**ELECTION DEFINITIONS**

**95 pages including cover page**

**General Election: GEN-01**

A basic election held in 4 precincts one of which is a split precinct.  This election contains 19 contests compiled into 4 ballot styles.   5 of the contests are in all 4 ballot styles.  The other 15 contests are split between at least 2 of the precincts with a maximum of 4 different contest spread across the 4 precincts. The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: Yes
- Cross-party endorsement: No
- Split Precincts: Yes
- Vote for N of M: Yes
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: Yes
- Early Voting: Yes

This election was designed to functionally test the handling of multiple ballot styles, support for at least two languages, support for common voting variations, and audio support for at least two languages.  Test Pattern 8 was chosen for audio input in an alternative language because it is a basic voting pattern using an ADA device.  Test pattern 9 was chosen for audio input to demonstrate support for write-in voting using an ADA device.  Test Pattern 3 was chosen for Spanish language input because it is a basic vote pattern using Spanish. Test Pattern 10 was chosen for Spanish language input because it exercises write-in using Spanish.

**Criteria For Evaluation of Test Results:**
The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results.  During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

| ELECTION DEFINITION: GEN-02 |
| :---: |

**General Election: GEN-02**
A basic election held in 3 precincts.  This election contains 15 contests compiled into 3 ballot styles.  10 of the contests are in all 3 ballot styles with the other five split across the 3 precincts. The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: Yes
- Straight Party voting: No

**Criteria For Evaluation of Test Results:**

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

# ELECTION DEFINITION: GEN-03

**General Election**
A basic election held in 2 precincts.  This election contains 8 contests and compiled into 2 ballot styles.   4 of the contests are in both ballot styles.  The other 4 contests are split between the two precincts.  The voting variations supported by this election are as follows:

- Closed Primary: No
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: Yes
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: No
- Early Voting:  No

This election was designed to functionally test the handling of multiple ballot styles, support for at least three languages including a character-based language, support for common voting variations, and audio support for at least three languages and an ADA binary input device.  Test patterns 3 and 4 were chosen for input in the Spanish language because they are a basic voting pattern with a write-in.  Test patterns 5 and 6 were chosen for audio input using the Spanish language to demonstrate support for write-in voting using an ADA device with and alternative language.  Test pattern 7 was chosen for character-based language input because it is a basic vote pattern using Japanese. Test pattern 8 was chosen for character-based language using an ADA device to demonstrate support for character-based ADA device support.  Test pattern 9 was chosen for binary input to show support for ADA binary input device.  Test pattern 10 was chosen for binary input using ADA audio deceive to show support for binary input and ADA support.

## Criteria For Evaluation of Test Results:
The results of this test will be accepted if the stated election definition can be input into the EMS, the election

transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

**Logic and Accuracy**

This test must exercise all possible voting positions for this ballot.  There are 184 possible positions per ballot. OVI will be used to create a test deck for the OVO as a pre-test activity.  All OVI "Test Deck" ballots will be scanned back into OVO.  The OVI will be utilized to cast one audio vote per hour during the duration of the test.  The OVI "Test Deck" will be fed at a rate of no less than 100 ballots per hour included 21 hand marked professionally printed ballots will be cast.

**Constitutional Amendment**
**Proposed Amendment to Section 9 of**
**Article 1 (Bail)**
**Explanation of Propsoed Amendment**

The proposed amendment deals with the category of persons who may be
denied bail under the State Constitution.  The present constitutional provision
permits denial of bail only for persons charged with offenses punisheable by
death or life of imprisonment, and only where the proof is evident or the
presumption is great that the person charged committed the crime.  If the people
of the State adopt this proposed amendment, judges would also be empowered
to deny bail to persons charged with felonies that carry a mandatory sentence of
life imprisonment upon conviction where: (1) the proof is evident or the
presumption great that the person committed the crime; and (2) the count, after
a hearing, finds that the defendant poses a real and present threat to the safety

of any person.  The proposed amendment also requires the State to reimburse any unit of local government for additional costs incurred as a result of denial of bail under this provision.  The denial of bail means the defendant would not be released from custody prior to trial.

For the proposed amendment to Section 9 Article 1 of the State Constitution which will permit a court to deny bail:

(a) To person charged with felony offeneses if conviction would carry a mandatory sentence of imprisonment;
(b) When the proof is evident and the presumption great; and
(c) If the court, after a hearing finds that the defendant poses a real and present threat to the safty of any person.
Further, the amendment would require the State to reimburse a unit of local government for costs incurred as a result of this provision.

**Hardware Operational**
This test will exercise the operational status of the OVO and OVI units during operational hardware tests. The election will be setup as an early voting machine. The election will have a precinct titled Pre – XXXX, OP – XXXX and a POST – XXXX for each test. The OVI will vote a predetermined voting pattern and the ballots scanned into the OVO for the Pre – XXXX test. The session will be closed. The OP – XXXX will then be open. The OVI set to run repeatable audio and the OVO will be set to run in shoe shine mode for duration of the OP – XXXX. At the conclusion of the OP – XXXX test the session will be closed and a report will be produced. The POST – XXXX precinct will be opened. OVI will be voted in a predetermined voting pattern. The ballots will be scanned into OVO. The POST – XXXX test will be closed. At the conclusion of all hardware tests, the data will be pulled back into the EMS for consolidation and reporting.

**Test Results:**
OVO totals for PRE – XXXX will be 1 for each candidate and 5 YES votes.  The total for OP – XXXX will vary depending on the time of actual test.  The totals for this race will be the total of the public counter for the first candidate in each race and YES for the amendment.  The OVO totals for POST – XXXX will be 1 vote for each candidate and 5 YES for the amendment.

**Cumulated Totals:**
Depending on the number of re-tests run the accumulated totals will be the total of the PRE-XXXX + POST-XXXX + PRE – Hardware Retest X + OP – Hardware Retest X + the documented total of the OP-XXXX public counter.

**Criteria For Evaluation of Test Results:**

| ELECTION DEFINITION: Pre/Operational/Post Hardware |
| --- |
| This is an operational hardware test election. The totals for each hardware PRE-XXXX and POST-XXXX test need to be analyzed for Accept/Reject criteria independently of the accumulated totals for Reliability and Availability tests. The PRE-XXXX and POST-XXXX totals should match the expected results to PASS the given hardware test or an engineering analysis will have to be done to determine if the error was caused by the operational hardware test or another issue. The complexity of this test including the duration, multiple locations, and lack of experience by the individual lab technicians with election data the accumulated totals will have to be analyzed against the election results tapes, engineering log books, and the election data to determine if the results are valid and can be included into the data for Reliability and Availability Tests. |

## ELECTION DEFINITION:PRIM-01

**Primary Election:  PRIM-01**
An open primary election in 2 precincts.  This election contains 30 contests compiled into 5 ballot styles.  Each ballot style contains 6 contests.  The voting variations supported by this election are as follows:

**Criteria For Evaluation of Test Results:**

The results of this test will be accepted if the stated election definition can be input into the EMS, the election transferred to the voting machine, voted according to the test vote pattern, and the results reported and audited to match the expected results. During the execution of this election all errors need to be logged and analyzed by Wyle qualified personal to determine if the error is an actual error or another issue.

| ELECTION DEFINITION: PRIM-03 |
| --- |

**Primary Election: PRIM-03**
A basic election held in 2 precincts.  This election contains 10 contests and is compiled into 2 ballot styles.   2 of the contests are in both ballot styles.  The other 8 contests are split between the two parties' ballots.  The voting variations supported by this election are as follows:

- Closed Primary: Yes
- Open Primary: No
- Partisan offices: Yes
- Non-Partisan offices: Yes
- Write-in voting: Yes
- Primary presidential delegation nominations: No
- Ballot Rotation: No
- Straight Party voting: No
- Cross-party endorsement: No
- Split Precincts: No
- Vote for N of M: Yes
- Recall issues, with options: No
- Cumulative voting: No
- Ranked order voting: No
- Provisional or challenged ballots: No
- Early Voting: No

This election was designed to functionally test the handling of multiple ballot styles, support for at least three languages including a Ideographic based language, support for common voting variations, and audio support for at least three languages and a ADA binary input device.  Test patterns 3 and 4 were chosen for input in the Spanish language because it is a basic voting pattern with a write-in.  Test patterns 5 and 6 were chosen for audio input using the Spanish language to demonstrate support for write-in voting using an ADA device with and alternative language.  Test pattern 7 was chosen for Ideographic based language input because it is a basic vote pattern using Japanese. Test pattern 8 was chosen for character based language using an ADA device to demonstrate support for Ideographic based ADA device support.  Test pattern 9 was chosen for binary input to show support for ADA binary input device.  Test pattern 10 was chosen for binary input using ADA audio deceive to show support for binary input and ADA support.

| ELECTION DEFINITION: Volume and Stress |
|---|

**Volume Stress**
This test will exercise 240 ballot positions in 400 ballot styles to investigate the system's response to conditions that tend to overload the system's capacity to process, store, and report data. A "Test Deck" will be created from the OVI printing just the first ballot in the first 400 precincts. All OVI "Test Deck" ballots will be scanned back into an OVO with the first 400 precincts initialized. Unisyn will provide 2000 professional ballots on 14 inch card stock for the other selected precincts. These ballots will be hand-marked ballots in a matrix pattern creating 991 ballot test deck. The OVI "Test Deck" will be hand fed into 2 OVO units 5 times. The OVO "Test Deck" will be hand fed 2 times to produce 1982 cast ballots in another OVO. An additional 10000 ballots will be cast using "Shoe- shine" mode on another OVO. The OVI "Test Deck" will be fed 2 times into the OVCS. The OVO "Test Deck" will be fed into the OVCS 25 times.
