CQ Staff

After the turmoil over the 2000 presidential election, Congress created a bipartisan commission that was supposed to do nice, non-controversial things: hand out some federal grants, do some studies, certify voting machines, promote voting practices that seem to work well.

Instead, the Election Assistance Commission is now surrounded by controversy and tough questions. And the same lawmakers who could barely be bothered to pay attention to its creation four years ago are putting it under the microscope now.

Democrats were enraged by the commission's handling of a report on voter fraud – the panel ordered up the report (which found little evidence of fraud), sat on the document for several months, then released a rewritten version that concluded “there is a great deal of debate” about how much voter fraud takes place. Republicans have contended that voter fraud is a big problem and benefits Democrats.

A second commission report on voter identification laws found that the laws can reduce turnout, particularly among Hispanics. The panel delayed releasing that report for months, then made it public even while refusing to endorse its conclusions.

Voting rights groups have criticized the commission's handling of the reports, and two powerful Democratic senators – Dianne Feinstein of California, who chairs the Rules and Administration Committee, and Majority Whip Richard J. Durbin of Illinois, who chairs the Appropriations subcommittee that funds the commission – have asked the panel to answer a barrage of questions. More than anything, they want to know whether the commission received “any outside communication or pressure” to delay or change the reports.

The controversy has put a harsh spotlight on the commission in recent weeks, but it's hardly the only case where the panel's actions have gotten it into trouble. Last year, the commission angered Arizona's secretary of state when it refused to grant the state permission to require voters to provide proof of citizenship when they registered by mail using federal forms. Secretary of State Jan Brewer, a Republican, called the decision “inexcusably wrong” because Arizona's voters called for the requirement

027133

in Proposition 200 and because the Department of Justice had approved it.

On top of it all, secretaries of state have been suspicious of the commission all along, fearing that it would turn into yet another federal regulatory agency. The National Association of Secretaries of State called for the commission to be abolished after the 2006 election, since its three-year authorization expired at the end of fiscal 2005. New Hampshire Secretary of State William Gardner, a Democrat, urged the group to take that position because, he said, "I could see what could potentially be coming. . . . I remember when the Federal Election Commission was basically a clearinghouse as well."

These are a lot of pressures for a four-member commission with a staff of 19 and an operating budget of just over \$11 million, which got so little attention from Congress that it took a year before its first four members won Senate confirmation. The commission also has strict limits on what it can do under the 2002 election overhaul law that created it. Among other things, it's not supposed to be a regulatory agency – though it does have some authority under the National Voter Registration Act of 1993, the "motor voter" law that was at issue in the Arizona dispute.

### 'We Took On Too Much'

Donetta L. Davidson, the Republican who in January became the commission's third chairman, says she takes seriously the questions about the reports on voter fraud and voter identification. The commission has referred the issue to its own inspector general, asking him to take a hard look at the panel's contracting procedures for outside research projects. "We want to be as transparent as possible," Davidson said.

But Davidson, who was previously Colorado's secretary of state, says the biggest problem was that the commission may have been trying to move too many reports with a small staff that mostly works with outside contractors rather than producing its own research. "I think that was our biggest mistake – being too aggressive," she said. "We just took on too much."

That explanation won't quiet the criticism. House Majority Leader Steny H. Hoyer, a Maryland Democrat and one of the authors of the 2002 law, is concerned that the commission "may have mishandled taxpayer-financed reports" and has called for hearings, said spokeswoman Stacey Farnen Bernards. Feinstein's committee already has an oversight hearing tentatively scheduled for June.

Voting rights groups are highly suspicious of the commission's actions, though there is no evidence the administration interfered with the reports. Jonah Goldman, director of the Lawyers' Committee for Civil Rights Under Law, said it "just seems a little too convenient that there's no political motive" given that the administration reportedly fired some U.S. attorneys because they were not aggressive in prosecuting alleged voter fraud.

And even those who don't subscribe to a political conspiracy find fault with the commission's handling of the reports. "I think they're just trying to avoid controversy, and trying to avoid controversy is not what we need right now," said Richard L. Hasen, an election-law expert at Loyola Law School in Los Angeles. "With all the problems we're having with elections in this country, we need bold leadership, and they're not providing it."

### Congressional Alarm Bells

Davidson insists that the commission doesn't shy away from controversial subjects. "That's our job," she said. Indeed, the law spells out a list of reports the commission is supposed to produce, and they touch on nearly every hot-button election issue imaginable: ballot designs, voter registration methods, recount procedures, the handling of misinformation about election times and locations, and even proposals to make Election Day a holiday.

Much of the commission's other work is advice and testing of voting systems. In 2005, it published guidelines that dealt with security issues, paper audit trails, and accommodations for voters with

disabilities. And last year, it started testing and certifying voting systems in preparation for the 2008 election.

Still, the way the voter fraud and identification reports were handled and the possibility that the Justice Department influenced the reports have alarmed some members of Congress.

That issue won't be settled until the hearings have been held and the inspector general's office has issued its report. But the back story of one incident with the voter fraud report – in which two Justice officials secured changes to the summaries of their interviews for the report – suggests the department was more than a bystander in the voter fraud study.

In the appendix, which summarizes all of the expert interviews conducted for the fraud report, two Justice officials' interviews are included: Craig Donsanto, director of the Election Crimes Branch of the Public Integrity Section, and John Tanner, chief of the Civil Rights Division's Voting Section. In both cases, a footnote declares that "this interviewee did not agree with the consultants' interpretation of his interview comments" and that the commission made "clarifying edits." No such note accompanies any of the other expert interviews.

Donsanto got to see the summary of his interview because he was a technical adviser to the working group. He thought the summary erroneously implied that his unit didn't pursue systematic fraud schemes anymore, only individual cases like voting by felons and non-citizens. He worried that civil rights groups would think their constituencies were being singled out. Peggy Sims, an election research specialist at the commission who managed the project, agreed and had it changed.

Tanner took issue with the suggestion that he had said the Department of Justice wasn't pursuing voter-suppression cases anymore, and provided examples of cases where it was doing just that. His remarks were corrected.

Sims said that neither Donsanto nor Tanner got to weigh in on the entire report before it was released.

Such controversies are inevitable given that some lawmakers are worried about political influence on the commission and others are concerned it might grow too powerful. Elections are emotional, and even a bipartisan panel will have disagreements. When the four commissioners tried to revisit the Arizona decision, for instance, they deadlocked on party lines, something that also happens periodically to the bipartisan Federal Election Commission.

But the commission can go a long way, voting rights groups say, simply by operating with more transparency and establishing more written procedures for making decisions. "It is a relatively young agency," said Wendy R. Weiser of the Brennan Center for Justice at the New York University School of Law. "But they've been around long enough that this is no longer acceptable."

Davidson said more transparency and better procedures are her goals as well. "Definitely I hear what Congress is saying," she said. "We're a bipartisan commission, and we want to do the right thing." Now, in a year when lawmakers say they're trying to improve oversight, it's up to Congress to decide whether it is interested enough in its own creation to help the commissioners do the right thing.

###

## Who's Who on the Commission

The Election Assistance Commission was created in 2002 to help states comply with federal rules and to set standards and distribute grants for voting equipment. Its members, two from each party, are nominated by the president and confirmed by the Senate to four-year terms that are renewable once.

**Donetta L. Davidson** (Republican) was appointed in 2005 and is the current chairwoman. She had been Colorado's secretary of state for six years and before that state elections director and a county clerk in suburban Denver. Her term expires in December.

**Gracia M. Hillman** (Democrat) is a longtime figure in the voting rights movement and a former executive director of the League of Women Voters. She was president of a Washington consulting company when appointed in 2003. Her term expired in 2005, but she is serving until a replacement is named.

**Caroline C. Hunter** (Republican) was deputy director of the White House Office of Public Liaison when President Bush appointed her in 2007. She is a former attorney for the Republican National Committee and ombudsman for the Bureau of Citizenship and Immigration Services. Her term expires in February 2011.

**Rosemary E. Rodriguez** (Democrat) was finishing her third year on the Denver City Council when she was appointed in 2007 to replace Ray Martinez, who resigned. She had previously been Denver's city clerk and director of boards and commissions for the mayor. Her term expires in December.

Subject FYI - Today's media inquiries ( 4-30-07, Mon )

Commissioners,

(1) Leslie Clark of the Miami Herald plans to attend tomorrow's public meeting. Today she asked whether Florida is required to abide by EAC reply to their request. We said that EAC is the cognizant agency for most of the HAVA funding programs. We said that EAC therefore has the responsibility to advise and instruct states regarding the appropriate use of these funds consistent with the provisions of HAVA as well as circulars developed by OMB Circulars A-87 which governs the use of federal funds to purchase goods for state and local governments.

(2) Dana Burke, News Editor for the Citizen in Webster, TX is working on a story regarding voter identification requirements in Texas. She said Democrats opposed to the new legislation have referred to EAC's voter ID study and point to a correlation between more stringent voter id requirements and lower voter turnout, especially among minority groups. She noticed EAC's statement regarding a request for review, asked if the study is considered valid and whether the assessment by opponents of the legislation is correct. We sent her the following two links and replied that our Inspector General is currently reviewing the circumstances surrounding this research and that when that process is complete we'll be glad to discuss it further.

**04/16/07 - EAC Requests Review of Voter ID, Vote Fraud & Voter Intimidation Research Projects**

**News Release: 3/30/07 - EAC to Launch Comprehensive Study of Voter ID Laws**

Peggy,

In preparation for the logistics of this week's working group, I need to know how many people to expect for the meeting. Also, if you still need me to make name tags, I will need a list of attendees and the avery label size.

Also, I will need help from Laiza on the table tents, or we can see if she has the time to help with that.

Thanks!

Subject Re: Latest draft of the EAC Voter ID statement 

Attached, please find my edits. My intention was to try to explain in English how the Contractor conducted the study in the 2nd graph of the background statement. I realize I left some information out; for example, how he ran the numbers based on maximum and minimum id requirements. I am open to any suggestions on how to better describe what they did; however, despite reading the report and Appendix C many times, I am still do not understand exactly how the study was conducted. I think we should run the 2nd graph by the Contractor to ensure its accuracy.

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>1</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>2</sup> The contractor and the EAC agree that the report raises more questions than provides answers.<sup>3</sup>

**Deleted:** Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.¶

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

### EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the

<sup>1</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>2</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

<sup>3</sup> See EAC Public Testimony, February 8, 2007, page 109.

implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements and the potential variation in turnout rates based on the type of voter identification requirements. EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the report.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. ~~Study the effects, including voter turnout, voter registration, and fraud, of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.~~
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various

Deleted: , s

voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject Edited version of the Voter ID statement

Commissioners,

I intended to get this out to you much earlier today, but the day got away from me. After our hearing last week before the House Appropriations Subcommittee and the requests that were made for the draft reports of the Eagleton and Voter Fraud studies, I think that we must take a different approach to addressing the quality of these reports. While it may or may not be our intention to release these documents publicly, we MUST respond to the request made from a Congressional Committee and cannot use FOIA exemptions as FOIA does not apply to them. I believe that it is safe to assume that if we provide these documents to the Committee, even with a letter explaining their predecisional nature, that these documents will be released into the public spectrum. As such, I feel that EAC needs to make a statement regarding the quality of these reports and why we are making (or have made) a decision not to adopt the draft reports that were produced by our contractors.

Thus, I edited the statement that Karen produced with comments that reflect why we will not adopt the Eagleton report. That document is attached below. I would suggest that we put similar statements regarding Eagleton's report and the Voter Fraud draft report into a letter that I am drafting to go to the Committee with the requested documents. I will edit that letter to include similar comments tonight/tomorrow morning and will circulate it to you.

Please let me know if you have any questions, concerns, comments, etc.

Juliet Thompson Hodgkins  
General Counsel

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

### EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the data, analysis and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a less reliable data set based upon the Current Population Survey (which was self-reported and showed a significantly

Deleted: research

Deleted: and the potential variation in

Deleted: based on the type of voter identification requirements

higher turnout rate than other conventional data on that point) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." These data and the statistical analysis used by the Contractor were rightly criticized by independent working and peer review groups comprised of social scientists and statisticians. EAC believes that the Contractor's recommendation or draft report is so fundamentally flawed that none of the draft findings can be adopted or rehabilitated to form a reliable, accurate and useful product. Thus, EAC will not issue a report based upon this study.

**Deleted:** is not adopting the report submitted by the Contractor and, therefore, is not releasing the

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Commissioners,

I intended to get this out to you much earlier today, but the day got away from me. After our hearing last week before the House Appropriations Subcommittee and the requests that were made for the draft reports of the Eagleton and Voter Fraud studies, I think that we must take a different approach to addressing the quality of these reports. While it may or may not be our intention to release these documents publicly, we MUST respond to the request made from a Congressional Committee and cannot use FOIA exemptions as FOIA does not apply to them. I believe that it is safe to assume that if we provide these documents to the Committee, even with a letter explaining their predecisional nature, that these documents will be released into the public spectrum. As such, I feel that EAC needs to make a statement regarding the quality of these reports and why we are making (or have made) a decision not to adopt the draft reports that were produced by our contractors.

Thus, I edited the statement that Karen produced with comments that reflect why we will not adopt the Eagleton report. That document is attached below. I would suggest that we put similar statements regarding Eagleton's report and the Voter Fraud draft report into a letter that I am drafting to go to the Committee with the requested documents. I will edit that letter to include similar comments tonight/tomorrow morning and will circulate it to you.

Please let me know if you have any questions, concerns, comments, etc.

Subject Re: EAC Statement on its future study of Voter ID requirements 

John and Tom-

EAC staff are putting the finishing touches on the statement and data it will be releasing, in the next several days, related to voter identification study.

In our brief statement we will be summarizing what Rutgers/Eagleton did when performing its statistical analysis.

Could you review the following statement for accuracy and send me any revisions and edits to it by Friday March 16, 2007?

" The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The Contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election- November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign his or her name in order to receive a ballot. The Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates 1 and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau2 "

Footnotes:

1 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population includes persons who are not registered to vote.

2. The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S citizens.

Thanks for your feedback

Regards

Subject Voter ID statement

Commissioners,

Attached below are two versions of the Voter ID statement. One shows the track changes and the other shows the document having accepted all of those changes (so that it would be easier to read). Jeannie and Tom have both taken a look at this document and we think that it captures what we discussed on Wednesday.

Please take a look and let me know if this meets with your understanding of what we discussed.

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election -- November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>1</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>2</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

**Deleted:** The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.¶

### EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

**Deleted:** consideration of

**Deleted:**

<sup>1</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>2</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>3</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

Deleted:

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be

<sup>3</sup> See EAC Public Testimony, February 8, 2007, page 109.

covered in the study and timelines for completing an EAC study on voter identification.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

### EAC Recommendations for further study and next steps

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the data, analysis and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a less reliable data set based upon the Current Population Survey (which was self-reported and showed a significantly

Deleted: research

Deleted: and the potential variation in

Deleted: based on the type of voter identification requirements

higher turnout rate than other conventional data on that point) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." These data and the statistical analysis used by the Contractor were rightly criticized by independent working and peer review groups comprised of social scientists and statisticians. EAC believes that the Contractor's recommendation or draft report is so fundamentally flawed that none of the draft findings can be adopted or rehabilitated to form a reliable, accurate and useful product. Thus, EAC will not issue a report based upon this study.

**Deleted:** is not adopting the report submitted by the Contractor and, therefore, is not releasing the

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. <sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

---

<sup>4</sup> See EAC Public Testimony, February 8, 2007, page 109.

- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

DRAFT

# EAC Statement on Future Study of Voter Identification Requirements

## Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

**Comment [GH1]:** In Footnote #2, Regarding the estimate of non-citizens. Perhaps this could be clarified to say whether the % of non-citizens was in the VAP or of the US population as whole. It is not clear to me.

## EAC Recommendations for further study and next steps

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

**Comment [GH2]:** There is no page 109 in the Eagleton Testimony that was presented on 2/8/07, so I am not clear what document the public is being directed to see.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

<sup>4</sup> See EAC Public Testimony, February 8, 2007, page 109.

- Convene, ~~by mid-2007~~, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Comment [GH3]: Is it realistic that this meeting will be convened by June 30? Perhaps we should say, "Convene in 2007, a working"

Commissioners,

Attached below are two versions of the Voter ID statement. One shows the track changes and the other shows the document having accepted all of those changes (so that it would be easier to read). Jeannie and Tom have both taken a look at this document and we think that it captures what we discussed on Wednesday.

Please take a look and let me know if this meets with your understanding of what we discussed.

Subject Re: Revised Voter ID statement with Eagleton comments to  
paragraph 2 

I think Comm Rodriguez makes a good point about the document needing a different title. Also, it is my understanding that Jeannie has not yet edited the draft and therefore has not yet considered layout, subtitles, typos, etc.

I have raised three concerns/questions in Footnotes 2 and 4 and in the bullet that address the working group meeting.

Lastly, I have lost track of where we are with consideration of releasing the full report. The draft document does not do that, however I thought there was a suggestion that we should consider releasing the full report?

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

Comment [GH1]: In Footnote #2, regarding the estimate of non-citizens. Perhaps this could be clarified to say whether the % of non-citizens was in the VAP or of the US population as whole. It is not clear to me.

### EAC Recommendations for further study and next steps

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing an affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers. Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

**Comment [GH2]:** There is no page 109 in the Eagleton Testimony that was presented on 2/8/07, so I am not clear what document the public is being directed to see.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

<sup>4</sup> See EAC Public Testimony, February 8, 2007, page 109.

- Convene, ~~by mid-2007~~, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. # **EAC Statement on Future Study of Voter Identification Requirements**

## **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. The contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election—November 2004. For example, the turnout rate in 2004 in states with a photo identification requirement was compared to the turnout rate in 2004 in states with a requirement that voters sign their name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>1</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>2</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

## **EAC Recommendations for further study and next steps**

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

---

<sup>1</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor reduced the numbers by the same percentage the U.S. Census Bureau estimated were non-citizens in 2000. Estimates of voting age population include persons who are not registered to vote.

<sup>2</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>3</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be

---

Hi --

I wanted to let you know that the VTP issued a report this morning on voter identification and registration:  
<http://vote.caltech.edu/events/2006/VoterID/rpt.pdf>.

As many of our recommendations involve the EAC, I thought we'd pass this along asap.

Hope this is helpful, and we certainly continue to enjoy working with the EAC!

Mike

Subject FOR YOUR APPROVAL: Voter ID PR and Roll Out Strategy

Commissioners,

I have incorporated your edits, so please take a look at the latest drafts of both documents and let me know if you have further changes. I recommend making this public on Thursday. If possible, please let me know by the end of the day on Wed. if you have additional edits. Press release edits were made in the first two paragraphs, including backing off calling this a "multi-year study," and a more direct description of the action you took -- you declined to adopt the report. The only edit in the memo is new language in the Q&A that points out that the \$500K included work for both prov. voting and voter ID.

Thank you, and let me know if you have any questions.

**March 27, 2007**

**MEMORANDUM**

**To:** Commissioners Davidson, Rodriguez, Hunter and Hillman  
**Fr:** Jeannie Layson  
**Cc:** Tom Wilkey, Julie Hodgkins, Karen Lynn-Dyson, Bryan Whitener  
**RE:** Communications Strategy for Release of Voter ID Tally Vote Results

In anticipation of the release of the results of the tally vote and all of the information provided by the contractor, I suggest taking the following steps to effectively communicate your decision. Taking this approach will help us control how the information is distributed, how it is framed, and how to focus the discussion on the positive outcome of your decision.

The bottom line is that we want to try our best to make this a story about EAC's decision to conduct a thorough and in-depth look into the subject of voter ID, and we have decided to release the preliminary research. We do not want this to evolve into a storyline about squabbling between EAC and Eagleton.

I have provided a suggested overall message that reflects the action taken, as well as questions we should be prepared to answer.

Please let me know if you have any questions about my proposal, and I look forward to your input.

### **PRELIMINARY ACTIVITIES**

Prior to the completion of the tally vote and the subsequent release of the results and the contractor's materials, I suggest taking the following steps:

1. Discuss EAC's decision with the contractors in advance of distributing the press release and discussions with reporters so that they have an opportunity to respond and also so they will be well informed and prepared to discuss the facts with reporters or others who will most likely contact them.
2. Prior to release of EAC's decision, reach out to key Hill staffers who have been following this issue, including those members who have requested this data in the past. This should include staffers for the House Appropriations Committee Subcommittee on Financial Services and General Government since the Committee requested this information a few weeks ago. It should be made clear to committee staffers that the tally vote is the culmination of a directive made by the EAC chair in Feb. that the agency move forward to complete this project. These staffers should also be included on our list of key stakeholders.
3. Executive director should determine whether there are other key stakeholders that should be made aware of this decision from EAC personally, not from a press release. Possible candidates include members of Congress, NASS, individual secretaries of state, DOJ, and NASED.

### **PUBLIC ROLL-OUT**

Once the above preliminary steps have been completed, EAC Communications will:

1. Post the press release and the related data on the website, with a link from the home page.
2. Prior to release of the tally vote decision and related data, call Richard Whitt of USA Today, Will Lester of AP, Chris Drew of the NYT, and Zach Goldfarb of the WaPo and let them know we are about to release the information. Offer interviews with the chair or other commissioners.
3. Send the press release (with a link to the research) to all recipients in the media database. This includes national dailies, as well as wire services such as the Associated Press.
4. Send the press release (with a link to the research) to all recipients in the stakeholder database. The database consists of election officials, advocates, and other interested parties, including representatives from organizations who have been critical of EAC, including VoteTrust USA and the People for the American Way.

**OVERALL MESSAGE**

Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, was insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors including, the many changes in state laws and regulations that have occurred since the 2004.

**Q&A**

We should be prepared to answer the following questions:

**Q: Why not release the draft fraud report, too?**

A: EAC issued a final Voting Fraud and Voter Intimidation Report in December 2006, which included recommendations adopted by the Commission to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

In the case of the voter ID report, the Commission chose not to adopt a final report because it was determined that there was insufficient data to provide meaningful conclusions.

**Q: You cited concerns with the contractor's methodology and analysis. Didn't your contract with Eagleton include specific language regarding these issues?**

A: Yes, but in retrospect, perhaps we could have done a better job articulating how we wanted this research to be conducted.

**Q: During the course of the project, did you see draft reports? If so, why didn't these concerns get addressed at that time?**

A: We did receive progress reports, and when we identified areas of concern, we discussed it with the contractor. It was because of these concerns that EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

**Q: During the course of the contract, did you ever express these concerns with Eagleton?**

A: Yes, and as a result of these conversations, EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

**Q: You spent more than \$500,000 for a report the Commission doesn't think should be adopted – so basically you're flushing a lot of money down the drain. Is this a wise use of taxpayer dollars?**

A: There is value in what Eagleton provided, and this included work they did for us regarding provisional voting. As a result of the research on provisional voting, EAC

issued a set of best practices last fall. The voter ID data will help provide a baseline for how to move forward. And even though their research raised many questions, contemplating the answers to those questions has informed us on how to move forward.

**Q: If you were not satisfied with the final product, why did you pay for it?**

A: We adhered to the terms of the contract.

**Q: EAC received this data in June of last year. What has taken so long to bring it to a conclusion?**

A: This is an important issue, one that deserves careful deliberation and a thorough approach. Yes, we like to get things done quickly, but it is more important to take the time to get things right.

## **TRANSITION PHRASES**

To stay on message and avoid being dragged into discussions about anything other than the action taken, employ the following phrases and transition back to the overall message.

### ***Overall Message***

Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, were insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors, including the many changes in state laws and regulations that have occurred since 2004.

### ***Bridge/Transition Phrases***

- What's really important here...
- The bottom line is...
- The point is...
- We have a responsibility to...
- I'll let others speak to that, but let me tell you what's important to EAC...
- Everyone agrees that...

## **EAC to Launch Comprehensive Study of Voter ID Laws**

For Immediate Release  
DATE, 2007

Contact: Jeannie Layson  
Bryan Whitener  
(202) 566-3100

**WASHINGTON** – The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws. The initial research on voter identification laws are available at [www.eac.gov](http://www.eac.gov), but because this research focused exclusively on the 2004 general elections, included populations that are not eligible to vote, and did not take into account influential factors such as the competitiveness of campaigns, it was insufficient to provide meaningful conclusions and thus the Commission declined to adopt a report based on it.

“New voter identification laws have been enacted recently, and the Commission began working to determine the possible impact of these new laws,” said EAC Chair Donetta Davidson. “After careful consideration of the initial research conducted by our contractor, the Commission decided this important issue deserves a more in-depth research approach and that it should be examined beyond only one election cycle. The bottom line is that the research raises more questions than provides answers.

EAC’s strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission’s February 8, 2007, public meeting. For more information about the public meeting agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

EAC’s future research on this topic will be expanded to include more than one election cycle and to examine environmental and political factors and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC’s comprehensive research approach will undertake the following activities:

- Convene a working group of advocates, academics, research methodologists and election officials to discuss EAC’s next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states’ requirements that require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information already collected as well as additional data from the states to develop this baseline.

- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

Subject: Voter ID update

Commissioners,

The press release, the statement, and the draft report has been posted on our site. The press release is being distributed, and is on the way to all of you and the entire EAC staff. The following activities have occurred:

1. Press release was sent in advance to Eagleton.
2. I called Wendy Weiser of the Brennan Center and sent her the info.
3. I called and sent the info to Ray M. and Paul D.
4. I sent the info to Tom Hicks and Adam A.
5. Tom called Dan Tokaji, Dan Oak, and Rep. Hinchey's office.
6. Karen gave the three EAC experts a heads up.
7. Comm. Rodriguez was interviewed by NPR (the only outlet that showed any interest), as was Eagleton. Eagleton told NPR they are glad we are expanding the scope. Interview will run on affiliates today at approximately 5:44 pm EST.
8. I offered interviews to USA Today, WaPo, NYT, and AP but none were interested.
9. I have kept Eagleton apprised of our activities.

I'll continue to keep you apprised as the day goes on, and please let me know if there's anyone else you'd like me to contact.

## **EAC to Launch Comprehensive Study of Voter ID Laws**

**WASHINGTON** - The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report, which focused on only one election cycle, was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public.

The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov). The Commission's statement regarding its decision is attached.

"After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle," said EAC Chair Donetta Davidson. "The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers."

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

027205

EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:

- \* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.
- \* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by the contractor as well as additional data from the states to develop this baseline.
- \* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.
- \* Study how voter identification provisions that have been in place for two or more federal elections have impacted voter turnout, voter registration figures, and fraud.
- \* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###

## **EAC Statement on Study of Voter Identification Requirements**

### **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election - November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document\* was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates\* and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.\*

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

### **EAC Declines to Adopt Draft Report**

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.\* Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

\*1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted

voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

\* 2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

\* 3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

\* 4 See Transcript of EAC Public Meeting, February 8, 2007, page 109.

### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

\* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.

\* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

\* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

\* Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

\* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification

requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

## **Remarks for Thursday's Public Meeting**

In late May, 2005 this research contract awarded to The State University of New Jersey at Rutgers-- The Eagleton Institute of Politics using the Ohio State University Moritz School of Law, as its subcontractor.

The portion of the contract that was awarded related to the study and analysis of voter identification requirements was to :

- Collect and analyze state legislation, administrative procedures and court cases.
- Create a state-by-state compendium of the legislation, procedures, and litigation reviewed.
- Perform an analysis of how voter identification requirements were implemented around the country and to
- Recommend alternative approaches related to the future implementation of HAVA voter identification requirements. These recommendations were to be based on a literature review of research results, a review of data on voter identification and a diagnosis of the problems and challenges related to voter identification.

This contract was extended on two occasions to allow for additional review, including an EAC-initiated review conducted by an independently convened panel of experts who provided input to Eagleton on the first draft of its statistical analysis of voter identification requirements.

The Eagleton Institute of Politics submitted its draft report to the EAC on Best Practices to Improve Voter Identification Requirements on June 28, 2006. Findings from Eagleton's study of provisional voting (that was a part of Eagleton's overall study) were included in EAC's Best Practices on Provisional Voting, which were published by EAC in October 2005.

Subject Close-to-final draft of Voter ID statement 

Commissioners-

Attached please find the draft statement on voter ID requirement in which I have attempted to incorporate your suggested changes. Those changes are highlighted in yellow and bolded.

You'll want to pay particular attention to the options for the third paragraph in which I have offered two choices:

One choice allows you to release all of Eagleton's documents, including the testimony, the 32-page report and the statistical analysis( Appendix C).

The second choice only includes the testimony and does not include the 32 page summary or the data analysis ( Appendix C).

Once you have reached a consensus on one of the choices, I'll ask Jeannie to take a close look at grammar and syntax.

Thanks

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues court decisions, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can be found, along with the contractor's testimony, on EAC's website: [www.EAC.gov](http://www.EAC.gov).

OR

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. The contractor's full report describing the statistical and data analysis which it performed along with the testimony that was delivered summarizing this can be found on EAC's website. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issue court decisions, the statistical and data analysis of the effect of voter identification requirements on turnout, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can also be found on EAC's website: [www.EAC.gov](http://www.EAC.gov).

## EAC Recommendations for further study and next steps

EAC finds the contractor's summary of States' voter identification requirements and summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be an important beginning step in the Commission's consideration of voter identification requirements. From the contractor's statistical analysis and compilation of data EAC considers it advisable to engage in a longer-term, more systematic review of voter identification requirements and is recommending that at a minimum the agency engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- To collect a baseline of information on what factors may effect or influence Citizen Voting Age Population (CVAP) voter participation. **At a minimum data on voter participation statistics for the 2004 and 2008 election cycles would be collected.** Other factors to be examined will include various voter identification requirements, whether or not the race was "hotly" contested and, other environmental or political factors.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into whether voter identification requirements have had an impact over several elections on factors such as voter turnout, registration, and fraud.

EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- **Convening a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include specific issues to be covered in the study and timelines for completing an EAC study on voter identification.**
- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout, voter registration figures, and fraud. Included in this study would be an examination of the relationship between voter turnout and race and gender;
- Publication of a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating pollworkers and voters about various voter identification requirements. Included in the case studies would be detail on the policies and practices used to educate and inform pollworkers and voters;

- A state-by-state tracking of early voting, absentee voting, and vote-by-mail policies and procedures. The data collected through this tracking would then be compared to the various state voter identification policies and procedures described above.

I have attempted to craft language that expresses EAC's concern with the statistical analysis and research methodology that Eagleton employed, and to capture the essence of what EAC found problematic with that analysis.

In this draft I have kept the two options as I have not heard which option the Commissioners have chosen (e.g. for the release of all or only part of the Eagleton report)

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues, court decisions, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can be found along with the contractor's testimony, on EAC's website: [www.EAC.gov](http://www.EAC.gov).

OR

On February 8, 2007 in an EAC public meeting, the contractor presented testimony summarizing the findings from this statistical and data analysis which it elected to perform on voter identification requirements. The contractor's full report describing the statistical and data analysis which it performed along with the testimony that was delivered summarizing this can be found on EAC's website. A summary of voter identification requirements by State, court decisions and literature on voter identification and related issues, court decisions, the statistical and data analysis of the effect of voter identification requirements on turnout, an annotated bibliography on voter identification issues and state statutes and regulations affecting voter identification can also be found on EAC's website: [www.EAC.gov](http://www.EAC.gov).

## EAC Recommendations for further study and next steps

EAC finds the contractor's summary of States' voter identification requirements and summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be an important beginning step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research and statistical methodology the contractor chose to employ in order to categorize and analyze voter identification requirements. Therefore, EAC considers it advisable to engage in a longer-term, more systematic review of voter identification requirements and is recommending that additional study on the topic must take into account more than one Federal election cycle, must consider additional environmental and political factors that effect voter participation, and must take into account changing state laws and regulations related to voter identification requirements. At a minimum EAC will engage, on an ongoing basis, in:

- A state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identity.
- To collect a baseline of information on what factors may effect or influence Citizen Voting Age Population (CVAP) voter participation. **At a minimum data on voter participation statistics for the 2004 and 2008 election cycles would be collected.** Other factors to be examined will include various voter identification requirements, whether or not the race was "hotly" contested and, other environmental or political factors.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into whether voter identification requirements have had an impact over several elections on factors such as voter turnout, registration, and fraud.

EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- **Convening a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include specific issues to be covered in the study and timelines for completing an EAC study on voter identification.**
- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout, voter

registration figures, and fraud. Included in this study would be an examination of the relationship between voter turnout and race and gender;

- Publication of a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating pollworkers and voters about various voter identification requirements. Included in the case studies would be detail on the policies and practices used to educate and inform pollworkers and voters;
- A state-by-state tracking of early voting, absentee voting, and vote-by-mail policies and procedures. The data collected through this tracking would then be compared to the various state voter identification policies and procedures described above.

## **VOTER ID REPORT TALKING POINTS**

**Public Meeting**

**February 8, 2007**

### **I. Chair Davidson's Opening Comments for Eagleton Portion of Public Meeting**

- This has been a highly anticipated report.
- We received the Eagleton draft in June 2006.
- We immediately realized that the data presented more questions than answers.
- Since we have limited staff and resources, we were unable to immediately resolve these questions. Our top priorities at the time were the lab accreditation and the voting system certification programs.
- In addition, we had to focus our efforts on getting information to election officials and the public concerning the November elections, especially because so many jurisdictions were using new voting equipment.
- Now that we have launched those programs, we are once again turning our attention to this research project.
- Let me introduce Tom O'Neil and Tim Vercellotti. They are here today to pick up where we left off, and to give us a brief overview of the research they conducted regarding voter identification.

### **II. Karen Lynn-Dyson Testimony**

### **III. Eagleton Testimony**

### **IV. Commissioners Q&A**

### **V. Chair Closes Eagleton Portion of Public Meeting**

- Obviously many questions have been raised today.
- Next step is for EAC to determine how to move forward.
- I request that Tom instruct staff to provide recommendations on how to proceed within the next 30 days.
- Once we determine how to move forward and what the final culmination of this initial research will be, we will notify everyone.
- Thank you Tom and Tim for your hard work and efforts in the study of this important topic.

Summarizing a report on  
Best Practices to Improve Voter Identification Requirements  
Pursuant to the  
HELP AMERICA VOTE ACT OF 2002  
Public Law 107-252  
Submitted on June 28, 2006  
by  
The Eagleton Institute of Politics, Rutgers, The State University of New Jersey  
The Moritz College of Law, The Ohio State University

Thomas M. O'Neill  
Project Director

Tim Vercellotti  
Assistant Research Professor  
Assistant Director, Center for Public Interest Polling

Eagleton Institute of Politics  
Rutgers, The State University of New Jersey

Introduction

Formatted: Font: 11 pt, Underline

Our report, submitted to the EAC last June, provided information on voter identification practices in the 2004 election. It made recommendations for best practices to evaluate future proposals for voter ID requirements. In particular, we recommended a concerted, systematic effort to collect and evaluate information on voter ID requirements and turnout from the states. This report was a companion to our report on Provisional Voting, submitted to the EAC in November 2005.

Deleted: , including in

Deleted:

The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. Unfortunately, our colleagues from Moritz could not be with us today because of teaching obligations.

Deleted: classroom

Our work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election.

Voter ID requirements are just one set of election rules that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen chooses whether to vote by comparing costs and benefits. The benefits of voting are fairly stable –and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit may be, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decreases.

Deleted: ¶

Deleted: ¶

Deleted: s

We conducted our research before last year's election, when the debate over voter ID requirements was sharp and polarized. We took seriously our charge from the EAC, which was not to enter the national debate, but rather to explore if an empirical study could suggest how we might estimate the effects of different voter ID requirements on turnout. That analysis, of course, would be a sensible first step to assess tradeoffs between ballot security and ballot access and provide valuable information for all parties to the debate.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the net integrity of the ballot may not have been improved.

A key part of our work was a statistical analysis to examine how turnout may vary under different voter identification requirements. We used this statistical study to develop a model to illuminate the relationships between voter ID requirements and turnout. The model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

Tim Vercellotti led that phase of our research and will describe his methods and conclusions.

Results of Statistical Analysis

Deleted: INSERT VERCELLOTTI SUMMARY HERE

Formatted: Underline

Our research included an examination of variation in turnout based on voter ID requirements in the 50 states and the District of Columbia. We examined this question using aggregate data at

the county level gathered from the U.S. Census and other sources, and individual-level data from the November 2004 Current Population Survey.

Drawing from the research conducted by the Moritz College of Law, we were able to classify the states into one of five voter ID categories. Voters either had to:

1. state their name,
2. sign their name,
3. match their signatures to those already on file,
4. provide a non-photo ID,
5. provide a photo ID.

Deleted:

Deleted: or

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity. The five categories for minimum requirements were:

1. stating one's name,
2. signing one's name,
3. matching one's signature to a signature on file,
4. providing a non-photo identification, or
5. swearing an affidavit.

Formatted: Bullets and Numbering

Analysis of the aggregate data showed that the average turnout in states requiring photo identification as a maximum requirement was 58.1 percent compared to 64.2 percent in states that required voters to give their name as the maximum requirement. The differences were slightly smaller when we examined states in terms of their minimum requirements, with 60.1 percent of voters turning out in states that required an affidavit compared to 63 percent in states that required voters to give their name as the minimum requirement.

The analyses of aggregate data also included models that controlled for other factors that might influence turnout, such as whether a county was in a presidential battleground state, the length of time between the close of the registration period and Election Day, and the demographic composition of the county in terms of race and ethnicity, age, and household income. Controlling for those factors, the maximum requirements of providing a signature match or a non-photo identification showed a negative effect on voter turnout when compared to counties in states that only required voters to give their names. None of the voter identification requirements showed an effect on turnout, however, in the model that coded counties according to the states' minimum requirements.

Deleted: had  
Deleted:

Analyses of the individual-level data from the November 2004 Current Population Survey also indicated relationships between voter ID requirements and turnout. Controlling for contextual factors, such as whether a voter resided in a presidential battleground state, and demographic characteristics, such as a voter's gender, race, ethnicity, age, and education, the data showed that registered voters in states that require photo identification as a maximum requirement were 2.9 percent less likely to say they had voted compared to registered voters in states that required voters to state their names. Examining states within the context of minimum identification requirements showed that registered voters in states requiring affidavits were four

Deleted: revealed

percent less likely to say they had voted compared to registered voters in states that required individuals to give their names at the polling place.

Breaking down the Current Population Survey sample by race and ethnicity also revealed interesting patterns. Photo identification and affidavit requirements were negatively associated with whether white registered voters said they voted compared to their counterparts in states requiring registered voters to give their names. But African-American, Hispanic, and Asian-American registered voters in states that required photo identification as the maximum requirement or an affidavit as the minimum requirement were no less likely to say they had voted than their racial or ethnic counterparts in states that simply required voters to give their names.

The most consistent difference emerged in states that required non-photo identification as a maximum or a minimum requirement. In five of six statistical models, African-American, Hispanic, and Asian-American registered voters in non-photo identification states were less likely to say they had voted in November 2004 than their racial or ethnic counterparts in states that required voters to state their names as a maximum or minimum identification requirement.

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This observation does not answer the question as to why photo identification requirements did not have a more uniform effect across groups in 2004. Of course, photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement. But the finding that photo identification requirements were associated with a lower probability that white registered voters said they had voted, and the absence of a similar relationship within other racial and ethnic groups, runs counter to concerns expressed by some in the debate over voter ID. This finding points up the need for further research in this area, perhaps with a view to comparing turnout rates over time before and after a photo identification requirement takes effect, to further isolate potential relationships between photo ID requirements and turnout.

Deleted: begs

Deleted: It may have been due to the fact that

In examining the link between voter identification requirements and turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements.

#### Conclusions from the Research

The statistical analysis suggests that stricter voter ID requirements can be associated with lower turnout. It was not designed, however, to look at the other side of the balance equation: do tighter ID requirements reduce multiple voting or voting by ineligible voters? The scope of our research as defined by the EAC excluded assessing the dynamics and incidence of vote fraud.

Deleted: reduce

We believe, however, that sound policy on voter ID should begin with an examination of the tradeoffs between ballot security and ballot access.

The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs. The EAC's recent study<sup>1</sup> of election crimes found, for example, that there has never been a comprehensive, nationwide study of voting fraud and intimidation.

Without a better understanding of the incidence of vote fraud and its relationship to voter ID, for now, best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility. Election law should provide the clarity and certainty needed to forestall destabilizing challenges to election outcomes. Absent a sound, empirical basis for striking a wise balance between voter ID and ballot access, legal challenges may increase, not just to the process but to electoral outcomes.

Deleted: a

Deleted: now m

Deleted: electoral

The analysis of litigation conducted by the Moritz College of Law for our research suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting Social Security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents.

Deleted: s

Deleted: s

To strike that balance requires a more precise understanding of how voter ID requirements affect turnout. A first step in that direction would be to encourage or require states to collect and report additional data, including:

Deleted: demands

Deleted: the

Deleted: ion

Deleted: ing of

Deleted: ¶

- The reasons potential voters are required to cast a provisional ballot and
- The reasons for rejecting provisional ballots.

#### Recommendations for consideration and action by the EAC

1. Encourage or sponsor further research to clarify the connection between voter ID requirements and the number of potential voters able to cast a ballot that is counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements. The analysis will help focus the attention of the public and policy-makers on the tradeoff between ballot access and ballot security. A "Voter Impact Statement," to be drafted and offered for public review and comment before the adoption of new identity requirements, would estimate the number and demographics of:
  - Eligible, potential voters who may be kept from the polls or permitted to cast a provisional ballot by a stricter ID requirement; and
  - Assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

Deleted: that

Deleted:

The data collection and analysis recommended in this report would help make feasible an empirically-based assessment of the effects on voter participation of proposed identification requirements. That assessment could improve the quality of the debate on this polarizing topic.

<sup>1</sup> U. S. Election Assistance Commission, *Election Crimes: An Initial Review and Recommendations for Future Study*, December 2006.

3. Encourage or require the states to collect and report reliable, credible information on the relationship between ballot access and ballot security. A compilation by EAC of this information would provide a factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
4. Encourage or require states to sponsor surveys of voters to be conducted by local election officials. Such surveys would determine why those who cast a provisional ballot were found ineligible to cast a regular ballot and illuminate the frequency with which ID issues divert voters into the provisional ballot line. The connection between Voter ID requirements and provisional ballots is, of, course, close. Voters who lack required ID will likely vote provisionally, thus placing greater demands on a system that may be hard pressed to meet those demands. Asking voters what they know about ID requirements would also provide useful context for evaluating the effect of those requirements on electoral participation.<sup>2</sup>
5. Recommend as a best practice that state election officials conduct spot checks on how the identification process actually works at polling places. These spot checks could provide information on how closely actual practice tracks statutory or regulatory requirements.
6. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In 11 states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots, and the safe harbor provision in presidential elections.

Deleted: should compile this information to

#### A final thought

A voting system that requires voters to produce an ID may prevent the ineligible from voting. It may also prevent some eligible voters from casting a ballot. If the ID requirements block a few ineligible voters from the polls at the cost of preventing an equal or greater number of eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Deleted: the

Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and what form that requirement should take) will weigh value judgments as well as available factual evidence. We did our work on the premise that increased understanding of the facts relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

<sup>2</sup> Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it.

Deleted: ¶

We hope that premise is realistic, and we also hope that this research has helped the Commissioners and the interested public to clarify their thinking on this polarizing topic.

Deleted:

On behalf of the Eagleton – Moritz research team, we thank you for the opportunity to contribute to the national debate.

## **VOTER ID REPORT TALKING POINTS**

### **Public Meeting**

**February 8, 2007**

#### **I. Chair Davidson's Opening Comments for Eagleton Portion of Public Meeting**

- This has been a highly anticipated report.
- We received the Eagleton draft in June 2006.
- We immediately realized that the data presented more questions than answers.
- Since we have limited staff and resources, we were unable to immediately resolve these questions. Our top priorities at the time were the lab accreditation and the voting system certification programs.
- In addition, we had to focus our efforts on getting information to election officials and the public concerning the November elections, especially because so many jurisdictions were using new voting equipment.
- Now that we have launched those programs, we are once again turning our attention to this research project.
- Let me introduce Tom O'Neil and Tim Vercellotti. They are here today to pick up where we left off, and to give us a brief overview of the research they conducted regarding voter identification.

#### **II. Karen Lynn-Dyson Testimony**

#### **III. Eagleton Testimony**

#### **IV. Commissioners Q&A**

#### **V. Chair Closes Eagleton Portion of Public Meeting**

- Obviously many questions have been raised today.
- Next step is for EAC to determine how to move forward.
- I request that Tom instruct staff to provide recommendations on how to proceed within the next 30 days.
- Once we determine how to move forward and what the final culmination of this initial research will be, we will notify everyone.
- Thank you Tom and Tim for your hard work and efforts in the study of this important topic.

## **Remarks for Thursday's Public Meeting**

In late May, 2005 this research contract awarded to The State University of New Jersey at Rutgers-- The Eagleton Institute of Politics using the Ohio State University Moritz School of Law, as its subcontractor.

The portion of the contract that was awarded related to the study and analysis of voter identification requirements was to :

- Collect and analyze state legislation, administrative procedures and court cases.
- Create a state-by-state compendium of the legislation, procedures, and litigation reviewed.
- Perform an analysis of how voter identification requirements were implemented around the country and to
- Recommend alternative approaches related to the future implementation of HAVA voter identification requirements. These recommendations were to be based on a literature review of research results, a review of data on voter identification and a diagnosis of the problems and challenges related to voter identification.

This contract was extended on two occasions to allow for additional review, including an EAC-initiated review conducted by an independently convened panel of experts who provided input to Eagleton on the first draft of its statistical analysis of voter identification requirements.

The Eagleton Institute of Politics submitted its draft report to the EAC on Best Practices to Improve Voter Identification Requirements on June 28, 2006. Findings from Eagleton's study of provisional voting (that was a part of Eagleton's overall study) were included in EAC's Best Practices on Provisional Voting, which were published by EAC in October 2005.

## **EAC Report on Voter Identification**

### **Executive Summary**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data, aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau, the contractor found the overall relationship between the stringency of ID requirements and turnout to be fairly small, but statistically significant.

Based on The Eagleton Institute year-long inquiry into voter identification requirements EAC will implement one or more of the following recommendations:

- Further research into the connection between voter ID requirements and the number of ballots cast and counted;
- A state-by-state review of the impact that voter ID requirements are having on voter's participation;
- A state-by-state review of the relationship between ballot access and ballot security and the number of voters whose ballot is counted;
- A state-by-state review of time periods between voters casting of provisional ballots and the time allowed to return with an ID as well as a review of acceptable forms of identification other than photo ID.

## Introduction

This study was conducted at a time in which considerable attention is being paid to the issue of voter identification. Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for multiple voting or voting by those who are not eligible. The goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. Opponents of stricter ID requirements seek to ensure broad access to a regular ballot. There is a fear that some voters -- racial and ethnic minorities, young and elderly voters-- lack convenient access to required ID documents, or that these voters may be fearful of submitting their ID documents for official scrutiny.

This report considers policy issues associated with the voter ID debate. It examines the relationships between voter ID requirements and voter turnout along with the various policy implications of the issue.

## Methodology of the Study

In May 2005, under contract with the EAC, the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University undertook a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. The contract also included research and study related to provisional voting requirements. These research findings were submitted and reviewed by the EAC as a separate study.

The Eagleton Institute of Politics gathered information on the voter identification requirements in 50 states and the District of Columbia for 2004. Based on interpretations of state statutes and supplemental information provided through conversations with state election officials, state ID requirements were divided into five categories, with each category of identification more rigorous than the one preceding: stating name, signing name, signature match, presenting an ID, and the most rigorous, presenting a government photo ID. The Eagleton Institute also categorized and identified each state according to maximum and minimum identification requirements. Maximum requirements refer to the most that voters may be asked to do or show at the polling place. Minimum requirements refer to the most that voters can be required to do or show in order to cast a regular ballot. These definitions and the subsequent state-by-state analysis of voter identification requirements omitted those cases in which a particular voter's eligibility might be questioned using a state's voter ballot challenge process.

Two data sets were used to apply the criteria (variables) that were developed above: aggregate voter turnout data at the county level which was gathered from the EAC's 2004 Election Day Survey and; reports of individual voters collected through the November 2004 Current Population Survey administered by the U.S. Census Bureau. Use of EAC

survey data and Census Bureau CPS data provided a way to cross-check the validity of the analysis and conclusions that would be drawn regarding the effect of voter ID requirements on voter turnout.

## **Study Oversight and Methodological Review**

A draft of the Eagleton Institute report and findings on voter identification requirements was critiqued by a peer review group convened by the Eagleton Institute. A second review of the study's research and statistical methodologies was conducted using a group of research and statistical experts independently convened by the EAC. Comments and insights of the peer review group members were taken into account in the drafting of a study report although there was not unanimous agreement among the individual reviewers regarding the study findings and recommendations.

## **Summary of the Research**

### **Maximum and Minimum Voter Identification Requirements**

In order to analyze what, if any, correlation may exist between a State's voter identification requirements and voter turnout, the Eagleton Institute first coded a state according to how demanding its voter ID requirement was. The voter ID requirement, ranked from lowest to highest was as follows: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification and, providing a form of photo identification. Several possible caveats to this ranking system were noted. For all states which had photo identification requirements in 2004, voters

without a photo ID were permitted to cast a regular ballot after signing an affidavit regarding his or her identity and eligibility. These voters were also allowed to provide other forms of ID. The researchers also noted that while each state may be assigned to a category, that categorization may not reflect the actual practice related to voter identification that may or may not have taken place at many polling places.

Research performed for this study by the Moritz College of Law found that states had five different types of **maximum** identification requirements in place on Election Day 2004. For the purposes of this study a requirement that called for a signed affidavit or the provision of other forms of ID was considered the most rigorous or the “maximum” requirement. At the polling place voters were asked to:

- State his or her name (10 states)
- Sign his or her name (13 states and the District of Columbia)
- Sign his or her name, which would be matched to a signature on file (seven states)
- Provide a form of identification that did not necessarily include a photo (15 states)
- Provide a photo identification (five states)

Using the same criteria, but applying them as **minimum** rather than maximum criteria for voting the research showed: **(check this section- it doesn't really make sense)**

- State his or her name (12 states)
- Sign his or her name (14 states and the District of Columbia)
- Matching the voter's signature to the signature on file (6 states)
- Provide a non-photo identification (14 states)
- Swear by an affidavit (4 states)

The results of the research are summarized in Table 1.

Election laws in several states offer exceptions to these ID requirements if potential voters lack the necessary form of identification. Laws in these states set a minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. In 2004 none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID were allowed to vote in all states, if he or she was able to meet another ID requirement.

### **The Relationship of Voter Identification Requirements to Voter Turnout**

A statistical analysis examining the variation in turnout rates based on the type of voter ID required by each state in the 2004 election was conducted using two sets of data: 1) aggregate turnout data at the county level for each state (compiled by the Eagleton Institute of Politics-**footnote about how they collected the data**) and 2) individual level survey data included in the November 2004 Current Population Survey (CPS), conducted by the U.S. Census Bureau.

The analysis looked at the voter identification requirements as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements were ranked according to how demanding they were judged to be, with photo identification considered to be the most demanding requirement (**what about affidavit????**). Used as discrete variable, the statistical analysis considered stating the name as the least demanding ID requirement; the other ID requirements were then compared to that requirement.

### **Aggregate-level statistical analysis**

The statistical analysis performed by the Eagleton Institute of Politics found that when averaging across counties in each state, statewide turnout is negatively correlated to maximum voter identification requirements ( $r = -.30$ ,  $p$  less than .05). When a statistical analysis is performed on the other minimum voter ID requirements (with affidavit being the most demanding requirement), the correlation between voter identification and turnout is negative, but not statistically significant ( $r = -.20$ ,  $p = .16$ ). These findings would suggest that the relationship between turnout rates and minimum requirements may not be linear.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend was found when analyzing minimum ID requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their name, compared to 60.1 percent in states that required an affidavit from voters. This analysis showed there was not a clear, consistent linear relationship between turnout and minimum identification requirements.

**(insert table 2- Variation in 2004 State Turnout Based on Voter Identification Requirements)**

### **Multivariate models of analysis using aggregate-level data**

The Eagleton Institute of Politics performed an additional analysis that would estimate the effects of voter identification requirements, that took into account the electoral context in 2004 and, the demographic characteristics of the population in each county. The model also considers such variables as whether or not the county was 1) in a presidential battleground state, 2) if the county was in a state with a competitive race for government and/or the U.S. Senate, 3) the percentage of voting-age population in each county that was Hispanic or African-American 4) the percentage of county residents age 65 and older, 5) the percent of county residents below the poverty line, and 6) the number of days between each state's registration deadline and the election.

The results of this statistical modeling and subsequent analysis indicated that the stricter voter ID requirements of matching a voter's signature to a signature on file or with presenting a non-photo identification are associated with lower voter turnout when compared to voter turnout in states that required voters to simply state his or her name. These conclusions were reached when variables 1-5 listed above were held constant.

Other results from the Eagleton Institute analysis of stricter voter identification requirements showed that:

- Increased voter turnout was associated with whether the county was in a battleground state or whether that state have a competitive race for governor and/or U.S.Senate.
- A slight negative effect on turnout was correlated with those state's with a longer time between the closing date for registration and the election.
- Voter turnout declined as the percentage of Hispanics in a county's population increased.
- Higher turnout (and a positive correlation) was associated with a higher percentage of senior citizens and household median income.
- The percentage of African-Americans in the county did not have a significant effect on turnout.

The Eagleton Institute analysis of minimum voter identification requirements showed that:

- A relationship between minimum voter ID requirements and turnout was not demonstrated.
- Battleground states and those with competitive state races had a significant and positive correlation to turnout.
- A higher percentage of senior citizens in the county and higher household median income were associated with higher turnout and showed a positive correlation to turnout.
- The percentage of Hispanics in the county was associated with reduced turnout.
- The increased number of days between the closing date for registration was associated with reduced turnout.

The analysis of these aggregate, county-level data showed a significant correlation, between maximum voter identification requirements (a signature match and non-photo

identification, but not a photo identification) and lower turnout in the 2004 election. This correlation was also significant when compared to the minimum voter ID requirement of the voter simply having to state his or her name.

### **Multivariate analysis using individual level turnout data**

This analysis which used November 2004 Current Population Survey data conducted by the U.S. Census Bureau is based on reports from self-described registered voters. Not included in the analysis are persons who said they are not registered to vote, those who said they cast absentee ballots and those who said they were not U.S. citizens. The CPS' Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. (**why is the N is Table 3-54,973?**)

In addition to the five maximum voter identification requirements (enumerated on page XX) the analysis performed included other socioeconomic, demographic and political factors that could have influenced turnout in the 2004 election. These independent variables were analyzed against the dependent variable of whether or not the respondent said he or she voted in the November 2004 election.

In this analysis three of the voter identification requirements were shown to have a statistically significant correlation with whether or not the survey respondents said they have voted in 2004. Lower voter turnout was associated with:

- those states with maximum voter requirements to sign one's name,
- those states with maximum voter requirements to provide a non-photo ID or photo ID, or
- those states with the minimum voter requirement to swear by an affidavit in order to cast a ballot without the state-required identification

Increased voter turnout showed:

- A significant correlation with the competitiveness of the Presidential race (**explain**).
- African-American voters were more likely than white or other voters to say they have voted.
- Income and marital status were positive predictors of voting (**high income or low income, single, married?**),
- Women were more likely to say they voted than men.
- Those ages 45 to 64 and 65 and older were more likely to say they voted than those ages 18 to 24.
- Those who earned a high school diploma, attended some college, graduated from college or attended graduate school were more likely to say they have voted than those who had not finished high school.

## **Analysis of the predicted probability of voter turnout using the individual data**

Using this Census Bureau Current Population Survey data the Eagleton Institute of Politics performed an additional statistical analysis in which they calculated the effect of various independent variables on the probability that a respondent said he or she voted. This analysis, involving 54,973 voters cross-tabulated the maximum and minimum voter identification requirements in each state with the five levels of voting requirements: stating name, signing name, matching the signature, a non-photo ID, photo-ID signing an affidavit. The results of these **Predicted Probability of Voter Turnout for all Voter** tabulations are summarized in Table 3 below:

From this analysis, the Eagleton Institute of Politics found that three of the voter identification requirements (**which ones?**) exerted a statistically significant, negative effect on whether or not the CPS survey respondents said they had voted in 2004. That is, compared to states that require voters to only state their name, those states which require the voter to sign his or her name, to provide a non-photo ID, or to provide a photo ID as a maximum requirement, were shown to have a negative influence on turnout. Also, a negative influence on turnout was found when comparing those states that require voters to only state their name, as compared to those states which have as a minimum requirement for verifying voter ID, signing an affidavit.

This probability analysis also found that the competitiveness of the presidential race had a significant effect on turnout as well as some significant demographic and educational effects. For the entire voting population signature, non-photo identification and photo identification requirements were all associated with lower turnout rates compared to the requirements that voter simply state their names. The analysis further found that:

- The predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names and that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to only having to state one's name.
- Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. African American and Asian-American voters were about 6 percent less likely, while white voters were about 2 percent less likely.
- Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, while they were 6.1

percent less likely to vote where non-photo identification was the minimum requirement.

- For those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in those states that required an affidavit as the minimum requirement. These percentages were arrived at when comparing these states to ones that use as a minimum or maximum requirement, the voter to merely state his or her name.

### **Conclusions from the statistical analysis**

The statistical analysis found that as voter identification requirements vary, so do voter turnout rates. These findings were borne out through analyses conducted on aggregate data and individual-level data. There were, however, some distinctions found depending upon whether or not the state's particular voter identification requirements were set as minimums or maximums.

- The overall relationship between voter identification requirements and turnout for all registered voters was found to be small but statistically significant.
- Using the aggregate data the signature match and the non-photo identification requirement correlated with lower turnout. The photo identification requirement did not have a statistically significant effect.
- In the individual-level data the signature, no-photo identification and photo identification requirement were all correlated with lower turnout when compared to the requirements that voter simply state their names.
- Across various demographic groups (African-Americans, Asian-Americans and Hispanics) a statistically significant relationship was found between the non-photo identification requirement and voter turnout

### **Caveats to the Analysis**

The Eagleton Institute for Politics and the EAC make note that while this analysis is a good beginning, significant questions remain regarding the relationship between voter identification requirements and turnout. These analyses are unable, for example, to capture how or why identification requirements might lower turnout. That is, is it because voters are aware of the identification requirements and stay away from the polls because of them? Alternatively, do the requirements result in some voters being turned away when they cannot provide the identification, or must cast a provisional ballot?

Knowing more about the “on the ground” experience of voters regarding various identification requirements will guide state and local level policy makers in their efforts to educate voters about the requirements. These experiences could also help instruct election judges on how to handle questions and possible disputes over voter identification requirements.

## **Public Policy and Administrative Considerations**

Voter Identification, often described as the critical step in protecting the integrity of the ballot, is a process which can ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot. A voting system that requires voters to produce an identification document or documents may prevent the ineligible from voting, but also may prevent the eligible from casting a ballot.

Evaluating the effect of different voter identification regimes can be most effective when based on clear legal, equitable and practical standards. The questions outlined below might point policymakers to standards that can be created around voter identification requirements.

1. Is the voter ID system designed on the basis of valid and reliable empirical studies that will address concerns regarding certain types of voting fraud?
2. Does the voter ID requirement comply with the letter and spirit of the Voting Rights Act?
3. How effective is the voter ID requirement on increasing the security of the ballot and can it be coordinated with the statewide voter registration database?
4. How feasible is the voter identification requirement? That is, are there administrative or budgetary considerations or concerns? How easy or difficult will it be for pollworkers who must administer the requirement?
5. How cost effective is the voter ID system? That is, what are the monetary and non-monetary costs to the voter and to the state for implementing the ID system?
6. If voter ID requirements are shown to reduce voter turnout (generally, or with some particular groups), what possible steps should be taken to ameliorate this problem?

## **Recommendations and Next Steps**

As the Federal agency charged with informing election officials and the public about various issues related to the administration of elections EAC believes it should, in its capacity as a supporter of elections research, undertake additional study into the topic of voter identification requirements and the implementation of them in the following ways:

- Longitudinal studies of jurisdictions that have changed voter identification requirements.

- State-by-state and precinct-level analyses that will examine the correlations between various voter identification requirements and voter registration and turnout
- Alternative forms and methods for verifying a voter's identity.
- Continuing research into the connection between various voter identification requirements and the number of ballots cast and counted
- A continuing state-by-state update on changes to voter identification requirements.
- Continued collection of state-by-state data which will help examine the impact that voter identification requirements are having on the number of voters who are casting provisional ballots because of voter identification verification issues.

DRAFT

## **EAC Statement on Future Study of Voter Identification Requirements**

### **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic which are detailed in the attached report.

### **EAC Recommendations for further study and next steps**

EAC finds this initial review of States' voter identification requirements, state laws and litigation surrounding the implementation of voter identification requirements an important beginning step in its consideration of voter identification requirements. From this study and compilation of data EAC considers it advisable to engage in a longer-term, systematic review of voter identification requirements and is recommending that at a minimum the agency engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements.
- A review and study of how voter identification requirements are implemented and how these practices may vary from state law and statute.

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into how voter identification requirements have had an impact over time on factors such as voter turnout and voter registration.

EAC believes that the findings from this initial study of voter identification requirements are helping inform additional studies it is conducting on a variety of related topics. The EAC study on first time voters who have registered to vote by mail and several forthcoming studies related to voter registration processes will provide necessary additional data to help inform discussions and debate related to ballot access and ballot security. The EAC also anticipates that follow-on study it does related to election crimes and various aspects of voting accessibility will also help inform and guide these ballot security and ballot access discussions.

Finally, EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout and voter registration figures;
- A research study which examines, in greater detail, the relationship between race and voter turnout, and race and methods for registering voters;
- Studies on the inter-relationship between various voter registration processes, voter turnout and number of election crimes reported or litigated;
- Publication of a series of case studies which detail a particular state's or jurisdiction's experiences with various voter identification and voter registration regimes;
- A policy paper or memorandum exploring the alternatives to current voter identification processes and regimes.

Subject Short introduction to the Eagleton Voter ID report

History

This message has been replied to

Chair-

Attached please find a draft of a very brief introduction that could accompany the Eagleton report on voter identification requirements.

I am out of the office for the next several days. However, when I return I will provide you with a list of possible questions the Commissioners may want to pose during the March public meeting.

Regards-

## EAC Statement on Future Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic which are detailed in the attached report.

### EAC Recommendations for further study and next steps

EAC finds this initial review of States' voter identification requirements, state laws and litigation surrounding the implementation of voter identification requirements an important beginning step in its consideration of voter identification requirements. From this study and compilation of data EAC considers it advisable to engage in a longer-term, systematic review of voter identification requirements and is recommending that at a minimum the agency engage on an ongoing basis in:

- A state-by-state review, reporting and tracking of voter identification requirements.
- A review and study of how voter identification requirements are implemented and how these practices may vary from state law and statute.

1,21232

From this ongoing review and tracking EAC can determine the feasibility and advisability of further research and study into how voter identification requirements have had an impact over time on factors such as voter turnout and voter registration.

EAC believes that the findings from this initial study of voter identification requirements are helping inform additional studies it is conducting on a variety of related topics. The EAC study on first time voters who have registered to vote by mail and several forthcoming studies related to voter registration processes will provide necessary additional data to help inform discussions and debate related to ballot access and ballot security. The EAC also anticipates that follow-on study it does related to election crimes and various aspects of voting accessibility will also help inform and guide these ballot security and ballot access discussions.

Finally, EAC is likely to consider implementing one or more of the following research studies that will serve to augment the work begun by the Eagleton Institute of Politics:

- A study of how certain voter identification provisions that have been in place for two or more Federal elections have had an impact on voter turnout and voter registration figures;
- A research study which examines, in greater detail, the relationship between race and voter turnout, and race and methods for registering voters;
- Studies on the inter-relationship between various voter registration processes, voter turnout and number of election crimes reported or litigated;
- Publication of a series of case studies which detail a particular state's or jurisdiction's experiences with various voter identification and voter registration regimes;
- A policy paper or memorandum exploring the alternatives to current voter identification processes and regimes.

Subject Draft EAC report on Voter Identification

History

This message has been forwarded

Chair Davidson and Tom-

You may recall that during your last Commissioner's meeting you requested that a draft of the EAC Voter ID report be ready by January 5. Attached please find the first draft of such a report that I have prepared, based on the Eagleton Voter ID report and study.

There are several points in the document where I raise questions about the data or Eagleton's findings from their analysis. Certainly, before we would publish this report, we would need Eagleton to review it and to verify that we have accurately represented their findings and conclusions.

Hopefully, this is a first good step towards publishing something on voter identification. I look forward to your suggestions for next steps.

## EAC Report on Voter Identification

### Executive Summary

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. HAVA Section 303 (b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC sought to examine how these voter identification requirements were implemented in the 2004 general elections and to prepare guidance for the states on this topic.

In May 2005 EAC entered into a contract with the Eagleton Institute of Politics at Rutgers, the State University of New Jersey and the Moritz College of Law at the Ohio State University to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the contractor was to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and recommend various policies that could be applied to these approaches.

The contractor also performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data, aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau, the contractor found the overall relationship between the stringency of ID requirements and turnout to be fairly small, but statistically significant.

Based on The Eagleton Institute year-long inquiry into voter identification requirements EAC will implement one or more of the following recommendations:

- Further research into the connection between voter ID requirements and the number of ballots cast and counted;
- A state-by-state review of the impact that voter ID requirements are having on voter's participation;
- A state-by-state review of the relationship between ballot access and ballot security and the number of voters whose ballot is counted;
- A state-by-state review of time periods between voters casting of provisional ballots and the time allowed to return with an ID as well as a review of acceptable forms of identification other than photo ID.

## **Introduction**

This study was conducted at a time in which considerable attention is being paid to the issue of voter identification. Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for multiple voting or voting by those who are not eligible. The goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. Opponents of stricter ID requirements seek to ensure broad access to a regular ballot. There is a fear that some voters -- racial and ethnic minorities, young and elderly voters-- lack convenient access to required ID documents, or that these voters may be fearful of submitting their ID documents for official scrutiny.

This report considers policy issues associated with the voter ID debate. It examines the relationships between voter ID requirements and voter turnout along with the various policy implications of the issue.

## **Methodology of the Study**

In May 2005, under contract with the EAC, the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University undertook a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. The contract also included research and study related to provisional voting requirements. These research findings were submitted and reviewed by the EAC as a separate study.

The Eagleton Institute of Politics gathered information on the voter identification requirements in 50 states and the District of Columbia for 2004. Based on interpretations of state statutes and supplemental information provided through conversations with state election officials, state ID requirements were divided into five categories, with each category of identification more rigorous than the one preceding: stating name, signing name, signature match, presenting an ID, and the most rigorous, presenting a government photo ID. The Eagleton Institute also categorized and identified each state according to maximum and minimum identification requirements. Maximum requirements refer to the most that voters may be asked to do or show at the polling place. Minimum requirements refer to the most that voters can be required to do or show in order to cast a regular ballot. These definitions and the subsequent state-by-state analysis of voter identification requirements omitted those cases in which a particular voter's eligibility might be questioned using a state's voter ballot challenge process.

Two data sets were used to apply the criteria (variables) that were developed above: aggregate voter turnout data at the county level which was gathered from the EAC's 2004 Election Day Survey and; reports of individual voters collected through the November 2004 Current Population Survey administered by the U.S. Census Bureau. Use of EAC

2027287

survey data and Census Bureau CPS data provided a way to cross-check the validity of the analysis and conclusions that would be drawn regarding the effect of voter ID requirements on voter turnout.

## **Study Oversight and Methodological Review**

A draft of the Eagleton Institute report and findings on voter identification requirements was critiqued by a peer review group convened by the Eagleton Institute. A second review of the study's research and statistical methodologies was conducted using a group of research and statistical experts independently convened by the EAC. Comments and insights of the peer review group members were taken into account in the drafting of a study report although there was not unanimous agreement among the individual reviewers regarding the study findings and recommendations.

## **Summary of the Research**

### **Maximum and Minimum Voter Identification Requirements**

In order to analyze what, if any, correlation may exist between a State's voter identification requirements and voter turnout, the Eagleton Institute first coded a state according to how demanding its voter ID requirement was. The voter ID requirement, ranked from lowest to highest was as follows: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification and, providing a form of photo identification. Several possible caveats to this ranking system were noted. For all states which had photo identification requirements in 2004, voters

without a photo ID were permitted to cast a regular ballot after signing an affidavit regarding his or her identity and eligibility. These voters were also allowed to provide other forms of ID. The researchers also noted that while each state may be assigned to a category, that categorization may not reflect the actual practice related to voter identification that may or may not have taken place at many polling places.

Research performed for this study by the Moritz College of Law found that states had five different types of **maximum** identification requirements in place on Election Day 2004. For the purposes of this study a requirement that called for a signed affidavit or the provision of other forms of ID was considered the most rigorous or the “maximum” requirement. At the polling place voters were asked to:

- State his or her name (10 states)
- Sign his or her name (13 states and the District of Columbia)
- Sign his or her name, which would be matched to a signature on file (seven states)
- Provide a form of identification that did not necessarily include a photo (15 states)
- Provide a photo identification (five states)

Using the same criteria, but applying them as **minimum** rather than maximum criteria for voting the research showed: **(check this section- it doesn't really make sense)**

- State his or her name (12 states)
- Sign his or her name (14 states and the District of Columbia)
- Matching the voter's signature to the signature on file (6 states)
- Provide a non-photo identification (14 states)
- Swear by an affidavit (4 states)

The results of the research are summarized in Table 1.

Election laws in several states offer exceptions to these ID requirements if potential voters lack the necessary form of identification. Laws in these states set a minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. In 2004 none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID were allowed to vote in all states, if he or she was able to meet another ID requirement.

### **The Relationship of Voter Identification Requirements to Voter Turnout**

A statistical analysis examining the variation in turnout rates based on the type of voter ID required by each state in the 2004 election was conducted using two sets of data: 1) aggregate turnout data at the county level for each state (compiled by the Eagleton Institute of Politics-**footnote about how they collected the data**) and 2) individual level survey data included in the November 2004 Current Population Survey (CPS), conducted by the U.S. Census Bureau.

4027289

The analysis looked at the voter identification requirements as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements were ranked according to how demanding they were judged to be, with photo identification considered to be the most demanding requirement (**what about affidavit?????**). Used as discrete variable, the statistical analysis considered stating the name as the least demanding ID requirement; the other ID requirements were then compared to that requirement.

### **Aggregate-level statistical analysis**

The statistical analysis performed by the Eagleton Institute of Politics found that when averaging across counties in each state, statewide turnout is negatively correlated to maximum voter identification requirements ( $r = -.30$ ,  $p$  less than .05). When a statistical analysis is performed on the other minimum voter ID requirements (with affidavit being the most demanding requirement), the correlation between voter identification and turnout is negative, but not statistically significant ( $r = -.20$ ,  $p = .16$ ). These findings would suggest that the relationship between turnout rates and minimum requirements may not be linear.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend was found when analyzing minimum ID requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their name, compared to 60.1 percent in states that required an affidavit from voters. This analysis showed there was not a clear, consistent linear relationship between turnout and minimum identification requirements.

**(insert table 2- Variation in 2004 State Turnout Based on Voter Identification Requirements)**

### **Multivariate models of analysis using aggregate-level data**

The Eagleton Institute of Politics performed an additional analysis that would estimate the effects of voter identification requirements, that took into account the electoral context in 2004 and, the demographic characteristics of the population in each county. The model also considers such variables as whether or not the county was 1) in a presidential battleground state, 2) if the county was in a state with a competitive race for government and/or the U.S. Senate, 3) the percentage of voting-age population in each county that was Hispanic or African-American 4) the percentage of county residents age 65 and older, 5) the percent of county residents below the poverty line, and 6) the number of days between each state's registration deadline and the election.

The results of this statistical modeling and subsequent analysis indicated that the stricter voter ID requirements of matching a voter's signature to a signature on file or with presenting a non-photo identification are associated with lower voter turnout when compared to voter turnout in states that required voters to simply state his or her name. These conclusions were reached when variables 1-5 listed above were held constant.

Other results from the Eagleton Institute analysis of stricter voter identification requirements showed that:

- Increased voter turnout was associated with whether the county was in a battleground state or whether that state have a competitive race for governor and/or U.S.Senate.
- A slight negative effect on turnout was correlated with those state's with a longer time between the closing date for registration and the election.
- Voter turnout declined as the percentage of Hispanics in a county's population increased.
- Higher turnout (and a positive correlation) was associated with a higher percentage of senior citizens and household median income.
- The percentage of African-Americans in the county did not have a significant effect on turnout.

The Eagleton Institute analysis of minimum voter identification requirements showed that:

- A relationship between minimum voter ID requirements and turnout was not demonstrated.
- Battleground states and those with competitive state races had a significant and positive correlation to turnout.
- A higher percentage of senior citizens in the county and higher household median income were associated with higher turnout and showed a positive correlation to turnout.
- The percentage of Hispanics in the county was associated with reduced turnout.
- The increased number of days between the closing date for registration was associated with reduced turnout.

The analysis of these aggregate, county-level data showed a significant correlation, between maximum voter identification requirements (a signature match and non-photo

identification, but not a photo identification) and lower turnout in the 2004 election. This correlation was also significant when compared to the minimum voter ID requirement of the voter simply having to state his or her name.

### **Multivariate analysis using individual level turnout data**

This analysis which used November 2004 Current Population Survey data conducted by the U.S. Census Bureau is based on reports from self-described registered voters. Not included in the analysis are persons who said they are not registered to vote, those who said they cast absentee ballots and those who said they were not U.S. citizens. The CPS' Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents. **( why is the N is Table 3 54,973?)**

In addition to the five maximum voter identification requirements (enumerated on page XX) the analysis performed included other socioeconomic, demographic and political factors that could have influenced turnout in the 2004 election. These independent variables were analyzed against the dependent variable of whether or not the respondent said he or she voted in the November 2004 election.

In this analysis three of the voter identification requirements were shown to have a statistically significant correlation with whether or not the survey respondents said they have voted in 2004. Lower voter turnout was associated with:

- those states with maximum voter requirements to sign one's name,
- those states with maximum voter requirements to provide a non-photo ID or photo ID, or
- those states with the minimum voter requirement to swear by an affidavit in order to cast a ballot without the state-required identification

Increased voter turnout showed:

- A significant correlation with the competitiveness of the Presidential race **(explain)**.
- African-American voters were more likely than white or other voters to say they have voted.
- Income and marital status were positive predictors of voting **(high income or low income, single, married?)**,
- Women were more likely to say they voted than men.
- Those ages 45 to 64 and 65 and older were more likely to say they voted than those ages 18 to 24.
- Those who earned a high school diploma, attended some college, graduated from college or attended graduate school were more likely to say they have voted than those who had not finished high school.

## **Analysis of the predicted probability of voter turnout using the individual data**

Using this Census Bureau Current Population Survey data the Eagleton Institute of Politics performed an additional statistical analysis in which they calculated the effect of various independent variables on the probability that a respondent said he or she voted. This analysis, involving 54,973 voters cross-tabulated the maximum and minimum voter identification requirements in each state with the five levels of voting requirements: stating name, signing name, matching the signature, a non-photo ID, photo-ID signing an affidavit. The results of these **Predicted Probability of Voter Turnout for all Voter** tabulations are summarized in Table 3 below:

From this analysis, the Eagleton Institute of Politics found that three of the voter identification requirements (**which ones?**) exerted a statistically significant, negative effect on whether or not the CPS survey respondents said they had voted in 2004. That is, compared to states that require voters to only state their name, those states which require the voter to sign his or her name, to provide a non-photo ID, or to provide a photo ID as a maximum requirement, were shown to have a negative influence on turnout. Also, a negative influence on turnout was found when comparing those states that require voters to only state their name, as compared to those states which have as a minimum requirement for verifying voter ID, signing an affidavit.

This probability analysis also found that the competitiveness of the presidential race had a significant effect on turnout as well as some significant demographic and educational effects. For the entire voting population signature, non-photo identification and photo identification requirements were all associated with lower turnout rates compared to the requirements that voter simply state their names. The analysis further found that:

- The predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names and that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to only having to state one's name.
- Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. African American and Asian-American voters were about 6 percent less likely, while white voters were about 2 percent less likely.
- Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, while they were 6.1

percent less likely to vote where non-photo identification was the minimum requirement.

- For those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in those states that required an affidavit as the minimum requirement. These percentages were arrived at when comparing these states to ones that use as a minimum or maximum requirement, the voter to merely state his or her name.

### **Conclusions from the statistical analysis**

The statistical analysis found that as voter identification requirements vary, so do voter turnout rates. These findings were borne out through analyses conducted on aggregate data and individual-level data. There were, however, some distinctions found depending upon whether or not the state's particular voter identification requirements were set as minimums or maximums.

- The overall relationship between voter identification requirements and turnout for all registered voters was found to be small but statistically significant.
- Using the aggregate data the signature match and the non-photo identification requirement correlated with lower turnout. The photo identification requirement did not have a statistically significant effect.
- In the individual-level data the signature, no-photo identification and photo identification requirement were all correlated with lower turnout when compared to the requirements that voter simply state their names.
- Across various demographic groups (African-Americans, Asian-Americans and Hispanics) a statistically significant relationship was found between the non-photo identification requirement and voter turnout

### **Caveats to the Analysis**

The Eagleton Institute for Politics and the EAC make note that while this analysis is a good beginning, significant questions remain regarding the relationship between voter identification requirements and turnout. These analyses are unable, for example, to capture how or why identification requirements might lower turnout. That is, is it because voters are aware of the identification requirements and stay away from the polls because of them? Alternatively, do the requirements result in some voters being turned away when they cannot provide the identification, or must cast a provisional ballot?

Knowing more about the “on the ground” experience of voters regarding various identification requirements will guide state and local level policy makers in their efforts to educate voters about the requirements. These experiences could also help instruct election judges on how to handle questions and possible disputes over voter identification requirements.

## **Public Policy and Administrative Considerations**

Voter Identification, often described as the critical step in protecting the integrity of the ballot, is a process which can ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot. A voting system that requires voters to produce an identification document or documents may prevent the ineligible from voting, but also may prevent the eligible from casting a ballot.

Evaluating the effect of different voter identification regimes can be most effective when based on clear legal, equitable and practical standards. The questions outlined below might point policymakers to standards that can be created around voter identification requirements.

1. Is the voter ID system designed on the basis of valid and reliable empirical studies the will address concerns regarding certain types of voting fraud?
2. Does the voter ID requirement comply with the letter and spirit of the Voting Rights Act?
3. How effective is the voter ID requirement on increasing the security of the ballot and can it be coordinated with the statewide voter registration database?
4. How feasible is the voter identification requirement? That is, are there administrative or budgetary considerations or concerns? How easy or difficult will it be for pollworkers who must administer the requirement?
5. How cost effective is the voter ID system? That is, what are the monetary and non-monetary costs to the voter and to the state for implementing the ID system?
6. If voter ID requirements are shown to reduce voter turnout (generally, or with some particular groups), what possible steps should be taken to ameliorate this problem?

## **Recommendations and Next Steps**

As the Federal agency charged with informing election officials and the public about various issues related to the administration of elections EAC believes it should, in its capacity as a supporter of elections research, undertake additional study into the topic of voter identification requirements and the implementation of them in the following ways:

- Longitudinal studies of jurisdictions that have changed voter identification requirements.

- State-by-state and precinct-level analyses that will examine the correlations between various voter identification requirements and voter registration and turnout
- Alternative forms and methods for verifying a voter's identity.
- Continuing research into the connection between various voter identification requirements and the number of ballots cast and counted
- A continuing state-by-state update on changes to voter identification requirements.
- Continued collection of state-by-state data which will help examine the impact that voter identification requirements are having on the number of voters who are casting provisional ballots because of voter identification verification issues.

Subject Draft EAC report on Voter Identification

Chair Davidson and Tom-

You may recall that during your last Commissioner's meeting you requested that a draft of the EAC Voter ID report be ready by January 5. Attached please find the first draft of such a report that I have prepared, based on the Eagleton Voter ID report and study.

There are several points in the document where I raise questions about the data or Eagleton's findings from their analysis. Certainly, before we would publish this report, we would need Eagleton to review it and to verify that we have accurately represented their findings and conclusions.

Hopefully, this is a first good step towards publishing something on voter identification. I look forward to your suggestions for next steps.

Subject Supreme Court Order on AZ issue

All,

FYI

Below please find a link to the supreme court's decision in the AZ matter. The decision overturns the Ninth Circuit's interlocutory injunction of proposition 200... the decision does not discuss the merits of the case. The court was very insistent on this point:

*"We underscore that we express no opinion here on the correct disposition, after full briefing and argument, of the appeals from the District Court's September 11 order or on the ultimate resolution of these cases. As we have noted, the facts in these cases are hotly contested, and "[n]o bright line separates permissible election-related regulation from unconstitutional infringements." Timmons v. Twin Cities Area New Party, 520 U. S. 351, 359 (1997). Given the imminence of the election and the inadequate time to resolve the factual disputes, our action today shall of necessity allow the election to proceed without an injunction suspending the voter identification rules."*

**SUPREME COURT OF THE UNITED STATES**

HELEN PURCELL, MARICOPA COUNTY RECORDER,

ET AL.

06A375 (06-532)

*v.*

MARIA M. GONZALEZ ET AL.

ARIZONA ET AL.

06A379 (06-533)

*v.*

MARIA M. GONZALEZ ET AL.

ON APPLICATIONS FOR STAY

Nos. 06A375 (06-532) and 06A379 (06-533). Decided October 20, 2006

PER CURIAM.

The State of Arizona and county officials from four of its counties seek relief from an interlocutory injunction entered by a two-judge motions panel of the Court of Appeals for the Ninth Circuit. JUSTICE KENNEDY has referred the applicants' filings to the Court. We construe the filings of the State and the county officials as petitions for certiorari; we grant the petitions; and we vacate the order of the Court of Appeals.

I

In 2004, Arizona voters approved Proposition 200. The measure sought to combat voter fraud by requiring voters to present proof of citizenship when they register to vote and to present identification when they vote on election day.

The election procedures implemented to effect Proposition 200 do not necessarily result in the turning away of qualified, registered voters by election officials for lack of proper identification. A voter who arrives at the polls on election day without identification may cast a conditional provisional ballot. For that ballot to be counted, the voter

027300

Per Curiam

is allowed five business days to return to a designated site and present proper identification. In addition any voter who knows he or she cannot secure identification within five business days of the election has the option to vote before election day during the early voting period. The State has determined that, because there is adequate time during the early voting period to compare the voters' signatures on the ballot with their signatures on the registration rolls, voters need not present identification if voting early.

Arizona is a covered jurisdiction under §5 of the Voting Rights Act of 1965. So it was required to preclear any new voting "standard, practice, or procedure" with either the United States Attorney General or the District Court for the District of Columbia to ensure its new voting policy did "not have the purpose [or] effect of denying or abridging the right to vote on account of race or color," 42 U. S. C. §1973c. See *Georgia v. Ashcroft*, 539 U. S. 461, 461-462 (2003). On May 6, 2005, the United States Attorney General precleared the procedures Arizona adopted under Proposition 200.

In the District Court the plaintiffs in this action are residents of Arizona; Indian tribes; and various community organizations. In May 2006, these plaintiffs brought suit challenging Proposition 200's identification requirements. On September 11, 2006, the District Court denied their request for a preliminary injunction, but it did not at that time issue findings of fact or conclusions of law. These findings were important because resolution of legal questions in the Court of Appeals required evaluation of underlying factual issues.

The plaintiffs appealed the denial, and the Clerk of the Court of Appeals set a briefing schedule that concluded on November 21, two weeks after the upcoming November 7 election. The plaintiffs then requested an injunction pending appeal from the Court of Appeals. Pursuant to

Per Curiam

the Court of Appeals' rules, the request for an injunction was assigned to a two-judge motions/screening panel. See Rule 3-3 (CA9 2002). On October 5, after receiving lengthy written responses from the State and the county officials but without oral argument, the panel issued a four-sentence order enjoining Arizona from enforcing Proposition 200's provisions pending disposition, after full briefing, of the appeals of the denial of a preliminary injunction. The Court of Appeals offered no explanation or justification for its order. Four days later, the court denied a motion for reconsideration. The order denying the motion likewise gave no rationale for the court's decision.

Despite the time-sensitive nature of the proceedings and the pendency of a request for emergency relief in the Court of Appeals, the District Court did not issue its findings of fact and conclusions of law until October 12. It then concluded that "plaintiffs have shown a possibility of success on the merits of some of their arguments but the Court cannot say that at this stage they have shown a strong likelihood." Order in NO. CV 06-1268-PHX-ROS etc. (D. Ariz., Oct. 11, 2006), pp. 7-8, App. to Application for Stay of Injunction, Tab 5 (internal quotation marks and alterations omitted). The District Court then found the balance of the harms and the public interest counseled in favor of denying the injunction.

## II

"A State indisputably has a compelling interest in preserving the integrity of its election process." *Eu v. San Francisco County Democratic Central Comm.*, 489 U. S. 214, 231 (1989). Confidence in the integrity of our electoral processes is essential to the functioning of our participatory democracy. Voter fraud drives honest citizens out of the democratic process and breeds distrust of our government. Voters who fear their legitimate votes will be outweighed by fraudulent ones will feel disenfranchised.

## Per Curiam

“[T]he right of suffrage can be denied by a debasement or dilution of the weight of a citizen’s vote just as effectively as by wholly prohibiting the free exercise of the franchise.” *Reynolds v. Sims*, 377 U. S. 533, 555 (1964). Countering the State’s compelling interest in preventing voter fraud is the plaintiffs’ strong interest in exercising the “fundamental political right” to vote. *Dunn v. Blumstein*, 405 U. S. 330, 336 (1972) (internal quotation marks omitted). Although the likely effects of Proposition 200 are much debated, the possibility that qualified voters might be turned away from the polls would caution any district judge to give careful consideration to the plaintiffs’ challenges.

Faced with an application to enjoin operation of voter identification procedures just weeks before an election, the Court of Appeals was required to weigh, in addition to the harms attendant upon issuance or nonissuance of an injunction, considerations specific to election cases and its own institutional procedures. Court orders affecting elections, especially conflicting orders, can themselves result in voter confusion and consequent incentive to remain away from the polls. As an election draws closer, that risk will increase. So the Court of Appeals may have deemed this consideration to be grounds for prompt action. Furthermore, it might have given some weight to the possibility that the nonprevailing parties would want to seek en banc review. In the Ninth Circuit that procedure, involving voting by all active judges and an en banc hearing by a court of 15, can consume further valuable time. These considerations, however, cannot be controlling here. It was still necessary, as a procedural matter, for the Court of Appeals to give deference to the discretion of the District Court. We find no indication that it did so, and we conclude this was error.

Although at the time the Court of Appeals issued its order the District Court had not yet made factual findings

STEVENS, J., concurring

to which the Court of Appeals owed deference, see Fed. Rule Civ. Proc. 52(a), by failing to provide any factual findings or indeed any reasoning of its own the Court of Appeals left this Court in the position of evaluating the Court of Appeals' bare order in light of the District Court's ultimate findings. There has been no explanation given by the Court of Appeals showing the ruling and findings of the District Court to be incorrect. In view of the impending election, the necessity for clear guidance to the State of Arizona, and our conclusion regarding the Court of Appeals' issuance of the order we vacate the order of the Court of Appeals.

We underscore that we express no opinion here on the correct disposition, after full briefing and argument, of the appeals from the District Court's September 11 order or on the ultimate resolution of these cases. As we have noted, the facts in these cases are hotly contested, and "[n]o bright line separates permissible election-related regulation from unconstitutional infringements." *Timmons v. Twin Cities Area New Party*, 520 U. S. 351, 359 (1997). Given the imminence of the election and the inadequate time to resolve the factual disputes, our action today shall of necessity allow the election to proceed without an injunction suspending the voter identification rules.

The order of the Court of Appeals is vacated, and the cases are remanded for further proceedings consistent with this opinion. Pursuant to this Court's Rule 45.3, the Clerk is directed to issue the judgment in these cases forthwith.

*It is so ordered.*

JUSTICE STEVENS, concurring.

Allowing the election to proceed without enjoining the statutory provisions at issue will provide the courts with a better record on which to judge their constitutionality. At least two important factual issues remain largely unre-

STEVENS, J., concurring

solved: the scope of the disenfranchisement that the novel identification requirements will produce, and the prevalence and character of the fraudulent practices that allegedly justify those requirements. Given the importance of the constitutional issues, the Court wisely takes action that will enhance the likelihood that they will be resolved correctly on the basis of historical facts rather than speculation.

## Appendix A Summary of Voter Identification Requirements By State

Prepared by  
Sara A. Sampson, Reference Librarian,  
The Ohio State University Moritz College of Law.

### Voter ID Requirements

State	Forms of ID Required 2004	Statutory Language	Statutory Citation
Alabama	Provide ID	<p>(b) Each elector shall provide identification to an appropriate election official prior to voting. A voter required to show identification when voting in person shall present to the appropriate election official either of the following forms of identification:</p> <p>(1) A current valid photo identification.  (2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. The term "other government document" may include, but is not limited to, any of the following:</p> <p>a. A valid identification card issued by a branch, department, agency, or entity of the State of Alabama, any other state, or the United States authorized by law to issue personal identification.  b. A valid United States passport.  c. A valid Alabama hunting or fishing license.  d. A valid Alabama permit to carry a pistol or revolver.  e. A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States.  f. A valid United States military identification card.  g. A certified copy of the elector's birth certificate.  h. A valid Social Security card.  i. Certified naturalization documentation.  j. A certified copy of court records showing adoption or name change.  k. A valid Medicaid card, Medicare card, or an Electronic Benefits Transfer Card (formerly referred to as a "food stamp card").</p> <p>(c) For voters required to show identification when voting by mail, the voter shall submit with the ballot a copy of one of the forms of identification listed in subsection (b).  (e) An individual required to present identification in accordance with this section who is unable to meet the identification requirements of this section shall be permitted to vote by a challenged or provisional ballot, as provided for by law.</p> <p>(f) In addition, an individual who does not have identification in his or her possession at the polls shall be permitted to vote if the individual is positively identified by two election officials as a voter on the poll list who is eligible to vote and the election official signs the voters list by where the voter signs.</p> <p>Effective Date: June 24, 2003</p>	Ala. Code § 17-11A-1
Alaska	Provide ID	<p>(a) Before being allowed to vote, each voter shall exhibit to an election official one form of identification, including</p> <p>(1) an official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, or hunting or fishing license; or</p> <p>(2) an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document; an item exhibited under this</p>	Alaska Stat. § 15.15.225

		<p>paragraph must show the name and current address of the voter.</p> <p>(b) An election official may waive the identification requirement if the election official knows the identity of the voter. The identification requirement may not be waived for voters who are first-time voters who initially registered by mail or by facsimile or other electronic transmission approved by the director under <u>AS 15.07.050</u>, and did not provide identification as required in <u>AS 15.07.060</u>.</p> <p>(c) A voter who cannot exhibit a required form of identification shall be allowed to vote a questioned ballot.</p> <p>effective June 17, 2003</p>	
Arizona	Provide ID	<p>B. If a statewide voter registration database is not yet operational, for any person who has registered to vote by mail for the first time in this state after January 1, 2003 or who is reregistering by mail after January 1, 2003 after moving from one county to another county in this state, the person shall comply with the following in order to be issued a ballot:</p> <p>1. The person shall present either one of the following:</p> <p>(a) A current form of identification that bears a photograph of the person and the name of the person.</p> <p>(b) A current utility bill, bank statement, paycheck, government issued check or other government document that shows the name and registration address of the person.</p> <p>2. If the person does not present a document that complies with paragraph 1, the person is only eligible to vote a provisional ballot as prescribed by <u>§ 16-584</u>.</p> <p>Effective Dec. 1, 2003</p>	Ariz. Rev. Stat. Ann. § 16-579
Arkansas	Provide ID	<p>7-5-305. Requirements.</p> <p>(a) Before a person is permitted to vote, the election official shall:</p> <p>(1) Request the voter to identify himself in order to verify the existence of his name on the precinct voter registration list;</p> <p>(2) Request the voter, in the presence of the election official, to state his address and state or confirm his date of birth;</p> <p>(3) Determine that the voter's date of birth and address are the same as those on the precinct voter registration list;</p> <p>(4) If the date of birth given by the voter is not the same as that on the precinct voter registration list, request the voter to provide identification as the election official deems appropriate;</p> <p>(5)(A) If the voter's address is not the same as that on the precinct voter registration list, verify with the county clerk that the address is within the precinct.</p> <p>(B) If the address is within the precinct, request the voter to complete a voter registration application form for the purpose of updating county voter registration record files.</p> <p>(C) If the address is not within the precinct, instruct the voter to contact the county clerk's office to determine the proper precinct;</p> <p>(6) If the voter's name is not the same as that on the precinct voter registration list, request the voter to complete a voter registration application form for purposes of updating county voter registration record files;</p> <p>(7) Request the voter, in the presence of the election official, to sign his name, including his given name, his middle name or initial, if any, and his last name in the space provided on the precinct voter registration list. If a person is unable to sign his signature or make his mark or cross, the election official shall enter his initials and the voter's date of birth in the space for the person's signature on the precinct voter registration list; and</p>	Arkansas Code Annotated § 7-5-305

		<p>(8)(A) Request the voter for purposes of identification to provide a valid driver's license, photo identification card issued by a governmental agency, voter card, social security card, birth certificate, United States passport, employee identification card issued by a governmental agency containing a photograph, employee identification card issued in the normal course of business of the employer, student identification card, Arkansas hunting license, or United States military identification card.</p> <p>(B)(i) If a voter is unable to provide this identification, the election official shall indicate on the precinct voter registration list that the voter did not provide identification.</p> <p>(ii) Following each election, the county board of election commissioners may review the precinct voter registration lists and may provide the information of the voters not providing identification at the polls to the prosecuting attorney.</p> <p>(iii) The prosecuting attorney may investigate possible voter fraud; and</p> <p>(9) Follow the procedures under §§ 7-5-310, 7-5-311, and 7-5-523, if the person is a disabled voter and presents himself or herself to vote.</p> <p>Effective: July 16, 2003</p>	
California	Sign Name	<p>Any person desiring to vote shall announce his or her name and address in an audible tone of voice, and when one of the precinct officers finds the name in the index, the officer shall in a like manner repeat the name and address. The voter shall then write his or her name and residence address or, if the voter is unable to write, shall have the name and residence address written by another person on a roster of voters provided for that purpose, whereupon a challenge may be interposed as provided in this article.</p> <p>(Enacted in 1994, no amendments since)</p>	Cal. Elec. Code § 14216
Colorado	Provide ID	<p>(1) Except as provided in subsection (4) of this section, any eligible elector desiring to vote shall show his or her identification as defined in <u>section 1-1-104(19.5)</u>, write his or her name and address on the signature card, and give the signature card to one of the election judges, * * *</p> <p>(4) An eligible elector who is unable to produce identification may cast a provisional ballot in accordance with article 8.5 of this title.</p> <p>(19.5)(a) "Identification" means:</p> <p>(I) A valid Colorado driver's license;</p> <p>(II) A valid identification card issued by the department of revenue in accordance with the requirements of part 3 of article 2 of title 42, C.R.S.;</p> <p>(III) A valid United States passport;</p> <p>(IV) A valid employee identification card with a photograph of the eligible elector issued by any branch, department, agency, or entity of the United States government or of this state, or by any county, municipality, board, authority, or other political subdivision of this state;</p> <p>(V) A valid pilot's license issued by the federal aviation administration or other authorized agency of the United States;</p> <p>(VI) A valid United States military identification card with a photograph of the eligible elector;</p> <p>(VII) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the elector;</p> <p>(VIII) A valid medicare or medicaid card issued by the United States health care</p>	Colo. Connecticut	Provide ID	<p>(a) In each primary, election or referendum, when an elector has entered the polling place, the elector shall announce the elector's street address, if any, and the elector's name to the checkers in a tone sufficiently loud and clear as to enable all the election officials present to hear the same. Each elector who registered to vote by mail for the first time on or after January 1, 2003, and has a "mark" next to the elector's name on the official registry list, as required by <u>section 9-23r</u>, shall present to the checkers, before the elector votes, either a current and valid photo identification that shows the elector's name and address or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the elector. Each other elector shall (1) present to the checkers the elector's Social Security card or any other preprinted form of identification which shows the elector's name and either the elector's address, signature or photograph, or (2) on a form prescribed by the Secretary of the State, write the elector's residential address and date of birth, print the elector's name and sign a statement under penalty of false statement that the elector is the elector whose name appears on the official checklist. Such form shall clearly state the penalty of false statement. A separate such form shall be used for each elector. If the elector presents a preprinted form of identification under subdivision (1) of this subsection, the checkers shall check the name of such elector on the official checklist. If the elector completes the form under subdivision (2) of this subsection, the assistant registrar of voters shall examine the information on such form and either instruct the checkers to check the name of such elector on the official checklist or notify the elector that the form is incomplete or inaccurate.</p> <p>Effective May 10., 2004</p>	Conn. Gen. Stat. Ann. § 9-261
Delaware	Provide ID	<p>(a) A voter, upon entering the room where an election is being held, shall announce his or her name and address and provide proof of identity, whereupon the clerks shall place a mark or make a notation of his or her name upon the election district record. In the event the voter does not have proof of identity with them, he or she shall sign an affidavit of affirmation that he or she is the person listed on the election district record.</p> <p>Effective: July 9, 2002</p>	15 Del. Code § 4937
D.C.	Sign Name	<p>(i)(1) A person shall be entitled to vote in an election in the District of Columbia if he or she is a duly registered voter. A qualified elector shall be considered duly registered in the District if he or she has met the requirements for voter registration and, on the day of the election, either resides at the address listed on the Board's records or files an election day change of address pursuant to this subsection.</p> <p>(2) Each registered voter who changes his or her place of residence from that listed on the Board's records shall notify the Board, in writing, of the new residence address. A change of address shall be effective on the date the notification was mailed as shown by the United States Postal Service postmark. If not postmarked, the notification shall be effective on the date of receipt by the Board. Change of address notifications from registrants shall be accepted pursuant to subsection (g) of this section, except that any registrant who has not notified the Board of his or her current residence address by the deadline established by subsection (g) of this section may be permitted to vote at the</p>	D.C. Code § 1-1001.07

		<p>polling place that serves the current residence address by filing an election day change of address notice pursuant to paragraph (4) of this subsection.</p> <p>(3) Each registered voter who votes at a polling place on election day shall affirm his or her residence address as it appears on the official registration roll for the precinct. The act of signing a copy of the official registration roll for the precinct shall be deemed affirmation of the voter's address as it appears on the Board's registration records.</p> <p>(Effective April 3, 2001)(not added as part of 2005 amendment)</p>	
Florida	Photo ID	<p>101.043 (1) The precinct register, as prescribed in <u>s. 98.461</u>, shall be used at the polls in lieu of the registration books for the purpose of identifying the elector at the polls prior to allowing him or her to vote. The clerk or inspector shall require each elector, upon entering the polling place, to present a current and valid picture identification as provided in <u>s. 97.0535(3)(a)</u>. If the picture identification does not contain the signature of the voter, an additional identification that provides the voter's signature shall be required. The elector shall sign his or her name in the space provided, and the clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.</p> <p>(2) Except as provided in subsection (3), if the elector fails to furnish the required identification, or if the clerk or inspector is in doubt as to the identity of the elector, such clerk or inspector shall follow the procedure prescribed in <u>s. 101.49</u>.</p> <p><b>97.0535 (3)(a)</b> The following forms of identification shall be considered current and valid if they contain the name and photograph of the applicant and have not expired:</p> <ol style="list-style-type: none"> <li>1. Idaho	Sign Name	<p>(1) An elector desiring to vote shall state his name and address to the judge or clerk in charge of the combination election record and poll book.</p> <p>(2) Before receiving his ballot, each elector shall sign his name in the combination election record and poll book following his name therein.</p> <p>(5) The elector shall then be given the appropriate ballots which have been stamped with the official election stamp and shall be given folding instructions for such ballots.</p> <p>(Last amended in 1972)</p>	Id. St. §34-1106
Illinois	Give Name	<p>Any person desiring to vote shall give his name and, if required to do so, his residence to the judges of election, one of whom shall thereupon announce the same in a loud and distinct tone of voice, clear, and audible; the judges of elections shall check each application for ballot against the list of voters registered in that precinct to whom absentee or early ballots have been issued for that election, which shall be provided by the election authority and which list shall be available for inspection by pollwatchers. A voter applying to vote in the precinct on election day whose name appears on the list as having been issued an absentee or early ballot shall not be permitted to vote in the precinct. All applicable provisions of Articles 4, 5 or 6 shall be complied with and if such name is found on the register of voters by the officer having charge thereof, he</p>	10 Ill. Comp. Stat. 5/17-9

		<p>shall likewise repeat said name, and the voter shall be allowed to enter within the proximity of the voting booths, as above provided. One of the judges shall give the voter one, and only one of each ballot to be voted at the election, on the back of which ballots such judge shall indorse his initials in such manner that they may be seen when each such ballot is properly folded, and the voter's name shall be immediately checked on the register list. In those election jurisdictions where perforated ballot cards are utilized of the type on which write-in votes can be cast above the perforation, the election authority shall provide a space both above and below the perforation for the judge's initials, and the judge shall endorse his or her initials in both spaces. Whenever a proposal for a constitutional amendment or for the calling of a constitutional convention is to be voted upon at the election, the separate blue ballot or ballots pertaining thereto shall, when being handed to the voter, be placed on top of the other ballots to be voted at the election in such manner that the legend appearing on the back thereof, as prescribed in Section 16-6 of this Act, shall be plainly visible to the voter. At all elections, when a registry may be required, if the name of any person so desiring to vote at such election is not found on the register of voters, he or she shall not receive a ballot until he or she shall have complied with the law prescribing the manner and conditions of voting by unregistered voters. If any person desiring to vote at any election shall be challenged, he or she shall not receive a ballot until he or she shall have established his right to vote in the manner provided hereinafter; and if he or she shall be challenged after he has received his ballot, he shall not be permitted to vote until he or she has fully complied with such requirements of the law upon being challenged. Besides the election officer, not more than 2 voters in excess of the whole number of voting booths provided shall be allowed within the proximity of the voting booths at one time. The provisions of this Act, so far as they require the registration of voters as a condition to their being allowed to vote shall not apply to persons otherwise entitled to vote, who are, at the time of the election, or at any time within 60 days prior to such election have been engaged in the military or naval service of the United States, and who appear personally at the polling place on election day and produce to the judges of election satisfactory evidence thereof, but such persons, if otherwise qualified to vote, shall be permitted to vote at such election without previous registration.</p>

Mass.	Give Name	<p>Each voter desiring to vote at a polling place shall give his name and, if requested, his residence to one of the officers at the entrance to the space within the guard rail, who shall thereupon distinctly announce the same. If such name is found on the voting list, the election officer shall check and repeat the name and shall admit the voter to the space enclosed by the guard rail and, in case official ballots, other than those marked "Challenged Ballots" as provided by section thirty-five A, are used, such voter shall be given one ballot. The use of electronic means such as tape recording equipment or radio broadcasting equipment for the recording or broadcasting of the names of voters not yet checked as having voted shall be prohibited.</p> <p>Last amended in 1981</p> <p>(5B) Identification. If so authorized by the city or town clerk or registrars of voters, an election officer may request any voter to present written identification. Such requests shall not discriminate in any way, but shall be entirely random, consistent, or based on reasonable suspicion. For the purpose of 950 CMR 52.03(5B), of M.G.L. c. 54, § 76B, and of 950 CMR 52.03(5)(b), suitable written identification includes a driver's license, recent utility bill, rent receipt on a landlord's printed letterhead, lease, duplicate copy of a voter registration affidavit, or any other printed identification which contains the voter's name and address. If voters fail to present suitable written identification when so requested, they must still be allowed to vote, but an election officer or any other person may challenge their right to vote under M.G.L. c. 54, § 85 and 950 CMR 52.03(23).</p>	<p>Mass. Ann. Laws 54 § 76</p> <p>950 Mass. Code Regs. 52.03</p>
Michigan	Sign Name	<p>(1) At each election, before being given a ballot, each registered elector offering to vote shall identify himself or herself by presenting an official state</p>	Mich. Comp. Laws Ann. §

		<p>identification card issued to that individual pursuant to Act No. 222 of the Public Acts of 1972, being sections 28.291 to 28.295 of the Michigan Compiled Laws, an operator's or chauffeur's license issued to that individual pursuant to the Michigan Vehicle Code, Act No. 300 of the Public Acts of 1949, being sections 257.1 to 257.923 of the Michigan Compiled Laws, or other generally recognized picture identification card and by executing an application showing his or her signature or mark and address of residence in the presence of an election official. If the voter registration cards are used in the precinct, the election official in charge of the precinct registration file shall compare the signature upon the application with the signature upon the registration card. If voter registration lists are used in the precinct, the election inspector shall determine if the name on the application to vote appears on the voter registration list. If the name appears on the voter registration list, the elector shall provide further identification by giving his or her date of birth or other information stated upon the voter registration list. In precincts using voter registration lists, the date of birth may be required to be placed on the application to vote. If the signature or an item of information does not correspond, the vote of the person shall be challenged, and the same procedure shall be followed as provided in this act for the challenging of an elector. If the person offering to vote has signed the registration card or application by making a mark, the person shall identify himself or herself by giving his or her date of birth, which shall be compared with the date of birth stated upon the registration card or voter registration list, or shall give other identification as may be referred to upon the registration card or voter registration list. If the elector does not have an official state identification card, operator's or chauffeur's license as required in this subsection, or other generally recognized picture identification card, the individual shall sign an affidavit to that effect before an election inspector and be allowed to vote as otherwise provided in this act. However, an elector being allowed to vote without the identification required under this subsection is subject to challenge as provided in section 727.</p> <p>(2) If, upon a comparison of the signature or other identification, it is found that the applicant is entitled to vote, the election officer having charge of the registration list shall approve the application and write his or her initials on the application, after which the number on the ballot issued shall be noted on the application. The application shall serve as 1 of the 2 poll lists required to be kept as a record of a person who has voted. The application shall be filed with the township, city, or village clerk. If voter registration cards are used in the precinct, the date of the election shall be noted by 1 of the election officials upon the precinct registration card of each elector voting at an election. If voter registration lists are used in the precinct, the election official shall clearly indicate upon the list each elector voting at that election. The clerk of a city, village, or township shall maintain a record of voting participation for each registered elector.</p> <p>The Attorney General declared that this statute violated the Equal Protection Clause of the Fourteenth Amendment. 		(e) Any other form of identification issued by a governmental agency which contains the voter's signature and physical description or picture.  Last Amendment Effective Jan. 1, 2004.	
NH	Give Name	A person desiring to vote shall, before being admitted to the enclosed space within the guardrail, announce his or her name to one of the ballot clerks who shall thereupon repeat the name; and, if the name is found on the checklist by the ballot clerk, the ballot clerk shall put a checkmark beside it and again repeat the name. The ballot clerk shall state the address listed on the checklist for the voter, and ask if the address is correct; if the address on the checklist is not correct, the ballot clerk shall correct the address in red on the checklist. The voter, if still qualified to vote in the town or ward and unless challenged as provided for in <u>RSA 659:27-33</u> , shall then be allowed to enter the space enclosed by the guardrail. After the voter enters the enclosed space, the ballot clerk shall give the voter one of each ballot to be voted on in that election which shall be folded as it was upon receipt from the secretary of state.  Last Amendment Effective July 2, 2002.	N.H. Rev. Stat. Ann. 659:13
New Jersey	Match Sig.	19:15-17. Comparison of signatures or statements made openly; provisional ballots for newly registered voters without proper identification  a. The comparison of signatures of a voter made upon registration and upon election day, and if the voter alleges his inability to write, the comparison of the answers made by such voter upon registration and upon election day, shall be had in full view of the challengers.  b. If a voter has registered by mail after January 1, 2003 to vote for the first time in his or her current county of residence and did not provide personal identification when registering pursuant to section 16 of P.L.1974, c. 30 (C.19:31-6.4), the voter shall be permitted to vote starting at the first election held after January 1, 2004 at which candidates are seeking federal office after displaying one of the following items: (1) a current and valid photo identification card; (2) a current utility bill, bank statement, government check or pay check; (3) any other government document that shows the voter's name and current address; or (4) any other identifying document that the Attorney General has determined to be acceptable for this purpose. If the voter does not display one of these documents, the voter shall not be permitted to vote by machine but shall instead be provided with a provisional ballot, pursuant to the provisions of P.L.1999, c. 232 (C.19:53C-1 et seq.). This subsection shall not apply to any voter entitled to vote by absentee ballot under the "Uniformed and Overseas Citizens Absentee Voting Act" (42 U.S.C. 1973ff-1 et seq.) or to any voter who is provided the right to vote other than in person under section 3 of Pub.L.98-435, the "Voting Accessibility for the Elderly and Handicapped Act," or any other voter entitled to vote otherwise than in person under any other federal law. This subsection shall also not apply to any person who registers to vote by appearing in person at any voter registration agency or to any person whose voter registration form is delivered to the county commissioner of registration or to the Attorney General, as the case may be, through a third party by means other than by mail delivery.  c. Each county commissioner of registration shall collect and maintain, in the manner prescribed by the Attorney General, the information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31- 6.4). Access to the personal identification information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31- 6.4). shall be prohibited, in accordance with subsection a. of section 6 of P.L.2001, c. 404 (C.47:1A-5).  Last Amendment Effective July 9, 2004	N.J. Stat. Ann. 19:15-17
New Mexico	Sign Name	D. The judge assigned to the voter list used for confirmation of registration and voting shall determine that each person offering to vote is registered and, in the	N.M. Stat. Ann §1-5-10

		<p>case of a primary election, that the voter is registered in a party designated on the primary election ballot. If the person's registration is confirmed by the presence of his name on the voter list or if the person presents a certificate under the seal and signature of the county clerk showing that he is entitled to vote in the election and to vote in that precinct, the judge shall announce to the election clerks the list number and the name of the voter as shown on the voter list.</p> <p>E. The election clerk shall locate that list number and name on the signature roster and shall require the voter to sign his usual signature or, if unable to write, to make his mark opposite his printed name. If the voter makes his mark, it shall be witnessed by one of the judges of the precinct board. If the signature roster indicates that the voter is required to present a form of identification before voting, the election judge shall ask the voter for a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows and matches the name and address of the voter as indicated on the signature roster. If the voter does not provide the required identification, he shall be allowed to vote on a provisional paper ballot.</p> <p>G. <p>New York</p>	<p>Match Sig.</p>	<ol style="list-style-type: none"> <li>1. A person before being allowed to vote shall be required, except as provided in this chapter, to sign his name on the back of his registration poll record on the first line reserved for his signature at the time of election which is not filled with a previous signature, or on the line of the computer generated registration list reserved for his signature. The two inspectors in charge shall satisfy themselves by a comparison of this signature with his registration signature and by comparison of his appearance with the descriptive material on the face of the registration poll record that he is the person registered. If they are so satisfied they shall enter the other information required for the election on the same line with the voter's latest signature, shall sign their names or initials in the spaces provided therefor, and shall permit the applicant to vote. Any inspector or inspectors not satisfied shall challenge the applicant forthwith.</li> <li>2. If a person who alleges his inability to sign his name presents himself to vote, the board of inspectors shall permit him to vote, unless challenged on other grounds, provided he had been permitted to register without signing his name. The board shall enter the words "Unable to Sign" in the space on his registration poll record reserved for his signature or on the line of the computer generated registration list reserved for his signature at such election. If his signature appears upon his registration record or upon the computer generated registration list the board shall challenge him forthwith, except that if such a person claims that he is unable to sign his name by reason of a physical disability incurred since his registration, the board, if convinced of the existence of such disability, shall permit him to vote, shall enter the words "Unable to Sign" and a brief description of such disability in the space reserved for his signature at such election. At each subsequent election, if such disability still exists, he shall be entitled to vote without signing his name and the board of inspectors, without further notation, shall enter the words "Unable to Sign" in the space reserved for his signature at such election.</li> <li>3. The voter's signature made by him upon registration and his signature made at subsequent elections shall be effectively concealed from the voter by a blotter or piece of opaque paper until after the voter shall have completed his signature.</li> <li>4. In any case where a person who has heretofore voted has placed his voting signature on the back of his registration poll record on the first or any succeeding line or lines at the time or times of an election, instead of on the last line of the</li> </ol>	<p>N.Y. Law § 8-304 (McKinney)</p>

		<p>space thereon required to be reserved for such voting signatures and on any lines next running upward therefrom, the inspectors of election shall obliterate such misplaced signature or signatures, initial the obliteration and require such voter to sign his name again in the correct place on such registration poll record.</p> <p>5. Any person who has heretofore registered and who at such time placed his or her registration signature on the back of the registration poll record otherwise than in the space required to be provided therefor at the bottom of such poll record, shall, before being permitted to vote at any election thereafter, subscribe a new registration signature for himself on the last line at the bottom of such poll record, and, at the same time, if the inspectors of election are satisfied that the signatures were made by the same person, obliterate his original registration signature placed elsewhere than on the bottom of such record. Such obliterations may be made by crossing out the signature so as to completely efface the same or by affixing thereover a piece of gummed tape of a size sufficient only to cover such signature and of a type adequate to fully conceal the same Last Amended 1986</p>	
North Carolina	Give Name	<p>(a) Checking Registration. --A person seeking to vote shall enter the voting enclosure through the appropriate entrance. A precinct official assigned to check registration shall at once ask the voter to state current name and residence address. The voter shall answer by stating current name and residence address. In a primary election, that voter shall also be asked to state, and shall state, the political party with which the voter is affiliated or, if unaffiliated, the authorizing party in which the voter wishes to vote. After examination, that official shall state whether that voter is duly registered to vote in that precinct and shall direct that voter to the voting equipment or to the official assigned to distribute official ballots. If a precinct official states that the person is duly registered, the person shall sign the pollbook, other voting record, or voter authorization document in accordance with subsection (c) of this section before voting.</p>	N.C. Gen. Stat. Ann. § 163-166.7
North Dakota	Provide ID	<p>16.1-05-07 Poll clerks to check identification and verify eligibility -- Poll clerks to request, correct, and update incorrect information contained in the pollbook.</p> <p>1. Before delivering a ballot to an individual according to section 16.1-13- 22, the poll clerks shall request the individual to show a driver's license issued by the state, another form of identification displaying a photograph of the individual and the individual's date of birth, or another appropriate form of identification prescribed by the secretary of state. If an individual offering to vote fails or refuses to show an appropriate form of identification, the individual may be allowed to vote without being challenged according to section 16.1-05-06 if the individual provides to the election board the individual's date of birth and if a member of the election board or a clerk knows the individual and can personally vouch that the individual is a qualified elector of the precinct. After verifying that the individual's name is contained in the pollbook generated from the central voter file, poll clerks shall verify the individual's residential address and mailing address, if different from the individual's residential address.</p> <p>(From 2003 version of N.D. Century Code; only amendment to this statute that became effective in 2003 was in 2005)</p>	N.D. Cent. Code § 16.1-05-07

Ohio	Match Sig.	<p>When an elector appears in a polling place to vote he shall announce his full name and address to the precinct election officials. He shall then write his name and address at the proper place in the poll lists or signature pollbooks provided therefore, except that if, for any reason, an elector shall be unable to write his name and address in the poll list or signature pollbook, the elector may make his mark at the place intended for his name and a precinct official shall write the name of the elector at the proper place on the poll list or signature pollbook following the elector's mark, upon the presentation of proper identification. The making of such mark shall be attested by the precinct official who shall evidence the same by signing his name on the poll list or signature pollbook as a witness to such mark.</p> <p>The elector's signature in the poll lists or signature pollbooks shall then be compared with his signature on his registration form or a digitized signature list as provided for in section 3503.13 of the Revised Code, and if, in the opinion of a majority of the precinct election officials, the signatures are the signatures of the same person, the clerks shall enter the date of the election on the registration form or shall record the date by such other means as may be prescribed by the secretary of state. If the right of the elector to vote is not then challenged, or, if being challenged, he establishes his right to vote, he shall be allowed to proceed into the voting machine. If voting machines are not being used in that precinct, the judge in charge of ballots shall then detach the next ballots to be issued to the elector from Stub B attached to each ballot, leaving Stub A attached to each ballot, hand the ballots to the elector, and call his name and the stub number on each of the ballots. The clerk shall enter the stub numbers opposite the signature of the elector in the pollbook. The elector shall then retire to one of the voting compartments to mark his ballots. No mark shall be made on any ballot which would in any way enable any person to identify the person who voted the ballot.</p> <p>(Effective at time of last update, 1992 H 182, eff. 4-9-93)</p>	Ohio Rev. Code Ann. § 3505.18

Penn.	Match Sig.	(a.3) All electors, including any elector that shows identification pursuant to subsection (a), shall subsequently sign a voter's certificate, and, unless he is a State or Federal employee who has registered under any registration act without declaring his residence by street and number, he shall insert his address therein, and hand the same to the election officer in charge of the district register. Such election officer shall thereupon announce the elector's name so that it may be heard by all members of the election board and by all watchers present in the	25 Pa. Stat. Ann. § 3050

		<p>polling place and shall compare the elector's signature on his voter's certificate with his signature in the district register. If, upon such comparison, the signature upon the voter's certificate appears to be genuine, the elector who has signed the certificate shall, if otherwise qualified, be permitted to vote: Provided, That if the signature on the voter's certificate, as compared with the signature as recorded in the district register, shall not be deemed authentic by any of the election officers, such elector shall not be denied the right to vote for that reason, but shall be considered challenged as to identity and required to make the affidavit and produce the evidence as provided in subsection (d) of this section. When an elector has been found entitled to vote, the election officer who examined his voter's certificate and compared his signature shall sign his name or initials on the voter's certificate, shall, if the elector's signature is not readily legible, print such elector's name over his signature, and the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes shall also be entered by one of the election officers or clerks. As each voter is found to be qualified and votes, the election officer in charge of the district register shall write or stamp the date of the election or primary, the number of the stub of the ballot issued to him or his number in the order of admission to the voting machines, and at primaries a letter or abbreviation designating the party in whose primary he votes, and shall sign his name or initials in the proper space on the registration card of such voter contained in the district register.</p> <p>(In effect at time of, and unaltered by: 2004, Oct. 8, P.L. 807, No. 97, § 5.1 (changes procedure for first time voters, not established voters))</p>	
Rhode Island	Give Name	<p>(a) Each person desiring to vote shall state his or her name and residence, including that person's street address, if he or she has any, to one of the first pair of bi-partisan supervisors, who shall then announce the name and residence in a loud and distinct voice, clear and audible. As each voter's name is announced, the voter shall be handed a ballot application in the following form:</p> <p><b>BALLOT APPLICATION</b></p> <p>(Poll List)          Senatorial District _____          Representative District _____          Voting District _____</p> <p>Election          Date _____</p> <p>I hereby certify that I am a registered and qualified elector in the above voting district of          City of _____</p> <p>and hereby make application for ballots to be voted at this election.</p> <p>_____</p> <p>(Signature of Voter)</p> <p>_____</p> <p>(Residence Address)</p> <p>Number Approved _____</p> <p>(Supervisor of Election)</p>	R.I. Gen. Laws § 17-19-24

		<p>(b) The voter shall sign the application in the presence and view of a bipartisan pair. They shall locate the voter's name on the certified voting list for the voting district. Upon finding the voter's name on the certified voting list for the district, they shall initial the ballot application in the place provided next to the word "Approved" and shall enter on the certified list of voters a proper notation that the applicant has voted in the election. They shall then return the ballot application to the voter who shall pass down the line and present it to the clerk. After the voter has handed the approved ballot application to the clerk, the clerk shall provide the voter with the appropriate computer ballot and security sleeve, the warden shall direct the voter to the voting booth which the voter shall use, and unless the voter needs instruction or assistance as provided in this chapter, the voter shall cast his or her vote, and if he or she desires place the voted computer ballot in a security sleeve, and shall proceed to the optical scan precinct count unit and shall personally place his or her voted ballot into the designated ballot slot on the unit, and after doing so, shall leave the enclosure at once. No voter shall remain within the voting booth longer than ten (10) minutes, and if the voter refuses to leave after the lapse of ten (10) minutes, the voter shall be removed from the voting booth by order of the warden. Except for the election officials and the election inspector, not more than two (2) voters in excess of the number of voting booths shall be permitted within the enclosed space at any time.</p> <p>(Last amended 2004, Current through January 2005 Session)</p>	
South Carolina	Photo ID	<p><b>§ 7-13-710. Proof of right to vote; signing poll list; comparison of signatures.</b></p> <p>When any person presents himself to vote, he shall produce his valid South Carolina driver's license or other form of identification containing a photograph issued by the Department of Motor Vehicles, if he is not licensed to drive, or the written notification of registration provided for by §§ 7-5-125 and 7-5-180 if the notification has been signed by the elector. If the elector loses or defaces his registration notification, he may obtain a duplicate notification from his county board of registration upon request in person, or by telephone or mail. After presentation of the required identification, his name must be checked by one of the managers on the margin of the page opposite his name upon the registration books, or copy of the books, furnished by the board of registration. The managers shall keep a poll list which must contain one column headed "Names of Voters". Before any ballot is delivered to a voter, the voter shall sign his name on the poll list, which must be furnished to the appropriate election officials by the State Election Commission. At the top of each page the voter's oath appropriate to the election must be printed. The signing of the poll list or the marking of the poll list is considered to be an affirmation of the oath by the voter. One of the managers shall compare the signature on the poll list with the signature on the voter's driver's license, registration notification, or other identification and may require further identification of the voter and proof of his right to vote under this title as he considers necessary. If the voter is unable to write or if the voter is prevented from signing by physical handicap, he may sign his name to the poll list by mark with the assistance of one of the managers.</p> <p>Last amended: 1968</p>	S.C. Code Ann. § 7-13-710
South Dakota	Photo ID	<p>When a voter is requesting a ballot, the voter shall present a valid form of personal identification. The personal identification that may be presented shall be either:</p> <ol style="list-style-type: none"> <li>(1) A South Dakota driver's license or nondriver identification card;</li> <li>(2) A passport or an identification card, including a picture, issued by an agency of the United States government;</li> <li>(3) A tribal identification card, including a picture; or</li> <li>(4) An identification card, including a picture, issued by a high school or an accredited institution of higher education, including a university, college, or</li> </ol>	S.D. Codified Laws § 12-18-6.1

		<p>technical school, located within the State of South Dakota.</p> <p>Last amended March 2004</p>	
Tennessee	Provide ID	<p>Identification of eligible voters</p> <p>(a)(1) A voter shall sign an application for ballot, indicate the primary in which the voter desires to vote, if any, and present it to a registrar. The application for ballot shall include thereon a space for the address of the voter's current residence, and the voter shall write or print such address on the application when the voter signs it. The registrar shall compare the signature and information on the application with the signature and information on the duplicate permanent registration record. The registrar shall make a determination whether the voter's address is different from the address on the voter's permanent registration record or if the registration is in inactive status. If the voter has changed residence, or the voter's registration is inactive, the registrar shall follow the procedures for voting pursuant to § 2-7-140. If, upon comparison of the signature and other identification, it is found that the applicant is entitled to vote, the registrar shall initial the application and shall note on the reverse side of the voter's duplicate permanent registration record the date of the election, the number of the voter's ballot application, and the elections in which the voter votes. If the applicant's signature is illegible, the registrar shall print the name on the application. The registrar shall give the voter the ballot application which is the voter's identification for a paper ballot or ballots or for admission to a voting machine. The voter shall then sign the duplicate poll lists without leaving any lines blank on any poll list sheet.</p> <p>(2) In any computerized county, the county election commission shall have the option of using an application for a ballot as provided in this section, or using the computerized voter signature list. A computerized voter signature list shall include the voter's name, current address of residence, social security number or registration number, birth date and spaces for the voter's signature, elections voted, ballot number and precinct registrar's initials. The following procedures shall be followed in the case of computerized voter signature lists:</p> <p>(A) The voter shall sign the signature list and indicate the election or elections the voter desires to vote in and verify the voter's address in the presence of the precinct registrar;</p> <p>(B) The registrar shall compare the voter's signature and information on the signature list with other evidence of identification supplied by the voter. If, upon comparison of the signature and other evidence of identification, it is found that the applicant is entitled to vote, the registrar shall initial the signature list;</p> <p>(C) If the applicant's signature is illegible, the registrar shall print the name of the applicant on the voter list; and</p> <p>(D) If a voter is unable to present any evidence of identification specified in subsection (c), the voter shall be required to execute an affidavit of identity on a form provided by the county election commission.</p> <p>Last amended 2003</p>	Tenn. Code Ann. § 2-7-112
Texas	Provide ID	<p>(b) On offering to vote, a voter must present the voter's voter registration certificate to an election officer at the polling place.</p> <p>(Last amended in 1997)</p>	Tex. Elec. Code Ann. § 63.001
Utah	Give Name	<p>(1)(a) Any registered voter desiring to vote shall give his name, and, if requested, his residence, to one of the election judges.</p> <p>(b) If an election judge does not know the person requesting a ballot and has reason to doubt that person's identity, the judge shall request identification or have the voter identified by a known registered voter of the district.</p> <p>(3) If the election judge determines that the voter is registered:</p> <p>(a) the election judge in charge of the official register shall:</p> <p>(i) write the ballot number opposite the name of the voter in the official register; and</p>	Utah Code Ann. § 20A-3-104

		<p>(ii) direct the voter to sign his name in the election column in the official register;</p> <p>(b) another judge shall list the ballot number and voter's name in the pollbook; and</p> <p>(c) the election judge having charge of the ballots shall:</p> <p>(i) endorse his initials on the stub;</p> <p>(ii) check the name of the voter on the pollbook list with the number of the stub;</p> <p>(iii) hand the voter a ballot; and</p> <p>(iv) allow the voter to enter the voting booth.</p> <p>(In effect at time of last update prior to 2005: Laws 2003, c. 37, § 1, eff. May 5, 2003)</p>	
Vermont	Give Name	<p>Before a person may be admitted to vote, he or she shall announce his or her name and if requested, his or her place of residence in a clear and audible tone of voice, or present his or her name in writing, or otherwise identify himself or herself by appropriate documentation. The election officials attending the entrance of the polling place shall then verify that the person's name appears on the checklist for the polling place. If the name does appear, and if no one immediately challenges the person's right to vote on grounds of identity or having previously voted in the same election, the election officials shall repeat the name of the person and:</p> <p>(1) If the checklist indicates that the person is a first-time voter in the municipality who registered by mail and who has not provided required identification before the opening of the polls, require the person to present any one of the following: a valid photo identification; a copy of a current utility bill; a copy of a current bank statement; or a copy of a government check, paycheck, or any other government document that shows the current name and address of the voter. If the person is unable to produce the required information, the person shall be afforded the opportunity to cast a provisional ballot, as provided in subchapter 6A of this chapter. The elections official shall note upon the checklist a first-time voter in the municipality who has registered by mail and who produces the required information, and place a mark next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.</p> <p>(2) If the voter is not a first-time voter in the municipality, no identification shall be required, the clerk shall place a check next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting</p> <p>(Last amended in 2003)</p>	Vt. Stat. Ann. tit. 17, § 2563
Virginia	Provide ID	<p>§ 24.2-643. Qualified voter permitted to vote; procedures at polling place; voter identification</p> <p>A. After the polls are open, each qualified voter at a precinct shall be permitted to vote. The officers of election shall ascertain that a person offering to vote is a qualified voter before admitting him to the voting booth and furnishing an official ballot to him.</p> <p>B. An officer of election shall ask the voter for his full name and current residence address and repeat, in a voice audible to party and candidate representatives present, the full name and address stated by the voter. The officer shall ask the voter to present any one of the following forms of identification: his Commonwealth of Virginia voter registration card, his social security card, his valid Virginia driver's license, or any other identification card issued by a government agency of the Commonwealth, one of its political subdivisions, or the United States; or any valid employee identification card containing a photograph of the voter and issued by an employer of the voter in the ordinary course of the employer's business.</p> <p>If the voter's name is found on the pollbook, if he presents one of the forms of</p>	Va. Code. Ann.

		<p>identification listed above, if he is qualified to vote in the election, and if no objection is made, an officer shall enter, opposite the voter's name on the pollbook, the first or next consecutive number from the voter count form provided by the State Board, or shall enter that the voter has voted if the pollbook is in electronic form; an officer shall provide the voter with the official ballot; and another officer shall admit him to the voting booth.</p> <p>Except as provided in subsection E of this section, if a voter is entitled to vote except that he is unable to present one of the forms of identification listed above, he shall be allowed to vote after signing a statement, subject to felony penalties for false statements pursuant to § 24.2-1016, that he is the named registered voter who he claims to be. A voter who requires assistance in voting by reason of physical disability or inability to read or write, and who requests assistance pursuant to § 24.2-649, may be assisted in preparation of this statement in accordance with that section. The provisions of § 24.2-649 regarding voters who are unable to sign shall be followed when assisting a voter in completing this statement.</p> <p>(Version in effect as of 2004- effective 4/12/2004)</p>	
Washington	Sign Name	<p>29A.44.201.</p> <p>A voter desiring to vote shall give his or her name to the precinct election officer who has the precinct list of registered voters. This officer shall announce the name to the precinct election officer who has the copy of the inspector's poll book for that precinct. If the right of this voter to participate in the primary or election is not challenged, the voter must be issued a ballot or permitted to enter a voting booth or to operate a voting device. For a partisan primary in a jurisdiction using the physically separate ballot format, the voter must be issued a nonpartisan ballot and each party ballot. The number of the ballot or the voter must be recorded by the precinct election officers. If the right of the voter to participate is challenged, RCW 29A.08.810 and 29A.08.820 apply to that voter.</p> <p>(In effect at time of last update prior to 2005: 2004 c 271 § 136, eff. June 10, 2004)</p> <p>29A.44.210.</p> <p>Any person desiring to vote at any primary or election is required to sign his or her name on the appropriate precinct list of registered voters. If the voter registered using a mark, or can no longer sign his or her name, the election officers shall require the voter to be identified by another registered voter.</p> <p>The precinct election officers shall then record the voter's name.</p> <p>Effective date: July 1, 2004</p>	Wash. Rev. Code § 29A.44.201 & 29A.44.210
West Virginia	Match Sig.	<p>(a) Any person desiring to vote in an election shall, upon entering the election room, clearly state his or her name and residence to one of the poll clerks who shall thereupon announce the same in a clear and distinct tone of voice. If that person is found to be duly registered as a voter at that precinct, he or she shall be required to sign his or her name in the space marked "signature of voter" on the pollbook prescribed and provided for the precinct. If that person is physically or otherwise unable to sign his or her name, his or her mark shall be affixed by one of the poll clerks in the presence of the other and the name of the poll clerk affixing the voter's mark shall be indicated immediately under the affixation. No ballot may be given to the person until he or she so signs his or her name on the pollbook or his or her signature is so affixed thereon.</p> <p>* * *</p> <p>(c) When the voter's signature is properly on the pollbook, the two poll clerks shall sign their names in the places indicated on the back of the official ballot and deliver the ballot to the voter to be voted by him or her without leaving the</p>	W. Va. Code § 3-1-34 (a)

		<p>election room. If he or she returns the ballot spoiled to the clerks, they shall immediately mark the ballot "spoiled" and it shall be preserved and placed in a spoiled ballot envelope together with other spoiled ballots to be delivered to the board of canvassers and deliver to the voter another official ballot, signed by the clerks on the reverse side required by this subsection. The voter shall thereupon retire alone to the booth or compartment prepared within the election room for voting purposes and there prepare his or her ballot using a ballpoint pen of not less than five inches in length or other indelible marking device of not less than five inches in length. In voting for candidates in general and special elections, the voter shall comply with the rules and procedures prescribed in section five, article six of this chapter.</p> <p>(In effect at time of last update prior to 2005: Acts 2003, c. 100, eff. 90 days after March 7, 2003)</p>	
Wisconsin	Give Name	<p>6.79(2)(a) Except as provided in sub. (6), where there is registration, each person, before receiving a voting number, shall state his or her full name and address. Upon the prepared registration list, after the name of each elector, the officials shall enter the serial number of the vote as it is polled, beginning with number one. Each elector shall receive a slip bearing the same serial number. A separate list shall be maintained for electors who are voting under s. 6.15, 6.29 or 6.55(2) or (3) and electors who are reassigned from another polling place under s. 5.25(5)(b). Each such elector shall have his or her full name, address and serial number likewise entered and shall be given a slip bearing such number.</p> <p>(In effect at time of last update prior to 2005: 2003 Act 327, § 4, eff. June 12, 2004)</p>	Wis. Stat. § 6.79
Wyoming	Give Name	<p>(a) Unless a voter is challenged pursuant to W.S. 22-15-101 through 22-15-109, no identification shall be required when:</p> <p>(i) Voting in person or by mail after having registered in person; or</p> <p>(ii) Voting in person or by mail after having registered by mail and having previously voted in a Wyoming federal election.</p> <p>(In effect at time of last update prior to 2005: Effective dates. -- Laws 2004, ch. 94, § 5, makes the act effective immediately upon completion of all acts necessary for a bill to become law as provided by art. 4, § 8, Wyo. Const. Approved March 5, 2004.)</p>	Wyo. Stat. Ann. § 22-3-118

## APPENDIX B – Court Decisions and Literature on Voter Identification and Related Issues

### Court Decisions

#### Summary of Relevant Cases:

#### Challenges Prevailed:

##### *American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004*

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14<sup>th</sup> Amendment EPC: likely to prevail

##### *Greidinger v. Davis, 1993*

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14<sup>th</sup> Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

#### Challenges Rejected:

##### *League of Women Voters v. Blackwell, 2004.*

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

##### *Colorado Common Clause v. Davidson, 2004*

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

*McKay v. Thompson, 2000*

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14<sup>th</sup> Amend.: no protection for privilege where Congress authorized its infringement

*Kemp v. Tucker, 1975*

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a "qualification" for voting
  - 15<sup>th</sup> Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14<sup>th</sup> Amendment EPC: ruled there was no distinction among voters

*Perez v. Riddlehoover, 1966*

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a "test or device" because it applied equally
  - 15<sup>th</sup> Amendment: same reasons

**Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

***American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at \*1 (D. Minn. Oct. 28, 2004).***

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at \*1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at \*3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

**Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at \*1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at \*6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at \*10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. . Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

**Current Litigation Concerning Voter ID Issues<sup>1</sup>**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

<sup>1</sup> As of January 2, 2006

**Georgia** (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)<sup>2</sup>. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.<sup>3</sup> As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

***Indiana*** (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

<sup>2</sup> Litigation documents are available at the Election Law @ Moritz website.  
<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

<sup>3</sup> GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.<sup>4</sup> The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

---

<sup>4</sup> According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

### Analysis of Effects of Voter Identification Requirements on Turnout

Tim Vercellotti  
Eagleton Institute of Politics  
Rutgers University  
May 16, 2006

#### Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns whether such requirements dampen turnout among those eligible to vote. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics of voter identification requirements contend that the effect is greater based on specific types of requirements. Critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card, such as a driver's license. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. This report draws from two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

#### Types of voter identification requirements

Based on research by the Moritz College of Law, states had one of five types of requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (10 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>5</sup> It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

---

<sup>5</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). For the purposes of this analysis I also tested the array of minimum identification requirements to assess whether they posed increasing levels of demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

### **Estimating turnout among citizens in the voting-age population**

This report examines turnout among U.S. citizens of voting age in both the aggregate- and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000.<sup>6</sup>

### **Analysis of aggregate data**

If one treats maximum voter identification requirements as a continuous variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter

---

<sup>6</sup> McDonald and Popkin (2001) recommend an even more stringent approach to voter turnout calculations. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

identification requirements ( $r = -.30$ ,  $p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20$ ,  $p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.2 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, I opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>7</sup>

Voter identification requirements alone do not determine voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county.

I coded the voter identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

To capture electoral context I included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus I added a variable to reflect the number of days between each state's registration deadline and the election.<sup>8</sup>

<sup>7</sup> Treating maximum voter identification requirements as a continuous variable yielded results in which voter identification requirements were negatively related to aggregate turnout. Those results can be found in Table A-1 in the Appendix to this report.

<sup>8</sup> For states that had Election Day registration or no registration requirement (North Dakota), I assigned a value of zero to this variable.

Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the median household income for 2002 in each county.<sup>9</sup>

I estimated a series of random effects models to account for the likelihood that data from counties were correlated within each state (for further explanation of random effects and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).<sup>10</sup> I allowed the median income variable to have both fixed and random effects in each state to take into account variation in the cost of living in each state. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the estimated citizen voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, two of the four requirements had a small and negative effect on turnout in 2004: matching one's signature and providing a non-photo identification. Taking into account the reference variable of stating one's name, the results indicate that turnout was lower in states that required signature matches or a non-photo identification than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Two contextual factors -- whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate-- increased voter turnout. The time between the closing date for registration and the election had a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income had positive effects on turnout. The percentage of African-Americans in the county did not have a significant effect.

The effects of the minimum voter identification requirements were non-existent. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to have a negative effect on turnout, as did the number of days between the closing date for registration and the election.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. A chi-square test of the difference in the deviance for each model (represented by -2 log likelihood in Table 2),

<sup>9</sup> To bring the income figures into a scale comparable to those of the other variables, I used the natural log of median household income.

<sup>10</sup> The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .43, indicating considerable variation between the states.

showed no significant improvement by including the interactions ( $p > 0.05$ ). I report the coefficients for the models with the interactions in the Appendix in tables A-2 and A-3.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the identification requirements for voting vary, so does turnout. Specifically, in terms of the maximum requirements, the results suggest that requiring a signature match or non-photo identification is negatively related to turnout compared to requiring that a voter state his or her name. But the analysis showed that adding interactions between identification requirements and the percentage of the county that was African-American or Hispanic did not improve the fit of the model to the data.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>11</sup> Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

### Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>12</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens because the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>13</sup> As in the analysis of aggregate data, I coded the voter

<sup>11</sup> A reviewer for an earlier version of this paper recommended adding an education variable to the aggregate model. One version of the aggregate model not reported here included the percentage of adults in the county who had at least a college degree. The measure was highly collinear with the percentage of residents living below the poverty line, necessitating removal of the college degree variable from the model.

<sup>12</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

<sup>13</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown

identification requirements as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). I omitted the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.<sup>14</sup>

In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate data analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less.<sup>15</sup> At the individual level, I controlled for gender, household income, and dummy variables for race/ethnicity, age and education. In terms of race and ethnicity, I created dummy variables to represent whether a voter was Black/non-Hispanic, Hispanic, or Asian (with white/non-Hispanic/other voters as the omitted category for reference purposes). I separated education into five dummy variables: less than high school, high school diploma, some college, college graduate, and graduate training. I omitted the "less than high school" variable from the model for reference purposes. Regarding age, I created four dummy variables to represent 18 to 24 years of age, 29 to 44, 45 to 64, and 65 years and older. I omitted the 18-to-24 category as the reference variable in the model.

Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

## Results

---

that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>14</sup> Earlier versions of this paper included an individual-level analysis that included the five maximum voter identification requirements combined into a continuous variable. The results of that analysis, which found that voter identification requirements had a negative relationship with turnout, can be found in table A-4 in the Appendix.

<sup>15</sup> Given that the individual-level analysis focused on registered voters (as opposed to the citizen voting-age population in the aggregate analysis), I did not include the closing date for registration as a predictor of turnout in the individual-level analysis.

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted. I estimated the models using robust standard errors to control for correlated error terms for observations from within the same state.

[Table 3 here]

The two models in Table 3 use either the maximum or minimum voter identification requirements in each state. The two models generate similar results. In each model, three of the voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. In other words, compared to states that require voters only to state their names, the requirements to sign one's name, provide a non-photo identification, photo identification in the maximum requirements or affidavit in the minimum requires exert a negative influence on turnout.

Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had finished high school. Respondents who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>16</sup> I calculated the probabilities taking into account both maximum and minimum requirements.

[Table 4 here]

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability appear to decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>17</sup> In terms of the

<sup>16</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

<sup>17</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of

minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter identification requirements. But incorporating dummy variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, I divided the sample into sub-samples and re-ran the probit models.

[Table 5 here]

The effects of voter identification requirements were similar for white voters compared to the entire sample, which was not surprising given that white voters comprised 81 percent of the sample. Voters in states where the maximum requirement involved signing one's name, providing a non-photo identification or photo identification were less likely to vote than those in a state that required voters to give their names. Taking into consideration the minimum requirements, this was true only for voters in states that require a non-photo identification or an affidavit. White voters in photo identification states were 3.7 percent less likely to vote than were white voters in states where respondents gave their names. The difference in probability was 4.4 percent for voters in states where an affidavit was the minimum requirement.

Voter identification requirements also influenced turnout among Black voters, but to a lesser extent relative to white voters.

[Table 6 here]

Of the maximum voter identification requirements, only the non-photo identification requirement reduced turnout compared to turnout in states that required voters to state their names. The predicted probability of voting was 5.7 percent lower for Black respondents in states that required non-photo identification. In terms of age, only African-Americans age 65 and older were more likely to vote than respondents in the 18 to 24 referent group. Respondents in all levels of education were more likely to vote than respondents without a high school diploma. Gender, income, living in a battleground state, being a part of the workforce and having been born in the United States also were positive predictors. Recent mobility tended to lower the probability of voting. None of the minimum identification requirements had a significant effect on voting, while most of the remaining variables had effects similar to those in the maximum requirement model.

---

all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

Hispanic voters also were less likely to vote in states that required non-photo identification as opposed to stating one's name.

[Table 7 here]

Using the coefficients from Table 7 to calculate predicted probabilities, for both the maximum and minimum requirements, Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name. Hispanic voters ages 45 to 64 and 65 and over were more likely to vote than their 18-to-24-year-old counterparts. Education and income also were positive predictors of voting. Interestingly, being a native-born citizen lowered the probability of voting, while native-born citizenship was a positive predictor for African-American voters and was not a predictor at all for white voters. It may be that naturalized citizens of Hispanic descent are more conscious of the value of voting rights than other groups.

Varying voter identification requirements influenced Asian-American voters as well. As with Hispanic and Black voters, Asian-American voters were less likely to turn out in states with non-photo identification requirements than in states where voters gave their names.

[Table 8 here]

Using the probit coefficients to calculate predicted probabilities, Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement. Asian-American voters also were 2.2 percent less likely to vote when signatures were the maximum requirement compared to stating one's name.

In terms of other predictors, there were no significant differences in terms of age or income. In contrast to Hispanic voters, where one was a naturalized or natural-born citizen did not affect the probability of voting. Those with high school or college diplomas or graduate training were more likely to turn out than those with less than a high school diploma. Women and married voters also were more likely to turn out than men and voters who were not married.

## **Discussion and conclusion**

The results presented here provide evidence that as voter identification requirements vary, voter turnout does as well. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant.

In the aggregate data, requirements that voters match signatures on file, provide a non-photo identification or photo identification had negative effects on turnout compared to requiring that voters state their names. Interactions with specific groups – African-Americans and Hispanics – did not improve the fit of the aggregate data to the models. But differences emerged among specific groups in the individual-level data. The signature, non-photo identification and photo identification requirements all had negative effects compared to the requirement that voters simply state their names. These effects translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For

example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters (the gap widened to 3.7 percent for white voters when comparing photo identification to simply stating one's name).

That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements. This begs the question as to why photo identification requirements did not have a greater influence in 2004. It may have been due to the fact that photo identification was a maximum requirement in only five states, and each of those states accepted another type of identification as a minimum requirement.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?<sup>18</sup> Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

---

<sup>18</sup> The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using the November 2004 Current Population Survey data and voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Of all of the voter identification requirements, only requiring signatures or matching signatures had a significant effect on whether a respondent said he or she was registered to vote in 2004. In each instance the effect was negative.

State Statutes and Regulations Affecting Voter Identification

Compiled by The Moritz College of Law, The Ohio State University

Available in electronic form

**FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

**Report to the  
U. S. Election Assistance Commission  
On  
Best Practices to Improve Voter Identification Requirements  
Pursuant to the  
HELP AMERICA VOTE ACT OF 2002  
Public Law 107-252**

May 16, 2006

Submitted by

The Eagleton Institute of Politics, Rutgers, The State University of New Jersey

The Moritz College of Law, The Ohio State University

# FINAL DRAFT

For Review by the Standards Board and Board of Advisors

## The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

**The Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

**The Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

## Project Management Team

Dr. Ruth B. Mandel  
Director, Eagleton Institute of Politics  
Board of Governors Professor of Politics  
Principal Investigator

## **FINAL DRAFT**

For Review by the Standards Board and Board of Advisors

### **Peer Review Group**

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

R. Michael Alvarez  
Professor of Political Science  
California Institute of Technology

## REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

---

### Report Background

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

### EXECUTIVE SUMMARY AND RECOMMENDATIONS

#### Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

- Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:<sup>1</sup> the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.<sup>2</sup> Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed.<sup>3</sup> As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible

---

<sup>1</sup> See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

<sup>2</sup> The EAC has contracted with other researchers to study vote fraud issues.

<sup>3</sup> Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.<sup>4</sup> The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be *asked* to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be *required* to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included "maximum" requirements in our analysis, and not simply "minimum" requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the "maximum" of being asked to show photo ID may deter some voters even though the "minimum" would allow them to vote without photo ID.

---

<sup>4</sup> Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old; the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis's aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

significant predictor of turnout. Signature match and non-photo id remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.<sup>5</sup> And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls-- are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls

---

<sup>5</sup> Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
  - I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
  - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
  - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.
4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

the convenience of the voter, the total time allowed to evaluate ballots<sup>6</sup>, and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends.

Requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

## **SUMMARY OF RESEARCH**

### **Background and Approach of the Study**

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the

---

<sup>6</sup> Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.
  
- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.
  
- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.<sup>7</sup> The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.<sup>8</sup>

---

<sup>7</sup> As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

<sup>8</sup> Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.<sup>9</sup> Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter

---

<sup>9</sup> "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.<sup>10</sup> Voter ID requirements that require voters to bring a document to the polls --rather than simply sign their names-- may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.<sup>11</sup> And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards --legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?<sup>12</sup>

---

<sup>10</sup> For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

<sup>11</sup> The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

<sup>12</sup> "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?<sup>13</sup>
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?<sup>14</sup>
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.<sup>15</sup> A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.
5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?<sup>16</sup>
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

---

<sup>13</sup> See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

<sup>14</sup> In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

<sup>15</sup> "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

<sup>16</sup> For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

**Voter ID and Turnout**

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>17</sup> Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.<sup>18</sup>

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum

---

<sup>17</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

<sup>18</sup> As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a “minimum” requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state’s voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.<sup>19</sup> Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state’s legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

---

<sup>19</sup> One state election official told us that, “We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren’t that way, but it probably is.”

\* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

<sup>1</sup> Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

<sup>2</sup> Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

<sup>3</sup> Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

<sup>4</sup> Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

<sup>5</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>6</sup> Voters lacking a photo ID could vote by providing another form of ID in 2004.

<sup>7</sup> Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

<sup>8</sup> Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ( $r = -.30, p < .05$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ( $r = -.20, p = .16$ ). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

**Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements**

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	<b>64.2 %</b>	State Name	<b>63.0 %</b>
Sign Name	<b>61.1 %</b>	Sign Name	<b>60.4 %</b>
Match Signature	<b>60.9 %</b>	Match Signature	<b>61.7 %</b>
Provide Non-Photo ID	<b>59.3 %</b>	Provide Non-Photo ID	<b>59.0 %</b>
Provide Photo ID	<b>58.1 %</b>	Swear Affidavit	<b>60.1 %</b>
<i>Average Turnout (All States)</i>	<b>60.9 %</b>		

**This table displays the mean turnout using the aggregate county level data for each state in 2004.**

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.<sup>21</sup>

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American<sup>22</sup>
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

---

<sup>21</sup> The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

<sup>22</sup> The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.<sup>23</sup>

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

---

<sup>23</sup> This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.<sup>24</sup> Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

#### Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>25</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

---

<sup>24</sup> For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).<sup>24</sup> Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

<sup>25</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

influenced turnout in 2004.<sup>26</sup> The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>27</sup>

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.<sup>28</sup> Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>29</sup>

---

<sup>26</sup> The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

<sup>27</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

<sup>28</sup> A probit model is a popular specification of a generalized linear regression model, using the probit link function.

<sup>29</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

<b>Table 3. Predicted probability of voter turnout – all voters</b>		
	<b>Maximum requirement</b>	<b>Minimum requirement</b>
<b>State name</b>	91.7%	91.5%
<b>Sign name</b>	89.9%	90.2%
<b>Match signature</b>	Not significant	Not significant
<b>Non-photo ID</b>	89.0%	89.0%
<b>Photo ID</b>	88.8%	---
<b>Affidavit</b>	---	87.5%
<b>Total difference from “state name” to “photo ID” or “affidavit”</b>	<b>2.9%</b>	<b>4.0%</b>
<b>N</b>	54,973	
<p>Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one's name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.</p> <p>Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.</p>		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.<sup>30</sup> In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

<sup>30</sup> The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Race and ethnicity have generated particular interest in the debate over voter ID requirements.<sup>31</sup> The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

---

<sup>31</sup> Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day , or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

**Litigation Over Voter ID Requirements**

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*).. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

*Non-photo identification.* For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at \*1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

*Photo ID.* Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.<sup>32</sup> Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL

---

<sup>32</sup> Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

2428690, at \*1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at \*1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at \*1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

*Privacy.* In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

**Developments since 2004**

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

#### State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at

**REVISED FINAL D R A F T**  
**For review by the EAC's Advisory Boards**

the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

**Conclusions**

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.<sup>33</sup>

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents

---

<sup>33</sup> In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

## MEMORANDUM

---

---

**TO:** DOUG LEWIS, CHAIR  
EAC BOARD OF ADVISORS

**FROM:** COMMISSIONER RAY MARTINEZ

**SUBJECT:** CREATION OF STATEWIDE VOTER REGISTRATION LIST  
IMPLEMENTATION WORKING GROUP

**DATE:** MARCH 11, 2005

The Help America Vote Act of 2002 (“HAVA”) requires that each State implement a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained and administered at the State level.<sup>1</sup> Moreover, the EAC is required by HAVA to adopt voluntary guidance to assist States in meeting this important requirement.<sup>2</sup>

Accordingly, to assist the EAC in developing voluntary guidance, the EAC requests your assistance in identifying up to four current members of the Board of Advisors who would be willing to serve on a Statewide Voter Registration List Implementation Working Group (“Working Group”). This Working Group will be comprised exclusively of state and local election officials drawn primarily from the current membership of the EAC’s Board of Advisors and Standards Board, in addition to representation from the Department of Justice.

The immediate objective of the Working Group will be to review the minimum requirements and essential elements to creating a “HAVA-compliant” statewide voter registration list, as well as related implementation and operational issues. On a more long-term basis, the EAC is negotiating an agreement with the National Academy of Sciences (“NAS”) in order to bring members of the Working Group together with information technology experts in databases, networking and security in order to discuss lingering technology issues related to the implementation and on-going use of statewide voter registration lists.

## **EAC Study of Voter Identification Requirements**

### **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, [www.eac.gov](http://www.eac.gov).

### **EAC Declines to Adopt Draft Report**

EAC finds the Contractor’s summary of States’ voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission’s efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election’s statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations.

So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

#### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's

experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

Subject Re: questions 

In fact, we did not ever meet with Eagleton on the research and statistical methodology they chose to employ with the Voter ID portion of the study.

Eagleton did brief the Commission twice but the focus on was on the provisional voting portion of the study. Certainly, in hindsight it would have been appropriate to have gotten such a briefing. I believe EAC thought it was sufficiently "covered" given the substantial involvement of a project working group that we had approved and with the use of an EAC peer review group.

Certainly, we'll be far more cautious the next time around.

**Deliberative Process  
Privilege**

**March 22, 2007**

**MEMORANDUM**

**To:** Commissioners Davidson, Rodriguez, Hunter and Hillman  
**Fr:** Jeannie Layson  
**Cc:** Tom Wilkey, Julie Hodgkins, Karen Lynn-Dyson, Bryan Whitener  
**RE:** Communications Strategy for Release of Voter ID Tally Vote Results

In anticipation of the release of the results of the tally vote and all of the information provided by the contractor, I suggest taking the following steps to effectively communicate your decision. Taking this approach will help us control how the information is distributed, how it is framed, and how to focus the discussion on the positive outcome of your decision.

The bottom line is that we want to try our best to make this a story about EAC's decision to conduct a thorough and in-depth look into the subject of voter ID, and we have decided to release the preliminary research. We do not want this to evolve into a storyline about squabbling between EAC and Eagleton.

I have provided a suggested overall message that reflects the action taken, as well as questions we should be prepared to answer.

Please let me know if you have any questions about my proposal, and I look forward to your input.

027418

**PRELIMINARY ACTIVITIES**

Prior to the completion of the tally vote and the subsequent release of the results and the contractor's materials, I suggest taking the following steps:

1. Discuss EAC's decision with the contractors in advance of distributing the press release and discussions with reporters so that they have an opportunity to respond and also so they will be well informed and prepared to discuss the facts with reporters or others who will most likely contact them.
2. Prior to release of EAC's decision, reach out to key Hill staffers who have been following this issue, including those members who have requested this data in the past. This should include staffers for the House Appropriations Committee Subcommittee on Financial Services and General Government since the Committee requested this information a few weeks ago. It should be made clear to committee staffers that the tally vote is the culmination of a directive made by the EAC chair in Feb. that the agency move forward to complete this project. These staffers should also be included on our list of key stakeholders.
3. Executive director should determine whether there are other key stakeholders that should be made aware of this decision from EAC personally, not from a press release. Possible candidates include members of Congress, NASS, individual secretaries of state, DOJ, and NASED.

**PUBLIC ROLL-OUT**

Once the above preliminary steps have been completed, EAC Communications will:

1. Post the press release and the related data on the website, with a link from the home page.
2. Prior to release of the tally vote decision and related data, call Richard Whitt of USA Today, Will Lester of AP, Chris Drew of the NYT, and Zach Goldfarb of the WaPo and let them know we are about to release the information. Offer interviews with the chair or other commissioners.
3. Send the press release (with a link to the research) to all recipients in the media database. This includes national dailies, as well as wire services such as the Associated Press.
4. Send the press release (with a link to the research) to all recipients in the stakeholder database. The database consists of election officials, advocates, and other interested parties, including representatives from organizations who have been critical of EAC, including VoteTrust USA and the People for the American Way.

**OVERALL MESSAGE**

Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, was insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors including, the many changes in state laws and regulations that have occurred since the 2004.

**Q&A**

We should be prepared to answer the following questions:

**Q: Why not release the draft fraud report, too?**

A: EAC issued a final Voting Fraud and Voter Intimidation Report in December 2006, which included recommendations adopted by the Commission to conduct a comprehensive assessment of all claims, charges and prosecutions of voting crimes.

In the case of the voter ID report, the Commission chose not to adopt a final report because it was determined that there was insufficient data to provide meaningful conclusions.

**Q: You cited concerns with the contractor's methodology and analysis. Didn't your contract with Eagleton include specific language regarding these issues?**

A: Yes, but in retrospect, perhaps we could have done a better job articulating how we wanted this research to be conducted.

**Q: During the course of the project, did you see draft reports? If so, why didn't these concerns get addressed at that time?**

A: We did receive progress reports, and when we identified areas of concern, we discussed it with the contractor. It was because of these concerns that EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

**Q: During the course of the contract, did you ever express these concerns with Eagleton?**

A: Yes, and as a result of these conversations, EAC decided to revisit the methodologies used so that we could provide a more in-depth look at the subject matter.

**Q: You spent more than \$500,000 for a report the Commission doesn't think should be adopted – so basically you're flushing a lot of money down the drain. Is this a wise use of taxpayer dollars?**

A: There is value in what Eagleton provided. It will help provide a baseline for how to move forward. And even though their research raised many questions, contemplating the answers to those questions has informed us on how to move forward.

**Q: If you were not satisfied with the final product, why did you pay for it?**

A: We adhered to the terms of the contract.

**Q: EAC received this data in June of last year. What has taken so long to bring it to a conclusion?**

A: This is an important issue, one that deserves careful deliberation and a thorough approach. Yes, we like to get things done quickly, but it is more important to take the time to get things right.

## **TRANSITION PHRASES**

To stay on message and avoid being dragged into discussions about anything other than the action taken, employ the following phrases and transition back to the overall message.

### ***Overall Message***

Voter identification at the polling place is an important issue that affects voters in jurisdictions throughout the country. Understanding that this issue deserves a more in-depth approach, EAC has decided to move forward with a thorough, multi-year research project that will examine everything from turnout to voter education.

The findings of the preliminary research, which focused exclusively on the 2004 general elections, were insufficient to provide meaningful conclusions and raises more questions than provides answers. Future research will be expanded to include more than one election cycle and will examine environmental and political factors, including the many changes in state laws and regulations that have occurred since 2004.

### ***Bridge/Transition Phrases***

- What's really important here...
- The bottom line is...
- The point is...
- We have a responsibility to...
- I'll let others speak to that, but let me tell you what's important to EAC...
- Everyone agrees that...

"Rosemary Rodriguez"

Subject: FOR YOUR APPROVAL: Voter ID PR and Roll Out Strategy

Commissioners,

I have incorporated your edits, so please take a look at the latest drafts of both documents and let me know if you have further changes. I recommend making this public on Thursday. If possible, please let me know by the end of the day on Wed. if you have additional edits. Press release edits were made in the first two paragraphs, including backing off calling this a "multi-year study," and a more direct description of the action you took -- you declined to adopt the report. The only edit in the memo is new language in the Q&A that points out that the \$500K included work for both prov. voting and voter ID.

Thank you, and let me know if you have any questions.

Subject Comments on Eagleton's response

History:

This message has been replied to.

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.

2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates(FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.(FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one

assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.

My flight departs at 9:20 a.m. (EDT) and I do not arrive until 12:15 p.m. (EDT). However, if you have questions concerning my comments, I will be around tonight and will be available tomorrow afternoon by Blackberry.

I have not reviewed the various laws, but I believe that it would require that kind of review to answer your question accurately. My guess is that much like other election-related provisions, the language of the statute and the placement of the statute in the code or statutory scheme will dictate the answer to the question. Some may not even be written into statute. If you want me to, I can get someone to start working on that review.

Jeannie:

Thanks very much for the update. I really appreciate it. I also had a conversation with NPR. One of the points I made was that it is terrific that the EAC plans to devote additional resources to studying the topic.

Subject Voter ID update

Commissioners,

The press release, the statement, and the draft report has been posted on our site. The press release is being distributed, and is on the way to all of you and the entire EAC staff. The following activities have occurred:

1. Press release was sent in advance to Eagleton.
2. I called Wendy Weiser of the Brennan Center and sent her the info.
3. I called and sent the info to Ray M. and Paul D.
4. I sent the info to Tom Hicks and Adam A.
5. Tom called Dan Tokaji, Dan Oak, and Rep. Hinchey's office.
6. Karen gave the three EAC experts a heads up.
7. Comm. Rodriguez was interviewed by NPR (the only outlet that showed any interest), as was Eagleton. Eagleton told NPR they are glad we are expanding the scope. Interview will run on affiliates today at approximately 5:44 pm EST.
8. I offered interviews to USA Today, WaPo, NYT, and AP but none were interested.
9. I have kept Eagleton apprised of our activities.

I'll continue to keep you apprised as the day goes on, and please let me know if there's anyone else you'd like me to contact.

## **EAC to Launch Comprehensive Study of Voter ID Laws**

**WASHINGTON** - The U.S. Election Assistance Commission (EAC) has voted unanimously to launch a comprehensive study focused on voter identification laws after concluding that initial research it received in a report, which focused on only one election cycle, was not sufficient to draw any conclusions. The Commission declined to adopt the report, but is releasing all of the data to the public.

The report and the research, conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, are available at [www.eac.gov](http://www.eac.gov). The Commission's statement regarding its decision is attached.

"After careful consideration of the initial research, the Commission decided this important issue deserves a more in-depth research approach, and that it should be examined beyond only one election cycle," said EAC Chair Donetta Davidson. "The Commission and our contractor agree that the research conducted for EAC raises more questions than provides answers."

EAC's strategy for moving forward is based upon an examination of the initial research and the testimony and discussion about this research project at the Commission's February 8, 2007 public meeting. For more information about the public meeting, including the agenda, transcript, and testimony go to [http://www.eac.gov/Public\\_Meeting\\_020807.asp](http://www.eac.gov/Public_Meeting_020807.asp).

EAC's future research on this topic will be expanded to include more than one federal election, environmental and political factors, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004. EAC's comprehensive research approach will undertake the following activities:

027431

- \* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements.
- \* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation. EAC will use some of the information collected by the contractor as well as additional data from the states to develop this baseline.
- \* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification.
- \* Study how voter identification provisions that have been in place for two or more federal elections have impacted voter turnout, voter registration figures, and fraud.
- \* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements.

EAC is an independent bipartisan commission created by the Help America Vote Act of 2002 (HAVA). It is charged with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, accrediting voting system test laboratories and certifying voting equipment and serving as a national clearinghouse and resource of information regarding election administration. The four EAC commissioners are Donetta Davidson, chair; Rosemary Rodriguez, Caroline Hunter and Gracia Hillman.

###

## **EAC Statement on Study of Voter Identification Requirements**

### **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing

turnout rates among states for one election - November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document\* was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates\* and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.\*

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

### **EAC Declines to Adopt Draft Report**

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The study only focused on one federal election. An analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. A second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced some evidence of correlation between voter identification requirements and turnout. The initial categorization of voter identification requirements included classifications that, actually, require no identification documentation, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by an EAC review group comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers and both agree the study should have covered more than one federal election.\* Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

\*1 In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

\*2 The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor applied the percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated voting age population in 2004. Thus, 2004

estimates of voting age population include persons who are not registered to vote.

\* 3 The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

\* 4 See Transcript of EAC Public Meeting, February 8, 2007, page 109.

### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

\* Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state his or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.

\* Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

\* In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.

\* Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting.

\* Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject Hinchey statement

History:  This message has been replied to and forwarded.

Hinchey Statement on U.S. Election Assistance Commission's

Release of Report on Voter Identification Issues

Washington, DC - Congressman Maurice Hinchey (D-NY) today released the following report in response to the U.S. Election Assistance Commission's (EAC) release of a report on voter identification issues that was submitted to them by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics, and Ohio State University's Moritz College of Law. Hinchey directly requested the release of the report when EAC Chairwoman Donetta Davidson appeared earlier this month before the House Appropriations Subcommittee on Financial Services, of which the congressman is a member. Davidson told Hinchey at the hearing that she would provide the subcommittee with the report that is being released to the public today. Hinchey also requested the release of a separate report on voter fraud and intimidation. The Help America Vote Act (HAVA) requires the EAC to conduct and make available to the public studies regarding certain voting issues.

"I am very pleased that following Chairwoman Davidson's appearances before Congress the EAC decided to do the right thing and make public the Eagleton Institute of Politics study on voter identification issues. I hope that this decision signals a new day of transparency and sets a precedent for all future and previous studies and reports submitted to the EAC.

"When Chairwoman Davidson came before our subcommittee a few weeks ago, I also requested that the EAC make public another report about voter fraud and voter intimidation submitted to them by two outside consultants. It is my hope they will release this report to the public as well. The EAC has the responsibility to keep the public informed on any findings it has with regards to voter fraud, intimidation, and any other electoral issues.

"As we work to increase voter turnout and make our democracy function more effectively, it is imperative that potential voters are assured that they will be able to cast their votes fairly and in an environment free of intimidation. To achieve that goal, the EAC must be open with the information it receives in order to help identify voting problems and make recommendations on fixing them."

Subject: The Side By Side Project

I have made the following suggestion to Tom:

Tom:

I am not so sure having an election official do the side by side is the best way to go. This issue is not about election officials. It is about DC rat hole politics and the presentation of research "data."

I offer the following names for consideration.

Bruce Cain and Raymond Wolfinger. Both teach at Berkeley although Wolfinger retired last spring. Both are considered at the top of the poli sci hierarchy, in terms of competence and status. I am told they are very good scholars who do not have a reputation for partisanship, although they have been involved in "the real world of politics."

Here are their Web sites:

So, do we now wait until a final decision is made about the release of the report, in which we might say, "EAC has voted to release the report with a side by side...etc."?

At any rate, I urge that if we do decide to release the report, that we still send this out now and then send the side-by-side when it is ready.

Subject Chair Requests Internal Review

Commissioners,

The chair has asked me to provide you with the memo she just submitted to Curtis Crider, requesting a review of our contracting procedures surrounding the voter identification and vote fraud and voter intimidation research projects. She has asked me to write a press release about this decision, which I will send to you shortly. She requests that we incorporate the commission's request into the letter to the advisory boards and to Congresswoman Lofgren. She also requests that we respond to Sen. Feinstein's letter, letting her know that we are working to comply with her request, but we wanted to alert her to the action we've taken.

I am going to circulate this to the staff so everyone will be aware of this action. Please let me know if you have any questions, and I will have a press release for your review shortly. Attached to the press release will be this memo, letters from Members of Congress regarding this issue, and the recent statements from Congressmen Hinchey and Serrano.

April 16, 2007

**MEMORANDUM**

**To:** EAC Inspector General Curtis Crider  
**Fr:** EAC Chair Donetta Davidson  
**Cc:** Commissioners Rodriguez, Hillman and Hunter, Tom Wilkey, and Julie Hodgkins  
**RE:** EAC requests review of contracting procedures

On Friday, April 13, each of my three colleagues – Rosemary Rodriguez, Gracia Hillman, and Caroline Hunter -- agreed with my recommendation that we issue the following formal request to the Commission’s Office of Inspector General to review the circumstances surrounding two recent EAC research projects – vote fraud and voter intimidation and voter identification.

**Background**

The U.S. Election Assistance Commission (EAC) is an independent, bipartisan Commission created by the Help America Vote Act (HAVA) of 2002.

EAC develops guidance to meet HAVA requirements, adopts voluntary voting system guidelines, accredits voting system test laboratories, certifies voting systems and audits the use of HAVA funds. HAVA also directs EAC to maintain the national mail voter registration form developed in accordance with the National Voter Registration Act (NVRA) of 1993.

The Commission serves as a national clearinghouse and resource of information regarding election administration. It is under the Commission’s clearinghouse role that research projects are conducted with the goal of providing information that will lead to improvements in election administration, as well as inform the public about how, where and when we vote.

The voter identification research was conducted by Rutgers, the State University of New Jersey, through its Eagleton Institute of Politics (“Contractor”). The contract, awarded in May 2005, required the Contractor to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches. Last month, the commission voted unanimously not to adopt the report, citing concerns with its methodology, but voted to release all of the data provided by the Contractor.

The vote fraud and voter intimidation research was conducted by Tova Wang and Job Serebrov (“Consultants”). The contracts, awarded in September 2005, issued to these Consultants tasked them with defining the terms vote fraud and voter intimidation and providing recommendations how to conduct extensive research in the future on these topics. The contract stated that the Consultants were responsible for “creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.”

**Review Request**

The actions taken by the Commission regarding both the voter identification and the vote fraud and voter intimidation research projects have been challenged. Specifically, Members of Congress, the media, and

the public have suggested that political motivations may have been part of the Commission's decision making process regarding these two projects. Also, the Commission has been criticized for the amount of taxpayer dollars that were spent on these two projects, as well as how efficiently these projects were managed.

The Commission takes these allegations very seriously, and we request that you fully review the following issues and provide the Commission and the Congress with a report of your findings as soon as possible. The Commission stands ready to assist you in these efforts and will provide whatever information, including memos, emails and other documents you will need. Cooperating with your review will be the staff's top priority.

1. Current Commission policy regarding awarding and managing research contracts.
2. Issuance and management of the vote fraud and voter intimidation contract.
3. Circumstances surrounding the receipt of information from Consultants regarding the vote fraud and voter intimidation project.
4. Circumstances surrounding staff efforts to write a final report for Commission consideration.
5. Identification of staff members who assisted in the editing and collaboration of the final vote fraud and voter intimidation report for Commission consideration.
6. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the vote fraud and voter intimidation project.
7. Circumstances surrounding Commission discussion and deliberation of final adoption of *Election Crimes: An Initial Review and Recommendation for Further Study*.
8. Issuance and management of the voter identification contract.
9. Circumstances surrounding the receipt of information from Contractor regarding the voter identification report.
10. Identification of staff members who assisted in the editing, collaboration, and recommendation to the Commission regarding final adoption of the voter identification report.
11. Staff and/or Commissioner collaboration with political entities or other federal agencies regarding the voter identification project.
12. Circumstances surrounding Commission deliberation whether to adopt a final voter identification report.

For your information, I have attached statements and related correspondence from Members of Congress, and a statement issued by the Commission regarding the criticism.

It is our hope that your findings will instruct us how to move forward in a more efficient, effective and transparent manner. The Commission takes its mandates under HAVA very seriously, and this small Commission has an enormous amount of work to conduct, including testing and certifying voting equipment, providing guidance and assistance to election officials, and auditing the proper use of the \$3.1 billion that was distributed under HAVA.

We look forward to your findings so that we may take the actions necessary to improve the way we conceive research projects, manage research contracts, and make decisions regarding the final release of data provided to the Commission from a third party.

Subject Requested background on Florida Request

Commissioners,

Earlier, I was asked to provide information relative to the history of how the Florida request came to the Commission and to provide any additional information that Florida has provided since that initial request. First, here is the time line of how the request came to us:

3/12/2007 - Bob West of the Florida Legislature requested information from Edgardo regarding whether HAVA funds could be used to replace DREs with touch screen systems.  
3/13/2007 - Amy Tuck of the Florida Secretary of State's office sent the same request  
3/14/2007 - Edgardo, Julie and Jeannie had a conversation with Amy Tuck via telephone to discuss the question that she posed; she followed that up with an email.  
4/5/2007 - Amy Tuck requested a written opinion as to the questions that had been asked previously in the telephone conversation and via subsequent emails  
4/16/2007 - Julie, Tom and Edgardo had a telephone conference with the FL Secretary of State (Kurt Browning) and a host of others from his office and from the State Legislature  
4/16/2007 - FL Secretary of State's office sent via email additional information requested during the conference call with the Secretary of State and others  
4/25/2007 - FL Secretary of State provided additional information regarding the \$5,000,000 grant program for the purchase of ballot on demand systems  
4/30/2007 - FL Secretary of State provided additional information on what systems are replaced by the \$5,000,000 grant program.

Attached below are documents 1) containing emails between EAC (Edgardo) and FL; 2) containing information provided by the FL Secretary of State's office on 4/16/2007 -- 2 documents; and 3) containing information provided by the FL Secretary of State's office on 4/25/2007.

Subject RE: Response: Using HAVA funds to replace voting equipment

History This message has been replied to and forwarded.

Edgardo,

What are the restrictions on the use of the interest from the HAVA money and were do I find those rules. Can we use the interest to replace Florida DRE's with optical scan?

Thanks

Bob West - Legislative Analyst  
Florida House of Representatives  
Ethics and Elections  
402 HOB  
Tallahassee, FL 32399-1300

---

**From:** ecortes@eac.gov [mailto:ecortes@eac.gov]  
**Sent:** Monday, March 12, 2007 2:41 PM  
**To:** West, Bob  
**Subject:** Response: Using HAVA funds to replace voting equipment  
**Importance:** High

Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

**Sources and Uses of HAVA Funds**

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter

027683

registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

- A. Complying with the requirements under title III.
- B. Improving the administration of elections for Federal office.
- C. Educating voters concerning voting procedures, voting rights, and voting technology.
- D. Training election officials, poll workers, and election volunteers.
- E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
- F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
- G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
- H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were

## HAVA FUNDING

- May, 2001 Florida Legislature passes the Florida Election Reform Act that required replacement of punchcard or lever voting systems
- August, 2001 Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems  
Payment formula: \$3750 for large counties, \$7500 for smaller counties (per polling place as reported by counties)  
Total to counties from the state: \$12,046,875.00  
*(See Attachment A for county by county breakdown)*  
*Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.*
- July, 2002 Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems  
Payment formula: \$3750 for large counties, \$7500 for smaller counties (per polling place as reported by counties)  
Total to counties from the state: \$12,046,875.00  
*(See Attachment B for county by county breakdown)*  
*Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.*
- Total state payout for the replacement of punchcard or lever voting systems: \$24,093,750.00
- October, 2002 HAVA is passed by Congress
- April, 2003 Receipt of HAVA Funding  
Initial Payment  
101: \$5,000,000.00  
102: \$0  
251: \$0
- June, 2003 Receipt of HAVA Funding  
Balance of Section 101  
102 Funds  
101: \$9,447,580.00  
102: \$ 11,581,377.00
- July, 2003 Distribution of HAVA funding to the state for section 102 purchases (replacement of punchcard or lever voting systems)  
Total: \$11,500,000.00

Total HAVA funding from section 102 to replace punchcard or lever voting systems: \$11,500,000.00

June, 2004

Receipt of HAVA Funding  
Year 2003 Title II Funding  
251: \$47,416,833.00

September, 2004

Distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places  
Grant award to 51 counties to get in to compliance  
Total: \$11,600,000.00 from 251 funding  
(See Attachment C for county by county breakdown)

December, 2004

Receipt of HAVA Funding  
Year 2004 Title II Funding  
251: \$85,085,258.00

May, 2006

Final distribution of HAVA funding to counties for compliance with Section 251 (ADA) for accessible machines at polling places  
Grant award to 16 counties that were already in compliance  
Total: \$13,469,378.54 from 251 funding  
(See Attachment D for county by county breakdown)

Total distribution for Section 301 purposes for accessible voting systems from Section 251 funding: \$25,069,378.54

April, 2007

Discussion regarding payment of Governor's proposed legislation with HAVA funding

Governor's proposal:

1. Optical scan in all precincts and early voting sites  
Estimated cost to state: \$22,861,850.00
2. One VVPAT at each precinct for ADA purposes  
Estimated cost to state: \$7,511,360.00
3. One VVPAT at each early voting site for ADA purposes  
Estimated cost to state: \$304,850.00
4. Ballot on demand grant to counties that were 100% touchscreen at early voting sites in 2006 general election (to be funded per voter)  
Grant amount: \$5,000,000.00

Total: \$35,678,060.00\*

\*Please note that counties will have additional costs.

**FY 2004-05 Appropriation for Voting Systems Assistance** **11,600,000**

**Average cost per machine** **4,515.38**

From funds in Specific Appropriation 28711, \$11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place. No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State: 1) the number of precincts in the county; 2) the number of polling places in the county; 3) the number of voting machines the county has that meet the disability requirement; 4) the county's plan for purchasing the DRE's; and 5) the date that the county anticipates being in compliance.

The Department of State will determine the number of DRE's needed in each county based on the certifications provided by the supervisors of elections. Any county that receives funds from Specific Appropriation 28711 that is not in compliance with the accessibility requirements in Section 301(a)(3) Title III of the Help America Vote Act by January 1, 2006, shall be required to return those funds to the State.

April 25, 2007

Dear Mr. Wilkey,

This letter is in response to your request dated April 25, 2007 regarding additional information. If we understand your questions correctly, the following are our responses.

The proposed \$5 million cost for ballot on demand is separate from the proposed \$22.8 million cost to provide for optical scan voting systems to replace touchscreen systems at precinct and early voting sites. The optical scan voting systems at early voting sites will be used in conjunction with ballot on demand.

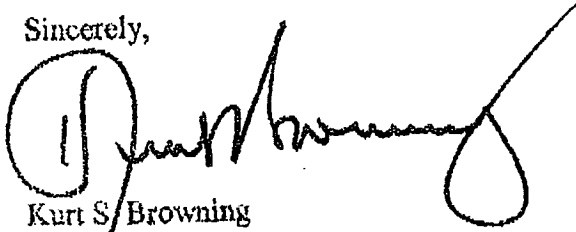

The ballot on demand system, used in conjunction with optical scan at early voting sites, is replacing touchscreen voting systems that were "partially" financed with HAVA funds. Please note that when Florida counties originally replaced punchcard and lever voting systems with touchscreen voting systems, the counties funded a majority of the cost. Florida reimbursed itself with HAVA Section 102 funds but that only constituted a small portion of the overall cost for the voting systems. For further explanation, please see the attached timeline regarding HAVA funding in Florida.

In response to your third question, I would like to restate it to be sure that I am answering the proper question. I believe your question to be: If Florida is replacing touchscreen (HAVA funded) voting systems with optical scan systems, are we also adding ballot on demand to this scenario? The answer to this question as stated is yes as it pertains to early voting sites only. The proposal is to provide optical scan voting systems that, for some early voting sites, would work in conjunction with ballot on demand. The larger counties in Florida do not have the capacity at early voting sites to provide ballot management for the voluminous ballot styles that would be required to be provided at early voting sites. Therefore, ballot on demand alleviates this problem.

As a final note, I would like to reiterate that Florida is proposing to leave one touchscreen voting system, upgraded with a voter verifiable paper audit record, in each precinct and early voting site.

If you have any further questions or need any further information, please do not hesitate to contact me. I look forward to seeing you in Washington, D.C. next week.

Sincerely,

Kurt S. Browning  
Secretary of State

KSB/at

**HAVA FUNDING**

- May, 2001 Florida Legislature passes the Florida Election Reform Act that required replacement of punchcard or lever voting systems
  
- August, 2001 Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems  
 Payment formula: \$3750 for large counties, \$7500 for smaller counties (per polling place as reported by counties)  
 Total to counties from the state: \$12,046,875.00  
*(See Attachment A for county by county breakdown)*  
*Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.*
  
- July, 2002 Contracts sent to counties for partial payment from state general revenue fund to replace or reimburse punchcard and lever voting systems  
 Payment formula: \$3750 for large counties, \$7500 for smaller counties (per polling place as reported by counties)  
 Total to counties from the state: \$12,046,875.00  
*(See Attachment B for county by county breakdown)*  
*Please note: County contracts to replace punchcard and lever voting systems were well in excess of this state funded formula.*

Total state payout for the replacement of punchcard or lever voting systems: \$24,093,750.00
  
- October, 2002 HAVA is passed by Congress
  
- April, 2003 Receipt of HAVA Funding  
 Initial Payment  
 101: \$5,000,000.00  
 102: \$0  
 251: \$0

Sorry about the yahoo address thing -- again. For some reason my system insists on picking up your yahoo address. I thought I deleted that address but apparently when there was a system restoration on my computer, it some how revived it.

At any rate, here is the original email and draft letter.

All:

Attached is a draft of the letter that I will send to Rep. Carolyn Maloney in response to the questions she raised to me at the April 18 hearing.

The draft represents consensus among Gavin, Matt, Brian and me. We know that consensus, while adding value, also adds time. I was hoping to get this letter out the door by Friday of last week but obviously that did not happen.

Nonetheless, here it is. I plan to send the letter by the end of this week so I ask that you give me your comments and edits by Close of Business tomorrow (Thursday).

Thanks,  
Gracia M. Hillman

**Deliberative Process  
Privilege**

The Honorable Carolyn Maloney  
United States House of Representatives  
2331 Rayburn House Office Building  
Washington, DC 20515

Dear Representative Maloney:

I am writing this letter to follow up on a conversation I had with your staff on April 23, 2007. In this conversation we clarified some of the concerns you raised in the April 18<sup>th</sup> hearing of the Subcommittee on Information Policy, Census, and National Archives, *Ensuring Fairness and Accuracy in Elections Involving Electronic Voting Systems*.

During the hearing, you indicated that you would like further explanation as to why the U.S. Election Assistance Commission (EAC) did not immediately release its Interim Accreditation Program Assessment Reports on CIBER Labs, Inc. You have expressed concern that the language in the CIBER Assessment Reports, which state that the laboratory's test reports do not provide sufficient documentation to allow a reviewer to determine if all testing was completed, was significant and should have been immediately publicized. I appreciate the opportunity to address your question.

The CIBER Assessment Reports are a part of EAC's temporary Interim Laboratory Accreditation Program. This interim accreditation program was a stop gap measure to serve elections officials for the November 2006 federal elections while EAC waited for the National Institute of Standards and Technology (NIST) to technically review and recommend laboratories to us, per HAVA.

The laboratory accreditation process is a review of a laboratory's current policies, capabilities, management, personnel and procedures in order to determine its ability to comply with a set of program standards. In operating its temporary program, EAC did not create new methodology, but followed international standards, practices and processes in consultation with NIST, which operates the National Voluntary Laboratory Accreditation Program (NVLAP). Although NVLAP did not routinely make their laboratory assessment reports public, EAC always intended to...

027465

release its assessment reports and was going to do so when a final decision on accreditation had been made.

Ultimately, the EAC did not expedite the release of the CIBER Assessment Reports, because they did not conclude that a specific voting system was compromised—only that CIBER's test reports did not document testing sufficient to satisfy applied standards. Any conclusion as to whether proper testing was in fact done would have been made by the then governing certification authorities (the National Association of State Election Directors and the States) prior to the grant of certification. These certification bodies would have had access to the original test reports and voting systems. Nevertheless, we recognize that the public expects a very high level of transparency in the testing of voting systems. The assessment reports on CIBER and all labs under review have been posted on EAC's website. Additionally, in a letter dated January 12, 2007 (attached), EAC urged NIST to make the laboratory assessment work that it does for EAC as transparent as possible. As a result, NIST has decided that it will publish its assessment reports on its web site. A NIST fact sheet describing its program is also attached.

In addition, a broader concern has been raised by you, the General Accounting Office (GAO) and others regarding EAC's role as a clearinghouse of information. EAC is routinely presented third party reports, papers and findings. Often, the individuals who write or pass along these documents demand that EAC publish or forward them to our stakeholders. The nature, source and quality of these reports vary widely. As I am sure you can appreciate, EAC must be careful that its actions do not appear to be an endorsement of a non-federal entity. Further, as a body that accredits testing laboratories and certifies voting systems, EAC has a duty to remain both impartial and consistent with its published standards. And perhaps most importantly, EAC must ensure that any information it disseminates to the public is accurate and reliable so that we are not perpetuating unsubstantiated or erroneous information.

At the same time, EAC has heard loud and clear that we should move post haste to figure out how it can reasonably, timely and responsibly address these matters. Along with EAC's other commissioners and staff, I have taken a personal and direct interest in this matter so that we can expedite this part of our planning/program implementation process. We will keep you informed of our progress and the decisions we make.

EAC's laboratory accreditation and voting system testing and certification programs are firsts for the Federal Government. All policies, procedures and practices for this first time venture must be developed, vetted, adopted and published before the programs can be implemented. As I am sure you can appreciate, that work takes time and resources. In the context of the enormity of this work and the competing demands we face, time and resources are two things of which EAC has very little. Despite that fact, we have made enormous progress to administer and audit \$3 billion

in requirements payments to states; develop and implement voting system guidelines, and laboratory accreditation, voting system testing and certification programs; provide management guidelines and guidance to the states; and develop our clearinghouse.

I hope this explanation helps to assure you that EAC is committed to responsibly providing as much information to election officials and the public as is possible. EAC is committed to transparency and public trust. We would welcome the opportunity to further brief you on our work and the progress that has been made to date. In the meantime, please be sure to let me know if you need additional information or further clarification and again, thank you for your questions and interest.

Sincerely,

Gracia Hillman  
Commissioner

**Subject:** Re: The Side By Side Project

I am going to have to learn the DC vernacular--"rat hole" is a new term for me. I think Bruce is pretty identified w Dems so I think there may be push back on him--I think that's why Tom was going for an EO, to get one of the non-partisan folks involved. We should get the best person for our audience--so I think we should identify our audience and I think that is the Congress.

Subject: The Side By Side Project

I have made the following suggestion to Tom:

Tom:

I am not so sure having an election official do the side by side is the best way to go. This issue is not about election officials. It is about DC rat hole politics and the presentation of research "data."

I offer the following names for consideration.

027468

Bruce Cain and Raymond Wolfinger. Both teach at Berkeley although Wolfinger retired last spring. Both are considered at the top of the poli sci hierarchy, in terms of competence and status. I am told they are very good scholars who do not have a reputation for partisanship, although they have been involved in "the real world of politics."

Here are their Web sites:

**U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW - Suite 1100  
Washington, DC 20005**

MEMORANDUM

**TO:** Commissioner Hillman, Commissioner Hunter, Commissioner Rodriguez, Thomas Wilkey, Juliet Hodgkins and Jeannie Layson

**FROM:** Donetta Davidson

**DATE:** April 3, 2007

**RE:** New Commissioner Subcommittee

As a supplement to the memo issued on March 19<sup>th</sup> regarding the creation of commissioner subcommittees, I would like to propose the creation of one additional subcommittee.

Commissioners Hunter and Rodriguez have expressed their interest in the National Voter Registration Act (NVRA) and have volunteered to serve on a subcommittee to work on a number of issues we need to complete in the next few months.

Their willingness to take on this important subject will assist the staff in developing strategies to complete our work in a timely fashion.

**RECOMMENDATION:**

Create a new subcommittee on NVRA issues.

Subject Research Scrubbing

Boss:

Attached is my list of the scrubbed "must" provisions in the statute. Beyond that, I have provided my suggestion on the long lines, and on the 241 section, have BOLDED priority research, and have included notes on what might go down on certain topics.

Some comments here are just for you, so when I come in, I can clean up the first section if you want to make some copies for the other COMmissioners, please let me know.

Hope this helps.

Amended Research Topics Memo.doc

027472

Title III, Subtitle B requires that the EAC shall provide guidance to the states on all the requirements found in HAVA, Title III, Subtitle A.

- 1) *HAVA 301 (a)(4) & (5)*: Legal research to be performed to determine whether the Voluntary Voting System Guidelines meet the “Alternative language accessibility” and “Error rates” legal standards found in sections of 301 (a).
- 2) *HAVA 302 (b)*: Voting Information Requirements. Research to be completed on how the state “caused voting information” to be publicly posted, the kinds of information displayed, and the relative effectiveness of that signage. [Potential efficiencies with Design for Democracy/AIGA Research on Signage efficiency.]
- 3) *HAVA 303(a) (8) (A-C)*: Research/Work with the Social Security Administration to understand the process by which states link to the SSA system to verify the last-4 digits of the registrant’s Social Security number. [Need to examine system, understand how it works, understand how rejected numbers are treated by the states, and provide guidance to the states on how to treat those “rejects.”]
- 4) NVRA Form
  - a. Update of the form; examine form for clarity, usability, electronic capabilities, internet voter registration. [Potential work with Design for Democracy; potential ideal ballot design templates.]
  - b. Examine effectiveness under the NVRA. The EAC is now the designated agency that looks at the effectiveness of the NVRA. There have been complaints from advocacy groups that the states have not fully developed the proper distribution of voter registration forms through the Voter Registration Agencies (as defined by NVRA).
- 5) Help America Vote College Program. EAC “shall create” (still in existence.)
  - a. Research on the HAV College Program “Create a Poll Worker Program” Kit that can be developed/distributed to colleges, to inform them of the best method of creating poll worker volunteer organizations. Work with design organizations to plan/create such programs.
  - b. Research on the best methods to train college pollworkers, potentially through partnership with the Pollworker Institute (Warren, Collins-Folely).
  - c. Potential use for VA, NJ Gubernatorial elections in Nov. 05.
  - d. Focus on research on how to better comply with *HAVA Sec. 501 (b)(2)*, which requires the EAC to take actions (as appropriate) to encourage State and local governments to use the services of the student participating in the Program. [Perhaps through the Pollworker Institution, or certain organizations that specialize in state/local volunteer programs.]
- 6) *HAVA 205 (b)*: Information from other Federal Agencies. “The EAC may secure directly information from any Federal Department or agency such information as the Commission considers necessary to carry out this Act. Upon request of the Commission, the head of such department or agency shall

furnish such information to the Commission.” What information would be necessary, and from what agencies? File material from FEC? DOD UOCAVA voter statistics? US Commission on Civil Rights Florida testimony? There is a lot of essential areas that we might want for historical or clearinghouse function to have in-house, for research purposes. Research should be done as to find out the kinds and type of information that the Commission might need in carrying out duties.

- 7) [QUESTION FOR RM: READ CAREFULLY!! HAVA Sec. 703(b). I know that we were working on some form for UOCAVA, but it's been a while since I've reviewed the report. 703(b) states that we, in conjunction with the Standards Board and Board of Advisors, “**shall** develop a standardized format for the reports submitted by states,...and **shall** make the format available to the States and units of government submitting such reports.] Have we researched/developed this form? I don't have my work on me here.
- 8) [ADDITIONAL QUESTION: 801(a) States that the EAC shall be transferred all the functions which the Office of Election Administration exercised under the date of their authority from the FEC. What specific authority did the OEA have, under the FEC, or administrative rule?

My focus in a quick review of the research topics are:

- 1) What are the changes that HAVA makes to our elections system, and how can we prepare election administrators for that change?
- 2) What were the major problems individual voters and election officials had on Election Day 2004?

It strikes me that we need to tackle the issue that will have the most concern for most Americans.

On those issues that face the elections process; you would want to tackle the retrospective and the prospective. Aside from the topic below, I would recommend that:

- 1) Research be done on the reasons and rationale for long lines that may occur on election day, and what can be done before election day to prepare for long lines. [Handles 2004 problems as well as potentially consolidated polling places.]

**HAVA Research Action [Priority Actions BOLDED]:**

- (1) Methods and mechanisms of election technology and voting systems used in voting and counting votes in elections for Federal office, including the over-vote and under-vote notification capabilities of such technology and systems.

**(2) Ballot designs for elections for Federal office.**

(3) Methods of voter registration, maintaining secure and accurate lists of registered voters (including the establishment of a centralized, interactive, statewide voter registration list linked to relevant agencies and all polling sites), and ensuring that registered voters appear on the voter registration list at the appropriate polling site.

(4) Methods of conducting provisional voting.

**(5) Methods of ensuring the accessibility of voting, registration, polling places, and voting equipment to all voters, including individuals with disabilities (including the blind and visually impaired), Native American or Alaska Native citizens, and voters with limited proficiency in the English language.**

(6) Nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office.

**(7) Identifying, deterring, and investigating methods of voter intimidation.** *[Chair will likely push this-compromise for the voter fraud provisions.]*

**(8) Methods of recruiting, training, and improving the performance of poll workers.**

**(9) Methods of educating voters about the process of registering to vote and voting, the operation of voting mechanisms, the location of polling places, and all other aspects of participating in elections.**

(10) The feasibility and advisability of conducting elections for Federal office on different days, at different places, and Public information. during different hours, including the advisability of establishing a uniform poll closing time and establishing—

(A) a legal public holiday under section 6103 of title 5, United States Code, as the date on which general elections for Federal office are held;

(B) the Tuesday next after the 1st Monday in November, in every even numbered year, as a legal public holiday under such section;

(C) a date other than the Tuesday next after the 1<sup>st</sup> Monday in November, in every even numbered year as the date on which general elections for Federal office are held; and

(D) any date described in subparagraph (C) as a legal public holiday under such section.

(11) Federal and State laws governing the eligibility of persons to vote.

(12) Ways that the Federal Government can best assist State and local authorities to improve the administration of elections for Federal office and what levels of funding would be necessary to provide such assistance.

(13)(A) The laws and procedures used by each State that govern—

- (i) recounts of ballots cast in elections for Federal office;
  - (ii) contests of determinations regarding whether votes are counted in such elections; and
  - (iii) standards that define what will constitute a vote on each type of voting equipment used in the State to conduct elections for Federal office.
- (B) The best practices (as identified by the Commission) that are used by States with respect to the recounts and contests described in clause (i).
- (C) Whether or not there is a need for more consistency among State recount and contest procedures used with respect to elections for Federal office.

(14) The technical feasibility of providing voting materials in eight or more languages for voters who speak those languages and who have limited English proficiency.

**(15) Matters particularly relevant to voting and administering elections in rural and urban areas. [POTENTIAL: Long lines issues fits in here]**

(16) Methods of voter registration for members of the uniformed services and overseas voters, and methods of ensuring that such voters receive timely ballots that will be properly and expeditiously handled and counted.

(17) The best methods for establishing voting system performance benchmarks, expressed as a percentage of residual vote in the Federal contest at the top of the ballot.

(18) Broadcasting practices that may result in the broadcast of false information concerning the location or time of operation of a polling place.

(19) Such other matters as the Commission determines are appropriate.

Proposed Amendments:

1) Amendment to Article V, Section 1(e)(ii):

A majority of Executive Members shall be present for a quorum at such time as a roll call is taken whether by physical presence, by telephone conference call, or virtual (electronic media) meeting; and to require a quorum re-establishment prior to action being taken. *Postponed and referred to the Bylaws Committee.*

Recommendation: Motion to strike amendment offered under Article V, Section 1(e)(ii), and insert in Article V, Section 1(e)(iii), the words "roll call" prior to the word, "vote." The Executive Board shall agree to actions by a majority roll call vote of seated members of the Executive Board. *Motion passed.*

2) Amendment to Article VIII, Section (3)(a):

The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws, limiting the term present and voting to mean only those members present at such time as the roll call is taken whether by physical presence or presence at a virtual meeting room meeting. *Postponed and referred to the Bylaws Committee.*

Recommendations:

Motion to amend Article VIII, Section 1(a): A quorum shall be established when 56 Standards Board members are present for a meeting as determined by a roll call or quorum call of the Standards Boards members. *Motion passed.*

Motion to amend Article VIII, Section 3, by adding Article VIII, Section 3(c): Votes taken during meetings conducted by conference call and through virtual (electronic media) means shall have a quorum established prior to voting. *Motion passed.*

3) Motion to refer Article VII, Section 1 to the Bylaws Committee for review. *Referred to the Bylaws Committee.*

Recommendation: Send the matter to the General Counsel for a more detailed analysis and report. *Motion passed.* Carol Johnson

4) Motion to allow the Bylaws Committee to make corrections to clerical errors. *Motion passed.*

Items Pending Consideration by Bylaws Committee  
As of 13 March 2007

The Nominating Committee has referred the following items to the Bylaws Committee for further consideration:

- How elections will be certified in the case of a tie vote; for example between the third and fourth candidates when only three can be elected. *straw poll, coin toss Tim Hurst - language*
- How elections will be certified if the elected candidates tip the balance of party affiliation on the Executive Board, as specified in HAVA (not more than five (5) of the same political party), if between existing + those elected, 6 or more of same party - Toni  
Whether Unaffiliated, Independent and Nonpartisan are one in the same or three separate categories of "party" affiliation. (HAVA Section 213 (c) requires a nine (9) member Executive Board. Not more than five (5) members may be of the same political party.) - Toni

either next eligible, runoff, or seat-preference to seat 5th

- ✗ Whether the bylaws should establish regions to assure geographical representation on the Executive Board. - *let membership decide*  
*No action taken*

deadline for absentee what about when not enough nominations?

- Whether there should be nominations from the floor for Executive Board elections. *Preference for closing nominations + having absentee voting Δ Article II + eliminate proxy for exec.*
- Should the Election Certification Committee (for Executive Board elections) be stipulated in the bylaws. → *Yes*

- Whether proxy voting should be allowed.

The following item was left pending from the February Standards Board meeting:

- Frequency of meetings of EAC Standards Board

Article VI, 1(a-b)

Article VIII 2(d) add language that proxy voting not allowed for St. Bd. exec. elections

- By middle of June - meet in month 4/23rd week
- ① Where should Amendments go?
  - ② ~~Research issue of whether state law defines~~

(860) 573-5728

**EAC Standards Board  
Bylaws Committee  
March 14, 2007**

**Summary Notes**

**Call to Order:**

Chair Tonni Bartholomew convened the meeting at 1:07 p.m.

**Members Present:**

Tonni Bartholomew, Marilyn Avery, Joanne Armbruster, and Tim Hurst

**Members Not Present:**

Kevin Kennedy and Howard Sholl

**Other Standards Board Members Present:**

Peggy Nighswonger, *ex officio*

**EAC Personnel Present:**

Commissioner Gracia Hillman (Designated Federal Officer), Tamar Nedzar (EAC Law Clerk) and Sheila Banks (Spec Asst to Comm Hillman)

**Next Standards Board Meeting**

Commissioner Hillman reported that the date of the next Standards Board meeting would depend on the timeline for issuing the next iteration of the VVSG. The Technical Guidelines Development Committee (TGDC) plans to send its recommendations to EAC in July. However, congressional legislation may impact current progress, which would impact when the next Standards Board meeting would be held.

As it stands, the earliest time a meeting could take place is October 2007. Subsequently, any proposed amendments from the Bylaws Committee would have to be sent to the full Standards Board 70 days before the meeting (early July).

**Proposed Amendment Items**

The Nominating Committee referred the following items to the Bylaws Committee for further consideration:

**Item #1** How elections will be certified in the case of a tie vote; for example between the third and fourth candidates when only three can be elected.

**Action** Tim Hurst will research state election laws and draft wording that would address the tie vote problem. Tonni Bartholomew will find where the wording will go in the newly adopted Bylaws.

**Item #2** How elections will be certified if the elected candidates tip the balance of party affiliation on the Executive Board, as specified in HAVA (not more than five (5) of the same political party).

**Action** All Bylaws Committee members agreed that runoff elections were not the solution to the tip the balance scenario. The committee also agreed that the solution should be placed in the bylaws. Tonni Bartholomew volunteered to research and submit recommendations.

**Item #3** Whether Unaffiliated, Independent and Nonpartisan are one in the same or three separate categories of "party" affiliation and if HAVA Section 213 should apply to that category. (HAVA Section 213 (c) requires a nine (9) member Executive Board. Not more than five (5) members may be of the same political party.)

**Action** The Bylaws Committee agreed that unaffiliated and nonpartisan meant the same thing – not affiliated with a political party. Tonni Bartholomew will research and bring definitions back to the committee.

**Item #4** Whether the bylaws should establish regions to assure geographical representation on the Executive Board.

**Action** Commissioner Hillman reported that the Nominating Committee could go either way on the geographical representation item. The Bylaws Committee decided to not recommend establishing regions and agreed that as long as there is visual representation (i.e. a map) showing the geographic location of current Executive Board members and nominees, Standards Board members would be able to cast their votes with geographical representation in mind.

**Item #5** Whether there should be nominations from the floor for Executive Board election.

**Action** If nominations from the floor were eliminated, absentee voting could take place and there would no need for proxy voting for elections. Issues resulting from this elimination were identified by the Bylaws Committee and will be researched by Tamar Nedzar and Commissioner Hillman:

- not receiving a sufficient number of nominations
- deadline for sending and receiving absentee ballots

Additionally, changes would have to be made to Article V of the bylaws to address those issues.

*No proxy voting  
absentee voting procedure  
No nom. from floor*

**Item #6** Should the Election Certification Committee (for Executive Board elections) be stipulated in the bylaws.

**Action** The Bylaws Committee agreed that the Election Certification Committee should be appointed at the time of the Standards Board meeting. Language will need to be drafted to reflect this decision. Commissioner Hillman will have EAC determine if the new language goes into Article 5 or Article 9 of the current bylaws.

**Item #7** Whether proxy voting should be allowed.

**Action** Proxy voting would be allowed for business issues. EAC will draft language to be added to Article 8 of the current bylaws.

### **Timeline for Amendments**

It was determined that proposed amendments for the items referred to the Bylaws Committee should be completed by mid-June. Tamar Nedzar will research all sections of the bylaws to identify where the recommended amendments will go.

### **Pending Item**

The issue of the bylaws specifying the frequency of Standards Board meetings was left pending from the February board meeting. Tonni Bartholomew reviewed the EAC General Counsel's memo on this issue, a copy of which will be provided to bylaws committee members. The committee agreed that this should be handled through a resolution and not a bylaws amendment.

The next committee meeting will take place during the week of April 23.

The meeting adjourned at approximately 1:50 p.m. (EDT).

- Look @ draft minutes from May 2006 meeting - incorporate comments into draft bylaws
- Article III - December of every year, inform appointing authority who serves on St. B.
  - also as soon as EAC knows of vacancy
- Resolution 1x/year
- Amendment by way of substitution or other language
  - look @ legislative language

### Procedures

- Notice of meeting to include when bylaws amendments are due.
- See X(2)

## BYLAWS

### UNITED STATES ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

The U.S. Election Assistance Commission Standards Board, hereinafter referred to as Standards Board, embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

#### Article I. Authority

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], as such statutes may be amended from time to time, the Standards Board has been granted its authority through its charter with the United States Election Assistance Commission (EAC) (filed with Congress on June 14, 2004).

#### Article II. Objectives:

The Standards Board will:

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations described in Section 241 of Title II of HAVA, as required by HAVA or as may be developed by EAC.
2. Provide guidance and advice to the EAC on a variety of topics related to the administration of elections for Federal office.
3. Function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act (FACA); and all other applicable Federal laws.

#### Article III. Standards Board Membership

1. Pursuant to Section 213(a) of HAVA, the Standards Board shall consist of 110 members, as follows:
  - a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
  - b. Fifty-five (55) shall be local election officials selected as follows:
    - ii. Each state's local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
    - iii. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.

- c. The two Standards Board members who represent the same state may not be members of the same political party.

**Article IV. Standards Board Member Terms of Service and Vacancies**

- 1. The chief election official of each state shall notify the EAC and Executive Board of the Standards Board within five (5) business days of any vacancy or membership changes to the Standards Board.
- ~~2. Members of the Standards Board shall serve for a term of two (2) years and may be reappointed.~~
- 3. Vacancy appointments to the Standards Board shall be made in the same manner as the original appointment pursuant to HAVA. → words from HAVA

accordance with 213(a) of HAVA  
Spell out Use language from Article III

**Article V. Executive Board of the Standards Board**

- 1. Pursuant to Section 213(c) of HAVA, the Standards Board shall select nine (9) of its members to serve as the Executive Board of the Standards Board as follows:
  - a. Membership.
    - i. Not more than five (5) members of the Executive Board may be state election officials.
    - ii. Not more than five (5) members of the Executive Board may be local election officials.
    - iii. Not more than five (5) members of the Executive Board may be of the same political party.
  - b. Nominations.
    - i. The Nominating Committee shall solicit nominations for the Executive Board from Standards Board members. The Nominating Committee shall send to Standards Board members a solicitation no later than December 1<sup>st</sup> immediately prior to the expiration of any Executive Board member's term. The solicitations shall designate the address and form for submitting nominations.
    - ii. In the event of a vacancy on the Executive Board prior to the expiration of a member's term on the Executive Board, the Nominating Committee shall send to Standards Board members a solicitation no later than sixty (60) days before the next meeting of the Standards Board. The solicitations shall designate the address and form for submitting nominations.
    - iii. Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.
    - iv. Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than January 15 or in the event of a vacancy, the date indicated on the solicitation.
    - v. Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.

Reorganize

Expired End of Term + Vacancy + enumerate + enumerate

c. Elections.

1. Elections to the Executive Board shall be by secret ballot and shall take place at a meeting of the Standards Board.
2. The ballot shall be designed to enable Standards Board members to select candidates based on the following: (1) With which party the candidate affiliates, (2) whether the candidate is a state or local election official, (3) which state or territory the candidate represents, (4) whether the candidate was elected or appointed, and (5) in the case of state election officials, whether the candidate is a Secretary of State, a member of a Citizen Board, or a State Election Director. The ballot shall also include concise biographical information for each candidate.
3. For nominations following the first election (2005), not including any special elections to fill unexpired terms, two (2) of the three positions shall be local election officials. For nominations following the second election (2007), two of the three positions shall be for state election officials. The number of state and local nominations shall continue to alternate in subsequent elections.
4. Within thirty (30) days of an Executive Board election, the Executive Board members shall convene to elect a Chair, Vice-Chair, Secretary, and Parliamentarian.

d. Executive Board Members Terms of Service and Vacancies.

- i. The Chair of the Executive Board shall notify the EAC and Nominations Committee Chair within five (5) business days of any vacancy on the Executive Board.
- ii. Members of the Executive Board shall serve for a term of two (2) years and may not serve for more than three (3) consecutive terms.
- iii. Members of the Standards Board who have previously served on the Executive Board shall be eligible to be nominated to the Executive Board no sooner than two (2) years from the last term in which they served on the Executive Board.
- iv. The Chair, Vice-Chair, Secretary, and Parliamentarian shall not serve for a term of more than one (1) year. An Executive Board member shall not serve for two (2) consecutive terms for the same office, except in the case of a member serving the unexpired term of an office, in which case the member may be elected to the same office for the succeeding terms.
- v. In the event of a vacancy in the Executive Board, the remaining members of the Executive Board may appoint an interim member of the Executive Board until the next Standards Board meeting.
- vi. An Executive Board member may be removed from the Executive Board by a vote of two-thirds (2/3) of Standards Board members at a Standards Board meeting.

e. Meetings.

- i. Any two members of the Executive Board may call an Executive Board meeting by filing the original call of the meeting with the DFO, including the stated reason for calling the meeting.
- ii. A ~~majority~~ majority of Executive Board Members shall be present for a

- iii. The Executive Board shall agree to actions by a ~~majority~~ majority vote of the Executive Board. Proxy voting will not be allowed in Executive Board votes. Any member of the Standards Board may attend and participate in any and all discussions, but may not vote.

at discretion of chair

Article VI. Executive Board Duties

Each describes duties

- 1. Chair. The Chair shall:
  - a. Preside over all meetings of the Executive Board and Standards Board.
  - b. Appoint the chair of standing committees and any ad hoc committees of the Standards Board.
  - c. Establish the agenda for meetings of the Executive Board and Standards Board in consultation with the DFO.
  - d. Call meetings of the Executive Board and Standards Board in consultation with the DFO.
  - e. Act as the official liaison between the Standards Board and the EAC for all resolutions, recommendations, and information requests.
  - f. Serve as an *ex officio* member of all committees.

h. Chair shall appoint people to act as

- 2. Vice-Chair. The Vice-Chair shall:
  - a. Preside over meetings of the Executive Board and Standards Board in the Chair's absence.
  - b. Perform other duties as may be appropriate in the Chair's absence.
  - c. Assist the Chair from time to time as the Chair may designate.
  - d. In the event of a vacancy before the completion of the Chair's term, serve as the Chair.

- 3. Secretary. The Secretary shall:
  - a. Maintain the minutes at Executive Board and Standards Board meetings, with assistance from the DFO.
  - b. Assist the Chair at meetings and from time to time as the Chair may designate.

New word/Oversee preparation of transmission of minutes are approved, go to DFO for PRP

- 4. Parliamentarian. The Parliamentarian shall:
  - a. Ensure that all meetings are run in accordance with Roberts Rules of Order.
  - b. Fulfill the duties of the Parliamentarian in his or her absence.
  - c. Be responsible for time limitations on agenda items and holding speakers accountable to keep on time as listed (if at all) on the agenda.
  - d. Serve as the Chair of the Bylaws Committee.

- 5. Executive Board. Generally. The Executive Board shall:
  - a. Perform all duties required under HAVA and other applicable Federal law.
  - b. Appoint the membership of appropriate standing committees and ad hoc committees by soliciting interest from the Standards Board membership.
  - c. Meet as necessary to address issues of concern in between Standards Board meetings.
  - d. Approve the minutes of the Executive Board meetings.
  - e. Convene Standards Board meetings, including, but not limited to, meetings by conference call and virtual meetings. Such meetings must allow each Standards Board member to include their comments and view or hear others' comments.
  - f. Consult with the DFO to ensure compliance with federal statutes and other applicable regulations.

Chair shall appoint Parliamentarian to preside over Standards Board Meetings

in accordance w/ these bylaws ✓  
Assume forfeiture creates vacancy ✓  
Vacancies shall be filled in accordance with bylaws ✓

in at least one

- g. Attend Executive Board meetings, including, but not limited to, meetings by conference call and virtual meetings, ~~in accordance with section (5), subsection (d) of this Article.~~ In the event that an Executive Board member fails to attend ~~or participate~~ <sup>or participate</sup> in a minimum of twenty five percent (25%) of Executive Board meetings within the preceding twelve (12) month period, such Executive Board member shall forfeit his or her position on the Executive Board.
- h. As soon as possible, provide Standards Board Members all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA. Executive Board recommendations to the Standards Board pursuant to Section 222(b)(3) of HAVA shall include an appendix of all dissenting comments from Executive Board members.
- i. Perform all other duties as from time to time the Standards Board may delegate to the Executive Board.

- 5. Designated Federal Officer (DFO). The DFO shall:
  - a. Serve as the government's agent for all Standards Board activities.
  - b. Approve or call Standards Board meetings.
  - c. Approve agendas proposed by the Executive Committee.
  - d. Attend all Standards Board and Executive Board meetings.
  - e. Adjourn Standards Board and Executive Board meetings when such adjournment is in the public interest.

- f. Provide adequate staff support to the Standards Board, to assist with:
  - i. Notifying members of the time and place for each meeting.
  - ii. Maintaining records for all meetings, including subgroup or working group activities, as required by law.
  - iii. Maintaining the roll.
  - iv. Assuring that minutes of all Standards Board and Executive Board meetings, including subgroup and working group activities are prepared and distributed.
  - v. Housing at the EAC and maintaining official Standards Board records, including subgroup and working group activities.
  - vi. Filing all papers and submissions prepared for or by the Standards Board, including those items generated by subgroups and working groups.
  - vii. Responding to official correspondence.
  - viii. Acting as the Standard Board's agent to collect, validate, and pay all vouchers for pre-approved expenditures.
  - ix. Preparing and handling all reports, including the annual report as required by FACA.

Article VII. Meetings

- 1. The Standards Board shall meet as <sup>open</sup> required, but not less frequently than once every 2 years for the purposes of selecting the Executive Board. Meetings shall be called by the DFO in consultation with the Executive Board.
- 2. The DFO shall approve the agenda for all meetings. The EAC shall distribute the agenda to Standards Board members prior to each meeting and shall publish notice of the meeting in the Federal Register as required by FACA.

1. Upon Notice of Executive Board Meeting, Executive Board shall notify the Standards Board.

use HAVA language in 215(2)(B-C)

list C - ~~that~~ - B

but not less frequently than

Write Resolution for Bylaws committee - wish to meet 2 minimum 1/4

027486

on S.B.

3. Standards Board members and members of the public may submit agenda items to the DFO or Executive Board Chair.

4. All meetings of the Standards Board shall be conducted in accordance with Roberts Rules of Order.

5. Open/Closed Meetings.

- A
1. Open  
5. closed
- X
- a. Unless otherwise determined in advance, all Standards Board meetings will be open to the public. O
  - b. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public. O
  - c. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance. C
  - d. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session. O
  - e. All materials brought before, or presented to, the Board during the conduct of an open meeting, including, but not limited to, the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting. O
  - f. Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded. In such a case, the Standards Board will accept written comments as an alternative. In addition, members of the public may submit written statements to the EAC at any time. O
  - g. Standards Board meetings will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel a minimum of 45 days in advance of the proposed closed session. C
  - h. Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), shall be published in the Federal Register. The notice may announce the closing of all or just part of a meeting. C

6. Minutes.

- i. The DFO, or his or her designee, shall assure that detailed minutes of each minute are prepared and distributed to Standards Board members.
- ii. Minutes of open meetings shall be available to the public upon request. Minutes of closed meetings shall be available to the public upon request, subject to the Freedom of Information Act (FOIA).
- iii. Meeting minutes shall include the following: (1) Time, (2) date, (3)

location, (4) record of persons present, including the names of Standards Board members, staff, and the names of members of the public making written or oral presentations, (5) a complete and accurate description of the matters discussed and conclusions reached, and (6) copies of all reports received, issued, or approved by the Standards Board.

*Minutes  
are considered  
part of  
gov. X*

iv. All documents, reports, or other materials prepared by or for the Standards Board constitute official government records and will housed at the EAC and maintained according to the Federal Records Act.

### Article VIII. Quorum and Proxy Voting

1. A quorum shall be established when fifty percent (50%) plus one of Standards Board members is present for a meeting or are present by proxy.
  - a. Only other Standards Board members may declare another Standards Board member present by proxy.
  - b. Proxy designations may be submitted in writing to the Chair up to the day of the Standards Board meeting.
2. The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws.
3. Proxy votes may only be cast by Standards Board members, provided proxy designations have been timely filed in advance with the Chair clearly identifying the Standards Board member to cast an absent member's proxy vote.
4. The Chair shall appoint a proxy committee to verify the eligibility of proxy votes.
5. Voting procedures for the Standards Board, the Executive Board, and the subcommittees will follow the accepted procedure, in the latest edition of Robert's Rules of Order. Votes by the Standard Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

*Move  
to  
Article P. 561 of  
XII*

### Article IX. Committees

In appointing members to committees, the Standards Board shall pay particular attention to ensuring diverse membership. Accordingly, the Executive Board shall do due diligence to ensure that committee members (1) affiliate with diverse parties, (2) are representative of both state and local election officials, (3) represent different states and territories, and (4) representative of both elected and appointed officials.

1. Meetings.
  - a. All committees may meet informally at any time for the purpose of conducting their business, including telephonically or through electronic media.
2. Standing Committees.
  - a. Nominating Committee. The Nominating Committee shall:
    - i. Be comprised of five (5) members.
    - ii. Solicit nominations for the Executive Board from Standards Board members.
    - iii. Prepare and distribute to Standards Board members ballots that include all the information listed in Article V, section 1, subsection c, paragraph

- ii of these Bylaws.
- b. Bylaws Committee. The Bylaws Committee shall:
  - i. Be comprised of seven (7) members.
  - ii. Be Chaired by the Parliamentarian.
  - iii. Submit all recommended amendments to the Executive Board for a two (2) day comment period before submitting recommendations to the Standards Board for resolution and adoption.
- 3. Ad-Hoc Committees.
  - a. The Standards Board may, at any time, by majority vote, establish an ad-hoc committee.
  - b. The Standards Board member wishing to establish an ad-hoc committee must present to the Standards Board the reason(s) he/she is requesting the committee.
  - c. Once an ad-hoc committee has been established, the Executive Board shall appoint members to the ad-hoc committee.
  - d. No ad-hoc committee shall be comprised of more than ten (10) Standards Board Members.

#### **Article X. Amendments**

- 1. The bylaws may be amended based on a two-thirds (2/3) vote of the members present and voting at any Standards Board meeting.
- 2. The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws. The form shall require the specific language of the proposed amendment to be included, identify the author of the amendment, and be designed to elicit the rationale and impact statement.
- 3. All proposed bylaw changes must be submitted in writing to the DFO, who shall thereafter forward the proposed changes to the Standards Board Bylaws Committee and the EAC's General Counsel.
  - a. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.
  - b. The Standards Board's Executive Committee shall place the report on the proposed change to the Standards Board's Bylaws on the agenda for the next meeting of the Standards Board.
- 4. The Executive Board shall forward all proposed changes to Standards Board members at least thirty-five (35) days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request that EAC post the proposed change to the bylaws and all supporting material on EAC's website at least thirty-five (35) days prior to the next meeting of the Standards Board.

#### **Article XI. Expenses and Reimbursement.**

- 1. Expenses related to Standards Board operations will be borne by the EAC.
- 2. Expenditures of any kind must be approved in advance by the DFO.
- 3. Standards Board members shall not receive any compensation for their services, but

*Article XIII Roberts Rules*

shall be paid travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of federal agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in performance of their services for the Standards Board.

**Section XII Effective Date**

*Article IV*

1. These By-Laws are effective upon adoption by the Standards Board.

**Section XII: Transition Procedures and Ratification**

1. The adoption of the bylaws has no effect on the selection, terms or appointment of the officers or members of the Standards Board, the Executive Board, or a committee of the Board serving on the effective date of these bylaws.
2. All acts of the Standards Board, the Executive Board, or a committee of the Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these bylaws.

*XIV. Roberts Rules*

**DRAFT**

BYLAWS

UNITED STATES ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

The U.S. Election Assistance Commission Standards Board, hereinafter referred to as Standards Board, embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

Article I. Authority

- 1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], as such statutes may be amended from time to time, the Standards Board has been granted its authority through its charter with the United States Election Assistance Commission (EAC) (filed with Congress on June 14, 2004).

 0.29" + 1.25"

Article II. Objectives:

The Standards Board will:

- 1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations described in Section 241 of Title II of HAVA, as required by HAVA or as may be developed by EAC.
- 2. Provide guidance and advice to the EAC on a variety of topics related to the administration of elections for Federal office.
- 3. Function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act (FACA); and all other applicable Federal laws.

 + Tab after: 0.3" + Indent at: 0.3",  
 Tabs: Not at 0.3"

Article III. Standards Board Membership

- 1. Pursuant to Section 213(a) of HAVA, the Standards Board shall consist of 110 members, as follows:
  - a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
  - b. Fifty-five (55) shall be local election officials selected as follows:
    - ii. Each state's local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
    - iii. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.

- c. The two Standards Board members who represent the same state may not be members of the same political party.

**Article IV. Standards Board Member Vacancies**

**Deleted:** Terms of Service and

- 1. The chief election official of each state shall notify the EAC and Executive Board of the Standards Board within five (5) business days of any vacancy or membership changes to the Standards Board.
- 2. Vacancy appointments to the Standards Board shall be made in accordance with Section 213(a) of HAVA.

**Formatted:** Indent: Left: 0.25", Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 0.05" + Tab after: 0.3" + Indent at: 0.3", Tabs: Not at 0.3"

*enumerate*

**Article V. Executive Board of the Standards Board**

**Deleted:** Members of the Standards Board shall serve for a term of two (2) years and may be reappointed. ¶

- 1. Pursuant to Section 213(c) of HAVA, the Standards Board shall select nine (9) of its members to serve as the Executive Board of the Standards Board as follows:

**Deleted:** the same manner as the original appointment pursuant to

a. Membership.

**Formatted:** Indent: Left: 0.25", Numbered + Level: 1 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 0.04" + Tab after: 0.29" + Indent at: 0.29", Tabs: Not at 0.29"

- i. Not more than five (5) members of the Executive Board may be state election officials.
- ii. Not more than five (5) members of the Executive Board may be local election officials.
- iii. Not more than five (5) members of the Executive Board may be of the same political party.

**Formatted:** Indent: Left: 1", Numbered + Level: 2 + Numbering Style: i, ii, iii, ... + Start at: 1 + Alignment: Left + Aligned at: 0.75" + Tab after: 1.25" + Indent at: 1.25", Tabs: Not at 1.25"

b. Nominations.

i. Expired Terms.

**Formatted:** Indent: Left: 1", Hanging: 0.5", Numbered + Level: 3 + Numbering Style: 1, 2, 3, ... + Start at: 1 + Alignment: Left + Aligned at: 1.2" + Tab after: 1.66" + Indent at: 1.66", Tabs: Not at 1.66"

(a) The Nominating Committee shall solicit nominations for the Executive Board from Standards Board members. The Nominating Committee shall send to Standards Board members a solicitation no later than December 1<sup>st</sup> immediately prior to the expiration of any Executive Board member's term. The solicitations shall designate the address and form for submitting nominations.

(b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.

(c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than January 15.

(d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.

ii. Vacancies Before the End of a Term.

**Formatted:** Indent: Left: 1", Hanging: 0.5", Numbered + Level: 3 + Numbering Style: i, ii, iii, ... + Start at: 1 + Alignment: Left + Aligned at: 1.2" + Tab after: 1.66" + Indent at: 1.66", Tabs: Not at 1.66"

(a) In the event of a vacancy on the Executive Board prior to the expiration of a member's term on the Executive Board, the Nominating Committee shall send to Standards Board members a solicitation no later than sixty (60) days before the next meeting of the Standards Board. The solicitations shall designate the address and form for submitting nominations.

- (b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.
- (c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than the date indicated on the solicitation.
- (d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.

c. Elections.

- i. Elections to the Executive Board shall be by secret ballot and shall take place at a meeting of the Standards Board.
- ii. The ballot shall be designed to enable Standards Board members to select candidates based on the following: (1) With which party the candidate affiliates, (2) whether the candidate is a state or local election official, (3) which state or territory the candidate represents, (4) whether the candidate was elected or appointed, and (5) in the case of state election officials, whether the candidate is a Secretary of State, a member of a Citizen Board, or a State Election Director. The ballot shall also include concise biographical information for each candidate.
- iii. For nominations following the first election (2005), not including any special elections to fill unexpired terms, two (2) of the three positions shall be local election officials. For nominations following the second election (2007), two of the three positions shall be for state election officials. The number of state and local nominations shall continue to alternate in subsequent elections.
- iv. Within thirty (30) days of an Executive Board election, the Executive Board members shall convene to elect a Chair, Vice-Chair, Secretary, and Parliamentarian.

Formatted: Indent: Left: 1", Hanging: 0.5", Numbered + Level: 1 + Numbering Style: i, ii, iii, ... + Start at: 1 + Alignment: Left + Aligned at: 1.2" + Tab after: 1.66" + Indent at: 1.66", Tabs: Not at 1.66"

d. Executive Board Members Terms of Service and Vacancies.

- i. Generally
  - (a) The Chair of the Executive Board shall notify the EAC and Nominations Committee Chair within five (5) business days of any vacancy on the Executive Board.
  - (b) The Chair, Vice-Chair, and Secretary, shall not serve for a term of more than one (1) year. An Executive Board member shall not serve for two (2) consecutive terms for the same office, except in the case of a member serving the unexpired term of an office, in which case the member may be elected to the same office for the succeeding terms.
  - (c) An Executive Board member may be removed from the Executive Board for cause by a vote of two-thirds (2/3) of Standards Board members at a Standards Board meeting.
  - (d) In the event of a vacancy in the Executive Board, the remaining members of the Executive Board may appoint an interim member to the Executive Board until the next Standards Board meeting.

- iii. Subsequent Terms.
  - (a) Pursuant to Section 213(c)(2) of HAVA, members of the Executive Board shall serve for a term of two (2) years and may not serve for more than three (3) consecutive terms.
  - (b) Members of the Standards Board who have previously served on the Executive Board shall be eligible to be nominated to the Executive Board no sooner than two (2) years from the last term in which they served on the Executive Board.

e. Meetings.

- i. Any two members of the Executive Board may call an Executive Board meeting by filing the original call of the meeting with the DFO, including the stated reason for calling the meeting.
- ii. A majority of Executive Board Members shall be present for a quorum.
- iii. The Executive Board shall agree to actions by a majority vote of the Executive Board.
- iv. Proxy voting will not be allowed in Executive Board votes.
- v. Any member of the Standards Board may attend and at the discretion of the Chair, may participate in any and all discussions at an Executive Board meeting, but may not vote.
- vi. If the Executive Board decides to hold an open meeting, it shall do so in accordance with the requirements FACA.

Article VI. Executive Board Duties

- 1. Chair. The Chair shall:
  - a. Preside over all meetings of the Executive Board and Standards Board.
  - b. Appoint the chair of standing committees and any ad hoc committees of the Standards Board.
  - c. Establish the agenda for meetings of the Executive Board and Standards Board in consultation with the DFO.
  - d. Call meetings of the Executive Board and Standards Board in consultation with the DFO.
  - e. Act as the official liaison between the Standards Board and the EAC for all resolutions, recommendations, and information requests.
  - f. Serve as an *ex officio* member of all committees.
  - g. Appoint a Parliamentarian to preside over all Standards Board meetings.
    - i. The Parliamentarian shall provide advice and assistance to the Chair so that the Chair can run all meetings in accordance with Roberts Rules of Order.
- 2. Vice-Chair. The Vice-Chair shall:

Formatted: Indent: Left: 0.5", Hanging: 0.25", Numbered + Level: 2 + Numbering Style: a, b, c, ... + Start at: 1 + Alignment: Left + Aligned at: 0.8" + Tab after: 1.75" + Indent at: 1.75", Tabs: Not at 1.75"

- a. Oversee preparation and transmission of the minutes at Executive Board and Standards Board meetings, with assistance from the DFO. *review minutes before distributed to Standards Board*
  - b. Assist the Chair at meetings and from time to time as the Chair may designate.
- Executive Board, Generally. The Executive Board shall:
- a. Perform all duties required under HAVA and other applicable Federal law.
  - b. Appoint the membership of appropriate standing committees and ad hoc committees by soliciting interest from the Standards Board membership.
  - c. Meet as necessary to address issues of concern in between Standards Board meetings
  - d. Approve the minutes of the Executive Board meetings.
  - e. Convene Standards Board meetings, including, but not limited to, meetings by conference call and virtual meetings. Such meetings must allow each Standards Board member to include their comments and view or hear others' comments.
  - f. Consult with the DFO to ensure compliance with federal statutes and other applicable regulations.
  - g. Attend Executive Board meetings, including, but not limited to, meetings by conference call and virtual meetings, in accordance with these bylaws. In the event that an Executive Board member fails to attend or participate in at least one (1) Executive Board meeting within the the preceding twelve (12) month period, such Executive Board member shall forfeit his or her position on the Executive Board, thereby creating a vacancy. Such vacancy shall be filled in accordance with these bylaws.
  - h. As soon as possible, provide Standards Board Members all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA. Executive Board recommendations to the Standards Board pursuant to Section 222(b)(3) of HAVA shall include an appendix of all dissenting comments from Executive Board members.
  - i. Perform all other duties as from time to time the Standards Board may delegate to the Executive Board.
  - j. Upon notice of an Executive Board meeting, the Executive Board shall notify the Standards Board *at the Executive Board meeting.*

**Article VII. Meetings**

1. Pursuant to Sections 215(a)-(c) of HAVA, the Standards Board shall hold a meeting of its members:
  - a. At such times as it considers appropriate for the purposes of conducting such business as it considers appropriate under HAVA.
  - b. In any event, not less frequently than once every two (2) years for purposes of selecting the Executive Board.
  - c. For the purposes of voting on voluntary voting system guidelines referred to it under Section 222 of HAVA, not less frequently than once every year.
2. Meetings shall be called by the DFO in consultation with the Executive Board.
3. The DFO shall approve the agenda for all meetings. The EAC shall distribute the agenda to Standards Board members prior to each meeting and shall publish notice of the meeting in the Federal Register as required by FACA.
4. Standards Board members and members of the public may submit agenda items to the DFO or Executive Board Chair.
5. Meetings.
  - a. Open Meetings.
    - i. \_\_\_\_\_
    - ii. \_\_\_\_\_
  - b. Closed Meetings.
  - c. Unless otherwise determined in advance, all Standards Board meetings will be open to the public.
  - d. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public.

- e. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.
- f. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session.
- g. All materials brought before, or presented to, the Board during the conduct of an open meeting, including, but not limited to, the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.
- h. Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded. In such a case, the Standards Board will accept written comments as an alternative. In addition, members of the public may submit written statements to the EAC at any time.
- i. Standards Board meetings will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel a minimum of 45 days in advance of the proposed closed session.
- j. Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), shall be published in the Federal Register. The notice may announce the closing of all or just part of a meeting.

open

6. Minutes.

- a. The DFO or his or her designee, shall assure that detailed minutes of each minute are prepared and distributed to Standards Board members.
- b. Minutes of open meetings shall be available to the public upon request. Minutes of closed meetings shall be available to the public upon request, subject to the Freedom of Information Act (FOIA).
- c. Meeting minutes shall include the following: (1) Time, (2) date, (3) location, (4) record of persons present, including the names of Standards Board members, staff, and the names of members of the public making written or oral presentations, (5) a complete and accurate description of the matters discussed and conclusions reached, and (6) copies of all reports received, issued, or approved by the Standards Board.
- d. All documents, reports, or other materials prepared by or for the Standards Board constitute official government records and will housed at the EAC and maintained according to the Federal Records Act.

Article VIII. Quorum and Proxy Voting

~~Make 2 sections~~  
Break out by 1+2

1. A quorum shall be established when fifty percent (50%) plus one of Standards Board members is present for a meeting or are present by proxy.

a. ~~Only other Standards Board members may declare another Standards Board member present by proxy.~~

*2* b. Proxy designations may be submitted in writing to the Chair up to the day of the Standards Board meeting.

2. The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws.

3. Proxy votes may only be cast by Standards Board members, provided proxy designations have been timely filed in advance with the Chair, clearly identifying the Standards Board member to cast an absent member's proxy vote.

The Chair shall appoint a proxy committee to verify the eligibility of proxy votes.

Voting procedures for the Standards Board, the Executive Board, and the subcommittees will follow the accepted procedure, in the latest edition of Robert's Rules of Order. Votes by the Standard Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

### Article IX. Committees

In appointing members to committees, the Standards Board shall pay particular attention to ensuring diverse membership. Accordingly, the Executive Board shall do due diligence to ensure that committee members (1) affiliate with diverse parties, (2) are representative of both state and local election officials, (3) represent different states and territories, and (4) *are* representative of both elected and appointed officials.

1. Meetings:

a. All committees may meet informally at any time for the purpose of conducting their business, including telephonically or through electronic media.

2. Standing Committees:

a. Nominating Committee: The Nominating Committee shall:

i. Be comprised of five (5) members.

ii. Solicit nominations for the Executive Board from Standards Board members.

iii. Prepare and distribute to Standards Board members ballots that include all the information listed in Article V, section 1, subsection c, paragraph ii of these Bylaws.

b. Bylaws Committee: The Bylaws Committee shall:

i. Be comprised of seven (7) members.

ii. ~~Be Chaired by the Parliamentarian.~~

iii. Submit all recommended amendments to the Executive Board for a ~~two~~ *seven*

*11* ~~7~~ day comment period before submitting recommendations to the Standards Board for resolution and adoption.

3. Ad-Hoc Committees:

a. The Standards Board may, at any time, by majority vote, establish an ad-hoc committee.

- b. The Standards Board member wishing to establish an ad-hoc committee must present to the Standards Board the reason(s) he/she is requesting the committee.
- c. Once an ad-hoc committee has been established, the Executive Board shall appoint members to the ad-hoc committee.
- d. ~~No ad-hoc committee shall be comprised of more than ten (10) Standards Board Members.~~

**Article X. Amendments**

- ~~X~~ <sup>A</sup> The bylaws may be amended <sup>by a</sup> ~~based on~~ a two-thirds (2/3) vote of the members present and voting at any Standards Board meeting.
- ~~X~~ <sup>1</sup> The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws. The form shall require the specific language of the proposed amendment to be included, identify the author of the amendment, and be designed to elicit the rationale and impact <sup>of the proposed amendment.</sup>
- ~~X~~ <sup>2</sup> All proposed bylaw changes must be submitted in writing to the DFO, who shall thereafter forward the proposed changes to the Standards Board Bylaws Committee and the EAC's General Counsel.
  - a. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.
- ~~X~~ <sup>C</sup> The Standards Board's Executive Committee shall place the <sup>Bylaws Comm.</sup> report on the proposed change to the Standards Board's Bylaws on the agenda for the next meeting of the Standards Board.
- ~~X~~ <sup>3</sup> The Executive Board shall forward all proposed changes to Standards Board members at least thirty-five (35) days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request that EAC post the proposed change to the bylaws and all supporting material on EAC's website at least thirty-five (35) days prior to the next meeting of the Standards Board.

Committee.  
(Break up)

**Article XI. Expenses and Reimbursement.**

1. Expenses related to Standards Board operations will be borne by the EAC.
2. Expenditures of any kind must be approved in advance by the DFO.
3. Standards Board members shall not receive any compensation for their services, but shall be paid travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of federal agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in performance of their services for the Standards Board.

~~Article XII~~ p. 561

**Section XII. Effective Date**

**Article XIII**

1. These By-Laws are effective upon adoption by the Standards Board.

**Article XIV**

**Section XII: Transition Procedures and Ratification**

b) Bylaws committee will transmit proposed bylaws committees to Executive Board

1. The adoption of the bylaws has no effect on the selection, terms or appointment of the officers or members of the Standards Board, the Executive Board, or a committee of the Board serving on the effective date of these bylaws.
2. All acts of the Standards Board, the Executive Board, or a committee of the Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these bylaws.

### UNITED STATES ELECTION ASSISTANCE COMMISSION STANDARDS BOARD

The U.S. Election Assistance Commission Standards Board, hereinafter referred to as Standards Board, embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

#### Article I. Authority

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], as such statutes may be amended from time to time, the Standards Board has been granted its authority through its charter with the United States Election Assistance Commission (EAC) (filed with Congress on June 14, 2004).

#### Article II. Objectives:

The Standards Board will:

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations described in Section 241 of Title II of HAVA, as required by HAVA or as may be developed by EAC.
2. Provide guidance and advice to the EAC on a variety of topics related to the administration of elections for Federal office.
3. Function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act (FACA); and all other applicable Federal laws.

#### Article III. Standards Board Membership

1. Pursuant to Section 213(a) of HAVA, the Standards Board shall consist of 110 members, as follows:
  - a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
  - b. Fifty-five (55) shall be local election officials selected as follows:
    - ii. Each state's local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
    - iii. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.

- c. The two Standards Board members who represent the same state may not be members of the same political party.

#### **Article IV. Standards Board Member Vacancies**

1. The chief election official of each state shall notify the EAC and Executive Board of the Standards Board within five (5) business days of any vacancy or membership changes to the Standards Board.
2. Vacancy appointments to the Standards Board shall be made in accordance with Section 213(a) of HAVA:
  - a. Fifty-five (55) shall be state election officials selected by the chief State election official of each State.
  - b. Fifty-five (55) shall be local election officials selected as follows:
    - iv. Each state's local election officials, including the local election officials of Puerto Rico and the United States Virgin Islands, shall select a representative local election official from the state in a process supervised by the chief election official of the state.
    - v. In the case of the District of Columbia, Guam, and American Samoa, the chief election official shall establish a procedure for selecting an individual to serve as a local election official. The individual selected under such a procedure may not be a member of the same political party as the chief election official.
  - c. The two Standards Board members who represent the same state may not be members of the same political party.
3. In December of each year, the EAC shall notify the appointing authority of each state or territory who represents their state or territory on the Standards Board.

#### **Article V. Executive Board of the Standards Board**

1. Pursuant to Section 213(c) of HAVA, the Standards Board shall select nine (9) of its members to serve as the Executive Board of the Standards Board as follows:
  - a. Membership.
    - i. Not more than five (5) members of the Executive Board may be state election officials.
    - ii. Not more than five (5) members of the Executive Board may be local election officials.
    - iii. Not more than five (5) members of the Executive Board may be of the same political party.
  - b. Nominations.
    - i. Expired Terms.
      - (a) The Nominating Committee shall solicit nominations for the Executive Board from Standards Board members. The Nominating Committee shall send to Standards Board members a solicitation no later than December 1<sup>st</sup> immediately prior to the expiration of any Executive Board member's term. The solicitations shall designate the address and form for submitting nominations.

- (b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.
  - (c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than January 15.
  - (d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.
- ii. Vacancies Before the End of a Term.
- (a) In the event of a vacancy on the Executive Board prior to the expiration of a member's term on the Executive Board, the Nominating Committee shall send to Standards Board members a solicitation no later than sixty (60) days before the next meeting of the Standards Board. The solicitations shall designate the address and form for submitting nominations.
  - (b) Standards Board members may nominate themselves or other Standards Board members by responding to the solicitation.
  - (c) Nominations shall be submitted to the Standards Board's Designated Federal Officer (DFO) in writing and may be submitted electronically no later than the date indicated on the solicitation.
  - (d) Upon receipt of nominations, the Nominating Committee shall prepare a ballot to be distributed to the Standards Board at least 15 days prior to the date of the Standards Board meeting immediately following the submission deadline.
- c. Elections:
- i. Elections to the Executive Board shall be by secret ballot and shall take place at a meeting of the Standards Board.
  - ii. The ballot shall be designed to enable Standards Board members to select candidates based on the following: (1) With which party the candidate affiliates, (2) whether the candidate is a state or local election official, (3) which state or territory the candidate represents, (4) whether the candidate was elected or appointed, and (5) in the case of state election officials, whether the candidate is a Secretary of State, a member of a Citizen Board, or a State Election Director. The ballot shall also include concise biographical information for each candidate.
  - iii. For nominations following the first election (2005), not including any special elections to fill unexpired terms, two (2) of the three positions shall be local election officials. For nominations following the second election (2007), two of the three positions shall be for state election officials. The number of state and local nominations shall continue to alternate in subsequent elections.
  - iv. Within thirty (30) days of an Executive Board election, the Executive Board members shall convene to elect a Chair, Vice-Chair, Secretary, and Parliamentarian.
- d. Executive Board Members Terms of Service and Vacancies.

- i. Generally.
  - (a) The Chair of the Executive Board shall notify the EAC and Nominations Committee Chair within five (5) business days of any vacancy on the Executive Board.
  - (b) The Chair, Vice-Chair, and Secretary, shall not serve for a term of more than one (1) year. An Executive Board member shall not serve for two (2) consecutive terms for the same office, except in the case of a member serving the unexpired term of an office, in which case the member may be elected to the same office for the succeeding terms.
  - (c) An Executive Board member may be removed from the Executive Board for cause by a vote of two-thirds (2/3) of Standards Board members at a Standards Board meeting.
  - (d) In the event of a vacancy in the Executive Board, the remaining members of the Executive Board may appoint an interim member of the Executive Board until the next Standards Board meeting.
  - (e)
- ii. Initial Term.
  - (a) Pursuant to Section 213(c)(3) of HAVA, of the members first selected to serve on the Executive Board of the Standards Board:
    - (i) Three (3) shall serve for one (1) term.
    - (ii) Three (3) shall serve for two (2) consecutive terms.
    - (iii) Three (3) shall serve for three (3) consecutive terms.
- iii. Subsequent Terms.
  - (a) Pursuant to Section 213(c)(2) of HAVA, members of the Executive Board shall serve for a term of two (2) years and may not serve for more than three (3) consecutive terms.
  - (b) Members of the Standards Board who have previously served on the Executive Board shall be eligible to be nominated to the Executive Board no sooner than two (2) years from the last term in which they served on the Executive Board.

#### Meetings.

- i. Any two members of the Executive Board may call an Executive Board meeting by filing the original call of the meeting with the DFO, including the stated reason for calling the meeting.
- ii. A majority of Executive Board Members shall be present for a quorum.
- iii. The Executive Board shall agree to actions by a majority vote of the Executive Board.
- iv. Proxy voting will not be allowed in Executive Board votes.
- v. Any member of the Standards Board may attend and at the discretion of the Chair, may participate in any and all discussions at an Executive Board meeting, but may not vote.
- vi. If the Executive Board decides to hold an open meeting, it shall do so in accordance with the requirements FACA.

## Article VI. Executive Board Duties

1. Chair. The Chair shall:
  - a. Preside over all meetings of the Executive Board and Standards Board.
  - b. Appoint the chair of standing committees and any ad hoc committees of the Standards Board.
  - c. Establish the agenda for meetings of the Executive Board and Standards Board in consultation with the DFO.
  - d. Call meetings of the Executive Board and Standards Board in consultation with the DFO.
  - e. Act as the official liaison between the Standards Board and the EAC for all resolutions, recommendations, and information requests.
  - f. Serve as an *ex officio* member of all committees.
  - g. Appoint a Parliamentarian to preside over all Standards Board meetings.
    - i. The Parliamentarian shall provide advice and assistance to the Chair so that the Chair can run all meetings in accordance with Roberts Rules of Order.
2. Vice-Chair. The Vice-Chair shall:
  - a. Preside over meetings of the Executive Board and Standards Board in the Chair's absence.
  - b. Perform other duties as may be appropriate in the Chair's absence.
  - c. Assist the Chair from time to time as the Chair may designate.
  - d. In the event of a vacancy before the completion of the Chair's term, serve as the Chair.
3. Secretary. The Secretary shall:
  - a. Review Executive Board minutes before distribution to Standards Board members.
  - b. Ensure, with assistance from the DFO, that meeting minutes are properly on file.
  - c. Assist the Chair at meetings and from time to time as the Chair may designate.
4. Executive Board, Generally. The Executive Board shall:
  - a. Perform all duties required under HAVA and other applicable Federal law.
  - b. Appoint the membership of appropriate standing committees and ad hoc committees by soliciting interest from the Standards Board membership.
  - c. Meet as necessary to address issues of concern in between Standards Board meetings.
  - d. Approve the minutes of the Executive Board meetings.
  - e. Convene Standards Board meetings, including, but not limited to, meetings by conference call and virtual meetings. Such meetings must allow each Standards Board member to include their comments and view or hear others' comments.
  - f. Consult with the DFO to ensure compliance with federal statutes and other applicable regulations.
  - g. Attend Executive Board meetings, including, but not limited to, meetings by conference call and virtual meetings, in accordance with these bylaws. In the event that an Executive Board member fails to attend or participate in at least one (1) Executive Board meeting within the the preceding twelve (12) month period, such Executive Board member shall forfeit his or her position on the Executive Board, thereby creating a vacancy. Such vacancy shall be filled in accordance with these bylaws.
  - h. As soon as possible, provide Standards Board Members all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA. Executive Board recommendations to the Standards Board pursuant to Section 222(b)(3) of HAVA shall include an

- appendix of all dissenting comments from Executive Board members.
- i. Perform all other duties as from time to time the Standards Board may delegate to the Executive Board.
- j. Upon notice of an Executive Board meeting, the Executive Board shall notify the Standards Board of the Executive Board meeting.
- 5. Designated Federal Officer (DFO). The DFO shall:
  - a. Serve as the government's agent for all Standards Board activities.
  - b. Approve or call Standards Board meetings.
  - c. Approve agendas proposed by the Executive Committee.
  - d. Attend all Standards Board and Executive Board meetings.
  - e. Adjourn Standards Board and Executive Board meetings when such adjournment is in the public interest.
  - f. Provide adequate staff support to the Standards Board, to assist with:
    - i. Notice. The DFO shall:
      - (a) Notify members of the time and place for each meeting.
      - (b) Upon notice of an open Executive Board meeting, notify the Standards Board and public of time and place for the meeting.
      - (c) Notify appointing authorities of any and all vacancies on the Standards Board.
    - ii. Recordkeeping and Administration. The DFO shall:
      - (a) Maintain records for all meetings, including subgroup or working group activities, as required by law.
      - (b) Maintain the roll.
      - (c) Assure that minutes of all Standards Board and Executive Board meetings, including subgroup and working group activities are prepared and distributed.
      - (d) House at the EAC and maintain official Standards Board records, including subgroup and working group activities.
      - (e) Filing all papers and submissions prepared for or by the Standards Board, including those items generated by subgroups and working groups.
      - (f) Respond to official correspondence.
      - (g) Prepare and handle all reports, including the annual report as required by FACA.
      - (h) Acting as the Standard Board's agent to collect, validate, and pay all vouchers for pre-approved expenditures.

## Article VII. Meetings

1. Pursuant to Sections 215(a)-(c) of HAVA, the Standards Board shall hold a meeting of its members:
  - a. At such times as it considers appropriate for the purposes of conducting such business as it considers appropriate under HAVA.
  - b. In any event, not less frequently than once every two (2) years for purposes of selecting the Executive Board.
  - c. For the purposes of voting on voluntary voting system guidelines referred to it

under Section 222 of HAVA, not less frequently than once every year.

2. Meetings shall be called by the DFO in consultation with the Executive Board.
3. The DFO shall approve the agenda for all meetings. The EAC shall distribute the agenda to Standards Board members prior to each meeting and shall publish notice of the meeting in the Federal Register as required by FACA.
4. Standards Board members and members of the public may submit agenda items to the DFO or Executive Board Chair.
5. Meetings.
  - a. Open Meetings.
    - i. Unless otherwise determined in advance, all Standards Board meetings will be open to the public.
    - ii. Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded. In such a case, the Standards Board will accept written comments as an alternative. In addition, members of the public may submit written statements to the EAC at any time.
    - iii. All materials brought before, or presented to, the Board during the conduct of an open meeting, including, but not limited to, the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.
    - iv. Minutes of open meetings shall be available to the public upon request.
    - v. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public.
    - vi. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session.
  - b. Closed Meetings.
    - i. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.
    - ii. Standards Board meetings will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel a minimum of 45 days in advance of the proposed closed session.
    - iii. Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), shall be published in the Federal Register. The notice may announce the closing of all or just part

- of a meeting.
  - iv. Minutes of closed meetings shall be available to the public upon request, subject to the Freedom of Information Act (FOIA).
6. Minutes.
- a. The DFO, or his or her designee, shall assure that detailed minutes of each minute are prepared and distributed to Standards Board members.
  - b. Meeting minutes shall include the following: (1) Time, (2) date, (3) location, (4) record of persons present, including the names of Standards Board members, staff, and the names of members of the public making written or oral presentations, (5) a complete and accurate description of the matters discussed and conclusions reached, and (6) copies of all reports received, issued, or approved by the Standards Board.
  - c. All documents, reports, or other materials prepared by or for the Standards Board constitute official government records and will housed at the EAC and maintained according to the Federal Records Act.
  - d. Meeting minutes are considered part of the official government record.

### **Article VIII. Quorum and Proxy Voting**

1. Quorum:
- a. A quorum shall be established when fifty percent (50%) plus one of Standards Board members is present for a meeting or are present by proxy.
  - b. Proxy designations may be submitted in writing to the Chair up to the day of the Standards Board meeting.
2. Proxy Votes.
- a. Proxy votes may only be cast by Standards Board members, provided proxy designations have been timely filed in advance with the Chair clearly identifying the Standards Board member to cast an absent member's proxy vote.
  - b. The Chair shall appoint a proxy committee to verify the eligibility of proxy votes.
3. Voting Generally.
- a. The Standards Board shall agree to actions by majority vote of those present and voting unless otherwise specified by these bylaws.
  - b. Votes by the Standard Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

### **Article IX. Committees**

In appointing members to committees, the Standards Board shall pay particular attention to ensuring diverse membership. Accordingly, the Executive Board shall do due diligence to ensure that committee members (1) affiliate with diverse parties, (2) are representative of both state and local election officials, (3) represent different states and territories, and (4) representative of both elected and appointed officials.

1. Meetings.
- a. All committees may meet informally at any time for the purpose of conducting

- their business, including telephonically or through electronic media.
2. Standing Committees.
    - a. Nominating Committee. The Nominating Committee shall:
      - i. Be comprised of five (5) members.
      - ii. Solicit nominations for the Executive Board from Standards Board members.
      - iii. Prepare and distribute to Standards Board members ballots that include all the information listed in Article V, section 1, subsection c, paragraph ii of these Bylaws.
    - b. Bylaws Committee. The Bylaws Committee shall:
      - i. Be comprised of seven (7) members.
      - ii. Submit a report with all recommended amendments to the Executive Board for a seven (7) day comment period before submitting recommendations to the Standards Board for resolution and adoption.
  3. Ad-Hoc Committees.
    - a. The Standards Board may, at any time, by majority vote, establish an ad-hoc committee.
    - b. The Standards Board member wishing to establish an ad-hoc committee must present to the Standards Board the reason(s) he/she is requesting the committee.
    - c. Once an ad-hoc committee has been established, the Executive Board shall appoint members to the ad-hoc committee.

#### **Article X. Amendments**

1. The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws.
  - a. The form shall require the specific language of the proposed amendment to be included, identify the author of the amendment, and be designed to elicit the rationale and impact of the proposed amendment.
2. All proposed bylaw changes must be submitted in writing to the DFO:
  - a. No later than December 1; or
  - b. Within the seventy (70) day timeframe provided by the Executive Committee.
3. After receiving proposed bylaw changes, the DFO shall forward the proposed changes to the Standards Board Bylaws Committee and the EAC's General Counsel.
  - c. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.
  - d. The Bylaws Committee shall transmit a report containing the proposed bylaws to the Executive Board.
  - e. The Standards Board's Executive Committee shall place the report on the proposed change to the Standards Board's Bylaws on the agenda for the next meeting of the Standards Board.
3. The Executive Board shall forward all proposed changes to Standards Board members at least thirty (30) days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request that EAC post the proposed change to the bylaws and all

supporting material on EAC's website at least thirty (30) days prior to the next meeting of the Standards Board.

4. The bylaws may be amended by on a two-thirds (2/3) vote of the members present and voting at any Standards Board meeting.

**Article XI. Expenses and Reimbursement.**

1. Expenses related to Standards Board operations will be borne by the EAC.
2. Expenditures of any kind must be approved in advance by the DFO.
3. Standards Board members shall not receive any compensation for their services, but shall be paid travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of federal agencies under subchapter I of chapter 57 of title 5, United States Code, while away from their homes or regular places of business in performance of their services for the Standards Board.

**Article XII. Roberts Rules**

1. The rules contained in the current edition of *Robert's Rules of Order Newly Revised* shall govern the Standards Board in all cases to which they are applicable and in which they are not inconsistent with these bylaws and any special rules of order the Standards Board may adopt.
2. Voting procedures for the Standards Board, the Executive Board, and the subcommittees shall follow the accepted procedure, in the latest edition of Robert's Rules of Order.

**Article XIII. Effective Date**

1. These By-Laws are effective upon adoption by the Standards Board.

**Article XIV. Transition Procedures and Ratification**

1. The adoption of the bylaws has no effect on the selection, terms or appointment of the officers or members of the Standards Board, the Executive Board, or a committee of the Board serving on the effective date of these bylaws.
2. All acts of the Standards Board, the Executive Board, or a committee of the Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these bylaws.

**BYLAWS**  
**OF THE UNITED STATES ELECTION ASSISTANCE COMMISSION**  
**STANDARDS BOARD**

The Standards Board embodies the vision of Congress to forge a partnership among federal, state and local election officials whose goal is to promote public confidence in the conduct of federal elections in the United States.

**Section I. Purpose** ✓

The purpose of the Standards Board is to review the Voluntary Voting System Guidelines and the Best Practices For Voting Processes in Federal Elections, to submit its recommendations to the U.S. Election Assistance Commission (EAC), and to provide guidance and advice to EAC on a variety of topics related to the administration of elections for federal office.

*not purpose-duties* { As deemed necessary, the Standards Board may convene hearings or subcommittees to support the Board's functions. The Board and its subcommittees shall function solely as an advisory body and must comply with the Federal Advisory Committee Act (FACA).

**Section II. Authority** ✓

The Standards Board is a committee authorized and required by the Help America Vote Act of 2002 as such statute may be amended from time to time (HAVA). The Standards Board is subject to FACA, as outlined in its Charter and filed with the Congress on June 14, 2004; HAVA; and all other applicable Federal laws.

**Section III. Membership of the Standards Board** ✓

- A. Membership of the Standards Board shall be governed by Section 213 of HAVA.
- B. The chief state election official of each state shall notify the Executive Board of the Standards Board and the EAC promptly of any vacancy or change of membership of the state's representatives to the Standards Board.
- C. Two nonpartisan members from the same state shall not be deemed to be members of the same party as such term is used in Section 213(a)(3) of HAVA.

- D. Duties of the members of the Standards Board shall be governed by HAVA.

**Section IV: Executive Board**

*— Role of Board Officials*

- A. There shall be an Executive Board of the Standards Board that may act on behalf of the Standards Board between meetings of the Standards Board.
- B. Membership of the Executive Board shall be governed by Section 213(c) of HAVA.
- C. Nominations to the Executive Board shall be made in the following manner:

The Nominating Committee shall solicit nominations to the Executive Board from the membership. The solicitation shall be sent no later than December 1 before the expiration of an Executive Board member's term. Standards Board members may nominate themselves or other Standards Board members by responding to this solicitation.

Nominations shall be submitted to the DFO and shall be received no later than January 15. Nominations shall be in writing and may be submitted electronically. The solicitation shall designate the address and form for submitting nominations.

The Nominating Committee shall prepare a ballot to be distributed at the Standards Board meeting immediately following the submission deadline. The ballot shall be designed to enable the membership to select candidates based on considerations of party membership; state/local election official, geography, elected/appointed and in the case of state election officials, Secretary of State/Citizen Board. The Nominating Committee shall include a short biography of the candidates along with a description of the factors considered in designing the ballot.

For nominations for the first election following the adoption of these By-Laws (2007) there shall be two (2) positions for local election officials. For nominations for the second election following adoption of the By-Laws (2008) there shall be two (2) positions for state election officials. The number of state/local nominations shall continue to alternate in subsequent elections.

- D. Elections to the Executive Board shall be governed by Section 213(c) of HAVA and shall be made at a meeting of the Standards Board.
- E. Within 30 days of election of the Executive Board, the Executive Board members shall convene for the purposes of electing a Chair, Vice-Chair, and a Secretary. The term of the Chair, Vice-Chair, and Secretary shall be for one year. A member may not serve two consecutive terms for the

same office, *except in the case of a member serving the unexpired term of an office then the member may be elected to the same office for the succeeding term.*

F. The duties of the Chair shall include:

1. To preside at all meetings of the Executive Board.
2. To preside at all meetings of the Standards Board.
3. To appoint the chair of standing committees and any ad hoc committees of the Standards Board. The current standing committees are the Nominating Committee which shall be comprised of five (5) members and the By-Laws Committee which shall be comprised of seven (7) members.
4. To establish the agenda for meetings of the Executive Board in consultation with the EAC.
5. To establish the agenda for meetings of the Standards Board in consultation with the EAC.
6. To call meetings of the Executive Board in consultation with the EAC.
7. To call meetings of the Standards Board in consultation with the EAC.

G. The duties of the Vice-Chair shall be:

1. To preside at meetings of the Executive Board or perform other duties as may be appropriate in the absence of the Chair.
2. To preside at meetings of the Standards Board in the absence of the Chair.
3. To assist the Chair from time to time as the Chair may designate.
4. The Vice-Chair serves as the Chair-elect and serves as Chair for the unexpired term of the Chair if a vacancy occurs.

H. The duties of the Secretary shall include:

1. To maintain minutes at meetings of the Executive Board with the assistance of the DFO.
2. To maintain the record of the minutes of the Executive Board meetings.

3. To assist the Chair at meetings.
  4. To assist the Chair from time to time as the Chair may designate.
- I. The duties of the Executive Board shall include:
1. To establish and appoint the membership of appropriate standing committees and ad hoc committees of the Standards Board by soliciting interest from the Standards Board membership.
  2. To meet as necessary to address issues of concern to the Standards Board between meetings of the Standards Board.
  3. To approve the minutes of the Executive Board meetings.
  4. To convene meetings of the Executive Board, including but not limited to, meetings by so-called conference calls utilizing such technology that allows each member to hear the comments of other members and to have their comments heard by other members.
  5. To consult with the DFO to ensure compliance with federal statutes or other standards.
  6. To attend meetings of the Executive Board, or to participate in meetings of the Executive Board when utilizing so called conference call technology, as called by the Chair or pursuant to subparagraph (8) of this subsection. Failure to attend or participate in 25% of the meetings of the Executive Board within the preceding 12 month period shall cause a vacancy on the Executive Board held by such member.
  7. To perform all duties as required under HAVA.
  8. Two members of the Executive Board shall have authority to call a meeting of the Executive Board in writing by filing the original call of the meeting with the Standards Board's Designated Federal Officer (DFO) and the purpose of the meeting shall be stated therein.
  9. A majority of the members of the Executive Board shall be present for a quorum.
  10. Actions of the Executive Board shall be made by majority vote of the full membership of the Executive Board. Proxy voting will not be allowed in Executive Board meetings. A representative of an Executive Board member may attend and participate in any and all discussions but may not vote.

11. A member of the Executive Board may be removed from the Executive Board by two-thirds vote of the Standards Board at a meeting of the Standards Board.
12. In the event of a vacancy in the Executive Board the remaining members of the Executive Board may appoint an interim member of the Executive Board until the next meeting of the Standards Board.
13. The Executive Board shall promptly provide to the members of the Standards Board all guidelines proposed to be adopted pursuant to Section 222(b)(3) of HAVA.
14. The recommendations made by the Executive Board to the Standards Board pursuant to Section 222(b)(3) shall include an appendix of any and all dissenting comments received from Executive Board members.
15. Such other duties as may be delegated to the Executive Board by the Standards Board from time to time.

**J. The duties of the DFO shall be:**

1. To serve as the government's agent for all matters related to the Standards Board's activities.
2. To approve or call the meeting of the Standards Board.
3. To approve agendas proposed by the Executive Committee of the Standards Board.
4. To attend all meetings of the Standards Board and Executive Board of the Standards Board.
5. To adjourn the meetings when such adjournment is in the public interest.
6. To provide adequate staff support to the Standards Board, including the performance of the following functions:
  - a. Notifying members of the time and place for each meeting.
  - b. Maintaining records of all meetings, including subgroup or working group activities, as required by law.
  - c. Maintaining the roll.

of Information Act (FOIA). The minutes will include the following: the time, date and place of the Standards Board meeting; a record of the persons present (including the names of Standards Board members, names of staff, and the names of members of the public from whom written or oral presentations were made); a complete and accurate description of the matters discussed and conclusions reached; and copies of all reports received, issued or approved by the Board.

All documents, reports, or other materials prepared by, or for, the Standards Board constitute official government records and will be maintained according to the Federal Records Act.

- F. Unless otherwise determined in advance, all meetings of the Standards Board will be open to the public. Once an open meeting has begun, it will not be closed unless prior approval of the closure has been obtained and proper notice of the closed session has been given to the public. All materials brought before, or presented to, the Board during the conduct of an open meeting, including the minutes of the proceedings of the previous open meeting, will be available to the public for review or copying at the time of the scheduled meeting.

Members of the public may attend any meeting or portion of a meeting that is not closed to the public and may, at the determination of the Chair, offer oral comment at such meeting. The Chair may decide in advance to exclude oral public comment during a meeting, in which case the meeting announcement published in the Federal Register will note that oral comment from the public is excluded and will invite written comment as an alternative. Members of the public may submit written statements to the EAC at any time.

- G. Meetings of the Standards Board will be closed only in limited circumstances and in accordance with applicable law. The Standards Board must obtain prior approval to conduct a closed session. Requests for closed meetings must be submitted to EAC's Office of General Counsel 45 days in advance of the proposed closed session.

Where the DFO, in conjunction with the Office of General Counsel, has determined in advance that discussions during a Standards Board meeting will involve matters about which public disclosure would be harmful to the interests of the government, industry, or others, an advance notice of a closed meeting, citing the applicable exemptions of the Government in the Sunshine Act (GISA), will be published in the Federal Register. The notice may announce the closing of all or just part of a meeting. If, during the course of an open meeting, matters inappropriate for public disclosure arise during discussions, the Chair will order such discussion to cease and will schedule it for closed session. Notices of closed meetings will be published in the Federal Register at least 15 calendar days in advance.

## Section VI: Voting

- A. Actions taken by the Standards Board shall be by majority vote of those present and voting unless otherwise specified in these bylaws.
- B.
  - 1. Proxy designations must be submitted in writing to the Chair up to the day of the meeting of the Standards Board.
  - 2. Proxy votes may be cast by members of the Standards Board or other designee provided the proxy designations have been timely filed in advance with the Chair clearly identifying the Board member or other designee to cast his proxy vote.
  - 3. The Chair shall appoint a proxy committee to verify eligibility of proxy votes.
- C. Voting procedures for the Standards Board, the Executive Board, and the subcommittees will follow the accepted procedure in the latest edition of Robert's Rules of Order. Votes by the Standard Board on recommendations to EAC shall have the ayes, nays, and abstentions recorded.

## Section VII: Bylaws

### A. General

- 1. The general membership of the EAC's Standards Board shall have the exclusive right to repeal and/or amend the organization's bylaws.
- 2. The bylaws may be amended by a two-thirds vote of the members present and voting at any Standards Board meeting, for which legal notice has been given to the Standards Board, where a quorum is present, and when at least 30 days prior notice of the vote has been given to the Standards Board members.

### B. Procedures

- 1. The Standards Board's Bylaws Committee shall promulgate a form for proposing an amendment to the Standards Board's Bylaws. The form shall require the specific language of the proposed amendment to be included, shall identify the author of the amendment, and shall be designed to elicit the rationale and impact statement.
- 2. Proposed changes to the Standards Board's bylaws submitted fewer than 60 days prior to a scheduled meeting of the Standards Board shall be deferred until the meeting following that meeting of the Standards Board.

3. Proposed changes to the Standards Board's Bylaws shall be submitted to the Standards Board's Designated Federal Officer who shall then expeditiously forward the proposed changes to the Standard's Board's Bylaws Committee and to the EAC's General Counsel.
4. The General Counsel shall report in an expeditious manner to the Bylaws Committee and the Executive Board whether or not a proposed change to the Bylaws is consistent with federal law and/or rules.
5. The Standards Board's Bylaws Committee shall prepare and forward to the Standards Board's Executive Committee the General Counsel's report on the legality of the proposed change, an analysis of the impact of a proposed change and a recommendation for disposition at least 45 days prior to the next Standards Board meeting.
6. The Standards Board's Executive Committee shall place the report on the proposed change to the Standards Board's Bylaws on the agenda for the meeting of the Standards Board.
7. The Standards Board's Executive Board shall forward all proposed changes along with rationale for or against the proposed change to all Standards Board members at least 35 days prior to the next meeting of the Standards Board via email and U.S. Mail to the applicable address of record on file with the EAC. The Executive Board shall request EAC post the proposed change to the bylaws and all supporting material on EAC's website at least 35 days prior to the next meeting of the Standards Board.

#### **Section VIII: Expenses and Reimbursement.**

Expenses related to the operation of the Standards Board will be borne by the EAC. Expenditures of any kind must be approved in advance by the DFO.

Members of the Standards Board will not be compensated for their services but will receive reimbursement for travel expenses and subsistence. The EAC will pay travel and per diem for non-government members at a rate equivalent to that allowable for federal employees.

#### **Section IX: Effective Date**

These By-Laws are effective upon adoption by the Standards Board.

#### **Section X: Transition Procedures and Ratification**

- A. The adoption of the By-Laws has no effect on the selection, terms or appointment of the officers or member of the Standards Board, the Executive Board, or a subcommittee of a Board serving on the effective date of these By-Laws.

**B. All acts of the Standards Board, the Executive Board or a subcommittee of a Board are hereby ratified, except to the extent that an act does not conform with a resolution adopted by the Standards Board before the effective date of these By-Laws.**

**BYLAWS OF THE U.S. ELECTION ASSISTANCE COMMISSION-  
BOARD OF ADVISORS**

**Article I: Board of Advisors, Operating Authority ✓**

1. Pursuant to the Federal Advisory Committee Act and the Help America Vote Act of 2002 (HAVA) [Public Law 107-252], the Board of Advisors has been granted its authority through its Charter with the U.S. Election Assistance Commission and will hereinafter be referred to as 'The Board'.

**Article II: Objectives ✓**

1. Advise the EAC through review of the voluntary voting system guidelines described in Title II Part 3 of the HAVA; through review of the voluntary guidance described under Title III of HAVA; and through the review of the best practices recommendations contained in the report submitted under Section 242(b) of Title II (HAVA Title II section 212).
2. The Board will function solely as an advisory body and will comply fully with the provisions of the Federal Advisory Committee Act.(Exhibit A)

**Article III: Membership ✓**

1. Pursuant to HAVA Title, Section 214 (a), the Board shall consist of the following:
  - a. Two members appointed by the National Governors Association;
  - b. Two members appointed by the National Conference of State Legislatures;
  - c. Two members appointed by the National Association of Secretaries of State;
  - d. Two members appointed by the National Association of State Election Directors;
  - e. Two members appointed by the National Association of Counties;
  - f. Two members appointed by the National Association of County Recorders, Election Officials, and Clerks;
  - g. Two members appointed by the United States Conference of Mayors;
  - h. Two members appointed by the Election Center;
  - i. Two members appointed by the International Association of County Recorders, Election Officials, and Treasurers;
  - j. Two members appointed by the United States Commission on Civil Rights;
  - k. Two members appointed by the Architectural and Transportation Barrier Compliance Board under section 502 of the Rehabilitation Act of 1973 (29 U.S.C. 792);
  - l. The Chief of the Public Integrity Section of the Criminal Division of the Department of Justice, or the chief's designee;
  - m. The Chief of the Voting Section of the Civil Rights Division of the Department of Justice, or the chief's designee;
  - n. The Director of the Federal Voting Assistance Program of the Department of Defense;

u

- o. Four members representing professionals in the field of science and technology, of whom
  - i. One (1) each shall be appointed by the Speaker and the Minority Leader of the House of Representatives; and
  - ii. One (1) each shall be appointed by the Majority Leader and the Minority Leader of the Senate.
- p. Eight members representing voter interests, of whom-
  - i. Four (4) members shall be appointed by the Committee on House Administration of the House of Representatives, of whom two (2) shall be appointed by the chair and two (2) shall be appointed by the ranking minority member; and
  - ii. Four (4) members shall be appointed by the Committee on Rules and Administration of the Senate, of whom two (2) shall be appointed by the chair and two (2) shall be appointed by the ranking minority members.

**Article IV: Terms of Service, Filling vacancies;**

1. Members of the Board shall serve for a term of two (2) years and may be reappointed.
2. Vacancy appointments to the Board shall be made in the same manner as the original appointment pursuant to the HAVA.

**Article V: Officers**

1. The Board shall elect a Chair, Vice-Chair and Secretary from its members.
2. All votes for officers shall be by secret ballot.
3. Each position shall last a period of one year or until the next election for a specified office.
4. Officers may serve no more than two consecutive terms for a specific office.
5. The Chair shall appoint a Parliamentarian to oversee the conduct of the meeting.
6. The election of officers shall be held at the first meeting of each calendar year.

**Article VI: Duties of Officers**

1. The Chair shall preside over meetings of the Board of Advisors; appoint all committees and serve as official liaison to the Election Assistance Commission for all resolutions and recommendations adopted by the Board; request information from any federal agencies necessary to assist with the functions of the Board of Advisors and coordinate with the Election Assistance Commission and Standards Board meeting calls pursuant to Section 222 of the HAVA; appoint committees as necessary to carry out advisory responsibilities charged under the HAVA or as otherwise assigned by the Election Assistance Commission; serve as *ex officio* member of all committees.
2. The Vice-Chair, in absence of the Chair, shall serve as official liaison to the Election Assistance Commission for all resolutions and

7  
in chair  
duties

recommendations adopted by the Board and preside over meetings of the Board of Advisors;

3. The Secretary shall be responsible for notifying the Board of Advisors on meeting calls; pending matters of business for the Board of Advisors; and serve as the Chair of the By-laws Committee.

#### **Article VII: Meetings**

1. Pursuant to the HAVA, the Board of Advisors shall conduct no less than two meetings per calendar year subject to forty-five (45) days advance notice of the meeting and proposed actions.
2. Other meetings may be called at the request of the Chair, or at the written request of a majority of the Board of Advisors, as necessary, subject to forty-five (45) days advance notice, which notice may be waived by agreement of a majority of the members to the extent permitted by law.
3. All meetings shall be subject to requirements within the Federal Advisory Committee Act.
4. To the extent permitted by law, meetings may be held by electronic means such as conference calls.

#### **Article VIII: Quorum and Proxy Voting**

1. Quorum shall consist of present and voting members of the Board.
2. Proxy designations must be submitted in writing to the Chair up to the day of the meeting of the Board.
3. Proxy votes may only be cast by members of the Board provided the proxy designations have been timely filed in advance with the Chair clearly identifying the Board member to cast his proxy vote.
4. The Chair shall appoint a proxy committee to verify eligibility of proxy votes.

#### **Article IX: Standing Committees**

##### **Section 1- Meetings**

- a. All committees may meet informally at anytime for the purpose of conducting their business, including telephonically or as otherwise determined necessary by the Committee Chair.

##### **Section 2-Bylaws Committee**

- a. The Secretary shall serve as Chair of the Bylaws Committee.
- b. The Bylaws Committee shall be comprised of no more than five (5) individuals, including the Secretary. Each remaining member of the committee will be appointed by the Board of Advisors by majority vote.
- c. All bylaws and resolutions presented to the association shall be referred to the committee for consideration and reported to the meeting prior to adoption.

##### **Section 3-Voting System Standards Committee**

- a. The Chair of the Voting System Standards Committee shall be appointed by the Chair of the Board of Advisors.

- b. The Chair of the Voting System Standards Committee must be acquainted with the conduct of elections and incorporation of various election technology and/or ballot design.
- c. The Committee shall be comprised of no more than eleven (11) individuals. (members)
- d. At least one (1) member, excluding the Chair, shall represent a disability advocacy group on this committee.
- e. One (1) member, excluding the Chair, shall represent each of the following:
  - i. National Association of County Recorders, Election Officials and Clerks (NACRC);
  - ii. International Association of Clerks, Recorders, Election Officials and Treasurers (IACREOT);
  - iii. National Association of Secretaries of State (NASS);
  - iv. National Association of State Election Directors (NASED);
  - v. The Election Center;
- f. The Chair shall appoint other members who are not specified in Section (e).

**Article X: Amendments**

- a. The bylaws may be amended based on a 2/3 decision of the Board.
- b. All proposed bylaw changes must be submitted to the Chair for subsequent reporting to the Bylaws committee no less than thirty (30) days prior to a meeting.
- c. All proposed bylaw changes should be submitted in writing and distributed to all members of the Advisory Board one (1) month prior to a meeting.

**Article XI: Parliamentary Authority**

- a. The parliamentary authority shall be Robert Rules of Order Newly Revised Edition.

**Interpretive Notes and Decisions:**

Requirements of Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.) cannot be constitutionally applied to American Bar Association committee that advises President and Department of Justice on federal judicial nominations

Handwritten note: Check w/ Gavin or Julie -> whether Standard Board members can remove employment law question

because President alone nominates candidates for federal judgeships, role of Congress is limited to Senate's advise and consent function, purposes of requirements are served through public confirmation process, and any need for applying requirements to committee is outweighed by President's interest in preserving confidentiality and freedom of consultation in selecting nominees. *Washington Legal Foundation v. United States Dep't of Justice* (1988, DC Dist Col) 691 F Supp 483, affd (1989) 491 US 440, 105 L Ed 2d 377, 109 S Ct 2558. (criticized in *In re Richardson* (1998, BC MD La) 217 BR 479, 32 BCD 114) and (criticized in *Manshardt v Fed. Judicial Qualifications Comm.* (2005, CA9 Cal) 401 F3d 1014).

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION

5 USCS Appx § 2

§ 2. Findings and purpose

(a) The Congress finds that there are numerous committees, boards, commissions, councils, and similar groups which have been established to advise officers and agencies in the executive branch of the Federal Government and that they are frequently a useful and beneficial means of furnishing expert advice, ideas, and diverse opinions to the Federal Government.

(b) The Congress further finds and declares that—

- (1) the need for many existing advisory committees has not been adequately reviewed;
- (2) new advisory committees should be established only when they are determined to be essential and their number should be kept to the minimum necessary;
- (3) advisory committees should be terminated when they are no longer carrying out the purposes for which they were established;
- (4) standards and uniform procedures should govern the establishment, operation, administration, and duration of advisory committees;
- (5) the Congress and the public should be kept informed with respect to the number, purpose, membership, activities, and cost of advisory committees; and
- (6) the function of advisory committees should be advisory only, and that all matters under their consideration should be determined, in accordance with law, by the official, agency, or officer involved.

(Oct. 6, 1972, P.L. 92-463, § 2, 86 Stat. 770.)

**HISTORY; ANCILLARY LAWS AND DIRECTIVES**

## Other provisions:

**Ex. Or. No. 11686 superseded.** Ex. Or. No. 11686 of Oct. 7, 1972, *37 Fed. Reg. 21421*, formerly classified as a note under this section, which related to committee management, was superseded by Ex. Or. No. 11769 of Feb. 21, 1974, *39 Fed. Reg. 7125*, formerly set out as a note under this section.

**Ex. Or. No. 11769 of Feb. 21, 1974 revoked.** Ex. Or. No. 11769 of Feb. 21, 1974, *39 Fed. Reg. 7125*; formerly classified as a note to this section, was revoked by Ex. Or. No. 12024 of Dec. 1, 1977, *42 Fed. Reg. 61445*, set out as a note to this section.

**Transfer of certain advisory committee functions.** Ex. Or. No. 12024 of Dec. 1, 1977, *42 Fed. Reg. 61445*, provided: "By virtue of the authority vested in me by the Constitution and statutes of the United States of America, including the Federal Advisory Committee Act, as amended [5 USCS Appx], *Section 301 of Title 3 of the United States Code*, *Section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c) [31 USCS § 1531]*, and *Section 7 of Reorganization Plan No. 1 of 1977 [42 Fed. Reg. 56101 (October 21, 1977), 5 USCS § 903 note]*, and as President of the United States of America, in accord with the transfer of advisory committee functions from the Office of Management and Budget to the General Services Administration provided by Reorganization Plan No. 1 of 1977, it is hereby ordered as follows:

"Section 1. The transfer, provided by Section 5F of Reorganization Plan No. 1 of 1977 (*42 FR 56101*) [*5 USCS § 903 note*, and note preceding *3 USCS § 101*], of certain functions under the Federal Advisory Committee Act, as amended (*5 U.S.C. App. I*) [*5 USCS Appx.*], from the Office of Management and Budget and its Director to the Administrator of General Services is hereby effective.

"Sec. 2. There is hereby delegated to the Administrator of General Services all the functions vested in the President by the Federal Advisory Committee Act, as amended [*5 USCS Appx*], except that, the annual report to the Congress required by Section 6(c) of that Act [*5 USCS Appx*] shall be prepared by the Administrator for the President's consideration and transmittal to the Congress.

"Sec. 3. The Director of the Office of Management and Budget shall take all actions necessary or appropriate to effectuate the transfer of functions provided in this Order [this note], including the transfer of funds, personnel and positions, assets, liabilities, contracts, property, records, and other items related to the functions transferred.

"Sec. 4. Executive Order No. 11769 of February 21, 1974 [formerly set out as a note to this section] is hereby revoked.

"Sec. 5. Any rules, regulations, orders, directives, circulars, or other actions taken pursuant to the functions transferred or reassigned as provided in this Order [this note] from the Office of Management and Budget to the Administrator of General Services, shall remain in effect as if issued by the Administrator until amended, modified, or revoked.

"Sec. 6. This Order [this note] shall be effective November 20, 1977."

## Interpretive Notes and Decisions:

In suit alleging that task force, which included Vice President and government officials, and gave policy recommendations to President, failed to comply with Federal Advisory Committee Act, where district court entered broad discovery orders against Vice President and government officials, appellate court prematurely terminated its writ of mandamus inquiry after Vice President refused to assert executive privilege; appellate court labored under mistaken assumption that assertion of executive privilege was necessary precondition to petitioners' separation-of-powers objections. *Cheney v United States Dist. Court* (2004, US) 159 L Ed 2d 459, 124 S Ct 2576, 32 Media L R 2121, 17 FLW Fed S 447.

Where U.S. Supreme Court Justice attended duck-hunting trip with Vice President of United States, who was defendant in official-capacity suit before Court, Justice's recusal was not required or permitted, because, inter alia, case was run-of-the-mill legal dispute about administrative decision under Federal Advisory Committee Act, 5 USCS app. 1, § 1 et seq. *Cheney v United States Dist. Court* (2004) 541 US 913, 158 L Ed 2d 225, 124 S Ct 1391.

Working groups formed during post-judgment conference process concerning protection of endangered Snake River salmon were not advisory committees within meaning of FACA since they were not established by agency of federal government, rather were created by principals in preceding litigation, nor were they funded by or subject to management of federal government. *ALCOA v National Marine Fisheries Serv.* (1996, CA9 Or) 92 F3d 902, 96 CDOS 5952, 96 Daily Journal DAR 9735.

Alleged inadequate public notice at several steps in protracted approval process for siting new memorial was harmless since position of organization challenging procedure was main focus of each stage in approval process, was considered and simply did not prevail; notably, organization did not become involved in siting process despite numerous instances of adequate notice. *Friends of Iwo Jima v National Capital Planning Comm'n* (1999, CA4 Va) 176 F3d 768.

★ Advisory committee exists to advise and not to decide. *Metcalf v National Petroleum Council* (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

Letter by Attorney General's Commission on Pornography to magazine publisher asking for response to accusation that its magazine was pornographic was not unlawful since, notwithstanding any misapprehension of publisher, court did believe that Commission ever threatened to use state's coercive power against publisher. *Penthouse Int'l, Ltd. v Meese* (1991, App DC) 291 US App DC 183, 939 F2d 1011, cert den (1992) 503 US 950, 117 L Ed 2d 650, 112 S Ct 1513.

National Academy of Sciences committee which produced scientific manual which included guidelines for handling and monitoring treatment of laboratory animals was "utilized" within meaning of statute since Department of Health and Human Services relied on its work product and because it was formed by National Academy of Sciences, which is quasi-public entity. *Animal Legal Defense Fund v Shalala* (1997, App DC) 322 US App DC 381, 104 F3d 424, 160 ALR Fed 777, reh, en banc, den (1997, App DC) 325 US App DC 1, 114 F3d 1209 and reh den (1997, App DC) 1997 US App LEXIS 21156 and cert den (1997) 522 US 949, 139 L Ed 2d 285, 118 S Ct 367.

Even if Federal Advisory Committee Act's requirements that agency representative approve agenda of advisory committee meeting as well as § 2's hortatory language that all matters under advisory committee's consideration should be determined by official, agency, or officer forbid advisory committee from taking any action not approved by agency representative and not included in committee's agenda, it does not mean that agency administrator or representative had duty to intervene to prevent committee from voting on resolution not on agenda. *Claybrook v Slater* (1997, App DC) 324 US App DC 145, 111 F3d 904 (criticized in *Taylor v FDIC* (1997, App DC) 328 US App DC 52, 132 F3d 753).

District court's injunction against agency's use of or reliance on report prepared by committee organized and operated in violation of FACA probably did not redress any of appellees' claimed injuries, and district court should have afforded appellees opportunity to take discovery and refine their request for equitable relief. *Natural Resources Defense Council v Pena* (1998, App DC) 331 US App DC 198, 147 F3d 1012, on remand, motion to strike den (1999, DC Dist Col) 189 FRD 4.

In suit where Vice President, and others, all defendants under Federal Advisory Committee Act suit, petitioned for writ of mandamus vacating district court's discovery orders, directing court to rule on basis of administrative record,

petitioners failed to satisfy heavy burden required to justify extraordinary remedy of mandamus as their challenges to district court's legal rulings could be fully considered on appeal following final judgment, and their claims of harm could be fully cured in district court; narrow, carefully focused discovery would fully protect Vice President; either Vice President would have no need to claim privilege, or if he did, then district court's express willingness to entertain privilege claims and to review allegedly privileged documents in camera would prevent any harm; moreover, such measures would enable district court to resolve statutory question—whether Federal Advisory Committee Act (FACA), 5 USCS App. 2, applied to energy policy commission at issue—without sweeping intrusions into *Presidency and Vice Presidency*. *In re Cheney* (2003, App DC) 357 US App DC 274, 334 F3d 1096, reh. en banc, den (2003, App DC) 2003 US App LEXIS 18831 and reh den (2003, App DC) 2003 US App LEXIS 18832 and vacated, remanded (2004, US) 159 L Ed 2d 459, 124 S Ct 2576, 32 Media L R 2121, 17 FLW Fed S 447 and (ovrld as stated in *Halmon v Jones-Lang Wootton USA* (2005, DC Dist Col) 355 F Supp 2d 239).

Federal Advisory Committee Act was aimed at eliminating useless advisory committees, strengthening independence of remaining advisory committees, and preventing advisory groups from becoming self-serving. *Consumers Union of United States, Inc. v HEW* (1976, DC Dist Col) 409 F Supp 473, affd without op (1977, App DC) 179 US App DC 280, 551 F2d 466.

Contention that advisory boards established by Taylor Grazing Act [43 USCS §§ 315 et seq.] were exempt from effect of Federal Advisory Act was without merit; in choosing to terminate all advisory committees, Congress contemplated that FAA would affect existing substantive law and that if it was later decided that a particular advisory committee was necessary, Congress would enact legislation to recharter it. *Carpenter v Morton* (1976, DC Nev) 424 F Supp 603.

Industry representatives did not constitute federal advisory committee within meaning of 5 USCS Appx § 2(2), where group of cement industry representatives who submitted proposal to Environmental Protection Agency for enforcement agreement regarding cement kiln dust was not established at request of EPA, group had no fixed membership or organized structure, and although EPA had logistical control over group, this was not substantive control amounting to utilization of group. *Huron Envtl. Activist League v United States EPA* (1996, DC Dist Col) 917 F Supp 34, 26 ELR 21085.

Animal rights organization is not granted preliminary injunction to enjoin members of U.S. delegation from participating, without complying with 5 USCS Appx §§ 1-14, in working group of experts whose objective is to develop international humane animal trapping standards, where (1) majority of members of U.S. delegation were selected by National Governors Association with no input from federal agencies, (2) only one federal official played substantive role, and where working group was formed at behest of international constituency, and (3) U.S. Trade Representative (USTR) at most indirectly facilitated formation of group, because plaintiff has not demonstrated substantial likelihood of success on merits of its claim that working group was established or utilized by USTR and is thereby subject to statute. *People for the Ethical Treatment of Animals v Barshefsky* (1996, DC Dist Col) 925 F Supp 844.

Private organization representing chemical producers did not have standing to challenge composition of National Advisory Committee for Acute Exposure Guideline Levels for Hazardous Substances as violative of "fair balance" requirement of 5 USCS Appx § 2, given that committee had made no final decisions on any acute exposure guideline levels and that there was no reason to believe that committee would do anything differently with one or 2 more industry representatives serving on it. *Fertilizer Inst. v United States EPA* (1996, DC Dist Col) 938 F Supp 52, 43 Envt Rep Cas 1385 (criticized in *Northwest Ecosystem Alliance v Office of the United States Trade Representative* (1999, WD Wash) 1999 US Dist LEXIS 21689).

MSPB lacked jurisdiction of employee's IRA appeal since his employer, Defense Intelligence Agency, is not covered agency, but rather is specifically excluded from coverage of whistleblower protection provisions. *Van Werry v Merit Sys. Protection Bd.* (1993, CA) 995 F2d 1048.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION

5 USCS Appx § 3

§ 3. Definitions.

For the purpose of this Act—

(1) The term "Director" ["Administrator"] means the Director of the Office of Management and Budget [Administrator of General Services].

(2) The term "advisory committee" means any committee, board, commission, council, conference, panel, task force, or other similar group, or any subcommittee or other subgroup thereof (hereafter in this paragraph referred to as "committee"), which is—

(A) established by statute or reorganization plan, or

(B) established or utilized by the President, or

(C) established or utilized by one or more agencies,

in the interest of obtaining advice or recommendations for the President or one or more agencies or officers of the Federal Government except that such term excludes (i) any committee that is composed wholly of full-time, or permanent part-time, officers or employees of the Federal Government, and (ii) any committee that is created by the National Academy of Sciences or the National Academy of Public Administration.

(3) The term "agency" has the same meaning as in *section 551(1) of title 5, United States Code*.

(4) The term "Presidential advisory committee" means an advisory committee which advises the President.

**HISTORY:**

(Oct. 6, 1972, P.L. 92-463, § 3, 86 Stat. 770; Dec. 17, 1997, P.L. 105-153, § 2(a), 111 Stat. 2689.)

**HISTORY; ANCILLARY LAWS AND DIRECTIVES**

Explanatory notes:

The bracketed words "Administrator" and "Administrator of General Services" have been inserted in para. (1) of this section on the authority of Reorg. Plan No. 1 of 1977, § 5F, *42 Fed. Reg. 56101*, 91 Stat. 1634, which appears as 5 USCS § 903 note, which transferred all functions of the Office of Management and Budget and the Director thereof relating to the Committee Management Secretariat to the Administrator of General Services, effective Nov. 20, 1977, as provided by section 1 of Ex. Or. No. 12024 of Dec. 1, 1977, *42 Fed. Reg. 61445*, which appears as a note to § 2 of this Act.

Amendments:

1997. Act Dec. 17, 1997, in para. (2), in the concluding matter, substituted "such term excludes (i) any committee that is composed wholly of full-time, or permanent part-time, officers or employees of the Federal Government, and (ii) any committee that is created by the National Academy of Sciences or the National Academy of Public Administration." for "such term excludes (i) the Advisory Commission on Intergovernmental Relations, (ii) the Commission on Government Procurement, and (iii) any committee which is composed wholly of full-time officers or employees of the Federal Government."

section in  
by laws

## Other provisions:

**Effective date and application of Dec. 17, 1997 amendments.** Act Dec. 17, 1997, P.L. 105-153, § 2(c), 111 Stat. 2691, provides:

"(1) In general. Except as provided in paragraph (2), this section and the amendments made by this section [redesignating § 15 of the Federal Advisory Committee Act as § 16, and adding a new § 15] shall take effect on the date of the enactment of this Act.

"(2) Retroactive effect. Subsection (a) and the amendments made by subsection (a) [amending this section] shall be effective as of October 6, 1972, except that they shall not apply with respect to or otherwise affect any particular advice or recommendations that are subject to any judicial action filed before the date of the enactment of this Act."

## Interpretive Notes and Decisions:

1. Advisory committees
2. Standing to challenge committee actions
3. Status of particular bodies as advisory committees

**1. Advisory committees**

Although National Petroleum Council had operated for considerable period of time prior to effective date of Federal Advisory Committee Act, it is clear that Council is advisory committee within meaning of § 3 of FACA and thus subject to Act's provisions. *Metcalf v National Petroleum Council* (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

When federal administrator establishes or utilizes advisory committee, he must comply with provisions of Federal Advisory Committee Act; it makes no difference whether committee is his own creation or pre-existing group and there is nothing in regulatory scheme of Act to suggest that Congress intended to exclude organizations fitting definition of advisory committee from coverage simply because they had existence independent of agency utilizing them. *Center for Auto Safety v Cox* (1978, App DC) 188 US App DC 426, 580 F2d 689.

Federal Advisory Committee Act was not intended to apply to all amorphous, ad hoc group meetings; only those groups having some sort of established structure and defined purpose may be considered as "advisory committees" within meaning of Act. *Nader v Barody* (1975, DC Dist Col) 396 F Supp 1231.

National Academy of Sciences is not agency for purposes of Federal Advisory Committee Act in absence of any significant delegation of governmental authority, jurisdiction, administrative function or power; nor was Academy's Committee on Motor Vehicle Emissions "advisory committee" under FACA where legislative history of that Act evidences apparent intention on part of Congress to exclude from coverage groups providing advice to federal agencies pursuant to

contractual relationship and specifically committees of National Academy of Sciences. *Lombardo v Handler* (1975, DC Dist Col) 397 F Supp 792, 8 Env't Rep Cas 1084, 6 ELR 20046, aff'd without op (1976, App DC) 178 US App DC 277, 546 F2d 1043, cert den (1977) 431 US 932, 53 L Ed 2d 248, 97 S Ct 2639.

→ Legislative history of Federal Advisory Committee Act evidences apparent intention on part of Congress to exclude from coverage groups providing advice to federal agencies pursuant to contractual relationships. *Lombardo v Handler* (1975, DC Dist Col) 397 F Supp 792, 8 Env't Rep Cas 1084, 6 ELR 20046, aff'd without op (1976, App DC) 178 US App DC 277, 546 F2d 1043, cert den (1977) 431 US 932, 53 L Ed 2d 248, 97 S Ct 2639.

Meetings held between FDA officials and representatives of Cosmetic, Toiletry and Fragrance Association were not "advisory committee meetings" within meaning of § 3(2) of FACA where, inter alia, CTFA was presenting to FDA a voluntary, industry-sponsored proposal and was seeking FDA's comments and advice, rather than FDA having solicited industry and consumer viewpoints on program proposed by FDA. *Consumers Union of United States, Inc. v HEW* (1976, DC Dist Col) 409 F Supp 473, aff'd without op (1977, App DC) 179 US App DC 280, 551 F2d 466.

Federal Advisory Committee Act was intended to apply to committees created by agencies and to those committees not originally created by agencies but subsequently used by them as advisory committees; exclusion provided by § 3(2) of FACA was applicable to committees made up wholly of federal officials, and did not apply to committee consisting of both state and federal employees. *Center for Auto Safety v Tiemann* (1976, DC Dist Col) 414 F Supp 215, remanded (1978, App DC) 188 US App DC 426, 580 F2d 689.

Requirements of Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.) cannot be constitutionally applied to American Bar Association committee that advises President and Department of Justice on federal judicial nominations because President alone nominates candidates for federal judgeships, role of Congress is limited to Senate's advise and consent function, purposes of requirements are served through public confirmation process, and any need for applying requirements to committee is outweighed by President's interest in preserving confidentiality and freedom of consultation in selecting nominees. *Washington Legal Foundation v United States Dep't of Justice* (1988, DC Dist Col) 691 F Supp 483, aff'd (1989) 491 US 440, 105 L Ed 2d 377, 109 S Ct 2558 (criticized in *In re Richardson* (1998, BC MD La) 217 BR 479, 32 BCD 114) and (criticized in *Manshardt v Fed. Judicial Qualifications Comm.* (2005, CA9 Cal) 401 F3d 1014).

Department of Energy's (DOE) establishment and use of three of four challenged committees contravened Federal Advisory Committee Act, 5 USCS Appx where court reasoned that committees were advisory in nature; committees did not have capability of acting on their own and, rather, provided advice to DOE. *NRDC v Abraham* (2002, DC Dist Col) 223 F Supp 2d 162, set aside in part and remanded in part (2004, App DC) 359 US App DC 183, 353 F3d 40 and (ovrld in part as stated in *Int'l Brominated Solvents Ass'n v Am. Conf. of Governmental Indus. Hygienists, Inc.* (2005, MD Ga) 21 BNA OSHC 1018).

National Commission on Observance of International Women's Year (IWY) is not "advisory committee" subject to Federal Advisory Committee Act since there is nothing in Ex. Or. No. 11832 or Public Law 94-167 which assigns Commission any advisory functions; while it may make its own recommendations in report on National Conference of Women it submits to Congress and President, Commission was not "established" or "utilized" for this purpose; National Women's Conference, to be organized by National Commission on IWY which will, among other functions, make findings and recommendations on various subjects to be submitted through Commission's report to President is advisory committee subject to Federal Advisory Committee Act; State and regional meetings, organized under Public Law 94-167, have sole statutory purpose of selecting representatives to Conference, and since they are not required to make recommendations to IWY Commission and others, they are not "advisory committees", nor are State coordinating committees "advisory" since they have only operational role of organizing and conducting State or regional meetings and are, in effect, grantees of National Commission. (1977) 57 Comp Gen 51.

## 2. Standing to challenge committee actions

Plaintiff has standing to bring claim under Federal Advisory Committee Act where it sustains injury in fact, injury could be remedied if court invalidated committee's decision, and where interest falls within zone of interest of Federal Advisory Committee Act. *HLI Lordship Indus. v Committee for Purchase from Blind & Other Severely Handicapped* (1985, ED Va) 615 F Supp 970, rev'd on other grounds, remanded (1986, CA4 Va) 791 F2d 1136.

## 3. Status of particular bodies as advisory committees

American Bar Association's standing committee on federal judiciary, in its role of advising Justice Department

regarding potential nominees for federal judgeships; does not constitute advisory committee for purposes of FACA because literalistic reading of definition section would bring such advisory relationship within act's terms; such relationship was not within contemplation of President's executive order which governed functioning of advisory committees until FACA's passage, and FACA's legislative history does not display intent to widen such order's application to include advisory relationship between Committee and Justice Department. *Public Citizen v United States Dep't of Justice* (1989) 491 US 440, 105 L Ed 2d 377, 109 S Ct 2558 (criticized in *In re Richardson* (1998, BC MD La) 217 BR 479, 32 BCD 114) and (criticized in *Manshardt v Fed. Judicial Qualifications Comm.* (2005, CA9 Cal) 401 F3d 1014).

Group that was organized and funded at least in part by certain federal agencies to assist agencies and other agencies with developing strategies for implementing restoration projects in Florida Everglades met definition of advisory committee set forth in 5 USCS App. 2 § 3. *Miccosukee Tribe of Indians v S. Everglades Restoration Alliance* (2002, CA11 Fla) 304 F3d 1076, 33 ELR 20024, 15 FLW Fed C 976 (criticized in *Int'l Brominated Solvents Ass'n v Am. Conf. of Governmental Indus. Hygienists, Inc.* (2004, MD Ga) 20 BNA OSHC 2070).

Committee formed to recommend nominees for certain federal appointments was not advisory committee within scope of Federal Advisory Committee Act (FACA), 5 USCS App. 2 § 3, because it was not established by statute, agency, or President; moreover, it was not utilized by President for purposes of FACA, particularly since its recommendations were not solicited by President. *Manshardt v Fed. Judicial Qualifications Comm.* (2005, CA9 Cal) 408 F3d 1154.

President's Task Force on National Health Care Reform was not advisory group subject to FACA since First Lady, who was appointed to chair Task Force, was federal employee; Congress has recognized in 5 USCS § 105 that President's spouse is functional equivalent of assistant to President; and President's implicit authority to enlist his spouse in aid of discharge of his federal duties undermines claim that treating President's spouse as officer or employee would violate anti-nepotism provisions of 5 USCS § 3110. *Association of Am. Physicians & Surgeons v Clinton* (1993, App DC) 302 US App DC 208, 997 F2d 898, 21 Media L R 1705.

Group advising U.S. Sentencing Commission on environmental crimes was not subject to FACA; Congress clearly excluded Sentencing Commission from APA, which determines FACA coverage, and group was not "utilized" by DOJ, even though members of group from DOJ were likely to exercise significant influence on group's deliberations and ensuing recommendations, since group answered to Commission, not DOJ. *Washington Legal Found. v United States Sentencing Comm'n* (1994, App DC) 305 US App DC 93, 17 F3d 1446, 22 Media L R 1338, 25 ELR 21189.

Panel of experts and consumers convened by Agency for Health Care Policy and Research to develop clinical practice guideline on treatment of lower back pain for health care practitioners was not advisory committee under FACA since it was created to develop guidelines for health care practitioners, not to provide advice to federal government, and fact that federal agency used guideline to formulate policy did not make panel advisory committee. *Sofamor Danek Group v Gaus* (1995, App DC) 314 US App DC 43, 61 F3d 929, cert den (1996) 516 US 1112, 133 L Ed 2d 841, 116 S Ct 910.

Presidential legal expense trust fund created by President and his wife to defray personal legal fees and related expenses incurred by President in legal proceedings commenced after he assumed office but unrelated to any of his official duties was not "advisory committee" since its main purpose was collecting and managing funds, not giving advice, and, even assuming advice were given, it was not directed to governmental policy. *Judicial Watch v Clinton* (1996, App DC) 316 US App DC 179, 76 F3d 1232.

In case involving issue whether Task Force on National Health Care Reform was advisory committee, attorney's fee award to defendant medical associations would be reversed since evidence of government's bad faith or lack of substantial justification for its litigation position was not clear and convincing, although district court on remand might consider whether sanctions on other grounds were warranted. *Association of Am. Physicians & Surgeons, Inc. v Clinton* (1999, App DC) 337 US App DC 394, 187 F3d 655.

Task forces organized by nonprofit foundation to assist Executive Committee of Private Sector Survey, appointed pursuant to Executive Order No. 12369, to conduct in-depth reviews of Executive Branch operations and to advise President, Secretary of Commerce and heads of other Federal agencies on cost-effective management, are not advisory committees within meaning of Federal Advisory Committee Act and thus subject to same procedural requirements as Executive Committee itself, since task forces do not provide advice directly to President or any agency but advise only Executive Committee. *National Anti-Hunger Coalition v Executive Committee of President's Private Sector Survey on Cost Control* (1983, DC Dist Col) 557 F Supp 524, affd (1983, App DC) 229 US App DC 143, 711 F2d 1071.

Committee which has primarily operational activities and whose advisory capacity is secondary to operational activities, is not advisory committee; National Industries for the Severely Handicapped, as nonprofit corporation is not advisory committee since it is operational component of program which recommends commodities, services and prices for consideration and has limited advisory capacity. *HLI Lordship Indus. v. Committee for Purchase from Blind & Other Severely Handicapped* (1985, ED Va) 615 F Supp 970, revd on other grounds, remanded (1986, CA4 Va) 791 F2d 1136.

Commission on Bicentennial of the United States Constitution, created by P.L. 98-101, 97 Stat. 719, is not advisory committee since list of duties of commission do not include rendition of advice but rather include operational duties. *Public Citizen v Commission on Bicentennial of United States Constitution* (1985, DC Dist Col) 622 F Supp 753.

Six private United States citizens, each expert in nuclear physics, engineering, and systems management, informally invited by Department of Energy Secretary to examine safety of plutonium production reactor in Richland, Washington, do not constitute "advisory committee" under Federal Advisory Committee Act since (1) experts work independently and report findings alone rather than acting as a committee, and (2) legislative history indicates Act's prime concern is to prevent committees from being controlled by special interest groups, and 6 individuals gained no selfish advantage by serving on advisory panel. *Natural Resources Defense Council, Inc. v Herrington* (1986, DC Dist Col) 637 F Supp 116.

Expert panel of scientists is advisory committee subject to balanced membership and public meeting requirements of Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.), where FDA solicited bids for contract to provide it with counsel on important future issues concerning safety of food and cosmetics, and group awarded contract suggested and was subsequently ordered by FDA to assemble expert panel to prepare report to contractor which would review it and then report to FDA, because material facts demonstrate that expert panel was "established" by and is being "utilized" by FDA within meaning of Act. *Food Chemical News v Young* (1989, DC Dist Col) 709 F Supp 5, 35 CCP P 75632, revd (1990, App DC) 283 US App DC 344, 900 F2d 328, cert den (1990) 498 US 846, 112 L Ed 2d 99, 111 S Ct 132.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION

5 USCS Appx § 4

§ 4. Applicability; restrictions

- (a) The provisions of this Act or of any rule, order, or regulation promulgated under this Act shall apply to each advisory committee except to the extent that any Act of Congress establishing any such advisory committee specifically provides otherwise.
- (b) Nothing in this Act shall be construed to apply to any advisory committee established or utilized by—
- (1) the Central Intelligence Agency; or

027537

(2) the Federal Reserve System.

(c) Nothing in this Act shall be construed to apply to any local civic group whose primary function is that of rendering a public service with respect to a Federal program, or any State or local committee, council, board, commission, or similar group established to advise or make recommendations to State or local officials or agencies.

**HISTORY:**

(Oct. 6, 1972; P.L. 92-463, § 4, 86 Stat. 771.)

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION

027538

## 5 USCS Appx § 5

## § 5. Responsibilities of Congressional committees; review; guidelines

(a) In the exercise of its legislative review function, each standing committee of the Senate and the House of Representatives shall make a continuing review of the activities of each advisory committee under its jurisdiction to determine whether such advisory committee should be abolished or merged with any other advisory committee, whether the responsibilities of such advisory committee should be revised, and whether such advisory committee performs a necessary function not already being performed. Each such standing committee shall take appropriate action to obtain the enactment of legislation necessary to carry out the purpose of this subsection.

(b) In considering legislation establishing, or authorizing the establishment of any advisory committee, each standing committee of the Senate and of the House of Representatives shall determine, and report such determination to the Senate or to the House of Representatives, as the case may be, whether the functions of the proposed advisory committee are being or could be performed by one or more agencies or by an advisory committee already in existence, or by enlarging the mandate of an existing advisory committee. Any such legislation shall—

- (1) contain a clearly defined purpose for the advisory committee;
- (2) require the membership of the advisory committee to be fairly balanced in terms of the points of view represented and the functions to be performed by the advisory committee;
- (3) contain appropriate provisions to assure that the advice and recommendations of the advisory committee will not be inappropriately influenced by the appointing authority or by any special interest, but will instead be the result of the advisory committee's independent judgment;
- (4) contain provisions dealing with authorization of appropriations, the date for submission of reports (if any), the duration of the advisory committee, and the publication of reports and other materials, to the extent that the standing committee determines the provisions of section 10 of this Act to be inadequate; and
- (5) contain provisions which will assure that the advisory committee will have adequate staff (either supplied by an agency or employed by it), will be provided adequate quarters, and will have funds available to meet its other necessary expenses.

(c) To the extent they are applicable, the guidelines set out in subsection (b) of this section shall be followed by the President, agency heads, or other Federal officials in creating an advisory committee.

The Federal Advisory Committee Act. *10 Harv J Legis 217, 1973.*

## Interpretive Notes and Decisions:

1. Balanced membership requirement
2. Review of committee actions
3. Standing to challenge committee actions

### 1. Balanced membership requirement

Individual nominees' challenge, to Secretary of Department of Interior's appointment of members to resource advisory councils, was dismissed in part because balanced membership requirement of 5 USCS app. 2 § 5(b)(3) did not provide meaningful standard of review for court to apply. *Colo. Envtl. Coalition v Wenker* (2004, CA10 Colo) 353 F3d 1221.

Executive Committee of Private Sector Survey, appointed by President pursuant to Executive Order No. 12369, is "balanced" within meaning of § 5 of Federal Advisory Committee Act (5 USCS Appx), notwithstanding that membership of 150-member committee includes no public interest advocates and no beneficiaries of Federal food assistance programs, since (1) purpose of Survey is to apply to Federal programs expertise of leaders in private sector with special abilities to give detailed advice on cost-effective management of large organizations, which purpose would not necessarily be advanced by inclusion of public interest groups or members of public receiving Federal benefits among membership of committee, and (2) Act does not explain meaning of term "balanced". *National Anti-Hunger Coalition v Executive Committee of President's Private Sector Survey on Cost Control* (1983, DC Dist Col) 557 F Supp 524, affd (1983, App DC) 229 US App DC 143, 711 F2d 1071.

Membership of National Advisory Committee on Microbiological Criteria for Foods is properly balanced under § 5(b) of Federal Advisory Committee Act (5 USCS Appx § 5(b)), notwithstanding claim that "consumer representative or advocate" has not been appointed; food industry employment or consulting background of several members is not to be equated with anti-regulatory sentiments. *Public Citizen v National Advisory Committee on Microbiological Criteria for Foods* (1988, DC Dist Col) 708 F Supp 359, affd (1989, App DC) 281 US App DC 1, 886 F2d 419.

National Women's Conference does not violate "balance" requirements of Federal Advisory Committee Act since Commission regulations on organization and conduct of State meetings, where Conference delegates are selected, afford extremely broad basis for participation and leaves degree of "balance" essentially to participants through normal democratic process; objective of balance goes only to composition of voting bodies rather than support or opposition on any given issue. (1977) 57 Comp Gen 51.

### 2. Review of committee actions

Federal Advisory Committee Act provides for 3 separate sources of review to insure that network of federal advisory committees is operating as effectively and efficiently as possible; first source of review is Congress itself under FACA § 5(a), second source is Director of Office of Management and Budget under authority of § 7(b), and third is head of federal agency utilizing advisory committee who monitors performance of committee under authority of § 8. *Metcalf v National Petroleum Council* (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

State environmental protection agency may not challenge recommendation of FDA advisory committee on grounds that advisory committee was not fairly balanced as required under 5 USCS Appx §§ 5(b)(2), (c), where committee recommended that Congress pass legislation preempting additional and conflicting state requirements, because no judicially manageable standards exist to review fair balance requirement. *Public Citizen v HHS* (1992, DC Dist Col) 795 F Supp 1212 (criticized in *Northwest Ecosystem Alliance v Office of the United States Trade Representative* (1999, WD Wash) 1999 US Dist LEXIS 21689).

### 3. Standing to challenge committee actions

Mine owners had standing to challenge defendant National Institution for Occupational Safety and Health's and others' alleged violation of Federal Advisory Committee Act by employing NIOSH's Board of Scientific Counselors (BSC) to peer-review protocol to govern planned study of health effects of exposure to diesel exhaust and filing BSC's charter with wrong congressional committee, since it suffered injury in fact in that it prevented effective congressional monitoring of BSC and mines had compelling interest in ensuring that study's results were accurate. *Cargill, Inc. v United States* (1999, CA5 La) 173 F3d 323, 18 BNA OSHC 1685, 1999 CCH OSHD P 31814.

In action brought by United States senator under Federal Advisory Committee Act, seeking to enjoin operation of National Petroleum Council on ground that council was illegally dominated by petroleum industry, 140 members out of 155 being affiliated with petroleum industry, district court dismissal for lack of standing by plaintiff would be affirmed, plaintiff's allegations that council's deficient advice would result in governmental policies unfavorable to consumers and to environment being purely speculative and conjectural, and his complaint that poor advice from Council would impede his efforts to produce best possible legislative product being insufficiently specific. *Metcalf v National Petroleum Council* (1977, App DC) 180 US App DC 31, 553 F2d 176, 7 ELR 20218.

Members of group denied membership on Executive Committee of Private Sector Survey, appointed by President pursuant to Executive Order No. 12369, to conduct in-depth reviews of Executive Branch Operations and to advise President, Secretary of Commerce and heads of other Federal agencies on cost-effective management have standing to challenge membership of Executive Committee on grounds of lack of "balance" as required by § 5 of Act. *National Anti-Hunger Coalition v Executive Committee of President's Private Sector Survey on Cost Control* (1983, DC Dist Col) 557 F Supp 524, affd. (1983, App. DC) 229 US App DC 143, 711 F2d 1071.

Nonprofit public interest law center has standing to assert claim against American Bar Association Standing Committee under § 5(b) of Federal Advisory Committee Act, where Committee contends center's interest in its activities of reviewing professional qualifications of and rating possible federal judgeship nominees is too remote and speculative to confer standing, because center's claim that defendant is regularly consulting with liberal public interest groups to exclusion of conservative public interest organizations like itself charges that it has been "directly affected" by lack of balance on Committee. *Washington Legal Foundation v American Bar Assn. Standing Committee on Federal Judiciary* (1986, DC Dist Col) 648 F Supp 1353.

"Stop ERA" group lacked standing to protest alleged violation by National Commission on Observance of International Women's Year of FACA § 5(b)(2) by support of Equal Rights Amendment. *Mulqueeny v National Com. on Observance of International Women's Year, 1975* (1977, CA7 Ill) 549 F2d 1115.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION

5 USCS Appx § 6

§ 6. Responsibilities of the President; report to Congress; annual report to Congress; exclusion

- (a) The President may delegate responsibility for evaluating and taking action, where appropriate, with respect to all public recommendations made to him by Presidential advisory committees.
- (b) Within one year after a Presidential advisory committee has submitted a public report to the President, the President or his delegate shall make a report to the Congress stating either his proposals for action or his reasons for inaction, with respect to the recommendations contained in the public report.
- (c) The President shall, not later than December 31 of each year, make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding fiscal year. The report shall contain the name of every advisory committee, the date of and authority for its creation, its termination date or the date it is to make a report, its functions, a reference to the reports it has submitted, a statement of whether it is an ad hoc or continuing body, the dates of its meetings, the names and occupations of its current members, and the total estimated

027541

annual cost to the United States to fund, service, supply, and maintain such committee. Such report shall include a list of those advisory committees abolished by the President, and in the case of advisory committees established by statute, a list of those advisory committees which the President recommends be abolished together with his reasons therefor. The President shall exclude from this report any information which, in his judgment, should be withheld for reasons of national security, and he shall include in such a report a statement that such information is excluded.

**HISTORY:**

(Oct. 6, 1972, § 6, 86 Stat. 772; Dec. 21, 1982, P.L. 97-375, Title II, § 201(c) in part, 96 Stat. 1822.)

**HISTORY; ANCILLARY LAWS AND DIRECTIVES****Amendments:**

1982. Act Dec. 21, 1982 (effective 7/1/83, as provided by § 201(c) in part of such Act), in subsec. (c), substituted "The President shall, not later than December 31 of each year, make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding fiscal year." for "The President shall, not later than March 31 of each calendar year (after the year in which this Act is enacted [enacted Oct. 6, 1972]), make an annual report to the Congress on the activities, status, and changes in the composition of advisory committees in existence during the preceding calendar year."

**Other provisions:**

**Termination of reporting requirements.** For termination, effective May 15, 2000, of provisions of subsec. (c) of this section relating to periodic reports to Congress, see § 3003 of Act Dec. 21, 1995, P.L. 104-66, which appears as 31 USCS § 1113 note. See also page 173 of House Document No. 103-7.

The Federal Advisory Committee Act. 10 *Harv J Legis* 217, 1973.

**Interpretive Notes and Decisions:**

Group that was organized by federal agencies to render advise over restoration projects was advisory committee that was subject to obligations of Federal Advisory Committee Act, 5 USCS App. 2 § 1 et seq. *Miccosukee Tribe of Indians v S. Everglades Restoration Alliance* (2002, CA11 Fla) 304 F3d 1076, 33 ELR 20024, 15 FLW Fed C 976 (criticized in *Int'l Brominated Solvents Ass'n v Am. Conf. of Governmental Indus. Hygienists, Inc.* (2004, MD Ga) 20 BNA OSHC 2070).

Although under § 6 of Federal Advisory Committee Act, there do not appear to be any statutory criteria for selection of State Coordinating Committees, it could not be argued reasonably that National Commission on Observance of International Woman's Year had not done responsible job of setting up Illinois State Coordinating Committee, even though it might be true that of 59 members, only one was in outspoken opposition to ratification of Equal Rights Amendment.

Commission had sought nominations from many diverse organizations and individuals, and asserted that in selection process there was also conscious attempt to designate people with range of views on some of more controversial issues. *Hall v Siegel (1977, SD Ill) 467 F Supp 750.*

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

**GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION**

5 USCS Appx § 7

§ 7. Responsibilities of the Administrator of General Services; Committee Management Secretariat, establishment; review; recommendations to President and Congress; agency cooperation; performance guidelines; uniform pay guidelines; travel expenses; expense recommendations

(a) The Director [Administrator] shall establish and maintain within the Office of Management and Budget [General Services Administration] a Committee Management Secretariat, which shall be responsible for all matters relating to advisory committees.

(b) The Director [Administrator] shall, immediately after the enactment of this Act [enacted Oct. 6, 1972], institute a comprehensive review of the activities and responsibilities of each advisory committee to determine—

- (1) whether such committee is carrying out its purpose;
- (2) whether, consistent with the provisions of applicable statutes, the responsibilities assigned to it should be revised;
- (3) whether it should be merged with other advisory committees; or
- (4) whether it should be abolished.

The Director [Administrator] may from time to time request such information as he deems necessary to carry out his functions under this subsection. Upon the completion of the Director's [Administrator's] review he shall make recommendations to the President and to either the agency head or the Congress with respect to action he believes should be taken. Thereafter, the Director [Administrator] shall carry out a similar review annually. Agency heads shall cooperate with the Director [Administrator] in making the reviews required by this subsection.

(c) The Director [Administrator] shall prescribe administrative guidelines and management controls applicable to advisory committees, and, to the maximum extent feasible, provide advice, assistance, and guidance to advisory committees to improve their performance. In carrying out his functions under this subsection, the Director [Administrator] shall consider the recommendations of each agency head with respect to means of improving the performance of advisory committees whose duties are related to such agency.

(d) (1) The Director [Administrator], after study and consultation with the Civil Service Commission [Director of the

027543

Office of Personnel Management], shall establish guidelines with respect to uniform fair rates of pay for comparable services of members, staffs, and consultants of advisory committees in a manner which gives appropriate recognition to the responsibilities and qualifications required and other relevant factors. Such regulations shall provide that—

(A) no member of any advisory committee or of the staff of any advisory committee shall receive compensation at a rate in excess of the rate specified for GS-18 of the General Schedule under *section 5332 of title 5, United States Code*;

(B) such members, while engaged in the performance of their duties away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence; as authorized by *section 5703 of title 5, United States Code*, for persons employed intermittently in the Government service; and

(C) such members—

(i) who are blind or deaf or who otherwise qualify as handicapped individuals (within the meaning of section 501 of the Rehabilitation Act of 1973 (29 U.S.C. 794)), and

(ii) who do not otherwise qualify for assistance under *section 3102 of title 5, United States Code*, by reason of being an employee of an agency (within the meaning of section 3102(a)(1) of such title 5,

may be provided services pursuant to section 3102 of such title 5 while in performance of their advisory committee duties.

(2) Nothing in this subsection shall prevent—

(A) an individual who (without regard to his service with an advisory committee) is a full-time employee of the United States, or

(B) an individual who immediately before his service with an advisory committee was such an employee, from receiving compensation at the rate at which he otherwise would be compensated (or was compensated) as a full-time employee of the United States.

(e) The Director [Administrator] shall include in budget recommendations a summary of the amounts he deems necessary for the expenses of advisory committees, including the expenses for publication of reports where appropriate.

#### **HISTORY:**

(Oct. 6, 1972, P.L. 92-463, § 7, 86 Stat. 772; Dec. 12, 1980, P.L. 96-523, § 2, 94 Stat. 3040.)

#### **HISTORY; ANCILLARY LAWS AND DIRECTIVES**

##### Explanatory notes:

The bracketed words "Administrator", "General Services Administration", and "Administrator's" are inserted in this section on the authority of Reorg. Plan No. 1 of 1977, § 5F, 42 *Fed. Reg. 56101*, 91 Stat. 1634, which appears as 5 *USCS* § 903 note, which transferred all functions of the Office of Management and Budget and the Director thereof relating to the Committee Management Secretariat to the Administrator of General Services, effective Nov. 20, 1977, as provided by section 1 of Ex. Or. No. 12024 of Dec. 1, 1977, 42 *Fed. Reg. 61445*, which appears as a note to § 2 of this act.

The bracketed words "Director of the Office of Personnel Management" are inserted in subsec. (d)(1) of this section, because, all functions vested by statute in the Civil Service Commission, except as otherwise specified, were transferred to the Director of the Office of Personnel Management by Reorg. Plan No. 2 of 1978, 43 *Fed. Reg. 36037*, 92 Stat. 3784, located at 5 *USCS* § 1101 note, effective Jan. 1, 1979, as provided by Ex. Or. No. 12107 of Dec. 28, 1978, § 1-102, 44 *Fed. Reg. 1055*, located at 5 *USCS* § 1101 note.

##### Amendments:

1980. Act Dec. 12, 1980 (effective 60 days after enactment on 12/12/80, as provided by § 3 of such Act, which appears as 5 *USCS* § 3102 note), in subsec. (d)(1), in subpara. (A), deleted "and" following the semicolon, in subpara. (B), substituted "; and" for the concluding period, and added subpara. (C).

##### Other provisions:

**GS 16-18 pay rates.** Act Nov. 5, 1990, P.L. 101-509, Title V, § 529 [Title I, § 101(c)-(e)], 104 Stat. 1442, which appears as 5 *USCS* § 5376 note, provides for the construction of references to rates of pay for GS 16-18 employees.

#### **NOTES:**

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES

TITLE 5—APPENDIX

FEDERAL ADVISORY COMMITTEE ACT

GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION

5 USCS Appx § 8

§ 8. Responsibilities of agency heads; Advisory Committee Management Officer, designation

(a) Each agency head shall establish uniform administrative guidelines and management controls for advisory committees established by that agency, which shall be consistent with directives of the Director [Administrator] under section 7 and section 10. Each agency shall maintain systematic information on the nature, functions, and operations of each advisory

027545

committee within its jurisdiction.

(b) The head of each agency which has an advisory committee shall designate an Advisory Committee Management Officer who shall—

(1) exercise control and supervision over the establishment, procedures, and accomplishments of advisory committees established by that agency;

(2) assemble and maintain the reports, records, and other papers of any such committee during its existence; and

(3) carry out, on behalf of that agency, the provisions of *section 552 of title 5, United States Code*, with respect to such reports, records, and other papers.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

**GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION**

*5 USCS Appx § 9*

§ 9. Establishment and purpose of advisory committees; publication in Federal Register; charter: filing, contents, copy

(a) No advisory committee shall be established unless such establishment is—

- (1) specifically authorized by statute or by the President; or
- (2) determined as a matter of formal record, by the head of the agency involved after consultation with the Director [Administrator], with timely notice published in the Federal Register, to be in the public interest in connection with the performance of duties imposed on that agency by law.

(b) Unless otherwise specifically provided by statute or Presidential directive, advisory committees shall be utilized solely for advisory functions. Determinations of action to be taken and policy to be expressed with respect to matters upon which an advisory committee reports or makes recommendations shall be made solely by the President or an officer of the Federal Government.

(c) No advisory committee shall meet or take any action until an advisory committee charter has been filed with (1) the Director [Administrator], in the case of Presidential advisory committees, or (2) with the head of the agency to whom any advisory committee reports and with the standing committees of the Senate and of the House of Representatives having legislative jurisdiction of such agency. Such charter shall contain the following information:

- (A) the committee's official designation;
- (B) the committee's objectives and the scope of its activity;
- (C) the period of time necessary for the committee to carry out its purposes;
- (D) the agency or official to whom the committee reports;
- (E) the agency responsible for providing the necessary support for the committee;
- (F) a description of the duties for which the committee is responsible, and, if such duties are not solely advisory, a specification of the authority for such functions;
- (G) the estimated annual operating costs in dollars and man-years for such committee;
- (H) the estimated number and frequency of committee meetings;
- (I) the committee's termination date, if less than two years from the date of the committee's establishment; and
- (J) the date the charter is filed.

A copy of any such charter shall also be furnished to the Library of Congress.

**HISTORY:**

(Oct. 6, 1972, P.L. 92-463, § 9, 86 Stat. 773.)

**HISTORY; ANCILLARY LAWS AND DIRECTIVES**

Explanatory notes:

The bracketed word "Administrator" referring to the Administrator of General Services, is inserted in subsecs. (a)(2) and (c) of this section on the authority of Reorg. Plan No. 1 of 1977, § 5F, 42 *Fed. Reg.* 56101, 91 Stat. 1634, which appears as 5 *USCS* § 903 note, which transferred all functions of the Office of Management and Budget and the Director thereof relating to the Committee Management Secretariat to the Administrator of General Services, effective Nov. 20, 1977, as provided by section 1 of Ex. Or. No. 12024 of Dec. 1, 1977, 42 *Fed. Reg.* 61445, which appears as a note to § 2 of this act.

**NOTES:**

Research Guide:

Annotations:

Construction and application of Federal Advisory Committee Act (5 *U.S.C.A. App.* 2 §§ 1-15 [5 *USCS Appx* §§ 1-15]. 160 *ALR Fed* 483.

Law Review Articles:

Tuerkheimer. Veto by Neglect: The Federal Advisory Committee Act, 25 *Am U L Rev* 53, 1975.

Kello. Drawing the curtain on open government? In defense of the Federal Advisory Committee Act. 69 *Brook L Rev* 345.

Perritt; Wilkinson. Open Advisory Committees and the Political Process: The Federal Advisory Committee Act After Two Years. 63 *Geo L J* 725, 1975.

The Federal Advisory Committee Act. 10 *Harv J Legis* 217, 1973.

Interpretive Notes and Decisions:

1. Generally 2. Function of committee 3. Effect of failure to comply with formation requirements 4. Judicial review

**1. Generally**

Before advisory committee can begin to function, it must be formally chartered in accordance with § 9(c) of Federal Advisory Committee Act and charter must contain, inter alia, information concerning committee's objectives and scope of its operations and duties; committees are chartered to one federal agency although such committee can serve as advisory committee to other federal agencies. *Metcalf v National Petroleum Council* (1977, App DC) 180 *US App DC* 31, 553 *F2d* 176, 7 *ELR* 20218.

**2. Function of committee**

Presence of retired Supreme Court Justice and active circuit judge on advisory committee charged with investigating and submitting report on organized crime to President, did not prevent committee from performing its functions since inter alia, (1) judges' presence did not prevent committee from conducting hearings, preparing reports or making recommendations for legislation, (2) committee does not prosecute, indict, or legislate, and (3) while committee was empowered to issue subpoenas, enforcement of subpoenas was reserved to courts; that committee member is a judge does not inhibit use of powers imposed on members, or excuse duty to submit advisory report, ability to make findings and recommendations would be the same in absence of any judge's participation. *In re President's Comm'n on Organized Crime etc.* (1986, CA3 NJ) 783 *F2d* 370.

Advisory committee exists to advise and not to decide: *Metcalf v National Petroleum Council* (1977, App DC) 180 *US App DC* 31, 553 *F2d* 176, 7 *ELR* 20218.

Under 5 *USCS* Appendix I § 9(b) advisory committee may be utilized solely for advisory functions but under 15 *USCS* § 776(a) Department of Energy may be able to use advisory committee to perform some operational tasks such as drafting of National Energy Policy Plan pursuant to 42 *USCS* § 7321. (1981) 60 *Comp Gen* 386.

**3. Effect of failure to comply with formation requirements**

When federal agency utilizes advisory committee for purpose of obtaining advice, agency must charter and establish committee in compliance with provisions of § 9 of Federal Advisory Committee Act; however, failure to comply with such requirements cannot be employed as subterfuge for avoiding public access requirements. *Food Chemical News, Inc. v Davis* (1974, DC Dist Col) 378 *F Supp* 1048.

**4. Judicial review**

Decision of whether advisory committee, terminated by § 14 of Federal Advisory Committee Act should be re-established is discretionary with particular administrative agency and cannot be reviewed by district court. *Hiatt Grain & Feed, Inc. v Bergland* (1978, DC Kan) 446 F Supp 457, 11 Env't Rep Cas 1961, aff'd (1979, CA10 Kan) 602 F2d 929, cert den (1980) 444 US 1073, 62 L Ed 2d 755, 100 S Ct 1019.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

**GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION**

5 USCS Appx § 10

§ 10. Advisory committee procedures; meetings; notice, publication in Federal Register; regulations; minutes; certification; annual report; Federal officer or employee, attendance

(a) (1) Each advisory committee meeting shall be open to the public.

(2) Except when the President determines otherwise for reasons of national security, timely notice of each such meeting shall be published in the Federal Register, and the Director [Administrator] shall prescribe regulations to provide for other types of public notice to insure that all interested persons are notified of such meeting prior thereto.

(3) Interested persons shall be permitted to attend, appear before, or file statements with any advisory committee, subject to such reasonable rules or regulations as the Director [Administrator] may prescribe.

(b) Subject to *section 552 of title 5, United States Code*, the records, reports, transcripts, minutes, appendixes, working papers, drafts, studies, agenda, or other documents which were made available to or prepared for or by each advisory committee shall be available for public inspection and copying at a single location in the offices of the advisory committee or the agency to which the advisory committee reports until the advisory committee ceases to exist.

(c) Detailed minutes of each meeting of each advisory committee shall be kept and shall contain a record of the persons present, a complete and accurate description of matters discussed and conclusions reached, and copies of all reports received, issued, or approved by the advisory committee. The accuracy of all minutes shall be certified to by the chairman of the advisory committee.

(d) Subsections (a)(1) and (a)(3) of this section shall not apply to any portion of an advisory committee meeting where the President, or the head of the agency to which the advisory committee reports, determines that such portion of such meeting may be closed to the public in accordance with subsection (c) of *section 552b of title 5, United States Code*. Any such determination shall be in writing and shall contain the reasons for such determination. If such a determination is made, the advisory committee shall issue a report at least annually setting forth a summary of its activities and such related

matters as would be informative to the public consistent with the policy of *section 552(b) of title 5, United States Code*.

(e) There shall be designated an officer or employee of the Federal Government to chair or attend each meeting of each advisory committee. The officer or employee so designated is authorized, whenever he determines it to be in the public interest, to adjourn any such meeting. No advisory committee shall conduct any meeting in the absence of that officer or employee.

(f) Advisory committees shall not hold any meetings except at the call of, or with the advance approval of, a designated officer or employee of the Federal Government, and in the case of advisory committees (other than Presidential advisory committee), with an agenda approved by such officer or employee.

#### **HISTORY:**

(Oct. 6, 1972, P.L. 92-463, § 10, 86 Stat. 774; Sept. 13, 1976, P.L. 94-409, § 5(c), 90 Stat. 1247.)

#### **HISTORY; ANCILLARY LAWS AND DIRECTIVES**

##### **Explanatory notes:**

The bracketed word "Administrator" referring to the Administrator of General Services, is inserted in subsec. (a)(2) and (3) of this section on the authority of Reorg. Plan No. 1 of 1977, § 5F, *42 Fed. Reg. 56101*, 91 Stat. 1634, which appears as *5 USCS § 903* note, which transferred all functions of the Office of Management and Budget and the Director thereof relating to the Committee Management Secretariat to the Administrator of General Services, effective Nov. 20, 1977, as provided by section 1 of Ex. Or. No. 12024 of Dec. 1, 1977, *42 Fed. Reg. 61445*, which appears as a note to § 2 of this act.

##### **Amendments:**

1976. Act Sept. 13 (effective 180 days after enactment on 9/13/76, as provided by § 6 of such Act, which appears as *5 USCS § 552b* note), 1976, in subsec. (d), substituted the first sentence for the one which read: "Subsections (a)(1) and (a)(3) of this section shall not apply to any advisory committee meeting which the President, or the head of the agency to which the advisory committee reports, determines is concerned with matters listed in *section 552(b) of title 5, United States Code*."

The Federal Advisory Committee Act. *10 Harv J Legis 217, 1973*.

##### **Interpretive Notes and Decisions:**

## 1. Generally 2. Closed meetings 3. Relationship with Freedom of Information Act

**1. Generally**

Under Federal Advisory Committee Act Congress has determined simply that when federal executive official utilizes advisory committee to assist him in discharging his responsibilities, in most instances he must do so openly and publicly; advisory committee has no First Amendment right to have administrator keep its communications secret. *Center for Auto Safety v Cox* (1978, App DC) 188 US App DC 426, 580 F2d 689.

Even if Federal Advisory Committee Act's requirements that agency representative approve agenda of advisory committee meeting as well as § 2's hortatory language that all matters under advisory committee's consideration should be determined by official, agency, or officer forbid advisory committee from taking any action not approved by agency representative and not included in committee's agenda, it does not mean that agency administrator or representative had duty to intervene to prevent committee from voting on resolution not on agenda. *Claybrook v Slater* (1997, App DC) 324 US App DC 145, 111 F3d 904 (criticized in *Taylor v FDIC* (1997, App DC) 328 US App DC 52, 132 F3d 753).

Two separate "informal" meetings with consumer and distilled spirits industry representatives relative to drafting proposed regulations of Bureau of Alcohol, Tobacco and Firearms of Treasury Department on ingredient labeling of distilled spirits were meetings of "advisory committees" used by director of bureau to obtain advice within the meaning of Federal Advisory Committee Act and therefore "open to the public". *Food Chemical News, Inc. v Davis* (1974, DC Dist Col) 378 F Supp 1048.

Court has no authority to order federal officials to convene Energy Conservation Advisory Committee and Solar Energy Advisory Committee specific number of times, or to direct committees themselves to issue reports to federal officials, addressing their recommendations to Solar Energy and Energy Conservation Bank, since Federal Advisory Committees, pursuant to § 10(f) may meet only at call of designated officer or employee of Federal Government, who is not required to call meetings if he does not wish to, and since there is no basis for court to direct meetings, there is also no basis to direct committees to report on their activities, since activities and reports thereon are for agency to request or not, as case may be. *Dabney v Reagan* (1982, SD NY) 559 F Supp 861.

Preliminary injunction is granted to prevent President's Task Force on National Health Care Reform from conducting meetings in violation of Federal Advisory Committee Act (FACA) (5 USCS Appx §§ 1 et seq.), but §§ 10(a)(1), 10(a)(3), and 10(c) are not applicable to meetings held for purpose of formulating advice and recommendations for President, because First Lady (chairperson of task force) is not federal officer or employee, making task force subject to FACA under § 3(2), but forced exposure of "recommendation" meetings under FACA provisions is unconstitutional as violation of separation of powers principles. *Association of Am. Physicians & Surgeons v Clinton* (1993, DC Dist Col) 813 F Supp 82, 21 Media L R 1225, revd, remanded (1993, App DC) 302 US App DC 208, 997 F2d 898, 21 Media L R 1705.

Nonprofit corporation is not entitled to records pertaining to costs of interdepartmental working group of health-care reform task force, where records were intended to help Congress in its oversight function, because such records are not within scope of § 10(b) of the Federal Advisory Committee Act and because nothing in statute or regulations creates right of public access to such records. *Association of Am. Physicians & Surgeons v Clinton* (1994, DC Dist Col) 879 F Supp 103, dismd (1994, DC Dist Col) 879 F Supp 106.

**2. Closed meetings**

Examination of legislative history of Federal Advisory Committee Act clearly indicates that although standard of openness and public inspection was to be applied liberally, it was intention of Congress to provide for closed deliberations under certain conditions, one of which is stated FACA § 10(d). *Aviation Consumer Action Project v Washburn* (1976, App DC) 175 US App DC 273, 535 F2d 101.

Broad application of FACA § 10(d) exemption to include all deliberative conversations to committee meetings is clearly contrary to Congressional intent and policy of Federal Advisory Committee Act. *Nader v Dunlop* (1973, DC Dist Col) 370 F Supp 177.

Agency's failure to charter and establish advisory committee in compliance with all terms of Federal Advisory Committee Act cannot be employed as subterfuge for avoiding public access requirements of FACA § 10. *Food Chemical News, Inc. v Davis* (1974, DC Dist Col) 378 F Supp 1048.

Plaintiff whose request for transcript of advisory committee meetings, which were not open to public as required by FACA § 10, was denied, has standing to sue for their production. *Center for Auto Safety v Tiemann* (1976, DC Dist Col) 414 F Supp 215, remanded (1978, App DC) 188 US App DC 426, 580 F2d 689.

Environmental group's challenge to EPA's refusal to open to public meetings of Governors' Forum on Environmental Management is denied, where forum made up of 9 state governors meets to help coordinate state and federal efforts to maintain clean and safe drinking water, because, even though forum was established to advise or assist EPA, it is not "advisory committee" subject to public meeting requirements of 5 USCS Appx §§ 9 and 10 since governors also act operationally as independent chief executives in partnership with federal agency. *Natural Resources Defense Council v EPA* (1992, DC Dist Col) 806 F Supp 275.

### 3. Relationship with Freedom of Information Act

While extent to which exemption 5 of FOIA (5 USCS § 552(b)(5)) must be given effect in context of Federal Advisory Committee meetings is undecided, mere disclosure of intra-agency memorandum to advisory committee did not have effect of making such memorandum public information to which exemption 5 was inapplicable. *Aviation Consumer Action Project v Washburn* (1976, App DC) 175 US App DC 273, 535 F2d 101.

Section renders disclosure provisions of FOIA applicable to advisory committees and designates each committee as appropriate repository for its own record; it does not impose upon President or office of administration special responsibility to guide document requests. *National Sec. Archive v Archivist of United States* (1990, App DC) 285 US App DC 302, 909 F2d 541; 17 Media L R 2265.

Agency is generally obligated under § 10(b) of Federal Advisory Committee Act (FACA) to make available for public inspection and copying all materials that were made available to or prepared for or by an advisory committee, and, except for materials agency reasonably believes to be exempt from disclosure pursuant to FOIA, member of public need not request disclosure in order for FACA materials to be made available. *Food Chem. News v Department of Health & Human Servs.* (1992, App DC) 299 US App DC 25, 980 F2d 1468, 21 Media L R 1057.

Member of advisory committee who had all necessary security clearances was entitled to information under FACA that was reviewed and relied upon by committee during its deliberations, even if that information might have been withheld from public pursuant to FOIA exemption. *Cummock v Gore* (1999, App DC) 336 US App DC 347, 180 F3d 282.

While Federal Advisory Committee Act does not contain same express provision of Freedom of Information Act placing burden of proof on agency to sustain action under 5 USCS § 552(b), underlying policy considerations are identical and burden of proof is on advisory committee to support claimed exemption by substantial justification and explanation of basis of claim, not merely by conclusory assertions; Defense Advisory Committee on Women in the Services is not "agency" and matters before it are, therefore, not "inter-agency" within meaning of 5 USCS § 552(b) exception to openness of advisory committee meetings under FACA § 10(d). *Gates v Schlesinger* (1973, DC Dist Col) 366 F Supp 797.

Newsletter reporter is not entitled to preliminary injunction preventing meetings of Advisory Committee on Food and Drug Administration until drafts, working papers, and other documents are publicly released under Federal Advisory Committee Act (5 USCS Appx §§ 1 et seq.), where Committee notified reporter to refer all document requests to HHS's Freedom of Information Office, because Committee properly interprets 5 USCS Appx § 10(b), which makes advisory committee documents "subject to" 5 USCS § 552 (FOIA), as incorporating FOIA procedures as well as FOIA exemptions. *Food Chemical News v Advisory Committee on Food & Drug Admin.* (1991, DC Dist Col) 760 F Supp 220, affd, clarified (1992, App DC) 299 US App DC 25, 980 F2d 1468, 21 Media L R 1057.

*5 USCS Appx § 12*

§ 12. Fiscal and administrative provisions; recordkeeping; audit; agency support services

(a) Each agency shall keep records as will fully disclose the disposition of any funds which may be at the disposal of its advisory committees and the nature and extent of their activities. The General Services Administration, or such other agency as the President may designate, shall maintain financial records with respect to Presidential advisory committees. The Comptroller General of the United States, or any of his authorized representatives, shall have access, for the purpose of audit and examination, to any such records.

(b) Each agency shall be responsible for providing support services for each advisory committee established by or reporting to it unless the establishing authority provides otherwise. Where any such advisory committee reports to more than one agency, only one agency shall be responsible for support services at any one time. In the case of Presidential advisory committees, such services may be provided by the General Services Administration.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

**GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION**

*5 USCS Appx § 14*

§ 14. Termination of advisory committees; renewal; continuation

(a) (1) Each advisory committee which is in existence on the effective date of this Act shall terminate not later than the expiration of the two-year period following such effective date unless—

(A) in the case of an advisory committee established by the President or an officer of the Federal Government, such advisory committee is renewed by the President or that officer by appropriate action prior to the expiration of such two-year period; or

(B) in the case of an advisory committee established by an Act of Congress, its duration is otherwise provided for by law.

(2) Each advisory committee established after such effective date shall terminate not later than the expiration of the two-year period beginning on the date of its establishment unless—

(A) in the case of an advisory committee established by the President or an officer of the Federal Government such advisory committee is renewed by the President or such officer by appropriate action prior to the end of such period; or

(B) in the case of an advisory committee established by an Act of Congress, its duration is otherwise provided for by law.

(b) (1) Upon the renewal of any advisory committee, such advisory committee shall file a charter in accordance with section 9(c).

(2) Any advisory committee established by an Act of Congress shall file a charter in accordance with such section upon the expiration of each successive two-year period following the date of enactment of the Act establishing such advisory committee.

(3) No advisory committee required under this subsection to file a charter shall take any action (other than preparation and filing of such charter) prior to the date on which such charter is filed.

(c) Any advisory committee which is renewed by the President or any officer of the Federal Government may be continued only for successive two-year periods by appropriate action taken by the President or such officer prior to the date on which such advisory committee would otherwise terminate.

References in text:

"The effective date of this Act", referred to in this section, is 90 days following the enactment of Act Oct. 6, 1972, P.L. 92-463, as provided by § 15 of such Act.

## Other provisions:

**Ex. Or. No. 11827 (superseded).** Ex. Or. No. 11827 of Jan. 4, 1975, *40 Fed. Reg. 1217*, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 11948 of Dec. 20, 1976, *41 Fed. Reg. 55705*. The superseded note provided for the continuance of certain Federal advisory committees.

**Ex. Or. No. 11948 (superseded).** Ex. Or. No. 11948 of Dec. 20, 1976, *41 Fed. Reg. 55705*, as amended by Ex. Or. No. 12007 of Aug. 22, 1977, *42 Fed. Reg. 42839*; Ex. Or. No. 12029 of Dec. 14, 1977, *42 Fed. Reg. 63631*, formerly set out as a note under this section, was superseded by Ex. Or. No. 12110 of Dec. 28, 1978, *44 Fed. Reg. 1069*. The superseded note provided for the continuance of certain Federal advisory committees.

**Termination of certain Presidential advisory committees.** Ex. Or. No. 12007 of Aug. 22, 1977, *42 Fed. Reg. 42839* provided:

"By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in order to terminate certain advisory committees in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. (a) The Citizens' Advisory Council on the Status of Women is terminated.

"(b) Executive Order No. 11126 of November 1, 1963, as amended by Executive Order No. 11221 of May 6, 1965 [*42 USCS § 2000e* note], is further amended as follows:

"(1) Subsection (5) of Section 102 is revoked.

"(2) Section 103, in order to delete a reference to the Council, is amended to read as follows:

'Annually the Committee shall transmit a report to the President concerning the status of women.'

"(3) Part II is revoked.

"(4) The second sentence of Section 301, in order to delete references to the Council, is amended to read as follows:

'To the extent practical and to the extent permitted by law (1) all Executive agencies shall cooperate with the Committee and furnish it such information and assistance as may be necessary for the performance of its functions, and (2) the Secretary of Labor shall furnish staff, office space, office facilities and supplies, and other necessary assistance, facilities, and services for the Committee.'

"Sec. 2. (a) The Citizens' Advisory Committee on Environmental Quality is terminated.

"(b) Part II of Executive Order No. 11472 of May 29, 1969, as amended by paragraphs (7) and (8) of Section 4 of Executive Order No. 11514 of March 5, 1970 [*42 USCS § 4321* note], is revoked.

"Sec. 3. (a) The Advisory Council for Minority Enterprise is terminated.

"(b) Section 2 of Executive Order No. 11625 of October 13, 1971 [*15 USCS § 631* note], is revoked.

"Sec. 4. (a) The Consumer Advisory Council is terminated.

"(b) Executive Order No. 11583 of February 24, 1971 [*20 USCS § 887d* note] is amended as follows:

"(1) The second sentence of subsection (b)(1) of Section 2 is amended by deleting '(including the Consumer Advisory Council established in section 5 of this order)'

"(2) Section 5 is revoked.

"Sec. 5. (a) The President's Advisory Board on International Investment is terminated.

"(b) Executive Order No. 11962 of January 19, 1977 [*22 USCS § 3107* note] is revoked.

"Sec. 6. Subsections (a), (g), (i), and (j) of Section 1 of Executive Order No. 11948 of December 20, 1976 [formerly set out as a note to this section], which extended the above advisory committees until December 31, 1978, is superseded."

**Quetico-Superior Committee terminated.** Ex. Or. No. 12029 of Dec. 14, 1977, *42 Fed. Reg. 63631* provided:

"By virtue of the authority vested in me by the Constitution and statutes of the United States of America, and as President of the United States of America, in order to terminate an advisory committee in accordance with the provisions of the Federal Advisory Committee Act (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. (a) The Quetico-Superior Committee is terminated.

"(b) Executive Order No. 11342, as amended, is revoked.

"Sec. 2. Subsection (e) of Section 1 of Executive Order No. 11948 of December 20, 1976 [formerly set out as a note under this section], which extended the above advisory committee until December 31, 1978, is superseded."

**Ex. Or. No. 12110 (superseded).** Ex. Or. No. 12110 of Dec. 28, 1978, § 1-104, *44 Fed. Reg. 1069*, formerly set out as a note to this section, was superseded by Ex. Or. No. 12258 of Dec. 31, 1980, *45 Fed. Reg. 1251*. It provided for continuance of certain Federal advisory committees.

**Advisory Committee on Small and Minority Business Ownership.** Ex. Or. No. 12190 of Feb. 1, 1980, *45 Fed. Reg. 7773* (*15 USCS § 636* note), provided that the Advisory Committee on Small and Minority Business Ownership shall terminate on December 31, 1980.

**State Planning Council on Radioactive Waste Management.** Ex. Or. No. 12192 of Feb. 12, 1980, *45 Fed. Reg. 9729*,

set out as an Other provisions note to 42 USCS § 2021, provided that the State Planning Council on Radioactive Waste Management "shall terminate thirty days after it transmits its final report to the President, but in no event shall it terminate later than eighteen months after the effective date of this Order."

**Section 1-101(h) of Ex. Or. No. 12258 (revoked).** Ex. Or. No. 12258 of Dec. 31, 1980, § 1-101(h), 46 Fed. Reg. 1251; as amended by Ex. Or. No. 12271 of Jan. 15, 1981, 46 Fed. Reg. 4677; Ex. Or. No. 12299 of March 17, 1981, 46 Fed. Reg. 17751, formerly classified as a note to this section, was revoked by Ex. Or. No. 12336 of Dec. 21, 1981, § 4(a), 46 Fed. Reg. 62239, which appears as 42-USCS-§ 2000e note. It provided for further continuance of President's Advisory Committee for Women.

**Termination of certain Federal advisory committees.** Ex. Or. No. 12305 of May 5, 1981, 46 Fed. Reg. 25421, provided:

"By the authority vested in me as President by the Constitution of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended [5 U.S.C. App.], the following Executive Orders, establishing advisory committees, are hereby revoked and the committees terminated:

"(a) Executive Order No. 12059 of May 11, 1978, as amended, establishing the United States Circuit Judge Nominating Commission [former 28 USCS § 44 note];

"(b) Executive Order No. 11992 of May 24, 1977, establishing the Committee on Selection of Federal Judicial Officers [former 28 USCS prec. § 1 note];

"(c) Executive Order No. 12084 of September 27, 1978, as amended by Executive Order 12097 of November 8, 1978, establishing the Judicial Nominating Commission for the District of Puerto Rico [former 28 USCS § 133 note]; and

"(d) Executive Order No. 12064 of June 5, 1978, establishing the United States Tax Court Nominating Commission [former 26 USCS § 7443 note].

"Subsections (g), (i), (j) and (k) of Section 1-101 of Executive Order No. 12258 [former note to this section], extending these committees, are also revoked."

**Termination of boards, committees, and commissions.** Ex. Or. No. 12379 of Aug. 17, 1982, 47 Fed. Reg. 36099, provides:

"By the authority vested in me as President by the Constitution and statutes of the United States of America, and to terminate the establishing authorities for committees that are inactive or no longer necessary, it is hereby ordered as follows:

"Section 1. Executive Order No. 12071, as amended [29 USCS § 1001 note], establishing the President's Commission on Pension Policy, is revoked.

"Sec. 2. Executive Order No. 12042 [unclassified], creating a Board of Inquiry to Report on Labor Disputes Affecting the Bituminous Coal Industry in the United States, is revoked.

"Sec. 3. Executive Order No. 12085 [unclassified], creating an Emergency Board to Investigate a Dispute Between the Norfolk and Western Railway Company and Certain of Its Employees, is revoked.

"Sec. 4. Executive Order No. 12132 [unclassified], creating an Emergency Board to Investigate a Dispute Between the National Railway Labor Conference and Certain of Its Employees, is revoked.

"Sec. 5. Executive Order No. 12095 [unclassified], creating an Emergency Board to Investigate a Dispute Between Wien Air Alaska, Inc., and Certain Individuals, is revoked.

"Sec. 6. Executive Order No. 12159 [unclassified], creating an Emergency Board to Investigate Disputes Between the Chicago, Rock Island, Pacific Railroad and Peoria Terminal Company and Brotherhood of Railway, Airline and Steamship Clerks, Freight Handlers, Express and Station Employees; and the United Transportation Union, is revoked.

"Sec. 7. Executive Order No. 12182 [unclassified], creating an Emergency Board to Investigate a Dispute Between the Long Island Rail Road and Certain of Its Employees, is revoked.

"Sec. 8. Executive Order No. 12207 [unclassified], creating an Emergency Board to Investigate a Dispute Between the Port Authority Trans-Hudson Corporation and Certain of Its Employees, is revoked.

"Sec. 9. Executive Order No. 12262 [29 USCS § 1001 note], establishing an Interagency Employee Benefit Council, is revoked.

"Sec. 10. Executive Order No. 12275 [20 USCS § 951 note], establishing the Design Liaison Council, is revoked.

"Sec. 11. Executive Order No. 11829, as amended [25 USCS § 640d note], establishing the Hopi-Navajo Land Settlement Interagency Committee, is revoked.

"Sec. 12. Executive Order No. 11022, as amended [42 USCS § 3001 note], establishing the President's Council on Aging, is revoked.

"Sec. 13. Executive Order No. 12192 [42 USCS § 2021 note], establishing the State Planning Council on Radioactive Waste Management, is revoked.

"Sec. 14. Executive Order No. 12075 [42 USCS § 1450 note], as amended, establishing the Interagency Coordinating Council, is revoked.

"Sec. 15. Executive Order No. 11782 [12 USCS § 2281 note], establishing the Federal Financing Bank Advisory Council, is revoked.

"Sec. 16. Executive Order No. 12089, as amended [15 USCS § 2401 note], establishing the National Productivity Council, is revoked.

"Sec. 17. Executive Order No. 11330, as amended [42 USCS prec § 2711 note], establishing the President's Council on Youth Opportunity, is revoked.

"Sec. 18. Executive Order No. 11256 [unclassified], establishing the President's Committee on Food and Fiber and establishing the National Advisory Commission on Food and Fiber, is revoked.

"Sec. 19. Executive Order No. 11654 [15 USCS § 278f note], continuing the Federal Fire Council, is revoked.

"Sec. 20. Executive Order No. 12083, as amended [42 USCS § 7101 note], establishing the Energy Coordinating Committee, is revoked.

"Sec. 21. Executive Order No. 12285, as amended and ratified [50 USCS § 1701 note], establishing the President's Commission on Hostage Compensation, is revoked.

"Sec. 22. Executive Order No. 12202, as amended [42 USCS § 5848 note], establishing the Nuclear Safety Oversight Committee, is revoked.

"Sec. 23. Executive Order No. 12194 [42 USCS § 4321 note], establishing the Radiation Policy Council, is revoked.

"Sec. 24. The Veterans' Federal Coordinating Committee (Weekly Compilation of Presidential Documents, volume 14, number 41, page 1743) [unclassified] is terminated.

"Sec. 25. The President's Council on Energy Efficiency (Weekly Compilation of Presidential Documents, volume 16, numbers 18 and 30, pages 790 and 1404) [unclassified] is terminated."

**Ex. Or. No. 12399 (superseded).** Ex. Or. No. 12399 of Dec. 31, 1982, 48 *Fed. Reg.* 379, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 12435 of Sept. 30, 1985, 50 *Fed. Reg.* 40319. Such note provided for the continuance of certain federal advisory committees.

**Ex. Or. No. 12489 (superseded).** Ex. Or. No. 12489 of Sept. 28, 1984, 49 *Fed. Reg.* 38927, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 12534 of Sept. 30, 1985, 50 *Fed. Reg.* 40319. Such note provided for continuance of certain federal advisory committees.

**Ex. Or. No. 12534 (superseded).** Ex. Or. No. 12534 of Sept. 30, 1985, 50 *Fed. Reg.* 40319, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 12610 of Sept. 30, 1987, 52 *Fed. Reg.* 36901. Such note provided for continuance of certain federal advisory committees.

**Ex. Or. No. 12610 (superseded).** Ex. Or. No. 12610 of Sept. 30, 1987, 52 *Fed. Reg.* 36901, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 12692 of Sept. 29, 1989, 54 *Fed. Reg.* 40627. Such note provided for continuation of certain Federal advisory committees.

**Ex. Or. No. 12692 (superseded).** Ex. Or. No. 12692 of Sept. 29, 1989, 54 *Fed. Reg.* 40627, which formerly appeared as a note to this section, was superseded by § 4 of Ex. Or. No. 12774 of Sept. 27, 1991, 56 *Fed. Reg.* 49836. Such note provided for continuation of certain Federal advisory committees.

**Ex. Or. No. 12774 (superseded).** Ex. Or. No. 12774 of Sept. 27, 1991, 56 *Fed. Reg.* 49835, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 12869 of Sept. 30, 1993, 58 *Fed. Reg.* 51751, effective Sept. 30, 1993. It provided for continuance of certain Federal advisory committees.

**Termination and limitation of Federal advisory committees.** Ex. Or. No. 12838 of Feb. 10, 1993, 58 *Fed. Reg.* 8207, provides:

"By the authority vested in me as President by the Constitution and the laws of the United States of America, including the Federal Advisory Committee Act ('FACA'), as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. Each executive department and agency shall terminate not less than one-third of the advisory committees subject to FACA (and not required by statute) that are sponsored by the department or agency by no later than the end of fiscal year 1993.

"Sec. 2. Within 90 days, the head of each executive department and agency shall submit to the Director of the Office of Management and Budget, for each advisory committee subject to FACA sponsored by that department or agency: (a) a detailed justification for the continued existence, or a brief description in support of the termination, of any advisory committee not required by statute; and (b) a detailed recommendation for submission to the Congress to continue or to terminate any advisory committee required by statute. The Administrator of General Services shall prepare such justifications and recommendations for each advisory committee subject to FACA and not sponsored by a department or agency.

"Sec. 3. Effective immediately, executive departments and agencies shall not create or sponsor a new advisory committee subject to FACA unless the committee is required by statute or the agency head (a) finds that compelling considerations necessitate creation of such a committee, and (b) receives the approval of the Director of the Office of Management and Budget. Such approval shall be granted only sparingly and only if compelled by considerations of national security, health or safety, or similar national interests. These requirements shall apply in addition to the notice and other approval requirements of FACA.

~~"Sec. 4. The Director of the Office of Management and Budget shall issue detailed instructions regarding the implementation of this order, including exemptions necessary for the delivery of essential services and compliance with applicable law.~~

"Sec. 5. All independent regulatory commissions and agencies are requested to comply with the provisions of this order."

**Ex. Or. No. 12869 (superseded).** Ex. Or. No. 12869 of Sept. 30, 1993, *58 Fed. Reg. 51751*; Ex. Or. No. 12882, Nov. 23, 1993, *58 Fed. Reg. 62493*; formerly classified as a note to this section, was superseded by Ex. Or. No. 12974 of Sept. 29, 1995, *60 Fed. Reg. 51875*, effective Sept. 30, 1995. It provided for continuance of certain Federal advisory committees.

**Ex. Or. No. 12974 (revoked).** Ex. Or. No. 12974, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 13062 of Sept. 29, 1997, *62 Fed. Reg. 51755*. It provided for continuance of certain Federal advisory committees.

**Continuance of certain Federal advisory committees and amendments to Executive Orders 13038 and 13054.** Ex. Or. No. 13062 of Sept. 29, 1997, *62 Fed. Reg. 51755*; Ex. Or. No. 13138 of Sept. 30, 1999, *64 Fed. Reg. 53879*, provides:

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Sections 1-4. [Superseded—These sections provided for continuance of certain advisory committees; performance of functions of the President; revocation of certain Executive Orders which established committees that have terminated and whose work is completed; and supersession of Ex. Or. No. 12974.]

"Sec. 5. In Executive Order 13038 [47 USCS § 336 note], the second sentence of section 1 is amended by deleting '15' and inserting '22' in lieu thereof.

"Sec. 6. Executive Order 13054 [22 USCS § 3310 note] is amended by revising section 1 to read as follows: 'A United States citizen who is a family member of a Federal civilian employee who has separated from Federal service to accept employment with the American Institute in Taiwan pursuant to section 11 of Public Law 96-8 (22 U.S.C. 3310(a)) may be appointed noncompetitively in a manner similar to noncompetitive appointments under Executive Order 12721 [5 USCS § 3301 note] and implementing regulations of the Office of Personnel Management to a competitive service position in the executive branch, provided such family member meets the qualifications and other requirements established by the Director of the Office of Personnel Management, including an appropriate period of satisfactory overseas employment with the American Institute in Taiwan.'

"Sec. 7. This order shall be effective September 30, 1997."

**Continuance of certain Federal advisory committees.** Ex. Or. No. 13138 of Sept. 30, 1999, *64 Fed. Reg. 53879*; Ex. Or. No. 13225 of Sept. 28, 2001, *66 Fed. Reg. 50291*; Ex. Or. No. 13226 of Sept. 30, 2001, *66 Fed. Reg. 50524*, provides:

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Sections 1-4. [Superseded—These sections provided for continuance of certain advisory committees; performance of functions of the President; revocation of certain Executive Orders which established committees that have terminated and whose work is completed; and supersession of Ex. Or. No. 13062.]

"Sec. 5. Executive Order 12131 [50 USCS Appx § 2401 note], as amended, is further amended by adding in section 1-102(a) a new paragraph as follows: '(9) Department of Energy.'

"Sec. 6. Executive Order 13115 [unclassified] is amended by adding the Department of the Treasury and the Office of National Drug Control Policy to the Interagency Task Force on the Roles and Mission of the United States Coast Guard, so that the list in section 1(b) of that order shall read as follows:

- (1) Department of State;
- (2) Department of the Treasury;
- (3) Department of Defense;
- (4) Department of Justice;
- (5) Department of Commerce;

- (6) Department of Labor;

"Sec. 7. Executive Order 12367 [unclassified], as amended, is further amended as follows:

"(a) in section 1, the text 'the director of the International Communication Agency,' is deleted;

"(b) in section 2, delete the first sentence and insert in lieu thereof 'The Committee shall advise, provide recommendations to, and assist the President, the National Endowment of the Arts, the National Endowment for the Humanities, and the Institute of Museum and Library Services on matters relating to the arts and the humanities. The Committee shall initiate and assist in the development of (i) ways to promote public understanding and appreciation of the arts and the humanities; (ii) ways to promote private sector support for the arts and humanities; (iii) ways to evaluate the effectiveness of Federal support for the arts and humanities and their relationship with the private sector; (iv) the planning and coordination of appropriate participation (including productions and projects) in major national cultural events, including the Millennium; (v) activities that incorporate the arts and the humanities in government objectives; and (vi) ways to promote the recognition of excellence in the fields of the arts and the humanities.'; and

"(c) in section 3(b), add the following sentence after the first sentence: 'Private funds accepted under the National Endowment for the Arts' or the National Endowment for the Humanities' gift authority may also be used to pay expenses of the Committee.'

"Sec. 8. Executive Order 12345 [42 USCS § 300u-5 note], as amended, is further amended by deleting the first sentence of section 2(b) and inserting in lieu thereof the following three sentences. 'The council shall be composed of twenty members appointed by the President. Each member shall serve a term of 2 years and may continue to serve after the expiration of their term until a successor is appointed. A member appointed to fill an unexpired term will be appointed for the remainder of such term.'

"Sec. 9. This order shall be effective September 30, 1999."

**Ex. Or. No. 13225 (superseded).** Ex. Or. No. 13225 of Sept. 28, 2001, *66 Fed. Reg. 50291*, which formerly appeared as a note to this section, was superseded by Ex. Or. No. 13316 of September 17, 2003, *68 Fed. Reg. 55255*. It provided for continuation of certain Federal advisory committees.

**Continuance of certain Federal advisory committees.** Ex. Or. No. 13316 of September 17, 2003, *68 Fed. Reg. 55255*; Ex. Or. 13385 of Sept. 29, 2005, *70 Fed. Reg. 57989*, provides:

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and in accordance with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Sections 1, 2. [Superseded—These sections provided for continuance of certain advisory committees and performance of functions of the President.]

"Sec. 3. The following Executive Orders, or sections thereof, which established committees that have terminated or whose work is completed, are revoked:

"(a) Sections 5 through 7 of Executive Order 13111 [5 USCS § 4103], as amended by Executive Order 13188 and Section 3(a) of Executive Order 13218, pertaining to the establishment of the Advisory Committee on Expanding Training Opportunities;

"(b) Executive Order 12975 [42 USCS § 6601 note], as amended by Executive Orders 13018, 13046, and 13137, establishing the National Bioethics Advisory Commission;

"(c) Executive Order 13227 [unclassified], as amended by Executive Order 13255, establishing the President's Commission on Excellence in Special Education;

"(d) Executive Order 13278 [unclassified], establishing the President's Commission on the United States Postal Service;

"(e) Executive Order 13210 [unclassified], establishing the President's Commission to Strengthen Social Security;

"(f) Sections 5 through 8 of Executive Order 13177 [50 USCS Appx § 2099 note], pertaining to the establishment of the President's Council on the Use of Offsets in Commercial Trade;

"(g) Executive Order 13263 [42 USCS § 290bb-3 note], establishing the President's New Freedom Commission on Mental Health;

"(h) Executive Order 13214 [38 USCS § 8111 note], establishing the President's Task Force to Improve Health Care Delivery for Our Nation's Veterans; and

"(i) Executive Order 13147 [42 USCS § 287c-21 note], as amended by Executive Order 13167, establishing the White House Commission on Complementary and Alternative Medicine Policy.

"Sec. 4. Executive Order 13225 is superseded [noted to this section].

"Sec. 5. [Omitted—This section amended Ex. Or. 12131 (50 USCS Appx § 2401 note).]

"Sec. 6. This order shall be effective September 30, 2003."

**Continuance of certain Federal advisory committees and amendments to and revocation of other executive orders.** Ex. Or. No. 13385 of Sept. 29, 2005, 70 Fed. Reg. 57989, provides:

"By the authority vested in me as President by the Constitution and the laws of the United States of America, and consistent with the provisions of the Federal Advisory Committee Act, as amended (5 U.S.C. App.), it is hereby ordered as follows:

"Section 1. Each advisory committee listed below is continued until September 30, 2007.

"(a) Committee for the Preservation of the White House; Executive Order 11145 [3 USCS § 110 note], as amended (Department of the Interior).

"(b) National Infrastructure Advisory Council; section 3 of Executive Order 13231 [6 USCS § 121 note], as amended (Department of Homeland Security).

"(c) Federal Advisory Council on Occupational Safety and Health; Executive Order 12196 [5 USCS § 7902 note], as amended (Department of Labor).

"(d) President's Board of Advisors on Historically Black Colleges and Universities; Executive Order 13256 [20 USCS § 1060 note] (Department of Education).

"(e) President's Board of Advisors on Tribal Colleges and Universities; Executive Order 13270 [25 USCS § 1801 note] (Department of Education).

"(f) President's Commission on White House Fellowships; Executive Order 11183 [unclassified], as amended (Office of Personnel Management).

"(g) President's Committee for People with Intellectual Disabilities; Executive Order 12994 [42 USCS § 15001 note], as amended (Department of Health and Human Services).

"(h) President's Committee on the Arts and the Humanities; Executive Order 12367 [unclassified], as amended (National Endowment for the Arts).

"(i) President's Committee on the International Labor Organization; Executive Order 12216 [22 USCS § 271 note], as amended (Department of Labor).

"(j) President's Committee on the National Medal of Science; Executive Order 11287 [42 USCS § 1881 note], as amended (National Science Foundation).

"(k) President's Council of Advisors on Science and Technology; Executive Order 13226 [42 USCS § 6601 note], as amended (Office of Science and Technology Policy).

"(l) President's Council on Bioethics; Executive Order 13237 [42 USCS § 6601 note] (Department of Health and Human Services).

"(m) President's Council on Physical Fitness and Sports; Executive Order 13265 [42 USCS § 300u note] (Department of Health and Human Services).

"(n) President's Export Council; Executive Order 12131 [50 USCS Appx § 2401 note], as amended (Department of Commerce).

"(o) President's National Security Telecommunications Advisory Committee; Executive Order 12382 [unclassified], as amended (Department of Homeland Security).

"(p) Trade and Environment Policy Advisory Committee; Executive Order 12905 [19 USCS § 2155 note] (Office of the United States Trade Representative).

"Sec. 2. Notwithstanding the provisions of any other Executive Order, the functions of the President under the Federal Advisory Committee Act [5 USCS Appx] that are applicable to the committees listed in section 1 of this order shall be performed by the head of the department or agency designated after each committee, in accordance with the guidelines and procedures established by the Administrator of General Services.

"Sec. 3. The following Executive Orders that established committees that have terminated or whose work is completed are revoked:

"(a) Executive Order 13328 [50 USCS § 2301 note], establishing the Commission on the Intelligence Capabilities of the

United States Regarding Weapons of Mass Destruction; and

"(b) Executive Order 13326 [unclassified], establishing the President's Commission on Implementation of United States Space Exploration Policy.

"Sec. 4. Sections 1 and 2 of Executive Order 13316 [note to this section] are superseded by sections 1 and 2 of this order.

"Sec. 5. [Omitted—This section amended Ex. Or. 13231 (6 USCS § 121 note).]

"Sec. 6. [Omitted—This section amended Ex. Or. 12367 (unclassified).]

"Sec. 7. [Omitted—This section amended Ex. Or. 12216 (22 USCS § 271 note).]

"Sec. 8. [Omitted—This section amended Ex. Or. 13226 (42 USCS § 6601 note).]

"Sec. 9. Executive Order 13283 [3 USCS prec § 101 note] is revoked.

"Sec. 10. This order shall be effective September 30, 2005."

The Federal Advisory Committee Act. 10 Harv J Legis 217, 1973.

##### Interpretive Notes and Decisions:

1. Generally. 2. Purpose. 3. Termination of particular committees

#### 1. Generally

Federal Advisory Committee Act was intended to have both immediate effect, through FACA § 14, and prospective effect, through §§ 5, 6 and 7, in providing means by which advisory committees could be reviewed so that those no longer furthering purpose for which they were established could be terminated. *Carpenter v Morton* (1976, DC Nev) 424 F Supp 603.

Decision of whether advisory committee, terminated by FACA § 14, should be re-established is discretionary with particular administrative agency and cannot be reviewed by district court. *Hiatt Grain & Feed, Inc. v Bergland* (1978, DC Kan) 446 F Supp 457, 11 Env't Rep Cas 1961, aff'd (1979, CA10 Kan) 602 F2d 929, cert den (1980) 444 US 1073, 62 L Ed 2d 755, 100 S Ct 1019.

#### 2. Purpose

It is clear that when Congress enacted Federal Advisory Committee Act, it was concerned about proliferation of advisory committees which had outlived their usefulness; to remedy situation, Congress in FACA § 14 chose to terminate

all advisory committees and in doing so contemplated that Act would affect existing substantive law and that if it later decided advisory committees were necessary, Congress would enact legislation to recharter them. *Carpenter v Morton* (1976, DC Nev) 424 F Supp 603.

**3. Termination of particular committees**

FACA § 14 terminated all Boards of Grazing District Advisers which were established under authority of 43 USCS §§ 315 et seq. *Carpenter v Morton* (1976, DC Nev) 424 F Supp 603.

TITLE 5. GOVERNMENT ORGANIZATION AND EMPLOYEES  
TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

**GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION**

5 USCS Appx § 15

§ 15. Requirements relating to the National Academy of Sciences and the National Academy of Public Administration

(a) In general. An agency may not use any advice or recommendation provided by the National Academy of Sciences or National Academy of Public Administration that was developed by use of a committee created by that academy under an agreement with an agency, unless—

(1) the committee was not subject to any actual management or control by an agency or an officer of the Federal Government;

(2) in the case of a committee created after the date of the enactment of the Federal Advisory Committee Act Amendments of 1997 [enacted Dec. 17, 1997], the membership of the committee was appointed in accordance with the requirements described in subsection (b)(1); and

(3) in developing the advice or recommendation, the academy complied with—

(A) subsection (b)(2) through (6), in the case of any advice or recommendation provided by the National Academy of Sciences; or

(B) subsection (b)(2) and (5), in the case of any advice or recommendation provided by the National Academy of Public Administration.

(b) Requirements. The requirements referred to in subsection (a) are as follows:

(1) The Academy shall determine and provide public notice of the names and brief biographies of individuals that the Academy appoints or intends to appoint to serve on the committee. The Academy shall determine and provide a reasonable opportunity for the public to comment on such appointments before they are made or, if the Academy determines such prior comment is not practicable, in the period immediately following the appointments. The Academy shall make its best efforts to ensure that (A) no individual appointed to serve on the committee has a conflict of interest that is relevant to the functions to be performed, unless such conflict is promptly and publicly disclosed and the Academy determines that the conflict is unavoidable, (B) the committee membership is fairly balanced as determined by the Academy to be appropriate

for the functions to be performed, and (C) the final report of the Academy will be the result of the Academy's independent judgment. The Academy shall require that individuals that the Academy appoints or intends to appoint to serve on the committee inform the Academy of the individual's conflicts of interest that are relevant to the functions to be performed.

(2) The Academy shall determine and provide public notice of committee meetings that will be open to the public.

(3) The Academy shall ensure that meetings of the committee to gather data from individuals who are not officials, agents, or employees of the Academy are open to the public, unless the Academy determines that a meeting would disclose matters described in *section 552(b) of title 5, United States Code*. The Academy shall make available to the public, at reasonable charge if appropriate, written materials presented to the committee by individuals who are not officials, agents, or employees of the Academy, unless the Academy determines that making material available would disclose matters described in that section.

(4) The Academy shall make available to the public as soon as practicable, at reasonable charge if appropriate, a brief summary of any committee meeting that is not a data gathering meeting, unless the Academy determines that the summary would disclose matters described in *section 552(b) of title 5, United States Code*. The summary shall identify the committee members present, the topics discussed, materials made available to the committee, and such other matters that the Academy determines should be included.

(5) The Academy shall make available to the public its final report, at reasonable charge if appropriate, unless the Academy determines that the report would disclose matters described in *section 552(b) of title 5, United States Code*. If the Academy determines that the report would disclose matters described in that section, the Academy shall make public an abbreviated version of the report that does not disclose those matters.

(6) After publication of the final report, the Academy shall make publicly available the names of the principal reviewers who reviewed the report in draft form and who are not officials, agents, or employees of the Academy.

(c) Regulations. The Administrator of General Services may issue regulations implementing this section.

TITLE 5—APPENDIX  
FEDERAL ADVISORY COMMITTEE ACT

**GO TO CODE ARCHIVE DIRECTORY FOR THIS JURISDICTION**

*5 USCS Appx § 16*

**§ 16. Effective date**

Except as provided in section 7(b), this Act shall become effective upon the expiration of ninety days following the date of enactment [enacted Oct. 6, 1972].

**HISTORY:**

(Oct. 6, 1972, P.L. 92-463, § 16 [15], 86 Stat. 777.)

**HISTORY; ANCILLARY LAWS AND DIRECTIVES**

**Redesignation:**

This section, enacted as § 15 of Act Oct. 6, 1972, P.L. 92-463, was redesignated § 16 of such Act by Act Dec. 17, 1997, P.L. 105-153, § 2(b), 111 Stat. 2689.

**UNITED STATES DEPARTMENT OF AGRICULTURE  
LAND BETWEEN THE LAKES (LBL) ADVISORY BOARD**

*Bylaws & Operating Procedures*

June 1, 2005

**SECTION I: PURPOSE**

The purpose of the LBL Advisory Board (Board) is to provide advice to the Secretary of Agriculture (Secretary) on the following:

- Means of promoting public participation for the land and resource management plan for LBL
- Environmental education.

**SECTION II: AUTHORITY**

- A. The Secretary, in accordance with Section 522 of the LBL Protection Act, established the LBL Advisory Board. The Board is subject to the Federal Advisory Committee Act (FACA), as outlined in the amended LBL Protection Act and the current Advisory Board Charter, as filed with Congress.
- B. For the purposes of National Forest System Land and Resource Management Planning under the provisions of CFR 219.19(a), November 9, 2000, this Board may be utilized as the committee that the Responsible Official (Regional Forester or Area Supervisor) may use for access to knowledge of local conditions and issues in the Forest Service planning process.

**SECTION III: MEMBERSHIP SELECTION AND APPOINTMENT**

Members of the Board are appointed by the Secretary and seven state and local public officials from Kentucky and Tennessee as described in the Charter. Each member shall serve without compensation and shall not be considered an employee of the United States Department of Agriculture. Appointments will be for five years.

When vacancies occur in a primary membership, the applicable appointing official will be asked to appoint a new primary member to the Board. The designated alternate will fill in as the official representative of their appointing agency until a new primary member is appointed. If an alternate is no longer able to serve, or is appointed to the primary membership, the applicable appointing official will be asked to designate a new alternate.

Appointments are final when notification of the appointment is received by the DFO from the appointing agency. Primary members will officially begin their five-year term at the fall meeting in the year of their appointment. Alternates who move up to a primary membership will officially begin their five-year term as a primary member at

the fall meeting in the year of their appointment.

Members may not succeed themselves as primary members on the Board; however, they may be appointed to additional terms so long as no individual serves more than five consecutive years as a member of the Board. Alternates do not have a term, so there is no limit to the amount of time they may serve in that capacity. They do, however, serve at the pleasure of their appointing agency.

Membership includes the responsibility to personally attend Board meetings, and members will be expected to show commitment to the board by their attendance. If a Board member misses three consecutive meetings, the Chair may recommend their termination as a Board member to the appointing official.

Members will notify the DFO at least 2 weeks in advance if they are unable to attend a meeting so that the alternate member may be contacted. Approved alternates will have full voting rights in the absence of primary members.

#### **SECTION IV: MEETING PROCEDURES**

The Board will meet at least twice each year; however, additional meetings may be held as needed. Meetings will be called by the Board Chairperson (Chairperson) with the concurrence of the Designated Federal Official (DFO), in accordance with the following considerations:

##### **A. Quorum and Voting**

The Charter requires that nine voting members constitute a quorum for the conduct of business. Any Board recommendation to the Secretary requires an affirmative vote of at least a majority of the total Board membership on that date. Consensus on decisions and recommendations is desirable.

##### **B. Agenda**

The DFO will initiate and approve the agenda for all meetings in consultation with the Chairperson. Any member of the Board may submit items for the agenda to the DFO and/or Chairperson. Also, items may be suggested by members of the public to the Board for consideration as agenda items at future meetings. All proposed agenda items must directly relate to the purpose of the Board as described in Section I. Copies of the agenda will be distributed to the members prior to each meeting, and an outline of the agenda will be published with the notice of the meeting in the Federal Register. Meeting agendas will also be available at the LBL Administrative Office and on the LBL web page.

##### **C. Minutes and Records**

The DFO will prepare minutes of each meeting, submit them to the Chairperson for certification, and distribute copies to each Board member within 30 working days of the meeting date. Minutes will also be available for review at the LBL Administrative Office and will be accessible on the LBL web page. The minutes will include a record of the members and Forest Service staff present and the names of members of the public requested to make an oral presentation, if applicable; a complete and accurate description of the matters discussed and conclusions reached; and copies of all reports received, issued, or approved by the Board. Additionally, a cumulative listing of Board recommendations will be maintained by the DFO. The listing of Board recommendations and the meeting minutes will be available to the public upon request.

All documents, reports, or other materials prepared by, or for, the Board constitute official government records and will be maintained according to USDA and FACA policies and procedures.

**D. Meeting Access**

Meeting Access All meetings of the Board will be open to the public for the duration of the meeting. All materials brought before or presented to the Board during the conduct of an open meeting, including minutes of the proceedings, will be available to the public for review, subsequent to the meeting, at the LBL Administrative Office.

Written statements from the public may be submitted to the Board at any time through the DFO; however, written statements received less than 1 week prior to the meeting will not be available to the members until after the meeting.

Time will be reserved on the agenda at each meeting for Board members to discuss comments received prior to that meeting from members of the public. If the individual submitting the comment is present at the meeting, the Board may ask questions for clarification while the comment is being reviewed. This will be an informal question/answer session and time allotted will be limited. Responses will be included in the meeting notes. If a comment received falls within the two purposes of the Board, and if the Board determines that more detailed clarification is required, a time will be scheduled on the agenda at an upcoming Advisory Board meeting for the individual to provide more detailed oral clarification, pertaining to the original comment received by the Board. The individual will be required to provide a written copy of the presentation, and any handouts they will use, to the DFO two (2) weeks prior to the meeting date so copies can be sent to Board Members for their review before the meeting. Time allotted for the detailed oral clarification will be limited. All oral comments from the public, during initial clarification or further detailed clarification if requested by the Board, will be considered as information for the Board. The Chairperson will determine the extent to which the Board will respond to the statements during the meeting, and also the time allotted for clarification.

The meeting announcement published in the Federal Register and made available to public media will note if an oral clarification from a member of the public is scheduled during the meeting.

**SECTION V: ROLE OF BOARD OFFICIALS** — Executive Board

**Chairperson:**

The Regional Forester of the Southern Region, USDA Forest Service, serves as the Chairperson. The Deputy Regional Forester serves as the alternate Chairperson. The Chairperson is a non-voting member who works with the DFO to establish priorities, identify issues that must be addressed, and determine the level and types of staff and financial support required. The Chairperson calls meetings with the concurrence of the DFO, conducts meetings, certifies the accuracy of meeting minutes, and is responsible for notifying the public before a meeting occurs. A notice of the upcoming meeting will be placed in the Federal Register 15 calendar days prior to the meeting date and notices will also be distributed through local media 2 weeks prior to the meeting. A meeting facilitator may be employed to assist the Chairperson in conducting meetings. The Chairperson may adjourn meetings with approval of the majority of members present. The alternate Chairperson will accomplish all duties of the Chairperson in his/her absence.

**Designated Federal Officer:**

The LBL Area Supervisor serves as the Designated Federal Officer (DFO). The Acting Area Supervisor serves as the alternate DFO. The DFO, or the alternate DFO, serves as the government's agent for all matters related to the Board's activities. By law, the DFO must: (1) approve or call meetings of the Board; (2) approve agendas; and (3) attend all meetings. The DFO shall adjourn meetings when such adjournment is in the public interest. The alternate DFO will accomplish all duties of the Designated Federal Officer in his/her absence.

The DFO is responsible for providing adequate staff support to the Board, including: (1) notifying members of the time and place of each meeting; (2) maintaining records of all meetings, including subgroup or working group activities, as required by law; (3) maintaining the roll; (4) preparing the minutes of all meetings of the Board's

deliberations, including subgroup and working group activities; (5) attending to official correspondence; (6) maintaining official Board records and filing all papers and submissions prepared for or by the Board, including items generated by subgroups and working groups; (7) acting as the Board's agent to collect, validate, and pay all vouchers for pre-approved expenditures; and (8) preparing and handling all reports, including the annual report as required by FACA.

#### **~~SECTION VI: EXPENSES AND REIMBURSEMENT~~**

Expenses related to the operation of the Board will be borne by USDA. Expenditures of any kind must be approved in advance by the DFO.

USDA will pay travel and per diem for Board members at a rate equivalent to that allowable for USDA employees. Members will be required to submit a travel voucher to the DFO with required receipts for out-of-pocket travel and per diem expenses attached. Alternate members will be reimbursed for travel expenses only when they attend an Advisory Board meeting as the official representative of their appointing agency in the absence of the primary member. Completed and signed travel vouchers for expenses should be submitted to the DFO within 30 days after each meeting.

(7) disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;

Pennsylvania Dept. of Public Welfare v. U.S.  
W.D.Pa., 2006.

Only the Westlaw citation is currently available.

United States District Court, W.D. Pennsylvania.  
COMMONWEALTH OF PA DEPT OF PUBLIC  
WELFARE, Plaintiff,

v.

UNITED STATES, U.S. Dept of Health & Human  
Services, Defendants.

No. CIVA 05-1285.

Dec. 21, 2006.

Jason W. Manne, Department of Public Welfare Office of General Counsel, Pittsburgh, PA, for Plaintiff.  
Lee J. Karl, United States Attorney's Office, Pittsburgh, PA, for Defendants.

MEMORANDUM ORDER

AMBROSE, Chief District J.

\*1 The above captioned complaint was received by the Clerk of Court on September 16, 2005, and was referred to United States Magistrate Judge Lisa Pupo Lenihan for pretrial proceedings in accordance with the Magistrates Act, 28 U.S.C. § 636(b)(1), and Rules 72.1.3 and 72.1.4 of the Local Rules for Magistrates.

The Magistrate Judge's Report and Recommendation (Doc. No. 22), filed on November 22, 2006, recommended that Defendants' Motion for Summary Judgment (Doc. No. 8) be granted with regard to the issue of the adequacy of the FOIA search, but denied without prejudice in all other respects. The Report and Recommendation further recommended that Plaintiff's Rule 56(f) Motion (Doc. No. 13) be denied without prejudice on the issue of the adequacy of the FOIA search, but granted on the remaining issues. Service was made on all counsel of record. Plaintiff filed timely Objections to the Report and Recommendation (Doc. No. 23) on December 1, 2006, to which Defendants filed a timely response on December 12, 2006 (Doc. No. 26). Defendants filed timely Objections to the Report and Recommendation on December 6, 2006 (Doc. No. 24), to which Plaintiff filed a timely response on December 18, 2006 (Doc.

No. 28). After review of the pleadings and documents in the case, together with the Report and Recommendation and the objections thereto, the following order is entered:

AND NOW, this 21st day of December, 2006,

IT IS HEREBY ORDERED that Defendants' Motion for Summary Judgment (Doc. No. 8) is GRANTED IN PART AND DENIED IN PART. Defendants' Motion for Summary Judgment is GRANTED WITH PREJUDICE as to the adequacy of the FOIA search, and DENIED WITHOUT PREJUDICE in all other respects.

IT IS FURTHER ORDERED that Plaintiff's Rule 56(f) Motion (Doc. No. 13) is GRANTED IN PART AND DENIED IN PART. Plaintiff's Rule 56(f) Motion is DENIED WITH PREJUDICE on the issue of the adequacy of the FOIA search, and GRANTED on the remaining issues. Plaintiff is entitled to limited discovery on the remaining issues, the parameters of which shall be set by the Magistrate Judge.

IT IS FURTHER ORDERED that the Report and Recommendation (Doc. No. 22) of Magistrate Judge Lenihan, dated November 22, 2006, is adopted as the opinion of the Court.

REPORT AND RECOMMENDATION

I. RECOMMENDATION

It is respectfully recommended that Defendants' Motion for Summary Judgment (Doc. No. 8) be granted with regard to the issue of the adequacy of the search, and denied without prejudice in all other respects. It is further recommended that Plaintiff's Rule 56(f) Motion (Doc. No. 13) be denied with prejudice on the issue of the adequacy of the search, and granted on the remaining issues.

II. REPORT

Plaintiff, the Commonwealth of Pennsylvania Department of Public Welfare ("Commonwealth"), instituted this action pursuant to the Freedom of In-

formation Act ("FOIA"), 5 U.S.C. § 552, to compel the United States and its Department of Health and Human Services ("HHS") to disclose certain documents relating generally to audits conducted by HHS's Office of Inspector General ("OIG") and, specifically, to the review of Title IV-E foster care programs. The Commonwealth made five separate requests pursuant to FOIA between June 29, 2005 and July 19, 2005 for specific materials in these categories. All told, HHS has released approximately 925 pages of responsive materials to the Commonwealth, including pages with redactions, and has withheld in their entirety approximately 202 pages of responsive materials, claiming the withheld materials are exempt from disclosure under 5 U.S.C. § 552(b)(5) ("Exemption (b)(5)"). The Commonwealth disputes the applicability of Exemption (b)(5) to approximately 196 pages of responsive materials withheld by HHS, and also challenges the adequacy of the search conducted by HHS, as well as HHS's representation that it has released all responsive and reasonably segregable factual information. This Court has original subject matter jurisdiction over the action pursuant to 5 U.S.C. § 552(a)(4)(B) and 28 U.S.C. § 1331.

\*2 HHS has filed a Motion for Summary Judgment (Doc. No. 8); based on its *Vaughn* indices and supporting declarations. In response, the Commonwealth has filed a brief and supplemental brief in opposition, supporting affidavit, and a Rule 56(f) Motion for Discovery (Doc. No. 13). For the reasons set forth below, the Court recommends that Defendants' motion for summary judgment be granted in part and denied in part, and that Plaintiff's Rule 56(f) Motion for Discovery be granted with limitations.

#### A. Standard of Review-Motion for Summary Judgment

The summary judgment standard of Fed.R.Civ.P. 56(c) applies to FOIA cases as it would to any other civil action. Commw. of Pa., Dep't of Public Welfare v. United States Dep't of Health & Human Serv., 623 F.Supp. 301, 303 (M.D.Pa.1985). Summary judgment is appropriate if, drawing all inferences in favor of the nonmoving party, "the pleadings, depositions, answers to interrogatories and admissions on file, together with the affidavits, if any, show that there is

no genuine issue of material fact and the movant is entitled to judgment as a matter of law." Fed.R.Civ.P. 56(c). Summary judgment may be granted against a party who fails to adduce facts sufficient to establish the existence of any element essential to that party's case, and for which that party will bear the burden of proof at trial. Celotex Corp. v. Catrett, 477 U.S. 317, 322, 106 S.Ct. 2548, 91 L.Ed.2d 265 (1986).

More specifically, the moving party bears the initial burden of identifying evidence which demonstrates the absence of a genuine issue of material fact. Once that burden has been met, the nonmoving party must set forth "specific facts showing that there is a *genuine issue for trial*" or the factual record will be taken as presented by the moving party and judgment will be entered as a matter of law. Matsushita Elec. Indus. Corp. v. Zenith Radio Corp., 475 U.S. 574, 587, 106 S.Ct. 1348, 89 L.Ed.2d 538 (1986) (quoting Fed.R.Civ.P. 56(e)) (emphasis added by *Matsushita* Court). An issue is genuine only "if the evidence is such that a reasonable jury could return a verdict for the non-moving party." Anderson v. Liberty Lobby, Inc., 477 U.S. 242, 248, 106 S.Ct. 2505, 91 L.Ed.2d 202 (1986).

In order to prevail on a motion for summary judgment in a FOIA action, the government agency must show that there are no disputed material facts and that each page of material that falls within the requested category either has been produced, is unidentifiable, or is exempt from disclosure. Students Against Genocide v. Dep't of State, 257 F.3d 828, 833 (D.C.Cir.2001) (citations omitted); Weisberg v. U.S. Dep't of Justice, 627 F.2d 365, 368 (D.C.Cir.1980) (citation omitted). As to the second part of its burden, the agency must demonstrate that its search was adequate and that any withheld documents fall within one of the FOIA exemptions. Lee v. U.S. Dep't of Justice, 235 F.R.D. 274, 287 (W.D.Pa.2006) (citing 5 U.S.C. § 552(a)(4)(B)); Carney v. U.S. Dep't of Justice, 19 F.3d 807, 812 (2d Cir.1994)). As the possessor of the records and the party responsible for conducting the search, the agency may satisfy this burden by filing a "reasonably detailed affidavit, setting forth the search terms and the type of search performed, and averring that all files likely to contain responsive materials (if such records exist) were

searched.” *Id.* (quoting *Valencia-Lucena v. U.S. Coast Guard*, 180 F.3d 321, 326 (D.C.Cir.1999); citing *Steinberg v. U.S. Dep't of Justice*, 23 F.3d 548, 552 (D.C.Cir.1994)). In addition, the affidavits or declarations must aver facts showing that the agency has conducted a thorough search and provide reasonably detailed explanations as to why any withheld documents fall within the claimed exemption. *Id.* (citing *Carney*, 19 F.3d at 812; *Maynard v. Cent. Intelligence Agency*, 986 F.2d 547, 559-60 (1st Cir.1993); *Perry v. Block*, 684 F.2d 121, 126-27 (D.C.Cir.1982)). Affidavits or declarations which satisfy this burden are to be given a presumption of good faith by the district court. *Id.* (citing *SafeCard Servs., Inc. v. Sec. & Exch. Comm'n.*, 926 F.2d 1197, 1200 (D.C.Cir.1991)). Thus, courts have granted summary judgment in favor of the agency when the agency's affidavits “describe the withheld information and the justification for withholding with reasonable specificity, demonstrating a logical connection between the information and the claimed exemption ..., and are not controverted by either contrary evidence in the record nor [sic] by evidence of agency bad faith.” *Davin v. U.S. Dep't of Justice*, 60 F.3d 1043, 1050 (3d Cir.1995) (quoting *Am. Friends Serv. Comm'n v. Dep't of Defense*, 831 F.2d 441, 444 (3d Cir.1987)) (other citation omitted).

\*3 “[D]iscovery relating to the agency's search and the exemptions it claims for withholding records generally is unnecessary so long as the agency's submissions are facially adequate.” *Id.* (citing *Goland v. Cent. Intelligence Agency*, 607 F.2d 339, 352 (D.C.Cir.1978)). If the agency's submissions are determined to be facially adequate, the district court may refuse discovery and award summary judgment based on the affidavits. *Id.* (citing *Goland, supra*). If, however, a review of the record raises substantial doubt, especially where the requests are “well-defined” and the complainant submits positive indications of overlooked materials, summary judgment is inappropriate. *Id.* (citing *Valencia-Lucena*, 180 F.3d at 326; *Founding Church of Scientology of Washington, D.C., Inc. v. Nat'l Sec. Agency*, 610 F.2d 824, 830 (D.C.Cir.1979)).

B. Statement of Relevant Facts and Procedural History

On June 29, 2005, the Commonwealth sent the first of five FOIA requests to HHS requesting inter-agency agreements between OIG and Administration for Children and Families (“ACF”), and between OIG and the Centers for Medicare and Medicaid Programs (“CMS”) regarding the performance of audits for these programs; all OIG statistical sampling policies; and contract documents relating to OIG's use of the Teammate working paper software.<sup>FN1</sup> (Ex. A to Pl.'s Compl.) On that same date, the Commonwealth sent a second FOIA request to HHS requesting all documents evidencing or discussing any agreement between ACF or its Regional Administrator, David Lett, and OIG relating to review of Pennsylvania's Title IV-E claims for any periods of time between 1997 and 2002.<sup>FN2</sup> (Ex. B to Pl.'s Compl.)

<sup>FN1.</sup> HHS assigned Case No.2005-0952-FW to the Commonwealth's first FOIA request. See *Declaration of Katherine Hooten* dated 1/13/06 (attached as Ex. D to Mem. of Law in Supp. of Defs.' Motion for Summ. J.) (“Hooten Decl. F”) at ¶ 5.

<sup>FN2.</sup> HHS assigned Case No.2005-0951 - MB to the Commonwealth's second FOIA request. See *Hooten Decl. I* at ¶ 7.

On June 30, 2005, the Commonwealth submitted its third FOIA request to HHS requesting documents relating to all child eligibility review instruments used by OIG auditors in ongoing or completed audits of Title IV-E maintenance payments made by states and local governments.<sup>FN3</sup> (Ex. C to Pl.'s Compl.) Also on June 30, 2005, the Commonwealth sent a fourth FOIA request to HHS requesting any letters to state officials after January 1, 2000 announcing the initiation of an audit by OIG relative to a state Title IV-E program except for completed audits whose reports were posted on the HHS web-site or, alternatively, a letter listing the ongoing Title IV-E audits.<sup>FN4</sup> (Ex. D to Pl.'s Compl.)

<sup>FN3.</sup> HHS assigned Case No.2005-0953-RE to the Commonwealth's third FOIA request. See *Declaration of Diane J. Diggs* dated 12/7/05 (attached as Ex. E to Mem. of Law

in Supp. of Defs.' Motion for Summ. J.) ("Diggs Decl.") at ¶ 9.

FN4. HHS assigned Case No.2005-0954-mb to the Commonwealth's fourth FOIA request. See *Diggs Decl.* at ¶ 11.

Finally, on July 19, 2005, the Commonwealth sent its fifth FOIA request to HHS requesting all documents post 1997 relating to decisions by ACF and OIG to subject Pennsylvania's Title IV-E program to audit by OIG, discussions held by the staff of ACF, including ACF Regional Administrator David Lett, or OIG staff relative to whether Pennsylvania's Title IV-E program should be audited by OIG, and the decision by OIG to include a cost analysis of Title IV-E provider rates in its audit of Pennsylvania's Title IV-E program.<sup>FN5</sup> (Ex. E to Pl.'s Compl.) In this request, the Commonwealth specifically sought the release of segregable factual material contained in privileged documents.<sup>FN6</sup> (*Id.*)

FN5. HHS assigned Case No.2005-1000-RE to the Commonwealth's fifth FOIA request. See *Diggs Decl.* at ¶ 12.

FN6. Although the FOIA requestor's purpose for requesting the information is irrelevant, the Court notes that the majority of the information sought in the five FOIA requests here appears to be related to claims asserted by the Commonwealth in a separate lawsuit filed in this judicial district at Civil Action No. 05-1345, under the caption, "*Commonwealth of Pennsylvania Department of Public Welfare v. United States, United States Department of Health and Human Services.*" On September 19, 2006, judgment was entered in favor of defendants in the case filed at 05-1345. The Commonwealth has appealed the judgment in Civil Action No. 05-1345 to the U.S. Court of Appeals for the Third Circuit by filing a notice of appeal on September 22, 2006.

\*4 Other than acknowledging receipt of the FOIA requests and denying the Commonwealth's requests for a fee waiver, HHS did not respond to the document

requests within the time required by law. (Compl. ¶ 6.) Therefore, while HHS was processing the five FOIA requests, the Commonwealth instituted the present FOIA action on September 16, 2005.

Subsequently, on October 19, 2005, HHS responded to the Commonwealth's fourth FOIA request (Case No.2005-0954-mb) by producing in its entirety a list of letters announcing the initiation of audits by OIG relating to state Title IV-E programs. (Ex. 6 to *Declaration of Robert Eckert* dated 4/12/06 ("*Eckert Decl. I*").<sup>FN7</sup>) Thereafter, the parties proposed and the Court approved a case management plan, pursuant to which HHS conducted its search for documents corresponding to the first, second, third, and fifth FOIA requests made respectively in Case Nos.2005-0952-FW, 2005-0951-MB, 2005-0953-RE, and 2005-1000-RE.

FN7. The Declaration of Robert Eckert dated 4/12/06 is attached as Exhibit A to the Memorandum of Law in Support of Defendants' Motion for Summary Judgment (Doc. No. 9).

On January 5, 2006, HHS informed the Commonwealth that after searching its records, it was able to locate approximately 1,128 pages responsive to the Commonwealth's requests and released approximately 830 pages, some of which contained redactions. (Ex. 8 to *Eckert Decl. I*.) In this regard, HHS informed the Commonwealth that employer identification numbers under Exemption (b)(4)<sup>FN8</sup>, information documenting the deliberative process under Exemption (b)(5)<sup>FN9</sup>, and names and other identifiers of minor children under Exemption (b)(6)<sup>FN10</sup> were redacted from the released documents. (*Id.*) HHS withheld the remaining 298 pages in their entirety based on Exemption (b)(5).<sup>FN11</sup> (*Id.*)

FN8. Exemption (b)(4) allows the agency to withhold "commercial or financial information obtained from a person and privileged or confidential". 5 U.S.C. § 552(b)(4).

FN9. Exemption (b)(5) allows the agency to withhold "inter-agency or intra-agency memorandums or letters which would not be

available by law to a party other than an agency in litigation with the agency". 5 U.S.C. § 552(b)(5). The courts have recognized that Exemption (b)(5) generally protects from disclosure materials that would be protected under the executive or "deliberative process" privilege, attorney-client privilege, and/or the attorney work product privilege. Coastal States Gas Corp. v. Dep't of Energy, 617 F.2d 854, 862 (D.C.Cir.1980) (citations omitted).

**FN10.** Exemption (b)(6) allows the agency to withhold "personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy". 5 U.S.C. § 552(b)(6).

**FN11.** HHS informed the Commonwealth that it withheld materials under Exemption (b)(5) based on either the deliberative process, the attorney work-product, and/or the attorney-client privileges. (Ex. 8 to *Eckert Decl. I*.)

HHS produced its *Vaughn* indices **FN12** on February 28, 2006 for materials withheld in their entirety and released with redactions in Case Nos.2005-951-MB and 2005-1000-RE (Ex. 9), Case No.2005-0952-FW (Ex. 10), and Case No.2005-953-RE (Ex. 11). (Ex. 9-11 to *Eckert Decl. I*; Ex. C to Mem. of Law in Supp. of Defs.' Mot. for Summ. J.) The *Vaughn* indices provided by HHS identify each material withheld or containing withheld information by providing: (1) the Bate-stamp page number and number of pages, (2) a description of the material, (3) an indication of the amount of information withheld and the length of the document, and (4) the basis for the exemption claimed. According to the *Vaughn* indices submitted by HHS for Case Nos.2005-1000-RE and 2005-951-MB, which are the only *Vaughn* indices at issue here, HHS withheld 202 pages in their entirety, **FN13** released with its *Vaughn* indices two (2) pages which had been redacted, **FN14** released with its *Vaughn* indices 92 pages in their entirety, **FN15** and provided an explanation for 66 pages of previously released materials that had been redacted. **FN16**

**FN12.** In *Vaughn v. Rosenn*, 484 F.2d 820 (D.C.Cir.1974) (*Vaughn I*), the Court of Appeals for the District of Columbia Circuit delineated certain information that must be provided by the agency for any documents being withheld under one of the enumerated exemptions under FOIA to satisfy its burden of proof, which has become known as the "*Vaughn* Index".

**FN13.** HHS alleges that 204 pages of responsive materials were withheld in their entirety; however, the Court, in its review of the *Vaughn* indices, calculated only 202 pages withheld in their entirety. HHS assigned the following Bate-stamp page numbers to these 202 unreleased pages: 490-91, 492-93, 494-95, 497-98, 499, 500-06, 512, 513-16, 517, 518-19, 520, 521-24, 525, 526-28, 529, 530, 531, 532, 533, 537, 538, 539, 542, 545, 546, 556, 584-86, 690-93, 831, 832, 833, 834-35, 836, 837, 838, 839, 84-85, 86, 87-88, 89-90, 91, 92-93, 94-95, 96, 97, 98, 99-100, 101-02, 103, 104-05, 112, 113-14, 115-17, 118, 194-95, 196-97, 198-200, 201-02, 203-04, 205-08, 209-11, 212-15, 217-18, 221-22, 223-24, 227-30, 233-35, 236-37, 238-39, 241, 242, 243, 245, 246-47, 248, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269, 270-71, 272-73, 274-76, 277-79, 280-84, 285-86, 287-88, 289-91, 292, 343, 344, 345, 346, 465, 466-68, 469, and 470-482.

**FN14.** These two pages are found at Bate-stamp page nos. 496 and 557.

**FN15.** The following Bate-stamp page numbers are assigned to these materials: 543-44, 106, 107, 108-09, 110-11, 119-193, 216, 219, 220, 225-26, 231-32, 240, and 244. Although HHS does not indicate in its *Vaughn* indices that page no. 244 was redacted, the Commonwealth contends that page was redacted and it is contesting the withholding of the redacted information.

FN16. The following Bate-stamp page numbers are assigned to these materials: 507-511, 547-55, 699-705, 711-24, 725-43, and 747-58.

In response, on March 28, 2006, the Commonwealth corresponded with HHS and provided a list of withheld documents which correlated to those listed in HHS's *Vaughn* indices for Case Nos. 2005-1000-RE and 2005-951-MB, for which it was challenging the specific claimed exemptions. (Ex. B attached to Mem. of Law in Supp. of Defs.' Mot. for Summ. J.) Initially, in its March 28, 2006 correspondence, the Commonwealth challenged HHS's claimed exemptions for 191 pages of responsive materials FN17 188 of the challenged pages were withheld in their entirety by HHS; FN18 the other three (3) pages were redacted and released with the *Vaughn* indices. FN19 However, a subsequent filing by the Commonwealth on June 2, 2006 (Ex. A to Rule 56(f) Declaration of Jason Manne (Doc. No. 14)) actually places 196 pages in dispute. FN20 Of these 196 pages, 29 appear to be duplicates of the withheld material. FN21 On March 28, 2006, the Commonwealth also informed HHS that it was contesting the adequacy of the search and objected to HHS's failure to disclose segregable factual material in the documents. (*Id.*)

FN17. The Commonwealth's March 28, 2006 challenge to the *Vaughn* indices actually lists 193 pages for which the claimed exemptions are disputed. However, that list includes Bate-stamped page nos. 219 and 220, which were released in their entirety by HHS with its *Vaughn* indices. The Commonwealth has subsequently acknowledged receipt of page nos. 00219 and 00220 and withdrawn its challenge to these pages. (Ex. C attached to Mem. of Law in Supp. of Defs.' Mot. for Summ. J.; Pl.'s Br. in Opp'n to HHS's Mot. for Summ. J. and in Supp. of its Rule 56(f) Mot. at 2 n. 2.)

FN18. The 188 pages withheld in their entirety which the Commonwealth is challenging are assigned the following Bate-stamp page numbers: 490-91, 492-93, 494-95, 497-98, 499, 500-06, 512, 513-16, 517,

518-19, 520, 521-24, 526-28, 529, 530, 531, 532, 533, 537, 538, 539, 542, 545, 546, 556, 584-86, 831, 832, 833, 834-35, 836, 837, 838, 839, 84-85, 86, 87-88, 89-90, 91, 92-93, 94-95, 96, 97, 98, 99-100, 101-02, 103, 104-05, 112, 113-14, 115-17, 118, 198-200, 201-02, 203-04, 205-08, 209-11, 212-15, 217-18, 221-22, 223-24, 227-30, 236-37, 241, 242, 243, 245, 246-47, 248, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269, 270-71, 272-73, 274-76, 277-79, 280-84, 285-86, 287-88, 289-91, 292, 343, 344, 345, 346, 465, 466-68, 469, 470-482.

FN19. The three (3) redacted pages released by HHS and challenged by the Commonwealth are Bate-stamp page nos. 496, 557, and 244. With regard to page no. 244, HHS's *Vaughn* indices do not indicate that this page was redacted in any way.

FN20. In addition to the 191 pages of withheld material challenged on March 28, 2006, the Commonwealth now appears to be challenging the exemptions claimed for eleven (11) other pages Bate-stamp page nos. 216, 225-26, 231-32, 233-35, 238-39, and 240-as indicated in Exhibit A to the Rule 56(f) Declaration of Jason W. Manne (Doc. No. 14). However, six (6) of these pages, *i.e.*, page nos. 216, 225-26, 231-32, and 240, appear to have been released without redaction with HHS's *Vaughn* indices, and the Commonwealth does not provide any basis for including these pages in its June 2, 2006 submission, nor is there any evidence of record to suggest that these documents contain redactions. Therefore, the Court concludes that these six (6) pages were listed in error by the Commonwealth and has not included them as part of the total number of challenged pages.

FN21. The following page numbers appear to be duplicates: Page no. 546 is a duplicate of 545; page nos. 556 and 557 are duplicates of page no. 496; page nos. 584-86, 274-76;

277-79, and 289-91 are duplicates of page nos. 526-28; page no. 836 is a duplicate of page no. 537; page no. 837 is a duplicate of page no. 538; page nos. 838 and 112 are duplicates of page nos. 539; page no. 839 is a duplicate of page no. 542; page nos. 113-14 are duplicates of page nos. 834-35; page nos. 272-73 and 285-86 are duplicates of page nos. 497-98; and page nos. 344, 345, and 346 are duplicates of page no. 343.

\*5 On May 3, 2006, HHS filed a Motion for Summary Judgment, brief in support thereof, together with its supporting declarations and documents. In response, the Commonwealth filed a motion to stay the proceedings on HHS's motion for summary judgment pending discovery pursuant to Rule 56(f), along with supporting declaration and brief. The Commonwealth also filed a brief in opposition to HHS's motion for summary judgment which was also included in its brief in support of its Rule 56(f) motion. Both sides filed reply briefs, and pursuant to the order of court dated October 19, 2006, the Commonwealth filed a supplemental brief in opposition to HHS's motion for summary judgment and in support of its Rule 56(f) motion on October 25, 2006. Thus, the pending motions have been fully briefed and are ripe for disposition.

### C. Analysis

FOIA was enacted by Congress for the purpose of "facilitat[ing] public access to Government documents." Davin, 60 F.3d at 1049 (quoting U.S. Dep't of State v. Ray, 502 U.S. 164, 173, 112 S.Ct. 541, 116 L.Ed.2d 526 (1991)). Consistent with the purpose of creating an expedient mechanism for disseminating information and holding government agencies accountable, FOIA directs government agencies to promptly produce any requested materials unless that information is exempt from disclosure pursuant to one of the nine exemptions enumerated in the FOIA statute, 5 U.S.C. § 552(b)(1)-(9). *Id.* (citing Coastal States Gas Corp. v. Dep't of Energy, 644 F.2d 969, 974 (3d Cir.1981) (quoting S.Rep.No. 813, 89th Cong., 1st Sess. 3 (1965)). Thus, the Supreme Court has held that FOIA "creates a strong presumption in favor of disclosure." *Id.* (citing Dep't of Air Force v.

Rose, 425 U.S. 352, 361, 96 S.Ct. 1592, 48 L.Ed.2d 11 (1976)). To this end, FOIA mandates that the district court review *de novo* the agency's decision to withhold requested information. *Id.* (citing 5 U.S.C. § 552(a)(4)(B)); see also McDonnell v. United States, 4 F.3d 1227, 1241 (3d Cir.1993) (citing § 552(a)(4)(B)). The burden of demonstrating that a particular exemption applies falls squarely on the agency. Davin, 60 F.3d at 1049; McDonnell, 4 F.3d at 1241. In addition, the statute requires the agency to disclose "[a]ny reasonably segregable portion of a record ... to any person requesting such record after deletion of the portions which are exempt under [section 552(b)]." 5 U.S.C. § 552(b).

Because "the review of FOIA cases is made difficult by the fact that the party seeking disclosure does not know the contents of the information sought and is, therefore, helpless to contradict the government's description of the information or effectively assist the trial judge," the reviewing court generally will require the government agency to prepare a *Vaughn* index and supporting affidavits to ensure a meaningful adversarial process. Davin, 60 F.3d at 1049 (citing Ferri v. Bell, 645 F.2d 1213, 1222 (3d Cir.1981), modified 671 F.2d 769 (3d Cir.1982)); McDonnell, 4 F.3d at 1241 (citing King v. U.S. Dep't of Justice, 830 F.2d 210, 217-18 (D.C.Cir.1987)). In this regard, the Third Circuit endorsed the following observation of the United States Court of Appeals for the District of Columbia Circuit in *King*, *supra*:

\*6 The significance of agency affidavits in a FOIA case cannot be underestimated. As, ordinarily, the agency alone possesses knowledge of the precise content of documents withheld, the FOIA requester and the court both must rely upon its representations for an understanding of the material sought to be protected. As we observed in *Vaughn v. Rosen*, "[t]his lack of knowledge by the party seeing [*sic*] disclosure seriously distorts the traditional adversary nature of our legal system's form of dispute resolution," with the result that "[a]n appellate court, like the trial court, is completely without the controverting illumination that would ordinarily accompany a lower court's factual determination." Even should the court undertake in camera inspection of the material—an unwieldy process where hundreds or thousands of pages

are in dispute”[t]he scope of the inquiry will not have been focused by the adverse parties....”

Affidavits submitted by a governmental agency in justification for its exemption claims must therefore strive to correct, however, imperfectly, the asymmetrical distribution of knowledge that characterizes FOIA litigation. The detailed public index which in *Vaughn* we required of withholding agencies is intended to do just that: “to permit adequate adversary testing of the agency’s claimed right to an exemption,” and enable “the District Court to make a rational decision whether the withheld material must be produced without actually viewing the documents themselves, as well as to produce a record that will render the District Court’s decision capable of meaningful review on appeal.” Thus, when an agency seeks to withhold information, it must provide “a relatively detailed justification, specifically identifying the reasons why a particular exemption is relevant and correlating those claims with the particular part of a withheld document to which they apply.”

McDonnell, 4 F.3d at 1241 (quoting King, 830 F.2d at 218-19) (footnotes omitted). The Court of Appeals in *King* further opined: Specificity is the defining requirement of the *Vaughn* index and affidavit; affidavits cannot support summary judgment if they are “conclusory, merely reciting statutory standards, or if they are too vague or sweeping.” To accept an inadequately supported exemption claim “would constitute an abandonment of the trial court’s obligation under the FOIA to conduct a *de novo* review.”

830 F.2d at 219 (footnotes omitted).

In the case at bar, HHS has filed its *Vaughn* indices and supporting declarations, identifying what it maintains are all of the materials responsive to the Commonwealth’s FOIA requests. HHS submits that its supporting documentation establishes that its search for responsive materials to the Commonwealth’s FOIA requests was reasonable, it released all reasonably segregable, non-exempt information, and that it properly withheld the challenged materials under Exemption (b)(5). Accordingly, HHS submits that it is entitled to summary judgment in its favor.

\*7 In opposition, the Commonwealth submits that the

search affidavits submitted by HHS are deficient on virtually all of the requirements established by the courts for adequate search affidavits and therefore HHS has failed to carry its burden on the adequacy of the search. In addition, the Commonwealth argues that HHS’s affidavits are deficient in that they fail to provide any details regarding the process used to determine that all reasonably segregable factual material has been released and/or to explain why the materials withheld are not reasonably segregable. The Commonwealth contends that Bate-stamped number 545 in the *Vaughn* Index evidences bad faith on the part of HHS with regard to its representation that all reasonably segregable material has been released. Finally, the Commonwealth argues that HHS has not met its burden of proof with regard to the claimed exemptions from disclosure, as most of the entries in the *Vaughn* index have the same conclusory, boilerplate language supporting the claimed exemption and little factual detail is supplied to show why a particular exemption applies to particular documents. In light of these infirmities, the Commonwealth contends that HHS’s motion for summary judgment should be denied and that it should be allowed to conduct limited discovery to flesh out the deficiencies in the HHS submission and to establish a full record for disposition by the Court.

According to the Commonwealth, the key to resolving HHS’s motion for summary judgment is to determine whether the *Vaughn* index and supporting declarations provide an “adequate factual basis” to grant the motion. In order to make this determination, the Commonwealth contends that this Court must answer the following four questions:

1. Do the search affidavits provide an adequate factual basis to establish the reasonableness of the search for documents;
2. Do the *Vaughn* index and affidavits provide an adequate factual basis to show that HHS released all segregable factual material in the withheld documents;
3. Do the *Vaughn* index and affidavits provide an adequate factual basis to establish the claimed exemptions from disclosure in the withheld documents; and
4. If the HHS materials are deficient, is [the Commonwealth] entitled to discovery.

See Pl.’s Br. in Opp’n to HHS’ Mot. for Summ. J. and

in Supp. of its Rule 56(f) Mot. (Doc. Nos. 15 & 16). The Commonwealth submits that the answers to the first three questions must be in the negative, and therefore, it is entitled to discovery, *i.e.*, the fourth question must be answered in the affirmative. Each of these arguments is addressed *seriatim* below.

### 1. Adequacy of Search

Generally, the courts apply a reasonableness standard to determine the adequacy of an agency's search for requested documents, which requires the agency to demonstrate that the search it conducted was "reasonably calculated to uncover all relevant documents." Moore v. Aspin, 916 F.Supp. 32, 35 (D.D.C.1996) (citing Miller v. U.S. Dep't of State, 779 F.2d 1378, 1383 (8th Cir.1985)); *see also* Williams v. U.S. Dep't of Justice, No. 05-2928, 2006 U.S.App. LEXIS 10493, \*4 (3d Cir. Apr. 26, 2006) (citing Oglesby v. U.S. Dep't of Army, 920 F.2d 57, 68 (D.C.Cir.1990)) (agency is obligated to conduct a reasonable search for responsive records); Steinberg v. U.S. Dep't of Justice, 23 F.3d 548, 551 (D.C.Cir.1994) (citing Weisberg v. U.S. Dep't of Justice, 745 F.2d 1476, 1485 (D.C.Cir.1984)) (adequacy of search is judged by a standard of reasonableness). Stated another way, this standard requires the agency to "show that it made a good faith effort to conduct a search for the requested records, using methods which reasonably can be expected to produce the information requested." Moore, 916 F.Supp. at 35 (citing Oglesby, 920 F.2d at 68). However, the reasonableness standard does not mandate a detailed examination of every document maintained by the agency or that the agency search every record system. *Id.* Rather, all that is required is that the search be reasonably calculated to reveal the records sought by the requester. *Id.*; Steinberg, 23 F.3d at 551.

\*8 An agency can satisfy its burden of establishing reasonableness by providing reasonably detailed affidavits, submitted in good faith, "setting forth the search terms and the type of search performed, and averring that all files likely to contain responsive materials (if such records exist) were searched[.]" <sup>FN22</sup> Oglesby, 920 F.2d at 69; Steinberg, 23 F.3d at 551 (citing Weisberg, 745 F.2d at 1485); Miller, 779 F.2d

at 1383 (citing Goland v. Cent. Intelligence Agency, 607 F.2d 339, 352 (D.C.Cir.1978)); Williams, 2006 U.S.App. LEXIS 10493, at \*4-5 (citing Valencia-Lucena, 180 F.3d at 326). Once the agency has met its burden of showing the search was reasonable, the burden then shifts to the requestor to rebut that evidence by demonstrating that the search was not conducted in good faith. Miller, 779 F.2d at 1383 (citing Weisberg v. U.S. Dep't of Justice, 705 F.2d 1344, 1351 (D.C.Cir.1983)). Mere speculation on the requestor's part that uncovered documents may exist will not suffice to rebut the agency's good faith reasonable search. Steinberg, 23 F.3d at 552 (citing Safe-Card Serv., 926 F.2d at 1201).

<sup>FN22</sup> An affidavit describing in general how the agency processed the FOIA request does not satisfy the reasonableness standard. Steinberg, 23 F.3d at 552-52 (citing Weisberg v. U.S. Dep't of Justice, 627 F.2d 365, 371 (D.C.Cir.1980)). The agency affidavits must state which files were searched and by whom, must contain facts showing a systematic approach to document location, thereby providing sufficiently specific information to enable the requestor to challenge the search process engaged in by the agency. *Id.* at 552.

#### *a. Declarations Submitted by HHS*

To satisfy its burden of establishing the adequacy of the search, HHS has produced declarations from the following individuals: Robert Eckert, Katherine Hooten, Diane J. Diggs, Frank T. Connors, and Michael S. Marquis. In asking the Court to deny summary judgment on the adequacy of the search, the Commonwealth submits that these declarations fail to describe in the required detail the files that were searched, by whom, the search terms used, and/or the structure of the agencies' filing systems. Therefore, the Commonwealth argues, the declarations do not describe a systematic approach to document location, nor do they provide sufficient factual information to afford it a meaningful opportunity to contest the search and to allow the district court an adequate factual foundation for judicial review. In support of this argument, the Commonwealth relies primarily on

*Davin and Ogelsby, supra*, and on *Church of Scientology of California v. IRS*, 792 F.2d 146 (D.C.Cir.1986).

On the other hand, HHS contends that its declarations provide sufficient detail regarding the scope and method of the searches conducted, in that the declarants describe the offices to which each request was referred, provide a description of the office, explain why a particular request was referred to a specific office, provide the location of the responsive documents and/or the type of files where the records were maintained. In addition, HHS argues that the declarants also state that all files likely to contain responsive documents were searched. In support of its argument, HHS cites *Perry v. Block*, 684 F.2d 121 (D.C.Cir.1982), and *Judicial Watch, Inc. v. Food & Drug Admin.*, 407 F.Supp.2d 70 (D.D.C.2005), for the proposition that in responding to FOIA requests, an agency is not required to “set forth with meticulous documentation the details of an epic search for the requested records.” *Perry*, 684 F.2d at 126. Rather, HHS argues that all it is required to do is provide “affidavits that explain in reasonable detail and scope the method of the search conducted by the agency.” *Lechliter v. Rumsfeld*, No. 05-4381, 182 Fed. Appx. 113, 116, 2006 WL 1506717, at \*2 (3d Cir. June 1, 2006) (quoting *Perry, supra*). <sup>FN23</sup> Moreover, HHS contends it has disclosed over 900 pages of responsive materials in this case, demonstrating that it searched the appropriate offices, and cites in support thereof, the district court’s decision in *Commw. of Pa. v. U.S. Dep’t of Health & Human Serv.*, 623 F.Supp. 301, 304 (M.D.Pa.1985) (the “1985 case”), which involved a similar FOIA matter. HHS further argues based on the 1985 case, that the Commonwealth in this case has not identified any “blocks of requested information or documents which appear to be missing and which might be discovered by further search of different offices.” *Id.* at 304. Accordingly, HHS submits the Commonwealth’s arguments lack merit and are insufficient to raise a material question of fact regarding the adequacy of the search.

<sup>FN23</sup> In *Lechliter*, the Court of Appeals held that affidavits from employees in the offices determined to be the only ones likely

to possess responsive documents, which indicated in detail their methods for filing documents, described the various files that they searched, and certified that they searched all records systems likely to contain responsive material, were sufficiently detailed to establish that the search was adequate and “reasonably calculated to uncover all relevant documents.” <sup>182 Fed. Appx. at 115-16, 2006 WL 1506717 at \*2</sup> (quoting *Ogelsby*, 920 F.2d at 68).

\*9 With these arguments in mind, the Court now turns to a review of the supporting declarations.

*Declaration of Robert Eckert* <sup>FN24</sup>

<sup>FN24</sup> HHS actually produced two declarations of Robert Eckert: The first one dated April 12, 2006 (“Eckert Decl. I”) addresses the search undertaken pursuant to the five FOIA requests submitted by the Commonwealth. The second declaration of Robert Eckert dated June 19, 2006 (“Eckert Decl. II”) was submitted in response to the Commonwealth’s brief in opposition to HHS’s motion for summary judgment, and addresses the segregability issue discussed *infra* in Part 2.

Robert Eckert is the Director of the Freedom of Information/Privacy Acts (“FOI/PA”) Division, Office of the Assistant Secretary for Public Affairs, Department of HHS. In essence, Eckert is the Freedom of Information Officer for HHS. (Eckert Decl. I at ¶ 1.) As such, his duties include responding to FOIA requests and determining whether to release or withhold records or portions of records in accordance with FOIA and HHS regulations. (*Id.* at ¶ 2.) Upon receipt of the five FOIA requests submitted by the Commonwealth, Eckert forwarded the requests to various offices and divisions within HHS, specifically OIG, ACF and CMS, because the requests sought records from these offices and therefore these offices were reasonably likely to possess responsive documents. (*Id.* at ¶¶ 6-10.) Eckert’s office responded to all five requests, releasing approximately 830 pages of documents and withholding 298 pages pur-

suant to Exemption (b)(5), and withholding small portions of 260 pages under Exemptions (b)(4) and (b)(6). (*Id.* at ¶ 13.) Subsequently, Eckert's office released an additional 94 pages of documents. (*Id.* at ¶ 16.) Eckert further stated that there were no other reasonably likely locations for responsive documents. (*Id.* at ¶¶ 6-10.) Eckert does not provide any other information regarding the search for responsive documents.

#### *Declarations of Katherine Hooten*

HHS produced two declarations from Katherine Hooten. The first one is dated January 13, 2006 ("Hooten Decl. I") and is attached as Exhibit D to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Katherine Hooten is the Freedom of Information Specialist for ACF and her duties include assembling ACF documents and recommending whether ACF documents should be released or withheld, and identifying corresponding exemptions if withholding is recommended. (Hooten Decl. I at ¶ 1.) Hooten explained that pursuant to a telephone conference she had on July 18, 2005 with counsel for the Commonwealth, Jason Manne, she referred his request in Case No.2005-0952-FW to the Office of Family Assistance ("OFA") and Administration for Children, Youth and Families ("ACYF"). (*Id.* at ¶ 6.) Both offices reported that they did not have any records responsive to the Commonwealth's request. (*Id.*) However, neither office indicated who conducted the search, the search terms used, or identified the particular files searched.

Hooten further explained that she forwarded the Commonwealth's request in Case No.2005-0951-MB to ACYF and HHS Region III, because ACYF is primarily responsible for administering federal child welfare programs and HHS Region III includes the State of Pennsylvania, and therefore, any agreements between ACF and OIG regarding review of Pennsylvania's Title IV-E claims were probably located there. (*Id.* at ¶ 8.) Both locations forwarded responsive documents, some of which were redacted to withhold personal, identifiable information of children in the foster care system. (*Id.*) No other details were provided as to who conducted the search, the

search terms used, or identified the particular files searched. Finally, Hooten stated there were no other likely locations for responsive documents. (*Id.*)

\*10 Hooten next explained that she forwarded the Commonwealth's FOIA request in Case No.2005-1000-RE to ACYF and HHS Region III, because these offices were likely locations of records pertinent to the decision to audit Pennsylvania's title IV-E program. (*Id.* at ¶ 10.) The results of the search located the same documents retrieved in response to the FOIA request in Case No.2005-0951-MB which were forwarded to Eckert. (*Id.*) No other details were provided as to who conducted the search, the search terms used, or identified the particular files searched. Finally, Hooten stated there were no other responsive documents or likely locations for responsive documents. (*Id.*)

In response to the Commonwealth's argument in opposition that Hooten's declaration fails to explain how the searches were conducted, HHS filed the supplemental declaration of Katherine Hooten dated June 21, 2006 ("Hooten Decl. II") (attached as Exhibit J to HHS's Reply Memorandum in Support of its Motion for Summary Judgment and in Opposition to Plaintiff's Rule 56(f) Motion) (Doc. No. 17)). In her supplemental declaration, Hooten provides information regarding who conducted the searches and the files searched in response to the FOIA requests in Case Nos.2005-0952-FW and 2005-0951-MB. In particular, as to the FOIA request in Case No.2005-0952-FW for interagency agreements between OIG and ACF and OIG and CMS, Hooten states that the searches were conducted by a "Program Analyst" within OFA; the "Team Leader for Audit Liaison/Debt Management Team, Division of Financial Integrity, Office of Financial Services, Office of Administration/ACF"; and within ACYF, a "Program Manager in Child Welfare of Region III," a "Policy Specialist," and the "Director of Program Implementation." <sup>FN25</sup> (Hooten Decl. II at ¶ 4.) The program analyst with OFA searched OFA's Program Policy Files, which include the Intranet policy file and the paper program files and contain all of the documents in OFA, for any agreements between OIG and ACF regarding audits of ACF programs. The program analyst also consulted with the Director of

Division of State TANF Policy and they agreed that if any agreement existed it would be located in the Office of Administration. The Team Leader then searched the OIG Website for work plans for fiscal years 2006, 2005 and 2004, without locating any of the requested interagency agreements. Within ACYF, the program manager, policy specialist, and director of program implementation searched all electronic and paper files for any agreements between OIG and ACF regarding audits of ACF programs. Hooten then indicated that there were no other likely locations for responsive documents to the FOIA Request in Case No.2005-0952-FW.

FN25. Hooten does not specifically identify the searchers by name.

The Commonwealth submits that Hooten's supplemental declaration is still deficient with regard to the June 29, 2005 FOIA request for certain interagency agreements with OIG (Case No.2005-0952-FW), as Hooten fails to list the specific files searched or the search terms used, fails to describe the structure of the agency's file systems, and therefore, the declaration fails to provide evidence of a systematic approach to document location. Specifically, the Commonwealth takes issue with Hooten's failure to explain (1) why she limited her search to OFA when the FOIA request covered all programs with ACF, and (2) why it was reasonable for HHS to search OFA Program Policy files when looking for intra-agency agreements which would more likely be found in administrative type files. The Commonwealth further argues that Hooten's assertion that the OFA Intranet policy file and paper program files contain all the documents in OFA fails to take into account any files maintained by individual employees, such as correspondence files and administrative files. Next, although it was determined by the OFA program analyst and Director of Division of State TANF Policy that the Office of Administration was the likely location for any intra-agency agreements, the Commonwealth notes that the team leader does not appear to have searched the files at the Office of Administration, but rather, this unnamed individual searched the "OIG Website for work plans for Fys 2006, 2005, and 2004." The Commonwealth takes issue with both the failure to search the files of the Office of Admin-

istration and Hooten's failure to explain why it is reasonable to search for intra-agency agreements on a website containing work plans, when intra-agency agreements are internal documents that would not ordinarily be publicly posted.

\*11 As to the FOIA request in Case Nos.2005-0951-MB and 2005-1000-RE for any agreements or discussions between, and any decisions by, ACF, David Lett, and/or all ACF staff and OIG, regarding a review or audit of Pennsylvania's Title IV-E claims/programs, Hooten avers in her supplemental declaration that the searches were conducted within ACYF by "several Policy Specialists" and the "Director of Program Implementation"; and within Region III, by a "Program Manager in Child Welfare", a "Grants Officer", and a "Program Specialist in Child Welfare." FN26 (Hooten Decl. II at ¶ 5.) According to Hooten, the files searched by these individuals consisted of "electronic and paper files" within ACYF; "Region III's electronic and paper Title IV-E files"; the "Child Welfare Unit's Title IV-E official program files for Pennsylvania (which contain letters and reports by year);" the "individual electronic files for any emails or reports involving Pennsylvania Title IV-E information;" and the "Regional Office's grants management files for Pennsylvania's Title IV-E program." (*Id.*)

FN26. Hooten does not specifically identify the searchers by name.

The Commonwealth contends that Hooten's supplemental declaration does not evidence a systematic approach to the search conducted by the unnamed policy specialists and the director of program implementation within ACYF because it states only that these unnamed individuals searched unspecified electronic and paper files. Moreover, the Commonwealth contends Hooten fails to provide the search terms used, denote which files were searched, or explain the structure of agency filing system, and fails to indicate whether the files of the individuals involved with Pennsylvania's OIG audits were searched. With regard to the searches conducted within Region III by an unnamed program manager, grants officer and program specialist, the Commonwealth again takes issue with Hooten's failure to specify the search terms

used or explain the structure of the agency files within Region III. In addition, the Commonwealth notes Hooten's supplemental declaration does not indicate that individual employees' *paper* files were searched and withholds the names of the individuals whose electronic files were searched, thereby precluding the Commonwealth from determining whether HHS searched the files of all individuals it knows were involved with the OIG audits.

*Declaration of Diane J. Diggs*

HHS produced one declaration from Diane J. Diggs, dated December 7, 2005 ("Diggs Decl.") which is attached as Exhibit E to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Diane Diggs is the Freedom of Information Specialist for the Office of Secretary, Office of Inspector General, Department of HHS, and her duties include assembling OIG documents in response to a FOIA request and recommending whether OIG documents should be released or withheld and identifying corresponding FOIA exemptions if withholding is recommended. (Diggs Decl. at ¶ 1.) When she receives a FOIA request from HHS's FOI/PA Division, Diggs stated that she logs it into her database. (*Id.* at ¶ 2.) Diggs then forwards the request to the component within OIG, including OIG regional offices, which she believes may have responsive documents. (*Id.* at ¶ 3.) All five FOIA requests were forwarded to Diggs for processing. (*Id.* at ¶ 4.) With regard to all five FOIA requests, Diggs determined that the Office of Audit Services ("OAS") within OIG was the likely location to have responsive documents because OAS is responsible for: (1) the performance of audits relative to ACF and CMS programs; (2) conducting audits of HHS programs and grantees, including Title IV-E audits; (3) all ongoing audits by OIG of Title IV-E programs; and (4) policy decisions regarding whether a HHS program or grantee should be audited by the OIG. (*Id.* at ¶¶ 6, 8, 10, 11, 13.) Therefore, Diggs forwarded all five FOIA requests to OAS. Documents responsive to all five FOIA requests were located and retrieved from the records maintained in the Audit Office Program Files, photocopied and sent to HHS's FOI/PA Division. (*Id.*) No further information regarding the search is provided. Diggs further stated that there were no other likely locations for respons-

ive records. (*Id.*)

\*12 In response to Digg's declaration, the Commonwealth argues that she fails to explain or otherwise identify the "Audit Office Program Files" and her declaration is uninformative regarding the search methodology.

*Declarations of Frank T. Connors*

HHS produced two declarations from Frank T. Connors. The first one is dated April 13, 2006 ("Connors Decl. I") and is attached as Exhibit F to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Frank Connors is the Program Analyst for OAS, Office of Inspector General, Department of HHS, and his duties include reviewing FOIA requests, coordinating searches for responsive documents within OAS, and assembling OAS documents for submission to OIG. (Connors Decl. I at 1.) When he receives a FOIA request from OIG, Connors stated that he logs it into his database. (*Id.* at ¶ 4.) Connors received all five FOIA requests from Diane Diggs. (*Id.* at ¶ 5.) With regard to these requests, Connors essentially identifies by title the individuals within OAS, Region III, Grants and Internal Activities ("GIA") Division, and the Office of Counsel to the Inspector General ("OCIG"), with whom he consulted and/or referred the document requests, and explains why these offices/divisions are likely to have any responsive documents. Connors goes on to state whether these individuals located any responsive documents after conducting a search. However, other than indicating that the responsive records were maintained in the "Audit Office Program Files," no other information is given regarding the search terms used, the structure of the agency's file system, or the names of the specific files searched.

In response to the Commonwealth's brief in opposition challenging the sufficiency of Connors' first declaration as completely lacking any details regarding the search terms or methodology used, and the structure of the agency's filing system, HHS filed the supplemental declaration of Frank T. Connors dated June 21, 2006 ("Connors Decl. II") (attached as Exhibit K to the reply memorandum in support of HHS's motion for summary judgment and opposition to

Plaintiff's Rule 56(f) motion (Doc. No. 17)). In his supplemental declaration, Connors first explains that the files in OAS are known simply as "program audit files" or "audit work files." (Connors Decl. II at ¶ 4.) He then goes on to explain, in some detail, the search process employed for the first FOIA request dated June 29, 2005 (Case No.2005-0952-FW). Connors consulted with a senior auditor within OAS who conducted a search of paper and electronic work files for any inter-agency agreements between OIG and ACF regarding the performance of audits going back six years from 2005. (Connors Decl. II at ¶ 5.) Connors also consulted with other staff members and he details the searches conducted by these individuals regarding the second, third and fourth items in this FOIA request.

With regard to OAS's processing of the second FOIA requests dated June 29, 2005 (Case No.2005-0951-MB), Connors explained that a Supervisory Auditor within the GIA Division, a Supervisory Auditor within Region III, and a senior attorney within the OCIG searched paper and electronic audit work files for the period 1997-2002 for all documents, including e-mail, file notes, meeting notices, and correspondence, evidencing or discussing any agreement between ACF, its Regional Administrator, David Lett, and OIG relative to a review of Pennsylvania's Title IV-E claims. (*Id.* at ¶ 6.) Connors further stated that the searches conducted by the Supervisory Auditors at GIA and Region III, and the senior attorney at OCIG located responsive documents maintained in paper and electronic audit work files and these documents were forwarded to him in paper form. (*Id.*)

\*13 With regard to the third FOIA request dated June 30, 2005 (Case No.2005-0953-RE) requesting all documents relating to all child eligibility review instruments used by OIG auditors in ongoing or completed audits of Title IV-E maintenance payments made by States and local governments, Connors explained that a Supervisory Auditor within GIA searched all paper and electronic audit work files for responsive documents and did not locate any documents within the scope of the request. (*Id.* at 7.) Supervisory Auditors within Regions I, II and III also searched all paper and electronic audit work files for

documents responsive to the third FOIA request and located and submitted all responsive documents. (*Id.*) Supervisory Auditors from Regions IV, V and IX each searched paper and electronic audit work files within their respective offices but had no responsive documents. (*Id.*) A senior attorney from OCIG also searched paper and electronic audit work files for documents responsive to the third FOIA request but did not locate any documents within the scope of the request. (*Id.*)

With regard to the fourth FOIA request dated June 30, 2005 (Case No.2005-0954-mb), Connors explained a Supervisory Auditor provided him with the requested list of all ongoing audits of Title IV-E programs in paper form, from an electronic audit work file. (*Id.* at ¶ 8.)

As to the fifth FOIA request dated July 19, 2005 (Case No.2005-1000-RE), requesting all documents post 1997 relating to decisions by ACF and OIG to subject Pennsylvania's Title IV-E program to audit by OIG, including discussions by ACF staff, ACF Regional Administrator David Lett, or OIG staff regarding same, and the decision of OIG to include a cost analysis of Title IV-E provider rates in its audit of Pennsylvania's Title IV-E program, Connors stated that a Supervisory Auditor within GIA, a Supervisory Auditor within Region III, and a senior attorney within OCIG all searched paper and electronic audit work files from 1997 to present for responsive documents. (*Id.* at ¶ 9.) Connors further stated that all three individuals located and forwarded responsive documents maintained in paper and electronic audit work files to Connor in paper form. (*Id.*)

However, in its supplemental reply brief, the Commonwealth challenges Connors' supplemental declaration as still devoid of either a description of the search terms used to search these "electronic" or "paper" files, or the names of the particular folders within the program audit files or audit work files which were searched. The Commonwealth also contends that the search is deficient in that none of the individuals with whom Connors consulted regarding the search for responsive records indicated that the personal filing systems and computer hard drives of individual employees were searched, or that either

the "program audit files" or "audit work files" contained the files of any individuals, including the ACF staff and David Lett.

*Declaration of Michael S. Marquis*

\*14 Finally, HHS presented one declaration from Michael S. Marquis dated January 24, 2006 ("Marquis Decl."), which is attached as Exhibit G to HHS's memorandum of law in support of its motion for summary judgment (Doc. No. 9). Michael Marquis is the Director of the Freedom of Information Group ("FIG"), Office of Strategic Operations and Regulatory Affairs, Centers for Medicare and Medicaid Services ("CMS"), U.S. Department of HHS, and as such, is the Records Access Officer for CMS. Marquis's duties include responding to FOIA requests for records of CMS, determining whether to release or withhold records or portions of records, and overseeing all FOIA activities within CMS. (Marquis Decl. at ¶ 1.) Marquis received from HHS FOI/PA Division one FOIA request dated June 29, 2005 for inter-agency agreements between OIG and CMS for the performance of audits relative to CMS programs (Case No.2005-0952-FW). (*Id.* at ¶ 4.) In his declaration, Marquis identifies the offices/divisions likely to possess responsive documents,<sup>FN27</sup> and the basis for this conclusion, *i.e.*, generally the relationship between the office/division and the documents requested. Marquis does not provide any detail regarding the types of files searched or the structure of the referred offices' file systems. Marquis does indicate that the searches conducted by the offices to whom he forwarded the FOIA request resulted in the retrieval of approximately 174 pages of responsive records from OAGM and OFM, which were forwarded to HHS's FOI/PA Division. (*Id.* at ¶¶ 7, 10.) Marquis further stated that there were no other likely locations for responsive documents and all located responsive documents were provided to HHS's FOI/PA Division. (*Id.* at ¶¶ 9, 12.)

<sup>FN27</sup>. The offices/divisions to which Marquis referred the FOIA request include: Office of Strategic Operations and Regulatory Affairs ("OSORA"); Office of Acquisition and Grants Management ("OAGM"); the Center for Beneficiary Choices ("CBC");

the Center for Medicaid and State Operations ("CMSO"); and CMS's Office of Financial Management ("OFM"). (Marquis Decl. at ¶¶ 5, 6, 8.)

The Commonwealth objects to the sufficiency of the Marquis declaration, for essentially the same reasons given as to the four previous declarations: Failure to identify the specific files searched and to explain the manner in which the search was conducted.

Reviewing the declarations of Eckert, Hooten, Diggs, Connors, and Marquis, the following conclusions can be drawn regarding the adequacy of the searches. Based on the information requested in the five FOIA requests, it was determined by the declarants that responsive materials were most likely located within the following agencies, offices, and/or divisions of HHS: ACF, and its offices/divisions OFA, ACYF; the regional offices of HHS Regions I, II, III, IV, V, and IX; OIG and its offices/divisions OAS, GIA, and OCIG; and CMS and its offices/divisions OSORA, OAGM, CBC, CMSO, and OFM. Collectively, the declarants adequately explained how and why a particular FOIA request was referred to a particular agency/office/division. The declarants also stated that these offices/divisions were searched because they were the likely locations for records responsive to the five FOIA requests submitted by the Commonwealth. In addition, the declarants indicated the filing systems or types of files searched, *i.e.*, "Audit Office Program Files," "Program audit files," or "audit work files," and within these files, whether both paper and/or electronic files were searched, and in some cases, whether individual files maintained by employees/staff were searched. Moreover, the Court notes that through their respective positions within HHS and its offices and divisions, the declarants are charged with the responsibility of processing all FOIA requests referred to HHS or their agency/office/division, and therefore, are deemed to have some expertise in processing FOIA requests. Indeed, the Commonwealth has not pointed to any reason or basis for a contrary conclusion. Accordingly, the Court finds the declarations provide sufficient factual detail to show that the searches were reasonably calculated to uncover the records requested by the Commonwealth and indeed, HHS produced approximately 925 documents (260

pages of which contained redactions of personal information pursuant to Exemptions (b)(4) and (b)(6)), thereby demonstrating that HHS searched the appropriate offices for responsive documents. Inasmuch as the Commonwealth has failed to provide any rebuttal evidence showing the searches were not conducted in good faith, the Court finds HHS has met its burden regarding the adequacy of the search. Therefore, the Court finds that HHS is entitled to summary judgment with regard to the adequacy of the search. <sup>judg-</sup><sub>FN28</sub>

<sup>FN28</sup>. The Court finds no merit to the Commonwealth's argument that HHS's failure to specifically identify the names of the employees and/or staff who maintained individual files and to indicate whether these particular files were searched precludes the Commonwealth from a meaningful opportunity to contest the adequacy of the search. HHS provided the Commonwealth with approximately 925 pages of documents. Certainly, the Commonwealth has had an adequate opportunity to review these documents and determine whether there appear to be any missing documents from individuals with whom the Commonwealth has dealt with regard to the Title IV-E audits and which the Commonwealth has reason to believe exist and were not produced. Yet, in its submissions to this Court, the Commonwealth does not identify any individuals whose records appear to be missing. Accordingly, the Commonwealth's argument amounts to nothing more than speculation as to what types of records might theoretically exist based on its prior dealings with HHS, rather than on any actual evidence of overlooked materials. Such speculation is insufficient to raise an issue of material fact with regard to the adequacy of the search. *Steinberg*, 23 F.3d at 552 (citing *SafeCard*, 926 F.2d at 1201); *Lee*, 235 F.R.D. at 288 (citing *SafeCard*, *supra*).

## 2. Reasonably Segregable Factual Material

\*15 The Commonwealth also challenges the adequacy of HHS's proof in support of its statement that

it has released all reasonably segregable factual information. First, the Commonwealth argues that HHS's declarations and *Vaughn* indices are legally deficient with regard to the required factual details and explanation necessary to show that all reasonably segregable factual information has been released. In support of this argument, the Commonwealth cites *Krikorian v. Dep't of State*, 984 F.2d 461, 466-67 (D.C.Cir.1993), and *Ruggerio v. U.S. Dep't of Justice*, 257 F.3d 534, 553 (6th Cir.2001). Second, the Commonwealth offers evidence of bad faith on the part of HHS with regard to segregability by pointing to one of the withheld pages for which HHS is claiming an exemption under 5 U.S.C. § 552(b)(5), but which the Commonwealth obtained outside the FOIA request, *i.e.*, Bate-stamped page no. 545. With regard to page no. 545, the Commonwealth argues that there are non-exempt portions of that page which reasonably could have and should have been segregable from the exempt portion and therefore disclosed. HHS counters that based on the supplemental declaration of Robert Eckert and its *Vaughn* indices, it has conducted a satisfactory segregability analysis and released all segregable factual material. For the reasons set forth below, the Court finds the Commonwealth's arguments have substantial merit and recommends summary judgment be denied on this issue.

HHS also has the burden of demonstrating that it has released all reasonably segregable portions of each of the withheld documents or portions of documents, or providing a factual recitation as to why certain materials are not reasonably segregable. *Davin*, 60 F.3d at 1052 (citing 5 U.S.C. § 552(a)(4)(B)). Because the emphasis of FOIA is on *information* rather than documents, an agency cannot base withholding an entire document or page of information simply on a showing that it contains some exempt material. *Mead Data Central, Inc. v. U.S. Dep't of Air Force*, 566 F.2d 242, 260 (D.C.Cir.1977) (emphasis added). In 1974, Congress amended FOIA to specifically incorporate this requirement. See 5 U.S.C. § 552(b) <sup>FN29</sup>. In the District of Columbia Court of Appeals, it has been clearly established that "non-exempt portions of a document must be disclosed unless they are inextricably intertwined with exempt portions." *Mead Data Central*, 566 F.2d at 260 (citations omitted).

FN29, Section 552(b) states in relevant part: “Any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt under [§ 552(b) 1].”

In determining whether the agency has satisfied its burden on segregability, the court must narrowly construe the exemptions with the focus on disclosure. Davin, 60 F.3d at 1052 (citing Wightman v. Bureau of Alcohol, Tobacco & Firearms, 755 F.2d 979, 982 (1st Cir.1985)). A conclusory statement to the effect that the agency has provided the requestor with all reasonably segregable portions of the non-exempt information, without any supporting justification, will not satisfy the agency's burden regarding segregability on summary judgment. Davin, 60 F.3d at 1052; Mead Data Central, 566 F.2d at 261. Rather, the agency must provide a detailed justification for its decision that non-exempt material is not segregable, which includes a description of “what proportion of the information in a document is non-exempt and how that material is dispersed throughout the document.” Mead Data Central, 566 F.2d at 261 (footnote omitted). In determining whether the agency has satisfied its burden of proof regarding segregability, the Court of Appeals in Davin required the agency to “describe the process by which [it] determined that all reasonably segregable material of each of the withheld documents or portions of documents had been released” and to “provide a factual recitation of why certain materials [were] not reasonably segregable.” Davin, 60 F.3d at 1052. The Court of Appeals rejected as wholly conclusory a declaration that was “comprised of assertions that documents were withheld because they contain the type of information generally protected by a particular exemption.” *Id.*

\*16 Moreover, it is of no moment for the agency to argue that this process will cause it to incur significantly increased costs. As the Court of Appeals explained in Mead Data Central, these “burdens may be avoided at the option of the agency ... by immediate disclosure.” 566 F.2d at 261. The Court of Appeals further opined:

Requiring a detailed justification for an agency's decision that non-exempt material is not segregable will

not only cause the agency to reflect on the need for secrecy and improve the adversarial position of FOIA plaintiffs, but it will also enable the courts to conduct their review on an open record and avoid routine reliance on in camera inspection. It is neither consistent with the FOIA nor a wise use of judicial resources to rely on in camera review of documents as the principal tool for review of segregability disputes. See Vaughn I, supra, 484 F.2d at 825-26.... If an agency has provided the description and justification suggested by this opinion, a district court need not conduct its own in camera search for segregable non-exempt information unless the agency response is vague, its claims too sweeping, or there is a reason to suspect bad faith. [Weissman v. CIA ], 565 F.2d 692, at 697-698 [ (D.C.Cir.) 1977].

Mead Data Central, 566 F.2d at 216-62 (footnotes omitted).

In the case at bar, the only declaration submitted initially by HHS to satisfy its burden of proving that all reasonably segregable, non-exempt material was released is that of Robert Eckert (Eckert Decl. I).<sup>FN30</sup> At the end of his first declaration, Eckert states in conclusory fashion that “[a]ll reasonably segregable, non-exempt information has been released. For records withheld in their entirety, there was no reasonably segregable, non-exempt information .” (Eckert Decl. I at ¶ 20.) In response to the Commonwealth's argument in opposition that such a conclusory statement without any explanation is insufficient to satisfy its burden, HHS filed the supplemental declaration of Robert Eckert dated June 19, 2006 (“Eckert Decl. II”) (attached as Exhibit L to HHS's Reply Memorandum in Support of its Motion for Summary Judgment and in Opposition to Plaintiff's Rule 56(f) Motion) (Doc. No. 17)). In his supplemental declaration, Eckert states that he evaluated “each individual piece of information with careful consideration to determine segregability.” (Eckert Decl. II at ¶ 5.) In this regard, Eckert further stated:

FN30. HHS also provided the declarations of Michael Leonard (Exhibit H) and Richard Stern (Exhibit I) in support of its motion for summary judgment with regard to its decision to withhold approximately 202 pages

of responsive documents. However, neither of these declarations addresses the decision-making process and/or justification for finding that “[a]ll reasonably segregable, non-exempt information has been released. For records withheld in their entirety, there was no reasonably segregable, non-exempt information.”

Documents were withheld in full either because all the information contained in the documents was exempt from disclosure or the redaction of exempt material would have left only mere templates or unintelligible or meaningless words and phrases because such non-exempt information was so inextricably intertwined with exempt material. For example, in some instances, what would remain after the redaction of the exempt information would have little or no value, amounting to barely more than the date of the draft or the email transmitting such draft and the names of the parties and the subject line—all information contained in the Vaughn index. In other instances, the withheld material contains confidential communications including facts and materials submitted in confidence to an attorney for purposes of seeking legal advice. In still other instances, the withheld material contains attorney work-product, including both factual and deliberative material, prepared in reasonable anticipation of litigation.

\*17 Eckert Decl. II at ¶ 6. Finally, regarding Bate-stamped page no. 545 which HHS withheld in its entirety but which the Commonwealth was able to obtain outside of the FOIA request, Eckert stated that he made the determination to withhold page no. 545 under the deliberative process privilege of Exemption (b)(5), and still maintains that page no. 545 is exempt as deliberative, even after learning that the Commonwealth possessed a copy of that page. (*Id.* at ¶ 7.) Eckert disclaimed any prior knowledge that the Commonwealth possessed page no. 545 or how the Commonwealth came to possess it. (*Id.*)

The Court finds that HHS's supporting evidence is woefully inadequate on segregability. First of all, the explanation of Robert Eckert paints with too broad a brush—he speaks in general terms, without any identification of the specific pages to which the explanation is said to apply. This approach was specifically

rejected by the Courts of Appeals in *Mead Data Central* and *Davin*, *supra*. In addition, for each page withheld in its entirety, HHS fails to provide a factual recitation as to why the information on that page was not reasonably segregable.

Second, the required explanation also cannot be found in the *Vaughn* indices provided by HHS, despite HHS's representation that its *Vaughn* indices “specify in detail which portions of the documents are discloseable and which are exempt.” See Reply Mem. in Supp. of Defs.' Mot. for Summ. J. & Opp'n to Pl.'s Rule 56(f) Mot. at 8. The “Bases for Exemption” set forth in the *Vaughn* Index assert that the documents were withheld because they contain the type of information generally protected by a particular exemption and, in some instances, provide additional detail regarding the contents of the documents to support application of the privilege claimed. However, none of the “Bases for Exemption” offers any explanation or description of how it was determined that all reasonably segregable, non-exempt portions of the documents were released, or that there was no reasonably segregable, non-exempt information.

HHS counters that under the attorney work-product privilege and attorney-client privilege, the release of segregable factual information is not required, and cites in support of this argument, *Commonwealth of PA.*, 623 F.Supp. at 307 (release of segregable factual information is not required with regard to material appropriately withheld under the attorney work-product privilege). While that may be an accurate statement of the law, HHS must first demonstrate the applicability of the attorney work-product privilege under Exemption (b)(5) to the withheld pages in this case. As explained below, HHS has failed to satisfy its burden of proof in claiming the attorney work-product privilege. Accordingly, to the extent HHS has rested its segregability analysis on the attorney work-product privilege, its analysis is likewise flawed.

Third and finally, the Commonwealth has presented actual evidence of bad faith on the part of HHS relative to segregability. In this regard, the Commonwealth argues that the first paragraph on page no. 545

contains obviously segregable factual background material that was withheld without justification or explanation. Although the *Vaughn* Index describes page no. 545 as containing predecisional opinions and strategy, the Commonwealth submits that in actuality, the page communicates the fact that the Commonwealth rejected a settlement offer, and that OAS “may initiate completion of the review that began in 2000, pursuant to the agreement between ACF and the Office of the Inspector General...” See Pl.’s Br. in Opp’n to HHS’ Mot. for Summ. J. & in Supp. of its Rule 56(f) Mot. at 18 (quoting *Vaughn* Index of Withheld Documents from HHS Release Dated Jan. 5, 2006 for Case Nos. 2005-1000RE and 2005-951MB at 18 (attached as Ex. 9 to Eckert Decl. I).) The Commonwealth contends that this page is clearly a non-exempt, post-decisional document that communicates a decision to another HHS component, and therefore, neither the claimed exemption nor the description in the *Vaughn* Index are supportable.

\*18 The Court finds that the Commonwealth’s point regarding page no. 545 is well-taken. An examination of page no. 545 reveals that the first paragraph <sup>FN31</sup> does indeed contain segregable, non-exempt, factual background information that does not involve predecisional opinions and strategy, as does the third paragraph. <sup>FN32</sup> Moreover, this factual information does not appear to be inextricably intertwined with exempt material, nor does it reveal the deliberative process within ACF, OAS, or OIG. Accordingly, at the very least, the first and third paragraphs of page no. 545 should have been released as segregable, non-exempt factual information. <sup>FN33</sup> The fact that HHS still maintains that page no. 545 is exempt in its entirety as deliberative, after receiving the Commonwealth’s challenge, is troublesome.

<sup>FN31</sup> The first paragraph of page no. 545 states: “Attached is correspondence from the Secretary, Pennsylvania Department of Public Welfare (DPW), that declined acceptance of the Administration for Children and Families’ (ACF) settlement offer pertaining to recovery of overpayments for ineligible recipients in the Title IV-E Foster Care Program for Federal Fiscal Years 1998, 1999, and 2000.” See Exhibit B to Pl.’s Rule 56(f) De-

claration dated June 2, 2006 (Doc. No. 14).

<sup>FN32</sup> The third paragraph of page no. 545 reads as follows: “If you have any questions, please contact me at 215/861-4000, or have your staff contact Michael Rolish, Grants Officer, at (215) 861-4016.” See *id.*

<sup>FN33</sup> Arguably, the only portion of page no. 545 that falls within the deliberative process privilege is the second paragraph, which states: “The Office of Audit Services may initiate completion of the review that began in 2000, pursuant to the agreement between the ACF and the Office of Inspector General, to determine the full extent to which DPW’s claims are ineligible for FFP.” See *id.* This argument is addressed in Part 3, *infra.*

Accordingly, the Court finds that HHS has failed to satisfy its burden of proof with regard to segregability and therefore recommends that summary judgment be denied on this issue.

### 3. Withholding Documents Based on Exemption (b)(5)

In this case, the claimed exemption for the 196 pages of responsive materials in dispute is Exemption (b)(5) of FOIA, which allows a government agency to withhold responsive records to a FOIA request that consist of “inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency[.]” 5 U.S.C. § 552(b)(5). Stated another way, “if a particular document falls within a recognized evidentiary privilege and, hence, would not normally be discoverable by a private party in the course of civil litigation with the agency, then the document likewise falls within the scope of Exemption 5 and is not releasable under the FOIA.” <sup>FN34</sup> *Jordan v. U.S. Dep’t of Justice*, 591 F.2d 753, 772 (D.C. Cir. 1978), *overruled in part on other grounds in Crooker v. Bureau of ATF*, 670 F.2d 1051 (D.C. Cir. 1981) (en banc). This exemption has been construed to encompass three privileges: the deliberative process privilege, the attorney work-product privilege, and the at-

torney-client privilege. See EPA v. Mink, 410 U.S. 73, 85-90, 93 S.Ct. 827, 35 L.Ed.2d 119 (1973) (deliberative process privilege); NLRB v. Sears, Roebuck & Co., 421 U.S. 132, 154, 95 S.Ct. 1504, 44 L.Ed.2d 29 (1975) (attorney work-product privilege); and Mead Data Central, 566 F.2d at 252-55 (attorney-client privilege). All three of these privileges have been asserted by HHS in this case.<sup>FN35</sup>

<sup>FN34</sup>. Although roughly based on discovery principles, exemption (b)(5) differs fundamentally in that a key ingredient for discovery, relevance, plays no part in FOIA cases. Coastal States Gas Corp. v. Dep't of Energy, 617 F.2d 854, 862 (D.C.Cir.1980) (citing EPA v. Mink, 410 U.S. 73, 86, 93 S.Ct. 827, 35 L.Ed.2d 119 (1973)); see also Mead Data Central, 566 F.2d at 252 (citing EPA v. Mink, *supra*).

<sup>FN35</sup>. HHS claims the deliberative process privilege as to all 202 withheld pages, and for 104 of these pages, it is also claiming the attorney-client privilege; it is also claiming the attorney-work product privilege for 133 of the 202 withheld pages.

In support of its motion for summary judgment on the issue of withholding under Exemption (b)(5), HHS argues that it has provided sufficient descriptions for each withholding in its *Vaughn* indices to satisfy its burden on summary judgment to show that the documents or information are exempt from disclosure under Exemption (b)(5). HHS further argues that paragraphs 18 and 19 of Eckert's first declaration, as well as the declarations of Stern and Leonard, underscore that the documents withheld under Exemption (b)(5) generally consisted of drafts, predecisional advice, recommendations, suggestions, opinions, as well as confidential attorney-client communications and attorney work-product concerning an audit of Pennsylvania's foster care program, and therefore, HHS has demonstrated that it reasonably withheld the challenged documents under FOIA Exemption (b)(5).

\*19 The Commonwealth disputes that the *Vaughn* indices and declarations submitted by HHS provide sufficient detail to support the claimed privileges and

therefore argues HHS has failed to carry its burden to entitle it to summary judgment on this issue.

#### *The Attorney-Client Privilege*

The attorney-client privilege is intended to protect "only those disclosures necessary to obtain informed legal advice which might not have been made absent the privilege." Coastal States Gas Corp., 617 F.2d at 862-63 (quoting Fisher v. United States, 425 U.S. 391, 403, 96 S.Ct. 1569, 48 L.Ed.2d 39 (1976)).<sup>FN36</sup> The purpose behind this privilege is to encourage a relationship of trust and free discussion between attorneys and their clients. *Id.* at 862; Mead Data Central, 566 F.2d at 253. Therefore, the application of this privilege is not restricted to communications that are made in relation to litigation or to a particular dispute, but extends to all situations in which an attorney's counsel is sought on a legal matter. Coastal States Gas Corp., 617 F.2d at 862. However, a fundamental prerequisite to assertion of the privilege is the demonstration of "confidentiality both at the time of the communication and maintained since. The burden is on the agency to demonstrate that confidentiality was expected in the handling of these communications, and that it was reasonably careful to keep this confidential information protected from general disclosure." *Id.* at 863. The test applied by the courts in determining confidentiality is "whether the agency is able to demonstrate that the documents, and therefore the confidential information contained therein, were circulated no further than among those members 'of the organization who are authorized to speak or act for the organization in relation to the subject matter of the communication.'" *Id.* (quoting Mead Data Central, 566 F.2d at 253 n. 24). "If the information has been or is later shared with third parties, the privilege does not apply." Mead Data Central, 566 F.2d at 253 (footnote omitted).

<sup>FN36</sup>. There is no question that this privilege applies to agency attorneys and their clients, *i.e.*, the agencies. See, *e.g.*, Coastal States Gas Corp., 617 F.2d at 863; Mead Data Central, 566 F.2d at 252.

One of the measures used to determine confidentiality is the degree of care exhibited in the handling of

the documents. *Coastal States*, 617 F.2d at 864. In this regard, the courts should ask what evidence exists to indicate that the person requesting the advice from the agency attorney had any expectation of confidentiality. *Id.* In *Coastal States*, the court of appeals found there was no evidence in the record from which it could conclude that there was any expectation of confidentiality. In support of its conclusion, the court of appeals noted the agency failed to establish that some attempt had been made to limit disclosure of the confidential documents to appropriate agency personnel, or that it made any attempt at all to protect the confidential communications within the agency, as the agency admitted that it did not know who had access to the documents, and undisputed testimony existed to the effect that in some regions copies of the memoranda were circulated to all area offices, filed and indexed for future reference, relied on as precedent, and used as training materials for new personnel. *Id.* at 863-64.

\*20 In a prior FOIA case between the same parties to the instant litigation, the district court found that HHS failed to establish the confidentiality of the documents for which it was claiming nondisclosure under the attorney-client privilege. In the 1985 case between the Commonwealth and HHS, HHS provided a *Vaughn* index and two affidavits in support of its claimed exemptions for withholding fifteen documents. 623 F.Supp. at 305. The *Vaughn* index in the 1985 case set forth the date, author, recipient, subject matter, length of each document, the circumstances of its preparation, and the exemptions being claimed. The affidavits of two agency attorneys provided greater detail regarding the preparation of the withheld documents, 11 out of 15 of which were claimed to have been generated in preparation for litigation before the Grant Appeals Board. Although the district court found that given the detail of its affidavits and *Vaughn* index, HHS met its burden of providing the Commonwealth with sufficient information to effectively challenge the claimed exemptions for 15 documents, the court nonetheless concluded that HHS had not met its burden of proving the application of the attorney-client privilege to 8 of the withheld documents. *Id.* at 305-06. The district court found that at best, the *Vaughn* index and affidavits

showed only that documents 2-9 were intended to be confidential at the time they were made. *Id.* The district court found lacking any assertion or proof that the matter discussed in the documents remained confidential at the present time, "or that the documents were circulated only to those in the agency authorized to speak or act for the agency on the subject matter of the communications." *Id.* at 306.

In the present action, HHS asserts the attorney-client privilege for 104 of the 196 withheld pages,<sup>FN37</sup> and in support thereof, offers the explanations contained in its *Vaughn* indices supplemented by the declarations of Michael Leonard and Richard Stern. In its *Vaughn* indices, HHS states as the basis for claiming the attorney-client privilege, for almost all of the pages withheld under this privilege, that "in addition," or "further," or "moreover," "the withheld material contains confidential attorney-client communications." This is the only explanation provided in the *Vaughn* indices for 81 of the pages withheld under the attorney-client privilege.<sup>FN38</sup> These 81 pages contain the following Bate-stamp page numbers: 490-91, 499, 500-06, 512, 529, 530, 533, 542, 831, 832, 839, 84-85, 89-90, 92-93, 97, 99-100, 101-02, 103, 104-05, 205-08, 209-11, 212-15, 223-24, 241, 242, 243, 248, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269, 270-71, 280-84, 287-88, 292, and 465. This explanation alone is clearly insufficient to establish the confidentiality of the information contained in the withheld pages.

<sup>FN37</sup> The attorney-client privilege is asserted for the following Bate-stamp page numbers: 490-91, 499, 500-06, 512, 526-28, 529, 530, 533, 538, 539, 542, 584-86, 831, 832, 837, 838, 839, 84-85, 89-90, 92-93, 97, 99-100, 101-02, 103, 104-05, 112, 205-08, 209-11, 212-15, 223-24, 233-35, 241, 242, 243, 248, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269, 270-71, 274-76, 277-79, 280-84, 287-88, 289-91, 292, and 465. In its opening memorandum of law in support of its motion for summary judgment ("HHS's opening memorandum"), HHS includes Bate-stamp page nos. 496, 556, 557, and

833 in the list of pages withheld under the attorney-client privilege. (Doc. No. 9, at page 25) However, an examination of the *Vaughn* indices reveals that the only claimed privilege for page nos. 496, 556, 557, and 833 is the deliberative process privilege. In addition, page nos. 233-35 are not included in HHS's list in its opening memorandum because these pages were added by the Commonwealth in its June 2, 2006 submission which post-dates the filing of HHS's opening memorandum.

FN38. Although the *Vaughn* indices do list the author and recipients of the documents (in most instances), the Court has no way of knowing if these individuals are authorized to act or speak on behalf of the agency on the subject matter of the communication.

For Bate-stamp page numbers 538, 539, 837, 838, and 112, the only explanation given by HHS in its *Vaughn* indices is "In addition, the withheld material contains confidential attorney-client communications pertaining to a legal matter for which client has sought professional advice." For three (3) pages, Bate-stamp page nos. 233-35, no explanation is given in the *Vaughn* index, other than the initial claim that the "withheld material is protected by the ... attorney-client privilege..." Again, these explanations alone are clearly insufficient to establish confidentiality.

\*21 For 15 of the withheld pages under this privilege, Bate-stamp page nos. 526-28, 584-86, 274-76, 277-79, and 289-91, HHS provides the same statement as provided for the above 81 pages, but also adds that "The document is clearly marked as 'CONFIDENTIAL-ATTORNEY/CLIENT PRIVILEGED MEMORANDUM.'" While such a designation on the pages demonstrates the existence of an expectation of confidentiality, it still falls short of the required showing. Just because a document is designated as "CONFIDENTIAL-ATTORNEY/CLIENT PRIVILEGED" does not mean that the Court can assume that the information contained therein was continually maintained as such. HHS asks this Court to make too great of a leap, especially since it bears the burden of proving that the claimed privilege applies.

HHS must meet this burden by providing evidence, either through affidavit or some other means, that established that the particular confidential materials have not been circulated beyond those authorized to speak on its behalf on the subject matter contained in the communication.

The Declaration of Michael Leonard ("Leonard Decl.") fails to add anything to support the application of the attorney-client privilege. Leonard is an attorney in Region III of the Office of the General Counsel (OGC) of HHS and he either authored or received nine (9) of the pages withheld by HHS. (Leonard Decl. at ¶¶ 1, 5.) Leonard addresses the attorney-client privilege claimed for seven (7) of these pages, Bate-stamp page numbers 490-91, 529, 530, and 262-64, in his declaration. However, he does not provide any more information or explanation regarding page numbers 529, 530, and 262-64, than that already contained in the *Vaughn* indices. (Leonard Decl. at ¶¶ 10-12.) For page nos. 490-91, Leonard adds only that he provided input into the draft letter and advice to HHS employees concerning the letter. (*Id.* at ¶ 7.) Leonard's declaration is completely devoid of any proof that there was an expectation of confidentiality or that the materials containing the confidential information were circulated no further than among the employees of HHS who are authorized to speak or act on behalf of it in relation to the subject matter of the communication.

Likewise, the Declaration of Richard Stern ("Stern Decl.") does not add significantly to the explanations provided in the *Vaughn* indices for the attorney-client privilege. Stern is an attorney in the OCIG of the OIG of HHS, and he either authored or received 85 of the pages withheld by HHS. (Stern Decl. at ¶¶ 1, 4-5.) Sixty (60) of these pages were withheld on the basis of the attorney-client privilege. For the following Bate-stamp page numbers, Stern stated merely that the pages contain a confidential exchange of emails between himself and agency attorneys and employees concerning either a draft document to the Commonwealth of Pennsylvania, or an audit of Pennsylvania's Title IV-E Foster Care Program or the Title IV-E audit: 490-91, 831, 832, 84-85, 90-90, 92-93, 101-02, 103, 241, 249-50, 251, 252-53, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269,

270-71, and 292. (*Id.* at ¶¶ 7, 9-11, 14, 16, 21-22, 32, 35-48.) Stern's explanation is simply a reiteration of that given in the *Vaughn* indices. For Bate-stamp page numbers 500-06, 104-05, 112, 209-11, 212-15, 223-24, 242, and 243, Stern stated that the pages contain a confidential legal memorandum, prepared by him to agency attorneys and/or employees regarding the audit of Pennsylvania's foster care claims or its Title IV-E program. (*Id.* at ¶¶ 8, 23-24, 29-31, 33.) Again, Stern's explanation adds nothing to the *Vaughn* indices. Finally, Stern stated that Bate-stamp page numbers 99-100 contain a confidential exchange of emails between himself and an agency attorney and agency employees regarding Title IV-E regulations. (*Id.* at ¶ 20.) Stern's explanation is simply a reiteration of that given in the *Vaughn* indices. However, at the end of his declaration, Stern makes the following statement with regard to all of the pages he authored or received:

**\*22** The documents at issue contain confidential communications from OIG to me as OIG's attorney and vice versa, for the purpose of advising and assisting OIG, and in a few instances, their HHS partner in these activities, ACF, with legal issues. My advice in these communications was advisory in nature and did not represent statements of agency policy or the final agency decision on a particular matter. OIG attorneys provide options and advice to OIG, which the agency can choose to adopt or not, depending on both legal consequences and other policy considerations. *Moreover, both the attorneys and clients who received these communications had a clear expectation that they would remain confidential. Indeed, all e-mail communications from the Office of Counsel to the Inspector General include a warning that they contain information protected by the attorney-client, attorney work product, deliberative process, or other privilege, or protected by Federal confidentiality laws.*

*Id.* at ¶ 49 (emphasis added). Based on Stern's statement in paragraph 49, HHS has offered some evidence of an expectation of confidentiality. However, this offer of proof still falls short of the mark. Despite his statement that all e-mail communications from the Office of Counsel to the Inspector General contain a warning that the information contained therein is pro-

tected by various privileges, there is no indication in the *Vaughn* indices that this warning appears on the emails.<sup>FN39</sup> Moreover, most law firms and corporate and government legal departments include this warning on all of their emails as a matter of course. That does not mean, however that all of the information contained in those emails is confidential, or has continued to remain confidential. At best, Stern's declaration establishes an expectation of confidentiality at the time the document was drafted, but as explained earlier, this alone is not enough to carry HHS's burden. It is clear from the above case law that HHS must also establish that the pages for which it is claiming the attorney-client privilege were not circulated to any persons not authorized to speak on its behalf regarding the subject matter or to third parties. Currently, there is nothing in the record that allows the Court to make this conclusion.

<sup>FN39</sup> Yet, for Bate-stamp page nos. 526-28, 584-86, 274-76, 277-79, and 289-91, HHS's explanation of the attorney-client privilege included the confidentiality designation.

Since HHS bears the burden of proof on the application of a claimed exemption and it has failed to do so based on the attorney-client privilege, HHS will not be entitled to summary judgment on its withholding of the 104 pages unless it demonstrates that these within Exemption (b)(5) for some other reason.<sup>FN40</sup>

<sup>FN40</sup> A great deal of overlap exists between the attorney-client privilege and the deliberative process privilege of Exemption (b)(5), with respect to materials containing legal opinions and advice. *Mead Data Central*, 566 F.2d at 254 n. 28. However, these two privileges are distinct in that the "attorney-client privilege permits nondisclosure of an attorney's opinion or advice in order to protect the secrecy of the underlying facts, while the deliberative process privilege directly protects advice and opinions and does not permit the nondisclosure of underlying facts unless they would indirectly reveal the advice, opinions, and evaluations circulated within the agency as part

of its decision-making process.” *Id.* (emphasis added). Moreover, the courts have held that if withheld materials are exempt only based on the deliberative process privilege, the agency is required to describe the factual content of the materials and disclose it or provide an adequate justification for concluding that it is not segregable from the exempt portions of the materials. *Id.*

#### Attorney Work-Product Privilege

HHS also asserts the attorney work-product privilege as a basis for withholding 133 pages of responsive material.<sup>FN41</sup> This privilege “protects disclosure of materials prepared by attorneys, or non-attorneys supervised by attorneys, in contemplation of litigation, that reveal information about an attorney’s preparation and strategy relating to a client’s case.” *Judicial Watch, Inc. v. U.S. Postal Serv.*, 297 F.Supp.2d 252, 268 (D.D.C.2004) (citing *Coastal States*, 617 F.2d at 866); *Wilderness Society v. U.S. Dep’t of Interior*, 344 F.Supp.2d 1, 17 (D.D.C.2004) (citing *Judicial Watch, supra*). The purpose of the attorney work product privilege is to provide “a working attorney with a ‘zone of privacy’ within which to think, plan weigh facts and evidence, candidly evaluate a clients case, and prepare legal theories.” *Coastal States*, 617 F.2d at 864. Moreover, factual information in attorney work-product will also be protected unless the requesting party can demonstrate a substantial need for the material and an inability to obtain it without suffering undue hardship. *Judicial Watch*, 297 F.Supp.2d at 268 (citing *Fed.R.Civ.P.* 26(b)(3); *Putnam v. U.S. Dep’t of Justice*, 873 F.Supp. 705, 711 n. 4 (D.D.C.1995)). “The work-product privilege can be waived, however, if the work product is disclosed to a third party who does not share a ‘common interest in developing legal theories and analyses of documents’ with the primary party.” *Id.* (quoting *In re Sealed Case*, 676 F.2d 793, 817 (D.C.Cir.1981)) (other citations omitted).

<sup>FN41</sup> The attorney work-product privilege is asserted for the following Bate-stamp page numbers: 490-91, 492-93, 497-98, 499, 500-06, 512, 517, 518-19, 526-28, 529, 530, 533, 542, 584-86, 831, 832, 839, 84-85, 86,

87-88, 89-90, 91, 92-93, 94-95, 96, 97, 101-02, 104-05, 115-17, 205-08, 209-11, 212-15, 217-18, 221-22, 223-24, 233-35, 241, 242, 243, 245, 246-47, 248, 249-50, 251, 254-55, 256-57, 258-59, 260-61, 262-64, 265, 266-67, 268, 269, 270-71, 272-73, 274-76, 277-79, 280-84, 285-86, 289-91, 292, 465, and 470-82.

\*23 The cornerstone of this privilege is that the documents were prepared in anticipation of litigation. *Id.* (citing *Jordan*, 591 F.2d at 775) (emphasis added). Therefore, the attorney work product privilege may only be invoked to exempt those documents prepared in anticipation of litigation, and not “ ‘every written document generated by an attorney.’ ” *Judicial Watch*, 297 F.Supp.2d at 268 (quoting *Senate of the Commw. of Puerto Rico v. U.S. Dep’t of Justice*, 823 F.2d 574, 586 (D.C.Cir.1987)). The agency’s burden of proving application of the attorney work-product privilege is two-fold: The agency must (1) show that the “documents must at least have been prepared with a specific claim supported by concrete facts which would likely lead to litigation in mind,” *Coastal States*, 617 F.2d at 865, and (2) “provide some indication whether the documents have been shared with third parties, which would amount to a waiver of the privilege”<sup>FN42</sup>, *Wilderness Society*, 344 F.Supp.2d at 17 (citing *Judicial Watch*, 297 F.Supp.2d at 268). As to the first requirement, there must be some “indication in the *Vaughn* index or affidavits that there was even the dimmest expectation of litigation when the [ ] documents were drafted.” *Coastal States*, 617 F.2d at 865 (emphasis added).

<sup>FN42</sup> The district court in *Judicial Watch* explained that in a normal, adversarial proceeding in which the parties are presumed to have equal access to the facts, on a waiver of privilege claim, the party asserting waiver would have the burden of proving that the privilege had been waived. However, in a FOIA case, where the agency possesses almost exclusive access to the facts, the court has required the agency to prove that it has not waived the privilege because the requester is not in a position to disprove it. 297 F.Supp.2d at 269 (citing *King v. U.S.*

Dep't of Justice, 830 F.2d 210, 218 (D.C.Cir.1987).

In *Judicial Watch*, *Wilderness Society*, and *King*, the courts refused to allow the agencies to withhold documents pursuant to the attorney work product privilege because in all three cases, the agencies failed to provide the courts with sufficient facts, in either their affidavits or *Vaughn* indices, to allow the courts to conclude that specific claims had arisen and were likely to be pursued to the point of litigation by the agency.

Similarly, in the case at bar, HHS fails to provide both the court and the Commonwealth with sufficient facts in either its declarations or *Vaughn* indices to determine whether the work product privilege applies to each of the claimed 133 pages. Indeed, the *Vaughn* indices for the 133 pages withheld pursuant to the attorney work product privilege state merely that the "withheld material is an intra-agency memorandum containing predecisional analysis and opinions concerning the audit of Pennsylvania's Title IV-E program ... [and] contains confidential ... attorney work-product, prepared in reasonable anticipation of litigation or administrative proceedings between HHS and Pennsylvania." This explanation is stated for each of the 133 pages claimed as exempt under the attorney work product privilege. In addition, the declarations of Michael Leonard and Richard Stern fail to provide the necessary detail for the court to determine that these pages were drafted in anticipation of litigation. As to establishing this requirement, both declarations are utterly devoid of detail, stating only that "[t]he documents at issue were either obtained or prepared in contemplation of litigation with the Commonwealth of Pennsylvania concerning an audit of Pennsylvania's Title IV-E program." Stern Decl. at ¶ 52; Leonard Decl. at ¶ 16. Stern goes on to state that "[i]ndeed, a large majority of the documents reflect [his]own legal opinions and mental processes prepared in anticipation of the very litigation that Pennsylvania has initiated in [*Commw. of PA Dep't of Public Welfare v. United States, U.S. Dep't of Health & Human Serv.*, C.A. No. 05-1345 (W.D.Pa.) ]. Stern Decl. at ¶ 52. However, what Mr. Stern and HHS have failed to realize is that they have provided no factual basis for the Court to make the giant leap they

suggest between the dates the documents were created (many of which occurred in 2000), and the litigation filed in 2005 as to how those documents could have been prepared in anticipation of litigation when the litigation was not filed, in many instances, until 5 years later.

\*24 There is no indication at the time the particular document was drafted what claims or litigation were anticipated, especially since there may have been numerous audits of Pennsylvania's Title IV-E programs since 1997, and it is not clear whether every audit resulted in some sort of claim, administrative proceeding, or federal court case. For each document or page claimed as exempt under the attorney work-product privilege, HHS must identify the particular audit (by date or some other basis) which it anticipated would result in litigation (including an administrative proceeding), and specifically identify the administrative proceeding and/or federal court case which resulted, if any. In addition, HHS provides no indication of whether the documents have been shared with third parties and, therefore, whether the privilege has been waived. For example, if agency attorneys prepared any of these documents in response to litigation, and had filed substantially similar material with a court or other administrative body such that they were publicly available, HHS would have waived the privilege.

For these reasons, HHS has failed to satisfy its burden of proving that the 133 pages are exempt from disclosure pursuant to the attorney work-product privilege. Therefore, unless HHS demonstrates that these documents fall within Exemption (b)(5) under the deliberative process privilege, the Court will not be able to find that HHS is entitled to summary judgment in its favor on the withheld documents.

#### *Deliberative Process Privilege*

HHS has invoked the deliberative process privilege of Exemption (b)(5) as the basis for withholding all of the pages challenged by the Commonwealth. This privilege "protects from disclosure 'documents reflecting advisory opinions, recommendations and deliberations comprising part of a process by which governmental decisions and policies are formulated.'"

' *Wilderness Society*, 344 F.Supp.2d at 10 (quoting *Dep't of Interior & Bureau of Indian Affairs v. Klamath Water Users Protective Ass'n*, 532 U.S. 1, 8, 121 S.Ct. 1060, 149 L.Ed.2d 87 (2001) (other citation omitted)). "The purpose of the deliberative process privilege is to ensure open communication between subordinates and superiors, prevent premature disclosure of policies before final adoption, and to avoid public confusion if grounds for policies that were not part of the final adopted agency policy happened to be exposed to the public." *Id.* (citing *Defenders of Wildlife v. U.S. Dep't of Agric.*, 311 F.Supp.2d 44, 57 (D.D.C.2004)); see also *Coastal States*, 617 F.2d at 866 (citing *Jordan*, 591 F.2d at 772-74). The critical question, therefore, in determining whether an agency has met its burden of proof as to the deliberative process privilege, is whether " 'disclosure of [the] materials would expose an agency's decisionmaking process in such a way as to discourage candid discussion within the agency and thereby undermine the agency's ability to perform its functions.' " *Wilderness Society*, 344 F.Supp.2d at 10 (quoting *Formaldehyde Inst. v. Dep't of Health & Human Serv.*, 889 F.2d 1118, 1122 (D.C.Cir.1989)) (other citation omitted).

\*25 In order to withhold documents under the deliberative process privilege, an agency must demonstrate that its decision is both (1) predecisional and (2) deliberative. *Coastal States*, 617 F.2d at 866; *Wilderness Society*, 344 F.Supp.2d at 10 (citing *Nat'l Ass'n of Home Builders v. Norton*, 309 F.3d 26, 39 (D.C.Cir.2002); *Judicial Watch*, 297 F.Supp.2d at 259 (citations omitted)). "A document is predecisional if it was 'prepared in order to assist an agency decision-maker in arriving at his decision,' rather than to support a decision already made." *Wilderness Society*, 344 F.Supp.2d at 10 (quoting *Petroleum Info. Corp. v. U.S. Dep't of Interior*, 976 F.2d 1429, 1434 (D.C.Cir.1992) (other citation omitted)). In other words, a predecisional document is one that is " 'antecedent to the adoption of agency policy.' " *Judicial Watch*, 297 F.Supp.2d at 259 (quoting *Jordan*, 591 F.2d at 774). An agency will satisfy its burden as to the predecisional requirement if it "pinpoints[s] an agency decision or policy to which the document contributed," *Senate of Puerto Rico*, 823 F.2d at 585,

or "identif [ies] a decision-making process to which a document contributed", *Judicial Watch*, 297 F.Supp.2d at 259 (citation omitted).

As to the second requirement, that the document be deliberative, the agency must show that the document is " 'a direct part of the deliberative process in that it makes recommendations or expresses opinions on legal or policy matters.' " *Wilderness Society*, 344 F.Supp.2d at 11 (quoting *Vaughn v. Rosen*, 523 F.2d 1136, 1144 (D.C.Cir.1975)) ("Vaughn II"); *Judicial Watch*, 297 F.Supp.2d at 259 (citing same). The deliberative document "must reflect the 'give-and-take of the consultative process.' " *Wilderness Society*, 344 F.Supp.2d at 11 (quoting *Senate of Puerto Rico*, 823 F.2d at 585). "In determining whether the deliberative process privilege should apply to a particular document, courts often look at "the nature of the decision making authority vested in the officer or person issuing the disputed document,' and the relative position in the agency's 'chain of command' occupied by the document's author and recipient.'" *Id.* (quoting *Animal Legal Defense Fund, Inc. v. Dep't of Air Force*, 44 F.Supp.2d 295, 301 (D.D.C.1999)). In this regard, generally employee to supervisor correspondence is more likely than other intra-agency communications to be exempt under the deliberative process privilege. *Judicial Watch*, 297 F.Supp.2d at 264 (citing *Access Reports v. Dep't of Justice*, 926 F.2d 1192, 1195 (D.C.Cir.1991)) ("A document from a junior to a senior is likely to reflect his or her own subjective opinions .... By contrast, one moving from senior to junior is far more likely to manifest decisionmaking authority and to be the denouement of the decisionmaking rather than part of its give and take.") (citing *Senate of Puerto Rico*, 823 F.2d at 586; *Coastal States*, 617 F.2d at 868)). Also, simply because a document has been designated as a "draft" does not automatically entitle the agency to withhold it based on the deliberative process privilege. *Wilderness Society*, 344 F.Supp.2d at 14 (citing *Arthur Andersen & Co. v. I.R.S.*, 679 F.2d 254, 257 (D.C.Cir.1982)). For each document designated as a "draft," the agency must indicate whether the "draft" was " '(1) 'adopted formally or informally, as the agency position on an issue;' or (2) 'used by the agency in its dealings with the public.' " *Id.* (quoting

Judicial Watch, 297 F.Supp.2d at 261).

\*26 Generally, factual information contained in a document which is withheld pursuant to the deliberative process privilege must be disclosed. Judicial Watch, 297 F.Supp.2d at 261 (citing Petroleum Info. Corp., 976 F.2d at 1434; Mead Data Central, 566 F.2d at 256). However, where the factual material may expose the policy judgments or reasoning of the author, and therefore the deliberative process of the agency, the factual information will also be exempt. Id. at 262 (citing Mead Data Central, 566 F.2d at 256; Mapother v. Dep't of Justice, 3 F.3d 1533, 1539 (D.C.Cir.1993); Petroleum Info. Corp., 976 F.2d at 1437-38); Wilderness Society, 344 F.Supp.2d at 14. In the latter instance, the agency must provide the required justification for not releasing segregable factual information as outlined in Part 2 above.

In addition, the Court of Appeals for the District of Columbia has repeatedly emphasized that an agency will not satisfy its burden of establishing its right to withhold records with a conclusory assertion of privilege. Id. (citing Senate of Puerto Rico, 823 F.2d at 585 (quoting Coastal States, 617 F.2d at 861)). Rather, "[t]he agency must identify the role of a contested document in a specific deliberative process, Coastal States, 617 F.2d at 868, in order to 'show by specific and detailed proof that disclosure would defeat, rather than further, the purposes of the FOIA.'" Judicial Watch, 297 F.Supp.2d at 259 (quoting Mead Data Central, 566 F.2d at 258) (other citations omitted). Moreover, "[s]ince the applicability of the deliberative process privilege depends on the content of each document and the role it plays in the decision-making process, an agency's affidavit must correlate facts in or about each withheld document with the elements of the privilege." Id. at 259-60 (citing Senate of Puerto Rico, 823 F.2d at 585; Coastal States, 617 F.2d at 866; Mead Data Central, 566 F.2d at 251); see also Wilderness Society, 344 F.Supp.2d at 14 (to qualify redacted and withheld documents as exempt under the deliberative process privilege, the agency must "identify the 'function and significance ... in the agency's decision making process'" of these documents (citing Arthur Andersen, 679 F.2d at 258)). "Without a sufficiently specific affidavit or Vaughn Index, a court cannot decide, one way or the

other, a deliberative process privilege claim." Id. at 260 (citing Senate of Puerto Rico, 823 F.2d at 585) (other citation omitted).

In the case at bar, neither the Vaughn indices nor the declarations of Leonard and Stern provide sufficient detail to enable this Court to decide HHS's claim of deliberative process privilege. Although the explanations for many of the withheld pages state that the documents make recommendations or express opinions regarding legal or policy matters, the Vaughn indices and declarations fail to provide any details regarding the give-and-take and/or supervisor/employee relationship between the author and recipient(s) in all but a few entries. Moreover, none of the explanations identify the specific agency decision or policy to which a particular document contributed, or state what role the document played in the deliberative process. For example, the entry for Bate-stamp page no. 520 identifies a specific review-Pennsylvania's Title IV-E foster care program for federal fiscal years 1998, 1999 and 2000-but neglects to identify the agency decision to which the document contributes and/or the role the document played in the decision. As another example, most entries describe the subject matter of the documents as relating to either a Pennsylvania Title IV-E program, an audit of that program, or a proposed settlement agreement. Not only does this description fail to identify the particular audit or program under consideration, it fails to identify the specific agency decision and the date thereof to which the particular document contributed and the way it contributed. Certainly, more than one audit has been conducted or contemplated by HHS and/or OIG with regard to Pennsylvania since 1997, yet no distinction is made as to which audit a particular document is referring. At the very least, HHS must identify the specific audit and/or program discussed in each withheld document, the particular agency decision to which the document contributed, and how the document contributed to it.

\*27 Nor does HHS correlate any facts about the withheld material with the elements of the privilege. Rather, the explanation merely reiterates the required elements of the deliberative process privilege. For many of the entries, the author and/or recipient(s) are unknown, so that a particular individual cannot be

linked to a document. In this situation, “ ‘it becomes difficult if not impossible, to perceive how the disclosure of such documents would result in a chilling effect upon the open and frank exchange of opinions within the agency.’ ” Wilderness Society, 344 F.Supp.2d at 15 (quoting Ethyl Corp. v. U.S. E.P.A., 25 F.3d 1241, 1250 (4th Cir.1994)). At the very least, HHS should provide information regarding the source of the documents' origination or the location where these documents were found, in order for the Court to assess what role, if any, a document played in the decision-making process.

In a few cases, where the document is described as a “draft,” (see e.g., Bate-stamp page nos. 513-16), HHS states that the documents do not represent the final agency decision. But the documents still do not fall within the deliberative process privilege because they fail to articulate with the required detail any particular agency decision or correlate the facts with the elements of the privilege.

In order for HHS to prove it is entitled to withhold 196 pages of materials under the deliberative process privilege, it must show that each document is both predecisional and deliberative. However, on the current record, the Court cannot make a determination whether any of the entries challenged by the Commonwealth satisfy this test.

Accordingly, because HHS's *Vaughn* indices and declarations fail to provide sufficient detail to show that either the attorney-client privilege, attorney work-product privilege, or the deliberative process privilege applies to the withheld materials, the Court recommends that Defendants' motion for summary judgment on this issue be denied.

#### 4. Policy Considerations

Finally, HHS argues that policy considerations also support granting summary judgment in its favor. In this regard, HHS accuses the Commonwealth of instituting the instant FOIA case with the sole purpose of conducting discovery in Civil Action No. 05-1345 (W.D.Pa.), thereby intentionally sidestepping the federal rules of discovery and this Court's instruction that discovery in Civil Action No. 05-1345 be stayed

until the dispositive motions were resolved. See Reply Mem. in Supp. of Defs.' Mot. for Summ. J. & Opp'n to Pl.'s Rule 56(f) Mot. at 13. Such a tactic, according to HHS, is squarely against the spirit and purpose of FOIA, as explained by numerous courts, including the Supreme Court and Court of Appeals for the Third Circuit.<sup>FN43</sup> HHS argues that essentially, these cases hold that FOIA was not intended to be a private discovery tool or to replace or supplement the discovery of litigants, but rather, is a public disclosure statute, fundamentally designed to inform the public about agency action, and not to benefit private litigants. Despite the express purpose of FOIA, HHS submits that counsel for the Commonwealth “has converted FOIA into his own personal discovery tool in an effort to avoid and/or supplement the Federal Rules of Civil Procedure.” (*Id.* at 14.) HHS further argues that if every plaintiff in a civil action against the United States filed a corresponding FOIA case in order to sidestep the federal rules of discovery, the drain of resources on the government and the Court system would be immeasurable. HHS posits that the Commonwealth should not be permitted to continue misusing and abusing the FOIA.

<sup>FN43</sup> NLRB v. Robbins Tire & Rubber Co., 437 U.S. 214, 242, 98 S.Ct. 2311, 57 L.Ed.2d 159 (1978) (“The basic purpose of FOIA is to ensure an informed citizenry ... FOIA was *not* intended to be a private discovery tool”; Metex Corp. v. ACS Ind., Inc., 748 F.2d 150, 155 (3d Cir.1984) (rejecting requester's argument that information requested is necessary to resolve underlying civil litigation as FOIA is public disclosure statute and not intended to replace or supplement discovery of private litigants); Newry Ltd. v. U.S. Customs & Border Prot. Bureau, No. Civ. A. 04-02110 HHK, 2005 WL 3273975, at \*4 (D.D.C. July 29, 2005) (FOIA requesters' position as an entity whose merchandise was seized and the subject of administrative forfeiture proceeding had no bearing on its “right” to documents in question); Changzhou Laosan Group v. U.S. Customs & Border Prot. Bureau, No. Civ. A. 04-1919(ESH), 2005 WL 913268,

\*7 (D.D.C. Apr. 20, 2005) (identity of FOIA requester and his reasons for request have no bearing on entitlement); NLRB v. Sears, Roebuck & Co., 421 U.S. 132, 144, 95 S.Ct. 1504, 44 L.Ed.2d 29 (1975) (FOIA is “fundamentally designed to inform public about agency action and not to benefit private litigants.”); Renegotiation Bd. v. Bannerkraft Clothing Co., Inc., 415 U.S. 124, 94 S.Ct. 1028, 39 L.Ed.2d 123 (1974) (“Discovery for litigation purposes is not an expressly indicated purpose of [FOIA]”); Johnson v. Dep’t of Justice, 785 F.Supp. 2, 4 (D.D.C.1991) (FOIA “is not a discovery statute”).

**\*28** The Commonwealth disputes this accusation, and submits that HHS’s own practice manual provides that litigants are permitted to use FOIA during the pendency of litigation against the agency. See *HHS Departmental Appeals Board Appellate Division-Practice Manual FAQ*, which is posted on the internet at [http://www.hhs.gov/dab/appellate/manual.html# 25](http://www.hhs.gov/dab/appellate/manual.html#25). Specifically, the Commonwealth points to the following frequently asked question and the agency’s response thereto:

What is the relationship between discovery processes at the DAB and requests under the Freedom of Information Act (FOIA)? An appellant has a right to seek information from the Department under FOIA which is unaffected by the existence or use of DAB processes. FOIA and DAB processes sometimes intersect, as when an appellant has a pending FOIA request which the appellant anticipates will produce information to be used in DAB proceedings. To avoid delay and misunderstanding about the rights and obligations of the parties under the two separate processes, appellants are urged to ask the DAB to convene a telephone conference when a FOIA request related to the case is involved.

*Id.* The Commonwealth further submits that this FOIA case was filed in contemplation of DAB litigation as permitted by the above policy, and indeed, the Court notes that DAB litigation is more likely now that the district court has dismissed the Commonwealth’s civil action filed at docket no. 05-1345, as

unripe. Moreover, the Commonwealth posits that resort to FOIA is necessary due to the DAB’s restrictive policies on discovery. *Id.* Therefore, the Commonwealth asserts that it routinely files FOIA litigation early into any audit that is likely to be contested due to the lag time between presenting the FOIA request and receiving responsive documents, and that such practice is expressly permitted by HHS as indicated in its DAB practice manual.

As to the cases cited by HHS for the proposition that FOIA was not intended to be a private discovery tool, the Commonwealth acknowledges that FOIA was not designed to supplement the rules of civil discovery. The Commonwealth argues, nonetheless, that it is well established that a requester’s rights are not diminished because of its status as a litigant, citing NLRB v. Robbins Tire & Rubber Co., 437 U.S. 214, 242 n. 23, 98 S.Ct. 2311, 57 L.Ed.2d 159 (1978) (stating that a person’s rights under FOIA are neither diminished nor enhanced by his “litigation-generated need” for agency documents), and State of Maine v. U.S. Dep’t of the Interior, 298 F.3d 60, 66 (1st Cir.2002). The Commonwealth further submits that the reasons that a person makes a request under FOIA are “simply not relevant to the merits of a FOIA request”, Solar Sources, Inc. v. United States, 142 F.3d 1033, 1039 n. 6 (7th Cir.1998), and that a plaintiff’s rights in a FOIA case “do not depend on his or her identity”, North v. Walsh, 881 F.2d 1088, 1096 (D.C.Cir.1989). Thus, the Commonwealth contends it has a right to have its FOIA litigation decided independently of what happens in the case filed at docket no. 05-1345.

**\*29** The Court finds HHS’s policy argument unpersuasive. The Court does not read the cases cited by HHS as authority for preventing a party to an administrative proceeding or a lawsuit from submitting a FOIA request for information that relates to the subject matter of those proceedings, nor does this authority prevent the agency from processing and responding to such a FOIA request. Rather, the cases cited by HHS support the proposition that a FOIA requester does not have a *right* to receive and examine documents just because the information may have some special significance to the requester but not to the public at large. Moreover, this authority does not sug-

gest that a plaintiff may not use FOIA to request information needed for an underlying civil case, nor does it suggest in any way that what the Commonwealth is doing here is an abuse or misuse of FOIA. As the district court observed in *Inter Ocean Free Zone, Inc. v. U.S. Customs Serv.*, “[t]he identity of the FOIA requester and the requester’s reasons for making the request have no bearing upon its entitlement to the information.... what is given to one requester is what is available to all who make the same request.” 982 F.Supp. 867, 871 (S.D.Fla.1997) (citing *U.S. Dep’t of Justice v. Reporters Comm. for Freedom of Press*, 489 U.S. 749, 771, 109 S.Ct. 1468, 103 L.Ed.2d 774 (1989)). That is all the Commonwealth can and is asking for here. “[FOIA’s] sole concern is with what must be made public or not made public.” *Reporters Comm.*, 489 U.S. at 772 (quoting Davis, *The Information Act: A Preliminary Analysis*, 34 U.Chi.L.Rev. 761, 765 (1966-67)) (other citation omitted). Thus, to the extent the Commonwealth’s FOIA request seeks information that must be made available to the public, the Commonwealth has not abused or misused FOIA. For HHS to argue otherwise is disingenuous, especially in light of its own policy in the DAB practice manual. Indeed, HHS actually released approximately 925 pages of materials relating to the Pennsylvania’s Title IV-E programs, some of which are at issue in Civil Action No. 05-1345, in response to the Commonwealth’s FOIA requests in this case, which suggests, at the very least, that such “tactics” are permissible and not abusive.

Of course, Congress has built a safeguard into FOIA to protect agencies from having to disclose information that would contravene national security, privacy interests, law enforcement investigations, the attorney-client or work-product privileges, and deliberative process privilege, by enacting exemptions to FOIA’s disclosure requirements. These exemptions ensure that FOIA requester, who also happens to be a private litigant, does not obtain information that is not discoverable in a lawsuit.

Therefore, it cannot be said that the Commonwealth is abusing or misusing FOIA to obtain non-discoverable documents since these documents would be exempt under either the attorney-client, attorney

work-product or deliberative process privileges, so long as sufficiently detailed affidavits and *Vaughn* indices have been provided by the agency to justify their non-disclosure. However, in this case, HHS has failed to meet its burden and would have this Court hold the Commonwealth responsible. That the Court will not do. Accordingly, the Court finds no merit to HHS’s argument that policy considerations also support the granting of its motion for summary judgment.

#### 5. Appropriate Relief & Commonwealth’s Rule 56(f) Motion

\*30 The Court has found that HHS’s *Vaughn* indices and declarations are so deficient with regard to its segregability analysis and proving its entitlement to withholding materials or portions of materials pursuant to Exemption (b)(5) that the Court is unable to make a *de novo* determination on these issues, and similarly, the Commonwealth is unable to articulate its challenges. In this instance, the Court has several options in fashioning the appropriate relief, including inspecting the withheld materials *in camera*, allowing the plaintiff to conduct discovery, and requesting further affidavits and/or an amended *Vaughn* index from the agency. See *Judicial Watch*, 297 F.Supp.2d at 270 (citing *Spirko v. U.S. Postal Serv.*, 147 F.3d 992, 997 (D.C.Cir.1998)). The Court will review each of these options in turn.

One option is to order an *in camera* review of the withheld materials, and in fact, HHS has indicated that it is not opposed to such review in the event that the Court concludes HHS is not entitled to summary judgment as to HHS’s claims of exemption.<sup>FN44</sup> The Court has broad discretion in determining whether an *in camera* review should be conducted in a particular case. *Spirko*, 147 F.3d at 997. “The ultimate criterion is simply this: Whether the district judge believes that *in camera* inspection is needed in order to make a responsible *de novo* determination on the claims of exemption.” *Id.* at 996 (quoting *Ray v. Turner*, 587 F.2d 1187, 1195 (D.C.Cir.1978)). Two factors here counsel against *in camera* review. First, conducting an *in camera* review is generally disfavored and appropriate “only when the issue ... could not be otherwise resolved.” *NLRB v. Robbins*

Tire & Rubber Co., 437 U.S. at 224. As explained below, the Court believes the best way to resolve the deficiencies here is through limited discovery. The second factor is the relatively large number of pages at issue. For some of the withheld materials, HHS is in the best position to provide the necessary factual information to prove the claimed exemptions, especially where the required details may not appear in the documents themselves, such as facts demonstrating documents were prepared in anticipation of litigation, or identifying the agency decision to which a particular document contributed. Conducting an *in camera* review of close to 200 pages of unreleased materials to determine whether the withheld materials are exempt under one of the claimed privileges would place a substantial burden on judicial resources, and is especially not warranted here in light of HHS's failure to supply the Court and the Commonwealth with even the minimal information necessary to make a *de novo* review and challenge the bases for withholding the materials, respectively. Another factor militating against *in camera* review is the general disfavor of *in camera* review by the courts as the principal means for resolving segregability disputes, as it impedes the adversarial position of the requester and is inconsistent with FOIA.<sup>FN45</sup> Accordingly, the Court declines to order an *in camera* review at this time.

FN44. See Reply Mem. in Supp. of Defs.' Mot. for Summ. J. & Opp'n to Pl.'s Rule 56(f) Motion (Doc. No. 17) at 2-3, 12.

FN45. Although *in camera* review has been required where the agency response is "vague; its claims too sweeping, or there is a reason to suspect bad faith," Mead Data Central, 566 F.2d at 262 (citing Weissman, 565 F.2d at 697-98)), these factors do not outweigh the more laudable factors of advancing the purposes of FOIA and conserving judicial resources under the particular facts of this case.

\*31 The second option the Court may select is allowing the plaintiff to conduct discovery. In the instant matter, the Commonwealth has indeed filed a Rule 56(f) motion requesting discovery in response to the Defendants' motion for summary judgment.<sup>FN46</sup>

Specifically, the Commonwealth requests that it be allowed to inquire as to (1) how HHS went about identifying segregable factual material, and (2) with regard to the claimed privileges, whether the withheld materials meet the requirements for withholding, including (i) the role of particular documents in the deliberative process, and (ii) whether attorney-client privilege documents have been kept confidential.<sup>FN47</sup> In addition, although not raised directly in its Rule 56(f) motion, the Commonwealth challenges the assertion of the attorney work-product privilege on the basis that HHS has not met its burden of proof of establishing that the documents were prepared in anticipation of litigation, and therefore, by implication, suggests discovery is needed on this issue as well.

FN46. Fed.R.Civ.P. 56(f) provides: "Should it appear from the affidavits of a party opposing the motion [for summary judgment] that the party cannot for reasons stated present by affidavit facts essential to justify the party's opposition, the court may refuse the application for judgment or may order a continuance to permit affidavits to be obtained or depositions to be taken or discovery to be had or may make such other order as is just."

FN47. See Pl.'s Br. in Opp'n to HHS' Mot. for Summ. J. & in Supp. of its Rule 56(f) Mot. (Doc. No. 15) at 20. The Commonwealth also requested discovery with regard to the adequacy of the search and suggests that at the conclusion of discovery, the parties be allowed to file cross motions for summary judgment. Given the Court's ruling on the adequacy of the search, *supra*, the Court recommends that the Commonwealth's Rule 56(f) motion be denied as to that issue.

In support of its Rule 56(f) motion, the Commonwealth submits the declaration of Jason Manne, counsel for the Pennsylvania Department of Public Welfare dated June 2, 2006 ("Manne Decl."). (Doc. No. 14.) In his declaration, Manne states that based on his prior experience, which spans twenty-five years

of handling Federal-State grant litigation including 12 FOIA lawsuits, he has a reasonable belief that HHS may not have released all segregable factual information in exempt documents and may be claiming exemptions improperly, as the official making the determination has historically lacked the program-specific knowledge necessary to make that determination. Manne specifically points to Bate-stamp page no. 545 as evidence of HHS's failure to release all segregable factual information. (Manne Decl. at ¶¶ 1, 5-6.) Manne further states that without knowing precisely how the decision to withhold information was made, he cannot adequately respond to the issue of segregability in HHS's motion for summary judgment. (*Id.* at 5.) In addition, Manne asserts that he cannot adequately respond to HHS's claimed exemptions without additional information regarding each document and how the document relates to the claimed privilege, as more fully explained in the Commonwealth's brief. (*Id.* at 6.)

HHS opposes the Commonwealth's Rule 56(f) motion, and in support thereof, advances two arguments. First, HHS submits that where the court already has sufficient information, consisting of *Vaughn* indices and declarations, to conclude the agency has fully complied with FOIA, discovery is generally unavailable. This argument is flawed however, because HHS assumes, incorrectly, that Court will find its *Vaughn* indices and declarations to be sufficiently detailed. As explained above, that is not the present case. Nonetheless, HHS cites a number of cases in which courts have denied discovery requests in FOIA cases.<sup>FN48</sup> However, the Court finds none of these cases dispositive here as the agencies in those cases submitted sufficiently detailed affidavits and/or there was no evidence of bad faith on the part of the agency, thereby making discovery unnecessary, unlike HHS in the case at bar.

<sup>FN48</sup>. The cases cited by HHS include *Wheeler v. CIA*, 271 F.Supp.2d 132, 139 (D.D.C.2003) (no evidence of bad faith); *SaifeCard*, 926 F.2d at 1200-02 (affidavits sufficiently detailed and no evidence of bad faith); *Simmons v. U.S. Dep't of Justice*, 796 F.2d 709, 711-12 (4th Cir.1986) (affidavits sufficiently detailed); *Broadrick v. Execut-*

*ive Office of President*, 139 F.Supp.2d 55, 64 (D.D.C.2001) (affidavits sufficiently detailed and no evidence of bad faith).

\*32 Second, HHS submits that there is no need here to conduct an *in camera* review, but if the Court is dissatisfied with the information supplied, it has the discretion to order a more specific index or order an *in camera* review. According to HHS, given the number and similarity of the documents at issue, an *in camera* inspection would (1) show that the documents were appropriately withheld, (2) would completely eliminate the need for discovery on the FOIA exemptions, and (3) allow the Court to make its own segregability determination. By so arguing, however, HHS attempts to improperly shift its burden of proof to this Court. As stated earlier, the Court finds an *in camera* review would substantially burden judicial resources.

Clearly, there is precedent for allowing limited discovery in FOIA cases where the affidavits and/or *Vaughn* index are deficient and national security is not involved. *See, e.g., Commw. of PA Dep't of Public Welfare v. United States, U.S. Dep't of Health & Human Serv.*, Civ. A. No. 99-175, 1999 U.S. Dist. LEXIS 17978, \*7-8 (W.D.Pa. Oct. 12, 1999) (citing *Church of Scientology v. IRS*, 991 F.2d 560, 563 (9th Cir.1993), vacated in part on other grounds, 30 F.3d 101 (9th Cir.1994); *Benavides v. DEA*, 968 F.2d 1243, 1249-50 (D.C.Cir.), mod. on other grounds, 976 F.2d 751 (D.C.Cir.1992)); *see also Schiller v. I.N.S.*, 205 F.Supp.2d 648, 653 (W.D.Tex.2002) (noting numerous district court cases holding that discovery in FOIA cases is limited to determining whether withheld items are exempt from disclosure or whether a thorough search for documents has been made). Because a FOIA plaintiff "obviously cannot know the facts [it] does not know," without discovery, it is virtually impossible for a FOIA plaintiff to know whether the agency has complied with FOIA's mandate. *Id.* at \*8 (quoting *Hanover Potato Prods. Inc. v. Shalala*, 989 F.2d 123, 129 (3d Cir.1993)). As the Court of Appeals for this Circuit observed in *Davin, supra*: "The review of FOIA cases is made difficult by the fact that the party seeking disclosure does not know the contents of the information sought and is, therefore, helpless to contradict the govern-

ment's description of the information or effectively assist the trial judge." *Id.* (quoting *Davin*, 60 F.3d at 1049). In *Commw. v. HHS* filed at Civil Action No. 99-175, Judge Smith found that the agency's affidavit on the adequacy of the search was scant and ordered limited discovery regarding the completeness of the material produced as well as the methodology used to compile it. *Id.* (citing *Weisberg v. U.S. Dep't of Justice*, 627 F.2d 365, 371 (D.C.Cir.1980)).

The decision whether to allow discovery lies within the discretion of this Court. *Schiller*, 205 F.Supp.2d at 653 (citing *Rugiero v. U.S. Dep't of Justice*, 257 F.3d 534, 544 (6th Cir.2001)) (other citations omitted). The courts have uniformly held that discovery in a FOIA case is permitted "when factual issues arise about the 'adequacy or completeness of the government search and index' and this issue can arise 'only after the government files its affidavits and supporting memorandum of law' ". *Id.* (quoting *Murphy v. F.B.I.*, 490 F.Supp. 1134, 1137 (D.D.C.1980)). Therefore, given that the discovery the Commonwealth seeks to conduct is limited to the issue of the completeness of HHS's *Vaughn* indices and declarations as to segregability of non-exempt factual information and the claimed exemptions for withholding materials, and that HHS has already filed its *Vaughn* indices and supporting declarations, the Court finds that limited discovery is appropriate here.

\*33 In lieu of discovery and an *in camera* review, the Court may order the agency to provide supplemental declarations or an amended *Vaughn* index to correct the deficiencies. In light of the fact that HHS has already had two opportunities to provide sufficiently detailed affidavits and has failed both times, the Court finds the better approach is to allow the Commonwealth to conduct limited discovery as outlined above.

Accordingly, the Court recommends that the Commonwealth's Rule 56(f) motion be granted and limited discovery allowed with regard to the completeness of the *Vaughn* indices and declarations on the segregability of non-exempt factual information and the claimed exemptions for the withheld materials. At the conclusion of discovery, if HHS still wishes to withhold materials or portions of materials, it will be

allowed to renew its motion for summary judgment, and the Commonwealth will be permitted to file a cross-motion for summary judgment.

### III. CONCLUSION

While the claimed privileges for a number of the documents appear plausible on the surface, HHS has failed to provide sufficiently detailed declarations and *Vaughn* indices to show that it has met *all* of the criteria for the respective privileges. Ultimately, the Court may well find that the withheld materials are exempt under either the attorney-client privilege, attorney work-product privilege, or the deliberative process privilege. However, on the current record, the Court cannot determine whether any of the claimed privileges apply as the declarations and *Vaughn* indices fail to provide the required detail.

Therefore, for this reason and the reasons set forth above, it is recommended that Defendants' Motion for Summary Judgment (Doc. No. 8) be granted with regard to the issue of the adequacy of the search, and denied without prejudice in all other respects. It is further recommended that Plaintiff's Rule 56(f) Motion (Doc. No. 13) be denied with prejudice on the issue of the adequacy of the search, and granted on the remaining issues.

In accordance with the Magistrates Act, 28 U.S.C. § 636(b)(1)(B) and (C), and Rule 72.1.4(B) of the Local Rules for Magistrates, the parties are allowed ten (10) days from the date of service to file objections to this report and recommendation. Any party opposing the objections shall have seven (7) days from the date of service of objections to respond thereto. Failure to file timely objections may constitute a waiver of any appellate rights.

**LOUISE SAWYER, Plaintiff, v. SOUTHWEST AIRLINES, Defendant. GRACE FULLER, Plaintiff, v. SOUTHWEST AIRLINES, Defendant.**

**CIVIL ACTION No. 01-2385-KHV, CIVIL ACTION No. 01-2386-KHV**

**UNITED STATES DISTRICT COURT FOR THE DISTRICT OF KANSAS**

*2002 U.S. Dist. LEXIS 25111*

**December 23, 2002, Decided**

**DISPOSITION:** [\*1] Plaintiffs' Motion to Compel Production of Documents denied in part.

compel except as to six documents, which the Court will inspect *in camera* to determine whether they are protected by work product [\*2] immunity.

**COUNSEL:** For LOUISE SAWYER, plaintiff: Scott A. Wissel, Lewis, Rice & Fingersh, L.C., Kansas City, MO.

**I. Factual Background**

For SOUTHWEST AIRLINES, defendant: John W. Cowden, Mary C. O'Connell, Baker, Sterchi, Cowden & Rice, L.L.C., Kansas City, MO. Todd W. Amrein, Phoenix, AZ.

In these two consolidated cases, Plaintiffs assert civil rights claims pursuant to 42 U.S.C. § 1981. In addition, Plaintiff Fuller alleges claims for intentional and negligent infliction of emotional distress, while Plaintiff Sawyer alleges only a claim for intentional infliction of emotional distress.

**JUDGES:** David J. Waxse, United States Magistrate Judge.

Global Aerospace ("Global") is Southwest's insurer and has a duty to defend Southwest with respect to the claims asserted in these consolidated cases. n1 At issue in this motion to compel are documents that were exchanged between Southwest and Global in connection with this action.

**OPINION BY:** David J. Waxse

**OPINION:**

n1 Ida Loubier Aff, Ex. 1 attached to doc. 73.

**MEMORANDUM AND ORDER**

This matter is before the Court on Plaintiffs' Motion to Compel Production of Documents (doc. 72). Plaintiffs ask the Court to overrule Defendant Southwest Airlines' ("Southwest") objections to Plaintiff Grace Fuller's First Request for Production of Documents that are based on the assertion of attorney-client privilege and work product protection and to compel production of the alleged privileged and protected documents. For the reasons set forth below, the Court will deny the motion to

In its August 17, 2002 responses to the requests for production, Southwest objected to producing any documents that were protected by the attorney-client privilege and work product doctrine. Southwest also objected to producing certain documents that it contended were protected from disclosure by the insurer/insured

027605

privilege. [\*3] Southwest did not provide a privilege log until September 23, 2002. On October 4, 2002 Southwest served a consolidated privilege log, and Plaintiffs filed the instant motion to compel on October 17, 2002. Southwest responded to the motion to compel and provided an amended version of the privilege log ("Amended Privilege Log") on October 28, 2002.

In its response to the motion to compel, Southwest states that it has abandoned its assertion of the insurer/insured privilege and has provided to Plaintiffs the documents it withheld based on that privilege. Thus, those objections and documents are no longer at issue. The objections at issue are only those based upon the attorney-client privilege and work product doctrine.

## II. Analysis

### A. Did Southwest Waive the Right to Assert Attorney-Client Privilege and Work Product Protection by Failing to Timely Serve a Privilege Log?

Plaintiffs first argue that the motion to compel should be granted because Southwest waited more than two months after it served its initial responses to the requests for production to provide a meaningful privilege log. The Court will decline to find waiver. The Court will therefore proceed to analyze [\*4] the merits of Southwest's privilege and work product objections and determine whether the Amended Privilege Log is sufficient to satisfy Southwest's obligations.

#### B. Attorney-Client Privilege

##### 1. Applicable law

Whether the court applies federal or Kansas law generally makes no difference in determining whether the attorney-client privilege applies. n2 This is because the essential elements of the attorney-client privilege are nearly identical under both Kansas and federal law. n3 Moreover, "the Kansas statute concerning the attorney-client privilege and its exceptions is typical of the laws of other jurisdictions." n4

n2 *Simmons Foods, Inc. v. Willis*, 191 F.R.D. 625, (D. Kan. 2000) (citations omitted).

n3 *Marten v. Yellow Freight Sys., Inc.*, 1998 U.S. Dist. LEXIS 268, No. 96-2013- GTV, 1998 WL 13244, at \*7 (D. Kan. Jan. 6 1998).

n4 *In re A.H. Robins Co.*, 107 F.R.D. 2, 8 (D. Kan. 1985) (citation omitted).

Under Kansas law, the essential elements of the privilege are: [\*5]

(1) Where legal advice is sought (2) from a professional legal advisor in his capacity as such, (3) the communications made in the course of that relationship (4) made in confidence (5) by the client (6) are permanently protected (7) from disclosures by the client, the legal advisor, or any other witness (8) unless the privilege is waived. n5

n5 *State v. Maxwell*, 10 Kan. App. 2d 62, 63, 691 P.2d 1316 (1984) (citation omitted).

Similarly, the essential elements of the privilege under federal common law are:

(1) Where legal advice of any kind is sought (2) from a professional legal adviser in his capacity as such, (3) the communications relating to that purpose, (4) made in confidence (5) by the client, (6) are at his instance permanently protected (7) from disclosure by himself or by the legal adviser, (8) except the protection be waived. n6

n6 *Great Plains Mut. Ins. Co.*, 150 F.R.D. 193, 196 n.4 (D. Kan. 1993).

[\*6]

Under both Kansas and federal law, the attorney-client privilege protects confidential communications made by a client to an attorney in order to obtain legal assistance from the attorney in his or her capacity as a legal advisor. n7 Under both laws, the term "communications" includes advice given by the attorney in the course of representing the client. n8 It also includes disclosures by the client to the attorney's representative or employee incidental to the professional relationship. n9

n7 *Simmons Foods*, 191 F.R.D. at 632; *Marten*, 1998 U.S. Dist. LEXIS 268, 1998 WL 13244, at \*6.

n8 *Simmons Foods*, 191 F.R.D. at 632; *Marten*, 1998 U.S. Dist. LEXIS 268, 1998 WL 13244, at \*6. See also *K.S.A. 60-426(c)(2)*.

n9 *Simmons Foods*, 191 F.R.D. at 632; *Marten*, 1998 U.S. Dist. LEXIS 268, 1998 WL 13244, at \*6. See also *K.S.A. 60-426(c)(2)*.

2. *Is the attorney-client privilege applicable here and has it been waived?*

Plaintiffs assert that Southwest has waived any attorney-client privilege existing [\*7] between Southwest and its attorney John Cowden by disclosing the documents to Global. Southwest responds that Global is also a client of Southwest's attorney John Cowden, and, thus, an attorney-client relationship also exists between Global and Cowden. Southwest further asserts that a claims attorney for Global requested legal advice and consultation from Cowden and that he provided that legal advice and consultation through written communications that are the subject of the motion to compel. In reply, Plaintiffs argue that the mere fact that Global is also a client of Cowden's does not save the privilege or protection. They argue that regardless of the attorney-client relationship between Global and Cowden, Global is still a third-party to any communications between Southwest and Cowden, and thus, when the communications between Cowden and Southwest were disclosed to Global, the privilege was waived. Plaintiffs claim that the proper objection in such a situation would have been for Southwest to assert objections based on either the joint defense doctrine or the common interest doctrine. Plaintiffs argue that because Southwest has never asserted either of these objections, any privilege [\*8] existing under those doctrines has been waived.

The Court disagrees, and, for the reasons discussed below, finds the common interest doctrine to be applicable here. Although Southwest has not expressly asserted the doctrine by name, Southwest has established all of the necessary elements of the doctrine.

3. *The common interest doctrine*

Generally, when a communication between a client

and an attorney occurs in the presence of third parties, the attorney-client privilege is waived. n10 The common interest doctrine, however, affords two parties with a common legal interest a safe harbor in which they can openly share privileged information without risking the wider dissemination of that information. n11 The common interest doctrine can only exist where there is an applicable underlying privilege, such as the attorney-client privilege or the work-product doctrine. n12

n10 *Lewis v. UNUM Corp. Severance Plan*, 203 F.R.D. 615, 620 (D. Kan. 2001).

n11 *Johnson Matthey, Inc. v. Research Corp.*, 2002 U.S. Dist. LEXIS 13560, No. 01 CIV.8115MBMFM, 2002 WL 1728566, at \*6 (S.D. N.Y. July 24, 2002)

[\*9]

n12 *Cavallaro v. U.S.*, 284 F.3d 236, 240 (1st Cir. 2002); *In re Megan-Racine*, 189 Bankr. 562, 571.

Admittedly, there is no Kansas statute or case that recognizes the common interest doctrine as a distinct privilege. n13 The Court, however, does not find that to be fatal to the assertion of the doctrine. Most commentators and courts view it not as a separate privilege, but as an exception to waiver of the attorney-client privilege. n14 The common interest doctrine thus acts as an exception to the general waiver rule by facilitating cooperative efforts among parties who share common interests. n15

n13 *In State v. Maxwell*, 10 Kan.App.2d 62, 691 P.2d 1316 (1984), the Kansas Court of Appeals addressed a similar doctrine relating to an attorney's joint defense of two or more clients. The Court finds that doctrine inapplicable here, however, as Global is not a co-defendant of Southwest in this litigation.

n14 See, e.g., *U.S. Info. Sys., Inc. v. Int'l Broth. of Elec. Workers Local Union No. 3*, 2002 U.S. Dist. LEXIS 19363, No. 00 CIV.4763RMBJCF, 2002 WL 31296430, at \*3

(S.D. N.Y., Oct. 11, 2002) ("the joint defense privilege or common interest rule is not really a separate privilege. Rather, it is a limited exception to the general rule that the attorney-client privilege is waived when a protected communication is disclosed to a third party outside the attorney-client relationship.") (citation omitted); *Johnson Matthey, Inc. v. Research Corp.*, 2002 U.S. Dist. LEXIS 13560, No. 01 CIV.8115MBMFM, 2002 WL 1728566, at \*6 (S.D. N.Y. July 24, 2002) ("The common interest exception is not an independent privilege, but an extension of the attorney-client privilege which serves to protect the confidentiality of communications passing from one party to the attorney for another party where a joint defense effort or strategy has been decided upon and undertaken by the parties and their respective counsel."); *Miller v. Alagna*, 138 F. Supp. 2d 1252, 1256 (C.D. Cal. 2000) (California law recognizes a "joint client" or "common interest" exception to the attorney-client privilege); *Roberts Aircraft Co. v. Kern*, No. 96- N-1214, 1997 WL 524894, at 3 (D. Colo. March 20, 1997) ("The 'common interest' doctrine is an exception to an otherwise applicable attorney-client privilege.").

[\*10]

n15 *In re Megan-Racine Assoc., Inc.*, 189 Bankr. 562, 571 (N.D. N.Y. 1995).

For the common interest doctrine to attach, "most courts . . . insist that the two parties have in common an interest in securing legal advice related to the same matter -- and that the communications be made to advance their shared interest in securing legal advice on that common matter." n16 "The key consideration is that the nature of the interest be identical, not similar, and be legal, not solely commercial." n17

n16 *First Pacific Networks, Inc. v. Atlantic Mut. Ins. Co.*, 163 F.R.D. 574, 581 (N.D. Cal. 1995) (citations omitted); *accord Strougo v. BEA Assoc.*, 199 F.R.D. 515, 525 (S.D. N.Y. 2001) (to invoke the "common interest" exception, a party must show that the communications were made in

the course of a joint defense effort or that the clients share a common legal interest, and that the statements were designed to further the common effort); *Libbey Glass, Inc. v. Oneida, Ltd.*, 197 F.R.D. 342, 348 (N.D. Ohio 1999) (parties must have a common legal, as opposed to commercial, interest and show that the communications are made in the course of formulating a common legal strategy).

[\*11]

n17 *Johnson Matthey*, 2002 U.S. Dist. LEXIS 13560, 2002 WL 1728566, at \*6 (citations omitted).

The Court finds that these elements have been satisfied here. Southwest has established that Southwest and Global, who has a duty to defend Southwest in this case, have an interest in common and that the interest of a legal and not commercial nature. Southwest has provided the affidavit of Ida Loubier, n18 a claims attorney for Global. Her affidavit establishes that, pursuant to Global's duty to defend Southwest, she retained Cowden as the attorney to defend Southwest in these consolidated cases and to provide legal advice in connection with all matters relating to the lawsuits. Her affidavit also establishes that, as a representative of Global, she requested and obtained legal advice from Cowden in connection with matters relating to the cases.

n18 See Ex. 1, attached to doc. 73.

In light of the above, the Court holds that Southwest has [\*12] established sufficient evidence to warrant application of the common interest exception to the waiver of any attorney-client privilege. Although Southwest did not use the term "common interest" doctrine or exception in asserting that the documents were privileged, it has shown that the necessary elements exist with respect to the claimed privileged documents. To fault Southwest for not using the correct terminology, when all of the elements have been satisfied, would elevate form over substance and would contravene the important policies underlying the attorney-client privilege. As the Kansas Supreme Court has emphasized, "the attorney-client privilege is important to the

administration of justice and should not be set aside lightly." n19

n19 *Wallace Saunders, Austin, Brown & Enochs, Chartered v. Louisburg Grain Co., Inc.*, 250 Kan. 54, 62, 824 P.2d. 933 (1992).

In sum, the Court holds that the common interest doctrine applies here and the documents exchanged between Southwest and Global retain [\*13] their attorney-client privileged status. Plaintiffs' motion to compel will therefore be denied with respect to the documents that Southwest has asserted are attorney-client privileged.

### B. Work Product Protection

The Court will now proceed to determine whether Southwest has properly asserted work product protection. Of the hundreds of documents listed in the Amended Privilege Log, only sixteen are identified solely as work product. n20 This analysis thus pertains to only those sixteen documents.

n20 Most of the documents identified in the Amended Privilege Log as work product are also identified as attorney-client privileged communications. Because the Court has upheld the assertion of the attorney-client privilege, the Court need not determine whether those documents are also protected by work product immunity.

1. *Are the documents protected by work product immunity?*

"Unlike the attorney client privilege, the work product privilege is governed, even in diversity cases, by a uniform federal standard [\*14] embodied in *Fed.R.Civ.P. 26(b)(3)*." n21 Thus, the Court will apply federal law to determine whether Southwest's assertion of work product protection should be upheld.

n21 *Frontier Refining, Inc. v. Gorman-Rupp Co., Inc.*, 136 F.3d 695, 702 (10th Cir. 1998) (citation omitted).

As the party asserting work product protection, Southwest has the burden of establishing that the work product doctrine applies. n22 To carry that burden, Southwest must make a "clear showing" that the asserted objection applies. n23 Southwest must show that "(1) the materials sought to be protected are documents or tangible things; (2) they were prepared in anticipation of litigation or for trial; and (3) they were prepared by or for a party or a representative of that party." n24

n22 *Disidore v. Mail Contractors of America, Inc.*, 196 F.R.D. 410, 413 (D. Kan. 2000) (citations omitted).

n23 *Id.* (citations omitted).

[\*15]

n24 *Johnson v. Gmeinder*, 191 F.R.D. 638, 643 (D. Kan. 2000) (citations omitted).

Applying these standards here, the Court finds that Southwest has established that all but the following documents are protected by work product immunity: PRIV 157, 158, 219, 245, 246, and 328. Southwest has failed to show that these six documents were prepared in anticipation of litigation or for trial. Southwest shall provide copies of those documents to the Court for an *in camera* inspection so that the Court may determine whether they are in fact protected by work product immunity. Southwest shall submit these documents to the Court within **seven (7) days** of the date of this Memorandum and Order.

2. *Are Plaintiffs entitled to review the work product documents regardless of their protected status?*

Plaintiffs assert that even if the Court finds that the documents are protected work product, Plaintiffs have a substantial need for these documents and that they should therefore be produced pursuant to *Fed.R.Civ.P. 26(b)(3)*. Under that rule, a party may discover work product "upon [\*16] a showing that the party seeking discovery has substantial need of the materials in the preparation of the party's case and that the party is unable without undue hardship to obtain the substantial equivalent of the materials by other means." n25

n25 *Fed.R.Civ.P 26(b)(3)*.

Plaintiffs have made no showing of "substantial need." The Court will therefore deny the motion to compel as it pertains to the documents that the Court has determined are protected by work product immunity.

**IT IS THEREFORE ORDERED** that Plaintiffs' Motion to Compel Production of Documents (doc. 72) is denied in all respects except with respect to the six documents identified as PRIV 157, 158, 219, 245, 246, and 328 in Southwest's Amended Privilege Log. Within **seven (7) days** of the date of this Memorandum and

Order, Southwest shall provide copies of those documents to the Court for the Court's *in camera* inspection. The Court will defer ruling on the Motion to Compel as it pertains to those six documents until the Court has [\*17] reviewed said documents.

**IT IS SO ORDERED.**

Dated in Kansas City, Kansas on this 23rd day of December 2002.

David J. Waxse

Deering, LEAD ATTORNEY, Parry, Deering, Futscher & Sparks PSC, Covington, KY; Douglas Bowdoin, LEAD ATTORNEY, Douglas Bowdoin, PA, Orlando, FL; Tamra C. Givens, Terry A. Smiljanich, W. Christian Hoyer, LEAD ATTORNEYS, James, Hoyer, Newcomer & Smiljanich, PA, Tampa, FL.

For Triad Guaranty Insurance Corp., Defendant: Jennifer R. Vala, Lisa Wolgast, Nolan C. Leake, LEAD ATTORNEYS, King & Spalding, LLP, Atlanta, GA; Ronald G. Sheffer, LEAD ATTORNEY, Sheffer Law Firm, PLLC, Louisville, KY.

**JUDGES:** E. Robert Goebel, United States Magistrate Judge.

**OPINION BY:** E. Robert Goebel

**OPINION:**

**[\*217] ORDER**

Before the Court are Plaintiff's Motion to Compel (DN 103), Plaintiff's supplement (DN 116), Defendant's response (DN 120), Plaintiff's reply (DN 129), and Defendant's sur-reply (DN 142). At issue are documents that Defendant has withheld from production on claim of work-product protection, the attorney-client privilege, and/or the joint defense/common interest privilege. Pursuant to an earlier order (DN 132), Defendant submitted directly to the undersigned for *in camera* inspection all documents that it **[\*\*2]** has withheld from production on claim of privilege or work-product protection. For the reasons set forth below, Plaintiff's motion is granted in part and denied in part. **[\*218]**

A

Pursuant to *Rule 26(b)(1)*, discovery must be "relevant to the claim or defense of any party." *Fed.R.Civ.P. 26(b)(1)(2000 Amendment)*, Advisory Committee's Note, 2000 amendments; see *Phalp v. City of Overland Park, Kansas, 2002 U.S. Dist. LEXIS 9684, 2002 WL 1162449, \*3 fn.3 (D.Kan. 2002)*. The undersigned notes that four of the documents withheld by Defendant are joint defense agreements. See 007382-007392, 00751-007581, 008962-008966, 008967-008976. The parties have argued vigorously on the question of whether these documents are privileged. However, both seemed to have overlooked a precedent

issue. Specifically, are these documents relevant within the meaning of *Rule 26(b)(1)*? While these documents may be helpful to the Court in addressing this discovery dispute, they are not "relevant to the claim or defense of any party." *Fed.R.Civ.P. 26(b)(1)*. For this reason, the undersigned concludes the joint defense agreements are not discoverable. [\*\*3]

Defendant appears to concede that the remainder of the withheld documents are relevant (DN 120). For this reason the undersigned will turn to Defendant's claim or claims of privilege as to each document withheld from production. The parties agree that federal common law on privilege applies to this discovery dispute.

*Rule 26(b)(1) of the Federal Rules of Civil Procedure* mandates that privileged matters are afforded an absolute protection from discovery. This is distinguishable from the qualified protection from discovery that is afforded work-product. n1 *Fed.R.Civ.P. 26(b)(3)*; *In re Perrigo Company*, 128 F.3d 430, 437 (6th Cir. 1997) (citations omitted); *Toledo Edison Co.*, 847 F.2d 335, 338-341 (6th Cir. 1988).

n1 The protection afforded work-product is not a privilege as the term is used in the Rules of Civil Procedure or the Law of Evidence. *Hickman v. Taylor*, 329 U.S. 495, 509-510, 67 S. Ct. 385, 91 L. Ed. 451 & n. 9 (1947). If an adverse party demonstrates substantial need and an inability to obtain the equivalent without undue hardship then the Court may order such work-product be produced, provided it does not reveal an attorney's mental impressions and opinions. *In re Perrigo Company*, 128 F.3d 430, 437 (6th Cir. 1997) (citations omitted); *Toledo Edison Co.*, 847 F.2d 335, 338-341 (6th Cir. 1988).

[\*\*4]

B

Defendant has asserted only the attorney-client privilege as to documents 007283-07286, 007564, 007650-007651, 007654, 007662, 007665, 007671-007672, 007685, 007688-007689, 007690-007692, 007693, 007698-007699, 007759-007760, 007761, and 007806.

Case law often articulates the elements of the

attorney-client privilege as follows:

"(1) Where legal advice of any kind is sought (2) from a professional legal adviser in his capacity as such, (3) the communications relating to that purpose, (4) made in confidence (5) by the client, (6) are at his instance permanently protected (7) from disclosure by himself or by the legal adviser, (8) unless the protection is waived."

*Reed v. Baxter*, 134 F.3d 351, 355-356 (6th Cir. 1998) (citations omitted). However, these elements apply to only a portion of the confidential communications that courts have deemed subject to the attorney-client privilege. For example, the privilege applies to confidential communications from counsel to client that set forth legal advice or reveal the substance of the client confidence. *United States v. Defazio*, 899 F.2d 626, 635 (7th Cir. 1990) (citations omitted); *Bank Brussels Lambert v. Credit Lyonnais*, 160 F.R.D. 437, 441-442 (S.D.N.Y. 1995) [\*\*5] (citations omitted). The attorney-client privilege also extends to communications made by noncontrol group employees (1) at the direction of their superiors, (2) in order to secure legal advice for the corporation, (3) about matters within the scope of the employee's corporate duties; and (4) while the employees were aware that they were being questioned in order that the corporation could obtain legal advice. *Upjohn Co. v. United States*, 449 U.S. 383, 394, 101 S. Ct. 677, 66 L. Ed. 2d 584 (1981). Additionally, confidential communications disclosed to or made in the presence of certain agents of the attorney (e.g., accountants, engineers, or experts) to further the rendition of legal advice or in connection with the legal representation are subject to the attorney-client [\*219] privilege. See e.g., *United States v. Schwimmer*, 892 F.2d 237, 243 (2d Cir. 1989). Further, the privilege extends to communications among corporate employees that reflect legal advice rendered by counsel to the corporation. *In re Grand Jury 90-1,758 F.Supp. 1411, 1413 (D.Colo. 1991)* (President of the corporation conveyed in a letter to the Board of Directors legal advice he received from outside counsel); [\*\*6] *SCM Corp. V. Xerox Corp.*, -70 F.R.D. 508, 518 (D. Conn.) appeal dismissed, 534 F.2d 1031, 1032 (2d Cir. 1976) ("A privileged communication should not lose its protection if an executive relays legal advice to

another who shares responsibility for the subject matter underlying the consultation.").

The burden of establishing the existence of the attorney-client privilege rests with Defendant because it is asserting the privilege in response to Plaintiff's discovery requests. *U.S. v. Dakota*, 197 F.3d 821, 825 (6th Cir. 1999) (citing *In re Grand Jury Investigation No. 83-2-35*, 723 F.2d 447, 450 (6th Cir.1983)); see also *Ross v. City of Memphis*, 423 F.3d 596, 606 (6th Cir. 2005).

After considering the arguments of the parties and conducting a review of documents 007283-07286, 007564, 007650-007651, 007654, 007662, 007665, 007671-007672, 007685, 007688-007689, 007690-007692, 007693, 007698-007699, 007759-007760, 007761, and 007806, the undersigned concludes that Defendant has satisfied its burden of demonstrating that each communication or note summarizing a communication is subject to the attorney-client [\*\*7] privilege.

### C

Defendant has asserted the joint defense/common interest privilege as to the remainder of the documents it has withheld from production. n2

n2 In a few instances Defendant has also asserted the attorney-client privilege. See documents 007380-007381, 007559, 007560, 007652-007653, 007660-007661, 007663-007664, 007666-007667, 007673-007674, 007675-007676, 007679-007680, 007681-007682, 007683-007684, 007686-007687, 007694-007695, 007696-007697, 007700-007701, 007709-007714, and 007820. For the reasons set forth in this section, the assertion of both privileges is redundant.

"The common interest privilege is not an independent basis for privilege, but an exception to the general rule that the attorney-client privilege is waived when privileged information is disclosed to a third party." Edna Selan Epstein, *The Attorney-Client Privilege and the Work-Product Doctrine*, American Bar Association Section of Litigation at 196 (4th ed. 2001). For this reason, it "assumes the existence of a valid underlying

[\*\*8] privilege." *Id.* Additionally, it assumes "there is a valid basis for exchanging information with a third party without undermining the requirement of confidentiality for the attorney-client privilege to apply." *Id.* "In effect, it states that privileged communications shared among and within some group of people will be deemed to have been made in confidence." *Id.*

Essentially, there are three situations where this exception is deemed to apply. *Id.* at 200-206. The first being a single attorney representing multiple clients in the same matter. *Id.* at 200-201. The first situation does not apply to the circumstances herein.

Another situation where the common interest is deemed sufficient to preclude waiver is when parties share a common defense. *Id.* at 201. This joint defense concept developed in the "criminal context when multiple defendants, each having separate counsel, share information to effect a united defense." *Id.* More and more, to protect the joint defense privilege, parties enter into written joint defense agreements in an effort to assure that information shared among the attorneys for each of the defendants will remain privileged despite the sharing. [\*\*9] *Id.* Here, Defendant and the other six members of the mortgage insurance industry in the United States did just that in May 2003. All seven signatories to this agreement appreciated the need to pool their resources in preparing a common or united defense to the claims asserted in an alleged class action suit filed against one of its members, Mortgage Guaranty Insurance Corporation ("MGIC") (DN 120, Exhibit 1, Affidavit of Earl Wall; 007382-007392). Essentially, all seven members [\*220] recognized they may become co-defendants in that action or become defendants in an alleged class action raising the same claims (DN 120, Exhibit 1, Affidavit of Earl Wall; 007382-007392). While the seven members of the mortgage insurance industry did not become co-defendants in the same civil action, all but one are presently defending against the same claims asserted in six alleged class action lawsuits prosecuted by the same law firm.

The third and final situation where the common interest is deemed sufficient to preclude waiver is "when two or more clients share a common legal or commercial interest and, therefore, share legal advice with respect to that common interest." *Id.* at 203. "The common [\*\*10] interest doctrine encourages parties working with a common purpose to benefit from the guidance of counsel,

and thus avoid pitfalls that otherwise might impair their progress toward their shared objective." *Id.* The doctrine has evolved from *Duplan Corp. v. Deering Milliken*, 397 F.Supp. 1146 (D.S.C. 1974), "which was limited to a common shared legal, rather than a common shared financial or commercial, interest." Epstein, *supra*, at 203. Notably, "[u]nlike the joint defense privilege, the common interest does not require or imply that an actual suit is or ever will be pending." *Id.*

After considering the arguments of the parties as well as the affidavits of Earl F. Wall, General Counsel of Defendant, and Suzanne C. Hutchinson, Executive Vice-President of the Mortgage Insurance Companies of America ("MICA"), the undersigned concludes the third situation applies to the circumstances herein. True, the seven members of the mortgage insurance industry did enter into a joint defense agreement in May of 2003. However, as evidenced by many of the documents withheld and indicated in Mr. Wall's affidavit, these seven companies and the trade organization they created, [\*\*11] MICA, have clearly shared a "common legal interest" n3 that extends beyond pooling their resources to prepare a common or united defense to the claims asserted in an alleged class action suit. Defendant has satisfied its burden of demonstrating a "common legal interest" with the other six members in the industry and MICA that extends to legislative and regulatory matters, as well as in matters in litigation or which could lead to litigation. For this reason, the undersigned finds Defendant's assertion of the common interest privilege well-taken, including the communications made years before the filing of this action and made after Radian Guaranty, Inc. ("Radian") withdrew as a member of MICA in July of 2003. n4

n3 There are two lines of cases that reflect differing views regarding the common interest arrangement. *Id.*; *Libbey Glass, Inc. v. Oneida, LTD.*, 197 F.R.D. 342, 348 (N.D. Ohio 1999). The undersigned has applied the more restrictive standard which is expressed in *Bank Brussels Lambert v. Credit Lyonnais*, 160 F.R.D. 437, 447 (S.D.N.Y. 1995). Epstein, *supra*, at 203-204, 206; *Libbey Glass, Inc.*, 197 F.R.D. at 348. In *Bank Brussels Lambert* the Court concluded:

"The common interest doctrine, then, has both a theoretical and a

practical component. In theory, the parties among whom privileged matter is shared must have a common legal, as opposed to commercial, interest. In practice, they must have demonstrated cooperation in formulating a common legal strategy."

160 F.R.D. at 447. Notably, the common interest doctrine, "does not encompass a joint business strategy which happens to include as one of its elements a concern about litigation." *Id.*

[\*\*12]

n4 The undersigned concludes that Radian's business dispute with MICA on an unrelated matter does not prevent it from continuing to share this "common legal interest" with Defendant, the other five members of the industry and MICA.

Defendant recently produced the Property Casualty Insurers Association of America ("PCIAA") documents discussed in Plaintiff's motion to compel. n5 Thus, the Court need not address Plaintiff's arguments regarding those documents.

n5 Defendant provided this information in the cover letter that accompanied the withheld documents it submitted to the undersigned for an *in camera* review.

The undersigned has considered Plaintiff's argument regarding document 007566-007568 (DN 129 at page 2 and footnote 3) and concludes the common interest privilege does apply because on March 6, 1998, Amerin was a mortgage insurance company that [\*221] shared a common legal interest with Defendant, the other members in [\*\*13] the industry and MICA. According to Defendant, Amerin subsequently merged with another mortgage insurance company to form Radian in 1999 (DN 142 at 3).

The undersigned has also considered Plaintiff's

argument regarding 007431-007433, 007434-007436, 007887-007889. An *in camera* review of these documents reveals that each document sets forth a series of emails, the earlier of which were copied to Pete Mills with Countrywide, a lender. Certainly, the common interest privilege does not apply to the emails that were copied to Mr. Mills. However, the common interest privilege does apply to the subsequent emails. In sum, Defendant may redact from each document the emails that were not copied to Pete Mills before it produces the three documents.

Next, the undersigned concludes that no privilege applies to the following documents 007438-007441, 007443-007458, 007461-007496, 007584-007620, 007704-007706, 007765-007771, 007773-007779, 008168-008234. These non-privileged documents are attachments to communications that are subject to privilege. The undersigned has considered whether these attachments are protected from discovery under the work-product doctrine. n6 While each of these documents [\*\*14] were prepared or obtained before or during this litigation, the undersigned concludes only 007584-007620 was obtained or prepared because of litigation and not for some other purpose. *Toledo Edison Co.*, 847 F.2d 335, 339, 341 (6th Cir. 1988); Edna Selan Epstein, *The Attorney-Client Privilege and the Work-Product Doctrine*, American Bar Association Section of Litigation at 506 (4th Ed. 2001). Reading the material at 007584-007620 could very well reveal the mental impressions, opinions, and trial strategy of Defendant's counsel. Since case law and *Rule 26(b)(3)* imply a near absolute protection is to be accorded to such work-product, the undersigned concludes it should not be produced to Plaintiff. *Hickman v. Taylor*, 329 U.S. 495, 510-513, 67 S. Ct. 385, 91 L. Ed. 451 (1947); see also *Upjohn Co. V. United States*, 449 U.S. 383, 400-402, 101 S. Ct. 677, 66 L. Ed. 2d 584 (1981); *In re Perrigo Company*, 128 F.3d 430, 437 (6th Cir. 1997) (citations omitted); *Toledo Edison Co.*, 847 F.2d at 338-341. Notably, "only disclosures that are 'inconsistent with the adversary system' are deemed to waive work-product

protection." Epstein, *supra*, at 610. Since the material has [\*\*15] not been disclosed to an adversary the undersigned concludes a waiver has not occurred. In sum, Defendant shall produce 007438-007441, 007443-007458, 007461-007496, 007704-007706, 007765-007771, 007773-007779, and 008168-008234 because they are not subject to privilege.

n6 If the document can be said to have been obtained or prepared in anticipation of litigation then it is entitled to a qualified protection from discovery. See *In re Perrigo Company*, 128 F.3d 430, 437 (6th Cir. 1997); *Toledo Edison Co.*, 847 F.2d 335, 338-341 (6th Cir. 1988); see also *Arkwright Mutual Insurance Co. v. National Union Fire Insurance Co.*, 1994 U.S. App. LEXIS 3828, 1994 WL 5899, \* 3 (6th Cir. 1994) (unpublished opinion).

**IT IS HEREBY ORDERED** that Plaintiff's motion to compel is GRANTED IN PART AND DENIED IN PART.

**IT IS FURTHER ORDERED** that on or before August 28, 2006, Defendant shall produce to Plaintiff redacted versions of 007431-007433, 007434-007436, 007887-007889. Specifically, Defendant [\*\*16] may redact from each document the emails that were not copied to Pete Mills.

**IT IS FURTHER ORDERED** that on or before August 28, 2006, Defendant shall produce copies of 007438-007441, 007443-007458, 007461-007496, 007704-007706, 007765-007771, 007773-007779, 008168-008234.

CORP.**

No. 73-1316

**SUPREME COURT OF THE UNITED STATES**

*421 U.S. 168; 95 S. Ct. 1491; 44 L. Ed. 2d 57; 1975 U.S. LEXIS 119; 1 Media L.  
Rep. 2487; 20 Cont. Cas. Fed. (CCH) P83,865*

**Argued January 14, 1975  
April 28, 1975**

**PRIOR HISTORY:**

CERTIORARI TO THE UNITED STATES COURT  
OF APPEALS FOR THE DISTRICT OF COLUMBIA  
CIRCUIT

**SUMMARY:**

An action instituted by a government defense contractor under the Freedom of Information Act (5 USCS 552) in the United States District Court for the District of Columbia raised the issue whether the Act required public disclosure of various documents generated by the Renegotiation Board and its Regional Boards in determining whether government defense contractors were liable to the government for excessive profits realized on government contracts subject to the Renegotiation Act of 1951 (50 USCS App 1211 et seq.)--the specific documents involved having been issued with regard to renegotiation proceedings with certain contractors during a period ending in 1965. The plaintiff sought disclosure of (1) those Regional Board Reports which had been submitted to the Renegotiation Board, and which recommended that "clearances" be

issued to the contractor on the basis of findings that no excessive profits had been realized, the Board having subsequently approved the "clearances," and (2) Division Reports which had been submitted to the Renegotiation Board by a "division" of the Board (usually consisting of three of its five members) assigned to determine the amount of excessive profits after the contractor was unable to agree with a Regional Board as to such amount, and which included recommendations for final disposition of the cases, along with any additional or contrary views of division members. The District Court held that the reports were "final opinions," within the Freedom of Information Act's disclosure provisions (5 USCS 552(a)(2)(A)), and were not within the Act's fifth exemption (5 USCS 552(b)(5)) from disclosure for "inter-agency or intra-agency memorandums" (325 F Supp 1146, 20 ALR Fed 370). The United States Court of Appeals for the District of Columbia Circuit affirmed (157 App DC 121, 482 F2d 710, 20 ALR Fed 383).

On certiorari, the United States Supreme Court reversed. In an opinion by White, J., expressing the views of seven members of the court, it was held that (1) the reports involved were not "final opinions" subject to disclosure under the Freedom of Information Act, but

027616

instead fell within the Act's fifth exemption for "inter-agency or intra-agency" memoranda, since (a) only the full Renegotiation Board had the power by law to decide whether excessive profits existed, neither the Regional Boards nor the divisions of the Renegotiation Board having any decisional authority, (b) both types of reports were prepared for use by the Renegotiation Board in its deliberations, thus constituting the kind of predecisional recommendations contemplated by the Act's fifth exemption, and (c) there was no showing that the reasoning in the reports was adopted by the Board as its reasoning, even when it agreed with the conclusion of the report; and (2) it was unnecessary to determine whether the Regional Boards were "agencies" for the purposes of the Act, since if they were separate agencies, their final recommendation would be "inter-agency" memoranda under the Act's fifth exemption, and if they were not separate agencies, their recommendations would be "intra-agency" memoranda under the exemption.

Douglas, J., dissented.

Powell, J., did not participate.

LAW §64

WAR §15.3

Freedom of Information Act -- Renegotiation Board --  
disclosure of Regional Board Reports --

Headnote:[1A][1B][1C]

Certain Regional Board Reports submitted to the Renegotiation Board and recommending that "clearances" be issued to government defense contractors on the basis of findings that no excessive profits had been realized by the contractors under contracts subject to the Renegotiation Act of 1951 (*50 USCS App 1211 et seq.*)--the Renegotiation Board having subsequently approved the "clearances"--are not "final opinions" made in the adjudication of cases within the meaning of the Freedom of Information Act provision making such final opinions available for public inspection (*5 USCS 552(a)(2)(A)*), but instead fall within the Act's fifth exemption from disclosure for "inter-agency or intra-agency memorandums" (*5 USCS 552(b)(5)*), where (1) only the Renegotiation Board has the power by law to decide whether excessive profits existed, the Regional Boards having no decisional authority whatever, (2) the

Regional Board Reports were prepared prior to the Renegotiation Board's decision and were used by the Board in its deliberations, thus constituting the kind of predecisional deliberative advice and recommendations contemplated by the Act's fifth exemption, and (3) there was no showing that the reasoning in the reports was adopted by the Renegotiation Board; it is unnecessary to determine whether the Regional Boards are themselves "agencies" for the purposes of the Freedom of Information Act, since if they are separate agencies, their final recommendations are "inter-agency" memoranda under the Act's fifth exemption, and if they are not agencies separate from the Renegotiation Board, their recommendations are "intra-agency" memoranda under the exemption.

[\*\*\*LEdHN2]

LAW §64

WAR §15.3

Freedom of Information Act -- Renegotiation Board --  
disclosure of Division Reports --

Headnote:[2A][2B]

Division Reports, which were submitted to the Renegotiation Board by a "division" of the Board (usually consisting of three of its five members) assigned to determine the amount of excessive profits realized by a government defense contractor after the contractor was unable to agree with a Regional Board as to the amount of excessive profits recoverable by the government under the Renegotiation Act of 1951 (*50 USCS App 1211 et seq.*), and which included a recommendation for final disposition of the matter, along with any additional or contrary views of division members, are not "final opinions, including concurring and dissenting opinions," made in the adjudication of cases within the meaning of the Freedom of Information Act provision making such "final opinions" available for public inspection (*5 USCS 552(a)(2)(A)*), but instead fall within the Act's fifth exemption from disclosure for "inter-agency or intra-agency memorandums" (*5 USCS 552(b)(5)*), where (1) only the full Renegotiation Board has the power by law to decide whether excessive profits existed, a division of the Board having no legal decisional authority but merely analyzing and recommending; (2) the Division Reports were prepared prior to the Board's decision for use in the deliberations by the full Board, including the members of the division who might change their minds and who might have included thoughts or arguments in the report with which they were not in

421 U.S. 168, \*, 95 S. Ct. 1491, \*\*;  
44 L. Ed. 2d 57, \*\*\*LEdHN2; 1975 U.S. LEXIS 119

agreement or which were not tentative; and (3) there was no showing that the reasoning in the reports was adopted by the Board as its reasoning, even when it agreed with the conclusion of a report.

[\*\*\*LEdHN3]

LAW §64

Freedom of Information Act -- exemption of intra-government memoranda --

Headnote:[3A][3B]

Subsection (b)(5) of the Freedom of Information Act (5 USCS 552(b)(5)) which exempts from public disclosure inter-agency or intra-agency memoranda that would not be available by law to a party other than an agency in litigation with the agency, does not include documents which are "final opinions" made in the adjudication of cases, subject to disclosure under the Act (5 USCS 552(a)(2)(A)).

[\*\*\*LEdHN4]

LAW §64

INSPECTION §13.5

Freedom of Information Act -- exemption of intra-government memoranda --

Headnote:[4]

Subsection (b)(5) of the Freedom of Information Act (5 USCS 552(b)(5))--which exempts from public disclosure inter-agency or intra-agency memoranda that would not be available by law to a party other than an agency in litigation with the agency--incorporates the privileges which the government enjoys under the relevant statutory and case law in the pretrial discovery context; and both the Freedom of Information Act's provision and the case law which it incorporates distinguish between predecisional memoranda prepared in order to assist an agency decisionmaker in arriving at his decision, which are exempt from disclosure, and postdecisional memoranda setting forth the reasons for an agency decision already made, which are not.

[\*\*\*LEdHN5]

LAW §64

Freedom of Information Act -- exemption of "inter-agency" memoranda --

Headnote:[5]

Since the exemption of certain memoranda from public disclosure contained in subsection (b)(5) of the Freedom

of Information Act (5 USCS 552(b)(5)) includes "inter-agency" memoranda as well as "intra-agency" memoranda, the exemption is intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency.

[\*\*\*LEdHN6]

LAW §64

WAR §15.3

Freedom of Information Act -- applicability to Renegotiation Board --

Headnote:[6A][6B]

Congress intended the Renegotiation Board to be subject to the provisions of the Freedom of Information Act (5 USCS 552).

[\*\*\*LEdHN7]

LAW §64

WAR §15.3

Renegotiation Board -- necessity of written opinions --

Headnote:[7]

Since the Renegotiation Act of 1951 (50 USCS App 1221) exempts the Renegotiation Board from all provisions of the Administrative Procedure Act (5 USCS 551 et seq.) except for the Public Information Section (Freedom of Information Act, 5 USCS 552), the opinion writing section of the Administrative Procedure Act (5 USCS 557) is inapplicable to Board decisions; and the Board has no affirmative obligation under the Freedom of Information Act to write opinions.

[\*\*\*LEdHN8]

LAW §64

Freedom of Information Act -- agency opinions --

Headnote:[8]

The Freedom of Information Act (5 USCS 552) imposes no independent obligation on agencies to write opinions; it simply requires them to disclose the opinions which they do write.

[\*\*\*LEdHN9]

COURTS §151

Renegotiation Board documents -- public disclosure -- matter for Congress --

Headnote:[9]

It is not for the United States Supreme Court, under the purported authority of the Freedom of Information Act (5 USCS 552), to require disclosure of documents of the Renegotiation Board and its Regional Boards which are not final opinions, which do not accurately set forth the reasons for the Board's decisions, and the disclosure of which would impinge upon the Board's pre-decisional processes; if the public interest suffers by reason of the Board's failure to explain some of its decisions, the remedy is for Congress to require it to do so.

#### SYLLABUS:

Pursuant to the Government contract renegotiation process in effect under the Renegotiation Act of 1951 for so-called Class A cases (those in which the contractor reported profits of more than \$ 800,000 on the relevant contracts) during the period involved in this case, if the Regional Board made a recommendation as to the amount of excessive profits in the year in issue rather than recommending a clearance, i. e., a unilateral determination that a contractor realized no excessive profits during the year in issue, the case, if the contractor declined to enter into an agreement, would be reassigned to the Renegotiation Board (Board). The case file, including the Regional Board Report, was then transmitted to the Board and assigned to a division of the Board, usually consisting of three of its five members, which in due course would make its own decision and submit to the full Board a Division Report, including a recommendation for final disposition of the case. If the Regional Board concluded that no excessive profits had been realized and that a clearance should therefore issue, a "final recommendation" that a clearance be issued was sent to the Board, which considered the case on the basis of the Regional Board Report. Respondent brought an action pursuant to the Freedom of Information Act (FOIA), 5 U. S. C. § 552, seeking disclosure of certain Regional Board Reports resulting in a recommendation of clearance and Board approval, and of Division Reports in other cases, all related to and issued during renegotiation proceedings involving 14 other companies during the period 1962-1965. The District Court ultimately granted relief on the grounds that both the Regional Board and Division Reports were "final opinions" within the meaning of § 552(a)(2)(A), which requires a Government agency to make available to the public "final opinions, including concurring and dissenting opinions, as well as

orders, made in the adjudication of cases," and were not exempt from disclosure under § 552(b)(5) (Exemption 5) as "inter-agency or intra-agency memorandums . . . which would not be available by law to a party other than an agency in litigation with the agency." The Court of Appeals affirmed, further holding that even if the Regional Board Reports were not "final opinions" of the Board, they were disclosable as final opinions of the Regional Board, which was to be considered an "agency" for purposes of the FOIA. Held: Neither the Regional Board nor Division Reports are final opinions and they do fall within Exemption 5, since (1) only the full Board has the power by law to make the decision whether excessive profits exist; (2) both types of reports are prepared prior to that decision and are used by the Board in its deliberations; and (3) the evidence fails to support the conclusion that the reasoning in the reports is adopted by the Board as its reasoning, even when it agrees with a report's conclusion. Pp. 183-190.

(a) The Regional Board Reports, being prepared long before the Board reached its decision and being used by it as a basis for discussion, are precisely the kind of predecisional deliberative advice and recommendations contemplated by Exemption 5 which must remain uninhibited and thus undisclosed, in order to supply maximum assistance to the Board in reaching its decision. Regardless of whether the Regional Boards are agencies for Class A purposes so that their final recommendations are inter-agency memoranda, or are not agencies separate from the Board so that their recommendations are intra-agency memoranda, the Regional Boards' total lack of decisional authority brings their reports within Exemption 5 and prevents them from being "final opinions." Pp. 185-188.

(b) Since the Division Reports were prepared before the Board reached its decision and to assist it in its deliberations, and were used by the full Board as a basis for discussion, the Board should not be deprived of such a thoroughly uninhibited version of this valuable deliberative tool by making such reports public on the unsupported assumption that they always disclose the final views of at least some Board members. Pp. 189-190. *157 U. S. App. D.C. 121, 482 F.2d 710, reversed.*

WHITE, J., delivered the opinion of the Court, in which BURGER, C. J., and BRENNAN, STEWART, MARSHALL, BLACKMUN, and REHNQUIST, JJ., joined. DOUGLAS, J., dissented. POWELL, J., took no

#### OPINION BY:

WHITE

#### OPINION:

[\*170] [\*\*\*62] [\*\*1493] MR. JUSTICE WHITE delivered the opinion of the Court.

The issue in this case is whether certain documents - documents generated [\*\*\*63] by the Renegotiation Board (Board) and by its Regional Boards in performing their task of deciding whether certain Government contractors have earned, and must refund, "excessive profits" on their Government contracts - are "final opinions" explaining the reasons for agency decisions already made, and thus expressly subject to disclosure pursuant to the Freedom of Information Act (Act), 5 U.S.C. § 552(a)(2)(A), or are instead predecisional consultative memoranda exempted from disclosure by § 552(b)(5). See *NLRB v. Sears, Roebuck & Co.*, ante, p. 132.

I

Essential to the consideration of whether the documents at issue in this case must be disclosed pursuant to the relevant provisions of the Act is an understanding of the renegotiation process, a process that itself serves to define the documents in issue and hereinafter described. n1 [\*171] Under the Renegotiation Act of 1951, 65 Stat. 7, as amended, 50 U.S.C. App. § 1211 et seq., the Government is entitled to recoup from those who hold contracts or subcontracts with certain departments of the Government [\*\*1494] any "excessive profits" received by such persons on such contracts. The amount of the profits which will be considered "excessive" in connection with a particular contract depends upon the statutory factors which are set forth in the margin. n2 As the Board's name suggests, it [\*172] endeavors to, and in fact does, conclude the vast majority of its cases by agreement. 50 U.S.C. App. § 1215(a) [\*\*\*64] (1970 ed., Supp. I). Absent an agreement, however, the Board must decide either to issue a "clearance," i.e., a unilateral determination that the contractor realized no excessive profits during the year in issue, or to issue a unilateral order fixing excessive profits at a specified amount and directing the contractor to refund them. The unilateral order is final unless a de novo determination regarding excessive profits is sought within 90 days before the Court of Claims. n3 It is in those cases not terminated by agreement that the documents at issue in this case were generated. n4 With this in mind, we turn to the details of the renegotiation process as it existed during the period relevant to the decision in this case. n5

n1 See generally S. Rep. No. 93-927, pp. 1-2 (1974); Staff Review of Recommendations Made on the Renegotiation Process: A Preliminary Report 3-5 (1974) (prepared for the use of the House Committee on Ways and Means and the Senate Committee on Finance by the staff of the Joint Committee on Internal Revenue Taxation (hereinafter Staff Review)).

n2 Title 50 U.S.C. App. § 1213 (e) reads as follows:

"(e) The term 'excessive profits' means the portion of the profits derived from contracts with

421 U.S. 168, \*172; 95 S. Ct. 1491, \*\*1494;  
44 L. Ed. 2d 57, \*\*\*64; 1975 U.S. LEXIS 119

the Departments and subcontracts which is determined in accordance with this title [ §§ 1211 to 1224 of this Appendix ] to be excessive. In determining excessive profits favorable recognition must be given to the efficiency of the contractor or subcontractor, with particular regard to attainment of quantity and quality production, reduction of costs, and economy in the use of materials, facilities, and manpower; and in addition, there shall be taken into consideration the following factors:

"(1) Reasonableness of costs and profits, with particular regard to volume of production, normal earnings, and comparison of war and peacetime products;

"(2) The net worth, with particular regard to the amount and source of public and private capital employed;

"(3) Extent of risk assumed, including the risk incident to reasonable pricing policies;

"(4) Nature and extent of contribution to the defense effort, including inventive and developmental contribution and cooperation with the Government and other contractors in supplying technical assistance;

"(5) Character of business, including source and nature of materials, complexity of manufacturing technique, character and extent of subcontracting, and rate of turn-over;

"(6) Such other factors the consideration of which the public interest and fair and equitable dealing may require, which factors shall be published in the regulations of the Board from time to time as adopted."

These statutory "factors" were developed by the War Contracts Price Adjustment Board during World War II, were incorporated by Congress into the original Renegotiation and Revenue Acts of that era, were continued in the Renegotiation Act of 1951, and have undergone little change since their initial development. Staff Review, *supra*, n. 1, at 23 and nn. 34-36.

n3 Prior to July 1971, de novo review was by the Tax Court. See 85 Stat. 98.

n4 Through June 30, 1970, 3,524 out of 4,006 cases not resulting in clearances terminated by agreement. Of the remaining 482 cases, the Board's unilateral orders were challenged in court in 203 cases.

n5 The description of the renegotiation process is of the process existing between 1962 through 1965 - the period in which the documents relevant to this case were generated within the Board - notwithstanding changes made since. Unless otherwise indicated, all citations to the Code of Federal Regulations throughout this opinion are to the Renegotiation Board's regulations in effect during this period (i.e., the Code as revised January 1, 1967).

Persons holding contracts or subcontracts with certain departments of the Government were required to file financial statements as prescribed by the Board, 50 *U.S.C. App. § 1215(e)(1)* (1964 ed.); 32 CFR Part 1470, if their receipts from those contracts met the requisite jurisdictional amount, 50 *U.S.C. App. § 1215(f)*. These statements [\*173] were reviewed by the staff of the Board, and, if that initial review indicated the possibility that the contractor realized "excessive" profits, the "case" was referred to one of two Regional Boards for further action. n6 At the time of this assignment, [\*\*1495] each case was designated as a Class A case or a Class B case: the former if the contractor had reported profits of more than \$ 800,000 on the relevant contracts covered in his financial statement, and the latter in all other cases. n7 The principal difference between Class A cases and Class B cases was that the Regional Boards had some final decisional authority in the latter and none in the former. 32 CFR §§ 1471.2(b), 1473.2(a), 1474.3(a), and 1475.3(a). Since the documents sought by respondent in this case were all generated in Class A cases, only the procedure applicable to those cases will be discussed.

n6 The reference is normally made on the basis of geographical considerations, 32 CFR § 1471.2(a). These Regional Boards were established in 1952 by regulation, 32 CFR § 1451.32, pursuant to statutory authorization, 50 *U.S.C. App. § 1217(d)*. Unlike members of the

421 U.S. 168, \*173; 95 S. Ct. 1491, \*\*1495;  
44 L. Ed. 2d 57, \*\*\*64; 1975 U.S. LEXIS 119

Board, who are appointed to the Board by the President, Regional Board members are civil servants.

n7 Under certain circumstances, cases may be redesignated after their initial designation. 32 CFR § 1471.2(f).

After reference to a Regional Board, a case was usually assigned to a staff team consisting of an accountant and a renegotiator. n8 This [\*\*\*65] team, after determining what further information from the contractor was required, secured such information and received any submissions [\*174] the contractor might have wanted to make with regard to his case, including his position concerning the statutory factors that largely determined whether he had received "excessive profits," 50 U.S.C. App. § 1213 (e). A document entitled "Report of Renegotiation" was then prepared by the team. Part IA of that report, the accountant's section, contained pertinent financial and accounting data and was furnished to the contractor upon request. n9 Part II of the Report of Renegotiation, prepared by the renegotiator, and not furnished to the contractor, generally contained "an analysis and evaluation of the case; and a recommendation with respect to the amount, if any, of excessive profits for the fiscal year under review." 32 CFR § 1472.3 (d). According to testimony given in this case, a Part II in outline form would be as follows: S

"A. Sources of Information

"B. Application of Statutory Factors:

"1. Character of Business

"2. Capital Employed

"3. Extent of Risk Assumed

"4. Contribution to the Defense Effort

"5. Efficiency

"6. Reasonableness of Costs and Profits

"(a) Costs

"(b) Pricing

"(c) Profits

"C. Special Matters

"D. Conclusion and Recommendation."I

n8 During the years 1962-1965, a renegotiator might be a staff member employed by the Regional Board or a member of the Regional Board itself. Under the Board's current regulations, a member of the Regional Board who acts as a renegotiator in a specific case is thereafter barred from participation in the case as a member of the Regional Board. 32 CFR § 1472.3 (d) (1974). There was no comparable regulation in effect during the period relevant to this case.

n9 32 CFR § 1472.3 (d). Under 1972 amendments to the regulations, the Report of Renegotiation was discontinued and was replaced by other reports not relevant to this case. See generally 32 CFR §§ 1472.3 (e)-(g), and (i) (1974).

After a Report of Renegotiation was prepared, but [\*175] prior to its submission to the Regional Board, the team assigned to the case endeavored to meet with the contractor to resolve "any issues or disputed matters of fact, law or accounting." 32 CFR § 1472.3 (b). The report was then submitted to the Regional Board.

After reviewing the Report of Renegotiation and the case file, the Regional Board would make a "tentative recommendation [\*\*1496] with respect to the amount of excessive profits realized in the fiscal year under review." 32 CFR § 1472.3 (e). n10 This "tentative recommendation" could "be in an amount greater than, equal to, or less than the amount recommended in the Report of Renegotiation." Ibid. After a "tentative recommendation" was made, the contractor, unless he declined, attended a meeting with the renegotiation team at which he was informed of the tentative recommendation of the Regional Board, as well as the Regional Board's reasons therefor, and was afforded the opportunity to [\*\*\*66] respond. The Regional Board would then enter a "final recommendation" either that a clearance be issued or that excessive profits be found in an amount greater than, equal to, or less than the tentative

421 U.S. 168, \*175; 95 S. Ct. 1491, \*\*1496;  
44 L. Ed. 2d 57, \*\*\*66; 1975 U.S. LEXIS 119

recommendation reached previously. If this final recommendation of the Regional Board corresponded to that of the staff team or panel, the report would be signed by the chairman of the Regional Board, signifying the approval of the staff or panel recommendation; if the Regional Board's final recommendation differed from the prior recommendation, an addendum would be attached to the report. The Report of Renegotiation with addenda, if any, will hereafter be referred to for convenience as the Regional Board Report.

n10 Under current regulations, the Regional Board no longer makes this "tentative recommendation" in Class A cases, 32 CFR §§ 1472.3 (k) and (l) (1974).

[\*176] (i)

Assuming the Regional Board did not recommend a clearance, it notified the contractor of its final recommendation in an effort to obtain an agreement. Toward this end, the contractor, upon request, would be furnished a "summary of the facts and reasons" (Summary) upon which the recommendation was based. 32 CFR § 1472.3 (i). n11 If a contractor did not request such a document, there is no indication that one was ever prepared in his case.

n11 This document was made available to the general public by regulation on February 24, 1971. 32 *Fed Reg.* 3808, 32 CFR § 1480.5 (a) (1972). When the Board first made the summaries of facts and reasons available to the public by regulation, it specifically stated that its action was taken "[w]ithout regard to the provisions of 5 U.S.C. [§ ] 552 (a)(2)...." *Ibid.* Subsequent to the effective date of that regulation, the District Court in this case, notwithstanding the fact that the controversy over respondent's access to the summaries of facts and reasons sought in this action had apparently been mooted, held that these documents must be made available under the ACT as "final opinions" of either the Board or the Regional Board, except in certain circumstances. 325 *F. Supp.* 1146, 1151-1152 (DC 1971). The Board has since amended its regulations, indicating that its own interpretation of the Act as to these documents is now consistent

with that of the District Court. 32 CFR § 1480.5 (a) (1974). Under current Board regulations, the contractor automatically receives a document entitled "Proposed Opinion," if he has not indicated a willingness to enter into an agreement with the Board. 32 CFR § 1477.3 (a) (1974).

If the contractor declined to enter into an agreement, the case was then reassigned to the Board, to which the case file including the Regional Board Report was transmitted. The case was then assigned to a "division" of the Board, usually consisting of three of its five members, which would undertake a study of the case. Staff personnel would go over both Part IA and Part II of the Regional Board Report and indicate, in memoranda, their [\*177] agreement or disagreement with the recommendation made by the Regional Board. At an appropriate juncture, the contractor would be afforded an opportunity to meet with the division members to discuss his case and submit additional relevant material. The division, in due course, would reach its own decision as to what recommendation should be made to the Board, "not... bound or limited in any manner [\*\*1497] by any evaluation, recommendation or determination of the Regional Board." 32 CFR § 1472.4 (b). The division would then submit to the full Board a report of the case, prepared by one of the members (Division Report), and including a recommendation for final disposition along with additional or contrary views, if [\*\*\*67] any, of the other division members. The Division Report is one of the categories of documents sought by respondent under the Act.

The Board would then meet, each member having had the opportunity to study the case file and the report submitted on behalf of the division, discuss the case, and vote on a final disposition. Neither the Board nor any of its members were bound by any prior recommendations. The Board was free, after discussion, to reject the proposed conclusion reached in the Division Report, or to accept it for reasons other than those set forth in the report. 32 CFR § 1472.4 (d). Assuming the Board did not decide that a clearance should issue, the contractor was then notified of the Board's conclusion and would be given, at his request, a Summary to enable him to decide whether to enter into an agreement with the Board. If an agreement was not reached, the Board would then enter a unilateral order within a specified time, 32 CFR Part 1475, and would issue, pursuant to statute, at the request

421 U.S. 168, \*177; 95 S. Ct. 1491, \*\*1497;  
44 L. Ed. 2d 57, \*\*\*67; 1975 U.S. LEXIS 119

of the contractor, a "statement of such determination, of the facts used as a basis therefor, and of its reasons for such determination." 50 U.S.C. App. [\*178] § 1215 (a) (Statement). n12 Absent a contractor's request for a Statement, there is no indication that one was ever prepared in his case. For this type of case, the renegotiation process thus came to an end. n13

n12 The "Summaries" and "Statements" were similar in both format and content. App. 35-41; 32 CFR § 1477.4. Under current Board regulations, the Regional Board now issues to the contractor a "Proposed Opinion," in lieu of the "summary of facts and reasons" discussed above, and furnishes to the contractor a "Regional Board Opinion" when the Regional Board's recommendation is forwarded to the Board. 32 CFR §§ 1477.3 (a) and (c) (1974). The Board also issues a "Final Opinion" in place of the Statement at the same time as it enters a unilateral order. 32 CFR § 1477.3 (b) (1974). All of these documents are available to the public. 32 CFR § 1480.5 (a) (1974).

n13 A dissatisfied contractor had the right at this point to bring an action in the Tax Court, which had jurisdiction to determine de novo whether excessive profits had been realized (see n. 3, supra); jurisdiction of these cases has subsequently been transferred to the Court of Claims. See *Renegotiation Board v. Bannercrest Clothing Co.*, 415 U.S. 1, 15 and n. 14 (1974).

(ii)

If the Regional Board concluded that no excessive profits had been realized by a particular contractor and that a clearance should therefore issue - or if the contractor agreed with the Regional Board as to an amount of excessive profits before the case was reassigned to the Board - then a Division Report was never created in that case. Instead, a "final recommendation" that a clearance be issued or that the agreement be consummated was sent to the Board, and the Board considered the case on the basis of the Regional Board Report, together with comments made by the Board's accounting and review divisions. After meeting and discussing the case on the basis of these documents, the Board decided whether to approve the

Regional Board's conclusion. If it did, appropriate closing documents were prepared by the [\*179] Regional Board. No explanation of the Board's reasons for agreeing with the Regional Board's recommendation was prepared or sent to the contractor; and it is not possible to know whether the Board agreed with the reasoning [\*\*\*68] of the Regional Board Report or just its conclusion. If the conclusion of the Regional Board was not approved, [\*\*1498] the case was either returned to the Regional Board for further factfinding, or assigned to a division of the Board as though no recommendation agreeable to the contractor had ever been made. The Regional Board Reports in the category of cases in which clearances were recommended and approved by the Board - and therefore in which no Division Report was created - is the other type of document in issue in this case.

## II

Against the foregoing backdrop, respondent filed a complaint, pursuant to the Act, in the District Court on June 27, 1968, seeking disclosure of "certain final opinions, orders and identifiable records" related to or issued during renegotiation proceedings involving 14 other companies during the period 1962-1965. n14 Respondent additionally sought certain documents related to its then-pending renegotiation proceedings before the Board for 1965, but later agreed that it was not seeking access to "[i]ntra-agency memoranda and communications consisting of advisory [\*180] opinions, conclusions recommendations, and analyses prepared by personnel and members of the Board" in its own case. 138 U.S. App. D.C. 147, 150, 425 F. 2d 578, 581 (1970). The District Court denied relief. On appeal, the Court of Appeals appears to have assumed that the "opinions" sought by respondent were limited to Statements and Summaries as defined in 32 CFR § 1480.8. n15 138 U.S. App. D.C., at 148, and n. 2, 425 F. 2d, at 579, and n. 2. On this basis, the Court of Appeals reversed, rejecting the claim of the Renegotiation Board that the documents sought were "completely immune" from disclosure under 5 U.S.C. § 552(b)(4), the provision of the Act exempting certain privileged or confidential information submitted to the Government by any person. n16 The court, stating that the Board was required to make available "final opinions, including concurring and dissenting [\*\*\*69] opinions," n17 remanded the case to the District Court for further proceedings in which the requested documents were to be made available after "suitable deletions." 138 U.S. App. D.C., at 150, 425 F. 2d, at 581.

027624

421 U.S. 168, \*180; 95 S. Ct. 1491, \*\*1498;  
44 L. Ed. 2d 57, \*\*\*69; 1975 U.S. LEXIS 119

n14 By reference in its complaint to correspondence between it and the Board of April 26, 1968, respondent requested access to "final opinions, determinations, unilateral orders, agreements, clearance notices and letters not to proceed issued in the adjudication of renegotiation cases" and "written summaries of the facts and reasons upon which such final opinions, determinations, unilateral orders and agreements have been reached." Nothing in the complaint or the letter suggests that, at that time, respondent sought the Regional Board Report, or the Division Report, in any of these renegotiation cases.

n15 Title 32 CFR § 1480.8 read in pertinent part:

"Except as authorized... opinions and orders will not be published or made available to the public... inasmuch as they are regarded as confidential... by reason of the confidential data furnished by contractors.... For the purposes of this paragraph, the term 'opinion' includes a statement furnished pursuant to [32 CFR Part 1477] and the term 'order' includes an agreement to eliminate excessive profits, as well as a unilateral determination. Opinions and orders are not cited as precedents in any renegotiation proceedings." Part 1477, as written during the period 1962-1967, included only Statements and Summaries.

n16 Title 5 U.S.C. § 552(b)(4) exempts from disclosure "trade secrets and commercial or financial information obtained from a person and privileged or confidential matters."

n17 *138 U.S. App. D.C., at 149, 425 F. 2d, at 580*, quoting from 5 U.S.C. § 552(a)(2)(A).

n18 A more detailed description of the documents sought is set out in the opinion written by the District Court after the initial remand from the Court of Appeals, *325 F. Supp., at 1151*.

[\*181] Subsequent to the remand of the case by the Court of Appeals, the Board turned over to respondent certain documents, including Statements and Summaries,

in attempted compliance with the mandate of that court. Respondent, not satisfied with the documents so disclosed, moved in the District Court for the disclosure, inter alia, of (1) Division Reports in all cases in which neither "Statements" nor "Summaries" were created; (2) Regional Board Reports resulting [\*\*1499] in a clearance; and (3) any document concurring in or dissenting from (1) and (2) above. n18

On the question whether these documents were "final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases," 5 U.S.C. § 552(a)(2)(A), the District Court permitted respondent to take the deposition of the then Chairman of the Board. That deposition of the Chairman constitutes almost the only evidence of record in this case bearing on this question other than the pertinent statutes and regulations. Although conceding, as it had to on the basis of the Chairman's deposition, that only the Board had final decisional authority, and that it studies and considers, but does not adopt Regional Board or Division Reports, the District Court held that these reports were "final opinions" for purposes of the Act and rejected the Board's contention that the documents were specifically exempted from disclosure under subsection (b)(5) of the Act, 5 U.S.C. § 552(b)(5) (Exemption 5), which encompasses: S

"inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency." I [\*182] As to the Regional Board Reports in clearance cases, the court characterized the clearance as the "decision" of the Regional Board "unless the Board is not in accord"; and held that "[i]n order for the public to be fully informed, the reasons behind the clearance... must be made available and in this type of case such... reasons are found in the Regional Board's report." As to the Division Reports, the court said that, although the Board may disagree with the reasoning of the report, "[i]t is in fact the last document which explains reasons for the Board's decision," it should "at the very least... reflect the analysis of one member," and thus it must be disclosed at least as a "concurring [or] dissenting opinion." 5 U.S.C. § 552(a)(2)(A). On appeal, the Court of Appeals affirmed the "findings of fact" and "conclusions" reached by the District Court and found two additional grounds supportive of the lower court's judgment as to the Regional Board Reports. The court held that, even if the [\*\*\*70] Regional Board Reports recommending a

421 U.S. 168, \*182; 95 S. Ct. 1491, \*\*1499;  
44 L. Ed. 2d 57, \*\*\*70; 1975 U.S. LEXIS 119

clearance subsequently approved by the Board n19 were not "final opinions" of the Board, they were disclosable as final opinions of the Regional Board: the Regional Board itself was to be considered an "agency" for purposes of the Act, and the reports were certainly its "final opinions" and, as such, they were disclosable under the express provisions of 5 U.S.C. § 552(a)(2)(A) and therefore outside the scope of Exemption 5. In concluding that the Regional Boards are agencies, the court relied in part on the power of the Regional Boards finally to dispose of certain Class B [\*183] cases. n20 In concluding that its decisions were "final," notwithstanding inevitable Board review, it analogized the power of the Regional Board in Class A cases to the power of a United States district court: the former's decisions being reviewable by the Board and the latter's by a United States court of appeals. The fact that the Regional Board's decisions were subject to review did not obviate the [\*1500] fact, any more than it does in the case of a United States district court, that its decisions are "final," 157 U.S. App. D.C. 121, 128, 482 F. 2d 710, 717 (1973), and that its report leading to a clearance was performe a "final opinion" of an "agency" subject to disclosure under the Act. The Court of Appeals additionally held that the Regional Board Reports were, in any event, "identifiable records," 5 U.S.C. § 552(a)(3), which are disclosable, unless exempt, and that these reports were not within the purview of Exemption 5 of the Act, because they "are not solely part of the consultative and deliberative process, but rather reflect actual decisions communicated outside the agency." 157 U.S. App. D.C., at 129, 482 F. 2d, at 718. See NLRB v. Sears, Roebuck & Co., ante, p. 132.

n19 The District Court had held the reports of Regional Boards to be disclosable only in instances where a regional Board made a final recommendation for a clearance and the Board concurred in the recommendation. *Id.*, at 1154. The Court of Appeals did not purport to extend the holding of the District Court to Regional Board Reports in other contexts.

n20 157 U.S. App. D.C. 121, 126-127, and nn. 20 and 23, 482 F. 2d 710, 715-716, and nn. 20 and 23 (1973).

The Board brought the case to this Court and we granted certiorari, 417 U.S. 907 (1974), setting the case for argument with NLRB v. Sears, Roebuck & Co., ante, p. 132, in order to resolve the important questions presented particularly with respect to the proper construction and interpretation of Exemption 5 of the Act. For reasons set forth hereafter, we reverse the judgment of the Court of Appeals.

### III

[\*\*LEdHR1A] [1A] [\*\*LEdHR2A] [2A] [\*\*LEdHR3A] [3A] [\*\*LEdHR4] [4] Strictly speaking, the issue in this case is whether the Division Reports and the Regional Board Reports fall [\*184] within Exemption 5, pertaining to "inter-agency or intra-agency memorandums... which would not be available by law to a party other than an agency in litigation with the agency." [\*\*71] 5 U.S.C. § 552(b)(5). n21 As we hold today in the companion case of NLRB v. Sears, Roebuck & Co., ante, at 149, Exemption 5 incorporates the privileges which the Government enjoys under the relevant statutory and case law in the pretrial discovery context; and both Exemption 5 and the case law which it incorporates distinguish between predecisional memoranda prepared in order to assist an agency decisionmaker in arriving at his decision, which are exempt from disclosure, and postdecisional memoranda setting forth the reasons for an agency decision already made, which are not. Because only the full Board has the power by law to make the decision whether excessive profits exist; because both types of reports involved in this case are prepared prior to that decision and are used by the Board in its deliberations; and because the evidence utterly fails to support the conclusion that the reasoning in the reports is adopted by the Board as its reasoning, even when it agrees with the conclusion of a report, we conclude [\*185] that the reports are not final opinions and do fall within Exemption 5.

[\*\*LEdHR3B] [3B]

n21 Grumman claims that the documents are "final opinions" expressly made disclosable, pursuant to 5 U.S.C. § 552(a)(2)(A). However, as we noted in the companion case of NLRB v. Sears, Roebuck & Co., ante, at 147-148, a conclusion that the documents are within

Exemption 5 would be dispositive in the Government's favor, since the Act "does not apply" to such documents; and a contrary conclusion would be dispositive against the Government, since it concedes that the documents are "identifiable records" otherwise disclosable pursuant to 5 U.S.C. § 552(a)(3). Thus, strictly speaking, the question whether the documents are "final opinions" is relevant only in deciding whether Exemption 5 applies to them and is important only because we have construed Exemption 5 in *NLRB v. Sears, Roebuck & Co.*, ante, at 153-154, not to include "final opinions" within the meaning of 5 U.S.C. § 552(a)(2)(A).

#### A. Regional Board Reports

It is undisputed that the Regional Boards had no legal authority to decide whether a contractor had received "excessive profits" in Class A cases. n22 [\*\*1501] In such cases, the Regional Boards could investigate and recommend, but only the Board could decide. 32 CFR §§ 1472.3-1472.4. The reports were prepared long before the Board reached its decision. The Board used the Regional Board Report as a basis for discussion and, even when it agreed with the Regional Board's conclusion, it often did so as a result of an analysis of the flexible statutory factors completely different from that contained in the Regional Board Report. Chairman Hartwig testified: I

"[W]hen the recommendation clearance of the Regional Board comes up on the Board agenda, the Board simply approves or disapproves the clearance. It does not adopt any of the memoranda that are before it. It does not ratify or [\*\*\*72] adopt any of these staff memoranda. It simply, in the exercise of its judgment, says it is a clearance or it isn't a clearance. [\*186]

And there is no Board-adopted document which you could call an opinion." App. 79.1

n22 We decline to consider whether this case would be different if the Regional Boards had de facto decisional authority - i.e., if, instead of making up its own mind in each case, the Board "reviewed" the Regional Board's recommendation under a clearly erroneous or some other deferential standard; or if the Board failed even to

review the vast bulk of the reports, absent special circumstances. There is no evidence in the record indicating that the Regional Boards had such de facto authority. Indeed, the evidence is to the contrary. In a recent review by the Comptroller General of 209 cases, the Board concurred in the Regional Board's recommendation only 85 times. Comptroller General, Report to the Congress: The Operations and Activities of the Renegotiation Board 33-34 (B-163520 - May 1973).

[\*\*\*LEdHR1B] [1B]The Regional Board Reports are thus precisely the kind of predecisional deliberative advice and recommendations contemplated by Exemption 5 which must remain uninhibited and thus undisclosed, in order to supply maximum assistance to the Board in reaching its decision. Moreover, absent indication that its reasoning has been adopted, there is little public interest in disclosure of a report. "The public is only marginally concerned with reasons supporting a [decision] which an agency has rejected, or with reasons which might have supplied, but did not supply, the basis for a [decision] which was actually adopted on a different ground." *NLRB v. Sears, Roebuck & Co.*, ante, at 152. Indeed, release of the Regional Board's reports on the theory that they express the reasons for the Board's decision would, in those cases in which the Board had other reasons for its decision, be affirmatively misleading. *Sterling Drug, Inc. v. FTC*, 146 U.S. App. D.C. 237, 246-247, 450 F. 2d 698, 707-708 (1971); *International Paper Co. v. FPC*, 438 F. 2d 1349, 1358 (CA2), cert. denied, 404 U.S. 827 (1971). Accordingly, these reports are not "final opinions," they do fall within the protection of Exemption 5, and they are not subject to compulsory disclosure pursuant to the Act.

The Court of Appeals' attempt to impute decisional authority to Regional Boards by analogizing their final recommendations to the final decisions of United States district courts must fail. The decision of a United States district court, like the decision of the General Counsel of the NLRB discussed in *NLRB v. Sears Roebuck & Co.*, ante, at 158-159, n. 25, has real operative effect independent of "review" by a court of appeals: absent appeal by one of the parties, the decision has the force of law; and, even if an appeal is filed, the court [\*187] of appeals will be bound, within limits, by certain of the

421 U.S. 168, \*187; 95 S. Ct. 1491, \*\*1501;  
44 L. Ed. 2d 57, \*\*\*LEdHR1B; 1975 U.S. LEXIS 119

district court's conclusions. n23 The recommendation of a Regional Board, by contrast, has no operative effect independent of the review: consideration of the case by the Board is not dependent on the decision by a party to "appeal" - such consideration is an inevitable event without which there is no agency decision; and the recommendation of the Regional Board carries no legal weight whatever before the Board - review by the latter is, as the Court of Appeals conceded, [\*\*1502] de novo. Indeed, "review" is an entirely inappropriate word to describe the process by which the Board decides whether to issue a clearance following a recommendation to that effect by the Regional Board. The latter's recommendation is functionally indistinguishable from the recommendation of any agency staff member whose judgment has earned the respect of a decisionmaker. There is simply no sense in which Regional Boards have the power to make "final dispositions" and thus no sense in which the explanations of [\*\*\*73] their recommendations can be characterized as "final opinions." n24 See *NLRB v. Sears, Roebuck & Co.*, ante, at 158-159.

n23 Fact determinations, for example, are reviewable under a "clearly erroneous" standard and certain legal judgments only for abuse of discretion.

n24 The distinction, between "recommendations" and "final opinions" subject to review, for Exemption 5 purposes is compelling. In order that a decisionmaker consider all the arguments in support of all the options, those who recommend should be encouraged to make arguments which they would not make in public and with which they may even disagree. However, if their recommendations were to have operative effect and thus qualify as decisions - even though subject to review - they should be discouraged from basing their decisions on arguments which they would not make publicly and with which they disagree.

[\*\*\*LEdHR1C] [1C] [\*\*\*LEdHR5] [5] In concluding that the Regional Board Reports are within the scope of Exemption 5, it is unnecessary to [\*188] decide whether, as respondent strenuously argues and the Court

of Appeals concluded, the Regional Boards are themselves "agencies" for the purposes of the Act. Respondent and the court below proceed on the premise that the final written product of an "agency's" deliberations may never fall within Exemption 5, and reason that since the Regional Board Report is the final product of the Regional Board, it must therefore be disclosable if the Regional Board is a separate agency. n25 The premise is faulty, however, overlooking as it does the fact that Exemption 5 does not distinguish between inter- agency and intra- agency memoranda. By including inter- agency memoranda in Exemption 5, Congress plainly intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency. Thus, if the Regional Boards are agencies for Class A purposes, their final recommendations are inter- agency memoranda; and, if they are not agencies separate from the Board, their recommendations are intra- agency memoranda. In either event, the Regional Boards' total lack of decisional authority brings their reports within Exemption 5 and prevents them from being "final opinions."

n25 We note in passing that, while the conclusion of the court below that the Regional Board's status as an agency stemmed from its power to issue "orders" in Class B cases finds support in the cases, *International Paper Co. v. FPC*, 438 F.2d 1349, 1359-1359 (CA2), cert. denied, 404 U.S. 827 (1971); *Washington Research Project, Inc. v. Department of HEW*, 164 U.S. App. D.C. 169, 504 F. 2d 238 (1974), cert. pending, No. 74-736, the Court of Appeals never considered the possibility that the Regional Board might be an agency for Class B purposes and not for Class A purposes.

[\*189] B. Division Reports

[\*\*\*LEdHR2B] [2B] It is equally clear that a division of the Board has no legal authority to decide. Once again, it may analyze and recommend, but the power to decide remains with the full Board. The evidence is uncontradicted that the Division Reports were prepared before the Board reached its decision, were used by the

full Board as a basis for discussion, and, as the Chairman testified, were "prepared for and designed to assist the members of the Board in their deliberations"; nor is the discussion limited to the material and analysis contained in the Division Report. Following the discussion, any Board member may disagree with the report's conclusion or agree with it for reasons other than those contained [\*\*\*74] in the report. Indeed, as Chairman Hartwig testified, it is [\*\*1503] likely that this will occur because of the highly judgmental nature of the Board's decisions given the number and generality of the statutory criteria. In any event, the reasoning of the Division Report is never adopted - though its conclusion may be - and no effort is made to reach agreement on anything but the result.

[\*\*\*LEdHR6A] [6A] It is true that those who participate in the writing of the Division Report are among those who participate in the Board's decision, and that, human nature being what it is, they may not change their minds after discussion by the full Board. This creates a greater likelihood that the Board's decision will be in accordance with the Division Report than is the case with respect to a Regional Board Report and that, where the Board's decision is different, the Division Report will reflect the final views of at least one of the Board's members. See *NLRB v. Sears, Roebuck & Co.*, ante, at 158-159, n. 25. However, this is not necessarily so. The Board obviously considers its discussion following the creation of the Division Report to be of crucial importance to its decision for, notwithstanding [\*190] the fact that a division is made up of a majority of the Board, it has been delegated no decisional authority. The member of the Board who wrote the report may change his mind as a result of the discussion or, consistent with the philosophy of Exemption 5, he may have included thoughts in the report with which he was not in agreement at the time he wrote it. The point is that the report is created for the purpose of discussion, and we are unwilling to deprive the Board of a thoroughly uninhibited version of this valuable deliberative tool by making Division Reports public on the unsupported assumption that they always disclose the final views of at least some members of the Board. n26

[\*\*\*LEdHR6B] [6B]

n26 Since all of the members of the division are free to change their minds after deliberation

and are free to place thoughts or arguments in the Division Reports which were only tentative in the first place, we need not reach the question whether a concurring or dissenting opinion must be disclosed even where no opinion expressing the view of the agency is written.

Respondent argues that Division Reports, as well as concurrences or dissents thereto, constitute "final opinions" of the Board or individual members of the Board, relying on a specific reference, assertedly made to such documents, in the House Report which accompanied the Act, H.R. Rep. No. 1497, 89th Cong., 2d Sess. (1966). That report, in speaking to the Committee's understanding of what is now codified as 5 U.S.C. § 552(a)(2)(A), stated:

"[Subsection (A)] requires concurring and dissenting opinions to be made available for public inspection. The present law, requiring most final opinions and orders to be made public, implies that dissents and concurrences need not be disclosed. As a result of a Government Information Subcommittee investigation a number of years ago, two major regulatory agencies agreed to make public the dissenting opinions of their members, but a recent survey indicated that five agencies - including... the Renegotiation Board - do not make public the minority views of their members." H.R. Rep. No. 1497, supra, at 8.

This statement from the legislative history of the Act supports the proposition that Congress intended the Board to be subject to the Act's provisions, *Renegotiation Board v. Bannerkraft Clothing Co.*, 415 U.S., at 16, and at first blush lends support to respondent's contention that Congress assumed, in passing the Act, that the Board was issuing "final opinions" in cases, that the Board was withholding concurrences and dissents to those final opinions, and that § 552(a)(2)(A) was designed to put an end to this practice. Our research convinces us, however, that this language from the House Report is not to be so read. The "survey" referred to in the report was conducted in 1963 by the Foreign Operations and Government Information Subcommittee of the Committee on Government Operations of the

421 U.S. 168, \*190; 95 S. Ct. 1491, \*\*1503;  
44 L. Ed. 2d 57, \*\*\*LEdHR6B; 1975 U.S. LEXIS 119

House. The unpublished data gathered during that survey indicate that, in response to three questions submitted by the subcommittee to the Board, concerning its practices with respect to opinion writing and publication, the Board stated:

"Except as authorized in Renegotiation Board Regulations 1480.4 (a) (attached), opinions and orders of the Renegotiation Board are not published or made available to the public (see RBR [32 C.F.R. § ] 1480.8)...."

As our prior discussion of 32 CFR § 1480.8, n. 15, supra, makes clear, the "opinions" to which the Board referred were Statements and Summaries. Thus, the reference to concurring and dissenting opinions in the House Report, with respect to the Renegotiation Board, was not to Division Reports but was to nonexistent concurrences to and dissents from Statements and Summaries which were already being made public.

[\*191]

[\*\*\*LEdHR7] [7] [\*\*\*LEdHR8] [8] [\*\*\*LEdHR9] [9]The [\*\*\*75] [\*\*1504] effect of this decision is that, in those cases in which Statements and Summaries were not issued, the public will be largely uninformed as to the basis for decisions by the Renegotiation Board. Indeed, the decisions of both courts below - conceding as they both did the absence of decisional authority in either the Regional Boards or divisions of the statutory board - appear to have rested in the final analysis on the notion that the Renegotiation Board has an affirmative obligation under the Act to make public the reasons for its decisions; and that it must disclose its opinion or the nearest thing to an opinion in every case. However, Congress explicitly exempted the Renegotiation Board from all provisions of [\*192] the Administrative Procedure Act except for the Public Information Section. 50 U.S.C. App. § 1221. Thus the opinion-writing section of the APA, 5 U.S.C. § 557 - which itself applies only to "adjudication required by statute to be determined on the record after opportunity for an agency hearing" and even then only if the agency decision is not subject to de novo court review, 5 U.S.C. § 554 - is inapplicable to Board decisions. The Freedom of Information Act imposes no independent obligation on agencies to write opinions. It

simply requires them to disclose the opinions which they do write. NLRB v. Sears, Roebuck & Co., ante, p. 132. If the public interest suffers by reason of the failure of the Board to explain some of its decisions, the remedy is for Congress to require it to do so. It is not for us to require disclosure of documents, under the purported authority of the Act, which are not final opinions, which do not accurately set forth the reasons for the Board's decisions, and the disclosure of which would impinge on the Board's predecisional processes.

The judgment of the Court of Appeals is

Reversed.

Mr. JUSTICE DOUGLAS dissents.

Mr. JUSTICE POWELL took no part in the consideration or decision of this case.

**OPINION BY:**

BROWN

**OPINION:**

[\*1315]

After its bid for a contract to overhaul airborne generators was rejected by the Air Force, Appellee Shermco Industries, Inc. (Shermco) filed a protest with

the General Accounting Office (GAO) and requested from the Air Force the production of several documents in connection with this protest. [\*1316] The Air Force produced all but seven of these documents and Shermco sued for their disclosure under the Freedom of Information Act, 5 U.S.C. § 552 (1977) (FOIA). The District Court ordered the production of the documents, holding that the exemptions of 5 U.S.C. §§ 552(b)(4) and (5) were inapplicable. n1 We reverse.

n1. *Shermco Industries, Inc. v. Secretary of the Air Force*, 452 F. Supp. 306 (N.D.Tex.1978).

## I. Factual [\*\*2] Background

In 1976, Shermco had a five-year contract with the Air Force to overhaul airborne generators at McClellan Air Force Base near Sacramento, California. The Air Force terminated the contract in its third year, citing "quality problems," and solicited offers from a number of contractors, including Shermco, to continue the work. On October 14, 1976, Shermco was informed that Tayko Industries, Inc. (Tayko) was the lowest acceptable bidder and that Shermco's bid was rejected. On October 22, 1976, Shermco filed a protest with the GAO pursuant to 4 CFR Part 20 (1979). Shermco and its president made several requests to the Air Force for information

027632

concerning Tayko's bid to help Shermco implement its protest. These requests included ones made under FOIA and the Privacy Act. n2 The Air Force produced twenty-four of the requested items but withheld seven others three legal memoranda which had been attached to the Air Force's response to the protest, the contracting officer's recommendation prepared in connection with the protest, n3 and three documents containing Tayko's basic pricing information, including "items, quantities and unit prices." On November 10, 1977, Shermco filed suit [\*\*3] against the Secretary of the Air Force to obtain these documents, pursuant to FOIA and the Privacy Act.

n2. 5 U.S.C. § 552a (1977).

n3. Since the Air Force has decided to release the contracting officer's recommendation, the disclosure of this document is not at issue on this appeal.

The District Court held that FOIA required the disclosure of all seven documents requested. The Secretary appeals this holding and we reverse. n4

n4. At oral argument, this Court learned that in December, 1978, the GAO denied Shermco's protest. At first glance it seems that this would give the Air Force the right to make a final award of the contract to Tayko and moot the central issue of this appeal, whether or not the Air Force's decision is final. However, Shermco can request reconsideration of the decision by the GAO. 4 CFR § 20.9 (1979). Moreover, Congress has amended the Small Business Administration Act to give the SBA the power to determine the competency of a small business to perform a government procurement contract. This Certificate of Competency, once awarded, is deemed conclusive proof of the small business' abilities, and the contract must be awarded to it. Pub.L. 95-89, Title V, § 501, Aug. 4, 1977, 91 Stat. 561; 15 U.S.C. § 637(b)(7) (West Supp.1979). See House Conference Report 95-535, 1977 U.S.Code Cong. & Admin.News vol. 2 at 821, 851-52. The current status of the proceedings in this case is that the Air Force has not yet awarded the contract to Tayko but is doing the work internally. Thus, there has not yet been a

final decision, and since the Appellee still has remedies it can seek from the GAO and the SBA, this appeal is not moot.

[\*\*4]

## II. The Cost Proposals And Exemption 4

The Air Force's basis for the withholding of Tayko's cost proposals was Exemption 4 of FOIA, 5 U.S.C. § 552(b)(4), which provides that the Government is not required to disclose

trade secrets and commercial or financial information obtained from a person and privileged or confidential . . . .

The Air Force argued that because there had not been a final award of the contract, this information should remain confidential until a final award was made. To disclose this information before a final decision was made would make it more difficult for the Air Force to make its final decision and would be prejudicial to the low bidder, undermining his competitive advantage.

[\*1317] The District Court conceded that the decision was not yet technically final (452 F. Supp. at 322) and that, if there were no final award, Exemption 4 would apply ( *Id.* at 324). However, the Court found that, for purposes of FOIA, the decision was final ( *Id.* at 322), and that "(a)ny need for secrecy (was) no longer present because the award (would) be made either to the successful bidder or the protester . . . ." *Id.* at 324. Therefore, the Court concluded, the [\*\*5] cost proposals were no longer confidential nor exempt.

The purpose of Exemption 4 is twofold to protect the interests of individuals who disclose confidential information to government agencies and to protect the *Government as well. National Parks and Conservation Association v. Morton*, 162 U.S.App.D.C. 223, 228, 498 F.2d 765, 770 (D.C. Cir. 1974). n5 This information concerning Tayko's cost proposals, in the hands of a competitor prior to the time of a final award, would jeopardize the Air Force's ability to discern clearly which bidder could do the best job for the lowest price. Moreover, the nondisclosure of this information is in keeping with the Armed Services Procurement Regulations (ASPR) policy prohibiting bidding with knowledge of competing bids. n6 Nondisclosure prior to final award also encourages competing bidders to enter

bids which accurately reflect their capabilities and their costs; this secrecy protects the bargaining power of each competitor's bid. Absent the assurance of this confidentiality, bidders might be reluctant to disclose such information to the procuring government agency.

n5. In *Federal Open Market Committee of the Federal Reserve System v. Merrill*, 443 U.S. 340, 355-360 99 S. Ct. 2800, 2810-2812, 61 L. Ed. 2d 587, 601-03 (1979), the need for nondisclosure of information received by an agency concerning the award of a contract, prior to the award of that contract, is acknowledged and discussed in the context of Exemption 5, the exemption for certain intra- and inter-agency memoranda (discussed *Infra* at 1318-1319. Further discussion of the *Merrill* opinion is at note 11, *Infra*. We believe the need for secrecy of commercial information prior to the award of a contract is equally, if not more important in the context of Exemption 4, where the information is derived from a private party, rather than a government agency.

[\*\*6]

n6. ASPR 3-805.3(b) & (c); 32 CFR 3.805.3(b) & (c) (1976):

3-805.3 Discussions With Offerors.

(b) Discussions shall not disclose the strengths or weaknesses of competing offerors, or disclose any information from an offeror's proposal which would enable another offeror to improve his proposal as a result thereof.

(c) Auction techniques are strictly prohibited; an example would be indicating to an offeror a price which must be met to obtain further consideration, or informing him that his price is not low in relation to another offeror. On the other hand, it is permissible to inform an offeror that his price is considered by the Government to be too high.

On appeal, the Air Force reasserts the same argument that their selection of Tayko as the lowest acceptable bidder did not amount to a final award. To support this

contention it cites GAO briefing papers stating that the effect of a GAO ruling in favor of a protestor in a pre-award protest is not necessarily that he will be awarded the contract. It may mean the contract bidding will be reopened to choose the next lowest responsible bidder. [\*\*7] Therefore, the reasons for withholding the cost proposals pursuant to Exemption 4 still exist.

We feel that the District Court misunderstood the bid protest procedure when it characterized the award as a final decision. The October 14th notice to Shermco was of a proposed award to Tayko; it was not a final decision. The District Court's statement that there was no need for secrecy because the award would be made either to Tayko or to Shermco is contrary to GAO protest procedure. It is amply clear from the record and from oral argument that there is a possibility that if the protest were to succeed either before the GAO, the SBA or some other forum, the bidding could be reopened. Thus, the Tayko pricing information [\*1318] is covered by Exemption 4 and should not have been disclosed. n7

n7. Recently, in *Audio Technical Services, Ltd. v. Department of Army*, C.A. 487 F. Supp. 779 (1979), the Federal District Court of the District of Columbia specifically rejected the position of the Northern District of Texas in *Shermco* and held that bid proposals of a successful bidder for a government contract, sought by an unsuccessful bidder in conjunction with a GAO protest, fell within Exemption 4. Interestingly, the District of Columbia Court so held, even though it characterized the award of the contract as final. Instead, the Court relied solely on the policy considerations, holding *Sub silentio* that the need for secrecy remains even after a final award.

[\*\*8]

### III. The Legal Memoranda And Exemption 5

The refusal of the Air Force to disclose three legal memoranda attached to its response to Shermco's protest was based on Exemption 5 of FOIA, 5 U.S.C. § 552(b)(5):

inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than

an agency in litigation with the agency . . . )

The District Court found the Air Force memoranda to be "legal opinions prepared to assist the contracting officer in making his decision awarding the overhauling contract," which would not normally have been releasable because of this exemption. 452 F. Supp. at 322. However, since, according to the District Court, the Air Force award of the contract to Tayko was a final decision, these intra-agency memoranda in defense of the bid protest became part of that decision and were releasable under *NLRB v. Sears-Roebuck & Co.*, 421 U.S. 132, 95 S. Ct. 1504, 44 L. Ed. 2d 29 (1975). Moreover, it was the District Court's opinion that by sending these memoranda to the GAO, the Air Force had waived its rights to assert the confidentiality of these otherwise internal staff opinions. 452 F. Supp. at 322. These memoranda [\*9] had become part of the Air Force's "official position" against the protest by Shermco. For both reasons, these documents were deemed releasable.

#### A. The Executive Privilege For Communications Relating To Governmental Deliberations

Exemption 5 incorporates at least two n8 types of privileges traditionally available to the Government in civil litigation (i) the attorney-client and attorney work-product privileges n9 and (ii) the executive privilege for information relating to governmental deliberations. *NLRB v. Sears Roebuck & Co.*, supra, 421 U.S. at 149-54; 95 S. Ct. at 1515-1518, 44 L. Ed. 2d at 46-49.

n8. A very recent Supreme Court decision, *Federal Open Market Committee v. Merrill*, supra, holds that Exemption 5 also incorporates a qualified privilege for confidential commercial information, modeled along the lines of *F.R.Civ.P. 26(c)(7)*. This exemption is discussed in more detail *Infra* at note 11.

n9. Because we hold that the Air Force's legal memoranda come under the executive privilege of Exemption 5, we need not consider Appellants' alternative argument that these memoranda are also exempt as attorney work-products.

[\*\*10]

The executive privilege grew out of a need to protect the governmental decision-making process by assuring those persons, both inside and outside the decision-making agency, who offer information and opinions to the Government that their communications will be kept in confidence. *NLRB v. Sears*, supra, 421 U.S. at 151-52, 95 S. Ct. 1516-1517, 44 L. Ed. 2d 47-48. See *Mead Data Central, Inc. v. United States Department of Air Force*, 184 U.S. App. D.C. 350, 225-226, n. 28, 566 F.2d 242, 254-55, n. 28 (D.C. Cir. 1977). For this reason, the Supreme Court has distinguished between pre-decisional communications which are exempt from disclosure and post-decisional communications which are not. *NLRB v. Sears*, 421 U.S. at 152-53, 95 S. Ct. at 1517, 44 L. Ed. 2d at 48-49; *Renegotiation Board v. Grumman Aircraft Engineering Corp.*, 421 U.S. 168, 184, 95 S. Ct. 1491, 1500; 44 L. Ed. 2d 57, 71 (1975). See *Audio Technical Service v. Army*, supra. Disclosure of pre-decisional communications presents more [\*1319] danger that governmental sources of information and advice will be inhibited. Besides, there is less public concern for this information, whereas the public is vitally interested in learning [\*11] an agency's reasons for a final decision which has the effect of law. *NLRB v. Sears*, supra, 421 U.S. at 151-52, 95 S. Ct. at 1516-1517, 44 L. Ed. 2d at 47-48.

In *Sears*, the Supreme Court emphasized that this distinction is supported by FOIA itself 5 U.S.C. § 552(a)(2)(A) n10 which requires the disclosure of all final agency opinions. 421 U.S. at 153, 95 S. Ct. at 1517, 44 L. Ed. 2d at 49. Thus, the Supreme Court concluded that if an advisory opinion of an agency staff member is expressly incorporated into a final agency decision, the policy considerations supporting the nondisclosure of this type of pre-decisional communication are no longer operable. Once the agency adopts its employee's advice as its own, the agency will defend its employee and he need no longer be concerned with adverse consequences if his communication becomes a matter of public record. Moreover, his advice, as part of a final agency opinion, has now become a matter of more profound public interest. 421 U.S. at 161, 95 U.S. at 1521, 44 L. Ed. 2d at 53. Thus, in effect, what was once a pre-decisional communication becomes post-decisional and is no longer exempt from disclosure under Exemption 5.

n10. S 552. Public information; agency rules, opinions, orders, records, and proceedings

(a) Each agency shall make available to the public information as follows:

(2) Each agency, in accordance with published rules, shall make available for public inspection and copying

(A) final opinions, including concurring and dissenting opinions, as well as orders, made in the adjudication of cases;

[\*\*12]

*Grumman, supra*, 421 U.S. at 184, 95 S. Ct. at 1500, 44 L. Ed. 2d at 71, lists the criteria for identifying a post-decisional communication: (i) The decision must, of course, be final. (ii) The agency of which the information is demanded must possess the power to make the final decision into which the pre-decisional information is incorporated. (iii) Finally, the information must be adopted as part of the agency's reasoning for its decision. Because the Grumman decision relied on Sears, its companion case, we believe these criteria also should apply to the Sears hybrid, the pre-decisional communication turned post-decisional. With respect to the third criterion, Sears goes even further than Grumman and holds that the hybrid, to become a post-decisional communication, must be "expressly adopt(ed) or incorporate(d) by reference" into the final opinion. 421 U.S. at 161, 95 S. Ct. at 1521-1522, 44 L. Ed. 2d at 53.

In holding that the three legal memoranda submitted to the GAO by the Air Force did not fall within Exemption 5, the District Court followed Sears but then held that these once pre-decisional memoranda, by being submitted to the GAO in connection with the Shermco protest, were [\*\*13] incorporated into the Air Force's final decision to award the contract to Tayko, and therefore had become post-decisional.

In the leap from Sears to this case we find this conclusion unacceptable for two reasons. First, as we stated earlier in this opinion, the proposed award of the contract to Tayko was not the final opinion of the Air Force. n11 Because the decision was not yet final, all the considerations [\*1320] which support the nondisclosure of pre-decisional communications were still in effect, as was Exemption 5. Second, even if it were a final decision, these memoranda were not expressly incorporated by reference into the opinion. They had been used by the Air Force internally in reaching their

initial conclusion that Tayko was the lowest bidder, and they were produced to the GAO in aid of their defense against Shermco's protest, but they were never attached to any formal written decision by the Air Force.

n11. Shermco cites *Federal Open Market Committee v. Merrill, supra*, "for the proposition that as soon as the Government awards a contract, any protection under Exemption 5 for any information generated in the process leading up to the award of the contract expires."

The specific holding of the Supreme Court in Merrill was "that Exemption 5 incorporates a qualified privilege for confidential commercial information, at least to the extent that this information is generated by the Government itself in the process leading up to awarding a contract." 443 U.S. at 360, 99 S. Ct. at 2812, 61 L. Ed. 2d at 603. This newly created but qualified exception is in addition to the two traditional Exemption 5 privileges for attorney work-products and executive deliberations. We do not believe this new category of Exemption 5 information includes legal memoranda prepared by an agency to aid in its deliberations at issue in this case. We find two passages in Merrill to support this conclusion.

First, the Supreme Court found support for the creation of this privilege in *F.R.Civ.P. 26(c)(7)*. This procedural rule permits a District Court to issue a protective order so "that a trade secret or other confidential research, development or commercial information not be disclosed or be disclosed only in a designated way." The analogous privilege under Exemption 5 was created by the Supreme Court only for confidential commercial information, and did not mention confidential research, a category in which we believe legal memoranda more readily fall. We decline to read "Exemption 5 confidential commercial information" so broadly as to include every type of information which could be protected under Rule 26(c)(7) because the Merrill opinion expressly states "that Exemption 5 was (not) intended to incorporate every privilege known to civil discovery." 443 U.S. at 360, 99 S. Ct. at 2809, 61 L. Ed. 2d at 599.

613 F.2d 1314, \*1320; 1980 U.S. App. LEXIS 19498, \*\*13;  
27 Cont. Cas. Fed. (CCH) P80,280

Second, the Supreme Court distinguishes between pre-decisional deliberations (and we have already held that the legal memoranda in the case before us are pre-decisional) and confidential commercial information which there is no need to protect after a contract is awarded. *443 U.S. at 360, 99 S. Ct. at 2812, 61 L. Ed. 2d at 603*. To us this is another indication that pre-decisional deliberations and confidential commercial information are not the same thing.

The language in the Merrill opinion on which Shermco relies in support of its proposition that the right to invoke Exemption 5 disappears as soon as a contract is awarded is as follows:

The theory behind a privilege for confidential commercial information generated in the process of awarding a contract, however, is not that the flow of advice may be hampered, but that the Government will be placed at a competitive disadvantage or that the consummation of the contract may be endangered. Consequently, the rationale for protecting such information expires as soon as the contract is awarded or the offer withdrawn.

*443 U.S. at 360, 99 S. Ct. at 2812, 61 L. Ed. 2d at 603.*

Not only are the legal memoranda at issue in this case not confidential commercial information, but we do not believe the Supreme Court, when it made the above statement, was necessarily creating a rule which applies to all communications exempt under § 552(b)(5). Moreover, we do not believe the Supreme Court was attempting to define a final decision as equivalent to the award of a contract or pinpoint when the final award of a contract technically is made. The finality of an agency decision was not even at issue in Merrill. For all of the reasons we state above, we do not think the Merrill case is applicable here.

[\*\*14]

B. Waiver Of Exemption 5 Through Disclosure To

GAO

The District Court also held that, by disclosing these

memoranda to the GAO, the Air Force waived its rights to claim Exemption 5. We will begin by stating that the mere fact that one federal agency releases intra-agency communications to another federal agency cannot by itself imply the waiver of Exemption 5, which explicitly applies to inter-agency, as well as intra-agency, memoranda.

Waiver occurs when an agency makes its information more broadcast than is allowed by its own regulations, *Cooper v. Department of Navy, 594 F.2d 484 (5th Cir. 1979)*, but it does not occur when an agency whose action is being reviewed forwards to the reviewing agency legal memoranda in support of its position:

By including Inter-Agency memoranda in Exemption 5, Congress plainly intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency.

*Grumman, supra, 421 U.S. at 188, 95 S. Ct. at 1502, 44 L. Ed. 2d at 73.* In reviewing [\*\*15] the Air Force's preliminary decision to award this contract to Tayko, the GAO needed and [\*1321] was entitled to the legal and technical advice of both parties. The Air Force should be allowed to supply this information without running the risk of waiving Exemption 5. The forwarding of these memoranda to the GAO was not a broadcast disclosure by the Air Force. It was no more than the submission of the agency's legal opinion in defense of a bid protest. There was thus no waiver of Exemption 5.

In sum, we hold that the Air Force's notice to Shermco was a proposed, and not a final, award of the contract to Tayko. There is a possibility that, if the GAO or its successor under the new law, the SBA, upholds the protest, that bidding will be reopened. All the policy reasons for exempting from disclosure both the Tayko cost proposals and the legal memoranda of the Air Force still operate to make this information immune from disclosure within the language of Exemptions 4 and 5. n12 Accordingly, we reverse the judgment of the District Court and remand this cause with orders to enter judgment in favor of the Appellant Air Force.

027637

613 F.2d 1314, \*1321; 1980 U.S. App. LEXIS 19498, \*\*15;  
27 Cont. Cas. Fed. (CCH) P80,280

n12. The Air Force also has sought review of the District Court's award of attorney's fees to Shermco under 5 U.S.C. § 552(a)(4)(E). Because we reverse on all of the substantive claims of this appeal, Shermco has no longer "substantially prevailed" in this action, and the award of

attorney's fees is also reversed.

DANIEL S. ALTER, Assistant United States Attorney,

**OPINION: [\*73] SOTOMAYOR, Circuit Judge:**

This appeal was brought by a lawyer and his law firm seeking access under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552(b), to a memorandum ("the Neiman Memorandum" or "Memorandum") prepared by

an assistant [\*\*2] United States Attorney in the Southern District of New York ("Southern District") and sent to a public commission. The Neiman Memorandum outlines the Southern District's opinions and recommendations as to how the Internal Revenue Service ("IRS") should conduct criminal tax investigations. The Memorandum was written for, and forwarded to, the Criminal Investigation Division Review Task Force headed by Judge William Webster ("the Webster Commission"), which was established by the IRS to gather information and make suggestions on how to reform its Criminal Investigations Department ("CID"). The district court held that the government did not have to produce the Neiman Memorandum because it was shielded by the FOIA's exemption for documents reflecting an agency's deliberative processes, relying on 5 U.S.C. § 552(b)(5).

On appeal, plaintiffs claim that the Neiman Memorandum was not an intra- or inter-agency document as required for exemption under § 552(b)(5) because it was provided to the Webster Commission, an independent task force that intended to issue a public report of its findings, and that it is not privileged as material of an agency consultant. Plaintiffs [\*\*3] also contend that the Neiman Memorandum is not "predecisional" because it was prepared to assist the Webster Commission rather than the IRS and does not relate to a sufficiently specific agency decision. They further argue that even if the deliberative process exemption applies, the government waived that protection by reproducing a quotation from the memorandum in the report published by the Webster Commission ("Webster Report" or "Report"). Finally, they argue that if the document is protected, any purely factual sections should be made [\*74] available. We disagree. We hold that (1) the Webster Commission was a consultant to the IRS that was charged with assisting the agency in developing its policy, rendering a memorandum sent from the Southern District to the Webster Commission an inter-agency document; (2) because the IRS created the Webster Commission in order to help it decide whether and how to reform the CID, the document is predecisional; (3) because the Webster Commission's Report was not a final decision, the government did not waive executive privilege; and (4) after *in camera* review, the district court properly found that there were no reasonably segregable parts of the [\*\*4] Neiman Memorandum subject to disclosure.

#### BACKGROUND

During his confirmation hearings before the Senate in the fall of 1997, IRS Commissioner Charles Rossotti made a commitment to improving the quality of service provided by each of the major components of the agency. To that end, in July 1998, Rossotti asked Judge William Webster, former director of both the FBI and the CIA, to establish a task force to conduct an "independent review" of the IRS's CID to "determine [CID's] effectiveness in accomplishing its mission, and make recommendations for improvement." Judge Webster recruited a number of experts with extensive experience in criminal investigations, law enforcement and federal prosecution to serve on the Webster Commission.

The Webster Commission spent nine months reviewing "countless" documents and interviewing over 600 people, including a number of law enforcement officials. The Webster Commission specifically requested the opinions of the Southern District because it handled more tax investigations than any other district. Then-Deputy U.S. Attorney Shirah Neiman wrote a sixteen-page memorandum expressing the views of the Southern District on "the various agency components [\*\*5] involved in criminal tax enforcement; ... the then existing focus of tax investigations and prosecutions and the deployment of IRS resources; ... the difference[s] between [the Southern District's] position on various issues and that of other agency components; ... and [the Southern District's] recommendations to ensure the continuation of vigorous criminal tax enforcement." According to Neiman, the Neiman Memorandum expressed the views of the Southern District and not those of the Department of Justice as a whole or Neiman as an individual, and her expectation that the memorandum would remain confidential contributed to her willingness to express the Southern District's opinions and policies about tax investigations.

The Webster Commission released its Report on April 9, 1999 to significant media attention. The 113-page Report includes both a factual inquiry into the practices of the CID and a set of recommendations about how the CID should be improved. Included in the Report is a letter from Commissioner Rossotti stating that the Report "will guide us to improve the work of this critically important component of tax administration for many years to come" and that the IRS concurred [\*\*6] with the specific recommendations in the Report, although noting that "some of the recommendations, particularly those concerning organization structure, need

further analysis and design work in coordination with our other organizational changes.

The Neiman Memorandum is mentioned twice in the Report. First, the Neiman Memorandum is referenced in a footnote as representing an opposing view to the position held by the leadership of the Department [\*75] of Justice Criminal Division, most United States Attorneys, and other important figures in criminal enforcement, all of whom apparently believe that the CID should continue to investigate money laundering and narcotics cases. Later in the Report, it is quoted as criticizing the use of administrative investigations and IRS summons because they are slower than grand jury subpoenas: "service of an administrative summons simply does not convey the urgency of a grand jury subpoena, and is not as readily enforceable as a subpoena, and represented subjects of administrative investigations often succeed in dragging out these investigations for unimaginably long periods."

Plaintiff John Tigue, an attorney whose law firm, Morvillo, Abramowitz, Grand, [\*\*7] Iason & Silberberg, P.C., often represents individuals in connection with federal grand jury tax investigations and IRS administrative investigations, enforcement actions, and prosecutions, obtained a copy of the Report and noticed the reference to the Neiman Memorandum. Believing that review of the Neiman Memorandum would improve his understanding of Southern District policy and thus allow him to represent his clients better, Tigue and his law firm ("plaintiffs") submitted a FOIA request for the Neiman Memorandum on August 18, 1999. Following a period of delay in which the Department of Justice ("DOJ") and the IRS attempted to discern which agency should respond to the FOIA request, the DOJ denied the application on April 28, 2000, and, on September 28, 2000, denied the appeal, citing 5 U.S.C. § 552(b)(5), which protects the so-called "deliberative process privilege."

On February 14, 2001, plaintiffs filed suit against the IRS and the DOJ in the United States District Court for the Southern District of New York. The parties cross-moved for summary judgment. Following oral argument on October 23, 2001, Judge Hellerstein ruled that the Neiman Memorandum met [\*\*8] the requirements of § 552(b)(5) and was therefore exempt from production under the FOIA, and that the government had not waived the privilege by citing to and quoting from the Neiman Memorandum in the published

Report. At that time the court also requested that the government review the Neiman Memorandum to determine whether any sections of the document could be produced as purely factual. On October 29, 2001, after in camera review of a marked copy of the Neiman Memorandum, the district court issued an order finding that the Memorandum was "predominantly evaluative, evaluating both policies and procedures of the United States Attorney for the Southern District of New York in criminal investigations involving tax matters and those of the Internal Revenue Service, and recommending procedures for the Internal Revenue Service." The district court also found that "there is no factual material in the report that is not inextricably intertwined with evaluations, and recommendations of policy" and thus denied plaintiffs' alternative request for partial production of the Neiman Memorandum.

Plaintiffs appeal both the October 23, 2001 and October 29, 2001 rulings.

#### DISCUSSION

This Court [\*\*9] reviews *de novo* a district court's grant of summary judgment in FOIA litigation. *Halpern v. FBI*, 181 F.3d 279, 288 (2d Cir. 1999). This Court also reviews *de novo* a district court's decisions whether to require partial production of documents following *in camera* review, in keeping with the spirit and the text of the FOIA and its presumption in favor of disclosure. *Grand Cent. P'ship, Inc. v. Cuomo*, 166 F.3d 473, 478 n.2 (2d Cir. 1999).

[\*76] The FOIA, 5 U.S.C. § 552, was enacted to ensure public access to information created by the government in order "to hold the governors accountable to the governed." *NLRB v. Robbins Tire & Rubber Co.*, 437 U.S. 214, 242, 57 L. Ed. 2d 159, 98 S. Ct. 2311 (1978). Thus, "upon request, FOIA mandates disclosure of records held by a federal agency unless the documents fall within enumerated exemptions." *Dep't of the Interior v. Klamath Water Users Protective Ass'n*, 532 U.S. 1, 7, 149 L. Ed. 2d 87, 121 S. Ct. 1060 (2001) (internal citations omitted). The Supreme Court has counseled that these exceptions are to be interpreted narrowly in the face of the overriding [\*\*10] legislative intention to make records public. *See id.* at 7-8.

At issue here is FOIA Exemption 5, which protects from disclosure "inter-agency or intra-agency memorandums or letters which would not be available by

law to a party other than an agency in litigation with the agency." 5 U.S.C. § 552(b)(5). "Stated simply, agency documents which would not be obtainable by a private litigant in an action against the agency under normal discovery rules (e.g., attorney-client, work-product, executive privilege) are protected from disclosure under Exemption 5." n1 *Grand Cent. P'ship*, 166 F.3d 473 at 481 (internal quotation marks and citation omitted).

n1 "This discovery standard can only serve as a rough guide to the courts, since decisions as to discovery are usually based on a balancing of the relative need of the parties, and standards vary according to the kind of litigation involved. Furthermore, the most fundamental discovery and evidentiary principle, relevance to the issues being litigated, plays no part in FOIA cases. *Coastal States Gas Corp. v. Dep't of Energy*, 199 U.S. App. D.C. 272, 617 F.2d 854, 862 (D.C. Cir. 1980) (internal citations and quotation marks omitted); accord *EPA v. Mink*, 410 U.S. 73, 86, 35 L. Ed. 2d 119, 93 S. Ct. 827 (1973).

[\*\*11]

Specifically, the government claims that the deliberative process privilege, a sub species of work-product privilege that "covers 'documents reflecting advisory opinions, recommendations and deliberations comprising part of a process by which governmental decisions and policies are formulated,'" *Klamath*, 532 U.S. at 8 (quoting *NLRB v. Sears, Roebuck & Co.*, 421 U.S. 132, 150, 44 L. Ed. 2d 29, 95 S. Ct. 1504 (1975)), permits withholding of the Neiman Memorandum. The rationale behind this privilege is "the obvious realization that officials will not communicate candidly among themselves if each remark is a potential item of discovery and front page news, and its object is to enhance 'the quality of agency decisions,' by protecting open and frank discussion among those who make them within the Government." 532 U.S. 1 at 8-9 (quoting *Sears*, 421 U.S. at 151); accord *Coastal States*, 617 F.2d at 866 ("The [deliberative process] privilege has a number of purposes: it serves to assure that subordinates within an agency will feel free to provide the decisionmaker with their uninhibited opinions and recommendations without fear [\*\*12] of later being subject to public ridicule or criticism; to protect against premature disclosure of proposed policies before they have been finally

formulated or adopted; and to protect against confusing the issues and misleading the public by dissemination of documents suggesting reasons and rationales for a course of action which were not in fact the ultimate reasons for the agency's action.").

In-order for a document to be protected by deliberative process privilege, it must be: (1) an inter-agency or intra-agency document; (2) "predecisional"; and (3) deliberative. See *Klamath*, 532 U.S. at 8 (discussing the agency-origin [\*77] requirement); *Local 3, Int'l Bhd. of Elec. Workers v. NLRB*, 845 F.2d 1177, 1180 (2d Cir. 1988) (enumerating the predecisional and deliberative requirements); *Lead Indus. Ass'n, Inc. v. OSHA*, 610 F.2d 70, 83 (2d Cir. 1979) (same). Plaintiffs concede that the Neiman Memorandum is, at least in part, deliberative, but challenge the government's right to withhold the Memorandum on the other two grounds.

#### I. Intra- and inter-agency communications

As noted above, Exemption 5 protects only "intra-agency" or "inter-agency" [\*\*13] communications. While "intra-agency" documents are those that remain inside a single agency, and "inter-agency" documents are those that go from one governmental agency to another, they are treated identically by courts interpreting FOIA. *Renegotiation Bd. v. Grumman Aircraft Eng'g Corp.*, 421 U.S. 168, 188, 44 L. Ed. 2d 57, 95 S. Ct. 1491 (1975) ("Exemption 5 does not distinguish between inter-agency and intra-agency memoranda."). The question at issue regarding the intra- or inter-agency requirement is whether the document either originated from or was provided to an entity that is not a federal government agency, in which case the document is not protected by the exemption.

The Supreme Court has cautioned that the term "intra-agency" is not "just a label to be placed on any document the Government would find it valuable to keep confidential." *Klamath*, 532 U.S. at 12. By statutory definition, "agency" means each authority of the Government of the United States," with certain exemptions not relevant here. 5 U.S.C. § 551(1). It is undisputed that the Webster Commission was not an "agency." See *Meyer v. Bush*, 299 U.S. App. D.C. 86, 981 F.2d 1288, 1298 (D.C. Cir. 1993) [\*\*14] (holding that a task force created by the President to study

regulatory relief is not an "agency" under the FOIA). From this uncontested point, plaintiffs reason that Exemption 5 cannot apply. The government, in turn, contends that because the Webster Commission acted as a consultant to the IRS, an agency, in soliciting the Neiman Memorandum, and relied on the Neiman Memorandum in preparing the Webster Report for the IRS, the district court properly concluded that the Neiman Memorandum was an intra-agency communication. The government also argues that the Neiman Memorandum could be deemed an inter-agency communication because it was provided by the Southern District for use in the IRS decision-making process. For the reasons that follow, we conclude that because the Webster Commission was acting as a consultant to the IRS when it solicited the Neiman Memorandum, and the Neiman Memorandum was prepared by the Southern District, an agency, to assist the IRS with determining how best to reform the CID, the Neiman Memorandum is an inter-agency communication.

In considering the scope of Exemption 5, this Circuit has recognized that agencies may require assistance from outside consultants [\*\*15] in formulating policy, and has held that "nothing turns on the point that ... reports were prepared by outside consultants ... rather than agency staff." *Lead Indus.*, 610 F.2d 70 at 83 (citing *Soucie v. David*, 145 U.S. App. D.C. 144, 448 F.2d 1067, 1078 n.44 (D.C. Cir. 1971)); accord *Ryan v. Dep't of Justice*, 199 U.S. App. D.C. 199, 617 F.2d 781, 790 (D.C. Cir. 1980) ("When an agency record is submitted by outside consultants as part of the deliberative process, and it was solicited by the agency, we find it entirely reasonable to deem the resulting document to be an 'intra-agency' memorandum for purposes of determining the applicability of Exemption [\*78] 5."). n2 Instead, "whether a particular document is exempt under (b)(5) depends not only on the intrinsic character of the document itself, but also on the role it played in the administrative process." *Lead Indus.*, 610 F.2d 70 at 80.

n2 In *Klamath*, the Supreme Court recently considered claims that documents submitted by various Indian tribes to the Department of the Interior expressing the tribes' positions on a water allocation project were "intra-agency" documents entitled to protection under Exemption 5. *Klamath*, 532 U.S. at 7-16. In rejecting that argument, the Court observed that "although

neither the terms of the exemption nor the statutory definitions say anything about communications with outsiders, some Courts of Appeals have held that in some circumstances a document prepared outside the Government may nevertheless qualify as an 'intra-agency' memorandum under Exemption 5." *Id.* at 9 (citing *Hoover v. U.S. Dep't of Interior*, 611 F.2d 1132, 1137-38 (5th Cir. 1980); *Lead Indus.*, 610 F.2d 70 at 83; *Soucie*, 448 F.2d at 1067). While the Supreme Court declined to rule on the validity of this "consultant corollary," it distinguished the tribes from consultants, noting that the latter typically "have not been communicating with the Government in their own interest or on behalf of any person or group whose interest might be affected by the Government action addressed by the consultant [and thus] may be enough like the agency's own personnel to justify calling their communications 'intra-agency.'" *Klamath*, 532 U.S. at 11, 12. Unlike in *Klamath*, plaintiffs in this case do not argue that the Webster Commission is an interested party.

[\*\*16]

Plaintiffs acknowledge that this Court has held that communications with consultants may be considered intra-agency, but argue, relying heavily on the D.C. Circuit's opinion in *Dow Jones & Co. v. Dep't of Justice*, 286 U.S. App. D.C. 349, 917 F.2d 571, 574 (D.C. Cir. 1990), that because the memorandum was prepared to assist the Webster Commission with its decisionmaking and was never reviewed by any IRS decisionmaker, the consultant principle is inapposite. In *Dow Jones*, the government had argued that documents provided by the Department of Justice to Congress were protected as inter-agency documents. The D.C. Circuit rejected that position on the grounds that documents prepared to assist with Congress's deliberative process could not be entitled to Exemption 5 privilege because Congress was not an agency for FOIA purposes. *Id.* Here, in contrast, the Webster Commission was not acting on its own behalf in requesting the Neiman Memorandum from the Southern District--rather, it was acting as a consultant to the IRS, an agency, to assist that agency with developing policy recommendations regarding the CID. Plaintiffs recognize, as they must, that the privilege would [\*\*17] have been maintained had Neiman given her memorandum directly to the IRS. *Renegotiation Bd.*, 421 U.S. at 188 ("By

including inter-agency memoranda in Exemption 5, Congress plainly intended to permit one agency possessing decisional authority to obtain written recommendations and advice from a separate agency not possessing such decisional authority without requiring that the advice be any more disclosable than similar advice received from within the agency."). The fact that Neiman transmitted it to the Webster Commission for use in the Commission's recommendations on IRS policy does not alter our view of the matter.

Plaintiffs also contend that an agency consultant's source material cannot be withheld under Exemption 5 where the author had no reasonable expectation that her material would be kept confidential. According to plaintiffs, "where there is no fear of publicity, there is no basis in policy for extending Exemption 5 to consultants' work, especially where the statutory language does not provide for such a result." The issue here, however, is not whether the Webster Commission's public Report is exempt, but rather, whether the [\*79] Commission may be considered a [\*\*18] part of the IRS for purposes of determining whether the Neiman Memorandum falls within the scope of Exemption 5 as an inter-agency communication. Although the Webster Commission may have had no intention to keep private *its* findings and recommendations, this has no bearing on the Southern District's expectation that its opinions would be kept confidential by the Webster Commission and the IRS. In fact, this Court has held that editorial decisions such as determining which parts, if any, of a confidential document to include in a public record are precisely the type of internal agency decisions that Exemption 5 was designed to protect. *See Lead Indus.*, 610 F.2d 70 at 86 ("If the segment appeared in the final version, it is already on the public record and need not be disclosed. If the segment did not appear in the final version, its omission reveals an agency deliberative process: for some reason, the agency decided not to rely on that fact or argument after having been invited to do so."). n3

n3 To the extent that plaintiffs argue that the publication of the Report with a reference to the Neiman Memorandum suggests that there is no basis to protect the Memorandum as a consultant's source material, that argument is addressed in greater detail below in the discussion of waiver.

[\*\*19]

Just as predecisional documents prepared by the Webster Commission for the IRS would be deemed intra-agency communications, *see 610 F.2d 70 at 83*, otherwise privileged communications by another agency intended to assist the Commission with its ultimate responsibilities to the IRS are, for purposes of the FOIA, inter-agency communications with the IRS. Cf. *Dow Jones*, 917 F.2d 571 at 575 ("Exemption 5 permits an agency to protect the confidentiality of communications from outside the agency so long as those communications are part and parcel of *the agency's* deliberative process."). The Webster Commission was acting as a consultant to the IRS when it solicited the Memorandum. It was charged with assisting the IRS with determining how best to reform the CID, and the Commission's Report proposed solutions to specific problems within the CID based on the information conveyed to the Commission by the Southern District, among its other sources. n4 To conclude that the deliberative process privilege does not apply when an outside consultant to an agency receives information from another agency effectively would condition the use of consultants on both agencies' willingness [\*\*20] to disclose any information the consultant reviews in the process of its work and would unreasonably hamper agencies in their decision-making process.

n4 Although plaintiffs state that the Webster Commission "essentially functioned as a watchdog, providing some measure of public oversight over the IRS," they acknowledge that part of the Commission's assignment included evaluating CD. Policies and making recommendations for improvement.

Insofar as the communications were between the Southern District and a consultant for the IRS, the Neiman Memorandum is more properly considered an inter-agency document than an intra-agency document, in that it was prepared by one governmental agency for use by another agency. n5 The interposition of the Webster Commission between the two agencies does not alter this result. We therefore find the Neiman Memorandum eligible for protection under the first prong of Exemption 5.

n5 Alternatively, as a document prepared for use by a consultant to an agency, the Neiman

Memorandum perhaps could also be viewed as an intra-agency document, as the district court concluded. Because we find that the Memorandum is an inter-agency document, we do not decide that issue.

[\*\*21]

[\*80] II. Predecisional

"A document is predecisional when it is prepared in order to assist an agency decisionmaker in arriving at his decision." *Grand Cent. P'ship*, 166 F.3d 473 at 482 (internal quotation marks and citations omitted). Protected by this privilege are "recommendations, draft documents, proposals, suggestions, and other subjective documents which reflect the personal opinions of the writer rather than the policy of the agency." *Id.* (internal quotation marks and citations omitted). However, "the privilege does not protect a document which is merely peripheral to actual policy formation; the record must bear on the formulation or exercise of policy-oriented judgment." *Id.* (quoting *Ethyl Corp. v. EPA*, 25 F.3d 1241, 1248 (4th Cir. 1994) (internal quotation marks omitted)).

Plaintiffs argue that because the Neiman Memorandum was provided to the Webster Commission, rather than to the IRS, it cannot be deemed predecisional, as it was never relied upon by any IRS decisionmaker. As source material for the Webster Report, however, the Neiman Memorandum was prepared for the Commission in order to assist the IRS in its decisionmaking regarding [\*\*22] the future of the CID. This decisionmaking is precisely the type contemplated by *Grand Central Partnership*.

Plaintiffs further contend, citing *Maricopa Audubon Society v. United States Forest Service*, 108 F.3d 1089, 1094 (9th Cir. 1997), that the district court erred in failing to identify any specific decision connected to the Memorandum. In *Maricopa*, the government had argued that "because agencies are involved in a continual process of self-examination, [they] need not identify a specific decision in which [documents claimed to be protected under Exemption 5] will culminate in order for those materials to be 'predecisional.'" *Id.* The Ninth Circuit disagreed, holding that while an agency need not actually demonstrate that a specific decision was made in reliance on the allegedly predecisional material, the government

must show that the material was prepared to assist the agency in the formulation of some specific decision. *Id.* In other words, while the agency need not show *ex post* that a decision was made, it must be able to demonstrate that, *ex ante*, the document for which executive privilege is claimed related to a specific decision [\*\*23] facing the agency. See *Sears*, 421 U.S. at 151 n.18. The Neiman Memorandum, however, meets the criteria established in *Maricopa*, as it is "not merely part of a routine and ongoing process of agency self-evaluation," *Maricopa*, 108 F.3d at 1094, but rather was specifically prepared for use by the Webster Commission in advising the IRS on its future policy with respect to the CID. As in *Maricopa*, the fact that the government does not point to a specific decision made by the IRS in reliance on the Neiman Memorandum does not alter the fact that the Memorandum was prepared to assist IRS decisionmaking on a specific issue.

We therefore conclude that the district court did not err in holding that the Neiman Memorandum falls within the Exemption 5 privilege.

III. Waiver

Even though protected by Exemption 5, the government nonetheless may be required to disclose the Neiman Memorandum if it waived the deliberative process privilege. Consistent with 5 U.S.C. § 552(a)(2), which requires disclosure of *final* agency decisions, the Supreme Court held in *Sears* that production of ostensibly predecisional material may be compelled where "an agency [\*\*24] chooses expressly to adopt or incorporate by reference an intra-agency memorandum previously [\*81] covered by Exemption 5 in what would otherwise be a final opinion." *Sears*, 421 U.S. at 161. In so concluding, the Supreme Court reasoned that:

the probability that an agency employee will be inhibited from freely advising a decisionmaker for fear that his advice, if adopted, will become public is slight. First, when adopted, the reasoning becomes that of the agency and becomes its responsibility to defend. Second, agency employees will generally be encouraged rather than discouraged by public knowledge that their policy suggestions have been adopted by the

agency. Moreover, the public interest in knowing the reasons for a policy actually adopted by an agency supports the District Court's decision below.

*Id.*

Plaintiffs contend that the citation to and publication of an excerpt of the Neiman Memorandum in the Webster Report, which was ultimately made public, was a waiver of the privilege provided by Exemption 5. Under the circumstances here, however, the minor references to the Neiman Memorandum cannot be said to be an express adoption or incorporation. [\*\*25] *See Access Reports v. Dep't of Justice*, 288 U.S. App. D.C. 319, 926 F.2d 1192, 1197 (D.C. Cir. 1991) (distinguishing between "reference to a report's conclusions [and] adoption of its reasoning," and noting that "it is the latter that destroys the privilege"); *Common Cause v. IRS*, 207 U.S. App. D.C. 321, 646 F.2d 656, 660 (D.C. Cir. 1981) (holding that a "casual allusion in a post-decisional document to subject matter discussed in some pre-decisional, intra-agency memoranda" does not waive Exemption 5). n6 Accordingly, we conclude that the government did not waive its right to assert the deliberative \* process privilege as to the Neiman Memorandum.

n6 We also note that this "waiver by incorporation" doctrine applies only where the agency expressly adopts or incorporates an inter-agency memorandum "in what otherwise would be a final opinion." *Sears*, 421 U.S. at 161 (emphasis added). Arguably, as the Webster Report was not drafted by IRS decisionmakers, and it was prepared to aid the IRS in making its decision about internal reforms, it was not a "final opinion."

[\*\*26]

We also reject plaintiffs' position that Neiman's knowledge that the Webster Commission would issue a published report constitutes a waiver of the deliberative process privilege. Even if Neiman could have been expected to know that a report would be published, we find no reason to doubt that she expected that her Memorandum would remain confidential. As previously noted, she prepared the Memorandum to give the Southern District's recommendations, based on its experience, to the IRS, for use in the IRS's internal

evaluation through the Webster Commission. In choosing to reveal the existence of the Memorandum and to publish a very brief excerpt, the Commission exercised its discretion by revealing only information that it determined should be made public and withholding the rest. *Cf. Rockwell Int'l Corp. v. Dep't of Justice*, 344 U.S. App. D.C. 226, 235 F.3d 598, 603-04 (D.C. Cir. 2001) (rejecting claim that partial publication of a document waived the attorney-client privilege as to the remainder of that document). Although the fact that the agency in *Rockwell International* took additional steps to ensure confidentiality also factored into the D.C. Circuit's finding [\*\*27] that the attorney-client privilege had not been waived in that case, we conclude that, for purposes of the deliberative process privilege, the incorporation of one sentence from the Neiman Memorandum in the published Report is not inconsistent with the IRS's or the Southern District's "desire to keep the rest secret." 235 F.3d 598 at 605.

[\*82] IV. *In camera* review

Finally, plaintiffs urge us to release any portions of the Neiman Memorandum that contain purely factual information. The FOIA requires that "any reasonably segregable portion of a record shall be provided to any person requesting such record after deletion of the portions which are exempt under this subsection." 5 U.S.C. § 552(b).

At oral argument, we requested that the government provide a redacted version of the Neiman Memorandum indicating what factual information, if any, was within the public domain. The government complied, but continued to maintain that this information should be withheld because it was intertwined with and provided insight into privileged material. After *de novo in camera* review of the original and redacted memoranda, we conclude that the district court properly found [\*\*28] that "the document is predominantly evaluative, evaluating both policies and procedures of the United States Attorney for the Southern District of New York in criminal investigations involving tax matters and those of the Internal Revenue Service, and recommending procedures for the Internal Revenue Service." We also conclude that even the limited factual material admittedly in the public domain is too intertwined with evaluative and policy discussions to require disclosure. *See Lead Indus.*, 610 F.2d 70 at 85.

312 F.3d 70, \*82; 2002 U.S. App. LEXIS 23672, \*\*28;  
90 A.F.T.R.2d (RIA) 7320; 59 Fed. R. Serv. 3d (Callaghan) 1285

CONCLUSION

For the foregoing reasons, we affirm the orders of  
the district court granting defendants' motion for

summary judgment and denying plaintiffs' cross motion  
for summary judgment.

EAC needed to provide accredited labs on a temporary, interim basis to ensure that the agency had the means to implement its certification program. Additionally, EAC would be compelled to implement a provisional, pre-election certification program to replace services offered by NASED. EAC could not wait for NIST to recommend laboratories. Fortunately, HAVA provided a mechanism for EAC to take such action in Section 231(b)(2)(B). This section requires that EAC publish an explanation when accrediting a laboratory without a NIST recommendation. A notice was published on EAC's Web site to satisfy this requirement.

**EAC's Interim Accreditation Program.** At a public meeting in August 2005 held in Denver, the commissioners received a staff recommendation outlining the details of the interim accreditation program. The staff recommendation included a process in which the three laboratories previously accredited by NASED – CIBER, SysTest Labs, and Wyle Laboratories – would be allowed to apply for interim accreditation. In December of 2005, EAC officially began accepting applications for a limited interim accreditation program. As stated in the letters, the purpose of the interim accreditation program was to provide accredited laboratories to test voting systems to federal standards, until such time as NIST/NVLAP was able to present its first set of recommended laboratories. This accreditation was limited in scope to the 2002 Voluntary Voting System Standards and required the laboratory to apply to the NVLAP program to receive a permanent accreditation. The letters also sought variety of administrative information from the laboratories and required them to sign a Certification of Laboratory Conditions and Practices. This certification required the laboratories to affirm, under penalty of law, information regarding laboratory personnel, conflict of interest policies, recordkeeping, financial stability, technical capabilities, contractors, and material changes.

and  
HAVA  
requirements  
?

In order to accredit a laboratory (even on an interim basis), EAC needed to contract with a competent technical expert to serve as a laboratory assessor. EAC sought a qualified assessor with real-world experience in the testing of voting systems. Ultimately, only one individual responded to EAC's solicitation. The individual was (at the time) the only individual known to have the requisite experience and assessor qualifications. The contractor reviewed each of the laboratories that applied. The review was performed in accordance with international standards, the same standards used by NVLAP and other laboratory accreditation bodies. This standard is known as International Standard ISO/IEC 17025, *General Requirements for the Competence of Testing and Calibration Laboratories*. In addition, the EAC assessor (who also currently serves as a NVLAP assessor) applied NIST Handbooks 150, *Procedures and General Requirements* and NIST Handbook 150-22, *Voting System Testing*.

CIBER, SysTest Labs, and Wyle Laboratories applied for accreditation under the interim program. Each, as required, had previously received a NASED accreditation. EAC's

---

scope, (1) it did not certify voting systems, just modifications and (2) the certification was provisional and, thus, expired.

027647

Congressman Jose Serrano, Chairman  
House Appropriations Subcommittee on Financial Services and General Government  
Page 4

---

assessor visited each of the labs and conducted a review consistent with the standards noted above. The assessor reviewed laboratory policies, procedures and capabilities to determine if the laboratories could perform the work required. Laboratory assessments do not make conclusions regarding past laboratory work product. Two of the applicant laboratories, SysTest Laboratories, L.L.C., and Wyle Laboratories, Inc. received an interim accreditation. The assessor's reports and EAC action regarding these laboratories are available on the EAC Web site.<sup>2</sup> EAC promptly published on its Web site information regarding its decision on accreditation (August and September of 2006). This notice provides some brief background on the interim accreditation process, starting with the fact that three previously NASED accredited laboratories were invited to apply to the program, including information on the program's requirements and limitations and ending with the identity and contact information of the two laboratories accredited. Information was also electronically forwarded to EAC's list of stakeholders via e-mail. The EAC stakeholders e-mail list includes almost 900 election officials and interest groups, nationwide. Staff members for EAC oversight and appropriations committees are included in this list of stakeholders. In addition to EAC's Web site and e-mail announcements, on September 21, 2006 EAC's Executive Director reiterated the Commission's decision at a public meeting Web cast to the EAC Web site. This announcement identified the interim accredited labs by name. Furthermore, in October 26, 2006, the two interim accredited laboratories testified at a nationally televised public hearing.

whose  
hearing  
?

**The Interim Accreditation Program and CIBER.** The third laboratory, CIBER, has yet to satisfy the requirements of the interim accreditation program. The initial assessment of CIBER revealed a number of management, procedural and policy deficiencies that required remedial action before the laboratory could be considered for accreditation. These deficiencies are identified in the initial CIBER/Wyle report. They were also brought to the attention of CIBER's President of Federal Solutions in a letter from EAC's Executive Director dated September 15, 2006. The letter outlines, consistent with recommendation of EAC's assessor, the steps the laboratory must take to achieve compliance. The letter requires CIBER to:

- a. *Assign resources, adopt policies and implement systems for developing standardized tests to be used in evaluating the functionality of voting systems and voting system software. Neither ITA Practices, CIBER nor any of its partners will be permitted to rely on test plans suggested by a voting system manufacturer.*
- b. *Assign resources, adopt policies and implement systems for quality review and control of all tests performed on voting systems and the report of results from those tests. This shall include provisions to assure that all*

---

<sup>2</sup> Note: The Wyle and CIBER assessment was completed as a joint report. The two labs have a cooperative agreement to work together in test voting systems (Wyle performing hardware testing and CIBER software testing).

Congressman Jose Serrano, Chairman  
House Appropriations Subcommittee on Financial Services and General Government  
Page 5

---

*required tests have been performed by ITA Practices, CIBER or its accredited partner lab.*

Finally, the letter required an additional "follow-up" assessment of the laboratory.

The follow-up assessment of CIBER was performed by EAC's assessor in December of 2006. The findings of this assessment were documented in a report, which is available on the EAC Web site. In the findings, the assessor recognized significant changes CIBER had made to its program in response to the initial assessment, including new policies regarding test procedures, management and personnel. The report also noted a number of non-conformities that had yet to be addressed by the laboratory.

In a letter dated January 3, 2007, CIBER provided a written response to EAC's follow-up assessment and report. The response sought to address the deficiencies noted in the December assessment. Additionally, CIBER officials requested to meet with EAC staff to discuss their January 3 response. This meeting took place at EAC on January 10, 2007. At the meeting, EAC staff informed CIBER that their report could not serve as the basis of accreditation because it failed to resolve all outstanding issues. A number of CIBER responses to noted deficiencies were listed as "TBD." EAC's assessor and Certification Program Director formally reviewed CIBER's response. EAC provided CIBER notice of the deficiencies that remain outstanding and informed them of the steps they must take to come into compliance by a letter dated February 1, 2007. Due to the fact that the purpose and usefulness of the interim accreditation program is coming to a close, EAC allowed CIBER 30 days in which to document their full compliance. After this time, the program will be closed and no further assessment actions will be performed under the interim program. CIBER was notified of this procedure by letter dated January 26, 2007, and on February 8, 2007, EAC voted to close its interim laboratory accreditation program effective March 5, 2007.

Information related to CIBER's status in the EAC interim accreditation program was not released prior to January 26, 2007. It was EAC's belief, in consultation with NIST, that it would be improper to release information regarding an incomplete assessment. However, on January 25, 2007, CIBER took the affirmative action of making this information available to a third party, the New York State Board of Elections. With this action, CIBER made the information public and EAC believed it was incumbent to provide this information to the public. As such, on January 26, 2007, EAC posted on its Web site assessment reports, correspondence, and responses from CIBER related to their progress in the EAC interim accreditation program.

Copies of the two reports issued by the EAC assessor concerning CIBER's laboratory accreditation assessments are attached as Appendixes 1 and 2 to this letter.

And the current status is - - -

was requested is a draft of a final document that has already been released after being vetted by staff and approved by the EAC Commissioners. It is available in its final form on EAC's Web site, [www.eac.gov](http://www.eac.gov). The draft document at issue was created by two contract employees hired pursuant to 5 U.S.C. §3109 (see 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees were supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. As stated by their contracts, these consultants were hired so that the EAC could "...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation." Moreover, the contracts clearly forbid the consultants from releasing the draft they created consistent with the privilege covering the draft report. The contract states

All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Finally, the purpose or subject of the draft report at issue was to make an EAC determination on how voter fraud should be studied by the agency. This was to be done by (1) assessing the nature and quality of the information that presently exists on the subject matter, (2) defining the terms and scope of EAC study as proposed by HAVA, (3) determining what is to be studied and (4) determining how it is to be studied. In addition, the Consultants were asked to develop a definition of the phrases "voting fraud" and "voter intimidation."

EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision. It would be irresponsible for EAC to accept the product of contracted employees and publish that information without exercising due diligence in vetting the product of the employees' work and the veracity of the information used to produce that product. EAC conducted this review of the draft voter fraud and intimidation report provided by Ms. Wang and Mr. Serebrov. EAC found that the draft report failed to provide a definition of the terms as required, contained conclusions that were not sought under the terms of the contract or were not supported by the underlying research, and allegations that showed bias. EAC staff edited the draft report to correct the problems mentioned above and included all of the consultants' and working groups' recommendations. The final report was adopted by EAC on December 7, 2007 during its public meeting. The final report as well as all of

was there more than one?

027649

Congressman Jose Serrano, Chairman  
House Appropriations Subcommittee on Financial Services and General Government  
Page 8

---

the underlying research conducted by Mr. Serebrov and Ms. Wang are available on EAC's Web site, [www.eac.gov](http://www.eac.gov).

EAC understands and appreciates that the a request from a Congressional committee is exempt from the provisions of FOIA, and as such, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 3 to this letter.

### Draft Voter Identification Report

The third document requested is the draft report prepared by Rutgers University in conjunction with Moritz College of Law. Rutgers and Moritz served as contractors to EAC and produced this draft document pursuant to the provisions of the contract governing that relationship. This draft report, like the draft voter fraud and voter intimidation report, is predecisional under the deliberative process exemption to FOIA.

With regard to the Voter Identification draft report, it was created by Rutgers University in conjunction with the Moritz College of Law (Ohio State University) to "...provide research assistance to the EAC for the development of voluntary guidance on provisional voting and voting identification procedures." The stated objective of the contract was to:

...obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics... The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were provided guidance, information, and were directed by EAC personnel. The final product they delivered (draft report sought) was identified as "a guidance document for EAC adoption." Clearly, as noted by the contract, the issuance of Federal guidance to states is a matter of government policy and limited to official EAC action. EAC has not completed review and vetting of this document. However, initial review of this document reveals data and analysis that causes EAC concern. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists

?  
voter

Congressman Jose Serrano, Chairman  
House Appropriations Subcommittee on Financial Services and General Government  
Page 9

---

and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>7</sup> After this review process is completed, EAC will make a decision whether to adopt or reject the draft report.

Again, recognizing that a request from a Congressional committee is exempt from the provisions of FOIA, EAC is providing this draft document despite the fact that the deliberative process exemption clearly applies to its contents. The draft report has been attached as Appendix 4 to this letter.

Thank you for your requests and your interest in election administration. If you have further questions, please do not hesitate to contact me.

Sincerely,

Donetta Davidson  
Chair

## EAC Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, www.eac.gov.

Comment (GH): In Footnote #2 Regarding the estimate of non-citizens Perhaps this could be clarified to say whether the % of non-citizens was in the VAP or of the US population as whole. It is not clear to me.

### EAC Declines to Adopt Draft Report

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. Because these numbers include non-citizens, the Contractor ~~reduced the numbers by the same percentage~~ the U.S. Census Bureau estimated ~~were non-citizens in 2000~~. Estimates of voting age population include persons who are not registered to vote. *VAP for 2004. Thus 2004*

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

*These data did not differentiate between citizens and non-citizens.*

*of citizens included in voting age population statistics in 2000 to*

implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. EAC, however, is releasing the data and analysis conducted by Contractor.

**Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

<sup>4</sup> See Transcript of EAC Public Meeting, February 8, 2007, page 109.

*All of the material provided by the Contractor is attached.*

- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

DRAFT

## EAC Study of Voter Identification Requirements

### Background

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics (“Contractor”) to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Drawing on its nationwide review and legal analysis of state statutes and regulations for voter identification, the contractor compared states with similar voter identification requirements and drew conclusions based on comparing turnout rates among states for one election – November 2004. For example, the turnout rate in 2004 in states that required the voter to provide a photo identification document<sup>1</sup> was compared to the turnout rate in 2004 in states with a requirement that voters give his or her name in order to receive a ballot. Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates<sup>2</sup> and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.<sup>3</sup>

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor’s testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC’s website, [www.eac.gov](http://www.eac.gov).

### EAC Declines to Adopt Draft Report

---

<sup>1</sup> In 2004, three of the states that authorized election officials to request photo identification allowed voters to provide a non-photo ID and still vote a regular ballot and two others permitted voters who lacked photo ID to vote a regular ballot by swearing and affidavit.

<sup>2</sup> The July 2004 estimates for voting age population were provided by the U.S. Census Bureau. These data did not differentiate between citizens and non-citizens; because these numbers include non-citizens, the Contractor reduced the numbers by applied the same percentage of citizens included in voting age population statistics in 2000 to the U.S. Census Bureau estimated were non-citizens in 2000 voting age population in 2004. Thus, 2004 estimates of voting age population include persons who are not registered to vote.

<sup>3</sup> The Current Population Survey is based on reports from self-described registered voters who also describe themselves as U.S. citizens.

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's efforts to study the possible impact of voter identification requirements.

However, EAC has concerns regarding the data, analysis, and statistical methodology the Contractor used to analyze voter identification requirements to determine if these laws have an impact on turnout rates. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a data set based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data) was conducted that produced only some evidence of correlation between voter identification requirements and turnout. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." The research methodology and the statistical analysis used by the Contractor were questioned by independent working and peer review groups comprised of social scientists and statisticians. The Contractor and the EAC agree that the report raises more questions than provides answers.<sup>4</sup> Thus, EAC will not adopt the Contractor's study and will not issue an EAC report based upon this study. All of the material provided by the Contractor is attached.

#### **Further EAC Study on Voter Identification Requirements**

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.

---

<sup>4</sup> See Transcript of EAC Public Meeting, February 8, 2007, page 109.

- In 2007, convene a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud. Study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.
- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject More thoughts on Eagleton draft report

After having read the Eagleton draft report, I have some thoughts and questions:

I am troubled by the concept that Eagleton compared states as if they were equal. They assume that, all factors being equal, that the voter turn out in each state would be equal. I am not at all certain that this is the case. Further, there is no evidence that the staticians actually compared previous years' turnout in the same state to determine whether 2004 was some sort of anomaly for that state (high or low). Long story short, I am very skeptical of the data that they used to draw conclusions. We should ask questions about what data they used, how they parsed it, why they used the data, what other data could have been used to provide better, more reliable results.

My second concern is how they (statistically speaking) differentiate between a minimum requirement (i.e. state name, photo i.d., etc) and a maximum requirement (i.e., state name, photo i.d., etc.). It makes no sense to me how they could possibly arrive at a different percentage for these requirement levels.

My third issue is the persistent use of the phrases "ballot access" and "ballot integrity" without some definition or some explanation of what those concepts are.

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW – Suite 1100  
Washington, DC 20005

**ATTORNEY-CLIENT PRIVILEGED COMMUNICATION**

**MEMORANDUM**

TO: Commissioners DeGregorio, Martinez, Davidson & Hillman  
FROM: Juliet Thompson Hodgkins  
DATE: February 6, 2006  
RE: Open Meetings

**BACKGROUND**

Based upon the number of questions that we have recently had concerning meetings of the Commission and meetings that groups of Commissioners want to have with various of our stakeholders, I thought it prudent to distribute this memorandum that sets forth the basic principles of the federal open meetings law, what is an open meeting and which meetings must be publicized.

**WHAT IS A MEETING?**

A meeting is considered to be the gathering and deliberation of a sufficient number of the agency members to constitute a quorum that can act on behalf of the agency and wherein the members conduct or dispose of official agency business:

the deliberations of at least the number of individual agency members required to take action on behalf of the agency where such deliberations determine or result in the joint conduct or disposition of official agency business, but does not include deliberations required or permitted by subsection (d) or (e)...

5 U.S.C. 552b(a)(2).

Each agency should have a set of regulations that further defines meetings for purposes of the Government in the Sunshine Act. For example, the FEC has defined meeting to exclude the type of circulation voting procedure that this

Commission has adopted. This agency has not yet adopted regulations governing its public meetings, but should do so in this fiscal year.

In addition to these statutory and regulatory provisions, case law has interpreted the meaning of meeting. Discussions between Commission staff and the Commissioners as well as circulation of memoranda regarding a subject are **not** considered a meeting for purposes of the Government in the Sunshine Act.

Discussions between members of Civil Aeronautics Board and staff and circulation of memoranda among Board members were activities common to any body of responsible public officials preparing to make important decision, and the kind of activity forbidden by Sunshine Act did not occur. Republic Airlines, Inc. v. C.A.B., C.A.8 1985, 756 F.2d 1304.

Furthermore, meetings to discuss whether to have another meeting are not considered to be covered by the Sunshine Act.

This section exempts from its definition of "meeting" deliberations about whether to schedule future meetings with shorter than seven-day notice; thus, meeting at which Federal Communications Commission did no more than set a date to consider applicant's amended application for transfer of television status was not subject to notice provisions of this section. Washington Ass'n for Television and Children v. F. C. C., C.A.D.C.1981, 665 F.2d 1264, 214 U.S.App.D.C. 446.

### **WHEN MUST A MEETING BE OPEN?**

Federal law requires that meetings of a government agency be open.

Members shall not jointly conduct or dispose of agency business other than in accordance with this section. Except as provided in subsection (c), every portion of **every meeting of an agency shall be open to public observation.**

5 U.S.C. 552b(b).

For purposes of this requirement, the term agency means:

any agency, as defined in section 552(e) of this title, headed by a collegial body composed of two or more individual members, a majority of whom are appointed to such position by the President with the advice and consent of the Senate, and any subdivision thereof authorized to act on behalf of the agency;

5 U.S.C. §552b(a)(1).

There are ten statutory exemptions for the requirement of an open meeting. In these instances, a meeting may be closed by vote of the Commission:

- (1) disclose matters that are
  - (A) specifically authorized under criteria established by an Executive order to be **kept secret in the interests of national defense or foreign policy** and
  - (B) in fact properly **classified** pursuant to such Executive order;
- (2) relate solely to the **internal personnel rules and practices** of an agency;
- (3) disclose matters **specifically exempted from disclosure by statute** (other than section 552 of this title), provided that such statute
  - (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or
  - (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (4) disclose **trade secrets and commercial or financial information** obtained from a person and privileged or confidential;
- (5) involve **accusing any person of a crime**, or formally censuring any person;
- (6) **disclose information of a personal nature** where disclosure would constitute a clearly unwarranted invasion of personal privacy;
- (7) **disclose investigatory records compiled for law enforcement purposes**, or information which if written would be contained in such records, but only to the extent that the production of such records or information would
  - (A) interfere with enforcement proceedings,
  - (B) deprive a person of a right to a fair trial or an impartial adjudication,
  - (C) constitute an unwarranted invasion of personal privacy,
  - (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source,
  - (E) disclose investigative techniques and procedures, or
  - (F) endanger the life or physical safety of law enforcement personnel;
- (8) disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;
- (9) disclose information the premature disclosure of which would—
  - (A) in the case of an agency which regulates currencies, securities, commodities, or financial institutions, be likely to

(i) lead to significant financial speculation in currencies, securities, or commodities, or  
(ii) significantly endanger the stability of any financial institution; or

(B) in the case of any agency, be likely to significantly frustrate implementation of a proposed agency action, except that subparagraph (B) shall not apply in any instance where the agency has already disclosed to the public the content or nature of its proposed action, or where the agency is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or

(10) specifically concern the agency's issuance of a subpoena, or the agency's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the agency of a particular case of formal agency adjudication pursuant to the procedures in section 554 of this title or otherwise involving a determination on the record after opportunity for a hearing.

5 U.S.C. 552b(c)(1) – (10).

Obviously, numbers 1, 8, 9, and 10 do not and will not apply to this Commission.

### **REQUIREMENTS OF AN OPEN MEETING**

Notice must be provided at least one week in advance of the meeting.

In the case of each meeting, the agency shall make public announcement, at least one week before the meeting, of the time, place, and subject matter of the meeting, whether it is to be open or closed to the public, and the name and phone number of the official designated by the agency to respond to requests for information about the meeting. Such announcement shall be made unless a majority of the members of the agency determines by a recorded vote that agency business requires that such meeting be called at an earlier date, in which case the agency shall make public announcement of the time, place, and subject matter of such meeting, and whether open or closed to the public, at the earliest practicable time.

5 U.S.C. 552b(e)(1).

In addition, each and every portion of the meeting must be open to the public unless the meeting is closed by vote due to the discussion of a topic covered under the exemptions discussed above. (See 5 U.S.C. 552b(b) and (c)(1) – (10))

## **CONCLUSION**

A quorum for this Commission is set by statute. HAVA provides that any action requires a vote of three Commissioners. As such, the presence and deliberation of three Commissioners constitute a quorum of the Commission.

Meetings must be held in compliance with the Government in the Sunshine Act. Thus, all meetings of the Commission (that is where 3 or more Commissioners and present and deliberating) shall be noticed and open to the public, unless one or more exceptions for closure of the meeting applies. No meetings of three or more Commissioners should be held with persons other than staff of this Commission without following the provisions of the Government in the Sunshine Act.

**ATTORNEY-CLIENT PRIVILEGED COMMUNICATION**

**MEMORANDUM**

**TO: Chairman Soaries**

**FROM: Julie Thompson**

**RE: Open Meetings**

**DATE: November 12, 2004**

The open meetings requirement is found in 5 USC § 552b. Generally, that statute defines a meeting of a covered agency to be:

the deliberations of at least the number of individual agency members required to take action on behalf of the agency where such deliberations determine or result in the joint conduct or disposition of official agency business, but does not include deliberations required or permitted by subsection (d) or (e)

5 USC 552b(a)(2). The statute, further specifically prohibits the conduct or disposition of agency business other than in accordance with the provisions of the open meetings law. 5 USC 552b(b). There are several enumerated exceptions to what must be conducted in an open and public meeting:

- (1) disclose matters that are (A) specifically authorized under criteria established by an Executive order to be kept secret in the interests of national defense or foreign policy and (B) in fact properly classified pursuant to such Executive order;
- (2) relate solely to the internal personnel rules and practices of an agency;
- (3) disclose matters specifically exempted from disclosure by statute (other than section 552 of this title), provided that such statute (A) requires that the matters be withheld from the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (4) disclose trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (5) involve accusing any person of a crime, or formally censuring any person;

## **ATTORNEY-CLIENT PRIVILEGED COMMUNICATION**

- (6) disclose information of a personal nature where disclosure would constitute a clearly unwarranted invasion of personal privacy;
- (7) disclose investigatory records compiled for law enforcement purposes, or information which if written would be contained in such records, but only to the extent that the production of such records or information would (A) interfere with enforcement proceedings, (B) deprive a person of a right to a fair trial or an impartial adjudication, (C) constitute an unwarranted invasion of personal privacy, (D) disclose the identity of a confidential source and, in the case of a record compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, confidential information furnished only by the confidential source, (E) disclose investigative techniques and procedures, or (F) endanger the life or physical safety of law enforcement personnel;
- (8) disclose information contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions;
- (9) disclose information the premature disclosure of which would--
  - (A) in the case of an agency which regulates currencies, securities, commodities, or financial institutions, be likely to (i) lead to significant financial speculation in currencies, securities, or commodities, or (ii) significantly endanger the stability of any financial institution; or
  - (B) in the case of any agency, be likely to significantly frustrate implementation of a proposed agency action,

except that subparagraph (B) shall not apply in any instance where the agency has already disclosed to the public the content or nature of its proposed action, or where the agency is required by law to make such disclosure on its own initiative prior to taking final agency action on such proposal; or

(10) specifically concern the agency's issuance of a subpoena, or the agency's participation in a civil action or proceeding, an action in a foreign court or international tribunal, or an arbitration, or the initiation, conduct, or disposition by the agency of a particular case of formal agency adjudication pursuant to the procedures in section 554 of this title or otherwise involving a determination on the record after opportunity for a hearing.

5 USC §552b(c). In addition, the exceptions to the public records law, those documents which are not required to be made open and available to the public, are also exceptions to items that must be discussed in an open and public meeting.

- (1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified pursuant to such Executive order;
- (2) related solely to the internal personnel rules and practices of an agency;
- (3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute (A) requires that the matters be withheld from

## **ATTORNEY-CLIENT PRIVILEGED COMMUNICATION**

- the public in such a manner as to leave no discretion on the issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;
  - (5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;
  - (6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
  - (7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could reasonably be expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of a confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of a record or information compiled by criminal law enforcement authority in the course of a criminal investigation or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;
  - (8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or
  - (9) geological and geophysical information and data, including maps, concerning wells.

5 USC § 552(b).

The open meetings law does not require the agency to hold meetings. Rather, if the agency holds a meeting it must comply with the open meeting requirements where applicable. This is why the agency can use notation voting (tally votes) in lieu of a meeting.

With regard to the specific discussion that we had concerning the possibility of holding a meeting with certain advocacy groups, I believe that this will run afoul of the open meetings law, as such meeting will inevitably reveal information and spurn deliberations, analysis and ultimately decisions related to the past election. It would be preferable to have these advocacy groups present at a public meeting of the Commission for a number of reasons: (1) it would allow an open and public discussion of their impressions of the election; (2) it would allow the Commission to invite all advocacy groups with an interest in this topic; and (3) it would prevent any allegations that the Commission met behind

**ATTORNEY-CLIENT PRIVILEGED COMMUNICATION**

closed doors with certain but not all advocacy groups – thus avoiding any appearance of favoritism. We have already discussed the possibility of having a public meeting on December 16 (or the date that is finally selected) where certain elections stakeholders are asked to give reports on their sense of the election. In addition, we have discussed the possibility of having public hearings in the field wherein we gather information regarding the positives and negatives associated with the November 2, 2004 election. These would be perfect opportunities to publicly gather the information that we are seeking through a meeting with the advocacy groups.

John Weingart  
Associate Director  
Eagleton Institute of Politics  
Rutgers University

New Brunswick, NJ

Dear Mr. Weingart:

Thank you for your recent inquiry of August 16, 2006 regarding the anticipated release of data contained in the Eagleton Institute of Politics and Moritz College of Law studies on provisional voting and voter identification, which were conducted for the U.S. Election Assistance Commission.

While your assertion that election officials could benefit from the data compiled in the course of your research may be true, I would urge Eagleton and Moritz to exercise caution in the release of this information without further work to ensure its accuracy and completeness. Eagleton and Moritz received information from several election officials at the Standards Board and Board of Advisors meetings that information contained in the data set and draft report are inaccurate or incomplete. Furthermore, as you will recall, EAC accepted the report based on this data in "draft" as the completion of your contract due to our concerns about the data and the analysis of that data. In light of those concerns, EAC has not yet completed its review of the "draft" report and has not made final determinations on the release of any future document based on that data and draft report.

As such, any release of the data gathered by Eagleton or Moritz may not be released in conjunction with or using EAC's name as endorsing the content, quality or veracity of such data. I trust that this clarifies how Eagleton and Moritz may use the data gathered in the performance of its contract with the EAC. If you have any questions, please feel free to contact me.

Sincerely,

Thomas Wilkey  
Executive Director

Subject Edited version of the Voter ID statement

Commissioners,

I intended to get this out to you much earlier today, but the day got away from me. After our hearing last week before the House Appropriations Subcommittee and the requests that were made for the draft reports of the Eagleton and Voter Fraud studies, I think that we must take a different approach to addressing the quality of these reports. While it may or may not be our intention to release these documents publicly, we MUST respond to the request made from a Congressional Committee and cannot use FOIA exemptions as FOIA does not apply to them. I believe that it is safe to assume that if we provide these documents to the Committee, even with a letter explaining their predecisional nature, that these documents will be released into the public spectrum. As such, I feel that EAC needs to make a statement regarding the quality of these reports and why we are making (or have made) a decision not to adopt the draft reports that were produced by our contractors.

Thus, I edited the statement that Karen produced with comments that reflect why we will not adopt the Eagleton report. That document is attached below. I would suggest that we put similar statements regarding Eagleton's report and the Voter Fraud draft report into a letter that I am drafting to go to the Committee with the requested documents. I will edit that letter to include similar comments tonight/tomorrow morning and will circulate it to you.

Please let me know if you have any questions, concerns, comments, etc.

## **EAC Statement on Future Study of Voter Identification Requirements**

### **Background**

The Help America Vote Act of 2002 (HAVA) authorizes the United States Election Assistance Commission (EAC) to conduct periodic studies of election administration issues. In May 2005, EAC contracted with Rutgers, the State University of New Jersey through its Eagleton Institute of Politics ("Contractor") to perform a review and legal analysis of state legislation, administrative procedures and court cases, and to perform a literature review on other research and data available on the topic of voter identification requirements. Further, the Contractor was asked to analyze the problems and challenges of voter identification, to hypothesize alternative approaches and to recommend various policies that could be applied to these approaches.

The Contractor performed a statistical analysis of the relationship of various requirements for voter identification to voter turnout in the 2004 election. Using two sets of data-- aggregate turnout data at the county level for each state, and reports of individual voters collected in the November 2004 Current Population Survey conducted by the U.S. Census Bureau-- the Contractor arrived at a series of findings, conclusions and subsequent recommendations for further research into the topic.

The Contractor presented testimony summarizing its findings from this statistical and data analysis at the February 8, 2007 public meeting of the U.S. Election Assistance Commission. The Contractor's testimony, its summary of voter identification requirements by State, its summary of court decisions and literature on voter identification and related issues, an annotated bibliography on voter identification issues and its summary of state statutes and regulations affecting voter identification are attached to this report and can also be found on EAC's website, [www.eac.gov](http://www.eac.gov).

### **EAC Recommendations for further study and next steps**

EAC finds the Contractor's summary of States' voter identification requirements and its summary of state laws, statutes, regulations and litigation surrounding the implementation of voter identification requirements, to be a first step in the Commission's consideration of voter identification requirements.

However, EAC has concerns regarding the research data, analysis and statistical methodology the Contractor chose to employ in order to analyze voter identification requirements and the potential variation into determine if these laws have an impact on turnout rates based on the type of voter identification requirements. The Contractor used a single election's statistics to conduct this analysis. The two sets of data came from the Census Bureau and included persons who were not eligible to and did not vote. The first analysis using averaged county-level turnout data from the U.S. Census showed no statistically significant correlations. So, a second analysis using a less reliable data set

based upon the Current Population Survey (which was self-reported and showed a significantly higher turnout rate than other conventional data on that point) was conducted that produced only some evidence of correlation between voter identification requirements and turn out. Furthermore, the initial categorization of voter identification requirements included classifications that actually require no identification at all, such as "state your name." These data and the statistical analysis used by the Contractor were rightly criticized by independent working and peer review groups comprised of social scientists and statisticians. EAC believes that the Contractor's recommendation or draft report is so fundamentally flawed that none of the draft findings can be adopted or rehabilitated to form a reliable, accurate and useful product. Thus, EAC is not adopting the report submitted by the Contractor and, therefore, is not releasing the will not issue a report based upon this study.

EAC will engage in a longer-term, more systematic review of voter identification requirements. Additional study on the topic will include more than one Federal election cycle, additional environmental and political factors that effect voter participation, and the numerous changes in state laws and regulations related to voter identification requirements that have occurred since 2004.

EAC will undertake the following activities:

- Conduct an ongoing state-by-state review, reporting and tracking of voter identification requirements. This will include tracking states' requirements which require a voter to state this or her name, to sign his or her name, to match his or her signature to a signature on file, to provide photo or non-photo identification or to swear an affidavit affirming his or her identify.
- Establish a baseline of information that will include factors that may affect or influence Citizen Voting Age Population (CVAP) voter participation, including various voter identification requirements, the competitiveness of a race and certain environmental or political factors. EAC will use some of the information collected by Eagleton as well as additional data from the states to develop this baseline.
- Convene, by mid-2007, a working group of advocates, academics, research methodologists and election officials to discuss EAC's next study of voter identification. Topics to be discussed include methodology, specific issues to be covered in the study and timelines for completing an EAC study on voter identification.
- Study how voter identification provisions that have been in place for two or more Federal elections have impacted voter turnout, voter registration figures, and fraud, study the effects of voter identification provisions, or the lack thereof, on early, absentee and vote-by-mail voting. Included in this study will be an examination of the relationship between voter turnout and other factors such as race and gender.

- Publish a series of best practice case studies which detail a particular state's or jurisdiction's experiences with educating poll workers and voters about various voter identification requirements. Included in the case studies will be detail on the policies and practices used to educate and inform poll workers and voters.

Subject Re: Comments on Eagleton's response

I have not reviewed the various laws, but I believe that it would require that kind of review to answer your question accurately. My guess is that much like other election-related provisions, the language of the statute and the placement of the statute in the code or statutory scheme will dictate the answer to the question. Some may not even be written into statute. If you want me to, I can get someone to start working on that review.

**Cc:** Thomas Wilkey; Karen Lynn-Dyson; Jeannie Layson  
**Subject:** Comments on Eagleton's response

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.

027674

2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates(FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.(FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.

My flight departs at 9:20 a.m. (EDT) and I do not arrive until 12:15 p.m. (EDT). However, if you have

Subject Comments on Eagleton's response

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.
2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates(FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.(FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."
3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).
4. There is no number 4.
5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.
6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton.

027677

The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

**SECTION 551 DEFINITIONS**

**RULE MAKING:**

Agency process for making, changing or repealing a rule.

**RULE:**

An agency statement of general or particular applicability AND future effect -- Designed to

- implement, interpret, or prescribe law or policy OR..
- describing the organization, procedure or practice requirements of the agency...

AND includes the approval or prescription for the future OF:

- rates,
- wages,
- corporate or financial structures or reorganizations thereof,
- prices,
- facilities,
- appliances, services or allowances therefore or of valuations,
- costs,
- or accounting,
- or practices bearing on any of the above.

**AJUDICATION:**

Agency process for formulating an ORDER.

**ORDER:**

Final disposition (affirmative or negative) of an agency in a matter other than rule making but including licensing.

**LICENSING:**

Agency process granting, renewing, denying, suspending, revoking, etc... a license.

**LICENSE:**

Whole or part of any agency permit, certificate, approval, registration.... or other form of permission.

**SECTION 553 Rule Making**

- 1) General Notice Required... Notice of proposed rule making published in Federal Register.
  - a. No timeline noted.
  - b. Exceptions. Such notice not required for interpretive rules, general statements of policy, or rules of agency organization, procedure or practice... OR finding of good cause shows such filing is impractical unnecessary, etc...

- 2) After notice, above, agency shall give the public an opportunity to participate in the rulemaking through submissions of written data... or oral presentations.
- 3) After consideration of the relevant materials presented, the agency shall incorporate in the rules adopted, a concise general statement of their basis and purpose. If statutes require a hearing on the record different rules apply (sec 556 & 557)
- 4) Publication of the substantive rule must be made 30 days before it becomes effective. (exceptions are noted).

***SEC 554 ADJUDICATIONS (Agency process for making orders –final decisions that are not rules—includes licensing (i.e. certification/approval permit)***

Applies only when adjudication required by statute to be determined on the record after opportunity to be heard. ??? does HAVA require this... it is silent to the whole process.

Section set rules for such a proceeding

**SEC 556 HEARINGS....**

This section on hearings applies only when required by the Rule Making Section (553) or the Adjudication Section (554). Under both sections hearings are only required when required by statute.

Subject FOIA QUESTION

Per your question concerning draft documents and agency policies, my experience is that such documents are rarely released. First, the basis for withholding such documents is a litigation privilege referred to as the deliberative process privilege. FOIA (as a matter of necessity) incorporates litigation privileges as a statutory exemption. Like most privileges, the deliberative process privilege can be waived by the agency. As such, it is a voluntary exemption under FOIA (unlike exemptions for other matters like the withholding of classified information).

Agencies do have FOIA regulations. I am familiar with the Air Force regulation and took a quick look at those of the DOL and DOE. The regulations are generally focused upon procedure (how a request is processed, appealed, etc...) . Sometimes a regulation will outline or summarize exemptions for the benefit of its employes (the Air Force did this). Generally, they do not contain specific policies regarding the retention of drafts. The closest you will see agencies come to this is a general statement of policy relating to dealing with non-mandatory exemptions. For example the DOE states: "[t]o the extent permitted by other laws, the DOE will make records available which it is authorized to withhold under 5 U.S.C. § 522 whenever it determines that such disclosure is in the public interest." 10 C.F.R. § 1004.1. HOWEVER, given that the deliberative process privilege is a privilege based upon public policy (i.e. to protect decision making and avoid public confusion) it is unlikely that this policy would support the release of most drafts. In fact, I pulled a DOE decision on a FOIA appeal regarding a drafts and found this to be the case.(Case No. VFA-0558, 27 DOE 80,270).

Washington, DC. 20005

*The purpose of this document is to provide a broad overview of the trade secrets and commercial and financial information exemption of the Freedom of Information Act (FOIA) (Exemption 4). The document should be a useful tool in responding to FOIA request. It should also serve as a helpful reference during the creation of the EAC's Voluntary Voting System Certification Program. The certification program should be created with the understanding that the EAC has an interest, legal obligation and responsibility to protect certain proprietary information. Such forethought will make for a more efficient and compliant program in the long run. Please note that this document is a simple overview and should not serve as a replacement for legal counsel, independent research and cases by case—fact specific—analysis.*

### Exemption 4 of FOIA

The Freedom of Information Act (5 U.S.C. §552(b)(4)) provides for the release of documents to the public upon proper request. The statute does, however, exempt certain documents from release. One such exemption, Exemption 4, protects "trade secrets and commercial or financial information obtained from a person [that is] privileged or confidential." This exemption serves to protect both the government and persons who provide information to the government. It does this by ensuring that the government will be able to obtain complete, accurate and useful information and safeguarding those who provide such information from competitive harm.

Generally, FOIA Exemption 4 is viewed in two parts or categories: (1) trade secrets and (2) commercial or financial information. If a document meets the definition of a trade secret no additional inquiry is necessary, it is exempt from the requirements of FOIA.<sup>1</sup> If a document is not a trade secret, it must be reviewed to determine if it is commercial or financial information which is privileged or confidential. This requires an involved analysis under standards set by the courts.<sup>2</sup> Ultimately any determination that Exemption 4 of FOIA applies to a request for information, will require that the information be withheld. This is because the Trade Secrets Act (18 U.S.C. §1905), a criminal statute prohibiting the release of certain information by the government, has been read as coextensive with Exemption 4.<sup>3</sup> Thus, in practice, there may be no discretionary release of materials covered by Exemption 4.

### Trade Secrets

The term "trade secrets" is not defined in FOIA and has different meanings under the common law. The courts have determined that in the FOIA context, the term trade secrets should be defined

<sup>1</sup> Public Citizens Health Research Group v. Food and Drug Administration, 539 F.Supp 1320, 1325 (D.D.C 1982).

<sup>2</sup> National Parks & Conservation Association v. Morton, 498 F.2d 765 (D.C.Cir.1974), and refined in National Parks & Conservation Association v. Kleppe, 547 F.2d 673 (D.C.Cir.1976), and Gulf & Western Industries v. United States, 615 F.2d 527 (D.C.Cir.1979).

<sup>3</sup> CNA Fin. Corp. v. Donovan, 830 F.2d 1132 (D.C. Cir. 1987).

narrowly. For the purpose of FOIA Exemption 4, the term has been defined “as a secret, commercially valuable plan, formula, process, or device that is used for the making, preparing, compounding, or processing of trade commodities and that can be said to be the end product of either innovation or substantial effort.”<sup>4</sup> Ultimately, trade secrets information “relates to the productive process itself.” It deals with information describing how a product is made. It does not relate to information describing end product capabilities, features, or performance.<sup>5</sup>

## Commercial or Financial Information

Exemption 4 of FOIA provides that documents containing information that is “commercial or financial” may be withheld if it was obtained from “a person” and is “privileged or confidential.”<sup>6</sup> First, the terms “commercial” and “financial” should be given their ordinary meaning. As such, the terms may be read broadly and include records in which a submitter has any *commercial interest*.<sup>7</sup> As for the term “person,” it is also read broadly. The FOIA phrase “obtained from a person” encompasses a wide range of entities, including: corporations and state governments who provide information to the government.<sup>8</sup> This leaves the more complex determination of whether information is privileged or confidential.

The standard for determining whether information is confidential depends upon whether its submission to the government was voluntary or required. Information given to an agency voluntarily is provided greater protection from release. Such information is categorically protected if it is NOT customarily disclosed to the public by the submitter.<sup>9</sup> Case law and Department of Justice guidance dictate that determining whether a submitter voluntarily provided information is not based upon the nature of their participation in the activity, but whether the information was required if they chose to participate.<sup>10</sup> Thus, despite the fact that the EAC’s voting system certification program will be “voluntary,” it is likely that the documents which vendors provide will be required by the EAC as a condition of participation.

Information required to be submitted to an agency is confidential if its disclosure is likely to produce either of the following effects: (1) impair the government’s ability to obtain necessary information in the future (“impairment prong”) OR (2) cause substantial harm to the competitive position of the submitter (“competitive harm prong”).<sup>11</sup>

### Impairment Prong.

Looking first to the impairment prong, in the context of required information, the government’s ability to collect needed information will be impaired when disclosure under FOIA would result in a

---

<sup>4</sup> Public Citizens Health Research Group v. Food and Drug Administration, 704 F.2d 1280, 1288 (D.C. Cir. 1983).

<sup>5</sup> Center for Auto Safety v. National Highway Traffic Safety Administration, 224 F.3d 144, 151 (D.C. Cir. 2001).

<sup>6</sup> Gulf, 615 F.2d at 529.

<sup>7</sup> Public Citizens Health Research Group, 704 F.2d at 1290.

<sup>8</sup> Flight Safety Services v. Dep’t of Labor, 326 F.3d 607, 611 (5<sup>th</sup> Cir. 2003) (Business entities) and Hustead v. Norwood, 526 F. Supp. 323, 326 (S.D. Fla. 1981) (state governments).

<sup>9</sup> Critical Mass Energy Project v. NRC, 975 F.2d 871, 879 (D.C. Cir. 1992).

<sup>10</sup> Department of Justice, *Freedom of Information Act Guide*, Exemption 4, Applying Critical Mass (May 2004) (See guidance and various case law cited therein.)

<sup>11</sup> National Parks & Conservation Association, 498 F.2d at 770.

diminution of the *reliability* or *quality* of the required submissions.<sup>12</sup> Such a determination by the Government requires a finding that impairment would be significant,<sup>13</sup> this requires the rough balancing of the extent of impairment with the public's interest in disclosure.<sup>14</sup> This should be considered a high standard. Moreover, such impairment seems unlikely in the certification context, where the reliability and quality of the information provided will be independently determined and provided by an EAC accredited testing laboratory. Furthermore, a lapse in the reliability or quality of information is less likely when a submitter's certification may depend upon such factors.

### Competitive Harm Prong

Looking next to the competitive harm prong, required information is confidential if its release "is likely... to cause substantial harm to the competitive position of the person from whom the information was obtained."<sup>15</sup> This harm is focused on that harm "flowing from the affirmative use of proprietary information by competitors," rather than any competitive injury such as that harm associated with angry customers or employees.<sup>16</sup> Before an agency may make a determination regarding the release of information that might cause competitive harm, it must provide the submitter with an opportunity to share its views. This coordination is required by Executive Order 12,600. Coordination with the submitter does not relieve the agency of its responsibility to make a final, independent determination. Ultimately, any determination of competitive harm is highly fact sensitive. The same types of information have been found releasable or not releasable depending on other surrounding facts.

### Additional Criteria for Confidentiality ("The Third Prong")

The Courts have held that the impairment and competitive harm prongs laid out in case law are not "the exclusive criteria for determining confidentiality." The key issue is whether the release of information will harm an "identifiable private or government interest which the Congress sought to protect by enacting Exemption 4."<sup>17</sup> Specifically, courts have found records that are "intrinsically valuable" meet this definition and should not be release. This includes records that are themselves valuable commodities sold in the marketplace.<sup>18</sup>

### **Summary Tool**

The below is a graphic summary of the information provided above. It may be used to assist individuals in the decision making process. All decision regarding the release of materials should be make on a cases by case basis after due consideration of the facts and law.

---

<sup>12</sup> Critical Mass, 975 F.2d at 878 and see Department of Justice, *Freedom of Information Act Guide*, Exemption 4, Impairment Prong of National Parks Test (May 2004) (See guidance and various case law cited therein.)

<sup>13</sup> Such a determination usually requires the agency to contact the submitter and have them make a statement regarding their practice.

<sup>14</sup> Washington Post Co. v. HHS, 690 F.2d 252, 269 (D.C. Cir. 1993)

<sup>15</sup> National Parks & Conservation Association, 498 F.2d at 770.

<sup>16</sup> Public Citizens Health Research Group, 704 F.2d at 1291.

<sup>17</sup> 9 to 5 Organization for Women Office Workers v. Board of Governors of the Federal Reserve System, 721 F.2d 1, 10 (1<sup>st</sup> Cir. 1983).

<sup>18</sup> Department of Justice, *Freedom of Information Act Guide*, Exemption 4, Third Prong of National Parks (May 2004) (citing FOIA Update, Vol. VI, No 1, at 3-4 and Vol. IV, No. 4 at 3-4).

- I. In order to determine if a document is protected from release under Exemption 4 of FOIA, you must first ask whether meets the definition of a Trade Secret.

**Trade Secret:** A secret, commercially valuable plan, process, or device that is used for the making or processing of a product and that is the end product of either innovation or substantial effort. It relates to the productive process itself, describing how a product is made. It does not relate to information describing end product capabilities, features, or performance.

**EXAMPLES**

<u>Trade Secret</u>	VS.	<u>Not a Trade Secret</u>
<ul style="list-style-type: none"> <li>➤ Plans, schematics and other drawings useful in production.</li> <li>➤ Specifications of material used in production.</li> <li>➤ Source code used to develop software where release would reveal actual programming.</li> <li>➤ Technical descriptions of the manufacturing processes, quality control methodology and other information directly related to production.<sup>19</sup></li> <li>➤ Test results (compliance testing) performed on <u>unfinished</u> products.</li> </ul>		<ul style="list-style-type: none"> <li>➤ Information pertaining to a finished product's capabilities or features.</li> <li>➤ Information regarding a finished product's performance (including testing results of an end product).</li> <li>➤ Information regarding product components that would not reveal any commercially valuable information regarding production.</li> </ul>

- II. If a document does not contain a "Trade Secret," you must determine whether the information is protected as commercial or financial under FOIA Exemption 4. This involves a three part test. Information must meet each part of this test to be withheld under Exemption 4.

**Test.** Exemption 4 also covers information that is (1) obtained from "a person," (2) commercial or financial and (3) is "privileged or confidential."

*(A) The first two elements of the test are the most simple to apply. Exemption 4 requires information to have been obtained from a "person" and be "commercial or financial" in nature.*

**Person.** The term "person," is read broadly and includes corporations and state governments.

**AND**

**Commercial and Financial.** The terms are given their ordinary meaning and read broadly. They include records in which a submitter has any *commercial interest*.

<sup>19</sup> In compliance testing, where a product awaited marketing approval from the FDA, a court has found the product to be **NOT FINISHED**—and the testing a Trade Secret.

*(B) Next the information must meet the more complicated third part of the test, it must be privileged or confidential. This requires yet another series of analysis.*

*1. Was the information required or provided voluntarily?*

**Voluntary or Required?** Information given to an agency voluntarily is provided greater protection from release. Most information provided the EAC via its certification program will not be voluntarily provided (despite the voluntary nature of the program), because it was most likely provided as a condition of participation. If this is not the case, the information may be withheld if it is not customarily released by the submitter. Such a determination should involve a statement from the submitter and an analysis of the relevant community practices.

*2. If the information was required, would release (i) impair the government's ability to obtain necessary information in the future ("impairment prong") OR (ii) cause substantial harm to the competitive position of the submitter ("competitive harm prong")? If either of the below is true than the information may be considered confidential.*

**Impairment Prong**

The government's ability to collect needed information will be impaired when disclosure under FOIA would result in a diminution of the reliability or quantity of the required submissions. The impairment **MUST BE SIGNIFICANT**. This is a high standard, unlikely to apply to certification.

**OR**

**Competitive Harm Prong**

Release would likely cause substantial harm to the competitive position of the submitter. The harm at issue must come from the use of proprietary information BY COMPETATORS. This is a fact specific analysis.

*3. If the release of information that may cause competitive harm is contemplated, the submitter must be contacted.*

**Contact Requirement.** Before an agency may make a determination regarding the release of information that might cause competitive harm, it must provide the submitter with an opportunity to share its views. This does not relieve the agency of its responsibility to make the final, determination. This action is required by Executive Order.

**FACA QUICKIE**

GENERAL

1. Federal Advisory Committees (FACs) are entities that provide guidance to Federal agencies. They are heavily regulated. There is the Federal Advisory Committee Act (FACA), a FACA regulation published by GSA, and relevant Executive Orders. You are collecting, maintaining and managing information on behalf of your commissioner who serves as an EAC Designated Federal Officer.

*Designated Federal Officer ("DFO")*, means an individual designated by the agency head, for each advisory committee for which the agency head is responsible, to implement the provisions of sections 10(e) and (f) of the Act and any advisory committee procedures of the agency under the control and supervision of the CMO. The DFO shall:

- (a) Approve or call the meeting of the advisory committee or subcommittee;
  - (b) Approve the agenda, except that this requirement does not apply to a Presidential advisory committee;
  - (c) Attend the meetings;
  - (d) Adjourn any meeting when he or she determines it to be in the public interest; and
  - (e) Chair the meeting when so directed by the agency head.
2. All EAC FACS are mandated by Congress via HAVA. Thus they are non-discretionary committees.

*Non-discretionary advisory committee* means any advisory committee either required by statute or by Presidential directive. A *non-discretionary advisory committee* required by statute generally is identified specifically in a statute by name, purpose, or functions, and its establishment or termination is beyond the legal discretion of an agency head.

3. An agency should also have a *Committee Management Officer* (I am not sure if we do). They are responsible for ensuring FACA policies and records are maintained Agency-wide.
4. EAC is also required to have guidelines on managing FACAs. We do not... yet....

DOCUMENTATION:

1. *Advisory committee records*. Official records generated by or for an advisory committee must be retained for the duration of the advisory committee. Upon termination of the advisory committee, the records must be processed in accordance with the Federal Records Act (FRA), 44 U.S.C. Chapters 21, 29-33,

and regulations issued by the National Archives and Records Administration (NARA) (see 36 CFR parts 1220, 1222, 1228, and 1234),

2. Documentation and consultation with the FACA Secretariat (GSA) was originally required when our FACs were created and drafted their Charter. To the extent we have this documentation; it should be sought, gathered and maintained.
3. At a minimum, we need to find copies of the FACA Charters, Bylaws and changes thereto. We also need to maintain accurate lists of all FACA members. Finally, all FACA meetings are required to be reduced to minutes. We must maintain all of these minutes.
4. Must maintain copies of all documents provided to or produced by the FACA.

Subject to section 552 of title 5, United States Code, **the records, reports, transcripts, minutes, appendixes, working papers, drafts, studies, agenda, or other documents which were made available to or prepared for or by each advisory committee** shall be available for public inspection and copying at a single location in the offices of the advisory committee or the agency to which the advisory committee reports until the advisory committee ceases to exist."

## 5. Reports

*Annual comprehensive review of Federal advisory committees.* To conduct an annual comprehensive review of each advisory committee as specified in section 7(b) of the Act, GSA requires Federal agencies to report information on each advisory committee for which a charter has been filed in accordance with § 102-3.70, and which is in existence during any part of a Federal fiscal year. Committee Management Officers (CMOs), Designated Federal Officers (DFOs), and other responsible agency officials will provide this information by data filed electronically with GSA on a fiscal year basis, using a Government wide shared Internet-based system that GSA maintains. This information shall be consistent with specific guidance provided periodically by the Secretariat. The preparation of these electronic submissions by agencies has been assigned interagency report control number (IRCN) 0304-GSA-AN.

*Annual report of closed or partially-closed meetings.* In accordance with section 10(d) of the Act, advisory committees holding closed or partially closed meetings must issue reports at least annually, setting forth a summary of activities and such related matters as would be informative to the public consistent with the policy of 5 U.S.C. 552(b).

*Advisory committee reports.* Subject to 5 U.S.C. 552, 8 copies of each report made by an advisory committee, including any report of closed or partially-closed

meetings as specified in paragraph (c) of this section and, where appropriate, background papers prepared by experts or consultants, must be filed with the Library of Congress as required by section 13 of the Act for public inspection and use at the location specified § 102-3.70(a)(3).

## PUBLISHING MEETINGS.

We are required to publish an announcement of a FACA meeting in the Federal Register 15 day in advance of the meeting. **THUS BEFORE (AT LEAST 4 WORKING DAYS BEFORE) THE 15 DAY DEADLINE YOU NEED TO PROVIDE BRYAN WHITENER AND COUNSEL SPECIFIC INFORMATION ABOUT THE MEETING. If any part of the meeting is to be closed to the public this needs to be discussed with counsel in advance.** FACA requires the following info:

### **How are advisory committee meetings announced to the public?**

- (a) A notice in the **Federal Register** must be published at least 15 calendar days prior to an advisory committee meeting, which includes:
- (1) The name of the advisory committee (or subcommittee, if applicable);
  - (2) The time, date, place, and purpose of the meeting;
  - (3) A summary of the agenda, and/or topics to be discussed;
  - (4) A statement whether all or part of the meeting is open to the public or closed; if the meeting is closed state the reasons why, citing the specific exemption(s) of the Government in the Sunshine Act, 5 U.S.C. 552b(c), as the basis for closure;
  - and (5) The name and telephone number of the Designated Federal Officer (DFO) or other responsible agency official who may be contacted for additional information concerning the meeting.
- (b) In exceptional circumstances, the agency or an independent Presidential advisory committee may give less than 15 calendar days notice, provided that the reasons for doing so are included in the advisory committee meeting notice published in the **Federal Register**.

U. S. ELECTION ASSISTANCE COMMISSION  
1225 New York Avenue, NW, Suite 1100  
Washington, DC. 20005

*The purpose of this paper is to provide background and make recommendations regarding the procedure for certifying or decertifying a voting system under the EAC's proposed voluntary voting system certification program. The document focuses on the fundamental requirements of due process in the context of this program.*

## BACKGROUND

EAC's voluntary voting system certification program will provide vendor's the opportunity to have their voting systems tested and ultimately certified by the Federal government. This program is strictly voluntary.<sup>1</sup> The Federal government places no restrictions or requirements nor grants any privileges regarding the sale or operation of voting systems on the basis of its certification. However, states may condition the use of such systems on the receipt of an EAC certification. Thus, at some level, voluntary EAC accreditation may impact the ability of a voting system manufacturer to sell its product. The question is whether or not this impact is proximate enough to trigger due process requirements and what these requirements would be. To start this analysis one must first look to the relevant law. The two principle authorities to consider are (1) the Administrative Procedures Act (APA) and (2) Due Process under the 5<sup>th</sup> Amendment to the U.S. Constitution (Due Process).

**The APA.** The APA sets forth procedural requirements for rule making, adjudication and licensing.<sup>2</sup> It is improbable that a court would find that these APA provisions apply to the EAC's voluntary certification program. Congress (through HAVA) has specifically withheld rulemaking authority from the EAC in all areas impacting state or local governments, with one exception (dealing with the National Voter Registration Act).<sup>3</sup> Moreover, legislative rule making requires a specific statutory grant of authority.<sup>4</sup> As the EAC has not been given this authority, the rule making provisions of the APA cannot apply.

Similarly, the adjudication provisions of the APA (which deals with the process for formulating an order) are triggered only when such determinations are "required by statute to be determined on the record after opportunity for an agency hearing."<sup>5</sup> HAVA contains no such requirements with regard to certification determinations. Further, the APA's adjudication section specifically exempts from its coverage "proceedings in which

<sup>1</sup> Help America Vote Act of 2002, 42 U.S.C. §15301 *et seq.*

<sup>2</sup> 5 U.S.C. §§ 553, 554 and 558 (respectively). See also 5 U.S.C. §§ 556, 557, 558 (regarding prescribed procedures)

<sup>3</sup> HAVA, 42 U.S.C. §15329

<sup>4</sup> United States v. Storer Broadcasting Co., 323 U.S. 134 (1956).

<sup>5</sup> 5 U.S.C. §§ 554(a)

decisions rest solely on inspections, test or elections.”<sup>6</sup> This exemption arguably covers the proposed certification program which is based primarily on a test report.

Finally, the APA definition of license includes an “agency certificate... or other form of permission.”<sup>7</sup> This definition has been read liberally by the courts.<sup>8</sup> However, under the definition, a license must (at least) include some form of “permission.” Under HAVA, the recipient of a certification receives no benefit, access or right provided by the Federal government. Moreover, even if an EAC certification can be viewed as a license as defined by the APA, the statute requires that such a license be “required by law” before it applies. Again, there is no requirement under HAVA that a party hold an EAC certification to participate in any Federal program or receive any Federal benefit.

While the procedural provisions of the APA do not apply to the EAC’s Certification program, a review of the statute’s processes may be helpful in the program’s development. This review does not suggest that the EAC should or has made the APA applicable as a matter of policy. The following are a few APA provisions with some relevance to the EAC certification program.

1. In hearings a party is entitled to present his case by oral OR documentary evidence, to submit rebuttal evidence and confront the evidence against them.<sup>9</sup>
2. In applications for initial licenses an agency may adopt procedures for the submission of evidence in written form.<sup>10</sup>
3. The suspension or withdrawal of a license requires, (1) written notice by the agency of the facts that warrant the action and (2) the opportunity to demonstrate OR achieve compliance with all lawful requirements.<sup>11</sup>
4. A license of a continuing nature does not expire until a final agency determination has been made, if the licensee has timely filed an application for a renewal or a new license.<sup>12</sup>

**Due Process.** The Due Process clause states that “No person shall... be deprived of life, liberty, or property, without due process of law.” Any analysis under this provision must be twofold. First one must determine if government action will deprive a person of life, liberty or property to determine if due process is required. Next, one must determine “how much process is due.”<sup>13</sup> At this point we must answer the first question. Ultimately, the issue is limited to whether a voting system vendor has a property interest in the receipt, denial or loss of an EAC certification. As noted above, this is a complicated question. While an EAC certification allocates no rights, privileges or

<sup>13</sup> *Administrative Law Treatise*, Vol. II, pg 568, §9.3 Richard J Pierce, Jr. (Aspen Law and Business).

benefits, it is likely that states may tie such benefits to the Federal certification. Is this connection proximate enough to create a property interest in an EAC certification?

Ultimately, we do not need to settle this matter at this time. As a matter of policy, the EAC has determined that voting system manufacturers shall be given an opportunity to be heard in the certification process. While we do not find that constitutional due process applies, prudence dictates that if procedural rights are to be granted, they meet the minimum due process requirements.

## DUE PROCESS REQUIREMENTS

“The fundamental requirement of due process is the opportunity to be heard ‘at a meaningful time and in a meaningful manner.’”<sup>14</sup> “Due process is flexible and calls for such procedural protections as the particular situation demands.”<sup>15</sup> Using these principles, the Supreme Court developed a three factor balancing test to determine what type of process is due before the government can deprive a person or entity of a protected interest. Due process requires consideration of three factors: (1) the private interest that will be affected by the official action; (2) the risk of an erroneous deprivation of such interest through the procedures used, as well as any value of adding additional safeguards; and (3) the Government's interest, “including the function involved and the fiscal and administrative burdens,” that additional procedural requirements would entail.<sup>16</sup>

Ultimately, a review and balancing of these factors indicate that an informal, written, pre-deprivation hearing (without additional post deprivation proceedings) is sufficient to meet due process. Looking at the first factor, the interest of voting system manufacturers is substantial (though somewhat tenuous). It is possible that the denial of system certification may impact a manufacturer's business interests by limiting the number of states in which they sell their system. However, the courts have affirmed an informal written hearing process in official actions effecting far more significant private interests. Such interests include disability benefits,<sup>17</sup> employment,<sup>18</sup> right to issue government insured mortgages,<sup>19</sup> and the deprivation of money.<sup>20</sup>

Further, the risk of erroneous deprivation is low and not significantly improved by adding additional safeguards (factor 2). Holding an oral informal or evidentiary hearing would add nothing to the process except cost. Consider the following: (1) The certification process is primarily an objective, technical and scientific one. Such

processes lend themselves to written communication.<sup>21</sup> (2) The certification process will be almost entirely a written procedure. It will be based primarily on a written test report. An oral proceeding will add little to the process. (3) Along these lines, the outcome of a certification does not depend upon the truth and veracity of witnesses, but technical data. Traditionally, oral hearings are called for when the veracity of witnesses are a key factor in the agency's decision.<sup>22</sup> (4) The parties at issue are well educated and sophisticated. Voting system manufacturers and the test labs they contract with are professional, highly qualified organizations in the business of developing and testing voting systems. They are quite capable of using the written process to make themselves heard.<sup>23</sup>

Finally, the public and government interests are best served through a written hearing procedure. The EAC is a small agency with limited means, manpower (23 fulltime employees) and resources. Offering an oral hearing each time a member of the voting systems manufacturing industry seeks certification of a new system or upgrades a system would be an overwhelming burden. Moreover, such a procedure would significantly slow the certification process. Often, prompt action is required to allow a voting system to be fielded in time for a Federal election. The timely holding of elections is a preeminent public concern.

## RECOMMENDED PROGRAM ELEMENTS

NOTE NEED TO ADD A SECTION REGARDING THE STANDARD OR REVIEW..

Ultimately, if we assume that voting system manufacturers have a property interest in the certification process sufficient to trigger due process, the analysis above concludes that a written pre-deprivation hearing process would provide the necessary procedural protections. An oral hearing is not required by law and, ultimately, would add little to the process, bar cost. The purpose of this final section is to recommend broad procedures that would define the written hearing process. Ultimately, the EAC's voting system certification program must be put forth such that it offers participants a meaningful opportunity to be heard at a meaningful time. The discussion will be split in two parts: a proposed process for (1) initial certification and (2) decertification.

**Initial Certification.** Initial certification is the process whereby the EAC makes a determination denying the certification of a voting system never before certified by the EAC. This would include the denial to certify such a system when paired with a new component or software modification (assuming such a pairing has not previously received an EAC certification). The following is a brief outline of this process.

1. Initial determination. Initial determination made regarding voting system (denial).
2. Notice. Notice of initial decision provided participant. This written notice would contain:

---

<sup>21</sup> Mathews, at 345 – 346; see also York, 774 F.2d at 421.

<sup>22</sup> See Mathews, at 333 – 334 (see also Goldberg v. Kelly, 397 U.S. 254 (1970)).

<sup>23</sup> See Mathews at 345 – 346 (Physicians better able to communicate in writing than welfare recipients).

- a. Initial decision.
  - b. Reasons for the decision.
  - c. Access to the information that served as the basis for the decision.
  - d. An opportunity to cure.
  - e. An opportunity for respondent to be heard (right to request reconsideration).
3. Reconsideration. Participant is given the opportunity to be heard on the matter by the individual who made the initial determination. This opportunity would take place before the decision is final. This individual must have the authority to grant relief. Participant must be allowed:
  - a. Access the information that served as the basis for the initial decision (ideally provided during notice, above).
  - b. To present additional facts and information in written form.
  - c. To present a written argument responding to the initial decision.
  - d. To have their relevant submissions considered.
  - e. A reasonable deadline for submissions.
4. Agency Final Determination. Determination authority reviews the request for reconsideration and makes a Final Agency Determination.
5. Notice of Final Decision. Notice of Final Decision provided participant. This written notice would contain:
  - a. Final decision.
  - b. Reasons for the decision which specifically addresses the matters raised by participant during the reconsideration process.
  - c. Notice of appeal rights.
6. Appeal. Participant may request an appeal of the agency final decision. After a timely request for an appeal, the participant shall be allowed:
  - a. Access to all information that served as the basis for the initial and final decisions; including the previous decisions themselves and the information previously provided by participant ("the record").
  - b. Opportunity to provide additional, written arguments responding to the initial and final decisions.
  - c. A review of presented materials (by a different decision authority) with the power to grant relief.
  - d. A reasonable deadline for submissions.
7. Decision on Appeal. Appellate authority reviews the request for appeal and makes a Decision on Appeal.
8. Notice of Decision on Appeal. Notice of Decision on Appeal provided participant. The notice would contain.
  - a. Decision on Appeal.

- b. Reasons for the decision which specifically address the matters raised by participant during the appeal process.
- c. Notice that the decision is final.

**Decertification.** Decertification is the process in which the EAC revokes certification previously granted. Any EAC certification shall remain valid until such time as the decertification process has been completed. The following is a brief outline of this process.

1. Informal Investigation. Informal efforts by the agency upon receipt or discovery of information suggesting non-conformance. The end product is a memorandum of recommendation for or against the initiation of a Formal Investigation.
2. Formal Investigation. An official investigation into potential non-conformance. Initiated upon recommendation of informal investigation. Must be initiated by the Formal Investigation Authority.
  - a. Notice of Formal Investigation. Upon determination of the need for a formal investigation notice must be given the interested party. Notice shall include:
    - i. A description of the matter being investigated (with specificity).
    - ii. An opportunity to provide relevant information.
    - iii. A timeline for the investigation.
  - b. Report of Investigation (ROI). The end result of a Formal Investigation is an ROI. The ROI shall collect and analyze all relevant information. The report will either substantiate or unsubstantiate the non-compliance investigation. A copy of the report will be provided the interested party.
3. Notice of Non-Compliance (NNC). If the formal investigation is substantiated, the interested party shall receive a NNC. The notice will provide the interested party the following:
  - a. The ROI.
  - b. A Statement of Non-Compliance outlining the relevant non-compliance with specificity.
  - c. A statement informing the party that the EAC will make a determination regarding compliance.
  - d. Opportunity to Cure.
  - e. Opportunity to provide information in writing.
  - f. Opportunity to provide a written argument.
  - g. A reasonable deadline for submissions.
4. Determination of Compliance or Non-Compliance. The EAC must make a written compliance determination after consideration of the information, above. This written decision must address all relevant fact (including those submitted by the interested party).

- a. *Compliance*. In the event the relevant authority determines that a voting system is substantively or procedurally compliant, he or she will make a formal, written determination. This determination will be forwarded to the interested party.
  - b. *Non-compliance*. In the event the relevant authority determines that a voting system is substantively or procedurally non-compliant, he or she will make a formal, written determination. The official will send the interested party a Notice of Intent to Decertify.
5. Notice of Intent to Decertify. If non compliance has been determined, the interested party will receive a notice of intent to decertify. This notice will include:
  - a. Statement of the basis if decertification.
  - b. The ROI, and all other factual materials that serve as the basis for the decision.
  - c. Opportunity to cure.
  - d. Opportunity to submit additional written information.
  - e. Opportunity to present written argument.
  - f. A reasonable deadline for submissions.
6. Final Decision on Decertification. Notice of Final Decision provided participant. This written notice would contain:
  - a. Final decision.
  - b. Reasons for the decision which specifically addresses the matters raised by participant during the reconsideration process.
  - c. Notice of appeal rights.
7. Appeal. The interested party may request an appeal of the agency final decision. After a timely request for an appeal, the participant shall be allowed:
  - a. Access to all information that served as the basis for the initial and final decisions; including the previous decisions themselves and the information previously provided by participant ("the record").
  - b. Opportunity to provide additional, written arguments responding to the initial and final decisions.
  - c. A review of presented materials (by a different decision authority) with the power to grant relief.
  - d. A reasonable deadline for submissions.
8. Decision on Appeal. Appellate authority reviews the request for appeal and makes a Decision on Appeal.
9. Notice of Decision on Appeal. Notice of Decision on Appeal provided participant. The notice would contain.
  - a. Decision on Appeal.
  - b. Reasons for the decision which specifically address the matters raised by participant during the appeal process.

- c. Letter of decertification.
- d. Notice that the decision is final.

To: Julie Thompson-Hodgkins, General Counsel  
From: Tamar Nedzar, Law Clerk  
Date: March 3, 2006  
Subject: Proprietary Information in the Voting System Certification Process

---

**BACKGROUND:**

Section 231 of the Help America Vote Act (HAVA) requires the U.S. Election Assistance Commission (EAC) to provide for the testing, certification, decertification, and recertification of voting system hardware and software by accredited laboratories. The vendors who participate in the testing and certification process are mainly private parties, many of whom are in competition with each other. However, the testing and certification process is an agency action subject to Freedom of Information Act (FOIA) requests. Therefore, the EAC wishes to develop and implement a policy consistent with FOIA that would protect private and proprietary information from public dissemination.

**FOIA**

FOIA requires that each agency publish in the Federal Register descriptions of its central organization and methods by which the public may obtain information. In addition, each agency must provide (1) a description of all formal and informal procedures available, (2) rules of procedure, (3) the location of forms, (4) instructions for forms, (5) substantive rules of general applicability, and (5) statements of general policy or interpretations of general applicability formulated and adopted by the agency.<sup>1</sup>

Once the agency receives a FOIA request, the agency is required to determine within twenty days whether to comply with the request. Once the agency decides whether to comply with the request, it must immediately notify the requester of its decision,

---

<sup>1</sup> 5 U.S.C.A. § 552(1) (1996)

including reasons for the determination. The determination of whether to comply with the request is within the agency's discretion, but each agency must do due diligence to disclose as much information as possible. If the decision is to deny a request, the requester must be allowed to appeal to the head of the agency. Responses to appeals must be made within twenty days of the appeal.<sup>2</sup> If the agency will be unable to comply with the request within the prescribed time limits because of unusual circumstances, it may extend the time limits by written notice only.<sup>3</sup> The agency is also required under FOIA to promulgate regulations pursuant to notice and comment for the expedited processing of requests.<sup>4</sup>

FOIA also requires each agency to promulgate regulations, including a notice and comment period, detailing the fees that may be associated with a FOIA request. Although fees should be limited to reasonable standard charges for searching, duplication, and review, if records are requested other than for commercial use, the fees should be lowered to the extent feasible.<sup>5</sup> Any fees that the agency charges may not be requested in advance unless the requester has previously failed to pay fees in a timely fashion. The total amount the agency charges cannot exceed \$250.<sup>6</sup>

Since the purpose of FOIA is to make government action more transparent, the Act is meant to include as much information as possible. To that end, Congress has provided for only 9 exceptions to the rule requiring agency disclosure.<sup>7</sup> Unless otherwise specified in the Act or superseded by another statute<sup>8</sup>, each agency is required to provide

---

<sup>2</sup> 5 U.S.C.A. § 552(a)(6) (1996)

<sup>3</sup> 5 U.S.C.A. § 552(a)(4)(B)(i) (1996)

<sup>4</sup> 5 U.S.C.A. § 552(a)(4)(E)(i) (1996)

<sup>5</sup> 5 U.S.C.A. § 552(a)(4)(A)(i) (1996)

<sup>6</sup> 5 U.S.C.A. § 552(a)(4)(A)(v) (1996)

<sup>7</sup> 5 U.S.C.A. § 552(b)(1-9) (1996)

<sup>8</sup> For example, the Trade Secrets Act, 18 U.S.C.A. § 1905 (2000)

as much information as possible to a requestor. The information can be transmitted in any reasonable form the requester indicates, and fees must be tailored to the kind of media used to send information.<sup>9</sup> For example, the agency may reasonably charge for photocopies, but may not charge for duplication if information is sent via email.

### **EAC Certification Process**

The EAC's proposed testing and certification process requires vendors to submit their technical data package (TDP) to the EAC, which then assigns the product an application number and develops a test plan. Once the test plan has been established, EAC Technical Review Consultants (TRC) will review the test plan, and approve or disapprove of it. If approved, the system is tested at a Voting System Test Laboratory (VSTL). Next, the TRC reviews the test report and submits approval or disapproval with a recommendation. The EAC Certification Committee then reviews the results and issues documented interpretation for the public record.

### **NONDISCLOSURE OF CONFIDENTIAL INFORMATION:**

Under 5 U.S.C.A. § 552(b)(4) ("Exemption 4"), an agency may not disclose trade secrets and commercial or financial information obtained from a person if the information is privileged and confidential. The purpose of Exemption 4 is to protect the confidentiality of information submitted to the government. However, the purpose of the FOIA is to make government as transparent as possible. Therefore, in deciding what proprietary information it will exempt from responses to FOIA requests, an agency

---

<sup>9</sup> 5 U.S.C.A. § 552(a)(3)(B) (1996)

should err on the side of disclosure and construe the exemption narrowly in accord with previous court interpretations.<sup>10</sup>

Traditionally, the determination of whether information qualifies for Exemption 4 is twofold. If the government compels the submission of information regarding trade secrets or commercial or financial information, the information will be considered confidential under Exemption 4 if the government can show that disclosure will not (1) impair the government's ability to obtain necessary information in the future, or (2) cause substantial harm to the competitive position of the submitter.<sup>11</sup> In all cases where an agency claims that information fits into an exception, the government has the burden of providing sufficient specificity and justifications for its decision<sup>12</sup>.

#### **Government's Ability to Obtain Future Information**

The government's ability to obtain necessary information in the future is impaired when disclosure would induce private parties making submissions to exclude (a) innovative ideas<sup>13</sup> or, (b) information necessary for the agency to fulfill its mandate<sup>14</sup>.

In *Orion Research, Inc. v. Environmental Protection Agency*<sup>15</sup>, the Supreme Court upheld EPA's decision not to disclose technical information in proposals for a government contract, finding that such disclosure would impair the government's ability to obtain information in the future because it would make potential bidders less likely to disclose novel ideas. The Court further held that the agency is in the best position to determine the effect of disclosure on its ability to obtain necessary technical

---

<sup>10</sup> See *Bristol-Meyers Co. v. Federal Trade Com.*, 424 F.2d 935 (US App DC 1970)

<sup>11</sup> See *Judicial Watch, Inc. v. U.S. Dept. of Commerce*, 337 F.Supp. 2d 146 (D.D.C. 2004).

<sup>12</sup> See *Neely v. FBI*, 208 F.3d 461 (4<sup>th</sup> Cir. 2000).

<sup>13</sup> See *Orion Research, Inc. v. Environmental Protection Agency*, 449 US 833 (1980).

<sup>14</sup> See *Comstock International, Inc. v. Export-Import Bank*, 464 F. Supp. 804 (D.D.C. 1979).

<sup>15</sup> 449 US 833 (1980).

information.<sup>16</sup> Consequently, a private party that submits information to an agency cannot argue on behalf of the government that the agency would be impaired.<sup>17</sup> Finally, an agency's assessment of whether its ability to gain information would be impaired in the future is quintessentially a managerial judgment not subject to judicial review.<sup>18</sup>

Similarly, in *Comstock International, Inc. v. Export-Import Bank*<sup>19</sup>, a FOIA requester sought disclosure of documents pertaining to an international loan made by the agency. The court recognized that there was no risk of impairing the agency's ability to obtain this sort of information in the future, since, as a lender, it would always have direct access to loan-related documents. However, noting that commercial banks and borrowers were reluctant to negotiate loan agreements with the agency absent assurances of confidentiality, the court held that disclosure would interfere with the agency's ability to promote United States exports, which was an essential part of its mandate<sup>20</sup>.

Similar to the situation in *Orion*, if the EAC were to disclose certain information vendors submit in their TDPs (specifically unique technical data), it might make vendors less likely to supply necessary information in the future and thereby inhibit the EAC's ability to obtain the information in the future. Also, like the situation in *Comstock*, the EAC is statutorily required to establish a certification process. If it discloses technical or financial information that vendors submit to the agency, the EAC may be in a position where such disclosure would limit its ability to satisfy its mandate. Therefore, the EAC should treat technical and financial data submitted by vendors as confidential to avoid inhibiting the attainment of similar information in the future or fulfilling its mandate.

### Harm to Submitter's Competitive Position

The government's disclosure of information causes harm to the submitter's competitive position when (a) such disclosure could allow competitors to underbid or undercut the submitter<sup>21</sup>, and (b) the information disclosed is not publicly available elsewhere<sup>22</sup>.

In *Lion Raisins v. U.S. Dept. of Agriculture*<sup>23</sup>, the 9<sup>th</sup> Circuit upheld the Department of Agriculture's decision not to disclose Line Check Sheets related to USDA raisin inspections conducted at appellant's competitors' facilities. The court found that the agency's decision was reasonable because disclosure of appellant's competitors' information would allow appellant to infer the volume of competitors' sales. Sales data would in turn allow appellant to use the information to underbid its competitors in future transactions with public and private entities<sup>24</sup>.

By contrast, in *Continental Stock Transfer & Trust Co. v. SEC*<sup>25</sup>, a corporation requested that the SEC treat the information they submitted in an application for registration as transfer agents confidentially. The SEC denied the request, claiming that the information was not confidential and was therefore subject to disclosure in a FOIA request. The court agreed, holding that the applicant's information was subject to disclosure since 95% of the information contained in the application was already available to the public through commercial publications. Therefore, disclosure could not be said to cause substantial competitive harm to the applicants<sup>26</sup>.

---

<sup>21</sup> See *Lion Raisins v. U.S. Dept. of Agriculture*, 354 F.3d 1072 (9<sup>th</sup> Cir. 2004).

<sup>22</sup> See *Continental Stock Transfer & Trust Co. v. SEC*, 566 F.2d 373 (2d Cir. 1977).

<sup>23</sup> See 354 F.3d 1072 (9<sup>th</sup> Cir. 2004).

<sup>24</sup> See 354 F.3d 1072 (9<sup>th</sup> Cir. 2004).

<sup>25</sup> See 566 F.2d 373 (2d Cir. 1977).

<sup>26</sup> *Id.*

Similar to the circumstances in *Lion Raisins*, if the EAC were to disclose technical data or financial information, it might enable the submitting vendors' competitors to use the information to underbid them in selling voting systems to the states. Disclosing technical data especially might allow competitors to modify their own systems to be more competitive. Finally, unlike the situation in *Continental Stock*, since the information vendors submit will likely not be available publicly through other means, the EAC's disclosure of technical or financial information might subject submitting vendors to unforeseen harms. Therefore, the EAC should classify technical and financial information as confidential to avoid exposing submitting vendors to potential harm.

**CONCLUSIONS:**

Section 231 of HAVA requires the EAC to provide for the testing, certification, decertification, and recertification of voting system hardware and software by accredited laboratories. During this process, private corporations will be submitting a technical data package (TDP) to the EAC. Each vendor's TDP will likely contain information unique to the submitter. The TDP will be used by Technical Review Consultants (TRC), and the Voting System Test Laboratory, after which the TRC will submit approval or disapproval of each system with a recommendation.

Once the EAC establishes its testing procedures, interest groups, corporations, and private persons may make FOIA requests about the EAC's certification process. It is likely that disclosure of either coding information or financial information would cause substantial competitive harm to the submitter *and* inhibit the EAC's ability to obtain similar information in the future as required by its mandate. In responding to such requests, the EAC should disclose enough information to comply with FOIA's broad

mandate to make government more transparent, while not inhibiting its ability to get similar information in the future or causing harm to the vendors. **Accordingly, the EAC should:**

- **Only Disclose Non-Unique Data:** Any data that is unique to the vendor should not be disclosed to the public in a FOIA request. Data the EAC should identify as unique includes, but is not limited to, computer coding, technical platform data, security encryption, and data encoding practices. In addition, any financial information a vendor submits to the EAC should be redacted before responding to a FOIA request.
- **Issue Public Rules:** Since FOIA is intended to make government more transparent, it is advisable that the EAC adopt, by notice and comment, rules clearly delineating what information the EAC will and will not disclose concerning the voting system certification process. These rules will serve the dual purposes of (1) giving vendors notice before they make submissions, and (2) enabling potential vendors to participate in the rule-making process. In addition, issuing rules should lower the likelihood that a vendor would challenge an EAC decision in the future since vendors were invited to participate in the rulemaking.
- **Clearly Identify Confidential Vendor Data:** After establishing clear guidelines concerning confidential information, the EAC should mark each document a vendor submits as part of the certification process either confidential or not confidential, depending on the content of the document. This process should be internal, and a vendor's marking something confidential should not have any bearing on the EAC's decision to treat something as confidential or not.

- **Inform Vendors Upon Submission:** The EAC should, in response to any submission by a vendor, respond by sending a one-page summary of the EAC's policies regarding disclosure of information to FOIA requesters. This will provide vendors with additional notice and should inform their future submissions.
- **Classify Documents When Submitted or Created:** Given the EAC's small staffing level, and because the EAC has 20 business days to respond to requests, it is imperative that the EAC classify documents as they come in or are created to lower the administrative burden of responding to FOIA requests. During the certification process, the EAC should, for each document submitted or created, classify it as (1) confidential/needs redaction, (2) public, or (3) internal<sup>27</sup> to make responding to FOIA requests more efficient.

#### **ADDITIONAL RECOMMENDATIONS:**

##### **I. The EAC Is Required by Law to Publish FOIA Guidance in the Federal Register**

FOIA requires that every agency subject to the Act make certain information available to the public.<sup>28</sup> Accordingly, the EAC must publish in the Federal Register:

- Descriptions of its central and field organization and established places at which, the employees from whom, and the methods whereby, the public may obtain information, make submittals or requests, or obtain decisions.

---

<sup>27</sup> Under 5 U.S.C.A. § 552(b)(5) (1996), interagency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency are exempt from FOIA requests.

<sup>28</sup> See 5 U.S.C.A. § 552(a)(A-E) (1996)

- Statements of general course and method by which its functions are channeled and determined, including the nature and requirements of all formal and informal procedures available.
- Rules of procedure, descriptions of forms available or the places at which forms may be obtained, and instructions as to the scope and contents of all papers, reports, or examinations.
- Substantive rules of general applicability adopted as authorized by law, and statements of general policy or interpretations of general applicability formulated and adopted by the agency.

## **II. The EAC Is Required by Law to Adopt a Fee Structure**

FOIA requires that every agency subject to the Act adopt and publish a fee structure applicable to the processing of requests and procedures and guidelines for determining when such fees should be waived or reduced<sup>29</sup>. Accordingly, the EAC must publish in the Federal Register:

- A comprehensive fee structure for incoming requests, including the EAC's classification of requesters and the appropriate reductions or waivers available to each classified group.
  - The fee structure shall provide for the recovery of direct costs only for the following: (1) search, (2) duplication, or (3) review. \*Review costs may not include the costs incurred in resolving issues of law or policy that may be raised in the course of processing a FOIA request.

---

<sup>29</sup> See 5 U.S.C.A. § 552(a)(4)(A)(i) (1996). See FEC's FOIA regulations (11 C.F.R. 4.1-4.9) for a comprehensive example.

- The EAC may not require advance payment of fees unless a requester has previously failed to pay fees in a timely fashion, or the EAC has determined that the cost of retrieving the requested information will exceed \$250.
- Guidelines and procedures for making a FOIA request, including:
  - Where forms are available to requesters. Each form should (1) indicate that the EAC needs requests to be as specific as possible, (2) ask that the requester classify itself in one of the categories established in the fee structure regulations, (3) ask for the requester's contact information, and (4) ask for the medium in which the requester would like information.
  - The EAC's policies for disclosure of information. The policies should clearly indicate how the EAC determines what information is exempt from FOIA requests and the reasons why EAC may choose not to disclose (eg. Confidential, internal, etc.).
  - Statutorily-mandated timelines and exceptions for unusual circumstances.
  - Procedures for appealing an EAC decision to not disclose information, including contact information, the appeals process provided for in FOIA, and any other internal policies the EAC adopts in accord with FOIA's express provisions.

### **III. The EAC Should Implement an Internal FOIA Request Tracking Mechanism**

As the EAC grows, it is likely that the number of FOIA requests the agency receives will also increase. Accordingly, the EAC should the following internal policies to expedite the resolution of FOIA requests:

- The EAC should issue a tracking number to each FOIA request by fiscal year. For example, the first request in fiscal year 2006 would be numbered 0601.
  - Each request should be date-stamped when received. Requests received after 1 PM should be date-stamped the next business day.
  - Each request should be date-stamped the date the EAC is required by law to respond to the request (20 business days unless unusual circumstances).
- The EAC should allow for one business week during the processing of FOIA requests for the legal department to review all documents the EAC plans to disclose.
- The EAC should, for each document submitted to the agency or created by the agency, classify it as (1) confidential/needs redaction, (2) public, or (3) internal<sup>30</sup> to make responding to FOIA requests more efficient.

---

<sup>30</sup> Under 5 U.S.C.A. § 552(b)(5) (1996), interagency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency are exempt from FOIA requests.

Subject PRA question

This is how I propose responding to Kim Brace's question about what PRA covers.

The Paperwork Reduction Act (PRA) requires Federal agencies to, prior to collecting information, submit an Information Collection Request to the Director of the Office of Management and Budget, publish notice in the Federal Register, and incorporate public comments for any information collection of ten or more persons (See 44 USCS section 3501 et seq.). Accordingly, the EAC anticipates that completion of the focus groups will require compliance with PRA.

Julie and Karen, what do you think?

Subject Re: Comments on Eagleton's response

I have not reviewed the various laws, but I believe that it would require that kind of review to answer your question accurately. My guess is that much like other election-related provisions, the language of the statute and the placement of the statute in the code or statutory scheme will dictate the answer to the question. Some may not even be written into statute. If you want me to, I can get someone to start working on that review.

Subject Re: Comments on Eagleton's response

Julie, in your legal opinion, is stating one's name considered identification in the states where it is the threshold requirement?

**Subject:** Comments on Eagleton's response

Karen will present our discussion and conclusions tomorrow. However, when we left the briefing, I think everyone believed that I would provide comments since I will not be able to be on the phone. As such, I am transmitting my comments through this email. I will respond or address Eagleton's numbered paragraphs (note that there is no paragraph 4).

1. There is no need to address this as Eagleton agrees that they only reviewed one election's statistics. The statement of work for the contract told them to review the status of the law in 2004, but in no way limited their analysis to a single year.

2. I believe that Eagleton's issue here is one of semantics. They don't like the phraseology of this sentence. However, the sentence is true and is demonstrated by the sentence in paragraph 2 of the statement that they reviewed and to which they provided comments. That paragraph specifically contains the following information: "Contractor used two sets of data to estimate turnout rates: 1) voting age population estimates(FN2) and 2) individual-level survey data from the November 2004 Current Population Survey conducted by the U.S. Census Bureau.(FN3)" Eagleton made two sets of comments to Footnote 2, which is imbedded in the sentence that was just quoted. They explained their methodology in those comments and that methodology was captured in footnote 2. That footnote specifically contains the following sentences: "These data did not differentiate between citizens and non-citizens;... Thus, 2004 estimates of voting age population include person who are not registered to vote."

3. Eagleton objects to the use of the word "so" in the second sentence. They believe that this creates an inference that they only used the second set of data because the first did not show significant correlations. While generally speaking, I believe that this inference is at least partially true, since researchers are always searching for a set of data that will show a statistically significant correlation and will proceed to a different set of data if the first does not show it, it is not the intended inference of these two sentences. The point is to show that of the two data sets that they used one showed no significant correlation and the second showed some correlations (however not all variables showed correlation). And, that the second set of data -- the one that showed correlation was questionable because of the unusually high turnout rate that was reported. As such, we have agreed to remove the words "so" at the beginning of the second sentence and "only" in the middle of the second sentence -- see #9).

4. There is no number 4.

5. I believe that the statement as contained in the EAC statement is TRUE. Stating one's name is not an independently verifiable form of identification, and I think those are the forms of identification that we are talking about. I can walk into any polling place in the country and state the name of any person. Unless the poll worker knows me or knows the person whose name I have used, there is no way to independently verify whether my statement is true. Conversely, my signature can be compared, my address can be verified, or my driver's license can be scrutinized to determine if I am the person that I purport to be. While it is true that I identify myself on the phone or in person all the time by stating my name, it is not for the purpose of determining my eligibility to vote in a particular precinct, etc. I believe that when the term identification is used in the context of voting that it must mean that the voter provides some independently verifiable form of identification. Having said this, I understand that this may be a point of disagreement for others. But, as for me, this statement is true.

6. Based on conversations with Karen concerning the two groups-- one assembled by Eagleton and one assembled by EAC -- both "questioned" the methodology and statistical analysis employed by Eagleton. The group assembled by Eagleton was referred to by them in their report as their "peer review group." Karen feels that "working group" is not an accurate description of the group assembled by EAC, so she has language to use to replace "independent working group" that captures the essence of that group.

7. See response to #2, above.

8. See response to #1, above.

9. See response to #3, above.

10. See response to #6, above.

11. I believe that the Commission must act on this report. Merely stating what we will do in the future will not distance us from this work and will result in media and others quoting Eagleton's work as an "EAC" report. It has been my understanding that the consensus of the group is to "decline to adopt." I believe that this is the right action.

My flight departs at 9:20 a.m. (EDT) and I do not arrive until 12:15 p.m. (EDT). However, if you have

027712

questions concerning my comments, I will be around tonight and will be available tomorrow afternoon by Blackberry.

## RECOMMENDATIONS FOR FURTHER EAC ACTIVITY ON VOTER FRAUD AND INTIMIDATION

### Consultant Recommendations

- **Greatly expand the scope of individuals interviewed.** Time and resource constraints prevented the consultants from interviewing the full range of participants in the electoral process. As a result, we recommend that in the next phase of this project, further interviews be conducted. In particular, a greater sampling of state and local election officials from different parts of the country should be interviewed. These individuals have first hand information and experience in the operation of elections.

We also recommend that in the next phase interviews be conducted with people in law enforcement, specifically Federal District Election Officers (“DEOs”)<sup>1</sup> and local district attorneys and attorneys defending those accused of election crimes or civil violations. In many instances it is the local district attorney who will investigate election fraud and suppression complaints. Attorneys who defend people accused of election crimes will have a different perspective on how the system is working to detect, prevent, and prosecute election fraud.

- **Conduct Follow-Up Nexis Research.** The Nexis search conducted for this phase of the research was based on a list of search terms agreed upon by both consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. However, without being able to go beyond the search terms, we
