■ Cast as intended, counted as cast.

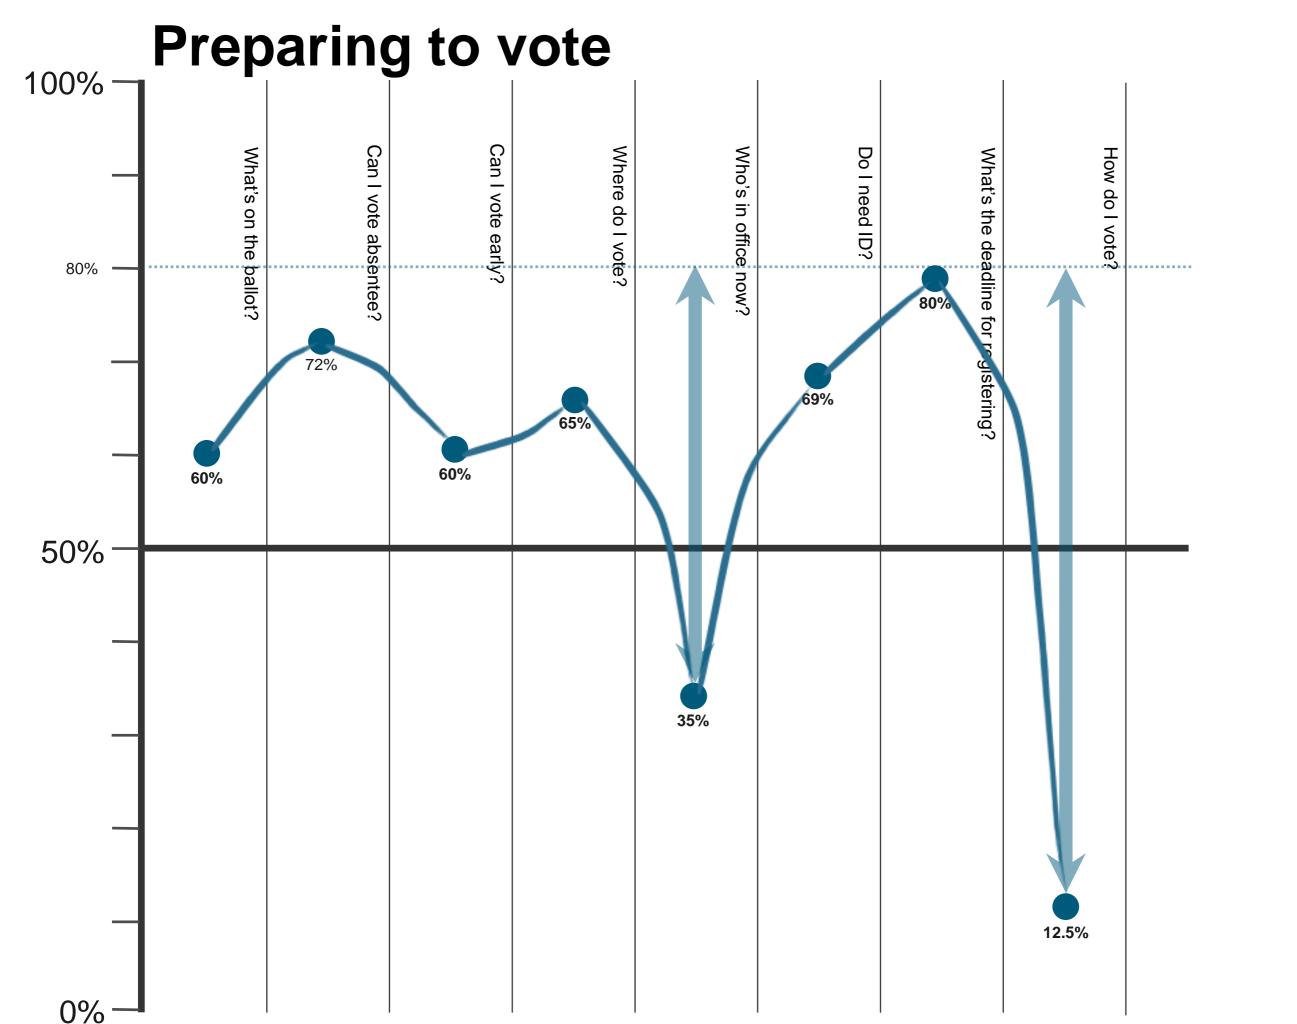

- 41 participants
- geographically diverse
- looked for answers on their county's website

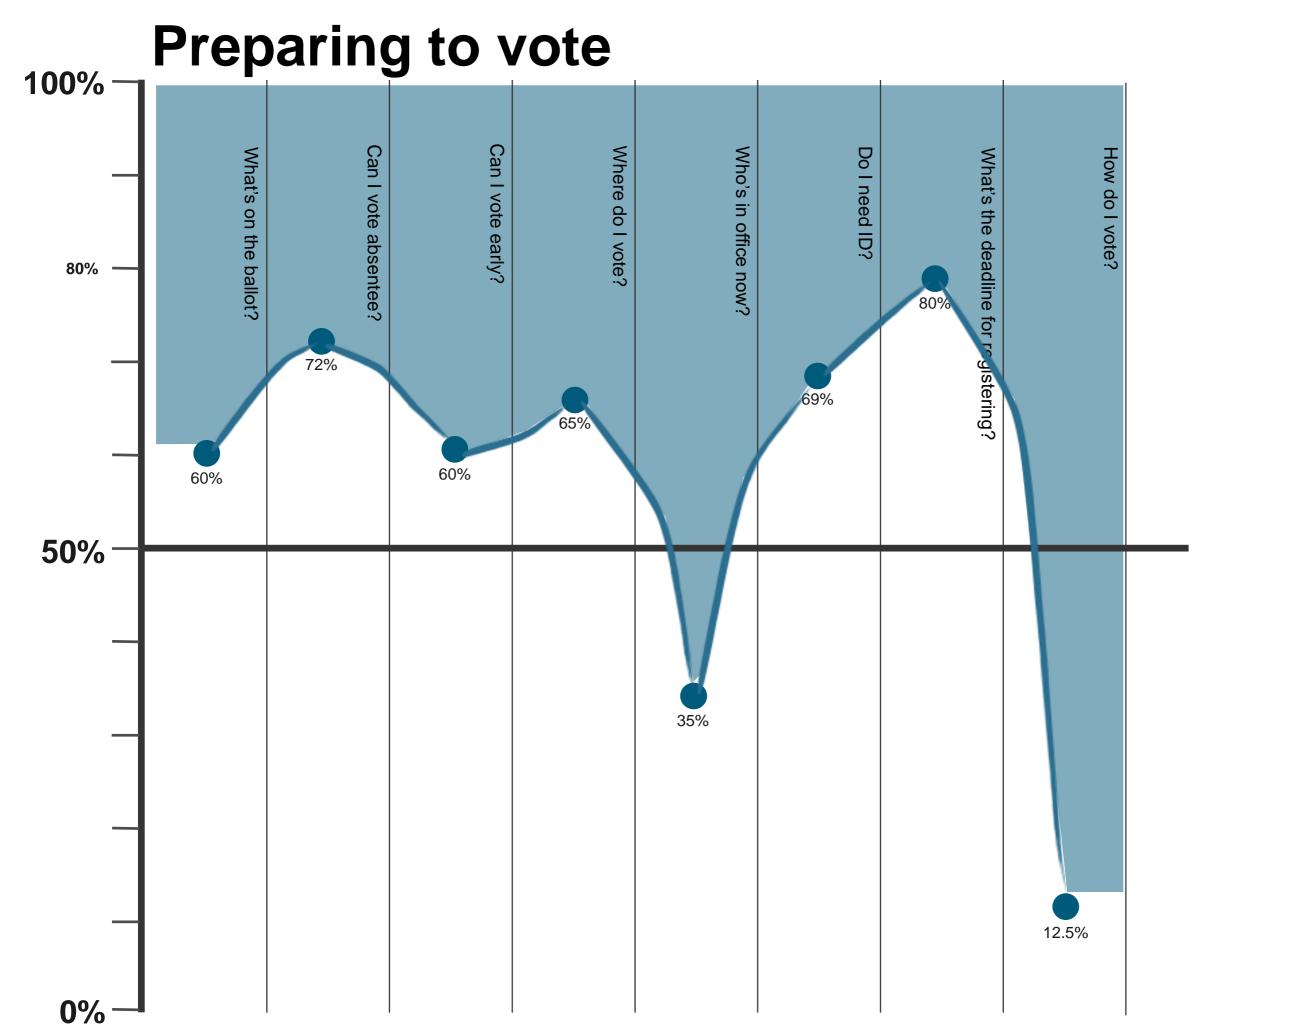

#### Most-asked questions

- 1. What's on the ballot?
- 2. Can I vote absentee?
- 3. Can I vote early?
- 4. Where do I vote?
- 5. Who's in office now?
- 6. Do I need ID?
- 7. What's the deadline for registering?
- 8. How do I vote?

■ 100+ hours in polling places

**Preparing to vote** 100% -Where do I vote? Who's in office now? What's on the ballot? How do I vote? 80% **50%** 

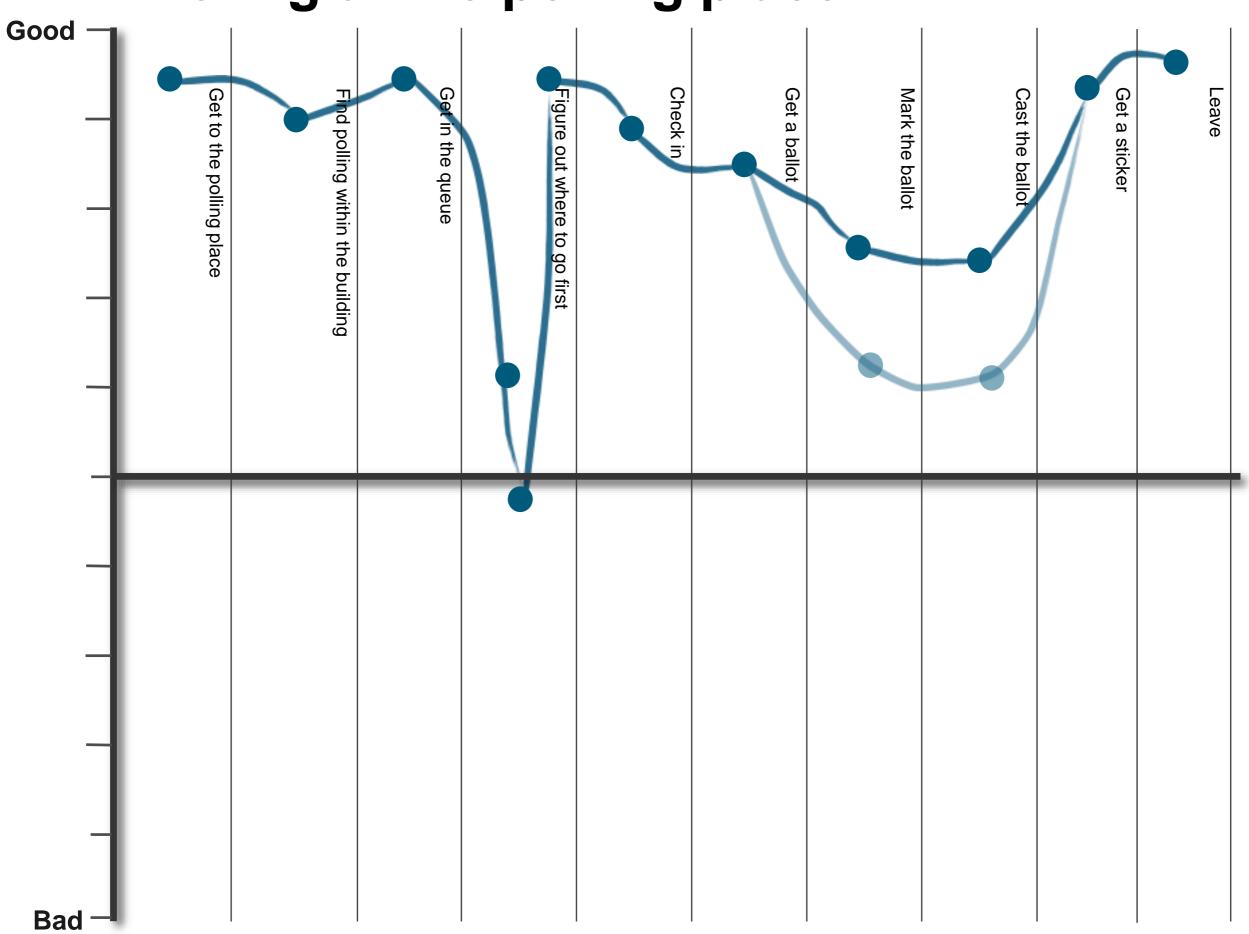

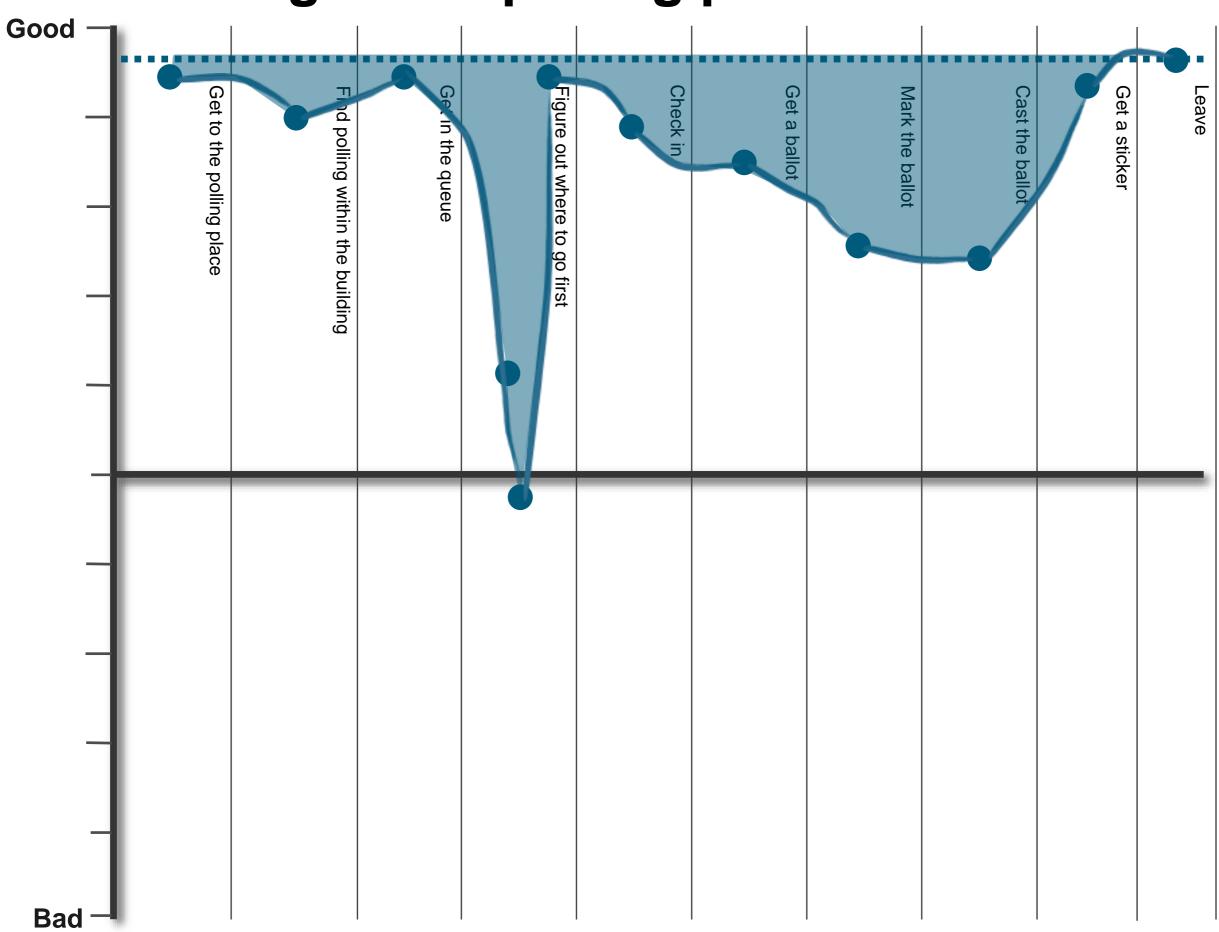

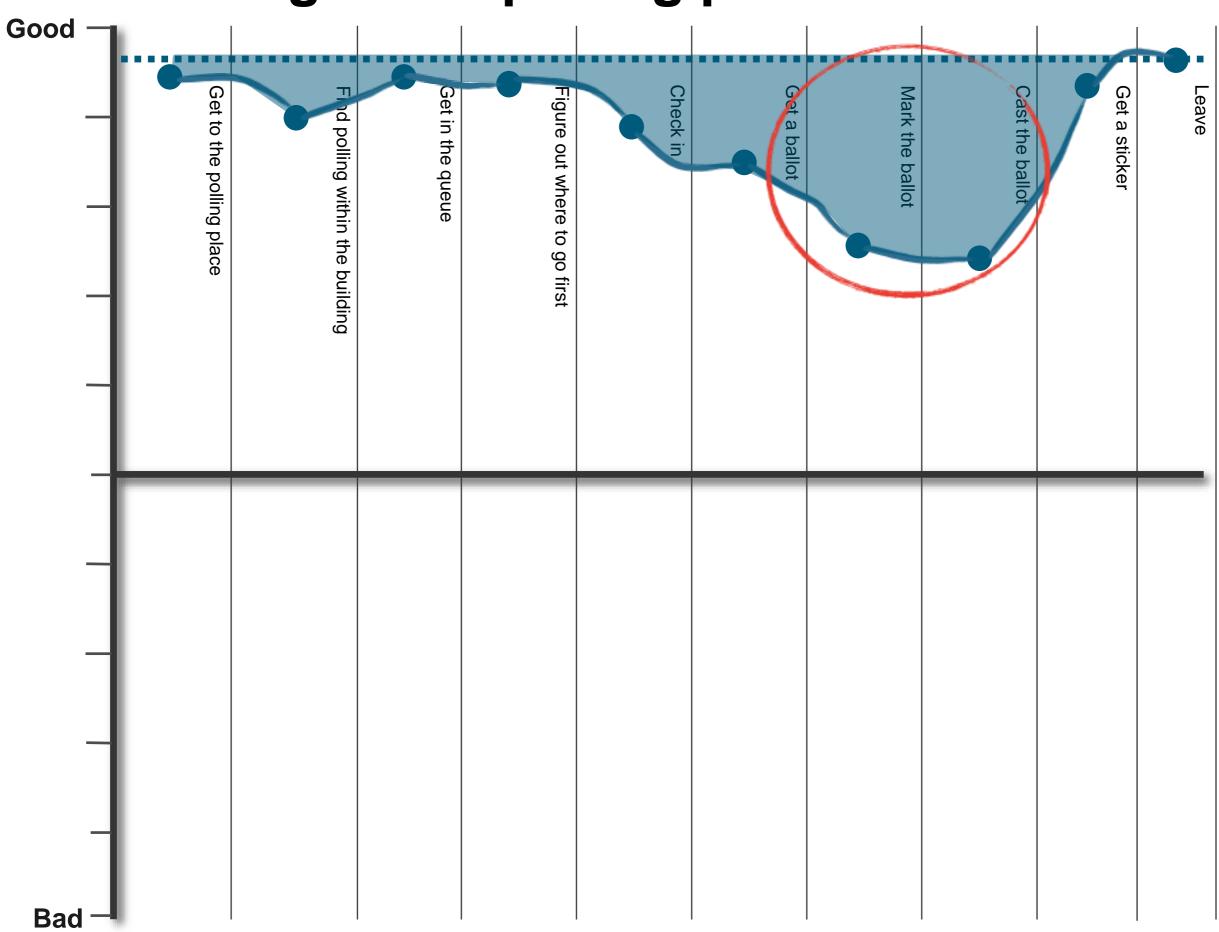

Good —				•		_ 				
	Get to the polling place	Find polling within the building	Get in the queue	Figure out where to go first	Check in	Get a ballot	Mark the ballot	Cast the ballot	Get a sticker	Leave
Bad —										

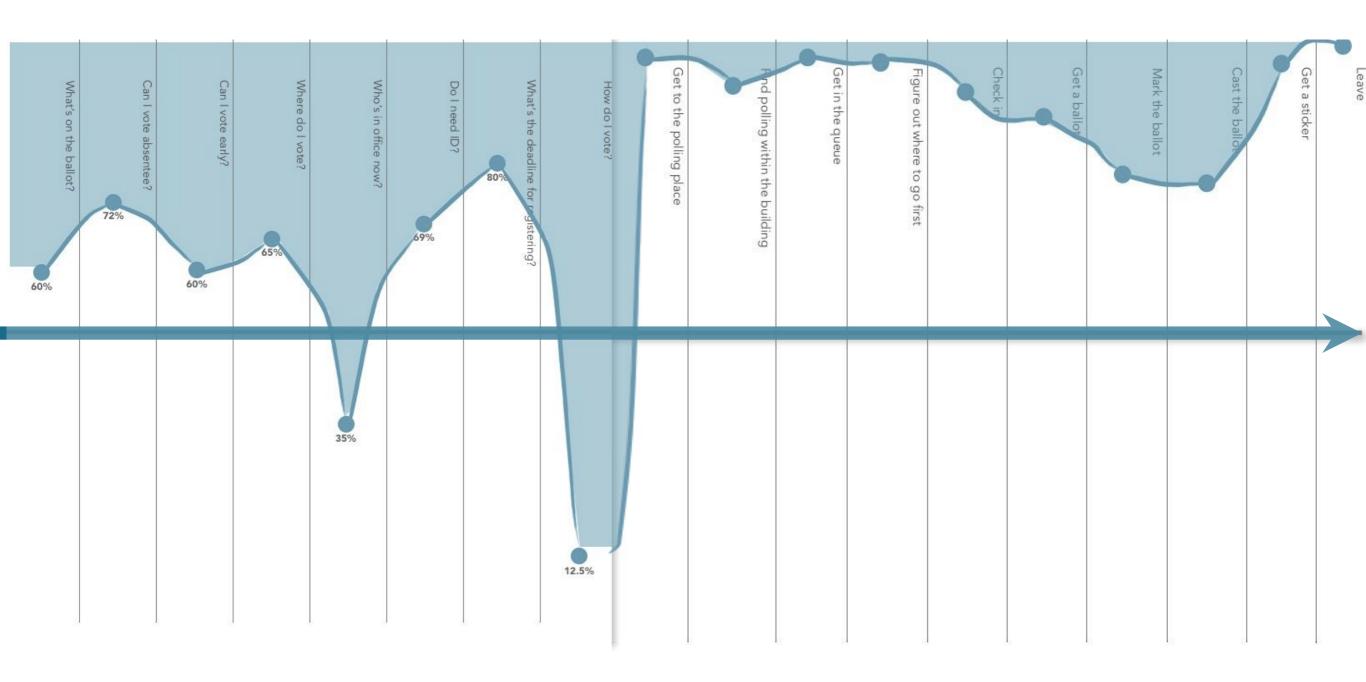

Do I know about all this stuff? How do I mark my choices? Should I vote on everything? What do I do if I don't know anything about these judges? What if I get it wrong? What is this Vote for 3? Why didn't they tell me there were more on the back?

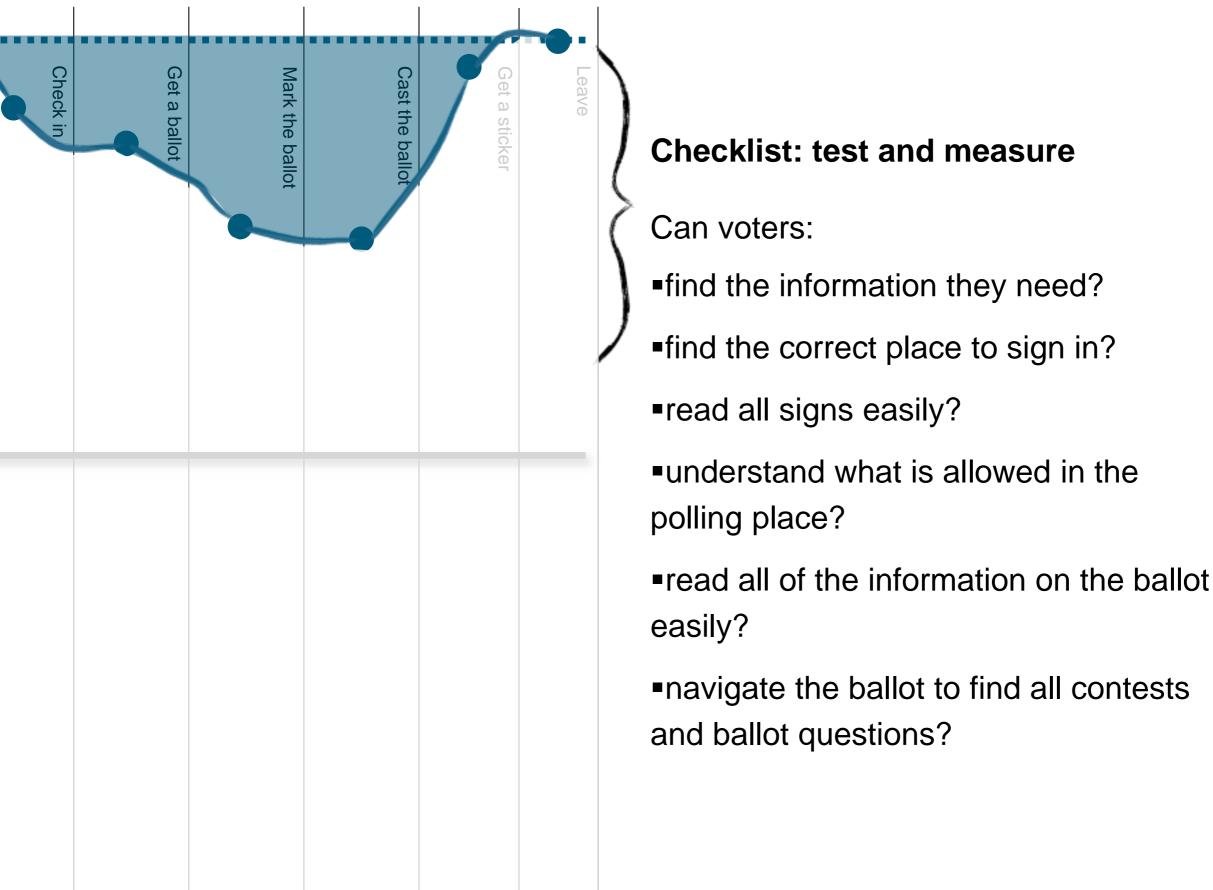

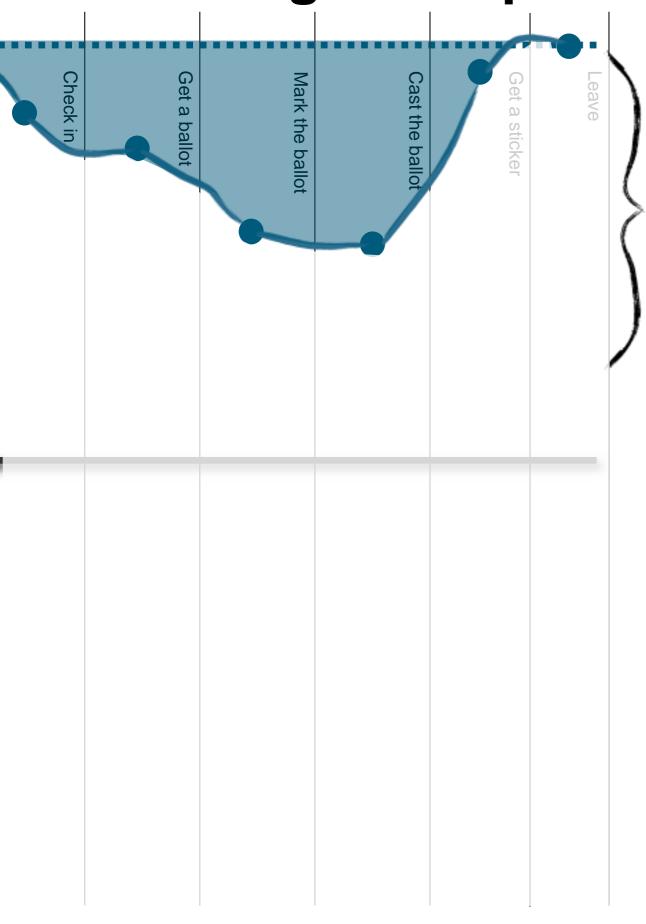

Journey maps look at experience holistically Benchmarking Showing improvement over time

#### Closing the gap

- Make signs easy to read
- Provide clear information about behavior in the polling place
- Use plain language
- Use icons to reinforce instructions
- Use mixed case
- Use big enough type
- Pick one sans serif font
- Use contrast and color to support meaning
- Show what's most important

- Design matters throughout the experience.
- Testing and measuring through usability checks can make it easy to make and see improvement over time.
