DOCUMENT UPDATE

Statement of Procedures

- When it becomes necessary to change or update Pasco County's Election Security Procedures document, the Chief Deputy Supervisor of Elections and the Senior Deputy Information Services will collaborate on any needed revisions.
- Once these have been proposed, they will be forwarded to the Supervisor of Elections for approval or further suggested changes.
- Said pages containing the changes of procedure will be forwarded to the Division of Elections, accompanied by a statement describing which part of the procedures previously filed has been revised, and the reasons why the changes were necessary.
- These will be forwarded (pursuant to 1S-2.015(3), FAC) within five (5) days from the date the change was made. The change will be accompanied by the Document Update Record.
- Following approval by the Division of Elections, the changes will be incorporated into the permanent document on file in Pasco County and affected pages will be printed for updates to all hard copies of the manual.

EXHIBITS

1. Oath of Candidate
2. Contest and Ballot Style Listing
3. Ballot Image Manager Ballot Proof
4. Ballot Order Quantities
5. Ballot Preparation Control Log
6. Tabulation System Preparation Control Log
7. Ballot Assignment Form
8. Precinct by Precinct Report – Model 650
9. Results Printout from iVotronic
10. Public Notice of Logic and Accuracy Test
11. Notification to Candidates of Logic and Accuracy Test
12. Cumulative Report – Election Reporting Manager
13. Certification of Public Logic and Accuracy Test
14. Equipment Distribution Control Log
15. Precinct Report Form
16. iVotronic Ballot Record
17. iVotronic Event Log
18. Ballot Distribution Control Log
19. Provisional Ballot Supply Envelope
20. Green Bag Outgoing Seal
21. Receiving/Inspection Board Log
22. Precinct Supervisor's Receipt Log

EXHIBITS (continued)

23. Polling Place Supply List
24. Pollworker Payroll Sheet
25. Voter Authority Slip
26. Precinct Incident Log
27. Polling Place Affirmation
28. Provisional Ballot Secrecy Envelope
29. Provisional Ballot Certificate Envelope
30. Completed Affirmation Envelope
31. Field Service Absentee Ballot Report
32. Polling Place iVotronic Removal Log
33. Green Bag Return Security Seal
34. Election Night Security Name Tag
35. Time Sheet
36. Pollworker Payroll Envelope
37. Provisional Ballot Log
38. Write-In Tally Sheet
39. Absentee Ballot Style Reconciliation Report
40. Ballot Routing Folder
41. Optical Ballot Storage Log
42. Style Identification Divider
43. Certificate of County Canvassing Board

EXHIBITS (continued)

44. Voter Identification Affirmation
45. In-Office Voting Certificate
46. Absentee Ballot Transmittal Form
47. Absentee Ballot Transport Log
48. Secrecy Envelope
49. Advance/Regular Absentee Ballot Comparison Report
50. Authorization Letter for Polling Place Entrance
51. Ballot Duplication Board Log
52. Ballot Tabulation System Test Control Log

GLOSSARY

Ballot Style

A unique combination of issues/races that can be voted on by a geographical voting area, such as a precinct.

Communications Pack

A device containing a printer and a modem used to print results at a polling place and transmit the results to the Central Counting Site.

Cumulative Report

A listing of vote totals at a given point in tabulation, showing overall totals, as opposed to precinct-by-precinct totals.

Direct Recording Electronic (DRE)

DRE voting systems allow a voter to directly enter choices into electronic storage with the use of a touch screen device. There is no ballot card. The possible choices are presented to the voter on a screen. The voter's choices are stored in these machines via a memory chip.

Election Qualification Code (EQC)

A unique code generated for each election and transferred to every iVotronic and PEB to be used for that election.

Flash Memory

Nonvolatile memory that retains its contents without a source of power.

Hard Drive

A non-removable magnetic storage system located inside the case of most personal computers.

iVotronic

The touch screen device used for voting in Pasco County.

Mark Sense (Optical Scan)

Mark sense voting systems employ a paper ballot on which candidates and issue choices are preprinted next to an empty oval. Voters record their choices by filling in the oval. The tabulating device reads the votes by detecting these filled-in ovals. Mark sense technology has been used extensively for decades in such areas as standardized testing and statewide lotteries.

Model 650

The optical scan reader used in Pasco County to process absentee and provisional ballots.

Modem

A device that allows a computer to communicate with another computer over regular telephone lines using communication software.

Overvote

A voter selects more choices than allowed for an office. If an office is "vote for one" and the voter chooses more than one candidate, each additional choice counts as an overvote.

Personalized Electronic Ballot (PEB)

An activator PEB is a cartridge containing ballot information that is inserted into the iVotronic terminal to activate the correct ballot for a voter. A master PEB is used to open and close the voting terminals, collecting vote totals for each location.

PC Network

A collection of personal computers physically linked by cable. One personal computer is the file server. All data is stored on the server's hard drive. The other personal computers are work stations that access this data.

Phone Bank

A network of personal computers used by trained personnel to research and answer questions from pollworkers about voter status and eligibility.

Provisional Ballot

A paper ballot issued at the polling place to a voter whose name is not found in the precinct register and whose eligibility to vote cannot be determined.

Tabulation System Guide (TSG)

A manual produced by the Supervisor of Elections' Information Services Staff. It includes instructions for pre-election testing, ballot tabulation, communications, absentee ballot canvassing, and voter history update.

Touch Screen

See "Direct Recording Electronic."

Undervote

A voter selects less choices allowed for an office. If an office is "vote for one" and the voter chooses none, this counts as an undervote.

Unity

The software product from Election Systems & Software consisting of several program modules used to control the setup and administration of ballot tabulation.

Upload

To transfer data, usually from a personal computer or device to a central, often remote computer.

Zip Disk

A 3.5" removable cartridge used to back up data or transfer data from one computer to another.

INTRODUCTION

The objective of these procedures is to outline the steps taken to plan, prepare, and conduct elections which maintain the highest level of honesty, accuracy, integrity, and secrecy in voting. The conduct of elections and ascertaining of results are regulated by the Election Code of the State of Florida. The Supervisor of Elections bases the election procedures on the Election Code and is given the flexibility to adopt additional procedures and safeguards as may be required to assure the integrity of the election process.

This procedures manual has been prepared with the desire of making the public, the press, candidates, and other interested parties aware of the method by which ballots are tabulated. The safeguards and procedures are continually reviewed and are subject to change if they are found not to accomplish the desired goal of protecting the integrity of the elections.

However, note that they are ONLY guidelines for conducting the elections. These procedures may be modified and even temporarily suspended if their effectiveness is questioned or a disaster occurs. Such a decision may only be made by the Supervisor of Elections.

Because Pasco County is so expansive geographically, offices are maintained in three areas of the county.

East Pasco

East Pasco Government Center
14236 6th Street, Suite 200
Dade City, FL 33523
352-521-4302
352-521-4319 (Fax)

West Pasco

West Pasco Government Center
7530 Little Road, Suite 110
New Port Richey, FL 34654
727-847-8162
727-847-8971 (Fax)

Central Pasco

Central Pasco Professional Center
4111 Land O' Lakes Boulevard, Room 105
Land O' Lakes, FL 34639
813-929-1288
813-929-1292 (Fax)

In addition to the three offices identified above, the Supervisor of Elections has staff at one other location.

Election Support Center
38245 McDonald Street
Dade City, FL 33525
352-521-4302
352-521-4110 (Fax)

The Pasco County Supervisor of Elections utilizes a ballot tabulation network system that functions in one location. Voting at polling places is accomplished using iVotronic touch screen terminals which are activated using a Personalized Electronic Ballot. Results from each precinct are transmitted to the tabulation network at the Election Support Center in East Pasco via modem. It is important to note that these modemed totals are considered “unofficial” until such time that the County Canvassing Board certifies same. Absentee in-office voting is accomplished using iVotronic touch screen terminals. Absentee mail, carry-out and provisional ballots are mark sense and are tabulated at the Election Support Center using an optical scan reader.

VOTING SYSTEM

The tabulation network uses Microsoft Windows NT Server 4.0 operating system for the server and Windows 98 operating system for the workstations.

The tabulation network consists of:

- 1 Dell Poweredge 2400 Server
- 6 Dell Dimension 4300
 - 2 Data Acquisition Workstations
 - 4 Data Reporting/Display Workstations
- 1 Hewlett-Packard 8100N 32PPM Laser Printer
- 2 Model 650 Optical Scan Readers
- 1 DLT-4000 Tape backup

DOCUMENT SUPPORT

Pollworker Manuals

Voter Registration Users Guide

Absentee Procedures

Election Night Board Training Instructions

Ballot Distribution

Tabulation System Guide (TSG)

SECTION A: Copies, Samples and Exhibits

All referenced forms are included in Section S of this document. The function, preparation, use, routing, destination, security, control, and retention of each document are discussed within the Election Security Procedures as each of the referenced forms is encountered in the elections process.

Election related forms, schedules, logs, and checklists discussed in this security procedures manual are all single-part; however, many of them are double-sided. Additionally, this procedures manual, in conjunction with training of election-related staff, specifies the routing of all forms, schedules, logs, and checklists back to the Supervisor of Elections for auditing/filing.

All election related documents are retained for a two-year period following each election. At such time, approval is received from the Division of Elections for disposal for unused materials. For any used materials/records, approval for disposal is obtained from the Bureau of Archives and Records Management of the Division of Library and Information Services of the Department of State.

SECTION B: Election Schedule

- The regular elections schedule is prepared on a calendar year basis for each regularly scheduled county-wide election. The calendar is prepared (for the purposes of this manual) showing no specific dates...only the number of days prior to the General Election. No later than the beginning of each calendar year, the Chief Deputy Supervisor of Elections will incorporate appropriate dates, insuring their accuracy, and forward the calendar to all Supervisor of Elections' staff.
- A municipal elections calendar reflects dates necessary for all municipal elections. Pasco County has a uniform municipal election date which is the second Tuesday in April of each year.
- A special election calendar has been prepared reflecting 45 day preparation time when and if a special election is called. Although the Division of Elections guidelines for the security procedures call for a 20-day calendar, Pasco County has not (to this point) conducted an election with the dates compacted so significantly. It is the preference of this Supervisor to continue to ask for at least a 45-day lead time in order to prepare adequately for an election.

SECTION C: Ballot Preparation

- A master election database is created and maintained using the Unity Election Data Manager. The database contains information about precincts, districts, precinct and district relationships, and all possible election contests.
- Issues or propositions that are to appear on the ballot are forwarded from the Department of State, the Board of County Commissioners, or District School Board to the Supervisor of Elections

Staff and materials needed:

Senior Deputy Support Services

Unity Software

Elections Systems & Software

11208 John Galt Blvd.

Omaha, NE 68137

800-247-8683

Contact: Linda Bennett

Official wording for all issues

Copies of Oath of Candidate (**Exhibit 1**) for qualified candidates

- Ballot preparation begins immediately after candidate qualifying ends.

Determine Ballot Styles

- The Unity Election Data Manager is used to build an election-specific file from the master election database. Precincts and contests for the election are selected.
- The Unity Election Data Manager produces a Contest and Ballot Style listing. (**Exhibit 2**)
- Candidate names are manually added to the contests.

Optical Scan Process

- The Unity Ballot Image Manager is used to define the exact appearance of optical scan ballots.
- The machine readable Sequence, Type, and Split codes are system generated and appear on the side of each ballot. These codes designate the ballot style of each ballot.

- A human readable code is printed on the lower right corner of the ballot and can be visually verified without having to interpret the machine readable codes.
- Ballots are verified by printing proofs from the Unity Ballot Image Manager (**Exhibit 3**) to a standard laser printer. All proofs are checked against the Oath of Candidate or the resolution calling for the election. The proof is checked by the Senior Deputy Support Services and the Senior Deputy Information Services for spelling, form, and content. It is then reviewed by the Chief Deputy Supervisor of Elections and the Supervisor of Elections.
- Senior Deputy Information Services requests computer program P80830 to be run. Output of P80830 (**Exhibit 4**) is used to determine required quantities of printed absentee, provisional, duplicate and test ballots.
- Supervisor of Elections' staff delivers the proofs to the printer immediately following the end of candidate qualifying or the election. If there are no recounts, proofs should be delivered to the printer within 24 hours following an election. (Proofs are still required from printer for absentee and provisional ballots prior to printing.)
- Once absentee and provisional ballots are received from the printer, they are checked to insure accuracy.
- The comparison is made against the original ballot proofs that were approved by the Supervisor of Elections.
- Ballots are tested by creating a “test deck” of marked ballots that contain a pre-determined number of votes for each candidate and question. Test decks also include blank ballots, overvoted ballots and write-ins. After the ballots are processed through the Model 650, reports are produced and results are verified.
- Any discrepancies or errors are brought to the attention of the printer for corrections to be made.
- All printed ballots are kept separately within ballot style to insure that they are not commingled.
- All printed ballots are kept in the custody of the deputy assigned absentee responsibility.

Touch Screen Process

- The Unity Hardware Programming Manager uses the election-specific database to create the required Personal Electronic Ballots for the iVotronic.

- One PEB for each ballot style is created.
- Each PEB is tested for content by immediately reviewing the PEB after it is prepared by using the “test vote” function on the iVotronic.
- The Supervisor of Elections’ Information Services Staff tests every ballot style on a touch screen unit.
- Multiple ballots are voted to give a predetermined total of votes to each candidate and issue.
- All PEB’s required for the election are created and verified.
- All PEB’s are kept in the custody of the Senior Deputy Support Services.
- All aspects described above will be noted on the Ballot Preparation Control Log. **(Exhibit 5)**

SECTION D: Preparation and Configuration of Tabulation System

All steps necessary to prepare the Tabulation System for counting ballots are noted on the Tabulation System Preparation Control Log. **(Exhibit 6)**

Staff and materials needed:

Senior Deputy Support Services
Senior Deputy Information Services
Computer Services Specialist
Unity Software
Elections Systems & Software
11208 John Galt Blvd.
Omaha, NE 68137
800-247-8683
Contact: Linda Bennett

Audit record requirements, pursuant to Rule 1S-5.006, Florida Administrative Code, shall be followed. The audit record for Tabulation System preparation is the Tabulation System Preparation Control Log.

Programming of Tabulation System

The Tabulation System must be prepared to tabulate ballots for the pre-public test.

- The Senior Deputy Support Services uses the Unity Hardware Programming Manager to load the election parameters on a Zip Disk for the Model 650 optical scan reader.
- The Senior Deputy Support Services configures the Unity SPR Host Software to accept elections results via modem.
- The Senior Deputy Information Services configures the Unity Election Reporting Manager to produce required files and reports.

Voting System Test Plan

Before the public Logic and Accuracy Test is conducted pursuant to 101.5612, Florida Statutes, certain conditions are tested to insure that all ballots are being tabulated properly. The testing is designed to test all possible problem areas.

Identification of Pre-Public Test Requirements

- To determine that all valid/invalid voting locations are counted correctly.
- To determine that all precincts are coded correctly.

- To demonstrate that no votes are tabulated for an overvoted race.
- To demonstrate that no votes are tabulated for an undervoted race.
- To determine that the appropriate ballot styles are correctly tabulated.
- To determine that all report variations accurately reflect the votes cast.
- To determine the correct tabulation when more than one vote is allowed in a race.
- To determine that write-in votes are counted correctly.
- To demonstrate that a sample of the actual ballots to be used in the election can be tabulated by the automatic tabulation equipment.

Design and Creation of Test Votes – Optical Scan

- Optical ballots used for the test decks are allocated by the deputy assigned absentee responsibility and assigned to the Senior Deputy Information Services on the Ballot Assignment Form. **(Exhibits 7 and 7A)**.
- The Supervisor of Elections' Information Services Staff prepares a test deck for each ballot style.
- Test decks are decks of ballots that have been marked to give a predetermined total of votes to each candidate and issue.
- A test deck is composed of the following:
 - 1 ballot with all choices marked
 - 1 ballot marked for the first choice in each race
 - Vote For Two – marked for the first and second choices
 - Vote For Three – marked for the first, second & third choices
 - 2 ballots marked for the second choice in each race
 - Vote For Two – marked for the second and third choices
 - Vote for Three – marked for the second, third & fourth choices
 - (Up to the maximum choices for any given race)**
 - A Nonpartisan deck will have 1 ballot with no choices marked
 - A Democratic deck will have 2 ballots with no choices marked
 - A Republican deck will have 3 ballots with no choices marked
- Use of this type test deck causes each candidate to receive the number of votes equal to their location in their race. “Vote for” multiple choices will produce results as follows:

Vote For Two

- Candidate 1 – 1 vote
- Candidate 2 – 3 votes (2 + 1)
- Candidate 3 – 5 votes (3 + 2)
- Candidate 4 - 7 votes (4 + 3)

Vote For Three

- Candidate 1 – 1 vote
- Candidate 2 – 3 votes (2 + 1)
- Candidate 3 – 6 votes (3 + 2 + 1)
- Candidate 4 – 9 votes (4 + 3 + 2)
- Candidate 5 – 12 votes (5 + 4 + 3)

- Specialized test decks, other than those described above, may be used in pre-election testing to be sure that all test requirements are met. Specialized test decks will verify that all valid voting locations are counted correctly, that no invalid voting locations are counted, that over and under votes are counted correctly, that races which allow more than one vote are counted correctly, and that write-in votes are counted correctly.
- Print and verify precinct-by-precinct results. **(Exhibit 8)**

Design and Creation of Test Votes – Touch Screen

- The Supervisor of Elections’ Information Services Staff tests every ballot style on a touch screen unit.
 - Multiple ballots are voted to give a predetermined total of votes to each candidate and issue.
 - A ballot style test is conducted by voting the following ballots on a touch screen unit:
 - 1 ballot – vote for the first choice in each race
 - Vote For Two – vote for the first and second choices
 - Vote For Three – vote for the first, second & third choices
 - 2 ballots marked for the second choice in each race
 - Vote For Two – vote for the second and third choices
 - Vote for Three – vote for the second, third & fourth choices
- (Up to the maximum choices for any given race)**
- A Nonpartisan style – vote 1 blank ballot
 - A Democratic style – vote 2 blank ballots
 - A Republican style – vote 3 blank ballots
- This test will cause each candidate to receive the number of votes equal to their location in their race. “Vote for” multiple choices will produce results as follows:

Vote For Two

- Candidate 1 – 1 vote
- Candidate 2 – 3 votes (2 + 1)
- Candidate 3 – 5 votes (3 + 2)
- Candidate 4 - 7 votes (4 + 3)

Vote For Three

- Candidate 1 – 1 vote
- Candidate 2 – 3 votes (2 + 1)
- Candidate 3 – 6 votes (3 + 2 + 1)
- Candidate 4 – 9 votes (4 + 3 + 2)
- Candidate 5 – 12 votes (5 + 4 + 3)

- Print and verify precinct-by-precinct results. **(Exhibit 9)**

Identification of Personnel and Facilities

- The Supervisor of Elections' Senior Deputy Information Services has sole responsibility for preparing the test votes used in all testing.
- The Supervisor of Elections and Chief Deputy Supervisor of Elections check to insure that all elements of the pre-testing have been completed and are accurate.
- All testing must be approved by the Supervisor of Elections.
- Completion is noted on the Tabulation System Preparation Control Log.
- Time needed for this procedure is three (3) to five (5) days.

Pre-Tests of Hardware, Software, and Procedures

- All hardware is tested to insure that it is functioning properly.
- In the event of equipment failure, service is requested from the appropriate service provider.
- The software is tested to meet these conditions:
 - All valid/invalid voting locations are counted correctly.
 - All precincts are coded correctly.
 - No votes are tabulated for an overvoted race.
 - No votes are tabulated for an undervoted race.

- Appropriate ballot styles are correctly tabulated.
 - All report variations are correct.
 - Tabulation is correct when more than one vote is allowed in a race.
 - Write-in votes are counted correctly.
 - A sample of the actual ballots to be used in the election can be tabulated by the equipment.
- Prior to any election, all precincts and all ballot styles are counted and tested using test data with pre-determined results.
 - Procedures that will be used on election night are used during the pre-testing to insure that all activities involving ballot tabulation are being accounted for.
 - Completion of each phase of testing is noted on the Tabulation System Preparation Control Log.

Evaluation of Results

- Upon completion of all pre-testing, the results of such tests are examined by the Senior Deputy Information Services, the Chief Deputy Supervisor of Elections and the Supervisor of Elections.
- Any errors or areas of concern are addressed, corrected, and retested.
- The Supervisor of Elections shall approve all test results prior to the public Logic and Accuracy Test.

SECTION E: Logic and Accuracy Test

Pursuant to 101.5612, Florida Statutes, Testing of Tabulating Equipment, a representative sample of the tabulation equipment must be tested to ascertain that the equipment will correctly count the votes cast for all offices and all measures. This is a public test.

Publication of Notice for Public Test

- Pursuant to 101.5612, Florida Statutes, public notice of the time and place of the test is given at least 48 hours prior to the test.
- The Supervisor of Elections publishes the public notice as a legal advertisement in the St. Petersburg Times and Tampa Tribune. **(Exhibit 10)**
- Candidates are notified of the date, place, and time of the public tests when they file their qualifying papers with the Supervisor of Elections. **(Exhibit 11)**
- Political Party Chairs are notified by certified mail at least 15 days prior to the election of the date, time, and place of the public test.
- The Logic and Accuracy Test will be conducted within 10 days of Election Day.
- If touch screen absentee voting will be conducted in the Supervisor of Elections' offices, a Logic and Accuracy Test will be conducted before equipment is dispatched to each of the three offices. This test will be conducted within 10 days of the beginning of voting.

Execution of the Test Plan

- All Logic and Accuracy Tests will be performed at the Election Support Center.
- One cumulative report will be produced for all the precincts counted on the Model 650 optical scan reader.
- One cumulative report will be produced for each one of a representative sample of iVotronic touch screen units by attaching these units to a Communications Pack
- One cumulative report **(Exhibit 12)** will be produced by the Tabulation Network for combined Model 650 and iVotronic totals.
- The Logic and Accuracy Test totals will be compared to a prepared listing of expected vote totals.

- At least one (1) precinct for each ballot style will be counted to insure that each authorized race and ballot position is tested.
- 2% or 10 of randomly selected iVotronics shall be tested for the 10-day Logic and Accuracy Test.
- 2% or 10 of randomly selected iVotronics used for absentee voting in the Supervisor of Elections' East, Central and West offices shall be tested prior to being dispatched.
- A prepared deck of mark sense ballots is read through the Model 650 optical scan reader.
- Both a pre-election and post-election Logic and Accuracy test will be performed using the Model 650 optical scan reader.
- The Logic and Accuracy Tests are conducted with the identical hardware and software used for the actual election.

Recording of Results

- One cumulative report will be produced for all the precincts counted on the Model 650 optical scan reader.
- One cumulative report will be produced for each one of a representative sample of iVotronic touch screen units by attaching these units to a Communications Pack.
- One cumulative report will be produced by the Tabulation Network for combined Model 650 and iVotronic totals.
- This output represents the totals produced by the test data.

Certification of Test Results

- The County Canvassing Board members will verify that all printed test totals match a prepared listing of expected vote totals. Once verified, the *Certification of the Public Logic and Accuracy Test (Exhibits 13 and 13A)* will be signed by the members of the County Canvassing Board present.

Retention of Test Materials

- The ballot storage cabinet security seal number is recorded on the *Certification of the Public Logic and Accuracy Test* signed by the County Canvassing Board, prior to the materials being locked and sealed in the ballot storage cabinet.

- Pursuant to 101.5612(2), Florida Statutes, the material used for the public test, including the test ballots and test result reports, are sealed and retained in the custody of the County Canvassing Board. In Pasco County, the Canvassing Board has given this custody to the Supervisor of Elections.

Staff Requirements and Assignments

- The Supervisor of Elections' Information Services Staff designs and prepares the Logic and Accuracy Test.
- Members of the Supervisor of Elections' staff conduct the Logic and Accuracy Test.

Security Provisions

- All test materials are locked and sealed in the ballot storage cabinet.
- The Election Support Center is staffed by employees of the Supervisor of Elections. The public is prohibited from access without prior permission of the Supervisor of Elections, Chief Deputy Supervisor of Elections, or the Senior Deputy Support Services. The facility is equipped with an infrared security system which is active during non-work hours.
- The Tabulation System network is secured at the conclusion of the public logic and accuracy test.

SECTION F: Filing Election Parameters

In accordance with section 101.5607(1)(b), Florida Statutes, and Rule 1S-2.015(5)(f), Florida Administrative Code, the Supervisor of Elections shall, within 24 hours after the completion of any Logic and Accuracy Test conducted pursuant to 101.5612, Florida Statutes, send by certified mail to the Department of State, a copy of the tabulation program which was used in the Logic and Accuracy testing, along with a copy of the parameters used within the voting system to define, for each election, the tabulation and reporting instructions.

- If touch screen absentee voting will be conducted in the Supervisor of Elections' offices, after the results of the Logic and Accuracy Test conducted for this purpose are verified by the County Canvassing Board, a copy of the required files, in the prescribed format, is prepared for submission to the Division of Elections.
- The copy is mailed to the Division of Elections on the same date of the Logic and Accuracy Test by the Executive Secretary. This copy is mailed "certified returned receipt requested."
- After the 10-day Logic and Accuracy Test results are verified by the County Canvassing Board, a copy of the required files, in the prescribed format, is prepared for submission to the Division of Elections.
- The copy is mailed to the Division of Elections on the same date of the Logic and Accuracy Test by the Executive Secretary. This copy is mailed "certified returned receipt requested."

SECTION G: Pre-election Steps for Voting Machines

Determining Number of Voting Machines

- Using the Equipment Distribution Control Log (**Exhibit 14**), the Senior Deputy Support Services allocates iVotronics and PEB's to each precinct.
 - Each precinct is assigned one iVotronic per approximately 175 voters, with a minimum of two issued to a precinct.
 - Each precinct is assigned one Master PEB.
 - Each precinct is assigned one Activator PEB per 3-5 iVotronics assigned.
- The Senior Deputy Support Services allocates iVotronics and PEB's used for absentee voting to the appropriate office. This equipment is stored in a secured area in the East, Central and West Pasco Supervisor of Elections' offices.
 - East Pasco
 - Supervisor iVotronic
 - Voter iVotronics (including one ADA unit) to accommodate expected turnout
 - Master PEB
 - Voter PEB's to accommodate expected turnout
 - Central Pasco
 - Supervisor iVotronic
 - Voter iVotronics (including one ADA unit) to accommodate expected turnout
 - Master PEB
 - Voter PEB's to accommodate expected turnout
 - West Pasco
 - Supervisor iVotronic
 - Voter iVotronics (including one ADA unit) to accommodate expected turnout
 - Master PEB
 - Voter PEB's to accommodate expected turnout

Public Test Components

- If touch screen absentee voting will be conducted in the Supervisor of Elections' offices, a Logic and Accuracy Test will be conducted before equipment is dispatched.

- The Logic and Accuracy Test will be conducted within 10 days of Election Day
- 2% or 10 of randomly selected iVotronics shall be tested for the 10-day Logic and Accuracy Test.
- 2% or 10 of randomly selected iVotronics used for absentee voting in the Supervisor of Elections' East, Central and West offices shall be tested prior to being dispatched.
- At least one (1) precinct for each ballot style will be counted to insure that each authorized race and ballot position is tested.
- The Logic and Accuracy Tests are conducted with the identical hardware and software used for the actual election.
- One cumulative report will be produced for each one of a representative sample of iVotronic touch screen units by attaching these units to a Communications Pack
- The Logic and Accuracy Test totals will be compared to a prepared listing of expected vote totals.

Securing Voting Machines

- iVotronics and PEB's are stored at the Election Support Center, which is staffed by employees of the Supervisor of Elections. The public is prohibited from access without prior permission of the Supervisor of Elections, Chief Deputy Supervisor of Elections, or the Senior Deputy Support Services. The facility is equipped with an infrared security system which is active during non-work hours.
- The preparation of PEB's and iVotronics is accomplished at the Election Support Center.
- All PEB's programmed for the election are kept in the custody of the Senior Deputy Support Services at the Election Support Center until such time as they are distributed to the Precinct Supervisors for use at the polls on election day.
- Once a precinct has been allocated the appropriate number of iVotronics, the stack of iVotronics for a precinct is placed in a holding area awaiting delivery to the polling place.
- Supervisor of Elections' staff will deliver each precinct's iVotronics, verifying the total on the Equipment Distribution Control Log.

- PEB's are locked in red bags and distributed to the precincts with the Precinct Registers in sealed green bags.
- On the day immediately preceding election day, Precinct Supervisors pick up the sealed green bag containing the PEB's, which remain in the sole custody of the Precinct Supervisor until election morning.
- During the procedure to open the polls, the Voting System Supervisor will verify the number of PEBs (masters and activators) and the number of iVotronics against the Precinct Report Form. **(Exhibit 15)**
- At the polling place, PEB's remain in the custody of pollworkers at all times.
- The iVotronic system provides a complete and extensive audit trail. In addition to the actual ballot record **(Exhibit 16)**, voter terminals record a chronological event log **(Exhibit 17)**, including serial number of each iVotronic and serial number of each PEB.

Retaining the Test Results and Records of the Proceedings

- Pursuant to 101.5612(2), Florida Statutes, the material used for the public test is sealed and retained in the custody of the County Canvassing Board. In Pasco County, the Canvassing Board has given this custody to the Supervisor of Elections.
- Audit data, including ballot images, is downloaded from each iVotronic terminal after each election.
- All data from the iVotronic terminals is archived on a removable storage medium.

SECTION H: Ballot Distribution

- PEB's are stored at the Election Support Center, which is staffed by employees of the Supervisor of Elections. The public is prohibited from access without prior permission of the Supervisor of Elections, Chief Deputy Supervisor of Elections, or the Senior Deputy Support Services. The facility is equipped with an infrared security system which is active during non-work hours.
- Mark sense absentee, provisional, duplicate and test ballots are stored at the East Pasco Government Center, in the custody of the deputy assigned absentee responsibility. Provisional and duplicate ballots are stamped either "PROVISIONAL" or "DUPLICATE" prior to being distributed.
- Ballots are secured in a locked room within the office of the Supervisor of Elections at the East Pasco Government Center.
- The preparation of PEB's, supply bags, precinct supplies, and iVotronics is accomplished at the Election Support Center.
- The deputy assigned absentee responsibility distributes the ballots used for absentees and testing using the Ballot Distribution Control Log. **(Exhibit 18)**
- Ballots used for testing are assigned to the Information Services Staff by the deputy assigned absentee responsibility using the Ballot Assignment Form. These ballots are stamped "TEST" and marked into test decks by the Supervisor of Elections' Information Services Staff. The test ballots are stored at the Election Support Center in the custody of the Senior Deputy Information Services and are used to test the optical scan readers.
- iVotronics and PEB's used for absentee voting are assigned to the appropriate office by the Senior Deputy Support Services. This equipment is stored in a secured area in the East, Central and West Pasco Supervisor of Elections' offices.
- Mark sense ballots used for absentee voting are issued to the appropriate offices by the deputy assigned that responsibility using the Ballot Assignment Form. These ballots are stored in a secured area in the East, Central, and West Pasco Supervisor of Elections' offices.
- Using the Equipment Distribution Control Log, the Senior Deputy Support Services allocates iVotronics and PEB's to each precinct.
- PEB's are locked in red bags and distributed to the precincts with the precinct registers in sealed green bags.

- Using the Ballot Distribution Control Log, the deputy assigned absentee responsibility allocates duplicate ballots for each ballot style and retains custody of these ballots.
- Using the Ballot Distribution Control Log, the deputy assigned absentee responsibility allocates provisional ballots to each precinct.
- Provisional ballots are distributed to the precincts in the Provisional Ballot Supply Envelope (**Exhibit 19**) with the precinct registers and the PEB's in sealed green bags. These outgoing security seal numbers (**Exhibit 20**) are recorded on the Ballot Distribution Control Log.
- The return seals issued for return of ballots on election evening are recorded on the Ballot Distribution Control Log.
- Upon completion of the Ballot Distribution Control Log, the Administrative Assistant prepares the Precinct Report Forms, the Transport Information Log on the back of the Precinct Report Forms and the Receiving/Inspection Board Logs (**Exhibit 21**).
- The Senior Deputy Support Services will assign each precinct a supply bag that will serve as a ballot box, labeled with the precinct's number. Each ballot box will be locked and the key will be in the custody of the Precinct Supervisor.
- The Transport Information Log for each precinct is included in that precinct's green bag. The Transport Information Log includes the precinct number, destination, and security seal numbers.
- The deputy assigned absentee responsibility checks each precinct's green bag for the correct quantity and serial numbers of Provisional Ballots.
- The Precinct Report Form is sealed in the green bag with the provisional ballots for each precinct by the deputy assigned absentee responsibility.
- Supervisor of Elections' staff will issue Precinct Registers to each precinct. The Precinct Registers are packed into the green bag for each precinct.
- The day before an election, the green bags are distributed to the Precinct Supervisors by Supervisor of Elections' staff. The Precinct Supervisor signs the Precinct Supervisor's Receipt Log (**Exhibit 22**) accepting custody of the Provisional Ballots, PEB's and Precinct Registers.

- The Senior Deputy Support Services will determine and assign sufficient supplies (forms, logs, affidavits) for the entire election day. A Polling Place Supply List (**Exhibit 23**) is given to each Precinct Supervisor. The supplies are packed into the precinct's ballot box and locked.
- Once a precinct has been allocated the appropriate number of iVotronics, the stack of iVotronics for a precinct is placed in a holding area awaiting delivery to the polling place.
- Supervisor of Elections' staff will deliver each precinct's iVotronics and "Voting Precinct No. ___" sign with an American flag imprint to the polling place prior to the election.

SECTION I: Distribution of Voting Machines

- iVotronics and PEB's are stored at the Election Support Center, which is staffed by employees of the Supervisor of Elections. The public is prohibited from access without prior permission of the Supervisor of Elections, Chief Deputy Supervisor of Elections, or the Senior Deputy Support Services. The facility is equipped with an infrared security system which is active during non-work hours.
- The preparation of PEB's and iVotronics is accomplished at the Election Support Center.
- All PEB's programmed for the election are kept in the custody of the Senior Deputy Support Services at the Election Support Center until such time as they are distributed to the Precinct Supervisors for use at the polls on election day.
- Once a precinct has been allocated the appropriate number of iVotronics, the stack of iVotronics for a precinct is placed in a holding area awaiting delivery to the polling place.
- Supervisor of Elections' staff will deliver each precinct's iVotronics, verifying the total on the Equipment Distribution Control Log.
- PEB's are locked in red bags and distributed to the precincts with the Precinct Registers in sealed green bags.
- On the day immediately preceding election day, Precinct Supervisors pick up the sealed green bag containing the PEB's, which remain in the sole custody of the Precinct Supervisor until election morning.
- At the polling place, PEB's and iVotronics remain under the supervision of pollworkers at all times.
- The Receiving/Inspection Board at the Collection Site will verify the number of PEB's against the pre-recorded information on the Receiving/Inspection Board Log.
- Supervisor of Elections' staff will pick up iVotronics from the precincts subsequent to the election, verifying quantities against the Equipment Distribution Control Log.
- The iVotronic system provides a complete and extensive audit trail. In addition to the actual ballot images, voter terminals record a chronological event log, including serial number of each iVotronic and serial number of each PEB.

SECTION J: Election Board Duties

Election boards for each polling place are appointed by the Supervisor of Elections pursuant to 102.012, Florida Statutes.

An election board is comprised of the following:

- 1 Precinct Supervisor
- 1 Voting System Supervisor
- 1 Registration Specialist or Registration Technician
- Numerous Inspectors (assigned various responsibilities)
- 1 Poll Deputy

In the four weeks preceding the election, all election board members are trained pursuant to 102.012, Florida Statutes.

On the day immediately preceding election day (from 4:00 to 6:00 p.m.) Precinct Supervisors pick up the ballot box with the election day supplies and sealed green bag containing the Precinct Registers, Pollworker Payroll sheets (**Exhibit 24**), PEB's, Provisional Ballots and the Precinct Report Form. These items remain in the sole custody of the Precinct Supervisor until election morning.

The week prior to the election, voting equipment and election day supplies and signs are delivered to the individual polling places by Supervisor of Elections' staff. A Polling Place Supply List is included in the green bag so the Precinct Supervisor may verify their issued materials.

All election board members take an oath at the beginning of the day attesting to respectively performing their duties in accordance with the laws of Florida. This oath is administered by the Precinct Supervisor. Upon subscribing to the oath, each board member signs the Oath Form.

Pre-Poll Opening Verification for Precinct Supervisor

- Break the numbered security seal on the green bag.
- Remove the Precinct Report Form and compare the security seal number to those pre-recorded on the Precinct Report Form.
- Remove key envelope and locked red bag containing PEB's from the green bag and give to Voting System Supervisor.
- Open the gray supply bag to begin verification of election day supplies. The gray supply bag will serve as the ballot box for Provisional Ballots.

- Verify the actual serial numbers on the Provisional Ballots against the recorded numbers on the Precinct Report Form. (If any discrepancy is discovered, notify the Supervisor of Elections' office immediately.)
- Remove supplies from the ballot box and display the empty ballot box to all present.
- Lock the ballot box with the provided key. The key remains in the possession of the Precinct Supervisor. The ballot box remains locked until after 7:00 p.m. -- when the last voter has voted.
- Using the Polling Place Supply List, verify that all election day supplies have been received. (If not, call the Phone Bank immediately.)

Pre-Poll opening verification for Voting System Supervisors

- Receive the red bag containing PEBs from the Precinct Supervisor.
- Verify the number of PEBs, masters and activators, and the number of iVotronics against the Precinct Report Form.
- Oversee setup of iVotronics.
- Using the Master PEB, electronically open the voting units.
- Secure the Master PEB for use at closing the polls.

Processing of Electors

- Offer to each voter (as they enter the polling place) a demonstration of the iVotronic.
- Ask for signature and picture identification of every elector.
- Check the signature on identification when the elector signs the precinct register.
- Inspector initials the Precinct Register indicating the voter has been authorized to vote, issues voter a Voter Authority Slip (**Exhibit 25**) and directs voter to the voting units.
- Voting System Attendant receives Voter Authority Slip from voter and activates proper ballot style for voter with the activator PEB.

Spoiled Ballot

- If the Voting System Attendant determines that the voter is voting an incorrect ballot – either wrong party or wrong precinct – follow the established guidelines for canceling the incorrect ballot. This must be done prior to the voter pressing the red VOTE button.
- If the Voting System Attendant determines that a voter has left without casting their ballot, follow the established guidelines for casting the ballot.
- In the event of an irregular occurrence, document the event on the Precinct Incident Log. **(Exhibit 26)**

Voter Inquiries

If a voter's name is not in the Precinct Register, their address has changed, or there is a message on the Precinct Register for the voter, it must be investigated. A qualified elector must be given every opportunity to vote.

- Registration Specialist
 - Call the Phone Bank, indicating situation to be resolved.
 - Phone Bank personnel will investigate and provide instructions for problem resolution.
 - Receive confirmation number from Phone Bank and record on Polling Place Affirmation. **(Exhibit 27)**
 - Complete all required information on Affirmation.
- Registration Technician
 - Determine situation to be resolved.
 - Using programs and data available on laptop computer, investigate and resolve problem.
 - Receive confirmation number from program and record on Polling Place Affirmation.
 - Complete all required information on Affirmation.

Provisional Ballots

A Provisional Ballot is an optical scan ballot issued at the precinct if the following conditions are met:

- Voter's name is not in Precinct Register and Phone Bank cannot be contacted.
 - OR**
 - Voter registered by mail without signature and picture identification. Message in Precinct Register is "REG BY MAIL – PHOTO ID REQUIRED" or "ABSENTEE ISSUED – PHOTO ID REQUIRED."
 - OR**
 - Poll closing time extended by court or other order.
- Complete the Polling Place Affirmation, indicating reason for issuing Provisional Ballot.
 - Voter votes the Provisional Ballot and places it in the Provisional Secrecy Envelope. **(Exhibit 28)**
 - Voter places the Secrecy Envelope into the Provisional Ballot Certificate Envelope **(Exhibit 29)**, seals and signs prior to placing in the ballot box.
 - Pollworker witnesses ballot.
 - Pollworker files the completed Affirmation in the Completed Affirmation Envelope. **(Exhibit 30)**
 - Voter is given written instructions regarding the Free Access System, which is available for voter to determine if their provisional ballot was counted, and if not, the reason why it was not counted.
 - Voter drops the sealed envelope containing the ballot in the ballot box.
 - If the ballot is spoiled:

Issue another ballot, initialing the Affirmation each time.

No more than three ballots may be issued per person.

Mark "spoiled" across the face of the Provisional Ballot and return to the Provisional Ballot Supply Envelope.

Marking Precinct Registers for Absentee Voters

- To prohibit voters from voting at the polls AND casting an absentee ballot, a list of voters returning absentee ballots after the Precinct Registers are distributed is produced.

- Voted ballots received prior to distribution of Precinct Registers will be stamped “VOTED ABSENTEE” by staff.
- On election day, the Precinct Supervisor will receive from the Field Service Representative the Field Service Absentee Ballot Report (**Exhibit 31**) for their precinct. This report lists all ballots returned following Precinct Register distribution.
- The Precinct Supervisor will find the appropriate name on the precinct register and stamp it “VOTED ABSENTEE.”
- If the Precinct Supervisor finds that a person has been to the polls and voted, the Phone Bank is called immediately.

If the absentee ballot is an optical scan ballot, it is pulled from other voted absentee ballots prior to canvassing of those ballots.

The situation is brought to the attention of the County Canvassing Board and possibly given to the State Attorney’s office on the grounds of casting more than one ballot in an election.

- Once the Precinct Supervisor has completed their list by stamping all appropriate precinct registers, the Phone Bank is called.
- Should any additional absentee ballots be received throughout the day, the Precinct Supervisor will be notified through another list or a telephone call.

Other Election Activities

- Throughout the day iVotronic booths are checked for campaign literature that may have been left by previous voters.
- Field Service Representatives will clean the iVotronic screens at intervals throughout the day.
- Pollwatchers are permitted in polling places pursuant to Florida Statutes, 101.131, as long as watchers do not interfere with operations of the polling place.
- Solicitation occurs (pursuant to 102.031, Florida Statutes) outside the polling place. NO ONE is authorized entrance to the polling place except those present for the purpose of voting and other designated personnel who function on behalf of the Supervisor of Elections.

Equipment Failure

Rarely, a problem will occur with an iVotronic terminal at the polling place that requires shutting the unit down before poll closing. However, upon such failure, the following procedures will be followed:

- Voting System Supervisor will telephone Phone Bank for assistance.
- Field Service Representative will arrive at polling place and close the terminal using the Master PEB for the polling place.
 - The unit is not removed from the polling place.
 - The situation and resolution are recorded on the Precinct Incident Log.
- Some situations may require that the unit be transported to the Counting Center.
 - In this event, Supervisor of Elections staff will remove the iVotronic terminal from the polling place and transport it to the Counting Center.
 - The situation and removal are documented on the Polling Place iVotronic Removal Log. **(Exhibit 32)**
 - Using V-Recovery procedures, any ballots stored in the iVotronic terminal will be retrieved as soon as the unit is received at the Counting Center.
 - After 7 p.m., these results will be included in the results for the election.

Problems

- Beginning at 6:00 a.m. until well after precincts are closed, all Precinct Supervisors and Voting System Supervisors have access to the Supervisor of Elections' staff through an 800 number.
- Any concerns, questions, or problems occurring throughout the day are handled by calling that number. This number is given to each Precinct Supervisor and Voting System Supervisor during their training session.
- Depending on the problem, it will either be handled in a phone conversation or a designated troubleshooter will be sent to the polling place.

SECTION K: Transport of Ballots

Precinct Supervisor

- Polls close at 7:00 p.m.
- Unlock the ballot box, empty and display for all present to see.
- Hand count the voted provisional ballots.
- Reconcile the hand count to the number of unused and spoiled provisional ballots.
- Once reconciliation occurs, complete the Precinct Report Form.
- Place the voted provisional ballots and the Precinct Report Form in the Provisional Ballot Supply Envelope and return to the green bag for transportation to the appropriate Collection Site.

Voting System Supervisor

- Use Master PEB to close the polls on every iVotronic.

RESULTS MUST BE PRINTED AT THE POLLING PLACE

- Print two copies of cumulative results:
 - One copy to be returned to collection site.
 - One copy to be posted on door of polling place.
 - If problems occur with printing of results, call the Phone Bank. Field Service Representative will arrive at polling place and print the results.
- Modem results to Counting Center.
 - If problems occur with results transmission, call the Phone Bank.
 - If problem cannot be resolved, it will be noted on the Precinct Incident Log, and results will be transmitted from the Collection Site for verification.
- Re-verify the number of PEB's to be returned.
- Place PEB's and one copy of results printout in red bag.

- Lock red bag, and give to Precinct Supervisor for return to Collection Site in green bag.
- Place key in designated envelope and give to Precinct Supervisor for return to collection site in green bag.
- Disassemble iVotronics and re-stack in designated location.

Precinct Supervisor (continued)

- Receive the locked red bag with PEB's along with key envelope from the Voting System Supervisor and place in green bag.
- Complete the bottom half of the Transport Information Log, which is found on the Precinct Report Form, when ready to walk out the door of the polling place.
- Sign the Transport Information Log indicating verification of all log entries.
- Precinct Report Form is returned in Provisional Ballot Supply Envelope.
- Lock the gray ballot box filled with election day supplies.
- Drop the key into the Green Bag for return to the Collection Site.
- PEB's, printed results, voted provisional ballots, unused provisional ballots, Precinct Registers, Precinct Report Form, completed Affirmation Envelopes and Pollworker Payroll are transported in the sealed green bag by the Precinct Supervisor and a pollworker of the opposite political party of the Precinct Supervisor to the appropriate Collection Site by automobile. The return security seal (**Exhibit 33**) number is recorded on the Ballot Distribution Control Log, the Precinct Report Form, Receiving/Inspection Board Log and the Transport Information Log.
- Indicate on the Receiving/Inspection Board Log the time the ballots arrive at the Collection Site and who received them.

IF ANY PROBLEMS ARISE, CONTACT THE SUPERVISOR OF ELECTIONS' OFFICE. ALL PROBLEMS MUST BE RESOLVED PRIOR TO PRECINCT SUPERVISORS LEAVING THE POLLING PLACE.

SECTION L: Receiving and Preparing Ballots for Central Counting

A variety of boards is established for the purpose of verifying results at regional Collection Sites on election night. Each board consists of two people who are of opposite political parties. These board members are paid for their services by the Supervisor of Elections and are trained by the Supervisor of Elections or the Chief Deputy Supervisor of Elections within seven days of the election. A brief training time is held on election night immediately prior to materials being received from the polling places.

Board members are assigned a security name tag which is intended to be worn around the neck. **(Exhibit 34)** These are prepared prior to election day by the Administrative Assistant.

These name tags indicate no particular security level... only that a person is part of the Election Processing Staff. These name tags are inventoried by the Administrative Assistant prior to each election, as well as immediately following the election to make certain all name tags have been returned.

Time sheets **(Exhibit 35)** are signed as election day/night workers arrive at their assigned location and remain in the custody of the Collection Site Supervisors throughout election evening. Time sheets are then returned to the Chief Deputy Supervisor of Elections along with the name tags for payroll preparation and auditing of name tags.

Collection Site Supervisor

The Collection Site Supervisor is responsible for the boards working at the Collection Site on election night for the purpose of receiving and preparing the ballots for verification.

Staff and materials needed:

1 person per collection site
East Pasco
Central Pasco
West Pasco
Supplies (see individual boards)
Security Badges
Keys to gray ballot box

- Conduct brief training of boards on election night.
- Distribute supplies.
- Assist boards with questions.

Receiving/Inspection Board

Receiving/Inspection Boards are responsible for verifying the return of all appropriate materials needed for reconciliation of a given precinct. The board notes that appropriate seals were used for transporting of voted/unused provisional ballots, PEB's and printed results. A major function of this board is to check for any concerns that might hinder the integrity of the election.

Staff and materials needed:

East Pasco: boards assigned as needed per election
Central Pasco: boards assigned as needed per election
West Pasco: boards assigned as needed per election
Keys to gray ballot box
Master Key for Red Bag
Instruction guidelines
Security badges
Election Day/Night Time Sheet
Receiving/Inspection Board Logs
Pens

- Record the time the precinct is received at the collection site on the Receiving/Inspection Board Log.
- Break security seal and open green bag.
- Check for completion of the Transport Information Log.
- Verify security seal number on the green bag against the pre-recorded numbers found on the Receiving/Inspection Board Log.

If any concerns arise as to security seal numbers, check the replacement security seal list.

If the security seal number is not found, notify the Collection Site Supervisor immediately.

- Verify receipt of the Provisional Ballot Supply Envelope.
- Give the sealed Provisional Ballot Supply Envelope and Precinct Report Form to runner for delivery to Provisional Ballot Verification Board.
- Verify the number of Precinct Registers and number of PEB's against the pre-recorded information on the Receiving/Inspection Board Log.
- Deliver the red bag to the Verification Coordinator.

- Check the green bag for the Pollworker Payroll Envelope (**Exhibit 36**) and record receipt of same on the Receiving/Inspection Board Log.
- Check the green bag for the Completed Affirmation Envelope and record receipt of same on the Receiving/Inspection Board Log.
- Have Transporter I and II sign the Receiving/Inspection Board Log.
- Highlight Transporter I and II on Pollworker Payroll Sheet for additional pay.
- Obtain the telephone number where the Precinct Supervisor (Transporter I) can be reached for the next several hours.
- Transporter I and II may leave at this time.
- Repeat this process for each precinct.
- Receiving Board members must sign each page of the Receiving/Inspection Board Log and designate their party affiliation in the appropriate location. These logs are collected by the Collection Site Supervisor on election night and returned to the Chief Deputy Supervisor of Elections. The Chief Deputy reviews for problems or discrepancies and ultimately files these logs in the official election file.

Provisional Ballot Verification Board

The Provisional Ballot Verification Board is responsible for reconciling Provisional Ballot totals. The board notes that all voted and unused Provisional Ballots are accounted for.

Staff and materials needed:

East Pasco: boards assigned as needed per election
 Central Pasco: boards assigned as needed per election
 West Pasco: boards assigned as needed per election
 Provisional Ballot Log (**Exhibit 37**)
 Instruction guidelines
 Security badges
 Election Day/Night Time Sheet
 Pens

- Receive Provisional Ballot Supply Envelope from runner.
- Reconcile the Provisional ballots by physically counting the voted, unvoted, and spoiled ballots.

- If any discrepancies are found, notify the Collection Site Supervisor immediately.
- Record results on Provisional Ballot Log.

Verification Coordinator

The Verification Coordinator supervises the process of comparing and verifying the printed results from the precinct to the transmitted results. If results were not successfully transmitted from the precinct, the Verification Coordinator will notify the PEB Reader. For a General Election, the Verification Coordinator supervises the process of recording valid and invalid write-in votes from the printed results from the precincts.

Staff and Materials needed:

East Pasco: 1
 Central Pasco: 1
 West Pasco: 1
 Master key for Red Bag
 “Verified” stamp
 Stamp pad
 Pen
 Write-In Tally Sheet (General Election) (**Exhibit 38**)
 Security Badge
 Election Day/Night Time Sheet

- Receive the red bag containing the printed precinct results tape from the Receiving/Inspection Board.
- Unlock red bag and remove printed results tape.
- Retrieve precinct results from the Supervisor of Elections network printer. If results were not transmitted from the precinct, notify the PEB Reader. The PEB Reader will transmit the results and notify the Verification Coordinator when complete. The precinct may then be processed according to procedures.
- Distribute precinct results tape and network precinct results to Verification Board for reconciliation.
- Receive audited results from Verification Board.

Results Match

- Stamp both precinct and network results as “verified.”
- File numerically for return to Counting Center.

Results do not Match

- Review for problems.
- Notify Collection Site Supervisor for appropriate resolution.

Verification Board

The Verification Board is responsible for comparing and verifying the printed results from the precinct to the transmitted results. For a General Election, the Verification Board is also responsible for recording valid and invalid write-in votes from the printed results from the precincts.

Staff and materials needed:

East Pasco: boards assigned as needed per election
Central Pasco: boards assigned as needed per election
West Pasco: boards assigned as needed per election
Pens
Highlighter
Stapler
Security badges
Election Day/Night Time Sheet

- Receive printed precinct results from Verification Coordinator.
- Receive printed network results from Verification Coordinator.
- Compare all vote totals including write-ins and undervotes.
- For a General Election, record write-in votes on the Write-In Tally Sheet.

Results Match

- Initial both reports.
- Staple the reports together.
- Give to Verification Coordinator for “verified” stamp.

Results Do Not Match

- Highlight totals not matching.
- Initial both reports.
- Staple the reports together.
- Notify the Verification Coordinator.

PEB Reader

The PEB Reader is responsible for transmitting results to the Counting Center if results were not successfully transmitted from a precinct.

Staff and materials needed:

Central Pasco: 1
West Pasco: 1
PEB Reader
Pen
Security Badge

Results Were not Transmitted from a Precinct

- Receive master PEB from Verification Coordinator.
- Dial into Tabulation Network.
- Insert PEB into PEB reader and transmit results.
- Return PEB to Verification Coordinator.

Runners

Staff and materials needed:

East Pasco: assigned as needed per election
Central Pasco: assigned as needed per election
West Pasco: assigned as needed per election
Election Day/Night Time Sheet
Security Badges
List of precinct numbers to be received at the respective Collection Site

- Greet the Precinct Supervisor upon arrival at the Collection Site.
- Carry the gray ballot box, green bag and other supplies into the Collection Site for the Precinct Supervisor.
- Wait for the Receiving/Inspection Board assignment by the Lead Runner.
- Leave the Precinct Supervisor with supplies at the Receiving/ Inspection Board.
- Deliver the printed precinct results to the Verification Coordinator.
- Take the gray ballot box with the precinct materials to the designated storage area which has been pre-determined by the Supervisor of Elections.
- Be available for whatever assistance the boards may need.

SECTION M: Tabulation of Vote

Pasco County tabulates optical scan ballots at the Election Support Center in Dade City. The procedures outlined in this section relate to the ascertaining of results on election night. Responsibilities of required personnel are covered accordingly as they are discussed in the procedures.

Pursuant to 101.5612, Florida Statutes, a Logic and Accuracy Test for the Model 650 optical scan reader is performed immediately prior to the tabulation of official absentee ballots. Another Logic and Accuracy Test for the Model 650 optical scan reader is performed immediately after the tabulation of official absentee ballots.

The public, political parties, and press are welcome to view the entire process of ballot tabulation in Pasco County. However, they will not be permitted to touch anything, nor will they be permitted to interfere with the tabulation process.

Results will be displayed on the Internet and on a large screen display at the counting center. Paper copies of cumulative results will be made available in the East, Central, and West Pasco Supervisor of Elections' offices on election night.

Tabulation System Supervisor

The Tabulation System Supervisor is responsible for the overall operation of the tabulation network.

Staff and materials needed:

1 person: Senior Deputy Information Services
Tabulation System Guide
Pens
Security Badges

- Conduct the pre-tabulation Logic and Accuracy Test on the Model 650 optical scan reader.
- Prepare the network for tabulation.
- Read in-office absentee voting results from the three Supervisor of Elections' offices into the Tabulation Network using a PEB Reader.
- Release absentee totals after 7:00 p.m. Election Day.
- Monitor the receipt of results via modem from the precincts.
- Distribute cumulative reports.

- Post results on the Internet.
- Send results to the Division of Elections.
- Post precinct results on the network for use by Verification Coordinators at Collection Sites.
- Insure that key precinct reports are available as needed.
- Monitor processing of the Late Run duplicated and reviewed ballots.
- Conduct the post-tabulation Logic and Accuracy Test on the Model 650 optical scan reader.

Optical Reader Operator

The Optical Reader Operator is responsible for the tabulation of optical scan absentee ballots and provisional ballots.

Staff and materials needed:

1 person per optical reader
 East Pasco: 2
 Pencils
 Pens
 Security Badges

- Prepare the ballots to be tabulated and the corresponding Absentee Ballot Style Reconciliation Report. **(Exhibit 39)**
- Verify the style number on the ballots against the Absentee Ballot Style Reconciliation Report.
- Process the voted ballots in the optical reader.
- Once the tabulation of a given style is accepted, deliver ballots to the Tabulation Librarian.

Counting/Reconciliation of Voted Ballots

Ballot Reading Process

- If the ballot count is the same as the Reconciliation Report:
 - (a) Accept on reader according to procedures.

- (b) Place the machine count on the Reconciliation Report in the appropriate box and initial.
 - (c) Place the optical reader number and reader operator's initials on the Reconciliation Report.
 - (d) Deliver tabulated ballots to Tabulation Librarian.
- If the ballot count does not match the Reconciliation Report:
 - (a) Cancel the count.
 - (b) Recount the ballots.
 - (c) When the same result is achieved twice, accept the count on the reader.
 - (d) Place the machine count on the Reconciliation Report in the appropriate box and initial.
 - (e) Place the optical reader number and reader operator's initials on the Reconciliation Report.
 - (f) Deliver tabulated ballots to Tabulation Librarian.
- Processing damaged, blank, and overvoted ballots:
 - (a) After each precinct is read, examine sorted blank and overvoted ballots to determine whether they require duplication. Direct any questions to the County Canvassing Board.
 - (b) Prepare a Ballot Routing Folder (**Exhibit 40**) for any damaged, blank, and overvoted ballots that must be duplicated, note total on Reconciliation Report, and forward to Ballot Duplication Board.
 - (c) Prepare a Ballot Routing Folder for any blank and overvoted ballots not requiring duplication and note total on Reconciliation Report. These ballots will be held in Tabulation for the Late Run.
- Processing write-in ballots:
 - (a) After each precinct is read, prepare a Ballot Routing Folder.

- (b) Note total on Reconciliation Report. These ballots have been counted and are not subtracted from total ballots.
- (c) Forward the Ballot Routing Folder to the Write-in Tally Board.

Optical Reader Sort Options

The optical ballot reader can sort blank, over-voted and write-in ballots separately from regular ballots. Since write-in ballots are counted when scanned, but blank and over-voted ballots are not, it is important to keep these ballot types separate after sorting.

- Press BLANK, OVER-VOTE or WRITE-IN (when applicable to the election) in the SORT section of the control panel.
- When the optical reader reads one of the chosen ballot types, operation will stop and the ballot type is identified on the display screen as follows:

Blank Ballot
Sort Overvote
Sort Write-in

- Remove the top ballot from the output hopper and place it in the appropriate sorting area.
- Before processing the late-run duplicated and reviewed ballots, turn off the sorts for blank and overvoted ballots.

Response to Optical Reader Machine Checks

There are three kinds of “checks” that can take place on the optical reader used in Pasco County’s tabulation system.

- Pick Failure

This message indicates that the ballot did not leave the tray. The input tray was too low or the pick belt is worn and needs replacing.

Verify that the ballots are square in the input hopper, and then adjust the upstop knob. If the message still appears, replace the pick belt.

- Feed Jam After Ballot Was Read

This message indicates that a ballot has blocked the sensor at the entrance to the output hopper.

Clear the feed path and empty the output hopper if it is full.

- Feed Jam In Read Area/Multiple Ballots In Reader

This message indicates ballot feeding problems.

If this error repeats often, “jog” the ballots by gently shuffling them until the pages separate to prevent ballots from sticking together, adjust the upstop knob, check the ballots for foreign objects and check the feed path.

Key Precinct Processing and Reporting

The purpose of key precincts is to assist the wire services in their election results reporting. This is done at the Counting Center in East Pasco.

Staff and materials needed for reporting:

1 person (paid by Wire Service)

Pens

Telephone

Precinct printout or electronic file for precincts selected as "key" by wire service

- Wire services notify the Supervisor of Elections of key precincts.
- When the key precinct results are received, processing is as usual.
- Once received from the polling place, the precinct results are available on the Supervisor of Elections' network.
- If requested by wire service, the Tabulation System Supervisor will create an electronic file of the precinct results and e-mail it to the appropriate wire service.
- Alternatively, the Tabulation System Supervisor will notify the appropriate Collection Site Supervisor to print the precinct report and telephone the results to the appropriate wire service.

Processing Late Run Ballots

A Late Run is processed for each of the three reconciliations. The Late Run process for duplicated and reviewed ballots tabulates:

Duplicated ballots

Reviewed blank and overvoted ballots sorted during tabulation

- Optical Reader Operator turns off sorts for blank and overvoted ballots.
- Optical Reader Operator prepares the Late Run ballots and the corresponding Absentee Ballot Style Reconciliation Report.
- Optical Reader Operator counts the Late Run ballots one style at a time.
- Optical Reader Operator and Tabulation System Supervisor verify the revised number of voted ballots.
- Optical Reader Operator accepts the new count.

Tabulation Librarian

The Tabulation Librarian is responsible for the cataloging and storage of optical scan absentee ballots and provisional ballots.

Staff and materials needed:

East Pasco: 1
 Storage Cabinets
 Optical Ballot Storage Log (**Exhibit 41**)
 Style Identification Dividers (**Exhibit 42**)
 Pens
 Security Badge

- Once the tabulation of a given style is accepted by the Optical Reader Operator, catalog and store the voted ballots in the storage cabinet.
- Prior to storing, place a Style Identification Divider at the front of the tabulated ballots.
- Complete the Optical Ballot Storage Log for each style as it is cataloged and stored.
- When all ballots are tabulated and stored, the Supervisor of Elections will lock the storage cabinet and seal with numbered security seal.
- Sign and return the Optical Ballot Storage Log to the Counting Center Supervisor.

Write-in Tally Board

The Write-in Tally Board is responsible for determining and recording valid and invalid write-in votes.

The Verification Boards in Central and West Pasco serve as the Write-in Tally Boards at those locations. These boards will tally only those write-in votes received from touch screen voting at precincts reporting to those Collection Sites.

The East Pasco Write-in Tally Board will tally write-in votes from in-office absentee voting in the three Supervisor of Elections' offices, touch screen voting at the precincts reporting to that Collection Site, and optical scan absentee ballots.

Staff and materials needed:

East Pasco: 1 Board
Pens
Security badges
Write-in Tally Board Envelope
Printed results from in-office absentee voting
Printed results from precincts
Write-In Tally Sheet

- Receive printed precinct results from touch screen voting.
- Receive optical scan ballots in Ballot Routing Folder from Tabulation where write-in position is voted (East Pasco).
- If the write-in vote is valid, indicate one vote on the Write-in Tally Sheet for the appropriate write-in candidate.
- If the write-in vote is invalid, indicate on the Write-in Tally Sheet that one vote was invalid.
- At the end of election night, write-in optical scan ballots are given to the Counting Center Supervisor for filing in the ballot storage cabinet.

Provisional Ballot Review Board

The Provisional Ballot Review Board will pre-canvass the provisional ballots received from the polling places to determine their eligibility to be counted.

Staff and materials needed:

East Pasco: 1 Board
Polling Place Affirmations
Pens
Security badges

- Investigate the eligibility of each provisional ballot. Reason issued is indicated on the Polling Place Affirmation that was completed at the polling place when the provisional ballot was issued.
- Record results on the original Polling Place Affirmation from the polling place.
- Attach the Polling Place Affirmation to the provisional ballot.
- After authorization by the Canvassing Board, the Senior Deputy Information Services will process the eligible provisional ballots through the optical reader and print a new cumulative report. These will be the official election results to be certified.
- Once processed, all provisional ballots are locked in the ballot storage cabinet.

History Update

This procedure will verify the number of ballots cast to the number of voters actually signing the precinct registers and is completed prior to canvassing and certifying of returns.

Staff and materials needed:

Supervisor of Elections' staff members as required
 Personal computers as required
 Automatic feed Bar code scanners as required
 Precinct registers

- Staff begins scanning precinct registers at the time designated by the Supervisor of Elections.
- Remove plastic binder from each book.
- Process one book at a time through the scanner.
- At the edit station PC, accept valid questionable votes.
- Continue this process until all registers have been scanned.
- When scanning is completed, the information is uploaded from the personal computer to the computer hosting the Voter Registration System.
- In-house computer program P80610 is run to update the individual voter's history record.

- In-house computer program P80555 is run to update each absentee voter's history record.

Certification of Election Returns

The certification process is performed by the County Canvassing Board indicating that all checking/re-checking of election results has been accomplished and that all results appear to be in order. The election results are certified by the County Canvassing Board to the Division of Elections in Tallahassee and official results can then be given to the public.

- Pursuant to FS 102.141(2), the County Canvassing Board will convene at a time and place designated by the Supervisor of Elections.
- The Supervisor of Elections provides for an official court reporter to be present to record the proceedings of the Canvassing Board meeting.
- The Canvassing Board will review the findings of the Provisional Ballot Review Board.
- Accepted provisional ballots will be processed by the Senior Deputy Information Services.
- An official cumulative total report will be printed.
- The Certificate of County Canvassing Board (**Exhibit 43**) will be prepared by the Executive Secretary using these cumulative totals.
- The County Canvassing Board will verify the results printed on the Certificate of County Canvassing Board against the final overall cumulative report containing vote totals.
- Upon completion of the verification of the certificate, the County Canvassing Board signs the original and two copies.
- After verification of the Certification of County Canvassing Board, it is reviewed and signed by the County Canvassing Board.
- If no recount is required, the County Canvassing Board will convene to verify and sign the Certificate of County Canvassing Board and the Conduct of Election Report (102.141(8)).
- Having no further business, the County Canvassing Board adjourns.

- Immediately after adjournment, the Supervisor of Elections will fax the Certificate of County Canvassing Board and Conduct of Elections report to the Division of Elections.
- An original copy of the Certificate of County Canvassing and Conduct of Election Report is forwarded to the Division of Elections by United States mail, certified return receipt requested.
- The other two copies are kept on file in the office of the Supervisor of Elections.

REPORTING REQUIREMENTS

Pursuant to Florida Statutes and Florida Administrative Code, various reports are required to be filed with the Department of State and made available to the public. These reports range from election parameters and software to election results. The only hard copy results distributed on election night are Key Precinct reports and cumulative reports. Cumulative totals are transmitted to the Division of Elections and the Pasco County Supervisor of Elections' Web Site.

Reports to the Public

- Key precinct reports will be printed as required. The key precinct reports will be directed to the designated person.
- Periodically, a cumulative total file will be generated.
- A file will be sent periodically to update the Internet.

Reports to the Department of State

- Immediately upon notification to the Supervisor of Elections by any governmental entity of an election being called, the Supervisor of Elections shall notify the Department of State by fax of the date of the election, the jurisdiction calling the election, and the nature of the election.
- The Supervisor of Elections shall confirm, in writing, the faxed information to the Department of State.
- Pursuant to 101.5607(1)(b), Florida Statutes, within 24 hours after completion of the Logic and Accuracy Test the Supervisor of Elections shall send by certified mail a copy of the election parameters and the tabulation program which was used in the Logic and Accuracy Test.
- Certification of Results of all elections held in Pasco County, including municipal elections, shall be forwarded to the Department of State by fax.

- The Supervisor of Elections shall forward the original Certification of Results to the Department of State.
- In addition to the Certification of Results, the County Canvassing Board shall forward to the Department of State a report on the conduct of the election.
- This report on the conduct of the election shall contain the information mentioned in 102.141(8), Florida Statutes.

SECTION N: Electronic Access to Voting Systems

The Pasco County Supervisor of Elections utilizes a ballot tabulation network system that functions in one location. Voting at polling places is accomplished using iVotronic touch screen terminals which are activated using a Personalized Electronic Ballot. Results from the polling places are transmitted to the tabulation network via modem. In-office absentee voting is accomplished using iVotronic touch screen terminals. Results from in-office absentee voting are read directly into the tabulation network using a PEB Reader. Mail absentee and provisional ballots are mark sense and are tabulated at one location using an optical reader.

Network Security

- The tabulation network operating system is Microsoft Windows NT Server 4.0.
- The tabulation network is stand-alone.
- The network server requires a logon user name and password.
- The network workstations require a logon user name and password.
- Unity System applications may only be initiated by authorized personnel through the use of user name and password.
- Unity System applications record audit logs which track the activity on each system.
- Dial-up access to the tabulation system is restricted to the password protected polling place transmission of vote results. The system password is pre-programmed into the PEB's prior to the election.
- Proprietary formatted election results are protected by built-in validation techniques in the accumulation program.

iVotronic Security

- The iVotronic terminal stores data in a proprietary format in three memory locations that are checked against each other during every activation sequence.
- The iVotronic system provides a complete and extensive audit trail. In addition to the actual ballot record, voter terminals record a chronological event log.

- PEB's are precinct specific. They can only be programmed using Election Systems & Software software. A PEB cannot be modified in the field.
- At the polling place, PEB's remain in the custody of pollworkers at all times.

Data Protection

- Once the 10-day Logic and Accuracy Test is completed, a copy containing the election parameters and the election processing software is forwarded to the Division of Elections.
- All data from the iVotronic terminals is archived on a removable storage medium.
- As a double check, a review of all event and audit logs for any unauthorized access, abnormal occurrences, or options in use during the tabulation process is performed.

SECTION O: Absentee Ballot Handling

The intent of this section is to insure the timely preparation and secure distribution of absentee ballots as well as the security and safe handling following receipt of a voted absentee ballot by the Supervisor of Elections to the point of tabulation.

Much of the process of ballot distribution is described in Section H of this document.

Distribution of Optical Scan Absentee Ballots

- Absentee ballots are received at the East Pasco Government Center and kept in the custody of the deputy assigned absentee responsibility.
- Allocation of those ballots is performed by the deputy assigned absentee responsibility.
- The deputy assigned absentee responsibility allocates the quantity of those absentee ballots to be held in the Supervisor of Elections' West and Central Pasco offices for carry-out voting.
- The assigned deputy in each of the Central Pasco and West Pasco offices must sign the Ballot Assignment Form indicating receipt of the ballots delivered to that office.
- Once absentee ballots are prepared for a given election, the absentee ballots are distributed to individual voters as requests are received.

Absentee Ballot Processing

From the time the first request is received from an elector until the voted ballot is returned to the office of the Supervisor of Elections, precautions are taken to insure the accuracy and integrity of the absentee ballot. The steps described in this section deal with reconciliation processes, verification tasks and the secure storage of both voted and unvoted ballots.

Requests for Absentee Ballots

- Elector (or his designee) makes request by telephone, by e-mail, in person, or in writing (either letter or Federal postcard) to the Supervisor of Elections.
- Requests will be accepted for any elections which will be held for the upcoming 12 month period.
- Supervisor of Elections' staff records request on the absentee system.

Returned Optical Scan Absentee Ballot Verification

- Absentee ballot is returned by mail or in person.
- The voter's signature is compared to the signature on file.
- Returned ballot is checked for appropriate witnessing.
- If there are no problems, return ballot as acceptable. Upon acceptance on the Absentee System, the individual voter's record is automatically updated to reflect date and time ballot was returned.
- If rejected for any of the legal reasons, the system is updated accordingly and the ballot is filed in appropriate location for decision by the County Canvassing Board.
- Notation is electronically made on the Precinct Register at time of printing stating "VOTED ABSENTEE" on the signature line to assist in prevention of double voting.
- Note that if a voter has been issued an absentee ballot but not yet returned it to the Supervisor of Elections' office, the Precinct Register will reflect "ABSENTEE BALLOT ISSUED" on the signature line.
- The pollworker is instructed to either receive from the voter their absentee ballot packet or send the voter to the Registration Technician or Registration Specialist of the polling place for verification that the absentee ballot has not been received by the Supervisor of Elections.

Returned Optical Scan Absentee Ballot Verification – Voter Registered by Mail

- Absentee ballot is returned by mail or in person.
- The outer envelope is opened to collect copy of identification and certificate envelope. If no identification is provided, the outside of the certificate envelope is reviewed for exemption to requirements. If there is no exemption, check voter's master record for compliance since ballot was issued.
- If identification is provided or the voter is exempt:
 - The voter's master record is updated.
 - The voter's signature is compared to the signature on file.
 - The ballot is checked for appropriate witnessing.

- If there are no problems, return ballot as acceptable. Upon acceptance on the Absentee System, the individual voter's record is automatically updated to reflect date and time ballot was returned.
- If rejected for any of the legal reasons (including if no identification is provided), the system is updated accordingly and the ballot is filed in appropriate location for decision by the County Canvassing Board.
- Notation is electronically made on the Precinct Register at time of printing stating "VOTED ABSENTEE" on the signature line to assist in prevention of double voting.
- Note that if a voter has been issued an absentee ballot but not yet returned it to the Supervisor of Elections' office, the Precinct Register will reflect "ABSENTEE ISSUED – PHOTO ID REQUIRED" on the signature line.
- The pollworker is instructed to either receive from the voter their absentee ballot packet or send the voter to the Registration Technician or Registration Specialist of the polling place for verification that the absentee ballot has not been received by the Supervisor of Elections.

In-Office Touch Screen Absentee Voting

Through 5 p.m. the day preceding election day, absentee voting in the three offices of the Supervisor of Elections will be touch screen voting on an iVotronic terminal.

- Elector requests to vote an absentee ballot in person in the office.
- Elector provides signature and picture identification.
 - If signature and picture identification are not provided, voter fills out Voter Identification Affirmation. **(Exhibit 44)**
 - If signature and picture identification are not provided by voter who registered by mail, voter must vote **Provisional Ballot** according to established procedures.
- Elector signs the In-Office Voting Certificate. **(Exhibit 45)**
- Compare the voter's signature to the signature on file. If the voter's signature does not match (but you feel certain it is the correct person), obtain an updated signature on a Registration Application before proceeding.
- Witness the affidavit.
- Load the voter's ballot into the PEB.

- Voter will complete the voting process on the iVotronic and return the PEB.
- If there are no problems, return ballot as acceptable. Upon acceptance on the Absentee System, the individual voter's record is automatically updated to reflect date and time ballot was issued and returned.
- Notation is electronically made on the precinct register at time of printing stating "VOTED ABSENTEE" on the signature line to assist in prevention of double voting. If voting occurs after the precinct registers are printed, "VOTED ABSENTEE" will be stamped on the signature line.

Storage of Voted/Unvoted Absentee Ballots

- Prior to issuing to individual voters, all absentee ballots are stored in a secured location in the East, Central and West Pasco offices.
- Once returned, the elector's voted ballot is stored in a secured location within the Supervisor of Elections' office.
- iVotronics and PEB's used for in-office absentee voting are stored in a secured location in the East, Central or West Pasco offices.
 - At close of business each day, record both the protective count and the public count from each iVotronic unit using an electronic spreadsheet.
 - Secure all iVotronics and PEB's.
 - Verify the protective count and the public count the next day.
- Following the completion of an Absentee Ballot Transmittal Form (**Exhibit 46**), those voted optical scan ballots received in the West or Central Pasco offices are transported from the West or Central Pasco offices to the East Pasco office in a sealed mail pouch. Prior to sealing the mail pouch, a copy of the transmittal form is made and retained in the West or Central Pasco offices. Departure time from the West or Central Pasco offices and security seal number are indicated on the transmittal form prior to sealing in the mail pouch.
- The Supervisor of Elections' courier is solely responsible for delivery of voted absentee ballots from the West or Central Pasco offices to the East Pasco office.
- The Absentee Ballot Transmittal Form notes the date of delivery, number of ballots delivered, person delivering, and person receiving as well as the time of departure from the West or Central Pasco offices and time of arrival in the East Pasco office.

- Voted absentee ballots from the West or Central Pasco office are received by the absentee balloting staff in the East Pasco office. Upon receipt, the mail pouch security seal is broken and the contents of the case are verified for accuracy. Once verified these ballots are interfiled with all other voted absentees.
- Reconciliation of the voted ballots takes place daily pursuant to procedures set forth by the Supervisor of Elections.

Absentee Ballot Canvassing

Pursuant to 101.68 and 102.141, Florida Statutes, the County Canvassing Board will convene at a time and place designated by the Supervisor of Elections to canvass absentee ballots. Two-member boards (of opposite political parties) will assist Supervisor of Elections' staff in the reconciliation of returned absentee ballots and prepare them for processing. Pursuant to 101.68(2)(a), the Supervisor of Elections will process absentee ballots through the tabulation equipment prior to 7:00 p.m. election day.

Staff and materials needed:

Boards assigned as needed per election
 Deputy Sheriff
 Ballot Routing Folders
 Absentee Ballot Style Reconciliation Report
 Pens
 Letter opener (electric and individual)
 Absentee ballots
 Absentee Ballot Transport Log (**Exhibit 47**)

- All ballots received through Saturday's mail immediately preceding the election are included in the "first reconciliation."
- Ballots received in the mail on Monday and Tuesday, and those dropped off at any of the three Supervisor of Elections' offices after the first reconciliation cutoff time, are included in the "second reconciliation."
- Ballots dropped off on election day at any of the three Supervisor of Elections' offices after the second reconciliation cutoff time, are included in the "third reconciliation." This reconciliation will also include Advance Ballots. This reconciliation occurs after 7 p.m. election day.
- Each reconciliation is followed by a Late Run for duplicated and reviewed ballots.

- Canvassing of the absentees will take place at the Election Support Center. Absentee ballots will be transported to the Election Support Center via county vehicle by two Supervisor of Elections' employees escorted by a Sheriff's Deputy. Ballots will be transported in transport cases and sealed with numbered security seals.
- Complete the Absentee Ballot Transport Log prior to departure from the East Pasco Supervisor of Elections' office. A copy of the log is made and filed in the Supervisor of Elections' election file. The original log is sealed in the transport case prior to transporting to the Election Support Center.
- Absentee ballots are received sealed at the Election Support Center by the County Canvassing Board.
- Beginning at a time designated by the Supervisor of Elections, the chairman of the County Canvassing Board will call the Board to order. At that time the seals are broken and verified against the Absentee Transport Log. A general overview of procedures will be given by the Supervisor of Elections and the canvassing of questionable ballots will immediately follow.
- Once questionable ballots have been canvassed and all Precinct Supervisors have reported that the precinct registers have been stamped (second and third reconciliations only), Certificate Envelopes are opened (on electric letter opener), processing one ballot style at a time.
- Absentee ballots for a given ballot style and an Absentee Ballot Style Reconciliation Report are given to an Absentee Board.
- Remove the ballots from the Certificate Envelopes and set aside ballots in Secrecy Envelopes.
- Remove the ballots from the Secrecy Envelopes (**Exhibit 48**) and unfold.
- Absentee Board will note on the Absentee Ballot Style Reconciliation Report any envelopes that do not contain a ballot or that contain more than one ballot.
- Watch for any ballots that are damaged, are totally undervoted or that are marked incorrectly (such as names circled) and set aside.
- After each style is completed, the Canvassing Board will examine separated ballots to determine whether they require duplication.
 - Those ballots not requiring duplication are returned to the other ballots for the style.
 - Place ballots to be duplicated in Ballot Routing Folder marked for that purpose to be forwarded to the Ballot Duplication Board.

- Note on the Absentee Ballot Style Reconciliation Report total ballots sent to the Ballot Duplication Board.
- Ballots are duplicated according to established procedures.
- Absentee Board members sign the Absentee Ballot Style Reconciliation Report.
- The Absentee Ballot Style Reconciliation Report and the ballots for the style will be picked up by the deputy assigned absentee responsibility to be taken to Tabulation.
- The Ballot Routing Folder will be picked up by the deputy assigned absentee responsibility to be taken to the Ballot Duplication Board.
- The absentee ballots will be processed through the tabulation equipment, catalogued, and filed in the ballot storage cabinet.
- No results will be released until after 7:00 p.m. on election day.

Advance Absentee Ballot

- Pursuant to 101.62(4)(a), Florida Statutes, the advance absentee ballot is mailed at least 45 days prior to the Second Primary and General Election.
- Format of ballot is as prescribed by law.
- Advance absentee ballots are held separately until the day of the election at which time the Advance/Regular Absentee Ballot Comparison Report (P80529) (**Exhibit 49**) is printed and used to determine whether the advance ballot or the regular ballot will be counted.
- If a regular ballot and an advance ballot have been returned by the same voter, the regular ballot takes precedence.
- If only the advance ballot has been returned, it will be counted.

State Write-In Ballot

- Pursuant to Section 101.6951, Florida Statutes, State Write-In Ballots are available for the General Election only.
- State Write-In Ballots are available in the Supervisor of Elections' office 90 to 180 days prior to the election.

- The overseas voter may request a State Write-In Ballot not earlier than 180 days prior to the election.
- The voter is permitted to request a State Write-In Ballot if military or other contingencies and normal mail delivery cannot be guaranteed.

Federal Write-In Ballot

- Federal Write-In Ballots are available for the General Election only.
- Overseas elector must have made a request for a regular absentee ballot at least 30 days prior to the General Election in order for the Federal Write-In Ballot to be counted.
- Federal Write-In Ballots are obtained overseas in embassies, on military bases, etc.
- Federal Write-In Ballot must be signed on or before election day in order for it to be counted.
- Ballot will be held until ten (10) days following the Presidential Preference Primary and the General Election. If the regular ballot has not been returned by that date, the Federal Write-In Ballot will be tabulated.

Field Service Representative

The Field Service Representative is a highly-trained technician responsible for troubleshooting voting equipment problems for a selected group of precincts. The Field Service Representative also delivers laptop personal computers and lists of returned absentee ballots to the individual precincts.

Staff and materials needed:

1 person per pre-determined absentee district
 Pens
 Field Service Absentee Ballot Report
 County Precinct Maps
 List of Polling Places
 iVotronic screen cleaner
 Authorization Letter for Polling Place Entrance (**Exhibit 50**)
 Security Badge
 Travel Expense Sheet
 Election Day/Night Time Sheet

- At 5:30 a.m., the Field Service Representatives report to their assigned office, Central Pasco, West Pasco, or the Election Support Center.

- The Field Service Representatives continuously stop at their assigned group of precincts throughout election day to be available to provide assistance.
- The Field Service Representative is trained to troubleshoot any voting equipment problems that may arise at the polling place.

Ballot Duplication Board

The Ballot Duplication Board is responsible for the duplication of damaged voted ballots and improperly marked ballots that have been reviewed by the Canvassing Board for voter intent. The board consists of two members who are of opposite political parties.

Staff and materials needed:

Boards assigned as needed per election
 Pens
 Black markers
 Blank ballots for each ballot style marked “duplicate”
 Ballot Duplication Board Logs (**Exhibit 51**)
 Ballot Routing Folders
 Security badges
 Election Day/Night Time Sheet

- Receive ballots from Absentee Board or Tabulation in Ballot Routing Folder at Style Station. The label on each folder will indicate style and quantity of ballots. Ballots will remain in this folder for filing.
- Prepare the correct Ballot Routing Folder for duplicated ballots to be returned to Tabulation for Late Run.
- Duplicate the ballot on a blank ballot of the same style exactly as voter voted his ballot, except where the interpretation of voter intent requires a change.
- Record the style number on the duplicated ballot.
- Number the ballots sequentially within the style, placing the same number on the original and duplicated ballot. If ballots for the style have previously been duplicated, begin with the next sequential number for the style.
- Record on the Ballot Duplication Board Log: style, total ballots duplicated, date, starting number, and ending number.
- After duplication, the original ballots remain in their original folder for filing.

- All duplicated ballots are placed in a routing folder to be counted in the Late Run for the appropriate reconciliation. Duplicated ballots will be retrieved by the deputy assigned absentee responsibility to be taken to Tabulation.
- Original ballots that were duplicated and signed Ballot Duplication Board Logs will be retrieved by the deputy assigned absentee responsibility.

SECTION P: Ballot Security

Prior to an Election

- All absentee and provisional ballots are kept in the custody of the deputy assigned absentee responsibility at the East Pasco Government Center until such time as they are distributed to the West and Central Supervisor of Elections' offices for absentee balloting or to the Precinct Supervisor for use at the polls on election day.
- The East Pasco Government Center is equipped with fire detectors and an electronic locking system for outside doors. After hours, only authorized personnel may enter the building.
- Ballots are secured in a locked room within the office of the Supervisor of Elections at the East Pasco Government Center.
- All PEB's programmed for the election are kept in the custody of the Senior Deputy Support Services at the Election Support Center until such time as they are distributed to the Precinct Supervisors for use at the polls on election day.
- Absentee ballots are issued to the West Pasco and the Central Pasco branches of the Supervisor of Elections' office for carry-out absentee voting.
- Absentee ballots issued to West Pasco and Central Pasco are secured within the Supervisor of Elections' offices.
- In the event of intrusion or fire, the appropriate public safety agency is automatically telephoned for immediate assistance.
- Precinct Supervisors pick up sealed green bags containing provisional ballots and PEB's on the day immediately preceding election day between the hours of 4:00 and 6:00 p.m.
 - East Pasco Precinct Supervisors pick up sealed green bags at the Election Support Center in Dade City.
 - Central Pasco Precinct Supervisors pick up sealed green bags at the Central Pasco Professional Center in Land O' Lakes.
 - West Pasco Precinct Supervisors pick up sealed green bags at the West Pasco Government Center in New Port Richey.

- Each green bag is sealed with a numbered metal security seal that is pre-recorded on the Precinct Supervisor's Receipt Log by the Senior Deputy Support Services.
- Each Precinct Supervisor signs the Precinct Supervisor's Receipt Log indicating receipt of the green bags containing precinct provisional ballots.
- The Precinct Supervisor has sole custody of the provisional ballots and PEB's until 6:00 a.m. election day.

While the Polls are Open

- The numbered security seal on the green bag is verified by the Precinct Supervisor and the other election officials at the polling place.
- The security seal number is pre-recorded on the Precinct Report Form by the Administrative Assistant.
- The Precinct Supervisor maintains custody of the provisional ballots and gives the red bag containing the PEB's to the Voting System Supervisor.
- The red bag containing the PEB's is opened by the Voting System Supervisor and quantity of PEB's is verified against the Precinct Report Form.
- Should an error be detected, the Supervisor of Elections is notified immediately.
- All PEB's at the polling place remain in the custody of the Voting System Supervisor.
- After the close of the polls, but prior to transporting of ballots to the tabulation center, the Precinct Supervisor and election board members hand count all voted, unused, and spoiled provisional ballots.
- The Voting System Supervisor re-verifies the number of PEB's to be returned, places the PEB's in the red bag, locks the red bag, and gives the red bag and key to the Precinct Supervisor.
- Totals of provisional ballots and PEB's are recorded on the Precinct Report Form and should equal the number of ballots and PEB's issued to the Precinct Supervisor.
- Any discrepancy is noted on the Precinct Incident Log attached to the Precinct Report Form for the County Canvassing Board.

- After a successful reconciliation of all provisional ballots and PEB's, the items are sealed in the green bag and locked in the gray ballot box with the Precinct Report Form signed by all members of the election board.
- The ballots are transported to the collection site as discussed in Section K.

During Tabulation

- The ballot tabulation center has an armed, uniformed deputy sheriff present during the entire ballot tabulation process.
- Each member of the election night staff is trained in advance as to their respective responsibilities on election night.
- Those persons that have been trained and checked-in receive a name tag and are admitted to the Tabulation Center.
- Members of the various election night boards are restricted to their immediate area within the Tabulation Center.
- Representatives of the political parties and the general public are allowed to examine the entire process, including ballot tabulation, but are prohibited from handling any ballot or ballot container or interfering with or obstructing the orderly count of the ballots (101.5614, Florida Statutes).
- All activity at the Tabulation Center, except the tabulation of ballots, is under the direct supervision of the Counting Center Supervisor.
- The Counting Center Supervisor is given authority to act in that capacity by the Supervisor of Elections and is directly responsible to the Supervisor of Elections and the Chief Deputy Supervisor of Elections.
- The tabulation of ballots is under the direct supervision of the Supervisor of Elections.

Subsequent to the Election

- Immediately after ballots are tabulated, they are placed in a ballot storage cabinet.
- As the ballots are placed in the storage cabinet, the location is logged on the Optical Ballot Storage Log.
- At the conclusion of the evening, the Tabulation Librarian signs the Optical Ballot Storage Log.

- The ballot storage cabinet is locked by the Supervisor of Elections.
- The Supervisor of Elections has the sole key to the storage cabinet.
- The key is kept in the possession of the Supervisor of Elections during a ten (10) day period following the election.
- All ballots are stored at the Election Support Center for the required period of time.
- All voted ballots are kept in the custody of the Senior Deputy Support Services.
- All unused and spoiled ballots are stored at the Election Support Center immediately after the election.
- The unused and spoiled ballots are stored for the period required by law.
- The PEB's remain intact until being reprogrammed as needed for subsequent elections.

SECTION Q: Voting System Maintenance and Storage

All voting equipment, including the iVotronics and Ballot Tabulation Network, are on a regular maintenance and testing schedule. This schedule will assist the Supervisor of Elections' staff in detecting any problem that needs to be corrected.

Voting Equipment

- Audit data, including ballot images, is downloaded from each iVotronic terminal after each election.
- To maintain the batteries, iVotronic terminals are charged for at least 16 hours, once every six months.
- Audit data is left intact until ready to prepare for the next election. Then a new Election Qualification Code unique to the election is generated via the Supervisor Terminal and transferred to all PEB's that will be used in the next election.
- These PEB's are used to "clear and test" the iVotronics, removing previous election audit data.
- Any machine flagged from a previous election will be repaired.
- All iVotronics, PEBs, and other supplies are stored and secured at the Election Support Center.

Ballot Tabulation System

- During that period of time when there are no elections scheduled, the Ballot Tabulation Network is activated and tested each month.
- The test utilizes data from a previous election.
- This test is equivalent to a Logic and Accuracy Test, and also includes testing of modems, data accumulation and election reporting software.
- Each test is documented on the Ballot Tabulation System Test Control Log **(Exhibit 52)**
- Any problems that occur are documented and reported to the appropriate service provider.
- The Pasco Ballot Tabulation Network is left intact at the Election Support Center.

BALLOT PREPARATION CONTROL LOG

ELECTION: _____

TASK/EVENT	DATE COMPLETED	COMPLETED BY
1. Build election file from master election database with contests and candidates.		
2. Print and review contest and ballot style listing.		
3. Define exact appearance of all optical scan ballots.		
4. Print ballot proofs.		
5. Verify spelling, form, and content of optical ballots.		
6. Supervisor of Elections checks ballot proofs and gives final approval for ordering.		
7. Order required quantities of ballots (P80830).		
8. Once received, check ballots for accuracy.		
9. Supervisor of Elections checks ballots for accuracy.		
10. Mark ballots into test decks and test each style by tabulating through equipment.		
11. Print reports and verify results for each ballot style.		
12. Give custody of ballots to deputy assigned absentee responsibility.		

TABULATION SYSTEM PREPARATION CONTROL LOG

ELECTION: _____ PAGE 1 OF 2

TASK/EVENT	DATE COMPLETED	COMPLETED BY
1. Create Zip Disk with election parameters and load on Model 650 optical scan reader.		
2. Configure Data Acquisition Manager to accept results via modem.		
3. Configure Election Reporting Manager to accumulate results and produce required reports.		
4. Calculate pre-determined test results for standard test decks.		
5. Prepare a pre-determined test deck for each ballot style.		
6. Test each style by tabulating through equipment.		
7. Verify precinct-by-precinct results against pre-determined results.		
8. Calculate pre-determined test results for specialized test decks.		
9. Prepare specialized test decks.		
10. Tabulate specialized test decks through equipment.		
11. Verify precinct-by-precinct results against pre-determined results.		

TABULATION SYSTEM PREPARATION CONTROL LOG

ELECTION: _____ PAGE 2 OF 2

TASK/EVENT	DATE COMPLETED	COMPLETED BY
12. Test every ballot style on a touch screen terminal using a standard group of votes.		
13. Transmit touch screen results to Tabulation Network via modem.		
14. Verify precinct-by-precinct results from network.		
15. Supervisor of Elections checks format of reports and gives final approval.		
16. Determine which precincts will be used for Logic and Accuracy Test and prepare necessary supporting documents and procedures.

**PROVISIONAL BALLOT
INFORMATION RECEIPT**

Voter's copy. F.S. 101.048(5) & (6)

NOTICE: You have voted a provisional ballot, the validity of which is conditional based on the information you provided. A decision will be made by the election canvassing board if you are an eligible voter in this jurisdiction and if your vote will be counted.

Within 30 days you will receive a letter addressed to the current mailing address you placed on your provisional ballot certificate. You will be advised if your ballot was counted or if not counted, the reason your ballot was rejected.

IMPORTANT:

If this is a primary election, you should contact the supervisor of elections' office immediately to confirm that you are a registered voter and can vote in the general election.

Call 1-800-851-8754 for further information concerning your registration status and/or the disposition of your provisional ballot.

KURT S. BROWNING
Pasco County - Supervisor of Elections

PROVISIONAL BALLOT VOTER'S CERTIFICATE

(Section 101.048(3) and 101.049, Florida Statutes)

YOUR BALLOT WILL NOT COUNT IF YOU DO NOT VOTE IN THE CORRECT PRECINCT

Procedure for Voter:

1. Vote your provisional ballot in secret.
2. After voting, put ballot into secrecy envelope and put secrecy envelope into provisional ballot envelope.
3. Seal the envelope. In front of the precinct official, complete and sign the provisional ballot certificate.
4. Give the envelope to the precinct official to witness.
5. You or the poll worker will place the envelope in the appropriate ballot box.

I do solemnly swear (or affirm) that my name is _____ ; that my date of birth is _____

(First) (Middle) (Last)

_____ ; that I am registered to vote and at the time I registered I resided at:

(Month/Day/Year)

_____, in the municipality of _____, in Pasco County, Florida;

(Residence Address)

that I am registered in the _____ Party; that I am a qualified voter of the county; and that I have not voted in this election. I understand that if I commit any fraud in connection with voting, vote a fraudulent ballot, or vote more than once in an election, I can be convicted of a felony of the third degree and fined up to \$5,000 and/or imprisoned for up to 5 years.

Signature of Voter **X** _____

Signature of Precinct Supervisor or Voter Registration Specialist

PROVISIONAL BALLOT

Procedure for Precinct Official

1. Print election date, precinct number and ballot style in the box below.
2. Check reason for provisional ballot in the box on the right.
3. Issue the voter a provisional ballot, secrecy envelope, this certificate envelope, and the free access notice.
4. Be sure voter completes the voter's certificate.
5. Witness the voter's signature and instruct voter to place ballot envelope in ballot box.

Must be completed by election official at precinct:

Election Date: _____
 Precinct Number: _____
 Ballot Style: _____
 Voter ID #: _____

For County Use Only

Reason for Provisional Ballot

Must be completed by election official at precinct

Check One:

- Voter's name does not appear on the precinct register and voter's eligibility cannot be verified.
- Voter refutes the office's confirmation that he or she is not registered/eligible.
- There is a message on the precinct register that the voter has requested an absentee ballot and the voter does not have a ballot to surrender. Poll worker cannot verify that the voter has not voted.
- There is a message on the precinct register that the voter has returned the absentee ballot or has voted in the office, but the voter maintains that he or she has not voted, even after a call to the office.
- Precinct register states the voter must provide picture/signature identification. None produced.
- A challenged voter is claiming eligibility (Attach both oaths. Do not enclose oaths inside envelope).
- Other (provide comments below)

Extended Hours Only:

Vote cast after 7 p.m. due to extended hours at polls by:

- Qualified voter
- Eligibility undetermined
