project with Karen, Tom and the gang we agreed that time billing was not a valid option for either of us. That is why the invoice is simple. Peggy said were to send a supplemental e-mail to her each month listing our monthly activities, again without time billing.

It seems that the invoice described by Edgardo better fits a different project.

Talk to you soon,

Job

intimidation project

All-

Although Tom Wilkey and I are still working to process each of your contracts on this project, we would like to tentatively schedule an in-person meeting on September 12, here in Washington.

In the meantime, I'd like to propose that we all have a short teleconference call next Wednesday or Thursday at 1:00 PM to begin to talk through the scope of this project and the respective roles and responsibilities each of you might take on.

Could you let me know your availability for a 45 minute call on August 31 or September 1 at 1:00?

Thanks

Tova & Job,

As you know, because the two of you are no longer under contract with the EAC, EAC is not afforded the same protections as if you were still functioning as EAC employees. As such, releasing the document to you would be the same as releasing it to any other member of the public.

Thus, EAC will not be able to release a copy of the proposed final report to you prior to its consideration and adoption by the Commission. The Commission will take up this report at its meeting on Thursday, Dec. 7. I

010993

will have a copy available for you immediately following their consideration - assuming that they do not change the report during their deliberations and voting on Dec. 7. If changes are made, I will have a copy available to you as soon as possible following that meeting.

In the final report, you will see that EAC took the information and work provided by the two of you and developed a report that summarizes that work, provides a definition for use in future study, and adopts parts or all of many of the recommendations made by you and the working group. In addition, you will note that EAC will make the entirety of your interview summaries, case summaries, and book/report summaries available to the public as appendixes to the report.

I know that you are anxious to read the report and that you may have questions that you would like to discuss following the release of the report. Please feel free to contact me with those questions or issues.

Julie,

I understand from Tom Wilkey that you are planning on releasing our report at the public meeting next Thursday, December 7. As we discussed, I respectfully request that Job and I be permitted to review what you are releasing before it is released. I would like us both to be provided with an embargoed copy as soon as possible so we have time to properly review it before Thursday. I can be contacted by email, cell phone at 917-656-7905, or office phone 202-741-6263. I hope to hear from you soon. Thanks.

I believe that is correct. What I think you might also be concerned about is the timelines for completion. If you, Job and Peggy need to work out a revised completion schedule, then I would encourage you to do that. We recognize that our delays have impacted the original schedule and that adjustments should be noted accordingly.

I guess for getting paid purposes it doesn't matter, it just matters with respect to the timeline for completion of the project. If that's right, I will sign and send the letter acknowledging receipt as is. Thanks so much.

Tova

The invoice that you have submitted at this point is for work conducted in September, September 1 - 30.

The invoice that you will submit shortly, if you have not already is for work performed in October, 1 - 31.

I am not sure if we are semantically calling these by different names (i.e., you submitted the Septbmer invoice in October, and October's work in November).

Let me know if this clarifies the point or confuses it.

Just one question on the receipt of contract -- it says that the first invoice was for September, but it actually was for October when we really got started, right? Should this be adjusted to say October 1 to October 31?

Thanks.

Tova

Subject Report

Julie:

Well I see you left out the controversial Donsanto remark. I really think the report is well done. It should have served to satisfy both sides---but wait---there is the Tova on the war path factor. Tova is totally disgusted with the report. She especially hates the omission of the summaries of the various sections (interviews, case law, reports, literature, and interviews). She is really upset with the Donsanto omission. I can see her going to some of the members of Congress she knows and trying to get a hearing. I know she will be sending you a letter, asking or demanding that you retract this report and publish the original one we submitted.

I told her that I am satisfied with the report and that I will have nothing to do with her future actions---which I expect will be plentiful like Santa's Christmas gifts or like the bubonic plague. In any case, this is a Tova production.

Now for the I told you so---this would have been far better had we been able to stick to the original plan to have me do this project alone. I told you so!!!

Keep a stiff upper lip,

Job

Julie:

I need clarification on something in the project before the conference call at 2:00 today between Peggy, Tova, and me. How much of what we are investigating should involve DOJ's jurisdictional matters under such things as the Voting Rights Act?

Also, did you have a chance to talk to Karen about a second project? I need to know because if there will not be one I will have to get a job with a local law firm until the 2006 elections.

## **Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote**

GAO Report

In 2002, the Help America Vote Act (HAVA) was enacted and, among other things, it requires states to implement provisional voting for elections for federal office. HAVA, in general, requires that individuals not listed as registered or whose eligibility is questioned by an election official must be notified about and permitted to cast a provisional ballot that is set aside for review by election officials at a later time so that they can determine whether the person is eligible to vote under state law. HAVA also requires that provisional ballots be provided to first-time voters who had registered to vote by mail on or after January 1, 2003, but were unable to show photo identification or another qualifying identification document when voting in person or by mail in a federal election. In addition, HAVA requires that election officials must provide access to information that permits voters to learn if their provisional ballot was counted, and, if not, why not.

This Report focuses on the efforts of local election officials in 14 jurisdictions within 7 states to manage the registration process, maintain accurate voter registration lists, and ensure that eligible citizens in those jurisdictions had the opportunity to cast ballots during the 2004 election. Specifically, for the 2004 election, the Report concentrates on election officials' characterization of their experiences with regard to (1) managing the voter registration process and any challenges related to receiving voter registration applications; checking them for completeness, accuracy, and duplication; and entering information into voter registration lists; (2) removing voters' names from voter registration lists and ensuring that the names of eligible voters were not inadvertently removed; and (3) implementing HAVA provisional voting and identification requirements and addressing any challenges encountered related to these requirements. The Report also provides information on motor vehicle agency (MVA) officials' characterization of their experiences assisting citizens who apply to register to vote at MVA offices and forwarding voter registration applications to election offices.

The Report analyzed information collected from elections and motor vehicle agency offices in seven states—Arizona, California, Michigan, New York, Texas, Virginia, and Wisconsin. These states take various approaches to administering elections. Within each of the seven states, using population data from the 2000 U.S. Census, two jurisdictions were selected: a local jurisdiction with a large population and a local jurisdiction with a small population. The 14 jurisdictions we selected were Gila and Maricopa Counties, Arizona; Los Angeles and Yolo Counties, California; City of Detroit and Delta Township, Michigan; New York City and Rensselaer County, New York; Bexar and Webb Counties, Texas; Albemarle and Arlington Counties, Virginia; and the cities of Franklin and Madison, Wisconsin.

Information was gathered for the Report in a number of ways. First, relevant laws, state reports, and documents related to the voter registration process in the seven states were reviewed. Second, state and local election officials in the 7 states and 14 jurisdictions

011017

were interviewed to obtain information on their registration processes and implementation of the HAVA requirements for provisional voting and voter identification. Third, a survey was sent to election officials in the 14 jurisdictions to gather information about their experiences with the November 2004 election. Finally, a survey was sent to state and local MVA officials in 6 of the 7 states and 12 of the 14 jurisdictions. The survey primarily asked questions about the MVA offices' experiences with (1) assisting citizens with completing voter registration applications, (2) forwarding the applications to election offices, and (3) responding to individuals and state or local election officials who contacted their offices about individuals who declared they had applied to register to vote at MVA offices but their names were not on voter registration lists when they went to vote in the November 2004 election.

Election officials representing all but one of the jurisdictions surveyed following the November 2004 election said they faced some challenges managing the voter registration process, including (1) receiving voter registration applications; (2) checking them for completeness, accuracy, and duplication; and (3) entering information into voter registration lists; when challenges occurred, election officials reported they took various steps to address them. Officials in 7 of the 14 jurisdictions reported that their staff faced challenges checking voter registration applications for completeness, accuracy, or duplicates. According to these officials, these challenges occurred for a variety of reasons, including problems contacting individuals to obtain complete and accurate information and insufficient staffing to check the applications. They reported that, among other things, their staff addressed these challenges by sending letters or calling applicants to obtain correct information. Finally, 6 of the 14 election officials reported that their staff faced challenges entering or scanning voter information into registration lists for reasons such as the volume of applications received close to Election Day and problems with the scanning equipment. To address these challenges, they reported that more staff were hired and staff worked overtime.

All but 1 of the jurisdictions reported removing names from registration lists during 2004 for various reasons, including that voters requested that their names be removed from the voter registration list; information from the U.S. Postal Service (USPS) showing that voters had moved outside the jurisdiction; felony records received from federal, state, or local governments identifying voters as ineligible due to felony convictions; and death records received from state or local vital statistics offices. When removing names from registration lists, election officials reported that they took various steps to ensure that the names of eligible voters were not inadvertently removed from voter registration lists. These steps included sending letters or postcards to registrants to verify that voters wanted their names removed; matching voters' identifying information with USPS data and sending voters identified by USPS as having moved outside the jurisdiction notices of removal; and matching voter registration records with felony records or death records to confirm it was the same person.

All of the jurisdictions reported that they permitted citizens to cast provisional ballots during the November 2004 election. In addition, 12 of the 14 jurisdictions to which this was applicable reported that they offered certain first-time voters who registered by mail

the opportunity to cast provisional ballots. Election officials in 13 of the 14 jurisdictions reported that 423,149 provisional ballots were cast, and 70 percent (297,662) were counted. Not all provisional votes were counted because, as election officials reported, not all provisional ballots met states' criteria for determining which ballots should be counted. Reasons that provisional ballots cast during the 2004 election were not counted, as reported by election officials, included, among others, that individuals did not meet the residency eligibility requirements, had not registered or tried to register to vote with the election office, had not submitted the voter registration applications at motor vehicle agency offices, or election officials did not have time to enter information from applicants into their voter registration lists because applications were received at the election offices very close to or after the state registration deadline.

Local election officials in 12 of the 13 jurisdictions 13 we surveyed reported that they set up mechanisms to inform voters—without cost—about the outcome of their provisional votes during the November 2004 election. These mechanisms included toll-free telephone numbers, Web sites, and letters sent to the voters who cast provisional ballots. Election officials also reported that provisional voters in their jurisdictions received written information at their polling places about how to find out the outcome of their provisional ballots, and provisional voters in 8 of the 13 jurisdictions had the opportunity to access information about the outcome of their ballots within 10 days after the election. Finally, election officials representing 8 of the 14 jurisdictions reported facing challenges implementing provisional voting for various reasons, including some poll workers not being familiar with provisional voting or, in one jurisdiction representing a large number of precincts, staff not having sufficient time to process provisional ballots. To address these challenges, the officials reported that they provided additional training to poll workers and hired additional staff to count provisional ballots.

## INDIANA ID LITIGATION SUMMARY

### **MEMORANDUM IN SUPPORT OF DEMOCRATS. MOTION FOR SUMMARY JUDGMENT**

Although the proponents of SEA 483 asserted that the law was intended to combat voter fraud, no evidence of the existence of such fraud has ever been provided. No voter has been convicted of or even charged with the offense of misrepresenting his identity for purposes of casting a fraudulent ballot in person, King Dep. 95-96; Mahern Aff. ¶¶ 2-3, though there have been documented instances of absentee ballot fraud. King Dep. 120. Indeed, no evidence of in person, on-site voting fraud was presented to the General Assembly during the legislative process leading up to the enactment of the Photo ID Law. Mahern Aff. ¶¶ 2-

The State cannot show any compelling justification for subjecting only voters who vote in person to the new requirements of the Photo ID Law, while exempting absentee voters who vote by mail or persons who live in state-certified residential facilities. On the other hand, absentee ballots are peculiarly vulnerable to coercion and vote tampering since there is no election official or independent election observer available to ensure that there is no illegal coercion by family members, employers, churches, union officials, nursing home administrators, and others.

The Law gives virtually unbridled discretion to partisan precinct workers and challengers to make subjective determinations such as (a) whether a form of photo identification produced by a voter conforms to what is required by the Law, and (b) whether the voter presenting himself or herself at the polls is in fact the voter depicted in the photo. Robertson Dep. 29-34, 45; King Dep. 86, 89. This is significant because any voter who is challenged under this Law will be required to vote by provisional ballot and to make a special trip to the election board's office in order to have his vote counted. Robertson Dep. 37; King Dep. 58.

The Photo ID Law confers substantial discretion, not on law enforcement officials, but on partisan precinct poll workers and challengers appointed by partisan political officials, to determine both whether a voter has presented a form of identification which conforms to that required by the Law and whether the person presenting the identification is the person depicted on it. Conferring this degree of discretion upon partisan precinct officials and members of election boards to enforce the facially neutral requirements of the Law has the potential for becoming a means of suppressing a particular point of view.

The State arguably might be justified in imposing uniform, narrowly-tailored and not overly-burdensome voter identification requirements if the State were able to show that there is an intolerably high incidence of fraud among voters misidentifying themselves at the polls for the purpose of casting a fraudulent ballot. But here, the State has utterly failed to show that this genre of fraud is rampant or even that it has ever occurred in the context of on-site, in-person voting (as opposed to absentee voting by mail) so as to justify these extra burdens, which will fall disproportionately on the poor and elderly.

In evaluating the breadth of the law and whether the State has used the least restrictive means for preventing fraud, the Court must take into account the other mechanisms the State currently employs to serve the statute's purported purposes, as well as other, less restrictive means it could reasonably employ. *Krislov*, 226 F.3d at 863. The State of Indiana has made it a felony for a voter to misrepresent his or her identity for purposes of casting a fraudulent ballot.

And where the State has already provided a mechanism for matching signatures, has made it a crime to misrepresent one's identity for purposes of voting, and requires the swearing out of an affidavit if the voter's identity is challenged, it already has provisions more than adequate to prevent or minimize fraud in the context of in-person voting, particularly in the absence of any evidence that the problem the Law seeks to address is anything more than the product of hypothesis, speculation and fantasy.

**MEMORANDUM OF THE STATE OF INDIANA, THE INDIANA SECRETARY OF STATE, AND THE CO-DIRECTORS OF THE INDIANA ELECTION DIVISION IN SUPPORT OF THEIR JOINT MOTION FOR SUMMARY JUDGMENT AND IN OPPOSITION TO THE MOTIONS FOR SUMMARY JUDGMENT FILED BY BOTH SETS OF PLAINTIFFS**

In-person voter-identity fraud is notoriously difficult to detect and investigate. In his book *Stealing Elections*, John Fund observes that actual in-person voter fraud is nearly undetectable without a voter photo-identification requirement because anybody who provides a name that is on the rolls may vote and then walk away with no record of the person's actual identity. *See generally* John Fund, *Stealing Elections* (2004). The problem is only exacerbated by the increasingly transient nature of society. Documentation of in-person voter fraud often occurs only when a legitimate voter at the polls hears a fraudulent voter trying to use her name, as happened to a woman in California in 1994. *See* Larry J. Sabato & Glenn R. Simpson, *Dirty Little Secrets* 292 (1996).

Regardless of the lack of extensive evidence of in-person voter fraud, the Commission on Federal Election Reform (known as the Baker-Carter Commission) recently concluded that "there is no doubt that it occurs." State Ex. 1, p. 18. Legal cases as well as newspaper and other reports confirm that in-person voter-identity fraud, including voter impersonation, double votes, dead votes, and fake addresses, plague federal and state elections. [The memorandum details several specific cases of various types of alleged voting fraud from the past several years]

Though they are largely unable to study verifiable data concerning in-person voter fraud, scholars are well aware of the conditions that foster fraudulent voting. *See* Fund, *supra*; Sabato & Simpson, *supra*, 321. In particular, fraud has become ever more likely as "it has become more difficult to keep the voting rolls clean of 'deadwood' voters who have moved or died" because such an environment makes "fraudulent voting easier and therefore more tempting for those so inclined." Sabato & Simpson, *supra*, 321. "In

general, experts believe that one in five names on the rolls in Indiana do not belong there.” State Ex. 25.

For this case, Clark Benson, a nationally recognized expert in the collection and analysis of voter-registration and population data, conducted his own examination of Indiana’s voter registration lists and concluded that they are among the most highly inflated in the nation.

The Crawford Plaintiffs cite the concessions by Indiana Election Division Co-Director King and the Intervenor-State that they are unaware of any historical in-person incidence of voter fraud occurring at the polling place (Crawford Brief, p. 23) as conclusive evidence that in-person voter fraud does not exist in Indiana. They also seek to support this conclusion with the testimony of two “veteran poll watchers,” Plaintiff Crawford and former president of the Plaintiff NAACP, Indianapolis Chapter, Roderick E. Bohannon, who testified that they had never seen any instances of in-person voter fraud.

*(Id.)*

At best, the evidence on this issue is in equipoise. While common sense, the experiences of many other states, and the findings of the Baker-Carter Commission all lead to the reasonable inferences that (a) in-person polling place fraud likely exists, but (b) is nearly impossible to detect without requiring photo identification, the State can cite to no confirmed instances of such fraud. On the other hand, the Plaintiffs have no proof that it does not occur.

At the level of logic, moreover, it is just reasonable to conclude that the lack of confirmed incidents of in-person voting fraud in Indiana is the result of an ineffective identification security system as it is to conclude there is no in-person voting fraud in Indiana. So while it is undisputed that the state has no proof that in-person polling place fraud has occurred in Indiana, there does in fact remain a dispute over the existence *vel non* of in-person polling place fraud.

It is also important to understand that the nature of in-person election fraud is such that it is nearly impossible to detect or investigate. Unless a voter stumbles across someone else trying to use her identity, *see* Sabato & Simpson, *supra*, 292, or unless the over-taxed poll worker happens to notice that the voter’s signature is different from her registration signature State Ext. 37, ¶ 9, the chances of detecting such in-person voter fraud are extremely small. Yet, inflated voter-registration rolls provide ample opportunity for those who wish to commit in-person voter fraud. *See* Fund, *supra*, 24, 65, 69, 138; Sabato & Simpson, *supra*, 321. And there is concrete evidence that the names of dead people have been used to cast fraudulent ballots. *See* Fund, *supra*, 64. Particularly in light of Indiana’s highly inflated voter rolls State Ex. 27, p. 9, Plaintiffs’ repeated claims that there has never been any in-person voter fraud in Indiana can hardly be plausible, even if the state is unable to prove that such fraud has in fact occurred.

Summary of the U.S Department of Justice Section 5 Recommendation Memorandum:  
August 25, 2005 regarding HB 244 – parts that pertain to the issue of voter fraud.

Overview: Five career attorneys with the civil rights department investigated and analyzed Georgia's election reform law. Four of those attorneys recommended objecting to Section 59, the voter identification requirement. The provision required all voters to present government issued photo identification in order to vote. The objection was based on the attorneys' findings that there was little to no evidence of polling place fraud, the only kind of fraud an ID requirement would address, and that the measure would disenfranchise many voters, predominantly minority voters, in violation of Section 5 of the Voting Rights Act.

Factual Analysis: The sponsor of the measure in the state legislature said she was motivated by the fact that she is aware of vote buying in certain districts; she read John Fund's book; and that "if there are fewer black voters because of this bill, it will only be because there is less opportunity for fraud. She said that when black voters in her black precincts are not paid to vote, they do not go to the polls."

A member of the Fulton County Board of Registrations and Elections said that prior to November 2004, Fulton County received 8,112 applications containing "missing or irregular" information. Only 55 of those registrants responded to BOE letters. The member concluded that the rest must be "bogus" as a result. He also stated that 15,237 of 105,553 precinct cards came back as undeliverable, as did 3,071 cards sent to 45,907 new voters. Of these 3,071, 921 voted.

Secretary of State Cathy Cox submitted a letter testifying to the absence of any complaints of voter fraud via impersonation during her tenure.

In the legal analysis, the attorneys state that if they determine that Georgia could have fulfilled its stated purpose of election fraud, while preventing or ameliorating the retrogression, an objection is appropriate. /They conclude that the state could have avoided retrogression by retaining various forms of currently accepted voter ID for which no substantiated security concerns were raised. Another non-retrogressive alternative would have been to maintain the affidavit alternative for those without ID, since "There is no evidence that penalty of law is an insufficient deterrent to falsely signing an affidavit of identity."

The attorneys point out that the state's recitation of a case upholding voter fraud in Dodge County does not support the purpose of the Act because that case involved vote buying and selling, not impersonation or voting under a false identity.

Securing the Vote: An Analysis of Election Fraud, by Lorraine Minnite

Professor Lori Minnite conducted a comprehensive survey and analysis of vote fraud in the United States. The methodology included doing nexis searches for all 50 states and surveying existing research and reports. In addition, Minnite did a more in-depth study of 12 diverse states by doing nexis searches, studying statutory and case law, and conducting interviews with election officials and attorneys general. Finally, the study includes an analysis of a few of the most high profile cases of alleged fraud in the last 10 years, including the Miami mayoral election (1997), Orange County congressional race (1996), and the general election in Missouri (2000). In these cases, Minnite shows that many allegations of fraud do not end up being meritorious.

Minnite finds that available evidence suggests that the incidence of election fraud is minimal and rarely affects election outcomes. Election officials generally do a very good job of protecting against fraud. Conditions that give rise to election fraud have steadily declined over the last century as a result of weakened political parties, strengthened election administration, and improved voting technology. There is little available evidence that election reforms such as the National Voter Registration Act, election day registration, and mail-in voting have resulted in increases in election fraud.

Election fraud appears also to be very rare in the 12 states examined more in-depth. Legal and news records turned up little evidence of significant fraud in these states or any indication that fraud is more than a minor problem. Interviews with state officials further confirmed this impression.

Minnite found that, overall, the absentee mail-in ballot process is the feature most vulnerable to voter fraud. There is not a lot of evidence of absentee ballot fraud but the potential for fraud is greatest in this area because of a lack of uniformly strong security measures in place in all states to prevent fraud.

Minnite suggest several reforms to prevent what voter fraud does take place. These include effective use of new statewide voter registration databases; identification requirements for first time voters who register by mail should be modified to expand the list of acceptable identifying documents; fill important election administration positions with nonpartisan professionals; strengthen enforcement through adequate funding and authority for offices responsible for detecting and prosecuting fraud; and establish Election Day Registration because it usually requires voter identification and authorization in person before a trained election worker, which reduces the opportunity for registration error or fraud.

Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections, People for the American Way, NAACP, Lawyers Committee for Civil Rights

Shattering the Myth is a description and analysis of the complaints and allegations of voting irregularities gathered by the Election Protection program during the 2004 presidential election. Election Protection was an effort involving hundreds of organizations and thousands of citizens to protect the voting rights of Americans across the country. The project included sending thousands of monitors to the polls and hosting a national toll free voters' rights hotline. EP mounted extensive field efforts in 17 states.

Election Protection received more than a thousand complaints of voter suppression or intimidation. Complaints ranged from intimidating experiences at polling places to coordinated suppression tactics. For example:

- Police stationed outside a Cook County, Illinois, polling place were requesting photo ID and telling voters if they had been convicted of a felony that they could not vote.
- In Pima, Arizona, voters at multiple polls were confronted by an individual, wearing a black tee shirt with "US Constitution Enforcer" and a military-style belt that gave the appearance he was armed. He asked voters if they were citizens, accompanied by a cameraman who filmed the encounters.
- There were numerous incidents of intimidation by partisan challengers at predominately low income and minority precincts
- Voters repeatedly complained about misinformation campaigns via flyers or phone calls encouraging them to vote on a day other than November 2, 2004 or of false information regarding their right to vote. In Polk County, Florida, for example, a voter received a call telling her to vote on November 3. Similar complaints were also reported in other counties throughout Florida. In Wisconsin and elsewhere voters received flyers that said:
  - "If you already voted in any election this year, you can't vote in the Presidential Election."
  - "If anybody in your family has ever been found guilty of anything you can't vote in the Presidential Election."
  - "If you violate any of these laws, you can get 10 years in prison and your children will be taken away from you."

There were also numerous reports of poll workers refusing to give voters provisional ballots.

The following is a summary of the types of acts of suppression and intimidation included in the report and a list of the states in which they took place. All instances of irregularities that were more administrative in nature have been omitted:

1. Improper implementation of voter identification rules, especially asking only African Americans for proof of identity: Florida, Ohio, Pennsylvania, Illinois, Missouri, Arkansas, Georgia, Louisiana

2. Individuals at the polls posing as some sort of law enforcement authority and intimidating and harassing voters: Arizona, Missouri
3. Intimidating and harassing challengers at the polls: Ohio, Michigan, Wisconsin, Missouri, Minnesota
4. Deceptive practices and disinformation campaigns, such as the use of flyers with intentional misinformation about voting rights or voting procedures, often directed at minority communities; the use of phone calls giving people misinformation about polling sites and other procedures; and providing verbal misinformation at the polls in a way that appears to have been intentionally misleading: Florida, Pennsylvania, Illinois, Wisconsin, Missouri, North Carolina, Arkansas, Texas
5. Refusal to provide provisional ballots to certain voters: Ohio, Pennsylvania, Illinois, Michigan, Colorado, Missouri, Texas, Georgia, Louisiana
6. Registration applications submitted through third parties that were not processed: Arizona, Michigan, Nevada (registration forms destroyed by Sproul Associates)
7. Improper removal from the voter registration list: Arizona
8. Individuals questioning voters' citizenship: Arizona
9. Police officers at the polls intimidating voters: Illinois, Michigan, Wisconsin, Missouri, North Carolina

The report does not provide corroborating evidence for the allegations it describes. However, especially in the absence of a log of complaints received by the Department of Justice, this report provides a very useful overview of the types of experiences some voters more than likely endured on Election Day in 2004.

Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections, People for the American Way, NAACP, Lawyers Committee for Civil Rights

Shattering the Myth is a description and analysis of the complaints and allegations of voting irregularities gathered by the Election Protection program during the 2004 presidential election.   - "If you violate any of these laws, you can get 10 years in prison and your children will be taken away from you."

There were also numerous reports of poll workers refusing to give voters provisional ballots.

The following is a summary of the types of acts of suppression and intimidation included in the report and a list of the states in which they took place. All instances of irregularities that were more administrative in nature have been omitted:

1. Improper implementation of voter identification rules, especially asking only African Americans for proof of identity: Florida, Ohio, Pennsylvania, Illinois, Missouri, Arkansas, Georgia, Louisiana

2. Individuals at the polls posing as some sort of law enforcement authority and intimidating and harassing voters: Arizona, Missouri
3. Intimidating and harassing challengers at the polls: Ohio, Michigan, Wisconsin, Missouri, Minnesota
4. Deceptive practices and disinformation campaigns, such as the use of flyers with intentional misinformation about voting rights or voting procedures, often directed at minority communities; the use of phone calls giving people misinformation about polling sites and other procedures; and providing verbal misinformation at the polls in a way that appears to have been intentionally misleading: Florida, Pennsylvania, Illinois, Wisconsin, Missouri, North Carolina, Arkansas, Texas
5. Refusal to provide provisional ballots to certain voters: Ohio, Pennsylvania, Illinois, Michigan, Colorado, Missouri, Texas, Georgia, Louisiana
6. Registration applications submitted through third parties that were not processed: Arizona, Michigan, Nevada (registration forms destroyed by Sproul Associates)
7. Improper removal from the voter registration list: Arizona
8. Individuals questioning voters' citizenship: Arizona
9. Police officers at the polls intimidating voters: Illinois, Michigan, Wisconsin, Missouri, North Carolina

The report does not provide corroborating evidence for the allegations it describes. However, especially in the absence of a log of complaints received by the Department of Justice, this report provides a very useful overview of the types of experiences some voters more than likely endured on Election Day in 2004.

## Summary of South Dakota Election Irregularities in 2002 and 2004

### **2002**

In fall 2002, one of South Dakota's Senators, Democrat Tim Johnson, was up for re-election, and was engaged in a very close race with his Republican challenger, John Thune. Both parties were engaged in a massive voter registration effort, and registered over 24,000 new voters in the five months between the June primary and the November election, increasing the number of registered voters in the state from around 452,000 to 476,000.<sup>1</sup>

A month before the election, several counties reported irregularities in some of the voter registration documents they'd received. In response to these reports, South Dakota Attorney General, Mark Barnett, with the state US Attorney and the FBI, launched an investigation.<sup>2</sup> Because of the importance of the race in determining the partisan balance of power in the Senate, the voter registration discrepancies got a good deal of national press, including a number of editorials accusing American Indians of stuffing ballot boxes.<sup>3</sup> The following allegations were also picked up by out-of-state newssources, including Fox News and the Wall Street Journal:

- Supporters of Thune, who lost the election by 524 votes, collected 47 affidavits from poll watchers claiming voting irregularities.
- Allegations were made that three individuals were offered money by Johnson supporters to vote.

Barnett, who was alerted to the affidavits when he read an early media report that referred to them, stated that these allegations were either false or didn't warrant concern. "Most of the stuff that's in those other 47 affidavits are the kind of problems that we see in every election. People parking too close to the polling place with a sign in their window, people shooting their mouths off at the polling place. The kind of things that local election officials generally do a pretty good job of policing."<sup>4</sup> The allegations of voter bribery were false.

Though most of the allegations of fraud that were filed turned out to be false, Attorney General Barnett's investigation did uncover two cases of voter registration fraud:

- The most high-profile case was that of Becky Red Earth-Villeda. Ms. Red Earth-Villeda was hired by the state Democratic party to register voters on the American Indian reservations. She was charged with 19 counts of forgery. No fraudulent voting was associated with Ms. Red Earth-Villeda, nor was there any evidence

that fraudulent voting occurred in the state.<sup>5</sup> All charges were dropped in January 2004, when, in court, it was determined by the state handwriting specialist that Ms. Red Earth-Villeda had not forged the signatures.<sup>6</sup>

- Lyle Nichols. Mr. Nichols was arrested for submitting five forged voter registration cards to his county office. He was working for an organization called the Native American Voter Registration Project, and was paid \$3 for each registration. The five charges were dropped after Mr. Nichols pleaded guilty to possession of a forgery, and was sentenced with 54 days in jail, which is how much time he'd already spent there because of the charges.<sup>7</sup>

## 2004

In October 2004, just before the general election, eight people working for a campus GOP Get-out-the-Vote organization resigned their positions after they were accused of submitting absentee ballot requests that had not been notarized properly. Because many of these ballot requests had already been processed and the ballots themselves had been cast, county auditors decided not to pursue the issue.<sup>8</sup>

Besides this incident, there were no reports of voter registration or voting irregularities in the run-up to the November 2004 election, as there were in 2002.<sup>9</sup> However, as with the primary and special elections in June 2004, there were complaints about voter intimidation from American Indians attempting to vote, as well as difficulties with the adoption of the state's new photo identification regulations (after the 2002 election, the state legislature passed more stringent requirements about the kind of identification voters would need to provide at the polls.)

### Incidents:

**Voter Intimidation:** The Four Directions Committee, an organization dedicated to helping American Indians register to vote and get to the polls, got a temporary restraining order on several Republican supporters who, they alleged, had been setting up video equipment outside of polling places on American Indian reservations and following around American Indians who voted early and recording their license plates.<sup>10</sup>

**Vote Buying:** A Republican election monitor from Virginia, Paul Brenner, claimed that Senator Tom Daschle's campaign was paying people to vote. Local county auditors

Steal this Vote-Dirty Elections and the Rotten History of Democracy in America by Andrew Gumbel

The bulk of the book comprises stories from United States electoral history outside the scope of this project. However, these tales are instructive in showing how far back irregular and illegal voting practices go. Cases include the 1868 New York City elections; the Tilden-Hayes election; the impact of the introduction of the secret ballot; the 1981 consent decree; the 1990 Helms campaign; the 1960 presidential election controversy in Chicago; the rise of the voting machine business, including the introduction of punch card machines; and allegations by Republicans regarding NVRA.

Steal this Vote is heavily slanted in favor of Democrats focuses almost entirely on alleged transgressions by Republican, although at times it does include complaints about Democratic tactics. Gumbel's accusations, if credible, especially in the Bush-Gore election, would have indicated that there were a number of problems in key states in such areas as intimidation, vote counting, and absentee ballots. However, the most glaring problem with the accuracy and veracity of the text is due to its possible biases, lack of specific footnoting, and insufficient and corresponding lack of identification of primary source material, caution is strongly urged with respect to utilizing this book for assessing the amount and types of voter fraud and voter intimidation occurring. ~~Gumbel is either guilty of generally listing sources or interviews without identifying pages or making the interviews public. Because of this, Steal this Vote cannot be used as a credible research tool.~~

The Long Shadow of Jim Crow, People for the American Way and the National Association for the Advancement of Colored People

This report describes the pervasive and repeated practices of voter intimidation and vote suppression that have taken place in very recent years and during contemporary American history. The most recent cases included in the report are the incident in which Florida law enforcement questioned elderly African American voters in Orlando regarding the 2003 mayoral race, which had already been resolved, shortly before the 2004 election; the 2004 Florida felon purge list; the case of South Dakota in 2004 in which Native Americans were improperly and illegally required to show photo identification at the polls or denied the right to vote, and similar improper demands for ID from minorities in other parts of the country; the use of challengers in minority districts in many locations; the challenge to the right of African American students to vote in Texas in 2004; the presence of men looking like law enforcement challenging African American voters at the polls in Philadelphia in 2003; the distribution of flyers in Louisiana and elsewhere in a number of elections over the last few years in minority areas telling them to vote on the wrong day; and the FBI investigation into thousands of Native American voters in South Dakota in 2002, which resulted in no showing of wrongdoing.

The report also points out that, "Over the past two decades, the Republican Party has launched a series of 'ballot security' and 'voter integrity' initiatives which have targeted minority communities. At least three times, these initiatives were successfully challenged in federal courts as illegal attempts to suppress voter participation based on race.

It goes on to describe the numerous instances of voter intimidation and suppression during the 2000 election, the 1990s, the 1980s and back through the civil rights movement of the 1960s, putting current efforts in historical perspective. Describing the chronology of events in this way demonstrates the developing patterns and strategic underpinnings of the tactics used over the last forty years.

## **The New Poll Tax: Republican-Sponsored Ballot-Security Measures are Being Used to Keep Minorities from Voting**

By Laughlin McDonald

McDonald argues that “the discriminatory use of so-called ‘ballot security’ programs” has been a reoccurring scandal since the passage of the Voting Rights Act of 1965. These programs are deceptively presented as preventing voter fraud and thereby furthering good government. However, McDonald states “but far too often they [the ballot security programs] are actually designed to suppress minority voting -- and for nakedly partisan purposes.”

McDonald blames the federal government as well as the states for use of suspect ballot security programs. He cites the implementation of the U.S. Department of Justice’s in “Voting Integrity Initiative” in South Dakota as the worst example of a joint federal-state effort to prevent voter fraud. Alleged voter fraud only in counties with significant Native American populations was targeted. South Dakota Attorney General Mark Barnett “working with the FBI, announced plans to send state and federal agents to question almost 2,000 new Native-American registrants, many of whom were participating in the political process for the first time.” However, statistics show that these efforts only served to increase Native American voter participation. Native Americans “were targeted based on fraud allegations that proved to be grossly exaggerated; at the end of the investigation, only one Native American was even charged with a voting-rules violation.”

McDonald cites several other ballot security efforts that were really disguised attempts at minority voter suppression:

In Pine Bluff, Ark., Democrats accused Republican poll watchers of driving away voters in predominantly black precincts by taking photos of them and demanding identification during pre-election day balloting. Democrats in Michigan charged that a plan by Republicans to station hundreds of “spotters” at heavily Democratic precincts was an effort to intimidate black voters and suppress Democratic turnout. In South Carolina, a lawsuit filed the day before the election alleged that officials in Beaufort County had adopted a new and unauthorized policy allowing them to challenge voters who gave rural route or box numbers for their registration address. According to the complaint, a disproportionate number of those affected by the new rule would be African-American voters who lived in the rural areas of the county.

McDonald is also critical of the Help America Vote Act (HAVA). He states that HAVA “contains other provisions that may enhance the opportunities for harassment and intimidation of minorities through ballot-security programs.” McDonald specifically attacks the photo ID requirement for anyone who registered by mail but has not previously voted. McDonald argues that the ID requirement will suppress minority voting because minorities are less likely than non-minorities to have a photo ID, a photo ID is expensive to obtain and all the alternatives to photo ID present similar obstacles to minority voters. He also argues that there is no evidence that photo ID will combat voter

fraud but it only really provides “another opportunity for aggressive poll officials to single out minority voters and interrogate them.”

McDonald lists some classic past ballot security efforts by the Republicans that have been abused: the 1981 gubernatorial election anti-fraud initiative leading to the well known consent decree prohibiting the Republicans from repeating this, a similar Republican effort in Louisiana in 1986 in Senator John Breaux’s race which again resulted in prohibition by a state court judge, and a similar effort by Republicans in Senator Jesse Helms 1990 reelection. This time the Department of Justice sued the Republican Party and Helm’s reelection committee, resulting in another consent decree prohibiting future ballot security programs without court approval.

McDonald indicates that the crux of the problem is lax enforcement of federal voters rights laws. He states, “there is no record of the purveyors of any ballot-security program being criminally prosecuted by federal authorities for interfering with the right to vote.” The only positive case law McDonald cited was a decision by the United States Court of Appeals for the Eighth Circuit that affirmed “an award of damages ranging from \$500 to \$2,000, payable by individual poll officials to each of seven black voters who had been unlawfully challenged, harassed, denied assistance in voting or purged from the rolls in the town of Crawfordsville [Arkansas].”

McDonald concludes by stating that Congress and the states should adopt “nondiscriminatory, evenly applied measures to ensure the integrity of the ballot.”

## Summary of Election Irregularities in Washington State 2004

The 2004 Washington state gubernatorial election was decided by one of the narrowest margins in American electoral history; 261 votes – less than a millionth of the 2.8 million votes cast statewide - separated the leading candidate, Republican Dino Rossi, from his competitor, Democrat Christine Gregoire. The state law-mandated recount that followed brought the margin down to 42 votes, and the subsequent hand recount ordered by the state Democratic Party gave Gregoire the lead, with 129 more votes than Rossi.

The race was so close that the parties decided to go to court to dispute the tally – the Republicans wanted the election results set aside and to have a revote; the Democrats sought a court-legitimated win. Each side set out into the field to find a way to swing the election in their favor. The trial and accompanying investigation, which lasted through the spring of 2005, revealed a litany of problems with the state's election system:

- The process by which absentee ballots are matched to the voters who requested them led to discrepancies between the number of absentee ballots received and the number of votes counted.<sup>1</sup>
- After the final certification of the election results, King County discovered 96 uncounted absentee ballots, Pierce county found 64, and Spokane County found eight; all had been misplaced following the election, but there was no mechanism for reconciling the number of absentee ballots received with the number counted.<sup>2</sup>
- Hundreds of felons who were ineligible to vote were able to cast ballots because they were not aware that they needed to apply to have their voting rights re-instated.<sup>3</sup>
- The system for verifying the eligibility of voters who had cast provisional ballots was found to be questionable.<sup>4</sup>
- Due to poll worker error, about 100 provisional ballots were improperly cast, and a hundred more were counted, though they were not verified as having been cast by eligible voters.<sup>5</sup>

The trial also revealed that most of these problems were the result of understaffing and human error.<sup>6</sup> In total, 1,678 ballots were proven to have been cast illegally, but none of these votes was subtracted from the candidates' totals because no evidence was produced in court as to how each individual voted.<sup>7</sup> Further, despite the scrutiny that the election

An Evaluation: Voter Registration Elections Board: Wisconsin Audit Report 05-12:  
September 2005

The Joint Legislative Audit Committee of the Wisconsin Legislature required the Wisconsin Audit Report. The Report obviously does not include the 2006 statistics for statewide voter registration as required by HAVA. Wisconsin voter registration is required by statute in only 172 municipalities---those with populations of 5,000 or more. Another 167 smaller municipalities opted to maintain voter registration lists. Currently, 28.9 % of the voting-age population is not required to register before voting.

According to the Report, great variation was found in the implementation of existing voter registration laws. For example, 46 % of municipalities that responded to the survey did not send address verification cards to individuals who registered by mail or at the polls on Election Day in November 2004.

Further, only 85.3 % of survey respondents reported updating their voter registration lists to remove inactive voters, as required by law.

Current voter registration practices were determined to be insufficient to ensure the accuracy of voter registration lists used by poll workers or to prevent ineligible persons from registering to vote. The Report identified 105 instances of voting irregularities in six municipalities, including 98 ineligible felons who may have voted. The names of these individuals were forwarded to appropriate district attorneys for investigation.

Due to concerns about ineligible voting, stemming from the 2004 election, the Joint Legislative Audit Committee requested that voter registration procedures be evaluated. The following was investigated for this Report:

- \* voter registration requirements and the methods by which voters register, including requirements in other states;
- \* the address verification process, including the use of address verification cards to confirm the residency of those who register by mail or at the polls;
- \* procedures and practices for updating voter registration lists; and,
- \* the role of the Elections Board.

Wisconsin allows qualified electors to register in person, by mail, or with a special registration deputy before Election Day, and at the polls on Election Day. In municipalities where registration is required by statute, 20.3 % of Wisconsin voters registered at the polls on Election Day in November 2004. Municipal clerks rely on registrants to affirm their eligibility, including citizenship and age. However, requirements for providing identification or proof of residence vary depending on when an individual registers and by which method.

Address verification cards are the primary tool available to municipal clerks for verifying the residency of registered voters and detecting improper registrations by mail or at the polls. Statutes require that clerks send cards to everyone who registers by mail or on Election Day. However, only 42.7 % of the 150 municipalities surveyed sent cards to both groups, and 46 % did not send any address verification cards.

Statutes also require clerks to provide the local district attorney with the names of any Election Day registrants whose cards are undeliverable at the address provided. However, only 24.3 % of the clerks who sent cards also forwarded names from undeliverable cards to district attorneys. District attorneys surveyed indicated that they require more information than is typically provided to conduct effective investigations.

To ensure that voter registration lists contain only the names of qualified electors, municipal clerks are required by statute to remove or inactivate the names of individuals who have not voted in four years, to update registration information for individuals who move or change their names, and to remove or inactivate the names of deceased individuals. They are also required to notify registered voters before removing their names from registration lists. These statutory requirements are not consistently followed:

- \* 85.3 % of municipalities removed the names of inactive voters from their voter registration lists;
- \* 71.4 % sometimes or always notified registered voters before removing their names; and
- \* 54.0 % reported removing the names of ineligible felons.

Because of such inconsistencies, registration lists contain duplicate records and the names of ineligible individuals. For example, more than 348,000 electronic voter registration records from eight municipalities were reviewed, identifying 3,116 records that appear to show individuals who are registered more than once in the same municipality.

In six municipalities where sufficient information was available, there was 105 instances of potentially improper or fraudulent voting in the 2004 elections. These included: 98 ineligible felons who may have voted; 2 individuals who may have voted twice; 1 voter who may have been underage; and 4 absentee ballots that should not have been counted because the voters who cast them died before Election Day.

#### Recommendations:

- \* adjusting the early registration deadline to provide clerks more time to prepare registration lists;
- \* establishing more stringent requirements for special registration deputies, including prohibiting compensation based on the number of individuals registered;

- \* establishing uniform requirements for demonstrating proof of residence for all registrants;
- \* providing municipal clerks with more flexibility in the use of address verification cards;
- \* Authorizing civil penalties for local election officials and municipalities that fail to comply with election laws; and,
- \* implementing mandatory elections training requirements for municipal clerks.

The Report also recognized that the new HAVA registration procedures would help with existing registration problems.

## Summary of Wisconsin Voting Irregularities November 2004

### *Instances of Illegal Voting, Milwaukee:*

A probe led by U.S. Attorney Steve Biskupic and Milwaukee County District Attorney Michael McCann found about 200 cases of illegal felon voting and at least 100 cases of other forms of illegal voting in the city of Milwaukee. Of these, 14 were prosecuted:

10 were instances of felons voting while on probation or parole:

5 are awaiting trial. (one of them is DeShawn Brooks)<sup>1</sup>

1 has been acquitted<sup>2</sup>

1 has been found guilty in trial (Kimberly Prude)<sup>2</sup>

3 have reached plea agreements (Milo Ocasio<sup>3</sup>)

[names: Ethel M. Anderson, Correan F. Edwards, Jiyto L. Cox, Joseph J. Gooden<sup>4</sup>]

4 were instances of double voting:

1 produced a hung jury (Enrique Sanders)<sup>2</sup>

1 was found incompetent to stand trial and his case was dismissed

1 initially pleaded guilty but now wants a trial.<sup>5</sup>

1 is awaiting trial.

Two of those accused of double voting were driven to multiple polling places in a van, but the identity of the driver of the vehicle is not known, and the DA does not suspect conspiracy.<sup>6</sup>

In addition to these, four people were charged with felonies in the Milwaukee County Circuit Court; two cases were filed against people accused of sending in false registration cards under the auspices of the Association of Community Organizations for Reform Now; the other two were felons who voted illegally.<sup>7</sup>

### *Instances of Illegal Voting, Statewide:*

The Legislative Audit Bureau, a nonpartisan research agency, released its analysis of state-wide 2004 election results in September 2005. The agency reviewed the names, addresses, and birthdates of over 348,000 individuals credited with having voted in November 2004, from the electronic voter registration records of 6 cooperating municipalities, and compared them to lists from the Department of Corrections of felons serving sentences on election day, and to lists from the municipalities (to check up on

<sup>7</sup> Milwaukee J-S. December 5, 2005.

double-voting) and to lists from the US Social Security Administration. LAB's search revealed 105 "questionable" votes:

- 98 ballots cast by ineligible felons, 57 of which were in Madison, 2 in Waukesha, 15 in Eau Claire, 16 in Appleton, 1 in the Village of Ashwaubenon
- 2 instances of double-voting (one in Madison, one in Waukesha).
- 4 votes counted despite the voter's having died two weeks or less before the election.
- 1 case in which a 17-year-old voted in Madison.<sup>8</sup>

The LAB referred the names of these people to the appropriate District Attorney for prosecution, and several cases are awaiting trial.

It should be noted that this study is not a complete survey of election returns state-wide in Wisconsin; the LAB's analysis is based on the voting records of the six municipalities that provided the LAB with sufficient information to conduct this study.

It should also be noted that the LAB discovered significant error in the data provided them by these municipalities, including:

- 91 records in which the individual's birthdate was incorrectly recorded as later than November 2, 1986
- 97 cases in which a person was mistakenly recorded as having voted twice
- More than 15,000 records were missing birthdates, making it more difficult to determine voter eligibility by comparing these records to lists of felons and deceased persons.<sup>9</sup>

### *General Findings*

Both reports (the Legislative Audit Bureau's and the report of the Joint Task Force on Election Reform convened in Milwaukee) that did in-depth studies of the Wisconsin election returns in 2004 found that there was no evidence of systematic, wide-spread fraud.<sup>10</sup> As the above statistics indicate, there are very few cases in which an individual intentionally voted illegally, and the majority of the discovered instances of fraudulent voting involved felons who were unaware that they were committing a crime. Certainly the number of fraudulent votes, intentional and unintentional, is dwarfed by the amount of administrative error – and the amount of potential there was for fraud.

### *Registration Irregularities*

---

<sup>8</sup> Borowski, Greg J. "State audit digs up wider vote problems; Thousands of voters on rolls more than once." *Milwaukee Journal-Sentinel*. September 17, 2005

<sup>9</sup> "An Evaluation: Voter Registration." *Legislative Audit Bureau*. Madison, Wisconsin. September 2005. Pg. 50-52.

<sup>10</sup> Brinkman, Phil. "Voting fraud in November not a problem in Madison; Nearly all suspect voters turn out to be people who moved or made innocent mistakes." *Wisconsin State Journal*. May 11, 2005.

**Duplicate Registrations:** In the data from the six participating municipalities, LAB found 3116 records for individuals who appear to be registered more than once in the same municipality (0.9% of the records they reviewed). These duplications were primarily the result of name changes, in which the registrar neglected to remove the old name from the registration list, previous addresses that were not deleted, and misspellings and other typographical errors.

**Deceased Voters:** the LAB study found 783 persons who were deceased, but whose records had not been eliminated from the registration lists. Most of the municipalities participating in the survey rely on obituaries and notifications from family members to purge their voter registration lists of deceased voters.

**Felons:** Comparing a list of felons from the Department of Corrections to their voter registration data lists, LAB found 453 felons who were registered to vote. This is largely because, although municipal clerks are informed of federal felony convictions, they have no way of obtaining records on state felony convictions.<sup>11</sup>

---

<sup>11</sup> Legislative Audit Bureau Report: pg 43-47.

Preliminary Findings of Joint Task Force Investigating Possible Election Fraud: May 10, 2005

On January 26, 2005, the Milwaukee Police Department, Milwaukee County District Attorney's Office, Federal Bureau of Investigation, and the United States Attorney's Office formed a task force to investigate alleged voting irregularities during the November 2004 elections. The purpose of the task force was to determine whether evidence of criminal fraud existed in the irregularities and, if evidence of fraud was found, to pursue criminal prosecutions.

The task force has made the following specific determinations based on evidence examined to date:

- \* evidence of more than 100 individual instances of suspected double-voting, voting in names of persons who likely did not vote, and/or voting in names believed to be fake. Those investigations continue;
- \* more than 200 felons voted when they were not eligible to do so. In order to establish criminal cases, the government must establish willful violations in individual instances;
- \* persons who had been paid to register voters as "deputy registrars" falsely listed approximately 65 names in order to receive compensation for the registrations. The evidence does not indicate that these particular false registrations were later used to cast votes; and,
- \* the number of votes counted from the City of Milwaukee exceeds the number of persons recorded as voting by more than 4,500.

The investigation concentrated on the 70,000+ same-day registrations. It found that a large majority of the reported errors were the result of data entry errors, such as street address numbers being transposed. However, the investigation also found more than 100 instances where votes were cast in a manner suggesting fraud. These include:

- \* persons with the same name and date of birth recorded as voting more than once;
- \* persons who live outside Milwaukee, but who used non-existent City addresses to register and vote in the City;
- \* persons who registered and voted with identities and addresses that cannot in any way be linked to a real person;
- \* persons listed as voting under a name and identity of a person known to be deceased; and
- \* persons whose identities were used to vote, but who in subsequent interviews told task force investigators that they did not, in fact, vote in the City of Milwaukee.

The investigation found persons who were paid money to obtain registrations allegedly falsified approximately 65 names on registration forms, allegedly to obtain more money for each name submitted. There is no evidence gathered to date that votes were cast under these specific false names. Also found were more than 200 felons who were not eligible to vote in the 2004 election, but who are recorded as having done so.

An additional finding of the task force was that the number of votes cast far exceeds the total number of recorded voters. The day after the 2004 election, the City of Milwaukee reported the total number of votes as 277,344. In late November an additional 191 previously uncounted absentee ballots were added, for a total of 277,535 votes cast. Still later, an additional 30 ballots were added, bringing the total number of counted votes to 277,565. City records, however, have been unable to match this total to a similar number of names of voters who cast ballots – either at the polls (under a prior registration or same day registration) or cast absentee ballots. At present, the records show a total of 272,956 voter names – for a discrepancy of 4,609. This part of the investigation was hampered by widespread record keeping errors with respect to recording the number of voters.

In the 2004 election, same-day registrations were accepted in which the card had incomplete information that would help establish identity. For example: 48 original cards for persons listed as voting had no name; 548 had no address; 28 did not have signatures; and another 23 cards had illegible information. These were part of approximately 1,300 same-day registrations for which votes were cast, but which election officials could not authenticate as proper voters within the City. Included in this 1,300 were 141 same-day registrants from addresses outside the City of Milwaukee, but who voted within the City of Milwaukee. In several instances, the voter explicitly listed municipality names other than Milwaukee on the registration cards.

Another record keeping procedure hampering the investigation appears to be the post-election misfiling or loss of original green registration cards that were considered duplicates, but that in fact corresponded to additional votes. These cards were used to record votes, but approximately 100 cards of interest to investigators can no longer be located. In addition, other original green registration cards continue to be found.

A Funny Thing Happened on the Way to the White House by David E. Johnson & Jonny R. Johnson

A Funny Thing Happened adds almost nothing to the present study. It contains no footnotes and no references to primary source material, save what may be able to be gleaned from the bibliography. The Johnsons take a historical look at United States Presidential elections from Andrew Jackson to George Bush by providing interesting stories and other historical information. Unfortunately, there are only three pages out of the entire book that touches on vote fraud in the first Bush election.

The authors assert that the exit polls in Florida were probably correct. The problem was the pollsters had no way of knowing that thousands of votes would be invalidated. But the authors do not believe that fraud was the cause of the tabulation inaccuracy. The major cause was undervotes and overvotes which, if all counted, would have altered the result, compounded by the use of the butterfly ballot in some strategic counties. Additionally, Ralph Nader's votes were primarily a bleed off of needed Gore votes. The authors accused Katherine Harris, then Florida Secretary of State and co-chair of the Bush campaign in Florida for prematurely certifying the state vote. The authors also ridiculed United States Secretary of State James A. Baker III, for using the courts to block attempts to hand count votes. Finally, the authors indicated that a mob of Republican partisans descended on the vote counters in Dade County and effectively stopped the count.

## Vote Fraud, Intimidation & Suppression In The 2004 Presidential Election

### American Center for Voting Rights Report

According to its website," the American Center For Voting Rights Legislative Fund was founded in February 2005 on the belief that public confidence in our electoral system is the cornerstone of our democracy... ACVR Legislative Fund supports election reform that protects the right of all citizens to participate in the election process free of intimidation, discrimination or harassment and which will make it easy to vote but tough to cheat.

Using court records, police reports and news articles, ACVR Legislative Fund presented this Report documenting hundreds of reported incidents and allegations from around the country. ACVR Legislative Fund found that thousands of Americans were disenfranchised by illegal votes cast on Election Day 2004. For every illegal vote cast and counted on Election Day, a legitimate voter is disenfranchised. This report alleges a coordinated effort by members of some organizations to rig the election system through voter registration fraud, the first step in any vote fraud scheme that corrupts the election process by burying local officials in fraudulent and suspicious registration forms. ACVR Legislative Fund further found that, despite their heated rhetoric, paid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts during the 2004 presidential election.

In addition to recommended changes and a zero-tolerance commitment by the political parties, ACVR Legislative Fund has identified five cities as "hot spots" which require additional immediate attention. These cities were identified based on the findings of this report and the cities' documented history of fraud and intimidation. These cities are: Philadelphia, PA, Milwaukee, WI, Seattle, WA, St. Louis/East St. Louis, MO/IL, and Cleveland, OH.

Without going into great detail in this review, this Report: refutes charges of voter intimidation and suppression made against Republican supporters, discusses similar charges against Democrats, details incidents vote fraud and illegal voting and finally discusses problems with vote fraud, voter registration fraud and election irregularities around the country. The majority of this Report is an attempt to redeem Republicans and vilify Democrats.

In terms of sheer numbers, the report most often alleges voter intimidation and voter registration fraud, and to a lesser degree absentee ballot fraud and vote buying.

The Report presented the following recommendations for future action:

\* Both national political parties should formally adopt a zero-tolerance fraud and intimidation policy that commits the party to pursuing and fully prosecuting individuals and allied organizations who commit vote fraud or who seek to deter any eligible voter from participating in the election through fraud or intimidation. No amount of legislative

reform can effectively deter those who commit acts of fraud if there is no punishment for the crime and these acts continue to be tolerated.

\* States should adopt legislation requiring government-issued photo ID at the polls and for any voter seeking to vote by mail or by absentee ballot. Government-issued photo identification should be readily available to all citizens without cost and provisions made to assure availability of government-issued identification to disabled and low-income citizens.

\* States should adopt legislation requiring that all polling places be fully accessible and accommodating to all voters regardless of race, disability or political persuasion and that polling locations are free of intimidation or harassment.

\* States should create and maintain current and accurate statewide voter registration databases as mandated by the federal Help America Vote Act (“HAVA”) and establish procedures to assure that the statewide voter roll is current and accurate and that the names of eligible voters on the roll are consistent with the voter roll used by local election authorities in conducting the election.

\* States should adopt legislation establishing a 30-day voter registration cutoff to assure that all voter rolls are accurate and that all registrants can cast a regular ballot on Election Day and the election officials have opportunity to establish a current and accurate voter roll without duplicate or fictional names and assure that all eligible voters (including all recently registered voters) are included on the voter roll at their proper precinct.

\* States should adopt legislation requiring voter registration applications to be delivered to the elections office within one week of being completed so that they are processed in a timely manner and to assure the individuals registered by third party organizations are properly included on the voter roll.

\* States should adopt legislation and penalties for groups violating voter registration laws, and provide the list of violations and penalties to all registration solicitors. Legislation should require those organizations obtaining a voter’s registration to deliver that registration to election officials in a timely manner and should impose appropriate penalties upon any individual or organization that obtains an eligible voter’s registration and fails to deliver it to election authorities.

\* States should adopt legislation prohibiting “bounty” payment to voter registration solicitors based on the number of registration cards they collect.

## America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy

### Advancement Project

The thesis of the Report, America's Modern Poll Tax, written after the 2000 election, is that structural disenfranchisement—the effect of breakdowns in the electoral system, is the new poll tax. Structural disenfranchisement includes “bureaucratic blunders, governmental indifference, and flagrant disregard for voting rights.” The blame for structural disenfranchisement is laid squarely at the feet of states and localities that “shirk their responsibilities or otherwise manipulate election systems,” resulting in voters “either turned away from the polls or their votes are thrown out.”

The interlocking practices and mechanics that comprise structural disenfranchisement are referred to as “ballot blockers” in the report. Most ballot blockers involve the structural elements of electoral administration: “ill-trained poll workers, failures to process registration cards on time or at all, inaccurate registration rolls, overbroad purges of voter rolls, unreasonably long lines, inaccurate ballot translations and a shortage of translators to assist voters who have limited English language skills.” The Report argues that a culture of indifference overlays these issues that both tolerates and excuses widespread disenfranchisement. This culture of indifference is exemplified by legislatures that do not properly fund election systems, officials that send antiquated equipment into poor and minority areas, poorly translated ballots and polling places that are not wheelchair accessible.

The data and conclusions in the Report are taken from eight sample case studies of states and cities across the country and a survey of state election directors that reinforces the findings of the case studies. Examples of state and city problems were: New York City—in six polling places Chinese translations inverted the Democrats with the Republicans; Georgia—the state computer crashed two weeks before the election, dropping thousands of voters from the rolls; Virginia—registration problems kept an untold number from voting; Chicago—in inner-city precincts with predominately minority populations, almost four out of every ten votes cast for President (in 2000) were discarded; St. Louis—thousands of qualified voters were placed on inactive lists due to an overbroad purge; Florida—a voting list purge of voters whose name and birth date closely resembled those of people convicted of felonies; and, Texas—significant Jim Crow like barriers to minority voting.

The survey of state election directors found: election directors lack the resources to effectively do their jobs and some lack the “ability or will to force local election officials to fix serious problems”; election officials are highly under funded and legislatures refuse to grant their requests for more money; due to a lack of funds, election officials must use old and inferior equipment and can't improve training or meet structural needs; election officials are generally unaware of racial disparities in voting; only three of the 50 state election administrators are non-white.

The Report “concludes that affected communities and democracy advocates should mobilize to force change.” A number of recommendations are made to protect the

electoral franchise including: Federal policies that set nationwide and uniform election policies; federal guarantee of access to provisional ballots; enforcement of voter disability laws; automatic restoration of voting rights to those convicted of a crime after they have completed their sentence; a centralized data base of voters administered by non-partisan individuals; federal standards limiting precinct discarded vote rates to .25 %; federal requirements that jurisdiction provide voter education, including how to protect their right to vote; and laws that strengthen the ability of individuals to bring actions to enforce voting rights and anti-discrimination laws.

Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General

By The Brennan Center for Justice at NYU School of Law and Dr. Michael McDonald of George Mason University

General

A September 15, 2005 Report submitted to the New Jersey Attorney General included lists of purportedly illegitimate votes in New Jersey in the 2004 general election, including lists of 10,969 individuals who purportedly voted twice and lists of 4,756 voters who were purportedly dead or incarcerated in November 2004. For the present Analysis of the Report, the lists of voters submitted to the New Jersey Attorney General, as well as a copy of the New Jersey county voter registration files were obtained, and an initial investigation of the report's claims was conducted. The analysis shows that the lists submitted are substantially flawed.

The Analysis is based on methodology only: its authors did not gain access to original documents related to registration or original pollbook records; only recently were copies of the counties' original registration data files acquired and compiled, which contain some notable gaps; and the lists submitted to the Attorney General contain significant errors and little documentation, which complicated the analysis. Nonetheless, the analysts say that information collected is sufficient for generally assessing the quality of evidence presented to support the September 15 report. Analysis of the suspect lists reveals that the evidence submitted does not show what it purports to show: cause for concern that there is serious risk of widespread fraud given the state of the New Jersey voter registration rolls.

These suspect lists were compiled by attempting to match the first name, last name, and birth date of persons on county voter registration files. Entries that supposedly "matched" other entries were apparently deemed to represent the same individual, voting twice. This methodology was similar to the method used in compiling the notoriously inaccurate Florida "purge lists" of suspected ineligible felons in 2000 and 2004. As Florida's experience shows, matching names and birth dates in the voter registration context can easily lead to false conclusions – as was almost certainly the case here.

This Analysis reveals several serious problems with the methodology used to compile the suspect lists that compromise the lists' practical value. For example, the data used in the Report from one county appears to be particularly suspect and anomalous, and may have substantially skewed the overall results. In addition, middle initials were ignored throughout all counties, so that "J \_\_\_\_\_ A. Smith" was presumed to be the same person as "J \_\_\_\_\_ G. Smith." Suffixes were also ignored, so that fathers and sons – like "B \_\_\_\_\_ Johnson" and "B \_\_\_\_\_ Johnson, Jr." – were said to be the same person.

Underlying many of the entries on these lists, and similar lists compiled in Florida and elsewhere, is a presumption that two records with the same name and date of birth must

represent the same person. As *explained* in this analysis, this presumption is not consistent with basic statistical principles. Even when votes appear to have been cast in two different cities under the same name and birth date, statistics show that voter fraud is not necessarily to blame. With 3.6 million persons who voted in the 2004 election in New Jersey, the chance that some have the same name and birth date is not far-fetched.

#### Analysis of the Claim of Double Voting by 4,497 Individuals

Attempts to match data on one list to data on another list will often yield “false positives:” two records that at first appear to be a match but do not actually represent the same person. The natural incidence of “false positives” for a matching exercise of this scale – especially when, as here, conducted with relatively little attention to detail – readily explains the ostensible number of double votes.

1,803 of these 4,397 records of ostensibly illegal votes seem to be the product of a glitch in the compilation of the registration files. These records reflect two registration entries by the same person from the same address, with a notation next to each that the individual has voted. For example, 55-year-old W\_\_\_\_\_ A. Connors, living at 253 B\_\_\_\_\_ Ave. in a New York commuter suburb, is listed on the data files with an (erroneous) first registration date in 1901 and a second registration date in 1993; Mr. Connors is thus represented twice on the data files submitted. Each of these entries also indicates that W\_\_\_\_\_ A. Connors at 253 B\_\_\_\_\_ Ave voted in 2004. There is no credible indication, however, that Mr. Connors actually voted twice; indeed, given the clearly erroneous registration date on the files, it is far more likely that data error is to blame for the doubly logged vote as well.

More plausibly, the bulk of these 1,803 records may be traced to irregularities in the data processing and compilation process for one single county: the Middlesex County registration file accounts for only 10% of registered voters in the state but 78% of these alleged double votes. The suspect lists themselves contain an acknowledgment that the problem in Middlesex is probably not fraud: 99% of these Middlesex voters are labeled on the lists submitted to the Attorney General with a notation that the record is “less likely” to indicate an illegal double vote.

Another 1,257 entries of the 4,397 records probably represent similar data errors – also largely driven by a likely glitch in the Middlesex County file, which is also vastly over represented in this category. These records show ever-so-slight variations in records listed with the same date of birth at the same address: for example, the same first and last names, but different middle initials or suffixes (e.g., J\_\_\_\_\_ T. Kearns, Sr., and J\_\_\_\_\_ T. Kearns, Jr., both born the same day and living at the same address; or J\_\_\_\_\_ E. Allen and J\_\_\_\_\_ P. Allen, born the same day and living at the same address).

Approximately 800 of the entries on the list likely represent different people, with different addresses and different middle initials or suffixes. For example, W\_\_\_\_\_ S. Smith, living in a northern New Jersey town, and W\_\_\_\_\_ C. Smith, living in another town two hours away, share the same date of birth but are not the same person. Nor are

T\_\_\_\_\_ Brown, living in a New York commuter suburb, and T\_\_\_\_\_ H. Brown, Jr., living in a small town over an hour west, despite the fact that they also share the same birth date. About three-quarters of the entries in this category reveal data that affirmatively conflict – for example, a middle initial (“W\_\_\_\_\_ S.”) in one case, and a different middle initial (“W\_\_\_\_\_ C.”) in another, listed at different addresses. There is absolutely no good reason to conclude that these individuals are in fact the same, when the available evidence indicates the contrary.

For approximately 200 of the entries in this category, however, less information is available. These entries show a middle initial (“J\_\_\_\_\_ W. Davis”) in one case, and no middle initial (“J\_\_\_\_\_ Davis”) in another – again, at different addresses. The lack of the middle initial is ambiguous: it could mean that one of the J\_\_\_\_\_ Davis in question has no middle name, or it could mean that the middle initial was simply omitted in a particular registration entry. Although these entries involve less conclusive affirmative evidence of a false match than the entries noted above, there is still no good reason to believe that “J\_\_\_\_\_ W. Davis” and “J\_\_\_\_\_ Davis,” at different addresses, represent the same person.

Of the individuals remaining, there are serious concerns with the accuracy of the dates of birth. Seven voters were apparently born in January 1, 1880 – which is most likely a system default for registrations lacking date-of-birth information. For 227 voters, only the month and year of birth are listed: this means only that two voters with the same name were born in the same month and year, an unsurprising coincidence in a state of several million people.

That leaves approximately 289 votes cast under the same name and birth date – like votes cast by “P\_\_\_\_\_ S. Rosen,” born in the middle of the baby boom – but from two different addresses. It may appear strange, but there may be two P\_\_\_\_\_ S. Rosens, born on the same date in 1948 – and such coincidences are surprisingly common. For any one person, the odds of someone else having the same name and birth date is small. But because there are so many voters in New Jersey, a sizable number will have the same name and birth date simply by chance. In a group of just 23 people, it is more likely than not that two will share the same birthday. For 40 people, the probability is 90%. Many, if not most, of the 289 alleged double votes of persons registered at different addresses most likely reflect two separate individuals sharing a first name, last name, middle initial, and birth date.

The September 15 Report makes much of the raw potential for foul play based on the unsurprising fact that there are voters who appear on the New Jersey registration rolls more than once. As noted above, many of the names identified reflect two different individuals and not simply duplicate entries. But there is no doubt that there are duplicate entries on New Jersey’s registration rolls. It is well known that voter registration rolls contain “deadwood” – registration entries for individuals no longer living at a given address or deceased. There is no evidence, however, that these extra registrations are used for widespread illegal voting. Moreover, the problem of deadwood will soon be largely resolved: both the National Voter Registration Act of 1993 and the Help America

Vote Act of 2002 require states to implement several systems and procedures as of January 1, 2006, that will clean the voter rolls of duplicate or invalid entries while protecting eligible voters from unintended disfranchisement.

Building Confidence in U.S. Election, National Commission on Federal Election Reform  
("Carter/Baker Commission)

The impetus for the Carter-Baker Commission and its report was the sense of the members that not enough had been done to reform the system since the 2000 election and that Americans had lost confidence in elections. The report makes several observations about the current system and makes 87 recommendations. Several of those recommendations are meant to be implemented in conjunction with one another in order to be effective, so the report is really a push for a comprehensive overhaul of the system as it works today.

Among the observations made that are relevant to the EAC study of fraud and intimidation are the following:

- The November 2004 elections showed that irregularities and fraud still occur.
- Failure to provide voters with such basic information as their registration status and their polling site location raises a barrier to voting as significant as inconsistent procedures on provisional ballots or voter ID requirements.
- There is no evidence of extensive fraud in U.S. elections or of multiple voting, but both occur, and it could affect the outcome of a close election.
- The Commission is concerned that the different approaches to identification cards might prove to be a serious impediment to voting.
- Voter registration lists are often inflated by the inclusion of citizens who have moved out of state but remain on the lists. Moreover, under the National Voter Registration Act, names are often added to the list, but counties and municipalities often do not delete the names of those who moved. Inflated voter lists are also caused by phony registrations and efforts to register individuals who are ineligible. At the same time, inaccurate purges of voter lists have removed citizens who are eligible and are properly registered.
- Political party and nonpartisan voter registration drives generally contribute to the electoral process by generating interest in upcoming elections and expanding participation. However, they are occasionally abused. There were reports in 2004 that some party activists failed to deliver voter registration forms of citizens who expressed a preference for the opposing party.
- Vote by mail raises concerns about privacy, as citizens voting at home may come under pressure to vote for certain candidates, and it increases the risk of fraud.
- While election fraud is difficult to measure, it occurs. The U.S. Department of Justice has launched more than 180 investigations into election fraud since October 2002. These investigations have resulted in charges for multiple voting, providing false information on their felon status, and other offenses against 89 individuals and in convictions of 52 individuals. The convictions related to a variety of election fraud offenses, from vote buying to submitting false voter registration information and voting-related offenses by non-citizens. In addition to the federal investigations, state attorneys general and local prosecutors handle cases of election fraud. Other cases are never pursued because of the difficulty in

obtaining sufficient evidence for prosecution or because of the low priority given to election fraud cases.

- Absentee ballots remain the largest source of potential voter fraud
- Non-citizens have registered to vote in several recent elections
- The growth of "third-party" (unofficial) voter registration drives in recent elections has led to a rise in reports of voter registration fraud.
- Many states allow the representatives of candidates or political parties to challenge a person's eligibility to register or vote or to challenge an inaccurate name on a voter roll. This practice of challenges may contribute to ballot integrity, but it can have the effect of intimidating eligible voters, preventing them from casting their ballot, or otherwise disrupting the voting process.

Its pertinent recommendations for reform are as follows:

- Interoperable state voter databases are needed to facilitate updates in the registration of voters who move to another state and to eliminate duplicate registrations, which are a source of potential fraud.
- Voters should be informed of their right to cast a provisional ballot if their name does not appear on the voter roll, or if an election official asserts that the individual is not eligible to vote, but States should take additional and effective steps to inform voters as to the location of their precinct
- The Commission recommends that states use "REAL ID" cards for voting purposes.
- To verify the identity of voters who cast absentee ballots, the voter's signature on the absentee ballot can be matched with a digitized version of the signature that the election administrator maintains. While such signature matches are usually done, they should be done consistently in all cases, so that election officials can verify the identity of every new registrant who casts an absentee ballot.
- Each state needs to audit its voter registration files to determine the extent to which they are accurate (with correct and current information on individuals), complete (including all eligible voters), valid (excluding ineligible voters), and secure (with protections against unauthorized use). This can be done by matching voter files with records in other state agency databases in a regular and timely manner, contacting individuals when the matches are inconclusive, and conducting survey research to estimate the number of voters who believe they are registered but who are not in fact listed in the voter files.
- Each state should oversee political party and nonpartisan voter registration drives to ensure that they operate effectively, that registration forms are delivered promptly to election officials, that all completed registration forms are delivered to the election officials, and that none are "culled" and omitted according to the registrant's partisan affiliation. Measures should also be adopted to track and hold accountable those who are engaged in submitting fraudulent voter registrations. Such oversight might consist of training activists who conduct voter registration drives and tracking voter registration forms to make sure they are all accounted for. In addition, states should apply a criminal penalty to any activist who deliberately fails to deliver a completed voter registration form.

- Investigation and prosecution of election fraud should include those acts committed by individuals, including election officials, poll workers, volunteers, challengers or other nonvoters associated with the administration of elections, and not just fraud by voters.
- In July of even-numbered years, the U.S. Department of Justice should issue a public report on its investigations of election fraud. This report should specify the numbers of allegations made, matters investigated, cases prosecuted, and individuals convicted for various crimes. Each state's attorney general and each local prosecutor should issue a similar report.
- The U.S. Department of Justice's Office of Public Integrity should increase its staff to investigate and prosecute election-related fraud.
- In addition to the penalties set by the Voting Rights Act, it should be a federal felony for any individual, group of individuals, or organization to engage in any act of violence, property destruction (of more than \$500 value), or threatened act of violence that is intended to deny any individual his or her lawful right to vote or to participate in a federal election.
- To deter systemic efforts to deceive or intimidate voters, the Commission recommends federal legislation to prohibit any individual or group from deliberately providing the public with incorrect information about election procedures for the purpose of preventing voters from going to the polls.
- States should define clear procedures for challenges, which should mainly be raised and resolved before the deadline for voter registration. After that, challengers will need to defend their late actions. On Election Day, they should direct their concerns to poll workers, not to voters directly, and should in no way interfere with the smooth operation of the polling station.
- State and local jurisdictions should prohibit a person from handling absentee ballots other than the voter, an acknowledged family member, the U.S. Postal Service or other legitimate shipper, or election officials. The practice in some states of allowing candidates or party workers to pick up and deliver absentee ballots should be eliminated.
- All states should consider passing legislation that attempts to minimize the fraud that has resulted from "payment by the piece" to anyone in exchange for their efforts in voter registration, absentee ballot, or signature collection.
- Nonpartisan structures of election administration are very important, and election administrators should be neutral, professional, and impartial.
- No matter what institutions are responsible for conducting elections, conflict-of-interest standards should be introduced for all federal, state, and local election officials. Election officials should be prohibited by federal and/or state laws from serving on any political campaign committee, making any public comments in support of a candidate, taking a public position on any ballot measure, soliciting campaign funds, or otherwise campaigning for or against a candidate for public office. A decision by a secretary of state to serve as co-chair of his or her party's presidential election committee would clearly violate these standards.

## Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – Or Both?

By Chandler Davidson

As the author describes it, this Report focuses on vote suppression through “ballot security programs:”

These are programs that, in the name of protecting against vote fraud, almost exclusively target heavily black, Latino, or Indian voting precincts and have the intent or effect of discouraging or preventing voters in those precincts from casting a ballot. In some cases, these programs have been found by courts to be illegal. Still, they continue to exist in spite of strong criticism by leaders of minority communities, their allies, and voting rights lawyers.

There are several noteworthy characteristics of these programs. They focus on minority precincts almost exclusively. There is often only the flimsiest evidence that vote fraud is likely to be perpetrated in such precincts. In addition to encouraging the presence of sometimes intimidating Republican poll watchers or challengers who may slow down voting lines and embarrass potential voters by asking them humiliating questions, these programs have sometimes posted people in official-looking uniforms with badges and side arms who question voters about their citizenship or their registration. In addition, warning signs may be posted near the polls, or radio ads may be targeted to minority listeners containing dire threats of prison terms for people who are not properly registered—messages that seem designed to put minority voters on the defensive. Sometimes false information about voting qualifications is sent to minority voters through the mail.”

He further states that a most common theme of the programs over the last 50 years is that of sending white challengers to minority precincts. He says that the tactic of doing mailings, collecting returned materials, and using that as a basis for creating challenger lists and challenging voters at the polls, started in the 1950s and continues to today. The problem with this practice is that reasons for a mailing to be returned include a wrong address, out of date or inaccurate addresses, poor mail delivery in minority areas, and matching mistakes. Davidson also sets out to demonstrate through documentary evidence that the practices have been and are approved of or winked at by high ups in the party.

Davidson goes on to provide numerous examples from the last 50 years to demonstrate his thesis, going through the historical development of Republican ballot security programs from the 1950s through to the present. The author cites and quotes internal Republican letters and memoranda, primary sources and original documents, media

reports, scholarly works, as well as the words of judges' rulings in some of the cases that ended up in litigation to prove his argument.

In addition to describing how the schemes really were brought to the fore in the 1964 election, he describes more recent incidents such as 1981 in New Jersey, 1982 Dallas, Louisiana 1986, Houston 1986, Hidalgo 1988 Orange County 1988, North Carolina 1990, South Carolina 1980-1990, and South Dakota 2002. (Summaries of these examples are available)

Davidson concludes with an outline of some of the features of vote suppression efforts put forth by Republicans under the guise of ballot security programs, as described in the Report, from the 1950s to the present day:

1. An organized, often widely publicized effort to field poll watchers in what Republicans call "heavily Democratic," but what are usually minority, precincts;
2. Stated concerns about vote fraud in these precincts, which are occasionally justified but often are not;
3. Misinformation and fear campaigns directed at these same precincts, spread by radio, posted signs in the neighborhoods, newspapers, fliers, and phone calls, which are often anonymously perpetrated;
4. Posting "official-looking" personnel at polling places, including but not limited to off-duty police—sometimes in uniform, sometimes armed;
5. Aggressive face-to-face challenging techniques at the polls that can confuse, humiliate, and intimidate—as well as slow the voting process—in these same minority precincts;
6. Challenging voters using inaccurate, unofficial lists of registrants derived from "do-not-forward" letters sent to low-income and minority neighborhoods;
7. Photographing, tape recording, or videotaping voters; and
8. Employing language and metaphors that trade on stereotypes of minority voters as venal and credulous.

The report ends with some observations on the state of research on the incidence of fraud, which the author finds lacking. He suggests that vote suppression of qualified minority voters by officials and partisan poll-watchers, challengers, and uniformed guards should also be considered as included in any definition of election fraud. Davidson also offers a few recommendations for reform, noting that Democrats should not protest all programs aimed at ballot integrity, but rather work with Republicans to find solutions to problems that confront both parties and the system as a whole.

## A 'Crazy-Quilt' of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law

By Alec Ewald

"A Crazy-Quilt of Tiny Pieces" presents results from the first nationwide study to document the implementation of American felony disenfranchisement law. Data came from two main sources: a 33-state survey of state elections officials and telephone interviews with almost one hundred city, county, town, and parish officials drawn from 10 selected states. In the spring of 2004, a two-page survey consisting of questions regarding disqualification and restoration procedures was sent to the offices of the statewide elections director in each of the fifty states. Responses were collected through the summer and early fall of 2004. Thirty-three states responded. No state currently administers and enforces its criminal disqualification and restoration laws in an efficient, universally-understood and equitable way. Some do not appear to notify local elections officials of convictions, or do not do so in a clear and timely way; others risk "false positives" in disqualification, particularly with suspended sentences or offenses not subject to disenfranchisement; many ask local officials to handle disqualification and restoration with little or no guidance or supervision from the state; none have clear policies regarding new arrivals from other states with old convictions.

The report reaches seven major conclusions:

1. Broad variation and misunderstanding in interpretation and enforcement of voting laws:
  - More than one-third (37%) of local officials interviewed in ten states either described their state's fundamental eligibility law incorrectly, or stated that they did not know a central aspect of that law.
  - Local registrars differ in their knowledge of basic eligibility law, often within the same state. Differences also emerge in how they are notified of criminal convictions, what process they use to suspend, cancel, or "purge" voters from the rolls, whether particular documents are required to restore a voter to eligibility, and whether they have information about the criminal background of new arrivals to the state.
2. Misdemeanants disenfranchised in at least five states:
  - The commonly-used term "felon disenfranchisement" is not entirely accurate, since at least five states -- Colorado, Illinois, Michigan, South Carolina, and Maryland -- also formally bar some or all people convicted of misdemeanors from voting.
  - It is likely that misdemeanants in other states who do retain the formal right to vote could have difficulty exercising that right, given ignorance of their eligibility and the lack of clear rules and procedures for absentee voting by people in jail who have not been convicted of a felony.
  - Maryland excludes persons convicted of many misdemeanors, such as "Unlawful operation of vending machines," "Misrepresentation of tobacco leaf weight," and "Racing horse under false name."
3. Significant ambiguities in voting laws:
  - Disenfranchisement in Tennessee is dependent on which of five different time periods a felony conviction occurred between 1973 and the present.
  - In Oregon, disenfranchisement is determined not by conviction or imprisonment for a felony, but for being placed under Department of Corrections supervision. Since 1997, some persons

convicted of a felony and sentenced to less than 12 months' custody have been sent to county jails and hence, are eligible to vote.

4. Disenfranchisement results in contradictory policies within states:

- The "crazy-quilt" pattern of disenfranchisement laws exists even within states. Alabama and Mississippi have both the most and least restrictive laws in the country, a result which is brought about by the fact that certain felonies result in the loss of voting rights for life, while others at least theoretically permit people in prison to vote.
- Most felonies in Alabama result in permanent disenfranchisement, but drug and DUI offenses have been determined to not involve the "moral turpitude" that triggers the loss of voting rights.
- In Mississippi, ten felonies result in disenfranchisement, but do not include such common offenses as burglary and drug crimes.

5. Confusing policies lead to the exclusion of legal voters and the inclusion of illegal voters:

- The complexity of state disenfranchisement policies results in frequent misidentification of voter eligibility, largely because officials differ in their knowledge and application of disqualification and restoration law and procedures.

6. Significant variation and uncertainty in how states respond to persons with a felony conviction from other states:

- No state has a systematic mechanism in place to address the immigration of persons with a felony conviction, and there is no consensus among indefinite-disenfranchisement states on whether the disqualification is properly confined to the state of conviction, or should be considered in the new state of residence.
- Interpretation and enforcement of this part of disenfranchisement law varies not only across state lines, but also from one county to another within states. Local officials have no way of knowing about convictions in other states, and many are unsure what they would do if a would-be voter acknowledged an old conviction. Because there is no prospect of a national voter roll, this situation will continue even after full HAVA implementation.

7. Disenfranchisement is a time-consuming, expensive practice:

- Enforcement requires elections officials to gather records from different agencies and bureaucracies, including state and federal courts, Departments of Corrections, Probation and Parole, the state Board of Elections, the state police, and other counties' elections offices.

#### Policy Implications

1. Policies disenfranchising people living in the community on probation or parole, or who have completed a sentence are particularly difficult to enforce:

- States which disenfranchise only persons who are currently incarcerated appear able to enforce their laws more consistently than those barring non-incarcerated citizens from voting.

2. Given large-scale misunderstanding of disenfranchisement law, many eligible persons incorrectly believe they cannot vote, or have been misinformed by election officials:

- More than one-third of election officials interviewed incorrectly described their state's law on voting eligibility.
- More than 85% of the officials who misidentified their state's law either did not know the eligibility standard or specified that the law was more restrictive than was actually the case.

3. Occasional violation of disenfranchisement law by non-incarcerated voters not surprising:

- Given the complexity of state laws and the number of state officials who lack an understanding of restoration and disqualification procedures, it should come as no surprise that many voters are ignorant of their voting status, a fact that is likely to have resulted in hundreds of persons with a felony conviction registering and voting illegally in recent years.

4. Taken together, these findings undermine the most prominent rationale for disenfranchisement: that the policy reflects a strong, clear consensus that persons with a felony conviction are unfit to vote and constitute a threat to the polity:

- First, when significant numbers of the people who administer elections do not know important aspects of disenfranchisement law, it is hard to conclude that the restriction is necessary to protect social order and the “purity” of the ballot box.
- Second, because they are all but invisible in the sentencing process, “collateral” sanctions like disenfranchisement simply cannot accomplish the denunciatory, expressive purposes their supporters claim. We now know that disenfranchisement is not entirely “visible” even to the people running American elections.
- Third, deep uncertainty regarding the voting rights of people with felony convictions who move from one state to another indicates that we do not even know what purpose disenfranchisement is supposed to serve – whether it is meant to be a punishment, or simply a non-penal regulation of the franchise.

#### Recommendations

1. Clarify Policies Regarding Out-of-State Convictions:

- State officials should clarify their policies and incorporate into training programs the means by which a felony conviction in another state affects an applicant’s voting eligibility. For example, sentence-only disenfranchisement states should clarify that newcomers with old felony convictions from indefinite disenfranchisement states are eligible to vote. And those states which bar some people from voting even after their sentences are completed must clarify whether new arrivals with old felony convictions from sentence-only disenfranchisement states are automatically eligible, and must explain what procedures, if any, should be followed for restoration.

2. Train Election Officials:

- Clarify disenfranchisement policies and procedures for all state and local election officials through development of materials and training programs in each state. At a minimum, this should include distribution of posters, brochures and FAQ sheets to local and state elections offices.

3. Train Criminal Justice Officials:

- Provide training on disqualification and restoration policies for all correctional and criminal justice officials, particularly probation and parole staff. Correctional and criminal justice officials should also be actively engaged in describing these policies to persons under criminal justice supervision.

4. Review Voting Restrictions on Non-Incarcerated People:

- Given the serious practical difficulty of enforcing laws disqualifying people who are not incarcerated from voting – problems which clearly include both excluding eligible people from voting and allowing those who should be ineligible to vote -- state policymakers should review such policies to determine if they serve a useful public purpose.

Deliver the Vote: A History of Election Fraud, An American Political Tradition---1742-2004

by Tracy Campbell.

In Deliver the Vote, Campbell traces the historical persistence of voter fraud from colonial times through the 2004 Bush-Kerry election. From the textual information, it quickly becomes obvious that voter fraud was not limited to certain types of people or to certain political parties. Major American political figures fail to emerge unscathed. For instance, before independence, George Washington plied potential voters with drink as payment for their vote. This type of early vote buying succeeded in electing Washington to the Virginia Assembly over a heavily favored candidate. Both the Democrat and Republican Parties also participated in vote fraud. Finally, there were several regions of the country known for fraudulent voting problems such as Chicago, St. Louis, Texas, and Kentucky, especially Louisville.

Germane to the voter fraud project, Campbell indicates that in the Bush-Gore election, both camps committed major errors. Campbell contends that the central problem in that election was the 175,000 invalidated votes. It is evident that Florida was procedurally unprepared to deal with the voluminous questions that arose in determining valid from invalid votes. Campbell glosses over the Bush-Kerry election but does note from one who opposed Kerry, that there was something amiss with the Ohio final vote tally. This book is well researched and provided numerous citations to source material.

Democracy At Risk: The November 2004 Election in Ohio  
Democratic National Committee

In December 2004, the DNC announced a comprehensive investigative study and analysis of election administration issues arising from the conduct of the 2004 general election in Ohio. The DNC decided to undertake this study because of the many reports, made to the Democratic Party, appearing in the press and made to advocacy groups, immediately after the election, of problems in the administration of the election in that state—problems that prevented many Ohio citizens who showed up at the polls to be able to vote and to have their vote counted. This study was intended to address the legitimate questions and concerns that have been raised and to develop factual information that would be important and useful in crafting further necessary election reforms.

**Most Pertinent Findings**

- Overall, 28 percent of Ohio voters reported problems with their voting experience, including ballot problems, locating their proper polling place and/or intimidation.
- Twice as many African American voters as white voters reported experiencing problems at the polls (52 percent vs. 25 percent).
- Scarcity of voting machines caused long lines that deterred many people from voting. Three percent of voters who went to the polls left their polling places and did not return due to the long lines.
- Statewide, African American voters reported waiting an average of 52 minutes before voting while white voters reported waiting an average of 18 minutes.
- Overall, 20 percent of white Ohio voters reported waiting more than twenty minutes, while 44 percent of African American voters reported doing so.
- Of provisional voters in Cuyahoga County, 35 percent were African American, compared to 25 percent of non-provisional voters, matched by geography. African American voters were 1.2 times more likely than white voters to be required to vote provisionally.
- Under Ohio law, the only voters who should have been asked for identification were those voting in their first Federal election who had registered by mail but did **not** provide identification in their registration application. Although only 7 percent of all Ohio voters were newly registered (and only a small percentage of those voters registered by mail and failed to provide identification in their registration application), more than one third (37 percent) reported being asked to provide identification.—meaning large numbers of voters were illegally required to produce identification.
- African American voters statewide were 47 percent more likely to be required to show identification than white voters. Indeed, 61 percent of

African American men reported being asked to provide identification at the polls.

- 6 percent of all voters reported feelings of intimidation.
- Statewide, 16 percent of African Americans reported experiencing intimidation versus only 5 percent of white voters.

The report also includes a useful summary and description of the reports that came through Ohio Election Protection on Election Day, which included a wide variety of problems, including voter intimidation and discrimination.

### **Most Pertinent Recommendations**

- States should be encouraged to codify into law all required election practices, including requirements for the adequate training of official poll workers.
- States should adopt uniform and clear published standards for the distribution of voting equipment and the assignment of official pollworkers among precincts, to ensure adequate and nondiscriminatory access. These standards should be based on set ratios of numbers of machines and pollworkers per number of voters expected to turn out, and should be made available for public comment before being adopting.
- States should adopt legislation to make clear and uniform the rules on voter registration.
- States should be urged to implement statewide voter lists in accordance with the Help America Vote Act (“HAVA”), the election reform law enacted by Congress in 2002 following the Florida debacle.
- State and local jurisdictions should adopt clear and uniform rules on the use of, and the counting of, provisional ballots, and distribute them for public comment well in advance of each election day.
- States should not adopt requirements that voters show identification at the polls, beyond those already required by federal law (requiring that identification be shown only by first time voters who did not show identification when registering.)
- State Attorneys General and local authorities should vigorously enforce, to the full extent permitted by state law, a voter’s right to vote without showing identification.
- States should make voter suppression a criminal offense at the state level, in all states.
- States should improve the training of pollworkers.
- States should expend significantly more resources in educating voters on where, when and how to vote.
- Partisan officials who volunteer to work for a candidate should not oversee or administer any elections.

## DOJ Public Integrity Reports 2002, 2003, and 2004

### General Background

The Public Integrity Reports are submitted to Congress pursuant to the Ethics in Government Act of 1978, which requires the Attorney General to report annually to Congress on the operations and activities of the Justice Department's Public Integrity Section. The Report describes the activities of the Public Integrity Section. It also provides statistics on the nationwide federal effort against public corruption. The Public Integrity Section was created in 1976 in order to consolidate in one unit of the Criminal Division the Department's oversight responsibilities for the prosecution of criminal abuses of the public trust by government officials. Section attorneys prosecute selected cases involving federal, state, or local officials, and also provide advice and assistance to prosecutors and agents in the field regarding the handling of public corruption cases. In addition, the Section serves as the Justice Department's center for handling various issues that arise regarding public corruption statutes and cases. An Election Crimes Branch was created within the Section in 1980 to supervise the Department's nationwide response to election crimes, such as ballot fraud and campaign financing offenses. The Branch reviews all major election crime investigations throughout the country and all proposed criminal charges relating to election crime.

One of the Section's law enforcement priorities is its supervision of the Justice Department's nationwide response to election crimes. The purpose of Headquarters' oversight of election crime matters is to ensure that the Department's nationwide response to election crime is uniform, impartial, and effective. An Election Crimes Branch, headed by a Director and staffed by Section attorneys on a case-by-case basis, was created within the Section in 1980 to handle this supervisory responsibility.

The Election Crimes Branch oversees the Department's handling of all election crime allegations other than those involving civil rights violations, which are supervised by the Voting Section of the Civil Rights Division. Specifically, the Branch supervises four types of corruption cases: crimes that involve the voting process, crimes involving the financing of federal election campaigns, crimes relating to political shakedowns and other patronage abuses, and illegal lobbying with appropriated funds. Vote frauds and campaign-financing offenses are the most significant and also the most common types of election crimes.

### Divisions of the Election Crimes Branch

As affecting the present EAC study, the appropriate divisions of the Election Crimes Branch are:

Vote frauds-During 2002 the Branch assisted United States Attorneys' Offices in Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nevada, North Carolina, Rhode Island, South Carolina, South Dakota, Texas, Utah, West Virginia, and

Wisconsin in handling vote fraud matters that occurred in their respective districts. This assistance included providing expertise in the evaluation of allegations to determine whether investigation would produce prosecutable federal criminal cases, helping to structure investigations, providing legal assistance with respect to the formulation of charges, and assisting in establishing task force teams of federal and state law enforcement officials to investigate vote fraud matters.

During 2003 the Branch assisted United States Attorneys' Offices in Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Jersey, Nevada, North Carolina, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Virgin Islands, West Virginia, and Wisconsin in handling vote fraud matters that occurred in their respective districts. This assistance included providing expertise in the evaluation of allegations to determine whether investigation would produce prosecutable federal criminal cases, helping to structure investigations, providing legal assistance with respect to the formulation of charges, and assisting in establishing task force teams of federal and state law enforcement officials to investigate vote fraud matters.

During 2004 the Branch assisted United States Attorneys' Offices in the following states in the handling of vote fraud matters that occurred in their respective districts: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New Mexico, Nevada, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, South Carolina, South Dakota, Texas, Utah, Virginia, West Virginia, Washington, and Wisconsin. This assistance included evaluating vote fraud allegations to determine whether investigation would produce a prosecutable federal criminal case, helping to structure investigations, providing legal advice concerning the formulation of charges, and assisting in establishing several task force teams of federal and state law enforcement officials to investigate vote fraud matters.

Litigation-The Branch Director or Section attorneys also prosecute selected election crimes, either by assuming total operational responsibility for the case or by handling the case jointly with a United States Attorney's Office. The Section also may be asked to supervise the handling of a case in the event of a partial recusal of the local office. For example, in 2002 the Branch continued to supervise the prosecution of a sheriff and his election attorney for using data from the National Crime Information Center regarding voters' criminal histories to wage an election contest.

District Election Officer Program-The Branch also assists in implementing the Department's long-standing District Election Officer (DEO) Program. This Program is designed to ensure that each of the 93 United States Attorneys' Offices has a trained prosecutor available to oversee the handling of election crime matters within the district and to coordinate district responses with Headquarters regarding these matters. The DEO Program involves the appointment of an Assistant United States Attorney in each federal district to serve a two-year term as a District Election Officer; the training of these

prosecutors in the investigation and prosecution of election crimes; and the coordination of election-related initiatives and other law enforcement activities between Headquarters and the field. In addition, the DEO Program is a crucial feature of the Department's nationwide Election Day Program, which occurs in connection with the federal general elections held in November of even-numbered years. The Election Day Program ensures that federal prosecutors and investigators are available both at the Department's Headquarters in Washington and in each district to receive and handle complaints of election irregularities from the public while the polls are open and that the public is aware of how these individuals can be contacted on election day. In 2002 the Department enhanced the DEO Program by establishing a Ballot Integrity Initiative.

Ballot Integrity Initiative-Beginning in September of 2002, the Public Integrity Section, acting at the request of the Attorney General, assisted in the implementation of a Ballot Integrity Initiative for the 2002 general election and subsequent elections. This initiative included increasing the law enforcement priority the Department gives to election crimes; holding a special day-long training event in Washington, DC for representatives of the 93 United States Attorneys' Offices; publicizing the identities and telephone numbers of the DEOs through press releases issued shortly before the November elections; and requiring the 93 U.S. Attorneys to communicate the enhanced federal prioritization of election crime matters to state and local election and law enforcement authorities. As part of Ballot Integrity Initiative, on October 8, 2002, the Public Integrity Section and the Voting Rights Section of the Department's Civil Rights Division co-sponsored a Voting Integrity Symposium for District Election Officers representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes used to prosecute such cases. Attorney General John Ashcroft delivered the keynote address on the importance of election crime and ballot integrity enforcement. Assistant Attorney General of the Civil Rights Division Ralph Boyd and Assistant Attorney General of the Criminal Division Michael Chertoff also spoke to attendees on the protection of voting rights and the prosecution of election cases.

As part of Ballot Access and Voting Integrity Initiative, on September 23 and 24, 2003, the Public Integrity Section and the Voting Rights Section of the Department's Civil Rights Division co-sponsored a two-day Symposium for DEOs representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes used to prosecute such cases. Assistant Attorney General of the Civil Rights Division Alexander Acosta and Assistant Attorney General of the Criminal Division Christopher A. Wray delivered the keynote addresses on the importance of protecting voting rights and the prosecution of election cases.

On July 20 and 21, 2004, the Public Integrity Section and the Voting Section of the Department's Civil Rights Division co-sponsored a two-day symposium for DEOs representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes available to prosecute such cases, and the handling of civil rights matters involving

voting. Attorney General John Ashcroft delivered the keynote address on the importance of protecting voting rights and the prosecution of election fraud. In addition, Assistant Attorney General Christopher A. Wray of the Criminal Division and Assistant Attorney General R. Alexander Acosta of the Civil Rights Division addressed conference attendees on voting rights and election fraud enforcement issues respectively.

### Federal Election Crimes

During 2002 the Public Integrity Section continued its nationwide oversight role regarding the handling of election crime allegations. As part of a general Department effort to increase its effectiveness in this important area, the Section assisted in the planning and execution of the Department's 2002 Ballot Integrity Initiative. The purpose of this ongoing Initiative is to increase the Department's ability to deter, detect, and prosecute election crimes and voting abuses by prioritizing election crime cases. As a result of the Initiative, during 2002 the number of election crime matters opened by federal prosecutors throughout the country increased significantly, as did the Section's active involvement in election crime matters stemming from the Initiative. At the end of 2002, the Section was supervising and providing advice on approximately 43 election crime matters nationwide. In addition, as of December 31, 2002, 11 matters involving possible election crimes were pending in the Section.

During 2002 the Section closed two election crime matters and continued its operational supervision of the following election crime case: *United States v. Woodward and Jordan*, Northern District of Alabama. Jimmy Woodward, the former Sheriff of Jefferson County, Alabama, and Albert Jordan, an attorney from Birmingham, were indicted in 2000 for conspiring to obtain criminal history records from the National Crime Information Center (NCIC) for use in an election contest, for converting NCIC records, and for accessing government computers without authority. The indictment charged that Woodward and Jordan conspired to use Sheriff's office personnel to access NCIC computers to run criminal history checks on hundreds of voters in Jefferson County who had voted by absentee ballot in the 1998 general election, in the hopes they would find criminal histories they could use to challenge the qualifications of voters who cast votes for Woodward's opponent. The charges were dismissed in 2000 on procedural grounds. The Department appealed the dismissal of the charges. In 2001 the case was argued before the Eleventh Circuit Court of Appeals by the Appellate Section of the Criminal Division. The Court of Appeals subsequently reversed the trial court's dismissal of the charges and remanded the case for retrial. The former United States Attorney for the Northern District of Alabama was recused from the case. The case is being prosecuted by an Assistant United States Attorney under the supervision of the Public Integrity Section.

The following cases are the result of an extensive federal investigation into vote-buying in the May 1998 primary election in Knott County, Kentucky, an Appalachian county in the Eastern District of Kentucky. The primary was contested by two slates of candidates. The ballot included the race for the position of Knott County Judge Executive, which controls local government hiring, contracting, and services. The ballot also included a primary contest for the office of United States Senator, conferring federal jurisdiction

over vote buying in the election even though the electoral corruption was directed at local races.

The following cases are being handled jointly by the Section and the United States Attorney's Office for the Eastern District of Kentucky:

*United States v. Calhoun.* On March 28, 2003, a federal grand jury indicted Jimmy Calhoun on two counts of vote-buying. On August 19, 2003, Calhoun pled guilty to two counts of vote-buying on behalf of a slate of candidates headed by Donnie Newsome, the successful candidate for County Judge Executive in the May 1998 Knott County, Kentucky primary election. Calhoun paid two persons to vote by absentee ballot. On April 7, 2004, Calhoun was sentenced to six months in prison and two years of supervised release. Calhoun pled guilty to two counts of vote-buying on behalf of a slate of candidates headed by Donnie Newsome, the successful candidate for County Judge Executive in the May 1998 Knott County, Kentucky primary election. Calhoun paid two persons to vote by absentee ballot.

*United States v. Conley.* On March 28, 2003, a federal grand jury indicted Jimmy Lee Conley on five counts of vote-buying and one count of making a false statement in a matter within federal jurisdiction. Conley was charged with paying five persons to vote by absentee ballot for a slate of candidates headed by Donnie Newsome, the successful candidate for County Judge Executive. During the investigation, Conley allegedly made false statements to an agent of the FBI. A jury acquitted Conley on June 19, 2003.

*United States v. Johnson.* On April 24, 2003, a federal grand jury indicted Newton Johnson on four counts of vote-buying, one count of making a false statement in a matter within federal jurisdiction, and two counts of obstructing justice. On June 2, 2003, Johnson pled guilty pursuant to a plea agreement to one count of vote-buying, and one count of obstructing justice. Johnson paid four persons to vote by absentee ballot in the May 1998 Knott County, Kentucky primary election. Johnson paid the voters to vote for a slate of candidates headed by Donnie Newsome, the successful candidate for County Judge Executive. During the investigation of this vote-buying, Johnson made a false statement to an agent of the FBI, and pressured grand jury witnesses to falsely deny that he bought their votes. Pursuant to his plea agreement, Johnson pled guilty to paying one of the voters for her vote, and to endeavoring to obstruct the grand jury investigation by urging her to lie under oath. Johnson agreed to cooperate with the government. On October 6, 2003, Johnson was sentenced to three years of probation. Johnson had previously testified at the trial of Donnie Newsome to the nature and extent of the broader conspiracy to approach and pay numerous impoverished, handicapped, illiterate, or otherwise impaired persons to vote for the slate of candidates headed by Newsome. Newsome offered Johnson a road improvement and a county job in exchange for participation in the conspiracy. Johnson, who is impoverished, illiterate, and unable to leave his remote mountain hollow without the road improvement, agreed and purchased the votes of four persons. A jury convicted Newsome on all counts.

*United States v. Madden.* On March 28, 2003, a federal grand jury indicted Patrick Wayne Madden on three counts of vote-buying and one count of making a false statement in a matter within federal jurisdiction. On October 6, 2003, Madden pled guilty to one count of vote-buying. Madden paid three persons to vote by absentee ballot for a slate of candidates headed by Donnie Newsome, the successful candidate for County Judge Executive in the May 1998 Knott County, Kentucky primary election. During the investigation of this vote-buying, Madden made a false statement to an agent of the FBI. On February 2, 2004, Madden was sentenced to 20 months in prison and two years of supervised release. Madden pled guilty to one count of vote-buying. Madden paid three persons to vote by absentee ballot for a slate of candidates headed by Newsome.

*United States v. Newsome, Pigman, and Smith.* On April 24, 2003, a federal grand jury indicted sitting County Judge Executive Donnie Newsome and two of his supporters, Willard Smith and Keith Pigman, on one count of conspiracy to commit vote-buying. The grand jury further charged five substantive counts of vote-buying, one count charging Newsome, two counts charging Smith, one count charging Smith and Pigman, and one count charging all three defendants. Newsome, Pigman, and Smith, working together and with other conspirators, approached and paid numerous impoverished, handicapped, illiterate, or otherwise impaired persons to vote for Newsome by absentee ballot, resulting in a large increase in the rate of absentee voting, and long lines at the County Clerk's Office. Newsome won the election to remain the County Judge Executive.

On July 8, 2003, Pigman pled guilty pursuant to a plea agreement to conspiracy to commit vote-buying, and one count of vote-buying. Pigman cooperated with the government following his plea, and provided substantial assistance by testifying against Newsome and Smith. Pigman explained the nature and extent of the broader conspiracy to approach and pay numerous impoverished, handicapped, illiterate, or otherwise impaired persons to vote for the slate of candidates headed by Newsome. Pigman further explained that such voters were purposefully chosen because they would present severe credibility problems for the government in any investigation and prosecution of their conspiracy. Newsome offered and ultimately gave Pigman a county job in exchange for Pigman's participation in the conspiracy. On October 30, 2003, Pigman was sentenced to four months of imprisonment, four months of community confinement, and two years of supervised release. On October 1, 2003, a jury convicted both Newsome and Smith on all counts. Newsome, while in office as a Kentucky State Representative, became a candidate for County Judge Executive. Newsome, Pigman, and Smith, working together and with other conspirators, approached and paid numerous persons to vote for Newsome and certain other candidates by absentee ballot, resulting in a large increase in the rate of absentee voting, and long lines at the County Clerk's Office. Newsome, who won the primary election and subsequent elections, was ordered detained pending sentencing, together with Smith, in light of threats to government witnesses during the trial.

On March 16, 2004, Newsome, the former County Judge Executive for Knott County, Kentucky, was sentenced to 26 months of in prison, a \$20,000 fine, and three years of supervised release. Smith was sentenced to 24 months in prison, a \$5,000 fine, and three

years of supervised release. A jury previously convicted Newsome and Smith on all counts of an indictment that charged them with conspiracy to buy votes and five counts of vote-buying. Pigman, previously pled guilty to the conspiracy charge, and was sentenced to four months in prison, four months of community service, and two years of supervised release.

*United States v. Ronnie Slone and Brady Slone.* On March 28, 2003, a federal grand jury indicted Ronnie Neal Slone and Brady Warren Slone (who are brothers) on three counts of vote-buying, and on one count each of making a false statement in a matter within federal jurisdiction. The Slones allegedly paid three persons to vote by absentee ballot for a slate of candidates headed by Donnie Newsome. During the investigation of this vote-buying, each of the Slones allegedly made a false statement to an agent of the FBI. On August 15, 2003, a jury acquitted both defendants.

*United States v. Phillip Slone.* On March 28, 2003, a federal grand jury indicted Phillip Slone (who is not directly related to Ronnie and Brady Slone) on seven counts of vote-buying and one count of making a false statement in a matter within federal jurisdiction. On June 4, 2003, Slone pled guilty pursuant to a plea agreement to one count of vote-buying. Slone paid seven persons to vote for a slate of candidates headed by Homer Sawyer, the unsuccessful incumbent candidate for County Judge Executive in the May 1998 Knott County, Kentucky primary election. During the investigation of this vote-buying, Slone made a false statement to an agent of the FBI. On October 15, 2003, Slone was sentenced to ten months in prison and two years supervised release. Slone appealed his sentence and the district court's jurisdiction, and that appeal is pending.

## Prosecution Of Electoral Fraud Under United States Federal Law

By Craig Donsanto

In Prosecution of Electoral Fraud, Donsanto discusses what sort of conduct is currently considered to be actionable as vote fraud, the historical background for the role of the criminal prosecutor in this area, and the various federal laws and juridical precedents governing the prosecution of vote fraud. It is a very useful document for understanding the current Department of Justice's view of its mission in this area, its interpretation of the federal laws governing its work, and how the Department has and has not been able to utilize applicable provisions.

Donsanto stresses that because electoral administration is primarily a state rather than a federal matter, the federal government usually only has authority over electoral issues where: federal candidates are standing for election; a corrupt act occurs; a federal instrumentality is employed in the fraud; the fraud involves the participation of public officials "acting under color of law" in such a manner that the constitutional right to Due Process and/or Equal Protection is violated; and/or the fraud is motivated by an intent to deprive a class of voters who's rights have been specifically guaranteed by the United States Constitution.

Donsanto defines election fraud as "a substantive irregularity relating to the voting act--- such as bribery, intimidation, or forgery---which has the potential to taint the election itself." Specifically, this includes:

- \* Preventing voters from participating in elections where a federal candidate is on the ballot, or when done "under color of law" in any election—18 U.S.C. sections 241 & 242.
- \* Vote buying, 42 U.S.C. section 1973i(c).
- \* Voting more than once, 42 U.S.C. section 1973i(e).
- \* Fraudulent voting, 42 U.S.C. sections 1973i(c), 1973i(e) & 1973gg-10.
- \* Intimidating voters through physical duress in any election, 18 U.S.C. section 245(b)(1)(A), or through physical or economic threats in connection with their registering to vote or their voting in federal elections, 42 U.S.C. section 1973gg-10, or to vote for a federal candidate, 18 U.S.C. section 594.
- \* Malfeasance by election officials acting "under color of law" for actions such as ballot-box stuffing, falsely tabulating votes, or preventing valid voter registrations or votes from being given effect in any election, 18 U.S.C. sections 241 & 242, as well as in elections where federal candidates are on the ballot, 42 U.S.C. sections 1973i(c), 1973i(e) & 1973gg-10.

- \* Submitting fictitious names on voter registration roles, 42 U.S.C. sections 1973i(c) & 1973gg-10.
- \* Knowingly procuring eligibility to vote for federal office by persons who are not entitled to vote under applicable state law, 42 U.S.C. sections 1973i(c) & 1973gg-10 (criminal voting—prohibited in approximately 40 states) and 42 U.S.C. sections 1973i(c), 1972gg-10, 18 U.S.C. 1015(f) & 611 (non-citizen voting).
- \* Knowingly making a false claim of United States citizenship to register to vote in any election, 18 U.S.C. section 1015(f), or falsely claiming United States citizenship for registering or voting in any election, 18 U.S.C. section 911.
- \* Providing false information concerning a person's name, address or period of residence in a district in order to establish that person's eligibility to register or to vote in a federal election, 42 U.S.C. sections 1973i(c) & 1973gg-10.
- \* Causing the production of voter registrations that qualify alleged voters to vote for federal candidates, or the production of ballots in federal elections, that the actor knows are materially defective under applicable state law, 42 U.S.C. section 1973gg-10.
- \* Using the United States mails, or interstate wire facilities, to obtain the salary and emoluments of an elected official through any of the activities mentioned above, 18 U.S.C. sections 1341 & 1343.
- \* Ordering, keeping or having under one's authority or control any troops or armed men at any polling place in any election. The actor must be an active civilian or military officer or an employee of the United States government, 18 U.S.C. section 592.
- \* Intimidating or coercing a federal employee to induce or discourage "any political activity" by that employee, 18 U.S.C. section 610.

#### Other Points of Interest

- Most election fraud is aimed at corrupting elections for local offices, which control or influence patronage positions. Election fraud occurs most frequently where there are fairly equal political factions, and where the stakes involved in who controls public offices are weighty -- as is often the case where patronage jobs are a major source of employment, or where illicit activities are being protected from law enforcement scrutiny
- Vote buying offenses have represented a sizable segment of the federal election crime docket in modern times.
- Voter intimidation requires proof of a difficult element: the existence of physical or economic intimidation that is intended by the defendant and felt by the victim. The crime of voter "intimidation" normally requires evidence of threats, duress, economic coercion, or some other aggravating factor which tends to improperly induce conduct on the part of the victim. If such evidence is lacking, an

alternative prosecutive theory may apply to the facts, such as multiple voting in violation of 42 U.S.C. ' 1973i(e). As with other statutes addressing voter intimidation, in the absence of any jurisprudence to the contrary, it is the Criminal Division's position that section 1973gg-10(1) applies only to intimidation that is accomplished through the use of threats of physical or economic duress. Voter "intimidation" accomplished through less drastic means may present violations of the Voting Rights Act, 42 U.S.C. § 1973i(b), which are enforced by the Civil Rights Division through noncriminal remedies.

- Section 1973gg-10(2) is a specific intent offense. This means that the offender must have been aware that citizenship is a requirement for voting and that the registrant did not possess United States citizenship. In most instances, proof of the first element is relatively easy because the citizenship requirement is stated on the voter registration form, and the form requires that the voter check a box indicating that he or she is a citizen. Proof of the second element, however, may be more problematic, since the technicalities of acquiring United States citizenship may not have existed in the culture of the registrant's country of birth, or otherwise been evident to him, and because the registrant may have received bad advice concerning the citizenship requirement. These issues can also usually be overcome by the fact that all voter registration forms now require a registrant to certify that he or she is a citizen. Section 611 is a relatively new statute that creates an additional crime for voting by persons who are not United States Citizens .It applies to voting by non-citizens in an election where a federal candidate is on the ballot, except when: (1) non-citizens are authorized to vote by state or local law on non-federal candidates or issues, and (2) the ballot is formatted in a way that the non-citizen has the opportunity to vote solely for the non-federal candidate or issues on which he is entitled to vote under state law. Unlike section 1015(f), section 611 is directed at the act of voting, rather than the act of lying. But unlike section 1015(f), Section 611 is a strict liability offense in the sense that the prosecution must only prove that the defendant was not a citizen when he registered or voted. Section 611 does not require proof that the offender be aware that citizenship is a prerequisite to voting.

## Election Protection 2004

By the Election Protection Coalition

### **Election Protection – the Program**

Election Protection 2004 was the nation's most far-reaching effort to protect voter rights before and on Election Day. The historic nonpartisan program included:

- A toll-free number, 1-866-OUR-VOTE, with free, immediate and multi-lingual assistance to help voters with questions about registration and voting, and assist voters who encounter barriers to the ballot box.
- Distribution of more than five million "Voters' Bills of Rights" with state-specific information
- 25,000 volunteers, including 6,000 lawyers and law students, who watched for problems and assisted voters on the spot at more than 3,500 predominantly African-American and Latino precincts with a history of disenfranchisement in at least 17 states.
- Civil rights lawyers and advocates represented voters in lawsuits, preserved access to the polls, exposed and prevented voter intimidation, worked with election officials to identify and solve problems with new voting machines, technology and ballot forms, and protected voter rights in advance and on Election Day.

### **Voter Intimidation and Suppression Stories (Abridged)**

- An Associated Press story noted Election Protection's exposure of reported voter suppression tactics in Colorado: Officials with the Election Protection Coalition, a voter-rights group, also said some voters in a predominantly black neighborhood north of Denver found papers on their doorsteps giving them the wrong address for their precinct
- Election Protection received a report from Florissant County, Missouri from a voter who lives in predominantly white neighborhood. While waiting in line to vote, a Republican challenger challenged the black voters by requesting more proof of identification, residence, and signature match, while asking nothing from white voters. Also, the same voter reportedly asked a few questions about voting but an election officials refused to provide any meaningful answer, insisting that "it's very simple", but provided white voters with information when requested. There was one other black voter in line who was also singled out for same treatment while white voters were not.
- Election Protection received a report from Boulder County, Colorado that a poll worker made racist comments to Asian American voter and then told her she was not on the list and turned her away. The voter saw others filling out provisional ballots and asked for one but was denied. Another Asian American woman behind

her in line was also given trouble by the same poll worker (he questioned her nationality and also turned her away).

- The Election Protection hotline received reports from Pinellas County, Florida that individuals purporting to be from the Kerry campaign are going door-to-door handing out absentee ballots, and asking voters to fill them out, and then taking the ballots from them, saying "Vote here for Kerry. Don't bother going to the polls."
- The Election Protection Coalition received a report from a woman whose sister lives in Milwaukee and is on government assistance. Her sister was reportedly told by her "case manager" that if she voted for Kerry, she would stop receiving her checks.
- An illiterate, older and disabled voter in Miami-Dade asked for assistance reading the ballot and reported that a poll worker yelled at him and refused to assist him and also refused to allow him to bring a friend into the booth in order to read the ballot to him.
- The Election Protection Coalition have gathered reports that flyers are circulating in a black community in Lexington, South Carolina claiming they those who are behind on child support payments will be arrested as the polls.
- Minority voters from Palm Beach County, Florida reported to the hotline that they received middle-of-the-night, live harassing phone calls warning them away from the polls.
- A volunteer for Rock the Vote reported that two illiterate voters in Michigan requested assistance with their ballots but were refused and reportedly mocked by poll workers.
- The hotline received a call from a radio DJ in Hillsborough County, Florida, who stated that he has received many calls (most of which were from African-Americans) claiming that poll workers were turning voters away and not "letting" them vote.
- The hotline received a call from Pima County, Arizona, indicating that Democratic voters received calls throughout Monday evening, providing incorrect information about the precinct location. Voters have had to be transported en masse in order to correct the problem.
- A caller from Alabama claims that he was told at his polling place that he could vote there for everything but the President and that he would have to go elsewhere in order to vote for a presidential candidate.

- Poll monitors in Philadelphia reports groups of lawyers, traveling in threes, who pull voters out of line and challenge them to provide ID, but when challenged themselves, they hop into waiting cars or vans and leave. Similar activity by Republican lawyers in Philadelphia was reported in the 2002 election.
- In Cuyahoga, Ohio, a caller reported that all black voters are being asked to show ID, while white voters are not. Caller report that he is black and had to show ID while his girlfriend is white and did not have to show ID.
- Two months ago, suspicious phone calls to newly registered Democrats —telling them they weren't, in fact, registered to vote — were traced to the Republican headquarters in the Eastern Panhandle. On Monday, Democrats there said the calls have started again, even after the Berkeley County Clerk — a Republican — sent the party a cease-and-desist letter. The Berkeley prosecutor, who also is county Democratic chairman, has called on the U.S. attorney to investigate.
- In Tuscon, Arizona a misleading call informing voters that they should vote on November 3 has been traced back to the state GOP headquarters. The FBI is investigating.
- A man driving around in a big van covered in American flags and a big picture of a policeman was reportedly parked in front of a polling place; he then got out and moved within the 75 ft limit, until he was asked to leave; he then was found inside the polling place and was again asked to leave. Election Protection volunteers contacted officials and the man was eventually removed.
- The Election Protection hotline has received a report from individuals who claim to have received recorded telephone message coming from Bill Clinton and ACT and reminding them to vote on Nov. 3rd.
- In Massachusetts, the EP Hotline has received a report that a radio station (WILD) is broadcasting that voters will be arrested on the spot if they have outstanding parking tickets.
- In Richland, South Carolina Election Protection has received a report of a poll manager turning away individuals who do not have photo ID issued to the county or a driver's license; an EP lawyer spoke with the Poll Manager at 8:20 am and told her that people with other forms of ID should be allowed to vote by provisional ballot.
- In Greenville, a caller reported that a white poll worker was asking Blacks for multiple form of I.D. Fortunately, the voter who reported the problem did have a second I.D. but reported that some others were turned away. Election Protection attorneys have alerted election officials.

- In Allegheny County, Pennsylvania, an official looking flyer advises Democratic voters to "create a peaceful voting environment" by voting on Wednesday, November 3
- The week before the election, flyers were circulated in Milwaukee under the heading "Milwaukee Black Voters League" with some "warnings for election time." The flyer listed false reasons for which you would be barred from voting (such as a traffic ticket) and then warned that "If you violate any of these laws you can get ten years in prison and your children will get taken away from you."
- There is a Jefferson County flyer which tells voters "See you at the Poles![sic]"... on November 4.

U.S. Department of Justice Section 5 Recommendation Memorandum (Georgia voter identification)

Fooled Again, Mark Crispin Miller

Fooled Again sets out to show that the 2004 election was won by Bush through nefarious means, and indicts the news media for not taking anomalies, irregularities, and alleged malfeasance in the process seriously enough.

Miller identifies a number of statistical anomalies based on polling and turnout results that he alleges puts the validity of the 2004 election in doubt. He accuses Republicans of committing crimes and improprieties throughout the country. These include deliberate disparities in voting machine distribution and long lines in Democratic jurisdictions; misinterpretation of voting laws by elections officials to the detriment of Democratic voters; dirty tricks and deceptive practices to mislead Democratic and minority voters about voting times, places and conditions; machine irregularities in Democratic jurisdictions; relocating polling sites in Democratic and minority areas; suspicious mishandling of absentee ballots; refusing to dispense voter registration forms to certain voter registration groups; intimidation of students; suspicious ballot spoilage rates in certain jurisdictions; "strategic distribution of provisional ballots," and trashing of provisional ballots; harassment of Native American voters; a Republican backed organization engaging in voter registration efforts throughout the country that allegedly destroyed the voter registration forms of Democrats; illegitimate challenges at the polls by Republican poll watchers; improper demands for identification in certain areas; Republican challenges to the voter registration status of thousands of voters before the election, and the creation of lists of voters to challenge at the polls; wrongful purging of eligible voters from voting rolls; partisan harassment; the selective placement of early voting sites; and the failure to send out absentee ballots in time for people to vote.

Miller details what he says was the inappropriate use of the Federal Voter Assistance Program that made voting for the military easy while throwing up obstacles for civilians overseas in their efforts to vote by absentee ballot, leading many of them to be disenfranchised. Miller says that most of the military voters would be Republicans and most of the overseas civilians Kerry voters.

In this book, Miller clearly tries to prove the Republican Party won the 2004 through illegitimate means. This must be kept strongly in mind in making any use of this work. However, the book is well sourced, and individual instances of alleged malfeasance discussed may be worth looking at.

## Summary and Relevant Excerpts From Georgia Voter ID Litigation

### Complaint For Declaratory And Injunctive Relief

The Secretary of State, as the Chief Election Officer in Georgia, informed the General Assembly before the passage of Act 53 in a letter (attached hereto as Exhibit A), and also informed the Governor in a letter (attached hereto as Exhibit B) before he signed the bill into law, that there had been no documented cases of fraudulent voting by persons who obtained ballots unlawfully by misrepresenting their identities as registered voters to poll workers reported to her office during her nine years as Secretary of State .

Although the Secretary of State had informed the members of the General Assembly and the Governor prior to the enactment of Act 53, that her office had received many complaints of voter fraud involving absentee ballots and no documented complaints of fraud that involve ballots that were cast in person at the polls, the General Assembly ignored this information and arbitrarily chose instead to require only those registered voters who vote in person to present a Photo ID as a condition of voting, but deliberately refused to impose the same requirement on absentee voters

### The Stated Purpose Of The Photo ID Requirement Fraud Is A Pretext

According to a press release prepared by the Communications Office of the Georgia House of Representatives, the purpose of Act 53 is:

... to address the issue of voter fraud by placing tighter restrictions on voter identification procedures. Those casting ballots will now be required to bring a photo ID with them before they will be allowed to vote.

Al Marks, Vice Chairman for Public Affairs and Communication of the Hall County GOP told the Gainesville Times:

I don't think we need it for voting, because I don't think there's a voter fraud problem. Gainesville Times, "States Voters Must Present Picture IDs" (September 15, 2005) ([www.gainesvilletimes.com](http://www.gainesvilletimes.com)).

There is no evidence that the existing provisions of Georgia law have not been effective in deterring and preventing imposters from fraudulently obtaining and casting ballots at the polls by misrepresenting their true identities to election officials and passing themselves off as registered voters whose names appear on the official voter registration list.

The pretextual nature of the purported justification for the burden which the Photo ID requirement imposes on the right to vote is shown by the following facts:

(a) Fraudulent voting was already prohibited by existing Georgia law without unduly burdening the right of a citizen to vote.

(i) Fraudulent voting was already prohibited as a crime under O.C .G.A. §§ 21-2-561, 21-2-562, 21-2-566, 21-2-571, 21-2-572 and 21-2-600, punishable by a fine of up to \$10,000 or imprisonment for up to ten years, or both.

(ii) Voter registration records are updated periodically by the Secretary of State and local election officials to eliminate people who have died, have moved, or are no longer eligible to vote in Georgia for some other reason.

(iii) Existing Georgia law also required election officials in each precinct to maintain a list of names and addresses of registered voters residing in that precinct, and to check off the names of each person from that official list as they cast their ballots.

(iv) Registered voters were also required by existing Georgia law to present at least one of the seventeen forms of documentary identification to election officials who were required, before issuing the voter a ballot, to match the name and address shown on the document to the name and address on the official roll of registered voters residing in the particular precinct. O .C .G.A.§ 21-2-417 .

(b) There is no evidence that the existing Georgia law has not been effective in deterring or preventing fraudulent in-person voting by impersonators - the only kind of fraudulent voting that might be prevented by the Photo ID requirement. To the contrary, the Secretary of State, who, as the Superintendent of Elections, is the highest election official in Georgia, informed both the General Assembly (Exhibit A) and the Governor (Exhibit B) in writing that there had been no documented cases of fraudulent in person voting by imposters reported to her during her nine years in office .

(c) If the true intention of the General Assembly had been to prevent fraudulent voting by imposters, the General Assembly would have imposed the same restrictions on the casting of absentee ballots - particularly after the Secretary of State had called to their attention the fact that there had been many documented instances of fraudulent casting of absentee ballots reported to her office.

(d) Fraudulent in-person voting is unlikely, would be easily detected if it had occurred in significant numbers, and would not be likely to have a substantial impact on the outcome of an election:

(i) Many people vote at a local neighborhood polling place where they are likely to be known to and recognized by neighbors or poll workers.

(ii) Voters were required by existing Georgia law (O .C.G.A. § 21-2-417), to provide one of the seventeen means of identification to election officials.

(iii) Election officials are required, before issuing the ballot to the voter, to check off the name of either voter from an up-to-date list of the names and addresses of every registered voter residing in the precinct. If an imposter arrived at a poll and was successful in fraudulently obtaining a ballot before the registered voter arrived at the poll, a registered voter, who having taken the time to go to the polls to vote, would undoubtedly complain to elections officials if he or she were refused a ballot and not allowed to vote because his or her name had already been checked off the list of registered voters as having voted. Likewise, if an imposter arrived at the polls after the registered voter had voted and attempted to pass himself off as someone he was not, the election official would instantly know of the attempted fraud, would not issue the imposter a ballot or allow him to vote, and presumably would have the imposter arrested or at least investigate the attempted fraud and report the attempt to the Secretary of State as Superintendent of Elections.

## EXHIBIT B

### Letter from Secretary of State Cathy Cox to Governor Sonny Purdue, April 8, 2005

One of the primary justifications given by the Legislature for the passage of the photo identification provisions of House Bill 244 - the elimination of voter ID fraud at the polls is an unfounded justification I cannot recall one documented case of voter fraud during my tenure as Secretary of State or Assistant Secretary of State that specifically related to the impersonation of a registered voter at voting polls. Our state currently has several practices and procedures in existence to ensure that such cases of voter fraud would have been detected if they in fact occurred, and at the very least, we would have complaints of voters who were unable to vote because someone had previously represented himself or herself as such person on that respective Election Day. As a practical matter, there is no possibility that vote fraud of this type would have gone undetected if it had in fact occurred because there is a list of registered voters at each polling place that is checked off as each person votes. If the impersonator voted first and the legitimate voter came to the polling place later in the day and tried to vote, he or she would be told that they had already voted and would not be allowed to vote a second time in the same day. It is reasonable to suspect that a voter who cared enough to show up at the polls to cast a ballot would almost certainly have complained - but there have been no such complaints. If the opposite occurred, and the legitimate person came to the polls first and cast his ballot, the impersonator who showed up later would not be allowed to vote for the same reason and the attempted fraud would have been prevented.

In addition, this slate has adopted severe criminal sanctions for the type of vote impersonation that is purportedly of concern and it is evident that such penalties have been a sufficient deterrent. In essence, there is no voter fraud problem currently in existence that House Bill 244 addresses.

In contrast to the lack of voter fraud relating to impersonation of voters at polls during my tenure the State Election Board has reviewed numerous cases of voter fraud relating to the use of absentee ballots.

### State Defendants' Initial Brief In Opposition To Plaintiffs' Motion For Preliminary Injunction

There are 159 counties and an even larger number of municipalities in Georgia that conduct elections. Neither the Secretary of State nor her staff can be physically present at the polling places for those elections and therefore could not possibly be aware of all in-person voter fraud that might occur. (Cox Decl. ¶ 6.)

Under the prior law before enactment of HB 244, it is beyond argument that in person voter fraud could have taken place. (Id. ¶ 5.) The Secretary of State's view of the scenario in which voter fraud would occur is when an imposter votes at the polling place and the actual voter shows up later and is unable to cast a ballot. (Id. ¶ 5.) However, the Secretary of State agrees that the scenario she describes is only one instance of potential voter

fraud, and both her scenario and others were possible under the law as it existed prior to the enactment of HB 244. (Id.) As stated by the Director of Elections for the Forsyth County Board of Elections, the typical case of in-person voter fraud would be committed by identifying persons who do not typically vote and then having other individuals vote as those persons. (Smith Decl. ¶ 4.)

The Executive Director of the Richmond County Board of Elections has been aware of such complaints, but has been unable to gather evidence to prove the violations because the nature of the conduct makes such evidence hard to develop. (Bailey Decl. ¶ 9.) Indeed, past incidents of fraudulent registrations in Forsyth County and Fulton County were reported to the District Attorneys' offices in those respective counties. (Smith Decl. ¶ 6; MacDougald Decl. ¶ 4.) In Fulton County, the fraudulent registrations were also reported to the United States Attorney for the Northern District of Georgia, and he has opened an investigation of the fraudulent registrations. (MacDougald Decl. ¶ 4.)

#### Order for a Preliminary Injunction

As part of the order, Judge Murphy describes the testimony of Harry MacDougald, a member of the Fulton County Board of Registration and Election. Mr. MacDougald had stated he had observed voter registration fraud, which he referred to the U.S. Attorney and the District Attorney. In addition, since some precinct cards the Board sent out in 2004 were returned as undeliverable, MacDougald believes they were not eligible voters, yet they were allowed to vote.

Although the Secretary of State said she knew of no incidents of impersonation at the polls, she and her staff are not physically present in every polling site. Secretary Cox stated local officials are in the best position to know of such incidents. The State Election Board has received a number of complaints of irregularities with respect to absentee ballots. Cox is also aware of a case of vote buying of absentee ballots. She is also aware of efforts to submit fraudulent registrations.

According to Secretary of State Cox, Georgia has procedures and practices in place to detect voter fraud. Those procedures include verifying the voter's correct address, as well as the voter's name, during the check-in process for in-person voters. Georgia also imposes criminal penalties for voter impersonation. Most violations of Georgia election laws are punishable as felonies. No evidence indicates that the criminal penalties do not sufficiently deter in-person voter fraud.

The integrity of the voter list also is extremely important in preventing voter fraud. The Atlanta Journal Constitution published an article indicating that Georgia had experienced 5,412 instances of voter fraud during a twenty-year period. Secretary of State Cox's office undertook an investigation in response to that article. The investigation revealed that the specific instance of voter fraud outlined in the Atlanta Journal-Constitution, involving a report that Alan J. Mandel had voted after his death, actually did not occur. Instead, an individual with a similar name, Alan J. Mandle, had voted at the polls, and the poll worker had marked Alan J. Mandel's name rather than marking Alan J. Mandle, the name of the individual who actually voted. Secretary of State Cox's office compared the

signature on the voter certificate to the voter registration card of the living individual, and concluded that the living individual, Alan J. Mandle, rather than the deceased Alan J. Mandel, had voted.

The Secretary of State's Office subsequently attempted to ensure that voter records were maintained and up to date. The Secretary of State's Office sends information concerning dead voters to local elections officials on a monthly basis, and now has the authority to remove the names of deceased voters from the voter rolls if the local elections officials fail to do so in a timely manner. Secretary of State Cox is not aware of any reports of dead individuals voting since her office received authority to remove the names of deceased individuals from the voter rolls.

There seems to be little doubt that the Photo ID requirement fails the strict scrutiny test: accepting that preventing voter fraud is a legitimate and important State concern, the statute is not narrowly drawn to prevent voter fraud. Indeed, Secretary of State Cox pointed out that, to her knowledge, the State had not experienced one complaint of in-person fraudulent voting during her tenure. In contrast, Secretary of State Cox indicated that the State Election Board had received numerous complaints of voter fraud in the area of absentee voting. Furthermore, the Secretary of State's Office removes deceased voters from the voting rolls monthly, eliminating the potential for voter fraud noted by the Atlanta Journal-Constitution article alleging that more than 5,000 deceased people voted during a twenty—year period.

Further, although Defendants have presented evidence from elections officials of fraud in the area of voting, all of that evidence addresses fraud in the area of voter registration, rather than in-person voting. The Photo ID requirement does not apply to voter registration, and any Georgia citizen of appropriate age may register to vote without showing a Photo ID. Indeed, individuals may register to vote by producing copies of bank statements or utility bills, or without even producing identification at all. The Photo ID law thus does nothing to address the voter fraud issues that conceivably exist in Georgia.

History This message has been replied to

Hey Julie, go home---you just got out of bed from being sick! The other project mentioned was the creation of an RFP for some large organization to develop a solution to the problem. My feeling is that we can do that without the need to farm out an RFP.

Julie:

I just read my contract and it is fine except for the termination clause. I have two issues with it. First, I am concerned with a short-term contract for personal services like this that can be terminated without cause. That really makes this no contract at all. Second, I am just as concerned with the two week notice provision. We are paid every thirty days. Termination should require thirty days. Of course, the second point is moot if termination is for cause only.

Please let me know what you think.

Subject Addition

Julie/Peggy:

In addition to my question about completion of our contracts---I am wondering whether you had a chance to address the working group issue and the law clerk issue?

Also, Peggy have you been able to get a response from DOJ?

Regards,

Job

Subject Working Group List

Julie:

Here is my working group list. I still have not heard from two people but due to the size limitations I am sending what I have now:

- Cleta Mitchell (DC)
- Patrick Rogers (NM)
- Mark (Thor) Hearne II (MO)
- Mark Braden (DC)
- David Norcross (DC)
- Ben Ginsberg (DC)
- Todd Roketa, Sec of State, Indiana (IN)

I recommend that since we are limited to three Republicans and three Democrats that we pick Roketa, Rogers, and Hearne. We can use the rest for interviews.

Also, got an e-mail from Peggy but no info on what is needed for invoices. I assume our contracts will be signed in time to get us paid for this month.

Regards,

Job Cleta Mitchell Bio.doc W0528922.DOC Benjamin L Ginsberg.doc E. Mark Braden.doc TER.official.shortbio.7.15.05.doc

David A Norcross.doc Thor\_Hearne\_Resume\_5\_05.pdf

Dear Job Serebrov

Some additional information: I have put together and run election day / ballot security programs in Oklahoma and North Carolina; I testified before the House Judiciary Committee on HAVA and also worked closely with Sen. Kit Bond's office & staff on the drafting of the Senate version of the legislation. I now serve as outside counsel to the National Republican Senatorial Committee and have been putting together the preliminary outline of the ballot security program for the 2006 election cycle, working with the Office of Public Integrity of the Dept of Justice on this very topic. Let me know if you want/need more information.  
Thanks! Cleta

Cleta Mitchell

Washington, D.C.

  
P 202.295.4081

Cleta Mitchell  
Partner

Cleta Mitchell is a partner in the Washington, D.C. office of Foley & Lardner LLP as a member of the firm's Public Affairs Practice Group. Ms. Mitchell has more than 30 years of experience in law, politics and public policy. She advises corporations, nonprofit organizations, candidates, campaigns, and individuals on state and federal election and campaign finance law, and compliance issues related to lobbying, ethics and financial disclosure. Ms. Mitchell practices before the Federal Election Commission and similar federal and state enforcement agencies.

Ms. Mitchell was a member of the Oklahoma House of Representatives from 1976-1984 where she chaired the House Appropriations and Budget Committee. She served on the executive committee of the National Conference of State Legislatures.

Ms. Mitchell was in private law practice in Oklahoma City in litigation and administrative law until 1991 when she became director and general counsel of the Term Limits Legal Institute in Washington, D.C. She litigated cases in state and federal courts nationwide on congressional term limits. She served as co-counsel with former U.S. Attorney General Griffin Bell in the U.S. Supreme Court case on

011094

term limits for members of Congress.

Ms. Mitchell represents numerous Republican candidates, campaigns and members of Congress, including Senator Elizabeth Dole (R-NC), Sen. Jim Inhofe (R-OK) Sen. David Vitter (R-LA), Rep. Roy Blunt (R-MO) and Rep. Tom Cole (R-OK), among others. She is legal counsel to the National Republican Senatorial Committee. Ms. Mitchell served as co-counsel for the National Rifle Association in the Supreme Court case involving the 2002 federal campaign finance law.

Ms. Mitchell has testified before Congress several times and is a frequent speaker and guest commentator on election law and politics. In 1999, she authored *The Rise of America's Two National Pastimes: Baseball and the Law*, published by the *University of Michigan Law Review*.

Ms. Mitchell received her B.A. (high honors, 1973) and J.D. (1975) from the University of Oklahoma. She is admitted to practice in the District of Columbia, the State of Oklahoma, the Supreme Court of the United States and federal district and appellate courts.

*Kunko, et al v. Decker, et al*; Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues.

*In the Matter of the Security of Ballots Cast in Bernalillo County in the 2000 General Election*; Second Judicial District Court of Bernalillo County, New Mexico (2000); voting and counting irregularities and fraud.

*Larrogoite v. Vigil-Giron and Archuletta*; First Judicial District Court of Santa Fe County, New Mexico (1990); petition challenge, U.S. House of Representatives

Benjamin L. Ginsberg represents numerous political parties, political campaigns, candidates, members of Congress and state legislatures, Governors, corporations, trade associations, vendors, donors and individuals participating in the political process.

In both the 2004 and 2000 election cycles, Mr. Ginsberg served as national counsel to the Bush-Cheney presidential campaign; he played a central role in the 2000 Florida recount. He also represents the campaigns and leadership PACs of numerous members of the Senate and House, as well as the Republican National Committee, National Republican Senatorial Committee and National Republican Congressional Committee. He serves as counsel to the Republican Governors Association and has wide experience on the state legislative level from directing Republican redistricting efforts nationwide following the 1990 Census and being actively engaged in the 2001—2002 round of redistricting.

In addition to advising on election law issues, particularly those involving federal and state campaign finance laws, ethics rules, redistricting, communications law, and election recounts and contests, Mr. Ginsberg represents clients before Congress and state legislatures.

Before entering law school, he spent five years as a newspaper reporter on The Boston Globe, Philadelphia Evening Bulletin, The Berkshire (Mass.) Eagle, and The Riverside (Calif.) Press-Enterprise. He has been adjunct professor of law at the Georgetown University Law Center lecturing on law and the political process.

**E. Mark Braden**

Of Counsel

mbraden@bakerlaw.com

**Education:**

J.D., Washington and Lee University School of Law, 1976

B.A., Washington and Lee University, 1973

**Bar Admissions:**

U.S. Supreme Court, 1983

U.S. District Court, District of Columbia, 2002

District of Columbia, 1989

Ohio, 1976

**Summary:**

E. Mark Braden concentrates his work principally on election law and governmental affairs. This field includes work with Congress, the Federal Election Commission, state campaign finance agencies, public integrity issues, political broadcast regulation, contests, recounts, the Voting Rights Act, initiatives, referendums and redistricting. Each is an area in which he has substantial knowledge and unusual experience.

Mr. Braden spent ten years as Chief Counsel to the Republican National Committee prior to joining Baker & Hostetler. He has worked intimately with many elected officials, the major national political consultants and pollsters providing successful, and often highly innovative, legal guidance. For example, in campaign finance, he can rightly claim to be the father of "soft money" as now used in national political campaigns. In redistricting, he has argued successfully at the U.S. Supreme Court and has been involved in litigation across the nation. In addition to his experience in the area of federal election law, Mr. Braden is widely recognized as an authority on state election laws, having served as Chief Counsel to the Ohio Elections Commission and Election Counsel for the Secretary of State in Ohio. He has been a principal lawyer in many of the largest recounts in our political history.

Mr. Braden was a key negotiator for the site city agreements and many of the other contracts for four Republican National Conventions and has been special counsel to the House Administration Committee. He has also worked with many nonprofit organizations on government affairs issues.

Mr. Braden has testified before congressional committees and the Federal

Election Commission on numerous occasions. His experience in these areas has been recognized by numerous invitations to be a guest lecturer at universities and institutes across the nation.

Mr. Braden is a member of the adjunct faculty of George Washington University and a former Captain of the United States Army Reserve.

## SECRETARY OF STATE STATE OF INDIANA

**TODD ROKITA**  
SECRETARY OF STATE

### **Indiana Secretary of State Todd Rokita Biographical Information**

At the age of 35, Secretary Rokita is the second youngest Secretary of State in the country. First elected to the third highest office in state government in 2002, Secretary Rokita served for a year as the youngest Secretary of State in the nation.

As Indiana's chief election official, Secretary Rokita continues to work on reforming Indiana's election practices to ensure Indiana's elections are as fair, accurate and accessible as possible. By embracing technology and accountability, Secretary Rokita is leading the effort to make Indiana a 21<sup>st</sup> century election administration model. Rokita serves on the nine-member Executive Board of the Election Assistance Commission Standards Board, charged by federal law to address election reform issues. Secretary Rokita has testified about Indiana's voting reform efforts before the United States Congress.

Secretary Rokita also serves as Indiana's chief securities fraud investigator. Secretary Rokita's office has uncovered investor fraud scams and helped secure numerous felony convictions and thousands of dollars in restitution.

In his role as the head of Indiana's Business Services Division, Secretary Rokita has continued making Indiana a pioneer in e-government initiatives.

As Secretary of State, Rokita visits each of Indiana's 92 counties at least once each year. Rokita continues to serve as a precinct committeeman during each election, and was recently named as one of the "40 under 40" by the Indianapolis Business Journal.

A native of Munster, he holds a law degree from Indiana University School of Law-Indianapolis and a Bachelor of Arts degree from Wabash College. At Wabash, Rokita earned distinction as an Eli Lilly Fellow. After law school, Secretary Rokita worked as a practicing attorney.

Rokita began serving in the Secretary of State's office in 1997. As the Deputy Secretary of State and in other positions, Rokita helped implement user-friendly e-government services, provided tougher securities enforcement, and championed significant election reforms.

Secretary Rokita is active in the National Association of Secretaries of State, having served in 2004 as the Chair of the Voter Participation Committee and serving in 2005 as the Vice Chair of the organization's Securities Committee.

Secretary Rokita is a member of the Director's Circle of the Indiana Council for Economic Education, the state and local bar Associations, the Knights of Columbus, and the National Rifle Association. A commercial-rated pilot, Secretary Rokita volunteers his time by flying people in need of non-emergency medical care to hospitals and clinics throughout the Midwest for treatment.

Secretary Rokita lives in Indianapolis with his wife, Kathy and they are members of St. Thomas More Parish.

Subject Lists

Julie:

I just got an e-mail from Tova. She does expect me to add Republicans to the interview list. Tova and I are going to talk tomorrow. I think that making the final interview list will take some time as we need to see who is vetted off or removed from the working group list due to funding issues or other issues.

I do not intend to mention anything we discussed in my conversation with Tova. Please let me know how the Commissioner's discussion with the complaining party went.

Subject Add to Tova's Working Group List

Julie:

Tova added this name to her list a few days ago.

Donna Brazile

Donna Brazile is Founder and Managing Director of Brazile and Associates, LLC. Brazile, Chair of the Democratic National Committee's Voting Rights Institute (VRI) and an Adjunct Professor at Georgetown University, is a senior political strategist and former Campaign Manager for Gore-Lieberman 2000 - the first African American to lead a major presidential campaign.

Prior to joining the Gore campaign, Brazile was Chief of Staff and Press Secretary to Congresswoman Eleanor Holmes Norton of the District of Columbia where she helped guide the District's budget and local legislation on Capitol Hill.

Brazile is a weekly contributor and political commentator on CNN's Inside Politics and American Morning. In addition, she is a columnist for Roll Call Newspaper and a contributing writer for Ms. Magazine.

A veteran of numerous national and statewide campaigns, Brazile has worked on several presidential campaigns for Democratic candidates, including Carter-Mondale in 1976 and 1980, Rev. Jesse Jackson's first historic bid for the presidency in 1984, Mondale-Ferraro in 1984, U.S. Representative Dick Gephardt in 1988, Dukakis-Bentsen in 1988, and Clinton-Gore in 1992 and

011109

1996.

In addition to working on political campaigns, Brazile has served as a senior lecturer and adjunct professor at the University of Maryland and a fellow at Harvard's Institute of Politics.

Brazile is the recipient of numerous awards and honors, including Washingtonian Magazine's 100 Most Powerful Women in Washington, D.C. and the Congressional Black Caucus Foundation's Award for Political Achievement.

Brazile, a native of New Orleans, Louisiana earned her undergraduate degree from Louisiana State University in Baton Rouge.

Subject Meeting

Julie:

As we just discussed, at this time and in light of the recent inquiry, I think it prudent to postpone our meeting in DC until the first or second week of November in order to:

1. Finalize the Working Group list (I am still waiting to hear from Kay James and Governor Barbour);
2. Finalize the Interview list;
3. Finish the search on existing voter fraud research;
4. Assure participation from the Department of Justice; and,
5. Get everyone on the same page and assure all outside parties that this will not be a radical venture

What do you think and can we get agreement on this with Peggy?

Regards,

Job

I think we should use the content of those articles or some summary of them as a background of what we know about VF and VI. I just didn't want to have to read all of those articles to be able to make some generalized statements about their contents.

Julie:

All of the summaries received are in the shared drawer under T:\RESEARCH IN PROGRESS\VOTING FRAUD-VOTER INTIMIDATION\Research Summaries. There are too many of them to append to this message, or I would do it. The researchers did not propose to include these summaries in the report. Are you considering adding them?

If you want, I can cross reference each of these with the list of articles and ID any missing summaries. I could do that over the weekend. -- Peggy

Dear Tom and Julie,

Happy New Year. I hope you both enjoyed the holidays.

As you know, I am well aware that the research Job and I produced belongs to the EAC. Nonetheless, I was wondering whether there might be some way I can use just the Nexis material solely for my own further research purposes. Anything I might publish using that underlying data as enhanced by my further research would be in my name and my name only, not that of the EAC. I put a tremendous amount of work into collecting and organizing that data and I would like the opportunity to continue this research on an ongoing basis. It would be a shame if it was not put to some further use.

Is there something we might arrange in this regard? Thanks so much.

Subject: Re: fraud and intimidation report

Tova & Job,

As you know, because the two of you are no longer under contract with the EAC, EAC is not afforded the same protections as if you were still functioning as EAC employees. As such, releasing the document to you would be the same as releasing it to any other member of the public.

Thus, EAC will not be able to release a copy of the proposed final report to you prior to its consideration and adoption by the Commission. The Commission will take up this report at its meeting on Thursday, Dec. 7. I will have a copy available for you immediately following their consideration - assuming that they do not change the report during their deliberations and voting on Dec. 7. If changes are made, I will have a copy available to you as soon as possible following that meeting.

In the final report, you will see that EAC took the information and work provided by the two of you and developed a report that summarizes that work, provides a definition for use in future study, and adopts parts or all of many of the recommendations made by you and the working group. In addition, you will note that EAC will make the entirety of your interview summaries, case summaries, and book/report summaries available to the public as appendixes to the report.

I know that you are anxious to read the report and that you may have questions that you would like to discuss following the release of the report. Please feel free to contact me with those questions or issues.

Julie,

I understand from Tom Wilkey that you are planning on releasing our report at the public meeting next Thursday, December 7. As we discussed, I respectfully request that Job and I be permitted to review what you are releasing before it is released. I would like us both to be provided with an embargoed copy as soon as possible so we have time to properly review it before Thursday. I can be contacted by email, cell phone at 917-656-7905, or office phone 202-741-6263. I hope to hear from you soon. Thanks.

Subject work plan

Hi Karen and Tom,

As we discussed yesterday, attached is a preliminary work plan/division of labor for your review. Please let us know if this is sufficient for the present and if you have any comments or questions.

In terms of hours dedicated to the project, Job and Tova are able to commit to 15-20 hours per week assuming that includes reimbursed periodic travel. Steve can do approximately 2 hours per week. We have tentatively scheduled to meet at your offices in DC, if that is convenient for you, on September 20. We will be able to confirm that within the next day or so.

All of us are very eager to get started on this important work as soon as possible. However, because we also have other work related responsibilities, we are a bit reluctant to do so before having an opportunity to review our contracts. We look forward to receiving them so we can get going right away.

Thanks so much. Speak to you soon.

Tova, Job and Steve

**Subject:** Re: Kick off activities for the EAC Voting fraud/voter intimidation project

All-

In anticipation of our 45-minute conference call scheduled for Tuesday, September 6 at 4:00 PM, I would ask the three consultants ( Steve, Job and Tova) to come prepared to talk about the following:

The major topics and issues which you see as needing immediate attention, definition, delineation, etc.

Rough timelines and timeframes for addressing these major issues and topics

Your major roles and responsibilities and the timelines you envision for meeting your major deliverables

We all realize that this conversation is just a start; I look forward to this beginning and to framing the tasks that lie ahead of us between now and September 30.

Have a wonderful holiday!!

Re: Preliminary Work Plan  
Date: September 7, 2005

The following is a preliminary work plan and division of labor for the project on voter fraud and voter intimidation:

MONTH ONE (beginning the date contracts are finalized):

- I. Defining Fraud/Intimidation
  - a. In person meeting and discussion among consultants to:
    - i. Determine what we believe the parameters of the terms fraud and intimidation should be for our research purposes. (All)
    - ii. Create a list of state and local officials, third party representatives, attorneys, scholars, etc. to interview and/or survey to assist in this process of definition (All)
  - b. Interviews of individuals identified as having expertise (Job and Tova)
  - c. Analysis of existing research (Job and Tova)
- II. Obtaining research assistance (e.g. interns, law clerks) (All)

MONTH TWO:

- III. Examining the Feasibility of Quantifying the Level of Incidence of Different Types of Fraud
  - a. Looking at how we can develop a statistically sound research instrument
    - i. Discussion with political and social scientists, legal scholars in the field (Tova and Steve)
  - b. Determination as to information that would be required for a potential survey; identification of potential survey states to ensure a fair representation of different systems (All)
  - c. Preliminary survey of case law of recent prosecutions for fraud/intimidation (Job)
  - d. Interviews with state and local officials, third party groups, election lawyers to assess what they believe are the most prevalent problems (All)

MONTH THREE:

- IV. Preliminary assessment of the federal, state and local legal capacity to handle fraud and intimidation cases
  - a. Case law research (Job)
  - b. Survey of current state election codes (Tova and Job)
  - c. Analysis of Department of Justice Civil Rights and Criminal Divisions work in this area (Tova)

011139

- d. Survey and assessment of who has enforcement responsibility and accountability in each state and the extent to which that entity exercises that authority (All)

**MONTH FOUR:**

- V. Report of Preliminary Findings (Tova and Job)
- VI. Assembling the Working Group
  - a. Developing a list of potential members (All)
  - b. Development of a work plan and set of issues for examination for the working group (All)

**Potential Working Group Members – Initial Suggestions:**

Lori Minnite, Barnard College  
Allan Lichtman, American University  
David Orr, Cook County Clerk (Chicago)  
Judith Browne, The Advancement Project  
Cathy Cox, Secretary of State, Georgia  
Jonah Goldman, Lawyers Committee for Civil Rights  
Christopher Edley, Dean, Berkeley School of Law  
Daniel Tokaji, Moritz College of Law, The Ohio State University  
Spencer Overton, George Washington School of Law

Subject FW: The EAC- Tova Wang piece on voter fraud and  
intimidation

History:

 This message has been replied to.

Julie - thought John had sent these to you.

---

From: Tanner, John K (CRT)  
Sent: Friday, July 07, 2006 4:37 PM  
To: Quinn, Cameron (CRT)  
Cc: Agarwal, Asheesh (CRT)  
Subject: The EAC- Tova Wang piece on voter fraud and intimidation

The EAC paper is ridiculous. I have a call in to Julie. Here are some notes

Tova Wang.wpd

011141

Tova Wang/EAC

p 5. 2d bullet ..DOJ is bringing fewer intimidation and suppression cases now...

This clearly is a myth. The Department has brought two 11(b) cases, one of the two in this Administration. The focus of DOJ activity has shifted, in fact, to voter suppression as there are fewer cases over voter dilution (challenges to at-large election systems, etc.) being brought by anyone as the number of jurisdictions with at-large election systems has shrunk dramatically. This Administration has, in fact, brought far more voter-suppression cases in this Administration than ever in the past, including a majority of all cases under Sections 203 and 208 of the Act, and such key recent Section 2 cases as US v. City of Boston and US v. Long County, Georgia.

The Voting Section brings cases involving "systemic" discrimination because federal voting statutes focus on discriminatory action by local governments. It is criminal statutes that involve malfeasance by individuals. The difference is fundamental and key to understanding law enforcement

3d bullet.

The Voting Section of DOJ has taken action to address badly kept voter lists with recent lawsuits in Missouri and Indiana.

4<sup>th</sup> bullet

The Voting Section of DOJ has, by a large margin, included mandatory training of poll workers in avoiding discriminatory practices in more cases in this Administration than in its entire previous history.

Page 6 - first bullet

This is not true. Ms. Wang repeatedly declined to define intimidation, so that her questions were vague and unhelpful in defining or identifying problems. The facts:

The Voting Section is bringing more cases involving discrimination and violation of minority voters rights at the polls on election day than ever in its history - than in its entire history combined. That is indisputable.

The credibility of allegations depends on their specificity and corroboration. Questions as to intimidation and vote suppression are meaningless in the absence of a definition of discrimination.

Prior enforcement has indeed changed the landscape, especially in the Southeast; however, the fact that we are bringing record numbers of cases clearly shows that discrimination is not rare.

Challenges based on race and unequal implementation of ID rules are indeed actionable and we have brought lawsuits, such as in Boston and Long County; we have not identified instances of

011142

such discrimination in which we have not taken action.

**Deliberative Process  
Privilege**

Julie,

I am ok with the edits Commissioner made to the letter; however, I do think that because of the tone of

011144

Tova's letter, which is likely to be supplied to others (as was their report to us). that we need a paragraph in the letter that makes it clear that the process used in producing this final report was consistent with the process we have used in all the reports and studies we have issued to date. What she needs to know (in writing) is that while we review the work of our researchers and consultants on a topic closely to draw various conclusions, our staff and the commissioners themselves have input into the final product that becomes the public report issued by a majority vote of the EAC. Since I've been on the EAC, we have consistently questioned statistics, statements and conclusions drawn by those doing work for the EAC. We have also drawn upon our collect resources and wisdom to produce the best report possible. I think that was true in this case as it has been with all the other reports we have issued. In the end, it is the EAC--and the commissioners in particular--who are held accountable for what we adopt and release; not our paid consultants or organizations we contract with to do studies.

Subject Re: Draft response to Tova Wang [Link](#)

Julie and Jeannie:

Thank you for the quick turn around on drafting a response to Tova Wang.

I have made substantial edits because I think the first draft offered too much information, which is not germane to Tova's complaint. Additionally, too much verbiage masks the strength of our good report and seemed to obscure the main points in our response.

I hope you will find the attached helpful.

BTW, who will sign the letter ?

Washington, DC 20005

**Via U.S. Mail and Facsimile Transmission**  
**202-483-9430**

Dear Ms. Wang:

We are writing in response to your December 7, 2006 memorandum. As you know, the U.S. Election Assistance Commission (EAC) issued its first report on election crimes last week, based in large part on the work that was done for EAC by Job and you. The report contains the full and complete summaries of every interview conducted as well as every book, article, report or case that was reviewed. Rather than provide the synopsis of these interviews, EAC provided the individual summaries so readers could reach their own conclusions about the substance of the interviews.

As the agency responsible for these final reports, it is incumbent upon EAC to assure that the information contained in the reports is accurate and fairly presented. With each of the reports, best practices documents, quick start guides, and other documents that EAC publishes, EAC makes changes as needed to make certain that our constituents are receiving the best and most complete information. This due diligence process is observed regardless of whether the document was created in-house or was created by consultants or contractors.

Upon reviewing initial information about the Department of Justice interviews contained in the status report that was provided to the EAC Standards Board and EAC Board of Advisors and the information provided at the working group meeting in May 2006, those persons interviewed at the Department of Justice did not agree with certain characterizations of their statements contained in these materials. Therefore, EAC exercised its responsibility to make clarifying edits. The Department of Justice is an important prosecutorial agency engaged in enforcing Federal anti-fraud and anti-intimidation laws. Thus, it was important to EAC to assure that the summary of their comments did not lend confusion to an already complex and hotly-debated topic.

011147

The report on voting fraud and voter intimidation will stand as adopted on December 7, 2006. Again, we thank you for the contributions you made to the EAC's initial research of these important issues.

Sincerely,

Paul DeGregorio  
Chairman

Donetta Davidson  
Commissioner

Gracia Hillman  
Commissioner

Subject VF-VI Another DOJ Objection

Julie:

I just remembered that there was one other DOJ objection. It was about the way the consultants described the Election Crimes Branch focus on cases. In the interview with Donsanto (the only interview I attended), he made reference to the fact that the Election Crimes Branch used to only go after conspiracies, not individuals. Now, however, they had begun prosecuting individuals for noncitizen and felon voting. The consultants heard an unexpressed "instead", which would mean that DOJ had dropped pursuing conspiracies in favor of going after individuals. Based on my previous experience, I heard and unexpressed "in addition", meaning that DOJ was not just prosecuting conspiracies, the department also had begun to prosecute individuals.

I had lengthy discussions with the consultants over this issue as well. Donsanto confirmed that he meant "in addition", and the lists of cases he provided indicates that the department continues to pursue conspiracies. (It doesn't make sense any other way, unless you believe that the government is out to get the little guy.) --- Peggy

Subject VF-VI Interviews

Sorry this is later than expected. I was missing the notes of one interview and had several computer crashes when I tried to retrieve archived email to determine if I had failed to file it after one of the consultants sent it. I finally gave up looking for it in favor of summarizing what I had.

Attached is a summary of points raised in the interviews. I found it more difficult to extract lessons learned from the interview notes, so I used a summary format. (The interview notes make it appear that the focus of the interviews differed from one person to another, perhaps because consultants were seeking different information from interviewees). I've also attached a list of interviewees with pertinent interview notes. (Some of the interview notes dealt with irregularities other than voting fraud and voter intimidation.) ---

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

**Voter Suppression & Intimidation:**

- Voter suppression efforts are sometimes racially based, and sometimes based on partisan considerations
- Hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. Many instances of what some people refer to as voter intimidation are more unclear now (e.g.; photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera). It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation
- The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.
- Some advocates assert that, given the additional resources and latitude given to the DOJ enforcement of acts such as double voting and noncitizen voting, there should be an equal commitment to enforcement of acts of intimidation and suppression cases.
- Examples:
  - spreading of false information, such as phone calls, flyers, and radio ads that intentionally mislead as to voting procedures, such as claiming that if you do not have identification, you cannot vote, and providing false dates for the election
  - Observers with cameras, which people associate with potential political retribution or even violence
  - Intimidating police presence at the polls
  - open hostility by poll workers toward minorities (racial and language), or poll workers asking intimidating questions;
  - groups of officious-looking poll watchers at the poll sites who seem to be some sort of authority looking for wrongdoing;
  - challenges
    - There are cases where challenger laws have been beneficial and where they have been abused (Brennan is currently working on developing a model challenger law)
    - No way to determine whether a challenge is in good or bad faith, and there is little penalty for making a bad faith challenge. The fact that there are no checks on the challenges at the precinct level, or even a requirement of concurrence from an opposing party challenger leads to the concern that challenge process will be abused. The voter on the other hand, will need to get majority approval of county election board members to defeat the challenge.
    - Especially in jurisdictions that authorize challenges, the use of challenge lists and challengers goes beyond partisanship to racial suppression and intimidation
  - instances where civic groups and church groups intimidate members to vote in a specific manner, not for reward, but under threat of being ostracized or even telling them they will go to hell.(AR, KY)
  - moving poll sites
  - having Indians vote at polling places staffed by non-Indians often results in incidents of disrespect towards Native voters, judges aren't familiar with Indian last names and are more dismissive of solving discrepancies with native voters
  - intimidation at the poll sites in court houses. Many voters are afraid of the county judges or county employees and therefore will not vote. They justifiably believe their ballots will be opened by these employees to see who they voted for, and if they voted against the county people, retribution might ensue. (AR)

**Fraud in Voting:**

*NOTE: Many interviewees appear to have made claims regarding the quantity and type of voting fraud based on incomplete data, their personal experience, or their impressions (e.g.; voting fraud*

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

*has been confined to absentee ballots; there is no in person assumption of others' voter identities to vote).*

- The most commonly cited example of voting fraud mentioned was absentee ballot fraud (e.g.; vote selling involving absentee ballots, the filling out of absentee ballots en masse, people at nursing homes filling out the ballots of residents, and union leaders getting members to vote a certain way by absentee ballot).
- Many assert that impersonation, or polling place fraud, is probably the least frequent type because:
  - impersonation fraud is more likely to be caught and is therefore not worth the risk
  - unlike in an absentee situation, actual poll workers are present to disrupt impersonation fraud, for instance, by catching the same individual voting twice
  - if one votes in the name of another voter, and that voter shows up at the polls, the fraud will be discovered
  - one half to one quarter of the time the person will be caught (there is a chance the pollworker will have personal knowledge of the person, Georgia Secretary of State Cathy Cox has mentioned that there are many opportunities for discovery of in person fraud as well).
  - deterrent is that it's a felony, and that one person voting twice is not an effective way to influence an election. One would need to get a lot of people involved for it to work
- Vote buying still occurs and, in some cases, it is hard to distinguish between intimidation and vote buying.
- Tampering with ballots in transit between poll and election office is a concern (AR)

**Voter Registration:**

- Some assert that registration fraud is the major issue (esp unsupervised voter registration drives by political parties and advocacy groups that pay workers to register voters)
- Some assert that various groups abuse the existence of list deadwood to make claims about fraudulent voting.
- Some assert that when compiling such lists and doing comparisons, which are used as the basis for challenges, sound statistical methods must be utilized, and often are not. Matching protocols without faulty assumptions will have a 4 percent to 35 percent error rate—that's simply the nature of database work. Private industry has been working on improving this for years.
- If someone is on a voter list twice, that does not mean that voter has voted twice.
- Many problems will be addressed by the statewide database required under HAVA

**Enforcement:**

- States vary in their authority to intervene in and track voter intimidation-voter suppression and voting fraud cases (e.g.; in AR, enforcement is the responsibility of counties, in IN it is responsibility of State AG).
- Voter fraud and intimidation is difficult to prove. It is very hard to collect the necessary factual evidence to make a case, and doing so is very labor-intensive
- Some believe that voter suppression matters are not pursued formally because often they involve activities that current law does not reach.
- Only two interviewees assert that current state and federal codes seem sufficient for prosecuting fraud, and are not under-enforced (no need for additional laws).
- Some advocacy groups assert that the government does not engage in a sustained investigation of voter suppression matters or pursue any kind of resolution to them. There is a perception that the Department of Justice has never been very aggressive in pursuing cases of vote suppression, intimidation and fraud, and that choices DOJ has made with respect to where they have brought claims do not seem to be based on any systematic analysis of where the biggest problems are.
- Some advocates point out that, once the election is over, civil litigation becomes moot.

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

- The development of a pre-election challenge list targeted at minorities (some claim this has never been pursued, yet Mr. Tanner said the DOJ was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama), long lines due to unequal distribution of voting machines based on race, list purges based on race, unequal application of voter ID rules, and refusal to offer a provisional ballot on the basis of race would be VRA violations.
- DOJ asserts there is a big gap between complaints and what can be substantiated
- DOJ Voting Rights Section - Federal Voting Rights Act only applies to state action, so the section only sues State and local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. When deciding what to do with the complaint, the section errs on the side of referring it criminally because they do not want civil litigation to complicate a possible criminal case
- DOJ Election Crimes Branch – DOJ is permitted to prosecute whenever there is a candidate for federal office, but can't prosecute everything. Deceptive practices that are committed by individuals and would be a matter for the Public Integrity Section; local government would have to be involved for the voting section to become involved. The problem is asserting federal jurisdiction in non-federal elections. (In U.S. v. McNally, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to "fix" McNally, did not include voter fraud.)
- It is preferable for the federal government to pursue these cases for the following reasons:
  - federal districts draw from a bigger and more diverse jury pool;
  - the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected;
  - DOJ has more resources – local prosecutors need to focus on personal and property crimes—fraud cases are too big and too complex for them;
  - DOJ can use the grand jury process as a discovery technique and to test the strength of the case.
- Some assert that election crimes are not high on the priority list of either district attorneys or grand juries; therefore, complaints of election crime very rarely are prosecuted or are indicted by the grand jury.
- Political parties have devoted extraordinary resources into 'smoking out' fraudulent voters

**Recommendations Re Laws & Procedures:**

- It is important to keep clear who the perpetrators of the fraud are and where the fraud occurs because that effects what the remedy should be.
- Support Senator Barak Obama's bill for combating voter harassment and deceptive practices. (Many jurisdictions do not currently have laws prohibiting voter harassment and deceptive practices.)
- Support a new law that allows the DOJ to bring civil actions for suppression that are not race based, for example, deceptive practices or wholesale challenges to voters in jurisdictions that tend to vote heavily for one party.
- Support a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce (DOJ has drafted such legislation, which was introduced but not passed in the early 1990s.)
- Put stronger teeth in the voter fraud laws; step up enforcement against fraud and provide stiffer penalties as current penalties make the risk of committing fraud relatively low
- There should be increased resources dedicated to expanded DOJ monitoring efforts. This might be the best use of resources since monitors and observers act as a deterrent to fraud and intimidation.
- Some advocate that all election fraud and intimidation complaints should be referred to the State Attorney General's Office to circumvent the problem of local political prosecutions. The

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

Attorney General should take more responsibility for complaints of fraud because at the local level, politics interferes

- Some advocate greater resources for district attorneys. In addition, during election time, there should be an attorney in the DA's office who is designated to handle election prosecution
- Would be useful to have recommendations for prosecutors investigating fraudulent activity
- Better trained poll workers
- Polling places should be open longer, run more professionally but there needs to be fewer of them so that they are staffed by only the best, most professional people (Voting Centers).
- Move elections to weekends. This would involve more people acting as poll workers who would be much more careful about what was going on.
- A day should be given off of work without counting as a vacation day so that better poll workers are available.
- Early voting at the clerk's office is good because the people there know what they are doing. People would be unlikely to commit fraud at the clerk's office. This should be expanded to other polling places in addition to that of the county clerk.
- Many assert that the best defense against fraud will be better voter lists.
  - States should be urged to implement statewide voter lists in accordance with the Help America Vote Act ("HAVA"), the election reform law enacted by Congress in 2002 following the Florida debacle
  - Linking voter registration databases across states may be a way to see if people who are registered twice are in fact voting twice
  - New legislation or regulations are needed to provide clear guidance and standards for generating voter lists and purging voters, otherwise states could wrongfully disenfranchise eligible voters; purging must be done in a manner that uses the best databases, and looks at only the most relevant information
  - The process for preventing ineligible ex-felons from casting ballots needs to be improved
  - statewide registration databases should be linked to social service agency databases
- Challenge laws need to be reformed, especially ones that allow for pre-election mass challenges with no real basis. There is no one size fits all model for challenger legislation, but some bad models involving hurdles for voters lead to abuse and should be reformed. There should be room for poll workers to challenge fraudulent voters, but not for abuse. (KY has list of defined reasons for which they can challenge a voter, such as residency, and the challengers must also fill out paperwork to conduct a challenge) Last minute challenges should not be permitted
- False information campaigns should be combated with greater voter education, the media could do more to provide information about what is legal and what is illegal
- Improve the protective zone around polling places: the further vote suppressers can keep people away from the polls, the better.
- States should be encouraged to:
  - codify into law uniform and clear published standards for voter registration, challenges, voter ID, poll worker training, use and counting of provisional votes, the distribution of voting equipment and the assignment of official pollworkers among precincts, to ensure adequate and nondiscriminatory access
  - standardize forms
  - modify forms and procedures based on feedback from prosecutors
- Ensure good security procedures for the tabulation process and more transparency in the vote counting process
- Conduct post-election audits
- Many advocate eliminating "no excuse" absentee voting.
- Some recommend reducing partisanship in election administration, but others are skeptical of the feasibility of this

SUMMARY OF INFO FROM INTERVIEWS  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

- Some strongly recommend requiring voter ID, while others strongly oppose it as a voter suppression tactic, asserting that states should not adopt requirements that voters show identification at the polls, beyond those already required by federal law (requiring that identification be shown only by first time voters who did not show identification when registering.) and that states could use signature comparisons.
- Political parties should monitor the processing of voter registrations and purging of registered by local election authorities on an ongoing basis to ensure the timely processing of registrations and changes, including both newly registered voters and voters who move within a jurisdiction or the state, and the Party should ask state Attorneys General to take action where necessary to force the timely updating of voter lists or to challenge, unlawful purges and other improper list maintenance practices.

**Future Study Recommendations:**

- Just because there was no prosecution, does not mean there was no vote fraud; very hard to come up with a measure of voter fraud short of prosecution
- EAC should conduct a survey of the general public that asks whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data
- EAC should work with the Census Bureau to have them ask different, additional questions in their Voter Population Surveys
- EAC should talk to private election lawyers

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Wade Henderson, Executive Director, Leadership Conference for Civil Rights

Data Collection

Mr. Henderson had **several recommendations as to how to better gather additional information and data on election fraud and intimidation in recent years. He suggested interviewing the following individuals who have been actively involved in Election Protection and other similar efforts:**

- Jon Greenbaum, Lawyers Committee for Civil Rights
- Tanya Clay, People for the American Way
- Melanie, Campbell, National Coalition for Black Political Participation
- Larry Gonzalez, National Association of Latino Election Officers
- Jacqueline Johnson, National Congress of American Indians
- Chellie Pingree, Common Cause
- Jim Dickson, disability rights advocate
- Mary Berry, former Chair of the US Commission on Civil Rights, currently at the University of Pennsylvania
- Judith Browne and Eddie Hailes, Advancement Project (former counsel to the US Commission on Civil Rights)
- Robert Rubin, Lawyers Committee for Civil Rights – San Francisco Office
- Former Senator Tom Daschle (currently a fellow at The Center for American Progress)

He also recommended we **review the following documents and reports:**

- The 2004 litigation brought by the Advancement Project and SEIU under the 1981 New Jersey Consent Decree
- Forthcoming LCCR state-by-state report on violations of the Voting Rights Act
- Forthcoming Lawyers Committee report on violations of the Voting Rights Act (February 21)

Types of Fraud and Intimidation Occurring

Mr. Henderson said he believed that the kinds of **voter intimidation and suppression tactics employed over the last five years are ones that have evolved over many years. They are sometimes racially based, sometimes based on partisan motives. He believes the following types of activity have actually occurred, and are not just a matter of anecdote and innuendo, and rise to the level of either voter intimidation or vote suppression:**

- **Flyers with intentional misinformation, such as ones claiming that if you do not have identification, you cannot vote, and providing false dates for the election**
- **Observers with cameras, which people associate with potential political retribution or even violence**
- **Intimidating police presence at the polls**
- **Especially in jurisdictions that authorize challenges, the use of challenge lists and challengers goes beyond partisanship to racial suppression and intimidation**
- **Unequal deployment of voting equipment, such as occurred in Ohio. Also, he has seen situations in which historically Black colleges will have one voting machine while other schools will have more.**

Mr. Henderson **believes that these matters are not pursued formally because often they involve activities that current law does not reach. For example, there is no law prohibiting a Secretary of State from being the head of a political campaign, and then deploying voting machines in an uneven manner. There is no way to pursue that. Also, once the election is over, civil litigation becomes moot. Finally, sometimes upon reflection after the campaign, some of the activities are not as sinister as believed at the time.**

Mr. Henderson believes **government does not engage in a sustained investigation of these matters or pursue any kind of resolution to**

Deliberative Process  
Privilege

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

them. LCCR has filed a FOIA request with both the Civil Rights Division and the Criminal Division of the Department of Justice to examine this issue.

Election Protection activities will be intensified for the 2006 elections, although the focus may shift somewhat given the implementation of new HAVA requirements.

Recommendations for Reform

There was tremendous concern after the 2004 election about conflicts of interest – the “Blackwell problem” – whereby a campaign chair is also in charge of the voting system. We need to get away from that.

He also supports Senator Barak Obama’s bill regarding deceptive practices, and is opposed to the voter identification laws passing many state legislatures.

- States should adopt **election-day registration**, in order to boost turnout as well as to allow eligible voters to immediately rectify erroneous or improperly purged registration records
- **Expansion of early voting & no-excuse absentee voting**, to boost turnout and reduce the strain on election-day resources.
- **Provisional ballot reforms:**
  - Should be **counted statewide** – if cast in the wrong polling place, votes should still be counted in races for which the voter was eligible to vote (governor, etc.)
  - Provisional ballots should also **function as voter registration applications**, to increase the likelihood that voters will be properly registered in future elections
- Voter ID requirements: **states should allow voters to use signature attestation to establish their identity**
- The **Department of Justice should increase enforcement of Americans with Disabilities Act and the accessibility requirements of the Help America Vote Act**
- **Statewide registration databases should be linked to social service agency databases**
- **Prohibit chief state election officials from simultaneously participating in partisan electoral campaigns** within their states
- Create and enforce **strong penalties for deceptive or misleading voting practices**

Wendy Weiser, Deputy Director, Democracy Program, The Brennan Center

Brennan Center findings on fraud

The Brennan Center's primary work on fraud is their report for the Carter Baker Commission with commissioner Spencer Overton, written in response to the Commission's ID recommendations. Brennan reviewed all existing reports and election contests related to voter fraud. They believe the contests serve as an especially good record of whether or not fraud exists, as the parties involved in contested elections have a large incentive to root out fraudulent voters. Yet despite this, the incidence of voter impersonation fraud discovered is extremely low—something on the order 1/10000<sup>th</sup> of a percentage of voters. See also the brief Brennan filed on 11<sup>th</sup> circuit in Georgia photo ID case which cites sources in Carter Baker report and argues the incidence of voter fraud too low to justify countermeasures.

Among types of fraud, they found impersonation, or polling place fraud, is probably the least frequent type, although other types, such as absentee ballot fraud are also very infrequent. Weiser believes this is because impersonation fraud is more likely to be caught and is therefore not worth the risk. Unlike in an absentee situation, actual poll workers are present to disrupt impersonation fraud, for instance, by catching the same individual voting twice. She believes perhaps one half to one quarter of the time the person will be caught. Also, there is a chance the pollworker will have personal knowledge of the person. Georgia Secretary of State Cathy Cox has mentioned that there are many opportunities for discovery of in person fraud as well. For example, if one votes in the name of another voter, and that

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**voter shows up at the polls, the fraud will be discovered.**

Weiser believes court proceedings in election contests are especially useful. Some are very extensive, with hundreds of voters brought up by each side and litigated. In both pre-election challenges and post-election contests, **parties have devoted extraordinary resources into 'smoking out' fraudulent voters.** Justin Leavitt at Brennan scoured such proceedings for the Carter Baker report, which includes these citations. Contact him for answers to particular questions.

Countermeasures/statewide databases

Brennan has also considered what **states are doing to combat impersonation fraud besides photo ID laws**, although again, it seems to be the rarest kind of fraud, beyond statistically insignificant. In the **brief Brennan filed in the Georgia case, the Center detailed what states are already doing to effectively address fraud.** In another **on the web site includes measures that can be taken that no states have adopted yet.** Weiser adds that an effort to look at strategies states have to prevent fraud, state variations, effectiveness, ease of enforcement would be very useful.

Weiser believes the **best defense against fraud will be better voter lists**—she argues the fraud debate is actually premature because states have yet to fully implement the HAVA database requirement. This should eliminate a great deal of 'deadwood' on voter rolls and undermine the common argument that fraud is made possible by this deadwood. This was the experience for Michigan, which was able to remove 600,000 names initially, and later removed almost 1 million names from their rolls. It is fairly easy to cull deadwood from lists due to consolidation at the state level—most deadwood is due to individuals moving within the state and poor communication between jurisdictions. (Also discuss with Chris Thomas, who masterminded the Michigan database for more information and a historical perspective.)

Regarding the question of whether the effect of this maintenance on fraud in Michigan can be quantified, Weiser would caution against drawing direct lines between list problems and fraud. **Brennan has found various groups abusing the existence of list deadwood to make claims about fraudulent voting.** This is analyzed in greater detail in the Brennan Center's critique of a purge list produced by the NJ Republican party, and was illustrated by the purge list produced by the state of Florida. **When compiling such lists and doing comparisons, sound statistical methods must be utilized, and often are not.**

The NJ GOP created a list and asked NJ election officials to purge names of ineligible voters on it. Their list assumed that people appearing on the list twice had voted twice. Brennan found their assumptions **shoddy and based on incorrect statistical practices, such as treating individuals with the same name and birthdays as duplicates**, although this is highly unlikely according to proper statistical methods. **Simply running algorithms on voter lists creates a number of false positives, does not provide an accurate basis for purging, and should not be taken as an indicator of fraud.**

Regarding the Florida purge list, **faulty assumptions caused the list to systematically exclude Hispanics while overestimating African Americans. Matching protocols required that race fields match exactly, despite inconsistent fields across databases.**

The kinds of list comparisons that are frequently done to allege fraud are unreliable. Moreover, **even if someone is on a voter list twice, that does not mean that voter has voted twice. That, in fact, is almost never the case.**

Ultimately, **even matching protocols without faulty assumptions will have a 4 percent to 35 percent error rate—that's simply the nature of database work.** Private industry has been working on improving this for years. Now that HAVA has introduced a matching requirement, **even greater skepticism is called for in judging the accuracy of list maintenance.**

Intimidation and Suppression

Brennan does not have a specific focus here, although they do come across it and have provided assistance on bills to prevent suppression and intimidation. They happen to have **an extensive paper file of intimidating fliers and related stories from before the 2004 election.** (They can supply copies after this week).

Challengers

**Brennan has analyzed cases where challenger laws have been beneficial and where they have been abused. See the decision and record**

011159

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

from the 1982 NJ vs. RNC case for some of the history of these laws. **Brennan is currently working on developing a model challenger law. Weiser believes challenge laws with no requirement that the challenger have any specific basis for the challenge or showing of ineligibility are an invitation to blanket harassing challenges and have a range of pitfalls.** State laws are vague and broad and often involve arcane processes such as where voters are required to meet a challenge within 5 days. **There are incentives for political abuse, potential for delaying votes and disrupting the polls, and they are not necessarily directed toward the best result.** Furthermore, **when a voter receives a mailer alleging vote fraud with no basis, even the mere fact of a challenge can be chilling.** A voter does not want to have to go through a quasi-court proceeding in order to vote.

**Brennan recommends challenge processes that get results before election, minimize the burden for voters, and are restricted at polling place to challenges by poll workers and election officials, not voters.** They believe limitless challenges can lead to pandemonium—that once the floodgates are open they won't stop.

Recommendations

- **Intimidation— Weiser believes Sen. Barak Obama's bill is a good one for combating voter harassment and deceptive practices. Many jurisdictions do not currently have laws prohibiting voter harassment and deceptive practices.**
- **Fraud— Current state and federal codes seem sufficient for prosecuting fraud. Weiser doesn't consider them under-enforced, and sees no need for additional laws.**
- **Voter lists— New legislation or regulations are needed to provide clear guidance and standards for generating voter lists and purging voters, otherwise states could wrongfully disenfranchise eligible voters.**
- **Challengers—Challenge laws need to be reformed, especially ones that allow for pre-election mass challenges with no real basis. There is no one size fits all model for challenger legislation, but some bad models involving hurdles for voters lead to abuse and should be reformed. There should be room for poll workers to challenge fraudulent voters, but not for abuse.**

**Also useful would be recommendations for prosecutors investigating fraudulent activity, How should they approach these cases? How should they approach cases of large scale fraud/intimidation? While there is sufficient legislative cover to get at any election fraud activity, questions remain about what proper approaches and enforcement strategies should be.**

William Groth, attorney for the plaintiffs in the Indiana voter identification litigation

Fraud in Indiana

**Indiana has never charged or prosecuted anyone for polling place fraud. Nor has any empirical evidence of voter impersonation fraud or dead voter fraud been presented.** In addition, there is no record of any credible complaint about voter impersonation fraud in Indiana. State legislators signed an affidavit that said there had never been impostor voting in Indiana. At the same time, the Indiana Supreme Court has not necessarily required evidence of voter fraud before approving legislative attempts to address fraud.

**The state attorney general has conceded that there is no concrete fraud in Indiana, but has instead referred to instances of fraud in other states.** Groth filed a detailed motion to strike evidence such as John Fund's book relating to other states, arguing that none of that evidence was presented to the legislature and that it should have been in the form of sworn affidavits, so that it would have some indicia of verifiability.

Photo ID law

**By imposing restrictive ID measures, Groth contends you will discourage 1,000 times more legitimate voters than illegitimate voters you might protect against.** He feels the implementation of a REAL ID requirement is an inadequate justification for the law, as it will not affect the upcoming 2006 election where thousands of registered voters will be left without proper ID. In addition, he questions whether REAL ID will be

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

implemented as planned in 2008 considering the backlash against the law so far. **He also feels ID laws are unconstitutional because of inconsistent application.**

Statewide database as remedy

Groth believes **many problems will be addressed by the statewide database required under HAVA.** To the extent that the rolls in Indiana are bloated, it is because state officials have not complied with NVRA list maintenance requirements. Thus, it is somewhat disingenuous for them to use bloated voter rolls as a reason for imposing additional measures such as the photo ID law. Furthermore, the state has ceded to the counties the obligation to do maintenance programs, which results in a hit or miss process (see discussion in reply brief, p 26 through p. 28).

Absentee fraud

**To the extent that there has been an incidence of fraud, these have all been confined to absentee balloting.** Most notably the East Chicago mayoral election case where courts found absentee voting fraud had occurred. See: Pabey vs. Pastrick 816 NE 2<sup>nd</sup> 1138 Decision by the Indiana Supreme Court in 2004.

Intimidation and vote suppression

**Groth is only aware of anecdotal evidence supporting intimidation and suppression activities.** While he considers the sources of this evidence credible, it is still decidedly anecdotal. Instances he is aware of include **police cars parked in front of African American polling places.** However, **most incidents of suppression which are discussed occurred well in the past.** Trevor Davidson claims a fairly large scale intimidation program in Louisville.

Challengers

There was widespread information that the state Republican Party had planned a large scale challenger operation in Democratic precincts for 2004, but abandoned the plan at the last minute.

Last year the legislature made a crucial change to election laws which will allow partisan challengers to be physically inside the polling area next to members of the precinct board. **Previously, challengers at the polling place have been restricted to the 'chute,'** which provides a buffer zone between voting and people engaging in political activity. That change will make **it much easier to challenge voters.** As there is no recorded legislative history in Indiana, it is difficult to determine the justification behind this change. As both chambers and the governorship are under single-party control, the challenger statute was passed under the radar screen.

Photo ID and Challengers

Observers are especially concerned **about how this change will work in conjunction with the photo ID provision.** Under the law, there are at least two reasons why a member of the precinct board or a challenger can raise object to an ID: whether a presented ID conforms to ID standards, and whether the photo on an ID is actually a picture of the voter presenting it. The law does not require bipartisan agreement that a challenge is valid. **All it takes is one challenge to raise a challenge to that voter, and that will lead to the voter voting by provisional ballot.**

**Provisional ballot voting means that voter must make a second trip to the election board (located at the county seat) within 13 days to produce the conforming ID or to swear out an affidavit that they are who they claim to be.** This may pose a considerable burden to voters. For example, Indianapolis and Marion County are coterminous—anyone challenged under the law will be required to make second trip to seat of government in downtown Indianapolis. If the voter in question did not have a driver's license in the first place, they will likely need to arrange transportation. Furthermore, in most cases the election result will already be known.

The law is **vague about acceptable cause for challenging a voter's ID.** Some requirements for valid photo ID include being issued by state or fed gov't, w/ expiration date, and the names must conform exactly. **The League of Women Voters is concerned about voters with hyphenated names, as the Indiana DMV fails to put hyphens on driver's licenses potentially leading to a basis for challenge.** Misspelling of names would also be a problem. The other primary mode of challenge is saying the photo doesn't look like the voter, which could be happen in a range of instances. Essentially, the law gives unbridled discretion to challengers to decide what conforms and what does not.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Furthermore, there is **no way to determine whether a challenge is in good or bad faith, and *there is little penalty for making a bad faith challenge.*** The fact that there are no checks on the challenges at the precinct level, or even a requirement of concurrence from an opposing party challenger leads to the concern that challenge process will be abused. The voter on the other hand, will need to get majority approval of county election board members to defeat the challenge.

Groth suggests the political situation in Indianapolis also presents a temptation to abuse this process, as electoral margins are growing increasingly close due to shifting political calculus.

Other cases

Groth's other election law work has included a redistricting dispute, a dispute over ballot format, NVRA issues, and a case related to improper list purging, but nothing else related to fraud or intimidation. The purging case involved the election board attempting to refine its voter list by sending registration postcards to everyone on the list. When postcards didn't come back they wanted to purge those voters. Groth blames this error more on incompetence, than malevolence, however, as the county board is bipartisan. (The Indiana Election Commission and the Indiana election division are both bipartisan, but the 92 county election boards which will be administering photo id are controlled by one political party or the other—they are always an odd number, with the partisan majority determined by who controls the clerk of circuit court office.)

Recommendations

- **Supports nonpartisan administration of elections.**
- Indiana specific recommendations including a longer voting day, time off for workers to vote, and an extended registration period.
- He views the central problem of the Indiana photo ID law is that the list of acceptable forms of ID is too narrow and provides no fallback to voters without ID. At the least, he believes the state **needs to expand the list so that most people will have at least one.** If not, **they should be allowed to swear an affidavit regarding their identity, under penalty of perjury/felony prosecution. This would provide sufficient deterrence for anyone considering impersonation fraud. He believes absentee ballot fraud should be addressed by requiring those voters to produce ID as well, as under HAVA.**
- His personal preference would be **signature comparison.** Indiana has never encountered an instance of someone trying to forge a name in the poll book, and while this leaves open the prospect of dead voters, that danger will be substantially diminished by the statewide database. But if we are going to have some form of ID, he believes we should apply it to everyone and avoid disenfranchisement, provided they swear an affidavit.

Lori Minnite, Barnard College, Columbia University

Securing the Vote

In Securing the Vote, Ms. Minnite found very little evidence of voter fraud because the historical conditions giving rise to fraud have weakened over the past twenty years. She stated that for fraud to take root a conspiracy was needed with a strong local political party and a complicit voter administration system. Since parties have weakened and there has been much improvement in the administration of elections and voting technology, the conditions no longer exist for large scale incidents of polling place fraud. Ms. Minnite concentrates on fraud committed by voters not fraud committed by voting officials. She has looked at this issue on the national level and also concentrated on analyzing certain specific states. Ms. Minnite stressed that it is important to keep clear who the perpetrators of the fraud are and where the fraud occurs because that effects what the remedy should be. Often, voters are punished for fraud committed by voting officials.

Other Fraud Issues

Ms. Minnite found no evidence that NVRA was leading to more voter fraud. She supports non-partisan election administration. Ms.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Minnite has found evidence that there is absentee ballot fraud. She can't establish that there is a certain amount of absentee ballot fraud or that it is the major kind of voter fraud.

Recommendations

- Assure there are accurate voter records and centralize voter databases
- Reduce partisanship in electoral administration.

Neil Bradley, ACLU Voting Rights Project

Voter Impersonation Cases (issue the Georgia ID litigation revolves around)

Mr. Bradley asserted that Georgia **Secretary of State Cox** stated in the case at issue: that she clearly would know if there had been any instances of voter impersonation at the polls; that she works very closely with the county and local officials and she **would have heard about voter impersonation** from them if she did not learn about it directly; and that she said that she had not heard of "any incident"---which includes acts that did not rise to the level of an official investigation or charges.

Mr. Bradley said that it is also **possible to establish if someone has impersonated another voter at the polls. Officials must check off the type of voter identification the voter used. Voters without ID may vote by affidavit ballot. One could conduct a survey of those voters to see if they in fact voted or not.**

The type of **voter fraud that involves impersonating someone else is very unlikely to occur.** If someone wants to steal an election, it is **much more effective to do so using absentee ballots.** In order to change an election outcome, one must steal many votes. Therefore, one would have to have lots of people involved in the enterprise, meaning there would be many people who know you committed a felony. It's simply not an efficient way to steal an election.

Mr. Bradley is not aware of any instance of voter impersonation anywhere in the country except in local races. He does not believe it occurs in statewide elections.

Voter fraud and intimidation in Georgia

Georgia's **process for preventing ineligible ex-felons from casting ballots has been improved** since the Secretary of State now has the power to create the felon purge list. When this was the responsibility of the counties, there were many difficulties in purging felons because local officials did not want to have to call someone and ask if he or she was a criminal.

The **State Board of Elections has a docket of irregularity complaints. The most common involve an ineligible person mailing in absentee ballots on behalf of another voter.**

In general, Mr. Bradley **does not think voter fraud and intimidation is a huge problem in Georgia** and that people have confidence in the vote. The biggest problems are the new ID law; misinformation put out by elections officials; and **advertisements that remind people that vote fraud is a felony, which are really meant to be intimidating. Most fraud that does occur involves an insider, and that's where you find the most prosecutions. Any large scale fraud involves someone who knows the system or is in the courthouse.**

Prosecution of Fraud and Intimidation

Mr. Bradley stated that **fraud and intimidation are hard to prosecute.** However, Mr. Bradley made contradictory statements. When asked whether the decision to prosecute on the county level was politically motivated, he first said "no." Later, Mr. Bradley reversed himself stating the opposite.

Mr. Bradley also stated that **with respect to US Attorneys, the message to them from the top is that this is not a priority. The Georgia ACLU has turned over information about violations of the Voting Rights Act that were felonies, and the US Attorney has done nothing with the information. The Department of Justice has never been very aggressive in pursuing cases of vote suppression, intimidation**

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

and fraud. But, the Georgia ACLU has not contacted Craig Donsanto in DC with information of voter fraud. Mr. Bradley believes that **voter fraud and intimidation is difficult to prove. It is very hard to collect the necessary factual evidence to make a case, and doing so is very labor-intensive.**

Recommendations

In Georgia, the Secretary of State puts a lot of work into training local officials and poll workers, and much of her budget is put into that work. **Increased and improved training of poll workers**, including training on how to respectfully treat voters, is the most important reform that could be made. Mr. Bradley also suggested that **increased election monitoring** would be helpful.

Nina Perales, Counsel, Mexican American Legal Defense and Education Fund

Ms. Perales did not seem to have a sense of the overall electoral issues in her working region (the southwest) effecting Hispanic voters and did not seem to want to offer her individual experiences and work activities as necessarily a perfect reflection of the challenges Hispanic voters face.

Largest Election Problems Since 2000

- Santa Anna County, New Mexico-2004-intimidated voters by video taping them.
- San Antonio-One African American voter subjected to a racial slur.
- San Antonio-Relocated polling places at the last minute without Section 5 pre-clearance.
- San Antonio-Closed polls while voters were still in line.
- San Antonio-2003-only left open early voting polls in predominantly white districts.
- San Antonio-2005-racially contested mayoral run-off election switched from touch screen voting to paper ballots.

Voter Fraud and Intimidation

In Texas, the counties are refusing to open their records with respect to Section 203 compliance (bilingual voting assistance), and those that did respond to MALDEF's request submitted incomplete information. Ms. Perales believes this in itself is a form of voter intimidation.

Ms. Perales said it is hard to say if the obstacles minorities confront in voting are a result of intentional acts or not because the county commission is totally incompetent. There have continuously been problems with too few ballots, causing long lines, especially in places that had historically lower turnout. There is no formula in Texas for allocating ballots – each county makes these determinations.

When there is not enough language assistance at the polls, forcing a non-English speaker to rely on a family member to vote, that can suppress voter turnout.

Ms. Perales is not aware of deceptive practices or dirty tricks targeted at the Latino community.

There have been no allegations of illegal noncitizen voting in Texas. Indeed, the sponsor of a bill that would require proof of citizenship to vote could not provide any documentation of noncitizen voting in support of the bill. The bill was defeated in part because of the racist comments of the sponsor. In Arizona, such a measure was passed. Ms. Perales was only aware of one case of noncitizen voting in Arizona, involving a man of limited mental capacity who said he was told he was allowed to register and vote. Ms. Perales believes proof of citizenship requirements discriminate against Latinos.

Recommendations

Ms. Perales feels the laws are adequate, but that her organization does not have enough staff to do the monitoring necessary. This could be done by the federal government. However, even though the Department of Justice is focusing on Section 203 cases now, they have not even begun to scratch the surface. Moreover, the choices DOJ has made with respect to where they have brought claims do not seem to be based on any systematic analysis of where the biggest problems are. This may be because the administration is so ideological and partisan.

011163

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Ms. Perales does not believe making election administration nonpartisan would have a big impact. In Texas, administrators are appointed in a nonpartisan manner, but they still do not always have a nonpartisan approach. Each administrator tends to promote his or her personal view regardless of party.

Pat Rogers, attorney, New Mexico

Major issues in NM w/ regard to vote fraud

**Registration fraud seems to be the major issue**, and while the legislature has taken some steps, Rogers is skeptical of the effect they will have, considering the history of unequal application of election laws. He also believes there are **holes in the 3<sup>rd</sup> party registration requirement deadlines**.

Rogers **views a national law requiring ID as the best solution to registration problems**. Rather than imposing a burden he contends it will enhance public confidence in the simplest way possible.

Registration Fraud in 2004 election

It came to light that **ACORN had registered a 13 year old**. The father was an **APD officer and received the confirmation**, but it was sent to the next door address, a vacant house. They traced this to an **ACORN employee and it was established that this employee had been registering others under 18**.

Two weeks later, in a crack cocaine bust of Cuban nationals, one of those raided said his job was registering voters for ACORN, and the police found signatures in his possession for fictitious persons.

**In a suspicious break-in at an entity that advertised itself as nonpartisan, only GOP registrations were stolen.**

In another instance, a college student was allegedly fired for registering too many Republicans.

Rogers said he **believed these workers were paid by the registration rather than hourly**.

There have been **no prosecution or convictions related to these incidents**. In fact, there have been no prosecutions for election fraud in New Mexico in recent history. However, Rogers is skeptical that much action can be expected considering the positions of Attorney General, Governor, and Secretary of State are all held by Democrats. Nor has there been any interest from the U.S. attorney—**Rogers heard that U.S. attorneys were given instruction to hold off until after the election in 2004 because it would seem too political**.

As part of the case against the Secretary of State regarding the identification requirement, the parties also sued ACORN. At a hearing, the head of ACORN, and others aligned with the Democratic Party called as witnesses, took the 5<sup>th</sup> on the stand as to their registration practices.

Other incidents

**Very recently, there have been reports of vote buying in the town of Espanola. Originally reported by the Rio Grande Sun, a resident of a low-income housing project is quoted as saying it has been going on for 10-12 years. The Albuquerque Journal is now reporting this as well. So far the investigation has been extremely limited.**

In 1996, there were some prosecutions in Espanola, where a state district judge found registration fraud.

In 1991, the chair of Democratic Party of Bertolino County was convicted on fraud. Yet she was pardoned by Clinton on same day as Marc Rich.

Intimidation/Suppression

Rogers believes the most notable example of intimidation in the 2004 election was the discovery of a DNC Handbook from Colorado advising Democratic operatives to widely report intimidation regardless of confirmation in order to gain media attention.

In-person polling place fraud

There have **only been isolated instances of people reporting that someone had voted in their name, and Rogers doesn't believe there is any large scale conspiracy**. Yet he contends that **perspective misses the larger point of voter confidence**. Although there has been a large

011164

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

public outcry for voter ID in New Mexico, it has been deflected and avoided by Democrats.

In 2004, there were more Democratic lawyers at the polls than there are lawyers in New Mexico. Rogers believes these lawyers had a positive impact because they deterred people from committing bad acts.

Counting Procedures

The **Secretary of State has also taken the position that canvassing of the vote should be done in private**. In NM, they have a 'county canvass' where they review and certify, after which all materials—machine tapes, etc.—are centralized with the Secretary of State who does a final canvass for final certification. Conducting this in private is a serious issue, especially considering the margin in the 2000 presidential vote in New Mexico was only 366 votes. **They wouldn't be changing machine numbers, but paper numbers are vulnerable.**

On a related note, NM has adopted state procedures that will ensure their reports are slower and very late, considering the 2000 late discovery of ballots. In a close race, potential for fraud and mischief goes up astronomically in the period between poll closing and reporting. Rogers believes these changes are going to cause national embarrassment in the future.

Rogers attributes other harmful effects to what he terms the Secretary of State's incompetence and inability to discern a nonpartisan application of the law. **In the 2004 election, no standards were issued for counting provisional ballots.** Furthermore, the Secretary of State spent over \$1 million of HAVA money for 'voter education' in blatant self-promotional ads.

Recommendations

- Rogers believes it would be unfeasible to have nonpartisan election administration and favors transparency instead. To make sure people have confidence in the election, there must be transparency in the whole process. Then you don't have the 1960 vote coming down to Illinois, or the Espanola ballot or Dona Anna County (ballots found there in the 2000 election). HAVA funds should also be restricted when you have an incompetent, partisan Secretary of State.
- There should be national standards for reporting voting results so there is less opportunity for fraud in a close race. Although he is not generally an advocate of national laws, he does agree there should be more national uniformity into how votes are counted and recorded.

Rebecca Vigil-Giron, Secretary of State, New Mexico

Complaints of election fraud and intimidation are filed with the SOS office. She then decides whether to refer it to the local district attorney or the attorney general. Because the complaints are few and far between, the office does not keep a log of complaints; however, they do have all of the written complaints on file in the office.

Incidents of Fraud and Intimidation

During the **2004 election**, there were a couple of complaints of polling place observers telling people outside the polling place who had just voted, and then **the people outside were following the voters to their cars and videotaping them**. This happened in areas that are mostly **second and third generation Latinos**. The Secretary sent out the sheriff in one instance of this. The perpetrators moved to a different polling place. This was the **only incident of fraud or intimidation Vigil-Giron was aware of in New Mexico**.

There have **not been many problems on Native reservations because, unlike in many other states, in New Mexico the polling place is on the reservation and is run by local Native Americans**. Vigil-Giron said that it does not make sense to have non-Natives running those polls because it is necessary to have people there who can translate. Because most of the languages are unwritten, the HAVA requirement of accessibility through an audio device will be very helpful in this regard. Vigil-Giron said she was surprised to learn while testifying at the Voting Rights Act commission hearings of the lack of sensitivity to these issues and the common failure to provide assistance in language minority areas.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

In 2004 the U.S. Attorney, a Republican, suddenly announced he was launching an investigation into voter fraud without consulting the Secretary of State's office. After all of that, there was maybe one prosecution. Even the allegations involving third party groups and voter registration are often misleading. People doing voter registration drives encourage voters to register if they are unsure if they are already registered, and the voter does not even realize that his or her name will then appear on the voter list twice. The bigger problem is where registrations do not get forwarded to election administrators and the voter does not end up on the voting list on Election Day. This is voter intimidation in itself, Vigil-Giron believes. It is very discouraging for that voter and she wonders whether he or she will try again.

Under the bill passed in 2004, third parties are required to turn around voter registration forms very quickly between the time they get them and when they must be returned. If they fail to return them within 48 hours of getting them, they are penalized. This, Vigil-Giron believes, is unfair. She has tried to get the Legislature to look at this issue again.

Regarding allegations of vote buying in Espanola, Vigil-Giron said that the Attorney General is investigating. The problem in that area of New Mexico is that they are still using rural routes, so they have not been able to properly district. There has, as a result, been manipulation of where people vote. Now they seem to have pushed the envelope too far on this. The investigation is not just about vote buying, however. There have also been allegations of voters being denied translators as well as assistance at the polls.

Vigil-Giron believes there was voter suppression in Ohio in 2004. County officials knew thirty days out how many people had registered to vote, they knew how many voters there would be. Administrators are supposed to use a formula for allocation of voting machines based on registered voters. Administrators in Ohio ignored this. As a result, people were turned away at the polls or left because of the huge lines. This, she believes, was a case of intentional vote suppression.

A few years ago, Vigil-Giron heard that there may have been people voting in New Mexico and a bordering town in Colorado. She exchanged information with Colorado administrators and it turned out that there were no cases of double voting.

Recommendations

- Vigil-Giron believes that linking voter registration databases across states may be a way to see if people who are registered twice are in fact voting twice.
- The key to improving the process is better trained poll workers, who are certified, and know what to look for on Election Day. These poll workers should then work with law enforcement to ensure there are no transgressions.
- There should be stronger teeth in the voter fraud laws. For example, it should be more than a fourth degree felony, as is currently the case.

Sarah Ball Johnson, Executive Director of the State Board of Elections, Kentucky

Procedures for Handling Fraud

Fraud complaints are directed first to the state Board of Elections. Unlike boards in other states, Kentucky's has no investigative powers. Instead, they work closely with both the Attorney General and the U.S. Attorney. Especially since the current administration took office, they have found the U.S. Attorney an excellent partner in pursuing fraud cases, and have seen many prosecutions in the last six years. She believes that there has been no increase in the incidence of fraud, but rather the increase in prosecutions is related to increased scrutiny and more resources.

Major Types of Fraud and Intimidation

Johnson says that vote buying and voter intimidation go hand in hand in Kentucky. While historically fraud activity focused on election day, in the last 20 years it has moved into absentee voting. In part, this is because new voting machines aren't easy to manipulate in the way

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

that paper ballots were open to manipulation in the past, especially in distant rural counties. For this reason, she is troubled by the proliferation of states with early voting, but notes that there is a difference between absentee ballot and early voting on machines, which is far more difficult to manipulate.

Among the cases of absentee ballot fraud they have seen, **common practice involves a group of candidates conspiring together to elect their specific slate. Nursing homes are an especially frequent target.** Elderly residents request absentee ballots, and then workers show up and 'help' them vote their ballots. **Though there have been some cases in the Eastern district of election day fraud, most have been absentee.**

Johnson argues that it is **hard to distinguish between intimidation and vote buying.** They have also **seen instances where civic groups and church groups intimidate members to vote in a specific manner, not for reward, but under threat of being ostracized or even telling them they will go to hell.**

While she is **aware of allegations of intimidation by the parties regarding minority precincts in Louisville, the board hasn't received calls about it and there haven't been any prosecutions.**

Challengers

**Challengers are permitted at the polls in Kentucky.** Each party is allowed two per location, and they must file proper paperwork. **There is a set list of defined reasons for which they can challenge a voter, such as residency, and the challengers must also fill out paperwork to conduct a challenge.**

As for allegations of challengers engaging in intimidation in minority districts, Johnson notes that challengers did indeed register in Jefferson County, and filed the proper paperwork, although they ultimately did not show up on election day.

She finds that **relatively few challengers end up being officially registered, and that the practice has grown less common in recent years.** This is due more to a change of fashion than anything. **And after all, those wishing to affect election outcomes have little need for challengers in the precinct when they can target absentee voting instead.**

**In the event that intimidation is taking place, Kentucky has provisions to remove disruptive challengers, but this hasn't been used to her knowledge.**

Prosecutions

**Election fraud prosecutions in Kentucky have only involved vote buying.** This may be because that **it is easier to investigate, by virtue of a cash and paper trail which investigators can follow.** It is **difficult to quantify any average numbers about the practice from this, due in part to the five year statute of limitations on vote buying charges.** However, **she does not believe that vote-buying is pervasive across the state, but rather confined to certain pockets.**

Vote-hauling Legislation

**Vote hauling is a common form of vote buying by another name.** Individuals are **legally paid to drive others to the polls, and then divide that cash in order to purchase votes.** Prosecutions have confirmed that vote hauling is used for this purpose. While the Secretary of State has been committed to legislation which would ban the practice, it has failed to pass in the past two sessions.

Paying Voter Registration Workers Legislation

**A law forbidding people to pay workers by the voter registration card or for obtaining cards with registrations for a specific party was passed this session.** Individuals working as part of a registration campaign may still be paid by hour. Kentucky's experience in the last presidential election illustrates the problems arising from paying individuals by the card. That contest included a constitutional amendment to ban gay marriage on the ballot, which naturally attracted the attention of many national groups. **One group paying people by the card resulted in the registrar being inundated with cards, including many duplicates in the same bundle, variants on names, and variants on addresses.** **As this practice threatens to overwhelm the voter registration process, Kentucky views it as constituting malicious fraud.**

Deceptive practices

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Other than general reports in the news, Johnson hasn't received any separate confirmation or reports of deceptive practices, i.e., false and misleading information being distributed to confuse voters.

Effect of Kentucky's Database

Johnson believes Kentucky's widely praised voter registration database is a key reason why the state doesn't have as much fraud as it might, especially the types alleged elsewhere like double and felon voting. While no database is going to be perfect, the connections with other state databases such as the DMV and vital statistics have been invaluable in allowing them to aggressively purge dead weight and create a cleaner list. When parties use their database list they are notably more successful. Johnson wonders how other states are able to conduct elections without a similar system.

Some factors have made especially important to their success.

- When the database was instituted in 1973, they were able to make everyone in the state re-register and thus start with a clean database. However, it is unlikely any state could get away with this today.
- She is also a big supporter of a full Social Security number standard, as practiced in Kentucky. The full Social Security, which is compared to date of birth and letters in the first and last name, automatically makes matching far more accurate. The huge benefits Kentucky has reaped make Johnson skeptical of privacy concerns arguing for an abbreviated Social Security number. Individuals are willing to submit their Social Security number for many lesser purposes, so why not voting? And in any event, they don't require a Social Security number to register (unlike others such as Georgia). Less than a percent of voters in Kentucky are registered under unique identifiers, which the Board of Elections then works to fill in the number through cross referencing with the DMV.

Recommendations

- Johnson believes the backbone of effective elections administration must be standardized procedures, strong record keeping, and detailed statutes. In Kentucky, all counties use the same database and the same pre election day forms. Rather than seeing that as oppressive, county officials report that the uniformity makes their jobs easier.
- This philosophy extends to the provisional ballot question. While they did not have a standard in place like HAVA's at the time of enactment, they worked quickly to put a uniform standard in place.
- They have also modified forms and procedures based on feedback from prosecutors. Johnson believes a key to enforcing voting laws is working with investigators and prosecutors and ensuring that they have the information they need to mount cases.
- She also believes public education is important, and that the media could do more to provide information about what is legal and what is illegal. Kentucky tries to fulfill this role by information in polling places, press releases, and high profile press conferences before elections. She notes that they deliberately use language focusing on fraud and intimidation.
- Johnson is somewhat pessimistic about reducing absentee ballot fraud. Absentee ballots do have a useful function for the military and others who cannot get to the polling place, and motivated individuals will always find a way to abuse the system if possible. At a minimum, however, she recommends that absentee ballots should require an excuse. She believes this has helped reduce abuse in Kentucky, and is wary of no-excuse practices in other states.

Stephen Ansolobehere, Massachusetts Institute of Technology

Chandler Davidson, Rice University

Methodology suggestions

In analyzing instances of alleged fraud and intimidation, we should look to criminology as a model. In criminology, experts use two sources:

011168

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

the Uniform Crime Reports, which are all reports made to the police, and the Victimization Survey, which asks the general public whether a particular incident has happened to them. After surveying what the most common allegations are, we should conduct a survey of the general public that asks whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data collection. Mr. Ansolobehere recommended Jonathan Krosnick, Doug Rivers, and Paul Sniderman at Stanford; Donald Kinder and Arthur Lupia at Michigan; Edward Carmines at Indiana; and Phil Tetlock at Berkeley. In the alternative, Mr. Ansolobehere suggested that the EAC might work with the Census Bureau to have them ask different, additional questions in their Voter Population Surveys.

Mr. Chandler further suggested it is important to talk to private election lawyers, such as Randall Wood, who represented Ciro Rodriguez in his congressional election in Texas. Mr. Ansolobehere also recommended looking at experiments conducted by the British Election Commission.

Incidents of Fraud and Intimidation

Mr. Davidson's study for the Lawyers Committee for Civil Rights on the Voting Rights Act documented evidence of widespread difficulty in the voting process. However, he did not attempt to quantify whether this was due to intentional, malevolent acts. In his 2005 report on ballot security programs, he found that there were many allegations of fraud made, but not very many prosecutions or convictions. He saw many cases that did go to trial and the prosecutors lost on the merits.

In terms of voter intimidation and vote suppression, Mr. Davidson said he believes the following types of activities do occur:

- videotaping of voters' license plates;
- poll workers asking intimidating questions;
- groups of officious-looking poll watchers at the poll sites who seem to be some sort of authority looking for wrongdoing;
- spreading of false information, such as phone calls, flyers, and radio ads that intentionally mislead as to voting procedures.

Mr. Ansolobehere believes the biggest problem is absentee ballot fraud. However, many of these cases involve people who do not realize what they are doing is illegal, for example, telling someone else how to vote. Sometimes there is real illegality occurring however.

For example:

- vote selling involving absentee ballots,
- the filling out of absentee ballots en masse,
- people at nursing homes filling out the ballots of residents, and
- there are stories about union leaders getting members to vote a certain way by absentee ballot.

This problem will only get bigger as more states liberalize their absentee ballot rules. Mr. Chandler agreed that absentee ballot fraud was a major problem.

Recommendations

- Go back to "for cause" absentee ballot rules, because it is truly impossible to ever ensure the security of a mail ballot. Even in Oregon, there was a study showing fraud in their vote by mail system.
- False information campaigns should be combated with greater voter education. Los Angeles County's voter education program should be used as a model.

Tracey Campbell, author, *Deliver the Vote*

While less blatant than in previous eras, fraud certainly still occurs, and he mentions some examples in his book. The major trend of the past 60-70 years has been that these tactics have grown more subtle.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

While he hasn't conducted any scientific study of the current state of fraud, his sense as a historian is that it is seems naive, after generations of watching the same patterns and practices influence elections, to view suspect election results today as merely attributable to simple error.

Vote-buying and absentee fraud

Campbell sees fraud by absentee ballot and vote buying as the greatest threats to fair elections today. He says vote fraud is like real estate: location, location, location—the closer you can keep the ballots to the courthouse the better. **Absentee ballots create a much easier target for vote brokers who can manage voting away from the polling place, or even mark a ballot directly, in exchange for, say, \$50— or even more if an individual can bring their entire family.** He has noted some small counties where absentee ballots outnumber in-person ballots.

However, few people engaged in this activity would call it 'purchasing' a vote. Instead, it is candidate Jones' way of 'thanking' you for a vote you would have cast in any event. The issue is what happens if candidate Smith offers you more. Likewise, the politicians who engage in vote fraud don't see it as a threat to the republic but rather as a game they have to play in order to get elected.

Regional patterns

Campbell suggests such practices are more prevalent in the South than the Northern states, and even more so compared to the West. The South has long been characterized as particularly dangerous in intimidation and suppression practices—throughout history, one can find routine stories of deaths at the polls each year. While he maintains that fraud seems less likely in the Western states, he sees the explosion of mail in and absentee ballots there as asking for trouble.

Poll site closings as a means to suppress votes

Campbell points to a long historical record of moving poll sites in order to suppress votes. Polling places in the 1800s were frequently set-up on rail cars and moved further down the line to suppress black votes. He would include door-to-door canvassing practices here, as well as voting in homes, which was in use in Kentucky until only a few years ago. All of these practices have been justified as making polling places 'more accessible' while their real purpose has been to suppress votes.

Purge lists

Purge lists are, of course, needed in theory, yet Campbell believes the authority to mark names off the voter rolls presents extensive opportunity for abuse. For this reason, purging must be done in a manner that uses the best databases, and looks at only the most relevant information. When voters discover their names aren't on the list when they go to vote, for example, because they are "dead," it has a considerable demoralizing effect. **Wrongful purging takes place both because of incompetence and as a tool to intentionally disenfranchise.**

Campbell believes transparency is the real issue here. An hour after the polls close, we tend to just throw up our hands and look the other way, denying voters the chance to see that discrepancies are being rectified. He believes the cost in not immediately knowing election outcomes is a small price to pay for getting results rights and showing the public a transparent process.

Deceptive practices

Today's deceptive practices have are solidly rooted in Reconstruction-era practices—i.e. phony ballots, the Texas 'elimination' ballot. The ability to confuse voters is a powerful tool for those looking to sway elections.

Language minorities

Campbell argues there is a fine line between offering help to non-English speakers and using that help against them. A related issue, particularly in the South, is taking advantage of the illiterate.

Current intimidation

Another tactic Campbell considers an issue today is polling place layout: the further vote suppressers can keep people away from the

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

polls, the better. Practices such as **photographing people leaving a polling place** may also tie into **vote-buying**, where photos are used to **intimidate and validate purchased votes**. A good way to combat such practices is by **keeping electioneering as far from the polls as possible**.

Recommendations

- Specific voting administration recommendations Campbell advocates would include **reducing the use of absentee ballots and improving the protective zone around polling places**.
- Campbell would also like to see **enforcement against fraud stepped up and stiffer penalties enacted, as current penalties make the risk of committing fraud relatively low**. He compares the risk in election fraud similar to steroid use in professional sports—the potential value of the outcome is far higher than the risk of being caught or penalized for the infraction, so it is hard to prevent people from doing it. People need to believe they will pay a price for engaging in fraud or intimidation. Moreover, we need to have the will to kick people out of office if necessary.
- He is **skeptical of the feasibility of nonpartisan election administration**, as he believes it would be difficult to find people who care about politics yet won't lean one way or the other—such an attempt would be unlikely to get very far before accusations of partisanship emerged. He **considers the judiciary the only legitimate check on election fraud**.

Douglas Webber, Assistant Attorney General, Indiana, (defendant in the Indiana voter identification litigation)

Litigation

Status of litigation in Indiana: On January 12 the briefing was completed. The parties are waiting for a decision from the U.S. district judge. The judge understood that one of the parties would seek a stay from the 7<sup>th</sup> Circuit Court of Appeals. The parties anticipate a decision in late March or early April. Mr. Webber did the discovery and depositions for the litigation. Mr. Webber feared the plaintiffs were going to state in their reply brief that HAVA's statewide database requirement would resolve the problems alleged by the state. However, the plaintiffs failed to do so, relying on a Motor Voter Act argument instead. **Mr. Webber believes that the voter ID at issue will make the system much more user-friendly for the poll workers**. The Legislature passed the ID legislation, and the state is defending it, on the basis of the problem of the *perception* of fraud.

Incidents of fraud and intimidation

Mr. Webber thinks that **no one can put his or her thumb on whether there has been voter fraud in Indiana**. For instance, if **someone votes in place of another, no one knows about it**. **There have been no prosecuted cases of polling place fraud in Indiana. There is no recorded history of documented cases, but it does happen**. In the litigation, he used articles from around the country about instances of voter fraud, but even in those examples there were ultimately no prosecutions, for example the case of Milwaukee. He also stated **in the litigation that there are all kinds of examples of dead people voting---totaling in the hundreds of thousands of votes across the country**.

One interesting **example of actual fraud in Indiana occurred when a poll worker, in a poll using punch cards, glued the chads back and then punched out other chads for his candidate**. But this would not be something that would be addressed by an ID requirement.

He also believes that the perception that the polls are loose can be addressed by the legislature. The legislature does not need to wait to see if the statewide database solves the problems and therefore affect the determination of whether an ID requirement is necessary. When he took the deposition of the Republican Co-Director, he said he thought Indiana was getting ahead of the curve. That is, there have been problems around the country, and confidence in elections is low. Therefore Indiana is now in front of getting that confidence back.

Mr. Webber stated that the **largest vote problem in Indiana is absentee ballots. Absentee ballot fraud and vote buying are the most documented cases**. It used to be the law that applications for absentee ballots could be sent anywhere. **In one case absentee votes were**

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

exchanged for "a job on election day"---meaning one vote for a certain price. The election was contested and the trial judge found that although there was vote fraud, the incidents of such were less than the margin of victory and so he refused to overturn the election. Mr. Webber appealed the case for the state and argued the judge used the wrong statute. The Indiana Supreme Court agreed and reversed. **Several people were prosecuted as a result – those cases are still pending.**

Process

In Indiana, voter complaints first come to the attorney for the county election board who can recommend that a hearing be held. If criminal activity was found, the case could be referred to the county prosecutor or in certain instances to the Indiana Attorney General's Office. In practice, the Attorney General almost never handles such cases.

Mr. Webber has had experience training county of election boards in preserving the integrity and security of the polling place from political or party officials. Mr. Webber stated that the Indiana voter rolls need to be culled. He also stated that in Southern Indiana a large problem was vote buying while in Northern Indiana a large problem was based on government workers feeling compelled to vote for the party that gave them their jobs.

Recommendations

- Mr. Webber believes that all election fraud and intimidation complaints should be referred to the Attorney General's Office to circumvent the problem of local political prosecutions. The Attorney General should take more responsibility for complaints of fraud because at the local level, politics interferes. At the local level, everyone knows each other, making it harder prosecute.
- Indiana currently votes 6 am to 6 pm on a weekday. Government workers and retirees are the only people who are available to work the polls. Mr. Webber suggested that the biggest change should be to move elections to weekends. This would involve more people acting as poll workers who would be much more careful about what was going on.
- Early voting at the clerk's office is good because the people there know what they are doing. People would be unlikely to commit fraud at the clerk's office. This should be expanded to other polling places in addition to that of the county clerk.
- Finally, Mr. Webber believes polling places should be open longer, run more professionally but that there needs to be fewer of them so that they are staffed by only the best, most professional people.

Heather Dawn Thompson, Director of Government Relations, National Congress of American Indians

Recent trends

Native election protection operations have intensified recently for several reasons. While election protection efforts in Native areas have been ongoing, leaders realized that they were failing to develop internal infrastructure or cultivate locally any of the knowledge and expertise which would arrive and leave with external protection groups.

Moreover, in recent years partisan groups have become more aware of the power of the native vote, and have become more active in native communities. This has partly resulted in an extreme increase in voter intimidation tactics. **As native communities are easy to identify, easy to target, and generally dominated by a single party, they are especially vulnerable to such tactics.**

Initially, reports of intimidation were only passed along by word of mouth. But it became such a problem in the past 5 to 6 years that tribal leaders decided to raise the issue to the national level. Thompson points to the Cantwell election in 2000 and the Johnson election in South Dakota in 2002 as tipping points where many began to realize the Indian vote could matter in Senate and national elections.

Thompson stressed that Native Vote places a great deal of importance on being nonpartisan. While a majority of native communities vote Democratic, there are notable exceptions, including communities in Oklahoma and Alaska, and they have both parties engaging in aggressive tactics. However, she believes the most recent increase in suppression and intimidation tactics have come from Republican Party organizations.

Nature of Suppression/Intimidation of Native Voters

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Thompson categorizes suppression into judge related and poll-watcher related incidents, both of which may be purposeful or inadvertent, as well as longstanding legal-structural constraints.

Structural problems

One example of inadvertent suppression built into the system stems from the fact that many Indian communities also include significant numbers of non-Indians due to allotment. Non-Indians tend to be most active in the state and local government while Indians tend to be more involved in the tribal government. Thus, the individuals running elections end up being non-Indian. Having Indians vote at polling places staffed by non-Indians often results in incidents of disrespect towards Native voters (Thompson emphasized the considerable racism which persists against Indians in these areas). Also, judges aren't familiar with Indian last names and are more dismissive of solving discrepancies with native voters.

Structural problems also arise from laws which mandate that the tribal government cannot run state or local elections. In places like South Dakota, political leaders used to make it intentionally difficult for Native Americans to participate in elections. For example, state, local and federal elections could not be held in the same location as tribal elections, leading to confusion when tribal and other elections are held in different locations. Also, it is common to have native communities with few suitable sites, meaning that a state election held in a secondary location can suddenly impose transportation obstacles.

Photo ID Issues

Thompson believes both state level and HAVA photo ID requirements have a considerable negative impact. For a number of reasons, many Indian voters don't have photo ID. Poor health care and poverty on reservations means that many children are born at home, leading to a lack of birth certificates necessary to obtain ID. Also, election workers and others may assume they are Hispanic, causing additional skepticism due to citizenship questions. There is a cultural issue as well—historically, whenever Indians register with the federal government it has been associated with a taking of land or removal of children. Thus many Indians avoid registering for anything with the government, even for tribal ID.

Thompson also offered examples of how the impact of ID requirements had been worsened by certain rules and the discriminatory way they have been carried out. In the South Dakota special election of 2003, poll workers told Native American voters that if they did not have ID with them and they lived within sixty miles of the precinct, the voter had to come back with ID. The poll workers did not tell the voters that they could vote by affidavit ballot and not need to return, as required by law. This was exacerbated by the fact that the poll workers didn't know the voters—as would be the case with non-Indian poll workers and Indian voters. Many left the poll site without voting and did not return.

In Minnesota, the state tried to prohibit the use of tribal ID's for voting outside of a reservation, even though Minnesota has a large urban Native population. Thompson believes this move was very purposeful, and despite any reasonable arguments from the Secretary of State, they had to file a lawsuit to stop the rule. They were very surprised to find national party representatives in the courtroom when they went to deal with lawsuit, representatives who could only have been alerted through a discussion with the Secretary of State.

Partisan Poll-Monitoring

Thompson believes the most purposeful suppression has been perpetrated by the party structures on an individual basis, of which South Dakota is a great example.

Some negative instances of poll monitoring are not purposeful. Both parties send in non-Indian, non-Western lawyers, largely from the East Coast, which can lead to uncomfortable cultural clashes. These efforts display a keen lack of understanding of these communities and the best way to negotiate within in them. But while it may be intimidating, it is not purposeful.

Yet there are also many instances of purposeful abuse of poll monitoring. While there were indeed problems during the 2002 Johnson election, it was small compared to the Janklow special election. Thompson says Republican workers shunned cultural understanding outreach, and had an extensive pamphlet of what to say at polls and were very aggressive about it. In one tactic, every time a voter

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

would come up with no ID, poll monitors would repeat "You can't vote" over and over again, causing many voters to leave. This same tactic appeared across reservations, and eventually they looked to the Secretary of State to intervene. In another example, the head of poll watchers drove from poll to poll and told voters without IDs to go home, to the point where the chief of police was going to evict him from the reservation. In Minnesota, on the Red Lake reservation, police actually did evict an aggressive poll watcher—the fact that the same strategies are employed several hundred miles apart points to standardized instructions.

None of these incidents ever went to court. Thompson argues this is due to few avenues for legal recourse. In addition, it is inherently difficult to settle these things, as they are he said-she said incidents and take place amidst the confusion of Election Day. Furthermore, poll watchers know what the outline of the law is, and they are careful to work within those parameters, leaving little room for legal action.

Other seeming instances of intimidation may be purely inadvertent, such as when, in 2002, the U.S. Attorney chose Election Day to give out subpoenas, and native voters stayed in their homes. In all fairness, she believes this was a misunderstanding.

The effect of intimidation on small communities is especially strong and is impossible to ultimately measure, as the ripple effect of rumors in insular communities can't be traced. In some communities, they try to combat this by using the Native radio to encourage people to vote and dispel myths.

She has suggestions for people who can describe incidents at a greater level of detail if interested.

#### Vote Buying and Fraud

They haven't found a great deal of evidence on vote-buying and fraud. When cash is offered to register voters, individuals may abuse this, although Thompson believes this is not necessarily unique to the Native community, but a reflection of high rates of poverty. This doesn't amount to a concerted effort at conspiracy, but instead represents isolated incidents of people not observing the rules. While Thompson believes looking into such incidents is a completely fair inquiry, she also believes it has been exploited for political purposes and to intimidate. For example, large law enforcement contingents were sent to investigate these incidents. As Native voters tend not to draw distinctions between law enforcement and other officials, this made them unlikely to help with elections.

#### Remedies

- As far as voter suppression is concerned, Native Vote has been asking the Department of Justice to look into what might be done, and to place more emphasis on law enforcement and combating intimidation. They have been urging the Department to focus on this at least much as it is focusing on enforcement of Section 203. Native groups have complained to DOJ repeatedly and DOJ has the entire log of handwritten incident reports they have collected. Therefore, Thompson recommends more DOJ enforcement of voting rights laws with respect to intimidation. People who would seek to abuse the process need to believe a penalty will be paid for doing so. Right now, there is no recourse and DOJ does not care, so both parties do it because they can.
- Certain states should rescind bars on nonpartisan poll watchers on Election Day; Thompson believes this is contrary to the nonpartisan, pro-Indian presence which would best facilitate voting in Native communities.
- As discussed above, Thompson believes ID requirements are a huge impediment to native voters. At a minimum, Thompson believes all states should be explicit about accepting tribal ID on Election Day.
- Liberalized absentee ballot rules would also be helpful to Native communities. As many Indian voters are disabled and elderly, live far away from their precinct, and don't have transportation, tribes encourage members to vote by absentee ballot. Yet obstacles remain. Some voters are denied a chance to vote if they have requested a ballot and then show up at the polls. Thompson believes South Dakota's practice of tossing absentee ballots if a voter shows up at the ED would serve as an effective built-in protection. In addition, she believes there should be greater scrutiny of GOTV groups requesting absentee ballots without permission. Precinct location is a longstanding issue, but Thompson recognizes that states have limited resources. In the

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**absence of those resources, better absentee ballot procedures are needed.**

- **Basic voter registration issues and access** are also important in native communities and **need to be addressed.**
- Thompson is **mixed on what restrictions should be placed on poll watcher behavior, as she believes open elections and third party helpers are both important.** However, she would be **willing to explore some sort of stronger recourse and set of rules concerning poll watchers' behavior.** **Currently, the parties are aware that no recourse exists, and try to get away with what they will.** This is not unique to a single party—both try to stay within law while shaking people up. The existing VRA provision is 'fluffy'—unless you have a consent decree, you have very little power. Thompson thinks a **general voter intimidation law that is left a bit broad but that nonetheless makes people aware of some sort of kickback could be helpful.**

Jason Torchinsky, Assistant General Counsel, American Center for Voting Rights

Regarding the August 2005 Report

**ACVR has not followed up on any of the cases it cited in the 2005 report to see if the allegations had been resolved in some manner.** Mr. Torchinsky stated that **there are problems with allegations of fraud in the report and prosecution---just because there was no prosecution, does not mean there was no vote fraud.** He believes that it is **very hard to come up with a measure of voter fraud short of prosecution.** Mr. Torchinsky does not have a good answer to resolve this problem.

P. 35 of the Report indicates that there were coordinated efforts by groups to coordinate fraudulent voter registrations. P. 12 of the Ohio Report references a RICO suit filed against organizations regarding fraudulent voter registrations. Mr. Torchinsky does not know what happened in that case. He stated that there was a drive to increase voter registration numbers regardless of whether there was an actual person to register. He stated that when you have an organization like ACORN involved all over the place, there is reason to believe it is national in scope. When it is the same groups in multiple states, this leads to the belief that it is a concerted effort.

Voting Problems

Mr. Torchinsky stated **there were incidents of double voting---ex. a double voter in Kansas City, MO.** If the statewide voter registration database requirement of HAVA is properly implemented, he believes it will stop multiple voting in the same state. He supports the HAVA requirement, if implemented correctly. Since Washington State implemented its statewide database, the Secretary of State has initiated investigations into felons who voted. In Philadelphia the major problem is permitting polling places in private homes and bars – even the homes of party chairs.

Mr. Torchinsky believes that **voter ID would help, especially in cities in places like Ohio and Philadelphia, PA.** The ACVR legislative fund supports the Real ID requirements suggested by the Carter-Baker Commission. Since federal real ID requirements will be in place in 2010, any objection to a voter ID requirement should be moot.

Mr. Torchinsky stated that there are two major poll and absentee voting problems---(1) **fraudulent votes-ex. dead people voting in St. Louis and (2) people voting who are not legally eligible-ex. felons in most places.** He also believes that **problems could arise in places that still transport paper ballots from the voting location to a counting room.** However, he does not believe this is as widespread a problem now as it once was.

Suggestions

**Implement the Carter-Baker Commission recommendations because they represent a reasonable compromise between the political parties.**

Joseph Rich, former Director of the Voting Section, Civil Rights Division, U.S. Department of Justice

Data Collection and Monitoring

- The **(Voting) section developed a new database before the 2004 election to log complaint calls and what was done to follow up on them. They opened many investigations as a result of these complaints, including one on the long lines in Ohio (see DOJ letter on website, as well as critical commentary on the DOJ letter's analysis). DOJ found no Section 2 violation in Ohio. John Tanner should be able to give us this data. However, the database does not include complaints that were received by monitors and observers in the field.**
- **All attorney observers in the field are required to submit reports after Election Day to the Department. These reports would give us a very good sense of the scope and type of problems that arose on that day and whether they were resolved on the spot or required further action.**
- **The monitoring in 2004 was the biggest operation ever. Prior to 2000, only certain jurisdictions could be observed – a VRA covered jurisdiction that was certified or a jurisdiction that had been certified by a court, e.g. through a consent decree. Since that time, and especially in 2004, the Department has engaged in more informal "monitoring." In those cases, monitors assigned to certain jurisdictions, as opposed to observers, can only watch in the polling place with permission from the jurisdiction. The Department picked locations based on whether they had been monitored in the past, there had been problems before, or there had been allegations in the past. Many problems that arose were resolved by monitors on the spot.**

Processes for Cases not Resolved at the Polling Site

- **If the monitor or observer believes that a criminal act has taken place, he refers it to the Public Integrity Section (PIN). If it is an instance of racial intimidation, it is referred to the Civil Rights Criminal Division. However, very few such cases are prosecuted because they are very hard to prove. The statutes covering such crimes require actual violence or the threat of violence in order to make a case. As a result, most matters are referred to PIN because they operate under statutes that make these cases easier to prove. In general, there are not a high number of prosecutions for intimidation and suppression.**
- **If the act is not criminal, it may be brought as a civil matter, but only if it violated the Voting Rights Act – in other words, only if there is a racial aspect to the case. Otherwise the only recourse is to refer it to PIN.**
- **However, PIN tends not to focus on intimidation and suppression cases, but rather cases such as alleged noncitizen voting, etc. Public Integrity used to only go after systematic efforts to corrupt the system. Now they focus on scattered individuals, which is a questionable resource choice. Criminal prosecutors over the past 5 years have been given more resources and more leeway because of a shift in focus and policy toward noncitizens and double voting, etc.**
- **There have been very few cases brought involving African American voters. There have been 7 Section 2 cases brought since 2001 – only one was brought on behalf of African American voters. That case was initiated under the Clinton administration. The others have included Latinos and discrimination against whites.**

Types of Fraud and Intimidation Occurring

- **There is no evidence that polling place fraud is a problem. There is also no evidence that the NVRA has increased the opportunity for fraud. Moreover, regardless of NVRA's provisions, an election official can always look into a voter's registration if he or she believes that person should no longer be on the list. The Department is now suing Missouri because of its poor registration list.**

011176

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- The **biggest problem is with absentee ballots**. The photo ID movement is a **vote suppression strategy**. This type of suppression is a bigger problem than intimidation. There has been an increase in vote suppression over the last five years, but it has been indirect, often in the way that laws are interpreted and implemented. Unequal implementation of ID requirements at the polls based on race would be a VRA violation.
- The **most common type of intimidation occurring is open hostility by poll workers toward minorities**. It is a judgment call whether this is a crime or not – **Craig Donsanto of PIN decides if it rises to a criminal matter**.
- **Election Day challenges at the polls could be a VRA violation but such a case has never been formally pursued**. Such cases are often resolved on the spot. Development of a pre-election challenge list targeted at minorities would be a VRA violation but this also has never been pursued. These are choices of current enforcement policy.
- **Long lines due to unequal distribution of voting machines based on race, list purges based on race and refusal to offer a provisional ballot on the basis of race would also be VRA violations**.

Recommendations

- Congress should **pass a new law that allows the Department to bring civil actions for suppression that is NOT race based, for example, deceptive practices or wholesale challenges to voters in jurisdictions that tend to vote heavily for one party**.
- **Given the additional resources and latitude given to the enforcement of acts such as double voting and noncitizen voting, there should be an equal commitment to enforcement of acts of intimidation and suppression cases**.
- There should also be increased **resources dedicated to expanded monitoring efforts**. This might be the best use of resources since **monitors and observers act as a deterrent to fraud and intimidation**.

Joseph Sandler, Counsel to the Democratic National Committee

2004-Administrative Incompetence v. Fraud

Sandler believes the **2004 election was a combination of administrative incompetence and fraud**. Sandler stated there was a deliberate effort by the Republicans to disenfranchise voters across the country. This was accomplished by **mailing out cards to registered voters and then moving to purge from the voters list those whose cards were returned**. Sandler indicated that **in New Mexico there was a deliberate attempt by Republicans to purge people registered by third parties**. He stated that there were intentional efforts to disenfranchise voters by election officials like Ken Blackwell in Ohio.

The problems with machine distribution in 2004 were not deliberate. However, Sandler believes that a large problem exists in the states because there are no laws that spell out a formula to allocate so many voting machines per voter.

Sandler was asked how often names were intentionally purged from the voter lists. He responded that there will be a lot of names purged as a result of the creation of the voter lists under HAVA. However, Sandler stated **most wrongful purging results from incompetence**.

Sandler also said there was not much intimidation at the polls because most such efforts are deterred and that the last systematic effort was in Philadelphia in 2003 where Republicans had official looking cars and people with badges and uniforms, etc.

Sandler stated that **deliberate dissemination of misinformation was more incidental, with individuals misinforming and not a political party**. Disinformation did occur in small Spanish speaking communities.

Republicans point to instances of voter registration fraud but Sandler believes it did not occur, except for once in a blue moon. Sandler did not believe non-citizen voting was a problem. He also does not believe that there is voter impersonation at the polls and that Republicans allege this as a way of disenfranchising voters through restrictive voter identification rules.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Fraud and Intimidation Trends

- Sandler stated that **over the years there has been a shift from organized efforts to intimidate minority voters through voter identification requirements, improper purging, failure to properly register voters, not allocating enough voting machines, failure to properly use the provisional ballot, etc., by voter officials as well as systematic efforts by Republicans to deregister voters.**
- At the federal level, **Sandler said, the voting division has become so politicized that it is basically useless now on intimidation claims. At the local level, Sandler does not believe politics prevents or hinders prosecution for vote fraud.**

Sandler's Recommendations:

- Moving the voter lists to the state level is a good idea where carefully done
- Provisional ballots rules should follow the law and not be over-used
- No voter ID
- Partisanship should be taken out of election administration, perhaps by giving that responsibility by someone other than the Secretary of State. There should at least be conflict of interest rules
- Enact laws that allow private citizens to bring suit under state law

All suggestions from the DNC Ohio Report:

1. The Democratic Party must continue its efforts to monitor election law reform in all fifty states, the District of Columbia and territories.
2. **States should be encouraged to codify into law all required election practices, including requirements for the adequate training of official poll workers.**
3. **States should adopt uniform and clear published standards for the distribution of voting equipment and the assignment of official pollworkers among precincts, to ensure adequate and nondiscriminatory access. These standards should be based on set ratios of numbers of machines and pollworkers per number of voters expected to turn out, and should be made available for public comment before being adopting.**
4. **States should adopt legislation to make clear and uniform the rules on voter registration.**
5. The Democratic Party should monitor the processing of voter registrations by local election authorities on an ongoing basis to ensure the timely processing of registrations and changes, including both newly registered voters and voters who move within a jurisdiction or the state, and the Party should ask state Attorneys General to take action where necessary to force the timely updating of voter lists.
6. **States should be urged to implement statewide voter lists in accordance with the Help America Vote Act ("HAVA"), the election reform law enacted by Congress in 2002 following the Florida debacle.**
7. **State and local jurisdictions should adopt clear and uniform rules on the use of, and the counting of, provisional ballots, and distribute them for public comment well in advance of each election day.**
8. The Democratic Party should monitor the purging and updating of registered voter lists by local officials, and the Party should challenge, and ask state Attorneys General to challenge, unlawful purges and other improper list maintenance practices.
9. **States should not adopt requirements that voters show identification at the polls, beyond those already required by federal law (requiring that identification be shown only by first time voters who did not show identification when registering.)**
10. **State Attorneys General and local authorities should vigorously enforce, to the full extent permitted by state law, a voter's right to vote without showing identification.**
11. Jurisdictions should be encouraged to use precinct-tabulated optical scan systems with a computer assisted device at each precinct, in preference to touchscreen ("direct recording equipment" or "DRE") machines.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

12. Touchscreen (DRE) machines should not be used until a reliable voter verifiable audit feature can be uniformly incorporated into these systems. In the event of a recount, the paper or other auditable record should be considered the official record.
13. Remaining punchcard systems should be discontinued.
14. **States should ask state Attorneys General to challenge unfair or discriminatory distribution of equipment and resources where necessary, and the Democratic Party should bring litigation as necessary.**
15. Voting equipment vendors should be required to disclose their source code so that it can be examined by third parties. No voting machine should have wireless connections or be able to connect to the Internet.
16. Any equipment used by voters to vote or by officials to tabulate the votes should be used exclusively for that purpose. That is particularly important for tabulating/aggregating computers.
17. States should adopt "no excuse required" standards for absentee voting.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

011186

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

18. States should make it easier for college students to vote in the jurisdiction in which their school is located.
19. States should develop procedures to ensure that voting is facilitated, without compromising security or privacy, for all eligible voters living overseas.
20. **States should make voter suppression a criminal offense at the state level, in all states.**
21. **States should improve the training of pollworkers.**
22. **States should expend significantly more resources in educating voters on where, when and how to vote.**
23. **Partisan officials who volunteer to work for a candidate should not oversee or administer any elections.**

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

John Ravitz, Executive Director, New York City Board of Elections

Process

If there is an allegation of fraud or intimidation, the commissioners can rule to act on it. For example, in 2004 there were allegations in Queens that people had registered to vote using the addresses of warehouses and stores. The Board sent out teams of investigators to look into this. The Board then developed a challenge list that was to be used at the polls if any of the suspect voters showed up to vote. If the allegation rises to a criminal level, the Board will refer it to the county district attorney. If a poll worker or election official is involved, the Board may conduct an internal investigation. That individual would be interviewed, and if there is validity to the claim, the Board would take action.

Incidences of Fraud and Intimidation

Mr. Ravitz says there have been **no complaints about voter intimidation since he has been at the Board**. There have been instances of over-aggressive poll workers, but nothing threatening. Voter fraud has also generally not been a problem.

**In 2004, the problem was monitors from the Department of Justice intimidating voters. They were not properly trained, and were doing things like going into the booth with voters.** The Board had to contact their Department supervisors to put a stop to it.

**Charges regarding "ballot security teams" have generally just been political posturing.**

**The problem of people entering false information on voter registration forms is a problem. However, sometimes a name people allege is false actually turns out to be the voter's real name. Moreover, these types of acts do not involve anyone actually casting a fraudulent ballot.**

**With respect to the issue of voters being registered in both New York and Florida, the Board now compares its list with that of Florida and other places to address the problem. This will be less of an issue with the use of statewide voter registration databases, as information becomes easier to share.** Despite the number of people who were on the voter registration lists of both jurisdictions, there was no one from those lists who voted twice.

**Most of the problems at the polls have to do with poll workers not doing what they are supposed to do, not any sort of malfeasance. This indicates that improved training is the most important measure we can take.**

**There have been instances in which poll workers ask voters for identification when they shouldn't. However, the poll workers seem to do it when they cannot understand the name when the voter tells it to them. The Board has tried to train them that no matter what, the poll worker cannot ask for identification in order to get the person's name.**

**Absentee ballot fraud has also not been a problem in New York City. This is likely because absentee ballots are counted last – eight days after election day. This is so that they can be checked thoroughly and verified. This is a practice other jurisdictions might consider.**

**New York City has not had a problem with ex-felons voting or with ex-felons not knowing their voting rights. The City has not had any problems in recent years with deceptive practices, such as flyers providing misinformation about voting procedures.**

Recommendations

**Better poll worker training**

John Tanner, Director, Voting Section, Civil Rights Division, U.S. Department of Justice

Mr. Tanner would not give us any information about or data from the section's election complaint in-take phone logs; data or even general information from the Interactive Case Management (ICM) system-its formal process for tracking and managing work activities in pursuing complaints and potential violations of the voting laws; and would give us only a selected few samples of attorney-observer reports,

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

reports that every Voting Section attorney who is observing elections at poll sites on Election Day is required to submit. **He would not discuss in any manner any current investigations or cases the section is involved in.** He also did not believe it was his position to offer us recommendations as to how his office, elections, or the voting process might be improved.

Authority and Process

The Voting Section, in contrast to the Public Integrity section as Craig Donsanto described it, typically looks only at systemic problems, not problems caused by individuals. Indeed, the section never goes after individuals because it does not have the statutory authority to do so. In situations in which individuals are causing problems at the polls and interfering with voting rights, the section calls the local election officials to resolve it.

Federal voting laws only apply to state action, so the section only sues local governments – it does not have any enforcement power over individuals. Most often, the section enters into consent agreements with governments that focus on poll worker training, takes steps to restructure how polls are run, and deals with problems on Election Day on the spot. Doing it this way has been most effective – for example, while the section used to have the most observers in the South, systematic changes forced upon those jurisdictions have made it so now the section does not get complaints from the South.

The section can get involved even where there is no federal candidate on the ballot if there is a racial issue under the 14<sup>th</sup> and 15<sup>th</sup> Amendments.

When the section receives a complaint, attorneys first determine whether it is a matter of individuals or systemic. When deciding what to do with the complaint, the section errs on the side of referring it criminally because they do not want civil litigation to complicate a possible criminal case.

When a complaint comes in, the attorneys ask questions to see if there are even problems there that the complainant is not aware are violations of the law. For example, in the Boston case, the attorney did not just look at Spanish language cases under section 203, but also brought a Section 2 case for violations regarding Chinese and Vietnamese voters. When looking into a case, the attorneys look for specificity, witnesses and supporting evidence.

Often, lawsuits bring voluntary compliance.

Voter Intimidation

Many instances of what some people refer to as voter intimidation are more unclear now. For example, photographing voters at the polls has been called intimidating, but now everyone is at the polls with a camera. It is hard to know when something is intimidation and it is difficult to show that it was an act of intimidation.

The fact that both parties are engaging in these tactics now makes it more complicated. It makes it difficult to point the finger at any one side.

The inappropriate use of challengers on the basis of race would be a violation of the law. Mr. Tanner was unaware that such allegations were made in Ohio in 2004. He said there had never been an investigation into the abusive use of challengers.

Mr. Tanner said a lot of the challenges are legitimate because you have a lot of voter registration fraud as a result of groups paying people to register voters by the form. They turn in bogus registration forms. Then the parties examine the registration forms and challenge them because 200 of them, for example, have addresses of a vacant lot.

However, Mr. Tanner said the Department was able to informally intervene in challenger situations in Florida, Atkinson County, Georgia and in Alabama, as was referenced in a February 23 Op-Ed in USA Today. Mr. Tanner reiterated the section takes racial targeting very seriously.

Refusal to provide provisional ballots would be a violation of the law that the section would investigate.

Deceptive practices are committed by individuals and would be a matter for the Public Integrity Section. Local government would have to be involved for the voting section to become involved.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Unequal implementation of ID rules, or asking minority voters only for ID would be something the section would go after. Mr. Tanner was unaware of allegations of this in 2004. He said this is usually a problem where you have language minorities and the poll workers cannot understand the voters when they say their names. The section has never formally investigated or solely focused a case based on abuse of ID provisions. However, implementation of ID rules was part of the Section 2 case in San Diego. Mr. Tanner reiterated that the section is doing more than ever before.

When asked about the section's references to incidents of vote fraud in the documents related to the new state photo identification requirements, Mr. Tanner said the section only looks at retrogression, not at the wisdom of what a legislature does. In Georgia, for example, everyone statistically has identification, and more blacks have ID than whites. With respect to the letter to Senator Kit Bond regarding voter ID, the section did refer to the perception of concern about dead voters because of reporting by the Atlanta Journal-Constitution. It is understandable that when you have thousands of bogus registrations that there would be concerns about polling place fraud. Very close elections make this even more of an understandable concern. Putting control of registration lists in the hands of the states will be helpful because at this higher level of government you find a higher level of professionalism.

It is hard to know how much vote suppression and intimidation is taking place because it depends on one's definition of the terms – they are used very loosely by some people. However, the enforcement of federal law over the years has made an astounding difference so that the level of discrimination has plummeted. Registration of minorities has soared, as can be seen on the section's website. Mr. Tanner was unsure if the same was true with respect to turnout, but the gap is less. That information is not on the section's website.

The section is not filling as many Section 2 cases as compared to Section 203 cases because many of the jurisdictions sued under Section 2 in the past do not have issues anymore. Mr. Tanner said that race based problems are rare now.

NVRA has been effective in opening up the registration process. In terms of enforcement, Mr. Tanner said they do what they can when they have credible allegations. There is a big gap between complaints and what can be substantiated. Mr. Tanner stated that given the high quality of the attorneys now in the section, if they do not investigate it or bring action, that act complained of did not happen.

Recommendations

Mr. Tanner did not feel it was appropriate to make recommendations

Kevin Kennedy, Executive Director of the State Board of Elections, Wisconsin

Complaints of fraud and intimidation do not usually come to Kennedy's office. Kennedy says that complainants usually take their allegations to the media first because they are trying to make a political point.

Election Incidents of Fraud

The investigations into the 2004 election uncovered some cases of double voting and voting by felons who did not know they were not eligible to vote, but found no concerted effort to commit fraud. There have been a couple of guilty pleas as a result, although not a number in the double digits. The task force and news reports initially referred to 100 cases of double voting and 200 cases of felon voting, but there were not nearly that many prosecutions. Further investigation since the task force investigation uncovered that in some instances there were mis-marks by poll workers, fathers and sons mistaken for the same voter, and even a husband and wife marked as the same voter. The double votes that are believed to have occurred were a mixture of absentee and polling place votes. It is unclear how many of these cases were instances of voting in two different locations.

In discussing the case from 2000 in which a student claimed – falsely – that he had voted several times, Kennedy said that double voting can be done. The deterrent is that it's a felony, and that one person voting twice is not an effective way to influence an election. One would need to get a lot of people involved for it to work.

The task force set up to investigate the 2004 election found a small number of illegal votes but given the 7,000 alleged, it was a relatively small number. There was no pattern of fraud.

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

The one case Kennedy could recall of an organized effort to commit fraud was in the spring of 2003 or 2004. A community service agency had voters request that absentee ballots be sent to the agency instead of to the voters and some of those ballots were signed without the voters' knowledge. One person was convicted, the leader of the enterprise.

In Milwaukee, the main contention was that there were more ballots than voters. However, it was found that the 7,000 vote disparity was tied to poll worker error. The task force found that there was no concerted effort involved. Kennedy explained that there are many ways a ballot can get into a machine without a voter getting a number. These include a poll worker forgetting to give the voter one; someone does Election Day registration and fills out a registration form but does not get a number because the transaction all takes place at one table; and in Milwaukee, 20,000 voters who registered were not put on the list in time and as a short term solution the department sent the original registration forms to the polling places to be used instead of the list to provide proof of registration. This added another element of confusion that might have led to someone not getting a voter number.

The Republican Party used this original list and contracted with a private vendor to do a comparison with the U.S. postal list. They found initially that there were 5,000 bad addresses, and then later said there were 35,000 illegitimate addresses. When the party filed a complaint, the department told them they could force the voters on their list to cast a challenge ballot. On Election Day, the party used the list but found no one actually voting from those addresses. Kennedy suspects that the private vendor made significant errors when doing the comparison.

In terms of noncitizen voting, Kennedy said that there is a Russian community in Milwaukee that the Republican Party singles out every year but it doesn't go very far. Kennedy has not seen much in the way of allegations of noncitizen voting.

However, when applying for a drivers license, a noncitizen could register to vote. There is no process for checking citizenship at this point, and the statewide registration database will not address this. Kennedy is not aware of any cases of noncitizen voting as a result, but it might have happened.

Kennedy said that the biggest concern seemed to be suspicions raised when groups of people are brought into the polling site from group homes, usually homes for the disabled. There are allegations that these voters are being told how to vote.

#### Incidents of Voter Intimidation

In 2004, there was a lot of hype about challenges, but in Wisconsin, a challenger must articulate a basis under oath. This acts as a deterrent, but at the same time it creates the potential that someone might challenge everyone and create long lines, keeping people from voting. In 2004, the Republican Party could use its list of suspect addresses as a legitimate basis for challenges, so there is the potential for abuse. It is also hard to train poll workers on that process. In 2004, there were isolated cases of problems with challengers.

In 2002, a flyer was circulated only in Milwaukee claiming that you had vote by noon. This was taken as an intimidation tactic by the Democrats.

#### Reforms

Wisconsin has had difficulty with its database because 1) they have had a hard time getting a good product out of the vendor and 2) until now there was no registration record for one-quarter of the voters. Any jurisdiction with fewer than 5000 voters was not required to have a registration list.

In any case, once these performance issues are worked out, Kennedy does believe the statewide voter registration database will be very valuable. In particular, it will mean that people who move will not be on more than one list anymore. It should also address the double voting issue by identifying who is doing it, catching people who do it, and identifying where it could occur.

#### Recommendations

- Better trained poll workers
- Ensure good security procedures for the tabulation process and more transparency in the vote counting process

011186

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- **Conduct post-election audits**

Evelyn Stratton, Justice, Supreme Court of Ohio

The 2004 Election

Justice Stratton stated that usually in the period right before an election, filings die down due to the Ohio expedited procedures for electoral challenges. However, the 2004 election was unusual because there were motions and cases decided up to the day of the election. Justice Stratton believed that most of the allegations were knee-jerk reactions without any substance. For example, without any factual claims, suit was brought alleging that all voter challengers posed a threat to voters. Thematically, allegations were either everyday voting problems or "conspiracies" depending on where the complaint came from. The major election cases in 2004 revolved around Secretary of State Blackwell.

Justice Stratton made a point that the Ohio Supreme Court bent over backwards in the 2004 election to be fair to both sides. There was never any discussion about a ruling helping one political party more than the other.

Justice Stratton cited **two cases that summarize and refute the 2004 complaints---819 NE 2d 1125 (Ohio 2004) and 105 Ohio St. 3d 458 (2004).**

General Election Fraud Issues

Justice Stratton has **seen very few fraud cases in Ohio.** Most challenges are for technical statutory reasons. She remembered one instance where a man who assisted handicapped voters marked the ballot differently than the voter wanted. Criminal charges were brought against this man and the question that the Ohio Supreme Court had to decide was whether ballots could be opened and inspected to see how votes were cast.

Justice Stratton claimed she **knew of isolated incidences of fictitious voter registration but these were not prosecuted.** She has not seen any evidence of ballots being stuffed, dead people voting, etc.

Suggestions for Changes in Voting Procedures

- The Ohio Supreme Court is very strict about laches---if a person sits on their rights too long, they lose the right to file suit. The Ohio expedited procedures make election challenges run very smooth. Justice Stratton does not remember any suits brought on the day of the election.
- lower courts need to follow the rules for the expedited procedures. Even given the anomalies with lower courts permitting late election challenges in 2004, the Ohio Supreme Court does not want to make a new rule unless this pattern repeats itself in 2008.
- last minute challenges should not be permitted
- supports a non-partisan head of state elections.

Tony Sirvello, Executive Director, International Association of Clerks, Recorders, Election Officials and Treasurers

Incidents of Election Fraud

Sirvello stated that one problem with election crimes is that they are not high on the priority list of either district attorneys or grand juries. Therefore, complaints of election crime very rarely are prosecuted or are indicted by the grand jury. In 1996 in Harris County, 14 people voted twice but the grand jury refused to indict. One woman voted twice, once during early voting and once on Election Day. She said she thought there were two elections. The jury believed her. Sirvello believes none of the people intentionally voted more than once. He said that he believes double voting is not as big of an issue as people make it out to be.

011187

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

In 1986, it was found that there were 300 more ballots than voter signatures. It was clear that the elections officials stuffed the ballot boxes. The case was brought before a grand jury, but there was no indictment because all of the defendants were friends and relatives of each other and none would admit what had been done.

Sirvello stated that there have been isolated circumstances where a voter would show up at the poll and his name had already been signed and he had voted.

Finally, Sirvello indicated that some people who worked in Houston but did not live in Harris County were permitted to vote.

Specific Absentee Ballot/Vote By Mail Issues

Sirvello said that mail voting presents the largest problem. With mail voting there is too much opportunity to influence voters or to fraudulently request a ballot. If one applied for an absentee ballot, their name and address was made available to candidates and political consultants who would often send people to collect the ballot. Many did not want to give up the ballot but wanted to mail it personally. The result was to discourage voting.

In Texas, a person could only apply for an absentee ballot if over 65 years of age. Parties, candidates and consultants would get the list of voters over 65 and send them a professional mail piece telling them they could vote by mail and a ballot with everything filled out except the signature. Problems ensued -- for example, voters would print their names rather than sign them, and the ballot was rejected. In other cases, the elderly would give their absentee ballot to someone else.

If a person applied for an absentee ballot but then decided not to cast it but to vote in person, that person had to bring the non-voted absentee ballot to the poll and surrender it. If they did not they would not be permitted to vote at the polling place.

Incidents of Voter Intimidation

Sirvello only reported isolated cases of intimidation or suppression in Harris County. These mostly occurred in Presidential elections. Some people perceived intimidation when being told they were not eligible to vote under the law. Sirvello stated that the big issue in elections now is whether there should be a paper trail for touch screen voting.

Recommendations

- District attorneys need to put more emphasis on election crime so people will not believe that it goes unpunished.
- There should be either a national holiday for Election Day or a day should be given off of work without counting as a vacation day so that better poll workers are available and there can be more public education on election administration procedures.

Harry Van Sickle, Commissioner of Elections, and Deputy Chief Counsel to the Secretary of State Larry Boyle, Pennsylvania

Fraud and Intimidation

Neither Van Sickle nor Boyle was aware of any fraud of any kind in the state of Pennsylvania over the last five years. They are not aware of the commission of any deceptive practices, such as flyers that intentionally misinform as to voting procedures. They also have never heard of any incidents of voter intimidation. With respect to the mayoral election of 2003, the local commission would know about that.

Since the Berks County case of 2003, where the Department of Justice found poll workers who treated Latino voters with hostility among other voting rights violations, the Secretary's office has brought together Eastern Pennsylvania election administrators and voting advocates to discuss the problems. As a result, other counties have voluntarily chosen to follow the guidance of the Berks County federal court order.

Regarding the allegations of fraud that surrounded the voter identification debate, Mr. Boyle said was not aware of any instances of fraud involving identity. He believes this is because Pennsylvania has laws in place to prevent this. For example, in 2002 the state legislature passed an ID law that is stricter than HAVA's -- it requires all first time voters to present identification. In addition, the SURE System --

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**the state's statewide voter registration database – is a great anti-fraud mechanism.** The system will be in place statewide in the May 2006 election.

In addition, the state took many steps before the **2004** election to make sure it would be smooth. They had **attorneys in the counties to consult on problems as well as staff at the central office to take calls regarding problems.** In addition, in 2004 the state used provisional ballots for the first time. This resolved many of the problems that used to occur on Election Day.

Mr. Boyle is **not aware of any voter registration fraud.** This is because **when someone registers to vote, the administrator does a duplicate check.** In addition, under new laws a person registering to vote must provide their drivers license or Social Security number which are verified through the Department of Motor Vehicles and the Social Security Administration. Therefore, it would be unlikely that someone would be able to register to vote falsely.

Process

**Most problems are dealt with at the local level and do not come within the review of the Secretary of State's office.** For instance, if there is a complaint of intimidation, this is generally dealt with by the county courts which are specially designated solely to election cases on Election Day. **The Secretary does not keep track of these cases.** Since the passage of NVRA and HAVA counties will increasingly call the office when problems arise.

Recommendations

Mr. Boyle suggested we review the recommendations of the Pennsylvania Election Reform Task Force which is on the Secretary's website. Many of those recommendations have been introduced in the legislature.

Craig Donsanto, Director, Public Integrity Section, U.S. Department of Justice

Questions

*How are Prosecution Decisions Made?*

**Craig Donsanto must approve all investigations that go beyond a preliminary stage, all charges, search warrant applications and subpoenas and all prosecutions. The decision to investigate is very sensitive because of the public officials involved. If a charge seems political, Donsanto will reject it.** Donsanto gives possible theories for investigation. **Donsanto and Noel Hillman will decide whether to farm out the case to an AUSA. Donsanto uses a concept called predication.** In-other-words, there must be enough evidence to suggest a crime has been committed. The method of evaluation of this evidence depends on the type of evidence and its source. There are two types of evidence---factual (antisocial behavior) and legal (antisocial behavior leading to statutory violations). **Whether an indictment will be brought depends on the likelihood of success before a jury. Much depends on the type of evidence and the source.** Donsanto said he "knows it when he sees it." Donsanto will only indict if he is confident of a conviction assuming the worst case scenario – a jury trial.

A person under investigation will first receive a target letter. Often, a defendant who gets a target letter will ask for a departmental hearing. The defendant's case will be heard by Donsanto and Hillman. On occasion, the assistant attorney general will review the case. The department grants such hearings easily because such defendants are likely to provide information about others involved.

**The Civil Rights Division, Voting Rights Section makes its own decisions on prosecution.** The head of that division is John Tanner. There is a lot of cooperation between

Does the Decision to Prosecute Incorporate Particular Political Considerations within a State Such as a One Party System or a System in which the Party in Power Controls the Means of Prosecution and Suppresses Opposition Complaints?

Yes. Before, the department would leave it to the states. Now, if there is racial animus involved in the case, there is political bias involved, or the prosecutor is not impartial, the department will take it over.

Does it Matter if the Complaint Comes from a Member of a Racial Minority?

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

No. But if the question involves racial animus, that has also always been an aggravating factor, making it more likely the Department will take it over

What Kinds of Complaints Would Routinely Override Principles of Federalism?

Federalism is no longer big issue. DOJ is permitted to prosecute whenever there is a candidate for federal office.

Are There Too Few Prosecutions?

DOJ can't prosecute everything.

What Should Be Done to Improve the System?

- The problem is asserting federal jurisdiction in non-federal elections. It is preferable for the federal government to pursue these cases for the following reasons:
  - federal districts draw from a bigger and more diverse jury pool;
  - the DOJ is politically detached; local district attorneys are hamstrung by the need to be re-elected;
  - DOJ has more resources – local prosecutors need to focus on personal and property crimes---fraud cases are too big and too complex for them;
  - DOJ can use the grand jury process as a discovery technique and to test the strength of the case.
- In *U.S. v. McNally*, the court ruled that the mail fraud statute does not apply to election fraud. It was through the mail fraud statute that the department had routinely gotten federal jurisdiction over election fraud cases. 18 USC 1346, the congressional effort to “fix” *McNally*, did not include voter fraud.
- As a result, the department needs a new federal law that allows federal prosecution whenever a federal instrumentality is used, e.g. the mail, federal funding, interstate commerce. The department has drafted such legislation, which was introduced but not passed in the early 1990s..

Other Information

The Department has held four symposia for DEOs and FBI agents since the initiation of the Ballot Access and Voting Integrity Initiative. In 2003, civil rights leaders were invited to make speeches, but were not permitted to take part in the rest of the symposium. All other symposia have been closed to the public. (Peg will be sending us the complete training materials used at those sessions. These are confidential and are the subject of FOIA litigation).

There are two types of attorneys in the division:

- prosecutors, who take on cases when the jurisdiction of the section requires it; the US Attorney has recused him or herself; or when the US Attorney is unable to handle the case (most frequent reason) and
- braintrust attorneys who analyze the facts, formulate theories, and draft legal documents.

Cases:

Donsanto provided us with three case lists: Open cases (still being investigated) as of January 13, 2006 – confidential; election fraud prosecutions and convictions as a result of the Ballot Access and Voting Integrity Initiative October 2002-January 13, 2006 and cases closed for lack of evidence as of January 13, 2006

If we want more documents related to any case, we must get those documents from the states. The department will not release them to us.

**Although the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate complaints of fraud, the number of cases that the department is investigating and the number of indictments the department is pursuing are both up dramatically.**

**Since 2002, the department has brought more cases against alien voters, felon voters, and double voters than ever before. Previously, cases were only brought when there was a pattern or scheme to corrupt the process. Charges were not brought against individuals – those**

011190

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

cases went un-prosecuted. **This change in direction, focus, and level of aggression was by the decision of the Attorney General. The reason for the change was for deterrence purposes.**

The department is currently undertaking three pilot projects to determine what works in developing the cases and obtaining convictions and what works with juries in such matters to gain convictions:

- **Felon voters in Milwaukee.**
- **Alien voters in the Southern District of Florida.** FYI – under 18 USC 611, to prosecute for “alien voting” there is no intent requirement. Conviction can lead to deportation. Nonetheless, the department feels compelled to look at mitigating factors such as was the alien told it was OK to vote, does the alien have a spouse that is a citizen.
- **Double voters in a variety of jurisdictions.**

The department does not maintain records of the complaints that come in from DEOs, U.S attorneys and others during the election that are not pursued by the department. Donsanto asserted that U.S. attorneys never initiate frivolous investigations.

Sharon Priest, former Secretary of State, Arkansas

Process:

**When there is an allegation of election fraud or intimidation, the county clerk refers it to the local district attorney. Most often, the DA does not pursue the claim.** There is little that state administrators can do about this because in Arkansas, county clerks are partisanly elected and completely autonomous. Indeed, county clerks have total authority to determine who is an eligible voter.

Data:

There is **very little data collected in Arkansas on fraud and intimidation cases.** Any information there might be stays at the county level. This again is largely because the clerks have so much control and authority, and will not release information. **Any statewide data that does exist might be gotten from Susie Storms from the State Board of Elections.**

Most Common Problems

**The perception of fraud is much greater than the actual incidence of fraud.**

- **The DMV does not implement NVRA** in that it does not take the necessary steps when providing the voter registration forms and does not process them properly. **This leads to both ineligible voters potentially getting on the voting rolls (e.g. noncitizens, who have come to get a drivers license, fill out a voter registration form having no intention of actually voting) and voter thinking they are registered to vote to find they are not on the list on Election Day.** Also, some people think they are automatically registered if they have applied for a drivers license.
- **Absentee ballot fraud is the most frequent form of election fraud.**
- **In Arkansas, it is suspected that politicians pay ministers to tell their congregations to vote for them**
- **In 2003, the State Board documented 400 complaints against the Pulaski County Clerk for engaging in what was at least borderline fraud, e.g. certain people not receiving their absentee ballots. The case went to a grand jury but no indictment was brought.**
- **Transportation of ballot boxes is often insecure making it very easy for insiders to tamper with the ballots or stuff the ballot boxes.** Priest has not actually witnessed this happen, but believes it may have.
- **Intimidation at the poll sites in court houses. Many voters are afraid of the county judges or county employees and therefore will not vote. They justifiably believe their ballots will be opened by these employees to see who they voted for, and if they voted against the county people, retribution might ensue.**

01191

EAC SUMMARY OF EXPERT INTERVIEWS FOR  
VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- **Undue challenges to minority language voters at the poll sites**
- **Paid registration collectors fill out phony names, but these individuals are caught before anyone is able to cast an ineligible ballot.**

Suggested Reforms for Improvement:

- **Nonpartisan election administration**
- **Increased prosecution of election crimes through greater resources to district attorneys.** In addition, during election time, there should be an attorney in the DA's office who is designated to handle election prosecution.
- There should be **greater centralization of the process, especially with respect to the statewide database.** Arkansas has a "bottom up" system. This means the counties still control the list and there is insufficient information sharing. For example, **if someone lives in one county but dies in another, the county in which the voter lived – and was registered to vote – will not be notified of the death.**

**Deliberative Process  
Privilege**

Subject Re: VF and VI study 

OK, I will get started on the interview summaries today.

DOJ (Donsanto and Tanner) raised objections to the consultants' description of their interviews, which state that DOJ officials agreed they were bringing fewer intimidation and suppression cases. An advocacy group is going after DOJ, accusing the agency of doing just that for political reasons, so this is something DOJ wants corrected.

Apart from the consultants pre-existing bias that "the feds aren't doing enough", a big part of the problem appears to have been a misunderstanding over terminology. When our consultants used the term "intimidation", they included all sorts of suppression activities. When Craig Donsanto used the term "intimidation", he was using the definition under federal criminal vote fraud statutes, which requires the action be accompanied by threat of physical or economic harm. (He told me he has had only one such case in 30 years.) His office is actively pursuing voter suppression activities under statutes other than federal voter intimidation laws (e.g.; the recent case in NH where a campaign operative conspired to block election day GOTV telephone lines of the opposing party). A copy of Tanner's comments on the interview summary in the status report for the Standards and Advisory Boards meetings is attached.

I had many long discussions with Tova and Job about this. I was able to get them to soften their description (see 4th bullet on page 7 of the draft report), but not entirely to my satisfaction. Also, at the Working Group meeting, it was agreed that the consultants would add a note to their definition to clarify that the working definition for purposes of the research includes activities that do not meet the federal definition of voter intimidation. The resulting note on page 5 of the draft report is too vague.

DOJ has not seen everything the consultants put in the draft final report, so they may have additional concerns. For example, the consultants' recommendations include the following:

**Attend the Department of Justice's Ballot Access and Voting Integrity Symposium** . The consultants also believe it would be useful for any further activity in this area to include attendance at the next Ballot Access and Voting Integrity Symposium. According to the Department, DEOs are required to attend annual training conferences centered on combating election fraud and voting rights abuses. These conferences sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, feature presentations by civil rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. According to the Department, DEOs are required to attend annual training conferences centered on combating election fraud and voting rights abuses. These conferences sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, feature presentations by civil rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices.

**Footnote:**

By attending the symposium researchers could learn more about the following: How *DEOs* are trained, e.g. what they are taught to focus their resources on; How they are instructed to respond to various types of complaints; How information about previous elections and voting issues is presented; and, How the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

DOJ has stated that this is an internal meeting, involving only DOJ officials, US Attorneys and FBI. EAC researchers cannot be admitted without opening the meeting to other outsiders. DOJ does not want to do this, probably for two reasons: (1) confidential information on current enforcement cases may be

011193

discussed; and (2) making enforcement strategies public could give unscrupulous individuals a virtual "how to" manual for circumventing such strategies when committing election crimes.

We may also have a hard time gaining access to the DOE reports and the Voting Section records of complaints, as they probably aren't considered public documents.

Julie:

Happy to help, especially as I have to assume the blame for the report turned in by the consultants. I think you were aware that I was disappointed that it was not a more professional product. As I was not clear what the Commission's position is on editing such reports after receipt of the final, and as the consultants insisted that their work not be changed, I felt a bit stymied. Let me know what else I can do.

In the meantime, I'm revisiting some drafts received on the Vote Count-Recount best practices to see if I can encourage more improvements before submission of the final. We're still waiting for the state-by-state summary of practices, originally delayed by the subcontractor's nonperformance, which could affect goes into the best practices. I think some of the emphasis I see in the drafts on post election audits and proper recordkeeping will help respond to some of the issues raised in the literature review for the voting fraud-voter intimidation study.

011199

**1. Everyone does not define voting fraud and voter intimidation the same way.**

In some cases, what may have been honest administrative mistakes or errors due to poor poll worker training are lumped together with genuine voter suppression efforts and labeled as voter intimidation or voting fraud. Examples: (1) many authors consider certain voter suppression tactics to be voter intimidation that do not rise to the definition used in criminal enforcement of election crimes; (2) some charge that a DOJ ballot integrity measure in South Dakota was voter intimidation; and (3) some mistakes made in the maintenance of voter registration lists are labeled as fraud.

**2. There seems to be no systematic *nationwide* study that reports all (or most) verified instances of voting fraud and voter intimidation or suppression efforts in a particular election or a particular period in U.S. history.**

Some sources focus on certain areas of the country, which can bias the study if these areas are more or less susceptible to fraud and suppression. Some focus on the alleged (but not necessarily verified) misdeeds of one political party or another. Still others focus on unverified allegations reported to a toll-free phone line. In some cases, it is not clear if the incidents were intentional voter suppression or genuine poll worker mistakes (e.g.; not providing provisional ballots or in appropriately asking voters for ID). Minnite's study is as close as they get to a systematic study.

**3. There are a number of obstacles to gathering compete data on voting fraud and voter intimidation/suppression nationwide in any election.**

Authors often have limited resources (time and money) to collect such information. Investigation and prosecution of voting fraud and voter intimidation or suppression occurs at different levels of government (Federal, state and local). These investigations and prosecutions are not reported to and recorded by a central authority. Some voting fraud is inherently more difficult to identify and to prove than others (e.g.; impersonation of another voter at the polls is more difficult, due to the transient nature of some jurisdictions and the fact that impersonators not identified as a fraud at the polls are hard to identify later, than voter registration, vote buying, and absentee ballot fraud). At least some voting fraud and voter intimidation appears to go unreported and uninvestigated, and some prosecutions are unsuccessful due to local politics and law enforcement affiliations and the lack of sufficient resources at the Federal, state, and local levels to support the labor intensive effort.

**4. Most sources seem to agree that voter registration and absentee balloting fraud are the most common forms of voting fraud. Absentee ballot fraud often is accompanied by vote buying or voter coercion. Also frequently alleged were instances of ineligible voters (usually felons, but sometime non-citizens, under aged individuals, or non-residents) that voted. But not all agree that these are the only common forms of fraud.**

Some contend that voting in the name of another at the polling place is common, but that such instances are extremely hard to prove. Most instances of ineligible voters voting were linked to improper voter list maintenance or confusion on the part of local election officials as to state law on felon disenfranchisement.

**5. A number of sources have identified numerous instances of attempted voter suppression, but no instances of voter intimidation that could be prosecuted under Federal criminal laws is alleged.**

Examples of voter suppression efforts include: (1) phone calls and mailings deliberately directing targeted voters to vote on the wrong day or to go to the wrong polling place, or that provide incorrect and threatening information about the voter qualifications and legal consequences of voting; (2) targeted, inappropriate challenges to voters at the polls or shortly before election day; (3) people posing as law enforcement agents at targeted polling places. When such tactics target minority communities, they may be attacked through civil action by DOJ under Voting Rights Act provisions, but they do not qualify for criminal penalties under Federal voter intimidation law. Currently, there is no Federal election law providing criminal penalties for voter suppression efforts. When the suppression adversely affects a political party, but does not have a racial component, DOJ may be hard pressed to pursue the matter unless other Federal criminal law has been violated (e.g.; suppression of phone banks in New Hampshire).

**6. Unsupervised voter registration drives by political parties and advocacy groups are a primary source of fraudulent voter registration applications and missing (perhaps deliberately) voter registration applications.**

The practice of paying persons to man voter registration drives (particularly, but not only, when the person is paid by the head) is a frequent source of fraudulent voter registration applications. Partisan drives have resulted in applications from persons of “the wrong party” being held back or destroyed. Therefore, while the applicant believes they have registered, the election official has no record of that registration.

**7. Many authors contend that proper implementation of the National Voter Registration Act of 1993 (NVRA) and the Help America Vote Act of 2002 (HAVA) will reduce or at least not increase the potential for fraud and voter suppression, but some argue that provisions in these laws increase the likelihood of fraud or voter suppression.**

Many argue that proper implementation of the list maintenance and fail-safe voting provisions of the NVRA and HAVA’s requirements for the statewide voter registration list, voter ID for certain first-time voters, and provisional voting will reduce the potential for voting fraud and voter intimidation. Others argue that the list maintenance provisions of NVRA cause “dead wood” to be left on the voter rolls, providing opportunity for fraud, or that HAVA’s voter ID and list matching requirements can be used as voter suppression tactics.

EAC-LESSONS LEARNED FROM LITERATURE RESEARCH  
PRELIMINARY VOTING FRAUD-VOTER INTIMIDATION STUDY

---

- 8. Proper recordkeeping and post-election auditing is an important key to identifying and preventing voting fraud, and for subsequent prosecution of such activities; but is not being done consistently.**
- 9. Poll worker recruitment and training is a key component to combating actions that are perceived as suppressing or intimidating voters.**
- 10. Both sides on election reform debates are using incomplete data to bolster their arguments.**

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**Articles**

People for the American Way and the NAACP, "The Long Shadow of Jim Crow," December 6, 2004.

This report describes the pervasive and repeated practices of voter intimidation and vote suppression that have taken place in very recent years and during contemporary American history. It goes on to describe the numerous instances of voter intimidation and suppression during the 2000 election, the 1990s, the 1980s and back through the civil rights movement of the 1960s, putting current efforts in historical perspective.

Describing the chronology of events in this way demonstrates the developing patterns and strategic underpinnings of the tactics used over the last forty years. **Examples** include:

- Florida law enforcement questioned elderly African American voters in Orlando regarding the 2003 mayoral race, which had already been resolved, shortly before the 2004 election;
- the 2004 Florida felon purge list;
- the case of South Dakota in 2004 in which Native Americans were improperly and illegally required to show photo identification at the polls or denied the right to vote, and similar improper demands for ID from minorities in other parts of the country;
- the use of challengers in minority districts in many locations;
- the challenge to the right of African American students to vote in Texas in 2004;
- the presence of men looking like law enforcement challenging African American voters at the polls in Philadelphia in 2003;
- the distribution of flyers in Louisiana and elsewhere in a number of elections over the last few years in minority areas telling them to vote on the wrong day; and
- the FBI investigation into thousands of Native American voters in South Dakota in 2002.

Laughlin McDonald, "The New Poll Tax," *The American Prospect* vol. 13 no. 23, December 30, 2002.

Argues that "the discriminatory use of so-called 'ballot security' programs" has been a reoccurring scandal since the passage of the Voting Rights Act of 1965. These programs are deceptively presented as preventing voter fraud and thereby furthering good government. However, McDonald states "but far too often they [the ballot security programs] are actually designed to suppress minority voting -- and for nakedly partisan purposes." Blames the federal government as well as the states for use of suspect ballot security programs. McDonald cites several ballot security efforts that were really disguised attempts at minority voter suppression:

- SD-DOJ "voting integrity initiative".
- AR - poll watchers driving away voters in predominantly black precincts by taking photos of them and demanding identification during pre-election day balloting.
- MI - "spotters" at heavily Democratic precincts was an effort to intimidate black voters and suppress Democratic turnout
- SC - one county's officials instituted a new and unauthorized policy allowing them to challenge voters who gave rural route or box numbers for their registration address (disproportionately affecting African Americans).
- the 1981 gubernatorial election anti-fraud initiative leading to the well known consent decree prohibiting the Republicans from repeating this, a similar Republican effort in Louisiana in 1986 in Senator John Breaux's race which again resulted in prohibition by a state court judge, and a similar effort by Republicans in Senator Jesse Helms 1990 reelection.

States that HAVA "contains provisions that may enhance the opportunities for harassment and intimidation of minorities through ballot-security

011203

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**programs** (especially voter ID). Indicates that the crux of the problem is **law enforcement of federal voters rights laws** ("there is no record of the purveyors of any ballot-security program being criminally prosecuted by federal authorities for interfering with the right to vote." The only positive case law McDonald cited was a decision by the United States Court of Appeals for the Eighth Circuit that affirmed "an award of damages ranging from \$500 to \$2,000, payable by individual poll officials to each of seven black voters who had been unlawfully challenged, harassed, denied assistance in voting or purged from the rolls in the town of Crawfordville [Arkansas].")

Recommends that Congress and the states should adopt "nondiscriminatory, evenly applied measures to ensure the integrity of the ballot."

Wisconsin Legislative Audit Bureau, "An Evaluation: Voter Registration Elections Board" Report 05-12, September, 2005.

Current voter registration practices were determined to be insufficient to ensure the accuracy of voter registration lists used by poll workers or to prevent ineligible persons from registering to vote. **In six municipalities where sufficient information was available, there was 105 instances of potentially improper or fraudulent voting in the 2004 elections. These included: 98 ineligible felons who may have voted; 2 individuals who may have voted twice; 1 voter who may have been underage; and 4 absentee ballots that should not have been counted because the voters who cast them died before Election Day** (all but dead voters were forwarded to appropriate district attorneys for investigation). Statutes require that clerks send cards to everyone who registers by mail or on Election Day. However, only 42.7 % of the 150 municipalities surveyed sent cards to both groups, and 46 % did not send any address verification cards to those registering to vote on Election Day in November 2004. Statutes also require clerks to provide the local district attorney with the names of any Election Day registrants whose cards are undeliverable at the address provided. However, only 24.3 % of the clerks who sent cards also forwarded names from undeliverable cards to district attorneys. District attorneys surveyed indicated that they require more information than is typically provided to conduct effective investigations. To ensure that voter registration lists contain only the names of qualified electors, municipal clerks are required by statute to remove or inactivate the names of individuals who have not voted in four years, to update registration information for individuals who move or change their names, and to remove or inactivate the names of deceased individuals. They are also required to notify registered voters before removing their names from registration lists. These statutory requirements are not consistently followed:

- 85.3 % of municipalities removed the names of inactive voters from their voter registration lists;
- 71.4 % sometimes or always notified registered voters before removing their names; and
- 54.0 % reported removing the names of ineligible felons.
- registration lists contain duplicate records and the names of ineligible individuals (e.g.; more than 348,000 electronic voter registration records from eight municipalities were reviewed, identifying 3,116 records that appear to show individuals who are registered more than once in the same municipality).

Recommendations:

- adjust the early registration deadline to provide clerks more time to prepare registration lists;
- establish more stringent requirements for special registration deputies, including prohibiting compensation based on the number of individuals registered;
- establish uniform requirements for demonstrating proof of residence for all registrants;
- provide municipal clerks with more flexibility in the use of address verification cards;
- Authorize civil penalties for local election officials and municipalities that fail to comply with election laws; and
- implement mandatory elections training requirements for municipal clerks.

Report also recognized that the new **HAVA registration procedures would help with existing registration problems.**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Milwaukee Police Department, Milwaukee County District Attorney's Office, Federal Bureau of Investigation, United States Attorney's Office "Preliminary Findings of Joint Task Force Investigating Possible Election Fraud," May 10, 2005.

On January 26, 2005, the Milwaukee Police Department, Milwaukee County District Attorney's Office, Federal Bureau of Investigation, and the United States Attorney's Office formed a task force to investigate alleged voting irregularities during the November 2004 elections. The task force has made the following specific determinations based on evidence examined to date:

- **evidence of more than 100 individual instances of suspected double-voting, voting in names of persons who likely did not vote, and/or voting in names believed to be fake.**
- **more than 200 felons voted when they were not eligible to do so. (In order to establish criminal cases, the government must establish willful violations in individual instances);**
- **persons who had been paid to register voters as "deputy registrars" falsely listed approximately 65 names in order to receive compensation for the registrations. (The evidence does not indicate that these particular false registrations were later used to cast votes); and,**
- **the number of votes counted from the City of Milwaukee exceeds the number of persons recorded as voting by more than 4,500. (Evidence indicates widespread record keeping errors with respect to recording the number of voters)**

The investigation concentrated on the 70,000+ same-day registrations. It found that a large majority of the reported errors were the result of data entry errors, such as street address numbers being transposed. However, the investigation also found more than 100 instances where votes were cast in a manner suggesting fraud. These include:

- persons with the same name and date of birth recorded as voting more than once;
- persons who live outside Milwaukee, but who used non-existent City addresses to register and vote in the City (141 of them were same day registrants; in several instances, the voter explicitly listed municipality names other than Milwaukee on the registration cards);
- persons who registered and voted with identities and addresses that cannot in any way be linked to a real person;
- persons listed as voting under a name and identity of a person known to be deceased;
- persons whose identities were used to vote, but who in subsequent interviews told task force investigators that they did not, in fact, vote in the City of Milwaukee.

Investigation also found:

- **persons who were paid money to obtain registrations allegedly falsified approximately 65 names on registration forms, allegedly to obtain more money for each name submitted.**
- **more than 200 felons who were not eligible to vote in the 2004 election, but who are recorded as having done so.**
- **same-day registrations were accepted in which the card had incomplete information that would help establish identity. For example: 48 original cards for persons listed as voting had no name; 548 had no address; 28 did not have signatures; and another 23 cards had illegible information (part of approximately 1,300 same-day registrations for which votes were cast, but which election officials could not authenticate as proper voters within the City).**
- **the post-election misfiling or loss of original green registration cards that were considered duplicates, but that in fact corresponded to additional votes. These cards were used to record votes, but approximately 100 cards of interest to investigators can no longer be located. In addition, other original green registration cards continue to be found.**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

National Commission on Federal Election Reform, "Building Confidence in U.S. Elections," Center for Democracy and Election Management, American University, September 2005.

Among the observations made that are relevant to the EAC study of fraud and intimidation are the following:

- The November 2004 elections showed that irregularities and fraud still occur.
- Failure to provide voters with such basic information as their registration status and their polling site location raises a barrier to voting as significant as inconsistent procedures on provisional ballots or voter ID requirements.
- There is no evidence of extensive fraud in U.S. elections or of multiple voting, but both occur, and it could affect the outcome of a close election.
- The Commission is concerned that the different approaches to identification cards might prove to be a serious impediment to voting.
- **Voter registration lists are often inflated by the inclusion of citizens who have moved out of state but remain on the lists.** Moreover, under the National Voter Registration Act, names are often added to the list, but counties and municipalities often do not delete the names of those who moved. Inflated voter lists are also caused by phony registrations and efforts to register individuals who are ineligible. At the same time, inaccurate purges of voter lists have removed citizens who are eligible and are properly registered.
- Political party and nonpartisan voter registration drives generally contribute to the electoral process by generating interest in upcoming elections and expanding participation. However, they are occasionally abused. **There were reports in 2004 that some party activists failed to deliver voter registration forms of citizens who expressed a preference for the opposing party.**
- **Vote by mail raises concerns about privacy**, as citizens voting at home may come under pressure to vote for certain candidates, and it increases the risk of fraud.
- **While election fraud is difficult to measure, it occurs.** The U.S. Department of Justice has launched more than 180 investigations into election fraud since October 2002. These investigations have resulted in **charges for multiple voting, providing false information on their felon status, and other offenses** against 89 individuals and in convictions of 52 individuals. The convictions related to a **variety of election fraud offenses, from vote buying to submitting false voter registration information and voting-related offenses by non-citizens.** In addition to the federal investigations, **state attorneys general and local prosecutors handle cases of election fraud. Other cases are never pursued because of the difficulty in obtaining sufficient evidence for prosecution or because of the low priority given to election fraud cases.**
- **Absentee ballots remain the largest source of potential voter fraud**
- **Non-citizens have registered to vote in several recent elections**
- **The growth of "third-party" (unofficial) voter registration drives in recent elections has led to a rise in reports of voter registration fraud.**
- **Many states allow the representatives of candidates or political parties to challenge a person's eligibility to register or vote or to challenge an inaccurate name on a voter roll. This practice of challenges may contribute to ballot integrity, but it can have the effect of intimidating eligible voters, preventing them from casting their ballot, or otherwise disrupting the voting process.**

Its pertinent recommendations for reform are as follows:

- **Interoperable state voter databases** are needed to facilitate updates in the registration of voters who move to another state and to eliminate duplicate registrations, which are a source of potential fraud.
- **Voters should be informed of their right to cast a provisional ballot** if their name does not appear on the voter roll, or if an election official asserts that the individual is not eligible to vote, but **States should take additional and effective steps to inform voters as to the location of their precinct**
- The Commission recommends that states use **"REAL ID" cards for voting purposes.**
- **To verify the identity of voters who cast absentee ballots, the voter's signature on the absentee ballot can be matched with a digitized**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

**version of the signature that the election administrator maintains.** While such signature matches are usually done, they should be done consistently in all cases, so that election officials can verify the identity of every new registrant who casts an absentee ballot.

- Each **state needs to audit its voter registration files** to determine the extent to which they are accurate (with correct and current information on individuals), complete (including all eligible voters), valid (excluding ineligible voters), and secure (with protections against unauthorized use). This can be done by matching voter files with records in other state agency databases in a regular and timely manner, contacting individuals when the matches are inconclusive, and conducting survey research to estimate the number of voters who believe they are registered but who are not in fact listed in the voter files.
- Each **state should oversee political party and nonpartisan voter registration drives** to ensure that they operate effectively, that registration forms are delivered promptly to election officials, that all completed registration forms are delivered to the election officials, and that none are "culled" and omitted according to the registrant's partisan affiliation. Measures should also be adopted to track and hold accountable those who are engaged in submitting fraudulent voter registrations. Such oversight might consist of training activists who conduct voter registration drives and tracking voter registration forms to make sure they are all accounted for. In addition, states should apply a criminal penalty to any activist who deliberately fails to deliver a completed voter registration form.
- **Investigation and prosecution of election fraud should include those acts committed by individuals, including election officials, poll workers, volunteers, challengers or other nonvoters associated with the administration of elections, and not just fraud by voters.**
- **In July of even-numbered years, the U.S. Department of Justice should issue a public report on its investigations of election fraud.** This report should specify the numbers of allegations made, matters investigated, cases prosecuted, and individuals convicted for various crimes. **Each state's attorney general and each local prosecutor should issue a similar report.**
- **The U.S. Department of Justice's Office of Public Integrity should increase its staff to investigate and prosecute election-related fraud.**
- In addition to the penalties set by the Voting Rights Act, **it should be a federal felony for any individual, group of individuals, or organization to engage in any act of violence, property destruction (of more than \$500 value), or threatened act of violence that is intended to deny any individual his or her lawful right to vote or to participate in a federal election.**
- **To deter systemic efforts to deceive or intimidate voters, the Commission recommends federal legislation to prohibit any individual or group from deliberately providing the public with incorrect information about election procedures for the purpose of preventing voters from going to the polls.**
- **States should define clear procedures for challenges, which should mainly be raised and resolved before the deadline for voter registration.** After that, challengers will need to defend their late actions. **On Election Day, they should direct their concerns to poll workers, not to voters directly, and should in no way interfere with the smooth operation of the polling station.**
- **State and local jurisdictions should prohibit a person from handling absentee ballots other than the voter, an acknowledged family member, the U.S. Postal Service or other legitimate shipper, or election officials.** The practice in some states of allowing candidates or party workers to pick up and deliver absentee ballots should be eliminated.
- All states should **consider passing legislation that attempts to minimize the fraud that has resulted from "payment by the piece" to anyone in exchange for their efforts in voter registration, absentee ballot, or signature collection.**
- Nonpartisan structures of election administration are very important, and **election administrators should be neutral, professional, and impartial.**
- No matter what institutions are responsible for conducting elections, **conflict-of-interest standards should be introduced for all federal, state, and local election officials.** Election officials should be prohibited by federal and/or state laws from serving on any political campaign committee, making any public comments in support of a candidate, taking a public position on any ballot measure, soliciting campaign funds, or otherwise campaigning for or against a candidate for public office. A decision by a secretary of state to serve as co-chair of his or her party's presidential

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

election committee would clearly violate these standards.

The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law "Response to the Report of the 2005 Commission on Federal Election Reform," September 19, 2005.

### Recommendation on Voter Identification -

- Report premises its burdensome identification proposals on the need to ensure ballot integrity and on the existence of or potential for widespread fraud. However, the **Report admits that there is simply "no evidence" that the type of fraud that could be solved by stricter voter identification** – individual voters who misrepresent their identity at the polls – is a widespread problem.
- The photo ID proposal guards against only one type of fraud: individuals arriving at the polls to vote using false information, such as the name of another registered voter, or a recent but not current address. Since the costs of this form of fraud are extremely high (federal law provides for up to five years' imprisonment), and the benefits to any individual voter are extremely low, it is highly unlikely that this will ever occur with any frequency. **The limited types of fraud that could be prevented by a Real ID requirement are extremely rare and difficult.**
- In the most comprehensive survey of alleged election fraud to date, Professor Loraine Minnite and David Callahan have shown that the **incidence of individual voter fraud at the polls is negligible**. A few prominent examples support their findings. In Ohio, a statewide survey found four instances of ineligible persons voting or attempting to vote in 2002 and 2004, out of 9,078,728 votes cast – a rate of 0.00004%. Earlier this year, Georgia Secretary of State Cathy Cox stated that she could not recall one documented case of voter fraud relating to the impersonation of a registered voter at the polls during her ten-year tenure as Secretary of State or Assistant Secretary of State.
- The Report attempts to support its burdensome identification requirements on four specific examples of purported fraud or potential fraud. **None of the Report's cited examples of fraud stand up under closer scrutiny**. This response report goes through each instance of fraud raised by the Commission report and demonstrates that in each case the allegation in fact turned out later not to be true or the fraud cited was not of the type that would be addressed by a photo identification requirement.
- The Report fails to provide a good reason to create greater hurdles for voters who vote at the polls than for those who vote absentee. Despite the fact that **absentee ballots are more susceptible to fraud than regular ballots**, the Report exempts absentee voters from its proposed Real ID and proof of citizenship requirements.

Other points in ID requirement:

- **Report does not explain why the goals of improved election integrity will not be met through the existing provisions in the Help America Vote Act of 2002 (HAVA).**
- Report fails to consider alternative measures to advance its goals that are less restrictive to voters. To the extent that any limited fraud by **individuals at the polls does trickle into the system, it can be addressed by far less restrictive alternatives**. The first step is to recognize that only voters who appear on the registration list may vote a regular ballot. Proper cleaning of registration lists – and proper use of the lists at the poll–will therefore go a long way toward ensuring that every single ballot is cast by an eligible voter.
- In addition to the **better registration lists that full implementation will provide, better record keeping and administration at the polls will reduce the limited potential for voting by ineligible persons**. In the unlikely event that implementation of current law is not able to wipe out whatever potential for individual fraud remains, there are several effective and less burdensome alternatives to the Report's Real ID recommendation that received wholly insufficient consideration.
- Costs - If required as a precondition for voting, photo identification would operate as a de facto poll tax that could disenfranchise low-income voters. To alleviate this burden, the Report appropriately recommends that the "Real ID" card itself be issued free of charge. Nevertheless, the

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

percentage of Americans without the documentary proof of citizenship necessary to obtain Real IDs is likely to remain high because the requisite documents are both expensive and burdensome to obtain. (Each of the documents an individual is required to show in order to obtain a "Real ID" card or other government-issued photo ID card costs money or presumes a minimal level of economic resources. Unless the federal and all state governments waive the cost of each of these other forms of identification, the indirect costs of photo IDs will be even greater than their direct costs. In addition, since government-issued IDs may only be obtained at specified government offices, which may be far from voters' residences and workplaces, individuals seeking such IDs will have to incur transportation costs and the costs of taking time off from work to visit those offices during often-abbreviated business hours.)

- Since voting generally depends on the voter's address, and since many states will not accept IDs that do not bear an individual's current voting address, an additional 41.5 million Americans each year will have ID that they may not be able to use to vote.
- The burden would fall disproportionately on the elderly, the disabled, students, the poor, and people of color.
- The ID recommendations reduce the benefits of voter registration at disability and other social service agencies provided by the National Voter Registration Act of 1993. Individuals who seek to register at those offices—which generally do not issue IDs Census data demonstrate that African Americans and Latinos are more than three times more likely than whites to register to vote at a public assistance agency, and that whites are more likely than African Americans and Latinos to register when seeking a driver's license. Accordingly, the voter registration procedure far more likely to be used by minorities than by whites will no longer provide Americans with full eligibility to vote.
- The Report's proposal to use Real ID as a condition of voting is so excessive that it would prevent eligible voters from proving their identity with even a valid U.S. passport or a U.S. military photo ID card. The Report's proposal to use Real ID as a condition of voting is so excessive that it would prevent eligible voters from proving their identity with even a valid U.S. passport or a U.S. military photo ID card

**Recommendation on Database Information Sharing Across States -serious efficacy, privacy, and security concerns raised by a nationally distributed database of the magnitude it contemplates.** These problems are exacerbated by the Report's recommendation that an individual's Social Security number be used as the broadly disseminated unique voting identifier.

**Recommendation on Voting Rights of Ex-Felons - This recommendation would set a standard more generous than the policies of the most regressive thirteen states in the nation but more restrictive than the remaining thirty-seven. The trend in the states is toward extension of the franchise.**

Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, "Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?" A Report to the Center for Voting Rights & Protection, September, 2004.

Focuses on **vote suppression through "ballot security programs"** (programs that, in the name of protecting against vote fraud, almost exclusively target heavily black, Latino, or Indian voting precincts and have the intent or effect of discouraging or preventing voters in those precincts from casting a ballot). Noteworthy **characteristics of these programs:**

- **focus on minority precincts almost exclusively**
- **is often on only the flimsiest evidence that vote fraud is likely to be perpetrated in such precincts;**
- **in addition to encouraging the presence of sometimes intimidating white Republican poll watchers or challengers who may slow down voting lines and embarrass potential voters by asking them humiliating questions, these programs have sometimes posted people in official-looking uniforms with badges and side arms who question voters about their citizenship or their registration**
- **warning signs may be posted near the polls, or radio ads may be targeted to minority listeners containing dire threats of prison terms for people who are not properly registered—messages that seem designed to put minority voters on the defensive.**
- **sometimes false information about voting qualifications is sent to minority voters through the mail."**
- **doing mailings, collecting returned materials, and using that as a basis for creating challenger lists and challenging voters at the polls,**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

started in the 1950s and continues to today (problem with this practice is that reasons for a mailing to be returned include a wrong address, out of date or inaccurate addresses, poor mail delivery in minority areas, and matching mistakes)

Provide numerous examples from the last 50 years to demonstrate his thesis, going through the historical development of Republican ballot security programs from the 1950s through to the present (including more recent incidents, such as 1981 in New Jersey, 1982 Dallas, Louisiana 1986, Houston 1986, Hidalgo 1988 Orange County 1988, North Carolina 1990, South Carolina 1980-1990, and South Dakota 2002). Author cites and quotes internal Republican letters and memoranda, primary sources and original documents, media reports, scholarly works, as well as the words of judges' rulings in some of the cases that ended up in litigation to prove his argument. author cites and quotes internal Republican letters and memoranda, primary sources and original documents, media reports, scholarly works, as well as the words of judges' rulings in some of the cases that ended up in litigation to prove his argument.

**Some of the features of vote suppression efforts put forth by Republicans under the guise of ballot security programs:**

1. **An organized, often widely publicized effort to field poll watchers in what Republicans call "heavily Democratic," but what are usually minority, precincts;**
2. **Stated concerns about vote fraud in these precincts, which are occasionally justified but often are not;**
3. **Misinformation and fear campaigns directed at these same precincts, spread by radio, posted signs in the neighborhoods, newspapers, fliers, and phone calls, which are often anonymously perpetrated;**
4. **Posting "official-looking" personnel at polling places, including but not limited to off-duty police—sometimes in uniform, sometimes armed;**
5. **Aggressive face-to-face challenging techniques at the polls that can confuse, humiliate, and intimidate—as well as slow the voting process—in these same minority precincts;**
6. **Challenging voters using inaccurate, unofficial lists of registrants derived from "do-not-forward" letters sent to low-income and minority neighborhoods;**
7. **Photographing, tape recording, or videotaping voters; and**
8. **Employing language and metaphors that trade on stereotypes of minority voters as venal and credulous.**

The report ends with some observations on the state of research on the incidence of fraud, which the author finds lacking. He **suggests that vote suppression of qualified minority voters by officials and partisan poll-watchers, challengers, and uniformed guards should also be considered as included in any definition of election fraud.** Recommends Democrats should not protest all programs aimed at ballot integrity, but rather work with Republicans to find solutions to problems that confront both parties and the system as a whole.

Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.

Presents results from the first nationwide study to document the implementation of American felony disenfranchisement law. Data came from two main sources: a 33-state survey of state elections officials (spring 2004) and telephone interviews with almost one hundred city, county, town, and parish officials drawn from 10 selected states.

### Major Conclusions:

1. **Broad variation and misunderstanding in interpretation and enforcement of voting laws** (more than one-third [37%] of local officials interviewed in ten states either described their state's fundamental eligibility law incorrectly, or stated that they did not know a central aspect of that law. / Local registrars differ in their knowledge of basic eligibility law, often within the same state. Differences also emerge in how they are notified of criminal convictions, what process they use to suspend, cancel, or "purge" voters from the rolls, whether particular documents are required to restore a voter to eligibility, and whether they have information about the criminal background of new arrivals to the state.)
2. **Misdemeanants disenfranchised in at least five states** (the commonly-used term "felon disenfranchisement" is not entirely accurate, since at

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

least five states – Colorado, Illinois, Michigan, South Carolina, and Maryland -- also formally bar some or all people convicted of misdemeanors from voting [ it is likely that misdemeanants in other states who do retain the formal right to vote could have difficulty exercising that right, given ignorance of their eligibility and the lack of clear rules and procedures for absentee voting by people in jail who have not been convicted of a felony / Maryland excludes persons convicted of many misdemeanors, such as “Unlawful operation of vending machines,” “Misrepresentation of tobacco leaf weight,” and “Racing horse under false name.”)

3. **Significant ambiguities in voting laws (disenfranchisement in Tennessee is dependent on which of five different time periods a felony conviction occurred between 1973 and the present /** in Oregon, disenfranchisement is determined not by conviction or imprisonment for a felony, but for being placed under Department of Corrections supervision / since 1997, some persons convicted of a felony and sentenced to less than 12 months’ custody have been sent to county jails and hence, are eligible to vote.
4. **Disenfranchisement results in contradictory policies within states (the “crazy-quilt” pattern of disenfranchisement laws exists even within states /** Alabama and Mississippi have both the most and least restrictive laws in the country, a result which is brought about by the fact that certain felonies result in the loss of voting rights for life, while others at least theoretically permit people in prison to vote / most felonies in Alabama result in permanent disenfranchisement, but drug and DUI offenses have been determined to not involve the “moral turpitude” that triggers the loss of voting rights / in Mississippi, ten felonies result in disenfranchisement, but do not include such common offenses as burglary and drug crimes.
5. **Confusing policies lead to the exclusion of legal voters and the inclusion of illegal voters:** The complexity of state disenfranchisement policies results in frequent misidentification of voter eligibility, largely because officials differ in their knowledge and application of disqualification and restoration law and procedures.
6. **Significant variation and uncertainty in how states respond to persons with a felony conviction from other states:** No state has a systematic mechanism in place to address the immigration of persons with a felony conviction, and there is no consensus among indefinite-disenfranchisement states on whether the disqualification is properly confined to the state of conviction, or should be considered in the new state of residence. Interpretation and enforcement of this part of disenfranchisement law varies not only across state lines, but also from one county to another within states. Local officials have no way of knowing about convictions in other states, and many are unsure what they would do if a would-be voter acknowledged an old conviction. Because there is no prospect of a national voter roll, this situation will continue even after full HAVA implementation.
7. **Disenfranchisement is a time-consuming, expensive practice:** Enforcement requires elections officials to gather records from different agencies and bureaucracies, including state and federal courts, Departments of Corrections, Probation and Parole, the state Board of Elections, the state police, and other counties’ elections offices.

### Policy Implications

1. **Policies disenfranchising people living in the community on probation or parole, or who have completed a sentence are particularly difficult to enforce:** States which disenfranchise only persons who are currently incarcerated appear able to enforce their laws more consistently than those barring non-incarcerated citizens from voting.
2. **Given large-scale misunderstanding of disenfranchisement law, many eligible persons incorrectly believe they cannot vote, or have been misinformed by election officials:** More than one-third of election officials interviewed incorrectly described their state’s law on voting eligibility. More than 85% of the officials who misidentified their state’s law either did not know the eligibility standard or specified that the law was more restrictive than was actually the case.
3. **Occasional violation of disenfranchisement law by non-incarcerated voters not surprising:** Given the complexity of state laws and the number of state officials who lack an understanding of restoration and disqualification procedures, it should come as no surprise that many voters are ignorant of their voting status, a fact that is likely to have resulted in hundreds of persons with a felony conviction registering and voting illegally in recent years.

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

4. Taken together, these findings undermine the most prominent rationale for disenfranchisement: that the policy reflects a strong, clear consensus that persons with a felony conviction are unfit to vote and constitute a threat to the polity: First, when significant numbers of the people who administer elections do not know important aspects of disenfranchisement law, it is hard to conclude that the restriction is necessary to protect social order and the "purity" of the ballot box. Second, because they are all but invisible in the sentencing process, "collateral" sanctions like disenfranchisement simply cannot accomplish the denunciatory, expressive purposes their supporters claim. We now know that disenfranchisement is not entirely "visible" even to the people running American elections. Third, deep uncertainty regarding the voting rights of people with felony convictions who move from one state to another indicates that we do not even know what purpose disenfranchisement is supposed to serve – whether it is meant to be a punishment, or simply a non-penal regulation of the franchise.

### Recommendations

1. **Clarify Policies Regarding Out-of-State Convictions:** State officials should clarify their policies and incorporate into training programs the means by which a felony conviction in another state affects an applicant's voting eligibility. For example, sentence-only disenfranchisement states should clarify that newcomers with old felony convictions from indefinite disenfranchisement states are eligible to vote. And those states which bar some people from voting even after their sentences are completed must clarify whether new arrivals with old felony convictions from sentence-only disenfranchisement states are automatically eligible, and must explain what procedures, if any, should be followed for restoration.
2. **Train Election Officials:** Clarify disenfranchisement policies and procedures for all state and local election officials through development of materials and training programs in each state. At a minimum, this should include distribution of posters, brochures and FAQ sheets to local and state elections offices.
3. **Train Criminal Justice Officials:** Provide training on disqualification and restoration policies for all correctional and criminal justice officials, particularly probation and parole staff. Correctional and criminal justice officials should also be actively engaged in describing these policies to persons under criminal justice supervision.
4. **Review Voting Restrictions on Non-Incarcerated People:** Given the serious practical difficulty of enforcing laws disqualifying people who are not incarcerated from voting – problems which clearly include both excluding eligible people from voting and allowing those who should be ineligible to vote -- state policymakers should review such policies to determine if they serve a useful public purpose.

American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.

Using court records, police reports and news articles, ACVR Legislative Fund presented this Report documenting hundreds of reported incidents and allegations from around the country. The report **most often alleges voter intimidation and voter registration fraud, and to a lesser degree absentee ballot fraud and vote buying.** This report alleges a coordinated effort by members of some organizations to rig the election system through voter registration fraud, the first step in any vote fraud scheme that corrupts the election process by burying local officials in fraudulent and suspicious registration forms. paid Democrat operatives were far more involved in voter intimidation and suppression activities than were their Republican counterparts during the 2004 presidential election. Identified five cities as "hot spots" which require additional immediate attention, based on the findings of this report and the cities' documented history of fraud and intimidation: Philadelphia, PA, Milwaukee, WI, Seattle, WA, St. Louis/East St. Louis, MO/IL, and Cleveland, OH. Refutes charges of voter intimidation and suppression made against Republican supporters, discusses similar charges against Democrats, details incidents vote fraud and illegal voting and finally discusses problems with vote fraud, voter registration fraud and election irregularities around the country. Recommends:

- **Both national political parties should formally adopt a zero-tolerance fraud and intimidation policy that commits the party to pursuing and fully prosecuting individuals and allied organizations who commit vote fraud or who seek to deter any eligible voter from participating in the election through fraud or intimidation.** No amount of legislative reform can effectively deter those who commit acts of fraud if there is no punishment for the crime and these acts continue to be tolerated.

011212

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- States should adopt legislation requiring government-issued photo ID at the polls and for any voter seeking to vote by mail or by absentee ballot. Government-issued photo identification should be readily available to all citizens without cost and provisions made to assure availability of government-issued identification to disabled and low-income citizens.
- States should adopt legislation requiring that all polling places be fully accessible and accommodating to all voters regardless of race, disability or political persuasion and that polling locations are free of intimidation or harassment.
- States should create and maintain current and accurate statewide voter registration databases as mandated by the federal Help America Vote Act (“HAVA”) and establish procedures to assure that the statewide voter roll is current and accurate and that the names of eligible voters on the roll are consistent with the voter roll used by local election authorities in conducting the election.
- States should adopt legislation establishing a 30-day voter registration cutoff to assure that all voter rolls are accurate and that all registrants can cast a regular ballot on Election Day and the election officials have opportunity to establish a current and accurate voter roll without duplicate or fictional names and assure that all eligible voters (including all recently registered voters) are included on the voter roll at their proper precinct.
- States should adopt legislation requiring voter registration applications to be delivered to the elections office within one week of being completed so that they are processed in a timely manner and to assure the individuals registered by third party organizations are properly included on the voter roll.
- States should adopt legislation and penalties for groups violating voter registration laws, and provide the list of violations and penalties to all registration solicitors. Legislation should require those organizations obtaining a voter’s registration to deliver that registration to election officials in a timely manner and should impose appropriate penalties upon any individual or organization that obtains an eligible voter’s registration and fails to deliver it to election authorities.
- States should adopt legislation prohibiting “bounty” payment to voter registration solicitors based on the number of registration cards they collect.

The Advancement Project, “America’s Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy” November 7, 2001

Written after the 2000 election, thesis of report is that **structural disenfranchisement**—the effect of breakdowns in the electoral system, is the new poll tax. Structural disenfranchisement includes “bureaucratic blunders, governmental indifference, and flagrant disregard for voting rights.” Blame for structural disenfranchisement is laid squarely at the feet of **states and localities that “shirk their responsibilities or otherwise manipulate election systems,” resulting in voters “either turned away from the polls or their votes are thrown out.”** Data and conclusions in the Report are taken from **eight sample case studies** of states and cities across the country and a survey of state election directors that reinforces the findings of the case studies (New York City—in six polling places Chinese translations inverted the Democrats with the Republicans; Georgia—the state computer crashed two weeks before the election, dropping thousands of voters from the rolls; Virginia—registration problems kept an untold number from voting; Chicago—in inner-city precincts with predominately minority populations, almost four out of every ten votes cast for President (in 2000) were discarded; St. Louis—thousands of qualified voters were placed on inactive lists due to an overbroad purge; Florida—a voting list purge of voters whose name and birth date closely resembled those of people convicted of felonies; and, Texas—significant Jim Crow like barriers to minority voting.) Most ballot blockers involve the structural elements of electoral administration: “ill-trained poll workers, failures to process registration cards on time or at all, inaccurate registration rolls, overbroad purges of voter rolls, unreasonably long lines, inaccurate ballot translations and a shortage of translators to assist voters who have limited English language skills.”

### Findings:

- election directors lack the resources to effectively do their jobs and some lack the “ability or will to force local election officials to fix serious

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

problems”;

- election officials are highly under funded and legislatures refuse to grant their requests for more money;
- due to a lack of funds, election officials must use old and inferior equipment and can't improve training or meet structural needs;
- election officials are generally unaware of racial disparities in voting; only three of the 50 state election administrators are non-white.

### Recommendations:

- federal policies that set nationwide and uniform election policies;
- federal guarantee of access to provisional ballots;
- enforcement of voter disability laws;
- automatic restoration of voting rights to those convicted of a crime after they have completed their sentence;
- a centralized data base of voters administered by non-partisan individuals;
- federal standards limiting precinct discarded vote rates to .25 %;
- federal requirements that jurisdiction provide voter education, including how to protect their right to vote; and laws that strengthen the ability of individuals to bring actions to enforce voting rights and anti-discrimination laws.

The Brennan Center and Professor Michael McDonald “Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General,” The Brennan Center for Justice at NYU School of Law, December 2005.

A September 15, 2005 Report submitted to the New Jersey Attorney General included lists of purportedly illegitimate votes in New Jersey in the 2004 general election, including lists of 10,969 individuals who purportedly voted twice and lists of 4,756 voters who were purportedly dead or incarcerated in November 2004. **Analysis of the suspect lists reveals that the evidence submitted does not show what it purports to show: cause for concern that there is serious risk of widespread fraud given the state of the New Jersey voter registration rolls.** These suspect lists were compiled by attempting to match the first name, last name, and birth date of persons on county voter registration files. **Analysis reveals several serious problems with the methodology used to compile the suspect lists that compromise the lists' practical value.** For example, middle initials were ignored throughout all counties, so that “J\_\_\_\_\_ A. Smith” was presumed to be the same person as “J\_\_\_\_\_ G. Smith.” Suffixes were also ignored, so that fathers and sons – like “B\_\_\_\_\_ Johnson” and “B\_\_\_\_\_ Johnson, Jr.” – were said to be the same person. **A presumption that two records with the same name and date of birth must represent the same person is not consistent with basic statistical principles.**

Re Claim of Double Voting by 4,497 Individuals:

- 1,803 of these 4,397 records of ostensibly illegal votes seem to be the product of a glitch in the compilation of the registration files (far more likely that data error is to blame for the doubly logged vote - to irregularities in the data processing and compilation process for one single county);
- another 1,257 entries of the 4,397 records probably represent similar data errors;
- approximately 800 of the entries on the list likely represent different people, with different addresses and different middle initials or suffixes;
- for approximately 200 of the entries in this category, however, less information is available (lack of or differences in middle initial or middle name);
- 7 voters were apparently born in January 1, 1880 – which is most likely a system default for registrations lacking date-of-birth information;
- for 227 voters, only the month and year of birth are listed: this means only that two voters with the same name were born in the same month and year, an unsurprising coincidence in a state of several million people;
- leaves approximately 289 votes cast under the same name and birth date – like votes cast by “P\_\_\_\_\_ S. Rosen,” born in the middle of the baby boom – but from two different addresses. It may appear strange, but there may be two P\_\_\_\_\_ S. Rosens, born on the same date in 1948 – and

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

such coincidences are surprisingly common. . In a group of just 23 people, it is more likely than not that two will share the same birthday. For 40 people, the probability is 90%. Many, if not most, of the 289 alleged double votes of persons registered at different addresses most likely reflect two separate individuals sharing a first name, last name, middle initial, and birth date.

But there is **no doubt that there are duplicate entries on New Jersey's registration rolls**. It is well known that voter registration rolls contain "deadwood" – registration entries for individuals no longer living at a given address or deceased. There is no evidence, however, that these extra registrations are used for widespread illegal voting. Moreover, **the problem of deadwood will soon be largely resolved: both the National Voter Registration Act of 1993 and the Help America Vote Act of 2002 require states to implement several systems and procedures as of January 1, 2006, that will clean the voter rolls of duplicate or invalid entries while protecting eligible voters from unintended disfranchisement.**

Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005

Study re 2004 election in Ohio. Findings considered related to EAC study:

- **Statewide, 6 % of all voters reported feelings of intimidation: 16 percent of African Americans reported experiencing intimidation versus only 5 % of white voters.**
- **African American voters were 1.2 times more likely than white voters to be required to vote provisionally.** Of provisional voters in Cuyahoga County, 35% were African American, compared to 25% of non-provisional voters, matched by geography.
- Under Ohio law, the only voters who should have been asked for identification were those voting in their first Federal election who had registered by mail but did **not** provide identification in their registration application. **Although only 7% of all Ohio voters were newly registered (and only a small percentage of those voters registered by mail and failed to provide identification in their registration application), more than one third (37% reported being asked to provide identification.—meaning large numbers of voters were illegally required to produce identification. African American voters statewide were 47% more likely to be required to show identification than white voters. Indeed, 61% of African American men reported being asked to provide identification at the polls.**
- **Scarcity of voting machines caused long lines that deterred many people from voting: 3% of voters who went to the polls left their polling places and did not return due to the long lines; statewide, African American voters reported waiting an average of 52 minutes before voting while white voters reported waiting an average of 18 minutes; overall, 20% of white Ohio voters reported waiting more than twenty minutes, while 44% of African American voters reported doing so.**

The report also includes a useful summary and description of the reports that came through Ohio Election Protection on Election Day, which included a wide variety of problems, including voter intimidation and discrimination.

Pertinent recommendations:

- **codify into law all required election practices**, including requirements for the adequate training of official poll workers
- **adopt legislation to make clear and uniform the rules on voter registration.**
- **adopt uniform and clear published standards for the distribution of voting equipment and the assignment of official pollworkers among precincts**, to ensure adequate and nondiscriminatory access
- **improve training of official poll workers**
- **adopt clear and uniform rules on the use of, and the counting of, provisional ballots**, and distribute them for public comment well in advance of each election day
- **not adopt requirements that voters show identification at the polls, beyond those already required by federal law; vigorously enforce, to the full extent permitted by state law, a voter's right to vote without showing identification.**

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- **make voter suppression a criminal offense at the state level**, in all states
- **implement statewide voter lists** in accordance with the Help America Vote Act ("HAVA")
- **expend significantly more resources in educating voters on where, when and how to vote.**
- **partisan officials who volunteer to work for a candidate should not oversee or administer any elections.**

Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2002."

Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2003."

Public Integrity Section, Criminal Division, United States Department of Justice, "Report to Congress on the Activities and Operations of the Public Integrity Section for 2004."

**Supervision of the Justice Department's nationwide response to election crimes:**

Election Crimes Branch oversees the Department's handling of all election crime allegations other than those involving civil rights violations, which are supervised by the Voting Section of the Civil Rights Division. Specifically, the Branch supervises four types of corruption cases: crimes that involve the voting process, crimes involving the financing of federal election campaigns, crimes relating to political shakedowns and other patronage abuses, and illegal lobbying with appropriated funds. Vote frauds and campaign-financing offenses are the most significant and also the most common types of election crimes. The purpose of Headquarters' oversight of election crime matters is to ensure that the Department's nationwide response to election crime is uniform, impartial, and effective. An Election Crimes Branch, headed by a Director and staffed by Section attorneys on a case-by-case basis, was created within the Section in 1980 to handle this supervisory responsibility.

**Voting Fraud:**

During **2002** the Branch assisted United States Attorneys' Offices in Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Michigan, Mississippi, Missouri, Nevada, North Carolina, Rhode Island, South Carolina, South Dakota, Texas, Utah, West Virginia, and Wisconsin in handling vote fraud matters that occurred in their respective districts. During **2003** the Branch assisted United States Attorneys' Offices in Alabama, Arkansas, California, Colorado, Connecticut, Florida, Georgia, Illinois, Indiana, Iowa, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Jersey, Nevada, North Carolina, Ohio, Oklahoma, Oregon, South Carolina, South Dakota, Tennessee, Texas, Virgin Islands, West Virginia, and Wisconsin in handling vote fraud matters that occurred in their respective districts. During **2004** the Branch assisted United States Attorneys' Offices in the following states in the handling of vote fraud matters that occurred in their respective districts: Alabama, Alaska, Arizona, Arkansas, California, Colorado, Florida, Georgia, Illinois, Indiana, Kansas, Kentucky, Louisiana, Massachusetts, Maryland, Michigan, Minnesota, Mississippi, Missouri, New Hampshire, New Jersey, New Mexico, Nevada, New York, North Carolina, North Dakota, Ohio, Oklahoma, Oregon, Pennsylvania, Puerto Rico, South Carolina, South Dakota, Texas, Utah, Virginia, West Virginia, Washington, and Wisconsin. This assistance included evaluating vote fraud allegations to determine whether investigation would produce a prosecutable federal criminal case, helping to structure investigations, providing legal advice concerning the formulation of charges, and assisting in establishing several task force teams of federal and state law enforcement officials to investigate vote fraud matters.

**Litigation:**

The Branch Director or Section attorneys also prosecute selected election crimes, either by assuming total operational responsibility for the case or by handling the case jointly with a United States Attorney's Office. The Section also may be asked to supervise the handling of a case in the event of a partial recusal of the local office. For example, in 2002 the Branch continued to supervise the prosecution of a sheriff and his election attorney for using data from the National Crime Information Center regarding voters' criminal histories to wage an election contest.

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

### **District Election Officer Program:**

The Branch also assists in implementing the Department's long-standing District Election Officer (DEO) Program. This Program is designed to ensure that each of the 93 United States Attorneys' Offices has a trained prosecutor available to oversee the handling of election crime matters within the district and to coordinate district responses with Headquarters regarding these matters. The DEO Program involves the appointment of an Assistant United States Attorney in each federal district to serve a two-year term as a District Election Officer; the training of these prosecutors in the investigation and prosecution of election crimes; and the coordination of election-related initiatives and other law enforcement activities between Headquarters and the field. In addition, the DEO Program is a crucial feature of the Department's nationwide Election Day Program, which occurs in connection with the federal general elections held in November of even-numbered years. The Election Day Program ensures that federal prosecutors and investigators are available both at the Department's Headquarters in Washington and in each district to receive and handle complaints of election irregularities from the public while the polls are open and that the public is aware of how these individuals can be contacted on election day. In 2002 the Department enhanced the DEO Program by establishing a Ballot Integrity Initiative.

### **Ballot Integrity Initiative:**

**Beginning in September of 2002**, the Public Integrity Section, acting at the request of the Attorney General, assisted in the implementation of a Ballot Integrity Initiative for the 2002 general election and subsequent elections. This initiative included increasing the law enforcement priority the Department gives to election crimes; holding a special day-long training event in Washington, DC for representatives of the 93 United States Attorneys' Offices; publicizing the identities and telephone numbers of the DEOs through press releases issued shortly before the November elections; and requiring the 93 U.S. Attorneys to communicate the enhanced federal prioritization of election crime matters to state and local election and law enforcement authorities. As part of Ballot Integrity Initiative, on October 8, 2002, the Public Integrity Section and the Voting Rights Section of the Department's Civil Rights Division co-sponsored a Voting Integrity Symposium for District Election Officers representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes used to prosecute such cases. Attorney General John Ashcroft delivered the keynote address on the importance of election crime and ballot integrity enforcement. Assistant Attorney General of the Civil Rights Division Ralph Boyd and Assistant Attorney General of the Criminal Division Michael Chertoff also spoke to attendees on the protection of voting rights and the prosecution of election cases. As part of Ballot Access and Voting Integrity Initiative, on September 23 and 24, 2003, the Public Integrity Section and the Voting Rights Section of the Department's Civil Rights Division co-sponsored a two-day Symposium for DEOs representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes used to prosecute such cases. Assistant Attorney General of the Civil Rights Division Alexander Acosta and Assistant Attorney General of the Criminal Division Christopher A. Wray delivered the keynote addresses on the importance of protecting voting rights and the prosecution of election cases. On July 20 and 21, 2004, the Public Integrity Section and the Voting Section of the Department's Civil Rights Division co-sponsored a two-day symposium for DEOs representing each of the 93 federal judicial districts. Topics discussed included the types of conduct that are prosecutable as federal election crimes and the federal statutes available to prosecute such cases, and the handling of civil rights matters involving voting. Attorney General John Ashcroft delivered the keynote address on the importance of protecting voting rights and the prosecution of election fraud. In addition, Assistant Attorney General Christopher A. Wray of the Criminal Division and Assistant Attorney General R. Alexander Acosta of the Civil Rights Division addressed conference attendees on voting rights and election fraud enforcement issues respectively.

As a result of the Initiative, during 2002 the number of election crime matters opened by federal prosecutors throughout the country increased significantly, as did the Section's active involvement in election crime matters stemming from the Initiative. At the end of 2002, the Section was supervising and providing advice on approximately 43 election crime matters nationwide. In addition, as of December 31, 2002, 11 matters involving possible election crimes were pending in the Section. During 2002 the Section closed two election crime matters and continued its operational supervision of 8 voting fraud cases (conspiracy to illegally obtain criminal history records to use to challenge voters (AL) and 7 cases of vote buying involving 10 defendants (KY).

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Craig Donsanto, "The Federal Crime of Election Fraud," Public Integrity Section, Department of Justice, prepared for Democracy.Ru, n.d., at [http://www.democracy.ru/english/library/international/eng\\_1999-11.html](http://www.democracy.ru/english/library/international/eng_1999-11.html)

Addresses the role of the United States Department of Justice in matters of election fraud, specifically: what sort of election-related conduct is potentially actionable as a federal crime; what specific statutory theories apply to frauds occurring in elections lacking federal candidates on the ballot, what federalism; procedural, and policy considerations impact on the federalization of this type of case; and how Assistant United States Attorneys should respond to this type of complaint. As a general rule, the federal crime of voter fraud embraces only organized efforts to corrupt of the election process itself: i.e., the registration of voters, the casting of ballots, and the tabulation and certification of election results. Moreover, this definition excludes all activities that occur in connection with the political campaigning process, unless those activities are themselves illegal under some other specific law or prosecutorial theory. This definition also excludes isolated acts of individual wrongdoing that are not part of an organized effort to corrupt the voting process. Mistakes and other gaffs that inevitably occur are not included as voter fraud. Prosecuting election fraud offenses in federal court is further complicated by the constitutional limits that are placed on federal power over the election process. The conduct of elections is primarily a state rather than a federal activity.

### **Four situations where federal prosecution is appropriate:**

1. Where the objective of the conduct is to corrupt the outcome of a federal elective contest, or where the consequential effect of the corrupt conduct impacts upon the vote count for federal office;
2. Where the object of the scheme is to discriminate against racial, ethnic or language minority groups, the voting rights of which have been specifically protected by federal statutes such as the Voting Rights Act, 42 U.S.C. section 1973 et seq.;
3. Where federalization is required in order to redress longstanding patterns of electoral fraud, either at the request of state or local authorities, or in the face of longstanding inaction by state authorities who appear to be unwilling or unable to respond under local law; and,
4. Where there is a factual basis to believe that fraudulent registration or voting activity is sufficiently connected to other forms of criminal activity that perusing the voter fraud angle will yield evidence useful in the prosecution of other categories of federal offense

### **Four advantages to federal prosecution:**

1. Voter fraud investigations are labor intensive - local law enforcement agencies often lack the manpower and the financial resources to take these cases on;
2. Voter fraud matters are always politically sensitive and very high profile endeavors at the local level - local prosecutors (who are usually themselves elected) often shy away from prosecuting them for that reason; the successful prosecution of voter fraud cases demands that critical witnesses be examined under oath before criminal charges based on their testimony are filed.
3. Many states lack the broad grand jury process that exists in the federal system; and
4. The defendants in voter fraud cases are apt to be politicians - or agents of politicians - and it is often impossible for either the government or the defendant to obtain a fair trial in a case that is about politics and is tried to a locally-drawn jury. The federal court system provides for juries to be drawn from broader geographic base, thus often avoiding this problem.

Several prosecutorial theories used by United States Attorneys to federalize election frauds are discussed.

### **Four questions used by prosecutors in evaluating the credibility of election complaints:**

1. does the substance of the complaint assuming it can be proven through investigation - suggest a potential crime;
2. is the complaint sufficiently fact-specific that it provides leads for investigators to pursue;
3. is there a federal statute that can be used to federalize the criminal activity at issue; and,
4. is there a special federal interest in the matter that warrants federalization rather than deferral to state law enforcement.

All federal election investigations must avoid the following: non-interference in elections unless absolutely necessary to preserve evidence; interviewing voters during active voting periods; seizing official election documentation; investigative activity inside open polls; and prosecutors must adhere to 18 U.S.C. section 592, prohibiting the stationing of armed men at places where voting activity is taking place.

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Election crimes based on race or language minority status are treated as civil rights matters under the Voting Rights Act.

People for the American Way, Election Protection 2004, Election Protection Coalition, at <http://www.electionprotection2004.org/edaynews.htm>

Election Protection 2004 was the nation's most far-reaching effort to protect voter rights before and on Election Day. The historic nonpartisan program included: (1) a toll-free number, 1-866-OUR-VOTE, with free, immediate and multi-lingual assistance to help voters with questions about registration and voting, and assist voters who encounter barriers to the ballot box; (2) distribution of more than five million "Voters' Bills of Rights" with state-specific information; (3) 25,000 volunteers, including 6,000 lawyers and law students, who watched for problems and assisted voters on the spot at more than 3,500 predominantly African-American and Latino precincts with a history of disenfranchisement in at least 17 states; and (4) civil rights lawyers and advocates represented voters in lawsuits, preserved access to the polls, exposed and prevented voter intimidation, worked with election officials to identify and solve problems with new voting machines, technology and ballot forms, and protected voter rights in advance and on Election Day.

### **Voter Intimidation and Suppression Stories (Abridged):**

- An Associated Press story noted Election Protection's exposure of reported voter suppression tactics in **Colorado**: Officials with the Election Protection Coalition, a voter-rights group, also said **some voters in a predominantly black neighborhood north of Denver found papers on their doorsteps giving them the wrong address for their precinct.**
- Election Protection received a report from Boulder County, **Colorado** that a **poll worker made racist comments to Asian American voter and then told her she was not on the list and turned her away.** The voter saw others filling out provisional ballots and asked for one but was denied. Another Asian American woman behind her in line was also given trouble by the same poll worker (he questioned her nationality and also turned her away).
- Election Protection received a report from Florissant County, **Missouri** from a voter who lives in predominantly white neighborhood. While waiting in line to vote, a **Republican challenger challenged the black voters by requesting more proof of identification, residence, and signature match, while asking nothing from white voters.** Also, the same voter reportedly asked a few questions about voting but an election officials refused to provide any meaningful answer, insisting that "it's very simple", but provided white voters with information when requested. There was one other black voter in line who was also singled out for same treatment while white voters were not.
- The Election Protection hotline received reports from Pinellas County, **Florida** that individuals purporting to be from the Kerry campaign are going door-to-door handing out absentee ballots, and asking voters to fill them out, and then taking the ballots from them, saying "Vote here for Kerry. Don't bother going to the polls."
- The Election Protection Coalition received a report from a woman whose sister lives in **Milwaukee** and is on government assistance. Her sister was reportedly told by her "case manager" that if she voted for Kerry, she would stop receiving her checks.
- An illiterate, older and disabled voter in Miami-Dade asked for assistance reading the ballot and reported that a poll worker yelled at him and refused to assist him and also refused to allow him to bring a friend into the booth in order to read the ballot to him.
- The Election Protection Coalition have gathered reports that flyers are circulating in a black community in Lexington, **South Carolina** claiming they those who are behind on child support payments will be arrested as the polls.
- **Minority voters from Palm Beach County, Florida** reported to the hotline that they received middle-of-the-night, live harassing phone calls warning them away from the polls.
- A volunteer for Rock the Vote reported that two illiterate voters in **Michigan** requested assistance with their ballots but were refused and reportedly mocked by poll workers.
- The hotline received a call from a radio DJ in Hillsborough County, **Florida**, who stated that he has received many calls (most of which were from African-Americans) claiming that poll workers were turning voters away and not "letting" them vote.

011219

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

- The hotline received a call from **Pima County, Arizona**, indicating that **Democratic voters received calls throughout Monday evening, providing incorrect information about the precinct location**. Voters have had to be transported en masse in order to correct the problem.
- A caller from **Alabama** claims that he was told at his polling place that he could vote there for everything but the President and that he would have to go elsewhere in order to vote for a presidential candidate.
- Poll monitors in **Philadelphia** reports groups of lawyers, traveling in threes, who pull voters out of line and challenge them to provide ID, but when challenged themselves, they hop into waiting cars or vans and leave. Similar activity by Republican lawyers in Philadelphia was reported in the 2002 election.
- In **Cuyahoga, Ohio**, a caller reported that all black voters are being asked to show ID, while white voters are not. Caller report that he is black and had to show ID while his girlfriend is white and did not have to show ID.
- Two months ago, **suspicious phone calls to newly registered Democrats —telling them they weren't, in fact, registered to vote —** were traced to the Republican headquarters in the **Eastern Panhandle**. On **Monday, Democrats there said the calls have started again, even after the Berkeley County Clerk — a Republican — sent the party a cease-and-desist letter**. The Berkeley prosecutor, who also is county Democratic chairman, has called on the U.S. attorney to investigate.
- In **Tuscon, Arizona** a **misleading call informing voters that they should vote on November 3** has been traced back to the state GOP headquarters. The FBI is investigating.
- **A man driving around in a big van covered in American flags and a big picture of a policeman was reportedly parked in front of a polling place; he then got out and moved within the 75 ft limit, until he was asked to leave; he then was found inside the polling place and was again asked to leave**. Election Protection volunteers contacted officials and the man was eventually removed.
- The Election Protection hotline has received a report from **individuals who claim to have received recorded telephone message coming from Bill Clinton and ACT and reminding them to vote on Nov. 3rd**.
- In **Massachusetts**, the EP Hotline has received a report that a **radio station (WILD) is broadcasting that voters will be arrested on the spot if they have outstanding parking tickets**.
- In **Richland, South Carolina** Election Protection has received a report of a **poll manager turning away individuals who do not have photo ID issued to the county or a driver's license**; an EP lawyer spoke with the Poll Manager at 8:20 am and told her that people with other forms of ID should be allowed to vote by provisional ballot.
- In **Greenville**, a caller reported that a **white poll worker was asking Blacks for multiple form of I.D**. Fortunately, the voter who reported the problem did have a second I.D. but reported that some others were turned away. Election Protection attorneys have alerted election officials.
- In **Allegheny County, Pennsylvania**, an official looking **flyer advises Democratic voters to "create a peaceful voting environment" by voting on Wednesday, November 3**
- The week before the election, **flyers were circulated in Milwaukee under the heading "Milwaukee Black Voters League" with some "warnings for election time." The flyer listed false reasons for which you would be barred from voting (such as a traffic ticket) and then warned that "If you violate any of these laws you can get ten years in prison and your children will get taken away from you."**
- There is a **Jefferson County flyer which tells voters "See you at the Poles[sic]"... on November 4**.

Craig Donsanto, "Prosecution of Electoral Fraud Under United State Federal Law," *IFES Political Finance White Paper Series*, IFES, 2006.

[NO SUMMARY FOUND] This is summary of federal role in prosecuting election crimes.

General Accounting Office, "Elections: Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote,"

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Report to Congressional Requesters, September 2005.

**[SUMMARY FAILS TO NOTE ELECTION OFFICIALS' RESPONSEs THAT LITTLE VOTING FRAUD OR VOTER INTIMIDATION WAS DETECTED. DETECTED VOTING FRAUD WAS RELATED TO SUBMISSION OF FALSE/MATERIALLY INCORRECT VOTER REGISTRATION APPLICATIONS AND TO ABSENTEE BALLOT FRAUD. VOTER SUPPRESSION EFFORTS OCCUR.]**

This Report focuses on the efforts of local election officials in 14 jurisdictions within 7 states to manage the registration process, maintain accurate voter registration lists, and ensure that eligible citizens in those jurisdictions had the opportunity to cast ballots during the 2004 election. The Report concentrates on election officials' characterization of their experiences with regard to (1) managing the voter registration process and any challenges related to receiving voter registration applications; checking them for completeness, accuracy, and duplication; and entering information into voter registration lists; (2) removing voters' names from voter registration lists and ensuring that the names of eligible voters were not inadvertently removed; and (3) implementing HAVA provisional voting and identification requirements and addressing any challenges encountered related to these requirements. The Report also provides information on motor vehicle agency (MVA) officials' characterization of their experiences assisting citizens who apply to register to vote at MVA offices and forwarding voter registration applications to election offices. The Report analyzed information collected from elections and motor vehicle agency offices in seven states—Arizona, California, Michigan, New York, Texas, Virginia, and Wisconsin. The 14 jurisdictions we selected were Gila and Maricopa Counties, Arizona; Los Angeles and Yolo Counties, California; City of Detroit and Delta Township, Michigan; New York City and Rensselaer County, New York; Bexar and Webb Counties, Texas; Albemarle and Arlington Counties, Virginia; and the cities of Franklin and Madison, Wisconsin.

Election officials representing all but one of the jurisdictions surveyed following the November 2004 election said they faced some challenges managing the voter registration process, including (1) receiving voter registration applications; (2) checking them for completeness, accuracy, and duplication; and (3) entering information into voter registration lists; when challenges occurred, election officials reported they took various steps to address them. All but 1 of the jurisdictions reported removing names from registration lists during 2004 for various reasons, including that voters requested that their names be removed from the voter registration list; information from the U.S. Postal Service (USPS) showing that voters had moved outside the jurisdiction; felony records received from federal, state, or local governments identifying voters as ineligible due to felony convictions; and death records received from state or local vital statistics offices. All of the jurisdictions reported that they permitted citizens to cast provisional ballots during the November 2004 election. In addition, 12 of the 14 jurisdictions to which this was applicable reported that they offered certain first-time voters who registered by mail the opportunity to cast provisional ballots. Local election officials in 12 of the 13 jurisdictions 13 we surveyed reported that they set up mechanisms to inform voters—without cost—about the outcome of their provisional votes during the November 2004 election. These mechanisms included toll-free telephone numbers, Web sites, and letters sent to the voters who cast provisional ballots. Election officials representing 8 of the 14 jurisdictions reported facing challenges implementing provisional voting for various reasons, including some poll workers not being familiar with provisional voting or, in one jurisdiction representing a large number of precincts, staff not having sufficient time to process provisional ballots.

Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.

A comprehensive survey and analysis of vote fraud in the United States. The methodology included doing nexis searches for all 50 states and surveying existing research and reports. In addition, Minnite did a more in-depth study of 12 diverse states by doing nexis searches, studying statutory and case law, and conducting interviews with election officials and attorneys general. Finally, the study includes an analysis of a few of the most high profile cases of alleged fraud in the last 10 years, including the Miami mayoral election (1997), Orange County congressional race (1996), and the general election in Missouri (2000). In these cases, **Minnite shows that many allegations of fraud do not end up being meritorious.** Minnite finds that **available evidence suggests that the incidence of election fraud is minimal and rarely affects election outcomes.** Election officials generally do a very good job of protecting against fraud. **Conditions that give rise to election fraud have steadily declined over the last century as a result of weakened political parties, strengthened election administration, and improved voting technology.** **There is little available evidence that election reforms such as the National Voter Registration Act, election day registration, and mail-in voting have resulted in increases in election fraud.** Election

011221

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

fraud appears also to be very rare in the 12 states examined more in-depth. Legal and news records turned up little evidence of significant fraud in these states or any indication that fraud is more than a minor problem. Interviews with state officials further confirmed this impression. Minnite found that, **overall, the absentee mail-in ballot process is the feature most vulnerable to voter fraud.** There is not a lot of evidence of absentee ballot fraud but the potential for fraud is greatest in this area because of a lack of uniformly strong security measures in place in all states to prevent fraud.

### **Suggested reforms to prevent what voter fraud does take place:**

1. effective use of new statewide voter registration databases;
2. identification requirements for first time voters who register by mail should be modified to expand the list of acceptable identifying documents;
3. fill important election administration positions with nonpartisan professionals;
4. strengthen enforcement through adequate funding and authority for offices responsible for detecting and prosecuting fraud; and
5. establish Election Day Registration because it usually requires voter identification and authorization in person before a trained election worker, which reduces the opportunity for registration error or fraud.
- 6.

People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

A description and analysis of the complaints and allegations of voting irregularities gathered by the Election Protection program during the 2004 presidential election. Election Protection received more than a thousand complaints of voter suppression or intimidation. Complaints ranged from intimidating experiences at polling places to coordinated suppression tactics. For example:

- Police stationed outside a Cook County, Illinois, polling place were requesting photo ID and telling voters if they had been convicted of a felony that they could not vote.
- In Pima, Arizona, voters at multiple polls were confronted by an individual, wearing a black tee shirt with "US Constitution Enforcer" and a military-style belt that gave the appearance he was armed. He asked voters if they were citizens, accompanied by a cameraman who filmed the encounters.
- There were numerous incidents of intimidation by partisan challengers at predominately low income and minority precincts
- Voters repeatedly complained about misinformation campaigns via flyers or phone calls encouraging them to vote on a day other than November 2, 2004 or of false information regarding their right to vote. In Polk County, Florida, for example, a voter received a call telling her to vote on November 3. Similar complaints were also reported in other counties throughout Florida. In Wisconsin and elsewhere voters received flyers that said:
  - "If you already voted in any election this year, you can't vote in the Presidential Election."
  - "If anybody in your family has ever been found guilty of anything you can't vote in the Presidential Election."
  - "If you violate any of these laws, you can get 10 years in prison and your children will be taken away from you."

There were also numerous reports of poll workers refusing to give voters provisional ballots.

The following is a summary of the types of acts of suppression and intimidation included in the report and a list of the states in which they took place. All instances of irregularities that were more administrative in nature have been omitted:

1. **Improper implementation of voter identification rules, especially asking only African Americans for proof of identity:** Florida, Ohio, Pennsylvania, Illinois, Missouri, Arkansas, Georgia, Louisiana
2. **Individuals at the polls posing as some sort of law enforcement authority and intimidating and harassing voters:** Arizona, Missouri
3. **Intimidating and harassing challengers at the polls:** Ohio, Michigan, Wisconsin, Missouri, Minnesota
4. **Deceptive practices and disinformation campaigns, such as the use of flyers with intentional misinformation about voting rights or voting procedures, often directed at minority communities; the use of phone calls giving people misinformation about polling sites and**

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

other procedures; and providing verbal misinformation at the polls in a way that appears to have been intentionally misleading: Florida, Pennsylvania, Illinois, Wisconsin, Missouri, North Carolina, Arkansas, Texas

5. **Refusal to provide provisional ballots to certain voters:** Ohio, Pennsylvania, Illinois, Michigan, Colorado, Missouri, Texas, Georgia, Louisiana
6. **Registration applications submitted through third parties that were not processed:** Arizona, Michigan, Nevada (registration forms destroyed by Sproul Associates)
7. **Improper removal from the voter registration list:** Arizona
8. **Individuals questioning voters' citizenship:** Arizona
9. **Police officers at the polls intimidating voters:** Illinois, Michigan, Wisconsin, Missouri, North Carolina

The report does not provide corroborating evidence for the allegations it describes. However, especially in the absence of a log of complaints received by the Department of Justice, this report provides a very useful overview of the types of experiences some voters more than likely endured on Election Day in 2004.

### Books

John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.

Focuses almost entirely on alleged transgressions by Democrats. Fund's accusations, if credible, would indicate that fraud such as voter registration fraud, absentee ballot fraud, dead people voting, and felon voting is prevalent throughout the country. However, due to its possible biases, lack of specific footnoting, and insufficient identification of primary source material, caution is strongly urged with respect to utilizing this book for assessing the amount and types of voter fraud and voter intimidation occurring.

Fund says that "Election fraud, whether its phony voter registrations, illegal absentee ballots, shady recounts or old-fashioned ballot-box stuffing, can be found in every part of the United States, although it is probably spreading because of the ever-so-tight divisions that have polarized the country and created so many close elections lately. Fund argues that fraud **has been made easier by the passage of the National Voting Rights Act** because it allows ineligible voters to remain on the voter rolls, allowing a voter to vote in the name of someone else. He claims dead people, people who have moved, and people in jail remain on the voting list. He believes because of NVRA illegal aliens have been allowed to vote.

**Absentee balloting makes it even worse:** someone can register under false names and then use absentee ballots to cast multiple votes. Groups can get absentee ballots for the poor and elderly and then manipulate their choices.

Provides a number of examples of alleged voter fraud, mostly perpetrated by Democrats. For example, he claims much fraud in St. Louis in 2000, including illegal court orders allowing people to vote, **felons voting, people voting twice, dead people voting, voters were registered to vacant lots, election judges were not registered and evidence of false registrations.** Another case he pays a great deal of attention to are the alleged transgressions by Democrats in Indian Country in South Dakota 2002, including **voter registration fraud, suspicious absentee ballot requests, vote hauling, possible polling place fraud, abusive lawyers at polling sites, and possible vote buying.**

Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.

Bulk of the book comprises stories from United States electoral history outside the scope of this project; however, tales are instructive in showing how far back irregular and illegal voting practices go. Focuses almost entirely on alleged transgressions by Republican, although at times it does include complaints about Democratic tactics. Gumbel's accusations, if credible, especially in the Bush-Gore election, would indicate there were a number of problems in key states in such areas as **intimidation, vote counting, and absentee ballots.** However, due to its possible biases, lack of specific footnoting, and insufficient identification of primary source material, caution is strongly urged with respect to utilizing this book for assessing the amount

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

and types of voter fraud and voter intimidation occurring.
Tracy Campbell, <i>Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004</i> , Carroll & Graf Publishers, 2005.
Traces the historical persistence of voter fraud from colonial times through the 2004 Bush-Kerry election. From the textual information, it quickly becomes obvious that voter fraud was not limited to certain types of people or to certain political parties. [SKIMPY SUMMARY-DOES NOT SAY MUCH.]
David E. Johnson and Jonny R. Johnson, <i>A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush</i> , Taylor Trade Publishing, 2004.
<b>Adds almost nothing to the present study.</b> It contains no footnotes and no references to primary source material, save what may be able to be gleaned from the bibliography. Takes a historical look at United States Presidential elections from Andrew Jackson to George Bush by providing interesting stories and other historical information. There are only three pages out of the entire book that touches on vote fraud in the first Bush election. The authors assert that the exit polls in Florida were probably correct. The problem was the pollsters had no way of knowing that thousands of votes would be invalidated. But the authors do not believe that fraud was the cause of the tabulation inaccuracy.
Mark Crispin Miller, <i>Fooled Again</i> , Basic Books, 2005.
Sets out to show that the 2004 election was won by Bush through nefarious means, and indicts the news media for not taking anomalies, irregularities, and <b>alleged malfeasance</b> in the process seriously enough. However, book is well sourced, and individual instances of alleged malfeasance discussed may be worth looking at. He accuses Republicans of committing crimes and improprieties throughout the country, including: <ol style="list-style-type: none"> <li>1. <b>deliberate disparities in voting machine distribution and long lines in Democratic jurisdictions;</b></li> <li>2. <b>misinterpretation of voting laws by elections officials to the detriment of Democratic voters;</b></li> <li>3. <b>dirty tricks and deceptive practices to mislead Democratic and minority voters about voting times, places and conditions;</b></li> <li>4. <b>machine irregularities in Democratic jurisdictions;</b></li> <li>5. <b>relocating polling sites in Democratic and minority areas;</b></li> <li>6. <b>suspicious mishandling of absentee ballots;</b></li> <li>7. <b>refusing to dispense voter registration forms to certain voter registration groups;</b></li> <li>8. <b>intimidation of students;</b></li> <li>9. <b>suspicious ballot spoilage rates in certain jurisdictions;</b></li> <li>10. <b>“strategic distribution of provisional ballots,” and trashing of provisional ballots;</b></li> <li>11. <b>harassment of Native American voters;</b></li> <li>12. <b>a Republican backed organization engaging in voter registration efforts throughout the country that allegedly destroyed the voter registration forms of Democrats;</b></li> <li>13. <b>illegitimate challenges at the polls by Republican poll watchers;</b></li> <li>14. <b>improper demands for identification in certain areas;</b></li> <li>15. <b>Republican challenges to the voter registration status of thousands of voters before the election, and the creation of lists of voters to challenge at the polls;</b></li> <li>16. <b>wrongful purging of eligible voters from voting rolls;</b></li> <li>17. <b>partisan harassment;</b></li> <li>18. <b>the selective placement of early voting sites; and</b></li> <li>19. <b>failure to send out absentee ballots in time for people to vote.</b></li> </ol> <p>Details what he says was the inappropriate use of the Federal Voter Assistance Program that made voting for the military easy while throwing up obstacles</p>

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

for civilians overseas in their efforts to vote by absentee ballot, leading many of them to be disenfranchised.

### Legal

*Indiana Democratic Party vs. Rokita*, U.S. District Court Southern District of Indiana (Indianapolis) 1:05-cv-00634, U.S. Court of Appeals, 7<sup>th</sup> Circuit 06-2218

Although the proponents of SEA 483 asserted that the law was intended to combat voter fraud, no evidence of the existence of such fraud has ever been provided. No voter has been convicted of or even charged with the offense of misrepresenting his identity for purposes of casting a fraudulent ballot in person, King Dep. 95-96; Mahern Aff. ¶¶ 2-3, though there have been documented instances of absentee ballot fraud. King Dep. 120. Indeed, no evidence of in person, on-site voting fraud was presented to the General Assembly during the legislative process leading up to the enactment of the Photo ID Law. Mahern Aff. ¶¶ 2-

The State cannot show any compelling justification for subjecting only voters who vote in person to the new requirements of the Photo ID Law, while exempting absentee voters who vote by mail or persons who live in state-certified residential facilities.

On the other hand, absentee ballots are peculiarly vulnerable to coercion and vote tampering since there is no election official or independent election observer available to ensure that there is no illegal coercion by family members, employers, churches, union officials, nursing home administrators, and others.

Law gives virtually unbridled discretion to partisan precinct workers and challengers to make subjective determinations such as (a) whether a form of photo identification produced by a voter conforms to what is required by the Law, and (b) whether the voter presenting himself or herself at the polls is in fact the voter depicted in the photo Robertson Dep. 29-34, 45; King Dep. 86, 89. This is significant because any voter who is challenged under this Law will be required to vote by provisional ballot and to make a special trip to the election board's office in order to have his vote counted. Robertson Dep. 37; King Dep. 58.

The Photo ID Law confers substantial discretion, not on law enforcement officials, but on partisan precinct poll workers and challengers appointed by partisan political officials, to determine both whether a voter has presented a form of identification which conforms to that required by the Law and whether the person presenting the identification is the person depicted on it. Conferring this degree of discretion upon partisan precinct officials and members of election boards to enforce the facially neutral requirements of the Law has the potential for becoming a means of suppressing a particular point of view.

The State arguably might be justified in imposing uniform, narrowly-tailored and not overly-burdensome voter identification requirements if the State were able to show that there is an intolerably high incidence of fraud among voters misidentifying themselves at the polls for the purpose of casting a fraudulent ballot. But here, the State has utterly failed to show that this genre of fraud is rampant or even that it has ever occurred in the context of on-site, in-person voting (as opposed to absentee voting by mail) so as to justify these extra burdens, which will fall disproportionately on the poor and elderly.

And where the State has already provided a mechanism for matching signatures, has made it a crime to misrepresent one's identity for purposes of voting, and requires the swearing out of an affidavit if the voter's identity is challenged, it already has provisions more than adequate to prevent or minimize fraud in the context of in-person voting, particularly in the absence of any evidence that the problem the Law seeks to address is anything more than the product of hypothesis, speculation and fantasy.

In-person voter-identity fraud is notoriously difficult to detect and investigate. In his book *Stealing Elections*, John Fund observes that actual in-person voter fraud is nearly undetectable without a voter photo-identification requirement because anybody who provides a name that is on the rolls may vote and then walk away with no record of the person's actual identity. The problem is only exacerbated by the increasingly transient nature of society. Documentation of in-person voter fraud often occurs only when a legitimate voter at the polls hears a fraudulent voter trying to use her name, as happened to a woman in California in 1994. See Larry J. Sabato & Glenn R. Simpson, *Dirty Little Secrets* 292 (1996).

Regardless of the lack of extensive evidence of in-person voter fraud, the Commission on

EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

Federal Election Reform (known as the Baker-Carter Commission) recently concluded that "there is no doubt that it occurs." State Ex. 1, p. 18.1 **Legal cases as well as newspaper and other reports confirm that in-person voter-identity fraud, including voter impersonation, double votes, dead votes, and fake addresses, plague federal and state elections. [The memorandum details several specific cases of various types of alleged voting fraud from the past several years]**

**Though they are largely unable to study verifiable data concerning in-person voter fraud, scholars are well aware of the conditions that foster fraudulent voting. See Fund, *supra*; Sabato & Simpson, *supra*, 321. In particular, fraud has become ever more likely as "it has become more difficult to keep the voting rolls clean of 'deadwood' voters who have moved or died" because such an environment makes "fraudulent voting easier and therefore more tempting for those so inclined." Sabato & Simpson, *supra*, 321. "In general, experts believe that one in five names on the rolls in Indiana do not belong there." State Ex. 25.**

For this case, Clark Benson, a nationally recognized expert in the collection and analysis of voter-registration and population data, conducted his own examination of **Indiana's voter registration lists and concluded that they are among the most highly inflated in the nation.**

The Crawford Plaintiffs cite the **concessions** by Indiana Election Division Co-Director King and the Intervenor-State that they are **unaware of any historical in-person incidence of voter fraud occurring at the polling place (Crawford Brief, p. 23) as conclusive evidence that in-person voter fraud does not exist in Indiana.** They also seek to support this conclusion with the testimony of two "veteran poll watchers," Plaintiff Crawford and former president of the Plaintiff NAACP, Indianapolis Chapter, Roderick E. Bohannon, who testified that they had never seen any instances of in-person voter fraud.

(*id.*)

While common sense, the **experiences of many other states, and the findings of the Baker-Carter Commission all lead to the reasonable inferences that (a) in-person polling place fraud likely exists, but (b) is nearly impossible to detect without requiring photo identification, the State can cite to no confirmed instances of such fraud. On the other hand, the Plaintiffs have no proof that it does not occur.**

At the level of logic, moreover, it is **just reasonable to conclude that the lack of confirmed incidents of in-person voting fraud in Indiana is the result of an ineffective identification security system as it is to conclude there is no in-person voting fraud in Indiana.** So while it is undisputed that the state has no proof that in-person polling place fraud has occurred in Indiana, there does in fact remain a dispute over the existence *vel non* of in-person polling place fraud.

It is also important to understand that the **nature of in-person election fraud is such that it is nearly impossible to detect or investigate. Unless a voter stumbles across someone else trying to use her identity, see Sabato & Simpson, *supra*, 292, or unless the over-taxed poll worker happens to notice that the voter's signature is different from her registration signature State Ext. 37, ¶ 9, the chances of detecting such in-person voter fraud are extremely small. Yet, inflated voter-registration rolls provide ample opportunity for those who wish to commit in-person voter fraud. See Fund, *supra*, 24, 65, 69, 138; Sabato & Simpson, *supra*, 321. And there is concrete evidence that the names of dead people have been used to cast fraudulent ballots. See Fund, *supra*, 64. Particularly in light of Indiana's highly inflated voter rolls State Ex. 27, p. 9, Plaintiffs' repeated claims that there has never been any in-person voter fraud in Indiana can hardly be plausible, even if the state is unable to prove that such fraud has in fact occurred.**

*Common Cause of Georgia vs. Billups*, U.S. District Court, Northern District of Georgia (Rome) 4:05-cv-00201-HLM U.S. Court of Appeals, 11<sup>th</sup> Circuit 05-15784

The Secretary of State, as the Chief Election Officer in Georgia, informed the General Assembly before the passage of Act 53 in a letter (attached hereto as Exhibit A), and also informed the Governor in a letter (attached hereto as Exhibit B) before he signed the bill into law, that **there had been no documented cases of fraudulent voting by persons who obtained ballots unlawfully by misrepresenting their identities as registered voters to poll workers reported to her office during her nine years as Secretary of State .**

Although the Secretary of State had informed the members of the General Assembly and the Governor prior to the enactment of Act 53, that her office had

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

received many complaints of voter fraud involving absentee ballots and no documented complaints of fraud that involve ballots that were cast in person at the polls, the General Assembly ignored this information and arbitrarily chose instead to require only those registered voters who vote in person to present a Photo ID as a condition of voting, but deliberately refused to impose the same requirement on absentee voters.

The Stated Purpose Of The Photo ID Requirement Fraud Is A Pretext.

According to a press release prepared by the Communications Office of the Georgia House of Representatives, the purpose of Act 53 is: to address the issue of voter fraud by placing tighter restrictions on voter identification procedures. Those casting ballots will now be required to bring a photo ID with them before they will be allowed to vote.

Al Marks, Vice Chairman for Public Affairs and Communication of the Hall County GOP told the Gainesville Times: I don't think we need it for voting, because I don't think there's a voter fraud problem. Gainesville Times, "States Voters Must Present Picture IDs" (September 15, 2005) ([www.gainesvilletimes.com](http://www.gainesvilletimes.com)).

**There is no evidence that the existing provisions of Georgia law have not been effective in deterring and preventing imposters from fraudulently obtaining and casting ballots at the polls by misrepresenting their true identities to election officials and passing themselves off as registered voters whose names appear on the official voter registration list.**

The pretextual nature of the purported justification for the burden which the Photo ID requirement imposes on the right to vote is shown by the following facts:

(a) Fraudulent voting was already prohibited by existing Georgia law without unduly burdening the right of a citizen to vote.

(i) Fraudulent voting was already prohibited as a crime under O.C.G.A. §§ 21-2-561, 21-2-562, 21-2-566, 21-2-571, 21-2-572 and 21-2-600, punishable by a fine of up to \$10,000 or imprisonment for up to ten years, or both.

(ii) Voter registration records are updated periodically by the Secretary of State and local election officials to eliminate people who have died, have moved, or are no longer eligible to vote in Georgia for some other reason.

(iii) Existing Georgia law also required election officials in each precinct to maintain a list of names and addresses of registered voters residing in that precinct, and to check off the names of each person from that official list as they cast their ballots.

(iv) Registered voters were also required by existing Georgia law to present at least one of the seventeen forms of documentary identification to election officials who were required, before issuing the voter a ballot, to match the name and address shown on the document to the name and address on the official roll of registered voters residing in the particular precinct. O.C.G.A. § 21-2-417.

(b) There is no evidence that the existing Georgia law has not been effective in deterring or preventing fraudulent in-person voting by impersonators - the only kind of fraudulent voting that might be prevented by the Photo ID requirement. To the contrary, the Secretary of State, who, as the Superintendent of Elections, is the highest election official in Georgia, informed both the General Assembly (Exhibit A) and the Governor (Exhibit B) in writing that there had been no documented cases of fraudulent in person voting by imposters reported to her during her nine years in office.

(c) If the true intention of the General Assembly had been to prevent fraudulent voting by imposters, the General Assembly would have imposed the same restrictions on the casting of absentee ballots - particularly after the Secretary of State had called to their attention the fact that there had been many documented instances of fraudulent casting of absentee ballots reported to her office.

(d) Fraudulent in-person voting is unlikely, would be easily detected if it had occurred in significant numbers, and would not be likely to have a substantial impact on the outcome of an election:

(i) Many people vote at a local neighborhood polling place where they are likely to be known to and recognized by neighbors or poll workers.

(ii) Voters were required by existing Georgia law (O.C.G.A. § 21-2-417), to provide one of the seventeen means of identification to election officials.

(iii) Election officials are required, before issuing the ballot to the voter, to check off the name of either voter from an up-to-date list of the names and addresses of every registered voter residing in the precinct. If an imposter arrived at a poll and was successful in fraudulently obtaining a ballot before

## EAC SUMMARY OF LITERATURE REVIEW FOR VOTING FRAUD-VOTER INTIMIDATION RESEARCH

the registered voter arrived at the poll, a registered voter, who having taken the time to go to the polls to vote, would undoubtedly complain to elections officials if he or she were refused a ballot and not allowed to vote because his or her name had already been checked off the list of registered voters as having voted. Likewise, if an imposter arrived at the polls after the registered voter had voted and attempted to pass himself off as someone he was not, the election official would instantly know of the attempted fraud, would not issue the imposter a ballot or allow him to vote, and presumably would have the imposter arrested or at least investigate the attempted fraud and report the attempt to the Secretary of State as Superintendent of Elections.

U.S. Department of Justice Section 5 Recommendation Memorandum (regarding HB 244), August 25, 2005 at <http://www.votingrights.org/news/downloads/Section%205%20Recommendation%20Memorandum.pdf>

**Overview:** Five career attorneys with the civil rights department investigated and analyzed Georgia's election reform law. Four of those attorneys recommended objecting to Section 59, the voter identification requirement. The provision required all voters to present government issued photo identification in order to vote. The objection was based on the attorneys' findings that there was little to no evidence of polling place fraud, the only kind of fraud an ID requirement would address, and that the measure would disenfranchise many voters, predominantly minority voters, in violation of Section 5 of the Voting Rights Act.

**Factual Analysis:** The sponsor of the measure in the state legislature said she was motivated by the fact that she is aware of vote buying in certain districts; she read John Fund's book; and that "if there are fewer black voters because of this bill, it will only be because there is less opportunity for fraud. She said that when black voters in her black precincts are not paid to vote, they do not go to the polls."

A member of the Fulton County Board of Registrations and Elections said that prior to November 2004, Fulton County received 8,112 applications containing "missing or irregular" information. Only 55 of those registrants responded to BOE letters. The member concluded that the rest must be "bogus" as a result. He also stated that 15,237 of 105,553 precinct cards came back as undeliverable, as did 3,071 cards sent to 45,907 new voters. Of these 3,071, 921 voted.

**Secretary of State Cathy Cox submitted a letter testifying to the absence of any complaints of voter fraud via impersonation during her tenure.** In the legal analysis, the attorneys state that if they determine that Georgia could have fulfilled its stated purpose of election fraud, while preventing or ameliorating the retrogression, an objection is appropriate. They conclude that the state could have avoided retrogression by retaining various forms of currently accepted voter ID for which no substantiated security concerns were raised. Another non-retrogressive alternative would have been to maintain the affidavit alternative for those without ID, since "There is no evidence that penalty of law is an insufficient deterrent to falsely signing an affidavit of identity." The attorneys point out that the state's recitation of a case upholding voter fraud in Dodge County does not support the purpose of the Act because that case involved vote buying and selling, not impersonation or voting under a false identity.

Subject Voter Fraud-Voter Intimidation Draft Report

Attached is a copy of the draft voter fraud-voter intimidation report that combines all of the pieces provided to me by the consultants, except for the voluminous Nexis research and case law charts. Tom wants to get this before the Commissioners ASAP, but I need some other eyes to look it over before we do. Although I've made some formatting changes to provide some consistency in presentation, and corrected a couple of glaring errors, I remain concerned about a number of issues:

- As you know, references to DOJ actions/responses have caused some concern at DOJ. But both consultants are adamantly opposed to EAC making substantive changes to their report. Perhaps using footnotes clearly labeled as EAC footnotes would be a method of addressing this issue?
- There are some recommendations regarding DOJ that we (the consultants and I) were told would not be supported by DOJ, and other references to DOJ, none of which have been reviewed by the department. I think we ought to give Craig Donsanto and John Tanner a chance to provide feedback on each of these sections.
- I am a little concerned about the naming of names, particularly in the section that addresses working group concerns. If we publish it as is, it might end up as fodder for some very negative newspaper articles.
- The report currently uses three different voices: third person, first person singular, first person plural. I think this looks really clumsy. If we are not actually making substantive changes, perhaps we could get away with making the presentation consistent in this regard.
- Because the consultants submitted the report in pieces, they did not include proper sequeways. I don't know if we should leave it as is, or insert them where needed.

Please let me know what you think. If it would help, we can schedule a teleconference. --- Peggy

## Introduction

### **Charge Under HAVA**

Under the Help America Vote Act, Pub. L. No. 107-252, 116 Stat. 1666 (2002) (“HAVA”), the United States Election Assistance Commission is charged with developing national statistics on voter fraud and developing methods of deterring and investigating voter fraud. Also, the Commission is charged with developing methods of identifying, deterring, and investigating methods of voter intimidation.

### **Scope of Project**

The Commission employed a bipartisan team of legal consultants, Ilova Wang and Job Serebrov to develop a preliminary overview work product to determine the quantity and quality of vote fraud and voter intimidation that is present on a national scale. The consultants’ work is neither comprehensive nor conclusive. This first phase of an envisioned two-phase project was constrained by both time and funding. The consultants’ conclusions and recommendations for phase II will be contained in this report.

The consultants, working without the aid of a support staff, divided most of the work. However, the final work product was mutually checked and approved. They agreed upon the steps that were taken needed and the method employed. For all of the documentary sources, the consultants limited the time period under review from January 1, 2001 to January 1, 2006. The research performed by the consultants included interviews, an extensive Nexis search, a review of existing literature, and case research.

**Interviews:** The consultants chose the interviewees by first coming up with a list of the categories of types of people they wanted to interview. Then the consultants separately, equally filled those categories with a certain number of people. Due to time and resource constraints, the consultants had to pare down this list substantially – for instance, they had to rule out interviewing prosecutors altogether – but still got a good range of people to talk to. The ultimate categories were academics, advocates, elections officials, lawyers and judges. Although the consultants were able to talk to most of the people they wanted to, some were unavailable and a few were not comfortable speaking to them, particularly judges. The consultants together conducted all of the interviews, either by phone or in person. Then the consultants split up drafting the summaries. All summaries were reviewed and mutually approved. Most of the interviews were extremely informative and the consultants found the interviewees to be extremely knowledgeable and insightful for the most part.

**Nexis:** Initially, the consultants developed an enormous list of possible Nexis search terms. It soon became obvious that it would be impossible to conduct the research that way. As a result, consultant Wang performed the Nexis search by finding search term combinations that would yield virtually every article on a particular subject from the last

five years. Consultant Serebrov approved the search terms. Then Wang created an excel spreadsheet in order to break down the articles in way in which they could be effectively analyzed for patterns. Each type of fraud is broken down in a separate chart according to where it took place, the date, the type of election it occurred in, what the allegation was, the publication it came from. Where there was a follow up article, any information that that suggested there had been some further action taken or some resolution to the allegation was also included. For four very complicated and long drawn out situations – Washington State, Wisconsin, South Dakota in 2004, and the vote buying cases in a couple of particular jurisdictions over the last several years –written summaries with news citations are provided.

**Existing Literature:** Part of the selections made by the consultants resulted from consultant Wang's long-term familiarity with the material while part was the result of a joint web search for articles and books on vote fraud and voter intimidation and suggestions from those interviewed by the consultants. The consultants reviewed a wide range of materials from government reports and investigations, to academic literature, to reports published by advocacy groups. The consultants believe that they covered the landscape of available sources.

**Cases:** In order to properly identify all applicable cases, the consultants first developed an extensive word search term list. A WestLaw search was performed and the first one hundred cases under each word search term were then gathered in individual files. This resulted in a total of approximately 44,000 cases. Most of these cases were federal as opposed to state and appellate as opposed to trial. Consultant Serebrov analyzed the cases in each file to determine if they were on point. If he found that the first twenty cases were inapplicable, Serebrov would sample forty to fifty other file cases at random to determine applicability. If the entire file did not yield any cases, the file would be discarded. All discarded word search terms were recorded in a separate file. Likewise, if the file only yielded a few applicable cases, it would also be discarded. However, if a small but significant number of cases were on point, the file was later charted. The results of the case search were stark because relatively few applicable cases were found.

## **Working Definition of Fraud and Intimidation**

*Note: The definition provided below is for the purposes of this EAC project. Most of the acts described come within the federal criminal definition of fraud, but some may not.*

Election fraud is any intentional action, or intentional failure to act when there is a duty to do so, that corrupts the election process in a manner that can impact on election outcomes. This includes interfering in the process by which persons register to vote; the way in which ballots are obtained, marked, or tabulated; and the process by which election results are canvassed and certified.

Examples include the following:

- falsifying voter registration information pertinent to eligibility to cast a vote, (e.g. residence, criminal status, etc).;
- altering completed voter registration applications by entering false information;
- knowingly destroying completed voter registration applications (other than spoiled applications) before they can be submitted to the proper election authority;
- knowingly removing eligible voters from voter registration lists, in violation of HAVA, NVRA, or state election laws;
- intentional destruction by election officials of voter registration records or balloting records, in violation of records retention laws, to remove evidence of election fraud;
- vote buying;
- voting in the name of another;
- voting more than once;
- coercing a voter's choice on an absentee ballot;
- using a false name and/or signature on an absentee ballot;
- destroying or misappropriating an absentee ballot;
- felons, or in some states ex-felons, who vote when they know they are ineligible to do so;
- misleading an ex-felon about his or her right to vote;
- voting by non-citizens who know they are ineligible to do so;
- intimidating practices aimed at vote suppression or deterrence, including the abuse of challenge laws;
- deceiving voters with false information (e.g.; deliberately directing voters to the wrong polling place or providing false information on polling hours and dates);
- knowingly failing to accept voter registration applications, to provide ballots, or to accept and count voted ballots in accordance with the Uniformed and Overseas Citizens Absentee Voting Act;
- intentional miscounting of ballots by election officials;
- intentional misrepresentation of vote tallies by election officials;
- acting in any other manner with the intention of suppressing voter registration or voting, or interfering with vote counting and the certification of the vote.

Voting fraud does not include mistakes made in the course of voter registration, balloting, or tabulating ballots and certifying results. For purposes of the EAC study, it also does not include violations of campaign finance laws.

DRAFT

## Summaries of Research Conducted

### Interviews

#### *Common Themes*

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, “dead” voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud, although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.
- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate – including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now and is focusing on matters such as noncitizen voting, double voting and felon voting. While the civil rights section continues to focus on systemic patterns of malfeasance, the public integrity section is focusing now on individuals, on isolated instances of fraud.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full

implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

***Common Recommendations:***

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.
  - With respect to the civil rights section, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one’s definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and the section has not pursued any such cases.
  - Craig Donsanto of the public integrity section says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases the department is investigating and the number of indictments the section is pursuing are both up dramatically. Since 2002, the department has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so it can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud. Of particular note, Sarah Ball Johnson, Executive Director of Elections for Kentucky, emphasized that having had an effective statewide voter registration database for more than thirty years has helped that state avoid most of the fraud problems that have been alleged elsewhere, such as double voting and felon voting.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment

- Several people advocate passage of Senator Barak Obama’s “deceptive practices” bill
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected nonpartisanly they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas is a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states’ office; increasing transparency in the process; and enacting conflict of interest rules.
- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the scheme contemplated in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

## **Nexis Research**

### ***Absentee Ballot Fraud***

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

### ***Voter Registration Fraud***

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people
- Fake names and other information on voter registration forms
- Illegitimate addresses used on voter registration forms
- Voters being tricked into registering for a particular party under false pretenses
- Destruction of voter registration forms depending on the party the voter registered with

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported on included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

### ***Voter Intimidation and Suppression***

This is the area which had the most articles in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places.
- Improper demands for identification
- Poll watchers harassing voters
- Poll workers being hostile to or aggressively challenging voters
- Disproportionate police presence
- Poll watchers wearing clothes with messages that seemed intended to intimidate
- Insufficient voting machines and unmanageably long lines

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio and Pennsylvania.

### ***“Dead Voters and Multiple Voting”***

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking of voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person taking criminal advantage of that. In total, the San Francisco Chronicle found 5 such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### ***Vote Buying***

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations in three particular jurisdictions as detailed in the vote buying summary. There were more official investigations, indictments and convictions/pleas in this area. All of these cases are concentrated in the Midwest and South.

### ***Deceptive Practices***

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of voter registration forms. There were no reports of prosecutions or any other legal proceeding.

### ***Non-citizen Voting***

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case charges were filed against ten individuals. In one case a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this nexis search, remained just allegations of noncitizen voting.

### ***Felon Voting***

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem has been the large number of ineligible felons that remained on the voting list.

### ***Election Official Fraud***

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### ***Existing Research***

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books

written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the “second phase” of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund’s frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.
- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

## Cases

After reviewing over 40,000 cases, the majority of which came from appeals courts, I have found comparatively very few which are applicable to this study. Of those that are applicable, no apparent thematic pattern emerges. However, it seems that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility. But because so few cases provided a picture of these current problems, I suggest that case research for the second phase of this project concentrate on state trial-level decisions.

## Methodology

The following is a summary of interviews conducted with a number of political scientists and experts in the field as to how one might undertake a comprehensive examination of voter fraud and intimidation. A list of the individuals interviewed and their ideas are available, and all of the individuals welcome any further questions or explanations of their recommended procedures.

- In analyzing instances of alleged fraud and intimidation, we should look to criminology as a model. In criminology, experts use two sources: the Uniform Crime Reports, which are all reports made to the police, and the Victimization Survey, which asks the general public whether a particular incident has happened to them. After surveying what the most common allegations are, we should conduct a survey of the general public that ask whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data collection. (Stephen Ansolobhere, MIT)
- Several political scientists with expertise in these types of studies recommended a methodology that includes interviews, focus groups, and a limited survey. In determining who to interview and where the focus groups should be drawn from, they recommend the following procedure:
  - Pick a number of places that have historically had many reports of fraud and/or intimidation; from that pool pick 10 that are geographically and demographically diverse, and have had a diversity of problems
  - Pick a number of places that have not had many reports of fraud and/or intimidation; from that pool pick 10 places that match the geographic and demographic make-up of the previous ten above (and, if possible, have comparable elections practices)

- Assess the resulting overall reports and impressions resulting from these interviews and focus groups, and examine comparisons and differences among the states and what may give rise to them.

In conducting a survey of elections officials, district attorneys, district election officers, they recommend that:

- The survey sample be large in order to be able to get the necessary subsets
- The survey must include a random set of counties where there have and have not been a large number of allegations

(Allan Lichtman, American University; Thad Hall, University of Utah; Bernard Grofman, UC – Irvine)

- Another political scientist recommended employing a methodology that relies on qualitative data drawn from in-depth interviews with key critics and experts on all sides of the debate on fraud; quantitative data collected through a survey of state and local elections and law enforcement officials; and case studies. Case studies should focus on the five or ten states, regions or cities where there has been a history of election fraud to examine past and present problems. The survey should be mailed to each state's attorney general and secretary of state, each county district attorney's office and each county board of elections in the 50 states. (Lorraine Minnite, Barnard College)
- The research should be a two-step process. Using LexisNexis and other research tools, a search should be conducted of news media accounts over the past decade. Second, interviews with a systematic sample of election officials nationwide and in selected states should be conducted. (Chandler Davidson, Rice University)
- One expert in the field posits that we can never come up with a number that accurately represents either the incidence of fraud or the incidence of voter intimidation. Therefore, the better approach is to do an assessment of what is most likely to happen, what election violations are most likely to be committed – in other words, a risk analysis. This would include an analysis of what it would actually take to commit various acts, e.g. the cost/benefit of each kind of violation. From there we could rank the likely prevalence of each type of activity and examine what measures are or could be effective in combating them. (Wendy Weiser, Brennan Center of New York University)
- Replicate a study in the United States done abroad by Susan Hyde of the University of California- San Diego examining the impact of impartial poll site observers on the incidence of election fraud. Doing this retrospectively would require the following steps:
  - Find out where there were federal observers
  - Get precinct level voting information for those places

- Analyze whether there was any difference in election outcomes in those places with and without observers, and whether any of these results seem anomalous.

Despite the tremendous differences in the political landscapes of the countries examined by Hyde in previous studies and the U.S., Hyde believes this study could be effectively replicated in this country by sending observers to a random sample of precincts. Rather than compare the incumbent's vote share, such factors such as voter complaints, voter turnout, number of provisional ballots used, composition of the electorate, as well as any anomalous voting results could be compared between sites with and without monitors.

For example, if intimidation is occurring, and if reputable monitors make intimidation less likely or voters more confident, then turnout should be higher on average in monitored precincts than in unmonitored precincts. If polling station officials are intentionally refusing to issue provisional ballots, and the polling station officials are more likely to adhere to regulations while being monitored, the average number of provisional ballots should be higher in monitored precincts than in unmonitored precincts. If monitors cause polling station officials to adhere more closely to regulations, then there should be fewer complaints (in general) about monitored than unmonitored precincts (this could also be reversed if monitors made voters more likely to complain).

Again, random assignment controls for all of the other factors that otherwise influence these variables.

One of the downsides of this approach is it does not get at some forms of fraud, e.g. absentee ballot fraud; those would have to be analyzed separately.

- Another political scientist recommends conducting an analysis of vote fraud claims and purging of registration rolls by list matching. Allegations of illegal voting often are based on matching of names and birth dates. Alleged instances of double voting are based on matching the names and birth dates of persons found on voting records. Allegations of ineligible felon (depending on state law), deceased, and of non-citizen voting are based on matching lists of names, birth dates, and sometimes addresses of such people against a voting records. Anyone with basic relational database skills can perform such matching in a matter of minutes.

However, there are a number of pitfalls for the unwary that can lead to grossly over-estimating the number of fraudulent votes, such as missing or ignored middle names and suffixes or matching on missing birth dates. Furthermore, there is a surprising statistical fact that a group of about three hundred people with the same first and last name are almost assured to share the exact same birth date, including year. In a large state, it is not uncommon for hundreds of Robert Smiths (and other common names) to have voted. Thus, allegations of vote fraud

or purging of voter registration rolls by list matching almost assuredly will find a large proportion of false positives: people who voted legally or are registered to vote legally.

Statistics can be rigorously applied to determine how many names would be expected to be matched by chance. A simulation approach is best applied here: randomly assign a birth date to an arbitrary number of people and observe how many match within the list or across lists. The simulation is repeated many times to average out the variation due to chance. The results can then be matched back to actual voting records and purge lists, for example, in the hotly contested states of Ohio or Florida, or in states with Election Day registration where there are concerns that easy access to voting permits double voting. This analysis will rigorously identify the magnitude alleged voter fraud, and may very well find instances of alleged fraud that exceed what might have otherwise happened by chance.

This same political scientist also recommends another way to examine the problem: look at statistics on provisional voting: the number cast might provide indications of intimidation (people being challenged at the polls) and the number of those not counted would be indications of "vote fraud." One could look at those jurisdictions in the Election Day Survey with a disproportionate number of provisional ballots cast and cross-reference it with demographics and number of provisional ballots discarded. (Michael McDonald, George Mason University)

- Spencer Overton, in a forthcoming law review article entitled *Voter Identification*, suggests a methodology that employs three approaches—investigations of voter fraud, random surveys of voters who purported to vote, and an examination of death rolls provide a better understanding of the frequency of fraud. He says all three approaches have strengths and weaknesses, and thus the best studies would employ all three to assess the extent of voter fraud. An excerpt follows:

#### 1. *Investigations and Prosecutions of Voter Fraud*

Policymakers should develop databases that record all investigations, allegations, charges, trials, convictions, acquittals, and plea bargains regarding voter fraud. Existing studies are incomplete but provide some insight. For example, a statewide survey of each of Ohio's 88 county boards of elections found only four instances of ineligible persons attempting to vote out of a total of 9,078,728 votes cast in the state's 2002 and 2004 general elections. This is a fraud rate of 0.00000045 percent. The Carter-Baker Commission's Report noted that since October 2002, federal officials had charged 89 individuals with casting multiple votes, providing false information about their felon status, buying votes, submitting false voter registration information, and voting improperly as a non-citizen. Examined in the context of the 196,139,871 ballots cast between October 2002 and

August 2005, this represents a fraud rate of 0.0000005 percent (note also that not all of the activities charged would have been prevented by a photo identification requirement).

A more comprehensive study should distinguish voter fraud that could be prevented by a photo identification requirement from other types of fraud — such as absentee voting and stuffing ballot boxes — and obtain statistics on the factors that led law enforcement to prosecute fraud. The study would demand significant resources because it would require that researchers interview and pour over the records of local district attorneys and election boards.

Hard data on investigations, allegations, charges, pleas, and prosecutions is important because it quantifies the amount of fraud officials detect. Even if prosecutors vigorously pursue voter fraud, however, the number of fraud cases charged probably does not capture the total amount of voter fraud. Information on official investigations, charges, and prosecutions should be supplemented by surveys of voters and a comparison of voting rolls to death rolls.

## *2. Random Surveys of Voters*

Random surveys could give insight about the percentage of votes cast fraudulently. For example, political scientists could contact a statistically representative sampling of 1,000 people who purportedly voted at the polls in the last election, ask them if they actually voted, and confirm the percentage who are valid voters. Researchers should conduct the survey soon after an election to locate as many legitimate voters as possible with fresh memories.

Because many respondents would perceive voting as a social good, some who did not vote might claim that they did, which may underestimate the extent of fraud. A surveyor might mitigate this skew through the framing of the question (“I’ve got a record that you voted. Is that true?”).

Further, some voters will not be located by researchers and others will refuse to talk to researchers. Photo identification proponents might construe these non-respondents as improper registrations that were used to commit voter fraud.

Instead of surveying all voters to determine the amount of fraud, researchers might reduce the margin of error by focusing on a random sampling of voters who signed affidavits in the three states that request photo identification but also allow voters to establish their identity through affidavit—Florida, Louisiana, and South Dakota. In

South Dakota, for example, only two percent of voters signed affidavits to establish their identity. If the survey indicates that 95 percent of those who signed affidavits are legitimate voters (and the other 5 percent were shown to be either fraudulent or were non-responsive), this suggests that voter fraud accounts for, at the maximum, 0.1 percent of ballots cast.

The affidavit study, however, is limited to three states, and it is unclear whether this sample is representative of other states (the difficulty may be magnified in Louisiana in the aftermath of Hurricane Katrina's displacement of hundreds of thousands of voters). Further, the affidavit study reveals information about the amount of fraud in a photo identification state with an affidavit exception—more voter fraud may exist in a state that does not request photo identification.

### 3. *Examining Death Rolls*

A comparison of death rolls to voting rolls might also provide an estimate of fraud.

Imagine that one million people live in state A, which has no documentary identification requirement. Death records show that 20,000 people passed away in state A in 2003. A cross-referencing of this list to the voter rolls shows that 10,000 of those who died were registered voters, and these names remained on the voter rolls during the November 2004 election. Researchers would look at what percentage of the 10,000 dead-but-registered people who "voted" in the November 2004 election. A researcher should distinguish the votes cast in the name of the dead at the polls from those cast absentee (which a photo identification requirement would not prevent). This number would be extrapolated to the electorate as a whole.

This methodology also has its strengths and weaknesses. If fraudulent voters target the dead, the study might overestimate the fraud that exists among living voters (although a low incidence of fraud among deceased voters might suggest that fraud among all voters is low). The appearance of fraud also might be inflated by false positives produced by a computer match of different people with the same name. Photo identification advocates would likely assert that the rate of voter fraud could be higher among fictitious names registered, and that the death record survey would not capture that type of fraud because fictitious names registered would not show up in the death records. Nevertheless, this study, combined with the other two, would provide important insight into the magnitude of fraud likely to exist in the absence of a photo identification requirement.

**Recommendations for Further EAC Activity**  
**on Voting Fraud and Voter Intimidation**

**Consultants' Recommendations**

***Recommendation 1: Conduct More Interviews***

Time and resource constraints prevented the consultants from interviewing the full range of participants in the process. As a result, we recommend that any future activity in this area include conducting further interviews.

In particular, we recommend that more election officials from all levels of government, parts of the country, and parties be interviewed. These individuals have the most direct inside information on how the system works -- and at times does not work. They are often the first people voters go to when something goes wrong and are often responsible for fixing it. They are the ones who must carry out the measures that are designed to both prevent fraud and voter intimidation and suppression. They will most likely know what, therefore, is and is not working.

It would also be especially beneficial to talk to people in law enforcement, specifically federal District Election Officers ("DEOs") and local district attorneys, as well as civil and criminal defense attorneys.

The Public Integrity Section of the Criminal Division of the Department of Justice has all of the 93 U.S. Attorneys appoint Assistant U.S. Attorneys to serve as DEOs for two years. DEOs are required to

- screen and conduct preliminary investigations of complaints, in conjunction with the FBI and PIN, to determine whether they constitute potential election crimes and should become matters for investigation;
- oversee the investigation and prosecution of election fraud and other election crimes in their districts;
- coordinate their district's (investigative and prosecutorial) efforts with DOJ headquarters prosecutors;
- coordinate election matters with state and local election and law enforcement officials and make them aware of their availability to assist with election-related matters;
- issue press releases to the public announcing the names and telephone numbers of DOJ and FBI officials to contact on election day with complaints about voting or election irregularities and answer telephones on election day to receive these complaints; and
- supervise a team of Assistant U.S. Attorneys and FBI special agents who are appointed to handle election-related allegations while the polls are open on election day.<sup>i</sup>

Given the great responsibilities of the DEOs, and the breadth of issues they must deal with, they undoubtedly are great resources for information and insight as to what types of fraud and intimidation/suppression are occurring in their districts.

In many situations, however, it is the local district attorneys who will investigate election fraud and suppression tactics, especially in local elections. They will be able to provide information on what has gone on in their jurisdictions, as well as which matters get pursued and why.

Finally, those who defend people accused of election related crimes would also be useful to speak to. They may have a different perspective on how well the system is working to detect, prevent, and prosecute election fraud.

***Recommendation 2: Follow Up on Nexis Research***

The Nexis search conducted for this phase of the research was based on a list of search terms agreed upon by both consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contain allegations of fraud or intimidation. Similarly, many of the articles contain information about investigations into such activities or even charges brought. However, without being able to go beyond the agreed search terms, it could not be determined whether there was any later determination regarding the allegations, investigation or charges brought. This leaves a gaping hole: it is impossible to know if the article is just reporting on “talk” or what turns out to be a serious affront to the system.

As a result, we recommend that follow up Nexis research be conducted to determine what, if any, resolutions or further activity there was in each case. This would provide a much more accurate picture of what types of activities are actually taking place.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Similarly, many allegations are made in the reports and books that we analyzed and summarized. Those allegations are often not substantiated in any way and are inherently time limited by the date of the writing. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation.

Therefore, we recommend follow up to the literature review: for those reports and books that make or cite specific instances of fraud or intimidation, a research effort should be made to follow up on those references to see if and how they were resolved.

***Recommendation 4: Review Complaints File With MyVote1 Project Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a 1-800 voter hotline where voters could call for poll location, be transferred to a local hotline, or leave a recorded message with a complaint.

In 2004, this resulted in over 200,000 calls received and over 56,000 recorded complaints.<sup>ii</sup> The researchers in charge of this project have done a great deal of work to parse and analyze the data collected through this process, including going through the audio messages and categorizing them by the nature of the complaint. These categories include registration, absentee ballot, poll access, ballot/screen, coercion/intimidation, identification, mechanical, provisional (ballot).

We recommend that further research include making full use of this data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding 200,000 complaints should provide a good deal of insight into the problems voters experienced, especially those in the nature of intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

Although according to a recent GAO report the Voting Section of the Civil Rights Division of the Department of Justice has a variety in ways it tracks complaints of voter intimidation,<sup>iii</sup> the Section was extremely reluctant to provide the consultants with useful information. Further attempts should be made to obtain relevant data. This includes the telephone logs of complaints the Section keeps and information from the database – the Interactive Case Management (ICM) system – the Section maintains on complaints received and the corresponding action taken. We also recommend that further research include a review and analysis of the observer and monitor field reports from Election Day that must be filed with the Section.

***Recommendation 6: Review Reports Filed By District Election Officers***

Similarly, the consultants believe it would be useful for any further research to include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. As noted above, the DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

The consultants also believe it would be useful for any further activity in this area to include attendance at the next Ballot Access and Voting Integrity Symposium. According to the Department,<sup>iv</sup>

Prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices are required to attend annual training conferences on fighting election fraud and voting rights abuses... These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity

Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. As a result of these conferences, there is a nationwide increase in Department expertise relating to the prosecution of election crimes and the enforcement of voting rights.

By attending the symposium researchers could learn more about the following:

- How District Election Officers are trained, e.g. what they are taught to focus their resources on, how they are instructed to respond to various types of complaints
- How information about previous election and voting issues is presented
- How the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants

***Recommendation 8: Employ Academic or Individual to Conduct Statistical Research***

Included in this report is a summary of various methodologies political scientists and others suggested to measure voter fraud and intimidation. While we note the skepticism of the Working Group in this regard, we nonetheless recommend that in order to further the mission of providing unbiased data, further activity in this area include an academic institution and/or individual that focuses on sound, statistical methods for political science research.

***Recommendation 9: Explore Improvements to Federal Law***

Finally, consultant Tova Wang recommends that future researchers review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

According to Craig Donsanto, long-time Director of the Election Crimes Branch, Public Integrity Section, Criminal Division of the U.S. Department of Justice:

As with other statutes addressing voter intimidation, in the absence of any jurisprudence to the contrary, it is the Criminal Division's position that section 1973gg-10(1) applies only to intimidation which is accomplished through the use of threats of physical or economic duress. Voter "intimidation" accomplished through less drastic means may present violations of the Voting Rights Act, 42 U.S.C. § 1973i(b), which are enforced by the Civil Rights Division through noncriminal remedies.<sup>v</sup>

Mr. Donsanto reiterated these points to us on several occasions, including at the working group meeting.

As a result, researchers should examine if there is some way in which current law might be revised or new laws passed that would reach voter intimidation that does not threaten the voter physically or financially, but rather threatens the voter's right to vote as a tangible value in itself. Such an amendment or law would reach all forms of voter intimidation, no matter if it is motivated by race, party, ethnicity or any other criteria. The law would then *potentially* cover, for example, letters and postcards with language meant to deter voters from voting and both pre-election and Election Day challengers that are clearly mounting challenges solely on illegitimate bases.

In the alternative to finding a way to criminalize such behavior, researchers might examine ways to invigorate measures to deter and punish voter intimidation under the civil law. For example, there might be a private right of action created for voters or groups who have been subjected to intimidation tactics in the voting process. Such an action could be brought against individual offenders; any state or local actor where there is a pattern of repeated abuse in the jurisdiction that such officials did not take sufficient action against; and organizations that intentionally engage in intimidating practices. As a penalty upon finding liability, civil damages could be available plus perhaps attorney's fees.

Another, more modest measure would be, as has been suggested by Ana Henderson and Christopher Edley,<sup>vi</sup> to bring parity to fines for violations under the Voting Rights Act. Currently the penalty for fraud is \$10,000 while the penalty for acts to deprive the right to vote is \$5,000.

### **Working Group Recommendations**

#### ***Recommendation 1: Employ Observers To Collect Data in the 2006 and/or 2008 Elections***

At the working group meeting, there was much discussion about using observers to collect data regarding fraud and intimidation at the polls in the upcoming elections. Mr. Ginsberg recommended using representatives of both parties for the task. Mr. Bauer and others objected to this, believing that using partisans as observers would be unworkable and would not be credible to the public.

There was even greater concern about the difficulties in getting access to poll sites for the purposes of observation. Most states strictly limit who can be in the polling place. In addition, there are already so many groups doing observation and monitoring at the polls, administrators might object. There was further concern that observers would introduce a variable into the process that would impact the outcome. The very fact that observers were present would influence behavior and skew the results.

Moreover, it was pointed out, many of the problems we see now with respect to fraud and intimidation does not take place at the polling place, e.g. absentee ballot fraud and deceptive practices. Poll site monitoring would not capture this activity. Moreover, with

increased use of early voting, poll site monitoring might have to go on for weeks to be effective, which would require tremendous resources.

Mr. Weinberg suggested using observers in the way they are utilized in international elections. Such observers come into a jurisdiction prior to the election, and use standardized forms at the polling sites to collect data.

***Recommendation 2: Do a Study on Absentee Ballot Fraud***

The working group agreed that since absentee ballot fraud is the main form of fraud occurring, and is a practice that is great expanding throughout the country, it would make sense to do a stand-alone study of absentee ballot fraud. Such a study would be facilitated by the fact that there already is a great deal of information on how, when, where and why such practices are carried out based on cases successfully prosecuted. Researchers could look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them.

***Recommendation 3: Use Risk Analysis Methodology to Study Fraud<sup>1</sup>***

Working group members were supportive of one of the methodologies recommended for studying this issue, risk analysis. As Mr. Bauer put it, based on the assumption that people act rationally, do an examination of what types of fraud people are most likely to commit, given the relative costs and benefits. In that way, researchers can rank the types of fraud that are the easiest to commit at the least cost with the greatest effect, from most to least likely to occur. This might prove a more practical way of measuring the problems than trying to actually get a number of acts of fraud and/or intimidation occurring. Mr. Greenbaum added that one would want to examine what conditions surrounding an election would be most likely to lead to an increase in fraud. Mr. Rokita objected based on his belief that the passions of partisanship lead people to not act rationally in an election.

***Recommendation 4: Conduct Research Using Database Comparisons***

Picking up on a suggestion made by Spencer Overton and explained in the suggested methodology section, Mr. Hearne recommended studying the issue using statistical database matching. Researchers should compare the voter roll and the list of people who actually voted to see if there are “dead” and felon voters. Because of the inconsistent quality of the databases, however, a political scientist would need to work in an appropriate margin of error when using such a methodology.

***Recommendation 5: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers with false and/or intimidating information, to suppress voter participation. A number of

<sup>1</sup> See Appendix C, and section on methodology

**Challenges:** Communications on this issue with the EAC have not been clear or timely. The PRG should be in place now to comment on our research design while there is still time to refine it. While we are confident in the quality of our work, the wisdom and perspective of the outstanding candidates we have proposed for membership would strengthen the analysis and reports of our work.

**Projections:** We have effectively brought these challenges to the attention of EAC staff and look forward to a resolution speedy enough to allow recruitment of the PRG's members before the end of the month. If we meet that goal, the work of the PRG will be about 2 weeks behind the milestones indicated in the work plan.

### COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and a website for easy access to drafts and reports.

#### INFORMATION SYSTEM

**Description:** The statutory data and reports prepared by the Moritz College of Law will be merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** The Moritz team has provided Eagleton staff with samples of the work that they are performing. An Eagleton staff member will be reviewing the content and formats of data from all supporting research and (re-)formatting once the work has been completed. The researchers and staff at Eagleton have created a shared folder on the Institute's server for the safe storage of work and access for those staff members. All of this work is being reviewed by the project team to ensure that a broad survey is being performed.

**Challenges:** There are no evident challenges to this task at this time.

**Projections:** By the end of July 2005, much of the above referenced research will have been completed with respective materials and charts near completion. At that time, staff at Eagleton will review, combine and format all documents and materials in preparation for our final reporting to the EAC.

#### INTRANET

**Description:** A trial Intranet for the project became available during the week of June 26. The Intranet will facilitate the exchange of information and collaboration among project participants.

**Progress:** After meetings with staff members of Rutgers University Computer Services (RUCS) and subsequent submission of a proposal by RUCS for technical support and hosting of the Intranet and the evaluation of alternative commercial services, the project team decided at its June 28<sup>th</sup> meeting to publish the Intranet through [www.intranets.com](http://www.intranets.com),

011387

one of the leading commercial services. This decision was based on lower costs and earlier publication schedules than offered under the RUCS proposal. The Intranet services were evaluated during a free trial period, which demonstrated the ease of design and navigation of the proposed service.

**Challenges:** There are no immediate challenges to completion of this task by the timeframe specified below.

**Projections:** Design, testing and publication of initial content of the Intranet service is continuing, with all participants expected to be provided access by July 8, 2005.

#### FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Given that the report reflects the first month of the project, several procedures for payment of subcontractors on the project were initiated. Expenses related to those members of the team are not reflected in this report because they have not yet been incurred.

Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project inception through June 30, 2005, is attached.

Tom and Julie-

Please take a look at this draft e-mail and let me know if it captures all that it needs to.

Would like to get this out ASAP- appreciate your feedback..

Dear Jonathan Nagler  
Dear Jan Leighley  
Dear Adam Berinsky

011389

On behalf of the U.S. Election Assistance Commission (EAC), thank you in advance for agreeing to assist us with the review of research conducted by the Eagleton Institute of Politics on voter identification. By **Friday, May 5, 2006**, you will receive, in electronic form, the research paper and relevant data analysis which supports the paper's findings. Through this independent review by a small group of experts familiar with elections data and research we are seeking feedback on:

- The research methodology which was used to support the paper's conclusions
- The specific statistical applications which were used to analyze the data and arrive at various conclusions

If there are alternate methodological and statistical approaches to analyzing the data on voter identification, and if there is other data on voter identification that you think should have been included in the analysis, please be certain to note this in your comments.

On **May 11, 2006** EAC will conduct a 60-90 minute phone call with key Eagleton Institute staff responsible for the research, members of Eagleton's peer review group and the EAC-identified reviewers who have been asked to consider the research. Through this dialogue EAC hopes to gather varying perspectives and insights on the research strategies and methods that were employed by Eagleton. As a result of this conversation, EAC anticipates that some revisions will be made to the Eagleton research paper. This paper is scheduled to be presented to EAC's Board of Advisors and Standards Boards in late May.

While EAC agency policy does not allow us to provide you with financial compensation for your review of this research we greatly appreciate your willingness to assist us with this important task. We believe that the research findings we will provide on voter identification are important and will most certainly be enhanced by your insights and expertise.

Sincerely,

Karen Lynn-Dyson

History: This message has been forwarded.

Tim, Tom, John, et.al--

The EAC has identified three academics who are going to serve as peer reviewers of the Eagleton Voter ID paper and research.

They are Jonathan Nagler of New York University, Jan Leighley, University of Arizona, and Adam Berinsky of MIT.

They are ready to review the documents as soon as they are available.

I would like to them one week to review the material and then have a joint conference call on **Thursday, May 11**, in which we would all have an opportunity to discuss the research methodology and statistical analysis, along with general comments and suggestions.

If you are able to get to me the paper and the supporting data analysis, I will distribute to the documents ASAP.

Also let me know, if you would, your availability on May 11 to do this conference all.

I anticipate that it will last approximately 90 minutes.

Karen,

Glad the paper arrived. Sorry it was a bit later than promised, but we reworked the statistical analysis on the basis of some insightful suggestions by the Peer Review Group. . .that took a few extra days (and nights). Looking back at my email to you, I realize the full statistical analysis was not attached as it should have been. It is appendix to the paper that will be of interest to those who want the details of our methodology. It is attached to this email.

I will be away, without access to email, until late Monday afternoon, but if you need to, you can reach me by cell phone at 908-794-1030.

Tom O'Neill

## Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns how such requirements affect voter turnout. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics argue that requiring voters to produce some form of government-issued photo identification on Election Day is more demanding than requiring, for example, that they state their names at the polling place because of the various steps needed to procure a photo identification card, ~~such as a driver's license~~. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. It draws on two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

## Types of voter identification requirements

Each state is classified as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (nine states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (eight states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).<sup>1</sup> It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification. Laws in those states set a minimum standard that a

---

<sup>1</sup> Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

#### Analysis of aggregate data

If one treats maximum voter identification requirements as an ordinal variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with voter identification requirements ( $r = -.21$ ,  $p < .0001$ ). In considering the array of minimum requirements, with affidavit as the most demanding requirement, voter identification also is negatively correlated with turnout ( $r = -.16$ ,  $p < .0001$ ). Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

Differences in voter turnout at the state level in 2004 varied based on voter identification requirements.<sup>2</sup> Taking into account the maximum requirements, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof.

Voter identification requirements alone, however, do not determine voter turnout. Multivariate models that take into account other predictors of turnout can place the effects of voter identification in a more accurate context. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. To capture electoral context I

<sup>2</sup> Voter turnout is defined here as the percentage of the adult voting-age population that voted in November 2004, based on county vote totals reported by the states and U.S. Census population projections for the counties from 2003. McDonald and Popkin (2001) contend that using the voting-age population to calculate turnout understates turnout for a number of reasons. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the percentage of individuals who fell below the poverty line in each county in the 2000 Census.

I estimated a series of random intercept models to account for the likelihood that data from counties were correlated within each state (for further explanation of random intercept and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).<sup>3</sup> The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, those requirements had a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. Both contextual factors (whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate) increased voter turnout. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-Americans in the county had no effect, but the percentage of Hispanic adults exerted a negative effect on voter turnout, as did the percentage of individuals living below the poverty line.

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities and the poor, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum voter identification requirements and the percentage of African-Americans, Hispanics, and poor individuals in the counties. The interaction involving African-Americans was not significant, but those involving Hispanics and poor individuals were significant.<sup>4</sup> Thus voter identification requirements have a greater effect for Hispanics and those living below the poverty line. A chi-square test of the difference in the deviance for each model (represented by -2 log likelihood in Table 2), shows that the model with interactions provides a better fit to the data ( $p = 0.0003$ ).

Comment [o1]

I also estimated the effects of the minimum voter identification requirements holding constant the effects of electoral context and the demographic variables.

<sup>3</sup> The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the intercept as a predictor generated an intraclass correlation of .40, indicating considerable variation between the states.

<sup>4</sup> The interactions are labeled in Tables 2 and 3 as VID\*African-American, VID\*Hispanic, and VID\*Poverty. To calculate the effects of voter identification requirements for a specific group, one must add the estimates for voter identification, the group, and the interaction. Doing so for Hispanic adults results in an estimate of -0.36 [-0.04 (voter id) - 0.38 (Hispanic) + 0.06 (voter id X Hispanic)].

[Table 3 here]

The effects of the minimum requirements are not statistically significant ( $p = 0.15$ ). The battleground state variable continues to exert a positive influence on turnout, while the presence of a competitive race for governor and/or U.S. Senate has no statistically significant effect. As in the maximum identification requirements models, as the percentage of the population that is Hispanic or poor increases, turnout declines. As the percentage of elderly increases, so does turnout. The proportion of African-Americans in the population does not affect turnout. Adding interactive effects to the model results in a statistically significant and negative effect of minimum voter identification requirements on turnout. But one must interpret this estimate with caution. A chi-square test for the difference in fit between the two models shows no significant difference ( $p = 0.08$ ), and thus no improvement to the fit when adding the interactions between voter identification requirements and the percentages of the county that is Hispanic or lives below the poverty line.

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line. But aggregate data cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991). Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

#### Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm-Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.<sup>5</sup> The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not

<sup>5</sup> It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S. citizens.

It is important to note here that the voter turnout rate for the CPS sample is much higher than the turnout rates presented in the aggregate data analysis. The U.S. Census Bureau reported that 89 percent of registered voters in the CPS sample said they voted (U.S. Census Bureau 2005). Turnout among the voting-age population was 58 percent in 2004, according to the aggregate data analysis. The difference is a result of several factors. One factor consists of the different denominators in calculating the turnout rate – registered voters versus the much larger voting-age population. Also, previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of a level of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be much higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

~~In addition, I eliminated from the sample respondents who said they were not U.S. citizens.~~

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.<sup>6</sup> In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a competitive gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less. At the individual level, I controlled for gender, age in years, education, household income, and dummy variables representing whether a voter was Black/non-Hispanic, Hispanic, or another non-white race (with white/non-Hispanic voters as the omitted category for reference purposes). Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and

<sup>6</sup> The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

## Results

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, and estimated robust standard errors to control for correlated error terms for observations from within the same state.

[Table 4 here]

The two models in Table 4 use either the maximum or minimum voter identification requirements in each state. The two models generate virtually identical results. ~~Voter identification requirements exert a statistically significant negative effect on whether survey respondents said they had voted in 2004.~~ Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters to say they had cast a ballot, while those of other non-white races were less likely than white voters to say they had turned out. Hispanic voters were not statistically different from white voters in terms of reported turnout. Consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.<sup>7</sup> I calculated the probabilities taking into account both maximum and minimum requirements, with photo identification serving as the most demanding of the maximum requirements and affidavits as the most demanding minimum requirement.

[Table 5 here]

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent ~~0.912~~ if all voters had to state their names ~~for stating one's name~~ to 88.7 percent ~~0.887~~ if all voters had to

<sup>7</sup> In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

provide for photo identification under the maximum requirements. In other words, the probability of voting dropped with each level of voter identification requirement, with a total drop of 0.25, or 2.5 percent, across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Among the key variables of interest in the debate over voter identification requirements are race, age, income, and education. Given the large sample size (54,973 registered voters), it was possible to break the sample into sub-samples along those demographic lines to explore variation in predicted probability by group. I disaggregated the sample by the variable of interest (such as race, for example), omitting that variable while I re-ran the probit model with the remaining predictors of voter turnout, including the voter identification requirements.<sup>8</sup> If the analysis showed that the voter identification requirements had a statistically significant effect on turnout, I used the probit coefficients from the model to calculate the predicted probability of voting for each group across the five requirements while holding the other variables in the model constant.

[Table 6 here]

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent, respectively, in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent.

The effects of voter identification requirements also varied by age, with the greatest variation occurring among voters ages 18 to 24.

[Table 7 here]

Voters in that age group had a predicted probability of 83.9 percent if when the maximum requirement would be to state one's name, and the probability drops 8.9 percentage points if voters would have to provide photo identification. The range was from 83.1 percent to 75.4 percent under the minimum requirements. The gap in probability narrowed in older age groups (4.8 percent for the maximum requirements and 5.8 percent for the minimum requirements for those ages 25 to 44; 1.8 percent for the minimum requirements for those ages 45 to 64, and 2.4 percent for the minimum requirements for those ages 65 and older).

Comment [62]: The turnout figures shown in the analysis of the aggregate data range of 57.1% turnout to 63.1% turnout. When using the individual data based on self-reports, the turnout figures approach 90%. I think a couple of sentences explaining the difference in the data between the two different analyses would be helpful here, even for readers comfortable with the statistical techniques used.

<sup>8</sup> See Nagler 1991 for a similar approach in analyzing the effects of registration closing dates broken down by education levels.

Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.<sup>9</sup>

[Table 8 here]

While the maximum set of requirements did not have a statistically significant effect for voters living below the poverty line, the minimum set of requirements had a significant and negative effect. The probability of voting was .784 for poor voters if they would have to identify themselves by giving their name, and the probability declined to .731 if they would have to provide an affidavit attesting to their identity. Both the maximum and minimum sets of requirements had a significant and negative effect on voters living above the poverty line, but the difference in probability across the effects was narrower (2.3 percent for the maximum requirements and 3.1 percent for the minimum requirements).

The effects of voter identification requirements varied across education levels as well, with those lowest in education demonstrating the widest variation in probabilities as identification requirements ranged from least to most demanding.

[Table 9 here]

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The difference from the lowest to the highest requirement among the minimum requirements was 7.4 percent. The difference in probabilities ranged from 3.3 percent for the maximum requirements to 4.5 percent for the minimum requirements for voters with a high school diploma. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category—voters with some college education).

### Discussion and conclusion

The results presented here provide evidence that as the level of demand associated with voter identification requirements increases, voter turnout declines. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election.

The effects of voter identification requirements were more pronounced for specific subgroups. Hispanic voters and the poor appeared to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey

<sup>9</sup> I coded respondents as being above or below the U.S. Census Bureau's 2004 poverty line based on respondents' reported annual household income and size of the household.

respondents living in poor households would be 5.3 percent less likely to vote as the requirements varied from stating one's name to attesting to one's identity in an affidavit.

Effects of voter requirements also varied with education. Registered voters who had not graduated from high school would be 6.7 percent less likely to say they voted if the maximum requirement is photo identification as opposed to stating one's name as the maximum requirements ranged from stating one's name to providing photo identification. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name. Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.

Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements ranged from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?<sup>10</sup> Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers, election judges to handle questions about, and potential disputes over, voter identification requirements.

<sup>10</sup> The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not registered). Neither the maximum nor minimum array of voter identification requirements had a statistically significant effect on the probability that a survey respondent was registered to vote.

Subject The Fraud "Report"

I am recommending that we use Thursday's meeting, a public forum, to be on the record about this report.

My thought is that Tom should report the matter to us in his report. New Business?? Just stating the facts as they exist, including the nature of the study, how we have handled the numerous requests and inquiries that we have received, etc.

Please let me know what you think about this suggestion. Thanks.

# Key Questions

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?

**Review of statutes and regulations**

**State narratives**

2. How did this vary between states that had previously had some form of provisional ballot and those that did not?

**Survey of local election officials**

**State narratives**

3. How did litigation affect implementation?

**Survey of case law and regulations**  
**State narratives**

4. How effective was provisional voting in enfranchising qualified voters?

**Survey of litigation**  
**State narratives**  
**Survey of local election officials**

5. Did states and local processes provide for consistent counting of provisional ballots?

**State narratives**

**Survey of litigation**

**Survey of local election officials**

6. Did local election officials have a clear understanding of how to implement provisional voting?

**Survey of local election officials**

**State narratives**

## **OUTREACH**

**American Enterprise Institute**

**Brennan Center for Justice at NYU School of Law**

**Center for Digital Government**

**The Century Foundation**

**The Constitution Project**

**DEMOS-USA**

**The Election Center**

**Election Reform Information Project**

**Leadership Conference on Civil Rights**

**League of Women Voters**

**National Association of Secretaries of State National Association  
of State Election Directors**

**People for the American Way**

**+ Other organizations after consultation with U.S.E.A.C.**

# **PROVISIONAL VOTING**

## **Key Research Deliverables**

- 1. Summary of case law on Provisional Voting**
- 2. Compendium of states' legislation, regulations, and litigation.**
- 3. Analysis of how provisional voting was implemented around the country, which will be critiqued by Peer Review Group.**
- 4. Description of alternatives to existing practices and procedures**

# **VOTER IDENTIFICATION**

## **Key Research Deliverables**

- 1. Indexed database of major articles on Voter ID Requirements**
- 2. Summary of case law**
- 3. Compendium of states' legislation, procedures, and litigation.**
- 4. Analysis of voter participation and vote fraud under various Voter ID regimes to be reviewed by Peer Review Group.**
- 5. Alternative approaches**

## **Hearings on Guidance Documents**

**Consult with EAC to identify locations and venues**

**Hearings to take place 30 days after publication**

**Deliverables**

**Transcript**

**Summary and analysis of comments**

**Recommend revisions to GD based on hearing results and discuss with EAC**

**Deliver final Guidance Document to EAC**

# Project Status

## PROVISIONAL VOTING

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

---

- Initial legal, regulatory, and case law research for 44 states, is complete. Completion for all states by August 1.
- Compiling narrative description of experience in each state. Completion in first week in August.
- Surveying 400 county election officials actual practice in administering provisional voting. Completion mid-August.

# Project Status

## VOTER IDENTIFICATION

### Task 3.10: Legislation, regulations, and litigation

- Initial research complete (and statutes compiled) for 45 states. Questions answered include *"Who is required to present ID"*, *"Types of ID required"*, and *"Consequences of having no ID"*. Complete mid-September.
- Collecting information on the voter id debate in the states to monitor possible secondary effects of HAVA and to suggest alternative approaches. Complete first week of August.
- Statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters. Complete late August.

Subject: Pasadena Meeting

History:

 This message has been replied to.

Julie: My plane arrives at LAX at about 5, and I should arrive in Pasadena after 7. I don't think we could meet until about 8 p.m. Does that fit your plans? I am staying at the Huntington, about a mile from the Cal Tech campus. You can always reach me by cell phone at 908-794-1030.

Dan and I have divided up our presentation this way: I will describe the overall research effort and the major questions to which we are seeking answers. I'll also outline the methods we are using to develop those answers and report on the current status of the work. Dan will describe in greater detail Moritz's research and compilation of the statutes, regulation and case law and describe some of the key matters of substance involved in developing our report.

The outline of my talk on Power Point is not yet complete, but the unfinished version is attached to give you a clearer impression of the presentation. I assume the meeting room will have a projector and screen. If that is not the case let me know and I'll print the Power Point slides and hand them out to the Commissioners.

Tom O'Neill

**Subject:** Progress Report

Tom,

I'm so sorry for taking so long to get back to you. I am hoping that you have moved forward with your update presentation. My general thoughts are very simple, just a presentation on the research that you have done thus far, the plans that you have made for additional research, but not to include any preliminary conclusions at this point.

Is there a possibility that I could get a copy of what you guys are thinking of presenting prior to the meeting? I am sure that the Commissioners will want it in advance to prepare questions for you and Dan.

011431

Also, you and I had planned to get together on Wednesday. What time are you arriving? I plan to go over to the university and view the room just after I arrive (around 1:00). Would you have some time around 3:30 or 4:00?

Subject RE: Status of agenda recommendations

Julie: The great strength that Doug Chapin would bring (as opposed to a historian) is that he could put the presentations from Mississippi and Wisconsin in national perspective. The debate over voter id, as you know, is taking place across the country. The terms of the debate everywhere are strikingly similar: voter access versus ballot security. Chapin could provide the context that would make it possible for the commissioners to appreciate the presentations of the two legislators as examples of a broader, national debate

A historian, as opposed to Chapin would provide a different sort of context. The historian would describe as a step in the evolution of the franchise.

The panel would be stronger if the two legislators' stories were put in context. The 10 – 15 minutes spent on context, whether current or historical, would, I think, be well worth it.

Tom

Tom,

What are your thoughts about just having the legislators and not the historian. I am just thinking time-wise, we may be a bit tight. Do you think we can get the same sense of how these debates have come up and been resolved through the legislators?

SubjectRe: Status of agenda recommendations

Julie:

I have made a little progress on the search for a scholar of the history of voter registration and voter ID to present the historical perspective in the opening panel at the July meeting. But none of the 3 suggestions below are obviously preferable to Doug Chapin.

Three possibilities are:

Dayna L. Cunningham, author of "*Who Are to Be the Electors? A Reflection on the History of Voter Registration in the United States*," 9 Yale L. & Pol'y Rev. 370 (1991). She was Assistant Counsel in the Voting Rights Project of the NAACP Legal Defense and Educational Fund at the time she wrote the article. She was active as a pro bono lawyer on election issues in Florida in 2004, and is now with Lord-Ross Philanthropic Advisors in Boston. [dcunningham@lordross.org](mailto:dcunningham@lordross.org) (914) 907-8895

R. Michael Alvarez, author of "Voter Registration," among other articles on registration issues. Currently at Caltech. <http://www.hss.caltech.edu/~rma/home.html>. He is a candidate for our Peer Review Group. My sense is that his experience and interests are more in current issues than in the history of the development of voter registration and voter ID.

Alexander Keyssar, author of "The Right to Vote: The Contested History of Democracy in the United States." Currently at the Kennedy School of Government, but on leave. [http://ksgfaculty.harvard.edu/alexander\\_keyssar](http://ksgfaculty.harvard.edu/alexander_keyssar)

Let me know if you'd like me to explore further or explore the issue with one or more of these possible presenters.

Subject Re: Status of agenda recommendations

History

✉ This message has been replied to and forwarded.

Julie:

We agree with your conception of the hearing as including 3 panels.

Panel 1 on the History of Voter ID and Experiences Adopting Voter ID Requirements.

We are looking for a scholar in this area as an alternative to Doug Chapin to speak to the historical perspective. The other panelists should represent Mississippi and Wisconsin, a pro voter ID speaker from one state and an opponent from the other. The choices, more detail on them is contained in my earlier memo on this topic, are:

Mississippi: Rep William Denny (pro) or Rep. Walter Robinson (con)  
Wisconsin: Sen. Joe Leibhan (pro) or Sen. Judith Robinson (con)

Panel 2 on Voter ID and HAVA.

Your suggestions ere (Andino of SC and Thompson of TN) look fine.

Panel 3 on Voter ID, Turnout and HACA

Minnite of Barnard and Samples of Cato.

On the subject of this hearing: in view of the change from Minneapolis to Pasadena, we would like to know if the commitment to the date and place is now certain enough that we should buy plane tickets. Affecting the travel decision will be the availability of a webcast of the event. Do you plan to offer that, as you did at the Columbus hearing?

Tom

tom,

We are looking at the question that you posed on provisional voting states. That should be completed soon.

How are we coming on the recommendations for the July 28 meeting? I will need to get the commissioners to approve and get the invitations issued as soon as possible.

Subject Provisional Voting in the states

History:  This message has been replied to and forwarded.

Julie: Nice to see you in New York yesterday. Here is the list of states categorized by whether provisional voting was new to them post HAVA or whether they had had some form of provisional ballot pre-HAVA. As we discussed, this list will be used in sampling and analyzing the survey of local election officials is that is about to begin. The EAC's review of the list would be helpful in ensuring that we have assigned states to the correct category.

Have a good 4th.

Tom

OLD PROVISIONAL VOTING STATES (27)

AK, AZ, AR, CA, DC, FL, IA, KS, MD, NM, NY, NC, OR, RI, SC,  
VA, WA, WV, CO, NE, NJ, OH, AL, KY, MI, MS, TX

NEW PROVISIONAL VOTING STATES (17)

CT, DE, GA, HI, IL, IN, LA, MA, MO, MT, NV, OK, PA, SD, TN, UT, VT

**Subject:** July Meeting - California

I have reviewed the agenda that your group proposed with regard to the meeting on Voter ID. The attached are some suggestions on a few changes. We have had Chris Thomas and Secretary Cortes speak at recent meetings of EAC. So, I have included a few other ideas of states that have and those that do have ID requirements. Please take a look at this. Perhaps we can chat about it on Tuesday, July 5.

Subject June 30 Panel --comment OSU

Julie:

I have now heard from Ned Foley at OSU. He makes a useful observation and suggestion.

Ned cautions that there just might be residual animosity between the two Mississippi legislators that would become apparent at the hearing. (I have not talked to any of the panelists recommended, but by Mississippi informant, a legislative staffer, said that the debate while emotional cleared the air and left everyone feeling better.)

Ned suggests that since Wisconsin Indiana, Arizona and New Mexico have experienced much the same debate, the panel could be structured to include a "pro" view from one state, say Mississippi, and the "con" view from another one of the other four. I can't offer you a specific legislator from one of those other states at this minute, but if you elect to take that approach, finding one should not be difficult.

Tom

011443

Julie:

I should have a recommendation to you for the panels on Wednesday. Your recommendation of John Samples strikes me as very well chosen. He has opined on the topic of voter id and turnout for USA today --and he has a PhD from Rutgers.

Just to provide a preview of what I think our recommendation will be, I now envision two panels. The first would look at Voter ID requirements within the 4 corners of HAVA through presentations by election directors from two contrasting states (probably Michigan and Pennsylvania), perhaps supplemented by an analyst who can put the stories of these two states in a broader context.

The second panel would broaden the scope to include voter id issues that go beyond first-time mail registrants. This second panel would explore the debate between those who argue for tighter ID requirements to prevent fraud and those who caution that tighter requirements will depress turnout, especially among older voters, African Americans and immigrants. This panel could be composed of two Mississippi legislators (not the two we discussed a few days ago) and two analysts, possibly Samples and Lorraine Minnite, the Barnard political scientist who was the lead researcher on the Demos election fraud study (and who has a professional interest in immigrant voting patterns}.

The Eagleton team is meeting on this, among other topics, tomorrow morning. I'll then consult with our Moritz colleagues and make a few phone calls to identify the best candidates from Mississippi and put together a recommendation for you.

Your reaction to this plan as it takes shape would be welcome.

In light of information that Mr. Flemming may be an opponent to Senator Lott, it would not be wise for us to include Mr. Flemming on the panel. I am sure that there is another state rep or senator that would have the same opinion that would be able to be substituted.

Voter ID exposes raw emotions in House.doc

011450

Voter ID exposes raw emotions in House  
Lawmakers represent two Mississippis  
By: Emily Wagster Pettus, Associated Press 03/23/2004

JACKSON - Reps. Erik Fleming and Philip Gunn both live in Clinton and are close to the same age. Their state House districts twist and weave around one another in the metro Jackson suburbs.

But in some ways, the two state lawmakers represent two different Mississippis.

Fleming, 39, is a black Democrat. Gunn, 41, is a white Republican.

The day after an emotionally wrenching House debate over voter ID, Fleming and Gunn stayed at the Capitol to quietly discuss one of Mississippi's most racially divisive political issues: Should people be required to prove their identity at the polls?

Like many white legislators, Gunn supports voter identification. He says requiring a driver's license or other ID would prevent people from voting in others' names.

"It is not a racial issue for the younger members - the younger white members. There are legitimate problems with our process, and voter ID is one way to fix them," said Gunn, who was elected last year only after some precincts were revoted in a disputed Republican primary.

Like most black lawmakers, Fleming opposes voter ID. He points to Mississippi's history of racial strife designed to keep blacks from voting - from poll taxes to shootings.

"From the black perspective, it's all about inclusion. From the white perspective, it's all about fairness," Fleming said.

Last Thursday, a House debate on an affidavit-voting bill stretched more than three hours after Republican lawmakers offered voter ID amendments.

An amendment by Rep. Bill Denny, R-Jackson, would have required a voter to show anything from a driver's license to a pilot's license before casting an affidavit ballot. It was adopted 77-45, with solid opposition from blacks and a few whites and support from white Republicans and many white Democrats, including Speaker Billy McCoy.

That prompted speeches from more than three dozen of the 122 House members, for and against ID.

Several black lawmakers, including Rep. Tyrone Ellis, D-Starkville, told personal stories of being threatened for trying to exercise their constitutional rights.

"You get shot at, you get burned out, then someone puts this before you and you tell me

how you vote," Ellis said, his voice rising.

The Mississippi House is generally divided into three factions - white Republicans, black Democrats and rural white Democrats. During Thursday's debate, lawmakers say it became clear that the voter ID disagreement threatened the coalition of black and rural white Democrats that had brought McCoy into the speakership in January.

White Democrats who had voted for the ID amendment started going to the podium to urge defeat of the bill. Among them was Rep. Bo Eaton, D-Taylorville.

"I feel it was an issue that was going to divide the House, when we don't even have a balanced budget yet," Eaton said the next day.

Rep. Steve Holland, D-Plantersville, was on the verge of tears as he said he was switching his vote - from supporting ID to opposing passage of the bill.

The bill was defeated 47-72.

On Friday morning after most of their colleagues had left for the weekend, Fleming and Gunn sat on the last row of the House chamber and chatted about ID. They wondered aloud how they could find a solution palatable not only to their constituents but to the diverse state as a whole.

Gunn wondered if the U.S. Justice Department - which oversees changes in Mississippi's voting system to ensure fairness to minorities - would accept a bill requiring ID for younger people but not for older ones who had lived through the turbulent civil rights era.

"We have to respect the feelings of the older members of the Black Caucus," Gunn said. "You can't ask them to forget what they went through. You can't ask them to ignore it."

Fleming said he was encouraged when a white lawmaker walked back to his desk during the debate and said: "I know where you're coming from."

Fleming said he's "very optimistic" that lawmakers eventually will find a solution to address concerns about voting integrity and inclusion. A voter ID bill has passed the Senate and awaits consideration in a House committee - but it's not clear whether that bill will make it to the full House.

Gunn said last week's House debate gave members a chance to express their feelings without accusing each other of being stupid.

Fleming agreed and added: "I think this was a discussion or a come-to-Jesus meeting that was 40 years in the making."

Subject June 30 Hearing Panelists

Julie:

Thanks for your call. Our conversation helped me crystallize further the recommendations we will make to the Commission about the material to be covered at the hearing.

I believe we will recommend two panels of 3 or 4 people each for the June 30 hearing. One will cover the relatively narrow HAVA Voter ID requirements with presentations by 2 state-level voting administrators with contrasting experiences. The contrast between Michigan and Pennsylvania might prove especially instructive because it would demonstrate the relationship between the quality of the data base and requirements for voter identification. Since the hearing is being held in Manhattan, perhaps inviting a speaker from New York instead of Pennsylvania would make sense. I'd appreciate your thoughts on that.

Two other speakers could address the issue of broader Voter ID requirements to reduce vote fraud by requiring some form of identification for each voter at the polling place. The experience in Mississippi over the past 5 years has been particularly dramatic, as illustrated by the attached news article from the local press last year. As we discussed, inviting the 2 legislators profiled in the article might make for powerful testimony.

The final 2 speakers we believe should be academics who have studied the relationship between Voter ID regimes, voter participation and vote fraud and who have conflicting evidence and conclusions to offer. We have found at least two university based researchers who can present the view that stricter Voter ID requirements do not reduce vote fraud and do dampen participation. We have not yet identified a researcher from the other end of the spectrum, but we are looking actively. Your suggestions would be most welcome.

Below is our current list of possibilities for your review.

Tom

JUNE 30 HEARING  
POSSIBLE PANELISTS OR TOPICS

Possible States to be represented by one or more panelists

**Mississippi**

Debate over voter id issues has been dramatic. The resonance of Mississippi on voting issues would lend

011454

interest to the testimony. Voter id legislation was not approved in the current legislative session and has been a source of contention at least since 1999.

### **Michigan**

Strong database state; lax Voter ID requirements don't seem to present as much of a problem (although one hears rumors about Detroit); interesting contrast to NY. With Pennsylvania would present contrasts in the importance of the Statewide Voter Data Base

### **New York**

Had a significant problem with provisional ballots, suggesting that their relatively lax ID rules might be problematic; also Tom Wilkey will have good contacts there. The hearing is there.

### **Pennsylvania**

Relatively lax ID rules and apparently quite a few problems with provisional ballots in 2004. Had start up problems with its data base and would offer comparisons between counties where the data base was well established and those where is new. Should be weighed against New York for inclusion as a contrast with Michigan

### **Wisconsin**

Governor Doyle vetoed the legislature's first attempt at tightening voter ID requirements, and instead offered a package to recruit and train more qualified poll workers and calls for improvements in voter registration procedures.

### Academics on Voter ID, Turnout, and Vote Fraud

#### **Spencer Overton**

Professor, GWU Law School. Has written op-eds arguing that the empirical research is insufficient to support the need for more ID to reduce fraud. He is working on a book on the topic.

#### **John Fortier**

Research Fellow at the American Enterprise Institute. Recommended by Norm Ornstein. Google revealed no publications on this topic by Fortier.

#### **Lorraine C. Minnite**

Assistant Professor of Political Science, Barnard College. Lead researcher of the Demos election fraud study and researcher in immigrant voting patterns. Found that the incidence of fraud perpetrated by individual voters in the United States was very low and had a minimal impact on election outcomes.

#### **Guy-UrielCharles**

Associate Professor of Law, Center for the Study of Political Psychology University of Minnesota. His areas of interest include Election Law and Election Law Disputes and African American Voting Concerns. He is a member of the National Research Commission on Elections and Voting of the Social Science Research Council

**Subject:** Re: Arrangements for June 30 Meeting

Tom,

The following answers, I hope, your questions. I am happy to discuss this further.

1. Does the EAC have a preference for a venue for the meeting? Have any arrangements --preliminary or otherwise-- been made to secure that facility? If not, I assume EAC would prefer a public building or an academic setting such as the auditorium you used at the law school in Columbus.

EAC has a meeting location for this meeting and the hearing that will follow. The meeting and hearing will be held at the Marriot Marquis Hotel. I will have staff provide the address and room.

2. Has the EAC made arrangements for a transcriber to record the meeting of the Commissioners? If so, is it the EAC's intention that we will use the same transcriber for the panel? If not, should we arrange for a transcriber for the entire day? Are there federal rules on payments for transcription services that we should follow?

While EAC has not yet made arrangements for a transcriber, we will as we will need one for the meeting and the hearing.

3. Will EAC support staff attend the hearing to sign in those attending, issue name tags, etc., or are these duties that we should be prepared to carry out?

Yes, EAC will have staff available for this function.

4. Will the EAC issue the news release about the meeting and the panel?

011456

Yes.

5. What do federal regulation indicate that I may offer speakers we bring in from these states in terms of travel, accommodations, meals, etc? Will speakers have to pay for their travel and accommodations and then request reimbursement or can we pay their bills directly?

Federal travel regulations apply. However, once you have made recommendations on panelists and the Commission has approved those panelists, we will take care of their travel arrangements and accommodations.

Arizona, California, Mississippi, Michigan, New York, Pennsylvania, and Wisconsin.

I can imagine that the Commission will not want to use Arizona. There is a great deal of controversy around some proposed legislation that was introduced and passed by the Arizona legislature last year. EAC has not yet taken a position on that controversy, but may. Until such time as EAC has formalized its opinion on this, EAC will not want to invite a public debate on this issue.

I will call you later to discuss any questions or concerns. I am in a meeting from 1 - 3 (EDT)

Subject Arrangements for June 30 Meeting

Julie,

011457

Karen Lynn-Dyson suggested I consult directly with you about arrangements for the Commission's June 30 meeting in New York. As I understood our discussions in Washington last week, as your consultants we will be responsible for organizing the portion of the meeting that will cover the Voter Identification issue, while EAC staff will organize the regular meeting of the Commissioners. Is that understanding correct?

Because time is short, we know we must move quickly on the arrangements.

1. Does the EAC have a preference for a venue for the meeting? Have any arrangements --preliminary or otherwise-- been made to secure that facility? If not, I assume EAC would prefer a public building or an academic setting such as the auditorium you used at the law school in Columbus.

2. Has the EAC made arrangements for a transcriber to record the meeting of the Commissioners? If so, is it the EAC's intention that we will use the same transcriber for the panel? If not, should we arrange for a transcriber for the entire day? Are there federal rules on payments for transcription services that we should follow?

3. Will EAC support staff attend the hearing to sign in those attending, issue name tags, etc., or are these duties that we should be prepared to carry out?

4. Will the EAC issue the news release about the meeting and the panel?

5. What do federal regulation indicate that I may offer speakers we bring in from these states in terms of travel, accommodations, meals, etc? Will speakers have to pay for their travel and accommodations and then request reimbursement or can we pay their bills directly?

These are the states we are currently evaluating for the Voter ID presentations: Arizona, California, Mississippi, Michigan, New York, Pennsylvania, and Wisconsin. We may pick 4 of these, or fewer if we determine that one state should have two panelists representing different viewpoints: Karen tells me you have been working with several of these, and your counsel would sharpen the judgment we bring to bear on our selection. I am particularly interested in the Mississippi experience and would like to discuss that with you. . .perhaps by phone. The project team is aiming to agree on a panel of speakers to submit to the the EAC early next week. Panelists should receive their invitations at least two weeks in advance (more would be better), especially if we want to get onto their schedules.

I will be in a meeting tomorrow from 10:30 -- 1:00 p.m. but will be available the rest of the day for a phone conversation. My cell phone --on which you can

always reach me-- is [REDACTED]

Tom,

I'm so sorry for taking so long to get back to you. I am hoping that you have moved forward with your update presentation. My general thoughts are very simple, just a presentation on the research that you have done thus far, the plans that you have made for additional research, but not to include any preliminary conclusions at this point.

Is there a possibility that I could get a copy of what you guys are thinking of presenting prior to the meeting? I am sure that the Commissioners will want it in advance to prepare questions for you and Dan.

Also, you and I had planned to get together on Wednesday. What time are you arriving? I plan to go over to the university and view the room just after I arrive (around 1:00). Would you have some time around 3:30 or 4:00?

After much wrangling, the final agenda is attached. We have invited the speakers, but have not heard back from most. We will follow up on Monday.

All of the arrangements have been made. CalTech is letting us use the Baxter Lecture Hall in the Baxter Humanities building. We are still working on webcasting. CalTech cannot or will not host it on their site, but we are trying to get it done through another source.

We have a block of rooms at the Westin. We will likely have some extras if you would like to use them. I will confirm this in the next few days.

O.k. I will look at the historians. I am leaning away from Doug Chapin. I am trying to finalize this list for final approval by the Commissioners this afternoon. Will be back in touch later today.

Julie: The great strength that Doug Chapin would bring (as opposed to a historian) is that he could put the presentations from Mississippi and Wisconsin in national perspective. The debate over voter id, as you know, is taking place across the country. The terms of the debate everywhere are strikingly similar: voter access versus ballot security. Chapin could provide the context that would make it possible for the commissioners to appreciate the presentations of the two legislators as examples of a broader, national debate

A historian, as opposed to Chapin would provide a different sort of context. The historian would describe as a step in the evolution of the franchise.

The panel would be stronger if the two legislators' stories were put in context. The 10 – 15 minutes spent on context, whether current or historical, would, I think, be well worth it.

Tom,

What are your thoughts about just having the legislators and not the historian. I am just thinking time-wise, we may be a bit tight. Do you think we can get the same sense of how these debates have come up and been resolved through the legislators?

SubjectRe: Status of agenda recommendations

Julie:

I have made a little progress on the search for a scholar of the history of voter registration and voter ID to present the historical perspective in the opening panel at the July meeting. But none of the 3 suggestions below are obviously preferable to Doug Chapin.

Three possibilities are:

Dayna L. Cunningham, author of "*Who Are to Be the Electors? A Reflection on the History of Voter Registration in the United States*," 9 Yale L. & Pol'y Rev. 370 (1991). She was Assistant Counsel in the Voting Rights Project of the NAACP Legal Defense

011468

and Educational Fund at the time she wrote the article. She was active as a pro bono lawyer on election issues in Florida in 2004, and is now with Lord-Ross Philanthropic Advisors in Boston. [dcunningham@lordross.org](mailto:dcunningham@lordross.org) [REDACTED]

R. Michael Alvarez, author of "Voter Registration," among other articles on registration issues. Currently at Caltech. <http://www.hss.caltech.edu/~rma/home.html>. He is a candidate for our Peer Review Group. My sense is that his experience and interests are more in current issues than in the history of the development of voter registration and voter ID.

Alexander Keyssar, author of "The Right to Vote: The Contested History of Democracy in the United States." Currently at the Kennedy School of Government, but on leave. [http://ksgfaculty.harvard.edu/alexander\\_keyssar](http://ksgfaculty.harvard.edu/alexander_keyssar)

I have reviewed the agenda that your group proposed with regard to the meeting on Voter ID. The attached are some suggestions on a few changes. We have had Chris Thomas and Secretary Cortes speak at recent meetings of EAC. So, I have included a few other ideas of states that have and those that do have ID requirements. Please take a look at this. Perhaps we can chat about it on Tuesday, July 5.

Julie:

I should have a recommendation to you for the panels on Wednesday. Your recommendation of John Samples strikes me as very well chosen. He has opined on the topic of voter id and turnout for USA today --and he has a PhD from Rutgers.

Just to provide a preview of what I think our recommendation will be, I now envision two panels. The first would look at Voter ID requirements within the 4 corners of HAVA through presentations by election directors from two contrasting states (probably Michigan and Pennsylvania), perhaps supplemented by an analyst who can put the stories of these two states in a broader context.

The second panel would broaden the scope to include voter id issues that go beyond first-time mail registrants. This second panel would explore the debate between those who argue for tighter ID requirements to prevent fraud and those who caution that tighter requirements will depress turnout, especially among older voters, African Americans and immigrants. This panel could be composed of two Mississippi legislators (not the two we discussed a few days ago) and two analysts, possibly Samples and Lorraine Minnite, the Barnard political scientist who was the lead researcher on the Demos election fraud study (and who has a professional interest in immigrant voting patterns).

The Eagleton team is meeting on this, among other topics, tomorrow morning. I'll then

011473

consult with our Moritz colleagues and make a few phone calls to identify the best candidates from Mississippi and put together a recommendation for you.

Your reaction to this plan as it takes shape would be welcome.

Subject Re: Arrangements for June 30 Meeting

Tom,

The following answers, I hope, your questions. I am happy to discuss this further.

1. Does the EAC have a preference for a venue for the meeting? Have any arrangements --preliminary or otherwise-- been made to secure that facility? If not, I assume EAC would prefer a public building or an academic setting such as the auditorium you used at the law school in Columbus.

EAC has a meeting location for this meeting and the hearing that will follow. The meeting and hearing will be held at the Marriot Marquis Hotel. I will have staff provide the address and room.

2. Has the EAC made arrangements for a transcriber to record the meeting of the Commissioners? If so, is it the EAC's intention that we will use the same transcriber for the panel? If not, should we arrange for a transcriber for the entire day? Are there federal rules on payments for transcription services that we should follow?

While EAC has not yet made arrangements for a transcriber, we will as we will need one for the meeting and the hearing.

3. Will EAC support staff attend the hearing to sign in those attending, issue name tags, etc., or are these duties that we should be prepared to carry out?

Yes, EAC will have staff available for this function.

4. Will the EAC issue the news release about the meeting and the panel?

Yes.

5. What do federal regulation indicate that I may offer speakers we bring in from these states in terms of travel, accommodations, meals, etc? Will speakers have to pay for their travel and accommodations and then request reimbursement or can we pay their bills directly?

Federal travel regulations apply. However, once you have made recommendations on panelists and the Commission has approved those panelists, we will take care of their travel arrangements and accommodations.

Arizona, California, Mississippi, Michigan, New York, Pennsylvania, and Wisconsin.

I can imagine that the Commission will not want to use Arizona. There is a great deal of controversy

011479

around some proposed legislation that was introduced and passed by the Arizona legislature last year. EAC has not yet taken a position on that controversy, but may. Until such time as EAC has formalized its opinion on this, EAC will not want to invite a public debate on this issue.

I will call you later to discuss any questions or concerns. I am in a meeting from 1 - 3 (EDT)

Subject Arrangements for June 30 Meeting

Julie,

Karen Lynn-Dyson suggested I consult directly with you about arrangements for the Commission's June 30 meeting in New York. As I understood our discussions in Washington last week, as your consultants we will be responsible for organizing the portion of the meeting that will cover the Voter Identification issue, while EAC staff will organize the regular meeting of the Commissioners. Is that understanding correct?

Because time is short, we know we must move quickly on the arrangements.

1. Does the EAC have a preference for a venue for the meeting? Have any arrangements --preliminary or otherwise-- been made to secure that facility? If not, I assume EAC would prefer a public building or an academic setting such as the auditorium you used at the law school in Columbus.

2. Has the EAC made arrangements for a transcriber to record the meeting of the Commissioners? If so, is it the EAC's intention that we will use the same transcriber for the panel? If not, should we arrange for a transcriber for the entire day? Are there federal rules on payments for transcription services that we should follow?

3. Will EAC support staff attend the hearing to sign in those attending, issue name tags, etc., or are these duties that we should be prepared to carry out?

4. Will the EAC issue the news release about the meeting and the panel?

5. What do federal regulation indicate that I may offer speakers we bring in from these states in terms of travel, accommodations, meals, etc? Will speakers have to pay

011480

for their travel and accommodations and then request reimbursement or can we pay their bills directly?

These are the states we are currently evaluating for the Voter ID presentations: Arizona, California, Mississippi, Michigan, New York, Pennsylvania, and Wisconsin. We may pick 4 of these, or fewer if we determine that one state should have two panelists representing different viewpoints: Karen tells me you have been working with several of these, and your counsel would sharpen the judgment we bring to bear on our selection. I am particularly interested in the Mississippi experience and would like to discuss that with you. . .perhaps by phone. The project team is aiming to agree on a panel of speakers to submit to the the EAC early next week. Panelists should receive their invitations at least two weeks in advance (more would be better), especially if we want to get onto their schedules.

I will be in a meeting tomorrow from 10:30 -- 1:00 p.m. but will be available the rest of the day for a phone conversation. My cell phone --on which you can always reach me-- is [REDACTED]

Tom O'Neill

011481

groups, including the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices, which may be available for review and analysis. This is also an area in which there is often tangible evidence, such as copies of the flyers and postcards themselves. All of this information should be reviewed and analyzed to see how such practices are being conducted and what can be done about them.

***Recommendation 6: Study Use of HAVA Administrative Complaint Procedure As Vehicle for Measuring Fraud and Intimidation***

The EAC should study the extent to which states are actually utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 7: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts that are running before, during and after election day would be an effective means of disposing with complaints and violations in an expeditious manner. Pennsylvania employs such a system, and the EAC should consider investigating how well it is working to deal with fraud and intimidation problems.

DRAFT

## Key Working Group Observations and Concerns

### Working Group Observations

1. ***The main problems today are structural barriers to voting and administrative error.*** Mr. Perez observed that, in accordance with the research, the biggest issues today are structural barriers to voting, not stealing votes. Election administrators share this view. Election fraud is negligible, and to the extent it occurs, it needs to be prosecuted with stronger criminal laws. The biggest problem is properly preparing people, which is the responsibility of election administrators.
2. ***Most fraud and intimidation is happening outside of the polling place.*** Mr. Greenbaum observed that with respect to both voter fraud and voter suppression, such as deceptive practices and tearing up voter registration forms, most of that is taking place outside of the polling place.
3. ***This issue cannot be addressed through one study or one methodology alone.*** Mr. Weinberg observed that since there is such a variety in types of fraud and intimidation, one solution will not fit all. It will be impossible to obtain data or resolve any of these problems through a single method.
4. ***The preliminary research conducted for this project is extremely valuable.*** Several of the working group members complimented the quality of the research done and although it is only preliminary, thought it would be useful and informative in the immediate future.
5. ***The Department of Justice is exploring expanding its reach over voter suppression activities.*** In the context of the conversation about defining voter intimidation, Mr. Donsanto pointed out that while voter intimidation was strictly defined by the criminal law, his section is beginning to explore the slightly different concept of vote suppression, and how to pursue it. He mentioned the phone-jamming case in New Hampshire as an initial success in this effort. He noted that he believes that vote suppression in the form of deceptive practices ought to be a crime and the section is exploring ways to go after it within the existing statutory construct. Mr. Bauer raised the example of a party sending people dressed in paramilitary outfits to yell at people as they go to the polls, telling them they have to show identification. Mr. Donsanto said that under the laws he has to work with today, such activity is not considered corrupt. He said that his lawyers are trying to “bend” the current laws to address aggravated cases of vote suppression, and the phone-jamming case is an example of that. Mr. Donsanto said that within the Department, the term vote “suppression” and translating it into a crime is a “work in progress.”

6. **Registration fraud does not translate into vote fraud.** Ms. Rogers, Mr. Donsanto and others stated that although phony voter registration applications turned in by people being paid by the form was a problem, it has not been found in their experience to lead to fraudulent voters at the polls. Ms. Rogers said such people were motivated by money, not defrauding the election.
7. **Handling of voter fraud and intimidation complaints varies widely across states and localities.** Ms. Rogers and others observed that every state has its own process for intake and review of complaints of fraud and intimidation, and that procedures often vary within states. The amount of authority secretaries of state have to address such problems also is different in every state. Mr. Weinberg stated he believed that most secretaries of state did not have authority to do anything about these matters. Participants discussed whether secretaries ought to be given greater authority so as to centralize the process, as HAVA has mandated in other areas.

### Working Group Concerns

1. Mr. Rokita questioned whether the purpose of the present project ought to be on assessing the level of fraud and where it is, rather than on developing methods for making such measurements. He believed that methodology should be the focus, “rather than opinions of interviewees.” He was concerned that the EAC would be in a position of “adding to the universe of opinions.”
2. Mr. Rokita questioned whether the “opinions” accumulated in the research “is a fair sampling of what’s out there.” Ms. Wang responded that one of the purposes of the research was to explore whether there is a method available to actually quantify in some way how much fraud there is and where it is occurring in the electoral process. Mr. Rokita replied that “Maybe at the end of the day we stop spending taxpayer money or it’s going to be too much to spend to find that kind of data. Otherwise, we will stop it here and recognize there is a huge difference of opinion on that issue of fraud; when it occurs is obtainable, and that would possibly be a conclusion of the EAC.” Ms. Sims responded that she thought it would be possible to get better statistics on fraud and there might be a way of “identifying at this point certain parts in the election process that are more vulnerable, that we should be addressing.”
3. Mr. Rokita stated that, “We’re not sure that fraud at the polling place doesn’t exist. We can’t conclude that.”
4. Mr. Rokita expressed concern about working with a political scientist. He believes that the “EAC needs to be very careful in who they select, because all the time and effort and money that’s been spent up to date and would be spent in the future could be invalidated by a wrong selection in the eyes of some group.”

DRAFT

### **Appendix 3**

## **Excerpt from “Machinery of Democracy,” a Brennan Center Report**

### **APPENDIX C**

#### **BRENNAN CENTER TASK FORCE ON VOTING SYSTEM SECURITY, LAWRENCE NORDEN, CHAIR**

**Excerpted from pp. 8-19**

### **METHODOLOGY**

The Task Force concluded, and the peer review team at NIST agreed, that the best approach for comprehensively evaluating voting system threats was to: (1) identify and categorize the potential threats against voting systems, (2) prioritize these threats based upon an agreed upon metric (which would tell us how difficult each threat is to accomplish from the attacker's point of view), and (3) determine, utilizing the same metric employed to prioritize threats, how much more difficult each of the catalogued attacks would become after various sets of countermeasures are implemented.

This model allows us to identify the attacks we should be most concerned about (*i.e.*, the most practical and least difficult attacks). Furthermore, it allows us to quantify the potential effectiveness of various sets of countermeasures (*i.e.*, how difficult the least difficult attack is after the countermeasure has been implemented). Other potential models considered, but ultimately rejected by the Task Force, are detailed in Appendix B.

### **IDENTIFICATION OF THREATS**

The first step in creating a threat model for voting systems was to identify as many potential attacks as possible. To that end, the Task Force, together with the participating election officials, spent several months identifying voting system vulnerabilities. Following this work, NIST held a Voting Systems Threat Analysis Workshop on October 7, 2005. Members of the public were invited to write up and post additional potential attacks. Taken together, this work produced over 120 potential attacks on the three voting systems. They are detailed in the catalogs annexed.<sup>20</sup> Many of the attacks are described in more detail at <http://vote.nist.gov/threats/papers.htm>.

The types of threats detailed in the catalogs can be broken down into nine categories: (1) the insertion of corrupt software into machines prior to Election Day; (2) wireless and other remote control attacks on voting machines on Election Day; (3) attacks on tally servers; (4) miscalibration of voting machines; (5) shut off of voting machine features intended to assist voters; (6) denial of service attacks; (7) actions by corrupt poll workers or others at the polling place to affect votes cast; (8) vote buying schemes; (9) attacks on ballots or VVPT. Often, the actual attacks

involve some combination of these categories. We provide a discussion of each type of attack in “Categories of Attacks,” *infra* at pp. 24–27.

### **PRIORITIZING THREATS: NUMBER OF INFORMED PARTICIPANTS AS METRIC**

Without some form of prioritization, a compilation of the threats is of limited value. Only by prioritizing these various threats could we help election officials identify which attacks they should be most concerned about, and what steps could be taken to make such attacks as difficult as possible. As discussed below, we have determined the level of difficulty for each attack where the attacker is attempting to affect the outcome of a close statewide election.

There is no perfect way to determine which attacks are the least difficult, because each attack requires a different mix of resources – well-placed insiders, money, programming skills, security expertise, *etc.* Different attackers would find certain resources easier to acquire than others. For example, election fraud committed by local election officials would always involve well-placed insiders and a thorough understanding of election procedures; at the same time, there is no reason to expect such officials to have highly skilled hackers or first-rate programmers working with them. By contrast, election fraud carried out by a foreign government would likely start with plenty of money and technically skilled attackers, but probably without many conveniently placed insiders or detailed knowledge of election procedures.

Ultimately, we decided to use the “number of informed participants” as the metric for determining attack difficulty. An attack which uses fewer participants is deemed the easier attack.

We have defined “informed participant” as someone whose participation is needed to make the attack work and who knows enough about the attack to foil or expose it. This is to be distinguished from a participant who unknowingly assists the attack by performing a task that is integral to the attack’s successful execution without understanding that the task is part of an attack on voting systems.

The reason for using the security metric “number of informed participants” is relatively straightforward: the larger a conspiracy is, the more difficult it would be to keep it secret. Where an attacker can carry out an attack by herself, she need only trust herself. On the other hand, a conspiracy that requires thousands of people to take part (like a vote-buying scheme) also requires thousands of people to keep quiet. The larger the number of people involved, the greater the likelihood that one of them (or one who was approached, but declined to take part) would either inform the public or authorities about the attack, or commit some kind of error that causes the attack to fail or become known.

Moreover, recruiting a large number of people who are willing to undermine the integrity of a statewide election is also presumably difficult. It is not hard to imagine two or three people agreeing to work to change the outcome of an election. It seems far less likely that an attacker could identify and employ hundreds or thousands of similarly corrupt people without being discovered.

We can get an idea of how this metric works by looking at one of the threats listed in our catalogs: the vote-buying threat, where an attacker or attackers pay individuals to vote for a particular candidate. This is Attack Number 26 in the PCOS Attack Catalog<sup>22</sup> (though this attack would not be substantially different against DREs or DREs w/ VVPT).<sup>23</sup> In order to work under our current types of voting systems, this attack requires (1) at least one person to purchase votes, (2) many people to agree to sell their votes, and (3) some way for the purchaser to confirm that the voters she pays actually voted for the candidate she supported. Ultimately, we determined that, while practical in smaller contests, a vote-buying attack would be an exceptionally difficult way to affect the outcome of a statewide election. This is because, even in a typically close statewide election, an attacker would need to involve thousands of voters to ensure that she could affect the outcome of a statewide race.<sup>24</sup>

For a discussion of other metrics we considered, but ultimately rejected, see Appendix C.

## **DETERMINING NUMBER OF INFORMED PARTICIPANTS**

### **DETERMINING THE STEPS AND VALUES FOR EACH ATTACK**

The Task Force members broke down each of the catalogued attacks into its necessary steps. For instance, Attack 12 in the PCOS Attack Catalog is “Stuffing Ballot Box with Additional Marked Ballots.”<sup>25</sup> We determined that, at a minimum, there were three component parts to this attack: (1) stealing or creating the ballots and then marking them, (2) scanning marked ballots through the PCOS scanners, probably before the polls opened, and (3) modifying the poll books in each location to ensure that the total number of votes in the ballot boxes was not greater than the number of voters who signed in at the polling place.

Task Force members then assigned a value representing the minimum number of persons they believed would be necessary to accomplish each goal. For PCOS Attack 12, the following values were assigned:<sup>26</sup>

**Minimum number required to steal or create ballots: 5 persons total.<sup>27</sup>**

**Minimum number required to scan marked ballots: 1 per polling place attacked.**

**Minimum number required to modify poll books: 1 per polling place attacked.<sup>28</sup>**

After these values were assigned, the Brennan Center interviewed several election officials to see whether they agreed with the steps and values assigned to each attack.<sup>29</sup> When necessary, the values and steps were modified. The new catalogs, including attack steps and values, were then reviewed by Task Force members. The purpose of this review was to ensure, among other things, that the steps and values were sound.

These steps and values tell us how difficult it would be to accomplish a *single attack in a single polling place*. They do not tell us how many people it would take to change the outcome of an election successfully – that depends, of course, on specific facts about the jurisdiction: how many votes are generally recorded in each polling

place, how many polling places are there in the jurisdiction, and how close is the race? For this reason, we determined that it was necessary to construct a hypothetical jurisdiction, to which we now turn.

**NUMBER OF INFORMED PARTICIPANTS NEEDED TO CHANGE STATEWIDE ELECTION**

We have decided to examine the difficulty of each attack in the context of changing the outcome of a reasonably close statewide election. While we are concerned by potential attacks on voting systems in any type of election, we are most troubled by attacks that have the potential to affect large numbers of votes. These are the attacks that could actually change the outcome of a statewide election with just a handful of attack participants.

We are less troubled by attacks on voting systems that can only affect a small number of votes (and might therefore be more useful in local elections). This is because there are many non-system attacks that can also affect a small number of votes (*i.e.*, sending out misleading information about polling places, physically intimidating voters, submitting multiple absentee ballots, *etc.*). Given the fact that these non-system attacks are likely to be less difficult in terms of number of participants, financial cost, risk of detection, and time commitment, we are uncertain that an attacker would target *voting machines* to alter a small number of votes.

In order to evaluate how difficult it would be for an attacker to change the outcome of a statewide election, we created a composite jurisdiction. The composite jurisdiction was created to be representative of a relatively close statewide election. We did not want to examine a statewide election where results were so skewed toward one candidate (for instance, the re-election of Senator Edward M. Kennedy in 2000, where he won 73% of the vote<sup>30</sup>), that reversing the election results would be impossible without causing extreme public suspicion. Nor did we want to look at races where changing only a relative handful of votes (for instance, the Governor's race in Washington State in 2004, which was decided by a mere 129 votes<sup>31</sup>) could affect the outcome of an election; under this scenario, many of the potential attacks would involve few people, and therefore look equally difficult.

We have named our composite jurisdiction "the State of Pennasota." The State of Pennasota is a composite of ten states: Colorado, Florida, Iowa, Ohio, New Mexico, Pennsylvania, Michigan, Nevada, Wisconsin and Minnesota. These states were chosen because they were the ten "battleground" states that Zogby International consistently polled in the spring, summer, and fall 2004.<sup>32</sup> These are statewide elections that an attacker would have expected, ahead of time, to be fairly close.

We have also created a composite election, which we label the "Governor's Race" in Pennasota. The results of this election are a composite of the actual results in the same ten states in the 2004 Presidential Election.

We have used these composites as the framework by which to evaluate the difficulty of the various catalogued attacks.<sup>33</sup> For instance, we know a ballot-box stuffing attack would require roughly five people to create and mark fake ballots, as

well as one person per polling place to stuff the boxes, and one person per polling place to modify the poll books. But, in order to determine how many informed participants would be needed to affect a statewide race, we need to know how many polling places would need to be attacked.

The composite jurisdiction and composite election provide us with information needed to answer these questions: *i.e.*, how many extra votes our attackers would need to add to their favored candidate's total for him to win, how many ballots our attackers can stuff into a particular polling place's ballot box without arousing suspicion (and related to this, how many votes are generally cast in the average polling place), how many polling places are there in the state, *etc.* We provide details about both the composite jurisdiction and election in the section entitled "Governor's Race, State of Pennasota, 2007," *infra* at pp 20-27.

### LIMITS OF INFORMED PARTICIPANTS AS METRIC

Of the possible metrics we considered, we believe that measuring the number of people who know they are involved in an attack (and thus could provide evidence of the attack to the authorities and/or the media) is the best single measure of attack difficulty; as already discussed, we have concluded that the more people an attacker is forced to involve in his attack, the more likely it is that one of the participants would reveal the attack's existence and foil the attack, perhaps sending attackers to jail. However, we are aware of a number of places where the methodology could provide us with questionable results.

By deciding to concentrate on size of attack team, we mostly ignore the need for other resources when planning an attack. Thus, a software attack on DREs which makes use of steganography<sup>34</sup> to hide attack instruction files (*see* "DRE w/ VVPT Attack No.1a" discussed in greater detail, *infra* at pp. 62-65) is considered easier than an attack program delivered over a wireless network at the polling place (*see* discussion of wireless networks, *infra* at pp. 85-91). However, the former attack probably requires a much more technologically sophisticated attacker.

Another imperfection with this metric is that we do not have an easy way to represent how much choice the attacker has in finding members of his attack team.

Thus, with PCOS voting, we conclude that the cost of subverting a routine audit of ballots is roughly equal to the cost of intercepting ballot boxes in transit and substituting altered ballots (*see* discussion of PCOS attacks, *infra* at pp. 77-83). However, subverting the audit team requires getting a specific set of trusted people to cooperate with the attacker. By contrast, the attacker may be able to decide which precincts to tamper with based on which people he has already recruited for his attack.

In an attempt to address this concern, we considered looking at the number of "insiders" necessary to take part in each attack. Under this theory, getting five people to take part in a conspiracy to attack a voting system might not be particularly difficult. But getting five well-placed county election officials to take part in the attack would be (and should be labeled) the more difficult of the two attacks. Because, for the most part, the low-cost attacks we have identified do not necessarily involve well placed insiders (but could, for instance, involve one of many people with access to commercial off the shelf software ("COTS") during development

or at the vendor), we do not believe that using this metric would have substantially changed our analysis.<sup>35</sup>

Finally, these attack team sizes do not always capture the logistical complexity of an attack. For example, an attack on VVPT machines involving tampering with the voting machine software and also replacing the paper records in transit requires the attacker to determine what votes were falsely produced by the voting machine and print replacement records in time to substitute them. While this is clearly possible, it raises a lot of operational difficulties – a single failed substitution leaves the possibility that the attack would be detected during the audit of ballots.

We have tried to keep these imperfections in mind when analyzing and discussing our least difficult attacks.

We suspect that much of the disagreement between voting officials and computer security experts in the last several years stems from a difference of opinion in prioritizing the difficulty of attacks. Election officials, with extensive experience in the logistics of handling tons of paper ballots, have little faith in paper and understand the kind of breakdowns in procedures that lead to traditional attacks like ballot box stuffing; in contrast, sophisticated attacks on computer voting systems appear very difficult to many of them. Computer security experts understand sophisticated attacks on computer systems, and recognize the availability of tools and expertise that makes these attacks practical to launch, but have no clear idea how they would manage the logistics of attacking a paper-based system. Looking at attack team size is one way to bridge this difference in perspective.

## **EFFECTS OF IMPLEMENTING COUNTERMEASURE SETS**

The final step of our threat analysis is to measure the effect of certain countermeasures against the catalogued attacks. How much more difficult would the attacks become once the countermeasures are put into effect? How many more informed participants (if any) would be needed to counter or defeat these countermeasures?

Our process for examining the effectiveness of a countermeasure mirrors the process for determining the difficulty of an attack: we first asked whether the countermeasure would allow us to detect an attack with near certainty. If we agreed that the countermeasure would expose the attack, we identified the steps that would be necessary to circumvent or defeat the countermeasure. For each step to defeat the countermeasure, we determined the number of additional informed participants (if any) that an attacker would need to add to his team. As with the process for determining attack difficulty, the Brennan Center interviewed numerous election officials to see whether they agreed with the steps and values assigned. When necessary, the values and steps for defeating the countermeasures were altered to reflect the input of election officials.

## **COUNTERMEASURES EXAMINED**

### **BASIC SET OF COUNTERMEASURES**

The first set of countermeasures we looked at is the “Basic Set” of countermeasures. This Basic Set was derived from security survey responses<sup>36</sup> we received

from county election officials around the country, as well as additional interviews with more than a dozen current and former election officials. Within the Basic Set of countermeasures are the following procedures:

### **Inspection**

The jurisdiction is not knowingly using any uncertified software that is subject to inspection by the Independent Testing Authority (often referred to as the “ITA”).<sup>37</sup>

### **Physical Security for Machines**

- Ballot boxes (to the extent they exist) are examined (to ensure they are empty) and locked by poll workers immediately before the polls are opened.
- Before and after being brought to the polls for Election Day, voting systems for each county are locked in a single room in a county warehouse.
- The warehouse has perimeter alarms, secure locks, video surveillance and regular visits by security guards.
- Access to the warehouse is controlled by sign-in, possibly with card keys or similar automatic logging of entry and exit for regular staff.
- Some form of “tamper evident” seals are placed on machines before and after each election.
- The machines are transported to polling locations five to fifteen days before Election Day.

### **Chain of Custody/Physical Security of Election Day Records**

- At close of the polls, vote tallies for each machine are totaled and compared with number of persons that have signed the poll books.
- A copy of totals for each machine is posted at each polling place on Election Night and taken home by poll workers to check against what is posted publicly at election headquarters, on the web, in the papers, or elsewhere.<sup>38</sup>
- All audit information (*i.e.*, Event Logs, VVPT records, paper ballots, machine printouts of totals) that is not electronically transmitted as part of the unofficial upload to the central election office, is delivered in official, sealed and hand-delivered information packets or boxes. All seals are numbered and tamper-evident.
- Transportation of information packets is completed by two election officials representing opposing parties who have been instructed to remain in joint custody of the information packets or boxes from the moment it leaves the precinct to the moment it arrives at the county election center.

- Each polling place sends its information packets or boxes to the county election center separately, rather than having one truck or person pick up this data from multiple polling locations.
- Once the sealed information packets or boxes have reached the county election center, they are logged. Numbers on the seals are checked to ensure that they have not been replaced. Any broken or replaced seals are logged. Intact seals are left intact.
- After the packets and/or boxes have been logged, they are provided with physical security precautions at least as great as those listed for voting machines, above. Specifically, for Pennasota, we have assumed the room in which the packets are stored have perimeter alarms, secure locks, video surveillance and regular visits by security guards and county police officers; and access to the room is controlled by sign-in, possibly with card keys or similar automatic logging of entry and exit for regular staff.

#### Testing<sup>39</sup>

- An Independent Testing Authority has certified the model of voting machine used in the polling place.
- Acceptance Testing<sup>40</sup> is performed on machines at time, or soon after they are received by County.
- Pre-election Logic and Accuracy<sup>41</sup> testing is performed by the relevant election official.
- Prior to opening the polls, every voting machine and vote tabulation system is checked to see that it is still configured for the correct election, including the correct precinct, ballot style, and other applicable details.

#### REGIMEN FOR AUTOMATIC ROUTINE AUDIT PLUS BASIC SET OF COUNTERMEASURES.

The second set of countermeasures is the Regimen for an Automatic Routine Audit Plus Basic Set of Countermeasures.

Some form of routine auditing of voter-verified paper records occurs in 12 states, to test the accuracy of electronic voting machines. They generally require between 1 and 10% of all precinct voting machines to be audited after each election. <sup>42</sup>

Jurisdictions can implement this set of countermeasures only if their voting systems produce some sort of voter-verified paper record of each vote. This could be in the form of a paper ballot, in the case of PCOS, or a voter-verified paper trail (“VVPT”), in the case of DREs.

We have assumed that jurisdictions take the following steps when conducting an Automatic Routine Audit (when referring to this set of assumptions “Regimen for an Automatic Routine Audit”):

### **The Audit**

- Leaders of the major parties in each county are responsible for selecting a sufficient number of audit-team members to be used in that county.<sup>43</sup>
- Using a highly transparent random selection mechanism (*see* point ii, below), the voter-verified paper records for between a small percentage of all voting machines in the State are selected for auditing.
- Using a transparent random selection method, auditors are assigned to the selected machines (two or three people, with representatives of each major political party, would comprise each audit team).
- The selection of voting machines, and the assignment of auditors to machines, occurs immediately before the audits take place. The audits take place as soon after polls close as possible – for example, at 9 a.m. the morning after polls close.
- Using a transparent random selection method, county police officers, security personnel and the video monitor assigned to guard the voter-verified records are chosen from a large pool of on-duty officers and employees on election night.
- The auditors are provided the machine tallies and are able to see that the county tally reflects the sums of the machine tallies before the start of the inspection of the paper.
- The audit would include a tally of spoiled ballots (in the case of VVPT, the number of cancellations recorded), overvotes, and undervotes.

### **Transparent Random Selection Process**

In this report, we have assumed that random auditing procedures are in place for both the Regimen for an Automatic Routine Audit and Regimen for Parallel Testing. We have further assumed procedures to prevent a single, corrupt person from being able to fix the results. This implies a kind of transparent and public random procedure.

For the Regimen for an Automatic Routine Audit there are at least two places where transparent, random selection processes are important: in the selection of precincts to audit, and in the assignment of auditors to the precincts they will be auditing.

Good election security can employ Transparent Random Selection in other places with good effect:

- the selection of parallel testers from a pool of qualified individuals.
- the assignment of police and other security professionals from on-duty lists, to monitor key materials, for example, the VVPT records between the time that they arrive at election central and the time of the completion of the ARA.

If a selection process for auditing is to be trustworthy and trusted, ideally:

- The whole process will be publicly observable or videotaped;<sup>44</sup>
- The random selection will be publicly verifiable, *i.e.*, anyone observing will be able to verify that the sample was chosen randomly (or at least that the number selected is not under the control of any small number of people); and
- The process will be simple and practical within the context of current election practice so as to avoid imposing unnecessary burdens on election officials.

There are a number of ways that election officials can ensure some kind of transparent randomness. One way would be to use a state lottery machine to select precincts or polling places for auditing. We have included two potential examples of transparent random selection processes in Appendix F. These apply to the Regimen for Parallel Testing as well.

#### **REGIMEN FOR PARALLEL TESTING PLUS BASIC SET OF COUNTERMEASURES**

The final set of countermeasures we have examined is “Parallel Testing” plus the Basic Set of countermeasures. Parallel Testing, also known as election-day testing, involves selecting voting machines at random and testing them as realistically as possible during the period that votes are being cast.

#### **Parallel Testing**

In developing our set of assumptions for Parallel Testing, we relied heavily upon interviews with Jocelyn Whitney, Project Manager for Parallel Testing in the State of California, and conclusions drawn from this Report.<sup>45</sup> In our analysis, we assume that the following procedures would be included in the Parallel Testing regimen (when referring to this regimen “Regimen for Parallel Testing”) that we evaluate:

- At least two of each DRE model (meaning both vendor and model) would be selected for Parallel Testing;
- At least two DREs from each of the three largest counties would be parallel tested;
- Counties to be parallel tested would be chosen by the Secretary of State in a transparent and random manner.
- Counties would be notified as late as possible that machines from one of their precincts would be selected for Parallel Testing;<sup>46</sup>
- Precincts would be selected through a transparent random mechanism;
- A video camera would record testing;
- For each test, there would be one tester and one observer;

- Parallel Testing would occur at the polling place;
- The script for Parallel Testing would be generated in a way that mimics voter behavior and voting patterns for the polling place;
- At the end of the Parallel Testing, the tester and observer would reconcile vote totals in the script with vote totals reported on the machine.

### **Transparent Random Selection Process**

We further assume that the same type of transparent random selection process that would be used for the Regimen for Automatic Routine Audit would also be employed for the Regimen for Parallel Testing to determine which machines would be subjected to testing on Election Day.

## **APPENDIX C**

### **ALTERNATIVE SECURITY METRICS CONSIDERED**

#### **Dollars Spent**

The decision to use the number of informed participants as the metric for attack level difficulty came after considering several other potential metrics. One of the first metrics we considered was the dollar cost of attacks. This metric makes sense when looking at attacks that seek financial gain – for instance, misappropriating corporate funds. It is not rational to spend \$100,000 on the misappropriation of corporate funds if the total value of those funds is \$90,000. Ultimately, we rejected this metric as the basis for our analysis because the dollar cost of the attacks we considered were dwarfed by both (1) current federal and state budgets, and (2) the amounts currently spent legally in state and federal political campaigns.

#### **Time of Attack**

The relative security of safes and other safety measures are often rated in terms of “time to defeat.” This was rejected as metric of difficulty because it did not seem relevant to voting systems. Attackers breaking into a house are concerned with the amount of time it might take to complete their robbery because the homeowners or police might show up. With regard to election fraud, many attackers may be willing to start months or years before an election if they believe they can control the outcome. As discussed *supra* at pp. 35–48, attackers may be confident that they can circumvent the independent testing authorities and other measures meant to identify attacks, so that the amount of time an attack takes becomes less relevant.

**EAC REPORT ON VOTER FRAUD AND VOTER INTIMIDATION STUDY****INTRODUCTION**

Voter fraud and intimidation is a phrase familiar to many voting-aged Americans. However, it means different things to different people. Voter fraud and intimidation is a phrase used to refer to crimes, civil rights violations, and, at times, even the correct application of state or federal laws to the voting process. Past study of this topic has been as varied as its perceived meaning. In an effort to help understand the realities of voter fraud and voter intimidation in our elections, the U.S. Election Assistance Commission (EAC) has begun this, phase one, of a comprehensive study on election crimes. In this phase of its examination, EAC has developed a definition of election crimes and adopted some research methodology on how to assess the true existence and enforcement of election crimes in this country.

**PURPOSE AND METHODOLOGY OF THE EAC STUDY**

Section 241 of the Help America Vote Act of 2002 (HAVA) calls on the U.S. Election Assistance Commission (EAC) to research and study various issues related to the administration of elections. During Fiscal Year 2006, EAC began projects to research several of the listed topics. These topics for research were chosen in consultation with the EAC Standards Board and Board of Advisors. Voter fraud and voter intimidation was a topic that the EAC as well as its advisory boards felt were important to study to help improve the administration of elections for federal office.

EAC began this study with the intention of identifying a common understanding of voter fraud and intimidation and devising a plan for a comprehensive study of these issues. This study was not intended to be a comprehensive review of existing voter fraud and voter intimidation actions, laws, or prosecutions. That To conduct that type of extensive research, a is well beyond the basic understanding that had to be first be established regarding what is commonly referred to as voter fraud and voter intimidation. Once that understanding was reached, a definition had to be crafted to refine and in some cases limit the scope of what reasonably can be researched and studied as evidence of voter fraud and voter intimidation. That definition will serve as the basis for recommending a plan for a comprehensive study of the area.

To accomplish these tasks, EAC employed two consultants, who worked with who along with EAC staff and interns to conducted the research that forms the basis of this report. Consultants were chosen based upon their experience with the topic. In addition, consultants were and to chosen to assure a bipartisan representation in this study. The consultants and EAC staff were charged (1) to research the current state of information on the topics of voter fraud and voter intimidation; (2) to develop a uniform definition of voter fraud and voter intimidation; and (3) to propose recommended strategies for researching this subject.

EAC consultants reviewed existing studies, articles, reports and case law on voter fraud and intimidation. ~~In addition, EAC consultants~~ and conducted interviews with selected experts in the field. ~~Last, EAC consultants and staff~~ then presented their ~~study~~ initial findings to a working group that provided feed-back. The working group participants were:

**The Honorable Todd Rokita**  
Indiana Secretary of State  
Member, EAC Standards Board and the  
Executive Board of the Standards Board

**Kathy Rogers**  
Georgia Director of Elections, Office of  
the Secretary of State  
Member, EAC Standards Board

**J.R. Perez**  
Guadalupe County Elections  
Administrator, Texas

**Barbara Arnwine**  
Executive Director, Lawyers Committee  
for Civil Rights under Law  
Leader of Election Protection Coalition

**Benjamin L. Ginsberg**  
Partner, Patton Boggs LLP  
Counsel to national Republican  
campaign committees and Republican  
candidates

**Robert Bauer**  
Chair of the Political Law Practice at the  
law firm of Perkins Coie, District of  
Columbia  
National Counsel for Voter Protection,  
Democratic National Committee

**Mark (Thor) Hearne II**  
Partner-Member, Lathrop & Gage, St  
Louis, Missouri  
National Counsel to the American  
Center for Voting Rights

**Barry Weinberg**  
Former Deputy Chief and Acting Chief,  
Voting Section, Civil Rights Division,  
U.S. Department of Justice

*Technical Advisor:*

**Craig Donsanto**  
Director, Election Crimes Branch, U.S.  
Department of Justice

Throughout the process, EAC staff assisted the consultants by providing statutes and cases on this subject as well as supervision on the direction, scope and product of this research.

The consultants drafted a report for EAC that included their summaries of existing laws, cases, studies and reports on voter fraud and intimidation as well as summaries of the interviews that they conducted. The draft report also provided a definition of voter fraud and intimidation and made certain recommendations developed by the consultants or by the working group on how to pursue further study of this subject. This document was vetted and edited by EAC staff to produce this final report.

## **EXISTING INFORMATION ABOUT FRAUD AND INTIMIDATION**

To begin our study of voter fraud and voter intimidation, EAC consultants reviewed the current body of information on voter fraud and intimidation. ~~What the world knows~~ The

information available about these issues comes largely from a very limited body of reports, articles, and books. There are volumes of case law and statutes in the various states that also impact our understanding of what actions or inactions are legally considered fraud or intimidation. Last, there is anecdotal information available through media reports and interviews with persons who have administered elections, prosecuted fraud, and studied these problems. All of these resources were used by EAC consultants to provide an introductory look at the available knowledge of voter fraud and voter intimidation.

### Reports and Studies of Voter Fraud and Intimidation

Over the years, there have been a number of studies conducted about the concepts of voter fraud and voter intimidation. EAC reviewed many of these studies and reports to develop a base-line understanding of the information that is currently available about voter fraud and voter intimidation. EAC consultants reviewed the following articles, reports and books, summaries of which are available in Appendix “\_\_”:

Formatted: Indent: First line: 0"

#### Articles and Reports

- People for the American Way and the NAACP, “The Long Shadow of Jim Crow,” December 6, 2004.
- Laughlin McDonald, “The New Poll Tax,” *The American Prospect* vol. 13 no. 23, December 30, 2002.
- Wisconsin Legislative Audit Bureau, “An Evaluation: Voter Registration Elections Board” Report 05-12, September, 2005.
- Milwaukee Police Department, Milwaukee County District Attorney’s Office, Federal Bureau of Investigation, United States Attorney’s Office “Preliminary Findings of Joint Task Force Investigating Possible Election Fraud,” May 10, 2005.
- National Commission on Federal Election Reform, “Building Confidence in U.S. Elections,” Center for Democracy and Election Management, American University, September 2005.
- The Brennan Center for Justice at NYU School of Law and Spencer Overton, Commissioner and Law Professor at George Washington University School of Law “Response to the Report of the 2005 Commission on Federal Election Reform,” September 19, 2005.
- Chandler Davidson, Tanya Dunlap, Gale Kenny, and Benjamin Wise, “Republican Ballot Security Programs: Vote Protection or Minority Vote Suppression – or Both?” A Report to the Center for Voting Rights & Protection, September, 2004.

- Alec Ewald, "A Crazy Quilt of Tiny Pieces: State and Local Administration of American Criminal Disenfranchisement Law," The Sentencing Project, November 2005.
- American Center for Voting Rights "Vote Fraud, Intimidation and Suppression in the 2004 Presidential Election," August 2, 2005.
- The Advancement Project, "America's Modern Poll Tax: How Structural Disenfranchisement Erodes Democracy" November 7, 2001
- The Brennan Center and Professor Michael McDonald "Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General," The Brennan Center for Justice at NYU School of Law, December 2005.
- Democratic National Committee, "Democracy at Risk: The November 2004 Election in Ohio," DNC Services Corporation, 2005

- Lori Minnite and David Callahan, "Securing the Vote: An Analysis of Election Fraud," Demos: A Network of Ideas and Action, 2003.
- People for the American Way, NAACP, Lawyers Committee for Civil Rights, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," December 2004.

#### Books

- John Fund, *Stealing Elections: How Voter Fraud Threatens Our Democracy*, Encounter Books, 2004.
- Andrew Gumbel, *Steal this Vote: Dirty Elections and the Rotten History of Democracy in American*, Nation Books, 2005.
- Tracy Campbell, *Deliver the Vote: A History of Election Fraud, An American Political Tradition – 1742-2004*, Carroll & Graf Publishers, 2005.
- David E. Johnson and Jonny R. Johnson, *A Funny Thing Happened on the Way to the White House: Foolhardiness, Folly, and Fraud in the Presidential Elections, from Andrew Jackson to George W. Bush*, Taylor Trade Publishing, 2004.
- Mark Crispin Miller, *Fooled Again*, Basic Books, 2005.

During our review of these documents, we learned a great deal about the type of research that has been conducted in the past concerning voter fraud and voter intimidation. None of the studies or reports was based on a comprehensive study, survey or review of all allegations, prosecutions or convictions of state or federal crimes related to voter fraud or voter intimidation. Most reports focused on a limited number of case studies or instances of alleged voter fraud or intimidation. For example, "Shattering the Myth: An Initial Snapshot of Voter Disenfranchisement in the 2004 Elections," a report produced by the People for the American Way, focused exclusively on citizen reports of fraud or intimidation to the Election Protection (is this DOJ?) program during the 2004 presidential election. Similarly, reports produced annually by the Department of Justice, Public Integrity Division, deal exclusively with crimes reported to and prosecuted by the United States Attorneys and/or the Department of Justice through the Public Integrity Section.

It is also apparent from a review of these articles and books that there is no consensus on the pervasiveness of voter fraud and voter intimidation. Some reports, such as "Building Confidence in U.S. Elections," suggest that there is little or no evidence of extensive fraud in U.S. elections or of multiple voting. This conflicts directly with other reports, such as the "Preliminary findings of Joint Task Force Investigating Possible Election Fraud," produced by the Milwaukee Police Department, Milwaukee County District

Attorney's Office, FBI and U.S. Attorney's Office. That report cited evidence of more than 100 individual instances of suspected double-voting, voting in the name of persons who likely did not vote, and/or voting using a name believed to be fake.

Voter intimidation is also a topic of some debate. Generally, speaking, because there is little agreement on what constitutes actionable voter intimidation. Some studies and reports cover only intimidation that involves physical or financial threats, while others cover non-criminal intimidation, even legal practices, that they allege suppress suppression of the vote.

One point of agreement is that absentee voting and voter registration by third-party groups create opportunities for fraud. A number of studies cited circumstances in which voter registration drives have falsified voter registration applications or have destroyed voter registration applications of voters of a certain party. Others conclude that paying persons per voter registration application creates the opportunity and perhaps the incentive for fraud.

### Interviews with Experts

In addition to reviewing prior studies and reports on voter fraud and intimidation, EAC consultants interviewed a number of persons regarding their experiences and research of voter fraud and voter intimidation. Persons interviewed included:

**Wade Henderson**

Executive Director,  
Leadership Conference for Civil Rights

**Pat Rogers**

Attorney, New Mexico

**Wendy Weiser**

Deputy Director,  
Democracy Program, The Brennan  
Center

**Rebecca Vigil-Giron**

Secretary of State, New Mexico

**William Groth**

Attorney for the plaintiffs in the Indiana  
voter identification litigation

**Sarah Ball Johnson**

Executive Director,  
State Board of Elections, Kentucky

**Lori Minnite**

Barnard College, Columbia University

**Stephen Ansolobhere**

Massachusetts Institute of Technology

**Neil Bradley**

ACLU Voting Rights Project

**Chandler Davidson**

Rice University

**Nina Perales**

Counsel,  
Mexican American Legal Defense and  
Education Fund

**Tracey Campbell**

Author, *Deliver the Vote*

**Douglas Webber**

Assistant Attorney General, Indiana

**Heather Dawn Thompson**  
Director of Government Relations,  
National Congress of American Indians

**Kevin Kennedy**  
Executive Director  
State Board of Elections, Wisconsin

**Jason Torchinsky**  
Assistant General Counsel,  
American Center for Voting Rights

**Evelyn Stratton**  
Justice  
Supreme Court of Ohio

**Robin DeJarnette**  
Executive Director,  
American Center for Voting Rights

**Tony Sirvello**  
Executive Director  
International Association of Clerks,  
Recorders, Election Officials and  
Treasurers

**Harry Van Sickle**  
Commissioner of Elections,  
Pennsylvania

**Joseph Rich**  
Former Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

**Joseph Sandler**  
Counsel  
Democratic National Committee

**Craig Donsanto**  
Director, Public Integrity Section  
U.S. Department of Justice

**John Ravitz**  
Executive Director  
New York City Board of Elections

**John Tanner**  
Director  
Voting Section, Civil Rights Division  
U.S. Department of Justice

These interviews in large part confirmed the conclusions that were gleaned from the articles, reports and books that were analyzed. For example, the interviewees largely agreed that absentee balloting is subject to the greatest proportion of fraudulent acts, followed by vote buying and voter registration fraud. They similarly pointed to voter registration drives by third-party groups as a source of fraud, particularly when the workers are paid per registration. Many asserted that impersonation of voters is probably the least frequent type of fraud, ~~citing as reasons that~~ because it was the most likely type of fraud to be discovered and due to the stiff ~~that there are stiff~~ penalties associated with this type of fraud.

Interviewees differed on what they believe constitutes actionable voter intimidation. Law enforcement and prosecutorial agencies tend to look to the criminal definitions of voter intimidation, which generally require some threat of physical or financial harm. On the other hand, voter rights advocates tended to point to activities such as challenger laws, voter identification laws, ~~the location of polling place~~ locations, and distribution of voting machines as activities that can constitute voter intimidation.

Those interviewed also expressed opinions on the enforcement of voter fraud and voter intimidation laws. States have varying authorities to enforce these laws. In some states, enforcement is left to the county or district attorney, and in others enforcement is managed by the state’s attorney general. Regardless, voter fraud and voter intimidation are difficult to prove and require resources and time that many local law enforcement and prosecutorial agencies do not have. Federal law enforcement and prosecutorial agencies have more time and resources but have limited jurisdiction and. ~~They can only prosecute crimes related to elections involving federal candidates. Those interviewed differed on the effectiveness of the current system of enforcement, including those that who allege that prosecutions are not sufficiently aggressive and those that who feel that the current laws are sufficient for prosecuting fraud and intimidation.~~

A summary of the each of the interviews conducted is attached as Appendix “\_\_\_”.

### Case Law and Statutes

Consultants reviewed ~~over~~ more than 40,000 cases that were identified using a series of search terms related to voter fraud and voter intimidation. The majority of these cases came from appeal courts. This is not a ~~surprising situation~~, since most cases that are publicly reported come from courts of appeal. Very few cases that are decided at the district court level are reported for public review.

Very few of the identified cases were applicable to this study. Of those that were applicable, no apparent thematic pattern emerged. However, it did seem (WHY DID IT “SEEM” THIS WAY? IS THERE EVIDENCE?) that the greatest number of cases reported on fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

A listing of the cases reviewed in this study is attached as Appendix “\_\_\_”.

### Media Reports

EAC consultants reviewed thousands of media reports concerning a wide variety of potential voter fraud or voter intimidation, including:

- absentee ballot fraud,
- voter registration fraud,
- voter intimidation and suppression,
- deceased voters,
- multiple voting,
- felons voting,
- non-citizens voting,
- vote buying,
- deceptive practices, and

- fraud by election officials.

While these reports showed that there were a large number of allegations of voter fraud and voter intimidation, they provided much less information as to whether the allegations were ever formalized as complaints to law enforcement, whether charges were filed, whether prosecutions ensued, and whether any convictions were made. The media reports were enlightening as to the pervasiveness of complaints of fraud and intimidation throughout the country, the correlation between fraud allegations and the perception that the state was a “battleground” or “swing” state, and the fact that there were reports of almost all types of voter fraud and voter intimidation. However, these reports do not provide much data for analysis as to the number of complaints, charge and prosecutions of voter fraud and intimidation throughout the country.

## DEFINITION OF ELECTION CRIMES

From our study of available information on voter fraud and voter intimidation, we have learned that these terms mean many things to many different people. These terms are used casually to refer to anything from vote buying to refusing to register a voter to falsifying voter registration applications. Upon further inspection, however, it is apparent that there is no common understanding or agreement of what is and what is not constitutes “voter fraud” and “voter intimidation.” Some think of voter fraud and voter intimidation only as criminal acts, while others include actions that may constitute civil wrongs, civil rights violations, and even legal and appropriate activities. In order to arrive come up with a common definition and list of activities that can be studied, EAC assessed the appropriateness of the terminology that is currently in use and applied certain factors to limit the scope and reach of what can and will be studied by EAC in the future.

### New Terminology

The phrase “voter fraud” is really a misnomer for a concept that is much broader. “Fraud” is a concept that connotes an intentional act of deception, which may constitute either a criminal act or civil tort depending upon the willfulness of the act.

**Fraud, n. 1.** A knowing misrepresentation of the truth or concealment of a material fact to induce another to act to his or her detriment. • Fraud is usu. a tort, but in some cases (esp. when the conduct is willful) it may be a crime.

Black’s Law Dictionary, Eighth Edition, p. 685.

A “voter” is a person who is eligible to and engages in the act of voting. Black’s Law Dictionary, Eighth Edition, p. 1608. Using these terms to form a definition of “voter fraud,” it means fraudulent or deceptive acts committed by the voter or in which the voter is the victim. Thus, a voter who intentionally provides false information on a voter registration application or intentionally impersonates another registered voter and attempts to vote for that person would be committing “voter fraud.” Similarly, a person

who knowingly provides false information to a voter about the location of the voter's polling place commits fraud on the voter.

The phrase "voter fraud" does not capture a myriad of other criminal acts that are related to elections which are not perpetrated by the voter and/or do not involve an act of deception. For example, "voter fraud" does not capture actions or willful inaction by candidates and election workers. When an election official willfully and knowingly refuses to register to vote a ~~non~~ otherwise-legally eligible person it is a crime. This is a crime that involves neither the voter nor an act of deception.

To further complicate matters, the phrases "voter fraud" and "voter intimidation" are used to refer to actions or inactions that are criminal as well as those that are potentially civil wrongs and even those that are legal. Obviously, criminal acts and civil wrongs are pursued in a very different manner. Criminal acts are prosecuted by the local, state or federal government. Generally, civil wrongs are prosecuted by the individual who believes that they were harmed. In some cases, when civil rights are involved, the civil division of the Department of Justice may become involved.

The goal of this study was to develop a common definition of what is generically referred to as "voter fraud" and "voter intimidation" that would serve as the basis of a future, comprehensive study of the existence of these problems. In order to meet that goal, we recognize that the current terminology does not accurately represent the spectrum of activities that we desire to study. Furthermore, we recognize that the resources, both financial and human capital, needed to study allegations and prosecutions of criminal acts, suits involving civil torts, and allegations of potential voter suppression through the use of legal election processes are well beyond the resources available to EAC. As such, EAC has defined "election crimes," a phrase that captures all crimes related to the voter registration and voting processes.

#### **What is an Election Crime for Purposes of this Study**

Election crimes are intentional acts or willful failures to act, prohibited by state or federal law, that are designed to cause ineligible persons to participate in the election process, eligible persons to be excluded from the election process, ineligible votes to be cast in an election, eligible votes not to be cast or counted, or other interference with or invalidation of election results. Election crimes generally fall into one of four categories: acts of deception, acts of coercion, acts of damage or destruction, and failures or refusals to act.

Generally speaking, election crimes can be committed by voters, candidates, election officials, or any other members of the public ~~that~~ who desire to criminally impact the result of an election. However, crimes that are based upon ~~knowing-intentional~~ or willful failure to act assume that a duty to act exists. Election officials have affirmative duties to act with regard to elections. By and large, other groups and individuals do not have such duties.

The victim of an election crime can be a voter, a group of voters, an election official, a candidate, or the public, in general. Election crimes can occur during any stage of the election process, including but not limited to qualification of candidates; voter registration; campaigning; voting system preparation and programming; voting either early, absentee, or election day; vote tabulation; recounts; and recalls.

The following are examples of activities that may constitute election crimes. This list is not intended to be exhaustive, but is representative of what states and the federal government consider criminal activity related to elections.

*Acts of Deception*

- Knowingly causing to be mailed or distributed, or knowingly mailing or distributing, literature that includes false information about the voter's precinct or polling place, ~~regarding the date and time of the election or regarding a candidate~~;
- Possessing an official ballot outside the voting location, unless the person is an election official or other person authorized by law or local ordinance ~~to possess a ballot outside of the polling location~~;
- Making, or knowingly possessing, a counterfeit of an official election ballot;
- Signing a name other than his/her own to a petition proposing an initiative, referendum, recall, or nomination of a candidate for office;
- Knowingly signing more than once for the proposition, question, or candidate at one election;
- Signing a petition proposing an initiative or referendum when the signer is not a qualified voter.
- Voting or attempting to vote in the name of another person;
- Voting or attempting to vote more than once ~~at during~~ the same election;
- Intentionally making a false affidavit, swearing falsely, or falsely affirming under an oath required by a statute regarding their voting status, including when registering to vote, requesting an absentee ballot or presenting to vote in person;
- Registering to vote without being entitled to register;
- Knowingly making a material false statement on an application for voter registration or re-registration; and
- Voting or attempting to vote in an election after being disqualified or when the person knows that he/she is not eligible to vote.

*Acts of Coercion*

- Using, threatening to use, or causing to be used force, coercion, violence, restraint, or inflicting, threatening to inflict, or causing to be inflicted damage harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting or to register or refrain from registering to vote;
- Knowingly paying, offering to pay, or causing to be paid money or other thing of valuable thing-e to a person to vote or refrain from voting for a candidate or for or against an election proposition or question;

- Knowingly soliciting or encouraging a person who is not qualified to vote in an election;
- Knowingly challenging a person's right to vote without probable cause or on fraudulent grounds, or engaging in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voter from voting or delay the process of voting;
- As an employer, attempting by coercion, intimidation, threats to discharge or to lessen the remuneration of an employee, to influence his/her vote in any election, or who requires or demands an examination or inspection by himself/herself or another of an employee's ballot;
- Soliciting, accepting, or agreeing to accept money or other valuable thing in exchange for signing or refraining from signing a petition proposing an initiative;
- Inducing or attempting to induce an election official to fail in the official's duty by force, threat, intimidation, or offers of reward;
- Directly or through any other person advancing, paying, soliciting, or receiving or causing to be advanced, paid, solicited, or received, any money or other valuable consideration to or for the use of any person in order to induce a person not to become or to withdraw as a candidate for public office; and
- Soliciting, accepting, or agreeing to accept money or other thing of valuable thing e in exchange for registering to vote.

***Acts of Damage or Destruction***

- Removing or destroying any of the supplies or other conveniences placed in the voting booths or compartments ~~for the purpose of enabling the voter to vote his or her ballot;~~
- Removing, tearing down, or defacing election materials, instructions or ballots;
- Fraudulently altering or changing the vote of any elector, by which such elector is prevented from voting as ~~h~~the person intended;
- Knowingly removing, altering, defacing or covering any political sign of any candidate for public office for a prescribed period prior to and following the election;
- Intentionally changing, attempting to change, or causing to be changed an official election document including ballots, tallies, and returns; and
- Intentionally delaying, attempting to delay, or causing to be delayed the sending of certificate, register, ballots, or other materials whether original or duplicate, required to be sent by jurisdictional law.

***Failure or Refusal to Act***

- Intentionally failing to perform an election duty, or knowingly committing an unauthorized act with the intent to effect the election;
- Knowingly permitting, making, or attempting to make a false count of election returns;
- Intentionally concealing, withholding, or destroying election returns or attempts to do so;

- Marking a ballot by folding or physically altering the ballot so as to recognize the ballot at a later time;
- Attempting to learn or actually and unlawfully learning how a voter marked a ballot;
- Distributing or attempting to distribute election material knowing it to be fraudulent;
- Knowingly refusing to register a person who is entitled to register under the rules of that jurisdiction; and
- Knowingly removing the eligibility status of a voter who is eligible to vote; and
- Knowingly refusing to allow an eligible voter to cast his/her ballot.

Formatted: Bullets and Numbering

### **What is not an Election Crime for Purposes of this Study**

There are some actions or inactions that may constitute crimes or civil wrongs that we do not include in our definition of “election crimes.” All crimes or civil violations related to campaign finance reporting either at the state or federal level are not “election crimes” for purposes of this study and any future study conducted by EAC. Similarly, criminal acts that are unrelated to elections, voting, or voter registration are not “election crimes,” even when those offenses occur in a polling place, voter registration office, or a candidate’s office or appearance. For example, an assault or battery that results from a fight in a polling place or at a candidate’s office is not an election crime. Similarly, violations of ethical provisions such as the Hatch Act are not “election crimes.” Last, and actions that do not rise to the level of criminal activity, ~~that such as is~~ a misdemeanor, relative felony or felony, are not “election crimes.”

### **RECOMMENDATIONS ON HOW TO STUDY ELECTION CRIMES**

As a part of its study, EAC sought recommendations on ways that EAC can study research the existence of election crimes. EAC consultants, the working groups and some of the persons interviewed developed recommendations. ~~In addition, the working group and some of the persons interviewed~~ as a part of this study provided the following recommendations.

#### ***Recommendation 1: Conduct More Interviews***

Future activity in this area should include conducting additional interviews. In particular, more election officials from all levels of government, parts of the country, and political parties should be interviewed. It would also be especially beneficial to talk to ~~people in~~ law enforcement officials, specifically federal District Election Officers (“DEOs”) and local district attorneys, as well as civil and criminal defense attorneys.

#### ***Recommendation 2: Follow Up on Media Research***

The media search conducted for this phase of the research was based on a list of search terms agreed upon by EAC consultants. Thousands of articles were reviewed and hundreds analyzed. Many of the articles contained allegations of fraud or intimidation.

Similarly, many of the articles contained information about investigations into such activities or even charges brought. (THIS SENTENCE CONTRADICTS WHAT WAS SAID EARLIER ABOUT THE LACK OF MEDIA ARTICLES ON FOLLOW UP.)

Additional media research should be conducted to determine what, if any, resolutions or further activity there was in each case.

***Recommendation 3: Follow Up on Allegations Found in Literature Review***

Many of the allegations made in the reports and books that were analyzed and summarized by EAC consultants were not substantiated and were certainly limited by the date of publication of those pieces. Despite this, such reports and books are frequently cited by various interested parties as evidence of fraud or intimidation. Further research should include follow up on the allegations discovered in the literature review.

***Recommendation 4: Review Complaints Filed With “MyVote1” Voter Hotline***

During the 2004 election and the statewide elections of 2005, the University of Pennsylvania led a consortium of groups and researchers in conducting the MyVote1 Project. This project involved using a ~~1-800~~toll-free voter hotline ~~where that~~ voters could call for poll locations, be transferred to a local hotline, or leave a recorded message with a complaint. In 2004, this resulted in ~~over~~more than 200,000 calls received and ~~over~~more than 56,000 recorded complaints.

Further research should be conducted using the MyVote1 data with the cooperation of the project leaders. While perhaps not a fully scientific survey given the self-selection of the callers, the information regarding ~~200,000~~56,000 complaints may provide ~~a good deal of~~ insight into the problems voters may have experienced, especially ~~those in the nature of~~issues regarding intimidation or suppression.

***Recommendation 5: Further Review of Complaints Filed With U.S. Department of Justice***

~~Although a~~According to a recent GAO report, the Voting Section of the Civil Rights Division of the Department of Justice has a variety in ways it tracks complaints of voter intimidation. Attempts should be made to obtain relevant data, including the telephone logs of complaints and information from the Interactive Case Management (ICM) system. Further research should also include a review and analysis of the DOJ/OPM observer and “monitor field reports” (NOT SURE WHAT THIS MEANS) from Election Day.

***Recommendation 6: Review Reports Filed By District Election Officers***

Further research should include a review of the reports that must be filed by every District Election Officer to the Public Integrity Section of the Criminal Division of the Department of Justice. The DEOs play a central role in receiving reports of voter fraud and investigating and pursuing them. Their reports back to the Department would likely

provide tremendous insight into what actually transpired during the last several elections. Where necessary, information could be redacted or made confidential.

***Recommendation 7: Attend Ballot Access and Voting Integrity Symposium***

Further activity in this area should include attending the next Ballot Access and Voting Integrity Symposium. At this conference, prosecutors serving as District Election Officers in the 94 U.S. Attorneys' Offices obtain annual training on fighting election fraud and voting rights abuses. These conferences are sponsored by the Voting Section of the Civil Rights Division and the Public Integrity Section of the Criminal Division, and feature presentations by Civil Rights officials and senior prosecutors from the Public Integrity Section and the U.S. Attorneys' Offices. By attending the symposium researchers could learn more about the following: how District Election Officers are trained; how information about previous election and voting issues is presented; and how the Voting Rights Act, the criminal laws governing election fraud and intimidation, the National Voter Registration Act, and the Help America Vote Act are described and explained to participants.

***Recommendation 8: Conduct Statistical Research***

EAC should measure voter fraud and intimidation using interviews, focus groups, and a survey and statistical analysis of the results of these efforts. The sample should be based on the following factors:

- Ten locations that are geographically and demographically diverse where there have historically been many reports of fraud and/or intimidation;
- Ten locations (geographically and demographically diverse) that have not had many reports of fraud and/or intimidation;

EAC should also conduct a survey of elections officials, district attorneys, and district election officers. (WHAT WOULD WE SURVEY THEM ABOUT?) The survey sample should be large in order to be able to get the necessary subsets, and it. The sample must include a random set of counties where there have and have not been a large number of allegations.

***Recommendation 9: Explore Improvements to Federal Law***

Future researchers should review federal law to explore ways to make it easier to impose either civil or criminal penalties for acts of intimidation that do not necessarily involve racial animus and/or a physical or economic threat.

***Recommendation 10: Use Observers to Collect Data on Election Day***

Use observers to collect data regarding fraud and intimidation at the polls in on Election Day. There may be some limitations to the ability to conduct this type of research, including difficulty gaining access to polling places for the purposes of observation.

***Recommendation 11: Study Absentee Ballot Fraud***

Because absentee ballot fraud constitutes a large portion of election crimes, a stand-alone study of absentee ballot fraud should be conducted. Researchers should look at actual cases to see how absentee ballot fraud schemes are conducted in an effort to provide recommendations on more effective measures for preventing them fraud when absentee ballots are used.

***Recommendation 12: Use Risk Analysis Methodology to Study Fraud***

Conduct an analysis of what types of fraud people are most likely to commit. Researchers ~~can~~ will use that risk analysis to rank the types of fraud based on the “ease of commission” (WHAT DOES THIS MEAN?) and the impact of the fraud.

***Recommendation 13: Conduct Research Using Database Comparisons***

Researchers should compare information on databases to determine whether the voter rolls contain deceased persons and felons. In addition, the voter rolls can then be compared with the list of persons who voted to determine whether a vote was recorded by someone who is deceased voters or if felons actually voted.

***Recommendation 14: Conduct a Study of Deceptive Practices***

The working group discussed the increasing use of deceptive practices, such as flyers and phone calls with false and/or intimidating information, to suppress voter participation. A number of groups, such as the Department of Justice, the EAC, and organizations such as the Lawyers Committee for Civil Rights, keep phone logs regarding complaints of such practices. These logs should be reviewed and analyzed to see how and where such practices are being conducted and what can be done about them.

***Recommendation 15: Study Use of HAVA Administrative Complaint Procedure as Vehicle for Measuring Fraud and Intimidation***

EAC should study the extent to which states are ~~actually~~ utilizing the administrative complaint procedure mandated by HAVA. In addition, the EAC should study whether data collected through the administrative complaint procedure can be used as another source of information for measuring fraud and intimidation.

***Recommendation 16: Examine the Use of Special Election Courts***

Given that many state and local judges are elected, it may be worth exploring whether special election courts should be established to handle fraud and intimidation complaints before, during, and after Election Day. Pennsylvania employs such a system and could investigate how well that system is working.

### Accepted Recommendations

There has never been a comprehensive study that gathered data regarding all claims, charges, and prosecutions of voting crimes. EAC feels that a comprehensive study is the most important research that it can offer the election community and the public. As such, EAC has adopted all or a part of six of the 16 recommendations made by EAC consultants and the working group.

While several of the other recommendations could be used to obtain more anecdotal information regarding election crimes, EAC believes that what is needed is a comprehensive survey and study of the information available from investigatory agencies, prosecutorial bodies and courts on the number and types of complaints, charges and prosecutions of election crimes. Additional media reviews, additional interviews and the use of observers to collect information from voters on Election Day will only serve to continue the use of anecdotal data to report on election crimes. Hard data on complaints, charges and prosecutions exists and we should gather and use that data, rather than rely on the perceptions of the media or the members of the public as to what might be fraud or intimidation.

Some of the recommendations are beyond the scope of the current study. While election courts may be a reasonable conclusion to reach after we determine what the volume and type of election crimes are being reported, charged or prosecuted, it is premature to embark on an analysis of that solution without more information. Last, some of the recommendations do not support a comprehensive study of election crimes. While a risk analysis might be appropriate in a smaller scale study, EAC desires to conduct a broader survey to avoid the existing problem of anecdotal and limited scope of information.

In order to further its goal of developing a comprehensive data set regarding election crimes, EAC intends to engage in the following research activities in studying the existence and enforcement of election crimes:

#### *Survey Chief Election Officers Regarding Administrative Complaints*

Likely sources of complaints concerning voting crimes are the administrative complaint processes that states were required to establish as a part of complying with HAVA. Those complaint procedures were required to be in place prior to a state receiving any funds under HAVA. Citizens are permitted to file complaints under those procedures with the state's chief election official, and those complaints must be resolved within 60 days. The procedures also allow for alternative dispute resolution of claims.

In order to determine how many of these complaints allege the commission of election crimes, EAC will survey the states' chief election officers regarding complaints that have been filed, investigated, and resolved since January 1, 2004. EAC will use the definition of election crimes provided above in this report in its survey so that data regarding a uniform set of offenses can will be collected.

***Survey State Election Crime Investigation Units Regarding Complaints Filed and Referred***

Several chief state election officials have developed investigation units focused on receiving, investigating, and referring complaints of election crimes. These units were established to bolster the abilities of state and local law enforcement to investigate allegations of election crimes. California, New York and Florida are just three examples of states that have these types of units.

EAC will use a survey instrument to gather information on the numbers and types of complaints that have been received by, investigated, and ultimately referred to local or state law enforcement by election crime investigation units since January 1, 2004. ~~This~~ These data will help us understand the pervasiveness of perceived fraud, as well as the number of claims that state election officials felt were meritorious of being referred to local and state law enforcement or prosecutorial agencies for further action.

***Survey Law Enforcement and Prosecutorial Agencies Regarding Complaints and Charge of Voting Crimes***

While voters, candidates and citizens may call national hotlines or the news media to report allegations of election crimes, it is those complaints that are made to law enforcement that can be investigated and ultimately prosecuted. Thus, it is critical to the study of election crimes to obtain statistics regarding the number and types of complaints that are made to law enforcement, how many of those complaints result in the perpetrator being charged or indicted, and how many of those charges or indictments result in pleas or convictions.

Thus, EAC will survey law enforcement and prosecutorial agencies at the local, state and federal level to determine the number and types of complaints, charges or indictments, and pleas or convictions of election crimes since January 1, 2004. In addition, EAC will seek to obtain an understanding of why some complaints are not charged or indicted and why some charges or indictments are not prosecuted.

***Analyze Survey Data in Light of State Laws and Procedures***

Once a reliable data set concerning the existence and enforcement of election crimes is assembled, a real analysis of the effectiveness of fraud prevention measures can be conducted. For example, data can be analyzed to determine if criminal activities related to elections are isolated to certain areas or regions of the country. Data collected from the election official surveys can be compared to the data regarding complaints, charges and prosecutions gathered from the respective law enforcement and prosecutorial agencies in each jurisdiction. The effect and/or effectiveness of provisions such as voter identification laws and challenger provisions can be assessed based on hard data from areas where these laws exist. Last, analyses such as the effectiveness of enforcement can be conducted in light of the resources available to the effort.

## CONCLUSION

Election crimes are nothing new to our election process. The pervasiveness of these crimes and the fervor with which they have been enforced has created a great deal of debate among academics, election officials, ~~and political pundits~~ and voters. Past studies of these issues have been limited in scope and some have been riddled with bias. These are issues that deserve comprehensive and nonpartisan review. EAC, through its clearinghouse role, will collect and analyze data on election crimes throughout the country. These data not only will tell us what types of election crimes are committed and where fraud exists, but also inform us of what factors impact the existence, prevention, and prosecution of election crimes.

I think that distinction comes a little too late, as the commissioners have been referring to any future report as one that would be produced by EAC. Hence, the effort to explain the difference b/w data provided/produced by consultants.

Subject Re: Media inquiry RE: fraud research Link

I don't know that we can say that EAC will produce a report on the subject in the near future. We will have the consultants' report to EAC, which I don't believe constitutes an EAC report/statement. The consultants' report never was intended to be the definitive study of voting fraud/voter intimidation that the news media and others seem to be seeking. One of the primary goals of the report was to provide recommendations for future EAC action/direction of study. In order to do this, the consultants did some preliminary research to get an idea of what problems were occurring. I don't know how soon EAC will decide which recommendations, if any, to pursue. --- Peggy

011302

Hello everyone,

Brian Friel of the National Journal has posed the following questions regarding the fraud report. Since we know this is something everyone on the Hill will definitely read, I want to make sure everyone agrees with these responses. I need to get this info to him by noon tomorrow.

Tom -- do you want me to run this language by the commissioners?

1. Are there any plans to release voter fraud report since several groups have called for its release; or if there is some procedure that would be necessary for EAC to determine that it should be released? The status report created by EAC staff was presented to EAC's Board of Advisors and Standards Board to provide an update on the research project. This meeting was open to the public. As a small agency of only 23 employees, including four commissioners, it is necessary for EAC to contract with third parties and experts to conduct research. The information provided by third parties is used by staff to develop EAC final policy or reports. No documents, drafts, or recommendations presented to EAC by third parties constitute official EAC policy. Currently, EAC staff is reviewing the data presented regarding voter fraud and intimidation and will produce a final report in the near future.

Is the fourth position still vacant and does this impact the decision for release of the report. There is a vacancy on the commission, but the vacancy has not impacted the timeline for releasing the fraud report.

Subject Re: Kick off activities for the EAC Voting fraud/voter  
intimidation project

All-

In anticipation of our 45-minute conference call scheduled for Tuesday, September 6 at 4:00 PM, I would ask the three consultants ( Steve, Job and Tova) to come prepared to talk about the following:

The major topics and issues which you see as needing immediate attention, definition, delineation, etc.  
Rough timelines and timeframes for addressing these major issues and topics  
Your major roles and responsibilities and the timelines you envision for meeting your major deliverables

We all realize that this conversation is just a start; I look forward to this beginning and to framing the tasks that lie ahead of us between now and September 30.

Have a wonderful holiday!!

Subject Kick off activities for the EAC Voting fraud/voter intimidation  
project

Greetings-

Tom Wilkey and I have just completed a series of very informative and productive conversations with each of you and are anxious to move to the next step of this process.

We hope to assemble our consultant team on this project, within the next three weeks and are presently awaiting final approval of your contracts from our Commissioners. We anticipate this will take place in the next week to ten days.

We would like to assemble the team- Steve Ansolabehere of MIT, Tova Wang from The New Century Foundation and Job Serebrov, who has worked extensively on these issues for the State of Arkansas, during the week of September 11. Please get back to us with some tentative dates during that week that might work with your schedule.

We look forward to working with all of you and appreciate your efforts on behalf of the EAC.

## **Statement of Work**

### **Assistance with developing an Election Assistance Commission (EAC) Voting Fraud and Voter Intimidation Project**

#### **Background**

Section 241 of HAVA enumerates a number of periodic studies of election administration issues in which the U.S. Election Assistance Commission may elect to engage. In general "On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b)"

Sections 241(b) (6) and (7) list the following election administration issues:

(6) Nationwide statistics and methods of identifying, deterring and investigating voting fraud in election for Federal offices.

(7) Identifying, deterring and investigating methods of voter intimidation.

Building on this HAVA reference to studies of voting fraud and voter intimidation, the EAC Board of Advisors has indicated that further study of these issues to determine how the EAC might respond to them is a high priority.

The U.S. Election Assistance Commission (EAC) seeks to identify one or more senior-level project consultants to develop various project activities and studies related to voting fraud and voter intimidation affecting Federal elections.

The consultant(s) must of have knowledge of voting fraud and voter intimidation along with an understanding of the complexities, nuances and challenges which surround the topics. The EAC is particularly interested in candidates with experience in elections, with public policy and with the law. The consultant (s) must be able to demonstrate an ability to approach the issues of voting fraud and voter intimidation in a balanced, nonpartisan fashion.

## **Duties**

The consultant(s), whose contract would run for the period September-February, 2005, would be responsible for the following.

1. Identifying what constitutes voting fraud and voter intimidation affecting Federal elections.
2. Performing background research, including Federal and state-by state administrative and case law review related to voting fraud and voter intimidation, and a review of current voting fraud and voter intimidation activities taking place with key government agencies, civic and advocacy organizations. A written summary of this research, and a copy of any source documentation used, will be presented to EAC.
3. Identifying, in consultation with EAC, and convening a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The working group's goals and objectives and meeting agendas will be vetted with key EAC staff.
4. Developing a project scope of work and a project work plan related to voting fraud and voter intimidation. The consultants (s) will develop a draft scope of work and project work plan for EAC's consideration based on research into the topics, the deliberations and findings of the working group, and the consultants' understanding of EAC's mission and agency objectives.
5. Authoring a report summarizing the key findings of this preliminary study of voting fraud and voter intimidation. The report will also include suggestions for specific activities that EAC may undertake to address these topics.

From this initial research and exploration of these topics the consultant (s) may be retained to help oversee follow-on research projects and contracts EAC may pursue on the topics of voting fraud and voter intimidation.

## **Special Considerations**

Work for Hire. The services performed under the terms of this agreement are considered "work for hire," and any intellectual property or deliverables, including but not limited to, research, policies, procedures, manuals, and other works submitted; or which are specified to be delivered; or which are developed or produced and paid for by EAC, shall be owned exclusively by EAC, including copyright. EAC or its assignees have the exclusive right to reproduce all work products from this agreement without further payment to the Contractor.

011309

## Terms and Conditions

The period of performance for this consulting contract is six months, with a fixed price ceiling of \$XXXXXX for labor. The consultant (s) is expected to work at least 200 hours in performing this work. The EAC estimates that the most efficient distribution of these hours would be as follows: XXXXX. The period of performance and level of effort can be revised in writing by mutual agreement of the EAC and the consultant, as required.

The Consultant is required to travel to the EAC Washington, D.C. offices on a periodic, as needed basis, throughout the duration of the contract. The Consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, other approved incidental expenses, and per diem costs while working on-site at the EAC offices. An estimated \$XXXXXX has been allocated for reimbursement for travel and other allowable expenses.

## Invoicing

Invoices may be submitted monthly in equal payments for labor. Expenses claimed for reimbursement shall be itemized with appropriate receipts provided. Invoices shall be delivered to Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005.

## Deliverables and Timetable

Deliverable	Due Date
Draft project work plan (Phase I)	ASAP after award
Progress Reports to Contracting Officer's Representative (COR)	Monthly
A written summary of background research on voting fraud and voter intimidation.	TBD
Identifying and convening a working group knowledgeable about voting fraud and voter intimidation.	TBD
Developing a project scope of work and project work plan ( Phase II)	TBD
Summary report describing key findings of this preliminary study of voting fraud and voter intimidation	TBD

Subject Finishing touches on the Statement of Work for the Voter  
Fraud/Intimidation consultants

History  This message has been replied to

All-

This morning the Commissioners approved the Statement of Work for the Voter Fraud/Voter Intimidation project consultants, with the caveat that some additional language would be added and the SOW polished up.

Tom, Peg and I are scheduled to interview the first candidate tomorrow morning at 10:00 am and will need your edits to this SOW by COB today.

I am attaching the item again, just in case you don't have a copy. Since I have an appointment out of the office and will be leaving at 4:00 today, I ask that you get your changes and edits to Nicole so that she may enter them and get the revised copy to the candidate first thing in the morning .

Thanks for your input on this.

Subject: Finalizing a Statement of Work for consultants working on a voter fraud and intimidation project

Greetings-

Tom Wilkey and I are working to schedule a series of conference calls with three consultants we have identified to work with us to help us develop the voter fraud and voter intimidation project.

We have tentatively scheduled a series of telephone interviews with these three consultants (all of whom would be hired to work on this project) for August 17, 18 and 19.

Attached you will find a draft of a Statement of Work that has been developed for these consultants. Dan Murphy's contract was used as a template for this.

I've sent this document to you all because I need your edits and corrections to this document, based on your expertise either in contracting, human resources or the subject area.

Since Tom and I will be interviewing the candidates in two weeks, I'm hoping you can react to the document and get to Tom and Nicole your changes by mid-week next week.

I will then ask Nicole to send the draft statement of work to the three candidates, so they might refer to it, prior to our interviews.

Thanks for your input and assistance.

The consultant(s) must of have knowledge of voter fraud and intimidation along with an understanding of the complexities, nuances and challenges which surround the topics. The EAC is particularly interested in candidates with experience in elections, with public policy and the law. The consultant (s) must be able to demonstrate an ability to approach the issues of voter fraud and intimidation in a balanced, nonpartisan fashion.

#### **Duties**

The consultant (s), whose contract would run for the period September-February, 2005, would be responsible for the following.

1. Performing background research, including a state-by state administrative and case law review related to voter fraud and intimidation, and a review of current voter fraud and intimidation activities taking place with key government agencies, civic and advocacy organizations. This review will be summarized and presented to the EAC.

2. Identifying and convening a working group of key individuals and organizations knowledgeable about the topics of voter fraud and intimidation. The list of working group members and the methods used to identify the groups members will be shared with EAC staff prior to the confirmation of the working group. The working group's goals and objectives and meeting agendas will be vetted with key EAC staff.
3. Developing a project scope of work and a project work plan related to voter fraud and intimidation. Based on research into the topics, the deliberations and findings of the working group, and the consultants' understanding of the EAC's mission and agency objectives, develop a draft scope of work and project work plan for the EAC's consideration.
4. Authoring a report summarizing the key findings of this preliminary study of voter fraud and intimidation. The report will also include suggestions for specific activities the EAC may undertake around these topics.

From this initial research and exploration of these topics the consultant (s) may be retained to help oversee follow-on research projects and contracts EAC may develop on the topics of voter fraud and intimidation.

### **Special Considerations**

The Consultants will be required to sign a Non-Disclosure Agreement???

The Consultants are also required to sign a Conflict of Interest declaration???

### **Terms and Conditions**

The period of performance for this consulting contract is six months, with a fixed price ceiling of \$XXXXXX for labor. The consultant (s) is expected to work at least 200 hours in performing this work. The EAC estimates that the most efficient distribution of these hours would be as follows: XXXXX. The period of performance and level of effort can be revised in writing by mutual agreement of the EAC and the consultant, as required.

Subject Your recommendations for consultants to help frame EAC's  
work on voter fraud and intimidation

Ray-

As was discussed yesterday- you will get me the names of consultants and organizations who you think will be good for us to consider employing as consultants to help us frame our work around voter fraud and intimidation.

Once I have a list of names and resumes, I will work with Tom Wilkey to come up with a recommendation of a consultant or consultants to use on this project.

Thanks for your input.

Subject Job Description for a Voter Fraud Project Consultant

Commissioners-

Attached please find a first draft of a short job description outlining EAC's expectations for a project consultant on voter fraud.

As you are aware, Julie has shared with me the resume of someone with an interest in the position. Ray has indicated that he participates in a legal list-serve group that has recently focused on voter fraud issues. This list-serve is probably a good place to "advertise" the consultant opportunity.

Let me know your thoughts on next steps. I look forward to getting this project up and running.

Regards-

**Job Description****U.S. Election Assistance Commission (EAC) Voter Fraud Project Consultant**

The U.S. Election Assistance Commission (EAC) seeks to identify a senior-level project consultant to assist with the oversight and development of a study and possible project examining U.S. election voter fraud.

The consultant must have a knowledge of voter fraud and an understanding of the complexities, nuances and challenges which surround the topic. The EAC is particularly interested in candidates with experience in elections, with public policy and the law. The consultant must be able to demonstrate an ability to approach the issue of voter fraud in a balanced, nonpartisan fashion.

This consultant, whose contract would run for the period June-November, 2005, would be responsible for conceptualizing a project scope of work around the issue and from that, developing a statement of work for a research project around the topic.

In consultation with EAC staff, EAC Commissioners, and other key EAC stakeholders, the consultant will develop a project plan around voter fraud. The consultant will recommend certain EAC project activities related to voter fraud and will develop a scope of work for an EAC research study on voter fraud. The consultant will oversee and manage various processes related to EAC contracts awarded for work related to voter fraud.

EAC's consultant fees are competitive and are awarded based on the candidates' relevant background and experience.

Julie:

I reviewed our materials and refreshed my memory. The DOJ issues appear to be the only potential pitfalls in the consultants' interview summaries. The only other issue that arose during the course of the work was Secretary Rokita's objection to EAC doing the research. I think you have taken care of that in your paper. --- Peggy

Thanks for your comments.

Last night, I took the case charts and assembled into one 200 -page document. So, that is compiled. I have also amended to include Job and Tova's bios as appendix "1". I have established both your summaries and theirs into alternative appendixes and will talk to the commissioners about that. One question that I have is whether we would need to go through and "clean up" their summaries? I have compiled them into a single document (that is one for interviews and one for literature). Other than the

Subject Re: Voting Fraud-Voter Intimidation Report 

I would hope that we can refer to it as a status report on the research project (prepared by EAC staff based upon information available at the time from our consultants, Tova and Job). Calling it a preliminary report has given rise to some confusion. That confusion has led to complaints from project working group members and requests from outsiders, who mistakenly think that EAC has released the document written by our consultant that fully reports on the preliminary research into voting fraud and voter intimidation and makes recommendations for future EAC action. --- Peggy

Mr. Chairman,

Will Lester of the Associated Press wants to interview you briefly via phone about the preliminary fraud report. I recommend you accomodate him, as he has dutifully covered EAC, and plans to include us in a story next week about the election lanscape. He has requested a copy of the preliminary report, which I am sending to him. He only needs a few minutes, and as we discussed, i think the message is that these are preliminary findings that we presented to our advisory boards to get their input. When the final report is

011326

complete, we will release it. You can also use some of the talking pts from your speech, such as the challenge related to the very definition of the term "fraud," as people define it differently. How about I set it up for noon?

The only question he asked that I don't know the answer to is when we expect the final report. Peg... please weigh in on this.

## INTRODUCTION

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that the agency make research on these matters a high priority.

## FOCUS OF CURRENT RESEARCH

In September 2005, the Commission hired two consultants with expertise in this subject matter, Job Serebrov and Tova Wang, to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

As of the date of this report, the consultants have drafted a definition of election fraud, reviewed relevant literature and reports, interviewed persons from government and private sectors with subject matter expertise, analyzed news reports of alleged election fraud, reviewed case law, and established a project working group.

## DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud) and voter registration fraud, but excludes campaign finance violations and election administration mistakes. This draft will be discussed and probably refined by the project working group, which is scheduled to convene on May 18, 2006.

## LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". The consultants found that books written about this subject all seem to have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, the consultants found that reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections".

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate; but some reports say it is a major problem, albeit hard to identify.

- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

### **Recommendations**

The consultants recommend that subsequent EAC research include a follow up study of allegations made in reports, books and newspaper articles. They also suggest that the research should focus on filling the gap between the lack of reports based on methodical studies by social or political scientists and the numerous, but less scientific, reports published by advocacy groups.

### **INTERVIEWS**

The consultants jointly selected experts from the public and private sector for interviews. The consultants' analysis of their discussions with these members of the legal, election official, advocacy, and academic communities follows.

### **Common Themes**

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud,

although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.

- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate that, for various reasons, DOJ is bringing fewer voter intimidation and suppression cases now, and has increased its focus on matters such as noncitizen voting, double voting, and felon voting. Interviews with DOJ personnel indicate that the Voting Section, Civil Rights Division, focuses on systemic patterns of malfeasance in this area. While the Election Crimes Branch, Public Integrity Section, continues to maintain an aggressive pursuit of systematic schemes to corrupt the electoral process (including voter suppression), it also has increased prosecutions of individual instances of felon, alien, and double voting.
- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

#### **Common Recommendations:**

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed.
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.

- With respect to DOJ's Voting Section, Civil Rights Division, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and his office has not pursued any such cases.
- Craig Donsanto of DOJ's Election Crimes Branch, Public Integrity Section, says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases DOJ is investigating and the number of indictments his office is pursuing are both up dramatically. Since 2002, in addition to pursuing systematic election corruption schemes, DOJ has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so that his agency can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.
- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment.
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected as non partisan officials, they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas are a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.

- A few recommend returning to allowing use of absentee ballots “for cause” only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the proposal in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

## **NEWS ARTICLES**

Consultants conducted a Nexis search of related news articles published between January 1, 2001 and January 1, 2006. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview of these articles provided by the consultants.

### **Absentee Ballots**

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

## **Voter Registration Fraud**

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota, and Wisconsin.

## **Voter Intimidation and Suppression**

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;

- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio, and Pennsylvania.

### **“Dead Voters and Multiple Voting”**

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found five such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

### **Vote Buying**

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations concentrated in three states (Illinois, Kentucky, and West Virginia). There were more official investigations, indictments and convictions/pleas in this area.

### **Deceptive Practices**

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of completed voter registration applications. There were no reports of prosecutions or any other legal proceeding.

### **Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case, charges were filed against ten individuals. In another case, a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

### **Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem was the large number of ineligible felons that remained on the voting list.

### **Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one

instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

### **Recommendation**

The consultants recommend that subsequent EAC research should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

## **CASE LAW RESEARCH**

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, the consultants found comparatively few applicable to this study. Of those that were applicable, the consultants found that no apparent thematic pattern emerges. However, it appears to them that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

### **Recommendation**

Because so few cases provided a picture of these current problems, consultants suggest that subsequent EAC research include a review of state trial-level decisions.

## **PROJECT WORKING GROUP**

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.) The working group is scheduled to convene at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

## **FINAL REPORT**

After convening the project working group, the consultants will draft a final report summarizing the results of their research and the working group deliberations. This report will include recommendations for future EAC research related to this subject matter. The draft report will be reviewed by EAC and, after obtaining any clarifications or corrections deemed necessary, will be made available to the EAC Standards Board and EAC Board of Advisors for review and comment. Following this, a final report will be prepared.

Subject Last Submission from Vote Fraud-Voter Intimidation  
Consultants

Dear Mr. Chairman:

The last submission from the Vote Fraud-Voter Intimidation Study consultants is dated August 8. At this time, EAC staff are reviewing all items submitted for the report to the Commission with an eye toward the best way of presenting the information to the Commissioners for their consideration. There has been some delay in this staff review process, for which I take full responsibility.

Subject Re: Definition of Voting Fraud and Voter Intimidation 

Peggy,

Per our discussion, I have some initial concerns regarding the definitions that have been proposed.

1. Fraud is a legal term of art. Fraud is an intentional act or omission (i.e. actual fraud or constructive fraud) of misrepresentation or deceit. There is no such thing as defacto fraud or quasi fraud. Fraud must be intentional.... negligence alone is not fraud.

The general definition of voter fraud must concise and universally applicable (this in the challenging part). After this definition is created and intellectually tested, one can then create examples and explanations. These would 1) apply the definition to the entire election process (from beginning to end) and (2) apply it to action by voters, 3rd parties and election officials. Through this process a determination may be made regarding whether three definitions are needed or just one.

2. The document has no definition of voter intimidation. What is voter intimidation and how does it differ from voter fraud? I assume this would also be an intentional act.

3. Definitions need to be concise and tight. Such definitions need to be able to be broken down into elements. Each of these elements must have clear, applicable and enforceable meaning. This can be a challenge. For example use of the term "any illegal act" is unclear, begs the question and suggests that fraud only occurs in the course of committing a related crime.

These are just my initial thoughts.

## **Deliberative Process Privilege**

“Fraud” should be defined as any illegal act that has a clear and direct distorting impact on the election results. It includes adding illegal votes and tampering with vote counts as well as actions such as voter intimidation and deceptive practices that serve to subtract legal votes. Illegally keeping certain voters from voting has the same distorting effect on election outcomes as ineligible voters casting ballots or some form of modern ballot box stuffing. Fraud may involve wrongdoing by individual voters, election workers or organized groups such as campaigns or political parties.

Vote fraud usually breaks down into three categories---intentional fraud, de facto fraud, and quasi-fraud. Research and investigation of fraud should focus on those forms of fraud that are known to have had true impacts on election outcomes.

"Intentional fraud" includes acts that are intentionally planned. Such forms of fraud include the following:

- Absentee/mail ballot fraud, e.g. coercing another voter's choice, use of a false or other voter's name and signature, destruction or misappropriation of an absentee or mail-in ballot
- Ex-felons knowingly and willingly casting illegal ballots
- Knowingly and willingly misleading an ex-felon about his or her right to vote
- Voting more than once
- Noncitizen voting
- Intimidating practices e.g. intimidating signs, inappropriate police presence, abusive/threatening treatment by poll workers or others that deter voters from voting
- Deceptive practices e.g. providing false information to voters about the voting process, such as when and/or where to vote, who is eligible to vote
- Fraud by election administrators in the handling or counting of ballots, misrepresentation of vote tallies
- Vote buying
- Addition or destruction of cast ballots by elections officials
- Intentional wrongful removal of eligible voters from voter registration lists
- Knowingly falsifying registration information pertinent to eligibility to cast a vote, e.g. residence, criminal status, etc.

The second type of fraud is de facto fraud. This occurs when the intent to commit fraud is lacking, but the party or parties' actions results in fraud nonetheless. De facto fraud more often is a result of a misapplication of election statutes or the application of a long established practice or tradition in a way that contradicts the intent of the statute. Examples of de facto fraud include the abusive use of challengers to voter registrations or to voters' eligibility at the polls and wrongful purging of voter lists.

The last form of fraud, "quasi-fraud," is the most difficult to classify as such because the correct law (case law or legislative act) is applied but the result is to deprive voters of their electoral rights. This type of fraud is also the most difficult to catch because it requires both legal electoral expertise and almost always occurs on the day of the election. One example of this is Arkansas supreme court case law making election

statutes mandatory before an election but discretionary after. The discretion is left up to the county board of election commissioners. These are not elected but are either the chairs of the two main political parties or a person elected by the county central committee should the chair decide not to serve. The result is that election statutes are never enforced after the election. It therefore permits past patterns of fraud to persist.

Two areas that are of major concern but do not come within the purview of fraud for the purposes of this type of research are registration forms in the name of another or fake person(s), which from the evidence do not usually result in illegal votes; and electronic vote machine tampering, for which there is as of now no definitive evidence has taken place in a U.S. election.

It sounds similar to the issues I had with the Donsanto interview. It was a classic example of the interviewers' interpreting what was said through their own biases.

It also is true that the original interview summaries failed to differentiate between the criminal definition of intimidation and the consultants use of the term.. The consultants have revised their definition to note that it goes beyond the legal definition, but we may need to repeat the statement where the DOJ interviews are referenced.

I have already brought the Donsanto matter to our contractors' attention. When they responded that they did not think they should redraft that section, I told them that the section will likely be edited. It appears that we will have to do the same with the reference to Tanner's interview.

Why don't we discuss this with Tanner (and Donsanto) after we have had a chance to review a

011346

consolidated draft of the final report? We can determine what clarifications or corrections are necessary at that time.

Subject Re: Fraud and Intimidation Study

I have not yet seen a draft final report. My best guess is that Tanner is concerned about the summary of his interview. I have already had discussions with our consultants about the description of the Donsanto interview, at which I was present. Wilkey knows that I won't let it go as is. I wasn't at the Tanner interview, but would be interested in hearing where he thinks the consultants went wrong.

It is possible that, due to my objections re the Donsanto interview, the consultants may have asked Tanner to review their description of his interview. I won't know for sure until I can contact them.

I gave you and Gavin a folder that included a summary of interviews, etc before the working group meeting. Also, the report delivered to the boards on this project is in the shared drawer under Research in Progress-Voting Fraud-Intimidation. That is everything I have at the moment.

Subject Voting Fraud-Voter Intimidation Project Briefing

Dear Commissioners:

Attached is our consultants' analysis of the literature reviewed for the Voting Fraud-Voter Intimidation preliminary research project. It was not included in the information packets delivered to you on Friday, May 12, because we did not receive it until today. I thought you might be interested in having it. prior to tomorrow's briefing.

Peggy Sims  
Election Research Specialist

Literature-Report Review Summary.doc

011349

## Existing Research Analysis

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the “second phase” of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund’s frequently cited book. Again, this is something that it is hoped will be addressed in the “second phase” of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.
- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.

- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

Subject Extension Needed for Voting Fraud/Voter Intimidation Project  
Consultants

The estimated additional hours needed to bring the Voting Fraud/Voter Intimidation Project to a logical stopping point (without requiring a draft statement of work for any future RFPs on the topic) are:

**Expert Interviews:**

3 hours of scheduling

17 hours conducting the interviews

15 hours summarizing and analyzing the interviews

Subtotal: 35 hours

Nexis research, organization of research, summary of research (Tova): 180 hours

Lexis research, organization of research, summary of research (Job): 180 hours

Subtotal: 360 hours

Working Group preparation and meeting time: 20 hours

Final Report: 45 hours

Grand Total: 460

The sooner we find out if the Commissioners will accept this extension, the better. If the extension (or new contract for 3 additional months) is not accepted, we have to figure out what can be done in the limited time remaining. --- Peggy

**Subject:** RESPONSE REQUESTED-Working Group for Voting Fraud and Voter  
Intimidation Project

Dear Commissioners:

The consultants' contracts for EAC's voting fraud and voter intimidation project require Tova Wang and Job Serebrov to work in consultation with EAC staff and the Commissioners "to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation". The contracts do not specify the number of working group members but, as EAC has to pay for the group's travel and we want the size of the group to be manageable, I recommend that we limit the number to 6 or 8. Please let me know if you think that this limit is too conservative .

Attached for your review and comment are two lists of potential working group members for this project. One list was submitted by Job, the other by Tova. Tova and Job have provided brief summaries of each candidate's relevant experience and have placed asterisks next to the names of the individuals whom they particularly recommend. I can provide more extensive biographies of these individuals, if you need them. If EAC agrees that the recommended working group members are acceptable, an equal number may be selected from each list in order to maintain a balanced perspective.

Absent from the attached lists is the name of a representative from the U.S. Department of Justice's Election Crimes Branch. At this time, I am working through the DOJ bureaucracy to determine to what degree Craig Donsanto will be permitted to participate. If he cannot be named as a working group member, we may still be able to use him as a resource.

Please provide your feedback to me no later than Monday , November 28. I am available to meet with you if you would like to discuss this matter further.

**Possible Working Group Members - Serebrov**

I recommend the first four with an \*

\***Mark (Thor) Hearne II**-Counsel to Republican National Committee; National Counsel to American Center for Voting Rights; National election counsel to Bush-Cheney, '04; Testified before U.S. House Administration Committee hearings into conduct of Ohio presidential election; Academic Advisor to Commission on Federal Election Reform (Baker-Carter Commission).

\***Todd Rokita**-Secretary of State, Indiana; Secretary Rokita strives to reform Indiana's election practices to ensure Indiana's elections are as fair, accurate and accessible as possible; Secretary Rokita serves on the nine-member Executive Board of the Election Assistance Commission Standards Board, charged by federal law to address election reform issues.

\***Patrick J. Rogers**-Partner/Shareholder, Modrall, Sperling, Roehl, Harris and Sisk, P.A., Albuquerque, New Mexico; 1991-2003 General Counsel to the New Mexico Republican Party; Election cases: *The Coalition to Expose Ballot Deception, et al v. Judy N. Chavez, et al*; Second Judicial District Court of Bernalillo County, New Mexico (2005); represented plaintiffs challenging petition procedures; *Miguel Gomez v. Ken Sanchez and Judy Chaves*; Second Judicial District Court of Bernalillo County, New Mexico (2005); residency challenge; *Moises Griego, et al v. Rebecca Vigil-Giron v. Ralph Nader and Peter Miguel Camejo*, Supreme Court for the State of New Mexico (2004); represented Ralph Nader and Peter Camejo, ballot access issues; *Larry Larrañaga, et al v. Mary E. Herrera and Rebecca Vigil-Giron*, Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *Decker, et al v. Kunko, et al*; District Court of Chaves County, New Mexico (2004); voter identification and fraudulent registration issues; *Kunko, et al v. Decker, et al*; Supreme Court of New Mexico (2004); voter identification and fraudulent registration issues; *In the Matter of the Security of Ballots Cast in Bernalillo County in the 2000 General Election*; Second Judicial District Court of Bernalillo County, New Mexico (2000); voting and counting irregularities and fraud.

\***David A. Norcross**- Partner, Blank Rome LLP, Trenton NJ, Washington D.C.; Chairman, New Jersey Republican State Committee, 1977 – 1981; General Counsel, Republican National Committee, 1993 – 1997; General Counsel, International Republican Institute; Counsel, The Center for Democracy; Vice Chairman, Commission on Presidential Debates; Executive Director, New Jersey Election Law Enforcement Commission

**Benjamin L. Ginsberg**-Served as national counsel to the Bush-Cheney presidential campaign; He played a central role in the 2000 Florida recount; He also represents the campaigns and leadership PACs of numerous members of the Senate and House, as well as the Republican National Committee, National Republican Senatorial Committee and

National Republican Congressional Committee; His expertise is more in campaign finance.

**Cleta Mitchell**-Partner in the Washington, D.C. office of Foley & Lardner LLP; She advises corporations, nonprofit organizations, candidates, campaigns, and individuals on state and federal election and campaign finance law, and compliance issues related to lobbying, ethics and financial disclosure; Ms. Mitchell practices before the Federal Election Commission and similar federal and state enforcement agencies; Her expertise is more in campaign finance law.

**Mark Braden**-Of counsel at Baker & Hostetler; He concentrates his work principally on election law and governmental affairs, including work with Congress, the Federal Election Commission, state campaign finance agencies, public integrity issues, political broadcast regulation, contests, recounts, the Voting Rights Act, initiatives, referendums and redistricting; His expertise is mainly outside of the voter fraud area.

**Deliberative Process  
Privilege**

Re: Working Group Recommendations  
Date: November 12, 2005

\*Wendy R. Weiser, Associate Counsel in the Democracy Program at the Brennan Center for Justice at NYU School of Law and an expert in federal and constitutional law, has done a great deal of research, writing, speaking, and litigating on voting rights and election law issues. As part of the Brennan Center's wide ranging activities in the area of democracy, Ms. Weiser is currently overseeing an analysis and investigation of recent allegations of voter fraud throughout the country.

\*Barbara Arnwine is Executive Director of the Lawyers Committee for Civil Rights Under Law, an organization that for four decades has been at the forefront of the legal struggle to secure racial justice and equal access to the electoral process for all voters. Notably, Ms. Arnwine and the organization have led the Election Protection program for the last several years, a nationwide grassroots education and legal effort deploying thousands of volunteers and using a nationally recognized voter hotline to protect voters' rights on election day.

\*Daniel Tokaji, professor and associate director of the Election Law Center at the Moritz College of Law at the Ohio State University, is one of the nation's foremost experts in election law and reform and ensuring equality in the voting system. Professor Tokaji frequently writes and speaks on democracy related issues at academic and practitioner conferences, on such issues as voting technology, fraud, registration, and identification requirements, as well as the interplay between the election administration practices and voting rights laws.

Donna Brazile is Chair of the Democratic National Committee's Voting Rights Institute, the Democratic Party's major initiative to promote and protect the right to vote created in response to the irregularities of the 2000 election, and former Campaign Manager for Gore-Lieberman 2000 (the first African American to lead a major presidential campaign.) Brazile is a weekly contributor and political commentator on CNN's Inside Politics and American Morning, a columnist for Roll Call Newspaper and a contributing writer for Ms. Magazine.

Wade Henderson is the Executive Director of the Leadership Conference on Civil Rights (LCCR) and Counsel to the Leadership Conference on Civil Rights Education Fund (LCCREF), an organization at the forefront of defending voting rights for the last fifty years. Prior to his role with the Leadership Conference, Mr. Henderson was the Washington Bureau Director of the National Association for the Advancement of Colored People (NAACP)

Robert Bauer is the Chair of the Political Law Practice at the law firm of Perkins Coie, National Counsel for Voter Protection, Democratic National Committee, Counsel to the Democratic Senatorial and Congressional Campaign Committees and Co-Author, Report

of Counsel to the Senate Rules and Administration Committee in the Matter of the United States Senate Seat from Louisiana in the 105<sup>th</sup> Congress of the United States, (March 27, 1997). He is the author of *United States Federal Election Law*, and one of the foremost attorneys in the country in the area of federal/state campaign finance and election laws.

Laughlin McDonald has been the executive director of the Southern Regional Office of the ACLU since 1972 and as the Director of the ACLU Voting Rights Project, McDonald has played a leading role eradicating discriminatory election practices and protecting the gains in political participation won by racial minorities since passage of the 1965 federal Voting Rights Act. During the past two decades, McDonald has broken new ground by expanding ACLU voting rights cases to include representation of Native Americans in various western states, and written innumerable publications on voting rights issues.

Joseph E. Sandler is a member of the firm of Sandler, Reiff & Young, P.C., in Washington, D.C., concentrating in campaign finance and election law matters, and general counsel to the Democratic National Committee. As an attorney he has handled campaign finance and election law matters for Democratic national and state party organizations, Members of Congress, candidates and campaigns. He served as general co-counsel of the Association of State Democratic Chairs, as general counsel for the Democratic Governors' Association and as counsel to several state Democratic parties.

Cathy Cox is serving her second term as Georgia's Secretary of State, having first been elected in 1998. In 2002 she earned re-election with over 61 percent of the vote, winning 146 out of 159 counties. Because of Secretary Cox's efforts Georgia has become a national leader in election reform. Her initiative made Georgia the first state in America to deploy a modern, uniform electronic voting system in every county

**Subject:** Eagleton

In his note regarding the Eagleton contract, Hans has raised some of the same concerns I raised from the beginning of any discussions I had regarding this contract with our staff, and at our first formal meeting with Eagleton. In reviewing their work product from time to time, I continue to have concerns about a lack of balanced input and have repeatedly voiced them with staff and with Eagleton. I did this when the initial peer review group was proposed and again during their presentation at our meeting in Pasadena (the outreach slide in their public presentation showed outreach to seven groups, of which only one could be considered conservative-leaning). Now, as I have just had the opportunity to read their July progress report, it appears that Eagleton seems to be going into a larger analysis of the voter fraud issue than was authorized in the contract. My suspicion is that Dan Tokaji is injecting his views into this to dismiss or diminish the concerns some people may have about voter fraud. I could be wrong, but his previous writings lead me to believe otherwise.

I only found one mention of voter fraud in the contract with Eagleton. It is in Section 3.5 regarding provisional voting, where it discusses "minimizing opportunity for voter fraud." Yet, on page 4 of the July progress report from Eagleton, in describing their work plan for the next month it states: "we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms." This clearly seems to be going beyond the mandate we gave them as I thought they were going to be looking at voter fraud relating to provisional voting (as the contract calls for), not voter fraud as it relates to election reforms. While voter fraud was never mentioned in the contract regarding the voter ID issue, page 5 of their July report indicates that their narratives "will include an appraisal of the prevalence and nature of vote fraud." In addition to this, page 6 describes a look into the "relationship between voter ID regime and vote fraud."

Voter fraud is clearly an issue that is perceived differently from the Right and from the Left. I have struggled with determining what a clear definition of voter fraud is myself, and therefore want to obtain various perspectives and good analysis on this issue before I formulate a solid conclusion in my mind. It has been my understanding all along that the whole voter fraud/voter intimidation issue is going to be studied by the EAC using a balanced group of consultants--not Eagleton and Moritz, who are likely to focus on just on the number of prosecutions of voter fraud, rather than the complaints made or the fact that many election officials are frustrated that some prosecutors don't take their complaints about voter fraud seriously. I am not convinced at this point that we will get a balanced and objective study from Eagleton/Moritz on voter fraud. I am puzzled on why they seem to be expending a significant portion of their time on this and would want to know if we somehow authorized them to do more research into the voter fraud issue.

On page 7 of their July report Eagleton indicates that communications with the EAC on the Peer Review

011363

Group "were not clear or timely." I would like to know what this refers to. Also, I may have missed it, but I do not recall seeing the final list of who is serving as the Peer Review group.

The August 15th copy of the July report that I received from Karen did not include the attachment of the financial report of expenses incurred. I would like to see that attachment.

Outside of our NIST work, this contract represents our largest single outside expenditure of our operational funds. Any single expenditure of \$500,000+ needs to be closely monitored. I, for one, am not going to sign off on any report that appears to have been written from a biased viewpoint, especially one that doesn't appear to be interested in hearing from conservative organizations or right-leaning researchers, or seems to minimize any input from them. I've already had questions from congressional staff and others on why we picked Eagleton and Moritz, as they are perceived by some as biased against Republicans. I assured the critics that we have insisted all along on an objective study from Eagleton. An unbalanced or biased study from them will not only hurt my credibility, but also that of the EAC. I'm not suggesting that we stop their work, but I do want Tom and Julie to inform them in no uncertain terms that we will not accept a report that does not seriously consider all viewpoints on provisional voting and the voter ID issue, and that any study or interpretations they present to us reflect a diversity of opinions on these subjects. We also need for staff to determine whether their considerable work into the voter fraud area is authorized in the contract. We should not be paying for and receiving work we did not authorize.

The contract clearly calls for "alternative approaches" on voter ID requirements and "alternatives" on provisional voting. I agreed to support this contract to Eagleton because I was assured that we would receive a variety of approaches from their work, and not just those from a liberal perspective.

Subject Eagleton Institute of Politics - July 2005 - Monthly Progress  
Report

Ms. Dyson,

Attached please find the July 2005 Progress Report for the project entitled, "Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures." If you have any questions regarding any part of this document please contact Tom O'Neill at: [redacted] or [redacted]

The financial reporting for this project is performed by the Division of Grant and Contract Accounting at Rutgers University. A copy of this report was not made available to us in an electronic format. Hard copies of the Progress Report and Financial Report have been Fedex'ed to you this afternoon and should arrive to your attention tomorrow morning. Please let me know if you do not receive this package by tomorrow afternoon.

Thank you for your time, have a great evening.

Best,  
Lauren Vincelli

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.4
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from July 1 through July 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

The effort this month continued to focus on research for the analysis and alternatives paper, including the compilation of Provisional Voting statutes, regulations, and litigation from the 50 states. We also prepared and delivered testimony at the EAC's regular monthly meeting in Pasadena on July 28.

The data collection, analysis, and compilation are all on schedule. Because of delays in agreeing on the composition of the Peer Review Group with EAC, however, the actual completion and submission of the analysis and alternatives paper to the EAC will most likely be delayed about a week beyond the target date in the work plan. We are scheduled to discuss the draft paper and guidance document prior to submission, with the EAC on September 6, and the final draft cannot be completed until several days after that date.

The document report is divided into 4 sections that cover: Provisional Voting, Voter Identification Requirements, Project Management, and the Financial Report. Each section references the specific tasks described in paragraph 3 of the contract.

Please direct any questions or comments about this report to Tom O'Neill at: tom\_oneill@verizon.net or (908) 794-1030.

## **PROVISIONAL VOTING**

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed this month.

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

### **LEGISLATION, REGULATIONS, AND LITIGATION**

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It also will provide a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team has created a 50-state chart to summarize information on provisional voting, compiled statutes, case law and administrative procedures regarding Provisional Voting.

**Progress:** The 50-state (plus District of Columbia) chart created to collect data on provisional voting is complete. We have collected the statutes for all states. State by state summaries of provisional voting have been written for 47 states and D.C. A memorandum summarizing provisional voting litigation is complete. The collection of the documents associated with the litigation is nearing completion.

**Challenges:** The variety in the form of provisional voting legislation from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** The remaining 3 state summaries of provisional voting will be completed by August 8. Analysis of all the information, data, and survey results concerning provisional voting data will be performed in August.

### **PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING**

The Eagleton team has researched and compiled a narrative of each state's experience with provisional voting in 2004. At the end of July the survey of 400 local election officials was nearing its end, and – as of this writing – is now complete with an analysis and report in draft form. We will rely on the survey results to improve our understanding of actual practice in administering provisional voting, including the steps local officials took to prepare for the election.

### PROVISIONAL VOTING NARRATIVES

**Description:** To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with provisional voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

**Progress:** The state-by-state database is complete, as is a first draft of all state narratives. This work has been shared with the larger team and is being reviewed currently in preparation for constructing analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

**Work Plan:** In the next month, revisions of the narratives will be complete. In addition to this research, we will expand upon vote fraud research and examine further the relationship between instances of vote fraud and ensuing election reforms.

### SURVEY OF COUNTY ELECTION OFFICIALS

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton conducted a national survey of county election officials to measure several aspects of provisional voting. The survey was designed to determine the following factors related to provisional voting at the county (or equivalent election jurisdiction) level:

- The content and quality of instructions provided to county officials by the states;
- The steps taken by county officials to pass information on to poll workers;
- Differences in experience between states new to provisional voting and those that had some form of provisional ballot before HAVA; and
- Recommendations to improve and/or reduce the need for provisional voting.

**Progress:** The fielding and initial analysis of the survey results are complete.

**Work Plan:** The information derived from the survey will be considered in drafting the analysis and alternatives document required under Task 3.5.

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. During the reporting period, we have completed tasks 3.10 and 3.11. The research on Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

**Progress:** The chart created to collect data on voter identification is complete and is now being reviewed. Voter identification statutes are being collected.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Work Plan:** Review of the voter identification chart, the collection of the voter identification statutes, and the writing of the state by state summaries will be completed by the end of August.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of voter ID requirements. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern with more rigorous identification requirements for all voters. We are following these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern

with increasing the rigor of voter ID requirements. The next key milestones will be the completion of the state database and drafting the first narratives.

### VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

**Progress:** The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. It also contains exit poll data from the 50 states, providing demographic data of voter turnout. The analysis of that data is well underway.

**Challenges:** The initial methodology that was devised to investigate the questions involved in this part of the study proved insufficient, as the necessary data was unobtainable (the Census Bureau has not yet released their 2004 data). After re-developing an appropriate methodology, the necessary data has been assembled, we have resumed the analysis of this data.

**Projection:** The analysis of the impact that voter identification requirements have upon voter turnout should be completed around mid-August.

### **Task 3.11 Public meeting on Voter Identification Requirements**

**Description:** In early July, we continued our efforts to identify specific Voter ID topics or issues and panelists who could shed light on them. We recommended a focus on the debate over Voter ID now underway in the states. To provide a vivid picture of the debate, we recommended that one panel include specific legislators on opposite sides of the issue from two different states, Mississippi and Wisconsin. We also discussed adding a researcher to the panel in order to place the debate in a national or historical context. We also recommended a panel of two academic researchers with contrasting points of view, to address the effects of Voter ID provisions under HAVA. In response to our suggestions, EAC staff recommended a panel of two state election directors to address the interaction of Voter ID with HAVA.

By mid-July, the EAC had decided which topics and speakers should be invited, however most of those speakers proved unable to attend.

**Progress:** Tom O'Neill and Dan Tokaji attended the EAC Public Meeting held in Pasadena on July 28. Their presentations at the meeting described the progress of the research and our developing perspective on how to assess the quality of the provisional voting process in the states and identify possible steps for improvement.

**Challenges:** The changes in the scheduling of the July meeting delayed and ultimately made it impossible to assemble a panel, from which we could derive substantive insight into voter identification issues as they are playing out in the states. Additionally, due to the date of the hearing, the information from the hearing was not available as early in the research process as contemplated in the contract.

**Projection:** Preparation of the hearing summary will likely be delayed, due to the team's focus on preparation of the analysis and alternatives paper.

## PROJECT MANAGEMENT

### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The EAC indicated at our first meeting in May that it would review our recommendations for members of the PRG. Our initial vision of the PRG was a small group of scholars and representatives of advocacy organizations that would comment on the research design, review drafts of our analyses and reports, and, in general, identify areas of the research that should be strengthened and help us improve the breadth, depth and clarity of reports based on that research.

**Progress:** Upon reflection, the project team agreed that the PRG should not include representatives of advocacy groups. We concluded that as representatives they would feel obligated to act as advocates for positions already taken by their groups. While advocacy organizations might be consulted as stakeholders during the course of our work, they were unlikely to achieve the goals we had in mind for the PRG as a source of advice on research design, methodology, and analysis. We submitted a revised list of potential members, substantially comprised of academics, to the EAC for review.

The EAC responded with suggestions concerning both the balance of the PRG's membership and the creation of additional committees to review our work. We provided an analysis of the cost and time involved in adopting the EAC's suggestions as well as with suggestions for a balanced selection of academics for the Peer Review Group. In the end, the EAC determined that Eagleton should appoint a balanced Peer Review Group of its own choosing. Initial phone calls were made to all members of that group by the end of July, and written invitations and descriptions of the process have gone to all possible members who had indicated their interest in serving.

**Challenges:** Communications on this issue with the EAC were not clear or timely. The purpose of the PRG is to review our work, and to comment on our research design, which is well underway. We had planned to have the PRG in place early enough in the project to enable them to provide feedback, including the research design. While we are

confident in the quality of our work, the experience and perspective of the Peer Review Group will strengthen our analysis and recommendations as we find a way to receive its critique in the more limited time now available. The delay in creating the Peer Review Group will result in a delay in the completion of the final draft of the analysis and alternatives paper and in the preliminary guidance document.

**Projections:** The work of the PRG will be about 2 weeks behind the milestones indicated in the work plan.

### **COORDINATION AND INFORMATION MANAGEMENT**

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

#### **INFORMATION SYSTEM**

**Description:** The statutory data and reports prepared by the Moritz College of Law will be merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

**Progress:** The Moritz team has provided Eagleton staff with all completed work. An Eagleton staff member reviews the content and formats of data from all supporting research and will (re-)format once the work has been completed for the compendium and reports submitted to the EAC. The researchers and staff at Eagleton have created a shared folder on the Institute's server for the safe storage of work and access for those staff members. All of this work is being reviewed by the project team to ensure that a broad survey is being performed.

**Projections:** By the end of July 2005, much of the above referenced research has been completed. The entire project team has begun the process of reviewing all work, and will combine and format all documents and materials in preparation for our final reporting to the EAC.

#### **INTRANET**

**Description:** All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

**Progress:** Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has been extremely helpful to team members and serves as an internal website with announcements and important documents readily available to all team members.

## FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project inception through June 30, 2005, is attached.

Subject Eagleton Institute June 2005 Progress Report

Ms. Dyson,

Attached please find the June 2005 Progress Report for the project entitled, "Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures." If you have any questions regarding any part of this document please direct them to Tom O'Neill at: [Redacted] (908)794-1030.

The financial reporting for this project is performed by the Division of Grant and Contract Accounting at Rutgers University. A copy of this report was not made available to us in an electronic format. Hard copies of the Progress Report and Financial Report have been Fedex'ed to you this afternoon and should arrive to your attention tomorrow morning. Please let me know if you do not receive this package by tomorrow afternoon.

Thank you for your time, have a great evening.

Best,  
Lauren Vincelli

## OUTLINE

- Introduction
- Provisional Voting
  - Task 3.4
- Voter Identification Requirements
  - Task 3.10
  - Task 3.11
- Project Management
  - Task 3.1
- Financial Report

## INTRODUCTION

This report describes our progress from the start of the project on May 26 through June 30, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

The objective of the contract is to assist the EAC in the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements on which to base policy recommendations as guidance for the states in the conduct of the 2006 elections. The work has begun well, thanks to the clarity of the EAC's expectations and the strong collaboration by the scholars and staff at the Eagleton Institute of Politics at Rutgers, The State University of New Jersey, and the Moritz College of Law at the Ohio State University.

The document report is divided into 4 sections that cover: Provisional Voting, Voter Identification Requirements, Project Management, and the Financial Report. Each section references the specific tasks described in paragraph 3 of the contract.

Please direct any questions or comments about this report to Tom O'Neill at: [tom\\_oneill@verizon.net](mailto:tom_oneill@verizon.net) or (908) 794-1030.

## PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. The work plan provides for two months to complete Task 3.4. Work on this task is on schedule.

**Task 3.4: Collect and analyze state legislation, administrative procedures, and court cases. Understand the disparities and similarities of how provisional voting was implemented around the country.**

### LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task. It also will provide a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

**Description:** The Moritz team includes faculty, an executive administrator, a reference librarian, and several research assistants. It began immediately to compile statutes, case law and administrative procedures regarding Provisional Voting. The team has created a 50 state chart to summarize information on provisional voting. Categories for which state statutes and administrative procedures are being reviewed include:

- *When did the state create a system compliant with the HAVA provisional ballot requirements?*
- *Who may be eligible to cast a provisional ballot? and*
- *What is the process for discovering whether your provisional ballot was counted in the election?*

**Progress:** Initial research for 27 states, including the collection of provisional voting statutes is complete. This phase of the work is on schedule for completion by August 1. By the beginning of the week of July 11, Moritz's full time research assistant will move from voter identification research to gathering and organizing case law on provisional voting.

**Challenges:** Identifying the relevant statutes has been challenging; states use different terminology to codify provisional voting issues. Many states have scattered election law provisions throughout their codes. This variation from state to state makes creating a snapshot view across states a challenge. The team is meeting this challenge, and the work is on schedule.

### PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team is constructing a narrative description for each state of the 50 states and the District of Columbia. It is also surveying a stratified random sample of county election officials to improve its understanding of actual practice in administering provisional voting.

**Description:** To construct the narratives, a researcher is examining newspaper accounts, state websites, and reports from third-party organizations to determine what information is publicly available about these issues during the 2004 election. To organize the information derived from this examination, we are creating an information system that will make it possible to catalog the basic information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combine it with Moritz's collection and analysis of statutes, regulations and litigation. The information system will make it possible to provide answers to such topics of particular interest listed in the contract as: "How did preparation for provisional voting vary between states that had some form of provisional voting and those that did not?" and "How did litigation affect implementation?"

**Progress:** The researcher in this area has identified sources of information for every state and the collection process is well underway. Verified database entries for 24 states are complete, as are two state narrative summaries. This phase of the research is on schedule for completion by the end of July.

**Challenges:** A key challenge is determining just what states actually did in practice to verify and count provisional ballots. A second challenge has been determining the variations in policy within individual states. We are still wrestling with resolving this challenge, but the work is on schedule.

**Work Plan:** By the end of the July, the compilation of statutes, administrative regulations, and litigation will be complete and ready to be combined with the state-by-state narrative compiled by Eagleton. That will form the basis for the analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

### SURVEY OF COUNTY ELECTION OFFICIALS

This survey will help the research team understand more about such key topics of interest as:

- "How did the experience of provisional voting vary between states that previously had some form of provisional voting and those where provisional voting was new in 2004?"
- "Did state and local processes provide for consistent counting of provisional ballots?"
- "Did local officials have a clear understanding of how to implement provisional voting?"

The survey results will supplement the information on these topics from the compilation of statutes, regulations and cases and from the narrative we are constructing for each state.

**Description:** The Center for Public Interest Polling (CPIP) at Eagleton is conducting a national survey of county election officials to measure several aspects of provisional voting. The survey is designed to determine the following factors related to provisional voting at the county level:

- The content and quality of instructions provided to county officials by the states
- The steps taken by county officials to pass information on to poll workers;
- Differences in experience between states new to provisional voting and those that had some form of provisional ballot before HAVA; and
- Recommendations to improve and/or reduce the need for provisional voting

**Progress:** The survey instrument is complete. CPIP has compiled a list of election officials at the county level and at the municipal or regional level for states that do not assign the election responsibility to counties. It was forwarded to the call center, Schulman, Ronca & Bucuvalas Inc., (SRBI) the week of July 5, 2005. A sample will be drawn the week of July 12. Human Subjects Approval from Rutgers University was granted July 12. Pre-notification letters will be sent to election officials around July 12-13, 2005. The EAC has reviewed a draft of this letter, which we have now revised to make clear that the survey will increase our understanding of the provisional voting process, but is not being conducted on behalf of the EAC.

**Challenges:** We made special efforts to expedite Human Subject Approval to meet the schedule in the work plan. In the absence of an existing, reliable database of local election officials, we had to create one especially for this project. In order to provide a valid comparison between the states new to provisional voting with those that previously had some form of provisional ballot we doubled the sample size from 200 to 400. This increase will require an increase in the budget for the survey from \$15,000 to about \$24,000. We intend to reallocate costs within the existing budget to make this improvement possible, and will submit a letter describing the reallocation to the EAC in mid-July.

The sample has been, and will continue to represent the biggest challenge in this survey. Compiling the sample required substantial coordination and research to determine the accuracy of the identity and contact information for potential respondents. The difficulty in determining the appropriate contact is attributed to variation in county election officials' titles, jurisdiction types, and state and county election structures across the country. In addition to the potential pitfalls of reaching the appropriate county official, another factor in actually making contact with this special population will be dependent upon the hours that they keep, and may be hindered by the summer season.

**Work Plan:** This questionnaire will be pre-tested by July 15, and will field July 18 through August 5, 2005. This is somewhat later than projected in the revised work plan, but the information will arrive in time to be considered in drafting the analysis and alternatives document required under Task 3.5.

## VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. During the reporting period, we have made substantial progress in the first two tasks, which constitute the information-gathering phase of the work on Voter ID. The research of Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting.

### Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. When complete, this information will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

**Description:** A team of Election Law@Moritz faculty, executive administrator, a reference librarian, and several research assistants is compiling statutes on Voter Identification, and providing a summarized analysis of this research.

**Progress:** The Moritz team has created a 50-state chart to record data on voter identification. Categories for which state statutes and administrative regulations are being reviewed include: “*Who is required to present ID*”, “*Types of ID required*”, and “*Consequences of having no ID*”. We have completed the initial research for 45 states and have collected the voter identification statutes for those states. An *Election Law@Moritz* Fellow is conducting an academic literature review on voter identification. This literature review will help shape the analytical framework that will guide us when the compendium of statutes and administrative regulations is complete.

**Challenges:** Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

**Projections:** At the current rate, a draft of the voter identification chart should be complete on schedule, by the end of July. Work on the literature review will continue into August, but will be available to inform the analysis of alternative approaches for voter identification called for by Task 3.12 of the contract.

### SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter in the states; and second, estimating the effect on turnout of voter id requirements. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern with more rigorous identification requirements for all voters. We are following these developments both to

monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with increasing the rigor of voter ID requirements. This work is on schedule to be completed by the end of July. The next key milestones will be the completion of the state database and drafting the first narratives.

### VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

**Description:** We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election. Analysis on the county-level will enable us to estimate the influence of ID requirements on various age groups, races, ethnicities and gender groups. We are compiling data from both the 2000 and 2004 Presidential elections to measure the effect that changes in ID requirements may have had on voter turnout through two national election cycles.

**Progress:** The structure of the database is complete. It contains demographic information from the Census, and turnout data from various sources. The researcher assigned to this task is devising the syntax that will be required to run the statistics when the dataset is complete. The methodology for this part of the study is complete, and the actual data collection will soon be finished.

**Projection:** We are waiting for the Census Bureau to release the 2004 County Demographic Estimates. We have ordered and await the arrival of 2 datasets that contain voter turnout and voter registration numbers on the county-level for both the 2000 and 2004 elections. Once these two sources of information are received, the researcher will insert this information into the existing database, clean up the dataset, and begin to run the statistics. By that point, the researcher will have separated the states into various ID-requirement groupings that have been determined by the team, which will require coordination with several other parts of the study. This work is on schedule. By the end of July, the researcher should have county-level and state-level statistics on the impact of each ID system upon turnout, analyzed through various demographic features on the county-level.

### Task 3.11 Public meeting on Voter Identification Requirements

**Description:** We are working closely with EAC staff, particularly the General Counsel, to plan a half day public meeting on Voter ID requirements. Presentations at the meeting will form an important part of the information we are compiling about Voter ID requirements and the strengths and shortcomings of a range of alternative approaches.

**Progress:** We have recommended a focus on the debate over Voter ID now underway in the states. To provide a vivid picture of the debate, we have recommended that one panel include legislators on opposite sides of the issue from two different states. Our research identified Mississippi and Wisconsin as two states to focus on, and we have recommended specific legislators from each. We have discussed with staff adding a researcher to the panel to put the debate in Wisconsin and Mississippi in either a national or historic context. We also recommended two researchers from contrasting points of view, to address the effects of Voter ID provisions under HAVA and broader provisions that are now the subject of national debate. EAC staff recommended a panel of two state election directors to address the interaction of Voter ID with HAVA. We are awaiting a decision on our recommendations from EAC staff. We have no reason not to believe that the work is on schedule to be completed in time to organize a productive meeting on July 28.

**Challenges:** The date and location of this hearing has been changed twice since the beginning of the project. It was originally scheduled to take place in late June, but was rescheduled for July to allow the June hearing to focus on voting machine technology. The regular meeting was rescheduled for July 26 in Minneapolis, and was recently changed to July 28 in Pasadena. The changes in the scheduling of the July meeting have complicated our choice of panelists. More seriously, the changes mean that information from the hearing will not be available as early in the research process as contemplated in the contract. This timeframe will now require the team to summarize the hearing events at the same time that we are drafting the analysis and alternatives paper in early August.

Additionally, while our contract states that the "Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC," we have been asked only to make recommendations of topics and panelists, and the arrangements for the organization of the hearing are in other hands. This lack of clarity has caused some confusion and has delayed invitations to panelists. Thanks to frequent communication with members of the EAC, the process now seems to be working smoothly.

**Projection:** We believe the work is on schedule for completion in time to recruit the panelists for the July 28 hearing. Preparation of the hearing summary will likely be delayed because of the need to complete the analysis and alternatives paper.

011385

## PROJECT MANAGEMENT

Immediately after announcement of the award of the contract, Eagleton and Moritz began supplementing the core group that had prepared to proposal to building a highly qualified team to undertake the work. That team was in place by mid June, just a few weeks after the contract award.

As described in the proposal, the direction of the project is the responsibility of a five-person committee of faculty and staff from Eagleton and Moritz, chaired by Dr. Ruth Mandel, Director of the Eagleton Institute of Politics. Project Director Thomas O'Neill, a consultant to Eagleton, reports to this team and provides day-to-day guidance and coordination for the research. A weekly meeting of all the researchers engaged in the project if the primary means of coordinating the work. We have recently added an internal website to facilitate the review and revision of written materials.

### Task 3.1 Update the Work Plan

The first task was completed on time with the submission of a detailed work plan and timeline. EAC staff requested that the work plan be supplemented with a Gantt chart created on MS Project, and we submitted that a few days later.

### PEER REVIEW GROUP

**Description:** A feature of our proposal was the creation of a Peer Review Group (PRG). The EAC indicated at our first meeting in May that it would review our recommendations for members of the PRG. Our initial vision of the PRG was a small group of scholars and representatives of advocacy organizations that would comment on the research design, review drafts of our analyses and reports, and, in general, identify areas of the research that should be strengthened and help us improve the breadth, depth and clarity of reports based on that research.

**Progress:** Upon reflection, the project team agreed that the PRG should not include representatives of advocacy groups. We concluded, as representatives they would feel obligated to act as advocates for positions already taken by their groups. While advocacy organizations should be consulted as stakeholders during the course of our work, they were unlikely to achieve the goals we had in mind for the PRG as a source of advice on research design, methodology, and analysis. We submitted a revised list of potential members, substantially comprised of academics, to EAC for review.

The EAC responded with suggestions concerning both the balance of the PRG's membership and the creation of additional committees to review our work. We answered with an analysis of the cost and time involved adopting the EAC's suggestions as well as with suggestions for a balanced selection of academics for the Peer Review Group. We have not received response on this correspondence from the EAC, and the recruitment of the group is on hold.

FOCUS - 8 of 21 DOCUMENTS  
CONGRESSIONAL RECORD -- SENATE

From  
Peg  
Lotgren only

Tuesday, October 15, 2002

107th Congress, 2nd Session

148 Cong Rec S 10412

**REFERENCE:** Vol. 148, No. 135

**SECTION:** Senate

**TITLE:** HELP AMERICA VOTE ACT OF 2002\_CONFERENCE REPORT

**SPEAKER:** Mr. DODD; Mr. McCONNELL; Mr. KOHL. ; Mr. WYDEN

**TEXT:** [\*S10412]

The PRESIDING OFFICER. Under the previous order, the Senate will now proceed to the consideration of the conference report accompanying H.R. 3295, which the clerk will report.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 3295) to require States and localities to meet uniform and nondiscriminatory election technology and administration requirements applicable to Federal elections, to establish grant programs to provide assistance to States and localities to meet those requirements and to improve election technology and the administration of Federal elections, to establish the Election Administration Commission, and for other purposes, having met, have agreed that the House recede from its disagreement to the amendment of the Senate, and agree to the same with an amendment, signed by a majority of the conferees on the part of both Houses.

The PRESIDING OFFICER. The Senate will proceed to the consideration of the conference report.

(The report is printed in the House proceedings of the Record of October 8, 2002.)

Mr. DODD. Mr. President, I am very pleased this afternoon to bring to the attention of the Senate the conference report agreement on legislation to reform our Nation's election laws. I anticipate we will not need the full time allocated. I would like to think Members are so interested they would like to come over and share their thoughts with us on this subject. But knowing there are no votes today, that is not likely to occur so we will probably use a lot less time than the 2 hours required.

I note the presence of my friend and colleague, Senator McConnell, the ranking member of the Rules Committee.

Before getting to the substance of my remarks, let me begin by thanking him and his staff, and the staff of Senator Bond as well, one of our conferees, and that of my own two conferees on the Democratic side, Senators Durbin and Schumer, and their staffs, not to mention my own staff, Kennie Gill and others, for the tremendous work done on the Senate side of this effort.

It is somewhat ironic. I understand we are going to get this done. It is a quiet afternoon after Columbus Day. Members are still back in their States having spent the weekend with their families before returning tomorrow when we will have some additional votes as we begin to wind up this 107th Congress. It is somewhat ironic in a sense that we are in this sort of quiet stillness of this Chamber with only two of us here to talk, when you consider what gave rise to this legislation—the fact that there was one of the most tumultuous elections in the history of [\*S10413] our country that galvanized the attention, not only of the people of this country but those throughout the world. For more than a month, every single news program, day in and day out, 24 hours a day, was of eyes peering through hanging chads and people bellowing at each other in a voting precinct in Florida, with courtrooms packed, around the corner from here, in the United States Supreme Court.

011482

The irony is all of that turmoil provoked us to step up and find out whether our election laws could do with some changing\_not that it all occurred in Florida or in just the 2000 election\_but today, as we approach the second anniversary of that election, we find ourselves in a quiet Chamber with a couple of Members talking about something that both of us believe is a rather historic piece of legislation.

When you consider that unlike other matters that come before this body, despite the fact that our colleagues may claim expertise in every subject matter that comes before them, this is truly one in which each Member who serves here is an expert because they would not have arrived here had they not been elected. To that extent, we have an appreciation of elections beyond the awareness of the average citizen in this country. So the fact that we\_as Democrats and Republicans, in a time when people question whether or not we can come to terms about some of the major issues of the day, can take a subject matter so rife with partisanship as an election, with all of the scars, the wounds, the admonitions, the rhetoric, the demagoguery, use whatever words you want\_were able in this Congress to craft legislation that passed the other body by a substantial margin, and passed this body 99 to 1, and then the conference report passed the House by a vote of 357-48, and we hope a substantial vote will occur here as well, is a tribute to the membership of this body, to the leadership of this body, and the other body as well\_that we were able to get this done.

If I may say so, I have been here 21 years. I have had proud moments when I have been involved in other legislative efforts. None exceeds the sense of pride I have over this particular accomplishment. Again, no one can ever claim that they were responsible in a legislative process for the final result. A lot of people can take legitimate credit for helping us achieve what we are asking our colleagues to support tomorrow when we vote before noon.

This agreement, as it said, represents many mouths of effort. That effort took place amid a steady stream of news reports that predicted the demise of election reform. While those reports bewailed the lack of progress in conference negotiations, they overlooked the fact that, instead of a lack of progress, conferees were making progress. Working quietly during early mornings, late nights, and long weekends, we crafted the conference agreement that is before the Senate this afternoon.

It is a bipartisan and bicameral agreement. It is one that, I believe, merits the support of our colleges in the Senate.

It is one that has already been approved by the other body by a vote of 357 to 48. And it is one that the Administration has said the President is prepared to sign.

Twenty-three months ago, our Nation was thrown into turmoil because we learned a painful reality: that our democracy does not work as well as we thought it did, or as it should. More than 100 million citizens went to the polls on election day 2000\_November 7. Four to six million of them\_for a variety of reasons\_never had their votes counted. Some were thwarted by faulty machinery. Some were victims of wrongful and illegal purges from voter lists. Others fell victim to poorly designed ballots. But all of them\_all\_were denied the right to effectively exercise their most fundamental right as American citizens: the right to vote.

Regardless of which candidate one supported, there is no disagreement that election day 2000 was not a proud day for our democracy.

It was a day of deep embarrassment for a nation rightly viewed by the rest of the world as a beacon light of self-government. But that day was also, in a very real sense, a gift. Had there never been a contested election like the election of 2000, the problems plaguing our Nation's elections would likely never have been addressed. So it was in a sense a gift. If you were to find a silver lining in what occurred that day, what we are producing and asking our colleagues to support may be it.

The legislation we present to the Senate today goes a long way toward fixing those problems and righting those wrongs. It does justice to the American voter. It breaks new ground. It is, I believe, the first civil rights legislation of the 21st century. It is not a perfect bill. But it will make our democracy work better and be stronger.

Two hundred and thirteen years ago at the Constitutional Convention in Philadelphia, the Framers decreed that the administration of federal elections is not the job of just the States, or just the Federal Government, but the job of both.

Until now, that vision of cooperation and partnership has largely been honored in the breach. The Federal Government has for the most part been an observer, not a partner, in the conduct of elections for Federal office.

Starting now, with this legislation, that pattern comes to an end. For the first time\_if you exclude the Voting Rights Act of 1965 in which the Federal Government told States what not to do\_they must not levy poll taxes, must not set literacy tests\_the National Government steps up to more fully meet its constitutional duty to uphold the soundness and

sancity of the ballot. This is the first time the Federal Government is saying what we must do together to make our elections stronger. With this bill, we move closer to the day when every vote cast will be a vote counted.

Our bill achieves this progress in three ways: with new rights, new responsibilities, and new resources.

First, new rights. The conference agreement establishes new voting rights for our citizens. These include:

The right starting in 2004 to cast a provisional ballot. With this right, no qualified voter can ever again be turned away from the polling place without being able to cast at least a provisional ballot. There are some States that are doing this already and have been for years. Many do not.

The right to check and correct one's ballot if the voter made a mistake. I know this is a radical idea. In this way, voters need never again leave a polling place haunted by the thought that they voted for the wrong candidate, or nullified their own vote by over-voting.

The right of all voters to cast a private and independent ballot. Today, millions of disabled Americans face two options on election day, both of them bad: they either vote with the assistance of a stranger, or they do not vote at all. In the 2000 elections alone, some 20 million of them took the second option because the barriers to the ballot box were just too daunting.

With this legislation, henceforth beginning in the year 2006 those days will come to an end. Starting with this bill, a disabled voter will have the same right to cast a private and independent ballot as any other voter.

That provision dealing with providing for accessibility improvements in voting systems may not be required to go into effect until 2006. Obviously, some States may do that before. There is something in this bill that says you cannot do that. But at the very least, by the year 2006.

The bill also creates the right to have, at each polling place, printed, posted information, including a sample ballot and a listing of voter rights and responsibilities. In this way, our bill will sharply reduce the risk of confusion and error on election day.

In addition, our bill requires states to develop "uniform and nondiscriminatory" standards for counting ballots because whether or not your ballot will count should never depend on the county or precinct where you happen to live and the economic circumstances there.

Second, our bill establishes new responsibilities for voters, for States, and for the Federal Government.

To address concerns about **FRAUD**, voters seeking to vote for the first time in a state will be responsible for producing some form of identification. Senator Bond was particularly instrumental in crafting these provisions. We thank him.

States will be responsible for producing statewide computerized lists of registered voters. Once these lists are up and running, it is our hope and expectation that the risk that individuals [\*S10414] may be voting multiple times in multiple jurisdictions will be minimized if not eliminated altogether.

Let me add, by the way, that when it comes to the computerized statewide lists, a voter may not have to register again. If you live in a State that provides for state-wide registration, or wants to provide for state-wide registration, this requirement will facilitate that so that if you move around in that State from one county to another, or from one community to the next, a statewide voter registration list means you don't have to register again. If you move from one community and one precinct to the other, with the statewide list, you register once. If you stay in that State, you may be registered forever in that State regardless of where you may live or move to under state-wide registration.

That is not an insignificant burden we are lifting for many people in this country who move. If they are renters who can't afford homes and who want to participate in the process, every time they move from one precinct to the next, they have to register to vote. That will be over with, under state law providing for state-wide registration once provisions on the statewide voter registration requirements of this bill become effective.

To ensure that the requirements of the bill are met, States will also be required to establish meaningful enforcement procedures to remedy voters' grievances. And at the federal level, the Department of Justice will be responsible for enforcing the provisions of the act.

011484

Third, this legislation would commit unprecedented new resources to improving and upgrading all aspects of our elections. It authorizes some \$3.9 billion over the next three years to help states replace and renovate voting equipment, train poll workers, educate voters, upgrade voter lists, and make polling places more accessible for the disabled.

I thought it worthwhile to note that since the elections of 2000, only three States\_maybe a couple more\_have made any effort at all to reform and update their election laws and requirements that voters use in the various States. It is always costly to do this. Frankly, as the Presiding Officer, a former Governor, can attest, when there are budget constraints and a lot of demands are being made, there has not been a great constituency out there advocating spending money to buy new voting equipment, or new voting machinery, or to train poll workers. There are many other demands on a State budget that have much larger constituencies than those who might say we ought to improve the voting systems of the country. The fact of matter is, despite a public outcry about all of this, there has been very little action over the years\_even in the wake of the 2000 elections.

So it seems clear to us that if we are truly going to command States, in a number of provisions, to do things differently, to suggest that they do so without providing the resources would be yet once again an unfunded mandate. We know how States feel about Federal requirements when there are not resources to support meeting those requirements.

This legislation provides \$3.9 billion\_some that will flow immediately, and others subject to development of state plans and submission of applications. I will not go into all the details this afternoon. But the idea is that the Federal Government is going to become a real partner financially in the conduct of these elections. It does not mean the conduct of elections is going to be fully supported by the Federal Government. Obviously, States, communities, and municipalities have to allocate resources for every election. But with these changes we are talking about, the costs, by and large, are going to be borne by the Federal Government. This is the first time we will become such an active participant in improving the election systems of our country.

Lastly, this legislation establishes a new commission\_the Election Assistance Commission\_to assist states and voters. I want to acknowledge Senator McConnell's pivotal role in conceiving of this commission. In coming years, it will serve as an important source of new ideas and support for states as they take steps to improve the caliber of their elections.

It allows us to have an ongoing relationship with election officials at the State and local level day in and day out rather than waiting for some crisis to occur or for some disastrous election result where we then go out and form some ad hoc commission to go back and look at what happened.

For the first time, we are going to have a permanent commission that doesn't have rulemaking authority, except to the extent provided under section 9(a) of "Motor-Voter," but sets voluntary standards and guidelines\_a source of information for people to access, as we will, I am sure, in the years to come with technology being what it is, and a demand for efficiencies by the American public to update and to simplify the process to make voting as user friendly as it can possibly be while simultaneously protecting against the abuses in which some may wish to engage.

We will now have a permanent venue where those ideas can be heard and recommendations can be made so that we will be involved on a continuing basis in a seamless way with the conduct of something as fundamental and as important as the elections in this country.

New rights, new responsibilities, new resources. And with them, a new day for our Nation's democracy.

Almost 2 years from the 2000 elections, this legislation will help America move beyond the days of hanging chads, butterfly ballots, and illegal purges of voters and accusations of voter **FRAUD**. It will make the central premise of our democracy\_that the people are sovereign\_ring even more truly in the years to come.

This legislation has the support of many individuals and organizations that have been critical to its success.

They include former Presidents Ford and Carter. We thank them for their work on the National Commission on Federal Election Reform. They met early on and crafted some recommendations and ideas. They held hearings around the country. Once again, it is a great tribute to President Ford and President Carter for their ongoing commitment to this country and for the allocation of time from their schedules to dedicate efforts to make recommendations on how we might improve the election process. I thank them.

The Congressional Black Caucus\_for whom this legislative effort was the number one priority\_I thank Eddie Bernice Johnson particularly as the Chair of the Black Caucus; John Conyers, my coauthor of this bill from the very

outset; and every other member of the Black Caucus who has been tremendously helpful in working with us on this legislation and lending support to this final product.

The National Association of Secretaries of State has been tremendously helpful. It is a bipartisan group that deals every day with the election laws in our country. They have to grapple with them. It is critically important. Everything we talked about on which they had some input to let us know whether or not these things will work obviously, many of them have not been tested yet, and time will only tell. But because they were involved here, we think the likelihood of things not working as well as one might normally expect will be minimized.

I particularly thank my secretary of state, Susan Bysewicz of Connecticut, who has done a remarkable job in our State, has been tremendously creative, and was a source of a lot of good solid information.

Secretary of State Kathy Cox of Georgia\_I want to commend Georgia, by the way, one of the three States that made significant changes on their own in the election laws of their own States. They did a tremendous job. And Kathy Cox deserves a lot of credit for stepping up and doing things early on.

I thank Secretary of State Chet Culver of Iowa, the youngest secretary of state in the country and the son of a former colleague of ours who is doing a fantastic job, for his input. Ninety-two percent of the people of Iowa are registered to vote. It is one of the highest in the country. They have 300,000 new registered voters in the last 3 1/2 or 4 years in Iowa. Seventy-two percent of the people of that State voted in the last election. It is really a remarkable result, and a lot of it, again, is the result of the creative work of the secretary of state of Iowa. [\*S10415]

The NAACP has been tremendously helpful; the AFL-CIO; the United Auto Workers; the National Federation of the Blind; the United Cerebral Palsy Association; the American Foundation of the Blind; and the National Association of Protection and Advocacy Systems, which represents persons with disabilities. I thank them for all of their tremendous help.

I ask unanimous consent that letters from these organizations and individuals in support of this legislation be printed in the Record.

There being no objection, the material was ordered to be printed in the Record, as follows:

The National Commission on

Federal Election Reform.

October 4, 2002.

Former Presidents Ford and Carter Welcome the Agreement Reached on Election Reform Legislation.

Today, former Presidents Gerald R. Ford and Jimmy Carter, along with Lloyd Cutler and Bob Michel, co-chairs of the National Commission on Federal Election Reform, welcomed the bipartisan agreement struck by the House and Senate Conference Committee on a bill to reform federal elections.

"The bill represents a delicate balance of shared responsibilities between levels of government," Ford and Carter said. "This comprehensive bill can ensure that America's electoral system will again be a source of national pride and a model to all the world." Indeed, all four of the co-chairs share the belief of Congressman John Lewis (D-GA) and others that, if passed by both Houses and signed by President Bush, this legislation can provide the most meaningful improvements in voting safeguards since the civil rights laws of the 1960s.

Washington Bureau,

NAACP,

Washington, DC, October 8, 2002.

Re Conference Report to H.R. 3295, the Help America Vote Act (election reform)

Members,

011486

U.S. Senate,

Washington, DC.

Dear Senator: The National Association for the Advancement of Colored People (NAACP), our nation's oldest, largest and most widely-recognized grassroots civil rights organization supports the conference report on H.R. 3295, the Help America Vote Act and we urge you to work quickly towards its enactment.

Since its inception over 90 years ago the NAACP has fought, and many of our members have died, to ensure that every American is allowed to cast a free and unfettered vote and to have that vote counted. Thus, election reform has been one of our top legislative priorities for the 107th Congress and we have worked very closely with members from both houses to ensure that the final product is as comprehensive and as nondiscriminatory as possible.

Thus we are pleased that the final product contains many of the elements that we saw as essential to addressing several of the flaws in our nation's electoral system. Specifically, the NAACP strongly supports the provisions requiring provisional ballots and statewide voter registration lists, as well as those ensuring that each polling place have at least one voting machine that is accessible to the disabled and ensuring that the voting machines allow voters to verify and correct their votes before casting them.

The NAACP recognizes that the actual effectiveness of the final version of H.R. 3295 will depend upon how the states and the federal government implement the provisions contained in the new law. Thus, the NAACP intends to remain vigilant and review the progress of this new law at the local and state levels and make sure that no provision, especially the voter identification requirements, are being abused to disenfranchise eligible voters.

Again, on behalf of the NAACP and our more than 500,000 members nation-wide, I urge you to support the swift enactment of the conference report on H.R. 3295, the Help America Vote Act. Thank you in advance for your attention to this matter; if you have any questions or comments I hope that you will feel free to contact me at (202) 638-2269.

Sincerely,

Hilary O. Shelton,

Director.

American Federation of Labor and Congress of Industrial Organizations

Washington, DC, October 8, 2002.

Dear Senator: The AFL-CIO supports the conference report on H.R. 3295, the Help America Vote Act.

This conference report will help improve our nation's election system in several important ways. It will allow registered individuals to cast provisional ballots even if their names are mistakenly excluded from voter registration lists at their polling places. It will require states to develop centralized, statewide voter registration lists to ensure the accuracy of their voter registration records. It will also require states to provide at least one voting machine per polling place that is accessible to the disabled and ensure that their voting machines allow voters to verify and correct their votes before casting them.

Since the actual number of individuals enfranchised or disenfranchised by the conference report on H.R. 3295 will depend on how the states and the federal government implement its provisions, the AFL-CIO will closely monitor the progress of this new law especially its voter identification requirements. We will also increase our voter education efforts to ensure that individuals know and understand their new rights and responsibilities.

Sincerely,

William Samuel,

Director, Department of Legislation.

Paralyzed Veterans

of America,

011487

Washington, DC, October 15, 2002.

Chairman

Christopher J. Dodd,

Ranking Member Mitch McConnell,

Senate Rules and Administration Committee, Russell Senate Office Building, Washington, DC.

Dear Senators: On behalf of the members of the Paralyzed Veterans of America (PVA), I want to congratulate you and your staff on the hard work that was done to bring forth a bipartisan Election Reform conference report. The House of Representatives passed the report overwhelmingly, recognizing the fact that our federal government, since the presidential election of 2000, needed to take steps to ensure the public that their votes do indeed count. This bill, the Help America Vote Act of 2002, does that.

The bill provides funds to states and local jurisdictions to recruit and train poll workers. It will allow for replacement of antiquated mechanisms, like punch card and lever voting machines, with machines that will allow voters to verify their vote before the ballot is cast, including voters with disabilities.

This legislation will charge the Architectural Transportation Barriers Compliance Board known as the Access Board to develop minimum standards of access at polling places and to consult with other organizations for research and improvements to voting technology.

This legislation will allow the Secretary of the Health and Human Services to make payments to eligible states and local jurisdictions for the purposes of making polling places accessible: including the paths of travel, entrances, exits, and voting areas of each polling facility. It will ensure sites are accessible to individuals with disabilities including those who are blind or visually impaired, in a manner that provides the same opportunity for access and participation including privacy and independence.

In addition the Secretary of Health and Human Services shall provide the Protection and Advocacy Systems of each State grant monies to ensure full participation in the electoral process for individuals with disabilities, including registering to vote, education in casting a vote and accessing polling places.

Again, PVA congratulates you on this legislation which, when implemented and fully funded, will provide tremendous access for PVA members and all people with disabilities in exercising their constitutional right to vote. PVA stands ready to work with you and your staff on implementation of this legislation which ensures confidence in our citizens and our democracy that indeed every ones vote cast will indeed count.

Sincerely,

Douglas K. Vollmer,

Associate Executive Director for Government Relations.

National Federation

of the Blind,

Baltimore, MD, October 9, 2002.

Hon. Robert Ney, Chairman,

Hon. Steny H. Hoyer, Ranking Minority Member,

Committee on House Administration, House of Representatives, Washington, DC.

Dear Mr. Chairman and Congressman Hoyer: I am writing to express the strong support of the National Federation of the Blind (NFB) for the Help America Vote Act of 2002. Thanks to your efforts and strong bipartisan support, this legislation includes provisions designed to guarantee that all blind persons will have equal access to voting procedures

and technology. We particularly endorse the standard set for blind people to be able to vote privately and independently at each polling place throughout the United States.

While the 2000 election demonstrated significant problems with our electoral system, consensus regarding the solution proved to be much more difficult to find. Part of that solution will now include installation of up-to-date technology for voting throughout the United States. This means that voting technology will change, and devices purchased now will set the pattern for decades to come.

With more than 50,000 members representing every state, the District of Columbia, and Puerto Rico, the NFB is the largest organization of blind people in the United States. As such we know about blindness from our own experience. The right to vote and cast a truly secret ballot is one of our highest priorities, and modern technology can now support this goal. For that reason, we strongly support the Help America Vote Act of 2002, and appreciate your efforts to enact this legislation.

Sincerely,

James Gashel,

Director of Governmental Affairs. [\*S10416]

United Cerebral Palsy

Associations,

Washington, DC, October 9, 2002.

Dear Senator Dodd: United Cerebral Palsy Association and affiliates support the conference report on H.R. 3295, the Help America Vote Act. We also take this opportunity to commend you for the work you did to ensure that all people with disabilities have equal access under this act.

This legislation, while not perfect, will go a long way in improving the ability of people with disabilities to exercise their constitutional right and responsibility to vote. The funding allocated for the multiple provisions of H.R. 3295 is critical, and we pledge to work with Congress to ensure that this funding is made available.

UCP stands ready to assist states' and local entities as they work toward compliance of this very important legislation. The changes outlined in the bill must be adopted swiftly, correctly and fairly, and it will be incumbent upon us all to help in this process.

Finally, UCP applauds you and your colleagues on your dogged determination to pass legislation that will make distinct improvements at the polls and in the lives of voters with disabilities.

Sincerely,

Patricia Sandusky,

Interim Executive Director.

American Foundation for the Blind, Governmental Relations Group,

Washington, DC, October 9, 2002.

The Hon. Christopher Dodd,

U.S. Senate, Russell Senate Office Building, Washington, DC.

Dear Senator Dodd: The American Foundation for the Blind supports the conference report for S. 565 and H.R. 3295. We are pleased that the conference report contains the disability provisions of the Senate bill.

Already this year, in some jurisdictions, blind and visually impaired voters have, for the first time, been able to cast a secret and independent ballot. We look forward to the day when all voters with visual impairment will have full and independent access to the electoral process.

The mission of the American Foundation for the Blind (AFB) is to enable people who are blind or visually impaired to achieve equality of access and opportunity that will ensure freedom of choice in their lives. AFB led the field of blindness in advocating the enactment of the Americans with Disabilities Act of 1990 (ADA). Today, AFB continues its work to protect the rights of blind and visually impaired people to equal access to employment, information, and the programs and services of state and local government.

Sincerely,

Paul W. Schroeder,

Vice President, Governmental Relations.

AARP,

National Headquarters,

Washington, DC, October 10, 2002.

The Hon. Christopher J. Dodd,

Chairman, Senate Rules and Administration Committee,

Senate Russell Office Building, Washington, DC.

The Hon. Mitch McConnell,

Ranking Member, Senate Rules and Administration Committee,

Senate Russell Office Building, Washington, DC.

Dear Senators: We are writing to express our support for the bipartisan election reform conference report on H.R. 3295. AARP recognizes that significant compromise was required by all parties to produce an agreement that would advance the process of effective and fair election reform. The Senate-House conference report contains a mix of provisions that both strengthen and hinder citizen ability to exercise the legal right to vote and have that vote counted. Despite its shortcomings, however, we believe the overall effect of the compromise agreement will be to reform and enhance the nation's voting system.

AARP is pleased that the compromise:

Requires states to develop and maintain centralized polling lists;

Requires polling sites in each jurisdiction to meet accessibility standards and provide user-friendly voting equipment for persons with disabilities;

Makes provisional ballots available to voters whose names may be erroneously absent from registration lists;

Permits voters to verify and correct their voting preferences before casting them;

Provides Federal funds to encourage state & local reforms; and

Provides for training of elections administration staff and polling site workers.

Unfortunately, the H.R. 3295 compromise report weakens some existing voting rights and contains certain provisions that AARP believes will increase the chances of a recurrence of the problems that plagued the 2000 Presidential Elections. The report:

Imposes voter identification requirements that discourage participation by low income, minority and foreign-born citizens;

Encourages purging of voter registration lists without current law assurances to prevent illegal purging of legal voters;

Permits the denial of registration if the registrant possesses either a driver's license or social security number but fails to write it on the registration form; and

Denies legal recourse for improper election administration, while lacking adequate enforcement provisions to ensure that the ballots of all legal voters are counted.

These provisions undermine existing voting protections, and provide technical loopholes that can discourage or intimidate potential legal voters\_ especially those who are low income, minority and foreign-born.

Ultimately, the success of this legislation in affording all eligible citizens the opportunity to vote and have that vote accurately counted depends on implementation by the states. AARP\_ through the advocacy and voter education efforts of our national and state offices\_ will work with states, election officials and other civil rights organizations to ensure that election reform implementation is fair and does not discourage citizen voter participation. We appreciate your leadership in bringing about these critically important advances. And, we look forward to working with you to further our most basic right as citizens\_ the vote. If you have any questions, please feel free to call me or have your staff contact Larry White of our Federal Affairs staff at [REDACTED]

Sincerely,

Christopher Hansen,

Director of Advocacy.

National Association of Protection & Advocacy systems,

October 9, 2002.

The Hon. Chris Dodd,

U.S. Senate, Russell Senate Office Building, Washington, DC.

Dear Senator Dodd: The Protection and Advocacy System (P&A) and the Client Assistance Programs (CAPs) comprise a federally mandated, nationwide network of disability rights agencies. Each year these agencies provide education, information and referral services to hundreds of thousands of people with disabilities and their families. They also provide individual advocacy and/or legal representation to tens of thousands of people in all the states and territories. The National Association for Protection and Advocacy Systems (NAPAS) is the membership organization for the P&A network. In that capacity, NAPAS want to offer its support for the passage of "The Help America Vote Act of 2002" (H.R. 3295).

NAPAS believes that the disability provisions in the bill go far to ensure that people with all types of disabilities\_ physical, mental, cognitive, or sensory\_ will have much improved opportunities to exercise their right to vote. Not only does this bill offer individuals with disabilities better access to voting places and voting machines, but it also will help provide election workers and others with the skills to ensure that the voting place is a welcome environment for people with disabilities. NAPAS is very pleased that P&A network will play an active role in helping implement the disability provisions in this bill.

NAPAS is well aware that there are still some concerns with certain provisions of the bill. We hope that these concerns can be worked out, if not immediately, then as the bill is implemented. It would be extremely unfortunate if people continued to face barriers to casting their ballot after this bill is signed into law.

Finally, We want to thank the bill's sponsors, Senators Dodd (D-CT) and McConnell (R-KY) and Representatives Ney (R-OH) and Hoyer (D-MD) for their hard work and perseverance. We look forward to working with each of them to ensure the swift and effective implementation of this important legislation.

Sincerely,

Bernadette Franks-Ongoy,

President.

[From News Common Cause, Oct. 8, 2002]

Common Cause President Praises Election Reform Agreement

Statement by Scott Harshbarger, president and chief executive officer of Common Cause, on the conference agreement on the election reform bill:

"The Help America Vote Act of 2002 is, as Senator Christopher Dodd (D-CT) has said, the first major piece of civil rights legislation in the 21st century. Nearly two years after we all learned that our system of voting had serious flaws, Congress will pass these unprecedented reforms.

"For the first time, the federal government has set high standards for state election officials to follow, while authorizing grants to help them comply. Billions of dollars will be spent across the country to improve election systems.

"This bill, while not perfect, will make those systems better. Registration lists will be more accurate. Voting machines will be modernized. Provisional ballots will be given to voters who encounter problems at the polling place. Students will be trained as poll workers.

"As Common Cause knows from a seven-year fight to pass campaign finance reform, compromise often comes slowly. We thank the bill's sponsors, Senators Dodd, Mitch McConnell (R-KY), Christopher Bond (R-MO), and Representatives Robert Ney (R-OH) and Steny Hoyer (D-MD) for their work. Their persistence\_ even when negotiations bogged down\_ brought this bill through.

"After the President signs the bill, states will need to act. Implementing this bill will require state legislators to change laws, election officials to adopt new practices, polling places to alter their procedures, and poll workers to be retrained.

"These far-reaching changes will not come easily. The bill's enforcement provisions are [\*S10417] not as strong as the 1993 Motor Voter law or the 1965 Voter Rights Act. Some states may lag behind and fail to implement these changes properly; some polling places will experience problems like in Florida this year; others may have problems implementing the new identification provisions.

"Common Cause and our state chapters will work with civil rights groups and other to ensure that states fully and fairly implement the new requirements. We will help serve as the voters' watchdogs: citizen vigilance can protect voters from non-compliant states.

"Voters can now look to marked improvements at the polls in the years ahead, thanks to the bipartisan leadership of the bill's sponsors."

National Association

of Secretaries of State,

Washington, DC, October 9, 2002.

Committee on House Administration,

Longworth Building,

Washington, DC.

Dear Chairman Ney and Ranking Member Hoyer: The National Association of Secretaries of State (NASS) congratulates you on the completion of H.R. 3295, the "Help America Vote Act." The bill is a landmark piece of bipartisan legislation, and we want to express our sincere thanks for your leadership during the conference negotiations. We also commend your Senate colleagues: Senators Chris Dodd, Mitch McConnell and Kit Bond.

The nation's secretaries of state, particularly those who serve as chief state election officials, consider this bill an opportunity to reinvigorate the election reform process. The "Help America Vote Act" serves as a federal response that stretches across party lines and provides a substantial infusion of federal money to help purchase new voting equipment

and improve the legal, administrative and educational aspects of elections. In fact, our association endorsed the original draft of H.R. 3295 in November 2001.

Specifically, the National Association of Secretaries of State (NASS) is confident that passage of the final version of H.R. 3295 will authorize significant funding to help states achieve the following reforms:

Upgrades to, or replacement of, voting equipment and related technology;

Creation of statewide voter registration databases to manage and update voter registration rolls;

Improvement of poll worker training programs and new resources to recruit more poll workers throughout the states;

Increases in the quality and scope of voter education programs in the states and localities;

Improvement of ballot procedures, whereby voters would be allowed to review ballots and correct errors before casting their votes;

Improved access for voters with physical disabilities, who will be allowed to vote privately and independently for the first time in many states and localities;

Creation of provisional ballots for voters who are not listed on registration rolls, but claim to be registered and qualified to vote.

We want to make sure the states will get the funding levels they've been promised, and that Congress will provide adequate time to enact the most substantial reforms. Please be assured that the nation's secretaries of state are ready to move forward once Congress passes H.R. 3295 and the President signs it.

If we can be of further assistance to you, your staff members, or your colleagues in the U.S. House of Representatives, please contact our office.

Best regards,

Dan Gwadosky,

NASS President,

Maine Secretary of State.

National Conference

of State Legislatures,

Washington, DC, October 7, 2002.

Hon. Robert Byrd,

Chairman, Senate Appropriations Committee,

Washington, DC.

Hon. Bill Young,

Chairman, House Appropriations Committee,

Washington, DC.

Dear Chairmen Byrd and Young: On behalf of the nation's state legislators, we urge you to make reform of our nation's election processes a reality by providing sufficient funding to implement H.R. 3295. The conference agreement announced today will provide an effective means for states and counties to update their election processes without federalizing election administration. NCSL worked closely with the conferees in the development of this legislation and is satisfied that it keeps election administration at the state and local level, limits the role of the U.S. Justice Department

011493

to enforcement, does not create a federal private right of action, and establishes an advisory commission that will include two state legislators to assist with implementation. NCSL commends the conferees for their work on this landmark legislation and is committed to implementing the provisions of H.R. 3295 to ensure every voter's right to a fair and accurate election.

To ensure proper implementation and avoid imposing expensive unfunded mandates on the states, it is critical that the federal government immediately deliver sufficient funding for states to implement the requirements of this bill. Neither of the existing versions of appropriations legislation provides sufficient funding for election reform. We urge you to fully fund H.R. 3295 at the authorized level of \$2.16 billion for FY 2003.

The Congressional Budget Office has estimated that it may cost states up to \$3.19 billion in one-time costs to begin implementing the provisions of this legislation. In this current fiscal environment, it will be extraordinarily difficult for states to implement the minimum standards in the bill without immediate federal financial support. States are already facing budget shortfalls for FY 2003 of approximately \$58 billion. Thirteen states have reported budget gaps in excess of 10 percent of their general fund budgets. To satisfy their balanced budget requirements, states are being forced to draw down their reserves, cut budgets, and even raise taxes.

We look forward to working with you to keep the commitment of the states and the federal government to implementing H.R. 3295. If we can be of assistance in this or any other matter, please contact Susan Parnas Frederick [REDACTED]; susan.frederick@ncsl.org) or Alysoun McLaughlin [REDACTED], alysoun.mclaughlin@ncsl.org) in NCSL's state-federal relations office in Washington, D.C.

Sincerely,

Senator Angela Z. Monson,

Oklahoma, President, NCSL.

Speaker, Martin R. Stephens,

Utah, President-elect, NCSL.

National Association

of State Election Directors,

Washington, DC, October 10, 2002.

Hon. Bob Ney,

Hon. Steny Hoyer,

House Administration Committee,

Washington, DC.

Dear Congressmen Ney and Hoyer: The National Association State Election Directors (NASED) congratulates you on the successful completion of the final conference report on H.R. 3295. This initiative will significantly affect the manner in which elections are conducted in the United States. On balance, H.R. 3295 represents improvements to the administration of elections. As administrators of elections in each state we express our appreciation to you and your staff for providing us access to the process and reaching out to seek our views and positions on how to efficiently and effectively administer elections.

As with all election legislation, H.R. 3295 is a compromise package, which places new challenges and opportunities before state and local election officials. We stand ready to implement H.R. 3295 once it is passed by Congress and signed into law by the President. Implementation of this bill will be impossible without the full \$3.9 billion appropriation that is authorized. The success of this bold congressional initiative rests in large measure upon the appropriation of sufficient funds to bring the bill's objectives to reality.

We found the bipartisan approach to this legislation refreshing and beneficial. Thank you again for including NASED in the congressional consideration the bill.

If we can be of further assistance, please contact our office.

Sincerely,

Brook Thompson,  
President, NASED.

National Association of Counties,

Washington, DC, October 9, 2002.

Hon. Christopher Dodd,

Chairman, Committee on Rules and Administration, U.S. Senate, Russell Senate Office Building, Washington, DC.

Hon. Mitch McConnell,

Ranking Minority Member, Committee on Rules and Administration, U.S. Senate, Russell Senate Office Building, Washington, DC.

Dear Chairman Dodd and Senator McConnell: We would like to congratulate you and thank you for your leadership, perseverance and hard work in reaching agreement in the House-Senate conference on the "Help American Vote Act of 2002." We believe the final bill is a balanced approach to reforming election laws and practices and to providing resources to help counties and states in improving and upgrading voting equipment. The National Association of Counties supports H.R. 3295 as it was approved by the House-Senate conference Committee.

We are very concerned about Congress providing the funds to implement the new law. While there is much confusion at this time about the appropriation process for FY2003, we strongly urge the leadership of the House and Senate and President Bush to support inclusion of \$2.16 billion in a continuing resolution. This is the amount authorized for FY2003 by the "Help American Vote Act." We believe that funding and improving voting practices in the United States is as important as our efforts to strengthen homeland security.

Thank you again for your continuing efforts to fund and implement this new law.

Sincerely,

Larry E. Naake,  
Executive Director.

Mr. DODD . Mr. President, I also would like to mention the tremendous assistance provided by the Leadership Conference on Civil Rights, the League of Women Voters, and People for the American Way.

Before I turn to my colleagues who wish to be heard, I would be remiss if I [\*S10418] did not publicly express my gratitude to my fellow conferees. I already mentioned Senator McConnell, Senator Bond, Senator Durbin, and Senator Schumer. I thank their staffs as well.

I want to take a moment as well to thank an individual I had never really met before\_ I may have met him before, but I did not certainly know him\_ and that is the chairman of the House Administration Committee, Bob Ney, from the State of Ohio, who serves in a tough job as chairman of that committee. He has been in the Congress, I think, about 8 or 10 years.

He worked very hard on this legislation. And I developed a great deal of respect and affection for Bob Ney. We are of different parties and, obviously, different States, not serving together in the House of Representatives.

But Bob Ney and his staff were tenacious, hard working, and determined to get a bill. I commend them for that. We were not sure we were going to be able to get it done in the end, as it appeared at several points this may not work. And because Bob Ney felt strongly that we had an obligation to try, we are here today with this product on which they had a successful vote in the other body. So I commend Bob Ney for his tremendous efforts and that of his staff.

Steny Hoyer is the ranking Democrat on the House Administration Committee. I have known Steny for years. Unlike Bob Ney, Steny and I have been good friends for a long time. Steny Hoyer has been as committed to election reform issues as anyone, as well as his commitment to the disabled.

He was one of the prime architects of legislation affecting the disabled. So while we talked about that a lot in this body during the consideration of our bill, we certainly need to extend credit to Steny Hoyer for his commitment to those issues as well.

So the team of Bob Ney and Steny Hoyer, putting together the product they did, deserves a great deal of credit and recognition for what we hope will be the adoption of this conference report tomorrow and the signing by the President of this, we think, historic piece of legislation.

On more occasions than I can recall, the three of us—Steny Hoyer, Bob Ney, and myself—along with staffs, spent a lot of late nights. I am looking around the Chamber at faces who were with me in those rooms in the wee hours of the morning, and long weekends, going back and forth. And I appreciate all of their efforts. We had some tough moments, but in any good piece of legislation there will be tension. And if people are committed to try to work things out, you can produce results such as we have in this legislation. So without their persistence and the patience of all involved, we would not be here. And I thank them.

Last but far from least, I thank John Conyers, the dean of the Congressional Back Caucus, for his stalwart support. The day we introduced a bill, that is not unlike what we are asking our colleagues to support here, I stood in a room with two people, in front of a bank of cameras, as we laid out this particular idea. And the two individuals with me in that room were John Conyers and John Sweeney of the AFL-CIO. And I thank both of them.

But John Conyers has been tireless. He has never given up on this. He knew that compromises would have to be struck, and he insisted we reach those compromises even though he would prefer, in some instances, that provisions of the bill not be included. But a great legislator, a good legislator, understands that when people gather for a conference, unfortunately, they arrive with their opinions, and you are not going to be able to get your own way all the time. So John Conyers was tremendously helpful. I began this journey with him a long time ago. And I could not end these remarks without extending my deep sense of appreciation to him and to his staff for their tremendous help.

In closing, I would like to add only this: Of all the many important issues considered by this Senate in this Congress, I do not think any others may argue this—but I do not think any are going to exceed this one in significance. I know we have had important debates on Iraq and other such questions, but I think what Mitch McConnell, Kit Bond, and my other conferees, Senator Durbin, Senator Schumer, and others who were involved in this—what we have achieved certainly ranks in the top echelons of accomplishments, I would say the best thing we have done in this Congress. We have not achieved a lot in this Congress, but I think this is one of the most significant things.

I think this is the kind of legislation you can talk to your grandchildren about or they will read about and say that even if we did not do anything else in this Congress, this is a significant accomplishment for the American people.

Thomas Paine, as I have quoted him over and over again over the last year and a half or so of this discussion, said 207 years ago:

The right to vote . . . is the primary right by which other rights are protected. To take away this right is to reduce a man to slavery, for slavery consists in being subject to the will of another, and he that has not a vote . . . is in this case.

So, Mr. President, I thank again my colleagues; for the bedrock principle in our Republic is simply this: the consent of the governed. We are a nation where the people rule, and they rule not with a bullet but with a ballot. That sacred, central premise of our Republic is given new power by this conference agreement. It can make America a more free and democratic Nation. That kind of opportunity comes our way only rarely, at most maybe once in a generation, on average. It is an opportunity that has emerged out of adverse circumstances—a close and controversial election for the Presidency of the United States.

By seizing that opportunity and passing this conference agreement, we in this body can transform a national moment of adversity into the promise of a future with the right to vote that will have new resonance for every citizen of America. I urge adoption of this conference report.

Mr. President, I yield the floor.

The PRESIDING OFFICER (Mr. Dayton). The Senator from Kentucky.

Mr. McCONNELL . Mr. President, first, let me say to my good friend from Connecticut, this is, indeed, something to celebrate on a bipartisan basis in a Congress that could use a celebration. This may have been the most unproductive and unsuccessful session of the Senate in my 18 years here: no energy bill; no terrorism insurance bill and until tomorrow, at least no appropriations bills; no budget; no homeland security bill; only 44 percent of President Bush's U.S. circuit court nominees confirmed.

A couple of items we did pass were at least in this Senator's judgment not very good: a flawed campaign finance reform bill and a bloated farm bill.

We could use a celebration. And the Senator from Connecticut and I would like to encourage all of our Senators to feel good about the piece of legislation that will be adopted tomorrow.

This is, indeed, a significant accomplishment, an important piece of legislation. Even if we had a very productive Congress, and a Senate that was passing landmark legislation on virtually a weekly basis even if that had been the case this year this legislation would have stood out as something important for the Nation and something well worth doing.

So, Mr. President, I rise today with a tremendous amount of pride and enthusiasm about this landmark legislation. Although the Senate, as I just suggested, has been mired in partisanship and virtually calcified over various pieces of legislation, and the confirmation of judges, the House-Senate conference committee on election reform has achieved an historic bipartisan, bicameral consensus.

Nearly 2 years ago, this Nation had a painful lesson on the complexities and complications State and local election officials face in conducting elections. In response, legislators on both sides of the Hill introduced legislation to address the problems exposed in the 2000 election. The various pieces of legislation ran the gamut in approach and emphasis, but all were unified in their goal of improving our Nation's election systems.

In December of 2000, Senator Torricelli and I introduced the first of what was to become four bipartisan compromise bills that I have sponsored or cosponsored. From the beginning, I have been committed to providing not [\*S10419] only financial assistance but also informational assistance to States and localities.

The best way to achieve both of these goals is by establishing an independent, bipartisan election commission. The commission will be a permanent repository for the best, unbiased, and objective election administration information for States and communities across America.

And that is really important because what happens I used to be a local official early in my political career is that you are confronted with vendors selling various kinds of election equipment, and there is really no way to make an objective analysis of what your needs are. On the other hand, this new commission will be a repository for expertise and unbiased advice to States and localities across America about what kind of equipment might best suit their situation.

This concept has been one of the cornerstones of each of the bills that I have sponsored. It was recommended by the Ford-Carter Commission, supported by the President, and has been perfected in this conference agreement. The commission will not micromanage the election process, but will instead serve as a tremendous resource for those across America who conduct elections.

This conference report will help make all elections more accurate, more accessible, and more honest, while respecting the primacy of States and localities in the administration of elections. For the first time ever, the Federal Government will invest significant resources to improve the process, roughly \$3.9 billion. Every State will receive funds under this legislation, and the smaller States are guaranteed a share of the pot. The funds will be used by the States in a manner they determine best suits their needs, rather than the Federal Government prescribing a one-size-fits-all system. Whether it is by replacing a punchcard or a lever voting system or educating and training poll workers, States are provided the flexibility to address their specific needs.

The mantra of this legislation, coined by the distinguished senior Senator from Missouri, Kit Bond, has been to "make it easier to vote and harder to cheat." We have achieved that balance in this conference agreement by setting standards for States to meet, standards which the Federal Government will pay 95 percent of the cost to implement. Voting systems will allow voters to verify their ballots and allow voters a second chance, if they make a mistake, while maintaining the sanctity of a private ballot.

Voting will become more accessible to people with disabilities, an issue admirably and vigorously championed by Senator Dodd. Provisional ballots will be provided to all Americans who show up at polling sites only to learn their

names are not on the poll books. Such a voter's eligibility will be verified, however, prior to the counting of the ballot to ensure that those who are legally entitled to vote are able to do so and do so only once; again, making it easier to vote and harder to cheat.

To protect the integrity of every election, this conference report makes significant advancements in rooting out vote **FRAUD**. Congress has acted properly to curtail **FRAUD**ulent voting and reduce duplicate registrations, both interstate found to be more than 720,000 nationwide and intrastate. The provisions of this bill are carefully drafted to address this impediment to fair and honest elections, and we provided the States with the means and the resources to address this problem.

First, States will establish secure, computerized Statewide voter registration databases that contain the name and information of each registered voter. The accuracy of the voter registration list is paramount to a fair and accurate election. The motor voter bill of 1993 has done grievous harm to the integrity of the system by junking up the voter rolls and making it extremely difficult to systematically ensure that only eligible voters are registered.

Second, every new registrant will be required to provide their driver's license number, if they have been issued one, or the last four digits of their Social Security number. If they have neither, the State will assign them a unique identifier. This information will be matched with the department of motor vehicles which will in turn match their data with the Social Security Administration. States which use the full nine-digit Social Security number for voter registration are given the option to avail themselves of this important new provision. Contrary to the assertions of some, the only thing this provision impedes is vote **FRAUD**.

Third, first-time voters who register by mail will have to confirm their identity at some point in the process by photo identification or other permissible identification. This provision was championed by Senator Bond, and its importance was once again highlighted just this past week in South Dakota where there is an ongoing joint Federal and State investigation of **FRAUD**ulent voter registrations.

According to press reports in South Dakota, people are registering weeks after they have died, and one eager voter even completed 150 voter registration cards. Is that an enthusiastic voter or what?

The South Dakota Attorney General succinctly summed up the problem:

It's pretty easy to register under a false name, have the registration confirmation sent back to your home, then send in by mail an absentee ballot request, get it and vote under the false name, send it back and get it counted.

Under this legislation, that is not going to be possible any longer. That is a step in the right direction for our democracy.

These three provisions will ensure that dogs such as Ritzy Mekler, Holly Briscoe, and other stars of "Animal Planet" will no longer be able to register and vote. These provisions will ensure that our dearly departed will finally achieve everlasting peace and will not be troubled with exercising their franchise every 2 years. And importantly, the provisions will ensure that voter rolls will be cleansed and protected against **FRAUD**ulent and duplicate registrations.

This conference report also provides remedial safeguards for every American's franchise. The Department of Justice will continue its traditional role of enforcing Federal law. In addition, each State will design and establish a grievance procedure available to any voter who believes a violation of law has occurred. States are best equipped to promptly address the concerns of its voters, and I compliment Senator Dodd for his foresight on this issue.

This legislation also makes significant improvements to protect the votes of those who have committed themselves to protecting all Americans, and that is our men and women in uniform.

I have touched upon just a few of the highlights of this historic piece of legislation. After nearly 2 years of discussions, negotiations, introductions and reintroductions of election reform bills, we now stand ready to vote on the most important piece of legislation before Congress in many years.

I thank, again, Senator Dodd for his steadfast leadership. He committed 110 percent of himself to this issue and worked tirelessly to bring us to this day. I also thank Senator Bond for all of his work to protect the integrity of the election process. I also congratulate my colleagues on the other side of the Hill for their significant achievement: Congressman Bob Ney of Ohio, chairman of the conference, did a superb job; and our good friend Steny Hoyer, ranking member, who was outstanding as well.

And to the staff people involved in this, my own staff on the Rules Committee: Tam Somerville; I particularly commend Brian Lewis, who was there from beginning to end in this process\_ as far as I am concerned, this will be known as the Brian Lewis bill around my office\_ and his able right hand, Leon Sequeira, and Chris Moore and Hugh Farrish, all of the Rules Committee staff.

For Senator Bond, Julie Dammann and Jack Bartling of Senator Bond's staff were superb. And for Senator Dodd, Kennie Gill, Shawn Maher, Ronnie Gillespie, we enjoyed working with them, and they, too, should feel about good about this. From Congressman Ney's staff, Paul Vinovich, Chet Kalis, Roman Buhler, Pat Leahy\_ they have a staffer named Pat Leahy, how about that\_ and Matt Petersen. And from Congressman Hoyer's staff, Bob Cable, Keith Abouchar and Len Shambon.

This is indeed a happy day, not just for Senator Bond and myself, but for [\*S10420] all Members of the Congress. This is a remarkable achievement we can all feel good about. We look forward to seeing it pass tomorrow by an overwhelming margin. I am sure the President at some point will want to sign this with appropriate flourish down at the White House.

Again, I thank my colleague from Connecticut and yield the floor.

weekend voting

Mr. KOHL. I thank the distinguished chairman of the Rules Committee for clarifying a provision in the bill. As the Senator knows, I am the sponsor of legislation moving Federal elections from the first Tuesday in November to the first weekend in November. It is my hope that moving Federal elections to the weekend will increase voter turnout by giving all voters ample opportunity to get to the polls without creating a national holiday. My proposal would also have the polls open the same hours across the continental United States, addressing the challenge of keeping results on one side of the country, or even a state, from influencing voting in places where polls are still open.

The Senate version of the election reform legislation before us included a provision sponsored by Senator Hollings and myself which directed the Election Administration Commission to study the viability of changing the day for congressional and presidential elections from the first Tuesday in November to a holiday or the weekend, with the possibility of looking at the first weekend in November. Unfortunately, during the conference on this bill, the studies section was refined to direct the Election Administration Commission to study the "feasibility and advisability of conducting elections for Federal office on different days, at different places, and during different hours, including the advisability of establishing a uniform poll closing time" with a legal public holiday mentioned as one option but no mention of weekend voting. Is it correct that there was no specific intent to leave out weekend voting as an option?

Mr. DODD. The Senator from Wisconsin is correct. The conferees intended that the new Election Administration Commission consider all options for election day, including the Senator's interesting proposal to move elections to the weekend. There was also no intent to limit the Election Administration Commission to considering just one day as an election day. It is my hope that the commission will examine all options, including the possibility of holding elections over two days as suggested in Senator Kohl's proposal.

Mr. KOHL. I thank the Senator from Connecticut for this clarification. I hope that the Election Administration Commission will seriously consider moving federal elections to the weekend. I will continue to advocate for weekend voting as a means of increasing voter turnout and addressing the need for uniform poll closing times in federal elections.

Mr. DODD . Mr. President, I yield 15 minutes to my colleague from Oregon, Senator Wyden.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. WYDEN . Mr. President, let me join in the extraordinarily important comments that have been made by Senator Dodd and Senator McConnell. This has been a huge and arduous task that had to be bipartisan. The fact is, you can't get anything done that really is important without it being bipartisan.

I take a moment to thank Senator Dodd. He has been extraordinarily patient with me and with all of the Members of this body who come from States that have pioneered innovative approaches.

It is fair to say right now with millions of Americans essentially being early voters, there have been estimates that something along the lines of 15 percent of the American people are going to vote early.

The legislation that Senator Dodd and Senator McConnell brings to us today protects the wave of the future\_ this early voting\_ whether it be by absentee ballot or the pioneering vote-by-mail system.

What this legislation does is protect the early voters\_ the person we are seeing more and more of in the American political process\_ by, in effect, taking steps to discourage **FRAUD** at the front end when people register, and then making sure that people don't face unnecessary barriers and hassles when they actually participate in the fall of even-numbered years. So I commend Senators Dodd and McConnell for their work in this area.

Suffice it to say, at various stages in the discussion, I wasn't sure that we were going to make it. Look at how the debate began when this bill first came to the floor of the Senate. It seemed to me and others that millions of Americans would have been turned away from the polls because they didn't have with them a valid photo identification or a copy of a utility bill. It would have disenfranchised millions of Americans. I and others made that point to Chairman Dodd and Senator McConnell, and we began a very lengthy set of negotiations that involved Senators Dodd, McConnell, Bond, Cantwell, Schumer, and I. Together we were able to work out an agreement with respect to the photo identification provision. It protects fully the vote-by-mail system. In fact, it protects all Americans who want to vote early, as I have mentioned. It is outlined in section 303 of the conference report.

I thought I would take a minute to describe how this provision would work. Beginning in January 2004, anyone who registers to vote for the first time, let's say in Oregon, has the choice of registering by providing a driver's license number, the last four digits of their Social Security number, a copy of a current utility bill, bank statement, government document, or a valid photo identification. When they cast their ballot by mail, Oregon's State elections officials will verify the voter's eligibility consistent with State law by signature verification. Under our Oregon election law, an elections official determines voter eligibility by matching the signature on the registration with the signature on the mail-in ballot. Oregon's signature match system would not change.

My primary concern throughout this discussion has, of course, been to support our pioneering vote-by-mail system, which I think is the wave of the future. But as we have seen in recent days it is not just Oregon but a variety of other States are going to see millions of people saying they want to take the time, essentially through the fall when people are considering the candidates, to look at the statements put out and reflect on them in a way that is convenient for them.

We said at the beginning of this discussion that we wanted to discourage **FRAUD** and encourage voters. I think that is what the Dodd-McConnell legislation does. I am particularly pleased that it does so in a way that protects Oregon's pioneering system and all of those around this country who are going to be voting by mail.

Senator McConnell just mentioned that this is, in his view, just about as important as it gets for the Senate. I will reaffirm that statement. After all of the problems that we have seen in Florida, after you look at all of the challenges in terms of getting young people excited about politics and excited about the democratic process, what this legislation does is it reaches out and says: We understand those concerns. We understand that the American people feel more strongly about this subject than just about anything else because it is what we are about. It is about our values, our principles; it is what the Senate is all about. So I am very pleased that Senators Dodd and McConnell had the patience to work with some of us who, I am sure, were fairly prickly and difficult along the way. I don't know how many hours we had in negotiations just looking at the arcane details of some of the vote-by-mail States. But Senator Dodd said we are just not going to give up. We understand that you are doing something very exciting in the Pacific Northwest, and we encourage it.

In effect, what Senator Dodd has done is not just protect the Oregon system but allowed this country to build on something that I think is the wave of the future; that is, people voting essentially throughout the fall. We have seen\_ as reported recently in various States as they innovate with different kinds of systems\_ a variety of approaches that are being tried. My own sense is that it won't be very long before people start voting online in this country. [\*S10421]

So what Senator Dodd has done is made it clear that he is going to stand with all of us in the Senate who want to discourage **FRAUD**, and we are going to do it at the right time and in the right way, which is essentially at the front end when people come to sign up for the electoral process. But then, after we can ascertain they are who they say they are, they are not going to face innumerable hassles and barriers when they actually show up to vote.

So my thanks to Senator Dodd and his staff, Carole Grunberg, who is here. She has championed for us the Oregon vote-by-mail system. But with Senator Dodd in the Chamber, I want him to know how much I appreciate what he is doing. It means a tremendous amount to my constituents and also to this country and to the future of American voting.

I yield the floor.

Mr. DODD . Mr. President, before my colleague leaves the floor, I thank him and his staff as well for their tremendous contribution. One of the things we did in this bill\_ I say to my friend from Oregon that he is in large part responsible for this, I probably should give him more credit for this\_ we set Federal standards and rights that never have existed before in all Federal elections across the country, and we have enumerated the rights in this bill.

One of the things I fought very hard to preserve is that what constitutes a valid registration of a voter and what constitutes a valid vote is left up to the States. We don't federalize registration and we don't federalize how votes get counted. We have left that to the States. It would be overreaching to go that far.

I must say some of the most creative ideas on how to make this basic franchise accessible to the maximum number of people, the most creative ideas are occurring in our States across the country. There are differences in places, and States ought to have the flexibility of deciding what system works best for them.

I will tell my colleague, I have learned of some fascinating historical stories. Going back, people have said: Where in the Constitution does it say you have to be a citizen to vote? Well, it is the 14th and 15th amendments. The 14th amendment describes what a citizen is, and the 15th amendment says all citizens have the right to vote.

There was a time\_ and the Presiding Officer may find this interesting\_ when we discovered as part of our research that in the latter part of the 19th century, in certain areas of the upper Midwest, in efforts to attract immigrant populations to settle in some of the vast farmlands there, they actually said: We will allow you to vote in Federal elections\_ which they did. I cannot find the lawsuit that stopped it. I think it may have been by tradition, but it provided that the person who signed up made a promise that they would someday become a citizen. That was the condition that you had to fill out.

There are actually some jurisdictions in this country, by the way, not in Federal elections but local elections, where noncitizens, by municipal law, are allowed to vote.

The State of Oregon is, I think, on the cutting edge. I agree with my colleague on this. Maybe because I have a head of gray hair, but I like the idea of a community gathering at a polling place. There is a sense of community spirit about showing up.

In my town of East Haddam, CT\_ it is a small place with only a few thousand people and where I have lived for the last two decades\_ we all gather in the old townhall, literally around the potbellied stove. The folks I have known for the last two decades run the polling operations there. We like it that way. I am not suggesting there is a younger generation coming along who do not like the way they do it in Oregon\_ I suspect they might, and I suspect there will be States allowing people, in the not-too-distant future, to vote by Internet.

I thank him for bringing forward the Oregon and, we should add, the Washington experience, because they are similar experiences, to this debate. The fact we managed to accommodate the unique voting circumstances in their States gave rise to the idea there actually may be other States that may want to move in this direction. In fact, the provisions authored by my colleague and included in the conference report can be used by every state, and not just by Oregon and Washington. We thank Senator Wyden for his contribution and for making this a stronger and a better bill, and one that does maintain its sensitivity to the unique requirements and needs of people across this vast country of ours. I thank the distinguished Senator from Oregon for his contribution.

I note as well\_ it is somewhat an irony\_ I recall vividly the day Senator McConnell and I had announced we had reached an agreement, at least on the Senate version of this bill, our colleague who is now presiding over the Senate was presiding over the Senate that very day. He would not have known on that day a year and a half ago he would be presiding today as well. I thank him.

Mr. President, I wish to note because there are so many wonderful staff people and they do not get the credit they deserve\_ we get to stand here and give the speeches and our names go on the bills. There are literally dozens of people who work incredible hours to produce the kind of legislation we are endorsing today.

I mentioned already the Members on the House side, my colleagues, Bob Ney and Steny Hoyer, the principal House advocates. There was a long list of conferees, by the way, in the House. A number of committees of jurisdiction touched on matters in this bill, from the Ways and Means Committee to the Armed Services Committee\_ I will forget some\_ a lot of committees. So there were a lot more conferees from the other body on the conference committee. I thank them.

I extend my special appreciation for the invaluable expertise and contributions in negotiating this bill to final passage to Paul Vinovich, one of the principal staff people for Bob Ney, and Chet Kalis, who is a wonderful individual. Both of these men are remarkable people and did a fantastic job, not just for Bob Ney and the Republican side, but they always had the sense they wanted to get a bill done, and that is a big difference when you are in a conference. If you are looking across the table at people and if the negotiating is to stop something or to make something happen, what a difference it is when you talk to people who give you the sense they want something to happen. I thank them.

I thank Roman Buhler, a tough negotiator; Matthew Petersen; and Pat Leahy.

From the office of Steny Hoyer: Bill Cable. I have known Bill for all my years in Congress. When I served in the other body, Bill Cable was a terrific staff person then. He has a wonderful institutional memory about the Congress of the United States. Steny Hoyer is truly fortunate to have Bill Cable with him. I thank him for the long hours he put in on this legislation.

Keith Abouchar and Lenny Shambon were wonderful. They are knowledgeable people and have been very helpful on this. They understand the laws, and have a wonderful expertise in motor voter registration and how these proposals work.

I further thank John Conyers. I mentioned already my coauthor of this legislation initially, but I want to also thank his staff. I thank Perry Apelbaum, Ted Kalo, and Michone Johnson, who were just wonderful and tireless in their efforts. I thank them for their tremendous work. Along with John, they were a great source of information and guidance during some very delicate moments on how we ought to proceed.

Tom Daschle, our leader in the Senate, has been tremendously helpful through all of this. He asked me how long the original bill would take on the floor of the Senate when it came up. We had gotten through this, worked out the agreement, and there were a lot of demands for time on the floor. He looked at me and said: How long do you think it will take to debate the election reform bill?

I said: Mr. Leader, I think we can do it in 2 days.

Mr. President, if you look around, you can see the smiles on the faces of some of the floor staff. I think we were on the floor 9 days, had 46 amendments, and there were a hundred more, at least, proposed. I took some very healthy ribbing from the majority leader and others on the staff when they would look at me day after day [\*S10422] and say: How long did you say this bill would take? It took a lot longer than we anticipated.

I thank Andrea LaRue, Jennifer Duck, Michelle Ballantyne, Mark Childress, and Mark Patterson from the majority leader's staff for their patience and assistance.

With regard to Senator McConnell's staff, we spent a lot of time with Senator McConnell's staff. We spent more time with Senator McConnell's staff than with Senator McConnell, and he would be the first to say that. Tam Somerville, Brian Lewis, and Leon Sequeira are also very fine and hard-working staff members. Brian Lewis, poor Brian got saddled with more responsibilities. With all of this coming together, committee staff had to deal with campaign finance reform and election reform all at once. There were demands on their time, pulling them in two different directions, as we were trying to get this bill completed in the Senate so we could get to conference because we knew we had a long conference ahead of us. I express my gratitude to Brian. He is knowledgeable, worked hard, and made a significant contribution. I appreciate it very much.

Senator Schumer's staff: Polly Trottenberg, Christine Parker, Cindy Bauerly, and Sharon Levin were very helpful. I thank them.

Senator Bond: Julie Dammann and Jack Bartling. We had some real go-rounds with Senator Bond's staff on some of the provisions in this bill. I thank both of them for a lot of effort. Jack Bartling spent a lot of time during the Senate consideration, going back months and months ago, sitting up late nights in my conference room and going through what we wanted to do and how it might work. I occasionally would run into Jack off the Hill. Even in off hours in restaurants, we would end up being seated next to each other unintentionally by the maitre d'. We spent all day working on this legislation, and when I went out for an evening with my wife and child, who ended up sitting next to me but Jack Bartling, and here we go again carrying on conversations. I thank Jack.

I thank Jennifer Leach and Sara Wills on Senator Torricelli's staff. Senator Bob Torricelli offered some of the earliest versions of election reform. Early on he thought we ought to do something about election reform and worked

with Senator McConnell and others to craft legislation. He agreed to work with us on our bill when we developed it. I thank Senator Torricelli for working very hard on campaign election reform.

Senator McCain's staff: Ken LaSala. I offer a special appreciation for his invaluable expertise and contributions in negotiating and bringing this bill to final passage.

Senator Durbin's staff: Bill Weber was tremendously helpful to us. I thank him.

I thank Beth Stein and Caroline Fredrickson from Senator Cantwell's staff. I mentioned Oregon, Senator Wyden and his State, and the Senator from the State of Washington, Ms. Cantwell, had similar circumstances and were concerned about how the provisions of this bill would work in a State where a significant number of the people vote by mail. They wanted to be sure we were not doing anything here that was going to prohibit them from conducting their elections in the way they have done successfully for some time.

I mentioned Senator Wyden. I thank Carol Grunberg for her work as well.

The floor staff, again, were tremendously patient with this Member. I tied up the cloakroom for hours one Friday trying to get holds lifted on this bill.

The floor staff was tremendously helpful. Marty Paone, Lula Davis, Gary Myrick, members of the cloakroom staff, were tremendously supportive.

I apologize for going through all of this and mentioning these names. I could just submit them for the Record, but I want to say their names because just putting their names in the Record does not do justice to the amount of time and effort people have put in. So I beg the indulgence of the Chair and others as I go through this.

This may sound mundane or boring to those who are watching it, but I am someone who believes very strongly we ought to give more recognition to the people whose names never appear much around this place and yet who make incredible contributions to a product like this.

I want to thank the Office of Legislative Counsel. Let me explain what legislative counsel does. These are the people who actually write these bills. We tell them what we are thinking, these grand ideas of ours. A Senator has a grand idea. The staff tries to put language around the grand idea and then they go to legislative counsel, who then has to write it in a legalistic way so it can actually mean something because words have specific meaning.

So the legislative counsel's office was instrumental—we asked them to work around the clock on a few instances. Literally, they were up all night producing language because we were running up against the clock to get this bill done. So to Jim Scott and Jim Fransen of the Office of Senate Legislative Counsel, and Noah Wofsy, from the House legislative counsel, I want to express my deep sense of gratitude to them for their work. They sat down very objectively. Noah Wofsy is on the House side under the Republican leadership in the House. Jim Scott and Jim Fransen are in the Senate under the Democratic leadership of the Senate, but neither side was partisan in any way. I can honestly say if I sat them in a room and asked them for their views on how this ought to be written, I would never know from which party they had been chosen to do the job. They are that objective and that professional in how they do it.

Sometimes I wish America could watch this when they talk about laws. They could then see people such as these who are so dedicated and see to it that we can get it right. They did not bring political baggage to that discussion and debate.

I mentioned some history earlier about the upper Midwest and these other places. The Congressional Research Service, CRS, was the organization that provided me with some historical framework and background in the conduct of elections and also provided side-by-side versions of bills along the way. And we thank them: Kevin Coleman, who is an analyst in the American National Government; Eric Fischer, senior specialist in Science and Technology; L. Paige Whitaker, legislative attorney at the Congressional Research Service; David Huckabee, who is a specialist in American National Government; and Judith Fraizer, who is an information research specialist. They did a great job, and we are very grateful to them as well.

I wish to thank my own staff. Obviously, in my own heart and mind they come first, as one might expect, but my mother raised me to be polite so I mentioned other people first. I am particularly grateful to my own staff who worked very hard on this. Through my bellowing and barking, and doing all the things we do and wondering why we could not reach agreements earlier—I hope I was not too impatient with them—I want to thank Shawn Maher, who is my legislative director. He was tremendously patient and did a great job. Kennie Gill, who is the staff director and chief counsel of the

Rules Committee, is just one of the most knowledgeable people about this institution I have ever met in my 27 years in Congress. I have met Members who have great respect for the institution, its history, its traditions, what these buildings mean, and what membership means in the other body or this body. I have never met anybody, Member or non-Member, who has as much reverence for this institution as Kennie Gill, and I thank her.

Ronnie Gillespie, who is a terrific individual as well, is our counsel on the Rules Committee. She did a terrific job and I am very grateful to her, as well as my own staff, Sheryl Cohen, Marvin Fast, Alex Swartzel and Tom Lenard. Sheryl Cohen is my staff director, chief of staff of my office, and has to manage all of these things going around. She does a wonderful job, and I am very grateful to her. From the Rules Committee, Carole Blessington, Beth Meagher, Hasan Mansori, and Sue Wright also deserve some very special recognition. Chris Shunk, Jennifer Cusick, and Sam Young are non-designated staff on the Rules Committee staff, who kept the vouchers going during this time and they do wonderful work. There are some former members who were part of this effort who had to leave for various reasons before the completion of this bill, but the fact they are not here does not mean they should not be recognized. Stacy Beck, [\*S10423] Candace Chin, and Laura Roubicek are three people I want to thank.

That is 60 individuals I have mentioned. There may be others I have missed. If I have missed them, I apologize, but I want them to know that all of us, regardless of political persuasion or ideology, thank them, and millions of Americans ought to as well because we never would have achieved this conference report, been able to write this bill, had it not been for these 60 individuals and many more like them.

I have not mentioned the individuals on the outside that worked on this, the NAACP, the National Association of Secretaries of State, the AFL-CIO, the various disability groups. There are literally hundreds of people who are involved in this journey over the last year and a half to produce this conference report. I know normally we do not take as much time to talk about all of this, but I think Senator McConnell and I, and not because it is a pride of authorship, but we think we have done something very historically significant. We are changing America. We are changing the way America is going to be choosing its leadership. We want everyone to participate in this country. It is a source of significant embarrassment to me that there are individuals who cannot participate.

I served in the Peace Corps in Latin America back in the 1960s. So I am asked periodically to go and observe elections, particularly in Latin America, because I know the language and have knowledge of the area. I cannot say how moving it is to watch some of these desperately poor countries where the people who lack any formal education, or have very little of it, will literally stand in line all day, walk miles through blistering and difficult weather, intimidation, fear of literally being killed if they show up, and they vote. They look to us as a beacon of what it means as a free people to be able to choose who represents us, from the most insignificant office on the municipal or town level to the Presidency of the United States. The idea that each and every one of us can be a part of making those choices, and the fact that only 50 percent of our eligible population does so, ought to be a source of collective shame. While this bill is not going to eradicate all of that, when we consider how hard some people fight to be free, how blessed we are as a people and how little is asked of us to participate in the process which has historically distinguished us as a people, our sincere hope today, as we vote tomorrow on this bill, is we have made it easier for people to meet that obligation and made it more difficult for those who would like to scam it in some way. But the most important thing this legislation does is to make it easier for people to make that choice.

So all of those who have been involved in this have my profound sense of gratitude, and I am very confident that sense of gratitude is going to be expressed by millions of people for years to come because of what we have done in the wake of a tragedy in the year 2000, on November 7. We have responded to it with this legislation. Not in every sense, but on some of the core questions, this Congress has stepped up to the plate and responded to those issues. The leadership and Members of the other body, as well as the leadership here, can rightfully claim a proud moment when this bill passes the Senate tomorrow and President Bush signs this legislation as the permanent law of our land.

CONGRESSIONAL RECORD -- *HOUSE*

Thursday, October 10, 2002

107th Congress, 2nd Session

*148 Cong Rec H 7836*

**REFERENCE:** Vol. 148, No. 133

**SECTION:** House

**TITLE:** CONFERENCE REPORT ON H.R. 3295, HELP AMERICA VOTE ACT OF 2002

**SPEAKER:** Mr. NEY; Mr. HOYER; Mr. EHLERS; Mr. CONYERS; Mr. GONZALEZ; Mr. MENENDEZ; Mr. FATTAH; Mr. DAVIS of Florida; Ms. WATERS; Mr. PRICE of North Carolina; Mr. LANGEVIN; Ms. BROWN of Florida; Mrs. MALONEY of New York; Ms. KILPATRICK; Mrs. MEEK of Florida; Ms. DeLAURO; Ms. JACKSON-LEE of Texas; Ms. SCHAKOWSKY; Mr. DAVIS of Illinois; Ms. SOLIS; Mr. HOLT; Mr. BOEHLERT; Mrs. JONES of Ohio; Ms. McCARTHY of Missouri; Mr. VITTER; Mr. HASTINGS of Florida

**TEXT:** [\*H7836]

Mr. NEY . Mr. Speaker, pursuant to the order of the House of October 9, 2002, I call up the conference report on the bill ( H.R. 3295) to establish a program to provide funds to States to replace punch card voting systems, to establish the Election Assistance Commission to assist in the administration of Federal elections and to otherwise provide assistance with the administration of certain Federal election laws and programs, to establish minimum election administration standards for States and units of local government with responsibility for the administration of Federal elections, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the order of House of Wednesday, October 9, 2002, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of October 8, 2002, at page H 7247.)

The SPEAKER pro tempore. The gentleman from Ohio (Mr. Ney) and the gentleman from Maryland (Mr. Hoyer) each will control 30 minutes.

The Chair recognizes the gentleman from Ohio (Mr. Ney).

General Leave

Mr. NEY . Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks and include extraneous material on H.R. 3295.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. NEY . Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this has been a long, winding process that is about to conclude tonight, in what I think is going to be known as one of the most important votes that any Member of this body can cast, not only for this session but for the future, for decades to come, of the future of the voting process for the citizens of the United States. [\*H7837]

I am pleased to present to the House the conference report for H.R. 3295, the Help America Vote Act of 2002. This legislation will have a profound and positive impact on the way we conduct Federal elections in this country. At the heart of the bill are some fundamental principles:

One, that every eligible citizen shall have the right to vote.

Two, that no legal vote will be canceled by an illegal vote.

Three, that every vote will be counted equally and fairly, according to the law.

When this legislation goes into effect, the voting citizens in this country will have the right to a provisional ballot, so no voter will be turned away from a polling place, no voter will be disenfranchised, just because their name does not appear on a registration list.

Henceforth, instead of simply being told to go home, the voters will be able to cast a provisional ballot which will be counted according to State law.

Voters will now also be able to have the opportunity to check for errors and verify the accuracy of their ballot in privacy before it is cast. No more will voters have to wonder if their vote was properly recorded or not. By guaranteeing them the right to verify the accuracy of their ballot in privacy, voters will be able to leave the polling place confident and certain that their vote was cast and counted in complete secrecy as they intended it to be.

This bill contains tremendous advances for individuals with disabilities. This legislation requires that every polling place in the country have at least one voting system that is accessible to the disabled, meaning individuals with disabilities, including the blind and visually impaired. They will now have the right to cast a secret and secure ballot in the same manner as all other Americans do.

No longer will individuals with disabilities have to rely on an assistant, or compromise the secrecy of their ballot. They will be able to vote in a private and independent manner, the same way all their fellow citizens do, many for the first time in their lives.

The legislation establishes a maximum error rate for voting system performance. This error rate is a measure of the performance of voting system prototypes under laboratory conditions to determine that the system counts votes accurately in accordance with national standards stands in Section 3.2.1 of the Voting System Standards adopted by the FEC.

I will include Section 3.2.1. for the record.

At the heart of our elections system is the process of how we maintain our records on who is eligible to vote. Currently, thousands of election jurisdictions across the country manage these records independently. Some employ the latest technologies and database management techniques to ensure accuracy and reliability. Others need improvement.

This bill will require each State to develop a Statewide registration system. These systems will modernize, centralize and improve current methods for ensuring the accuracy of registration lists.

The current system in many States creates inefficiencies and duplications, as voters often move from one jurisdiction to another within a State without notifying the jurisdiction that they used to live in before they made the move. The result is that a single individual may appear on more than one registration list in a State.

These Statewide systems will make it possible for States to more effectively maintain voter registration information, as they should. States will have more accurate systems to protect voters from being mistakenly removed from the list, while ensuring that costly duplicates that invite voter **FRAUD** are quickly removed.

The lists maintained by the State will be the official list used to determine who is registered to vote on Election Day. Uniformity and integrity in the system will be assured as local election jurisdictions will no longer be able to maintain separate lists.

This bill contains important new guarantees for military and overseas voters. Military voters will be guaranteed assistance and information that they need from the Department of Defense so they can complete and return their ballots on time. The military is required to mark all ballots so it can be determined when they were mailed, so no valid military ballot will be rejected for lack of a postmark. All enlistees will receive a voter registration form upon enlistment. We all know how important that is for those who are serving their country and laying their lives on the line.

State election officials must establish a single office where military and overseas voters can get information on how to vote in that State. For the first time, they will be required to accept ballots mailed early from military personnel whose duties, for example, on a submarine, may prevent them from mailing ballots on a date close to the election. For the first time, we will have a report on the number of applications received and absentee ballots sent out to military and overseas voters, together with the number of those ballots that have been returned. Studies of these numbers may help us determine how to future improve participation and turnout among those voters.

Our election system is dependent on tens of thousands of election officials and 1.5 million volunteer poll workers in over 7,000 jurisdictions serving over 150 million voters across this great country. In the general election for Federal office, all of these people come together during a 24-hour period to chose our leaders. It is an incredibly complicated process that must be choreographed precisely to ensure its success. This means that education and training is critical to the success of our elections system. This legislation provides needed funds to complete that task across the United States.

A provision in this package that has been the subject, frankly, of some controversy is the voter ID provision that was included in the Senate-passed bill and is included in this conference report.

I want to emphasize this provision does not require voters to present an actual photo ID. In recognition of the fact that some citizens do not have such an ID, the bill allows a voter a number of options to identify themselves, including a bank statement, utility bill or government check. The provision applies only to first-time voters who register by mail. Language has been added to ensure it will be administered in a uniform and non-discriminatory manner, Mr. Speaker.

The voter ID provision is very important and will go a long way toward enhancing the integrity of our election process. People should not be permitted to register by mail and then vote by mail without ever having to demonstrate in some fashion they are the actual human being who is eligible to vote. I think this is at least the minimal we can ask.

This provision will help to end the practice of ghost voting, whereby people who do not exist are miraculously somehow able to vote. We should all keep in mind that a person whose vote is canceled out by an illegal vote has been disenfranchised every bit as much as an individual who has simply also been turned away from the polls. In either case, that is not the correct thing to do. This ID provision will protect against **FRAUD** of this type, and I am glad the conference saw fit to include it in the package.

Mr. Speaker, the election that took place in November of 2000 demonstrated there are serious problems in our election system. While the initial attention was focused on Florida, we have all learned over the past 2 years that the problems encountered were not unique but in fact were widespread. We just simply did not know it because there was not an election of the magnitude of the presidential that brought all of this to light through the national media.

While the problems varied from State to State, one common problem was a failure to devote sufficient resources to election infrastructure. Not surprising, when State and local officials are faced with the decision of how to spend their limited resources and have to choose between things citizens use every day, like roads and schools, or spend it on equipment that might get used only a couple of times a year, like election equipment, the latter has often come up short; and this bill will help to solve that.

This lack of resources has left States with old and unreliable voting equipment, inadequate training and education of voters and poll workers and, frankly, poor registration systems. [\*H7838]

While State and local governments have been charged with the responsibility of running elections for Federal office, they have simply received no assistance from the Federal Government. This bill changes that.

It is time for the Federal Government to provide some funding to make sure that the world's greatest democracy has an election system it can have pride and confidence in. And remember, when we take our thoughts of democracy across the waters and we try to monitor elections, we have to have our own house in order so that we have the confidence that other countries will see that our system is the best it can be.

The Help America Vote Act will provide Federal financial assistance to the tune of \$3.9 billion in authorized funding over the next 3 years. We can no longer ask State and local governments to bear all of the expense without any assistance from us.

I would also note that according to figures from the Congressional Research Service and the State Department, the United States has spent more than \$3 billion over the past 7 years to promote democracy abroad. I support that; I think

we need to be promoting democracy in other countries. I just believe we need to start spending some Federal dollars to bolster our own democracy here at home.

I would also note that meeting the requirements of this act will not be cheap. If we want and expect State and local governments to meet the requirements we are imposing on them, we will have to provide the funding that will make it possible for them to do so. If we do not, we have done nothing more than pass another unfunded mandate to the States, and we do not want to do that. This bill will cause States and localities to fundamentally restructure their election systems in a host of tremendous ways. We need to provide the funding to make sure that happens.

In addition to the funding it provides, the bill will assist the States with their election administration problems by creating a new Federal election assistance commission. This independent, bipartisan entity will be responsible for providing advice, guidance, and assistance to the States. It will act as a clearinghouse for information and make recommendations on best practices.

I want to stress that the name of the commission, the Election Assistance Commission, is not an accident. The commission's purpose is to assist States with solving their problems. It is not meant and does not have the power to dictate to States how to run their elections. This will not be a bill where Washington, D.C. turns around and says, this is the way you do it. It will not have rulemaking authority. The fundamental premise of the legislation on the commission was to have no rulemaking authority, and it cannot impose its will on the States; but I have to tell my colleagues, it has a heart to this commission, and it has the ability to make changes.

This commission was an important point the gentleman from Maryland (Mr. Hoyer) and I talked about when we devised the Ney-Hoyer bill, because we wanted to make sure it worked for local governments and we wanted to make sure that this would be carried out.

Historically, elections in this country have been administered at the State and local level. This system has had many benefits that have to be preserved. The dispersal responsibility for election administration has made it impossible for a single centrally controlled authority to dictate how elections will be run and thereby be able to control the outcome. This leaves the power of responsibility for running elections right where it needs to be: in the hands of the citizens of this country. Local control has the further added benefits of allowing for flexibility so that local authorities can tailor their procedures to meet demands and unique community needs.

Further, by leaving the responsibility for election administration in the hands of local authorities, if a problem arises, the citizens who live within their jurisdictions know whom to hold accountable. The local authorities who bear the responsibility cannot now and not in the future be able to point the finger of blame at some distant, unaccountable, centralized bureaucracy.

By necessity, elections must occur at the State and local level. One-size-fits-all solutions do not work and only lead to inefficiencies. States and locales must retain the power and the flexibility to tailor solutions to their own unique problems. This legislation will pose certain basic requirements that all jurisdictions will have to meet, but they will retain the flexibility to meet the requirements in the most effective manner.

State and local officials from every State in America will have a voice on this commission. While the commissioners will have expertise and experience with election issues and administration, they can still benefit from the advice and council of those who are on the ground, running elections around this country. State and local election officials in each State will ultimately bear the responsibility for carrying out the commission's recommendations so their voices must be heard as these guidelines and recommendations and best practices are developed.

The Help America Vote Act strikes the appropriate balance between local and Federal involvement. It provides for Federal assistance, acknowledging the responsibility we share to ensure that the elections that send all of us to Washington are conducted properly, without concentrating power in Washington in a manner that will prove at best ineffective, and at worst dangerous.

This conference report has received the support of a very diverse group of organizations that care about how elections are run in this country. I would like to introduce into the Record the statements of support from the following organizations: the National Commission on Federal Election Reform (Ford-Carter Commission), National Conference of State Legislatures, National Association of Secretaries of State, National Association of Counties, The Election Center, National Federation of the Blind, Common Cause, National Association of State Election Directors, United Auto Workers, AFL-CIO, NAACP, American Foundation for the Blind, National Association of Protection Advocacy Systems, and United Cerebral Palsy Association.

Mr. Speaker, let me also say that I have presented the thrust of the bill, I have presented the heart of the bill. We have a couple of speakers, and then I am going to conclude by also telling how this bill got here.

[Media release from the National Commission on Federal Election Reform]

Former Presidents Ford and Carter Welcome the Agreement Reached by the Congress on Election Reform Legislation

Oct. 4, 2002. Today, former Presidents Gerald R. Ford and Jimmy Carter, along with Lloyd Cutler and Bob Michel, co-chairs of the National Commission on Federal Election Reform, welcomed the bipartisan agreement struck by the House and Senate Conference Committee on a bill to reform federal elections.

"The bill represents a delicate balance of shared responsibilities between levels of government," Ford and Carter said. "This comprehensive bill can ensure that America's electoral system will again be a source of national pride and a model to all the world." Indeed, all four of the co-chairs share the belief of Congressman John Lewis (D-GA) and others that, if passed by both Houses and signed by President Bush, this legislation can provide the most meaningful improvements in voting safeguards since the civil rights laws of the 1960s.

For more information on the National Commission on Federal Election Reform, please contact Ryan Coonerty at [REDACTED] or Margaret Edwards at [REDACTED].

National Conference

of State Legislatures,

Washington, DC, October 7, 2002.

Hon. Robert Byrd,

Chairman, Senate Appropriations Committee, Capitol Building, Washington, DC.

Hon. Bill Young,

Chairman, House Appropriations Committee, Capitol Building, Washington, DC.

Dear Chairmen Byrd and Young: On behalf of the nation's state legislators, we urge to make reform of our nation's election processes a reality by providing sufficient funding to implement H.R. 3295. The conference agreement announced today will provide an effective means for states and counties to update their election processes without federalizing election administration. NCSL worked closely with the conferees in the development of this legislation and is satisfied that it keeps election administration at the state and local level, limits the role of the U.S. Justice Department to enforcement, does not create a federal private right of action, and establishes an advisory commission that will include two state legislators [\*H7839] to assist with implementation. NCSL commends the conferees for their work on this landmark legislation and is committed to implementing the provisions of H.R. 3295 to ensure every voter's right to a fair and accurate election.

To ensure proper implementation and avoid imposing expensive unfunded mandates on the states, it is critical that the federal government immediately deliver sufficient funding for states to implement the requirements of this bill. Neither of the existing versions of appropriations legislation provides sufficient funding for election reform. We urge you to fully fund H.R. 3295 at the authorized level of \$2.16 billion for FY 2003.

The Congressional Budget Office has estimated that it may cost states up to \$3.19 billion in one-time costs to begin implementing the provisions of this legislation. In this current fiscal environment, it will be extraordinarily difficult for states to implement the minimum standards in the bill without immediate federal financial support. States are already facing budget shortfalls for FY 2003 of approximately \$58 billion. Thirteen states have reported budget gaps in excess of 10 percent of their general fund budgets. To satisfy their balanced budget requirements, states are being forced to draw down their reserves, cut budgets, and even raise taxes.

We look forward to working with you to keep the commitment of the states and the federal government to implementing H.R. 3295. If we can be of assistance in this or any other matter, please contact Susan Parnas Frederick

(202-624-3566; susan.frederick@ncsl.org) or Alysoun McLaughlin ([REDACTED]; alysoun.mclaughlin@ncsl.org) in NCSL's state-federal relations office in Washington, D.C.

Sincerely,

Senator Angela Z. Monson, Oklahoma,

President, NSCL.

Speaker, Martin R. Stephens, Utah,

President-elect, NCSI.

National Association

of Secretaries of State,

Washington, DC, October 9, 2002.

Committee on House Administration,

Longworth Building,

Washington, DC.

Dear Chairman Ney and Ranking Member Hoyer: The National Association of Secretaries of State (NASS) congratulates you on the completion of H.R. 3295, the "Help America Vote Act." The bill is a landmark piece of bipartisan legislation, and we want to express our sincere thanks for your leadership during the conference negotiations. We also commend your Senate colleagues: Senators Chris Dodd, Mitch McConnell and Kit Bond.

The nation's secretaries of state, particularly those who serve as chief state election officials, consider this bill an opportunity to reinvigorate the election reform process. The "Help America Vote Act" serves as a federal response that stretches across party lines and provides a substantial infusion of federal money to help purchase new voting equipment and improve the legal, administrative and educational aspects of elections. In fact, our association endorsed the original draft of H.R. 3295 in November 2001.

Specifically, the National Association of State (NASS) is confident that passage of the final version of H.R. 3295 will authorize significant funding to help states achieve the following reforms:

Upgrades to, or replacement of, voting equipment and related technology;

Creation of statewide voter registration databases to manage and update voter registration rolls;

Improvement of poll worker training programs and new resources to recruit more poll workers throughout the states;

Increases in the quality and scope of voter education programs in the states and localities;

Improvement of ballot review procedures, whereby voters would be allowed to review ballots and correct errors before casting their votes;

Improved access for voters with physical disabilities, who will be allowed to vote privately and independently for the first time in many states and localities;

Creation of provisional ballots for voters who are not listed on registration rolls, but claim to be registered and qualified to vote.

We want to make sure the states will get the funding levels they've been promised, and that Congress will provide adequate time to enact the most substantial reforms. Please be assured that the nation's secretaries of state are ready to move forward once Congress passes H.R. 3295 and the President signs it.

If we can be of further assistance to you, your staff members, or your colleagues in the U.S. House of Representatives, please contact our office at [REDACTED].

Best regards,

Dan Gwadosky,

NASS President,

Maine Secretary of State.

National Association of Counties,

Washington, DC, October 9, 2002.

Hon. Bob Ney,

Chairman, House Administration Committee, House of Representatives, Longworth House Office Building, Washington, DC.

Hon. Steny Hoyer,

Ranking Democrat, House Administration Committee, House of Representatives, Longworth House Office Building, Washington, DC.

Dear Chairman Ney and Representative Hoyer: We would like to congratulate you and thank you for your leadership, perseverance and hard work in reaching agreement in the House-Senate conference on the "Help America Vote Act of 2002." We believe the final bill is a balanced approach to reforming election laws and practices and to providing resources to help counties and states in improving and upgrading voting equipment. The National Association of Counties supports H.R. 3295 as it was approved by the House-Senate conference Committee.

We are very concerned about Congress providing the funds to implement the new law. While there is much confusion at this time about the appropriation process for FY2003, we strongly urge the leadership of the House and Senate and President Bush to support inclusion of \$2.16 billion in a continuing resolution. This is the amount authorized for FY2003 by the "Help America Vote Act." We believe that funding and improving voting practices in the United States is as important as our efforts to strengthen homeland security.

Thank you again for your continuing efforts to fund and implement this new law.

Sincerely,

Larry E. Naake,

Executive Director.

Election Center,

Houston, TX, October 8, 2002.

Hon. Robert Ney,

Hon. Steny Hoyer,

Hon. Christopher Dodd,

Hon. Mitch McConnell,

House Administration Committee and Senate Rules Committee, Washington, DC.

Congressmen Ney and Hoyer and Senators Dodd and McConnell: On behalf of the elections community of America, I want to congratulate each of you for accomplishing what grizzled veterans said could not be done: you have produced bi-partisan legislation that will help America cure the worst of the problems discovered in Election 2000.

011511

The Election Center neither supports nor opposes legislation\_our members nationwide will do that on their own\_but we can state what we believe the impact of the legislation will do for American elections.

This bill is not perfect. Few pieces of legislation that deal with complex issues are. And I know that there have been public comments from some quarters that they dislike provisions contained in the legislation. I hope that we all can remember that agreements between the two parties are hard to satisfy when we talk about something as fundamental as the democratic process.

As leaders of the committees of jurisdiction in the U.S. House and the U.S. Senate you have fashioned legislation which does, however, address many of the serious problems discovered in Election 2000. You have found methods which reach and solve many of the real problems and provides a role for each level of government. Real progress is offered in your legislation in assuring Americans that they will be able to go exercise their right to vote and have those votes counted.

Finding the right balance of voter protections, integrity of the process, and yet not upsetting the ability of states and local governments to maintain responsibility for this process has not been an easy task. You have managed to reach consensus that protects the rights of minorities, extends new services to the blind and disabled, to military and overseas voters, and allows the states to help rebuild the infrastructure of elections. The months of delay waiting on bi-partisan legislation have developed a true compromise bill. While perfection may not have been reached, it is a good compromise for our democracy.

Congratulations on a job well done. This is responsible legislation.

Sincerely,

R. Doug Lewis,

Executive Director.

National Federation

of the Blind,

Baltimore, MD, October 9, 2002.

Hon. Robert Ney,

Chairman,

Hon. Steny H. Hoyer,

Ranking Minority Member,

Committee on House Administration, House of Representatives, Washington, DC

Dear Mr. Chairman and Congressman Hoyer: I am writing to express the strong support of the National Federation of the Blind (NFB) for the Help America Vote Act of 2002. Thanks to your efforts and strong bipartisan support, this legislation includes provisions designed to guarantee that all blind persons will have equal access to voting procedures and technology. We particularly endorse the standard set for blind people to be able to vote privately and independently at each polling place throughout the United States.

While the 2000 election demonstrated significant problems with our electoral system, consensus regarding the solution proved to be much more difficult to find. Part of that solution will now include installation of up-to-date technology for voting throughout the United States. This means that voting technology will change, and devices purchased now will set the pattern for decades to come.

With more than 50,000 members representing every state, the District of Columbia, and Puerto Rico, the NFB is the largest organization of blind people in the United States. As such we know about blindness [\*H7840]

from our own experience. The right to vote and cast a truly secret ballot is one of our highest priorities, and modern technology can now support this goal. For that reason, we strongly support the Help America Vote Act of 2002 and appreciate your efforts to enact this legislation.

Sincerely,

James Gashel,

Director of Governmental Affairs.

#### Common Cause President Praises Election Reform Agreement

Statement by Scott Harshbarger, president and chief executive officer of Common Cause, on the conference agreement on the election reform bill:

"The Help America Vote Act of 2002 is, as Senator Christopher Dodd (D-CT) has said, the first major piece of civil rights legislation in the 21st century. Nearly two years after we all learned that our system of voting had serious flaws, Congress will pass these unprecedented reforms.

"For the first time, the federal government has set high standards for state election officials to follow, while authorizing grants to help them comply. Billions of dollars will be spent to across the country improve election systems.

"This bill, while not perfect, will make those systems better. Registration lists will be more accurate. Voting machines will be modernized. Provisional ballots will be given to voters who encounter problems at the polling place. Students will be trained as poll workers.

"As Common Cause knows from a seven-year fight to pass campaign finance reform, compromise often comes slowly. We thank the bill's sponsors, Senators Dodd, Mitch McConnell (R-KY), Christopher Bond (R-MO), and Representatives Robert Ney (R-OH) and Steny Hoyer (D-MD) for their work. Their persistence\_ even when negotiations bogged down\_ brought this bill through.

"After the President signs this bill, states will need to act. Implementing this bill will require state legislatures to change laws, election officials to adopt new practices, polling places to alter their procedures, and poll workers to be retrained.

"These far-reaching changes will not come easily. The bill's enforcement provisions are not as strong as the 1993 Motor Voter law or the 1965 Voter Rights Act. Some states may lag behind and fail to implement these changes properly; some polling places will experience problems like in Florida this year; others may have problems implementing the new identification provisions.

"Common Cause and our state chapters will work with civil rights groups and others to ensure that states fully and fairly implement the new requirements. We will help serve as the voters' watchdogs: citizen vigilance can protect voters from non-compliant states.

"Voters can now look forward to marked improvements at the polls in the years ahead, thanks to the bipartisan leadership of the bill's sponsors."

National Association of

State Election Directors,

October 10, 2002.

Hon. Bob Ney,

Hon. Steny Hoyer,

House Administration Committee, Longworth House Office Building, Washington, DC.

Dear Congressmen Ney and Hoyer: The National Association of State Election Directors (NASSED) congratulates you on the successful completion of the final conference report on H.R. 3295. This initiative will significantly affect the manner in which elections are conducted in the United States. On balance, H.R. 3295 represents improvements to the

administration of elections. As administrators of elections in each state we express our appreciation to you and your staff for providing us access to the process and reaching out to seek our views and positions on how to efficiently and effectively administer elections.

As with all election legislation, H.R. 3295 is a compromise package, which places new challenges and opportunities before state and local election officials. We stand ready to implement H.R. 3295 once it is passed by Congress and signed into law by the President. Implementation of this bill will be impossible without the full \$3.9 billion appropriation that is authorized. The success of this bold congressional initiative rests in large measure upon the appropriation of sufficient funds to bring the bill's objectives to reality.

We found the bipartisan approach to this legislation refreshing and beneficial. Thank you again for including NASED in the congressional consideration of the bill.

If we can be of further assistance, please contact our office at [REDACTED]

Sincerely,

Brook Thompson,

President.

International Union, United Automobile, Aerospace & Agricultural Implement Workers of America,

Washington, DC, October 8, 2002.

Dear Senator Dodd: This week the Senate may take up the conference report on the election reform legislation (H.R. 3295, the Help America Vote Act). The UAW supports this important legislation and urges you to vote for this conference report.

In our judgment, the conference report on H.R. 3295 will make significant improvements in our nation's election system. In particular, this legislation will require the states to allow registered individuals to cast provisional ballots if their names are mistakenly excluded from voter registration lists at their polling places. It also requires the states to ensure that voting machines allow voters to verify and correct their votes before casting them. And it requires the states to develop centralized, statewide voter registration lists to ensure the accuracy of their voter registration records. The legislation authorizes substantial new federal funding to help the states implement these reforms.

The UAW urges Congress to closely monitor progress by the states and federal government in implementing the provisions of this legislation. We believe it is especially important to make sure that the voter identification requirements are not implemented in a manner that disenfranchises or discriminates against any group of voters.

Thank you for considering our views on this important legislation to reform our nation's election system.

Sincerely,

Alan Reuther,

Legislative Director.

American Federation of Labor and Congress of Industrial Organizations,

Washington, DC, October 8, 2002.

Dear Senator: The AFL-CIO supports the conference report on H.R. 3295, the Help America Vote Act.

This conference report will help improve our nation's election system in several important ways. It will allow registered individuals to cast provisional ballots even if their names are mistakenly excluded from voter registration lists at their polling places. It will require states to develop centralized, statewide voter registration lists to ensure the accuracy of their voter registration records. It will also require states to provide at least one voting machine per polling place that is accessible to the disabled and ensure that their voting machines allow voters to verify and correct their votes before casting them.

Since the actual number of individuals enfranchised or disenfranchised by the conference report on H.R. 3295 will depend on how the states and the federal government implement its provisions, the AFL-CIO will closely monitor the

progress of this new law\_ especially its voter identification requirements. We will also increase our voter education efforts to ensure that individuals know and understand their new rights and responsibilities.

Sincerely,

William Samuel,

Director,

Department of Legislation.

National Association for the

Advancement of Colored People,

Washington, DC, October 8, 2002.

Re conference report to H.R. 3295, the Help America Vote Act (election reform).

Dear Senators: The National Association for the Advancement of Colored People (NAACP), our Nation's oldest, largest and most widely-recognized grassroots civil rights organization supports the conference report on H.R. 3295, the Help America Vote Act and we urge you to work quickly towards its enactment.

Since its inception over 90 years ago the NAACP has fought, and many of our members have died, to ensure that every American is allowed to cast a free and unfettered vote and to have that vote counted. Thus, election reform has been one of our top legislative priorities for the 107th Congress and we have worked very closely with members from both houses to ensure that the final product is as comprehensive and as nondiscriminatory as possible.

Thus we are pleased that the final product contains many of the elements that we saw as essential to addressing several of the flaws in our Nation's electoral system. Specifically, the NAACP strongly supports the provisions requiring provisional ballots and statewide voter registration lists, as well as those ensuring that each polling place have at least one voting machine that is accessible to the disabled and ensuring that the voting machines allow voters to verify and correct their votes before casting them.

The NAACP recognizes that the actual effectiveness of the final version of H.R. 3295 will depend upon how the states and the federal government implement the provisions contained in the new law. Thus, the NAACP intends to remain vigilant and review the progress of this new law at the local and state levels and make sure that no provision, especially the voter identification requirements, are being abused to disenfranchise eligible voters.

Again, on behalf of the NAACP and our more than 500,000 members nation-wide, I urge you to support the swift enactment of the conference report on H.R. 3295, the Help America Vote Act. Thank you in advance for your attention to this matter; if you have any questions or comments I hope that you will feel free to contact me at (202) 638-2269.

Sincerely,

Hilary O. Shelton,

Director. [\*H7841]

American Foundation

for the Blind,

Washington, DC, October 2, 2002.

Hon. Christopher Dodd,

U.S. Senate, Russell Senate Office Building, Washington, DC.

Dear Senator Dodd: The American Foundation for the Blind supports the conference report for S. 565 and H.R. 3295. We are pleased that the conference report contains the disability provisions of the Senate bill.

Already this year, in some jurisdictions, blind and visually impaired voters have, for the first time, been able to cast a secret and independent ballot. We look forward to the day when all voters with visual impairments will have full and independent access to the electoral process.

The mission of the American Foundation for the Blind (AFB) is to enable people who are blind or visually impaired to achieve equality of access and opportunity that will ensure freedom of choice in their lives. AFB led the field of blindness in advocating the enactment of the Americans with Disabilities Act of 1990 (ADA). Today, AFB continues its work to protect the rights of blind and visually impaired people to equal access to employment, information, and the programs and services of state and local government.

Sincerely,

Paul W. Schroeder,

Vice President,

Governmental Relations.

United Cerebral

Palsy Associations,

Washington, DC, October 9, 2002.

Dear Senator Dodd: United Cerebral Palsy Association and affiliates support the conference report on H.R. 3295, the Help America Vote Act. We also take this opportunity to commend you for the work you did to ensure that all people with disabilities have equal access under this act.

This legislation, while not perfect, will go a long way in improving the ability of people with disabilities to exercise their constitutional right and responsibility to vote. The funding allocated for the multiple provisions of H.R. 3295 is critical, and we pledge to work with Congress to ensure that this funding is made available.

UCP stands ready to assist states' and local entities as they work toward compliance of this very important legislation. The changes outlined in the bill must be adopted swiftly, correctly and fairly, and it will be incumbent upon us all to help in this process.

Finally, UCP applauds you and your colleagues on your dogged determination to pass legislation that will make distinct improvements at the polls and in the lives of voters with disabilities.

Sincerely,

Patricia Sandusky,

Interim Executive Director.

National Association of

Protection & Advocacy Systems,

October 9, 2002.

Hon. Chris Dodd,

U.S. Senate, Russell Senate Office Building, Washington, DC.

Dear Senator Dodd: The Protection and Advocacy System (P&A) and the Client Assistance Programs (CAPs) comprised a federally mandated, nationwide network of disability rights agencies. Each year these agencies provide education, information and referral services to hundreds of thousands of people with disabilities and their families. They

also provide individual advocacy and/or legal representation to tens of thousands of people in all the states and territories. The National Association for Protection and Advocacy Systems (NAPAS) is the membership organization for the P&A network. In that capacity, NAPAS wants to offer its support for the passage of "The Help America Vote Act of 2002 (H.R. 3295).

NAPAS believes that the disability provisions in the bill go far to ensure that people with all types of disabilities \_physical, mental, cognitive, or sensory\_ will have much improved opportunities to exercise their right to vote. Not only does this bill offer individuals with disabilities better access to voting places and voting machines, but it also will help provide election workers and others with the skills to ensure that the voting place is a welcome environment for people with disabilities. NAPAS is very pleased that P&A network will play an active role in helping implement the disability provisions in this bill.

NAPAS is well aware that there are still some concerns with certain provisions of the bill. We hope that these concerns can be worked out, if not immediately, then as the bill is implemented. It would be extremely unfortunate if people continued to face barriers to casting their ballot after this bill is signed into law.

Finally, we want to thank the bill's sponsors, Senators Dodd (D-CT) and McConnell (R-KY) and Representatives Ney (R-OH) and Hoyer (D-MD) for their hard work and perseverance. We look forward to working with each of them to ensure the swift and effective implementation of this important legislation.

Sincerely,

Bernadette Franks-Ongoy,

President.

Federal Election Commission

voting system standards\_section 3.2.1

### 3.2.1 Accuracy Requirements

Voting system accuracy addresses the accuracy of data for each of the individual ballot positions that could be selected by a voter, including the positions that are not selected. For a voting system, accuracy is defined as the ability of the system to capture, record, store, consolidate and report the specific selections and absence of selections, made by the voter for each ballot position without error. Required accuracy is defined in terms of an error rate that for testing purposes represents the maximum number of errors allowed while processing a specified volume of data. This rate is set at a sufficiently stringent level such that the likelihood of voting system errors affecting the outcome of an election is exceptionally remote even in the closest of elections.

The error rate is defined using a convention that recognizes differences in how vote data is processed by different types of voting systems. Paper-based and DRE systems have different processing steps. Some differences also exist between precinct count and central count systems. Therefore, the acceptable error rate applies separately and distinctly to each of the following functions:

- a. For all paper-based systems: (1) Scanning ballot positions on paper ballots to detect selections for individual candidates and contests; and (2) conversion of selections detected on paper ballots into digital data.
- b. For all DRE systems: (1) Recording the voter selections of candidates and contests into voting data storage; and (2) independently from voting data storage, recording voter selections of candidates and contests into ballot image storage.
- c. For precinct-count systems (paper-based and DRE): Consolidation of vote selection data from multiple precinct-based systems to generate jurisdiction-wide vote counts, including storage and reporting of the consolidated vote data.
- d. For central-count systems (paper-based and DRE): Consolidation of vote selection data from multiple counting devices to generate jurisdiction-wide vote counts, including storage reporting of the consolidated vote data.

For testing purposes, the acceptable error rate is defined using two parameters: the desired error rate to be achieved, and the maximum error rate that should be accepted by the test process.

For each processing function indicated above, the system shall achieve a target error rate of no more than one in 10,000,000 ballot positions, with a maximum acceptable error rate in the test process of one in 500,000 ballot positions.

Mr. Speaker, I reserve the balance of my time.

Mr. HOYER . Mr. Speaker, I yield myself 3 minutes.

Twenty-three months ago, uncertainty gripped our great democracy. The United States of America, the wealthiest and most technologically advanced Nation in the world had failed, in my opinion, its most basic election duty: the duty to count every citizen's vote and count it accurately.

The votes of an estimated 4 million to 6 million Americans went uncounted in November of 2000. This national disgrace cried out for comprehensive Federal reform. Thus, I am proud today to strongly support the historic, bipartisan conference report before us, the first Civil Rights Act of the 21st century.

The Help America Vote Act of 2002 is the most comprehensive package of voting reforms since enactment of the Voting Rights Act of 1965. The conference report authorizes unprecedented Federal assistance: \$3.9 billion over 3 years to help States improve and upgrade every aspect of their election systems. This funding will replace outdated voting equipment, train poll workers, educate voters, upgrade voter lists, and make polling places accessible for the disabled.

Furthermore, this legislation prescribes an array of new voting rights and responsibilities. States will now be required to provide provisional ballot to ensure no voter is turned away at the polls. It requires that we give voters the opportunity to check for and correct ballot errors. It provides at least one voting machine per precinct that allows disabled voters, including those with visual impairments, to vote privately and independently; and it provides for an implementation of a computerized statewide voter registration database to ensure accurate lists.

In addition, the conference report will require States to set standards for counting ballots and to define what constitutes a vote. To ensure the integrity of our election system, first-time voters who register by mail will be required to produce some form of identification and States will be obligated to maintain accurate voting registration lists.

This legislation, Mr. Speaker, also establishes a bipartisan 4-member elections assistance commission which will issue voluntary guidelines regarding [\*H7842] voting systems, administer grants, and study election issues. To ensure compliance, the conference report requires States to set up administrative grievance procedures. The U.S. Department of Justice will also be responsible for Federal enforcement.

Finally, let me remind my colleagues that passage of this conference report does not finish the journey. We now have, in my opinion, Mr. Speaker, a moral opportunity to ensure that this authorization is fully funded. I urge my colleagues to support this conference report. It will strengthen the foundation of democracy and shore up public confidence in this most basic expression of American citizenship, the right to vote and to have one's vote counted.

Mr. Speaker, I reserve the balance of my time.

Mr. NEY . Mr. Speaker, I yield 5 minutes to the gentleman from Michigan (Mr. Ehlers).

Mr. EHLERS . Mr. Speaker, I rise to engage the chairman of the Committee on House Administration and sponsor of this legislation in a brief colloquy.

I commend the chairman's effort in crafting this important legislation and bringing it before us today. In particular, I wish to thank him and his staff for working so closely with me in incorporating provisions of H.R. 2275, which I introduced with the gentleman from Michigan (Mr. Barcia) and which was passed by the Committee on Science last year. My legislation established an independent commission charged with developing technical standards to ensure the usability, accuracy, security, accessibility, and integrity of voting systems. This concept is included in the conference report in section 221 in the form of the Technical Guidelines Development Committee.

The conference report charges this committee with the duty of developing voluntary voting system guidelines and then recommending these technical standards to the newly created election assistance commission.

I am seeking clarification from the chairman that it is his intent that these guidelines should include standards to ensure the usability, accuracy, security, accessibility, and integrity of voting systems, including those areas described in section 221(e)(2).

Mr. Speaker, I yield to the gentleman from Ohio (Mr. Ney), the chairman of the Committee on House Administration, to respond to this request.

Mr. NEY . Mr. Speaker, the gentleman's interpretation of the language in the conference agreement is correct.

Mr. EHLERS . Mr. Speaker, I thank the chairman for his assurance and for his hard work on this conference report.

Mr. Speaker, reclaiming my time, I rise in support of the conference agreement on H.R. 3295, the Help America Vote Act of 2002. I thank the gentleman from Ohio (Mr. Ney), the chairman, and the gentleman from Maryland (Mr. Hoyer), the ranking member, for their hard work on this. We have all worked very hard to produce this bill, but their leadership is what pulled it through.

For a month after the November 2000 election, we watched in disbelief as Florida's troubled election system became a national drama and fodder for the late-night talk shows. Polling station workers across Florida struggled to discern the true intent of a voter based on their interpretation of the now-infamous hanging chad. Because of Florida's problems, the most precious component of our democracy, the expression of the free will of individual voters, was turned into a battle between attorneys. After the dust settled, we put Florida's voting system under a microscope and analyzed the flaws that troubled citizens and legislators alike.

After the Florida voting problems occurred, I, as a scientist, quickly realized that we needed to improve the technical flaws in our voting systems before State and local officials made large investments of taxpayer dollars in new voting equipment that may, in fact, be substandard. Scientists at MIT and Cal Tech came to the same realization and launched a joint research project to uncover the technicals flaws in our voting systems and equipment. I thank them for their work and for their cooperation with us in this area.

After careful analysis of the problem and the MIT and Cal Tech study, I was appalled to discover many potential problems. For example, a high school computer hacker, or any other hacker, could sabotage some computer voting systems and make them display erroneous vote totals. In response to these problems, I drafted H.R. 2275 in conjunction with my colleague, the gentleman from Michigan (Mr. Barcia).

In analyzing flaws of voting equipment, one of the key issues I identified was that the FEC's standards for voting equipment had been woefully inadequate for many years. It was very clear that we needed legislation to improve the process for developing technical standards for voting equipment, and H.R. 2275 was designed to address this need.

The legislation before us today contains almost all of H.R. 2275's provisions. It will improve voting equipment, because while we can debate the particulars of how to administer an election or which voting equipment to buy, no one will disagree that any voting system should be based on the best possible standards to ensure the usability, accuracy, security, accessibility, and integrity of voting equipment.

I know that new technical standards do not capture the public's attention, but they are the very foundation upon which voting accuracy and reliability rests, just as all of our commerce rests on reliable universal standards.

This conference report takes the concepts from H.R. 2275 and corrects a glaring flaw in our existing technical standards development process by creating a new 14-member panel chaired by the director of the National Institute of Standards and Technology. This panel will develop and recommend voluntary technical standards to ensure the usability, accuracy, security, accessibility and integrity of voting systems. A newly created Election Assistance Commission will then determine whether or not to adopt these voluntary standards.

Finally, the Commission will publish a central list of systems that are certified as meeting the current Federal standards. Since these standards are voluntary, States are still free to choose voting systems that are not certified, but now State election officials will be able to use this list to guide the purchasing decisions. This is a relatively simple, straightforward process that will lead to great improvement throughout our voting system.

With these provisions, voters can rest assured that casting their vote on equipment that meets the new Federal standards will mean that their vote counts.

I would also like to point out the strong anti-FRAUD provisions in this legislation. We must not only guarantee that each vote counts, we must also ensure these votes are not diluted by FRAUDulent votes. This bill will guard against FRAUD of many different types and will ensure that votes will be recorded accurately. We certainly do not want a return to the Tammany Halls or the Boss Prendergasts of the past.

Once again, I thank the gentleman from Ohio (Chairman Ney) and the ranking member, the gentleman from Maryland (Mr. Hoyer), for working with me to incorporate my thoughts in this legislation. I believe our collaboration has made a good bill even better, and I urge all of my colleagues to support this bill.

Mr. Speaker, I rise in support of the conference agreement on H.R. 3295, the Help America Vote Act of 2002.

For a month after the November 2000 election, we watched in disbelief as Florida's troubled election system became a national drama and fodder for the late night network shows. Polling station workers across Florida struggled to discern the true intent of a voter based on their interpretation of the now infamous "hanging chad." Because of Florida's problems, the most precious component of democracy—the expression of the free will of individual voters—was turned into a battle between lawyers. After the dust settled, we put Florida's voting system under a microscope and analyzed the flaws that troubled citizens and legislators alike.

But the problems Florida faced weren't unique, nor were they new. **FRAUD**, outdated and inadequate voting equipment, poor access for handicapped voters, poor training of polling station workers, and voter disenfranchisement have occurred in local, state, and national elections for years. But it took Florida's elections to spur Congressional action to correct these flaws. We can be proud that the agreement before us today addresses, and takes [\*H7843] action to correct, each of these issues, among others.

After the Florida voting problems occurred, as a scientist I quickly realized that we needed to improve the technical flaws in our voting systems before state and local officials made large investments of taxpayer dollars in new voting equipment that may, in fact, be substandard. Scientists at MIT and Caltech came to the same realization and launched a joint research project to uncover the technical flaws in our voting systems and equipment. I thank them for their work and for their collaboration with me in this area.

After careful analysis of the problem and the MIT and Caltech study, I was appalled to discover many potential problems. For example, a high school computer hacker, or any other hacker could sabotage some computer voting systems and make them display erroneous vote totals. In response I drafted H.R. 2275, in conjunction with my colleague from Michigan, Mr. Barcia, to address the many problems we found. In analyzing the flaws in voting equipment, one of the key issues I identified was that the Federal Election Commission's standards for voting equipment have been woefully inadequate for many years. It was very clear that we needed legislation to improve the process for developing technical standards for voting equipment, and H.R. 2275 was designed to address this need. My legislation was reported out of the House Science Committee with the encouragement of Science Committee Chairman Boehlert.

The legislation before us today contains almost all of H.R. 2275's provisions. It will improve voting equipment because, while we can debate the particulars of how to administer an election or which voting equipment to buy, no one will disagree that any voting system should be based on the best possible standards to ensure the usability, accuracy, security, accessibility, and integrity of voting equipment. I know that new technical standards do not capture the public's attention, but they are the very foundation upon which voting accuracy and reliability rests, just as all our commerce rests on reliable, universal standards. From the moment that you walk into a voting booth until your vote is officially recorded, the adequacy of the standards underlying this process will help determine whether or not your vote is recorded correctly. For example, standards help ensure that new "touch screen" technology does not bias your vote for one candidate over another, that voting equipment will afford access to all individuals with disabilities, and that your vote will be transmitted securely and recorded correctly.

This conference report takes the concepts from H.R. 2275 and corrects a glaring flaw in our existing technical standards development process by creating a new 14-member panel, chaired by the Director of The National Institute of Standards and Technology (NIST). This panel will develop and recommend voluntary technical standards to ensure the usability, accuracy, security, accessibility, and integrity of voting systems. A newly created Election Assistance Commission will then determine whether or not to adopt these voluntary standards. Once the Commission adopts these standards, labs accredited by the Commission will be able to test voting equipment and certify that new equipment meets the federal standards. Finally, the Commission will publish a central list of systems that are certified as meeting the current federal standards. Since these standards are voluntary, states are still free to choose voting systems that are not certified, but now state election officials will be able to use this list to guide their purchasing decisions.

The legislation also includes a research and development program to support the standards development process and to develop better voting technology and systems. This is critical because research must underpin decisions that the standards development committee will be making. In addition, we need research to help improve our voting equipment and systems for future elections.

This is a relatively simple, straightforward process that will lead to great improvement throughout our voting system. With these provisions, voters can rest assured that casting their vote on equipment that meets the new federal standards will mean that their vote counts. I would also like to point out the strong anti-FRAUD provisions in this legislation. We must not only guarantee that each vote counts; we must also insure those votes are not diluted by FRAUDulent votes. While flawed voting equipment can undermine a person's right to have their vote recorded accurately, FRAUD can undermine our entire voting system. In my 25 years in elected office I have seen voting FRAUD in many different forms. It occurs more often than the American people know. The anti-FRAUD provisions in this legislation are common-sense measures that reasonable people will agree that we must have in order to preserve the integrity of our elections. We don't want any new Tammany Halls or Boss Preudergasts in the USA!

I want to thank Chairman Ney and Ranking Member Hoyer again for working with me to incorporate my thoughts on this legislation. I believe our collaboration has made a good bill even better, and I urge all of my colleagues to support the bill.

Mr. HOYER . Mr. Speaker, I yield 4 1/2 minutes to the gentleman from Michigan (Mr. Conyers), one of the most senior Members of this House, the ranking member of the Committee on the Judiciary, a giant in the civil rights movement of this country, whose voice is always heard on behalf of those who are dispossessed, downtrodden, or discriminated against. It is an honor to be his friend and an honor to serve with him in this House.

Mr. CONYERS . Mr. Speaker, I want to thank the manager, the gentleman from Maryland (Mr. Hoyer), for his kind introduction, but, more importantly for what he did to help us come here today; on February 28 for his bill; on March 27 for my bill. We have been working tirelessly, and I have come to know the gentleman from Iowa (Mr. Ney), the chairman of the committee that had jurisdiction. I commend him. We have come a long, long way together.

I am very grateful to the gentleman from Michigan (Mr. Ehlers) for his technological contributions.

To the gentlewoman from California (Ms. Waters), who headed the Election Reform Task Force for the Democratic Caucus, I praise her, whose study was a classic, along with that of the Commission on Civil Rights, the Carter-Ford Election Reform Commission, and more than a dozen other historic studies that have gone into this measure.

I am also pleased to have had and enjoy the support of the caucus of which I am a dean, the Congressional Black Caucus. I am very grateful to all of them for their work, not just in forming the legislation and contributing to the process, but going to Florida and going across the country and putting their time in.

I am looking at the gentlewoman from Florida (Ms. Brown) in particular, who I appreciate; and our other sister on the Committee on the Judiciary, the gentlewoman from Texas (Ms. Jackson-Lee); and the Chairperson of the caucus, the gentlewoman from Texas (Ms. Eddie Bernice Johnson), who was heroic in this matter.

So I stand here, Mr. Speaker, commending all of our friends. I cannot omit the chairman of the committee in the Senate, Chris Dodd, who worked tirelessly for 18 months to bring us to this point, a point that was brought to us by the fact that 6 million votes were thrown out in the last Presidential election. Forty-seven percent of the disabled encountered physical barriers at the voting place, and 10 times as many African American voters in Florida were likely to have had their ballot discarded in the last Presidential election. So we have worked on a bill with major standards.

What does this bill do?

One, nobody can spoil a ballot anymore in America when this bill becomes law, no way. If you vote, the machine selected by the State, or another apparatus, has to make sure that the voter has not spoiled his ballot or her ballot before they walk out of that booth.

Number two, there is provisional voting, so any election dispute is protected; that one is not sent to a phone number that nobody ever answers or a building where the office is closed. The vote is allowed in a separate stack, and then the determination that it be included or not is a permanent record kept to be re-examined by the voter or authorities.

Three, it says that that voting site must be accessible to the disabled.

Finally, we have provisions written about language requirements. Many people went to the polls and could not read the English language carefully or clearly enough.

Then, of course, there is \$3.9 billion of funds.

The last point, this is not a perfect bill. We fought against voter ID provisions, citizen check-offs, Social Security numbers. We are going to watch it carefully in the next Congress. If it requires correcting, everybody on this side of the aisle and the chairman of the subcommittee promises that we will take whatever corrective action is necessary.

I thank Congress for their efforts in this movement.

Mr. HOYER . Mr. Speaker, I yield myself such time as I may consume. [\*H7844]

Mr. Speaker, I thank the gentleman for his contribution; but not just tonight, I thank the gentleman for his contribution over a career of fighting for people and ensuring that their rights are observed and expanded.

Mr. Speaker, I yield 4 minutes to the gentleman from Texas (Mr. Gonzalez), the son of an extraordinary Member of this House who fought for the little people of America all the time and was a giant in this House; and his son, of which he would be supremely proud, promises to be equally committed to people.

Mr. GONZALEZ . Mr. Speaker, I thank the gentleman for yielding time to me.

To my esteemed colleague, the gentleman from Maryland, I thank him very much for those wonderfully kind words. Dad was incredibly unique for many, many reasons; and he is missed.

First, I would like to start off saying that I stand here today in opposition to this bill. It is a difficult time to stand here against a bill that does contain some very good language and make some giant strides in election reform. The drawbacks, though, basically will cancel out the true benefits of this bill.

I will start off by giving credit where credit is due, and that is for everyone who worked so hard out of this House to get out a decent bill that took the best parts of what the Senate had to offer to attempt a compromise, bring it in here in some form that would be acceptable to a majority of the Members. I know that took a lot of work, and there has been progress. I thank the Members for their efforts.

For the first time in the United States election history, an ID requirement is mandated. I attended hearings in Pennsylvania; missed a couple, I believe, in Illinois; was in Florida and Texas, California, because we had committees, we had commissions, that conducted hearings throughout this Nation. Not once, not once was there ever pointed out that there was a problem that would require a national ID requirement. This came out of the clear blue.

The Members that sit in this House tonight will tell us in their conversations, it did not emanate out of this House, not from Members of the House of Representatives.

What am I talking about? I will tell the Members what I am talking about: They have made voter registration, and the very act of voting, more difficult. As good as this bill is, it complicates the process, and it will disenfranchise individuals, individuals that live in my community, because all of the Members run for office. We know the registration process, and we know the voting process because we become part of it, and we are in those neighborhoods.

What this bill does for mail-in registration: no driver's license, no ballot; no utility bill, no ballot; no government check, no ballot; no bank statement, no ballot; no Social Security number, no ballot.

Now, Members may say, we will provide them provisional ballots. Those do not count. Those do not really count. We are talking about what happened in Florida. This gives some sort of a voting right, whatever a provisional ballot really is, because that vote truly is not going to be counted until something is cleared up.

On top of it, on top of it now, we are going to have a driver's license or a Social Security or a special four-digit assigned number. That is not just for mail-in ballots, Mr. Speaker, that is anybody, first-time registrants within a State. Even if they cross the county line, they still go through all of this. If they do not have a driver's license, they should give us the last four digits of their Social Security number. If they do not have that, we will assign them a number.

But if they do have a driver's license, if they do have a Social Security number and we use the last four digits, we need those verified. We are going to have those verified before we have a database system in place by 2004, because all this goes into effect. States will get waivers, move it to 2006. We will not even have the ability to do this.

If any Member has ever been part of a voter registration drive, they know how it is done. There is a deputy that goes up there, because no one can simply go and have something filled out and take it back. They will be asking for the driver's license. They do not have it? Then the Social Security.

But for a mail-in ballot, which a majority of the ballots in my community are submitted in this fashion, why? How long has it been since these Members have actually looked at the voter registration card in their counties? It is simple, it is unique, it is efficient. There has never been a problem that would mandate the type of requirement that we will be instituting on a nationwide basis. This will impact communities. It will impact the Latino communities.

I end by advising everybody that the Mexican American Legal Defense and Educational Fund, the NAACP Legal Defense and Educational Fund, the National Council of La Raza, the National Association of Latino Elected and Appointed Officials, and the National Puerto Rican Coalition all oppose this legislation.

Mr. NEY . Mr. Speaker, I yield 3 minutes to the gentleman from New Jersey (Mr. Menendez).

(Mr. MENENDEZ asked and was given permission to revise and extend his remarks.)

Mr. MENENDEZ . Mr. Speaker, I thank the distinguished chairman for yielding time to me, and I thank the ranking member.

Mr. Speaker, let me say, in this great country of ours democracy can only flourish when we make all our voices heard. That is why it is important to do all we can to ensure that no vote is nullified.

I want to commend the sponsors of the Help America Vote Act. Much hard work went into crafting this legislation that seeks to address the problems that plague our Nation's voting system; and when this bill was first debated on the House floor, I sought to offer an amendment to enhance the civil rights provisions of the bill, including ensuring accessibility of polling places, provision for provisional voting, and strengthening the National Voter Registration Act. I am pleased that some of these things were included in the final bill.

However, I want to join my colleague, the gentleman from Texas (Mr. Gonzalez), in our concerns about other provisions that were added in the conference report. While these new identification provisions may be offered to ensure that our voting system is free of error and **FRAUD**, I fear these provisions may lead to further disenfranchise many Latino voters.

Under this bill, a Federal requirement for voter identification is created. This will be the first time ever such a provision exists in our Nation's law. I fear this starts a dangerous precedent. States will be required to ask a voter registration applicant or a first-time voter for a current driver's license number or the last four digits of their Social Security number or have a new four-digit number created and assigned to this applicant.

At a time that we should be encouraging people to come and register and be part of the democratic process, these new requirements add burdensome responsibilities in the process of voter registration and ultimately discourage voters. These people are citizens, and they know that you have to be a citizen to register to vote, which is why this whole other provision of checkoff, of citizenship checkoff, further delays the process and causes the possibility for registrars who may not see that checkoff take place to delay the ability of that individual to ultimately vote.

Lastly, we speak from experience, through manipulation of voter laws and voter intimidation. Many parts of our community and many parts of this country, including in my home State of New Jersey, have had laws used against them to ensure that they cannot vote. So in our objection we are concerned about the implementation of laws as written, and we are raising concerns about the potential or unequal administration of the law. We have seen it happen in the past, and we hope it will not continue in the future.

It is not just Hispanics, by the way. When Wisconsin looked at making changes to their voting laws, they conducted a study that found over 120,000 Wisconsin residents who did not have a driver's license or photo identification cards. Well, individuals such as these have their voices and their votes ultimately will be heard. [\*H7845]

I intend to vote for the bill because clearly there are many good provisions in it, and it provides desperately needed resources so that all of our States can update their voting systems, but we want to wave our sabers now and let it be understood that we intend to follow this process every step of the way, through the regulatory process, through what is promulgated in that regard, through its implementation to make sure that no citizen, particularly citizens of Hispanic decent, enter this democratic process with greater difficulty or with the inability to have their vote and their voice considered.

Mr. HOYER . Mr. Speaker, I thank the gentleman from New Jersey (Mr. Menendez) for his comments. I think they were well taken, as the comments from the gentleman from Texas were well taken. And I will join him and I know the gentleman from Ohio (Mr. Ney) will as well to ensure that their fears are not realized.

Mr. Speaker, how much time remains on our side?

The SPEAKER pro tempore (Mr. Simpson). The gentleman from Maryland (Mr. Hoyer) has 18 1/2 minutes remaining. The gentleman from Ohio (Mr. Ney) has 6 1/2 minutes remaining.

Mr. HOYER . Mr. Speaker, I yield 1 minute to my distinguished colleague, the gentleman from Pennsylvania (Mr. Fattah), the next ranking Democrat on the committee who has been such a critical participant in forging this legislation.

Mr. FATTAH . Mr. Speaker, let me thank the managers of this bill for their work, not just here on the floor but more importantly in the conference committee. And also I add kudos to Senator Dodd, who has really worked hard with the gentleman from Ohio (Mr. Ney) and the gentleman from Maryland (Mr. Hoyer) and also to pay deference to the dean, the gentleman from Michigan (Mr. Conyers).

This is a good bill. It is not, as we now know, a perfect bill; but it is a bill that moves this process forward.

Mr. Speaker, I served as a teller here in the House, and I had to record the results from the Florida election and the Presidential race in the year 2000. And we know that not only were there votes not counted by many in the State of Florida, but throughout this country there are holes in our democracy. And this bill is an attempt to respond to that.

We have worked the will of the conference committee, merging ideas in the Senate and the House. There are things in this bill that I am sure your Senate colleagues would rather not be there and things we prefer not be a part of this bill, but there is a shared consensus of the conferees; and we would hope that it would receive an overwhelming favorable endorsement here in the House, and I think it will move our democracy toward a more perfect Union.

#### Announcement by the Speaker Pro Tempore

The SPEAKER pro tempore. The Chair would remind Members that it is not in order to cast reflections on the Senate, either positively or negatively on individual Senators.

Mr. HOYER . Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I know the Speaker of the House, the gentleman from Illinois (Mr. Hastert), is on the floor and he is about to leave. With him is his deputy chief of staff, Mr. Stokke. Before he leaves, I want to take the opportunity to thank him and Mr. Stokke. Both of these gentlemen were vitally interested in this legislation. Both were extraordinarily helpful in seeking its passage. The Speaker has committed to the gentleman from Ohio (Mr. Ney) and I that he will work with us to make sure that this obligation is not an unfunded mandate, but in fact that we give the States the resources necessary. I wanted to thank the Speaker before he leaves the floor and thank Mr. Stokke, as well.

Mr. NEY . Mr. Speaker, I reserve the balance of my time.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the distinguished gentleman from Florida (Mr. Davis), a member of our committee who has been intimately involved throughout this consideration and was so important in making sure that we had a bill that we could pass.

Mr. DAVIS of Florida . Mr. Speaker, I wanted to commend the gentleman from Maryland (Mr. Hoyer) and the gentleman from Ohio (Mr. Ney) on their work.

Mr. Speaker, as a Floridian I need to provide a little more sober assessment as to where we are and where we need to go.

I painfully need to first point out that we began discussing this issue right after the November 2000 elections, and it has taken the verge of the next set of elections to revisit the issue. We should not just be talking about this issue at election time. This is a burden we all bear, Federal, State and local. The people that testified before the House Administration Committee pointed out to us that the legislation, if it was going to work, was not just about replacing machines. It was about making sure that we had qualified people who were trained to use the machines. And, unfortunately, once again in my home State of Florida we have provided another painful lesson as to just how right they were.

Let me also point out that tonight is only half the battle. This is an authorization bill; but the guts of the bill, apart from some of the issues that have been discussed earlier, have to do with some of the funding that needs to be provided. I want to urge the President for the first time to stand up and be counted on this and to release the funds that he has sequestered that would provide the first \$400 million in installment for this bill and to work with Democrats and

Republicans to fund this bill, because without funding, the bill will only be an expression. It will not be action by this Congress.

So this is the beginning tonight. I applaud the gentleman from Maryland (Mr. Hoyer) and the gentleman from Ohio (Mr. Ney), but we need to get to work on finishing the bill.

Mr. HOYER . Mr. Speaker, I yield 2 minutes to the gentlewoman from California (Ms. Waters), who chaired the special committee on election reform and held hearings all over this country and heard from literally hundreds of citizens on the issues confronting them at election time. "Revitalizing Our Nation's Election System" is a report issued by the Waters Commission, which was extraordinarily helpful to the gentleman from Ohio (Mr. Ney) and me in bringing this legislation to fruition. I thank her for that. I thank her for the contributions she has made. I am honored to serve with her.

Ms. WATERS . Mr. Speaker, I would like to thank the gentleman from Maryland (Mr. Hoyer) and the gentleman from Ohio (Mr. Ney) for the hard work they put in trying to get this election law passed so that we would not experience what we have experienced in Florida and other parts of this country.

Mr. Speaker, my ancestors could not vote. My ancestors were blocked from being able to vote with such tactics as forcing them to have to pay poll taxes and take literacy tests. And we saw some of the same kind of tactics used in Florida and some other parts of this country in the national election that basically stunned the world. And so when the Democratic House minority leader, the gentleman from Missouri (Mr. Gephardt), asked me to lead the Democratic Caucus Special Committee on election reform, I said, yes, I must do this.

The committee was given the responsibility to travel throughout America and examine our Nation's voting practices and equipment. Over a 6-month period, this committee held six public field hearings in Philadelphia, San Antonio, Chicago, Jacksonville, Cleveland, and Los Angeles. We heard from election experts.

We heard from election experts and hundreds of voters about what is right and wrong with our election system. I was overwhelmed about the outpouring of interest and the support we received from our Nation's voters.

The conference report before us today authorizes grants to test new voting equipment and increases access to polling places by voters with disabilities. The conference report establishes election standards that require States to allow voters to check and correct their ballots, provide access to disabled voters, allow provisional voting when there is question of an individual's eligibility.

This is not a perfect conference report, and I had to think long and hard about supporting it. I do not like any ID requirements. We do not have any in California. I do not like having to ask people for a driver's license or a Social Security number. [\*H7846]

But despite those things that I do not like and what I think is wrong with this bill, I am going to support it because we need to get started with correcting what is wrong with our election systems here in America. And hopefully, we will continue to work on this so that we can come up with perfect legislation to deal with those problems.

Mr. HOYER . Mr. Speaker, I thank the gentlewoman for her comments and again would pledge with the gentleman from Ohio (Mr. Ney) and myself and the gentleman from Michigan (Mr. Conyers) and others to continue to work with her towards those solutions.

Mr. Speaker, I yield 1 minute to the distinguished gentleman from North Carolina (Mr. Price). The gentleman has been involved with election reform as long as I can remember. He is an extraordinary leader on this bill and in this House on these issues.

Mr. PRICE of North Carolina . Mr. Speaker, I thank the gentleman for yielding me time.

Mr. Speaker, I rise in strong support of the conference report on the Help America Vote Act. I want to congratulate the gentleman from Maryland (Mr. Hoyer), the gentleman from Ohio (Mr. Ney), the gentleman from Michigan (Mr. Conyers), and others who have relentlessly pursued this historic bipartisan agreement.

Mr. Speaker, the problems that Florida experienced at the polling places and its primaries again this year demonstrate that our last national election was not just a once-in-a-life-time phenomenon. The problems that plagued us 2 years ago will continue to occur if we do not take action to address them. This legislation takes that action.

It requires States to meet minimum Federal election standards. It authorizes funds to help implement those standards and to educate voters, improve equipment, train poll workers and improve access for disabled voters. It also incorporates key elements of legislation I helped author, the Voting Improvement Act, H.R. 775, to buy out unreliable and outdated punch card machines, the type of equipment that has the highest error rate.

Mr. Speaker, now more than ever we need to make sure that every American can participate fully in our democratic form of government. We must ensure that every vote is counted. I urge my colleagues to take a significant step towards achieving these goals by joining me in support of the conference report, H.R. 3295.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the distinguished gentlewoman from Texas (Ms. Eddie Bernice Johnson), the distinguished chair of the Congressional Black Caucus, who has been involved since the very first day in demanding that we pass election reform, in focusing in on election reform and working towards the adoption of the bill; and I thank her for her efforts.

(Ms. EDDIE BERNICE JOHNSON of Texas asked and was given permission to revise and extend her remarks.)

Ms. EDDIE BERNICE JOHNSON of Texas. Mr. Speaker, I want to use this minute to say that I want to thank the gentleman from Ohio (Mr. Ney), whom I visited the very first day of the session to talk about this, and the gentleman from Maryland (Mr. Hoyer), who stayed the course, and Senator Dodd and the Senate who led the deliberations in the Senate.

There was such an overwhelming outcry from this Nation and internationally that came to the Black Caucus after January 6, 2001, that we knew we had to act.

This became the number one priority for the Congressional Black Caucus to do something about election reform.

The faith in the system had gone. Today hopefully it will start to restore it. This is not to say this is a perfect bill, but it is to say that it is a major, major step in the right direction; and we hope that the President will keep his word to me. He made it a public statement when he said he will support it, and he would see that the money would be in the budget.

We appreciate it; and, Mr. Speaker, this is the civil rights bill of the new millennium.

Mr. Speaker, I rise today in support of H.R. 3295, a bill that will restore integrity to our nation's voting system. I strongly urge my colleagues to support this legislation.

Mr. Speaker, today is a proud day for the Congressional Black Caucus. Throughout this Congress, election reform has been our number one legislative priority.

On January 6, 2001, our Members walked out of this chamber to protest the voting irregularities and intimidation that resulted in a President who was appointed by the Supreme Court, rather than elected by the people.

We said we would not rest until the right to vote of every American was protected.

Mr. Speaker, I am proud to say that after 21 months of floor speeches and field hearings, we are very, very close to delivering on our word.

Now, this legislation is not perfect. But it is a tremendous step forward. And, with the 2002 elections just a mere 26 days away, and the 2004 elections on the horizon, it's time to move the ball down the field.

It's time to implement the centralized voter registration and standardized balloting called for by this bill.

It's time that we fund training and technical assistance programs to educate poll workers and replace faulty voting machinery.

And it's time to implement provisional balloting, so that no voter will get turned away from the polls if their eligibility is challenged.

These provisions will all go a long way toward correcting the disenfranchisement that we witnessed in 2000.

However, because I believe that these regulations should be enacted quickly, I am concerned that this legislation gives states waivers to push back their deadlines for many of these protections.

I am also troubled that this legislation authorizes funding for these programs without appropriating the \$3.9 billion dollars that they will require.

Lastly, for far too long, we have seen voting regulations corrupted and used to deny the votes of millions of people, especially people of color.

We must remain vigilant that the voter protections in this legislation are implemented evenly and effectively. And we must ensure that they are enforced with the full weight of our justice system.

Our work is cut out for us. It is easy to see that this legislation is really only the beginning. But it is a good beginning.

Now, I must thank the Members of the Conference Committee from both Chambers for working many, many late nights to complete their work on this legislation.

In particular, I would like to thank the gentleman from Maryland, Mr. Hoyer, who has been battling to extend these important protections to our nation's voters. I would also like to commend Chairman Ney for his work in helping reach this compromise.

Finally, let me thank the Members of the Congressional Black Caucus for their extraordinary work. In particular, I must commend the gentleman from Michigan, Mr. Conyers, for his leadership in co-authoring one of the original House election reform bills and for working to ensure that this bill became a reality.

As I conclude, let me remind my colleagues: The time to improve our elections system is now. We must make sure all Americans can register to vote, remain on the rolls once registered, vote free from harassment, and have those votes counted. I believe that this bill achieves those goals.

I call upon my colleagues to vote in favor of this legislation today. Mr. Speaker, we must act before another day has passed.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentleman from Rhode Island (Mr. Langevin), a freshman Member of this House, an extraordinary Member of this House, who has been very much involved in the adoption of this bill as former Secretary of State in the administration of elections and a person who has confronted the challenges of barriers to participation. His participation was critical to the passage of this measure.

(Mr. LANGEVIN asked and was given permission to revise and extend his remarks.)

Mr. LANGEVIN . Mr. Speaker, I thank the gentleman for yielding me the time.

Mr. Speaker, I am pleased to be here on this historic day to urge passage of H.R. 3295, the Help America Vote Act. The measure sets minimum standards for elections and provides States with the much-needed resources to upgrade voting equipment, improve election accuracy and provide voter education and poll worker training.

This legislation has rightly been called the first civil rights legislation of the 21st century because it will ensure that all Americans can participate fully in our democracy by being guaranteed the fundamental right to vote.

We would not be here without the leadership of the gentleman from Ohio (Mr. Ney) and the gentleman from Maryland (Mr. Hoyer), my good friends on the Committee on House Administration. Their diligent efforts to craft a [\*H7847] bipartisan election reform bill demonstrates the successes that we may enjoy by setting aside our differences and working for the good of the American people. I particularly appreciate their work to make our polling places and election equipment accessible to people with disabilities.

I encourage my colleagues to vote for this measure.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from Florida (Ms. Brown), who has stood on this floor, stood up in Florida and stood in every forum to demand that we do what we can to ensure that every person's vote counts.

(Ms. BROWN of Florida asked and was given permission to revise and extend her remarks.)

Ms. BROWN of Florida . Mr. Speaker, to the gentleman from Ohio (Mr. Ney), the gentleman from Maryland (Mr. Hoyer), Congressional Black Caucus, and I have got to say Senator Dodd, we would not be here today if it was not for their leadership.

I tell my colleagues this is a great day. I know this is not a perfect bill, but it is the perfect beginning. I say that over and over again because, as I stand here today, 27,000 of my constituents' votes were thrown out because of old equipment. Do my colleagues hear me? Twenty-seven thousand votes that have not been counted to date.

And I want to say to the young people, it does matter who is in charge. It matters who is in charge, and this is the first step that we have taken to correct that, the first step.

I know that all of the civil rights community is not happy with this bill. I am not happy with it. The reason why I am not happy with it is because it took so long to get here. I wanted it here for the midterm elections. It is not, but it will be for the 2004 election.

Mr. Speaker, this is not a perfect bill but, for me, it is the greatest accomplishment of the 107th Congress. The greatest thing we have done is to make sure that what happened in the 2000 election never happens again in this country.

Mr. Speaker, I am here today to say that it matters who is in charge.

To the young people, I want you to know that your vote does matter, and that every vote counts. And voting matters because the person in charge sets the agenda. In Florida, and here in Washington, it is very clear just who is in charge and who is setting the agenda. Clearly, the Republican party thinks it is much more important to cut taxes and send the Federal budget into deficit than to focus on issues like election reform, health care, Social Security, and education.

There is no perfect bill, but this bill is a beginning. It has been 628 days since the 2000 election, and here we are, nearly 2 years later, and have just passed an election reform bill. I am thrilled we finally have an election reform bill though: We now have a bill which gives over \$170 million to the State of Florida for election reform, and \$3.6 billion to the States overall. Not perfect, but a good start. This bill requires States to do things they should have done long, long ago: Provisional balloting, replacing outdated punch-card voting machines, properly trained poll workers, educating voters, and upgrading voter lists . . . and making polling places more accessible for the disabled.

Everyone in this country and throughout the world knows that the 2000 elections were a complete sham. In my district alone, Florida's Third Congressional District, 27,000 of my constituents' votes were thrown out. Let me repeat that: 27,000. Now I know who won the last election and it was not the person sitting in the White House right now who is guiding this country into war.

And the incredible thing is that since the 2000 elections, in the State of Florida, Governor Bush has only spent \$32 million to overhaul the voting system. So, Florida, with 16 million people, spent \$32 million, while our neighbor, Georgia, with only 8 million residents, spent \$54 million on election reform.

I guess we see where the Florida Governor's priorities lie. He, like the Republican party here in Washington, is mainly interested in tax cuts for the country club group. Election reform just isn't very high up on their list.

In fact, the Governor did not even allow enough time during the Florida primaries to hold mock elections to educate voters and poll workers before the primaries.

Now I know there is no perfect bill, and I know many in the civil rights community and many here tonight are not happy with this compromise. And I am disappointed it has taken so long to reach a compromise and get an election reform bill passed. And I'm unhappy the conference report today will not pass in time to affect the mid-term elections. But I am happy to see we are ending the 107th Congress with a bill, and that we are finally addressing the problem of elections in this country. No, Mr. Speaker, this bill is not perfect, but it is to me, the greatest accomplishment of the 107th Congress, and I urge my colleagues to vote "yes" on the conference report.

#### Announcement by the Speaker Pro Tempore

The SPEAKER pro tempore (Mr. Simpson). The Chair would remind all Members it is not in order to refer to individual Senators except as the sponsor of a measure.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from New York (Mrs. Maloney).

(Mrs. MALONEY of New York asked and was given permission to revise and extend her remarks.)

Mrs. MALONEY of New York . Mr. Speaker, I rise in support of the conference report and important civil rights bill that will make much-needed reforms in the way that we vote. For too long Americans had to deal with outdated

polling practices, alleged **FRAUD** and confusing voting equipment and inexperienced poll workers. While the bill is not perfect, with this legislation we will begin to make improvements that prevent election controversies that continue to emerge in different parts of the Nation.

I am pleased to see that two provisions that I offered along with the gentleman from New York (Mr. Reynolds), my friend and colleague, have been included in the legislation. The bill ensures that overseas voters who fill out an application for voter registration will automatically receive an absentee ballot for two Federal general elections following registration. Additionally, the bill establishes an office in each State to respond to overseas voters inquiries. Overseas voters deserve the same opportunities to cast their ballots in elections as those who are able to make it to their local polling place on election day.

This is a movement towards truly every vote counting, and I commend the great leadership of the gentleman from Maryland (Mr. Hoyer) and the gentleman from Ohio (Mr. Ney).

Overseas voters deserve the same opportunities to cast their ballots in elections as those who are able to make it to their local polling place on election day.

I have spoken with Ambassadors, members of the armed services, and other American citizens living abroad who have expressed their desire to establish a more effective voting process for those living overseas.

Our constituents deserve to be a part of the electoral process no matter where they live.

With the passage of this legislation, we will ensure that each citizen's vote truly does count.

I'd like to commend my colleagues Chairman Ney and Ranking Member Hoyer for their work on this issue and for bringing this bipartisan legislation to the floor.

I urge my colleagues to support this bill.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from Michigan (Ms. Kilpatrick).

(Ms. KILPATRICK asked and was given permission to revise and extend her remarks.)

Ms. KILPATRICK . Mr. Speaker, I thank the gentleman from Ohio (Mr. Ney), as well as the gentleman from Maryland (Mr. Hoyer) for yielding the time and bringing the bill to the floor, some 20 plus months after the worst catastrophe in American history happened in our country.

The right to vote and have that vote counted is the most sacred thing an American citizen can have, and this bill begins the process of rectifying the very bad past that we experienced in 2000.

I want to commend the work of the committee. I want to work with my colleagues to see it implemented properly. I like the emphasis on high school and college students and voter education.

On that, I want to work with the committee to see that literacy is addressed. Too many people in America cannot read or read between the 4th and 6th grade level. We have got to make sure that the election materials reach that population so that it can vote.

With that, Mr. Speaker, I will cast my vote for this bill and ask that we continue to do the things necessary so all people's vote count and all people who are registered can vote.

Mr. Speaker, I rise today in support of the conference report on H.R. 3295, the Help America Vote Act. I also want to commend [\*H7848] Chairman Ney and Ranking Member Hoyer for their hard work on this landmark legislation.

In the aftermath of the 2000 election and the ensuing controversy that prevailed, it became abundantly clear that it was essential for our Nation to overhaul election administration processes. Our consideration of this act could not occur at a more favorable time because the specter of possible voter **FRAUD**, voter disenfranchisement and ballot confusion remain.

H.R. 3295 authorizes \$3.9 billion over 3 years to help States replace punch card and lever voting machines to improve the administration of elections. As we prepare for mid-term elections, once again the political stakes are high.

H.R. 3295 is important legislation because its enactment will enable voters to check for and correct ballot errors in a private and independent manner. The act will also ensure that legitimate voters will not be turned away from the polls. Furthermore, H.R. 3295 requires that States maintain clean and accurate voter lists.

As the Representative for the 15th Congressional District in Michigan, I am acutely aware of the vital importance of empowering every prospective voter. In the recent past, numerous black voters were disenfranchised due to the imposition of insidious practices designed to prohibit voter participation. Literacy tests, poll taxes, and voter intimidation were employed successfully to thwart black voter participation. However, a new day has dawned and Americans can now look forward to the overhaul of election administration.

I do, however, want to alert my colleagues to a concern I have about voter literacy, a problem that affects American voters. The average American reads on a 4th to 6th grade level. Therefore, it is imperative that we take steps to ensure that voting instructions and materials accommodate the literacy level of the average American. I am pleased that the conference report includes provisions to make voting sites accessible to persons with disabilities, and it affirms the Voting Rights Act of 1965. Nonetheless, I continue to have reservations about the potential for voter disenfranchisement.

As a former educator, I recognize the importance of reading and comprehending written material. I refer my colleagues to the provision in the bill that authorizes a total of \$3 billion over fiscal year 2003 through fiscal year 2005 that can be used in part to provide voter education. It is my hope that some part of those resources will be used to address voter literacy.

I am pleased to support the conference report, and I am confident the provisions of the bill will usher in critical changes that will serve to enhance the legitimacy of our electoral process.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from Florida (Mrs. Meek), an extraordinary Member of this body who will be leaving this body and we will be poorer for it, who experienced firsthand the trauma of people coming to the ballot box and being unable to cast their vote and being assured that it counts.

(Mrs. MEEK of Florida asked and was given permission to revise and extend her remarks.)

Mrs. MEEK of Florida . Mr. Speaker, I want to thank the gentleman from Maryland (Mr. Hoyer), my good friend, for yielding me the time.

It was once said that all that is required for evil to triumph is for good people to do nothing. We had some very good people doing something on this: the gentleman from Maryland (Mr. Hoyer), the gentleman from Ohio (Mr. Ney), the gentlewoman from California (Ms. Waters), the Congressional Black Caucus, the gentlewoman from Florida (Ms. Brown) and the entire lot, they wanted to do something, not just say nothing could be done because of the problems. The problems were faced.

We do not have a perfect bill, but we have the very best we could get, and it could not have been done without the people that I just mentioned. So I am glad that I lived to see this bill happen, and we all are very emotional about it because of the fact this, to us, is an emancipation of some of the problems we have had with voting in this country, and I want to thank the writers of this bill and the people who participated in it.

For once, we will go forward to do something better for this country and so that everybody can be created equal.

Mr. Speaker, this Conference Report is an important milestone for democracy in America. I am thrilled that the election reform conferees have heeded the will of the Congress and the American people and reached an Election Reform Conference Agreement that takes enormous steps toward ensuring that every voter counts equally and that every vote cast is counted. Last week, when this House overwhelmingly approved my Motion to Instruct the Election Reform Conferees to produce a Conference Report by October 4, 2002, the prospects for election reform were still very much in doubt.

I congratulate my good friends Representative Steny Hoyer, Senator Chris Dodd, Chairman Bob Ney, Senator Mitch McConnell, Senator Charles Schumer, Senator Kit Bond, the Chair of the Congressional Black Caucus Representative Eddie Bernice Johnson, Representative John Conyers, Representative Maxine Waters, Representative Corrine Brown, Representative Alcee Hastings, my other CBC Colleagues, and my South Florida Democratic Colleagues Peter Deutsch and Robert Wexler on this outstanding achievement.

From the day of the 2000 Presidential election catastrophe in Florida and elsewhere to today, including last month's primary election fiasco in Florida, I vowed that I would not rest until the Congress passed and adequately funded a real election reform bill and the President signed it into law. The Conference Agreement is an important step toward achieving my goal. The next step is to honor our shared commitment to adequately fund the implementation of this legislation through our appropriations process so that we do not create an unfunded mandate for the states.

As many of you know, I had a problem myself in last month's primary election when I stopped by a library branch in my precinct to cast an early vote. I was delayed from voting for more than 30 minutes because the only computer available was not working and the election officials on duty said that they couldn't verify that I was an eligible voter. So the need for election reform is not some abstract matter to me. It is something real and very personal. When I said, "No more Florida voting problems", I meant it. It remains extremely important to me to achieve real election reform for my constituents before I conclude my congressional service.

Mr. Speaker, the Conference Report is an historic achievement, certainly the most important piece of election and voting rights legislation since the Voting Rights Act of 1965. It will mean millions of dollars in Federal assistance to Florida and every other state and will go a long way toward making voting rights problems, such as those that occurred in Florida, a thing of the past.

The Conference Report contains such important protections as provisional voting, 2nd-chance voting, privacy in voting for voters with disabilities, statewide computerized lists of registered voters, and uniform and nondiscriminatory standards for counting ballots so that your chance to have your vote counted will not depend on where you live. It also authorizes \$3.8 billion in funding over the next three years to help states replace and renovate voting equipment, train poll workers, educate voters, upgrade voter lists, and make polling places more accessible for the disabled.

When this Conference Report becomes law, no qualified voter can ever again be turned away from the polling place without first being offered the opportunity to cast a provisional ballot. Voters will be able to correct their ballots easily if they make a mistake and vote for the wrong candidate, or nullify their ballot by voting for too many candidates.

Mr. Speaker, this is not a perfect bill. Like virtually every Conference Agreement, the Conference Report is the product of negotiation and compromise. As a result, it contains some provisions from the Senate bill, like the voter ID requirements for first time voters and the related and redundant citizenship check-off declaration, that would not be in the bill if I alone had been able to draft it.

Some civil rights organizations have expressed their concerns that the voter ID provisions and the citizenship check-off requirement could have a discriminatory and disproportionate impact on those prospective voters, such as racial and ethnic minorities, students, the poor, and people with disabilities, who are substantially less likely to have photo identification than other voters. Given my commitment to voting rights, I take these concerns seriously, but, they do not affect my support for this Conference Report.

To address the concerns about voter ID, I urge the Election Assistance Commission to be established by this Conference Report to carefully monitor the implementation of the voter ID requirements by the states so that the Commission may make recommendations for further reform if it uncovers evidence that these requirements are interfering with the opportunity of any qualified voter to vote and have his vote counted.

Mr. Speaker, when the House and the Senate approve this Conference Report and the President signs it, and we fully fund its implementation, we will take an enormous step toward ensuring that all qualified voters receive an equal right to vote and to have their vote counted.

I urge all my Colleagues to support this Conference Report. [\*H7849]

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from Connecticut (Ms. DeLauro), assistant Democratic leader, outspoken strong fighter for a citizen's right to vote, have that vote counted, an extraordinarily effective worker on behalf of the passage of this bill.

Ms. DeLAURO . Mr. Speaker, I rise in strong support of this legislation and thank those who have made it possible.

Not long ago we took our right to vote for granted, but what occurred in Florida 2 years ago and again last month reminded all Americans how very sacred that right is. The right to vote is a cornerstone of our democracy, the most basic and most essential expression of citizenship. When that right is put into doubt, when citizens cannot know that a

ballot cast is a ballot counted and that their unique voice has not been heard, it undermines confidence of our entire political system as well as the government formed on the foundation of our ballots.

People must simply have the confidence that their vote counts. That is what this legislation is about. It authorizes nearly \$4 billion during the next 3 years to modernize our equipment, poll worker training, voter education, improved voter lists, improved voter access, provisions that would alert voters to improperly marked ballots like those we saw during the last presidential election. It goes a long way toward restoring the integrity of our electoral system.

Our work is not done. We must make sure that the funds for this bill are not merely authorized but appropriated so that this historic legislation does not become just another empty promise. At a time when American leadership in the world is critical, following through reforming on our election system is simply too important to address halfheartedly.

I am proud to support it.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from Texas (Ms. Jackson-Lee), a member of the conference committee who succeeded Barbara Jordan in her seat, an extraordinary fighter for our Constitution and for our people, and she is following in that tradition.

(Ms. JACKSON-LEE of Texas asked and was given permission to revise and extend her remarks.)

Ms. JACKSON-LEE of Texas . Mr. Speaker, I thank the distinguished gentleman from Maryland very much for yielding me the time.

The gentleman from Maryland (Mr. Hoyer) did stay the course and the gentleman from Ohio (Mr. Ney), the chairman and the gentleman from Michigan (Mr. Conyers), and to be admonished, I know I will be, Senator Dodd. The work that they all have done has brought us to this place.

When I went to Florida, I saw many people in the aftermath of the 2000 election as we sought the recount; and they were minorities, they were elderly, they were Jewish Americans, they were Hispanic Americans. They were Americans, and each of them said that their vote had not been counted.

Today, let me thank my colleagues because we do have the civil rights act of the millennium but, more importantly, the most historic piece of legislation since the Voter Rights Act of 1965 which helped create the seat that Barbara Jordan held in this United States Congress.

So I am very gratified that we will now have provisional balloting. We will now have State-wide registration. We will now have the ability for disabled individuals to access the voting place. We will now have the ability for funding so that we can get rid of punch cards and we can get rid of paper ballots if the communities desire to do so.

Might I say that I am very grateful as well that the thousands of people who have been purged from the rolls now will have language in this legislation that they must have notice before they are purged. I am grateful that that particular provision that I desired to get in in working with the advocacy groups, we were able to clarify it. Because thousands of persons were purged off the rolls without knowing in the State of Texas, and thousands were purged off in the State of Florida. We have much work to do.

I am opposed to the photo ID. I am opposed to discriminating against people because they are Hispanic or ethnic minorities. The photo ID, let us work on that.

This is a great bill, and I offer my support, but there is more work to be done.

Mr. Speaker, first, I would like to thank Mr. Hoyer, Mr. Conyers, Mr. Dodd in the Senate, Mr. Hall and Mr. Barcia of the Science Committee

I rise in support of the Help America Vote Act, although there are issues that should still be resolved. After the election debacles of the past two years, I had hoped that we could have produced a perfect solution to the problems that plague our voting systems. Unfortunately, we did not. But I feel that that should not keep us from passing this landmark piece of legislation. This is a major civil rights initiative of this century.

The bill we have before us takes a great stride toward giving the American people the fair and efficient system of voting that the American people deserve, but it should not be the final step. Even after this Act is signed into law, as I assume it will be, we must continue to be vigilant looking for obstacles that disenfranchise legal voters, and removing those obstacles.

As a Member of the Judiciary Committee and of the Science Committee, I have been actively involved in the development of this bill. Indeed, I served as a conferee on several parts of the legislation. In it, there is much in it to be pleased with. Voting is the cornerstone of any democracy, and must be above all suspicion. Every vote should be counted to ensure that every voter is being heard.

One excellent provision of this bill is that it follows the recommendation of the National Commission on Election Reform by taking full advantage of the expertise and experience at the National Institute of Standards and Technology (NIST). NIST has long been reporting on voting standards and technologies, and should be the perfect group to direct and coordinate efforts to develop performance-based standards for voting equipment. Such standards will improve the accuracy, integrity, and security of our polling systems.

When this bill first came out of conference, it included language that would have forced any state employing these standards to pay royalties to the company that developed it, although those standards were developed with taxpayers funds. Thanks to a well-coordinated, bipartisan effort by us conferees from the Science Committee, this language was removed. We also ensured that once standards are created, that NIST will also be charged with accrediting the labs that will certify election equipment, to make it more likely that smart plans will translate into real benefits.

Other victories have come in the field of purging of registered voter lists. Although purging of voter-rolls, may be a well-intentioned attempt to remove inappropriate votes from being cast, such purging has rarely, if ever, been done effectively and fairly. Done improperly, purging can be an expensive tool for discrimination or mistreatment. Consistently through the history of our nation, purging has been a mechanism for silencing minorities, and the socio-economically disadvantaged.

In Florida alone, thousands of eligible voters have been misidentified as being as felons who are unable to vote: 3,700 before election 1998, and 11,000 before election 2000. There is no reason to think that this is a Florida-specific problem. This means that perhaps hundreds of thousands of American citizens, living in the richest Democracy in the world, are having their fundamental right to vote stripped due to clerical errors. This is absolutely unacceptable. I have fought to preserve language in this bill that will ensure that voters are not unfairly purged from the voting rolls. In Texas thousands of voters were purged from the rolls without notice. The language I insisted on adding requires notice to be given to the voter and two federal elections to occur before that voter would be purged.

I know that this is a somewhat contentious piece of legislation. I had hoped that election reform would draw us all together in the name of reaffirming the principles of democracy. There are several groups, whose opinions I deeply respect, who feel we should reject this bill because it is not perfect. They are, as I am, concerned that some provisions, such as the reliance on driver's licenses and social security numbers and utility bills as forms of identification, could be used to disenfranchise the elderly, the disabled, the homeless, racial and ethnic minorities who might not have such documentation. This would bring about a disproportionate burden on voters who deserve to vote and have their vote counted.

We are also worried that simple errors in filling out registration forms, such as the failure to check a box, or to supply a driver's license number, could jeopardize a person's ability to vote. Such restrictions could significantly hamper the efforts of get-out-the-vote campaigns that enable hundreds of thousands of Americans to take part in the Democratic process each election year. There will always be a balancing-act between making it easy for people to vote, and making it difficult for people to commit voter-FRAUD. Although it is not perfect, I feel the present bill is a decent compromise. [\*H7850]

As the world's greatest Democracy, we must ensure that our elections meet the highest standards of integrity. Pushing the cause of Democracy is primary part of our foreign policy. The eyes of the world are upon us every two years as Americans go to the polls. It is a disservice, not only to the American people, but to all people around the world who aspire to our level of freedom, when we sink to the lows that were seen in Florida in 2000, and again this year.

The Help America Vote Act of 2002, will set the bar for our elections, and election-systems of the future. We should always seek to raise that bar as technology improves and obstacles are recognized. However, with elections upcoming, now is the perfect time to demonstrate our commitment to progress in making each vote count. Mr. Speaker, I support the Help America Vote Act, and urge my colleagues to do the same, and look forward to the bill being fully funded.

Mr. HOYER . Mr. Speaker, I yield 1 minute to the gentlewoman from Illinois (Ms. Schakowsky), a member of the Waters Commission on which I also had the opportunity to serve.

Ms. SCHAKOWSKY . Mr. Speaker, I want to congratulate the gentleman from Maryland (Mr. Hoyer) and the gentleman from Ohio (Mr. Ney) for succeeding in bringing forward an election reform bill that will help move our election system into the 21st century. I thank the gentleman from Maryland (Mr. Hoyer) for making this a top priority and relentlessly fighting for its passage.

I had the privilege of being one of the vice chairs of the Democratic Caucus Special Committee on Election Reform under the able leadership of our chairwoman, the gentlewoman from California (Ms. Waters), who tirelessly traveled the country holding many hearings. From young and old voters, people of color and with disabilities, we heard a clear message. Without minimum election standards and a commitment of Federal dollars, voters will continue to be disenfranchised and history doomed to repeat itself.

I am particularly pleased that this legislation includes a crucial proposal similar to legislation I introduced last year, the Provisional Voting Rights Act of 2001. Under provisional voting, duly registered voters can feel confident that if their name does not appear on the registration list they will be permitted to vote. They will not have to go to a police station or leave the polling place in order to get their provisional ballot.

Any meaningful election reform proposal must include this measure and the Help Americans Vote Act does.

It is not perfect, but it will bring us closer to ensuring that every citizen can vote and every vote will be counted.

Mr. HOYER . Mr. Speaker, I yield myself the balance of my time.

We come now to the end of this debate. It has been a short debate, too short a debate; but it has been a long road from November 2000 to today. It was a road taken by many people.

Paul Vinovich, the chief counsel of our committee, Chet Kalis, who has done an extraordinary job on this bill and was one of the anchors, in my opinion, as we worked through this bill. Roman Buehler, who had strong contributions to this bill and a great knowledge that he brought to the consideration of this bill. Pat Leahy, who did an extraordinary job himself. Matt Petersen, Maria Robinson, Keith Abouchar, Dr. Abouchar, of my staff, who from the very first of this bill has worked daily on its provisions. Len Shambon, Bill Cable, Matt Pinkus, Noah Wofsy, Bob Bean, Neil Volz, who are no longer with us; and Beth Stein, who now works in the Senate.

All of these staffers have played an extraordinary role.

Mr. Speaker, I acknowledged earlier the Speaker of the House. I want to acknowledge the gentleman from Missouri (Mr. Gephardt), who was steadfast in his support of this process and whose help was absolutely critical to the final product and who met with the gentleman from Ohio (Mr. Ney) and me when we requested him to do so to discuss how we could move this bill forward.

And then, Mr. Speaker, let me say to the gentleman from Florida (Mr. Young), who is on the floor here today, that the gentleman from the State of Florida, the chairman of the Committee on Appropriations, my dear and close friend, one of the giants of this institution, his commitment to funding this legislation was and is absolutely critical. He and the Speaker have been extraordinarily supportive. And now we come to a challenge to get the \$2 billion that we are going to need for this year and the \$1 billion after that and the \$1 billion after that to ensure that this is not an empty promise.

Mr. Speaker, there are two bills I think that when I end my career I will look back on as being the most important bills in which I was involved: one that I had the privilege of sponsoring, the Americans with Disabilities Act, and this bill I have had the privilege of cosponsoring with my friend, the gentleman from Ohio (Mr. Ney).

There was an article in the paper just a few days ago talking about the gentleman from Ohio and me and our relationship and how we worked together in a nonpartisan fashion. Not in a bipartisan fashion, but in a nonpolitical, nonpartisan fashion, knowing full well that Americans expect us to work together to make sure this institution works as well as it possibly can, with fairness to all 435 Members. I am blessed by the fact that the gentleman from Ohio is committed to that objective and he runs an open, fair, and effective committee. I am pleased and honored to be his colleague.

I want to say as well that I am honored to have served in this House that has come to this day in a bipartisan fashion. When the roll is called, we are going to see the overwhelming majority of Republicans and the overwhelming majority of Democrats vote to ensure that every American not only has the right to vote but will be assured that this greatest of democracies will ensure that every individual, high or low, black or white, rich or poor, will be assured that their vote will count.

Mr. NEY . Mr. Speaker, I yield myself the balance of my time.

It has been said that this bill will make it easier to vote and harder to cheat, and that is true; but this bill goes way beyond a simple phrase, and I want to thank everybody that has made this bill possible.

I want to thank the people who worked on the Ford-Carter Commission, obviously, Presidents Ford and Carter. Their commission performed a tremendous service and their recommendations had a profound effect. I had the pleasure 2 days ago to be able to talk personally to Presidents Ford and Carter, and they expressed their tremendous support for this measure and their thanks to the Congress for passing it.

I want to thank the members of the conference committee. First, of course, the gentleman from Maryland (Mr. Hoyer). If it were not for the gentleman from Maryland, and he came to me and he proposed the ideas and he had a vision, if it were not for him, we simply would not have had the product in the direction obviously out of the House to be where we are at today, and I want to thank him for his integrity. He is a distinguished ranking member. He heeded the call to make elections work, to restore the faith in our system; and without his persistence and gentle persuasion at critical moments, this bill would not have been possible. And I want to thank him for what he has done for his country and for the citizens.

I want to recognize the gentleman from Michigan (Mr. Ehlers), who provided invaluable support for the scientific end of it; the gentleman from New York (Mr. Reynolds), whose concern over the rights of military and overseas voters are strongly reflected in this bill; the gentleman from California (Mr. Doolittle), who insisted on strong anti-FRAUD and privacy protections; the gentleman from Arizona (Mr. Stump) and the gentleman from New York (Mr. McHugh), from the Committee on Armed Services, who helped to make this bill a landmark piece of legislation for military voters; the gentleman from Illinois (Mr. Kirk).

And although he is not a conferee, I want to especially mention the gentleman from Indiana (Mr. Buyer), whose detailed input on the military voting issue significantly improved the bill. The gentleman from California (Mr. Thomas) and the gentleman from Florida (Mr. Shaw), from the Committee on Ways and Means, should be given the credit for crafting the provisions to protect voter privacy. The gentleman from New York (Mr. Boehlert) [\*H7851] and the gentlewoman from Maryland (Mrs. Morella) made sure also that the voice of the scientific community came through.

I also want to pay special tribute to the gentleman from Missouri (Mr. Blunt), the chief deputy whip, whose advice and guidance through the process based on his experience as the Missouri Secretary of State was essential to the final compromise.

I also want to thank the Members on the minority side who served on the conference committee: the gentleman from Pennsylvania (Mr. Fattah), the gentleman from Florida (Mr. Davis), who are tremendous Members. We are very blessed on House Administration, on both sides of the aisle, to have such terrific members: the gentleman from Missouri (Mr. Skelton) and the gentleman from Michigan (Mr. Conyers), who gave advice and who was always willing to be there; the gentleman from Michigan (Mr. Barcia); the gentlewoman from Texas (Ms. Jackson-Lee); the gentleman from New York (Mr. Rangel); and the gentleman from Rhode Island (Mr. Langevin), whose support on the disabilities issue was tremendous; the gentlewoman from Texas (Ms. Eddie Bernice Johnson), who always was concerned through the whole process to be part of it; and many other Members, Mr. Speaker.

I especially wanted to thank also the gentleman from Missouri (Mr. Gephardt), who met with the gentleman from Maryland (Mr. Hoyer) and me, and also I want to thank the Speaker of the House, the gentleman from Illinois (Mr. Hastert), whose unwavering support through the past 2 years kept this process on track and has gotten us to where we are today. He had the commitment and the faith this could be done. And Mike Stokke, his staff member.

I want to thank the groups whose efforts and support made this possible: the National Association of Counties, including their staff, Ralph Tabour; the National Association of Secretaries of State, including our Secretary of State Ken Blackwell of Ohio, who picked up the phone on the first day after the gentleman from Maryland (Mr. Hoyer) and I got together and said he wanted to be a part of the process to help, through the Secretaries of State; Ron Thornburg, past president of NASS, Secretary of State for Kansas; also Sharon Priest, Secretary of State of Arkansas, valuable input, and their executive director, Leslie Reynolds.

The National Conference of State Legislatures, NCSL, including Speaker Marty Stephens from Utah and staff Susan Parnes-Frederick. The Election Center and their executive director, Doug Lewis. The National Federation of the

Blind, including their staff Jim McCarthy. The National Commission on Federal Election Reform, executive director Phillip Zelikow.

And I want to mention our staff for their extraordinary, and I mean extraordinary, efforts. People talk about conference committees. There were discussions and they started at 10 a.m. and they ended at 3:15 and then started the next day at 8 a.m. and they ended at 2:15. There was a great deal of time put in on a very technical bill.

But I want to thank, from the Committee on House Administration, Paul Vinovich, our staff director, Chet Kalis, Roman Buhler, Matt Petersen, Pat Leahy, Maria Robinson, Chris Krueger, and also Will Heaton, our chief of staff of our personnel office, who kept that going. Not with us today, Neil Volz, who was originally in the process, and Jim Forbes, who was press secretary then, and our current press secretary, Brian Walsh. All of them had an integral part in making this happen.

For the gentleman from Maryland (Mr. Hoyer) and the staff of the Committee on House Administration, Bill Cable, Keith Abouchar, Lenny Shambon, all were extremely valuable.

Mr. Speaker, I want to thank my wife, Liz, and my son, Bobby, and my daughter, Kayla, for putting up with me not spending enough time with them in the last couple of weeks.

Also the staff of Senator Chris Dodd: Kennie Gill and Ronnie Gillespie and Sean Marr. The staff of Senator Mitch McConnell: Brian Lewis and Leon Sequeria. For Senator Kit Bond: Julie Damman and Jack Bartling. And especially legislative counsel Noah Wofsy for the House and Jim Scott for the Senate.

From the Senate side, there is no question the integrity, the desire, the vision, the perseverance of Senator Dodd. If it were not for that, we also would not be here tonight. He has done something that will live on for a long time, also along with the other two Senators, Mitch McConnell and Kit Bond.

As I said at the beginning of this process, Mr. Speaker, so many months ago, that for this effort to succeed we would have to be doing it in a bipartisan manner. We are about to witness the realization and fulfillment of that prediction.

I am grateful to my friends on the other side of the aisle, as well as on the other side of the Capitol, for their willingness to put partisanship aside and work together to produce this much-needed piece of legislation for the American people.

The United States of America is the world's greatest democracy. We need an election system that is worthy of that legacy. This bill will give us an election system that all Americans can have pride in. Langston Hughes, the poet, wrote, "Dream your dreams, but be willing to pay the sacrifice to make them come true." Our veterans have sacrificed with their blood, from the beginning of this country through the revolution, to make sure we can be here tonight to debate and argue all these points that are important to us. And on top of that, people died to get the right to vote in this country. We cannot forget that.

So, therefore, this bill is important. This is the bill that is going to produce, long after we are gone, the results that we need to have faith in the system.

In closing, Mr. Speaker, we talk about what we can do for our constituency, and there are a lot of issues. We debate important issues, such as if we are going to go to war or not, and issues important to our domestic agenda. But people have to be here to be able to vote on those issues. They have to be elected at all levels throughout the United States. And the greatest gift we can give, as Members of this House tonight, the greatest gift we can give to our constituency is to vote for this measure and take back to our constituency the ability to have them have faith in the system; a knowledge that tonight America did her work on the floor of this House, as boards of elections do their work every single election across our great country.

And also Members can take the gift back to their people that tonight the body politic worked for the good of the people. The body politic did something that, again, long after we are gone, people will benefit from. Tonight America shines. We need everyone's vote and support.

Mr. DAVIS of Illinois . Mr. Speaker, I wish to express my support for the conference bill on election reform, H.R. 3295. Members of both parties have worked very hard to reach agreement on this measure over several months. Although I am concerned that some of the bill's provisions relating to voter identification will not make it easier for new

voters to cast their ballots, I believe this legislation represents significant progress in addressing the problems we witnessed in our last national election.

I am especially pleased that the language in this bill relating to the accessibility of voting systems for people with disabilities reflects the stronger provisions for participation outlined in Mr. Langevin's July 9 motion to instruct, which I and several of my colleagues cosponsored.

Thanks to Mr. Shimkus and Mr. Ehrlich for their help in making the conferees aware of the importance of these provisions. Their recognition that this bill must ensure people with disabilities will be able to exercise their fundamental right to cast a secret ballot demonstrates that full participation in the electoral process by all Americans is truly a bipartisan concern.

I commend the members of the conference committee for their work on this bill and I urge its passage.

Ms. SOLIS . Mr. Speaker, I rise to express my concerns about the Help America Vote Act Conference Report, H.R. 3295. I am pleased that this conference report includes provisions that help voters in the greater Los Angeles area. For example, it provides money for the upgrade of our voting system. This will greatly assist the Los Angeles County Registrar Recorder and County Clerk transition out of the punch-card voting system.

However, I'm disappointed that this conference agreement also includes provisions that can lead to the disproportionate disenfranchisement of our Nation's minority voters. It requires first-time voters who register by mail [\*H7852] to bring current photo identification to the polls or a copy of a current utility bill, bank statement, paycheck, or other government document that shows the name and current address of the voter. Our Federal courts have recognized that the use of a photo ID causes a disparate impact on ethnic and racial minority communities. Nevertheless, the photo ID requirement is still part of this bill.

Also problematic is the variation in consequences for failing to meet presumably equal voting prerequisites \_being a citizen and being over the age of 18. Unfortunately, this bill has harsher consequences for voters who inadvertently forget to check a box affirming their citizenship than for voters who forget to certify they are 18 or older. This may lead to the disenfranchisement of voters who are English language learners or new to the voting system, including Latinos and Asians.

In addition, I am concerned about the provision that restricts access to information about provisional ballots to the individual who cast that ballot. Unquestionably, the confidentiality of votes cast as well as personal information should be protected. But information about provisional ballots such as where they were issued, should not be hidden from commissions that review and ensure fair voting. Based on this provision, it is unclear if commissions would have full access to information that would help them determine any inconsistencies in the provisional voting process.

While this bill is called the Help America Vote Act, I am afraid it may not help the fastest growing population in America \_Latinos\_ vote.

Mr. HOLT . Mr. Speaker, I support the Help America Vote Act and applaud Representatives Hoyer and Ney for their good work on this legislation.

The turmoil surrounding the 2000 Presidential election showed our Nation that we need to improve the instruments of voting and the means of electing our office holders. Even the Supreme Court Justices spoke of the need for uniform voting procedures. This bill does much to advance democracy.

Many of the problems with our electoral process lie in the disparities of our voting system. For instance, while some counties have modern voting machines that leave little room for error, others use dated punch-card ballots that can lead to the now-famous hanging and dimpled chads. In fact, studies show that 18 percent of Americans vote using technology that prevailed around the time Thomas Edison invented the light bulb. And nearly 33 percent of Americans vote by punching out chads, a system implemented during the Johnson administration. Yet many States and localities continue to use these outdated systems because of the exorbitant cost to replace them.

This bill takes many important steps towards that much-needed electoral reform. The Help America Vote Act would create the Election Assistance Commission and authorizes studies to analyze issues ranging from ballot design to voter accessibility.

However, this legislation goes beyond studies and agencies. It would authorize over \$400 million to buyout existing punch card voting devices from states and counties. Moreover, this legislation will provide \$2.25 billion to establish and maintain more accurate voter registration lists.

The bill also establishes minimum standards for State election systems. These standards include uniform means for determining what constitutes a vote on different types of equipment, sets new standards to accommodate individuals with disabilities, gives voters the opportunity to correct voting errors, ensures that uniformed and overseas voters have their votes counted, and requires more accurate registration lists.

Moreover, this bill authorizes the Attorney General to monitor and enforce these standards.

I am happy to support this bill as a step ahead in civil and voting rights.

Mr. BOEHLERT . Mr. Speaker, I rise in strong support of the Help America Vote Act, a bill that is the product of many days and nights of hard work on both sides of the aisle and both Houses of Congress. It is the product, too, of the collaborative efforts of the Science Committee and the House Administration Committee.

This bill is a carefully constructed compromise. It expands the right to vote by requiring that states allow provisional voting. It includes commonsense measures to prevent FRAUD. And, by providing over \$3 billion to States to buy out antiquated voting machines, train poll workers, educate voters, and improve the administration of Federal elections, the bill helps ensure that fiscally strapped States and localities will still be able to meet the tough requirements the bill imposes.

But perhaps one of the most fundamental reforms taken from provisions passed by the Science Committee last year is the improvement the bill makes in the way technical standards are developed for voting equipment. Most Americans pay no attention to this arcane field of technical specifications, tolerances, and error rates and that's as it should be. For when it goes right, no one notices.

But when it goes wrong when the chads of punch card ballots don't align correctly, or when electronic voting machines automatically shut down before the polls are supposed to the entire world quickly becomes all too familiar with its technical vocabulary.

Strong technical standards will become even more important as the country strives to live up to the new requirements of this bill, especially the requirement that each state compile a computerized database of all its registered voters. Such lists will surely make vast improvements in how America votes, but if they are not also to expose us to the misdeeds of hackers and other cyber criminals, we must develop robust computer security standards to protect these systems.

I want to thank Mr. Ney, the chairman of the House Administration Committee, for his hard work on crafting this bill and his willingness to include provisions of the Science Committee's to strengthen the way critical, but often overlooked, voting equipment standards are developed.

I urge my colleagues to support this important bill.

Mrs. JONES of Ohio . Mr. Speaker, I rise to talk about a piece of legislation that, if passed, will remove the barriers that have blocked many American citizens' right to vote. If Congress agrees to the passage of H.R. 3295, the Help America Vote Act of 2002, antiquated machines will be replaced, adequate assistance will be provided for our Nation's elections, nondiscriminatory and uniform requirements would be enforced, improved military and overseas voters ballot access will be provided, and the opportunity for young Americans to be involved in the voting process will be established.

Without legislation that helps Americans to have their vote count, barriers of participation will continue to plague many of our communities, and; therefore, increase the growing number of outdated voting equipment, alleged intimidation by police and lack of translators, as mandated by law.

As recent as the last Presidential election, the National Association for the Advancement of Colored People, NAACP, requested an investigation into the voting practices. The 14th amendment, which ensures equal protection under the law, was the basis for the Supreme Court's decision not to allow recounting in Florida. Ironically, an amendment designed in 1866 to protect the rights of minorities was used to protect a system which disenfranchised them in 2000.

It is also interesting that in addition to the votes that were not counted in Florida, there were voting irregularities in the 11th Congressional District of Ohio. Thousands of voters on the mostly African American east side of Cleveland, OH, went to vote, only to be turned away. Because of a 1996 State law cutting Cleveland precincts by a quarter, their polling places had been changed. The Cuyahoga County Board of Elections said that it sent postcards to registered voters telling them of the switch. But of 85 African Americans who were asked about the postcards during 2 1/2 days of interviews done by the Los Angeles Times, only one said he received notification.

"I never got a card, never," said Francis Lundrum, an East Cleveland native. He said he bellowed at an election worker: "I am a veteran of the United States armed forces! I want to vote!"

It did no good.

Lundrum and the others who were turned away should have been given provisional ballots, to be certified later. Among those who did not get a voting ballot was Chuck Conway, Jr., who stated, "I think there was some stinky stuff going on."

As a U.S. Representative, it truly saddens me to hear of voting irregularities, not only with my constituency, but to all who were not afforded the right to have their vote count. I urge my colleagues to seriously consider what will happen to the future of our democratic process if we do not pass this sensible piece of legislation. It is my hope that for our next general election cycle, Americans can proudly say that every vote does count. I urge my colleagues to vote in favor of H.R. 3295.

Ms. McCARTHY of Missouri . Mr. Speaker, I rise in support of the conference report on H.R. 3295, the Help American Vote Act. I wholeheartedly endorse the meaningful collaboration of the bipartisan group, led by my colleagues Congressman Ney and Congressman Hoyer.

The Help American Vote Act corrects the mistakes with our election system that were highlighted in the aftermath of the 2000 election. I have seen firsthand the challenges inadequately equipped polling places and poorly trained poll workers pose to our communities. This measure will go far in ensuring everyone's right and access to a vote.

I introduced bipartisan election reform legislation to establish a federal grant program to provide assistance to States for modernizing [\*H7853] and enhancing voting procedures and administration. The substantive changes that my legislation proposes are contained in the detailed election reform conference report we will pass today. I applaud this bill because it provides states with both the standards and the funding to make real election reform happen. This legislation authorizes \$3.0 billion over 3 years for a grant program administered by the commission to help States meet election requirements, train poll workers, provide voter education, and administer elections.

The Help American Vote Act also requires States to abide by uniform and nondiscriminatory requirements, such as providing provisional ballots, implementing statewide voter registration databases and ensuring that each precinct has at least one machine that is accessible to the disabled. It also establishes an Election Assistance Commission, a bipartisan commission that will issue voluntary guidelines, issue grants, and administer research grants, and pilot projects.

Mr. Speaker, this bill would provide the most meaningful reform to our democratic election system since the civil rights laws were enacted in the 1960s. It is time to pass real election reform, time to Help American Vote. This legislation will restore the confidence of the American people in our election process and encourage all citizens to take part in one of the paramount processes that defines us as a nation. Strengthening our election system strengthens our democracy.

Mr. Speaker, I urge my colleagues to vote "yes" on this conference report.

Mr. VITTER . Mr. Speaker, I rise in support of the election reform conference report before us today.

I have strongly advocated election reform in my home State of Louisiana in the past and continue to do so here in Congress. I am pleased that this legislation is a strong step toward correcting many of the flaws in the current system.

Following the 2000 election, I was incensed that there would be any attempt by political operatives to disenfranchise our brave men and women in the Armed Services overseas. In response I introduced legislation to remedy the situation, and am pleased to see the conference report takes important measures similar to the ones I proposed to ensure military overseas ballots are counted. Our service personnel deserve no less.

I applaud the efforts of the conference to address the issue of voter FRAUD as well. Statewide voting lists, presenting identification when voting, purging names from lists for those that do not vote, and strengthening penalties for those convicted of voting FRAUD will all help States deal with the problem of vote FRAUD, which is an assault on our democratic system.

Lastly, I would like to commend the conferees for their work in helping ensure that the disabled have access to voting machines in each precinct. Voters should never be disenfranchised because of any sort of disability and I now hope Congress will follow through with funds.

I would like to commend Chairman Ney, who met with me on a number of occasions to work on a variety of election reform issues, as well as Ranking Member Hoyer and all the conferees that worked out this compromise.

I urge my colleagues to support the election reform conference report.

Mr. HASTINGS of Florida . Mr. Speaker, I rise in strong support of the conference report of H.R. 3295, the Help America Vote Act.

I begin by thanking my good friend from Maryland, Mr. Hoyer, for keeping this issue at the forefront of this body's agenda. Given the daunting task of bringing this conference report to the floor, the gentleman from Maryland has remained the voice of justice for the tens of thousands of Americans who had their right to vote stolen from them on Election Day 2000. I thank him for his work and leadership on this issue and so many others.

Additionally, I commend the chairman from Ohio, Mr. Ney, for his continued efforts to get this bill to the floor. Even while Members of the chairman's own party were fighting against this bill and the President still refuses to make election reform a priority, I have never doubted the chairman's sincerity and resolve to get this bill passed.

Mr. Speaker, 628 days have passed since Election Day 2000 and, until today, Congress has remained largely silent. Just last month, in Florida, my constituents reaped the first-hand benefits of Federal inaction. On November 5, voters throughout this country will be returning to the same broken election system of 2000 because it took Congress nearly 2 years to act.

So, while I will ultimately support this conference report, I cannot come to the floor today with the same jubilation and admiration for this bill that some of my colleagues have. Frankly, we should be ashamed of ourselves. While we improved our homeland security, we neglected the integrity of our democracy.

The conference report that the House is considering has many qualities that hold true to the title's implication. That is, the bill actually helps Americans vote. Improving voter accessibility, establishing statewide voter registration lists, determining what constitutes a vote, increasing voter education and poll worker training, and providing States with the dollars to meet these standards, are just a few of the good qualities of the report.

However, this bill is not perfect by any means. The ID provisions in the report drastically alter voter registration and absentee voting procedures. The inclusion of these provisions will ultimately discourage and intimidate first-time and veteran voters alike. Further, the opt-out until 2006 provisions provide States with an opportunity to delay reform until after the next Presidential election. After the last election, I expected these provisions to be removed. But they weren't.

Mr. Speaker, the passage of today's conference report is merely the first step in true election reform. Congress must now put its money where its mouth is and appropriate the \$3.9 billion authorized in this report. Unfunded mandates are just lip service, and States need our help. If Congress fails to fund election reform in 2003, 2004, and 2005, then we can count on many states opting out until 2006. This places the reliability of our election system in jeopardy for 4 more years.

As I have said so many times before, we must never again find ourselves questioning the methods by which we choose our elected officials. Hopefully, we never will. After all, help is on the way\_though it may take a few years to get there.

I urge my colleagues to support the conference report.

The SPEAKER pro tempore (Mr. Simpson). All time for debate has expired.

Without objection, the previous question is ordered on the conference report.

There was no objection.

The SPEAKER pro tempore. The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. HOYER . Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were \_yeas 357, nays 48, not voting 26, as follows:

Defendants.

ORDER

This case is an action to have the photo identification ("Photo ID") requirement in the 2005 amendment to O.C.G.A. § 21-2-417 (Act No. 53), declared unconstitutional both on its face and as applied, and to enjoin its enforcement on the ground that it imposes an unauthorized, unnecessary, and undue burden on the fundamental right to vote of hundreds of thousands of registered Georgia voters, in violation of article II, section 1, paragraph 2 of the Georgia Constitution, the Fourteenth and Twenty-Fourth Amendments to the federal Constitution, the Civil Rights Act of 1964 (42 U.S.C.A. § 1971(a)(2)(A) and (a)(2)(B)), and Section 2 of the

Voting Rights Act of 1965 (42 U.S.C.A. § 1973(a)). The case is before the Court on Plaintiffs' Motion for Preliminary Injunction [2] [23].

## **I. Background**

### **A. The Parties**

Plaintiff Common Cause/Georgia is a chapter of Common Cause, Inc. (Compl. ¶ 1(a).) Common Cause is a non-partisan citizen lobby organized as a not-for-profit corporation under the laws of the District of Columbia, and is devoted to causes such as electoral reform, ethics in government, and the protection and preservation of the rights of all citizens to vote in national, state, and local elections, including educating voters about voting rights and procedures. (Id.)

Plaintiff League of Women Voters of Georgia is a non-partisan Georgia non-profit corporation that was founded in 1920. (Compl. ¶ 1(b).) Plaintiff League of Women Voters of Georgia's purpose is to encourage the informed and active participation by citizens in government at all levels, including the protection of the right of all citizens to vote and the education of voters about voting rights and procedures. (Id.)

Plaintiff The Central Presbyterian Outreach and Advocacy Center, Inc. is a Georgia non-profit corporation that provides

support to people in poverty, including emergency services for basic human needs and assistance in achieving self-sufficiency, including assisting individuals in obtaining photo identification. (Compl. ¶ 1(c).)

Plaintiff Georgia Association of Black Elected Officials, Inc. is an unincorporated association of more than 700 elected officials throughout the State of Georgia who regularly conduct election campaigns and seek the votes of all registered, eligible voters. (Compl. ¶ 1(d).) It also promotes voter registration, education, and participation, preserves minority voting rights, and fights to ensure that no qualified voters are turned away on Election Day for failure to possess a Photo ID card in violation of their right to vote. (Id.)

Plaintiff the National Association for the Advancement of Colored People ("Plaintiff NAACP"), through its Georgia State Conference of Branches, is the nation's oldest civil rights organization. (Compl. ¶ 1(e).) Plaintiff NAACP was formed in 1909 by a multiracial group of activists, and has nationwide membership as well as members and offices in Georgia. (Id.) Plaintiff NAACP has advocated for the advancement and protection of voting rights for minorities, and, throughout its history, has fought for access to the ballot, for its members and for others. (Id.) It also has fought to ensure

that racial minorities, low income people, and economically disadvantaged people have access to the ballot box and an equal opportunity to participate in the political process.

(Id.)

Plaintiff Georgia Legislative Black Caucus ("Plaintiff GLBC") was formed in 1966 and consists of elected African-American members of the House and Senate of the Georgia General Assembly. (Compl. ¶ 1(f).) Plaintiff GLBC's members, as elected representatives, engage in election campaigns, seek votes of registered, eligible voters, and also seek to make certain that the right to vote of all eligible citizens is protected and that no eligible voters are discouraged or prevented from voting on election day for failure to possess a Photo ID card in violation of their right to vote. (Id.)

Plaintiff Concerned Black Clergy of Metropolitan Atlanta, Inc. is a non-partisan, interfaith religious organization of mostly African-American members and laity whose mission is to provide leadership, advocacy, and service to the poor, the homeless, and the helpless in the metropolitan Atlanta area, including protecting their rights as citizens to full participation in the democratic process, including the right to register and vote without undue interference. (Compl. ¶ 1(g).)

Plaintiff Clara Williams is an African-American and duly

qualified and registered voter residing in the City of Atlanta and Fulton County, Georgia. (Compl. ¶ 1(h)(ii).) Plaintiff Williams does not possess a Georgia driver's license, passport, or other form of government-issued Photo ID, and cannot readily obtain a Photo ID card from the State Department of Driver Services. (Id.)

Defendant Evon Billups is the Superintendent of Elections for the Board of Elections and Voter Registration for Floyd County, Georgia, and is charged with the duty of conducting elections in Floyd County, Georgia, and the City of Rome, Georgia. (Compl. ¶ 2(a)(i).) Plaintiffs have sued Defendant Billups in her individual and official capacities. (Id.)

Defendant Tracy Brown is the Superintendent of Elections for the Board of Elections and Voter Registration for Bartow County, Georgia, and is charged with the duty of conducting elections in Bartow County, Georgia. (Compl. ¶ 2(a)(ii).) Plaintiffs have sued Defendant Brown in her official and individual capacities. (Id.)

Defendants Gary Petty, Michelle Hudson, Amanda Spencer, Ron McKelvey, and Nina Crawford are members of the Board of Elections and Voter Registration for Catoosa County, Georgia, and are charged with the duty of conducting elections in Catoosa County, Georgia. (Compl. ¶ 2(a)(iii).) Plaintiffs have sued those Defendants in their official and individual

capacities. (Id.)

Defendant Judge John Payne is the Superintendent of Elections for the Board of Registrars for Chattooga County, Georgia, and is charged with the duty of conducting elections in Catoosa County, Georgia. (Compl. ¶ 2(a)(iv).) Plaintiffs have sued Defendant Payne in his official and individual capacities. (Id.)

Defendant Shea Hicks is the Superintendent of Elections for the Board of Elections and Registrations for Gordon County, Georgia, and is charged with the duty of conducting elections in Gordon County, Georgia. (Compl. ¶ 2(a)(v).) Plaintiffs have sued Defendant Hicks in her official and individual capacities. (Id.)

Defendant Jennifer A. Johnson is the Superintendent of Elections for the Board of Elections and Voter Registration for Polk County, Georgia, and is charged with the duty of conducting elections in Polk County, Georgia. (Compl. ¶ 2(a)(vi).) Plaintiffs have sued Defendant Johnson in her official and individual capacities. (Id.)

Defendant Sam Little is the Superintendent of Elections for the Board of Elections and Registration for Whitfield County, Georgia, and is charged with the duty of conducting elections in Whitfield County, Georgia. (Compl. ¶ 2(a)(vii).) Plaintiffs have sued Defendant Little in his official and

individual capacities. (Id.)

Defendant Cathy Cox is the Secretary of State for the State of Georgia, and is Chair of the State Election Board. (Compl. ¶ 2(a)(viii).) Defendant Cox has been designated as the Chief Election Official for purposes of the federal Help America Vote Act of 2002, and also is the Chief Election Official for purposes of the National Voter Registration Act of 1993. (Id.) Plaintiffs have sued Defendant Cox in her individual and official capacities. (Id.)

Plaintiffs allege that the superintendents and board members of the city and county boards of elections named in paragraphs 2(a)(i) through 2(a)(vii) of the Complaint are members of a class that consists of superintendents and members of city and county boards of elections in each of the 159 counties in Georgia, who are so numerous as to make their joinder impracticable. (Compl. ¶ 6.) Plaintiffs seek certification of a defendant class of all superintendents and members of all city and county boards of election in Georgia under Federal Rule of Civil Procedure 23(b)(1) and (b)(2). (Id. ¶ 7.)

**B. The Georgia Photo ID Requirement**

Prior to the 1998 elections, voters in Georgia, like registered voters in a majority of other states, were not required to present identification as a condition of voting.

(Compl. ¶ 8.) In 1997, the Georgia General Assembly adopted O.C.G.A. § 21-2-417, which required registered voters in Georgia to identify themselves by presenting one of seventeen forms of identification to election officials as a condition of being admitted to the polls and of being allowed to vote. (State Defs.' Initial Br. Opp'n Pls.' Mot. Prelim. Inj. Ex. 1.) Prior to its amendment in 1997, O.C.G.A. § 21-2-417 permitted, but did not require, registered voters to present a Georgia driver's license or other form of official photographic identification as a method of identification as a condition of voting. (Compl. ¶ 10.) Under the version of O.C.G.A. § 21-2-417 as amended in 1997, voters remained free to use any of eight other methods of identification for voting, including a birth certificate, a social security card, a copy of a current utility bill, a government check, a payroll check, or a bank statement showing the voter's name and address. (State Defs.' Initial Br. Opp'n Pls.' Mot. Prelim. Inj. Ex. 1.) Additionally, voters who did not have, or could not find, one of the seventeen forms of identification specified in former O.C.G.A. § 21-2-417(a), were entitled to be admitted to the polls, to be issued a ballot, and to be allowed to vote simply by signing a statement under oath swearing or affirming that he or she is the person identified on the elector's certificate. (Id.)

In 2005, the Georgia General Assembly adopted House Bill 244, or Act 53 ("HB 244"), which amended O.C.G.A. § 21-2-417 to require that all registered voters in Georgia who vote in person in all primary, special, or general elections for state, national, and local offices held on or after July 1, 2005, present a government-issued Photo ID to election officials as a condition of being admitted to the polls and before being issued a ballot and being allowed to vote. Plaintiffs have presented evidence indicating that the Georgia House of Representatives approved the Conference Committee Report on Act 53 by a vote of eighty-nine Republicans and two Democrats, while seventy-two Democrats and three Republicans voted against it. (Decl. of Ron D. Hockensmith ¶ 5 & Ex. 1.) The Senate adopted the Conference Committee Report on Act 53, with thirty-one Republicans and no Democrats voting in favor of the Act and eighteen Democrats and two Republicans voting against the Act. (Id.)

Plaintiffs have submitted the Declaration of Margaret S. Smothers, the former Executive Director of the League of Women Voters of Georgia. (Decl. of Margaret S. Smothers ¶ 2.) Ms. Smothers served as the League of Women Voters of Georgia's lobbyist during the 2005 session of the Georgia General Assembly, and worked on voting rights issues, including the proposals to require Photo ID. (Id. ¶¶ 2-3.) Ms. Smothers

observed:

4.

One of the objections opponents had to the photo id proposals was that the proposals included no funding for public education to inform registered voters of the new requirements that they present a photo id card in order to have their vote counted. In contrast, when Georgia shifted to electronic voting machines, the budget and staff of the Secretary of State's office was temporarily increased in order to engage in extensive public education efforts to prepare voters for that change. At the March 21, 2005 hearing on HB 244 before the Senate Committee on State and Local Governmental Operations (SLOGO), Randall Evans, who sponsored the bill and who is currently a member of the State Elections Board expressed the opinion that the Secretary of State's office had funds available from its current budget and that the state could rely on the public education efforts of such groups as the NAACP and AARP. Similar statements about the advocacy groups being sufficient to educate the public were made on the Senate floor during the March 29, 2005 debate on the photo id bill.

5.

Advocacy groups opposed to the legislation suggested the issue be studied prior to the next legislative session to determine if there were in fact a serious number of incidents of voter impersonation. At the SLOGO hearing on March 21, 2005 referred to above, Senator John Wiles, chair of the committee, asked if the groups would prefer the legislation to be enacted in the 2005 session, thus, in his view, providing a year for the groups to conduct public education. It was apparent from this comment that the chair was either unaware or was not concerned that municipal elections are conducted in odd years.

(Id. ¶¶ 4-5.)

Defendant Cathy Cox, Georgia's Secretary of State

("Secretary of State Cox"), wrote a memorandum to the members of the Georgia State Senate, asking that the senators consider the "staggering opportunities for voter fraud" that HB 244 would create. (Pls.' Br. Supp. Mot. Prelim. Inj. Ex. A at 1.)

Secretary of State Cox observed:

By allowing any person, at any time within 45 days before an election, to vote an absentee ballot by mail - with no ID requirement and no requirement to state one of the current conditions for voting absentee (O.C.G.A. § 21-2-380) - such as being out of town on election day, having a disability, being over 75 years old, etc.), you would be opening a gaping opportunity for fraud. At virtually every meeting of the State Elections Board during the past 10 years, we have dealt with cases involving fraud or election law violations in handling or voting absentee ballots. HB 244 removes all restrictions on voting by mail, and thus makes it quite simple for someone inclined to commit fraud to do so.

This completely contradicts the reasons stated for another measure contained in HB 244 - the Photo ID requirement. If the authors are indeed concerned about voter fraud, they would not likely authorize the easiest - and most prevalent form - of election law violations: unregulated voting by mail. In the past 9 years, neither my staff nor I can recall a single case or complaint of a voter impersonating another voter at the polls - the issue sought to be corrected by mandatory photo identification. And had this been occurring, some voter surely would have complained upon finding that someone else had voted under their name. It hasn't happened.

I urge you to fully consider all the changes proposed by HB 244. This bill started out as the "housekeeping" legislation proposed by my office, but other bills - HB 597 and SB 84 - have now been merged into it. The bill attempts to solve a problem that does not exist while expanding the opportunity for fraud in the area that has long

been the most vulnerable to this type of abuse - the mailed absentee ballot.

(Id. at 1-2.)

On April 8, 2005, Secretary of State Cox wrote a letter to Governor Perdue expressing reservations about the Photo ID requirement contained in HB 244, and urging Governor Perdue to veto the bill. In her April 8, 2005, letter, Secretary of State Cox observed:

It is my strong belief that the picture identification requirement in House Bill 244 is (1) unnecessary, (2) creates a very significant obstacle to voting on the part of hundreds of thousands of Georgians, including the poor, the infirm and the elderly who do not have drivers licenses because they are either too poor to own a car, are unable to drive [a] car, or have no need to drive a car, (3) very unlikely to receive pre-clearance under the Voting Rights Act by the Department of Justice, (4) violates Art. II, section I paragraph I of the Georgia Constitution by adding a condition on the right to vote that is not contained in the constitution and (5) imposes an undue burden on a fundamental right of all citizens, the right to vote, in violation of both the state and federal constitutions."

(Id. at 1.)

Secretary of State Cox also expressed her belief that the Photo ID requirements of House Bill 244 are unnecessary:

One of the primary justifications given by the Legislature for the passage of the photo identification provisions of House Bill 244 - the elimination of voter ID fraud at the polls - is an unfounded justification. I cannot recall one documented case of voter fraud during my tenure as Secretary of State or Assistant Secretary of State that specifically related to the impersonation of a registered voter at voting polls. Our state

currently has several practices and procedures in existence to ensure that such cases of voter fraud would have been detected if they in fact occurred, and at the very least, we would have complaints of voters who were unable to vote because someone had previously represented himself or herself as such person on that respective Election Day. As a practical matter, there is no possibility that vote fraud of this type would have gone undetected if it had in fact occurred because there is a list of registered voters at each polling place that is checked off as each person votes. If the impersonator voted first, and the legitimate voter came to the polling place later in the day and tried to vote, he or she would be told that they had already "voted" and would not be allowed to vote a second time in the same day. It is reasonable to suspect that a voter who cared enough to show up at the polls to cast a ballot would almost certainly have complained - but there have been no such complaints. If the opposite occurred, and the legitimate person came to the polls first and cast his ballot, the impersonator who showed up later would not be allowed to vote for the same reason and the attempted fraud would have been prevented.

In addition, this state has adopted severe criminal sanctions for the type of voter impersonation that is purportedly of concern and it is evident that such penalties have been a sufficient deterrent. In essence, there is no voter fraud problem currently in existence that House Bill 244 addresses. Additionally, the concern for this type of voter fraud has not prompted other states to approve legislation as restrictive as House Bill 244. Forty-two of those states provide for other valid forms of identification besides photo identification. Of the other seven states, not one is as restrictive as the legislation recently enacted in our state. If this type of voting fraud was a national trend, other states would likely be adopting legislation as restrictive as House Bill 244.

In contrast to the lack of voter fraud relating to impersonation of voters at polls during my tenure, the State Election Board has reviewed numerous

cases of voter fraud relating to the use of absentee ballots. However, the Legislature, in adopting House Bill 244 grossly expanded the opportunities for absentee voting by mail without any photographic identification requirement whatsoever, even though absentee ballots pose more of a threat of voting fraud than people voting in a polling location in their community. As a result, the type of voter fraud that has frequently occurred in our state is not addressed, and in fact is enhanced by the expansion of vote-by-mail opportunities. In sum, the justification for House Bill 244 is but a pretext.

(Pls.' Br. Supp. Mot. Prelim. Inj. Ex. B at 1-2.) Secretary of State Cox also observed that the Photo ID requirements created substantial obstacles to many Georgia voters:

Requiring someone who is otherwise registered and fully qualified to vote to present a government issued picture identification at the polling place as a condition of voting places a very real burden on many people, and especially upon the poor and elderly who do not own or cannot drive a car and therefore do not have drivers' licenses. It is estimated by the League of Women Voters and the AARP that an estimated 152,664 individuals over the age of 60 who voted in the 2004 presidential election do not have a Georgia driver's license and are likely not to have other photo identification. For such voters to obtain identification is often an unnecessarily burdensome task, particularly if such voters are in retirement communities and assisted living facilities, or live in rural areas.

In addition, for many of the poorest residents of our state, photographic identification is not just a matter of unnecessary documentation that has no direct bearing on their day to day lives (they often have no need to drive or travel, or otherwise engage in activities that require a license), but is a burden of cost, economy and time. Although seemingly nominal, the \$8.00 fee for an identification card may be a cost that many of our poor residents are unable to bear. Given the fact

that the United State[s] Supreme Court has held that a \$1.50 poll tax is an unconstitutional burden on the ability [of] an individual to vote (*Harper v. State Bd. of Elections*, 383 U.S. 663 (1966)), an \$8.00 fee for an identification card required by the state would also seemingly be unconstitutional, even if such fee may be waived by the state in the event that a voter swears that he or she is indigent. In fact, to require that someone swear and affirm they are indigent when they are above the level of indigence but nonetheless too poor to afford the cost of an identification card, is both an affront to that person as well as an unlawful requirement that he or she swear to something that is not true. In addition, there are other costs related to obtaining an identification [card] which the state does not have the ability to waive. For an individual working on an hourly wage, the time it takes to travel to a DMVS (which may be an unreasonable distance away from the resident[']s home or office), wait in the lengthy lines that result from only having 56 DMVS offices in the state (according to the list of locations posted on [www.dmv.ga.gov](http://www.dmv.ga.gov)) and then the return commute, results in actual lost wages. For the state to require this of our citizens, some of whom cannot afford to take such time off, is an unnecessary burden related to the exercise of that person's right to vote.

The geography of state DMVS offices poses a significant burden on many residents who would be required to obtain identification in order to vote. Given this state has only 56 DMVS offices, citizens without cars who reside in 103 of the 159 counties in Georgia must travel outside their home counties to obtain a state-issue[d] picture ID in order to vote. Nor is there a single location to obtain such an ID in the city of Atlanta.

(Id. at 2-3.) Additionally, Secretary of State Cox expressed her belief that HB 244 violated article II, section 1, paragraph 2 of the Georgia Constitution because it imposed a qualification on voters that was not listed in the Georgia

Constitution. (Id. at 4.) Finally, Secretary of State Cox expressed her belief that the Photo ID requirement imposed an undue burden on the fundamental right of citizens to vote:

Our federal and state courts have consistently recognized the right to vote as one of the most fundamental rights of our citizens. *Wesberry v. Sanders*, 376 U[.]S[.] 1 (1964). The right to vote is "preservative" of other rights, and is one that bears the strictest of scrutiny and it is the fundamental nature of this right which cannot be burdened by state actions. *Harper v. State Bd. of Elections*, 383 U.S. 663 (1966), *Reynolds v. Sims*, 377 U[.]S[.] 533 (1964). The United States Supreme Court, in *Dunn v. Blumstein*, 405 U.S. 330 (1972), recognized the close constitutional review required with respect to any restriction on the right to vote. In particular, the Supreme Court held in *Dunn* that "before the right [to vote] can be restricted, the purpose of the restriction and the assertedly overriding interests served by it must meet strict constitutional scrutiny." In addition, our state Supreme Court has also held that "substantive due process requires that state infringement on a fundamental right be narrowly tailored to serve a compelling state interest." *State of Ga. v. Jackson*, 269 Ga. 308 (1998). Our Supreme Court has also held that "when it is established that the legislation 'manifestly infringes upon a constitutional provision or violates the rights of the people' that the statute should be declared unconstitutional." *Cobb County School District v. Barker*, 271 Ga. 35 (1995). The intersection of those two precedents presents two clear questions. First, acknowledging that the right to vote is a fundamental right, is House Bill 244 narrowly tailored to serve a compelling state interest? Second, is it established that the photo identification requirements of House Bill 244 do not manifestly infringe upon the rights of the people? Based on the foregoing facts referenced above, the answer to both of these questions is no.

(Id. at 5.)

On April 22, 2005, Governor Sonny Perdue signed HB 244,

and the Photo ID requirement of HB 244 became effective on July 1, 2005, subject to pre-clearance by the United States Department of Justice. (Compl. ¶ 15.) The Photo ID requirement of HB 244 is codified in O.C.G.A. § 21-2-417, which now provides:

(a) Except as provided in subsection (c) of this Code section, each elector shall present proper identification to a poll worker at or prior to completion of a voter's certificate at any polling place and prior to such person's admission to the enclosed space at such polling place. Proper identification shall consist of any one of the following:

(1) A Georgia driver's license which was properly issued by the appropriate state agency;

(2) A valid identification card issued by a branch, department, agency, or entity of the State of Georgia, any other state, or the United States authorized by law to issue personal identification, provided that such identification card contains a photograph of the elector;

(3) A valid United States passport;

(4) A valid employee identification card containing a photograph of the elector and issued by any branch, department, agency, or entity of the United States government, this state, or any county, municipality, board, authority, or other entity of this state;

(5) A valid United States military identification card, provided that such identification card contains a photograph of the elector; or

(6) A valid tribal identification card containing a photograph of the elector.

(b) Except as provided in subsection (c) of this Code section, if an elector is unable to produce any of the items of identification listed in subsection (a) of this Code section, he or she shall be allowed to vote a provisional ballot pursuant to Code Section 21-2-418 upon swearing or affirming that the elector is the person identified in the elector's voter certificate. Such provisional ballot shall only be counted if the

registrars are able to verify current and valid identification of the elector as provided in subsection (a) of this Code section within the time period for verifying provisional ballots pursuant to Code Section 21-2-419. Falsely swearing or affirming such statement under oath shall be punishable as a felony, and the penalty shall be distinctly set forth on the face of the statement.

c) An elector who registered to vote by mail, but did not comply with subsection (c) of Code Section 21-2-220, and who votes for the first time in this state shall present to the poll workers either one of the forms of identification listed in subsection (a) of this Code section or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of such elector. If such elector does not have any of the forms of identification listed in this subsection, such elector may vote a provisional ballot pursuant to Code Section 21-2-418 upon swearing or affirming that the elector is the person identified in the elector's voter certificate. Such provisional ballot shall only be counted if the registrars are able to verify current and valid identification of the elector as provided in this subsection within the time period for verifying provisional ballots pursuant to Code Section 21-2-419. Falsely swearing or affirming such statement under oath shall be punishable as a felony, and the penalty shall be distinctly set forth on the face of the statement.

O.C.G.A. § 21-2-417.

On August 26, 2005, the Department of Justice granted pre-clearance to Georgia's Photo ID requirement. (State Defs.' Initial Br. Opp'n Pls.' Mot. Prelim. Inj. Ex. 3.)

At the same time that the General Assembly voted to require the presentation of a Photo ID for voting, the General Assembly also voted to amend O.C.G.A. § 40-5-103(a) to double

the minimum fee for a Photo ID card from \$10 to \$20 for a five-year Photo ID, and to authorize a new ten-year Photo ID card for \$35. (Compl. ¶ 16.) O.C.G.A. § 40-5-103(a) presently provides:

(a) Except as provided in subsections (b) and (c) of this Code section, the department shall collect a fee of \$20.00 for a five-year card and a fee of \$35.00 for a ten-year card, which fee shall be deposited in the state treasury in the same manner as other motor vehicle driver's license fees.

(b) The department shall collect a fee of \$5.00 for the identification card for all persons who are referred by a nonprofit organization which organization has entered into an agreement with the department whereby such organization verifies that the individual applying for such identification card is indigent. The department shall enter into such agreements and shall adopt rules and regulations to govern such agreements.

(c) The department shall not be authorized to collect a fee for an identification card from those persons who are entitled to a free veterans' driver's license under the provisions of Code Section 40-5-36.

(d) The department shall not be authorized to collect a fee for an identification card from any person:

- (1) Who swears under oath that he or she is indigent and cannot pay the fee for an identification card, that he or she desires an identification card in order to vote in a primary or election in Georgia, and that he or she does not have any other form of identification that is acceptable under Code Section 21-2-417 for identification at the polls in order to vote; and
- (2) Who produces evidence that he or she is registered to vote in Georgia.

This subsection shall not apply to a person who has

been issued a driver's license in this state.

(d) The commissioner may by rule authorize incentive discounts where identification cards are renewed by Internet, telephone, or mail.

O.C.G.A. § 40-5-103.

The Communications Office of Georgia prepared a press release as to HB 244 stating that after the effective date of HB 244, only the following forms of Photo ID will be acceptable: (1) a Georgia Driver's license; (2) a State Identity Card; (3) a passport; (4) a Government Employee ID card; (5) a military ID card; and (6) a tribal ID card. (Pls.' Br. Supp. Mot. Prelim. Inj. Ex. F.) According to the same press release, the following forms of previously acceptable identification will no longer be accepted by election officials as valid forms of voter identification: (1) a birth certificate; (2) a Social Security Card; (3) a Certified Naturalization Document; (4) a current utility bill; (5) a bank statement; (6) a government check or paycheck; or (7) other government documents. (Id.) The information also includes a statement from Senator Cecil Stanton indicating that the Legislature wanted to "protect the integrity of the [voting] process" when it enacted the Photo ID law. (Id. at 2.)

The new Photo ID requirement applies only to registered voters who vote in person. (Oct. 12, 2005, Hr'g Tr.) The

General Assembly imposed no similar Photo ID requirement on absentee voters, except those voting absentee for the first time after registering by mail. (Id.)

After adopting HB 244, Georgia became one of only two states that requires registered voters to present a Photo ID as an absolute condition of being admitted to the polls and being allowed to cast a ballot in federal, state, and local elections. (Compl. ¶ 17.) Thirty states do not require registered voters to present any form of identification as a condition of admission to the polls or to cast a ballot. (Id.) Twenty states require voters to present some form of identification of the polls. (Id.) Of those states requiring identification, only two states, Georgia and Indiana, require that voters present a Photo ID as the sole method of identification as a condition of voting. (Id.; Oct. 12, 2005, Hr'g Tr.)

**C. Obtaining a Photo ID Card**

The State of Georgia issues photo identification cards ("Photo ID cards") at its Department of Driver Services ("DDS") offices. (Decl. of Alan Watson ¶ 7 & Ex. C.) As of October 1, 2005, the DDS had fifty-six full-time customer service centers and two part-time customer service centers in Georgia. (Id.) Georgia has 159 counties, and individuals who reside in some counties, particularly counties in south and

middle Georgia, may have lengthy drives to their nearest DDS service centers. (Id. Ex. C.)

No DDS service center is located within the Atlanta, Georgia, city limits or within the Rome, Georgia, city limits. (Watson Decl. Ex. C.) Fulton and DeKalb counties, however, have DDS customer service centers located at (1) 2801 Candler Road, Decatur, Georgia 30034; (2) 537 Shannon Mall, Union City, Georgia 30291; (3) 8610 Roswell Road, Suite 710, Sandy Springs, Georgia 30350; and (4) 8040 Rockbridge Road, Lithonia, Georgia. (Id. ¶ 8.) Floyd County, where Rome, Georgia, is located, has a full-time DDS customer service center located at 3386 Martha Berry Highway. (Id. ¶ 9.)

Individuals who wish to renew a valid Georgia driver's license or Photo ID card may do so via the Internet. (Watson Aff. ¶ 18.) The DDS makes accommodations for disabled applicants who appear at a DDS service center to obtain a driver's license or Photo ID card. (Id. ¶ 17.) DDS policy directs that those applicants be brought to the front of the line, given a "Q-Matic" ticket, and provided with a seat. (Id.) The DDS employees then serve the disabled applicants in the order in which their number is called. (Id.)

DDS also has a mobile issuance bus known as the Georgia Licensing on Wheels ("GLOW") Bus. (Watson Decl. ¶ 10.) During September 2005, the GLOW Bus visited twenty-five

locations. (Id. ¶ 10 & Ex. D.) During those visits, the DDS issued a total of 122 free Photo ID cards for voting purposes, ninety-one five-year Photo ID cards, thirteen ten-year Photo ID cards, sixty-one five-year driver's licenses, nine ten-year driver's licenses, and nine veteran's driver's licenses, and also processed two address changes. (Id.) In addition to the schedule for the GLOW bus established by the DDS, any group may sponsor the GLOW bus for an appearance in a particular location or community by making arrangements with the DDS. (Id. ¶ 11.)

Plaintiffs have presented evidence indicating that DDS employees gave inconsistent information in response to inquiries concerning the locations and dates for an appearance of the GLOW bus at Turner Field in Atlanta and for an appearance of the GLOW bus in downtown Atlanta. (Aff. of Jennifer Owens ¶¶ 3-4.) Plaintiffs also have presented evidence indicating that the GLOW bus has steps for access and is not accessible for purposes of the Americans with Disabilities Act, and that individuals who are confined to wheelchairs cannot enter the bus. (Id. ¶ 6.) The photography and computer equipment on the GLOW bus is not mobile and cannot be removed from the bus to service individuals who cannot enter the bus. (Id.)

Defendants have presented evidence indicating that all

individuals who wish to obtain a Photo ID card must complete an application and pay an applicable fee. (Decl. of Alan Watson ¶ 3.) If an applicant wishes to obtain a Photo ID card for voting purposes but cannot afford the card, a DDS employee will provide an affidavit to the applicant to complete. (Id.) The affidavit requires the applicant to swear or affirm that: (a) he or she is eligible to receive the Photo ID card free of charge because he or she is indigent and cannot pay the fee for the Photo ID card; (b) he or she desires a Photo ID card to vote in a primary or election in Georgia; and (c) he or she does not have any other form of identification that is acceptable under O.C.G.A. § 21-2-417 for voter identification purposes; (d) he or she is registered to vote in Georgia or is applying to register as part of his or her application for a Photo ID card; and (e) he or she does not have a valid driver's license issued by the State of Georgia. (Id. ¶ 4 & Ex. A.)

Defendants have presented evidence indicating that the DDS "considers the policy regarding the issuance of a free identification card for voting purposes to be completely nondiscretionary: if the applicant completes the Affidavit, the applicant is automatically eligible for a free photographic identification [card] for voting purposes." (Watson Aff. ¶ 5.) Defendants' evidence indicates that the

DDS "makes no effort to verify the provisions of these completed affidavits relating to the applicant's eligibility for a free identification card for voting purposes and does not question the applicant." (Id.) According to Defendants, "[i]n short, any applicant who completes such an affidavit will receive a free photographic identification card for voting." (Id.)

After HB 244 passed, the DDS trained its district managers concerning the above policy and the process for issuing free Photo ID cards for voting purposes. (Watson Decl. ¶ 6.) In turn, district managers trained their employees in the field offices. (Id.) Additionally, DDS sent a written notice concerning the policy and procedure for issuing free Photo ID cards for voting to all of its employees. (Id. & Ex. B.) Since the DDS began issuing the Photo ID cards for voting purposes, the DDS has received no complaints that individuals who wished to obtain the cards, whether free or paid, were denied the cards. (Id. ¶ 12.)

Defendants have presented evidence that as of July 30 or July 31, 2005, 5,674,479 Georgians possessed unexpired driver's licenses and 731,600 Georgians possessed unexpired Photo ID cards. (Watson Aff. ¶ 13.) When applying for licenses or Photo ID cards at the DDS service centers, applicants also may choose to register to vote under Georgia's

"Motor Voter" law. (Id.)

In 2005, the fee for driver's licenses and Photo ID cards was \$15.00 for four years. (Watson Aff. ¶ 15.) In 2005, the Georgia legislature changed the law to set a \$20.00 fee for each driver's license and Photo ID card, and to provide that those driver's licenses and Photo ID cards would be valid for a term of five years. (Id.) The new law also provides that Georgians may purchase a ten-year driver's license or Photo ID card for \$35.00. (Id.) Prior to 2005, the Georgia legislature had not increased the fees for driver's licenses or Photo ID cards in thirteen years. (Id.)

Defendants have presented evidence indicating that the fee charged for driver's licenses and Photo ID cards is directly related to the costs of producing and issuing the driver's licenses and Photo ID cards. (Watson Aff. ¶ 16.) For the fiscal year ending June 30, 2004, the DDS conducted a total of 3,344,823 transactions involving producing and issuing driver's licenses and Photo ID cards, obtaining a total revenue of \$42,304,316.06 while spending \$47,018,808.73 of its budget for the fiscal year. (Id.)

The DDS's website explains how to apply for a Photo ID card. (Pls.' Br. Supp. Mot. Prelim. Inj. Ex. C.) The website states that applicants for a Photo ID card must furnish proof that they reside in Georgia and provide a valid Georgia

residence address by presenting one of the following: (1) a utility bill with a valid Georgia residence address; (2) a bank statement with a valid Georgia residence address; (3) a rental contract or receipt with a valid Georgia residence address; (4) an employer verification; or (5) a Georgia license issued to the applicant's parent, guardian, or spouse.

(Id.) The website further states that first-time applicants for a Photo ID card must provide an acceptable form of personal identification that includes the applicant's full name and month, day, and year of birth. (Id.) Acceptable forms of personal identification include: (1) "[o]riginal birth certificate (State issued) State Vital Statistics (Hospital birth certificates are not acceptable)"; (2) "[c]ertified copy of birth certificate (issued from Vital Statistics with affixed seal)"; (3) "[c]ertificate of birth registration"; (4) certified naturalization records; (5) an immigration ID card from Immigration and Naturalization; or (6) a valid passport. (Id.)

Plaintiffs also have submitted information from the Department of Vital Statistics' website concerning the process for obtaining a certified copy of a birth certificate. (Pls.' Br. Supp. Mot. Prelim. Inj. Ex. D.) To obtain a certified copy of a birth certificate, an applicant must provide "a photocopy of your valid photo ID, such as: driver's license,

state issued ID card, or employer issued photo ID." (Id. at 1.) An applicant must pay a \$10 search fee. (Id. at 2.)

The DDS and its predecessor, the Department of Motor Vehicles, only began collecting social security numbers three years ago, when they issued driver's licenses and Photo ID cards for four years. (Watson Aff. ¶ 19.) Consequently, DDS has collected only three-quarters of the social security numbers for individuals holding driver's licenses and social security cards. (Id.) Consequently, matching a list of social security numbers for registered voters with the DDS's list of social security numbers to determine the identity of registered voters who hold a driver's license or a Photo ID card is not possible.

**D. Declarations of Would-Be Voters**

Plaintiffs have submitted a number of declarations or affidavits of voters. The majority of the declarations state that the voters are not indigent, but do not have \$20 to spend for a Photo ID card that they do not need except for purposes of voting. (Decl. of Annie Johnson ¶ 6; Decl. of Betty Kooper ¶ 5; Decl. of Cheryl D. Simmons ¶ 5; Decl. of Clarence Harp ¶ 5; Decl. of Eva Jeffrey ¶ 4; Decl. of George Cliatt ¶ 6; Decl. of Katherine Jackson ¶ 5; Decl. of L. Dewberry ¶ 5; Decl. of Luanna S. Miller ¶ 5; Decl. of Mary Cliatt ¶ 6; Decl. of Norma Pechman ¶ 5; Decl. of Ronnie Gibson ¶ 5; Decl. of Rosa Brown

¶ 8; Decl. of Ruth L. Butler ¶ 5; Decl. of Willie Boye ¶ 5.) A number of the voters do not drive or cannot afford a car. (A. Johnson Decl. ¶ 6; B. Kooper Decl. ¶ 5; C. Simmons Decl. ¶ 5; C. Harp Decl. ¶ 5; Decl. of Eleanor Whittenburg ¶ 2; E. Jeffrey Decl. ¶ 4; Decl. of Irene Laster ¶ 6; K. Jackson Decl. ¶ 5; L. Dewberry Decl. ¶ 5; Decl. of Lawrence Dorn ¶ 5; L. Miller Decl. ¶ 5; M. Cliatt Decl. ¶ 5; Decl. of Minnie Bridges ¶ 5; Decl. of Patricia Lane ¶ 4; Decl. of Pearl Kramer ¶ 5; R. Gibson Decl. ¶ 5; R. Brown Decl. ¶ 7; R. Butler Decl. ¶ 5; T. Jackson Decl. ¶ 5; W. Boye Decl. ¶ 5.)

Most of the voters do not have a driver's license, passport, tribal Photo ID, or other form of government-issued ID because they have no need for one. (A. Johnson Decl. ¶ 4; B. Kooper Decl. ¶ 4; C. Simmons Decl. ¶ 4; Decl. of Clara Williams ¶ 6; C. Harp Decl. ¶ 4; E. Whittenburg Decl. ¶ 4; E. Jeffrey Decl. ¶ 3; Decl. of Exie Brown ¶ 4; G. Cliatt Decl. ¶ 4; I. Laster Decl. ¶ 4; Decl. of Jason Benford ¶ 3; K. Jackson Decl. ¶ 4; L. Dewberry Decl. ¶ 4; L. Dorn Decl. ¶ 4; L. Miller Decl. ¶ 4; M. Cliatt Decl. ¶ 4; M. Bridges Decl. ¶ 4; N. Pechman Decl. ¶ 4; P. Lane Decl. ¶ 4; P. Kramer Decl. ¶ 4; R. Gibson Decl. ¶ 4; R. Brown Decl. ¶ 4; R. Butler Decl. ¶ 4; T. Jackson Decl. ¶ 5; W. Boye Decl. ¶ 4.) Quite a few of the voters are African-American. (A. Johnson Decl. ¶ 4; C. Williams Decl. ¶ 4; G. Cliatt Decl. ¶ 5; I. Laster Decl. ¶ 5;

M. Cliatt Decl. ¶ 5; P. Lane Decl. ¶ 1; R. Brown Decl. ¶ 3.) Many of the voters are over sixty-five years old. (A. Johnson Decl. ¶ 1 (seventy-five years old); B. Kooper Decl. ¶ 1 (ninety years old); I. Laster Decl. ¶ 1 (eighty-eight years old); C. Williams Decl. ¶ 1 (sixty-eight years old); E. Brown Decl. ¶ 1 (eighty-two years old); G. Cliatt Decl. ¶ 1 (seventy-four years old); L. Miller Decl. ¶ 1 (eighty-four years old); M. Cliatt Decl. ¶ 1 (eighty-seven years old); M. Bridges Decl. ¶ 1 (eighty-five years old); N. Pechman Decl. ¶ 1 (eighty-four years old); P. Kramer Decl. ¶ 1 (eighty years old); R. Brown Decl. ¶ 1 (appears to be ninety-three years old); R. Butler Decl. ¶ 1 (eighty-nine years old).)

Several of the voters have physical or mental disabilities that make it difficult for them to travel to a DDS service center, to walk for long distances, or to stand in line. (A. Johnson ¶ 6 (physical disability); E. Whittenburg Decl. ¶ 2 (legally blind and uses walker to assist in walking); E. Brown Decl. ¶ 5 (confined to wheelchair); G. Cliatt Decl. ¶ 6 (poor health); I. Laster Decl. ¶ 6 (physical disability); J. Benford Decl. ¶ 5 (mental difficulties); L. Miller Decl. ¶ 5 (legally blind); M. Cliatt Decl. ¶ 6 (physical disability and confined to wheelchair); M. Bridges Decl. ¶ 5 (physical and visual impairment); P. Kramer Decl. ¶ 5 (physical impairment); R. Brown Decl. ¶ 7 (same).) Others

have to rely on family members or friends for transportation, or cannot obtain transportation to a DDS service center. (E. Whittenburg Decl. ¶ 2 (relies on family for transportation; closest family member lives thirty-five miles away); E. Brown ¶ 6 (closest DDS service center eleven miles away; family members rarely available to transport her); J. Benford Decl. ¶ 5 (cannot obtain transportation to DDS service center); L. Dorn Decl. ¶ 5 (same).) Another voter would have difficulty taking off from work to go to a DDS service center to obtain a Photo ID. (L. Dewberry Decl. ¶ 5.)

Other voters had problems obtaining necessary information, such as birth certificates or valid driver's licenses from other states, required for issuing a Photo ID card. (E. Whittenburg Decl. ¶ 5 (assisted living resident would have to arrange for transportation to health department and pay \$10 for birth certificate); I. Laster Decl. ¶ 6 (born in 1917 and it was not customary to deliver birth certificate in community at that time); P. Lane Decl. ¶¶ 5-6 (could not get Photo ID at four DDS service center because she lacked documentation from Virginia's Department of Motor Vehicles); R. Brown Decl. ¶ 6 (has no birth certificate).) One voter could not get a Photo ID card because the State of North Carolina could not find her birth certificate, but was issued a letter that was good enough to get a passport from the

federal government--yet not good enough to get a Photo ID card. (Decl. of Ruth White ¶¶ 5-7.) Other voters had problems because their legal names did not match the names they used for voter purposes or the names on their birth certificates. (Decl. of Amanda Clifton ¶ 4 (divorce decree does not state intent to change name); C. Williams Decl. ¶ 4 (informally adopted and birth certificate name does not match voter registration).)

A declaration from George H. Carley, an Associate Justice of the Georgia Supreme Court, describes a lengthy wait at a DDS service center to renew a driver's license. (Decl. of George H. Carley ¶ 2 (describing standing in line at DDS service center for more than three hours to renew driver's license).) Another judge, Henry M. Newkirk, described taking his parents, ages eighty-one and eighty-two, to a DDS service center and standing in line for two hours to hold their places. (Decl. of Henry M. Newkirk ¶¶ 2-3.) He indicated that his parents would not have been able to stand in the line for so long because of their physical ailments, and could not have negotiated the process successfully without assistance. (Id. ¶¶ 4-5.)<sup>1</sup> Martin Crafter, a candidate for the Ft.

---

<sup>1</sup> During the October 12, 2005, preliminary injunction hearing, the Court overruled the State Defendants' objections to the declarations presented by Justice Carley and Judge Newkirk. The Court concluded that those declarations did not

Valley City Commission, described having to travel twenty miles to Warner Robbins to obtain a replacement driver's license, and stated that he had to request transportation from someone else to travel to the DDS service center. (Decl. of Marvin Crafter ¶¶ 2-4.)

**E. Census Data**

Plaintiffs have presented data from the 2000 Census to support their claim of vote denial. According to that data, 4.4 percent of African-American households in Georgia have a male householder and no wife present, with children under eighteen years old, as compared to 2.7 percent of Caucasian, non-Hispanic households in Georgia. (Pls.' Br. Supp. Mot. Prelim. Inj. Ex. E at 2.) Additionally, 30.1 percent of African-American households in Georgia have a female householder with no husband present and children under eighteen years old, as compared to 7.1 percent of Caucasian, non-Hispanic households in Georgia. (Id.)

According to the Census data, 18.5 percent of African-Americans in Georgia who are over age twenty-five have no high school diploma, as compared to 11.8 percent of Caucasian, non-Hispanic individuals over age twenty-five in Georgia. (Pls.' Br. Supp. Mot. Prelim. Inj. Ex. E at 3.) 9.0 percent of

---

violate applicable ethical rules, and that Justice Carley likely would take the appropriate action if this case came before the Georgia Supreme Court at some point.

African-Americans in Georgia who are over age twenty-five have less than a ninth-grade education, as compared to 5.5 percent of Caucasian, non-Hispanic individuals in Georgia who are twenty-five years and older. (Id.) Further, according to the data, 17.7 percent of African-American households in Georgia have no vehicle, as compared to 4.4 percent of Caucasian, non-Hispanic households in Georgia. (Id. at 9.)

**F. Declarations of Georgia Elections Officials**

**1. Shea Hicks**

Shea Hicks is the Chairperson of the Gordon County Board of Elections and Voter Registration. (Decl. of Shea Hicks ¶ 2.) Ms. Hicks has served in that capacity since 1991. (Id.) In her capacity as Chairperson, she supervises all Gordon County elections, as well as elections for municipalities in Gordon County such as Fairmount, Ranger, Resaca, and Plainville. (Id.) The Gordon County Board of Elections also assists the City of Calhoun with its elections when the City of Calhoun requests such assistance. (Id.) The City of Calhoun has requested assistance from the Gordon County Board of Elections for the November 8, 2005, election. (Id.)

Ms. Hicks' office has not received complaints that voters cannot obtain the identification needed for in-person voting. (S. Hicks Decl. ¶ 3.) Ms. Hicks testified that the great majority of voters in Gordon County already use either a

driver's license or a State-issued identification card to identify themselves at the polls. (Id.)

After the Photo ID requirement passed and obtained preclearance from the Justice Department, the Gordon County Board of Elections ordered new election materials from the Elections Division of the Secretary of State's Office (the "Elections Division"). (S. Hicks Decl. ¶ 4.) Those materials included voter certificates, which list the proper forms of identification for in-person voting, and posters for the polling places listing the forms of acceptable identification for in-person voting. (Id.) The Gordon County Board of Elections also attended training sessions conducted by the Elections Division. (Id.) Those sessions included training on the new Photo ID requirement. (Id.) The Gordon County Board of Elections has scheduled poll manager and poll worker training sessions for various dates during the next two weeks. (Id. ¶ 6.)

The Gordon County Board of Elections has made efforts to educate the public concerning the Photo ID requirement by providing information to the newspaper. (S. Hicks Decl. ¶ 4.) That information appeared in the local newspaper during the past weekend. (Id.)

Gordon County has the following elections scheduled for November 8, 2005: (1) a county-wide Special Local Option Sales

Tax ("SPLOST") referendum; (2) a Fairmount city council election; and (3) elections for the Calhoun Board of Education and Calhoun City Council. (S. Hicks Decl. ¶ 5.) Ms. Hicks believes that issuing a preliminary injunction against the Photo ID requirement for the November 8, 2005, elections would cause tremendous confusion among election officials, poll workers, and voters. (Id. ¶ 7.) Ms. Hicks believes that the Gordon County Board of Elections cannot order and receive new voter certificates and poll posters in time for those elections, and states that the Gordon County Board of Elections does not have a sufficient supply of the certificates or posters reflecting the former identification requirements. (Id.) Additionally, Ms. Hicks believes that holding additional training for poll managers and poll workers would be necessary. (Id.)

Finally, Ms. Hicks opines that it would not be reasonable or feasible to require poll workers to compare the signatures on the voter certificates to the voter registration cards to verify the identity of voters. (S. Hicks Decl. ¶ 8.) According to Ms. Hicks, no such mechanism is in place and implementing one would be very costly. (Id.) Ms. Hicks also believes that such verification at the polls would be very time-consuming given the short amount of time available for verifying the signatures and the number of voters. (Id.)

## 2. Lynn Bailey

Lynn Bailey is the Executive Director of the Richmond County Board of Elections. (Decl. of Lynn Bailey ¶ 2.) Ms. Bailey has served in that capacity since 1993. (Id.) In her capacity as Executive Director, she supervises all Richmond County elections, as well as elections for municipalities in Richmond County such as Augusta, Blythe, and Hephzibah. (Id.)

The Richmond County Board of Elections held a special election on September 20, 2005, to fill the unexpired term of State Senator Charles Walker. (Bailey Aff. ¶ 3.) According to Ms. Bailey, the changes made by the Photo ID requirement were "a nonissue." (Id.) She recalled that voters did not seem confused and that poll workers seemed to administer the new procedures properly. (Id.) Ms. Bailey testified that most of the voters showed the type of identification that was shown most often under the previous law--a driver's license or a State-issued identification card. (Id.)

According to Ms. Bailey, 12,826 people voted at the polls during the September 20, 2005, special election. (Bailey Decl. ¶ 4.) 12,813 of those individuals produced Photo ID at the polls. (Id.) The thirteen voters who did not produce a Photo ID at the polls voted provisional ballots. (Id.) Only two of those thirteen voters returned with a Photo ID within forty-eight hours. (Id.) The Richmond County Board of

Elections does not know why the other eleven voters did not return, and it never heard anything else from those voters.

(Id.)

Before the September 20, 2005, election, the Richmond County Board of Elections ordered new election materials from the Elections Division. (Bailey Decl. ¶ 5.) Those materials included voter certificates, which list the proper forms of identification for in-person voting, and posters for the polling places listing the forms of acceptable identification for in-person voting. (Id.) The Richmond County Board of Elections also attended training sessions conducted by the Elections Division. (Id.) Those sessions included training on the new Photo ID requirement. (Id.) The Richmond County Board of Elections also conducted poll worker training prior to the September 20, 2005, election. (Id.) Finally, the Richmond County Board of Elections has scheduled additional poll worker training for October 17 through October 19, 2005.

(Id. ¶ 7.)

Before the September 20, 2005, election, the Richmond County Board of Elections made efforts to educate the public concerning the Photo ID requirement by speaking to neighborhood groups, by using the media, and by educating the candidates. (Bailey Decl. ¶ 5.) The Richmond County Board of Elections also booked the GLOW bus to allow voters to obtain

a Photo ID, and the GLOW bus was stationed in Richmond County on September 6 and 7, 2005. (Id.) The Richmond County Board of Elections has requested that the GLOW bus return to Richmond County before the November 8, 2005, election. (Id. ¶ 7.)

Richmond County has the following elections scheduled for November 8, 2005: (1) an election to fill the offices of Mayor and five City Commission positions for the City of Augusta; (2) an election to fill the post of Marshal for the Civil and Magistrate Court; (3) a special election to fill the unexpired term of State Representative Henry Howard, who recently died; (4) a special election to fill an unexpired term in Board of Education District 9; (5) a SPLOST vote; and (6) municipal elections for Blythe and Hephzibah. (Bailey Decl. ¶ 6.) Ms. Bailey believes that issuing a preliminary injunction against the Photo ID requirement for the November 8, 2005, elections would cause tremendous confusion among election officials, poll workers, and voters. (Id. ¶ 8.) Ms. Bailey believes that the Richmond County Board of Elections cannot order and receive new voter certificates and poll posters in time for those elections, and states that the Richmond County Board of Elections does not have a sufficient supply of the certificates or posters reflecting the former identification requirements. (Id.) Additionally, Ms. Bailey believes that

holding additional training for poll managers and poll workers would be necessary. (Id.) Finally, Ms. Bailey states that the Richmond County Board of Elections would have to re-educate the public concerning the former identification requirements. (Id.)

Ms. Bailey opines that it would not be reasonable or feasible to require poll workers to compare the signatures on the voter certificates to the voter registration cards to verify the identity of voters. (Bailey Decl. ¶ 10.) According to Ms. Bailey, no such mechanism is in place and implementing one would be very costly. (Id.) Ms. Bailey also believes that such verification at the polls would be very time-consuming given the short amount of time available for verifying the signatures and the number of voters. (Id.)

Finally, Ms. Bailey is aware of speculation that people voted as other people under the former law. (Bailey Decl. ¶ 9.) According to Ms. Bailey, the Richmond County Board of Elections has never found substantiated evidence to support that speculation. (Id.) In any event, Ms. Bailey believes that evidence of voter impersonation would be difficult to find, because there is no way to track an impersonator after the impersonator leaves the polling place. (Id.)

### 3. Gary Smith

Gary Smith is the Director of Elections for the Forsyth

County Board of Elections. (Decl. of Gary Smith ¶ 2.) Mr. Smith has served in that capacity since January 1, 2002. (Id.) In his capacity as Director of Elections, he supervises all Forsyth County elections, as well as elections for municipalities in Forsyth County such as Cumming. (Id.)

Mr. Smith opines that in-person voter impersonation would be easy to accomplish, as any person can buy a list of electors and determine who ordinarily does not vote. (Smith Decl. ¶ 4.) The imposter then can go to vote in place of someone who ordinarily does not vote. (Id.) According to Mr. Smith, without Photo ID or a reasonable method of comparing signatures on registration cards to signatures on voter certificate, there is no real opportunity to prevent such fraud. (Id.)

Mr. Smith states that he recently reported six fraudulent voter registrations to the Forsyth County District Attorney's Office. (Smith Decl. ¶ 6.) According to Mr. Smith, the Photo ID requirements assist the Forsyth County Board of Elections in preventing those voters who have registered fraudulently from voting. (Id.) Mr. Smith opines that the opportunity for fraud existed under the prior law. (Id. ¶ 7.) Mr. Smith observes that limiting the forms of acceptable identification is helpful to the Forsyth County Board of Elections poll workers. (Id. ¶ 8.) Mr. Smith notes that many of the poll

workers do not know the voters by sight. (Id. ¶ 9.)

Mr. Smith's office has not received complaints that voters cannot obtain the identification needed for in-person voting. (Smith Decl. ¶ 11.) Mr. Smith testified that the great majority of voters in Forsyth County already use either a driver's license or a State-issued identification card to identify themselves at the polls. (Id.)

Mr. Smith believes that issuing a preliminary injunction against the Photo ID requirement for the November 8, 2005, elections would cause tremendous confusion among election officials, poll workers, and voters. (Smith Decl. ¶ 10.) Mr. Hicks believes that the various Boards of Elections cannot order and receive new voter certificates and poll posters in time for those elections, and states that the Boards of Elections do not have time to hold additional training for poll managers and poll workers would be necessary. (Id.)

Mr. Smith opines that it would not be reasonable or feasible to require poll workers to compare the signatures on the voter certificates to the voter registration cards to verify the identity of voters. (Smith Decl. ¶ 5.) According to Mr. Smith, no such mechanism is in place and implementing one would be very costly. (Id.) Mr. Smith also believes that such verification at the polls would be very time-consuming given the short amount of time available for verifying the

signatures and the number of voters. (Id.)

**4. Lynn Ledford**

Lynn Ledford is the Elections Supervisor for Gwinnett County, Georgia, and has served in that capacity for three years. (Decl. of Lynn Ledford ¶ 2.) Gwinnett County is the second-largest county in Georgia and is one of the fastest-growing counties in the United States. (Id.) Gwinnett County has approximately 341,000 registered voters and has more municipalities than any other county in Georgia. (Id.)

In her capacity as Elections Supervisor, Ms. Ledford supervises all Gwinnett County elections, and also serves as the official registrar of voters for municipalities in Gwinnett County. (Ledford Decl. ¶ 3.)

After the Photo ID requirement passed and obtained preclearance from the Justice Department, Gwinnett County held a runoff election on September 27, 2005, to fill the unexpired term of Phyllis Miller. (Ledford Decl. ¶ 4.) That election involved seventeen voting precincts. (Id. ¶ 6.) According to Ms. Ledford, the changes resulting from Georgia's new Photo ID requirement were a "non-issue." (Id. ¶ 5.) Specifically, Ms. Ledford recalled that voters did not seem confused, and poll workers properly administered the new requirements. (Id.) According to Ms. Ledford, most voters showed the type of identification that they previously showed most often--a

driver's license or state-issued Photo ID card. (Id.) No voter cast a provisional ballot for lack of proper Photo ID. (Id.)

Prior to the September 27, 2005, election, Gwinnett County ordered new election materials, revised the manual used by poll officials, and sent e-mails and made telephone calls to poll managers to educate the poll managers and poll workers. (Ledford Decl. ¶ 6.)

Gwinnett County has elections scheduled for November 8, 2005. (Ledford Decl. ¶ 6.) Those elections involve twelve municipalities, including Auburn, Berkeley Lake, Braselton, Buford, Dacula, Duluth, Lawrenceville, Lilburn, Loganville, Norcross, Snellville, and Sugar Hill. (Id. ¶¶ 6-7.)

Gwinnett County already has obtained supplies of voter certificates, which list the proper forms of identification for in-person voting, and posters for the polling places listing the forms of acceptable identification for in-person voting for the November 8, 2005, election. (Ledford Decl. ¶ 8.) Gwinnett County has made efforts to educate the public concerning the Photo ID requirement by using media outlets and by speaking at public engagements. (Id.)

Ms. Ledford believes that issuing a preliminary injunction against the Photo ID requirement for the November 8, 2005, elections would cause tremendous confusion among

election officials, poll workers, and voters. (Ledford Decl. ¶ 9.) Ms. Ledford believes that Gwinnett County cannot order and receive new voter certificates and poll posters in time for those elections, and states that Gwinnett County does not have a sufficient supply of the certificates or posters reflecting the former identification requirements. (Id.) Additionally, Ms. Ledford believes that holding additional training for poll managers and poll workers would be necessary, and that it also would be necessary to re-educate the public concerning the change in the identification requirement. (Id.)

Ms. Ledford opines that it would not be reasonable or feasible to require poll workers to compare the signatures on the voter certificates to the voter registration cards to verify the identity of voters. (Ledford Decl. ¶ 10.) According to Ms. Ledford, no such mechanism is in place and implementing one would be very costly. (Id.) Ms. Ledford also believes that such verification at the polls would be very time-consuming given the short amount of time available for verifying the signatures and the number of voters. (Id.)

#### **5. Harry MacDougald**

Harry MacDougald is a member of the Fulton County Board of Registration and Election ("FBRE"). (Decl. of Harry MacDougald ¶ 1.) As a member of the FBRE, Mr. MacDougald

receives and reviews written reports from FBRE staff, information regarding voter fraud trends and indicia, complaints from voters who experience difficulty registering or voting, and reports of fraudulent voter registration and voting in Fulton County. (Id.) Fulton County is the largest county in Georgia, and has the largest number of registered voters. (Id. ¶ 2.) The FRBE is the superintendent of all Fulton County elections, and also administers elections under contract for several municipalities in Fulton County, including the City of Atlanta and the City of Roswell. (Id.)

Mr. MacDougald states that during his service on the FBRE, he has observed numerous problems with fraudulent voter registration applications. (MacDougald Decl. ¶ 3.) According to Mr. MacDougald, during the 2004 election cycle, numerous press accounts of fraudulent voter registration applications surfaced around the United States. (Id.) Mr. MacDougald states that he was aware of reports of fraudulent registration applications or investigations into fraudulent registration applications in at least eleven states, including Georgia, Florida, Ohio, Nevada, Colorado, Wisconsin, California, Oregon, Washington, Pennsylvania, and South Carolina. (Id.) Mr. MacDougald states that some of the same groups accused of registration fraud in other states were active in Georgia. (Id.)

According to Mr. MacDougald, the FBRE received a total of 2,456 voter registration applications submitted to the Secretary of State's office by an organization called The Georgia Coalition for the People's Agenda. (MacDougald Decl. ¶ 3.) The FBRE also received a smaller batch of voter registration applications from an organization called Head Count. (Id.) The transmittal from the Secretary of State's office noted that the applications were suspicious, and recommended that the FBRE use verification procedures. (Id.) The FBRE's staff examined the applications carefully and reported that all, or nearly all, of the applications appeared fraudulent. (Id.) Specifically, many of the applications were written in the same handwriting, had invalid social security numbers, or had invalid addresses. (Id.)

In 2004, the FBRE received 2,456 voter registrations that appeared to be fraudulent. (MacDougald Decl. ¶ 4.) The FBRE referred those matters to the Fulton County District Attorney, as well as to the United States Attorney for the Northern District of Georgia. (Id.) Although the Fulton County District Attorney apparently did not respond to the FBRE's referral, the United States Attorney's Office opened an investigation into the matter. (Id.)

FBRE also sent out "missing information" letters to 8,112 applicants for voter registration during 2004, including the

2,456 applications discussed in the preceding paragraph. (MacDougald Aff. ¶ 5.) The FBRE sends "missing information" letters to applicants for voter registration whose applications do not contain required information or whose applications contain "irregular" information. (Id.) In theory, applicants who receive the "missing information" will supply the missing information to the FBRE office, and will be duly registered to vote. (Id. ¶ 6.) If the FBRE receives no response to a "missing information" letter, the FBRE does not process the application. (Id.)

In response to its 8,112 "missing information" letters sent in 2004, the FBRE received only fifty-five responses sufficient to process the applications and add the voters to the rolls, for a response rate of 0.678 percent and a non-response rate of 99.32 percent. (MacDougald Decl. ¶ 7.) Ten of the responses received indicated fraud by stating that the individuals who received the "missing information" letters had never registered to vote. (Id.) The family of one of those individuals responded that the individual had died. (Id.) Meanwhile, the United States Postal Service returned 1,362 of the 8,112 "missing information" letters as undeliverable. (Id.) 6,685 of the individuals who received "missing information" letters never responded. (Id.)

According to Mr. MacDougald, another group of individuals

succeeded in registering to vote in the latter part of 2004, but likely were not valid voters. (MacDougald Decl. ¶ 8.) In 2004, the FBRE had a record number of new registrations and mailed out precinct cards to newly registered voters. (Id.) The FBRE had 45,907 new registrations between the deadline for registering to vote in the primary election and the deadline for registering to vote in the general election. (Id.) The FBRE mailed precinct cards to all of the 45,907 new registrants, and the United States Postal Service returned 3,071 of those cards as undeliverable. (Id.) 971 of those 3,071 registrants whose precinct cards were returned voted in the general election. (Id.)

Mr. MacDougald opined that in light of the above information indicating that the FBRE received 8,057 suspect registrations that it could not process because of missing information and that the FBRE received 3,071 precinct cards for newly registered voters returned as undeliverable, the FBRE received a total of 11,128 applications for voter registration that were suspect or problematic "in a serious way." (MacDougald Decl. ¶ 9.) The suspect or problematic voter applications constituted 6.71 percent of the total registration applications processed in Fulton County before the 2004 election. (Id.)

Mr. MacDougald is not aware of any complaints to the FBRE

made by voters who cannot obtain the Photo ID required to vote in person at the polls. (MacDougald Decl. ¶ 12.) According to Mr. MacDougald, the "great majority" of Fulton County voters already use a driver's license or state-issued Photo ID card to vote at the polls. (Id.)

**6. Declaration of Ann Hicks**

Ann Hicks serves as an Assistant Director in the Elections Division, and has worked in the Elections Division for twenty-six years. (Decl. of Ann Hicks ¶ 2.) Ms. Hicks' duties include supervising six employees, assisting the Director of the Elections Division with the Division's budget, revising and ordering printed election forms, ordering other election materials used by counties and municipalities for conducting elections, assisting counties with entry of election supply orders and with obtaining approval for shipment of those orders, entering election supply orders for most municipalities, assisting county and municipal elections officials and other parties with numerous election-related questions, and training county and municipal registrars concerning election procedures. (Id.) The Elections Division regularly assists county election officials and municipal election officials ("local election officials") with various tasks related to elections. (Id. ¶¶ 3-4.)

Local elections officials order election supplies,

including voter certificates and poll posters advising voters of the required forms of identification, through the Elections Division. (A. Hicks Decl. ¶ 5.) County elections officials order their supplies electronically, while municipalities that conduct their own elections must telephone in their supply orders, which are entered by Elections Division staff. (Id.) The Elections Division also regularly provides training sessions for local election workers who, in turn, train their poll workers prior to elections. (Id. ¶ 6.)

After the passage of HB 244, Elections Division staff immediately began training local elections officials throughout Georgia concerning the new law so that the local elections officials could train their poll workers before the elections scheduled for August 30, 2005, September 20, 2005, September 27, 2005, and November 8, 2005. (A. Hicks Decl. ¶ 7.) The training also included instruction concerning the new Photo ID requirement for in-person voting and the removal of restrictions for absentee voting. (Id.) Specifically, the Elections Division conducted the following training: (1) training for county elections officials through the Georgia Election Officials Association on May 1 through May 4, 2005, which included nearly 400 participants; (2) training for municipal elections officials in June 2005 and July 2005 at four sites around the states, which included nearly 600

participants; (3) an additional training session for municipal elections officials at the University of Georgia held on September 20, 2005; (4) training for voter registrars through the Voter Registrar's Association of Georgia on August 7 through August 10, 2005, which included over 400 participants; and (5) training for newly-created boards of election in September 2005. (Id. ¶ 8.) In total, the Elections Department trained 2,000 participants during the past four months. (Id.)

After the Justice Department granted preclearance of the Photo ID requirement, approximately thirty-four municipalities held elections on September 20, 2005. (A. Hicks Decl. ¶ 9.) Further, Gwinnett County held a runoff election on September 27, 2005. (Id.)

The Elections Division distributed new supplies, including voter certificates and poll posters, to all counties and municipalities that it knew would hold elections on September 20, 2005. (A. Hicks Decl. ¶ 10.) Because the Photo ID requirement did not receive preclearance until after business hours on Friday, August 26, 2005, the Elections Division was very concerned about its ability to provide new forms and posters to all of the local elections boards and municipalities that planned to hold elections on September 20, 2005. (Id.)

At least 350 Georgia counties and municipalities will hold elections on November 8, 2005. (A. Hicks Decl. ¶ 11.) According to Ms. Hicks, a preliminary injunction against the Photo ID requirement would cause confusion. (Id. ¶ 12.) Specifically, the Elections Division could not hold new training with local elections officials so that those officials, in turn, could train their poll workers. (Id.) According to Ms. Hicks, many local elections officials already have conducted their poll worker training for the November 8, 2005, election and would not have sufficient time to conduct more training. (Id.) Ms. Hicks believes that a preliminary injunction also would cause confusion among elections officials, poll workers, and voters, especially in jurisdictions that already have held elections using the Photo ID requirement. (Id. ¶ 14.)

The Elections Division also is in the process of distributing supplies to local elections officials who will hold elections on November 8, 2005. (A. Hicks Decl. ¶ 13.) According to Ms. Hicks, the Elections Division needs at least one month to process orders for elections supplies and to distribute those supplies. (Id.)

As of August 1, 2005, the Elections Division's records indicated that 4,816,904 individuals were registered to vote in Georgia. (A. Hicks Decl. ¶ 15 & Ex. D.)

**G. Testimony of Secretary of State Cox**

**a. Secretary of State Cox's Responsibilities**

Secretary of State Cox is Georgia's Secretary of State. (Decl. of Cathy Cox ¶ 2; Oct. 12, 2005, Hr'g Tr.; Dep. of Cathy Cox at 8.) Secretary of State Cox also serves as the Chair of the State Election Board. (Cox Decl. ¶ 2; Oct. 12, 2005, Hr'g Tr.; Cox. Dep. at 9.) The State Election Board consists of five members, including Secretary of State Cox, a representative from the Georgia Democratic Party, a representative from the Georgia Republican Party, a representative from the Georgia Senate, and a representative from the Georgia House of Representatives. (Oct. 12, 2005, Hr'g Tr.) Secretary of State Cox is the principal official in the State Government in charge of elections and for purposes of the Help America Vote Act ("HAVA") and the National Voter Registration Act. (Oct. 12, 2005, Hr'g Tr; Cox Dep. at 9.)

**b. Reports of Voter Fraud**

During the nine years in which Secretary of State Cox has been affiliated with the Secretary of State's Office, that office has not received a report of voter impersonation involving a scenario in which a voter appears at the polls and votes as another person, and the actual person later appears at the polls and attempts to vote as himself. (Cox Decl. ¶ 5; Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 14, 16, 47.) Secretary

of State Cox does not dispute that under the previous law, it was possible for the above voter impersonation scenario or another form of in-person voter fraud to occur. (Cox Decl. ¶ 5.)

Further, Secretary of State Cox and her staff are not physically present in all 159 counties and the various municipalities on election days. (Cox Decl. ¶ 5; Oct. 12, 2005, Hr'g Tr.) Secretary of State Cox therefore acknowledges that issues related to in-person voter fraud may arise that are not reported to her office. (Cox Decl. ¶ 5; Oct. 12, 2005, Hr'g Tr.) According to Secretary of State Cox, local election officials are in the best position to know of such incidents. (Cox Decl. ¶ 5; Oct. 12, 2005, Hr'g Tr.)

The State Election Board has received a number of complaints of irregularities with respect to absentee ballots. (Oct. 12, 2005, Hr'g Tr.) In fact, at most of its meetings, the State Election Board discusses complaints of fraud and irregularities in absentee voting. (Id.) Secretary of State Cox also is aware of a previous incident in Dodge County, Georgia, involving vote buying and selling of absentee ballots. (Id.) The Dodge County incident involved in-person absentee voting. (Id.)

According to Secretary of State Cox, Georgia has procedures and practices in place to detect voter fraud.

(Oct. 12, 2005, Hr'g Tr.) Those procedures include verifying the voter's correct address, as well as the voter's name, during the check-in process for in-person voters. (Id.) Georgia also imposes criminal penalties for voter impersonation. (Id.) Most violations of Georgia election laws are punishable as felonies. (Id.) No evidence indicates that the criminal penalties do not sufficiently deter in-person voter fraud. (Id.)

The integrity of the voter list also is extremely important in preventing voter fraud. (Oct. 12, 2005, Hr'g Tr.) The Atlanta Journal-Constitution published an article indicating that Georgia had experienced 5,412 instances of voter fraud during a twenty-year period. (Pls.' Ex. 11; Oct. 12, 2005, Hr'g Tr.) Secretary of State Cox's office undertook an investigation in response to that article. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 40.) The investigation revealed that the specific instance of voter fraud outlined in the Atlanta Journal-Constitution, involving a report that Alan J. Mandel had voted after his death, actually did not occur. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 41.) Instead, an individual with a similar name, Alan J. Mandle, had voted at the polls, and the poll worker had marked Alan J. Mandel's name rather than marking Alan J. Mandle, the name of the individual who actually voted. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 41.)

Secretary of State Cox's office compared the signature on the voter certificate to the voter registration card of the living individual, and concluded that the living individual, Alan J. Mandle, rather than the deceased Alan J. Mandel, had voted. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 41.)

The Secretary of State's Office subsequently attempted to ensure that voter records were maintained and up to date. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 43.) The Secretary of State's Office sends information concerning dead voters to local elections officials on a monthly basis, and now has the authority to remove the names of deceased voters from the voter rolls if the local elections officials fail to do so in a timely manner. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 43-44.) Secretary of State Cox is not aware of any reports of dead individuals voting since her office received authority to remove the names of deceased individuals from the voter rolls. (Cox Dep. at 45.)

**c. Concerns Regarding HB 244**

In her letter to the Georgia State Senate addressing HB 244, Secretary of State Cox expressed concerns that allowing individuals to vote absentee ballots without showing identification and removing the conditions previously required for obtaining absentee ballots opened a gaping opportunity for fraud. (October 12, 2005, Hr'g Tr.; Cox Dep. at 10-12.)

Secretary of State Cox indicated that concerns with respect to absentee ballots involved incidents of individuals picking up absentee ballots for other individuals without the required family relationship and individuals removing absentee ballots from voters' mailboxes. (Oct. 12, 2005, Hr'g Tr.) According to Secretary of State Cox, the only restrictions on absentee voting that tended to prevent fraud were the restrictions for obtaining an absentee ballot. (Oct. 12, 2005, Hr'g Tr.)

In her letter to Governor Purdue concerning HB 244, Secretary of State Cox stated her opinion that the Photo ID requirement for in-person voting was unnecessary, created a significant obstacle to voting for many voters, was unlikely to receive preclearance from the Justice Department, violated the Georgia Constitution, and unduly burdened the fundamental right to vote. (Oct. 12, 2005, Hr'g Tr.; Pls.' Ex. 2; Cox Dep. at 17.) The opinion that Secretary of State Cox expressed in her letter to Governor Purdue remains her personal opinion; however, Secretary of State Cox is obligated to enforce and carry out the Photo ID requirement in her official capacity until the law is declared invalid. (Oct. 12, 2005, Hr'g Tr.)

Secretary of State Cox also requested that Governor Purdue seek the opinion of the Attorney General before approving HB 244. (Oct. 12, 2005, Hr'g Tr.; Pls.' Ex. 2; Cox

Dep. at 20.) Secretary of State Cox is not aware that Governor Perdue has sought an opinion from the Attorney General concerning HB 244, and is not aware of any opinion issued by the Attorney General concerning the Photo ID requirement. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 20.)

**d. Voter Registration**

Secretary of State Cox is aware of efforts to submit fraudulent voter registrations. (Oct. 12, 2005, Hr'g Tr.) Those efforts occurred both before and after Georgia enacted its Photo ID requirement. (Id.)

Georgia currently has no requirement that a person seeking to register to vote present a Photo ID. (Oct. 12, 2005, Hr'g Tr.) HB 244 did not address voter registration. (Id.)

In 2004, however, Georgia made some changes to its voter registration law to bring the law into conformity with HAVA. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 26-27.) The law now provides that applicants should provide some type of identification when they register to vote. (Oct. 12, 2005, Hr'g Tr.) That identification may include one of the seventeen forms of identification required for in-person voting prior to July 1, 2005, and need not necessarily be a Photo ID. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 26.) First-time voters who have registered by mail must provide a Photo

ID to vote absentee. (Id.) Voters who registered by mail and provided some information concerning their identity, however, are not required to provide a Photo ID to vote absentee. (Id.) Additionally, if a voter does not present identification when registering by mail, but the State can verify certain information provided by the voter through a State database, such as the voter's date of birth, the voter need not present a Photo ID to vote absentee. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 26.)

**e. Absentee Ballots and Absentee Voting**

HB 244 expanded the opportunity for voters to obtain absentee ballots. (Oct. 12, 2005.) Prior to July 1, 2005, voters seeking to obtain absentee ballots had to aver that they met certain requirements. (Id.) After July 1, 2005, those requirements no longer apply for purposes of obtaining absentee ballots. (Id.)

To obtain an absentee ballot, a voter must send in a request to the local registrar providing his or her name, address, and an identifying number, or must appear in person at the registrar's office and provide such information. (Oct. 12, 2005, Hr'g Tr.) Local elections officials are supposed to compare the signature on the request to the signature on the voter's registration card. (Id.) If the signatures match, the local elections officials will send an absentee ballot to

the address listed on the voter's registration. (Id.) A voter who wishes to vote an absentee ballot need not provide a Photo ID unless that voter registered by mail, did not provide identification, and is voting for the first time by absentee ballot. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 27.)

After receiving an absentee ballot, the voter must complete the ballot and return it to the registrar, either by hand-delivery to the registrar's office by the voter or certain relatives of the voter, or by mail. (Oct. 12, 2005, Hr'g Tr.) Even if an absentee ballot contains a postmark indicating that the voter mailed it on an earlier date, elections officials will not count the absentee ballot if the ballot is not received in the registrar's office by 7:00 p.m. on the day of the applicable election. (Id.) Exceptions to this rule exist for voters who are members of the military or reside overseas. (Id.)

An absentee ballot that arrives in the registrar's office should be returned in two envelopes--an inner blank "privacy" envelope and an outer envelope that contains an oath signed by the voter. (Oct. 12, 2005, Hr'g Tr.) Local elections officials compare the signature on the oath contained on the outer envelope to the signature on the voter's registration card to verify the voter's identity. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 35.) The signature verification procedure is

the only safeguard currently in place in Georgia to prevent imposters from voting by using absentee ballots. (Oct. 12, 2005, Hr'g Tr.) The verification process is done manually. (Id.) Absentee ballots are submitted to the local registrars' offices over a forty-day period. (Id.) However, if fifty percent of voters decided to vote by absentee ballot in any given election, local elections officials would have a difficult time completing the necessary signature verifications. (Id.)

Once a voter returns an absentee ballot to the registrar's office, the voter cannot change that ballot. (Oct. 12, 2005, Hr'g Tr.) The voter, however, has the right to notify the registrar that the voter intends to cancel the absentee ballot and vote in person. (Id.)

In the November 2004 general election, 422,490, or approximately ten percent, of Georgia's 4,265,333 registered voters voted absentee ballots. (Pls' Ex. 4 at 1.) 46,734, or approximately seven percent, of Georgia's 697,420 registered African-American female voters voted absentee ballots, as compared with 189,143, or approximately twelve percent, of Georgia's 1,548,916 registered Caucasian female voters. (Id.) 26,144, or approximately six percent, of Georgia's 467,835 registered African-American male voters voted absentee ballots, as compared with 150,722, or approximately eleven

percent, of Georgia's 1,376,368 registered Caucasian male voters. (Id.)

**f. Signature Comparison for In-Person Voting**

Presently, elections officials do not compare signatures on voter certificates of in-person voters to signatures on voter registration cards. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 36-37.) The voter registration cards are not physically present at the polling places. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 36-37.) Secretary of State Cox testified that it would be possible to send voter registration cards to polling places, but that comparing signatures on voter certificates to signatures on voter registration cards for in-person voters would be time-consuming. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 37.)

**g. Voters Without Photo ID**

A number of Georgia voters are elderly, have no driver's licenses, and have no need for a state-issued Photo ID card other than for voting purposes. (Oct. 12, 2005, Hr'g Tr.) Further, a number of Georgia voters who are elderly or have low incomes do not have automobiles or use mass transit, and would have difficulty obtaining Photo ID to vote. (Id.) Secretary of State Cox does not have information concerning the number of Georgia voters who lack Photo ID. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 23.) Secretary of State Cox also

has received no correspondence concerning significant problems with the new Photo ID requirement or concerning significant numbers of voters who have not been allowed to vote because of the Photo ID requirement. (Id.)

An individual who votes in person but does not present a Photo ID may vote a provisional ballot. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 27-28.) Elections officials, however, will not count the provisional ballot unless the voter returns to the registrar's office within forty-eight hours and presents a Photo ID. (Oct. 12, 2005, Hr'g Tr.; Cox Dep. at 27-28.) Secretary of State Cox has no information indicating that voters have cast a significant number of provisional ballots in the elections conducted after the Photo ID requirement received preclearance. (Id.)

**h. Training by Elections Division**

After the Photo ID requirement received preclearance from the Justice Department, Secretary of State Cox ensured that the Elections Division conducted necessary training, distributed necessary supplies, and did everything possible to ensure that the Photo ID requirement was carried out in every election, including the elections held on August 26, 2005, September 20, 2005, September 27, 2005, and November 8, 2005. (Cox Decl. ¶ 7; Oct. 12, 2005, Hr'g Tr.) The Elections Division also provided information to the public concerning

the Photo ID requirement via the website for the Secretary of State's Office and through other public information efforts. (Cox Decl. ¶ 7; Oct. 12, 2005, Hr'g Tr.)

**i. Connection to Local Elections Officials**

Local elections officials for counties are connected to the Secretary of State's Office through a mainframe computer. (Oct. 12, 2005, Hr'g Tr.) The Secretary of State's Office has the capability of e-mailing information concerning a preliminary injunction order to the various county elections officials. (Id.) The Secretary of State's Office does not have that capacity for municipal elections officials; however, in many cases, county elections officials also manage elections for municipalities within their counties. (Id.)

**j. Effect of a Preliminary Injunction**

Secretary of State Cox believes that a preliminary injunction precluding Georgia from applying the Photo ID requirement in the November 8, 2005, elections likely would cause confusion for election officials, poll workers, and voters, especially in jurisdictions that already have conducted elections under the new law. (Cox Decl. ¶ 8; Oct. 12, 2005, Hr'g Tr.) Additionally, the Elections Division would have to reprint and distribute new election forms and materials for the jurisdictions conducting November 8, 2005, elections in a very short period of time. (Cox Decl. ¶ 8;

Oct. 12, 2005, Hr'g Tr.) Secretary of State Cox anticipates that such a preliminary injunction would result in some local election officials applying the Photo ID requirement, some local election officials applying the former law, and others applying a variation of the laws. (Cox Decl. ¶ 8.)

#### **H. Procedural Background**

On September 19, 2005, Plaintiffs filed this lawsuit. Plaintiffs assert that the Photo ID requirement violates the Georgia Constitution, is a poll tax that violates the Twenty-fourth Amendment and the Equal Protection Clause, unduly burdens the fundamental right to vote, violates the Civil Rights Act of 1964, and violates Section 2 of the Voting Rights Act.

On September 19, 2005, Plaintiffs requested that the Court schedule a preliminary injunction hearing. On that same day, the Court entered an Order scheduling a preliminary injunction hearing for October 12, 2005. (Order of Sept. 19, 2005.)

On October 6, 2005, Plaintiffs filed a formal Motion for Preliminary Injunction. On October 7, 2005, Secretary of State Cox filed a Motion to Dismiss Individual Capacity Claims. On October 11, 2005, individual Plaintiff Tony Watkins filed a Stipulation of Dismissal Without Prejudice of his claims. Finally, on October 12, 2005, Plaintiffs filed

their First Amendment to Complaint, which addresses the issue of standing for the organizational Plaintiffs.

On October 12, 2005, the Court held a hearing with respect to Plaintiffs' Motion for Preliminary Injunction. During the October 12, 2005, hearing, the parties presented evidence and arguments in support of their respective positions. The Court concludes that the Motion for Preliminary Injunction now is ripe for resolution by the Court.

## **II. Standing**

Defendants argue that Plaintiffs lack standing to pursue this lawsuit. The Court addresses the issue of standing before turning to the merits of Plaintiffs' Motion for Preliminary Injunction.

Article III of the federal Constitution limits the power of federal courts to adjudicating actual "cases" and "controversies." U.S. Const. art. III, § 2, cl. 1. "The most significant case-or-controversy doctrine is the requirement of standing." Nat'l Alliance for the Mentally Ill, St. Johns Inc. v. Bd. of County Comm'r's, 376 F.3d 1292, 1294 (11th Cir. 2004). "In essence the question of standing is whether the litigant is entitled to have the court decide the merits of the dispute or of particular issues." Id. (quoting Warth v.

Seldin, 422 U.S. 490, 498 (1975)).

The party invoking federal jurisdiction has the burden of proving standing. Nat'l Alliance for the Mentally Ill, 376 F.3d at 1294. At least three different types of standing exist: taxpayer standing, individual standing, and organizational standing. Id. To establish those types of standing, a plaintiff must "demonstrate that he has suffered injury in fact, that the injury is fairly traceable to the actions of the defendant, and that the injury will likely be redressed by a favorable decision.'" Id. at 1295 (citing Bennett v. Spear, 520 U.S. 154, 162 (1997)) (internal quotation marks omitted). For purposes of this Order, the Court focuses on whether the organizational Plaintiffs have standing to pursue this action.<sup>2</sup>

"An association has standing to bring suit on behalf of its members when its members would otherwise have standing to sue in their own right, the interests at stake are germane to

---

2

One of the individual Plaintiffs, Tony Watkins, dismissed his claims without prejudice prior to the October 12, 2005, hearing, apparently because he did not wish to submit to a deposition. Defendants argue that the remaining individual Plaintiff, Clara Williams, lacks standing because she has a MARTA card that would qualify as a Photo ID card under the new Photo ID requirement and because she could vote by absentee ballot. In light of the need to issue a ruling quickly, and in light of the Court's decision infra concerning Plaintiffs' Section 2 claims, the Court does not address Defendants' arguments pertaining to Plaintiff Williams at this point.

the organization's purpose, and neither the claim asserted nor the relief requested requires the participation of individual members in the lawsuit.'" Nat'l Alliance for the Mentally Ill, 376 F.3d at 1296 (quoting Friends of the Earth, Inc. v. Laidlaw Envtl. Servs. (TOC), Inc., 528 U.S. 167, 120 S. Ct. 693, 704 (2000)). Here, Plaintiffs' First Amendment to Complaint adds a new paragraph 1(i) to their Complaint that states:

Common Cause, the League, the Central Presbyterian and Advocacy Center, Inc., Georgia Association of Black Elected Officials, Inc., The National Association for the Advancement of Colored People (NAACP), Inc., GLBC, and the Concerned Black Clergy of Metropolitan Atlanta, Inc., (in the aggregate, the "Non-Profit Plaintiffs"), are non-profit organizations composed of members who would have standing to sue in their individual right for the allegations set forth in the Complaint, the interests which each of the Non-Profit Plaintiffs and their members seek to protect in the Complaint are germane to the purpose of each of the Non-Profit Plaintiffs, and neither the claim or the relief sought requires participation by the individual members of the Non-Profit Plaintiffs.

(First Am. to Compl.) The Court concludes that Plaintiffs' allegations satisfy the organizational standing requirements, for purposes of Plaintiffs' Motion for Preliminary Injunction.

### **III. Plaintiffs' Motion for Preliminary Injunction**

To obtain a preliminary injunction, a movant must show: (1) a substantial likelihood of ultimate success on the merits; (2) the preliminary injunction is necessary to prevent

irreparable injury; (3) the threatened injury outweighs the harm the preliminary injunction would inflict on the non-movant; and (4) the preliminary injunction would serve the public interest. McDonald's Corp. v. Robertson, 147 F.3d 1301, 1306 (11th Cir. 1998). In the Eleventh Circuit, "[a] preliminary injunction is an extraordinary and drastic remedy not to be granted unless the movant clearly established the burden of persuasion' as to the four requisites."

Id. (quoting All Care Nursing Serv., Inc. v. Bethesda Mem'l Hosp., Inc., 887 F.2d 1535, 1537 (11th Cir. 1989)) (internal quotation marks omitted) (alterations in original).

A plaintiff seeking to enjoin enforcement of a state statute bears a particularly heavy burden. "[P]reliminary injunctions of legislative enactments--because they interfere with the democratic process and lack the safeguards against abuse or error that come with a full trial on the merits--must be granted reluctantly and only upon a clear showing that the injunction before trial is definitely demanded by the Constitution and by the other strict legal and equitable principles that restrain courts.'" Bankwest, Inc. v. Baker, 324 F. Supp. 2d 1333, 1343 (N.D. Ga. 2004) (quoting Northeastern Fla. Chapter of the Ass'n of Gen. Contractors of Am. v. City of Jacksonville, 896 F.2d 1283, 1285 (11th Cir. 1990)).

**A. Substantial Likelihood of Success on the Merits**

**1. Claims Under the Georgia Constitution**

Plaintiffs allege that the Photo ID requirement violates article II, section 1, paragraph 2 of the Georgia Constitution. Article II, section 1, paragraph 2 of the Georgia Constitution provides: "Every person who is a citizen of the United States and a resident of Georgia as defined by law, who is at least 18 years of age and not disenfranchised by this article, and who meets minimum residency requirements as provided by law shall be entitled to vote at any election by the people. The General Assembly shall provide by law for the registration of electors." Ga. Const. art. II, § 1, ¶ 2. Article II, section 1, paragraph 3 of the Georgia Constitution sets forth the following exceptions to the right to register to vote:

- (a) No person who has been convicted of a felony involving moral turpitude may register, remain registered, or vote except upon completion of the sentence.
- (b) No person who has been judicially determined to be mentally incompetent may register, remain registered, or vote unless the disability has been removed.

Ga. Const. art. II, § 1, ¶ 3.

Plaintiffs argue that the new Photo ID requirement violates the Georgia Constitution because it denies certain Georgia citizens the right to vote. According to Plaintiffs,

the Georgia Constitution lists only two grounds for denying a Georgia citizen who is registered to vote the right to vote: (1) having a conviction for a felony involving moral turpitude; or (2) having a judicial determination of being mentally incompetent to vote. Plaintiffs contend that the Georgia legislature simply has no power to regulate voting outside the areas of defining residency and establishing registration requirements.

Defendants argue that any claim that the State Defendants are violating Georgia law is barred by the Eleventh Amendment. Defendants quote Pennhurst State School & Hospital v. Halderman, 465 U.S. 89 (1984), for the proposition that the Eleventh Amendment bars federal courts from enforcing state law either prospectively or retroactively. According to Defendants, because Georgia state courts are the correct arbiters on the meaning of state law, "it would be a 'gross intrusion'" for this Court to grant a preliminary injunction on the basis of Plaintiffs' claims arising under the Georgia Constitution claims. (State Defs.' Br. Opp'n Pls.' Mot. Prelim. Inj at 56.)

Defendants also argue that even if Eleventh Amendment immunity does not exist, Plaintiffs cannot succeed because the constitutionality of a Georgia statute is presumed, and "'all doubts must be resolved in favor of its validity.'" (Id. at 57

(citations omitted).) According to Defendants, the General Assembly did not prescribe qualifications for voters when enacting the Photo ID law; instead, they were attempting to regulate the voting process itself. Defendant argue that the in-person Photo ID requirement is a "time, place, or manner" regulation, and that the Georgia Constitution does not require that citizens be permitted to vote in person nor does it state that citizens have an absolute right to be free from any regulation of in-person voting. (Id. at 59.)

Before the Court can consider Plaintiffs' claims regarding the Georgia Constitution, the Court must determine whether the Eleventh Amendment to the United States Constitution bars those claims. McClendon v. Ga. Dept. of Cmty. Health, 261 F.3d 1252, 1257 (11th Cir. 2001); Silver v. Baggiano, 804 F.3d 1211, 1213 (11th Cir. 1986).

The Eleventh Amendment to the Constitution provides that "[t]he Judicial power of the United States shall not be construed to extend to any suit in law or equity, commenced or prosecuted against one of the United States by Citizens of another State, or by Citizens or Subjects of any Foreign State." U.S. Const. amend. XI. The Supreme Court has made clear that this language also bars suits against a state by its own citizens. DeKalb County School Dist. v. Schrenko 109 F.3d 680, 687 (1997) (citing Hans v. Louisiana, 134 U.S. 1

(1890)). "In short, the Eleventh Amendment constitutes an 'absolute bar' to a state's being sued by its own citizens, among others." Id. (citing Monaco v. Mississippi, 292 U.S. 313, 329 (1934)).

"[A]bsent its consent, a state may not be sued in federal court unless Congress has clearly and unequivocally abrogated the state's Eleventh Amendment immunity by exercising its power with respect to rights protected by the Fourteenth Amendment." Id. at 688 (quoting Pennhurst State School & Hospital v. Halderman, 465 U.S. 89, 99 (1984) ("Pennhurst II")). "Congress may not nullify a state's immunity with respect to alleged violations of state law." Id. "For that reason, a federal court may not entertain a cause of action against a state for alleged violations of state law, even if that state claim is pendent to a federal claim which the district court could adjudicate. Id. (citing Pennhurst II, 465 U.S. at 117-23). In Pennhurst II, the United States Supreme Court explained that:

[a] federal court's grant of relief against state officials on the basis of state law, whether prospective or retroactive, does not vindicate the supreme authority of federal law. On the contrary, it is difficult to think of a greater intrusion on state sovereignty than when a federal court instructs state officials on how to conform their conduct to state law. Such a result conflicts directly with the principles of federalism that underlie the Eleventh Amendment.

Pennhurst II, 465 U.S. at 106.

Because Plaintiffs' suit is against State officials, rather than the State itself, a question arises as to whether the suit is actually a suit against the State of Georgia. "The Eleventh Amendment bars a suit against state officials when 'the state is the real, substantial party in interest.'" Id. at 101 (quoting Ford Motor Co. v. Dept. of Treasury, 323 U.S. 459, 464 (1945)). A state is the real party in interest when the judgment sought would "restrain the Government from acting, or compel it to act." Id. at 101 n.11 (quoting Dugan v. Rank, 372 U.S. 609, 620 (1963)) (internal quotation marks and citations omitted).

The injunction Plaintiffs seek here would restrain the State from attempting to enforce the Photo ID requirement imposed by HB 244. The Court therefore finds that the State of Georgia is the real party in interest. Further, the Court finds that Plaintiffs' claim--that the Act violates two sections of the Georgia Constitution--clearly is a cause of action against a state for alleged violations of state law. The Court therefore concludes that this portion of Plaintiffs' Complaint is barred by the Eleventh Amendment.<sup>3</sup>

---

3

The Court notes that Plaintiffs' claims under the Georgia Constitution do not fall within the Ex Parte Young exception to the States' Eleventh Amendment immunity from suit. Ex Parte Young, 209 U.S. 123 (1908). The Young doctrine, as interpreted by later Supreme Court cases, provides that a suit for prospective relief that challenges a state official's

For the reasons discussed above, the Eleventh Amendment precludes the Court from entertaining Plaintiffs' claims asserted under the Georgia Constitution. The Court therefore concludes that Plaintiffs have failed to show a substantial likelihood of success with respect to those claims.<sup>4</sup>

## 2. Undue Burden on the Right to Vote

The Supreme Court has made it clear that voting is a fundamental right, Burdick v. Takushi, 504 U.S. 428, 433 (1992), under the Fourteenth Amendment in the context of equal protection, Kramer v. Union Free Sch. Dist. No. 15, 395 U.S. 621, 629 (1969). Indeed, in Wesberry v. Sanders, 376 U.S. 1 (1964), the Court observed:

No right is more precious in a free country than that of having a voice in the election of those who make the laws under which, as good citizens, we

---

conduct as being contrary to the supreme authority of the United States is not a suit against the State and therefore is not barred by the Eleventh Amendment. Pennhurst, 465 U.S. at 102 (citing Young, 209 U.S. at 160; Edelman v. Jordan, 415 U.S. 651, 666-67 (1974)). Plaintiffs' claims under the Georgia Constitution, which challenge the enforcement of a state law as being contrary to a state constitution, do not implicate the supreme authority of the United States. Therefore, the Young exception to the Eleventh Amendment's bar on suits against a State does not apply to allow the Court to consider those claims.

4

The Court will not dismiss Plaintiffs' claims arising under the Georgia Constitution in this Order because the case is not before the Court on a motion to dismiss those claims. The Court will address Secretary of State Cox's Motion to Dismiss Individual Capacity Claims in a separate Order to be issued at a later date.

must live. Other rights, even the most basic, are illusory if the right to vote is undermined. Our Constitution leaves no room for classification of people in a way that unnecessarily abridges this right.

376 U.S. at 17-18. Similarly, in Reynolds v. Sims, 337 U.S. 533 (1964), the Court stated:

Undoubtedly, the right of suffrage is a fundamental matter in a free and democratic society. Especially since the right to exercise the franchise in a free and unimpaired manner is preservative of other basic civil and political rights, any alleged infringement of the right of citizens to vote must be carefully and meticulously scrutinized.

337 U.S. at 561-62.

"[A] citizen has a constitutionally protected right to participate in elections on an equal basis with other citizens in the jurisdiction." Dunn v. Blumstein, 405 U.S. 330, 336 (1972). The equal right to vote, however, is not absolute. Id. at 336. Instead, states can impose voter qualifications and can regulate access to voting in other ways. Id. at 336. Under the United States Constitution, states may establish the time, place, and manner of holding elections for Senators and Representatives. U.S. Const. art. I, § 4, cl. 1. Those qualifications and access regulations, however, cannot unduly burden or abridge the right to vote. Tashjian, 479 U.S. at 217 ("[T]he power to regulate the time, place, and manner of elections does not justify, without more, the abridgment of fundamental rights, such as the right to vote." ) (citing

Wesberry v. Sanders, 376 U.S. 1 (1964)); Dunn, 405 U.S. at 359-60 (striking down Tennessee's durational residency requirement for voting of one year in state and three months in county); Beare v. Briscoe, 498 F.2d 244, 247-48 (5th Cir. 1974) (invalidating provisions of Texas Constitution and implementing statute requiring persons who wished to vote in any given year to register each year during registration period beginning on October 1 and ending on January 31 of following year) (per curiam). In particular, the Supreme Court has observed that the wealth or the ability to pay a fee is not a valid qualification for voting. Harper v. Va. State Bd. of Elections, 383 U.S. 663, 666-68 (1966) (citations omitted; footnote omitted).

A number of Supreme Court cases have set forth standards for determining whether a state statute or regulation concerning voting violates the Equal Protection clause. In Dunn, the Supreme Court stated that a court must examine: "the character of the classification in question; the individual interests affected by the classification; and the governmental interests asserted in support of the classification." Dunn, 405 U.S. at 335. Another Supreme Court case indicates that the Court should "'consider the facts and circumstances behind the law, the interests which the State claims to be protecting, and the interests of those who are disadvantaged

by the classification.'" Kramer, 395 U.S. at 626. Those cases apply strict scrutiny when examining state statutes or regulations that limit the right to vote. Id. at 627 ("[I]f a challenged state statute grants the right to vote to some bona fide residents of requisite age and citizenship and denies the franchise to others, the Court must determine whether the exclusions are necessary to promote a compelling state interest." ); see also Hill v. Stone, 421 U.S. 289, 298 (1975) ("in an election of general interest, restrictions on the franchise of any character must meet a stringent test of justification").

In a more recent line of cases, the Supreme Court has not necessarily applied the strict scrutiny test automatically to regulations that relate to voting. Burdick, U.S. at 433-34; Tashjian v. Republican Party, 479 U.S. 208, 213 (1986) (quoting Anderson v. Celebrezze, 460 U.S. 780, 789 (1983)). Indeed, the Supreme Court observed in Burdick:

Election laws will invariably impose some burden upon individual voters. Each provision of a code, "whether it governs the registration and qualifications of voters, the selection and eligibility of candidates, or the voting process itself, inevitably affects—at least to some degree—the individual's right to vote and his right to associate with others for political ends. Consequently, to subject every voting regulation to strict scrutiny and to require that the regulation be narrowly tailored to advance a compelling state interest, as petitioner suggests, would tie the hands of States seeking to assure that elections are operated equitably and efficiently.

Accordingly, the mere fact that a State's system "creates barriers . . . tending to limit the field of candidates from which voters might choose . . . does not of itself compel close scrutiny."

Instead, . . . a more flexible standard applies. A court considering a challenge to a state election law must weigh "the character and magnitude of the asserted injury to the rights protected by the First and Fourteenth Amendments that the plaintiff seeks to vindicate" against "the precise interests put forward by the State as justifications for the burden imposed by its rule," taking into consideration "the extent to which those interests make it necessary to burden the plaintiff's rights."

Under this standard, the rigorousness of our inquiry into the propriety of a state election law depends upon the extent to which a challenged regulation burdens First and Fourteenth Amendment rights. Thus, as we have recognized when those rights are subjected to "severe" restrictions, the regulation must be "narrowly drawn to advance a state interest of compelling importance." But when a state election law provision imposes only "reasonable, nondiscriminatory restrictions" upon the First and Fourteenth Amendment rights of voters, "the State's most important regulatory interests are generally sufficient to justify" the restrictions.

Burdick, 504 U.S. at 433-34 (citations omitted).

Defendants argue that the Photo ID requirement simply regulates the manner of voting, and that requiring a Photo ID for in-person voting is a reasonable means of achieving the legitimate state interest of regulating voting and preventing in-person vote fraud. According to Defendants, the Photo ID requirement is not a severe restriction on voting because it prevents no one from voting. Defendants argue that anyone may

vote by absentee ballot under HB 244's more relaxed absentee voting requirements. Defendants state that even voters who register by mail may vote for the first time via absentee ballot without showing a Photo ID, and that such voters simply must include a utility bill, a bank statement, or other form of identification permitted by HAVA with their absentee ballots as a means of voter identification. (Oct. 12, 2005, Hr'g Tr.)

According to Defendants, at most, the Photo ID requirement prevents some individuals who wish to vote in person from doing so until they obtain proper identification. Defendants also contend that those individuals without a Photo ID may obtain one free of charge from a State DDS Office, the State's GLOW Bus, or through certain organizations serving indigent clients merely by completing an Affidavit for Identification Card for Voting Purposes ("Affidavit"). Defendants note that although the Affidavit requires the applicant "to swear[] under oath that he or she is indigent and cannot pay the fee," (State Defs.' Initial Br. Opp'n Pls.' Mot. Prelim. Inj. at 48), anyone who desires a non-driver Photo ID card for voting purposes may complete the form and receive the free Photo ID card (Watson Decl. ¶ 5).

Defendants also point out that although opportunities for voter fraud via absentee ballot may exist, the legislature may

address one method of voting at a time. In this case, the legislature has chosen to address voting fraud via in-person voting first.

**a. Under Strict Scrutiny**

There seems to be little doubt that the Photo ID requirement fails the strict scrutiny test: accepting that preventing voter fraud is a legitimate and important State concern, the statute is not narrowly drawn to prevent voter fraud. Indeed, Secretary of State Cox pointed out that, to her knowledge, the State had not experienced one complaint of in-person fraudulent voting during her tenure. In contrast, Secretary of State Cox indicated that the State Election Board had received numerous complaints of voter fraud in the area of absentee voting. Furthermore, the Secretary of State's Office removes deceased voters from the voting rolls monthly, eliminating the potential for voter fraud noted by the Atlanta Journal-Constitution's article alleging that more than 5,000 deceased people voted during a twenty-year period.

Further, although Defendants have presented evidence from elections officials of fraud in the area of voting, all of that evidence addresses fraud in the area of voter registration, rather than in-person voting. The Photo ID requirement does not apply to voter registration, and any Georgia citizen of appropriate age may register to vote

without showing a Photo ID. Indeed, individuals may register to vote by producing copies of bank statements or utility bills, or without even producing identification at all. The Photo ID law thus does nothing to address the voter fraud issues that conceivably exist in Georgia.

Rather than drawing the Photo ID law narrowly to attempt to prevent the most prevalent type of voter fraud, the State drafted its Photo ID requirement to apply only to in-person voters and to apply only to absentee voters who had registered to vote by mail without providing identification who were voting absentee for the first time. By doing so, the State, in theory, left the field wide open for voter fraud by absentee voting. Under those circumstances, the Photo ID requirement simply is not narrowly tailored to serve its stated purposes--preventing voter fraud. See Dunn, 405 U.S. at 343 ("Statutes affecting constitutional rights must be drawn with 'precision,' and must be 'tailored to serve their legitimate objectives. And if there are other, reasonable ways to achieve those goals with a lesser burden on constitutionally protected activity, a State may not choose the way of greater interference. If it acts at all, it must choose 'less drastic means.'" (citations omitted). Further, the State has a number of significantly less burdensome alternatives available to prevent in-person voting fraud, such

as the voter identification requirements it previously used and numerous criminal statutes penalizing voter fraud, to discourage voters from fraudulently casting ballots or impersonating other voters.

For the reasons discussed above, the Court finds that the Photo ID requirement is not narrowly tailored to serve the State's interest in preventing voter fraud, and that a number of significantly less burdensome alternatives exist to address the State's interest. Consequently, the Court concludes that Plaintiffs have a substantial likelihood of succeeding on the merits of their Equal Protection Clause claim under a strict scrutiny analysis.

**b. Under Burdick**

Even if the Court applies the Burdick test, Plaintiffs still have a substantial likelihood of succeeding on the merits of their Equal Protection Clause claim. Specifically, "the character and magnitude of the asserted injury to the rights protected by the First and Fourteenth Amendments that the plaintiff seeks to vindicate" outweighs "the precise interests put forward by the State as justifications for the burden imposed by its rule," taking into consideration "the extent to which those interests make it necessary to burden the plaintiff's rights." Burdick, 504 U.S. at 433-34.

**i. The Asserted Injury**

For the reasons discussed below, the Court concludes that the character and magnitude of the asserted injury to the right to vote is significant. Many voters who do not have driver's licenses, passports, or other forms of photographic identification have no transportation to a DDS service center, have impairments that preclude them from waiting in often-lengthy lines to obtain licenses, or cannot travel to a DDS service center during the DDS's hours of operation because the voters cannot take off time from work. It is beyond dispute that the DDS service centers, particularly those in suburban areas near Atlanta, frequently have lengthy lines, and that obtaining a driver's license or Photo ID at a DDS service center often may require several hours of one's time. Many voters who are elderly, disabled, or have certain physical or mental problems simply cannot navigate the lengthy wait successfully--even if the DDS allows those voters to sit and wait until a DDS worker calls their numbers.

Further, DDS service centers are not located in every Georgia county. Some of the service centers, particularly in south and middle Georgia, are so widely spaced that the service centers may be a lengthy drive away from many of the citizens those centers service. Most of the DDS service centers are located in largely rural areas where mass transit

likely is not available, and registered voters who have no need for a driver's license but do not have another form of Photo ID simply may not be able to obtain transportation to a DDS service center.

The Court acknowledges that the DDS has a mobile licensing unit, the GLOW bus. The fact remains, however, that the DDS has only one GLOW bus and Georgia has 159 counties. It therefore is not reasonable to expect that the GLOW bus can travel to all of Georgia's counties and the communities contained within those counties to service a significant number of voters who lack Photo IDs prior to the November 8, 2005, elections. Further, unless some effort is made to notify the public that the GLOW bus will be in a particular area on a particular date, many voters simply would not know of the GLOW bus alternative or would not be able to make arrangements for transportation to take them to the GLOW bus. As Plaintiffs' evidence indicates, even calling the DDS to request information concerning the GLOW bus's schedule of appearances may result in a voter receiving inconsistent information.

In any event, Plaintiffs have presented evidence indicating that the GLOW bus has steps for entering the bus and is not wheelchair-accessible. Many of the voters who do not possess Photo IDs are elderly or disabled and are

wheelchair-bound or have difficulty walking or navigating steps. The GLOW bus simply is not a feasible alternative for those voters, as the voters cannot enter the GLOW bus and the GLOW bus's photographic and computer equipment apparently cannot be moved outside the bus to service the voters.

Still other voters do not have the \$20 or \$35 to pay for a Photo ID card, although they may not qualify as "indigent" for purposes of the fee waiver provision. Although Defendants contend that any voter who needs a Photo ID card for voting and who does not have another form of Photo ID may obtain a Photo ID card for free simply by completing an Affidavit, which the DDS does not question, the evidence fails to indicate that the State has made efforts to publicize the DDS's "no questions asked" policy to voters or that DDS employees tell DDS customers that policy. The Affidavit requires a voter to sign the following statement:

I hereby swear or affirm that I am eligible for a free identification card for voting purposes pursuant to O.C.G.A. §40-5-103(d). I am eligible for this card because:

1. I am indigent and cannot pay the fee for an identification card;
2. I desire an identification card in order to vote in a primary or election in Georgia;
3. I do not have any other form of identification that is acceptable under O.C.G.A. § 21-2-417 for identification at the polls in order to vote;
4. I am registered to vote in Georgia or I am applying to register to vote as part of my application for an identification card; and

5. I do not have a valid driver's license issued by the State of Georgia.

A voter who reads the Affidavit without knowing the DDS's "no questions asked" policy most likely would believe that he or she actually must be indigent and lack funds to pay for an Photo ID card before he or she could obtain a card for free. Such a voter might not even bother completing the Affidavit, for fear that signing a statement under oath that is not true and submitting the Affidavit to a State agency would result in penalties. Thus, the availability of free Photo ID cards simply does not reduce the burden that the Photo ID requirement imposes on the right to vote.<sup>5</sup>

The State Defendants argue that the Photo ID requirement does not deprive voters of the right to vote, as voters can vote via absentee ballot without producing any Photo ID at all in most instances. Most voters, however, likely are unaware that they can vote via absentee ballot without a Photo ID, and the State has not demonstrated that it has publicized the fact that a Photo ID is not necessary to vote via absentee ballot.

---

5

In any event, the Court finds it ironic that the State seeks to prevent one type of lying--fraudulent in-person voting--yet the State points to a DDS policy that apparently allows voters who want Photo ID cards to "lie" about their financial status as support for its argument that the Photo ID requirement does not unduly burden the right to vote.

Further, HB 244 also changed the law governing absentee voting to eliminate the conditions previously required for obtaining an absentee ballot, which had been in effect for some time. Counsel for the State Defendants, in response to the Court's question concerning publication of the new absentee voting requirements, stated that the State has not publicized the new requirements for absentee voting any more or less than the State publicizes any other change in election law. Secretary of State Cox testified that the absentee voting rules in effect prior to the passage of HB 244 required voters to aver that they met one of several specified requirements to obtain an absentee ballot. Absent more information indicating that the State made an effort to inform Georgia voters concerning the new, relaxed absentee voting procedures, many Georgia voters simply may be unaware that the rules have changed. Those voters therefore still may believe that they must satisfy one of the former requirements to obtain an absentee ballot. Voters who cannot satisfy the former requirements likely will not even attempt to obtain an absentee ballot. Consequently, the Court simply cannot assume that Georgia voters who do not have a Photo ID will make the arrangements necessary to vote via the absentee voting process.

In any event, as Secretary of State Cox pointed out, an absentee ballot is only counted if it is received by the registrar in the voter's jurisdiction by 7:00 p.m. the day of the elections. Even absentee ballots postmarked by that date but delivered after 7:00 p.m. on election day are not counted. The only method voters have of ensuring that their vote is counted is to show up at their polling precinct on election day and vote in person or to hand-deliver their absentee ballot to the registrar in their jurisdiction before 7:00 p.m. on election day.<sup>6</sup>

The absentee voting process also requires that voters plan sufficiently enough ahead to request an absentee ballot, to have the ballot delivered from the registrar's office via the United States Postal Service, to complete the ballot successfully, and to mail the absentee ballot to the registrar's office sufficiently early to allow the United States Postal Service to deliver the absentee ballot to the registrar by 7:00 p.m. on election day. The majority of

---

6

The second method assumes voters know that they may hand-deliver absentee ballots and that voters know where to deliver those ballots. Many voters simply may believe that they can hand-deliver their absentee ballots to a polling place, which is not a viable alternative. Furthermore, many absentee voters do not drive or otherwise lack transportation. Although many organizations provide free transportation to the polls on election day, the availability of free transportation to the registrar's office likely is limited or nonexistent.

voters--particularly those voters who lack Photo ID--would not plan sufficiently enough ahead to vote via absentee ballot successfully. In fact, most voters likely would not be giving serious consideration to the election or to the candidates until shortly before the election itself. Under those circumstances, it simply is unrealistic to expect that most of the voters who lack Photo IDs will take advantage of the opportunity to vote an absentee ballot.

For the reasons discussed above, the Court finds that absentee voting simply is not a realistic alternative to voting in person that is reasonably available for most voters who lack Photo ID. The fact that voters, in theory, may have the alternative of voting an absentee ballot without a Photo ID thus does not relieve the burden on the right to vote caused by the Photo ID requirement.<sup>7</sup>

Additionally, the State argues that voters who do not have Photo ID will not be "turned away" from the polls;

---

7

Defendants argue that no constitutional right to vote in person exists, citing Oregon's policy of having elections conducted entirely by mail. Oregon's voting by mail structure differs significantly from Georgia's voting procedures. One major difference between Georgia's Photo ID requirement and Oregon's policy of conducting mail elections that is particularly noteworthy is that Oregon's policy places the same burden on every voter. Here, Georgia's Photo ID requirement places the burden of voting absentee on the very class of voters who will be least likely to navigate that method of voting successfully.

rather, those voters may vote a provisional ballot and return within forty-eight hours with a Photo ID. In support of this argument, the State points to the September 20, 2005, special election in Richmond County, where thirteen people without a Photo ID voted via provisional ballot and only two of those individuals returned with a Photo ID within the requisite forty-eight hour period to verify their identity and have their ballots counted. Given the difficulty of obtaining a Photo ID discussed above, it is highly unlikely that many of the voters who lack Photo ID and who would vote via provisional ballots could obtain a Photo ID card within the forty-eight hour period. Indeed, although many organizations are more than happy to transport individuals to polling places on election day, it is unlikely that those organizations or any other organization or individual would be able or willing to provide transportation to DDS service centers to allow voters of provisional ballots to obtain Photo ID cards. The ability to vote a provisional ballot thus is an illusion. Further, many voters may not even attempt to vote a provisional ballot in person because they do not have a Photo ID, and they believe that they cannot make the necessary arrangements to obtain a Photo ID within forty-eight hours after casting their votes.

The right to vote is a delicate franchise. Indeed, the Court notes that Plaintiff Watkins declined to pursue his claim when he was informed that Defendants planned to depose him.<sup>8</sup> Given the fragile nature of the right to vote, and the restrictions discussed above, the Court finds that the Photo ID requirement imposes "severe" restrictions on the right to vote. In particular, the Photo ID requirement makes the exercise of the fundamental right to vote extremely difficult for voters currently without acceptable forms of Photo ID for whom obtaining a Photo ID would be a hardship. Unfortunately, the Photo ID requirement is most likely to prevent Georgia's elderly, poor, and African-American voters from voting. For those citizens, the character and magnitude of their injury--the loss of their right to vote--is undeniably demoralizing and extreme, as those citizens are likely to have no other realistic or effective means of protecting their rights.

**ii. State Interest**

The State and the State Defendants assert that the Photo ID requirement is designed to curb voting fraud. Undoubtedly, this interest is an important one. Unfortunately, the fact

---

<sup>8</sup>

Counsel for Plaintiff Watkins indicated during an October 5, 2005, telephone conference with the Court that Plaintiff Watkins likely would choose not to participate in this litigation if the Court did not grant a request for a protective order to prevent Defendants from deposing him.

that the interest asserted is important and is legitimate does not end the Court's inquiry.

**iii. Extent to Which the State's Interest  
In Preventing Voter Fraud Makes It  
Necessary to Burden the Right to  
Vote**

Finally, the Court must examine the extent to which the State's interest in preventing voter fraud makes it necessary to burden the right to vote. As discussed above, the Photo ID requirement is not narrowly tailored to the State's proffered interest of preventing voter fraud, and likely is not rationally based on that interest. Secretary of State Cox testified that her office has not received even one complaint of in-person voter fraud over the past eight years and that the possibility of someone voting under the name of a deceased person has been addressed by her Office's monthly removal of recently deceased persons from the voter roles. Further, the Photo ID requirement does absolutely nothing to preclude or reduce the possibility for the particular types of voting fraud that are indicated by the evidence: voter fraud in absentee voting, and fraudulent voter registrations. The State imposes no Photo ID requirement or absolute identification requirement for registering to vote, and has removed the conditions for obtaining an absentee ballot imposed by the previous law. In short, HB 244 opened the door wide to fraudulent voting via absentee ballots. Under those

circumstances, the State Defendants' proffered interest simply does not justify the severe burden that the Photo ID requirement places on the right to vote. For those reasons, the Court concludes that the Photo ID requirement fails even the Burdick test.

**c. Summary**

For the reasons discussed above, the Court finds that under either the strict scrutiny or Burdick test, Plaintiffs have a substantial likelihood of succeeding on the merits of their claim that the Photo ID requirement unduly burdens the right to vote. Consequently, this factor counsels in favor of granting a preliminary injunction.

**3. Poll Tax**

Plaintiffs next argue that the Photo ID requirement imposes a poll tax on Georgia voters. Plaintiffs point out that voters who do not have a Georgia driver's license, a passport, or another valid form of Government-issued identification must pay \$20 to obtain a five-year Photo ID card or \$35 to obtain a ten-year Photo ID card. Plaintiffs contend that even though the Photo ID requirement does not use the term "poll tax," the fee for the Photo ID card is a tax and is not a user fee. Even if the Photo ID card fee is not a tax as defined under Georgia law, Plaintiffs contend that the State cannot evade the requirements of the Fourteenth and

Twenty-Fourth Amendments by labeling something as a "fee" when, in reality, it is a tax on the right to vote.

The Twenty-Fourth Amendment to the United States Constitution provides: "The right of citizens of the United States to vote in any primary or other election for President or Vice President, for electors for President or Vice President, or for Senator or Representative in Congress, shall not be denied or abridged by the United States or any State by reason of failure to pay any poll tax or other tax." U.S. Const. amend. XXIV. The Twenty-Fourth Amendment thus applies to elections for certain federal officials.

Plaintiffs contend that the \$20 fee for a five-year Photo ID card or the \$35 fee for a ten-year Photo ID is a poll tax because voters who do not have other acceptable forms of Photo ID must obtain the Photo ID card to cast their votes in person at the polls. Although Defendants point out that the DDS can waive the Photo ID card fee for voting under certain circumstances, Plaintiffs argue that this fee waiver provision is illusory. In any event, Plaintiffs argue that the possibility that a small number of voters can avoid paying the cost for a Photo ID card does not make the Photo ID scheme constitutionally permissible; it still places a burden on the right to vote.

For the following reasons, the Court finds that

Plaintiffs have a substantial likelihood of success on their poll tax claim. In Harman v. Forssenius, 380 U.S. 528 (1965), the Supreme Court struck down a Virginia requirement that a federal voter either pay the customary poll taxes as required for state elections or file a certificate of residence. The Supreme Court reasoned that the requirement to file a certificate of residence imposed a material requirement solely upon those who refused to surrender their right to vote in federal elections without paying the poll tax, and, consequently, the requirement violated the Twenty-Fourth Amendment. 380 U.S. at 541-42. The Supreme Court stated:

It has long been established that a State may not impose a penalty upon those who exercise a right guaranteed by the Constitution. "Constitutional rights would be of little value if they could be . . . indirectly denied," or "manipulated out of existence." Significantly, the Twenty-fourth Amendment does not merely insure that the franchise shall not be "denied" by reason of failure to pay the poll tax; it expressly guarantees that the right to vote shall not be "denied or abridged" for that reason. Thus, like the Fifteenth Amendment, the Twenty-fourth "nullifies sophisticated as well as simple-minded modes" of impairing the right guaranteed. "It hits onerous procedural requirements which effectively handicap exercise of the franchise" by those claiming the constitutional immunity.

Thus, in order to demonstrate the invalidity of § 24-17.2 of the Virginia Code, it need only be shown that it imposes a material requirement solely upon those who refuse to surrender their constitutional right to vote in federal elections without paying a poll tax. Section 24-17.2 unquestionably erects a real obstacle to voting in federal elections for those who assert their constitutional exemption

from the poll tax. As previously indicated, the requirement for those who wish to participate in federal elections without paying the poll tax is that they file in each election year, within a stated interval ending six months before the election, a notarized or witnessed certificate attesting that they have been continuous residents of the State since the date of registration (which might have been many years before under Virginia's system of permanent registration) and that they do not presently intend to leave the city or county in which they reside prior to the forthcoming election. Unlike the poll tax bill which is sent to the voter's residence, it is not entirely clear how one obtains the necessary certificate. . . . This is plainly a cumbersome procedure. In effect, it amounts to annual re-registration which Virginia officials have sharply contrasted with the "simple" poll tax system. For many, it would probably seem far preferable to mail in the poll tax payment upon receipt of the bill. In addition, the certificate must be filed six months before the election, thus perpetuating one of the disenfranchising characteristics of the poll tax which the Twenty-fourth Amendment was designed to eliminate. We are thus constrained to hold that the requirement imposed upon the voter who refuses to pay the poll tax constitutes an abridgement of his right to vote by reason of failure to pay the poll tax.

The requirement imposed upon those who reject the poll tax method of qualifying would not be saved even if it could be said that it is no more onerous, or even somewhat less onerous, than the poll tax. For federal elections, the poll tax is abolished absolutely as a pre-requisite to voting, and no equivalent or milder substitute may be imposed. Any material requirement imposed upon the federal voter solely because of his refusal to waive the constitutional immunity subverts the effectiveness of the Twenty-fourth Amendment and must fall under its ban.

380 U.S. at 540-42 (citations omitted; footnote omitted).

Similarly, in Harper v. Virginia State Board of Elections, 383 U.S. 664 (1966), the Supreme Court struck down

Virginia's poll tax requirement for state elections, finding that the poll tax violated the Equal Protection Clause. The Court stated:

We conclude that a State violates the Equal Protection Clause of the Fourteenth Amendment whenever it makes the affluence of the voter or payment of any fee an electoral standard. Voter qualifications have no relation to wealth nor to paying or not paying this or any other tax. Our cases demonstrate that the Equal Protection Clause of the Fourteenth Amendment restrains the States from fixing voter qualifications which invidiously discriminate. Thus without questioning the power of a State to impose reasonable residence restrictions on the availability of the ballot, we held . . . that a State may not deny the opportunity to vote to a bona fide resident merely because he is a member of the armed services. . . . Previously we had said that neither homesite nor occupation "affords a permissible basis for distinguishing between qualified voters within the State." We think the same must be true of requirements of wealth or affluence or payment of a fee.

383 U.S. at 666-67 (citations omitted). The Court further observed:

[W]e must remember that the interest of the State, when it comes to voting, is limited to the power to fix qualifications. Wealth, like race, creed, or color, is not germane to one's ability to participate intelligently in the electoral process. Lines drawn on the basis of wealth or property, like those of race, are traditionally disfavored. To introduce wealth or payment of a fee as a measure of a voter's qualifications is to introduce a capricious or irrelevant factor. The degree of the discrimination is irrelevant. In this context—that is, as a condition of obtaining a ballot—the requirement of fee paying causes an "invidious" discrimination that runs afoul of the Equal Protection Clause.

Id. at 668.

After the enactment of the Photo ID requirement, voters who do not have other acceptable forms of Photo ID must obtain Photo ID cards to be able to vote in person at the polls. Voters who choose not to obtain Photo ID cards, or who are unable to obtain Photo ID cards for one reason or another, are free to vote via absentee ballot. As discussed supra Part III.A.2., however, absentee voting is unavailable to many voters who do not have forms of Photo ID--either because those voters are unaware of their eligibility to vote via absentee ballot or because the voters are unable to navigate the absentee voting process successfully. As a practical matter, therefore, the majority of voters who do not have other acceptable forms of Photo ID must obtain a Photo ID card to cast their votes successfully and to ensure that their votes will be counted.

The fee for a Photo ID card is \$20 for a five-year card and \$35 for a ten-year card. Because, as a practical matter, most voters who do not possess other forms of Photo ID must obtain a Photo ID card to exercise their right to vote, even though those voters have no other need for a Photo ID card, requiring those voters to purchase a Photo ID card effectively places a cost on the right to vote. In that respect, the Photo ID requirement runs afoul of the Twenty-fourth Amendment

for federal elections and violates the Equal Protection Clause for State and municipal elections.<sup>9</sup>

Defendants argue that the DDS service centers will waive the fee for a Photo ID card if a voter who does not have another acceptable form of Photo ID needs the Photo ID card for voting purposes and if the voter completes an Affidavit. The Affidavit requires the voter to sign the following statement:

I hereby swear or affirm that I am eligible for a free identification card for voting purposes pursuant to O.C.G.A. §40-5-103(d). I am eligible for this card because:

1. I am indigent and cannot pay the fee for an identification card;
2. I desire an identification card in order to vote in a primary or election in Georgia;
3. I do not have any other form of identification that is acceptable under O.C.G.A. § 21-2-417 for identification at the polls in order to vote;
4. I am registered to vote in Georgia or I am applying to register to vote as part of my application for an identification card; and
5. I do not have a valid driver's license issued by the State of Georgia.

---

9

See John Victor Berry, Take the Money and Run: Lame-Ducks "Quack" and Pass Voter Identification Provisions, 74 U. Det. Mercy L. Rev. 291, 304, 314 (1997) (noting that "[t]he Attorney General of Michigan made the observation [with respect to a Michigan voter identification law] that: 'Requiring purchased photo identification is a reprise of the notorious poll tax scheme used in the past to prevent voting;' " and that "the ability to obtain certain types of photo identification costs money, which is unconstitutional in light of Harper, as a qualification based on affluence . . . .").

(Watson Decl. Ex. A.) The DDS, however, instructs its employees not to investigate the truth of the representations made by voters who complete the Affidavit. Instead, DDS employees are to issue a Photo ID card to any voter who completes the Affidavit, without asking any questions. As discussed supra Part III.A.2., however, many voters may not be aware of that policy, and understandably may be reluctant to sign an Affidavit that requires them to state that they are "indigent and cannot pay the fee for an identification card" when such a statement is not true. Additionally, many voters simply may be too embarrassed over their inability to afford a Photo ID card to request and complete an Affidavit for a free card. Berry, supra note 9, at 307. Consequently, very few voters likely will take advantage of the fee waiver affidavit option. In any event, as Plaintiffs' counsel correctly observes, the fact that some individuals avoid paying the cost for the Photo ID card does not mean that the Photo ID card is not a poll tax.

Moreover, even if the Court accepts as true Defendants' argument that the fee waiver affidavit option is realistically available for any voter who wishes to use that option, the fee waiver affidavit still runs afoul of the Twenty-fourth Amendment. As the Supreme Court noted in Harman, any material requirement imposed upon a voter solely because of the voter's

refusal to pay a poll tax violates the Twenty-fourth Amendment. Harman, 380 U.S. at 542. A voter who does not have another acceptable form of Photo ID and who wishes to vote must, as a practical matter, obtain a Photo ID card. To obtain a Photo ID card, the voter must arrange for transportation to a DDS service center or the GLOW bus, if that option is available, and must navigate the lengthy waiting process successfully. The voter then must pay the \$20 fee or sign the fee waiver affidavit, which may require the voter to swear or affirm to facts that simply are not true in order to avoid paying the \$20 fee. Under those circumstances, the Court cannot determine that the fee waiver affidavit is not a material requirement, as discussed in Harman. Consequently, the Court finds that the Photo ID requirement imposes a poll tax.

For the reasons discussed above, the Court concludes that the Photo ID requirement constitutes a poll tax. The Photo ID requirement thus violates the Twenty-fourth Amendment with respect to federal elections and violates the Equal Protection Clause with respect to State and municipal elections. Under those circumstances, the Court concludes that Plaintiffs have a substantial likelihood of succeeding on the merits with respect to their poll tax claim.

#### 4. Civil Rights Act of 1964

Alternatively, Plaintiffs contend that Georgia's Photo ID requirement violates the Civil Rights Act of 1964, 42 U.S.C.A. § 1971 by applying different standards to absentee and in-person voters within the same county and by precluding voting due to an omission that is not material to the right to vote under Georgia law. Defendants argue that both of Plaintiffs' claims under § 1971 fail as a matter of law because § 1971 does not furnish a private right of action. Because that argument may dispose of Plaintiffs' § 1971 claims, the Court addresses that argument before turning to the particulars of Plaintiffs' claims.

Defendants rely on language in § 1971(c) stating that "the Attorney General may institute for the United States, or in the name of the United States, a civil action or other proper proceeding for preventative relief, including an application for a permanent or temporary injunction, restraining order, or other order." (State Defs.' Br. Opp'n Pls. Mot. Prelim. Inj. at 49 (citation omitted).) Defendants rely wholly on the quoted statutory language and cite two cases as additional support for their argument: Willing v. Lake Orion Community School Board of Trustees, 924 F. Supp. 815, 820 (E.D. Mich. 1996), and Good v. Roy, 459 F. Supp. 403, 405 (D. Kan. 1978). Defendants further contend that even if

§ 1971 affords Plaintiffs a private right of action, Plaintiffs' claims still fail because the Photo ID requirement does not discriminate on the basis of race, color, or previous condition.

The Eleventh Circuit directly addressed the issue of whether § 1971 could be enforced by a private right of action in Schwier v. Cox, 340 F.3d 1284 (11th Cir. 2003). In Schweir, the Eleventh Circuit reversed a district court ruling which relied on McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000), which in turn relied entirely on Willing, which in turn relied entirely on Good--the two cases cited by Defendants. The Eleventh Circuit held that "the provisions of section 1971 of the Voting Rights Act may be enforced by a private right of action under § 1983." Schwier, 340 F. 3d at 1297. The Eleventh Circuit's holding is not limited to the fact pattern at issue in Schweir, regarding an individual's refusal to disclose his social security account number, and Judges Dubina, Black, and Ryskamp conducted a thorough analysis of the legislative history behind § 1971(c) and the Supreme Court's rationale behind holdings permitting private rights of action to enforce other sections of the Voting Rights Act. Id. at 1294-95. The Court is bound to apply Schweir, and the Court consequently finds as a matter of law that Plaintiffs

may assert a private right of action under § 1971 for the alleged voting rights violations at issue.

**a. 42 U.S.C.A. § 1971(a)(2)(A)**

First, Plaintiffs argue that Georgia's Photo ID requirement violates 42 U.S.C.A. § 1971(a)(2)(A) by applying different standards in determining whether individuals within the same county or other political subdivision are qualified to vote. 42 U.S.C.A. § 1971(a)(2)(A) provides that "[n]o person acting under color of state law shall," when "determining whether any individual is qualified under State law or laws to vote in any election, apply any standard, practice, or procedure different from the standards, practices, or procedures applied under such law or laws to other individuals within the same county, parish, or similar political subdivision who have been found by State officials to be qualified to vote." 42 U.S.C.A. § 1971(a)(2)(A).

Plaintiffs argue that the Photo ID requirement runs afoul of this subsection because the Photo ID requirement applies different standards to voters who reside in the same city or county who vote absentee than it applies to people who vote in person. Plaintiffs note that the Photo ID requirement applies only to voters who vote in person at the polls, while voters who vote absentee by mail do not have to comply with the Photo ID requirement unless they are registering to vote absentee,

or are voting absentee for the first time. Additionally, voters who registered by mail and are voting by absentee ballot for the first time may include a utility bill or bank statement with their absentee ballot as a means of voter identification. (Oct. 12, 2005, Hr'g Tr.)

Plaintiffs point out that although the stated purpose of the Photo ID requirement is to prevent voter fraud, the Photo ID requirement does nothing to address the largest sources of potential voter fraud--absentee voting and fraudulent voter registrations. In support of this argument, Plaintiffs cite to correspondence from Secretary of State Cox to Governor Perdue and the Georgia State Senate with respect to HB 244 indicating that over her tenure, she and her staff could not recall a single case or complaint of voter impersonation at the polls. In contrast, her office received numerous complaints of fraudulent absentee voting during the same time period. HB 244, in Secretary of State Cox's opinion, expanded opportunities for absentee voting by mail by eliminating the previous restrictions on obtaining an absentee ballot. Consequently, Plaintiffs contend that the Photo ID requirement, by its plain language, clearly violates 42 U.S.C.A. § 1971(a)(2)(A) because it imposes standards on voters in the same county or city that differ for absentee voters versus in-person voters.

Defendants contend that HB 244 does not apply different standards in determining whether any individual is qualified under State law to vote in person in any election. Defendants argue that individuals who choose to vote in person are all held to the same standard regardless of their race or color, and that individuals who choose to vote by absentee ballot are all held to the same standard regardless of their race or color.

Plaintiffs cited no case law and provided limited information in support of this claim at the preliminary injunction hearing. The Court therefore cannot determine at this point that Plaintiffs have a substantial likelihood of succeeding on the merits of this claim. Because Plaintiffs may be able to produce evidence and authority at a later stage of the proceedings that support this claim, the Court reserves a ruling on the merits of a claim for a later date.

**b. 42 U.S.C.A. § 1971(a)(2)(B)**

Second, Plaintiffs contend that Georgia's Photo ID requirement violates 42 U.S.C.A. § 1971(a)(2)(B), which prohibits a person acting under color of law from "deny[ing] the right of any individual to vote in any election because of an error or omission on any record or paper relating to any application, registration, or other act requisite to voting, if such error or omission is not material in determining

whether such individual is qualified under State law to vote in such election." 42 U.S.C.A. § 1971(a)(2)(B).

Plaintiffs contend that to be qualified to vote in Georgia, a voter need only: (1) be a United States citizen; (2) be a legal resident of the county where he or she seeks to register; (3) be at least 18 years old; and (4) not be serving a sentence for a felony conviction involving moral turpitude or have been found mentally incompetent by a judge. Ga. Const. art. II, § 1. Plaintiffs observe that none of those requirements include presenting a Photo ID, and that a Photo ID therefore cannot be material to determining whether an individual is qualified under State law to vote. In any event, Plaintiffs argue that because the Photo ID requirement does not apply to most absentee voters, the Photo ID requirement cannot be said to be "material" for purposes of 42 U.S.C.A. § 1971(a)(2)(B).

Defendants contest these assertions and argue that Plaintiffs' claim must fail because the Photo ID requirement does not add any condition on voter qualifications and that there is no error or omission on any record that is being used to disqualify any potential voter. Further, Defendants point out that a legislature traditionally has been allowed to reform state law one step at a time and therefore, the General

Assembly may address one potential avenue for voter fraud at a time.

Plaintiffs cited no case law and provided limited information in support of this claim at the preliminary injunction hearing. At this point, the Court simply cannot determine whether Plaintiffs have a substantial likelihood of succeeding on the merits of this claim. Because Plaintiffs may be able to present sufficient evidence and authority to succeed on this claim at a later stage of the proceedings, the Court will not rule on the merits of the claim at this time.

#### **5. Voting Rights Act of 1965**

Finally, Plaintiffs argue that the Photo ID requirement violates Section 2 of the Voting Rights Act, 42 U.S.C.A. § 1973(a). That statute provides, in relevant part: "No voting qualification or prerequisite to voting or standard, practice, or procedure shall be imposed or applied by any State or political subdivision in a manner which results in a denial or abridgement of the right of any citizen of the United States to vote on account of race or color, or in contravention of the guarantees set forth in section 1973b(f)(2) of this title, as provided in subsection (b) of this section." 42 U.S.C.A. § 1973(a). 42 U.S.C.A. § 1973(b) sets forth the requirements for establishing a violation of § 1973(a), and states:

A violation of subsection (a) of this section is established if, based on the totality of

circumstances, it is shown that the political processes leading to nomination or election in the State or political subdivision are not equally open to participation by members of a class of citizens protected by subsection (a) of this section in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice. The extent to which members of a protected class have been elected to office in the State or political subdivision is one circumstance which may be considered: Provided, That nothing in this section establishes a right to have members of a protected class elected in numbers equal to their proportion in the population.

42 U.S.C.A. § 1973(b).

Plaintiffs assert a claim of vote denial under § 1973(a), rather than a claim of vote dilution. The Supreme Court, however, has observed that Section 2 of the Voting Rights Act prohibits all forms of voting discrimination, not simply vote dilution. Thornburg v. Gingles, 478 U.S. 30, 45 n.10 (1986). After the 1982 amendments to the Voting Rights Act, a plaintiff asserting a violation of Section 2 need not present "proof that the contested electoral practice or mechanism was adopted or maintained with the intent to discriminate against minority voters." Id. at 44. Instead, the plaintiff must show that "'as a result of the challenged practice or structure plaintiffs do not have an equal opportunity to participate in the political processes and to elect candidates of their choice.'" Id. The Supreme Court has observed:

In order to answer this question, a court must assess the impact of the contested structure or

practice on minority electoral opportunities "on the basis of objective factors." The Senate Report specifies factors which typically may be relevant to a § 2 claim: the history of voting-related discrimination in the State or political subdivision; the extent to which voting in the elections of the State or political subdivision is racially polarized; the extent to which the State or political subdivision has used voting practices or procedures that tend to enhance the opportunity for discrimination against the minority group, such as unusually large election districts, majority vote requirements, and prohibitions against bullet voting; the exclusion of members of the minority group from candidate slating processes; the extent to which minority group members bear the effects of past discrimination in areas such as education, employment, and health, which hinder their ability to participate effectively in the political process; the use of overt or subtle racial appeals in political campaigns; and the extent to which members of the minority group have been elected to public office in the jurisdiction. The Report notes also that evidence demonstrating that elected officials are unresponsive to the particularized needs of the members of the minority group and that the policy underlying the State's or the political subdivision's use of the contested practice or structure is tenuous may have probative value. The Report stresses, however, that this list of typical factors is neither comprehensive nor exclusive. While the enumerated factors will often be pertinent to certain types of § 2 violations, particularly vote dilution claims, other factors may also be relevant and may be considered. Furthermore, the Senate Committee observed that "there is no requirement that any particular number of factors be proved, or that a majority of them point one way or the other." Rather, the Committee determined that "the question whether the political processes are 'equally open' depends upon a searching practical evaluation of the 'past and present reality,'" and on a "functional" view of the political process.

Id. at 44-45 (citations omitted; footnote omitted). "The essence of a § 2 claim is that a certain electoral law,

practice, or structure interacts with social and historical conditions to cause an inequality in the opportunities enjoyed by black and white voters to elect their preferred representatives." Id. at 47.

Similarly, in Johnson v. Governor of the State of Florida, 405 F.3d 1214 (11th Cir. 2005), the United States Court of Appeals for the Eleventh Circuit observed:

Vote denial occurs when a state employs a "standard, practice, or procedure" that results in the denial of the right to vote on account of race. To prevail, a plaintiff must prove that "under the totality of the circumstances, . . . the political processes . . . are not equally open to participation by [members of a protected class] . . . in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." In making this inquiry, courts consider a non-exclusive list of objective factors (the "Senate factors") detailed in a Senate Report accompanying the 1982 amendments.

405 F.3d at 1228 n.26 (citations omitted) (alterations and omissions in original).

Plaintiffs have presented declarations and Census data in support of their § 2 vote denial claim. Specifically, Plaintiffs point to socio-economic data from the 2000 Census indicating that in Georgia: (1) 17.3 percent of African-American households have an income of less than \$10,000, compared to 7.4 percent of Caucasian, non-Hispanic households; (2) an additional 16.0 percent of African-American households have incomes between \$10,000 and \$19,999, compared to 10.1

percent of Caucasian, non-Hispanic households; (3) 27.5 percent of African-Americans ages twenty-five or older have less than a high school education, including general equivalency degrees, as compared with 17.3 percent of Caucasian, non-Hispanics ages twenty-five or older; (4) 23.1 percent of African-Americans of all ages live below the poverty line, compared to 7.8 percent of Caucasian, non-Hispanic individuals; (5) 24.7 percent of African-Americans ages sixty-five through seventy-four live below the poverty line, as compared to 7.8 percent of Caucasian, non-Hispanic individuals in the same age group; (6) 32.1 percent of African-Americans aged seventy-five and over live below the poverty line, as compared to 12.9 percent of Caucasian, non-Hispanic individuals aged seventy-five or over; (7) 17.7 percent of African-American households have no vehicle available, as compared to 4.4 percent of Caucasian, non-Hispanic households; and (8) only one of the eight Georgia counties with the highest percentage of African-American residents--sixty percent or higher--has a DDS service center. Plaintiffs also plan to present data indicating that in Georgia, 11.0 percent of Caucasians, 26.0 percent of African-Americans, and 30.0 percent of Latinos live below the poverty line. Plaintiffs argue that this evidence is sufficient to show depressed political participation by minorities and to

demonstrate that the Photo ID requirement will discourage voting by minority voters.

At this point, however, the Court simply cannot agree with Plaintiffs that the evidence is sufficient to demonstrate that Plaintiffs have a substantial likelihood of succeeding on the merits with respect to their § 2 vote denial claim. The Court therefore is reluctant to grant preliminary injunctive relief to Plaintiffs based on their § 2 vote denial claim. Recognizing that Plaintiffs may be able to produce sufficient evidence at a later stage of the proceedings to support their § 2 vote denial claim, the Court reserves a final ruling on the merits of that claim for a later date.

**B. Irreparable Harm**

The Court next addresses the second factor for obtaining a preliminary injunction--whether Plaintiffs will suffer irreparable harm if the Court does not enter a preliminary injunction. For the reasons discussed supra Part III.A., the Court concludes that the Photo ID requirement unduly burdens the fundamental right to vote, and likely will cause a number of Georgia voters to be unable to cast a vote and to have their votes counted. The Court also concludes that the Photo ID requirement constitutes a poll tax.

Although Defendants argue that the Photo ID requirement will not deprive a single Georgia voter of the right to vote,

because voters without Photo IDs can vote absentee ballots, as a practical matter, a significant number of the registered Georgia voters who lack Photo IDs likely are unaware of that alternative or would not be able to navigate the absentee ballot voting process successfully. Voters who lack Photo IDs and are unaware of the absentee voting alternative, yet still desire to vote, must undertake the often difficult and burdensome process of obtaining a Photo ID card. Still others who can navigate this process successfully either must pay a fee for a Photo ID card or sign an Affidavit swearing that they are indigent and do not have the funds to pay for the card--whether or not that statement is true--to obtain a free Photo ID card. The Photo ID requirement thus has the likely effect of causing a significant number of Georgia voters to forego going to the polls or to forego obtaining and voting an absentee ballot. For the reasons discussed above, the Court finds that Plaintiffs have demonstrated that they or their constituents will suffer irreparable harm if the Court declines to enter a preliminary injunction. This factor therefore weighs in favor of granting Plaintiffs' Motion for Preliminary Injunction.

**C. Threatened Injury to Plaintiffs Weighed Against the Damage to the State Caused by a Preliminary Injunction**

Next, the Court must weigh the threatened injury to Plaintiffs against the damage to the State caused by a preliminary injunction. Defendants presented evidence that the entry of a preliminary injunction likely will result in confusion for voters, poll workers, and elections officials, and may result in an inconsistent application of the identification requirements. Defendants have pointed out that it will be extremely difficult for the Elections Division to produce new voter certificates and posters and for all local elections officials to receive sufficient numbers of voter certificates and posters for polling locations. Further, Defendants' evidence indicates that local elections officials lack sufficient time to conduct training for poll workers and to educate the public.

The Court certainly appreciates and understands the inconvenience and expense that entering a preliminary injunction may work upon the State and Defendants. The Court, however, is mindful that the right to vote is a fundamental right and is preservative of all other rights. Denying an individual the right to vote works a serious, irreparable injury upon that individual. Given the right at issue and the likely injury caused by not entering a preliminary injunction,

the Court finds that the potential injury to Plaintiffs outweighs the harm to the State and Defendants caused by entering a preliminary injunction. This factor therefore counsels in favor of entering a preliminary injunction.

**D. Public Interest**

Finally, the Court must determine whether issuing a preliminary injunction will serve the public interest. At the outset, the Court acknowledges that preventing voter fraud serves the public interest by ensuring that those individuals who have registered properly to vote are allowed to vote and to have their votes counted in any given election. As discussed supra Part III.A., however, the current Photo ID requirement simply is not targeted toward eliminating or preventing the only types of voter fraud that are supported by the evidence presented thus far: fraudulent voter registrations and fraudulent absentee voting. Rather, HB 244 opens the door wide for fraudulent absentee voting by removing the conditions for obtaining an absentee ballot. As discussed supra Parts III.A.2. and A.3., the Photo ID requirement unduly burdens the right of many properly registered Georgia voters to vote, is a poll tax, and has the likely effect of causing many of those voters to forego voting or of precluding those voters from voting at the polls. Because the right to vote is a fundamental right, removing the undue burdens on that right

imposed by the Photo ID requirement serves the public interest. This factor therefore counsels in favor of granting Plaintiffs' Motion for Preliminary Injunction.

**E. Summary**

In sum, the Court finds that the four factors for granting a preliminary injunction weigh in favor of Plaintiffs. In particular, the Court concludes that Plaintiffs have a substantial likelihood of success on the merits of their claim that the Photo ID requirement unduly burdens the right to vote and a substantial likelihood of success on the merits of their claim that the Photo ID requirement constitutes a poll tax. The Court also finds that Plaintiffs and their constituents will suffer irreparable harm if the Court does not grant a preliminary injunction, and that the threatened harm to Plaintiffs outweighs the injury to Defendants and the State that will result from issuing a preliminary injunction. Finally, the Court finds that entering a preliminary injunction will serve the public interest. Consequently, the Court grants Plaintiffs' Motion for Preliminary Injunction.

In reaching this conclusion, the Court observes that it has great respect for the Georgia legislature. The Court, however, simply has more respect for the Constitution. Because the Court finds that Plaintiffs have a substantial

likelihood of succeeding on their claims that the Photo ID requirement unduly burdens the right to vote and constitutes a poll tax, the Court must enter a preliminary injunction against the Photo ID requirement.<sup>10</sup>

---

10

The Court acknowledges that its conclusion differs from the decisions reached in League of Women Voters v. Blackwell, 340 F. Supp. 2d 823 (N.D. Ohio 2004), Bay County Democratic Party v. Land, 347 F. Supp. 2d 404 (E.D. Mich. 2004), and Colorado Common Cause v. Davidson, No. 04CV7709, 2004 WL 2360485 (D. Colo. Oct. 18, 2004). All of those cases, however, involved identification requirements that allowed voters to show means of identification other than Photo IDs. Georgia's Photo ID requirement, however, applies to in-person voting and goes one step further than the laws challenged in Blackwell, Bay County Democratic Party, and Colorado Common Cause.

For instance, Blackwell involved a challenge to an Ohio law implementing HAVA that required individuals who registered to vote by mail and who did not submit acceptable documentary proof of identity with their voter applications to provide "acceptable documentary proof" of their identities prior to voting. 340 F. Supp. 2d at 826. Such proof could include "a current and valid photo identification," or "[a] copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows [the voter's] name and address." Id.

Bay County Democratic Party, in turn, involved a challenge to directives issued to Michigan local elections officials concerning casting and tabulating provisional ballots, as well as a directive pertaining to proof of identity for first-time voters who registered by mail. 347 F. Supp. 2d at 410-11. The directive concerning proof of identity for first-time in-person voters who registered by mail was revised to allow those voters to furnish the identification required by HAVA either at the polls or during a six-day period after election day. Id. at 434. The HAVA requirements, however, allowed individuals who registered by mail to present a current, valid Photo ID or "a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter." 42 U.S.C.A. § 15483.

Finally, Colorado Common Cause also involved

#### IV. Conclusion

ACCORDINGLY, the Court **GRANTS** Plaintiffs' Motion for Preliminary Injunction [2] [23], and **ENJOINS** and restricts Defendants individually and in their official capacities from enforcing or applying the 2005 amendment to O.C.G.A. § 21-2-417 (Act No. 53, Section 59), which requires voters to present a Photo ID as a pre-condition to in-person voting in Georgia, to deny Plaintiffs or any other registered voter in Georgia

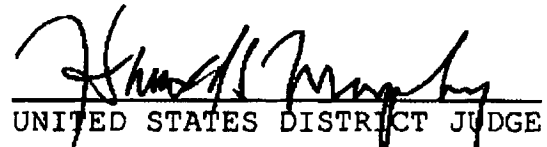

---

identification requirements that permitted voters to show several forms of identification, including: (1) a valid Colorado driver's license; (2) a valid ID card from the Colorado Department of Revenue; (3) a valid United States passport; (4) a valid government employee Photo ID; (5) a valid pilot's license; (6) a valid United States military Photo ID; (7) a copy of a current utility bill, a bank statement, government check, paycheck, or other government document showing the voter's name and address; (8) a valid Medicaid or Medicare card; (9) a certified copy of a birth certificate; or (10) certified documentation of naturalization. 2004 WL 2360485, at \*6. The Colorado Common Cause court observed that the identification requirement was intended to reduce voter fraud, and concluded that the identification requirement was reasonably related to the interest proffered by the state and was not unduly burdensome. Id. at \*10.

The identification requirements used by Ohio, Michigan, and Colorado, however, are of little relevance to the case now before the Court because those requirements are much less stringent than Georgia's Photo ID-only requirement. Each of the requirements challenged in Blackwell, Bay County Democratic Party, and Colorado Common Cause allowed voters to produce alternative forms of identification as well as Photo IDs. If Georgia's voter identification law permitted use of such alternative means of identification for purposes of in-person voting, Plaintiffs likely would not have filed this case. In sum, given the unique nature of Georgia's Photo ID requirement, the Court finds Blackwell, Bay County Democratic Party, and Colorado Common Cause cases unpersuasive. The Court therefore declines to follow those cases.

admission to the polls, a ballot, or the right to cast their ballots and to have their ballots counted in any special, general, run off, or referenda election in the State of Georgia because of their failure or refusal to present a Photo ID.

IT IS SO ORDERED, this the 18<sup>th</sup> day of October, 2005.

  
UNITED STATES DISTRICT JUDGE

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW – Suite 1100  
Washington, DC 20005

**STATEMENT BY COMMISSIONER GRACIA HILLMAN  
OF THE U.S. ELECTION ASSISTANCE COMMISSION  
ON THE "EAC REPORT ON VOTING FRAUD AND VOTER INTIMIDATION"**

---

**Washington, DC – December 7, 2006:** Today the U.S. Election Assistance Commission (EAC) voted on the findings of its preliminary study of voting fraud and voter intimidation and accepted recommendations to conduct a comprehensive study on election crimes. The findings and recommendations are in an EAC report, "Election Crimes: An Initial Review and Recommendations for Future Study," which is based largely on the research of two consultants and includes a working definition of election crimes that encompasses voting fraud and voter intimidation. This report and its appendices are available at [www.eac.gov](http://www.eac.gov).

Today's vote marks EAC's acceptance of the core recommendation that voting fraud and voter intimidation deserve more than just anecdotal assessment but rather a comprehensive, nationwide survey and study of the information that is available from election officials, investigatory agencies, prosecutorial bodies and the courts on the number and types of complaints lodged with the authorities and the disposition of those complaints.

With today's actions, EAC moves toward the next steps, which include the first nationwide, comprehensive study of election crimes based on hard data, with findings to be released to the public by the end of 2007.

It is my expectation that based on the findings of the comprehensive study, EAC will have useful data that can inform future discussions and debates about voting fraud, voter intimidation and other election crimes. It is my hope that based on the data, EAC will move forward early in 2008 to release suggested standards and/or best practices that will be useful to election officials and prosecuting authorities as they collect and assess claims and acts of election crimes, and bring offenders to justice. I also hope EAC will continue to collect and assess data on election crimes from future federal election cycles.

While I am pleased with the direction that we are taking on this important topic, I am also aware that some have voiced their concerns and raised questions about the delay EAC encountered in releasing this report. As we have explained, EAC's process to review the consultants' findings took far longer than anticipated. Hindsight is twenty-twenty vision and we at EAC now understand that we should have handled the delay differently. The resulting situation from the delay was both personally and professionally embarrassing for me. I truly hope this is the one and only time EAC will ever experience this type of difficult circumstance.

## **Testimony By Mr. Paul Bettencourt**

### **Tax Assessor-Collector and Voter Registrar Harris County, Texas**

Mr. Chairman and members of the committee:

My name is Paul Bettencourt, and I am the elected Tax Assessor-Collector and Voter Registrar for Harris County, Texas, the county that includes the City of Houston. I am honored to have been asked to speak before you today on an issue of great importance to those of us charged with ensuring the accuracy and integrity of the nation's voter registration rolls, which totals 1,892,883 in Harris County alone.

My office collects approximately \$3.8 billion in taxes from Harris County residents every year. Most of my constituents aren't happy about parting with their hard-earned money, but it is in my role as voter registrar that I can hear from over 50,000 constituents in just one day.

Since my election in 1998, the Tax Office has emphasized upgrading voter technology and the training of our staff because we know that the "right to vote" is sacrosanct. As voter registrar for Harris County, I work constantly with my staff to try to maintain the most accurate voter roll possible by employing the most up-to-date technology available. This includes comparing our voter registration list with other known good governmental services, such as the Texas Department of Public Safety, the United States Postal Service's National Change of Address List, the Social Security Department's Deceased List, and the Secretary of State's Statewide Voter Roll. Our original efforts in 2000 found more than 50,000 registrations that had to be deleted or suspended under law just by comparing the voter roll to these other governmental databases.

The Harris County Voter Registration Office has been recognized by various groups for our efforts to guarantee an accurate voter roll, including the National Association of Latino Elected and Appointed Officials, the Texas Secretary of State's Office and other organizations. We work extremely hard to avoid even minor problems with the voter roll by staffing a large "cross-trained" Call Center on election days to answer questions from precinct judges and county voters. On Election Day 2004 alone, our Call Center answered more than 51,000 live calls, in addition to an automated call system ably

011673

supported by our County Clerk, Beverly Kaufman, who conducts elections in Harris County.

Illegal voting and registration by foreign nationals is difficult for my office to prevent without federal assistance. We have three main ways to try to identify illegal registrations; the first is reliance on the "honor system" from the public; secondly, U.S. Immigration and Customs Enforcement checks during the naturalization process; and thirdly, and most effectively, is through juror records maintained by Harris County District Clerk Charles Bacarisse. The District Clerk's office routinely submits lists of jurors who have been excused from jury duty for non-citizenship, and we compare that list against our records of registered voters and send written challenges to those individuals who have used this exemption from jury duty.

With the help of Congress, we can do far more. Passage of legislation such as the Federal Election Integrity Act of 2006 would help my office ensure that only U.S. citizens are allowed to vote in federal, state and local elections. I am aware that some municipalities allow foreign citizens to vote in local elections, but the State of Texas amended its Constitution in 1921 to require that voters be U.S. citizens. Voting should be a right of citizenship in the United States.

The extent of illegal voting by foreign citizens in my home county is impossible to determine, but we know that it has and will continue to occur. Harris County is the third most populous county in the United States, with nearly 3.7 million residents - nearly 1.9 million of whom are registered to vote. If you've ever been to Houston, you know it's a remarkably diverse city. More than 22 percent of our county residents - nearly 1 in 4 - were born outside the United States, and more than 500,000 of them are estimated to be non-U.S. citizens.

As it now stands, we have no real way to stop a foreign citizen from voting. If a foreign national sends in a voter registration application and checks off that he or she is a citizen of the United States, they will get a card - unless we have some prior knowledge that their information is false. There is no reliable database of which I am aware that we can check against for proof of citizenship, but there could be at the federal level.

Just last year, a reporter with the Houston Chronicle called me, asking how it was that a resident of suburban Houston, a Norwegian citizen, was able to vote in the November 2004 federal, state and local elections. The answer, of course, was that he was not legally allowed to vote.

Neither was the Brazilian citizen whose registration was canceled in 1996 after she acknowledged on a jury summons that she was not a U.S. citizen. She then reapplied in 1997, again claiming to be a U.S. citizen, and was again given a voter card, which was again canceled. Records show she was able to vote at least four times in general and

primary elections. With the Harris County Tax Office's modern voter registration system, this type of fraud can easily be detected in 2006 but not in 1997.

A review by my office in early 2005 turned up at least 35 cases in which foreign nationals either applied for or received voter's cards. Even in the nation's third-largest county, we regularly have elections decided by one, two, or just a handful of votes in any one of our more than 400 local government jurisdictions. Therefore, every vote truly counts.

The federal government could combine the 50 states list from their Department of Public Safety driver's license records that maintain photo identification records, many with proof of citizenship. These records could be compared to federal data like passport lists, ICE records, or Social Security numbers to confirm these records electronically. In a county larger than 22 states, my office regularly maintains 7.1 million database records annually that can change on a yearly basis, so I know from real-world experience that this effort is feasible both technically and operationally.

Is voting taken so lightly that we cannot require so little an effort as the production of a photo ID? We require such identification from those buying tobacco or alcohol, boarding an airplane or using a credit card. Those not having a photo ID can be provided one by government at no cost to the voter.

Without a federal remedy, local registrants can do little to stop foreign citizens from registering in any election. Requiring proof of citizenship at the time of registration or re-registration will stop this documented fraud. We are all aware of the argument that such a requirement is a barrier or an inconvenience to those attempting to vote, but with 21st century technology, the task can be easily done and almost transparent to the citizen voters of this nation.

Additional information on the Harris County Voter Registration department's efforts can be seen at our Web site, [hcvoter.net](http://hcvoter.net). Thank you again for your time and attention.

## Questions abound in voter push

ACORN's registration drive in the KC area generates 35,000 applications, but thousands of them appear to be duplicates or contain dubious data.

By RICK MONTGOMERY  
The Kansas City Star

A group seeking a boost in Missouri's minimum wage said Wednesday it helped 35,000 Kansas City area residents register to vote next month.

However, at least a few thousand "questionable" applicants are clogging the verification system and probably won't be added to voter rolls for the November balloting, election officials said.

Near the top of the fishy list would be a man named Mark who apparently registered seven times over a three-day period using his mother's home address and phone number. She told *The Star* that Mark hadn't lived there in six years.

Sharon Turner Buie, Kansas City's Democratic director of elections, said about 3,000 of the 16,000 applications examined so far bore discrepancies, including suspicious signatures, applicants being too young, and birth dates and Social Security numbers not jibing with state databases.

The new applications were collected in a massive registration drive organized by the Association of Community Organizations for Reform Now, known as ACORN.

Wednesday was the final day for Missourians to submit applications to vote Nov. 7.

ACORN leaders said they were excited by the number of applications — which, if all are valid, would increase the number of registered Kansas City voters by nearly 20 percent.

Brian Mellor, the national group's election counsel, said several factors could lead to bad forms, including illegible handwriting and typos in Social Security numbers.

A check of several questionable applications at the Kansas City election office turned up a variety of puzzles: four forms with identical data except for an applicant's middle name; three other forms with identical data except for an applicant's place of birth.

If it's not fraudulent, submitting sloppy or duplicate applications "is dangerous" because it slows the verification process, said Kansas City election director Ray James, a Republican.

"We're hearing from many, many innocent people who registered at their libraries and haven't gotten their notices from us yet," he said.

He said an attorney for the election board was reviewing the matter for prosecution.

Not only did ACORN recruit volunteers to register people, it also paid more than 40 workers to collect applications — always a concern to election officials. Missouri law prohibits those workers from being paid on a quota basis.

ACORN said it paid only an hourly wage, about \$8, to avoid encouraging phony forms. And it says it consults with election officials and has internal checks in an effort to cut down on duplications and fraud.

In St. Louis, elections officials called nearly 1,500 of the 15,000 registration cards collected by ACORN

011678

"potentially fraudulent," according to the St. Louis Post-Dispatch.

Similar ACORN drives have come under fire recently in Ohio, Pennsylvania and other states. But the group notes that investigations into fraud allegations stemming from its 2004 efforts turned up no wrongdoing.

## Absentee balloting fraught with risks, legal scholar says

Mark Reutter, Business and Law Editor

4/13/06

CHAMPAIGN, Ill. — The rising popularity of absentee voting, especially the use of “no-excuse” absentee ballots, poses a risk of vote tampering and election fraud, a University of Illinois legal scholar argues.

In the name of offering voters flexibility and saving the government money, more than 25 states, including California, Florida and Ohio, have enacted laws letting registered voters cast a ballot before Election Day without providing a reason.

In addition, 20 states permit early voting by mail, and about 15 states offer voters permanent absentee status, which lets them register to vote absentee for an indefinite period.

Jessica A. Fay writes that voting outside of the polling place on Election Day carries with it the danger that absentee ballots can be collected and turned in by partisans. Or that voters can be pressured by campaign workers or others in ways that are not possible when ballots are cast in secret at a polling booth.

“With a growing elderly population and insufficient absentee-ballot regulation, it may be only a short time before the public spotlight shifts from the remnants of the infamous butterfly-ballot debacle of the 2000 presidential election to the increasingly critical issue of absentee voter fraud,” she wrote in the *Elder Law Journal*, published by the University of Illinois College of Law.

In many states with large numbers of seniors, including Illinois, allegations of absentee-ballot fraud have been reported. In Chicago, for example, a man reportedly helped 35 seniors apply for absentee ballots at a senior housing center during the 2002 primary, then returned several weeks later to illegally punch their signed ballots.

Traditionally, according to Fay, absentee voting was permitted only for limited groups of people, including soldiers and other U.S. citizens stationed abroad, and for voters with disabilities that restricted their ability to come to polling stations. “Over the last 30 years, there has been a significant movement away from the traditional polling place, instead embracing the concept of ‘convenience voting,’” she wrote.

Several factors have triggered this change, most notably a concern about the low voter turnout rates in America and the belief that absentee voting was a good way to increase turnout.

Among elderly voters, the problem of campaign workers interfering with voting, especially in retirement and nursing homes, has been documented in a number of jurisdictions. Several states require election officials to oversee balloting if a certain number of absentee ballots are requested at a retirement or nursing home, but most states have no laws tailored to curb absentee-voter abuse.

Especially under the system of no-excuse absentee voting, the possibilities of coercion or other irregularities are numerous. "Once an elector has qualified to vote in absentia, or is permitted to do so based on a state enacted no-excuse absentee voting provision, he or she receives a ballot in the mail, makes his or her balloting choices, and returns the ballot to the proper authorities. But what happens while the ballot is in the hands of the voter is unknown to election officials," Fay wrote.

In 2002, Congress responded to the widespread flaws in the 2000 presidential election by requiring states to replace faulty punch-card systems. The federal Election Assistance Commission was set up to establish best practices for state and local voting systems.

The Illinois scholar calls on Congress to direct EAC to focus attention on absentee-voting procedures, with a goal of "establishing the foundation of a more uniform and effective system of absentee voting."

For example, the 2002 law requires that each state implement a "single, uniform, official, centralized, interactive computerized statewide voter registration list" that contains the name and registration information of every legally registered voter in the state.

By utilizing these databases, states could maintain accurate lists of absentee voters, thereby flagging irregularities in ballot submissions, such as unusual surges in the number of ballots cast in a particular jurisdiction.

Her article is titled, "Elderly Electors Go Postal: Ensuring Absentee Ballot Integrity for Older Voters."

Date: November 8, 2005

## **On Election Day, Obama Introduces Legislation to Prevent Election Fraud**

WASHINGTON - U.S. Senator Barack Obama (D-IL) Tuesday introduced legislation to protect Americans from using tactics that intimidate voters and prevent them from exercising their rights on Election Day.

Obama's legislation, the Deceptive Practices and Voter Intimidation Prevention Act of 2005, would make it illegal for anyone to knowingly attempt to prevent others from exercising his or her right to vote by providing deceptive information and would require the Attorney General to fully investigate these allegations. The legislation would also require the Attorney General, in conjunction with the Election Assistance Commission, to provide accurate election information when allegations of deceptive practices are confirmed.

**"One of our most sacred rights as Americans is the right to make our voice heard at the polls," said Obama. "But too often, we hear reports of mysterious phone calls and mailers arriving just days before an election that seek to mislead and threaten voters to keep them from the polls. And those who engage in these deceptive and underhanded**

011680

**campaign tactics usually target voters living in minority or low-income neighborhoods. This legislation would ensure that for the first time, these incidents are fully investigated and that those found guilty are punished."**

As recently as the 2004 Presidential election there have been reports of tactics aimed at preventing rightful voters from exercising their right to cast a ballot. In Milwaukee some voters received fliers from the non-existent "Milwaukee Black Voters League," warning that voters risk imprisonment for voting if they were ever found guilty of any offense - even a traffic violation. In one county in Ohio, some voters received false mailings claiming that anyone registered to vote by the Kerry Campaign or the NAACP would be barred from voting. Similar reports were echoed in jurisdictions across the country and underscore the need for concerted action against such tactics. But many of these incidents are never investigated, and the culprit is never discovered.

Obama's legislation would provide a criminal penalty for deceptive practices, with penalties of up to \$100,000 or one year imprisonment, or both. The legislation would also require the Attorney General to work with the Federal Communications Commission and the Election Assistance Commission to determine the feasibility of using the public broadcasting system as a means of providing voters with full and accurate Election Day information.

Obama's legislation is supported by the National Association for the Advancement of Colored People, Common Cause, the Arc of the United States, the People for the American Way, the National Disability Rights Network, United Cerebral Palsy and the Lawyers' Committee for Civil Rights Under Law.

**University of Virginia Center for Governmental Studies**  
**Before**  
**The Committee on Rules and Administration**  
**United States Senate**

**June 27, 2001**

Mr. Chairman, Members of the Committee, thank you for this opportunity to speak with you today about election reform. I would like to talk specifically about the intertwined issues of voter registration and vote fraud in the United States.

Of course, this is a subject that has received considerable attention during the months since the ballots were cast in the 2000 Presidential election.

Let me begin my remarks by stating what all of us familiar with politics already know. Fraud and corruption in the American electoral system did not start with the 2000 Presidential election. In fact, evidence of corruption spans the entire history of our Republic. One example I cited in my book, Dirty Little Secrets: The Persistence of Corruption in American Politics, is the following: "For the 1844 election, New York City had a reasonably large voter pool of 41,000, but the turnout on Election Day was far more spectacular: 55,000, or 135 percent of the entire pool of voters! As one observer put it, 'the dead filled in for the sick,' and the city's dogs and cats must have been imbued with irresistible civic spirit, too (276)."

What could be unique at this point in our nation's history is the degree to which we, as a nation, can embark on a serious discussion of how to reform the system to limit the extent of electoral fraud and corruption.

The November 2000 election can serve as the catalyst for such a debate. By all means, we should toss out antiquated voting machines that poorly count properly cast ballots. But we ought simultaneously to spend sufficient resources to reduce vote fraud in several states.

When we look at the registration system and voting process in the U. S., we have to balance two conflicting values, two equally worthy objectives:

1. The goal of full and informed participation of the electorate.

2. The integrity 1. As Election 2000 demonstrated, the problems are numerous. I draw your attention to several of the most egregious instances of fraud that were encountered last year, and in other recent elections.

Last November, as reported by The Miami Herald, the votes of a 90-year-old woman and 21-year-old man were among more than 2,000 illegal ballots cast by Florida residents who swore they were eligible to vote, but in fact were not. The woman voted absentee and in person, while the man voted despite a felony drug conviction. These 2,000 illegal ballots were discovered in just 25 of Florida's 67 counties - this in a presidential race won by only 537 ballots in Florida.

These voters cast ballots even though their names were not on precinct voter registration lists, because all they had to do was sign an affirmation swearing they were eligible to vote.

Even though they were supposed to, poll workers never checked to see if these 2,000 people were actually registered. In addition to these 2,000, there were 1,200 instances of convicted Florida felons who no longer had the right to vote, but nevertheless managed to stay on the voting rolls and cast their ballot in the last election. There is also some indication that at least a few people who maintain two residencies cast ballots in two different states, one by absentee and the other in person.

Similarly, in Wisconsin, the Milwaukee Journal Sentinel found that at least 361 felons voted illegally last November 7th, breaking the state law that disqualifies felons from voting until they are off probation and parole. Like Florida, Wisconsin was the site of a very close Bush-Gore contest.

But it doesn't stop with Florida and Wisconsin, and as I suggested, fraud didn't just appear during the 2000 Presidential election.

Just a glance at the past decade shows many examples of electoral fraud. You don't even have to look very closely to find, as I did in my book Dirty Little Secrets: The Persistence of Corruption in American Politics:

Extensive absentee ballot fraud in Alabama.

Hundreds of phony registrations in California.

Nearly 1,000 illegal votes in New Jersey including some by people who were unregistered and others who were dead.

Significant absentee ballot fraud in Philadelphia.

Votes stolen from the elderly and infirm in Texas.

And the list goes on and on.

2. Voter fraud is not limited only to these examples. My strong suspicion - based on scores of investigated and unexplored tips from political observers and interviewees over the years - is that some degree of vote fraud can be found almost everywhere, and serious outbreaks can and do occur in every region of the country.

Whether fraud is Democratic or Republican, or located in the North or the South or the West, the effect on American democracy is similar. While electoral hanky-panky affects the outcome in only a small proportion of elections (mainly in very tight races), one fraudulent ballot is one too many for the integrity of the system and the confidence that the people have in the system.

The need for reform is urgent and clear. Voter turnout in the United States is traditionally too low, and cynicism among citizens too high, to permit the malodorous malady of election fraud to continue unchecked - or to spread.

The first best step is to ensure accurate lists of registered voters. Merely replacing one type of voting machine with another does nothing to address whether the voter is legally eligible and registered.

Just as with other areas of election reform, state action, not federal mandates, is the best fix of the system. I believe states should require that a photo identification card (of any sort) should be produced by each voter at the polls.

Second, voters should be asked at the time of registration to give a number unique to them - a social security number, a driver's license number - that can be prerecorded on the voter list provided each precinct's workers.

Third, every voter should have to sign his name on the voting rolls at the polls so that the signature can be compared to the one on the registration form to see if they match up. This comparison would probably be made only in the event the results of a close election were challenged, although again, the computer technology already exists for instantaneously scrolling, side by side, the poll signature and the registration signature.

Fourth, all potential voters ought to be advised at the polls, whether orally by an elections official or by means of a printed statement of the eligibility requirements for voting and the penalties for fraudulent voting. A similar warning should be prominently featured on all absentee and early-voting/mail-in ballots. These four overlapping safeguards, if adopted by the states, are not too burdensome for voters and poll workers, but they would go a long way toward discouraging fraud at the precinct stations on Election Day.

Fifth, no early-voting/mail-in and absentee ballot should ever be separated from its cover sheet and counted until the voter's signature has been carefully checked against the registration file signatures. Every envelope containing the marked absentee or early-voting/mail-in ballot should also be signed by an adult witness whose address should also be listed.

3. Finally, Mr. Chairman let me say that these regulations, even if adopted universally and followed to the letter, will be insufficient if:

(1) registrars and elections offices are not staffed and funded adequately;

(2) state statutes do not punish fraud severely - major felonies are required, not minor misdemeanors;

(3) law enforcement authorities do not make voter fraud a priority and press for substantial legal penalties against those found violating the fraud statutes; and

(4) the news media do not begin to look for evidence of voter fraud - a probable prerequisite to their finding it. A good first step would be for every news organization to establish and publicize an "election corruption hotline."

The examples I listed earlier, and others throughout the nation make it obvious that the solutions required for voter fraud must necessarily be adapted to each locality's culture and practice. But one imperative unites all the cases: While registration and voting should be as easy as possible, the process should also be as fraud-proof as possible.

As Congress moves to address these and other election reform issues, they must recognize and respect the needs of states and localities for flexibility. No two states are exactly alike—each has unique needs and challenges. While parameters tied to federal funding will provide necessary accountability for fund usage, Congress should stop well short of nationwide mandates on voting systems.

As I noted earlier, we must maximize the full and informed participation of the electorate while still preserving the integrity of our system. One can generally observe that our zealous focus on the full, but not necessarily informed, participation of the electorate may in fact challenge the integrity of our democratic process. Increasing informed participation must be our primary goal. For this reason, my Center for Governmental Studies at the University of Virginia has launched the Youth Leadership Initiative. This program helps schools to improve civic education, and it shows middle and high school students across America the value of informed participation.

Many of you on this committee have supported this program in the past. I applaud you for doing so and encourage you to continue to support the Youth Leadership Initiative and other programs like it that drive young people into our political process.

Informed participation combats fraud both by increasing salience and scrutiny, and by diminishing the proportional impact of fraudulent votes. Clearly, we must do all we can to improve the implementation of our registration and voting procedures. I believe the measures I have discussed today would move us in the right direction. However, I believe strongly that a focus on civic education must also be a part of any serious effort to revive confidence in our democracy.

Thank you Mr. Chairman.

# Preface

---

When the Help America Vote Act (HAVA) was enacted last fall, a new era began in the history of electoral reform. The law provides sweeping guidance to the states on how to overhaul their voting systems and provides new funding for reform measures. Unfortunately, this major step forward has been shadowed by bitter partisan divisions over how best to prevent election fraud. As finally enacted, the new election law contains requirements for verifying the identity of voters that many critics worry will create obstacles to full voter participation.

As the states begin to implement HAVA, and as they consider other important electoral reforms such as election day registration, many claims and counterclaims are being heard about the problem of election fraud. In the absence of strong empirical research, anecdotal stories too often drive these debates. This report represents an important contribution to our understanding of the problem of election fraud. Based on an extensive research effort, it is the most in-depth examination of election fraud issues to date. The research, led by Barnard College professor Lori Minnite, used several approaches to analyzing the incidence of election fraud nationwide, as well as in a handful of major states. The report also examines claims about whether various electoral reforms—such as the National Voter Registration Act, mail-in voting, and election day registration—have led to increased fraud.

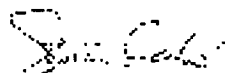

The overall conclusion of the report is that the incidence of election fraud in the United States is low and that fraud has had a minimal impact on electoral outcomes. The report also finds that the important electoral reforms of recent years have not led to increased election fraud and, in some cases, have helped reduce the potential for fraud. More generally, the report observes that the conditions that have historically led to election fraud have been on the decline for many years. Technological improvements in voting technology, stronger enforcement efforts, and changes in election administration can further reduce the likelihood of fraud.

Based upon these research findings, we strongly believe that the states should work to make registering and voting as accessible as possible to all Americans and can feel confident in doing so without increasing the chances of fraud. Dēmos is proud to be part of an energetic national network of reform groups that are seeking to maximize electoral participation.

We hope that public officials, reform advocates, and others will find this report to be a useful resource. Please do not hesitate to contact Dēmos for further information or assistance.

# Executive Summary

---

Election fraud is a hotly contested topic in public debates about electoral reform. Debates over election fraud are not new. They have been a staple part of discussions about elections and democracy in the United States for more than a century. But in recent years, issues of fraud and voting integrity have increasingly come to the forefront of public policy discussions over the health of America's democracy.

Since the 2000 election, a historic effort has been underway to strengthen voting systems across the 50 U.S. states and also to address obstacles to broader electoral participation. However, at both the federal and state level, efforts to move forward a reform agenda have frequently been complicated by heated debates over issues of election fraud and the integrity of voting systems.

In Congress, disagreement over voter identification provisions in federal election reform legislation resulted in an acrimonious legislative process that delayed passage of the Help America Vote Act.

The 2002 election further underscored the salience of the issue in U.S. electoral politics. With control of the U.S. Senate hanging on the outcome of at least eight Senate races too close to call, the integrity of all ballots was viewed as a matter of grave importance. Allegations of fraudulent registration and balloting, as well as voter intimidation, were made in a number of states.

Opponents of efforts to make voting easier and more accessible often cite the potential for election fraud as a reason to oppose reforms, such as election day registration, aimed at addressing one of the most challenging issues facing our electoral system: low voter turnout.

As federal and state officials consider future reform efforts, as well as the merits of existing reforms, and begin implementing the new Help America Vote Act, there is an acute need for better information and analysis about election fraud issues.

Yet to date *there have been no major studies of election fraud in the United States*. Too often, hearsay and anecdotal stories are put forth as fact during critical policy deliberations. This research report provides a new foundation of information and analysis to inform public discussions about the integrity of America's electoral system.

011694

## Approach

Election fraud is defined in this report as the corruption of the process by which votes are cast and counted. Fraud may involve wrongdoing by either individual voters or, as is more commonly the case, by organized groups such as campaigns or political parties. This report examines both kinds of fraud. Drawing on a wide range of sources, we address the following questions: How often does election fraud occur? How serious a problem is fraud, compared

to other problems with the election process, such as those that occurred in Florida in the 2000 election? What kinds of voting methods are most vulnerable to corruption? What administrative, technological, and legal steps can be taken to reduce the chances of election fraud while also expanding the opportunities to register and vote?

## Central Findings

Available evidence suggests that the incidence of election fraud is minimal across the 50 U.S. states and rarely affects election outcomes.

- Election officials generally do a very good job of protecting against fraud in the system and ensuring that election outcomes fairly reflect the intentions of voters.
- Conditions that give rise to election fraud have steadily declined over the last century as a result of weakened political parties, strengthened election administration, and improved voting technology.
- There is little available evidence that election reforms such as the National Voter Registration Act, election day registration, and mail-in voting have resulted in increases in election fraud.

- The disenfranchisement of voters through antiquated voting systems, system error, and improper management of registration databases, as occurred in Florida in the 2000 election, is a far bigger problem than traditional forms of election fraud.

Efforts to make it easier to register and vote are compatible with the prevention of election fraud. Fears of election fraud should not inhibit electoral reform efforts aimed at addressing the problem of low voter participation.

- States can reduce the potential for fraud by integrating and computerizing state voter registration records, as mandated by the new federal election law, the Help America Vote Act. These same reforms also reduce problems at the polls and make registration and voting easier.
- Reduced partisanship among election officials decreases the chances of fraud and also helps create more professionalized election administration.
- Election day registration (EDR), which has been proven to increase voter participation, also reduces the possibility for fraud as more registrations are handled by election officials.
- Vigorous signature-matching procedures can prevent fraud under mail-in voting election systems.

Best practices in select states show how to prevent fraud while keeping voting accessible.

- Ten states have very effective unified, computerized statewide records that are checked against other records, such as state death records and the National Change of Address database. Under the Help America Vote Act, all states must now develop similar registration databases, which will go a long way toward preventing opportunities to commit fraud.
- A number of states have voter identification requirements that allow a wide range of voter I.D., which can be used when implementing HAVA's I.D. requirements for certain first-time voters.
- A few states have made strides toward reducing partisan control of elections by having bipartisan state elections boards oversee elections. An even better practice would be the adoption of nonpartisan state elections boards.

## Policy Recommendations

- **Upgrade technology in the states.** The new Help America Vote Act, which mandates the creation of state-wide computerized registration systems and also provides states with money to upgrade voting machines, should be fully funded and effectively implemented in a uniform and nondiscriminatory manner. It is especially important that new state-of-the-art registration systems allow for interagency networking (for prompt and proper transmittal of registration information under NVRA) and local polling place access to systems (through laptops or other means).
- **Implement I.D. requirements that do not burden voters.** The new federal election law puts undue burdens on voters to prove their identity at the polls. The law should be modified to expand the list of acceptable identifying documents and to allow state or local officials discretion to incorporate or expand forms of identification currently in use. State officials should ensure the equal and non-discriminatory application of requirements.
- **Reduce partisan control of elections.** Important election administration positions should only be filled by nonpartisan professionals. Regular training and exchanges with elections administrators from other jurisdictions can increase officials' commitment to the professional administration of the democratic process itself, as opposed to party loyalty.
- **Strengthen enforcement.** The federal and state criminal penalties for election fraud are significant and serve as a powerful deterrent against fraud. All states should ensure adequate funding and authority for offices responsible for detecting and prosecuting fraud. In addition, all states should track allegations of election fraud, as well as the outcomes of criminal investigations, and make this data available to the public.
- **Establish election day registration (EDR).** EDR usually requires voter identification and authorization in person before a trained election worker, which reduces the opportunity for registration error or fraud.

# I. Election Fraud in the United States

---

## An Overview

Since the 2000 election, a historic effort has been underway to strengthen voting systems across the 50 U.S. states and to address obstacles to broader electoral participation. At both the federal and state level, however, efforts to move forward a reform agenda have frequently been complicated by heated debates over issues of election fraud and the integrity of voting systems. In Congress, disagreement over voter identification provisions in federal election reform legislation resulted in an acrimonious legislative process that delayed passage of the Help America Vote Act. Similarly emotional debates over I.D. provisions have occurred in the states, and these debates are likely to heat up as state governments begin work to implement the new federal election law.

The 2002 election further underscored the salience of the issue in U.S. electoral politics. With control of the U.S. Senate hanging on the outcome of at least eight Senate races that were too close to call, the integrity of all ballots was viewed as a matter of grave importance. In the wake of the election, fraudulent registrations and absentee balloting were alleged to have occurred in a hotly contested Senate race in South Dakota<sup>1</sup> and elsewhere. Allegations of voter intimidation were made in Arkansas and other states. Meanwhile, the specter of fraud played a major role in the defeat of ballot initiatives in California and Colorado that would have enacted election day registration into law, with opponents of the initiatives arguing that election day registration would increase the potential for fraud.<sup>2</sup>

Debates over election fraud are not new. They have been a staple of discussions about elections and democracy in the United States for more than a century. But in recent years, issues of fraud and voting integrity have increasingly come to the forefront of public policy discussions over the health of America's democracy. Even before the 2000 election, consistently low voter turnout rates and obstacles to participation motivated various efforts to increase voter registration and turnout—efforts that in turn raised questions about voting integrity. Critics of reforms—such as the institution of mail-in voting in Oregon, the loosening of guidelines for absentee ballot use, and, most notably, the National Voter Registration Act of 1993 (the “motor voter” act)—have charged that

011698

## While the issue of fraud is raised continually in discussions of election reform, to date there have been no major studies of election fraud in the United States.

these reforms increase the chances of voter fraud. Other frequently proposed reforms, such as election day registration, have been criticized on the same grounds.

As federal and state officials consider future reform efforts, as well as the merits of existing reforms, and begin implementing the new Help America Vote Act, there is an acute need for better information and analysis about election fraud issues. While the issue of fraud is raised continually in discussions of election reform, to date *there have been no major studies of election fraud in the United States*. Too often in this area, hearsay and anecdotal information are put forth as fact in important public policy debates. Many key questions about fraud remain unanswered, including: How often does election fraud occur? How serious a problem is fraud compared with other problems with the election process, such as those that occurred in Florida in the 2000 election? What kinds of voting methods are most vulnerable to corruption? What administrative, technological, and legal steps can be taken to reduce the chances of election fraud while also expanding opportunities to register and vote? This report seeks to provide some initial answers to these and other vital questions.

### What Is Fraud and Why Does It Matter?

Elections are the mechanisms by which people choose their representatives. Given that the integrity of this process is central to American democracy, there can be no compromise on the need for fair elections determined without the taint of fraud—whether on the part of voters, political parties, election administrators, or others.

A general definition of election fraud is the corruption of the process of casting and counting votes. Fraud may involve wrongdoing by either individual voters or, as is more often the case, by organized groups such as campaigns or political parties. This report focuses on fraud as it has traditionally been defined, and specifically on two common forms of fraud:

**Individual Fraud.** Voting in America is a two-stage process. In nearly all states, an eligible citizen who wants to vote must first register using his or her permanent home address. After successfully completing a voter registration application, the voter goes to the polls—or, in Oregon, receives voting materials through the mail—and casts his or her ballot. Voters may violate laws governing the registration process by misrepresenting themselves as eligible when they are not, or submit-

ting registration applications for fictitious people, dead people, or real people who can be ineligible or eligible to vote and who may or may not know of or consent to the fraud. Second, voters may commit fraud at the point of voting. A voter may vote multiple times using the name or names of another voter. In the case of a vote cast using the name of a real person, that person may or may not be eligible to vote and may or may not consent to the fraud. Voters consenting to the appropriation of their vote by another may do so because they do not plan to vote, have little interest in voting, or receive some kind of material benefit—a practice called vote buying.

**Organized Fraud.** Fraud is easier for organized groups to commit than it is for individual voters because such groups have resources and/or direct access to election machinery. In all but the most extraordinary of cases—for instance, when an election victory depends on a handful of votes—fraud must be committed through a conspiracy to have an impact on the outcome of an election. Existing systems for registration and voting provide considerable opportunity for organized fraud. Such fraud can take several forms. First, political parties, campaign organizations, or other groups can perpetrate organized fraud through filling out fraudulent absentee or mail-in ballots. Second, local election administrators or poll workers can commit clear-cut fraud by not counting or destroying ballots, allowing votes that should have been barred, and tampering with ballots. Third, interested groups can organize large-scale vote buying—for example, providing incentives for otherwise uninterested voters to go to the polls and vote in a certain way—or coordinate efforts to help large numbers of voters vote more than once.

Beyond these traditional conceptions of fraud, many people are concerned about official efforts to corrupt the election process or erect barriers to participation. For example, election officials can deliberately corrupt the election process by manipulating registration databases to remove the names of people likely to vote in a certain way so that these people are unable to cast ballots when they arrive at polling places. Corruption of this kind was widely alleged to have taken place in Florida and other states during the 2000 election. Deliberate disenfranchisement of voters may also occur because of other kinds of official misconduct: turning away voters already in line when polls close; intimidating or misinforming voters when they arrive the polls; producing misleading or poorly designed ballots; failing to provide bilingual

voting materials, as required by law; failing to upgrade or repair antiquated voting systems in specific election districts; and by other means.

Overall, the disenfranchisement of voters through antiquated voting systems, errors, mismanagement of registration bases, and intimidation or harassment is a far bigger problem today than traditional forms of election fraud. The problems in Florida in 2000, which determined the outcome of a presidential election, are dramatic evidence of this

point. These problems have been analyzed and highlighted in a number of studies and reports over the past two years.<sup>3</sup> Civil rights advocates have been particularly active in challenging official forms of election malfeasance as violating various provisions of the Voting Rights Act. This report does not focus on these issues. Rather, it looks exclusively at election fraud as the problem has commonly been discussed over the past century.

## Research Methodology

The administration of elections for all public offices in the United States, from county dogcatcher to the U.S. presidency, is controlled by state and local election officials. This makes election procedures radically different from state to state and, in many places, from county to county. Given this diffused reality, it is difficult to assess the overall integrity of U.S. election systems. While no other aspect of American politics has received as much scrutiny over the last fifty years as the behavior of the American electorate, the one area in this vast field of inquiry that has received very little attention by

scholars is election fraud. Remarkably, there are no definitive academic studies of election fraud in the contemporary period, nor are there studies of fraud by government agencies concerned with the administration of elections in this country.

The difficulty of gathering data on fraud explains much of this vacuum in analysis. Like many of the rules governing American elections, the rules dealing with election fraud and the state and local agencies assigned the responsibility of handling fraud claims vary widely from state to state and, in some cases, from locality to locality. In many states the secretary of state is the chief elections officer, and his or her office is the state office primarily responsible for maintaining election records and receiving complaints of fraud. In other states, complaints of election fraud are first received and investigated by the state attorney general. In still other states, neither the secretary of state nor the attorney general maintains voting and elections records or handles any matters related to fraud at all. Instead, those responsibilities are assigned to a state board of elections or other elections agency. Since so few fraud claims evidence criminal intent, law enforcement agencies are only occasionally involved in prosecuting cases. Finally, a number of states, especially those lacking a centralized voter registration or elections management system, allocate the responsibility for receiving and investigating complaints of election fraud to local or county boards of elections or district attorneys, with little to no responsibility or accountability vested in any state agency.

While the analysis of this report is limited by the lack of comprehensive and accessible statistical data on election fraud, the authors were able to develop an in-depth analysis of election fraud in the United States today by drawing on a wide range of sources.

- First, we conducted an analysis of the incidence of election fraud from 1992 to 2002 in 12 states that collectively represent about half of the electorate and are drawn from all of the major regions of the country. These states include: Alabama, California, Florida, Georgia, Illinois, Minnesota, Mississippi, New York, Oregon, Pennsylvania, Texas, and Wisconsin. For each of these states, we conducted Lexis-Nexis searches of news databases, as well as the statutory and case law for evidence of a record of prosecution of voter fraud. We also contacted selected state officials, including attorneys general and secretaries of state.

## Overall, the disenfranchisement of voters through errors, antiquated voting systems, and mismanagement of registration databases is a far bigger problem today than traditional forms of election fraud.

---

- Second, we conducted a complete Nexis search on voter fraud throughout the United States since the 2000 election, supplemented by searches related to several high-profile cases of election fraud that occurred before 2000. The search produced close to 2,000 references, each of which was thoroughly examined.
- Third, we surveyed the academic literature, a wide variety of government documents, congressional testimony and research reports, law journal articles, and other sources on election reform from professional, research, and reform organizations.
- Fourth, we analyzed in considerable depth some of the highest-profile cases of real or alleged fraud in the United States over the past decade, including notable cases in Missouri, California, and Florida.
- Fifth, we conducted an extensive analysis of fraud issues that surround particular voting methods or reforms, such as the NVRA, election day registration, and absentee balloting. Drawing on state and federal reports, as well as news and legal databases, we evaluated the charges often made about fraud and these reforms.
- Finally, we examined “best practices” in the states aimed at balancing fraud prevention with increased opportunities for voting.

### A Framework for Understanding Fraud

While heated debates over election fraud have been going on for more than a century, the circumstances that surround voting and elections have changed dramatically over time and continue to evolve rapidly today. Elections remain as contested as ever, but the conditions conducive to election fraud have steadily declined. This trend is likely to continue in the foreseeable future. Three factors account for this change: declining political parties and machines, strengthened election administration, and improved voting technology. While some level of fraud, as traditionally defined, is likely to exist within any electoral system, current trends suggest that it is more possible than ever to further open

the process and facilitate voting without bringing about greater fraud. Exaggerated fears of fraud should not stand as an obstacle to reforms aimed at expanding participation.

**Declining Political Parties.** Historically, local political parties have played an important role in perpetrating election fraud. During the late 19th century and well into the 20th century, a key motive for fraud was the immense local patronage benefits afforded to winning parties. Under these conditions, parties, patronage, and fraud were intertwined. Election fraud was perpetrated by partisans acting together to steal elections. Local party organizations competed for voters and controlled votes through patronage. When elections were fully controlled by local party organizations, ballots were easily destroyed, miscounted, or falsely multiplied, and voters could be strongly influenced by bosses or local elites to vote in specific ways. Typically, cases of election fraud involved organized efforts by partisan election officials, party leaders, and politicians rather than by the voters themselves.<sup>4</sup> Today, local party organizations are relatively weak to nonexistent, in part because their access to patronage has all but disappeared. They no longer control lucrative franchises, run police and fire departments, set utility rates, or build large-scale public works. However, in many states key election officials are openly partisan and may also play an active role in partisan political campaigns, a conflict of interest that increases the potential for fraud.

**Strengthened Election Administration.** At the same time that political parties have weakened, modern election administration has become more sophisticated and fraud has become more difficult. The reforms put in place in the late 19th century and early 20th century required voters to register in advance of elections and election authorities to keep registration records. While some of these reforms reduced the opportunities for fraud, they also had a negative impact on democratic participation, making voting especially more difficult for poor and working-class people.<sup>5</sup> The NVRA, as well as the advent of election day registration in six states, has helped to reduce the obstacles to voting that accompanied voter registration requirements. In the wake of the 2000 election, considerable attention has been focused on ways to improve election administration to strengthen the integrity of the election process; a number of reform mea-

asures have already been passed in the states. Particular attention has been given to the need to create statewide computerization registration systems in all states, as now required by the Help America Vote Act. As further reforms are enacted, facilitated by new federal monies, election administration will continue to be strengthened as a bulwark against fraud. (See Section IV.)

**Improved Voting Technology.** Steadily improving voting technology has also served to reduce opportunities for election fraud, a trend that is likely to accelerate in the near future. Despite the many problems with voting systems that were spotlighted by the 2000 election, U.S. voting systems as a whole are substantially more reliable and ensure higher levels of voting integrity than was the case even a few decades ago. Since the 2000 election, a number of states have already moved to implement major technology upgrades in voting technology. Additional upgrades will certainly occur as federal funds for such improvements flow to the states as a result of the Help America Vote Act.

**Fewer Trade-Offs: Easier Balloting, Secure Balloting.** Some level of fraud has always been seen as inevitable and acceptable in the U.S. electoral system. In historical terms, there is less and less opportunity to commit fraud today in ways likely to decide elections. This makes it more possible than ever to facilitate voting without trading off the goal of secure elections. As this report shows, steps taken in the past decade to open the process have not resulted in increased fraud.

## Election Fraud Today

Based on the research and analysis for this report, we offer several conclusions about election fraud in America today:

- Election fraud appears to be very rare in the 12 states examined. Legal and news records turned up little evidence of significant fraud in these states or any indication that fraud is more than a minor problem. Interviews with state officials further confirmed this impression. An authoritative study undertaken in the largest U.S. state, California, by CalTech professor R. Michael Alvarez found little incidence of fraud during the period 1994–2001.<sup>6</sup>

- Notable election reforms of the past decade—such as the NVRA, more permissive absentee balloting rules, all mail-in voting in Oregon, and the enactment of election day registration in three new states—do not appear to have resulted in any significant increase in voter fraud. (See Section III.)
- Analysis of several cases of election fraud that have received significant attention in recent years suggests that some of the most notable allegations of fraud have proved to be baseless. (See Appendix.) While the 1997 primary mayoral election in Miami, Florida, was the most egregious fraud case in recent history, there are other noted cases where charges of significant vote fraud have been disproved, such as the 1996 Dornan/Sanchez contest for the House of Representatives in Orange County, California. There are yet other cases, such as the 2000 election in St. Louis, Missouri, in which politicians have made great hay, but charges of widespread fraud have not been substantiated.

The low level of election fraud in the United States today does not preclude the need for continued vigilance to ensure the integrity of election systems. But it does suggest that reforms aimed at simplifying registration and voting can be implemented without risking a significant corrupting of elections by fraud. Even if only partly implemented, the many technological and administrative reforms recommended by national and state commissions since the 2000 election, as well as other best practices discussed in this report, can go a long way toward enhancing election integrity. (See Section IV.) These same reforms can facilitate programs, such as election day registration, that are intended to make voting easier.

011702

## II. Election Fraud and the Law

---

The opportunity to commit election fraud is constrained by a matrix of state and federal laws. Election fraud is a serious crime that can be prosecuted at the federal and state levels, where penalties carry fines, lengthy prison terms, and, in the case of illegal voting by non-citizens, deportation.<sup>7</sup> However, the effectiveness of laws depends on their enforcement and implementation.

### State Laws and Enforcement

The Constitution grants states broad jurisdiction over the elective process, though the authority of the states in these matters is not absolute.<sup>8</sup> The Fifteenth, Nineteenth, and Twenty-sixth Amendments prohibit states from restricting the franchise based on race or color, gender, or minimum age (18 years) of the voter, respectively. The Supreme Court has found that Congress is within its constitutional authority to pass laws governing the timing of federal elections, voter registration, access to the ballot for the elderly and disabled, and, perhaps most important, in the area of prohibitions against racially discriminatory voting practices.<sup>9</sup> However, within this framework, the states are granted wide powers to qualify voters and establish rules for conducting federal, state and local elections.

Within this framework for regulating the electoral process, the states have exhibited a full flowering of differences in the manner in which they administer elections. State election laws governing voting vary in their level of specificity, with many states granting localities considerable discretion in the way they run elections. For example, Oklahoma has standard election day procedures and a single voter registration and election management system, and it uses only one type of voting machine. In contrast, before a recent reform law was enacted, Pennsylvania's election law provided few statewide guidelines and near-autonomy to the state's 67 counties in the matter of election day procedures. Pennsylvania had 67 different election systems using a variety of voting machines.<sup>10</sup>

011704

## On election day in South Dakota, where the biggest story of alleged voter fraud in the 2002 election cycle took place, the statewide phone number set up by federal officials to report any voting irregularities received only one call.

---

Federalism, and the authority over election procedures granted to states, also explains why laws criminalizing fraud differ across the states. All states have laws governing election crime. However, because of the historically parochial manner in which states administer elections, there is wide variability in how they handle the problem of criminal election fraud. All states prohibit voting by noncitizens (although some localities permit such voting in local elections); most states have various restrictions that bar voting by individuals convicted of felonies,<sup>11</sup> as well those who have been ruled mentally incompetent by a court. Most states have prohibitions against falsifying voter registration information, voting more than once in an election, impersonating another voter, intimidating or coercing voters, and bribing voters or buying votes. Most of these crimes are classified as felonies and carry fines and prison sentences. In some states, a person convicted of voter fraud can permanently lose his or her right to vote.

State election laws allocate the responsibility for ensuring fair elections to various agencies and officials, and it is their responsibility to administer and monitor the electoral process to ensure that it is free of corruption. Local election and law enforcement officials also play a role in enforcing election laws, although the familiarity of these officials with the ins and outs of election laws and the lines of enforcement authority varies considerably within states. While it is incumbent upon government officials to bring criminal charges where appropriate, all states also empower private citizens and organizations to bring civil suits to contest election results.<sup>12</sup> Likewise, the NVRA provides a private right of action to any person aggrieved by a violation of the Act.<sup>13</sup>

### Federal Laws and Enforcement

Despite state jurisdiction over election administration, there is a role for the federal government in prosecuting voter fraud when federal interests are at stake.

Historically, the federal role has extended to ensuring elections that are free of corruption and in eliminating discrimination against minority voters protected by the Voting Rights Act of 1965, as amended. The enforcement of the Voting Rights Act concerns civil offenses and is handled by

the Justice Department's Civil Division. Election-related crimes are handled by the Public Integrity Section of the Justice Department's Criminal Division. A manual for federal prosecutors of election crimes defines election fraud as "conduct that corrupts the process by which ballots are obtained, marked, or tabulated; the process by which election results are canvassed and certified; or the process by which voters are registered."<sup>14</sup>

Federal election law is an amalgamation of statutes. Some of them expressly apply to elections and voting, and others, such as statutes prohibiting mail fraud, have been used to prevent and punish voter fraud. Most federal statutes apply only to federal or mixed federal/state and local elections. In order for election crime to rise to the level of federal prosecution, "there must be some *substantive* irregularity in the voting act ... which has the potential to taint the election itself."<sup>15</sup> The Supreme Court has found a constitutionally guaranteed right to vote and Congress has passed legislation to protect this most fundamental of all rights. There remains debate, however, over whether or not the Constitution guarantees a right to vote in purely state and local contests—here the judicial record is inconsistent. Federal prosecutors, therefore, avoid investigating fraud allegedly committed in these elections.

Federal election law can be divided into two categories: *anti-intimidation* laws and *anti-trafficking* laws. Anti-intimidation laws make it a felony to conspire to "injure, oppress, threaten, or intimidate any inhabitant of any State, Territory, or District in the free exercise or enjoyment of any right or privilege secured to him by the Constitution or laws of the United States or because of his having exercised the same."<sup>16</sup> They also provide for criminal punishment of anyone who deprives another of federally secured rights to vote. Anti-trafficking laws, on the other hand, restrict a citizen's right to vote by prohibiting the offering, making, soliciting, or receiving of payments in return for voting or withholding a vote. Penalties include a fine of up to \$10,000 and five years imprisonment. The Justice Department, as a matter of practice, does not prosecute voters whose only involvement in voter fraud is in compromising their votes, nor does it prosecute isolated instances of vote buying, because "isolated incidents do not implicate federal interests sufficiently" to warrant federal interference in what is traditionally a state

function. It appears that the majority of vote buying schemes that are prosecuted involve small amounts of money and occur in low-income neighborhoods.<sup>17</sup>

On October 1, 2002, U.S. Attorney General John Ashcroft announced the Voting Access and Integrity Initiative, aimed at enhancing the Department of Justice’s “ability to deter discrimination and election fraud, and ... to prosecute violators vigorously whenever and wherever these offenses occur.”<sup>18</sup> The initiative

involved the creation of task forces of district election officers, assistant U.S. attorneys appointed by each of the U.S. Attorneys to serve in this new capacity for the 2002–2004 period, and FBI officials whose job it is was to coordinate “on-the-ground investigative and prosecutorial coordination” with state and local elections and law enforcement personnel to “deter and detect discrimination, prevent elec-

toral corruption, and bring violators to justice.”<sup>19</sup> Federal monitoring of elections has been around since the Reconstruction period, but most often it has been directed toward protecting the voting rights of minority groups at the polls. What is significant about the Justice Department’s involvement in the recent midterm elections is the linking of voting rights with protection from corruption of the electoral process by voter fraud, reflecting a new view that voter fraud deserves the same level of scrutiny from federal law enforcement officials historically required to guard against racial discrimination in voting. During the month of October 2002, the district election officers opened 16 cases into allegations of voter fraud.<sup>20</sup> Federal officials do not comment on the status of open investigations, but it is of interest to note that on election day in South Dakota, where the biggest story of alleged voter fraud in the 2002 election cycle took place, the statewide phone number set up by federal officials to report any voting irregularities received only one call.<sup>21</sup>

# III. The Impact of Election Reforms on Voting Integrity

---

Proposals for election reform aimed at broadening participation have historically generated widespread concerns about increased fraud. In this section, we analyze issues of fraud in relation to three major reforms: the National Voter Registration Act, voting by mail, and election day registration. Examining available evidence, including federal and state studies, we discuss how these reforms have affected opportunities to commit election fraud.

## National Voter Registration Act of 1993

The NVRA, also known as the “motor voter” law, established national standards governing voter registration and voter roll purging. The law simplified voter registration by permitting mail-in registration; by increasing the locations where voters could register to include driver’s license offices, military recruiting offices, and welfare and other public agencies; and by requiring these agencies to send registration cards to county registrars. It also established safeguards for voters who move within their jurisdiction.

The NVRA has shifted some of the burden of expanding voter registration from voters to states and localities by requiring states and localities to comply with new voter list purging and reporting standards. As such, the act has presented challenges for keeping voter rolls up-to-date. Prior to the NVRA, states and localities established their own standards for purging voter files, and some removed voters from voting rolls for failure to vote. NVRA requires states to keep voter rolls up-to-date, but restricts their ability to purge voters, permitting purges only upon a voter’s request, death, felony conviction, mental incompetence, or upon relocation, provided the voter verifies the address change in writing.<sup>22</sup>

Despite a slow start, the NVRA is proving very successful in meeting its purpose of increasing the number of eligible citizens who register to vote in federal elections. Registration rolls have grown nationally by nearly 30 percent since its passage. Project Vote recently estimated that NVRA is responsible for more than 70 million new voter

## In their responses to the most recent FEC inquiries about the NVRA, no states raised the issue of voter fraud among their implementation problems.

---

registrations.<sup>23</sup> Along with this increase in access to the franchise, however, has come the argument that greater access inevitably leads to more voter fraud. For example, Senator Christopher S. “Kit” Bond (R-Mo.) charged in a *Washington Post* opinion piece that the NVRA “not only caused sloppy voter rolls, it actually facilitated organized vote fraud” in the 2000 election in Missouri.<sup>24</sup> John Samples, the director of the Center for Responsive Government at the conservative Cato Institute, recently testified before the Senate Rules and Administration Committee that the NVRA has encouraged lax registration requirements (through the use of mail-in registration forms) that “have left the voter rolls in a shambles in many states,” breeding mistrust in the electoral process and “foment[ing] ‘the appearance of corruption,’ that has, fairly or not, done real damage to American government.” Because the NVRA “has made it difficult if not impossible to maintain clean registration rolls,” Samples said, the NVRA deserves the blame for part of the decline in trust in government observed by political scientists over the past four decades.<sup>25</sup> *The Wall Street Journal* wrote no fewer than four editorials in 2001 claiming voter fraud is out of control and lambasting the NVRA.<sup>26</sup>

One way that the NVRA has increased access to voter registration has been by increasing the number of physical sites where citizens may submit voter registration forms to include motor vehicle agencies and state agencies administering services to the indigent, elderly, and disabled. The NVRA also requires state officials at these sites to inform clients about voter registration opportunities. People who visit motor vehicle agencies, welfare offices, and the like more than once therefore have the opportunity to register to vote multiple times. Moreover, multiple registrations can occur if a registrant submits updated information using a new application form. Local election officials must spend time and resources verifying new registration applications for duplication. In fact, a recent GAO report on election administration found that 99 percent of voting jurisdictions nationwide checked for multiple registrations.<sup>27</sup> On the other hand, other election officials told the GAO they supported the motor vehicle authorities’ policy of encouraging citizens to reapply if they had any reason to believe they might not be registered.

Critics of the NVRA’s restrictions on list purges (and the costs now associated with purging) point to the considerable amount of “deadwood,” or ineligible voters, on voting rolls. Deadwood is presumed to be fodder for voter fraud—names of voters no longer living in a jurisdiction, dead, or otherwise ineligible to vote but available for identity theft by those who would commit fraud by voting in their name. Indeed, as the states have come into compliance with the NVRA’s list maintenance and anti-purging requirements, the number of “inactive” registrants has significantly increased, from 1.7 million in 1994 to more than 18 million in 2000, or 11 percent of the total number of registered voters.<sup>28</sup>

The NVRA permits the maintenance of inactive lists, or lists of voters who have failed to respond to an address verification notice sent by the voter registrar confirming a change of address. Inactive lists represent the churning of voter records that results from combining a voter registration system tied to territorially based eligibility criteria with high voter mobility.<sup>29</sup> Voters do not stay on inactive lists indefinitely; they may be deleted from inactive lists after failing to vote in two successive federal elections. In fact, many of the names of inactive voters on the current rolls will be deleted from the lists after the 2002 election.<sup>30</sup> “Inactive” voters, therefore, may be left on such lists for as little as two and a half years before they are purged entirely from the rolls. Contrary to popular opinion, this represents a *decrease* in the length of time a voter can remain inactive before being deleted entirely from the rolls in about half of the 40 states that utilized the purge for failure to vote prior to the enactment of the NVRA.<sup>31</sup> Moreover, the new requirements permit deletions from the rolls in eight states that did not purge for nonvoting before implementing the NVRA.<sup>32</sup> In the 1999–2000 cycle, five of those states purged 1,888,795 names from their new inactive lists—names that could have remained on state and local voter registries prior to 1993.<sup>33</sup> They removed an additional 719,761 voters from their active lists. In sum, the NVRA is responsible for significantly tightening up, not loosening, list maintenance requirements for deadwood in many states.

Another problem with the argument that an increase in the number of inactive registered voters opens the door to voter fraud is a misunderstanding of how states and localities manage those lists on election day. Only about half the states covered by the NVRA even allow inactive voters to vote on election day. When inactive voters are permitted to vote, it is

usually by affidavit or through the use of some form of provisional ballot subject to further verification of such voters' qualifications, which by no means guarantees a provisional vote will be counted. A number of high profile cases of voter fraud involving the manipulation of "deadwood" voter registration records, mostly through absentee ballot fraud, have given critics' arguments some weight. But mismanagement of voter registration lists involving the erroneous removal of voters from active lists used at the polls is a more significant problem. It emerged in the 2000 presidential election and was compounded by the failure of election officials to provide opportunities for those voters to vote, as mandated by the NVRA's fail-safe provisions.<sup>34</sup> (Under the new federal election law, all states must provide voters with the opportunity to cast provisional ballots.)

In its most recent report to Congress on the impact of the NVRA on election administration in federal elections, the Federal Elections Commission noted an increasing effort by the states to maintain accurate voter registration lists. While the NVRA permits states latitude in designing list maintenance programs that reflect local conditions and needs, most of the 12 states reporting improvements in list maintenance managed these improvements through upgraded statewide computer information systems. Improvements also came about through enhanced networking between localities supervising the registration process and state agencies generating records related to voter list management—for example, death and criminal conviction records. A number of states are leading the way in the use of computer technology to clean the voter registration lists. Oklahoma now requires voters to provide the last four digits of their social security number to help identify duplicate registrations, and North Carolina has introduced a barcode-scanning technology that automatically assigns voter status based on returned mail.

A number of states initially resisted the implementation of the NVRA by challenging the legislation's constitution-

ality and raising concerns about voter fraud. None of the federal courts hearing the challenges found the evidence of fraud convincing or the concerns legitimate.<sup>35</sup> Today, states reporting problems in maintaining accurate voter registration lists complain mostly about the high cost of complying with mailings under state implementation of the NVRA. In their responses to the most recent FEC inquiries about the NVRA, no states raised the issue of voter fraud among their implementation problems.

Properly implemented and adequately funded, the NVRA helps guard against the possibility of voter fraud. The NVRA requires the states to clean their voter registration rolls by deleting voters who have moved out of the jurisdiction or have died. It requires voters to sign their names attesting to their eligibility to vote under penalty of perjury, and deportation for noncitizens. The NVRA does not prohibit states from requiring mail-in registrants to vote in person the first time they vote, nor does it prohibit states from checking individuals' identification prior to registration, as some critics of the NVRA have alleged.<sup>36</sup> Finally, the NVRA strengthens enforcement provisions against fraud.<sup>37</sup>

## Voting By Mail

Mail-in voting is proving to be an increasingly popular method of voting in the United States. As a proportion of total votes cast, the use of mail-in or absentee ballots doubled between 1970 and 1990, and then doubled again over the last decade, so that fully 14 percent of all ballots cast nationwide in 2000 were cast by absentee ballot.<sup>38</sup> This represents an increase of approximately 4.2 million absentee votes cast over the previous presidential election. This increase in mail-in voting has led to concerns about the opportunities that exist for election fraud under such arrangements. Significant fraud in the 1997 Miami mayoral race—perpetrated using absentee ballots—helped to amplify these concerns.

All states and the District of Columbia permit mail-in absentee voting but differ on the rules that qualify registered voters to vote absentee.<sup>39</sup> With the exception of Maine and Wisconsin, all of the states in the midwestern, southern, and eastern half of the country require voters to provide a reason or excuse for why they cannot vote in person on election day. All the rest of the states, save Texas, Utah, and South Dakota, allow for no-excuse absentee voting. Where,

## As a proportion of total votes cast, the use of mail-in or absentee ballots doubled between 1970 and 1990, and then doubled again over the last decade.

when, and how registered voters apply for absentee ballots differ across the states, with the eastern and southern states generally more restrictive in their rules.

The states also differ widely in the manner in which they process absentee ballot applications, such as in deadlines for filing applications. And they differ in the level of assistance provided by election officials to absentee applicants. Differences also exist across states in the manner in which incomplete, illegible or confusing applications are reviewed and handled. Some states aggressively pursue clarification in order to qualify the application, and others fail even to notify applicants when there are problems with their forms. A number of states, such as Oklahoma and Texas, require that absentee ballots only be returned by mail; others, such as New York, allow the voter to return the ballot in person. Still other states, such as California, Michigan, and Illinois, allow a family member to return another's absentee ballot on election day or, in California's case, during the week before the election. Variations in state policies continue to carry over to the manner in which ballots are counted once election officials receive them. One-third of the states, for example, require notarization or witnessing of voter signatures on absentee ballots; others do not. Cut-off dates and times for submitting absentee ballots differ, as does the time frame for counting such ballots and the designation of local officials doing the counting.<sup>40</sup>

The GAO's survey of election officials found that while most states and jurisdictions have laws and procedures for addressing the potential for fraud in mail-in absentee voting, some officials remain concerned that fraud still can be committed. They worry about someone other than the qualified voter voting in his or her place, multiple voting by an absentee voter casting a ballot by mail and in person, and intimidation of an absentee voter casting his or her ballot at home, without the supervision of election officials. Overall, the absentee mail-in ballot process is the feature most vulnerable to voter fraud within the decentralized, patchwork U.S. electoral system, at least in theory. This is not to say that there is a lot of evidence of absentee ballot fraud but rather that the potential for fraud is greatest in this area because of a lack of uniformly strong security measures in place in all states to prevent fraud. For example, according to the GAO survey, only two-thirds (64 percent) of voting jurisdictions check absentee ballot applications against their records to

determine whether applicants have previously applied for a mail-in ballot for that election.<sup>41</sup> Nearly half (45 percent) of all jurisdictions do not verify a voter's signature on absentee ballots against signatures provided on voter registration forms. Seven states require that absentee ballots be notarized or signed in the presence of two witnesses,<sup>42</sup> and 38 states require no third-party witnessing at all.

### Election Day Registration

Most states require voters to register as early as one month before an election in which they wish to participate. However, one state, North Dakota, has no voter registration at all, and another six states allow voters to register on election day: Idaho, Maine, Minnesota, New Hampshire, Wisconsin, and Wyoming. Each of the six states that use EDR experience significantly higher voter turnout than the national mean—10 percent higher on average. Political scientists who have studied EDR assert that it has been a key factor in creating higher turnout rates in these states, and they also estimate that nationwide implementation of EDR would increase participation in presidential elections by 8.5 million voters.<sup>45</sup> As reformers press to implement EDR in a wider variety of states, they face strong opposition because of the perceived potential for fraud. However, according to election officials in the states with EDR, as well as other available evidence, these concerns appear to be largely unfounded.<sup>46</sup>

The GAO's postelection survey of local election officials found that some officials in states without EDR worried that the elimination of the time between voter registration cut-off deadlines and election day would introduce fraud because officials would not be able to verify an applicant's eligibility quickly enough. Indeed, EDR shifts the burden of the two-stage registration and voting process toward local election officials and away from voters. But all of the states that practice EDR have adopted administrative procedures that work; they all require citizens to verify their identification and residence and have a variety of methods for preventing fraud. Acceptable I.D. differs among the states, ranging from driver's licenses and passports to leases and utility bills.

Some EDR states require picture identification, while others do not. In Maine, election day registrants must either show proof of identity and residence or cast a challenged

ballot, which would be investigated in the case of a close election. Officials in most EDR states see active, ongoing involvement from administrators as a prerequisite to fraud-free elections. In Minnesota, for example, officials verify the residence of each new registrant with a nonforwardable postcard mailing, and after elections the counties record and validate all new registrations within thirty days.<sup>48</sup> In both Minnesota and Wisconsin, election officials distinguish voter fraud from erroneous registration, mistakes that can result from inattentive poll workers, or unintentional registration at the wrong polling place on the part of the applicant. Those

who do register erroneously are sent a warning card informing them of the penalties they face if they repeat their mistake.<sup>49</sup>

As a deterrent to fraud, election officials in EDR states also publicize the stiff penalties that accompany a fraud conviction. In Maine, knowingly attempting to vote more than once for the same election is a felony punishable by fines of up to \$5,000 and up to five years of imprisonment. Knowingly registering at more than one voting place without revealing the prior registration address is a felony punishable by fines of up to \$2,000 and up to one year of imprisonment. The state provides each municipality with

## Oregon and All-Mail Balloting

Oregon has been experimenting with voting by mail (VBM) for 20 years and in 2000 became the first state in the nation to conduct a presidential election entirely by mail. Available evidence indicates that voter fraud in Oregon is negligible, suggesting that with proper safeguards and ample time for voters to become accustomed to voting by mail, this method of casting ballots can increase participation while ensuring the integrity of the electoral process.

Fraud charges and fraud detection in Oregon begin at the local level with the clerks of Oregon's 36 county boards of elections. Oregon maintains a vigorous signature-matching process for qualifying mail-in ballots. Approximately two and a half weeks before election day, local registrars mail ballots, and instructions for returning them, to all registered voters in their jurisdictions. Ballots that are undeliverable are returned to the county elections office by the post office. Voters mark their ballots and place them in "secrecy" envelopes that are then sealed in return envelopes the voter signs. Ballots must be returned by mail to county election offices or delivered by 8 p.m. on election day to special secure drop boxes established by the county registrars. Teams of election workers verify each signature against computerized records of registered voters and pass to the county election clerk any ballots whose signatures do not match the files. Clerks review the problem ballots and take a number of actions to resolve the problem. If a signature is missing, the ballot is not counted. If a signature does not match the signature on file for the voter, the clerk may try to contact the voter to have him or her come into the office to re-sign the ballot in the presence of an election official. A signature for a voter who does not appear on the registration list is investigated by the clerk, who attempts to contact the voter, or, if the voter's county can be determined, the clerk forwards the ballot to the appropriate county. If the clerk determines that a voter has voted more than once, the voter is contacted, and if fraud is suspected the case is forwarded to the secretary of state's office, which then forwards cases to the attorney general for prosecution. A review of records maintained by the secretary of state's office shows that over the past 10 years 1,001 cases of multiple voting and 1,056 cases of signature-matching problems have been referred to that office for investigation, out of tens of millions of votes cast. Of the combined 2,057 cases, only 15 have been referred to the Oregon attorney general for possible prosecution.<sup>43</sup> Eight of the 15 cases are currently pending investigation; one person was acquitted; and the remaining six people were found guilty of voter fraud, contaminating approximately a dozen ballots.

Elections officials in Oregon believe that VBM and the way it has been implemented over the years in Oregon helps prevent fraud better than most procedures used in polling place elections. Oregon's rigorous signature-matching procedures are key to the state's success with VBM. Overall, the Oregon secretary of state's office argues that given the frequency of elections in Oregon, which is a referendum and initiative state, the state has the cleanest registration lists in the country. Because voters receive three or four unforwardable ballots a year, they are forced to keep their registration current and the county boards of elections are forced to clean the rolls.<sup>44</sup>

## Despite the lack of evidence that EDR increases the potential for fraud, fears of this kind helped to defeat EDR ballot initiatives in California and Colorado during the 2002 election.

“voting penalty posters” that must be posted in each voting place and each voter registration place. In Minnesota, where penalties are similarly high, the state’s registration law requires county attorneys to give immediate attention to fraud allegations.

In many ways, election day registration may reduce opportunities for fraud. Because EDR typically requires voter identification and authentication in person, it actually makes voter registration fraud more difficult than a voter registration system that only requires a signature on a mailed-in form (although this may change as the result of the new federal law). Also, most voter registrations in EDR states occur at polling places and thus come through the election system—as opposed to through agencies like the DMV that are mandated to offer registration. As a result, under EDR, voter registration is more tightly under the supervision of election officials.

Despite the lack of evidence that EDR increases the potential for fraud, fears of this kind helped to defeat EDR ballot initiatives in California and Colorado during the 2002 election. In both states, opponents of the initiatives argued that eliminating the waiting period for verifying voter eligibility would open up the voting process to ineligible people and fraud schemes. Elections officials in California worried that the state’s electoral administration was not technologically advanced enough to instantaneously check for duplicate registrations. In Colorado, EDR opponents warned that setting up the program would cost millions of dollars in new equipment and training, and worried that election judges, wary of lawsuits, would avoid vigorous questioning of the authenticity of voters’ identification documents. Opponents persuaded the electorate that making voting easier was not worth the potential price of making cheating easier.

### EDR Under Fire in Wisconsin

The election day registration system in Wisconsin came under significant attack following the 2000 election, amid claims of fraud in Milwaukee. On closer inspection, these claims have turned out to be groundless. A student at Marquette University told ABC News that he had registered under his own name and voted four times on election day, and a student survey found that 174 students claimed to have voted more than once. In addition, a Democratic campaign operative allegedly offered cigarettes to homeless people in exchange for their votes.<sup>50</sup> Both allegations sparked investigations by the Milwaukee County Attorney’s Office. In the first case, the county attorney inspected the registration lists, voter lists, and ballots in the precincts in question. After intensive investigation, no cases of fraudulent voting were found at the precincts at Marquette University. Weeks after the story broke on ABC News, the student who reported the story recanted. He stated that he had invented the story to bring attention to the fact that voter fraud could occur, not that it had.<sup>51</sup>

The second case was more disturbing. A Democratic party activist from New York offered cigarettes to homeless people if they would vote. However, the case involved absentee ballots, not polling place registration.<sup>52</sup> Apart from these cases, the Milwaukee County Attorney’s Office did find evidence of voter fraud involving election day registration in two cases in 2000. Both cases were individuals who were felons on parole and who voted even though they were not allowed to under state law. In neither case was the prosecution successful, because the parole boards failed to inform the individuals that they were not permitted to vote until the duration of their sentences had been served. According to the Milwaukee County and city election offices, the number of allegations of fraud in 2000 was unusual. The city and county of Milwaukee typically have one or two cases each election.<sup>53</sup> Nevertheless, opponents of EDR in the Wisconsin have aggressively trumpeted the 2000 allegations in an effort to repeal the EDR law. To date, these efforts have been unsuccessful.

## IV. Key Election Administration Issues and Fraud

---

The 2000 election generated wide-ranging debates about how to strengthen the administrative, procedural, and technological infrastructure of elections. Issues of fraud have surfaced frequently in these debates. This section explores questions related to voter identification and fraud, as well issues of technical modernization and partisanship in election administration.

### Fraud and Voter Identification

The issue of identification requirements for registration and voting have become a contentious issue at both the state and national level. Those who favor more restrictive I.D. requirements argue that they are necessary to prevent voter fraud. Opponents counter that such procedures create discriminatory and potentially unconstitutional obstacles to the right to vote. The new federal election law, signed in October 2002 by President Bush, requires all voters to provide their driver's license number or the last four digits of their social security number when registering. Voters who have neither will have a number assigned to them. It also requires first-time voters who registered by mail to attest to their identity when they arrive at the polls with a driver's license, utility bill, or other proof of residence, including a bank statement, government check, paycheck, or other government document that shows the name and address of the voter.

The NVRA allows the states to conduct identity checks the first time a person votes if that person has registered by mail. It also allows states to require a person who has registered by mail to vote in person the first time they vote (eight states do). Until now, I.D. has generally not been a mandatory aspect of voting and registration in the states. Only 11 states presently require proof of identity to vote by law, and generally acceptable forms of I.D. differ widely, from driver's licenses to fishing licenses, leases, or utility bills.<sup>54</sup> The most common form of identification used at the polls is a signature: Thirty-eight states and the District of Columbia require voters to sign the poll book in order

011714

## Stiffer I.D. restrictions will likely disproportionately encumber low-income, disabled, and other minority group citizens as they seek to exercise their right to vote.

---

to vote.<sup>55</sup> Some states, for example, compare a voter's signature with one on file, others with the signature on a piece of identification supplied by the voter. The states have widely differing rules for identifying absentee voters and for voters who show up to vote without any identification; some states give local poll workers, or other voters, the authority to vouch for the identity of a voter who shows up to vote without the requisite identification. As with nearly all of the rules for administering elections in the states, rules governing voter identification take many forms and range from lenient to restrictive. However, bills calling for more restrictive I.D. requirements have recently been introduced in a number of states and are gaining ground.<sup>56</sup>

There are potentially discriminatory consequences of requiring specific forms of identification to register and vote. For example, many low-income, elderly, disabled, urban, and out-of-state student voters do not have driver's licenses. As some judicial decisions have found, requiring such people to purchase another form of photo I.D. in order to vote could function as a poll tax—an unconstitutional abridgement of the right to vote. Proof of residency through other documents, such as utility bills or leases, is also potentially discriminatory, as racial and ethnic minorities who are disproportionately poor are less likely than whites to have them. (Indeed, many Americans live in domiciles as roommates, spouses, or relatives where their name is not on the lease or on utility bills.) Those who work in the service industry or perform domestic work and are paid in cash are less likely to have a government paycheck or other paycheck for proof of identity. And as advocates for the disabled point out, requiring photo identification makes it harder to vote absentee.<sup>57</sup>

When first-time voters are required to vote in person, the disabled and wheelchair-bound are unduly burdened, as nearly 70 percent of the nation's polling sites are not wheelchair accessible. Finally, voting rights advocates are concerned that a mandatory I.D. requirement might result in voter discrimination and harassment. According to the Asian American Legal Defense and Education Fund, during a recent municipal election, one in six Asian Americans in New York City, where only a signature is required to vote,

were illegally asked for I.D. at the polls.<sup>58</sup> Stiffer I.D. restrictions will likely disproportionately encumber low-income, disabled, and other minority group citizens as they seek to exercise their right to vote.

### Technical Modernization

Voter fraud is best prevented today by accurate record keeping on the part of election administrators. Accurate record keeping is greatly facilitated by computerization and centralization of voter lists. Unified voter databases, networked to state agencies providing voter registration services to eligible citizens so that new registration records can be instantly processed, can help keep voter lists clean by preventing duplicate registration and by keeping address information current. Voter databases can be also cross-checked with other relevant records, such as death records, criminal convictions, and postal address records, to verify voter eligibility and eliminate "deadwood." In addition, technology is increasingly available that can electronically record and transmit signatures as part of voter registration records.

Currently, there is wide variation across states in the technological sophistication for maintaining voter registration records.<sup>59</sup> Ten states, Michigan being the largest, maintain unified databases that permit information sharing and records management between state and local agencies. Thirteen states maintain statewide lists compiled from local lists. Localities reserve responsibility for their own records, using the statewide list to check for duplicates. In some states localities can choose to use the statewide list as their own. Fourteen other states compile local lists but do not provide direct access to localities for verification of duplicate records. These states perform the checks for duplicate records and may also match their lists with other state records, and then notify localities of their findings. Finally, 13 states maintain no statewide voter registration records at all.

Beginning with its first mandated reports to Congress on the implementation of the NVRA in the mid-1990s, the FEC has recommended that states that have not yet done so develop and implement statewide computerized voter registration databases; computerize all local election regis-

tration offices; and link their statewide computerized system, where feasible, with the computerized systems of the collateral public agencies relevant to the NVRA (motor vehicle offices, public assistance offices, etc.).<sup>60</sup> The FEC's recommendation, repeated in each of its biannual reports to Congress, has not gone unheeded, but meager resources in the states for technological upgrades have served as a barrier to implementation.

It is not easy to generalize about the costs involved in bringing all states online.<sup>61</sup> Costs vary across a wide range of circumstances, including the distribution of responsibility for administering elections between state and county governments, the state of the existing computer infrastructure in the relevant state and local agencies, the level of sophistication desired in a statewide voter registration system, and how fast a state wants its new system operational. The FEC estimates that costs to implement such systems over the past two decades have ranged from less than \$1 million to more than \$8 million. Michigan's database, the Qualified Voter File, a unified database considered one of the best systems in the country, cost the state \$7.6 million to develop and \$3 million for annual maintenance.<sup>62</sup>

Help should be on the way. The new federal election reform law would provide roughly \$3.9 billion in federal funds for the upgrading of voting equipment and procedures and the training of poll workers. The law would require the states to implement interactive computerized statewide voter registration lists that are accessible to each state and local election official. However, while funds to implement reform had been authorized as of this writing, these funds had not yet been appropriated.

## Partisanship in Election Administration

Partisan control of election administration has historically created greater potential for election fraud. Partisan control of local election administration is much less of a problem now than when fraud prevention measures were first introduced a century ago, but it nevertheless has the potential to compromise elections. In very decentralized election systems, as in Florida, it can be even more difficult to monitor

administrative arrangements and keep partisanship out of the process. Yet even in more centralized systems, effective oversight can be difficult and there is considerable latitude for discretionary actions by local board officials and the influence of dominant politicians.

The 2000 election in Florida vividly showed the perils of such partisanship in a close race. In particular, major questions were raised about the fairness and propriety of local election officials in Seminole and Martin Counties, where elections officials gave Republican Party employees special opportunities to add information to incomplete absentee ballot forms. Questions were also raised about the partisan ties of Secretary of State Katherine Harris, who was closely connected to the Bush presidential campaign and who made critical decisions about purging Florida voter lists in ways that disadvantaged Democrats. In addition, the image of partisan local election officials presiding over hand vote recounts in Palm Beach and elsewhere during the 2000 election further underscored the problematic nature of partisanship in elections.

In almost every state, final authority over election systems rests with state government—generally in the secretary of state's office. How those officials are chosen has important effects on the level of partisanship in elections. Thirty-six secretaries of state are elected statewide in partisan elections. In Alaska, Hawaii, and Utah, the lieutenant governor serves as the secretary of state. In Texas, the secretary of state is appointed by the governor without legislative approval. The legislatures of Maine, New Hampshire, and Tennessee elect the secretary of state. In other ways, election officials at the county and state level are dependent on dominant politicians and parties.<sup>63</sup>

011717

## V. Best Practices in the States

---

As government officials and reformers grapple with the challenge of maximally expanding registration and voting opportunities—while constraining opportunities for fraud—they can learn from procedures and infrastructure already in place in various states aimed at successfully achieving this balance.

### Managing Voter Registration Records

The best available means of keeping accurate, continually updated records of voter registration are through statewide, unified registration systems, where the state and all localities share the same database. As a result of the new federal election law, such systems will be required of all states. Statewide coordination has a number of advantages over locally controlled databases. By integrating all local lists, duplicates are easier to identify and remove. States can more easily coordinate records with other state-held records, such as driver's licenses. Ten states currently employ unified systems. They are Alaska, Delaware, Hawaii, Kentucky, Louisiana, Massachusetts, Michigan, Minnesota, South Carolina, and Virginia. Unified databases are not enough, however, to facilitate accurate registration and voting. States are much better served by systems designed to link together election agencies with those agencies relevant to NVRA provisions, so that new applications are processed and recorded without delay. Ideally, poll workers should have laptops so that they can resolve registration problems that arise on election day. Currently, only ten states have statewide registration systems that allow voter information to be automatically transferred online to a central statewide database and updated immediately in “real time.” They are Alabama, Alaska, Delaware, Kentucky, Louisiana, Massachusetts, Michigan, Minnesota, Oklahoma, and South Carolina. Of these, the systems in Kentucky and Michigan are generally seen as among the best.

- **Kentucky:** From local terminals, county election officials access a statewide database located in the statehouse, and state election officials regularly update the database by comparing voter lists with lists of those deemed ineligible for reasons of death, mental

011718

## The best available means of keeping accurate, continually updated records of voter registration are through statewide, unified registration systems, where the state and all localities share the same database.

---

database by comparing voter lists with lists of those deemed ineligible for reasons of death, mental incompetence, felony conviction, relocation, or voter inactivity. Local election officials can update records and receive confirmation from state officials within a day. In the near future, they will be able to access the database at the precincts on election day via the Internet.

- **Michigan** : Michigan's Qualified Voter System is also an exemplary structure for accurate and efficient records management. Michigan's motor vehicle agencies are linked electronically to the electronic voter list, so new registrations are transmitted there directly and automatically, reducing the chance of losing registrations. The state matches its registration list against the U.S. Postal Service National Change of Address records, death records, and felony records.

### Voter Identification Requirements

In recent months, the issue of voter identification has been the subject of much legislative scrutiny, thanks to the I.D. requirements mandated by the new federal election reform law, the Help America Vote Act (HAVA). HAVA imposes I.D. requirements on first-time voters who register by mail. Many fear that the new requirement will depress voter participation, particularly among low-income voters, people of color, voters with disabilities, young voters, senior citizens, and others who are less likely to possess the necessary documents. Given these concerns, states should look to reduce the burden on voters by adopting a broad and flexible approach to identity and residence verification. The following states permit the use of a variety of I.D.s that voters are more likely to have.

- **Alaska** : Voters must present an I.D. at the polls, including a registration card, a driver's license, a birth certificate, a passport, a hunting or fishing license, or others prescribed by regulation. *The voter I.D. requirement is waived if an election official corroborates a voter's identity.*
- **Connecticut** : Voters must present an I.D. at the polls, including a social security card or other preprinted identification that includes name and either address, signature, or photograph. *Voters may sign an affirmation instead of presenting I.D.*

- **Georgia** : Voters must present an I.D. at the polls, including a driver's license, a government-issued I.D., an employee or student I.D. card with photo, a weapons' license, a pilot's license, a military I.D., a birth certificate, a social security card, court records showing adoption, name, or sex change, or naturalization documents. If the voter does not have I.D., he or she can sign an affidavit.
- **Virginia** : Voters must present a Virginia voter card, a driver's license, a social security card, a federal, state, or local government-issued I.D., or a photo I.D. issued by an employer in the course of regular business. Voters without I.D.s can sign a statement under oath. Voters who registered by mail are required to vote in person the first time they vote.

### Nonpartisan or Bipartisan Election Administration

Reducing partisanship in election administration is an important step toward ensuring the integrity of elections. While partisanship in election administration is the norm in the majority of states, it varies in intensity. Some states have devised different systems for choosing state election officers in ways that are either nonpartisan, or at least bipartisan. Among them are:

- **Illinois** : The Illinois State Board of Elections has eight bipartisan members, four appointed by the governor and four selected by the governor from a list of nominees submitted by the highest-ranking official of the opposite political party. Members serve staggered, four-year terms. The board provides a uniform manual of instructions for election judges; certifies ballots for all federal, state, and multi-county offices; and serves as the electoral board for objections to petitions for federal, state, and multi-county offices and statewide referenda.

- **Kentucky:** The State Board of Elections has six members, three from each of the two major parties, appointed for a four-year term by the governor. The secretary of state is chairman of the board and therefore the chief election official in the state. The board supervises voter registration, purgation of voters and the administration of election laws; supervises the county boards of election; prescribes voter registration forms; and furnishes county clerks with master lists of registered voters before each election.
- **North Carolina:** The State Board of Elections oversees administration of elections. Its five members are appointed by the governor, but its composition is bipartisan. The board issues and enforces rules and regulations binding on local officials; has power to remove local officials for fraud, neglect, or incompetence; prescribes form and content of ballots and other forms used in elections; investigates possible election irregularities; appoints members to county boards; approves all voting machines before use; and tabulates election returns, certifies the results, and sends the results to the secretary of state.

## VI. Policy Recommendations

---

The guardians of America's election systems have two equally solemn responsibilities: on the one hand, to realize the promise of democracy and make voting as accessible as possible, and on the other hand, to ensure that elections are carried out with the utmost integrity and are not susceptible to malfeasant manipulation. This report suggests that election officials are already doing a good job of protecting against fraud in the system, as it had traditionally been defined. Yet while the incidence of fraud appears to be very low and to have little impact on election outcomes, many barriers to voting endure, and too much disenfranchisement occurs within an election system that is outdated, prone to error, and too partisan. Below, we build on the previous section on best practices and offer four core recommendations to help guarantee safe elections that are as open as possible.

- **Upgrade Technology in the States.** Computerized voter registration records and state-of-the art voting technology are critical components of election systems that both facilitate participation and reduce the potential for fraud. The new federal election law, which mandates the creation of statewide computerized registration systems and also aims to provide states with money to upgrade voting machines, will be an important step forward if it is fully funded and effectively implemented. It is especially important that new state-of-the-art registration systems allow for interagency networking (for prompt and proper transmission of registration information under NVRA) and local poll access to systems (through laptops or other means). We also endorse the CalTech/MIT Voting Technology Project recommendation for the establishment of a National Elections Research Lab that would continue to foster the development of better voting equipment and voting systems, so that as technological advances take place they can be harnessed to help provide systems that are increasingly secure and accessible.
- **I.D. Requirements That Do Not Burden Voters.** The new federal election law places undue burdens on voters to prove their identity at the polls. We recommend modifying the law in certain respects and following several guidelines: (1) expanding the list of

011722

At the very least, states and counties should strive to remove ambiguity and conflicts of interest from all aspects of election laws, from registration to postelection procedures.

acceptable identifying documents; (2) allowing state or local officials discretion to incorporate or expand forms of identification currently in use; (3) stipulating that all provisions should be uniformly applied; and (4) enforcing a voter's bill of rights that outlines acceptable forms of I.D.

- **Reduce Partisanship in Election Administration.** We recommend that state legislatures explore ways to make election administration free of partisan control. At the very least, states and counties should strive to remove ambiguity and conflicts of interest from all aspects of election laws, from registration to postelection procedures. The National Association of Counties (NACo) and the National Association of County Recorders, Election Officials, and Clerks (NACRC) have recommended professionalization as a way to curtail partisanship.<sup>64</sup> Regular training and exchanges with elections administrators from other jurisdictions may increase officials' commitment to the integrity of the democratic process itself, as opposed to party loyalty.
- **Strengthen Enforcement.** The federal and state criminal penalties for election fraud are significant and should serve as a powerful deterrent against fraud. However, this will not be the case if laws are poorly enforced, or enforced unevenly. All states should ensure adequate funding and authority for offices responsible for detecting and prosecuting fraud. In addition, all states should track allegations of election fraud, as well as the outcomes of criminal investigations, and make this data available to the public.
- **Establish Election Day Registration.** As some elections experts have pointed out, EDR may allow better forms of fraud prevention than other systems.<sup>65</sup> Under NVRA, election officials have lost some measure of control over registration. Most registrations now come through departments of motor vehicles, through registration drives, and through the mail. EDR requires voter identification and authorization in person before a trained election worker, which should reduce the opportunity for registration error or fraud.

# Appendix

## Major Recent Cases of Alleged Election Fraud

### A. The 1997 Primary Mayoral Election, Miami, Florida

Perhaps the best-known contemporary case of uncontroverted absentee ballot fraud is the disputed 1997 primary mayoral election in Miami, Florida.<sup>66</sup> Running for reelection as mayor, Joe Carollo received 51.4 percent of the ballots cast at the polls, while his opponent, former mayor Xavier Suarez, received 61.5 percent of the absentee ballots, giving Suarez a slim lead (155 votes) over Carollo in total balloting. Because neither candidate received more than 50 percent of the vote, a run-off election was held, and Suarez narrowly won both the precinct and absentee ballots.<sup>67</sup>

Immediately after the November 4 election, Carollo challenged the results, claiming fraud in the absentee ballot vote that swung the election to Suarez, thus denying Carollo the majority support he received at the polls and forcing him into a run-off. A week after the election the Florida Department of Law Enforcement arrested two Suarez supporters for buying absentee ballots and falsely witnessing absentee ballots. The day after he lost the run-off election to Suarez, Carollo petitioned the Circuit Court for the Eleventh Judicial Circuit of Florida to overturn the results of the November 4 election on the grounds of voter fraud.

The trial was held in February 1998. For two and a half weeks, the trial court heard evidence and read depositions from 87 witnesses and examined 195 exhibits.<sup>68</sup> Its March 3 decision noted “a pattern of fraudulent, intentional and criminal conduct” in the extensive abuse of absentee ballot laws.<sup>69</sup> An expert documents examiner testified that 225 absentee ballots cast had forged signatures; there was evidence of 14 stolen ballots and 140 improperly witnessed ballots. Another 480 ballots were procured or witnessed by 29 “ballot brokers,” 27 of whom invoked their Fifth Amendment privilege against self-incrimination instead of testifying at trial. One such ballot broker was 92-year-old Alberto Russi, a campaign volunteer for Humberto Hernandez, a Suarez ally on the five-member City Commission. Within days of the November 4 election, Russi was arrested and charged with three counts of election fraud. Police traced Russi to the absentee ballot of a dead man whose ballot he witnessed. When police searched

011724

## In its zeal to address the embarrassing behavior of politicians in Miami, the Republican-controlled legislature passed a law that paved the way for one of the more underreported scandals of the 2000 election in Florida.

Russi's home they seized 75 absentee ballots already filled out and intended for the November 13 run-off, many of which were addressed to Russi's home in the names of other voters. A separate grand jury, convened to investigate the fraud allegations and make recommendations for improvements in the absentee ballot process, found that absentee ballots were stolen from mailboxes, that "unscrupulous individuals" had secured ballots for people under the guise of "helping the voter," and that voters had been coerced into voting for particular candidates in return for past favors done for them.<sup>70</sup>

At the center of what the trial court subsequently found to be "a massive, well-conceived and well-orchestrated absentee ballot voter fraud scheme" were a large number of absentee ballots—nearly 70 percent of the total—cast from Little Havana. Little Havana voters reinstated Commissioner Hernandez, the embattled Suarez ally who won reelection to the City Commission by a large majority after being removed from office by the governor following a 23-count indictment for bank fraud and money laundering.<sup>71</sup> An expert in statistical analysis testified at trial that the large number of absentee ballots from Little Havana were a statistical "outlier," the Little Havana absentee ballot rate an "aberrant case" so unlikely that it was "literally off the [statistical probability] charts."

The trial judge, Thomas S. Wilson Jr., concluded that "the evidence shows a pattern of fraudulent, intentional and criminal conduct that resulted in such an extensive abuse of the absentee ballot laws that it can fairly be said that the intent of these laws was totally frustrated.... This scheme to defraud, literally and figuratively stole the ballot from the hands of every honest voter in the city of Miami."<sup>72</sup> Judge Wilson overturned the results of the November 4 election and ordered a new election, but his remedy was overturned on appeal. The appellate court affirmed the finding of fraud but voided the remedy of a new election and remanded the case to the lower court with instructions to enter a final judgment that voided all of the absentee ballots, determining the outcome of the election by the machine total alone. This decision took victory out of Xavier Suarez's hands and gave it to Miami's new mayor, Joe Carollo.

The 1997 Miami mayor's race presents one of the most egregious cases of election fraud in recent memory. News coverage of the fraud scheme and trial was extensive and national and local leaders and residents loudly bemoaned the further tarnishing of the city's image as one steeped in political corruption. The state legislature acted quickly to pass a \$4 million election law reform package to root out voter fraud. But the law did much more than that. In its zeal to address the embarrassing behavior of politicians in Miami, the Republican-controlled legislature passed a law that paved the way for one of the more underreported scandals of the 2000 election in Florida: the massive disenfranchisement of Florida voters—most of them African American—whose names erroneously appeared on felony lists.<sup>73</sup>

In May 1998 the legislature added Section 98.0975 to Title IX, Chapter 98 of Florida's statutes. Section 98.0975 required the Division of Elections in the secretary of state's office to contract with a private company to compare the central voter file with databases of persons deceased, those with felony convictions, and those adjudicated mentally incompetent and to provide lists of matching names to the division. The division was required to provide the information to the county supervisors of elections who were to undertake their own verification process on local voter registration databases. Florida was the only state in the United States to require its local election officials to verify their voter rolls using data processed by a private firm.<sup>74</sup>

### B. The 1996 Sanchez/Dornan Contest for the U.S. House of Representatives, Orange County, California

Orange County, California, is the fourth largest county in the United States, with 2.8 million people, more than one-quarter of them Latino. The 46th Congressional district is nestled in the heart of Orange County and includes centers of Latino concentration, Santa Ana, the county seat, and most of Garden Grove and Anaheim, giving the 46th district a population that is nearly two-thirds Latino. Vast

growth and demographic change, along with careful redistricting by Democrats in California's state legislature, have facilitated political change in Orange County. Orange County was once a Republican stronghold, a core constituency for the Republican party in presidential elections because it could swing California to the party. As late as 1988, voters in the 46th district gave 62 percent of their votes to George Bush. By 2000, however, a 24 percent Republican margin in presidential elections had been replaced by a 12 percent Democratic margin when Al Gore won the 46th with 54

percent, to 42 percent for George W. Bush. The advancing ability of new immigrant and Latino voters to define Orange County politics and the transformation in party dominance toward the Democrats set the stage for an explosive case of alleged voter fraud in 1996.

The contested election between the nine-term Republican incumbent Robert K. Dornan and a little-known businesswoman named Loretta Sanchez involved a blizzard of allegations of registration fraud, noncitizen and illegal immigrant voting, double voting, voting from nonresidential addresses, illegal inducements to register and vote, voter intimidation, ballot box tampering and absentee ballot fraud, all under the canopy of a bitter and protracted partisan battle that quickly bled into national politics.

One day after the November 5, 1996, election, Dornan led Sanchez by 233 votes, but 12,000 absentee and provisional ballots had yet to be counted. A week later, when

about 3,000 ballots were still left to tally, the Associated Press called the election for Sanchez, who had moved into the lead with a 929-vote margin. As the count proceeded, Dornan repeatedly raised the issue of "noncitizen" voter fraud and vowed to take his reelection fight to the floor of the House of Representatives if he lost. He added that his Republican colleagues were looking for a case to use in challenging the recently implemented National Voter Registration Act, signaling the likely entry of national political forces into the fray.<sup>75</sup> Dornan specifically charged that a well-known Latino rights group and the Democratic Party signed up illegal voters in a drive he argued may have led to "the first case in history where a congressional election was decided by noncitizens."<sup>76</sup> His lawyer later called the case "what we think is the single largest example of voter fraud in a federal election in the last 50 years, and, yes, maybe in this century."<sup>77</sup>

On November 22, 1996, the Orange County Registrar of Voters certified Loretta Sanchez the winner by 984 votes,<sup>78</sup> and a 14-month battle to deny Sanchez a seat in the House was joined. State electoral and law enforcement agencies were the first to open investigations into the alleged election irregularities. Then, on December 26, 1996, Dornan filed a three-page Notice of Electoral Contest in the House of Representatives requesting an investigation of the election. This was within keeping of his prerogative and the constitutional authority of the House under Article 1, Section 5, Clause 1, which provides that each House of Congress shall be the judge of the "elections, returns and qualifications" of its members. Under the rules of the FCEA, the contest is first heard by the Committee on House Oversight, which conducts its own investigation, and then by the whole House, which disposes of the contest, by resolution or majority vote. In the 105th Congress, the eight-member committee was chaired by Rep. William M. Thomas, a Republican from Bakersfield, California, and dominated 5-to-3 by Republican members. Thomas created a three-person task force comprised of Rep. Vernon Ehlers (R-Mich.) and Rep. Robert Ney (R-Ohio), and, later, Rep. Steny Hoyer (D-Md.) to conduct the investigation and recommend a

011726

## The Dornan-Sanchez electoral dispute fits squarely in what political scientists Benjamin Ginsberg and Martin Shefter call “politics by other means.”

course action to the full committee. Along with the Orange County D.A. and secretary of state investigations, the House committee’s investigation took a year to complete and produced, in the end, a disputed finding of fraud that was too insubstantial to convince the Republican dominated House to upset or reverse Sanchez’s victory.<sup>79</sup> On February 12, 1998, the House voted 378-33 to dismiss Dornan’s contest.

The Dornan-Sanchez electoral dispute fits squarely in what political scientists Benjamin Ginsberg and Martin Shefter call “politics by other means.” Politics by other means involve the use of legal strategies and the courts, revelation, prosecution and investigation, and the media to win.<sup>80</sup> The fraud allegations and subsequent 14-month investigations by state, county, and federal government agencies cost American taxpayers well over \$1.4 million.<sup>81</sup> And in the end, very little voter fraud was convincingly substantiated. On April 29, 1998, California’s secretary of state announced that the people identified by the task force as illegal, noncitizen voters in the 46th congressional district election of 1996 would not be prosecuted for voter fraud, the secretary deciding that they had registered in error and not from criminal intent.<sup>82</sup>

### C. The 2000 Election, St. Louis, Missouri

Like most big cities, St. Louis has had its share of election fraud.<sup>83</sup> In the wake of the 2000 election, allegations of voter fraud in St. Louis were raised that included illegal registration; voting by deceased people, felons, and people whose addresses appear to be vacant lots; multiple voting; and unqualified election judges permitting unqualified voters to cast illegal ballots. All the facts are not yet in, but it appears that claims of a vast conspiracy on the part of the Democrats to undertake “a major criminal enterprise designed to defraud voters” are strongly exaggerated.<sup>84</sup>

The St. Louis case has gained national notoriety beyond what the available evidence of voter fraud would suggest, because the partisan conflict between a senior Missouri Republican senator and a newly elected St. Louis Democratic representative underlying it has erupted in congressional hearings and other public venues, giving the story a wider national audience than it would have had otherwise. As such, the

contemporary St. Louis case is a classic case of the conflict between forces promoting expanded access to the franchise and those that would contain them.

African-American leaders became concerned that the removal of more than 30,000 names from the registration rolls to an “inactive” list in St. Louis during the summer and fall before the election would create problems at the polls on election day. State Senator William Lacy Clay Jr., a candidate for a seat in the U.S. House of Representatives, gave a speech the day before the election in which he warned that if legal voters were prohibited from voting at the polls because of inaccurate registration records, lawsuits would be brought to keep the polls open past their legal closing time of 7 p.m.<sup>85</sup> In fact, that is exactly what happened. Late afternoon on election day, Lacy Clay’s campaign, the Gore-Lieberman campaign, and the Missouri State Democratic Committee filed suit in St. Louis City Circuit Court to keep the polls open until 10 p.m. A sympathetic judge issued an order to extend voting hours, but the Missouri Court of Appeals overruled her. The polls in St. Louis shut down at 7:45 p.m., with only an estimated 100 votes cast after the official 7 p.m. poll closing time.

As expected, the Democrats did very well in St. Louis, a heavily Democratic city, but they also did well statewide, electing a Democrat to the U.S. Senate and as governor. Within two days of the election, U.S. Senator Bond called for a federal investigation of voting in St. Louis, hinting at a conspiracy behind the Democrats’ efforts to extend polling place hours. “What I saw and heard on Tuesday night is an outrage,” he said, adding that the St. Louis Election Board and the Democratic Party should be investigated for “orchestrat[ing] a concerted scheme to deny all Missouri voters a valid count by keeping the polls open.”<sup>86</sup>

Postelection investigations by the newly elected Republican secretary of state, Matt Blunt, and the *St. Louis Post-Dispatch* suggest a marginal amount of voter fraud may have been committed in 2000. But most of the initial charges about criminal conspiracies and the defrauding of Missouri voters have been shown to be overblown. For example, the newly elected Republican circuit attorney, Jennifer Joyce, convened a St. Louis grand jury to investigate fraudulent voter registration cards delivered to the city board of elections on the last day of the voter regis-

tration period; three months later, the grand jury disbanded without issuing any indictments, though the case presumably is being investigated now by a federal grand jury looking into all the fraud issues. According to press reports, a third of the more than 3,000 cards under suspicion were clearly fraudulent—they appeared to be completed in the same handwriting and included at least three deceased aldermen, the deceased mother of a sitting alderman, a former deputy mayor, and a dog named Ritzy Mekler.<sup>87</sup> A number of these registrations, and then, upon further research, hundreds more, listed addresses that the board said were vacant lots. Bond and others jumped on this information to further fuel their fraud charges. The secretary of state's probe significantly reduced the number of vacant lot addresses to 79 voters, and subsequent investigations a year later by reporters at the *Post-Dispatch* discovered that “dozens of St. Louis voters are being wrongly accused of casting ballots from fraudulent addresses” in the 2000 election. The *Post-Dispatch* surveyed 1,000 supposedly vacant lots and found that 704 of them had buildings on them, some of them more than 50 years old.<sup>88</sup> Errors in the city's property records and methods for classifying vacant a multi-parcel address if only one of the parcels at the address is vacant account for the mistakes in the voter records. With no indictments in fraudulent voter registration and the problem of vacant lot addresses solved, Bond and Blunt focused on court orders permitting 1,233 people to vote. The court orders were issued by St. Louis City and St. Louis County election judges for reasons Blunt argued do not conform to Missouri law.

Most of the court orders appeared to be granted to people who acknowledged that they had failed to register by the October 11 deadline, although judges interviewed by the *St. Louis Post-Dispatch* said that they believed their court orders complied with state laws. St. Louis County judge Robert S. Cohen said that election officials first screened voters who believed they were eligible to vote but who were not on voter registration lists; voters then had to wait in long lines to have their cases reviewed by an election judge.<sup>89</sup> At this time, the alleged voter fraud scandal in St. Louis looks more like a case of managerial ineptitude and underfunding, and poor implementation of NVRA on the part of St. Louis and Missouri election officials.<sup>90</sup>

24. Christopher S. "Kit" Bond, "'Motor Voter' Out of Control," *Washington Post* (June 27, 2001): A25. This case is discussed below. According to Deborah M. Phillips of the Voting Integrity Project, a national organization concerned about voter fraud, and a critic of NVRA, "the National Voter Registration Act has tied the hands of election directors to protect the rights of legitimate voters from the dilution of vote fraud." U.S. Congress, Senate Committee on Rules and Administration, *Hearing on Election Reform*, 107th Cong., 2nd sess. (March 14, 2001) (testimony of Deborah M. Phillips).
25. U.S. Congress, Senate Committee on Rules and Administration, *Hearing on Election Reform* (testimony of John Samples). At the same hearing, Todd F. Gaziano, Senior Fellow in Legal Studies and director of the Center for Legal and Judicial Studies at the Heritage Foundation, testified that "Regardless of the intent of the Motor Voter law, it has helped create the most inaccurate voting rolls in our history. Citizens are registered in multiple jurisdictions at the same time, and very few states have effective procedures to ensure that those registered even are citizens...you can almost guarantee that illegal voting may provide the margin of victory in a close contest."
26. See *The Wall Street Journal*, "Blind To Voter Fraud" (March 2, 2001): 10; "The Voter Fraud Iceberg" (March 12, 2001): 22; "Manufacturing Votes" (May 8, 2001): 26; and "Too Easy To Steal" (December 11, 2001): 18.
27. U.S. General Accounting Office, *Elections: Perspectives on Activities and Challenges Across the Nation*, Report to Congressional Requesters (October 2001), GAO-02-3: 75.
28. Federal Elections Commission, *The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office, 1999-2000*, 22 and Table 1.
29. According to the U.S. Census Bureau, nearly one in five Americans of voting age moves annually. See Jason Schachter, "Geographical Mobility: Population Characteristics, March 1999 to March 2000," Current Population Reports, U.S. Department of Commerce, Economics and Statistics Administration, U.S. Census Bureau (May 2001).
30. Federal Elections Commission, *The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office, 1999-2000*: 22.
31. Steve Barber *et al.*, "The Purging of Empowerment: Voter Purge Laws and the Voting Rights Act," *Harvard Civil Rights-Civil Liberties Law Review* 23 (1988): 499 and Appendix A. The other states purging for failure to vote did so on an accelerated schedule, purging registered voters after two years of inactivity or for failure to vote in a single election.
32. Those states are Alabama, Connecticut, Kentucky, Maine, Massachusetts, Missouri, Nebraska, and Texas.
33. Federal Elections Commission, *The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office, 1999-2000*, Table 3. Kentucky, Maine, and Nebraska have yet to delete any names from their inactive lists.
34. These provisions apply to voters assigned to inactive lists for failure to respond to notices asking for address confirmation, and are meant to secure the right of these voters to vote as long as they are eligible. While NVRA does not specifically require states to provide provisional ballots to voters disputing their denial to vote, the House Report on the Act recommended "it would be appropriate, and in compliance with the requirements of this Act, to require that such a person vote by some form of provisional ballot." See U.S. Congress, Committee on House Administration, *National Voter Registration Act of 1993*, 103rd Cong. 1st sess., H. Rept. 103-9 (February 2, 1993): Section 8. Moreover, a number of analyses of the 2000 elections have concluded that reforms should seek to expand the use of provisional balloting given the documented level of error in list management contributing to an estimated 3 million eligible voters being denied their right to vote. These numbers are drawn from the U.S. Census Bureau Current Population Survey's estimate that 7.4 percent of the 40 million nonvoters in 2000 did not vote due to registration problems.

83. Missouri, Office of the Secretary of State, *Mandate for Reform: Election Turmoil in St. Louis, November 7, 2000*, Report by Secretary of State Matt Blunt (July 24, 2001): 39-46.
84. Carolyn Tuft, "Bond Wants Federal Investigation of Problems at City Polls; He Accuses Democrats of 'Criminal Enterprise' in Keeping Polls Open Late; Democrats Criticize Election Board," *St. Louis Post-Dispatch* (November 10, 2000): A1.
85. Jo Mannies, "Vote Fraud Charges are Hogwash, Clay Says, But Bond Stands Firm," *St. Louis Post-Dispatch* (February 21, 2001): C2.
86. See Tuft. Bond's assumption of criminal intent behind the effort to clear out what all parties agree was a chaotic situation inside many St. Louis polling places, may have a personal dimension. Speaking of his successful run for governor in Missouri in 1972, Bond said, "They [St. Louis Democrats] tried the same stunt on me. This time was one too many"—referring to his belief that St. Louis Democrats intentionally kept the polls open until midnight in 1972 to prevent his election as the youngest governor in the state's history. See Mannies (February 11, 2001). One of the lawyers for the Democrats in 2000 was Douglas Dowd, the son of Ed Dowd Sr., the man Bond defeated in 1972.
87. Carolyn Tuft, "Grand Jury Looks at Voter Registration," *St. Louis Post-Dispatch* (February 14, 2001): A1; Stephanie Simon, "National Perspective: Politics: In St. Louis, Dead Are Causing Lively Debate With Their Votes," *Los Angeles Times* (February 28, 2001): Part A1, Page 5; Christopher S. "Kit" Bond, "'Motor Voter' Out of Control," *The Washington Post* (June 27, 2001): A25.
88. Jo Mannies and Jennifer LaFleur, "City Mislabeled Dozens as Voting From Vacant Lots; Property Records Appear to be in Error, Survey Finds; Just 14 Ballots Are Found Suspect," *St. Louis Post-Dispatch* (November 5, 2001): A1. Further investigation by the *Post-Dispatch* fully debunked the vacant lot claims. According to reporter Jo Mannies, "Basically, we checked every one of the 2,000-plus props [properties] listed as vacant lots with voters, and found virtually all had houses on them—had been misclassified by the assessor's office." (E-mail correspondence with the author, February 25, 2002.)
89. St. Louis County judge Robert S. Cohen said, "This process had taken them hours and hours. Some had babies with them; some had wheelchairs; some had taken off work. We were trying to accommodate people in a long line and get them in and out. We were erring on the side of allowing people to vote. Rejecting an American citizen at the poll who appears to have engaged in no fraud ... it's a difficult thing to turn that person away and say you cannot vote, you cannot participate in the democracy today." Jo Mannies, "Secretary of State Says Local Judges Erred in Election; 1,233 People Were Improperly Allowed to Vote, Report Says," *St. Louis Post-Dispatch* (July 25, 2001): A1.
90. In one of three recent reports on voting in St. Louis, Secretary of State Blunt called the communications between local polls and the St. Louis City Board of Elections on election day 2000 "grossly inadequate." One of his recommendations for improving election administration on election day was the providing of working cell phones to local poll workers and elections judges and the installation of more telephone lines at Board of Elections headquarters so that poll workers could more easily access the inactive voter files by calling in their inquiries. On election day 2000 in St. Louis, many cell phones at the local polls had no batteries and a new telephone system at the Board of Elections malfunctioned, preventing judges from checking whether voters were listed on the inactive file. Under such circumstances, Missouri voters must get a court order to vote, a partial explanation for why so many court orders were issued. Blunt's recommendations were heeded for the March 6, 2001, municipal primary election. See Missouri, Office of the Secretary of State, *Making Every Vote Count: A Report of Secretary of State Matt Blunt to the People of Missouri* (January 29, 2001).

U.S. ELECTION ASSISTANCE COMMISSION  
1225 New York Ave. NW – Suite 1100  
Washington, DC 20005

Statement of Vice-Chair Rosemary E. Rodriguez Regarding  
Request by Tova Wang, Co-Author of the Draft Voter Fraud and Voter  
Intimidation Report for the Election Assistance Commission  
April 26, 2007

On April 16, 2007, Ms. Tova Wang, formerly a contract employee of the United States Election Assistance Commission (EAC), made the following request of the EAC: “to discuss with third parties any and all aspects of her work for the EAC and to release her research and other information relating to her work for the EAC and the draft report that she submitted to the EAC.”

Today, Ms. Wang issued a public statement restating her request to the EAC, pointing out that we have not yet responded to her April 16 request. As a member of the EAC, I am compelled to comment on her request. I cannot bind the Commission, as one member, but I believe that the EAC should immediately respond to Ms. Wang’s request. I further believe that releasing Ms. Wang to discuss her work for the EAC will be a positive step as we endeavor to operate with more transparency.

**PRELIMINARY RESEARCH PROJECT ON VOTING FRAUD AND VOTER INTIMIDATION  
U.S. Election Assistance Commission's (EAC)**

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the issues listed in the statute are the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- methods of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

EAC's Board of Advisors recommended that EAC make research on these topics a high priority. Subsequently, the Commission contracted with two consultants (Tova Wang and Job Serebrov) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the background research to the working group;
- convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

### Election Fraud

#### Questions and Answers

[How prevalent is voter fraud?](#)

[What best practices can states implement to combat voter fraud?](#)

[What kinds of voter suppression have occurred recently?](#)

[Are there criminal penalties?](#)

[Are they enforced?](#)

---

### How prevalent is voter fraud?

There is very little systematic data to tell us how widespread voter fraud actually is; most evidence of individuals attempting to subvert the election system is anecdotal. For this reason, the debate surrounding voter fraud and its supposed remedy, voter identification, often gets mired in politically partisan rhetoric rather than facts.

Nonetheless, the evidence that exists suggests voter fraud at the polling place is a relatively minor problem in American elections. The historically close 2004 gubernatorial election in Washington state resulted in a long litigation that involved extensive investigation of voter fraud. Of the 1678 illegal votes uncovered in this investigation, about 1 percent were cast fraudulently, either as "double votes" or on behalf of deceased voters; the rest of the votes were improperly included in the ballot tally as a result of errors on the part of election officials. In addition, a survey produced by

011740

the Coalition on Homelessness and Housing and the League of Women Voters of Ohio's 88 counties showed four instances of fraudulent voting out of a total of nine million votes cast in the state's 2002 and 2004 general elections.

### **What best practices can states implement to combat voter fraud?**

As a means of dealing with the perceived problem of voter fraud, many states are currently passing legislation requiring all voters to produce some form of identification—sometimes insisting upon government issued photo identification—when they go to vote. While these restrictive voter identification requirements can often disenfranchise eligible voters (for more on this topic see the [section on voter ID](#)) there are policies states can implement to guard against voter fraud that make the election system as a whole more secure without disenfranchising voters who lack standard forms of identification.

- **Technology:** Upgrading the linkages between local and state voter registration databases and the electronic databases of other state agencies can significantly cut down on the number of duplicate and ineligible registrations on the rolls. Providing access to these databases at the local polling places themselves (via laptop) can head off fraudulent voting at the polls as well.
  - **Enforcement:** Strengthening the prosecution of actual cases of fraud and enforcing voter fraud laws will help to deter potential fraud.
  - **Election Day Registration:** Although many people believe the myth that allowing voters to register to vote on Election Day increases voter fraud, Election Day Registration (EDR) actually can prevent fraud because it puts registration under the direct supervision of trained election officials, rather than allowing workers at the Department of Motor Vehicles and other sites to control voter registration. Studies show that states offering EDR report very few incidents of fraud, while their turnout is nearly ten points higher than average turnout in states that do not offer EDR.
  - **Absentee Ballot Security:** Many states consider absentee ballot fraud a more serious threat than polling place fraud. Some states, such as Oregon, which conducts its elections entirely by mail, have successfully implemented systems to prevent fraud. Absentee ballots cannot be forwarded, and each voter must sign an outside envelope that is later verified using a computer signature on record. The state requires ballot drop boxes, set up so voters can save on stamps by hand-delivering them, to be labeled as "official" if they have been set up by elections administrators and "unofficial" when they are set up by outside groups.
-

## What kinds of voter suppression have occurred recently?

In the 2004 election there were many reports of voter suppression and intimidation, though incidents such as these have occurred throughout American history:

- **Challenges:** Making use of an obscure law allowing challenges to an individual's right to vote, the Republican Party in Ohio preemptively disputed the registrations of more than 35,000 first-time voters from predominantly Democratic and minority areas, requiring them to appear in court to defend their eligibility to vote just days before the election. The GOP also announced plans to dispatch people to polling sites to challenge registrations of pre-selected voters in person—these plans were the subject of several last-minute lawsuits. Similar challenges also occurred in a number of other states, including Florida and Wisconsin.
- **Voter Registration Suppression:** In Nevada, according to press reports, workers for a Republican funded private voter registration company that targeted registration efforts at Republicans destroyed forms filled out by Democrats. In Florida, several thousand students and other potential voters found that their party affiliations and addresses had been changed on their registration forms.
- **Deception:** In African-American neighborhoods of Milwaukee, a flier purportedly from the "Milwaukee Black Voters League" was distributed, reading,

SOME WARNINGS FOR ELECTION TIME

IF YOU'VE ALREADY VOTED IN ANY ELECTION THIS YEAR YOU CAN'T VOTE IN THE PRESIDENTIAL ELECTION.

IF YOU [OR ANYBODY IN YOUR FAMILY] HAVE EVER BEEN FOUND GUILTY OF ANYTHING, EVEN A TRAFFIC VIOLATION, YOU CAN'T VOTE IN THE PRESIDENTIAL ELECTION.

... IF YOU VIOLATE ANY OF THESE LAWS YOU CAN GET TEN YEARS IN PRISON AND YOUR CHILDREN WILL BE TAKEN AWAY FROM YOU.

Letters sent on fake NAACP letterhead warned African-American voters that they would be arrested if they tried to vote and had outstanding parking tickets or had not paid child support.

In Pennsylvania, leaflets were distributed on fake county letterhead in a mall, announcing that Republicans should vote on Tuesday, November 2, and Democrats should vote on Wednesday November 3. A similar incident occurred in Cleveland, where letters printed on fake Board of Elections letterhead warned that registrations through the Kerry campaign, America Coming Together, and the NAACP were invalid.

**Are there criminal penalties?**

The Voting Rights Act of 1965 states that "no person [...] shall intimidate, threaten, or coerce, or attempt to intimidate, threaten, or coerce any person for voting or attempting to vote." This legislation addresses some of the more outright forms of intimidation, but sometimes intimidation is difficult to distinguish from ordinary election-related activity. For example, in Florida, false allegations of voter fraud led to fruitless investigations that involved sending uniformed officers to the homes of African-American voters for questioning. Investigations such as these have the effect of intimidating voters, by invoking memories, especially for older African-Americans, of police persecution at the polls fifty years ago, but they do not necessarily fall under the Voting Rights Act unless it is clear that they were part of an intentional effort to intimidate voters.

Efforts to Suppress the Vote: An Overview

Edward B. Foley and Amber Lea Gosnell (Election Law @ Moritz) September 2004

Text of Voting Rights Act of 1965

---

**Are they enforced?**

There has been a limited effort to investigate allegations of intimidation and suppression, and to prosecute the responsible parties, especially after the 2004 election, in which there were widespread reports of such tactics. However, it is likely that these laws are under-enforced, both because

they are difficult to detect or difficult to prosecute.

Thad E. Hall, University of Utah  
Susan Hyde, Yale University

---

There has been much discussion of fraud in elections in the popular media since the 2000 election, but social scientists have been studying this phenomenon for a very long time. Historical accounts of election fraud—and the procedural mechanisms that administrators have attempted in order to combat it—illustrate the complexity and the myriad of ways in which fraud has been perpetrated. Procedures from the Australian ballot to voter registration, things that we take for granted today, are innovations that were put into place to address election fraud concerns.

However, while there have been many popular accounts of allegations of election fraud in recent elections, there has not been sufficient and systematic study of this question from the academic and policy research communities. Despite the recent efforts by a handful of scholars (most of whom are contributors to this project), researchers and policymakers do not have any consistent place to turn for discussion of academic research on election fraud, for discussion of the methodologies of fraud detection, nor for advice on how to best prevent the occurrence of election fraud.

Our goal in this project is to provide such a resource for the academic and policymaking community, and hopefully also for the interested public. By bringing together the top researchers and policymakers in this field, we will provide in a single reference an accumulation of what the research and policy community now knows about election fraud — the incidence of election fraud, the best methodological tools for studying election fraud, and methods of fraud prevention. The contributions contained in this volume are to be presented and discussed extensively at an upcoming workshop at the University of Utah in late September 2006.

The papers in this volume examine three facets of election fraud. First, we open the book with a chapter that overviews the extant literature on election fraud, both domestically and internationally. We then continue with this theme in the first section, which examines our understanding of election fraud in specific contexts and through different measurements. In the second section, we examine specific methodological means by which election fraud can be

detected. These methods use existing data to determine when election results may be problematic. The third section of the book considers policy recommendations and considerations for making elections fair, accurate, and secure. The book will conclude with a chapter from the editors, summarizing the perspectives offered in the book, and providing an outline of research questions that should frame the next stage of research on election fraud.

### **Project Timeline**

As noted above, the contributions to this project will be presented and discussed at a workshop in late September 2006. We will then allow the authors of each contribution approximately eight weeks to return to us edited and revised manuscripts (due at the end of November 2006). The editors anticipate that by end of January 2007 the complete manuscript will be finalized and submitted for final consideration. This would put this project on schedule for potential publication in early 2008, which will coincide with the beginning of the 2008 presidential election cycle.

## **Brief Book Description**

### **INTRODUCTION: THE IMPORTANCE OF UNDERSTANDING ELECTION FRAUD**

In this introduction the editors will present, briefly, the three basic themes of this project: what social scientists currently know about election fraud, what methodologies can be used to detect election fraud, and the mechanisms that can help prevent election fraud. In this introduction, the editors will provide a brief discussion of the contributions contained in the rest of the volume.

### **Section 1: Understanding Election Fraud**

GAMZE ÇAVDAR

*WHEN "IRREGULARITIES" BECOME REGULAR: ELECTION FRAUD IN IRAQ, EGYPT AND THE PALESTINIAN TERRITORIES*

Although the Middle East as a region has seen a rise in the number of elections over the last decade, these elections are far from being free and fair. Both local and international NGOs have often reported fraud as a widely-experienced phenomenon in such elections. This paper examines election fraud in three Middle Eastern cases, namely Iraq, Egypt and the Palestinian territories, by discussing its manifestations, pervasiveness and significance. These cases have been selected due to their significance. In each case, the recent parliamentary elections marked turning points with actual and potential repercussions for their respective countries as well as the region. Iraq held its first parliamentary elections on December 15, 2006, after the constitution was approved in a referendum following the collapse of Saddam's regime. In Egypt, the November 2005 elections challenged the ruling National Democratic Party's overwhelming majority in the parliament, leading the Muslim Brotherhood, a banned Islamist party, to control one-fifth of the seats. In January 2006, the voters of the Palestinian territories unexpectedly brought Hamas, a political party that has been on the U.S. terrorist list, to power. Although the extent of the fraud varies from one case to another, many types of fraud have been reported by the election monitors in these cases. These include: harassment of monitors and candidate agents, intimidation of voters, incidents of violence, lack of voter secrecy inside the polling station, polling centers opening late, inaccurate voters' lists, vote-buying and multiple voting, and violation of the secrecy of the ballot.

This paper first discusses general characteristics of elections in the region, with the aim of demonstrating how the electoral systems have been engineered there. Then, it discusses various manifestations of fraud in these cases by underlining their common characteristics as well as their peculiarities. Finally, it discusses the obstacles to holding free and fair elections in all these cases. The paper argues that the election fraud in the Middle East cannot be fully understood without understanding the political and economic context within which such elections take place. Restrictions on basic human rights such as the freedoms of expression and assembly in Egypt, and ongoing violence and foreign occupation in Iraq and Palestine, illustrate the point.

PETER ORDESHOOK AND MISHA MYAGKOV

011747

*THE FLOW OF VOTES IN RUSSIA: COHERENT VERSUS SUSPICIOUS PATTERNS*

In our earlier research we have developed a variety of methods of looking at official election returns for detecting and measuring the extent of election irregularities (fraud) in both Russia and Ukraine. We were able to show that evidence consistent with a rigged vote exists in official election returns. But we also showed that, naturally, the strength of such evidence depends heavily on quality of the data, and, most importantly on the level of aggregation of election returns that we use. The main aggregation units in our analysis were so-called "rayons" (counties). That fairly high level of aggregation combined with strong data homogeneity requirements limited our findings to cases of mostly "massive" election fraud, which were clearly present in both latest Russian and Ukrainian presidential elections. In this paper we will report results of a much more refined application of our methods using Russian and Ukrainian election data aggregated to the level of individual polling stations.

The unique dataset analyzed here is comprised of approx 100,000 observations from Russia and 30,000 observations from Ukraine. In addition we will be able to use the time series piece of our methodology (based on ecological inference) on the refined data set. We will use the new precinct level data that should be shortly available as a result on the upcoming parliamentary elections in Ukraine.

FRED BOEHMKE AND MICHAEL ALVAREZ

*CONTEMPORARY ELECTION FRAUD: A QUANTITATIVE ANALYSIS OF ELECTION FRAUD CASES IN CALIFORNIA*

Studies of electoral fraud have generally consisted of demonstrating the existence and pervasiveness of fraud in various contexts based on elite interviews, voter surveys, newspaper stories or case-study analysis. Yet none of these studies has yielded data with sufficient variation across time or space to permit systematic testing of hypotheses regarding the frequency of electoral fraud. In addition, many of these studies have gone where the fraud is by intentionally studying cases or countries where fraud is considered problematic. In this paper we conduct a quantitative analysis of election fraud using data from California's 58 counties between 1994-2003. Our data consist of all electoral fraud cases filed during this period and are disaggregated by allegation and resolution. We conduct event count regressions to test hypotheses about the timing and location of fraud cases, including measures of competitiveness, ideology, economics and demographics. Our results provide evidence that fraud allegations are associated with competitiveness, ideology, race and population density. Results are similar across a variety of specific violations as well as case outcomes.

MICHAEL ALVAREZ AND THAD E. HALL

*PERCEPTIONS OF ELECTION THREATS: WHAT DO VOTERS KNOW ABOUT ELECTION SECURITY AND DO THEY CARE?*

Since before the 2004 presidential election, we have been conducting periodic public opinion polls to assess the perceptions of Americans about the electoral system. We have asked questions specifically about the potential problems associated with electronic voting systems in three successive surveys, and more recently, we have asked respondents about their perceptions of general security threats to the electoral process. In this paper we present data from our

surveys, providing important information on the perceptions of Americans about the security of their electoral system.

DELIA BAILEY

*CAUGHT IN THE ACT: WHAT WE CAN LEARN FROM CRIMINAL ELECTION FRAUD CASES*

Although fraud regularly features in academic and media discussions of election reform, there are relatively few recorded cases of large-scale vote fraud in recent U.S. history. Of course, it is difficult to know whether the lack of cases is due to the small number of perpetrators of election fraud, or to the ability of many perpetrators to avoid detection. This paper utilizes recent election fraud cases, both those highly publicized in the media, and smaller federal cases prosecuted within the 2000-2005 period, to identify commonalities and suggest avenues for further research in this area.

THAD E. HALL AND TOVA WANG

*THE POLITICS OF IS: HISTORICAL RESEARCH ON VOTER IDENTIFICATION AND QUALIFICATION AT THE POLLS*

In addition to using quantitative social science research methodologies to study election fraud, we can also study this issue by examining election fraud's historical and political dimensions. Specifically, we can use data on voter identification requirements to determine whether recent laws requiring voters to present identification at the polls are neutral to voting platforms—that is, they treat early, absentee, and in-precinct voters equally—in their purported attempt to combat fraud. We also examine whether historically other reforms that seek to ensure the voter is qualified have been neutral, treating all voters equally. Finally, we assess whether the current reforms are likely to result in all voters being treated equally, regardless of their voting method. This analysis can help to inform us as to whether laws and procedures are designed to address fraud or to serve other political or symbolic needs.

## **Section 2: Detecting Election Fraud**

MICHAEL ALVAREZ & JONATHAN KATZ

*DETECTING ELECTORAL FRAUD: THE CAST OF THE 2002 GENERAL ELECTION IN GEORGIA*

Detecting election fraud is difficult for many reasons. Allegations of election fraud are widespread, but actual empirical evidence of election fraud is illusory. In our paper we focus on the specific case of the two statewide elections in Georgia's 2002 general election. Drawing upon a large body of social science research, which has for decades used statistical tools to study election outcomes, we undertake a variety of statistical studies of these two Georgia elections. Our analysis concludes that there is little direct evidence of fraud in these two elections, using the past history of electoral data from Georgia. Our analysis also provides a series of methodological tools that might be used in future situations where allegations of electoral fraud arise.

CHARLES H. FRANKLIN

*CAN EXIT POLLS EVER DETECT VOTE FRAUD?*

The exit polls were prominently used in 2004 to cast doubt on the vote count in Ohio. Regardless of the specific merits of the 2004 case, it is of interest to ask how exit polls may ever be used as checks on fraudulent vote counts, in the U.S. and elsewhere. The difficulty is that simple discrepancy between the exit polls and the official count can be due to error in either or both the polls or the counts. In this situation it is crucial that we have reliable estimates of the true variability in exit polls, their potential biases and the extent to which we can ever question a tabulated vote based on the exit polls.

In this paper I exploit archival data in which multiple exit polls are available for most of the 50 states to estimate the reliability of exit polls. This provides an independent estimate of the variability in exit poll estimates (beyond sampling theory alone), which in turn places constraints on how large fraud must be in an electoral district for the exit polls to cast credible doubt on the results. One aspect of this issue is that the exit poll need not be treated as the definitive source of evidence. It merely needs to be convincing enough to trigger a formal investigation of the vote count. Thus an exit poll need not have unattainably low variance to play a roll in the monitoring of elections. The level of variability, however, sets a limit below which exit polls will be useless as fraud alarms.

D. RODERICK KIEWIET, THAD E. HALL, R. MICHAEL ALVAREZ, AND JONATHAN N. KATZ  
*USING INCIDENT REPORTS TO DETECT ELECTION ANOMALIES AND IRREGULARITIES*

In this paper, we present research using incident reports from election jurisdictions, and demonstrate how these incident reports can be used to study election anomalies and irregularities. Much of the analysis in this paper will focus on the May 2006 primaries in Cuyahoga County, Ohio, and incident reports from that election.

DAN KNOEPFLE  
*THE POWER AND RELIABILITY OF STATISTICAL TECHNIQUES FOR DETECTION OF ELECTION FRAUD*

Both election error and outright fraud pose a number of significant threats to our democratic process, including the possibility of erroneous outcomes or even fixed or stolen elections. In addition, the specters of fraud and election mistakes provide a premise for partisan maneuvering, putting the power to determine close, contested elections in the hands of a small group of officials and derailing election reform legislation. Previous research on statistical detection of election abnormalities has focused on finding known errors in county-level election returns (e.g. Wand et al., 2001). Despite a number of successes in implicating areas independently known to have suffered abnormalities, the feasibility of such methods for identifying occurrences of common election anomalies has not been investigated. We analyze the ability of various statistical techniques to identify simulated errors added to real election data using Monte Carlo experiments. The experiments give estimates of the power and reliability of the methods and suggest reasonable bounds on the potential of these methods. We extend earlier technical work and give suggestions for real-world application.

WALTER MEBANE  
*USING BENFORD'S LAW AND RANDOMIZATION TO DETECT ELECTION FRAUD*

What can we do to detect corruption in election results using only the vote totals reported in one election? Being able to test for corruption using such limited information is important if we wish to implement fully automated, routine vetting of election returns. Such tests should not depend on any substantive assumptions peculiar to the particular election at hand. For example, ideas about party loyalties, ideological commitments or the contents of the given campaigns should play no role. Not using such assumptions may help obviate controversies about whether the substantive model is correct, controversies that not only may delay reaching a conclusion about the status of the current election but also may distract attention from the core issue of whether the vote tallies are valid.

Benford's Law may serve as the foundation for such tests. I show that a kind of mixture process that generally occurs in elections produces vote counts that have second digits that satisfy Benford's Law, at least when the counts are for totals at the level of precincts. Benford's Law may also hold for higher levels of aggregation, but the usefulness of examining higher levels is questionable when the goal is to detect vote fraud. At lower levels of aggregation, in particular for machine-level vote totals, I show that Benford's Law may not hold if multiple voting machines are used at each polling place and voters are randomly assigned to voting machines. The random assignment of voters to machines may eliminate a key feature of clustering among voters that is important for producing digits that satisfy Benford's Law. If machine-level totals and other important information about how the voting machines were used are available, a randomization test can be used to check for distortions in the vote counts. I use simulation exercises to assess how sensitive the tests are to various kinds of corruption, and I apply the tests to various collections of data from recent elections.

ALBERTO SIMPSE

*FRAUD TECHNOLOGY AND THE ESTIMATION OF ELECTION FRAUD*

How can election fraud be detected and measured? I use a simple model to show how information about the technology of electoral corruption together with voting data can be used to estimate the extent of electoral corruption when both treatment and control observations are available. I apply this model to a cross-section of subnational-level historical data from Mexico, using observations after the electoral reforms of the 1990s as controls for the pre-reform "treatment" observations on the same units.

### **Section 3: Preventing Election Fraud**

SUSAN HYDE

*INTERNATIONAL ELECTION OBSERVATION AND FRAUD*

The practice of international election observation spread rapidly throughout the world since the early 1990s, and few elections today take place without the presence of international election observers. How do international election observers influence election fraud?

One of the challenges for international election observers is that there are virtually limitless means of manipulating an election. This paper documents methods used by the leading international observer organizations to detect election fraud, including the parallel vote tabulation, voter registration audits, the expansion of long-term election observation, and coordination with domestic election observers. Each of these methodological innovations

makes it more likely that certain forms of election manipulation will be caught by international observers. By improving their abilities to detect certain forms of election fraud, international election observers have given potential election manipulators the incentive to engage in less direct and less traceable means of manipulating the election.

However, the record of elections in the past fifteen years has shown that despite all of the improvements in international election observation and the resulting increased likelihood that direct fraud will be caught, some leaders continue to engage in Election Day voting fraud. International election observers have witnessed and documented election fraud in a number of high profile elections in recent years. Can international observers also deter these more blatant forms of voting manipulation? The final portion of this paper presents evidence that international observers can deter election fraud. In some cases, the presence of foreign observers in polling stations makes it less likely that voting fraud will occur. By randomly assigning international observers throughout the country on Election Day, observers can detect election-day fraud even if it is well concealed in their presence, and can measure the degree to which they had a deterrent effect on Election Day fraud.

MICHAEL ALVAREZ, THAD E. HALL, KATHY ROGERS

*ADMINISTERING ELECTIONS TO DETER FRAUD: APPLYING CHAIN OF CUSTODY PROCEDURES TO ELECTIONS*

The social sciences not only provide us with methodological mechanisms for identifying fraud, but also with mechanisms for deterring fraud. In this paper, we use data from the EAC Vote Count Project to examine legal and procedural mechanisms that exist in the states for deterring fraud by promoting the maintenance of chains of custody of all critical election components. We review models of implementing such chains of custody, with special attention paid to models used in Georgia and Austin, Texas, as well as consideration given to holes that exist in current regulatory schemes in most states.

DOUG CHAPIN

*PROHIBITING VOTE FRAUD AND INTIMIDATION*

In addition to the social science literature on election fraud, there is also a formal legal and regulatory component to understanding and deterring fraud. This chapter complements the existing discussion in the previous chapter by providing a survey of prohibitions on vote fraud and intimidation at the federal, state, and (where appropriate) the local level. The formal practices for deterring fraud and intimidation are influenced by many factors, including a state's political and legal culture, as well as experience in elections. This chapter includes both empirical and normative considerations regarding how the law can help to mitigate and prevent fraud.

TED SELKER

*ERGONOMICS, TECHNOLOGY, AND FRAUD PREVENTION*

Many current and proposed technologies purport to reduce opportunities for voting fraud. But the unintended consequences for the end user's experience of "technical solutions" can themselves introduce or perpetuate opportunities for voting fraud. Fraud can occur at any stage

of a voting process from registering a bogus candidate to changing the reported count from an election. Every kind of voting fraud involves some aspect of the human experience in the electoral process. Understanding the limitations of voter's perceptual, cognitive, motor and psychological abilities can help researchers and election officials in their efforts to evaluate the opportunity, level of threat, and consequences of various kinds of voting fraud. While research on the voter's user experience is only at early stages, the research that has been done to date can shed light on better ways to understand and to prevent voting fraud.

This chapter will examine how the user experience can itself be critical in establishing the possibilities for voting fraud, and for preventing it. By understanding the ways in which voters interact with the process and technologies involved in elections, many approaches can be developed to prevent or to mitigate fraudulent registration and voting. Ballot design continues to be a source of great voter confusion, and is one area where improved design can reduce confusion and increase the odds that fraud is prevented. Also, the limitation of voter ability to verify their choices easily and accurately when they vote makes many existing vote verification systems vulnerable to fraud. The choice of personnel and their placement can greatly affect the voter's experience in a polling place, and can mitigate many forms of voting fraud. The polling place procedures, including voter check-in, instructions and ballot presentation, often present problems that can open the door for various types of fraud schemes. Access to and handling of voting machines has long been a source of voting problems and continues to be a major concern. Precinct close-down procedures are often carried out with inadequate supervision. Handling of the counting process is a typical place where procedures and supervision have been questionable.

The list of ways fraud can occur is not new; this chapter will show how perceptual, cognitive, motor and psychological evaluation of voting process and technology must be factored into any evaluation of potential fraud. Successful voting requires viewing the process as a set of user experiences that must be designed to respect the abilities of people and be done with successful checks for all human actions.

#### **Section 4: Conclusions and Implications**

In this chapter, the editors will summarize the conclusions of the project and provide some perspectives on a future research strategy. What is the current state of research on election fraud in social science? How can that research be improved? Are the existing methods sufficient, or is there a need for the development and application of new methodologies for studying election fraud? And finally, how can the social science community who studies this question best communicate their research to the election officials who are in a position to put that knowledge to use?

## Brief Biographical Sketches

### The Editors (in alphabetical order)

R. Michael Alvarez is professor of political science at Caltech, and has been associated with the Caltech/MIT Voting Technology project since its inception in 2000. He has written extensively on voting behavior, campaigns and elections, survey research, statistical methodology, and election administration.

Thad E. Hall is assistant professor of political science at the University of Utah. He is an expert on public administration, and has published widely on policymaking, election administration, voting technology and election reform.

Together the editors have collaborated on a number of significant projects since 2000, including a range of research papers and monographs, collaborating on foundation grant research and government contract research, and the publication of two books (*Point, Click and Vote: The Future of Internet Voting* [Brookings Institution Press, 2004] and *Paper or Vapor: The Debate Over Electronic Voting* [Princeton University Press, forthcoming]).

### Contributors (in alphabetical order)

Delia Bailey is a Ph.D. candidate at the California Institute of Technology, where she studies statistical methodology. She has studied methodological issues associated with the analysis of the reliability of voting technologies and election reforms.

Fred Boehmke is an assistant professor of political science at the University of Iowa, and currently is a Robert Wood Johnston fellow at the University of Michigan. He is an expert on state politics, the initiative and referendum process, and political methodology.

Gamze Çavdar is an assistant professor of political science at Colorado State University, where she studies Middle Eastern politics.

Doug Chapin is executive director of electionline.org, and has analyzed policy developments associated with election reform and voting technology since the inception of electionline.org in the wake of the 2000 election.

Charles Franklin is professor of political science at the University of Wisconsin, and is an expert on political behavior, statistical methodology, and survey research.

Susan Hyde is an assistant professor of political science at Yale University. Her research has focused on international election monitoring, and on fraud prevention.

Jonathan N. Katz is a professor of political science at the California Institute of Technology, and is a member of the Caltech/MIT Voting Technology Project. His research has focused on electoral institutions and electoral behavior, and he is a leading scholar of statistical methodology.

D. Roderick Kiewiet is a professor of political science at the California Institute of Technology, and is a collaborator on the Caltech/MIT Voting Technology Project. He has authored or co-authored articles on several subjects, including the effects of economic conditions upon voting behavior, congressional elections, legislative politics, Russian politics, ethnic politics in California, state and local government, public school finance, and American political history.

Dan Knoepfle is an undergraduate student at the California Institute of Technology, where he is majoring in Biology and Economics. He has been studying election fraud and anomaly detection since his freshman year at Caltech.

Walter Mebane is a professor of Government at Cornell University, and has written many seminal studies on elections and electoral behavior; his expertise also includes political and statistical methodology.

Misha Myagkov is an associate professor of political science at the University of Oregon. He has studied elections and politics in the former Soviet Union and current Eastern European states, and is a leading figure in research literature regarding those regions of the world.

Peter Ordeshook is a professor of political science at the California Institute of Technology, and is a leading scholar of formal political theory and game theory in political science. He has published seminal studies in virtually every subfield of political science, and recently has focused research efforts on the former Soviet Union and East European politics.

Kathy Rogers is the Director of Election Administration for the State of Georgia. In 2002, she oversaw the state's transition to electronic voting statewide and the development of regulations to support this new system.

Ted Selker is an associate professor at the MIT Media and Arts Technology Laboratory, and is co-director of the Caltech/MIT Voting Technology Project. His research on voting and elections has focused on usability, election administration procedures, and the development of innovative new voting and election management technology.

Alberto Simpser is an assistant professor in political science at the University of Chicago. He has completed his dissertation on democratic accountability and electoral corruption, and will begin in the fall of 2006.

Tova Wang is the Democracy Fellow at The Century Foundation, and has been studying and writing about elections and election reform issues there since 2001, when she served on the professional staff of the National Commission on Federal Election Reform. Currently she is undertaking a study of election fraud for the United States Election Assistance Commission.

## Report refutes fraud at poll sites

Updated 10/11/2006 12:32 PM ET

By Richard Wolf, USA TODAY

WASHINGTON — At a time when many states are instituting new requirements for voter registration and identification, a preliminary report to the U.S. Election Assistance Commission has found little evidence of the type of polling-place fraud those measures seek to stop.

USA TODAY obtained the report from the commission four months after it was delivered by two consultants hired to write it. The commission has not distributed it publicly.

**NEW LAWS:** Thousands of voters shut out | Read the preliminary report

At least 11 states have approved new rules for independent voter-registration drives or requirements that voters produce specific forms of photo ID at polling places. Several of those laws have been blocked in court, most recently in Arizona last week. The House of Representatives last month approved a photo-ID law, now pending in the Senate.

The bipartisan report by two consultants to the election commission casts doubt on the problem those laws are intended to address. "There is widespread but not unanimous agreement that there is little polling-place fraud, or at least much less than is claimed, including voter impersonation, 'dead' voters, non-citizen voting and felon voters," the report says.

The report, prepared by Tova Wang, an elections expert at the Century Foundation think tank, and Job Serebrov, an Arkansas attorney, says most fraud occurs in the absentee ballot process, such as through coercion or forgery. Wang declined to comment on the report, and Serebrov could not be reached for comment.

Others who reviewed the report for the election commission differ on its findings. Jon Greenbaum of the liberal Lawyers' Committee for Civil Rights Under Law says it was convincing. The committee wrote to the commission Friday seeking its release.

Conservatives dispute the research and conclusions. Thor Hearne, counsel to the American Center for Voting Rights, notes that the Justice Department has sued Missouri for having ineligible voters registered, while dead people have turned up on the registration rolls in Michigan. "It is just wrong to say that this isn't a problem," he says.

That's one reason the commission decided not to officially release the report. "There was a division of opinion here," Chairman Paul DeGregorio says. "We've seen places where fraud does occur."

The consultants found little evidence of that. Barry Weinberg, former deputy chief of the voting section in the Justice Department's civil rights division, reviewed their work. "Fraud at the polling place is generally difficult to pull off," he says. "It takes a lot of planning and a lot of coordination."

### ***Best Practices for Facilitating Military & Overseas Voting (Section 242)***

#### ***Human Factors (Section 243)***

The EAC, in consultation with the Director of NIST, studied and assessed the areas of human factor research, including usability and human-computer/machine interaction that could be applied to voting products and system design to ensure usability and accuracy.

#### ***Guidance for Statewide Voter Registration Lists***

#### ***Voluntary Voting System Guidelines***

## **Underway**

### ***Statewide Voter Registration Lists - Technology Issues***

#### ***Best Practices for Recruitment, Retention, and Training of Poll Workers***

Sections 241(a) and 242(b) of HAVA direct EAC to periodically “conduct and make available to the public studies regarding... methods of recruiting, training, and improving the performance of pollworkers.” I

#### ***Best Practices for Recruitment, Retention, and Training of College Poll Workers***

The overall objectives of the project are to: (1) collect information on relevant state requirements; issues and options in college poll worker and poll assistant recruitment, training, retention; and effective methods of recruiting, training, and retaining such election workers, including sample materials used in these efforts; (2) produce a user-friendly recruitment manual that includes marketing and training materials; (3) conduct a pilot program in conjunction with colleges or universities in a minimum of three election jurisdictions during the 2006 election cycle; and (4) based on the pilot programs, provide recommendations for revisions to the manual and for future activities to benefit efforts to recruit, train, and retrain college poll workers.

#### ***Election Management Guidelines***

On June 29, EAC published its proposed VVSG for public comment. These guidelines augmented and updated the 2002 Voting System Standards. The first set of standards was promulgated in 1990. While there have been three editions of guidelines for voting equipment in the past 15 years, there is no companion document that covers the election administration and management aspects of the voting process. It is well known that deficiencies in procedures have just as much impact on the enfranchisement of voters and the outcome of elections as the functioning of voting machines.

For many years, the Voting Systems Board of the National Association of State Election Directors (NASSED) has called for the development of a set of election management guidelines to complement the technical standards for voting equipment. The EAC

recognized the need to create election management procedures to accompany the 2005 guidelines, and in Fiscal Year 2005 awarded a contract to develop election management guidelines.

Activities will begin by assembling a working group of experienced state and local election officials to provide subject matter expertise and to assist the project managers with the development of the guidelines. The project will focus on developing procedures related to the use of voting equipment and procedures for all other aspects of the election administration process. The election management guidelines will be available to all election officials if they wish to incorporate these procedures at the local and state levels.

### ***Vote Counts and Recounts***

Section 241(b)(13) - The major tasks associated with vote count research include: (1) review and analyze data collected on definitions of what constitutes a vote for each state by voting system; (2) draft comprehensive report that includes the data analysis and the state-by-state summary of definitions of what constitutes a vote for each voting system; and (3) review literature for methodologies used to establish best practices, and develop definitions of what shall constitute a best practice with respect to vote counts.

The major tasks associated with recount research include: (1) Review and analyze states' recount procedures; (2) draft a comprehensive report that includes the data analysis and the state-by-state summary of recount and contest procedures; and (3) develop definitions of what shall constitute a best practice with respect to recounts and contests of determinations.

After conducting the research, EAC will provide election officials throughout the country with a set of best practices for both vote counts and recounts.

### ***Provisional Voting***

Provisional voting in federal elections was created as a response to people who believed that they were registered to vote in 2000 but were turned away from the polling places because their names did not appear on the poll lists. HAVA Section 303(b) mandates that any eligible voter who appears at the polls must be given a provisional ballot if their name does not appear on the poll list. Provisional voting was not a new concept for all states, but in those jurisdictions enacting provisional voting for the first time, there was a lot of confusion surrounding the issue. Therefore, EAC awarded a contract to research the provisional voting requirements in each state, U.S. territory and the District of Columbia. EAC will then create guidance about implementing this important HAVA mandate, and make this information available to elections officials before the 2006 elections.

### ***Voter Identification***

HAVA Section 303(b) mandates that first-time voters who register by mail for a federal election provide proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the states for its implementation. In 2005, some states enacted new voter identification requirements in addition to what is required for federal elections, resulting

in many inquiries to EAC regarding the implications of these new state laws. To provide states with assistance when making decisions regarding voter identification laws, EAC is researching all of the relevant state laws and procedures relating to voter identification and produce related guidance, and make it available to elections officials before the 2006 elections.

#### ***Effective Designs for the Administration of Federal Elections***

Section 302(b) of HAVA requires the appropriate state or local election official to publicly post voting information at each polling place on the day of each election for federal office. Section 241(b) of HAVA describes ballot designs for elections for federal office as one of the election administration issues to be periodically studied to promote effective administration of federal elections. Therefore, EAC awarded a contract to develop best practices regarding the design of ballots and voter information posted in the polling place on Election Day. This effort will also include assistance with the redesign of the National Voter Registration Form to make it more accessible to all voters in terms of readability and usability.

#### ***Public Access Portal Design Conference***

Section 245(a) of HAVA mandates that EAC conduct a thorough study of issues and challenges presented by incorporating communications and internet technologies. Section 245(a)(2)(C) indicates that EAC may investigate the impact the new communications or internet technology systems for use in the electoral process could have on voter participation rates, voter education, and public accessibility. In addition, HAVA allows EAC to periodically study election administration issues, including methods of educating voters on all aspects of participating in elections.

One of the emerging technologies allowing voters to obtain information about voting that may affect participation rates and public accessibility is the public access portal, which is a website that disseminates voter education information. EAC conducted research to determine what information was available to voters during the last election cycle, and staff discovered that the information was duplicative, disorganized, and sometimes erroneous. Therefore, EAC will perform additional research on dissemination of information to voters, and then conduct a conference with election officials and technology experts to discuss the elements of implementing effective public access portals. EAC will then share the findings with election officials throughout the country to assist them in creating access portals that will serve their respective communities.

#### ***Language Minority Working Groups***

Section 241 of HAVA allows the EAC to carry out studies and other activities with the goal of promoting effective administration of federal elections. Effective administration methods are to be the most convenient, accessible, and easy to use for voters, including voters with limited proficiency with the English language. Section 241(b) (5) and (14) directly refer to conducting studies to address issues faced by voters with limited proficiency in the English language. To meet these requirements, in August EAC convened its first Hispanic Working Group meeting to provide guidance to the agency as it focuses on research to address language barriers to voting as well as input on the

readability and usability of the National Voter Registration Form, the National Mail-In Registration form and the updated List of Translated Election Terms. After conducting an initial assessment of these issues, the Working Group will assist the EAC in developing a Best Practices document containing methods of effective administration of federal elections affecting the Hispanic and Spanish-speaking communities.

Results and findings of all EAC research projects, best practices and guidance will be available to the public by accessing EAC's National Clearinghouse at [www.eac.gov](http://www.eac.gov).

#### ***Legal Resources Clearinghouse***

Section 241(b)(13) of HAVA allows EAC to study the laws and procedures used by each state that govern: recounts of ballots cast in elections for federal office; contests of determinations regarding whether votes are counted in such elections; and standards that define what will constitute a vote on each type of voting equipment used in the state to conduct elections for federal office. Consequently, EAC has awarded a contract to develop a legal resources clearinghouse. This web-based application will house a database containing statutes, regulations and rules as well as state and federal court decisions that impact the administration of elections for federal office under HAVA and/or the National Voter Registration Act. It will provide election officials, state legislators, government officials and the general public with a central location to conduct election administration research.

#### **To be Initiated This Year**

***A Study on the Effect of HAVA Voter Registration by Mail Requirements and a Study on the Use of Social Security Information in Voter Registration (Section 244)***

***Feasibility of Providing Free Absentee Ballot Postage (Section 246)***

### ***Legal Resources Clearinghouse***

Section 241(b)(13) of HAVA allows EAC to study the laws and procedures used by each state that govern: recounts of ballots cast in elections for federal office; contests of determinations regarding whether votes are counted in such elections; and standards that define what will constitute a vote on each type of voting equipment used in the state to conduct elections for federal office. Consequently, EAC has awarded a contract to develop a legal resources clearinghouse. This web-based application will house a database containing statutes, regulations and rules as well as state and federal court decisions that impact the administration of elections for federal office under HAVA and/or the National Voter Registration Act. It will provide election officials, state legislators, government officials and the general public with a central location to conduct election administration research.

### ***Best Practices for Recruitment, Retention, and Training of Poll Workers***

Sections 241(a) and 242(b) of HAVA direct EAC to periodically “conduct and make available to the public studies regarding... methods of recruiting, training, and improving the performance of pollworkers.” In response to this mandate and to the many election officials who continue to have difficulty recruiting and retaining poll workers, the EAC awarded a contract to identify strategies to address the shortage of poll workers.

The project will include conducting research about the state rules and procedures regarding poll workers and the kinds of resources available in the states to maintain adequate number of poll workers. EAC will then produce a manual encompassing a collection of best practices in poll worker recruitment, training, and retention as well as specific steps required to implement effective poll worker programs.

### ***Best Practices for Recruitment, Retention, and Training of College Poll Workers***

Section 501 of HAVA requires EAC to develop the HAVA College Program. Further, HAVA Section 502 states that EAC shall “develop materials, sponsor seminars and workshops, engage in advertising targeted at students, make grants, and take such other actions as is considers appropriate” to implement this program.

In accordance with HAVA sections 501 and 502, EAC conducted a grant program in 2004 designed to “(1) encourage students enrolled at institutions of higher education to assist state and local governments in the administration of elections by serving as non-partisan poll workers or assistants; and (2) to encourage state and local governments to use the services of the students participating in the program.”

The 2004 Help America Vote College Program was extremely well received overall, but several issues, most notably a short implementation timeline, may have hindered the program’s success.

Consequently, in Fiscal Year 2005 EAC awarded a contract to identify and build upon aspects of this program that were successful, to identify successful methods employed in the U.S. for similar programs, and to allow for replication in as many jurisdictions as possible. This project will examine the differences among community colleges, public

institutions, and private universities. It will seek to determine if varying strategies for college poll worker recruitment are more effective at different types of educational institutions.

The overall objectives of the project are to: (1) collect information on relevant state requirements; issues and options in college poll worker and poll assistant recruitment, training, retention; and effective methods of recruiting, training, and retaining such election workers, including sample materials used in these efforts; (2) produce a user-friendly recruitment manual that includes marketing and training materials; (3) conduct a pilot program in conjunction with colleges or universities in a minimum of three election jurisdictions during the 2006 election cycle; and (4) based on the pilot programs, provide recommendations for revisions to the manual and for future activities to benefit efforts to recruit, train, and retrain college poll workers.

#### ***Vote Counts and Recounts***

Section 341(b)(13) of HAVA allows EAC to study the laws and procedures used by each state that govern: recounts of ballots cast in elections for federal office; contests of determinations regarding whether votes are counted in such elections; and standards that define what will constitute a vote on each type of voting equipment used in the state to conduct elections for federal office. Consequently, in Fiscal Year 2005 EAC awarded a contract to conduct research activities to develop best practices on vote count and recount procedures.

The major tasks associated with vote count research include: (1) review and analyze data collected on definitions of what constitutes a vote for each state by voting system; (2) draft comprehensive report that includes the data analysis and the state-by-state summary of definitions of what constitutes a vote for each voting system; and (3) review literature for methodologies used to establish best practices, and develop definitions of what shall constitute a best practice with respect to vote counts.

The major tasks associated with recount research include: (1) Review and analyze states' recount procedures; (2) draft a comprehensive report that includes the data analysis and the state-by-state summary of recount and contest procedures; and (3) develop definitions of what shall constitute a best practice with respect to recounts and contests of determinations.

After conducting the research, EAC will provide election officials throughout the country with a set of best practices for both vote counts and recounts.

#### ***Voting Fraud and Voter Intimidation Project***

Section 241 enumerates a number of periodic studies of election administration issues which the EAC may elect to conduct. "On such periodic basis as the Commission may determine, the Commission shall conduct and make available to the public studies regarding the election administration issues described in subsection (b)." Sections 241(b)(6) and (7) list the following election administration issues: nationwide statistics

and methods of identifying, deterring, and investigating voting fraud in election for federal office; and identifying, deterring, and investigating methods of voter intimidation.

Building on this reference to studies of voting fraud and voting intimidation, EAC awarded a contract to perform the following tasks: (1) identify what constitutes voting fraud and voter intimidation affecting federal elections; (2) perform background research, including federal and state-by-state administrative and case law review related to voting fraud and voter intimidation and a review of current voting fraud and voter intimidation activities taking place with key government agencies and civic and advocacy organizations; (3) identify, in consultation with EAC, and convene a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation; and (4) author a report summarizing the key findings, including suggestions for specific activities that EAC may undertake to address these topics.

### ***Provisional Voting***

Provisional voting in federal elections was created as a response to people who believed that they were registered to vote in 2000 but were turned away from the polling places because their names did not appear on the poll lists. HAVA Section 303(b) mandates that any eligible voter who appears at the polls must be given a provisional ballot if their name does not appear on the poll list. Provisional voting was not a new concept for all states, but in those jurisdictions enacting provisional voting for the first time, there was a lot of confusion surrounding the issue. Therefore, EAC awarded a contract to research the provisional voting requirements in each state, U.S. territory and the District of Columbia. EAC will then create guidance about implementing this important HAVA mandate, and make this information available to elections officials before the 2006 elections.

### ***Voter Identification***

HAVA Section 303(b) mandates that first-time voters who register by mail for a federal election provide proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the states for its implementation. In 2005, some states enacted new voter identification requirements in addition to what is required for federal elections, resulting in many inquiries to EAC regarding the implications of these new state laws. To provide states with assistance when making decisions regarding voter identification laws, EAC is researching all of the relevant state laws and procedures relating to voter identification and produce related guidance, and make it available to elections officials before the 2006 elections.

### ***Effective Designs for the Administration of Federal Elections***

Section 302(b) of HAVA requires the appropriate state or local election official to publicly post voting information at each polling place on the day of each election for federal office. Section 241(b) of HAVA describes ballot designs for elections for federal office as one of the election administration issues to be periodically studied to promote effective administration of federal elections. Therefore, EAC awarded a contract to develop best practices regarding the design of ballots and voter information posted in the

polling place on Election Day. This effort will also include assistance with the redesign of the National Voter Registration Form to make it more accessible to all voters in terms of readability and usability.

***Minority Language Working Groups***

Section 241 of HAVA allows the EAC to carry out studies and other activities with the goal of promoting effective administration of federal elections. Effective administration methods are to be the most convenient, accessible, and easy to use for voters, including voters with limited proficiency with the English language. Section 241(b) (5) and (14) directly refer to conducting studies to address issues faced by voters with limited proficiency in the English language. To meet these requirements, EAC convened meetings of its Hispanic Working Group and its Asian Working Group to provide guidance to the agency as it focuses on research to address language barriers to voting as well as input on the readability and usability of the National Voter Registration Form, the National Mail-In Registration form and the updated List of Translated Election Terms. After conducting an initial assessment of these issues, the Working Groups will assist the EAC in developing a Best Practices document containing methods of effective administration of federal elections affecting the Hispanic and Asian communities.

Results and findings of all EAC research projects, best practices and guidance will be available to the public by accessing EAC's National Clearinghouse at [www.eac.gov](http://www.eac.gov).

## **Alaska Report**

### **Think globally, protect the vote locally**

**December 7th, 2006**

By Paul Rogat Loeb - Just as local cities have adopted environmental and wage laws that exceed federal standards, maybe it's time for local initiatives protecting the sanctity of the vote. We've been seeing electoral abuses and manipulations since the Bush administration took power. So we need to ensure the Democrats make national electoral protection a priority. But we can also act on a local level.

Though the Democratic surge took back the Senate and House, some ugly actions quite likely shifted several close Congressional races. The poster race for this election's abuses, appropriately, is Katherine Harris's old Congressional district in Sarasota, FL. Whether through manipulation or error, electronic voting machines in that district logged 18,000 fewer votes in this neck-and-neck congressional race than for governor or senator, and fewer than wholly uncontroversial down-ballot races like the Sarasota Public Hospital Board. Whatever the causes, these votes disappeared in a county that Democrat Christine Jennings carried by 53 percent, and would have likely allowed her to defeat Republican Vern Buchanan.

Harris's district saw more than just voting machine problems. In the Jennings/Buchanan election as in over 50 key races throughout the country, Republicans called voters again and again with automated robocalls that led with the name of the Democratic candidate, and then followed with scurrilous attacks. Because voters tend to hang up on these harassing calls as soon as they begin, or delete them from answering systems, many assumed they were coming from the Democrats, so switched their votes in anger. Volunteers all over the country heard people say they'd never vote for Democratic candidates, they were so furious at the presumed source of this harassment. As a Venice, Florida, man wrote to the Sarasota Herald Tribune, "So Christine Jennings lost by 368 votes. I think I can tell her why. She should sit at home and have the telephone ring twice a day, at lunch and dinner time, for two or three weeks, and then decide if she should vote for the person doing the calling."

In Maryland, the Democrats won, but Republicans bused in homeless men from Philadelphia to hand out fliers in black neighborhoods featuring photographs of former Congressman Kweisi Mfume and Prince Georges County executive Jack Johnson. "Ehrlich-Steele Democrats," proclaimed the flier, and announced: "These are OUR

Choices," as if Mfume and Johnson had endorsed Republican gubernatorial and senatorial candidates, Robert Ehrlich and Michael Steele. Since both Mfume and Johnson unequivocally supported their fellow Democrats, it was a blatant lie, as were the accompanying fliers headlined "Democratic Sample Ballot" with boxes checked in red promoting Ehrlich and Steele.

These weren't the only abuses. Republican-linked calls in various states gave misleading information on polling locations or told legitimate voters that they were registered in other states so would be arrested if they voted. A letter to Latino voters in Orange County, CA threatened jail to all immigrants who voted, ignoring that many were naturalized citizens. In Tucson, the Mexican American Legal Defense and Educational Fund photographed armed men attempting to prevent Hispanic voters from entering polling places. In Texas, a federal judge stopped Republican Attorney General Greg Abbott from prosecuting 13 largely elderly Democrats who took sealed absentee ballots from their friends to place in mail boxes. The abuses probably weren't on the level of 2000 or 2004, in part because of major coordinated voter protection efforts where citizens monitored the polls and had lawyers on call for instant intervention. But they were substantial enough to have probably diminished the margin of their victory.

To prevent similar future abuses, Barack Obama's Deceptive Practices and Voter Intimidation Prevention Act would make it a felony to give deliberately misleading information on the time, date or location of elections, or about voter eligibility. New Jersey Congressman and former Princeton physicist Rush Holt has offered the Voter Confidence and Increased Accessibility Act, mandating a verifiable paper trail for all election machines, requiring random audits to ensure ballots are properly counted, and banning wireless connections to make machines less vulnerable to hacking. Holt's bill had a majority of House members supporting it even before the past election, and should have an irrefutable additional argument with the meltdown of the machines in the Jennings/Buchanan race (not to mention the inability of Republicans to do comprehensive recounts in states like Virginia, where most machines lacked a paper trail). An even stronger and more secure alternative would be Dennis Kucinich's HB 6200, mandating paper ballots hand counted at the precinct level.

The Democrats need to do all they can to pass this legislation. They also need to ensure that that new state and federal voter identification laws don't disenfranchise poor and minority voters, as seems to be their frequent intent, and that abuses like the misleading robocalls carry the maximum possible penalties (which might mean outlawing robocalls of all kinds). In the process, they can hold visible hearings on the entire Republican legacy of purged voters, tossed provisional ballots, and voting machines pulled from key

Democratic districts (perhaps building on the unofficial hearings convened by incoming House Judiciary Committee chair John Conyers about pervasive Republican-linked abuses in Ohio, during the 2004 election). If the Republicans filibuster or Bush vetoes these laws, citizens need to ensure the Democrats keep pressing the issue.

But just as local minimum wage and environmental ordinances often surpass federal standards, we don't have to rely entirely on national efforts to protect the vote. Because most of the areas targeted by voter suppression attempts are urban and minority communities, Democratic mayors, county executives and governors already control many of the key jurisdictions. They just need to act on the potential power that they have.

Where useful local laws already exist, elected officials can use them to hold the perpetrators of these abuses accountable for every instance. The New Hampshire Attorney General's office already threatened the National Republican Congressional Committee with prosecution under a state law mandating \$5,000 fines for each prerecorded calls to anyone on the national do-not-call list. Activists now need to convince the state to prosecute the NRCC for the 200,000 illegal calls they made before finally stopping a suit that would potentially bankrupt the NRCC if successful. Former Bush-Cheney New England coordinator James Tobin has already been convicted for an illegal phone-jamming operation during the 2002 New Hampshire Senate campaign. Other states may be able to sue the NRCC and their allies as well. Perhaps former Congressman Mfume and County Executive Johnson could even sue the Republican creators of the leaflets that featured their picture-arguing that this reckless disregard for the truth defames their good name by implying they endorse politicians they diametrically oppose. Whether or not these suits entirely succeed, they'd keep these profoundly antidemocratic actions in the public eye.

Passing tough new local laws to protect the vote could create an immediate check against voter suppression in a situation where the Bush administration is unlikely to prosecute its own political allies. California, Connecticut, Illinois, Minnesota, and Wisconsin already have laws with strong penalties. Since the election, elected officials in Missouri, Florida, Virginia, Pennsylvania, and Wisconsin have introduced bills to protect citizens from automated robocalls. Michigan already had a robocall bill on the agenda, and some Connecticut legislators are reportedly interested in addressing this as well. Statewide same-day registration laws, like those in Idaho, Maine, Minnesota, Wisconsin, and North Dakota can also counter the possibility of politically driven voter purges or refusals to accept people's registrations, not to mention encouraging voter participation in general. If state and local voter protection laws were enacted before 2008, they could prove a major

deterrent against the kinds of abuses we've seen in the past several elections, ensuring their perpetrators could be prosecuted no matter who won at the national level.

We still need strong national laws to safeguard elections in Republican controlled states- Florida, for instance, has continued its voter purges, and instituted draconian procedures and penalties that have made it virtually impossible for groups like the League of Women Voters to even begin major registration drives. But even in these situations, local initiatives can mitigate disenfranchisement. In the most recent election, California's since-defeated Republican Secretary of State Bruce McPherson tried to reject 40% of new registrants, primarily Democratic-leaning Hispanics, by claiming they didn't match state databases. In response, the office of Los Angeles mayor Antonio Villagrosa contacted those purged, verified their information, and got almost all of them back on the rolls. Local officials in Miami, Tampa, and Orlando could have done the same to challenge Jeb Bush and Catherine Harris when they gave Bush his 2000 victory by knocking out 94,000 largely Democratic and minority voters for supposedly being disenfranchised felons-a BBC follow-up found that 90 percent of those scrubbed were legitimate voters. Officials in Cleveland and Columbus might have countered Ken Blackwell's purging of 300,000 largely Democratic voters in 2004, his pulling of voting machines from key urban neighborhoods, and his refusal to count ballots cast in the wrong precincts. Strong local laws and aggressive citizen oversight can counter electoral manipulation even while the federal executive branch remains in the hands of a party that's benefiting from its use.

Imagine if the Republicans risked jail for making misleading Robocalls into Philadelphia or Cleveland, Houston, Miami, or Albuquerque, or for telling voters they'd be arrested for voting while being behind on their rent. Imagine if they ran this risk whether or not the Feds intervened. The stronger the local laws, the more they could set a federal standard. The recent election has created a window of opportunity to help protect the vote, for now and in the future. Linking national and local protection efforts could help ensure that this actually happens.

## Analysis of the September 15, 2005 Voter Fraud Report Submitted to the New Jersey Attorney General

by

The Brennan Center for Justice at NYU School of Law

and

Dr. Michael McDonald of George Mason University

---

December 2005

---

According to a recent report submitted to the New Jersey Attorney General, 63-year-old K \_\_\_\_\_ Sullivan was so determined to vote in the November 2, 2004, election that she voted in person in Cape May and then drove to Bergen – or vice versa – traveling 161 miles across the length of the state so that she could vote in person a second time.

There is something bizarre afoot here, but it probably has little to do with Ms. Sullivan. Rather, the problem is with the report – a flawed partisan document stirring up the specter of voter fraud by listing thousands of allegedly illegitimate voters. Among other things, the report included lists of purportedly illegitimate votes in New Jersey in the 2004 general election, including lists of 10,969 individuals who purportedly voted twice and lists of 4,756 voters who were purportedly dead or incarcerated in November 2004. These lists were submitted to the Attorney General in mid-September, as exhibits to a report demanding that New Jersey counties purge their voter files based on the findings therein. The report's findings were widely publicized, in New Jersey and elsewhere.

We obtained the lists of voters submitted to the New Jersey Attorney General, as well as a copy of the New Jersey county voter registration files, and have conducted an initial investigation of the report's claims.

**Our analysis shows that the lists submitted to the New Jersey Attorney General are substantially flawed, and must not be used to interfere with New Jersey citizens' right to vote.**

These suspect lists were compiled by attempting to match the first name, last name, and birth date of persons on county voter registration files. Entries that supposedly "matched" other entries were apparently deemed to represent the same individual, voting twice. This methodology is similar to the method used in compiling the notoriously inaccurate Florida "purge lists" of suspected ineligible felons in 2000 and 2004. As Florida's experience shows, matching names and birthdates in the voter registration context is a tricky business, and can easily lead to false conclusions – as was almost certainly the case here.

Care and caution are required in any attempt to accurately match information in one data system with information in another, but special care must be taken when individual rights are at stake to make sure that unreliable matching results are not used to deprive individuals of their fundamental right to vote. Unfortunately, that level of care appears to be absent from the lists submitted to the Attorney General. As a result, neither these lists nor any that are compiled in a similar manner should form the basis of any decision that would impede any voter's registration status or access to the ballot.

Our review reveals several serious problems with the methodology used to compile the suspect lists that compromise the lists' practical value. For example, the data used in the report from one county appears to be particularly suspect and anomalous, and may have substantially skewed the overall results. In addition, middle initials were ignored throughout all counties, so that "J \_\_\_\_\_ A. Smith" was presumed to be the same person as "J \_\_\_\_\_ G. Smith."<sup>1</sup> Suffixes were also ignored, so that fathers and sons – like "B \_\_\_\_\_ Johnson" and "B \_\_\_\_\_ Johnson, Jr." – were said to be the same person.

More fundamentally, underlying many of the entries on these lists, and similar lists compiled in Florida and elsewhere, is a presumption that two records with the same name and date of birth must represent the same person. As we explain in this analysis, this presumption is not consistent with basic statistical principles. Even when votes appear to have been cast in two different cities under the same name and birth date, statistics show that voter fraud is not necessarily to blame. With 3.6 million persons who voted in the 2004 election in New Jersey, the chance that some have the same name and birth date is not far-fetched. Which is more reasonable: that there are two K \_\_\_\_\_ Sullivans born on July 5, or that one 63-year-old woman drove three hours across the state, from Cape May to Bergen, to make sure that she voted twice on Election Day?<sup>2</sup>

Individual examples like Ms. Sullivan's purported Election Day journey may seem trivial once they are caught and debunked. But the potential for harm is no laughing matter. Using flawed lists like these to purge the registration rolls would inevitably lead to disfranchisement of eligible voters and disruption at the polls when the eligible citizens arrive to vote in the next election. The voters deserve better. New Jersey should forswear use of the lists – and any list constructed with similarly flawed methods – to question the eligibility of voters of any political affiliation.

---

<sup>1</sup> The names used in this report represent actual entries in datafiles submitted to the New Jersey Attorney General. In order to understand the methodological flaws involved in the compilation of the datafiles, it is important to cite particular examples. But in order to protect individual privacy, we have reprinted only the first initial of each voter's given name. A discussion of "John A. Doe" and "John B. Doe" therefore appears in this analysis as "J \_\_\_\_\_ A. Doe" and "J \_\_\_\_\_ B. Doe." In each instance comparing one voter to another, these abbreviations ("J \_\_\_\_\_" and "J \_\_\_\_\_") represent the same first name.

<sup>2</sup> This is, obviously, a rhetorical question highlighting a methodological flaw in the report. But the question also has a real answer: a quick telephone inquiry confirmed that two different New Jersey residents named K \_\_\_\_\_ Sullivan were born on the same date; each voted separately (and quite legally) in 2004.

## Background: The September 15, 2005 Report and Accompanying Lists

The following analysis documents several of the methodological flaws in the lists of voters included as exhibits to the voter fraud report submitted to the New Jersey Attorney General on September 15, 2005. The analysis is based on methodology only: we have not gained access to original documents related to registration or original pollbook records; we have only recently acquired and compiled copies of the counties' original registration datafiles, which contain some notable gaps; and the lists submitted to the Attorney General contain significant errors and little documentation, which complicates the analysis. Nonetheless, the information we have collected so far is sufficient for the purposes of generally assessing the quality of the evidence presented to support the September 15 report. Our review of the suspect lists reveals that the evidence submitted does not show what it purports to show: cause for concern that there is serious risk of widespread fraud given the state of the New Jersey voter registration rolls.

The suspect lists were apparently prepared by assembling and compiling voter registration files from New Jersey's counties. It is clear that these registration files were subjected to data processing to format the data uniformly, but no documentation was submitted with the files to explain how the processing was done. All that we have is the end product: several lists of New Jersey voters that allegedly reveal fraud or the potential for fraud.

Most of these lists were apparently constructed by attempting to find each citizen's registration and voting records – across counties and supplemented by external data – by matching the first name, last name, and date of birth associated with each record. For example, all registration and voting data for any “J \_\_\_\_\_ Smith” born on June 6, 1960 were apparently compiled and merged into one record, showing that such a J \_\_\_\_\_ Smith registered in one New Jersey town and voted there in 2004, and that such a J \_\_\_\_\_ Smith registered in a different New Jersey town and voted there in 2004.

The report submitted to the Attorney General analyzes these compiled records. It concludes – for example – that the J \_\_\_\_\_ Smith records above show not two “J \_\_\_\_\_ Smiths” born on the same day, but that a single individual voted twice. Indeed, the report claims, in similar fashion, that the data reveal widespread voter fraud in the 2004 general election, including approximately 4,397 individuals in New Jersey who allegedly voted twice. **These claims, however, are not supported by the evidence submitted.**

## Analysis of the Double-Voting Claim

Even a cursory examination of the lists suffices to show that the claims of widespread fraud are greatly exaggerated. For example, although the allegations of multiple voting are presented as though they are based on reliable evidence that the same person has voted more than once, 80% of the relevant records – 3,532 voters on the list – are labeled on the New Jersey double-voting list as “less likely” indications of a double-vote. This caveat appears nowhere in the accompanying report to the Attorney General or in the press reports of the report’s findings.

It is also curious that only 0.6% of the voters on the lists are alleged to have voted more than twice. Why would a miscreant committed to perpetrating voter fraud stop at just two votes, rather than voting again and again and again?

The simplest answer, of course, is that the lists do not show fraud at all, but reveal instead only methodological problems with the way in which they were constructed. Attempts to match data on one list to data on another list will often yield “false positives”: two records that at first appear to be a match but do not actually represent the same person. The natural incidence of “false positives” for a matching exercise of this scale – especially when, as here, conducted with relatively little attention to detail – readily explains the ostensible number of double votes. It also explains the extremely low incidence of individuals who appear to vote three or more times: it is relatively rare that three “false positives” will all be tied to each other, unless the data to be matched is extremely common. And that it is why it is also no surprise that among the 27 citizens labeled on the suspect lists as voting three or more times in 2004, we find individuals with extremely common names, like “P \_\_\_\_\_ Smith” or “R \_\_\_\_\_ Miller,” or “L \_\_\_\_\_ Wong.”

Common sense thus indicates that whatever is going on here is not a sudden wave of voter fraud. Digging a little deeper into the substance of the lists submitted to the New Jersey Attorney General yields even more reason to be skeptical of the double-voting claims. Consider, for example, a detailed analysis of the 4,397 individuals alleged to have voted multiple times in New Jersey in 2004.

1. *Probable data duplication error: same name, same birth date, same address*

1,803 of these 4,397 records of ostensibly illegal votes seem to be the product of a glitch in the compilation of the registration files. These records reflect two registration entries by the same person from the same address, with a notation next to each that the individual has voted. For example, 55-year-old W \_\_\_\_\_ A. Connors, living at 253 B \_\_\_\_\_ Ave. in a New York commuter suburb, is listed on the datafiles submitted to the Attorney General with an (erroneous) first registration date in 1901 and a second registration date in 1993; Mr. Connors is thus represented twice on the datafiles submitted. Each of these entries also indicates that W \_\_\_\_\_ A. Connors at 253 B \_\_\_\_\_ Ave voted in 2004.

There is no credible indication, however, that Mr. Connors actually *voted* twice; indeed, given the clearly erroneous registration date on the files, it is far more likely that data error is to blame for the doubly logged vote as well. To believe that Mr. Connors voted twice, we would have to believe that he walked into the polling place, signed the poll book in front of a pollworker, and voted – and then returned to the *same* polling place, again signed the poll book in front of the pollworker, in a spot precisely adjacent to the prior signature, and again voted – all without arousing suspicion. And we would have to believe that 1,802 other voters did precisely the same. We would have expected at least one poll worker to notice one of these 1,803 individuals attempting to sign a poll book under the same name at the same address in the same precinct more than once.<sup>3</sup>

There is, of course, a more plausible explanation. The bulk of these 1,803 records may be traced to irregularities in the data processing and compilation process for one single county: the Middlesex County registration file accounts for only 10% of registered voters in the state but 78% of these alleged double votes. This does not prove a massive double-voting scheme in Middlesex County. Rather, it indicates a data processing problem with the Middlesex County datafile: a far more likely explanation than voter fraud for the fact that 89% of the Middlesex voters on the suspect lists are listed as double-voting from the same address. Indeed, the suspect lists themselves contain an acknowledgment that the problem in Middlesex is probably not fraud: 99% of these Middlesex voters are labeled on the lists submitted to the Attorney General with a notation that the record is “less likely” to indicate an illegal double vote .

---

<sup>3</sup> Eight of these records reflect registration addresses that are ostensibly different, but which on closer examination almost certainly reflect two records for the same person at the same physical address. Examples include records for individuals with the same name and birth date at “1/2 413 Summer St. 1” and “413 1/2 Summer St. 1”; “64 W. 10<sup>th</sup> St. 2” and “64 W. 10<sup>th</sup> St.”; and “602 Sooy Ln.” and “604 Sooy Ln.”

2. *Probable data entry errors: different name, same birth date, same address*

Another 1,257 entries of the 4,397 records probably represent similar data errors – also largely driven by a likely glitch in the Middlesex County file, which is also vastly overrepresented in this category. These records show ever-so-slight variations in records listed with the *same date of birth at the same address*: for example, the same first and last names, but different middle initials or suffixes (e.g., J \_\_\_\_\_ T. Kearns, Sr., and J \_\_\_\_\_ T. Kearns, Jr., both born the same day and living at the same address; or J \_\_\_\_\_ E. Allen and J \_\_\_\_\_ P. Allen, born the same day and living at the same address).

As above, it is extremely unlikely that two votes were actually cast here. Again, the files show errors: J \_\_\_\_\_ E. Allen is listed as registered in 1901, while J \_\_\_\_\_ P. Allen, born on the same day and living at the same address, is listed as registered in 2003. And again, to believe that Mr. Allen voted twice, it would be necessary to believe that he arrived twice at the polling place to sign his name in front of a pollworker in adjacent spaces on the poll books, without arousing any suspicion – and that 1,256 other voters did likewise.

Instead, it is far more likely that the listed votes represent a data error. Without access to the original registration records, it is impossible to determine where the mistake lies – for example, whether J \_\_\_\_\_ T. Kearns, Sr. and J \_\_\_\_\_ T. Kearns, Jr. were in fact born on different days, or whether the “Jr.” suffix is instead mistaken. A clue to the origin of the problem is that the original Middlesex County voter registration file does not list a birth date for any individual; we do not know how the authors of the September 15 report obtained birth date information for their matching purposes, or what errors may have been introduced during this process. What *is* clear is that the files do not establish a presumption that J \_\_\_\_\_ T. Kearns, Sr. and J \_\_\_\_\_ T. Kearns, Jr. represent one individual who fraudulently voted twice.<sup>4</sup>

---

<sup>4</sup> Some records in the file submitted to the Attorney General contain three different entries of registration information, so that registration information for F \_\_\_\_\_ DeLuca, F \_\_\_\_\_ M. DeLuca, and F \_\_\_\_\_ C. DeLuca may all be conflated in one record. It is therefore possible for one record to reflect more than one type of the errors or irregularities discussed above.

*3. Probable different individuals: different name, same birth date, different address*

Approximately 800 of the entries on the list likely represent different people, with different addresses and different middle initials or suffixes. For example, W\_\_\_\_\_ S. Smith, living in a northern New Jersey town, and W\_\_\_\_\_ C. Smith, living in another town two hours away, share the same date of birth but are not the same person. Nor are T\_\_\_\_\_ Brown, living in a New York commuter suburb, and T\_\_\_\_\_ H. Brown, Jr., living in a small town over an hour west, despite the fact that they also share the same birth date.

About three-quarters of the entries in this category reveal data that affirmatively conflict – for example, a middle initial (“W\_\_\_\_\_ S.”) in one case, and a different middle initial (“W\_\_\_\_\_ C.”) in another, listed at different addresses. There is absolutely no good reason to conclude that these individuals are in fact the same, when the available evidence indicates the contrary.

For approximately 200 of the entries in this category, however, less information is available. These entries show a middle initial (“J\_\_\_\_\_ W. Davis”) in one case, and no middle initial (“J\_\_\_\_\_ Davis”) in another – again, at different addresses. The lack of the middle initial is ambiguous: it could mean that one of the J\_\_\_\_\_ Davises in question has no middle name, or it could mean that the middle initial was simply omitted in a particular registration entry. Although these entries involve less conclusive affirmative evidence of a false match than the entries noted above, there is still no good reason to believe that “J\_\_\_\_\_ W. Davis” and “J\_\_\_\_\_ Davis,” at different addresses, represent the same person. As explained in further detail below, the incidence of individuals sharing the same name and birth date is sufficiently common that no valid conclusion of a fraudulent vote can be drawn here.

*4. Unwarranted assumptions given errors in the listed date of birth*

Of the individuals remaining, there are serious concerns with the accuracy of the dates of birth. Seven voters were apparently born in January 1, 1880 – which is most likely a system default for registrations lacking date-of-birth information. For 227 voters, only the month and year of birth are listed: this means only that two voters with the same name were born in the same month and year, an unsurprising coincidence in a state of several million people.

5. *Unwarranted assumptions given the statistics of name-and-birthday matching*

That leaves approximately 289 votes cast under the same name and birth date – like votes cast by “P \_\_\_\_\_ S. Rosen,” born in the middle of the baby boom – but from two different addresses.<sup>5</sup> It may appear strange, but there may be two P \_\_\_\_\_ S. Rosens, born on the same date in 1948 – and such coincidences are surprisingly common. Of course, for any one person, the odds of someone else having the same name and birth date is small. But because there are so many voters in New Jersey, a sizable number will have the same name and birth date simply by chance.

In a modestly sized group, the probability that two people have the same birthday – day and month – is, for many observers, surprisingly high. In a group of just 23 people, it is more likely than not that two will share the same birthday. For 40 people, the probability is 90%. These statistics are known as the “Birthday Problem,” which is often used to introduce students to counterintuitive results in statistics and probability.

Applying the “Birthday Problem” to voter registration lists is fairly straightforward. By including the year (and thus the full birth date), the statistics change somewhat, but the threshold is still surprisingly small to many: given some reasonable assumptions about the average lifespan, the probability that at least two of 150 people have the same exact birth date – day, month, and year – is 50%. And in a group of 300 people, the probability that two share a birth date match is approximately 90%.

Imagine that our group contains all of the registered New Jersey voters with a given first name and last name – such as all of the 417 Robert Smiths who are listed on New Jersey records as voting in 2004. The probability that at least two of these 417 individuals have the same birth date – day, month, and year – approaches 100%. The fact that two Robert Smiths with the same birthday voted in 2004 thus indicates not voter fraud, but a straightforward application of the “Birthday Problem.”

Indeed, the probabilities above likely *underestimate* the chance that a group of voting Robert Smiths share the same birth date, because the above calculations assume that birthdays are randomly distributed when, in fact, they are not. Certain given names are more common in certain years (it would be unsurprising to find two Jessica Smiths born on the same day in 1985, or Lisa Smiths in 1965, or Mildred Smiths in 1925). Likewise, the prevalence of surnames will fluctuate with the immigration patterns of particular ethnicities, which vary from decade to decade. Because older individuals vote at higher rates than younger people, too, we would expect a clustering of voting “Robert Smiths” weighted toward years past. Finally, birth dates themselves are not evenly distributed, as obstetricians are more likely to induce labor during the work week.

---

<sup>5</sup> Actually, we know only that these records share a first name, last name, and middle initial – but we cannot know from the lists submitted whether the same middle initial represents the same middle name. The “S.,” for example, could stand for “Stephen” or “Samuel” or “Stanley” or “Stuart,” or any other name beginning with “S,” or – famously following the sitting President – “S” could stand for nothing at all.

First Name	Last Name	Frequency
ROBERT	SMITH	417
JAMES	SMITH	368
WILLIAM	SMITH	365
JOHN	SMITH	321
MICHAEL	SMITH	256
ROBERT	JOHNSON	252
MARY	SMITH	249
ROBERT	BROWN	247
MARIA	RODRIGUEZ	242
ROBERT	MILLER	242
JOSE	RODRIGUEZ	241
THOMAS	SMITH	234
JAMES	BROWN	227
JOHN	MILLER	226
RICHARD	SMITH	223
JOHN	MURPHY	216
DAVID	SMITH	216
ROBERT	WILLIAMS	211
PATRICIA	SMITH	207
BARBARA	SMITH	204
JAMES	JOHNSON	204
WILLIAM	JOHNSON	202
JOHN	WILLIAMS	202
ROBERT	JONES	199
JOHN	KELLY	196

**25 Most Common Names of 2004 Voters  
from New Jersey Voter Registration Files**

To demonstrate the magnitude of potential birth date matches, we provide the 25 most common first and last names of persons with a record of voting in the 2004 general election, as recorded on the New Jersey voter registration rolls. For every one of these combinations, it is statistically more likely than not that at least two voters share the same exact birth date. Even for less common names, a shared birth date is less rare than one would intuit – and with almost 150,000 names listed at least twice on the voting rolls, it is not surprising to discover that more than a handful share the same birth date. Many, if not most, of the 289 alleged double votes of persons registered at different addresses most likely reflect two separate individuals sharing a first name, last name, middle initial, and birth date.<sup>6</sup> The suspect lists alone do not establish convincing, much less conclusive, evidence of widespread fraud.

---

<sup>6</sup> Triple birth date matches are rare, but not impossible, given the frequency with which some names appear on the rolls. It is therefore telling that only 0.6% of the alleged fraudulent votes – rare, but not impossible – are attributed to more than three or more votes under one name.

## Implications for the Other Claims in the Sept. 15 Report

Similarly, the other claims asserted in the report to the Attorney General – that New Jersey votes cast in the 2004 election reflect the same name and birth date as deceased and incarcerated persons and people in other states – are more likely a statistical coincidence or the result of data errors than evidence of actual vote fraud. And there are methodological problems with the report's other claims beyond the issues addressed above. For example, the report's curious use of the country's *most* common names in attempting to match incarcerated individuals to 2004 votes actually *increases* the chance that the same name and the same birth date will be shared by two different individuals. We cannot fully evaluate these claims at this time since we do not currently have access to the lists of deceased individuals, prisoners, and voters in other states that were used as grist for the claims submitted, but if such lists or files are made available to us, we will review the claims thoroughly to determine their merit.

Finally, the September 15 report makes much of the raw potential for foul play based on the unsurprising fact that there are voters who appear on the New Jersey registration rolls more than once. As noted above, many of the names identified reflect two different individuals and not simply duplicate entries. But we have no doubt that there are duplicate entries on New Jersey's registration rolls. It is well-known that voter registration rolls contain "deadwood" – registration entries for individuals no longer living at a given address or deceased. There is no evidence, however, that these extra registrations are used for widespread illegal voting. Moreover, the problem of deadwood will soon be largely resolved: both the National Voter Registration Act of 1993 and the Help America Vote Act of 2002 require states to implement several systems and procedures as of January 1, 2006, that will clean the voter rolls of duplicate or invalid entries while protecting eligible voters from unintended disfranchisement.

Unlike the voter list maintenance systems envisioned by Congress, using lists compiled like the flawed lists here as a basis for purging the voter rolls affords voters no protections from erroneous disfranchisement. In their haphazard assessment of ostensible fraud, these lists are massively overinclusive, and if used improperly, are virtually guaranteed to exclude many eligible voters. The purges and challenges nearly implemented in Florida and Ohio in 2004 revealed the dangers of list management on the fly; we should learn from those mistakes.

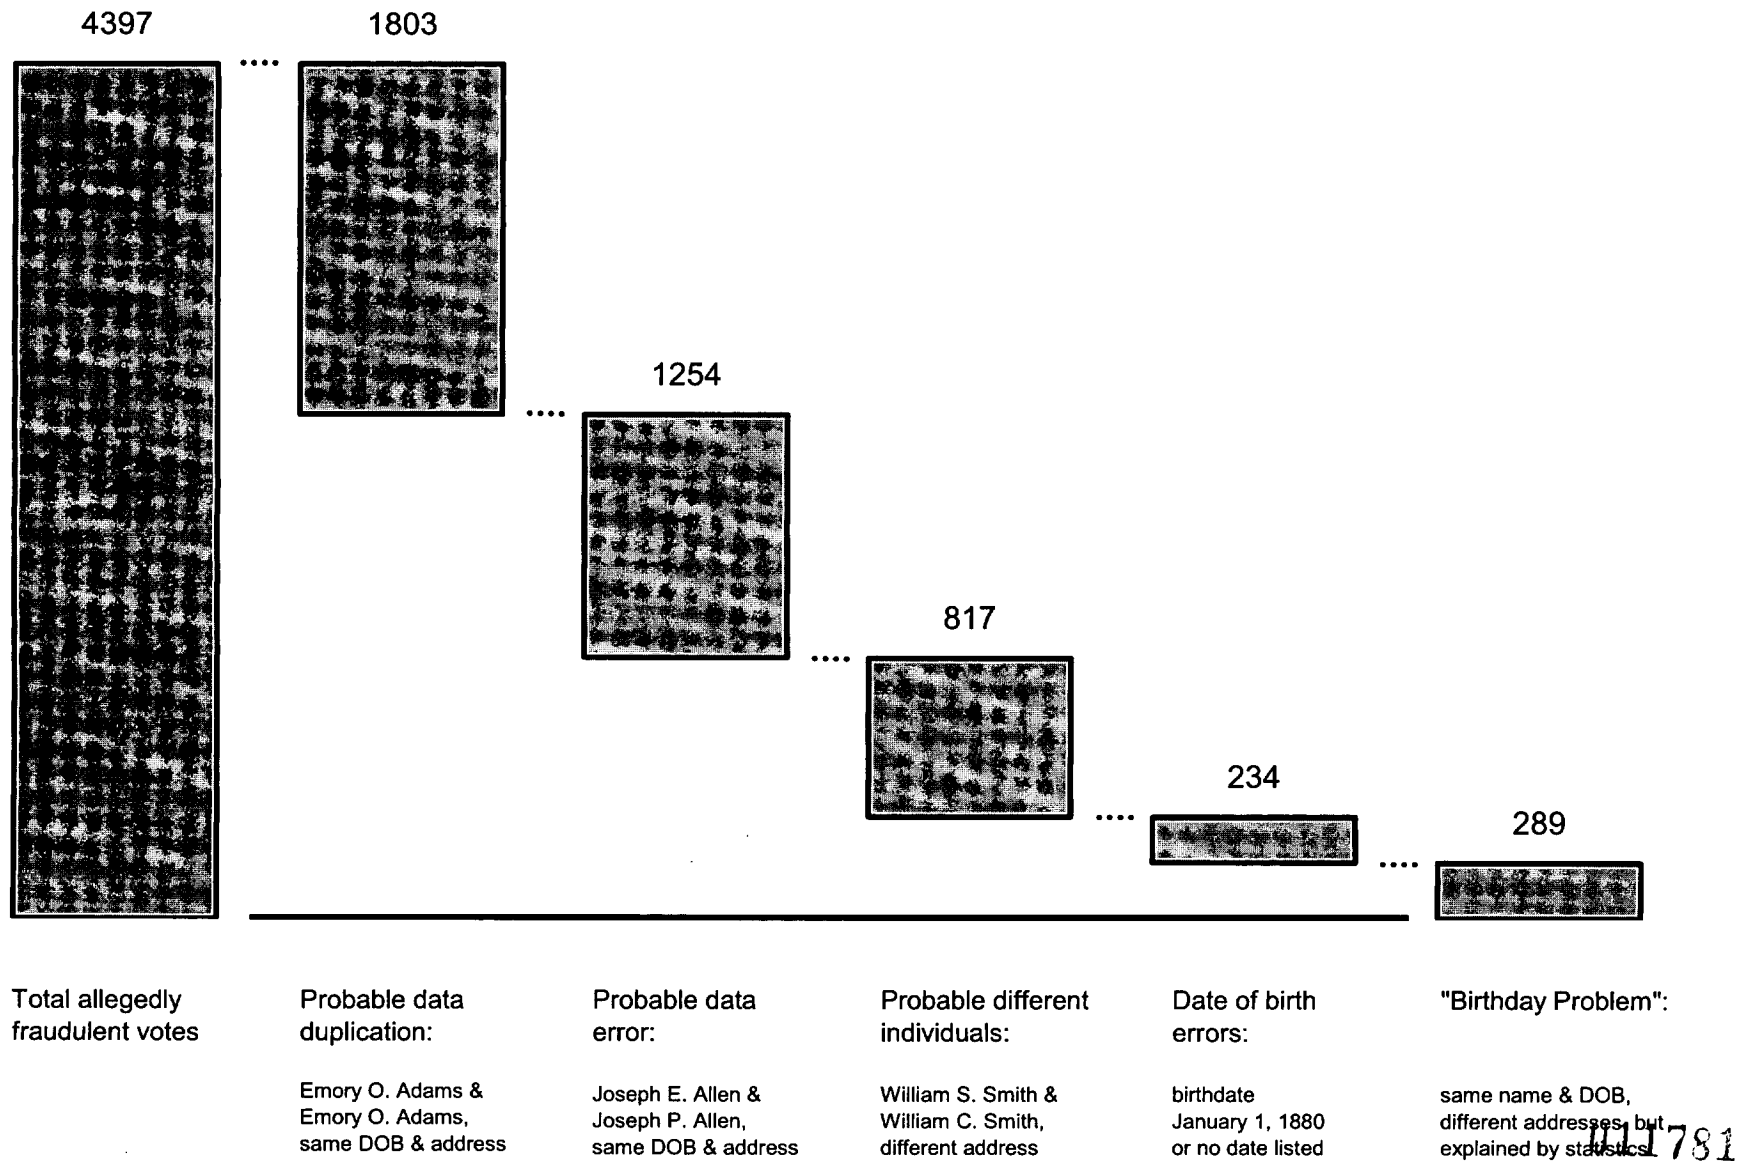

## Conclusion

It is certainly possible that of the 3.6 million New Jersey citizens voting in 2004, a handful managed to vote twice. Such cases can and should be investigated under existing law, and some of the information submitted to the Attorney General might prove to be helpful for that purpose. But the September 15 report and its accompanying lists of purportedly illegitimate voters simply fail to support the overall charge: an incidence of voter fraud sufficient either to cast doubt on the 2004 election or to provoke concern in elections to come. The vast majority of alleged irregularities identified in the report to the Attorney General and its accompanying lists do not stand up to even cursory analysis. One list, for example, was submitted with 80% of the entries specifically labeled in the datafile as “less likely” indicators of illegal activity. Middle names and suffixes were ignored; basic data compilation errors abound. And the report nowhere accounts for the basic statistical reality of the “Birthday Problem.”

The flaws in the data submitted to the Attorney General should preclude use of these lists – or the use of any similarly compiled file or list – as the basis for any purges of the voter files. Procedures established by HAVA and the NVRA, among others, when implemented with the safeguards contemplated by those statutes, will clean the registration rolls without the risk to eligible voters created by suspect lists like those submitted in the September 15 report. After a preliminary review of the evidence submitted, these lists simply do not prove what they purport to prove.

## Analysis of Alleged Double-Votes Reveals No Proof of Widespread Double Voting

## **AG says GOP campaign linked to letter to Hispanic voters**

**- The Associated Press**

***Published 6:24 am PDT Thursday, October 19, 2006***

State investigators have linked a Republican campaign to letters sent to thousands of Orange County Hispanics warning them they could go to jail or be deported if they vote next month, a spokesman for the attorney general said.

"We have identified where we believe the mailing list was obtained," said Nathan Barankin, spokesman for Attorney General Bill Lockyer.

He declined to identify the specific Republican campaign Wednesday, citing the ongoing investigation. The Los Angeles Times and The Orange County Register both reported Thursday that the investigation appeared to be focused on the campaign of Tan D. Nguyen, a Republican challenger to Democratic U.S. Rep. Loretta Sanchez.

The letter, written in Spanish, tells recipients: "You are advised that if your residence in this country is illegal or you are an immigrant, voting in a federal election is a crime that could result in jail time."

In fact, immigrants who are naturalized U.S. citizens can vote.

Complaints about the letters this week prompted state and federal investigations, and Barankin said investigators had been questioning people in Orange County.

The two newspapers reported state investigators had found the location where the letters were printed and mailed to an

011782

estimated 14,000 Democratic voters in central Orange County. The Los Angeles Times, citing an unnamed source, said authorities had interviewed Nguyen at his office.

Nguyen did not return messages left by The Associated Press or either newspaper. Sanchez also did not return messages seeking comment.

In an interview on Univision Thursday morning, Sanchez said the sender should be punished for stating that immigrants can't vote.

She also said it would be unfortunate if the person responsible was another immigrant because many organizations and individuals have worked for years to encourage minorities to vote.

"What a shame, really, that this is still happening in the United States today," she said.

The owner of Huntington Beach-based Mailing Pros, Christopher West, told The Orange County Register that he didn't know any laws were being broken when the mailer was sent. He said he gave investigators the name of the person who hired him to do the mailings but declined to provide that the name to the newspaper.

"I'm the one that processed it, and I don't read Spanish," West said. "Until the investigator read it to me, I didn't know the content."

Scott Baugh, chairman of the Orange County Republican Party, condemned the letter as "an obnoxious, grotesque piece of work."

"Regardless of who did it - Republican or Democrat - if it's a crime, then whoever did it should be prosecuted," Baugh said.

A group of six Vietnamese-American political candidates running for offices in Orange County issued a joint statement saying: "The content of this mailer is offensive to the immigrant voters, regardless of their ethnicity."

The note's letterhead resembles that of an anti-illegal immigration group, California Coalition for Immigration Reform, but group leader Barbara Coe said she told investigators for the attorney general's office Wednesday that her group didn't authorize the letter and she didn't know who sent it.

"The letterhead was altered and I've never head of any Sergio Ramirez," the name signed to the letter, Coe said.

Numerous political leaders including Gov. Arnold Schwarzenegger have denounced the letter and called for the investigations.

PROHIBITING VOTE FRAUD AND INTIMIDATION:  
A SURVEY OF STATE STATUTES  
Doug Chapin<sup>1</sup>

The aim of this paper is straightforward – to assemble the existing set of state statutes dealing with vote fraud and voter intimidation currently on the books across the country.

Notwithstanding the considerable body of research on federal election crime statutes, similar research at the state level – the current center of gravity for election administration reform nationwide – is somewhat lacking.

Consequently, the hope associated with creating this list is that it will make it possible to follow through on a number of other useful research opportunities as a result.

Specifically, using this list of state statutes as a base, it should now be possible (among other things) to:

- Compare the definitions and penalties associated with such laws in order to identify common themes and trends in terminology, penalties, etc.
- Examine state prosecution of fraud and intimidation cases in order to assess their number and scope – as well as to gauge the relative incidence of voter fraud and intimidation across the country; and
- Identify the standards of proof and evidentiary requirements in such cases as an attempt to discover whether voter identification, proof of citizenship and other prophylactic measures are essential to the prevention of fraud and intimidation at the polls.

METHODOLOGICAL NOTE: The list which follows attempts to identify state statutes addressing voter fraud and voter intimidation as it is commonly understood in the policy arena; i.e., registration and voting by unqualified persons and actions intended to impede voters by threat or deception. The aim is to find any state law criminalizing activity whereby individuals:

1. register fraudulently;
2. vote fraudulently;
3. vote more than once (if identified separately);
4. vote for someone else without their consent;
5. buy or sell votes;
6. use threats, force, deception or other methods to prevent voters from registering or voting.

CITATION NOTE: All statutes were retrieved via the Internet; hence, none of the citations bear a date as would a printed reference.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - ALABAMA

Ala. Code § 17-23-1

Illegal voting or attempting to vote.

Any person who votes more than once at any election held in this state, or deposits more than one ballot for the same office as his vote at such election, or knowingly attempts to vote when he is not entitled to do so, or is guilty of any kind of illegal or fraudulent voting, must, on conviction, be imprisoned in the penitentiary for not less than two nor more than five years, at the discretion of the jury.

Ala. Code § 17-23-3

Bribing or attempting to influence voter.

Any person who, by bribery or offering to bribe, or by any other corrupt means, attempts to influence any elector in giving his vote, or deter him from giving the same, or to disturb, or to hinder him in the free exercise of the right of suffrage, at any election, must, on conviction, be fined not less than \$50.00 nor more than \$500.00.

Ala. Code § 17-23-4

Buying votes.

Any person who buys or offers to buy any vote of any qualified elector at any election by the payment of money or the promise to pay the same at any future time, or by the gift of intoxicating liquors or other valuable thing, shall be deemed guilty of a misdemeanor, and, on conviction thereof, shall be fined not less than \$50.00 nor more than \$100.00.

Ala. Code § 17-23-5

Selling votes.

Any qualified elector at any election who takes or receives any money or other valuable thing, upon the condition that the same shall be paid at any future time, in exchange for the vote of such elector for any particular candidate, or the promise to vote for any particular candidate, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not less than \$50.00 nor more than \$500.00. No witness shall be prosecuted for any offense under this section as to which he testified before the grand jury.

Ala. Code § 17-23-8

Disturbing elector on election day.

Any person who, on election day, disturbs or prevents, or attempts to prevent, any elector from freely casting his ballot must, on conviction, be fined not less than \$500.00 nor more than \$1,000.00, and also sentenced to hard labor for the county, or imprisoned in the county jail for not less than six months nor more than one year.

Ala. Code § 17-23-12

Providing false information to register to vote.

Any person who knowingly provides false information in order to vote or register to vote in violation of Act 2003-313 shall be guilty of a Class A misdemeanor and upon conviction thereof shall be punished as provided by law.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – ALASKA

*AS 15.56.030. Unlawful Interference With Voting in the First Degree.*

- (a) A person commits the crime of unlawful interference with voting in the first degree if the person
- (1) uses, threatens to use, or causes to be used force, coercion, violence, or restraint, or inflicts, threatens to inflict, or causes to be inflicted damage, harm, or loss, upon or against another person to induce or compel that person to vote or refrain from voting in an election;
  - (2) knowingly pays, offers to pay, or causes to be paid money or other valuable thing to a person to vote or refrain from voting in an election; or
  - (3) solicits, accepts, or agrees to accept money or other valuable thing with the intent to vote for or refrain from voting for a candidate at an election or for an election proposition or question.
- (b) Violation of this section is a corrupt practice.
- (c) Unlawful interference with voting in the first degree is a class C felony.
- (d) For purposes of (a)(2) and (3) of this section, "other valuable thing"
- (1) includes
    - (A) an entry in a game of chance in which a prize of money or other present or future pecuniary gain or advantage may be awarded to a participant wherein the total of the prizes offered is greater than \$2 per participant with a maximum of \$100; and
    - (B) government employment or benefits;
  - (2) does not include
    - (A) materials having a nominal value bearing the name, likeness, or other identification of a candidate, political party, political group, party district committee, or organization, or stating a position on a ballot proposition or question;
    - (B) food and refreshments provided incidental to an activity that is nonpartisan in nature and directed at encouraging persons to vote, or incidental to a gathering in support of or in opposition to a candidate, political party, political group, party district committee, organization, or ballot question or proposition;
    - (C) care of the voter's dependents provided in connection with the absence of a voter from home for the purpose of voting;
    - (D) services provided by a person acting as a representative under AS 15.20.072 ;
    - (E) services provided by an election official as defined in AS 15.60.010; and
    - (F) transportation of a voter to or from the polls without charge.

*AS 15.56.035. Unlawful Interference With Voting in the Second Degree.*

- (a) A person commits the crime of unlawful interference with voting in the second degree if the person
- (1) has an official ballot in possession outside of the voting room unless the person is an election official or other person authorized by law or local ordinance, or by the director or chief municipal elections official in a local election;
  - (2) makes, or knowingly has in possession, a counterfeit of an official election ballot;
  - (3) knowingly solicits or encourages, directly or indirectly, a registered voter who is no longer qualified to vote under AS 15.05.010 , to vote in an election; or
  - (4) as a registration official
    - (A) knowingly refuses to register a person who is entitled to register under AS 15.07.030 ;
    - or
    - (B) accepts a fee from an applicant applying for registration.
- (b) Violation of (a)(3) of this section is a corrupt practice.
- (c) Unlawful interference with voting in the second degree is a class A misdemeanor.

*AS 15.56.040. Voter Misconduct in the First Degree.*

- (a) A person commits the crime of voter misconduct in the first degree if the person
- (1) votes or attempts to vote in the name of another person or in a name other than the person's own;
  - (2) votes or attempts to vote more than once at the same election with the intent that the person's vote be counted more than once;
  - (3) intentionally makes a false affidavit, swears falsely, or falsely affirms under an oath required by this title;

(4) knowingly votes or solicits a person to vote after the polls are closed with the intent that the vote be counted.

(b) Voter misconduct in the first degree is a class C felony.

*AS 15.56.050. Voter Misconduct in the Second Degree.*

(a) A person commits the crime of voter misconduct in the second degree if the person

(1) registers to vote without being entitled to register under AS 15.07.030;

(2) knowingly makes a material false statement while applying for voter registration or reregistration; or

(3) votes or attempts to vote in an election after being disqualified under AS 15.05.030.

(b) Voter misconduct in the second degree is a class A misdemeanor.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – ARIZONA

Ariz. Rev. Stat. § 16-1013. Coercion or intimidation of elector; classification

A. It is unlawful for a person knowingly:

1. Directly or indirectly, to make use of force, violence or restraint, or to inflict or threaten infliction, by himself or through any other person, of any injury, damage, harm or loss, or in any manner to practice intimidation upon or against any person, in order to induce or compel such person to vote or refrain from voting for a particular person or measure at any election provided by law, or on account of such person having voted or refrained from voting at an election.

2. By abduction, duress or any forcible or fraudulent device or contrivance whatever, to impede, prevent or otherwise interfere with the free exercise of the elective franchise of any voter, or to compel, induce or to prevail upon a voter either to cast or refrain from casting his vote at an election, or to cast or refrain from casting his vote for any particular person or measure at an election.

B. A person, whether acting in his individual capacity or as an officer or agent of a corporation, who violates a provision of this section is guilty of a class 1 misdemeanor.

Ariz. Rev. Stat § 16-1014. Corruption of electors; classification

A. It is unlawful for a person, directly or indirectly, by himself or through any other person knowingly:

1. To treat, give, pay, loan, contribute, offer or promise money or other valuable consideration, or to give, offer or promise an office, place or employment, or to promise or to procure or endeavor to procure an office, place or employment, to or for a voter, or to or for any other person, to induce the voter to vote or refrain from voting at an election for any particular person or measure, or to induce the voter to go to the polls, or remain away from the polls at an election, or on account of the voter having voted or refrained from voting for any particular person or measure, or having gone to the polls or remained away from the polls at an election.

2. To advance or pay or cause to be paid, money or other valuable consideration to or for the use of any other person with the intent that it, or any part thereof, be used for bribery at any election provided by law, or to knowingly pay or cause to be paid money or other valuable thing to any person in discharge or repayment of money, wholly or in part expended for bribery at any election.

3. To receive, agree or contract for, before, during or after an election provided by law, money, gifts, loans or other valuable consideration, office, place or employment for himself or other person, for voting or agreeing to vote, or for going or agreeing to go to the polls, or for refraining or agreeing to refrain from voting for a particular person or measure, or for inducing any person to vote or refrain from voting, or to vote or refrain from voting for a particular person or measure at an election.

B. A person violating any provision of this section is guilty of a class 2 misdemeanor.

Ariz. Rev. Stat § 16-1016. Illegal voting; pollution of ballot box; removal or destruction of ballot box, poll lists or ballots; classification

A person is guilty of a class 5 felony who:

1. Not being entitled to vote, knowingly votes.
2. Knowingly votes more than once at any election.
3. Knowingly gives to an election official two or more ballots folded together.
4. Knowingly changes or destroys a ballot after it has been deposited in the ballot box.

5. Knowingly adds a ballot to those legally cast at any election, by fraudulently introducing the ballot into the ballot box either before or after the ballots therein have been counted.
6. Knowingly adds to or mixes with ballots lawfully cast, other ballots, while they are being canvassed or counted, with intent to affect the result of the election, or to exhibit the ballots as evidence on the trial of an election contest.
7. Knowingly and unlawfully carries away, conceals or removes a poll list, ballot or ballot box from the polling place, or from possession of the person authorized by law to have custody thereof.
8. Knowingly destroys a polling list, ballot or ballot box with the intent to interrupt or invalidate the election.
9. Knowingly detains, alters, mutilates or destroys ballots or election returns.

Ariz. Rev. Stat § 16-1017. Unlawful acts by voters with respect to voting; classification

A voter who knowingly commits any of the following acts is guilty of a class 2 misdemeanor:

1. Makes a false statement as to the voter's inability to mark a ballot.
2. Interferes with a voter within the seventy-five foot limit of the polling place as posted by the election marshal or within seventy-five feet of the main outside entrance to an on-site early voting location established by a county recorder pursuant to section 16-542, subsection A.
3. Endeavors while within the seventy-five foot limit for a polling place or on-site early voting location to induce a voter to vote for or against a particular candidate or issue.
4. Prior to the close of an election defaces or destroys a sample ballot posted by election officers, or defaces, tears down, removes or destroys a card of instructions posted for the instruction of voters.
5. Removes or destroys supplies or conveniences furnished to enable a voter to prepare the voter's ballot.
6. Hinders the voting of others.
7. Votes in a county in which the voter no longer resides, except as provided in section 16-125.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – ARKANSAS

Ark. Code § 7-1-103. Miscellaneous misdemeanor offenses - Penalties.

(a) The violation of any of the following shall be deemed misdemeanors punishable as provided in this section:

\*\*\*

(11) No person applying for a ballot shall swear falsely to any oath administered by the election officials with reference to his or her qualifications to vote;

(12) No person shall willfully cause or attempt to cause his own name to be registered in any other election precinct than that in which he is or will be before the next ensuing election qualified as an elector;

\*\*\*

(19)(A) No person shall vote or offer to vote more than one (1) time in any election held in this state, either in person or by absentee ballot, or shall vote in more than one (1) election precinct in any election held in this state.

(B) No person shall cast a ballot or vote in the preferential primary of one (1) political party and then cast a ballot or vote in the general primary of another political party in this state;

(20) No person shall:

(A) Vote, knowing himself not to be entitled to vote;

(B) Vote more than once at any election, or knowingly cast more than one (1) ballot, or attempt to do so;

(C) Alter or attempt to alter any ballot after it has been cast;

(D) Add or attempt to add any ballot to those legally polled at any election either by fraudulently introducing it into the ballot box before or after the ballots have been counted or at any other time or in any other manner with the intent or effect of affecting the count or recount of the ballots;

(E) Withdraw or attempt to withdraw any ballot lawfully polled with the intent or effect of affecting the count or recount of the ballots; or

(F) In any manner interfere with the officials lawfully conducting the election or the canvass or with the voters lawfully exercising their right to vote at the election;

\*\*\*

(23) Any person, election official, county clerk, or deputy clerk who violates any provisions of the absentee voting laws, § 7-5-401 et seq., shall be punished as provided in this section.

(b)(1) Except as otherwise provided, the violation of any provision of this section shall be a Class A misdemeanor.

(2)(A) Any person convicted under the provisions of this section shall thereafter be ineligible to hold any office or employment in any of the departments in this state.

011801

(B)(i) If any person is convicted under the provisions of this section while employed by any of the departments of this state, he shall be removed from employment immediately.

(ii) If any person is convicted under the provisions of this section while holding public office, the conviction shall be deemed a misfeasance and malfeasance in office and shall subject the person to impeachment.

(c) Any violation of this act not covered by this section and § 7-1-104 shall be considered a Class A misdemeanor and shall be punishable as such.

Ark. Code § 7-1-104. Miscellaneous felonies - Penalties.

(a) The following offenses shall be deemed felonies punishable as provided in this section:

\*\*\*

(2) No public official or other person shall in any manner willfully or corruptly permit any person not entitled to register for the purpose of voting to register, nor shall a public official or other person forge or attempt to forge a registration;

(3) No person shall vote in any election in the state unless the person is a qualified elector of this state and has registered to vote in the manner provided by law;

(4) It shall be unlawful for any person to offer, accept, receive, or pay any person any money, goods, wares, or merchandise or solicit any money, goods, wares, or merchandise for the purpose of influencing his or her vote during the progress of any election in this state;

(5) It shall be unlawful for any person to make any threat or attempt to intimidate any elector or the family, business, or profession of the elector;

(6) It shall be unlawful for any person to prevent or to interfere with any qualified elector from voting at any election or to attempt to prevent or interfere with any qualified elector from voting at any election, provided that this subdivision (a)(6) shall not prohibit good faith challenges of ballots or voters according to law by candidates, authorized representatives of candidates, political parties, or ballot issues;

\*\*\*

(9) No person may cast a ballot in more than one (1) party primary election on the same day in this state or for candidates for more than one (1) political party;

(10) No person shall vote in any election more than one (1) vote;

(11) No person shall vote or attempt to vote other than his or her legal ballot;

(12) No election official shall knowingly permit any person to vote other than his or her legal ballot in any election;

(13) No election official or other person shall fraudulently permit any person to vote illegally, refuse the vote of any qualified elector, or cast up or make a false return of any election;

(14) No election official or other person shall willfully make a false count of any election ballots or falsely or fraudulently certify the returns of any election;

\*\*\*

011802

(17) Any person who violates the provisions of § 7-5-702 or who shall disclose how any voter may have voted unless compelled to do so in a judicial proceeding shall be deemed guilty of a Class D felony and punished as provided in this section.

(b)(1) Any person convicted of a felony as defined in this section shall be guilty of a Class D felony.

(2)(A) Any person convicted of a felony as defined in this section shall be barred from holding public office or employment in any of the departments of the state from the date of his conviction.

(B)(i) If the person is employed by any of the departments of this state at the time of his conviction, he shall be removed from employment immediately.

(ii) If any person is convicted under the provisions of this section while holding public office, the conviction shall be deemed a misfeasance and malfeasance in office and shall subject the person to impeachment.

011803

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – CALIFORNIA

Cal. Elec. Code §

Cal. Elec. Code § 18500. Any person who commits fraud or attempts to commit fraud, and any person who aids or abets fraud or attempts to aid or abet fraud, in connection with any vote cast, to be cast, or attempted to be cast, is guilty of a felony, punishable by imprisonment for 16 months or two or three years.

Cal. Elec. Code § 18501. Any public official who knowingly violates any of the provisions of this chapter, and thereby aids in any way the illegal casting or attempting to cast a vote, or who connives to nullify any of the provisions of this chapter in order that fraud may be perpetrated, shall forever be disqualified from holding office in this state and upon conviction shall be sentenced to a state prison for 16 months or two or three years.

Cal. Elec. Code § 18502. Any person who in any manner interferes with the officers holding an election or conducting a canvass, or with the voters lawfully exercising their rights of voting at an election, as to prevent the election or canvass from being fairly held and lawfully conducted, is punishable by imprisonment in the state prison for 16 months or two or three years.

Cal. Elec. Code § 18520. A person shall not directly or through another person give, offer, or promise any office, place, or employment, or promise to procure or endeavor to procure any office, place, or employment to or for any voter, or to or for any other person, in order to induce that voter at any election to:

- (a) Refrain from voting.
- (b) Vote for any particular person.
- (c) Refrain from voting for any particular person.

A violation of any of the provisions of this section shall be punishable by imprisonment in the state prison for 16 months or two or three years.

Cal. Elec. Code § 18521. A person shall not directly or through any other person receive, agree, or contract for, before, during or after an election, any money, gift, loan, or other valuable consideration, office, place, or employment for himself or any other person because he or any other person:

- (a) Voted, agreed to vote, refrained from voting, or agreed to refrain from voting for any particular person or measure.
- (b) Remained away from the polls.
- (c) Refrained or agreed to refrain from voting.
- (d) Induced any other person to:
  - (1) Remain away from the polls.
  - (2) Refrain from voting.
  - (3) Vote or refrain from voting for any particular person or measure.

Any person violating this section is punishable by imprisonment in the state prison for 16 months or two or three years.

Cal. Elec. Code § 18540.

(a) Every person who makes use of or threatens to make use of any force, violence, or tactic of coercion or intimidation, to induce or compel any other person to vote or refrain from voting at any election or to vote or refrain from voting for any particular person or measure at any election, or because any person voted or refrained from voting at any election or voted or refrained from voting for any particular person or measure at any election is guilty of a felony punishable by imprisonment in the state prison for 16 months or two or three years.

(b) Every person who hires or arranges for any other person to make use of or threaten to make use of any force, violence, or tactic of coercion or intimidation, to induce or compel any other person to vote or refrain from voting at any election or to vote or refrain from voting for any particular person or measure at any election, or because any person voted or refrained from voting at any election or voted or refrained from voting for any particular person or measure at any election is guilty of a felony punishable by imprisonment in the state prison for 16 months or two or three years.

Cal. Elec. Code § 18541.

(a) No person shall, with the intent of dissuading another person from voting, within 100 feet of a polling place, do any of the following:

- (1) Solicit a vote or speak to a voter on the subject of marking his or her ballot.
- (2) Place a sign relating to voters' qualifications or speak to a voter on the subject of his or her qualifications except as provided in Section 14240.
- (3) Photograph, videotape, or otherwise record a voter entering or exiting a polling place.

(b) Any violation of this section is punishable by imprisonment in a county jail for not more than 12 months, or in the state prison. Any person who conspires to violate this section is guilty of a felony.

(c) For purposes of this section, 100 feet means a distance of 100 feet from the room or rooms in which voters are signing the roster and casting ballots.

\*\*\*

Cal. Elec. Code § 18543.

(a) Every person who knowingly challenges a person's right to vote without probable cause or on fraudulent or spurious grounds, or who engages in mass, indiscriminate, and groundless challenging of voters solely for the purpose of preventing voters from voting or to delay the process of voting, or who fraudulently advises any person that he or she is not eligible to vote or is not registered to vote when in fact that person is eligible or is registered, or who violates Section 14240, is punishable by imprisonment in the county jail for not more than 12 months or in the state prison.

(b) Every person who conspires to violate subdivision (a) is guilty of a felony.

Cal. Elec. Code § 18544. (a) Any person in possession of a firearm or any uniformed peace officer, private guard, or security personnel or any person who is wearing a uniform of a peace officer, guard, or security personnel, who is stationed in the immediate vicinity of, or posted at, a polling place without written authorization of the appropriate city or county elections official is punishable by a fine not exceeding ten thousand dollars (\$10,000), by imprisonment in the state prison for 16 months or two or three years or in a county jail not exceeding one year, or by both the fine and imprisonment.

(b) This section shall not apply to any of the following:

- (1) An unarmed uniformed guard or security personnel who is at the polling place to cast his or her vote.
- (2) A peace officer who is conducting official business in the course of his or her public employment or who is at the polling place to cast his or her vote.
- (3) A private guard or security personnel hired or arranged for by a city or county elections official.
- (4) A private guard or security personnel hired or arranged for by the owner or manager of the facility or property in which the polling place is located if the guard or security personnel is not hired or arranged solely for the day on which an election is held.

Cal. Elec. Code § 18545. Any person who hires or arranges for any other person in possession of a firearm or any uniformed peace officer, private guard, or security personnel or any person who is wearing a uniform of a peace officer, guard, or security personnel, to be stationed in the immediate vicinity of, or posted at, a polling place without written authorization of the appropriate elections official is punishable by a fine not exceeding ten thousand dollars (\$10,000), by imprisonment in the state prison for 16 months or two or three years or in a county jail not exceeding one year, or by both the fine and imprisonment. This section shall not apply to the owner or manager of the facility or property in which the polling place is located if the private guard or security personnel is not hired or arranged solely for the day on which the election is held.

Cal. Elec. Code § 18560. Every person is guilty of a crime punishable by imprisonment in the state prison for 16 months or two or three years, or in county jail not exceeding one year, who:

- (a) Not being entitled to vote at an election, fraudulently votes or fraudulently attempts to vote at that election.
- (b) Being entitled to vote at an election, votes more than once, attempts to vote more than once, or knowingly hands in two or more ballots folded together at that election.
- (c) Impersonates or attempts to impersonate a voter at an election.

011805

Cal. Elec. Code § 18561. Every person is punishable by imprisonment in the state prison for 16 months or two or three years who:

- (a) Procures, assists, counsels, or advises another to give or offer his vote at any election, knowing that the person is not qualified to vote.
- (b) Aids or abets in the commission of any of the offenses mentioned in Section 18560.

\*\*\*

Cal. Elec. Code § 18578. Any person who applies for, or who votes or attempts to vote, an absent voter's ballot by fraudulently signing the name of a fictitious person, or of a regularly qualified voter, or of a person who is not qualified to vote, is guilty of a felony punishable by imprisonment in the state prison for 16 months or two or three years, or by fine not exceeding one thousand dollars (\$1,000) or by both the fine and imprisonment.

011806

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – COLORADO

Colo. Rev. Stat. § 1-13-203. Procuring false registration.

It is unlawful for any person to procure his or her own name, or the name of any other person, to be registered in the registration book of a precinct in which such person is not, at the time of such registration, entitled to be registered or for any person to procure any fictitious name to be registered in the registration book of any precinct. Any person who violates any of the provisions of this section shall be punished by a fine of not more than five thousand dollars, or by imprisonment in the county jail for not more than eighteen months, or by both such fine and imprisonment. Each violation shall be considered a separate offense.

Colo. Rev. Stat. §1-13-704.5. Voting by persons not entitled to vote - penalty.

(1) Any person voting in any election provided by law knowing that he or she is not entitled to vote in such election commits a class 5 felony and shall be punished as provided in section 18-1.3-401, C.R.S.

(2) This section shall be enforced without regard to race, religion, gender, ethnicity, or national origin.

Colo. Rev. Stat. § 1-13-705. Personating elector.

Any person who falsely personates any elector and votes at any election provided by law under the name of such elector shall be punished by a fine of not more than five thousand dollars or by imprisonment in the county jail for not more than eighteen months, or by both such fine and imprisonment.

Colo. Rev. Stat. §1-13-709. Voting in wrong precinct.

Any person who, at any election provided by law, knowingly votes or offers to vote in any election precinct in which he or she is not qualified to vote shall be punished by a fine of not more than five thousand dollars or by imprisonment in the county jail for not more than eighteen months, or by both such fine and imprisonment.

Colo. Rev. Stat. §1-13-709.5. Residence - false information - penalty.

Any person who votes by knowingly giving false information regarding the elector's place of present residence commits a class 6 felony and shall be punished as provided in section 18-1.3-401, C.R.S.

Colo. Rev. Stat. §1-13-710. Voting twice - penalty.

Any voter who votes more than once or, having voted once, offers to vote again or offers to deposit in the ballot box more than one ballot shall be punished by a fine of not more than five thousand dollars or by imprisonment in the county jail for not more than eighteen months, or by both such fine and imprisonment.

Colo. Rev. Stat. §1-13-713. Intimidation.

It is unlawful for any person directly or indirectly, by himself or by any other person in his behalf, to impede, prevent, or otherwise interfere with the free exercise of the elective franchise of any elector or to compel, induce, or prevail upon any elector either to give or refrain from giving his vote at any election provided by law or to give or refrain from giving his vote for any particular person or measure at any such election. Each such offense is a misdemeanor, and, upon conviction thereof, the offender shall be punished as provided in section 1-13-111.

Colo. Rev. Stat. §1-13-720. Unlawfully giving or promising money or employment.

(1) It is unlawful for any person, directly or indirectly, by himself or through any other person:

011807

(a) To pay, loan, or contribute, or offer or promise to pay, loan, or contribute, any money or other valuable consideration to or for any elector, or to or for any other person, to induce such elector to vote or refrain from voting at any election provided by law or to induce any elector to vote or refrain from voting at such election for any particular person or to induce such elector to go to the polls or remain away from the polls at such election or on account of such elector having voted or refrained from voting for any particular person or issue or having gone to the polls or remained away from the polls at such election; or

(b) To advance or pay, or cause to be paid, any money or other valuable thing to or for the use of any other person with the intent that the same, or any part thereof, shall be used in bribery at any election provided by law or to knowingly pay, or cause to be paid, any money or other valuable thing to any person in discharge or repayment of any money wholly or partially expended in bribery at any such election; or

(c) To give, offer, or promise any office, place, or employment or to promise, procure, or endeavor to procure any office, place, or employment to or for any elector, or to or for any other person, in order to induce such elector to vote or refrain from voting at any election provided by law or to induce any elector to vote or refrain from voting at such election for any particular person or issue.

(2) Each offense set forth in subsection (1) of this section is a misdemeanor, and, upon conviction thereof, the offender shall be punished as provided in section 1-13-111.

Colo. Rev. Stat. §1-13-721. Receipt of money or jobs.

(1) It is a misdemeanor for any person, directly or indirectly, by himself or through any other person:

(a) Before or during an election provided by law, to receive, agree to accept, or contract for any money, gift, loan, or other valuable consideration, office, place, or employment, for himself or any other person, for voting or agreeing to vote, or for going or agreeing to go to the polls, or for remaining away or agreeing to remain away from the polls, or for refraining or agreeing to refrain from voting, or for voting or agreeing to vote or refraining or agreeing to refrain from voting for any particular person or measure at any election provided by law;

(b) During or after an election provided by law, to receive any money or other valuable thing on account of himself or any other person for voting or refraining from voting at such election, or on account of himself or any other person for voting or refraining from voting for any particular person at such election, or on account of himself or any other person for going to the polls or remaining away from the polls at such election, or on account of having induced any person to vote or refrain from voting for any particular person or measure at such election.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - CONNECTICUT

**Conn. Gen. Stat. § 9-333x. Illegal practices.** The following persons shall be guilty of illegal practices and shall be punished in accordance with the provisions of section 9-333y:

(1) Any person who, directly or indirectly, individually or by another person, gives or offers or promises to any person any money, gift, advantage, preferment, entertainment, aid, emolument or other valuable thing for the purpose of inducing or procuring any person to sign a nominating, primary or referendum petition or to vote or refrain from voting for or against any person or for or against any measure at any election, caucus, convention, primary or referendum;

(2) Any person who, directly or indirectly, receives, accepts, requests or solicits from any person, committee, association, organization or corporation, any money, gift, advantage, preferment, aid, emolument or other valuable thing for the purpose of inducing or procuring any person to sign a nominating, primary or referendum petition or to vote or refrain from voting for or against any person or for or against any measure at any such election, caucus, primary or referendum;

(3) Any person who, in consideration of any money, gift, advantage, preferment, aid, emolument or other valuable thing paid, received, accepted or promised to the person's advantage or any other person's advantage, votes or refrains from voting for or against any person or for or against any measure at any such election, caucus, primary or referendum;

(4) Any person who solicits from any candidate any money, gift, contribution, emolument or other valuable thing for the purpose of using the same for the support, assistance, benefit or expenses of any club, company or organization, or for the purpose of defraying the cost or expenses of any political campaign, primary, referendum or election;

(5) Any person who, directly or indirectly, pays, gives, contributes or promises any money or other valuable thing to defray or towards defraying the cost or expenses of any campaign, primary, referendum or election to any person, committee, company, club, organization or association, other than to a campaign treasurer, except that this subdivision shall not apply to any expenses for postage, telegrams, telephoning, stationery, express charges, traveling, meals, lodging or photocopying incurred by any candidate for office or for nomination to office, so far as may be permitted under the provisions of this chapter;

(6) Any person who, in order to secure or promote the person's own nomination or election as a candidate, or that of any other person, directly or indirectly, promises to appoint, or promises to secure or assist in securing the appointment, nomination or election of any other person to any public position, or to any position of honor, trust or emolument; but any person may publicly announce the person's own choice or purpose in relation to any appointment, nomination or election in which the person may be called to take part, if the person is nominated for or elected to such office;

(7) Any person who, directly or indirectly, individually or through another person, makes a payment or promise of payment to a campaign treasurer in a name other than the person's own, and any campaign treasurer who knowingly receives a payment or promise of payment, or enters or causes the same to be entered in the person's accounts in any other name than that of the person by whom such payment or promise of payment is made;

(8) Any person who knowingly and willfully violates any provision of this chapter;

(9) Any person who offers or receives a cash contribution in excess of one hundred dollars to promote the success or defeat of any political party, candidate or referendum question;

(10) Any person who solicits, makes or receives a contribution that is otherwise prohibited by any provision of this chapter;

(11) Any department head or deputy department head of a state department who solicits a contribution on behalf of, or for the benefit of, any candidate for state, district or municipal office or any political party; or

(12) Any municipal employee who solicits a contribution on behalf of, or for the benefit of, any candidate for state, district or municipal office, any political committee or any political party, from (A) an individual under the supervision of such employee, or (B) the spouse or a dependent child of such individual.

011809

**Conn. Gen. Stat. § 9-357. Fraudulent registration.** Any person who fraudulently procures himself or another to be registered as an elector shall be fined not more than five hundred dollars or imprisoned not more than one year or be both fined and imprisoned.

**Conn. Gen. Stat. § 9-360. Fraudulent voting.** Any person not legally qualified who fraudulently votes in any town meeting, primary or election in which he is not qualified to vote, and any legally qualified person who, at such meeting, primary or election, fraudulently votes more than once at the same meeting, primary or election, shall be fined not less than three hundred dollars nor more than five hundred dollars and shall be imprisoned not less than one year nor more than two years and shall be disfranchised. Any person who votes or attempts to vote at any election, primary or town meeting by assuming the name of another who is registered or enrolled, as the case may be, shall be fined five hundred dollars and be imprisoned one year and shall be disfranchised.

**Conn. Gen. Stat. § 9-364. Influencing elector to refrain from voting.** Any person who influences or attempts to influence any elector to stay away from any election shall be fined not more than five hundred dollars and imprisoned not more than one year nor less than three months.

**Conn. Gen. Stat. § 9-364a. (Formerly Sec. 9-344). Acts prohibited in elections, primaries, referenda, caucuses and conventions. Penalties.** Any person who influences or attempts to influence by force or threat the vote, or by force, threat, bribery or corrupt means, the speech, of any person in a primary, caucus, referendum convention or election; or wilfully and fraudulently suppresses or destroys any vote or ballot properly given or cast or, in counting such votes or ballots, wilfully miscounts or misrepresents the number thereof; and any presiding or other officer of a primary, caucus or convention who wilfully announces the result of a ballot or vote of such primary, caucus or convention, untruly and wrongfully, shall be fined not more than one thousand dollars or imprisoned not more than one year or be both fined and imprisoned.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - DELAWARE

Del. Code § 2302. Wrongful registration; assault; riot; breach of peace; penalty.

Whoever causes or attempts to cause himself or herself to be registered in: (1) The name of any other person living or dead or under any fictitious name; or (2) any election district in this State, knowing that he or she has not the right to be registered; or (3) whoever, knowing himself or herself to be registered in any election district in this State, causes or attempts to cause himself or herself to be registered in any other election district in this State without having first caused his or her record to be removed from the Election District Record in which his or her original permanent registration record may have been previously entered; or (4) whoever, knowing himself or herself to be disqualified as a voter at the next following general election, causes or attempts to cause himself or herself to be entered in the Election District Record in any election district in this State as a registered voter therein or unlawfully interferes with any registrar, alternate registrar or assistant registrar in the discharge of his or her duties under this title; or (5) whoever makes any assault or commits any assault and battery or incites or creates any riot or breach of the peace at or near to any place of registration in this State during the sitting of any registration officers; shall be fined not less than \$50 or more than \$200 or imprisoned not less than 30 days or more than 2 years or both.

Del. Code §§ 5123. Intimidation, persuasion or bribery by election officer; penalty.

Whoever, being an election officer:

(1) In any manner attempts to influence, persuade, intimidate, bribe or coerce any voter in the marking of the voter's ballot, or in the making of the choice of the persons for whom the voter votes; or

(2) Discloses the manner in which any person has voted;

shall be deemed to have knowingly and wilfully violated his or her official duty, shall be guilty of wilful and deliberate perjury, and, in addition to the penalties and disabilities annexed to such crime, be fined not more than \$500 and may be imprisoned not more than 2 years.

Del. Code §§ 5128. Fraudulent voting; penalty.

Whoever, at any general or special election:

(1) Falsely personates any elector or other person and votes or attempts or offers to vote in or upon the name of such elector or other person; or

(2) Votes or attempts to vote in or upon the name of any other person whether living or dead or in or upon any false, assumed or fictitious name; or

(3) Knowingly, willfully or fraudulently votes more than once for any candidate at any election for the same office; or

(4) Votes or attempts or offers to vote in any election district without having a lawful right to vote therein, or to vote more than once or to vote in more than 1 election district; or

(5) Having once voted, votes or attempts or offers to vote again; or

(6) Fraudulently delivers or offers to an election officer more than a single ballot; or

(7) Knowingly, willfully or fraudulently does any unlawful act to secure an opportunity for himself or herself or for any other person to vote,

shall be fined not less than \$50 or more than \$200, or imprisoned not less than 30 days or more than 2 years, or both.

Del. Code § 5162. Intimidation of electors; penalty.

If any person, or corporation existing or doing business in this State, hinders, controls, coerces or intimidates or attempts to hinder, control, coerce or intimidate any qualified elector of this State from or in the exercise of the elector's right to vote at any general, special or municipal election held under the laws of this State, by means of bribery or by threats of depriving such elector of employment or occupation, absolutely or contingently, directly or indirectly, every elector so aggrieved may, in a civil action brought for that purpose, sue for and recover from the person or corporation so offending the sum of \$500.

011812

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – DISTRICT OF COLUMBIA

**D.C. Code § 1-1001.14. Corrupt election practices.**

(a) Any person who shall register, or attempt to register, or vote or attempt to vote under the provisions of this subchapter and make any false representations as to his or her qualifications for registering or voting or for holding elective office, or be guilty of violating § 1-1001.07(d)(2)(D), § 1-1001.09, § 1-1001.12, or § 1-1001.13 or be guilty of bribery or intimidation of any voter at an election, or being registered, shall vote or attempt to vote more than once in any election so held, or shall purloin or secrete any of the votes cast in an election, or attempt to vote in an election held by a political party other than that to which he or she has declared himself or herself to be affiliated, or, if employed in the counting of votes in any election held pursuant to this subchapter, knowingly make a false report in regard thereto, and every candidate, person, or official of any political committee who shall knowingly make any expenditure or contribution in violation of Chapter 11 of this title, shall, upon conviction, be fined not more than \$10,000 or be imprisoned not more than 5 years, or both.

(b)(1) Any person who signs an initiative, referendum or recall petition with any other than his or her own name, or who signs a petition for an initiative, referendum or recall measure, knowing that he or she is not a registered qualified elector in the District of Columbia, or who makes a false statement as to his or her residency on any such petition, shall upon conviction be fined not more than \$10,000 or be imprisoned not more than 1 year, or both.

(2) Any public officer, involved in any part of the election process, who willfully violates any of the provisions of § 1-1001.16 or § 1-1001.17, shall be fined not more than \$10,000 or be imprisoned not more than 1 year, or both.

(3) Any person who: (A) For any consideration, compensation, gratuity, reward or thing of value or promise thereof, signs or promises to sign or declines to sign, or promises not to sign any initiative, referendum, or recall petition; or (B) pays or offers or promises to pay, or gives or offers or promises to give any consideration, compensation, gratuity, reward, or thing of value to any person to induce him or her to sign or not to sign, his or her signatures upon any initiative, referendum, or recall petition, or to vote for or against, or to abstain from voting on, any initiative, referendum, or recall measure; or (C) by any other corrupt means or practice, or by threats or intimidation, interferes with, or attempts to interfere with, the right of any qualified registered elector to sign or not to sign any initiative, referendum, or recall petition, or to vote for or against, or to abstain from voting on any initiative, referendum, or recall measure; or (D) makes any false statement to the Board concerning any initiative, referendum, or recall petition, or the signatures appended thereto shall be fined not more than \$10,000 or be imprisoned not more than 1 year, or both.

(4) Any proposer or circulator of an initiative, referendum, or recall petition who willfully violates any provision of §§ 1-1001.16 and 1-1001.17 shall, upon conviction thereof, be subject to a fine of not more than \$10,000 or to imprisonment of not more than 6 months, or both. Each occurrence of a violation of §§ 1-1001.16 and 1-1001.17 shall constitute a separate offense. Violations of §§ 1-1001.16 and 1-1001.17 shall be prosecuted in the name of the District of Columbia by the Corporation Counsel of the District of Columbia.

(c) The provisions of this section shall be supplemental to, and not in derogation of, any penalties under other laws of the District of Columbia.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - FLORIDA

**Fla. Stat. § 104.011 False swearing; submission of false voter registration information.--**

(1) A person who willfully swears or affirms falsely to any oath or affirmation, or willfully procures another person to swear or affirm falsely to an oath or affirmation, in connection with or arising out of voting or elections commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(2) A person who willfully submits any false voter registration information commits a felony of the third degree, punishable as provided in s. 775.082 or s. 775.083.

**Fla. Stat. § 104.012 Consideration for registration; interference with registration; soliciting registrations for compensation; alteration of registration application.--**

(1) Any person who gives anything of value that is redeemable in cash to any person in consideration for his or her becoming a registered voter commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. This section shall not be interpreted, however, to exclude such services as transportation to the place of registration or baby-sitting in connection with the absence of an elector from home for registering.

(2) A person who by bribery, menace, threat, or other corruption, directly or indirectly, influences, deceives, or deters or attempts to influence, deceive, or deter any person in the free exercise of that person's right to register to vote at any time, upon the first conviction, commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084, and, upon any subsequent conviction, commits a felony of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(3) A person may not solicit or pay another person to solicit voter registrations for compensation that is based upon the number of registrations obtained. A person who violates the provisions of this subsection commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

(4) A person who alters the voter registration application of any other person, without the other person's knowledge and consent, commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.041 Fraud in connection with casting vote.--**Any person perpetrating or attempting to perpetrate or aid in the perpetration of any fraud in connection with any vote cast, to be cast, or attempted to be cast, is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.045 Vote selling.--**Any person who:

(1) Corruptly offers to vote for or against, or to refrain from voting for or against, any candidate in any election in return for pecuniary or other benefit; or

(2) Accepts a pecuniary or other benefit in exchange for a promise to vote for or against, or to refrain from voting for or against, any candidate in any election,

is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.061 Corruptly influencing voting.--**

(1) Whoever by bribery, menace, threat, or other corruption whatsoever, either directly or indirectly, attempts to influence, deceive, or deter any elector in voting or interferes with him or her in the free exercise of the elector's right to vote at any election commits a felony of the third degree, punishable as provided in s.

775.082, s. 775.083, or s. 775.084 for the first conviction, and a felony of the second degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084, for any subsequent conviction.

(2) No person shall directly or indirectly give or promise anything of value to another intending thereby to buy that person's or another's vote or to corruptly influence that person or another in casting his or her vote. Any person who violates this subsection is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084. However, this subsection shall not apply to the serving of food to be consumed at a political rally or meeting or to any item of nominal value which is used as a political advertisement, including a campaign message designed to be worn by a person.

**Fla. Stat. § 104.0615 Voter intimidation or suppression prohibited; criminal penalties.--**

(1) This section may be cited as the "Voter Protection Act."

(2) A person may not directly or indirectly use or threaten to use force, violence, or intimidation or any tactic of coercion or intimidation to induce or compel an individual to:

(a) Vote or refrain from voting;

(b) Vote or refrain from voting for any particular individual or ballot measure;

(c) Refrain from registering to vote; or

(d) Refrain from acting as a legally authorized election official or poll watcher.

(3) A person may not knowingly use false information to:

(a) Challenge an individual's right to vote;

(b) Induce or attempt to induce an individual to refrain from voting or registering to vote; or

(c) Induce or attempt to induce an individual to refrain from acting as a legally authorized election official or poll watcher.

(4) A person may not knowingly destroy, mutilate, or deface a voter registration form or election ballot or obstruct or delay the delivery of a voter registration form or election ballot.

(5) A person who violates subsection (2), subsection (3), or subsection (4) commits a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.15 Unqualified electors willfully voting.--**Whoever, knowing he or she is not a qualified elector, willfully votes at any election is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.16 Voting fraudulent ballot.--**Any elector who knowingly votes or attempts to vote a fraudulent ballot, or any person who knowingly solicits, or attempts, to vote a fraudulent ballot, is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.17 Voting in person after casting absentee ballot.--**Any person who willfully votes or attempts to vote both in person and by absentee ballot at any election is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.18 Casting more than one ballot at any election.--**Whoever willfully votes more than one ballot at any election is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

**Fla. Stat. § 104.24 Penalty for assuming name.**--A person may not, in connection with any part of the election process, fraudulently call himself or herself, or fraudulently pass by, any other name than the name by which the person is registered or fraudulently use the name of another in voting. Any person who violates this section is guilty of a felony of the third degree, punishable as provided in s. 775.082, s. 775.083, or s. 775.084.

01181E

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - GEORGIA

O.C.G.A § 21-2-561.

Any person who:

- (1) Registers as an elector knowing that such elector does not possess the qualifications required by law;
  - (2) Registers as an elector under any other name than the elector's own name; or
  - (3) Knowingly gives false information when registering as an elector
- shall be guilty of a felony.

O.C.G.A § 21-2-566.

Any person who:

- (1) Willfully prevents or attempts to prevent any poll officer from holding any primary or election under this chapter;
  - (2) Uses or threatens violence to any poll officer or interrupts or improperly interferes with the execution of his or her duty;
  - (3) Willfully blocks or attempts to block the avenue to the door of any polling place;
  - (4) Uses or threatens violence to any elector to prevent him or her from voting;
  - (5) Willfully prepares or presents to any poll officer a fraudulent voters certificate not signed by the elector whose certificate it purports to be;
  - (6) Knowingly deposits fraudulent ballots in the ballot box;
  - (7) Knowingly registers fraudulent votes upon any voting machine; or
  - (8) Willfully tampers with any electors list, voters certificate, numbered list of voters, ballot box, voting machine, direct recording electronic (DRE) equipment, or tabulating machine
- shall be guilty of a felony.

O.C.G.A § 21-2-570.

Any person who gives or receives, offers to give or receive, or participates in the giving or receiving of money or gifts for the purpose of registering as a voter, voting, or voting for a particular candidate in any primary or election shall be guilty of a felony.

O.C.G.A § 21-2-571.

Any person who votes or attempts to vote at any primary or election, knowing that such person does not possess all the qualifications of an elector at such primary or election, as required by law, or who votes or attempts to vote at any primary in violation of Code Section 21-2-223 or who knowingly gives false information to poll officers in an attempt to vote in any primary or election shall be guilty of a felony.

O.C.G.A § 21-2-572.

Any person who votes in more than one precinct in the same primary or election or otherwise fraudulently votes more than once at the same primary or election shall be guilty of a felony.

O.C.G.A § 21-2-573.

Any person who votes or attempts to vote by absentee ballot at any primary or election under Article 10 of this chapter and who is not qualified to vote shall be guilty of a misdemeanor.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – HAWAII

**Haw. Rev. Stat. §19-3 Election frauds.** The following persons shall be deemed guilty of an election fraud:

(1) Every person who, directly or indirectly, personally or through another, gives, procures, or lends, or agrees or offers to give, procure, or lend, or who endeavors to procure, any money or office or place of employment or valuable consideration to or for any elector, or to or for any person for an elector, or to or for any person in order to induce any elector to vote or refrain from voting, or to vote or refrain from voting for any particular person or party, or who does any such act on account of any person having voted or refrained from voting for any particular person at any election;

(2) Every person who advances or pays, or causes to be paid, any money to, or to the use of, any other person, with the intent that the money, or any part thereof, shall be expended in bribery at any election, or for any purpose connected with or incidental to any election; or who knowingly pays or causes to be paid any money to any person in the discharge or repayment of any money wholly or partly expended in bribery at any election, or for any purpose connected with or incidental to any election;

(3) Every elector who, before, during or after any election, directly or indirectly, personally or through another, receives, agrees, or contracts for any money, gift, loan, or valuable consideration, office, place, or employment for oneself or any other person for voting or agreeing to vote, or for refraining to vote or agreeing to refrain from voting, or for voting or refraining to vote for any particular person or party;

(4) Every person who, directly or indirectly, personally or through another, makes use of, or threatens to make use of, any force, violence, or restraint; or inflicts or threatens to inflict any injury, damage, or loss in any manner, or in any way practices intimidation upon or against any person in order to induce or compel the person to vote or refrain from voting, or to vote or refrain from voting for any particular person or party, at any election, or on account of the person having voted or refrained from voting, or voted or refrained from voting for any particular person or party; or who by abduction, distress, or any device or contrivance impedes, prevents, or otherwise interferes with the free exercise of the elective franchise;

(5) Every person who, at any election, votes or attempts to vote in the name of any other person, living or dead, or in some fictitious name, or who, having once voted, votes or attempts to vote again, or knowingly gives or attempts to give more than one ballot for the same office at one time of voting;

(6) Every person who, before or during an election, knowingly publishes a false statement of the withdrawal of any candidate at the election;

(7) Every person who induces or procures any person to withdraw from being a candidate at an election in consideration of any payment or gift or valuable consideration; or of any threat; and every candidate who withdraws from being a candidate in pursuance of such inducement or procurement;

(8) Every public officer by law required to do or perform any act or thing with reference to any of the provisions in any law concerning elections who wilfully fails, neglects, or refuses to do or perform the same, or who is guilty of any wilful violation of any of the provisions thereof;

(9) Any person wilfully tampering or attempting to tamper with, disarrange, deface, or impair in any manner whatsoever, or destroy any voting machine while the same is in use at any election, or who, after the machine is locked in order to preserve the registration or record of any election made by the same, tampers or attempts to tamper with any voting machine; and

(10) Every person who, directly or indirectly, personally or through another, wilfully designs, alters, accesses, or programs any electronic voting system to cause the system to inaccurately record, tally, or report votes cast on the electronic voting system.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – IDAHO

18-2302. FALSE SWEARING AS TO QUALIFICATIONS AS VOTER. Every person who, upon his right to vote being challenged at any election held under the laws of this state, wilfully, corruptly and falsely swears touching his qualifications as a voter, is guilty of perjury.

18-2304. PROCURING ILLEGAL VOTES. Every person who procures, aids, assists, counsels or advises another to give or offer his vote at any election, knowing that the person is not qualified to vote, is guilty of a misdemeanor.

18-2305. INTIMIDATION, CORRUPTION AND FRAUDS. Every person who, by force, threats, menaces, bribery, or any corrupt means, either directly or indirectly attempts to influence any elector in giving his vote, or to deter him from giving the same, or attempts by any means whatever, to awe, restrain, hinder or disturb any elector in the free exercise of the right of suffrage, or furnishes any elector wishing to vote, who can not read, with a ticket, informing or giving such elector to understand that it contains a name written or printed thereon different from the name which is written or printed thereon, or defrauds any elector at any such election, by deceiving and causing such elector to vote for a different person, for any office, than he intended or desired to vote for; or who, being officer, judge, or clerk of any election, while acting as such, induces, or attempts to induce, any elector, either by menace or reward, or promise thereof, to vote differently from what such elector intended or desired to vote, is guilty of a misdemeanor.

18-2306. ILLEGAL VOTING OR INTERFERENCE WITH ELECTION. Every person not entitled to vote, who fraudulently votes, and every person who votes more than once at any one election, or knowingly hands in two (2) or more tickets folded together, or changes any ballot after the same has been deposited in the ballot box, or adds, or attempts to add, any ballot to those legally polled at any election, either by fraudulently introducing the same into the ballot box before or after the ballots therein have been counted, or adds to or mixes with, or attempts to add to or mix with, the ballots lawfully polled, other ballots, while the same are being counted or canvassed, or at any other time, with intent to change the result of such election; or carries away or destroys, or attempts to carry away or destroy, any poll list, or ballots, or ballot box, for the purpose of breaking up or invalidating such election, or wilfully detains, mutilates, or destroys any election returns, or in any manner so interferes with the officers holding such election or conducting such canvass, or with the voters lawfully exercising their rights of voting at such election, as to prevent such election or canvass from being fairly held and lawfully conducted, is guilty of a felony.

18-2307. ATTEMPTING TO VOTE WHEN NOT QUALIFIED, OR TO REPEAT VOTING. Every person not entitled to vote, who fraudulently attempts to vote, or who, after being entitled to vote, attempts to vote more than once at any election, is guilty of a misdemeanor.

18-2319. ATTEMPT TO INFLUENCE VOTES. No person shall attempt to influence the vote of any elector by means of a promise or a favor, or by means of violence or threats of violence, or threats of withdrawing custom or dealing in business or trade, or enforcing the payment of a debt, or discharging from employment, or bringing a suit or criminal prosecution, or any other threat of injury to be inflicted by him, or by any other means.

18-2320. BRIBERY OF ELECTORS. No person shall in any way offer a bribe to an elector to influence his vote.

18-2322. ILLEGAL REGISTRATION BY VOTER. Any person who shall wilfully cause, or endeavor to cause, his name to be registered in any other election district than that in which he resides, or will reside prior to the day of the next ensuing election, except as herein otherwise provided, and any person who shall cause, or endeavor to cause, his name to be registered, knowing that he is not a qualified elector, and will not be a qualified elector on or before the day of the next ensuing election, in the election district in which he causes or endeavors to cause such registry to be made, and any person who shall induce, aid or abet anyone in the commission of either of the acts in this section enumerated and described, shall be fined not less than fifty dollars (\$50.00) nor more than one thousand dollars (\$1,000), or be confined in the county jail for not less than one (1) month nor more than six (6) months, or both.

## STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – ILLINOIS

10 ILCS 5/291. Vote buying. Any person who knowingly gives, lends or promises to give or lend any money or other valuable consideration to any other person to influence such other person to vote or to register to vote or to influence such other person to vote for or against any candidate or public question to be voted upon at any election shall be guilty of a Class 4 felony.

10 ILCS 5/29-2. Promise for vote. Any person who, in order to influence any other person to vote or register to vote or to vote for or against any candidate or public question to be voted upon at any election, knowingly promises to (a) cause or support the employment or appointment of any other person to any public office or public position or (b) perform or refrain from performing any official act, shall be guilty of a Class 4 felony.

10 ILCS 5/29-3. Selling of vote. Any person who votes for or against any candidate or public question in consideration of any gift or loan of money or for any other valuable consideration, or for any promise to cause or support the employment or appointment of any person to any public office or public position, shall be guilty of a Class 4 felony.

10 ILCS 5/29-4. Prevention of voting or candidate support. Any person who, by force, intimidation, threat, deception or forgery, knowingly prevents any other person from (a) registering to vote, or (b) lawfully voting, supporting or opposing the nomination or election of any person for public office or any public question voted upon at any election, shall be guilty of a Class 4 felony.

10 ILCS 5/29-5. Voting more than once. Any person who, having voted once, knowingly on the same election day where the ballot or machine lists any of the same candidates and issues listed on the ballot or machine previously used for voting by that person, (a) files an application to vote in the same or another polling place, or (b) accepts a ballot or enters a voting machine (except to legally give assistance pursuant to the provisions of this Code), shall be guilty of a Class 3 felony; however, if a person has delivered a ballot or ballots to an election authority as an absentee voter and due to a change of circumstances is able to and does vote in the precinct of his residence on election day, shall not be deemed to be in violation of this Code.

10 ILCS 5/29-18. Conspiracy to prevent vote - Liability. If 2 or more persons conspire to prevent by force, intimidation, threat, deception, forgery or bribery any person from registering to vote, or preventing any person lawfully entitled to vote from voting, or preventing any person from supporting or opposing, in a legal manner, the nomination or election of any person for public or political party office, or a proposition voted upon at any election, or to injure any person or such person's property on account of such vote, support or advocacy, and if one or more persons so conspiring do, attempt or cause to be done, any act in furtherance of the object of such conspiracy, whereby another is injured in his person or property or deprived of having or exercising any right, privilege or immunity secured by the Constitution or laws of the United States or the State of Illinois relating to the conduct of elections, voting, or the nomination or election of candidates for public or political party office, all persons engaged in such conspiracy shall be liable to the party injured or any person affected, in any action or proceeding for redress.

10 ILCS 5/29-19. False information – liability. Whoever knowingly or willfully gives false information as to his name, address, or period of residence in the voting district for the purpose of establishing his eligibility to register to vote, or conspires with another individual for the purpose of encouraging his false registration to vote or illegal voting, or pays or offers to pay or accepts payment either for registration to vote or for voting shall be liable to the party injured or any other person affected, in an action or proceeding for redress.

## STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - INDIANA

**IC 3-14-2-1**

**Fraudulent application for registration or absentee ballot; fraudulent voting**

Sec. 1. A person who knowingly does any of the following commits a Class D felony:

- (1) Conspires with an individual for the purpose of encouraging the individual to submit a false application for registration.
- (2) Conspires with an individual for the purpose of encouraging the individual to vote illegally.
- (3) Pays or offers to pay an individual for doing any of the following:
  - (A) Applying for an absentee ballot.
  - (B) Casting an absentee ballot.
  - (C) Registering to vote.
  - (D) Voting.
- (4) Accepts the payment of any property for doing any of the following:
  - (A) Applying for an absentee ballot.
  - (B) Casting an absentee ballot.
  - (C) Registering to vote.
  - (D) Voting.

**IC 3-14-2-2**

**Fraudulent application for registration or procurement of registration**

Sec. 2. A person who, knowing the person is not a voter and will not be a voter at the next election, applies for registration or procures registration as a voter commits a Class A misdemeanor.

**IC 3-14-2-2.5**

**Solicitation for fraudulent absentee ballot application**

Sec. 2.5. A person who does either of the following, knowing that an individual is ineligible to register to vote or to vote, commits absentee ballot fraud, a Class D felony:

- (1) Solicits the individual to complete an absentee ballot application.
- (2) Solicits the individual to submit an absentee ballot application to a county election board.

**IC 3-14-2-3**

**Fraudulent subscription of another person's name to affidavit of registration or absentee ballot application**

Sec. 3. A person who:

- (1) subscribes the name of another person to an affidavit of registration or application for an absentee ballot knowing that the application contains a false statement; or
  - (2) subscribes the name of another person to an affidavit of registration or application for an absentee ballot without writing on it the person's own name and address as an attesting witness;
- commits a Class D felony.

**IC 3-14-2-4**

**Registering to vote more than once**

Sec. 4. A person who recklessly registers or offers to register to vote more than once commits a Class A misdemeanor.

**IC 3-14-2-5**

**Destruction or failure to file or deliver registration form or absentee ballot application after execution**

Sec. 5. (a) A person who recklessly destroys or fails to deliver an absentee ballot application to the proper officer after the application has been executed by another individual in accordance with IC 3-11-4 commits a Class A misdemeanor.

(b) A person who recklessly destroys or fails to file or deliver to the proper officer a registration affidavit or form of registration after the affidavit or form has been executed commits a Class A misdemeanor.

**IC 3-14-2-6**

**Unauthorized release or removal of registration materials or information**

Sec. 6. A person who knowingly, intentionally, or recklessly releases or removes any registration materials or information contained in the computerized list maintained under IC 3-7-26.3 from the county voter registration office, except when release or removal is necessary:

(1) to comply with IC 3-7; or  
(2) for the destruction of the materials under IC 5-15-6;  
commits a Class A misdemeanor.

**IC 3-14-2-7**

**Withholding information or furnishing false information to poll taker; return of false names or names of deceased persons**

Sec. 7. A person who knowingly:

(1) upon the demand of a poll taker, withholds any information

from the poll taker with regard to the qualifications of a voter or person not entitled to vote;

(2) furnishes to a poll taker any false information with regard to the qualifications of any person for voting; or

(3) returns to the poll taker as voters any false names or the names of any persons who are dead or are not voters;

commits a Class A misdemeanor.

**IC 3-14-2-8**

**Return of names of ineligible, fictitious, or deceased persons by poll taker**

Sec. 8. A poll taker who knowingly returns:

(1) the name of a person who is not entitled to vote in the precinct for which the poll is taken at the next election;

(2) a fictitious name; or

(3) the name of a dead person;

commits a Class A misdemeanor.

**IC 3-14-2-9**

**Unregistered or unauthorized voting**

Sec. 9. A person who knowingly votes or offers to vote at an election when the person is not registered or authorized to vote commits a Class D felony.

**IC 3-14-2-10**

**Voting by ineligible persons**

Sec. 10. A person who recklessly votes at an election, unless the person is a registered voter under the requirements of IC 3-7 at the time of the election, commits a Class A misdemeanor.

**IC 3-14-2-11**

**Voting in other precincts**

Sec. 11. Except as provided by IC 3-10-10, IC 3-10-11, or IC 3-10-12, a person who knowingly votes or offers to vote in a precinct except the one in which the person is registered and resides commits a Class D felony.

**IC 3-14-2-12**

**Voting or applying to vote in false name and own name**

Sec. 12. A person who:

(1) knowingly votes or makes application to vote in an election in a name other than the person's own;

or

(2) having voted once at an election, knowingly applies to vote at the same election in the person's own name or any other name;

commits a Class D felony.

**IC 3-14-2-13**

**Hiring or soliciting an ineligible person to vote in a precinct**

Sec. 13. A person who knowingly hires or solicits another person to go into a precinct for the purpose of

011822

voting at an election at the precinct when the person hired or solicited is not a voter in the precinct commits a Class D felony.

#### **IC 3-14-2-14**

##### **Precinct officer or public official allowing ineligible voters or unauthorized procedure**

Sec. 14. A precinct election officer or public official upon whom a duty is imposed by this title who knowingly:

- (1) allows a person to vote who is not entitled to vote; or
- (2) allows a person to vote by use of an unauthorized procedure;

commits a Class D felony.

#### **IC 3-14-2-20**

##### **Deceptive registration of vote**

Sec. 20. A person who knowingly:

- (1) deceives a voter in registering the voter's vote under IC 3-11-8; or
- (2) registers a voter's vote in a way other than as requested by the voter;

commits a Class D felony.

#### **IC 3-14-3-18**

##### **Actions to unlawfully influence voter or candidate**

Sec. 18. (a) As used in this section, "candidate" includes an individual whom the person knows is considering becoming a candidate.

(b) A person who, for the purpose of influencing a voter or candidate, does any of the following commits a Class D felony:

- (1) Seeks to enforce the payment of a debt by force or threat of force.
- (2) Ejects or threatens to eject the voter or candidate from a house the voter or candidate occupies.
- (3) Begins a criminal prosecution.
- (4) Damages the business or trade of the voter or candidate.
- (5) Communicates a threat to commit a forcible felony (as defined in IC 35-41-1-11) against a voter or candidate with the intent that the voter or candidate:
  - (A) engage in conduct against the voter's or candidate's will; or
  - (B) be placed in fear of retaliation for a prior lawful act as a voter or candidate.

#### **IC 3-14-3-19**

##### **Inducing votes by gift or offer to compensate**

Sec. 19. A person who, for the purpose of inducing or procuring another person to:

- (1) apply for or cast an absentee ballot; or
- (2) vote or refrain from voting for or against a candidate or for or against a public question at an election or political convention;

gives, offers, or promises to any person any money or other property commits a Class D felony.

#### **IC 3-14-3-20**

##### **Acceptance or solicitation of compensation to induce or procure votes**

Sec. 20. A person who, for the purpose of inducing or procuring a voter to:

- (1) apply for or cast an absentee ballot; or
- (2) vote or refrain from voting for or against a candidate or for or against a public question at an election or political convention;

receives, accepts, requests, or solicits from any person any money or other property commits a Class D felony.

#### **IC 3-14-3-21.5**

##### **Voter intimidation**

Sec. 21.5. A person who knowingly or intentionally intimidates, threatens, or coerces an individual for:

- (1) voting or attempting to vote;
- (2) urging or aiding another individual to vote or attempt to vote; or
- (3) exercising any power or duty under this title concerning registration or voting;

commits voter intimidation, a Class D felony.

011824

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – IOWA

39A.2 Election misconduct in the first degree.

1. A person commits the crime of election misconduct in the first degree if the person willfully commits any of the following acts:

*a. Registration fraud.* Produces, procures, submits, or accepts a voter registration application that is known by the person to be materially false, fictitious, forged, or fraudulent.

*b. Vote fraud.*

(1) Destroys, delivers, or handles an application for a ballot or an absentee ballot with the intent of interfering with the voter's right to vote.

(2) Produces, procures, submits, or accepts a ballot or an absentee ballot, or produces, procures, casts, accepts, or tabulates a ballot that is known by the person to be materially false, fictitious, forged, or fraudulent.

(3) Votes or attempts to vote more than once at the same election, or votes or attempts to vote at an election knowing oneself not to be qualified.

(4) Makes a false or untrue statement in an application for an absentee ballot or makes or signs a false certification or affidavit in connection with an absentee ballot.

(5) Otherwise deprives, defrauds, or attempts to deprive or defraud the citizens of this state of a fair and impartially conducted election process.

*c. Duress.* Intimidates, threatens, or coerces, or attempts to intimidate, threaten, or coerce, a person to do any of the following:

(1) To register to vote, to vote, or to attempt to register to vote.

(2) To urge or aid a person to register to vote, to vote, or to attempt to register to vote.

(3) To exercise a right under chapters 39 through 53 .

*d. Bribery.*

(1) Pays, offers to pay, or causes to be paid money or any other thing of value to a person to influence the person's vote.

(2) Pays, offers to pay, or causes to be paid money or any other thing of value to an election official conditioned on some act done or omitted to be done contrary to the person's official duty in relation to an election.

(3) Receives money or any other thing of value knowing that it was given in violation of subparagraph (1) or (2).

*e. Conspiracy.* Conspires with or acts as an accessory with another to commit an act in violation of paragraphs "a" through "d" .

2. Election misconduct in the first degree is a class "D" felony.

011825

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - KANSAS

**25-2409. Election bribery.** Election bribery is conferring, offering or agreeing to confer, or soliciting, accepting or agreeing to accept any benefit as consideration to or from any person either to vote or withhold any person's vote, or to vote for or against any candidate or question submitted at any public election.

Election bribery is a severity level 7, nonperson felony.

**25-2415. Intimidation of voters.** (a) Intimidation of voters is: (1) intimidating, threatening, coercing or attempting to intimidate, threaten, or coerce any person for the purpose of interfering with the right of such person to vote or to vote as he may choose, or of causing such person to vote for, or not to vote for, any candidate for any office or question submitted at any election; or

(2) mailing, publishing, broadcasting, telephoning or transmitting by any means false information intended to keep one or more voters from casting a ballot or applying for or returning an advance voting ballot.

(b) Intimidation of voters is a severity level 7, nonperson felony.

**25-2416. Voting without being qualified.** Voting without being qualified is knowingly and willfully: (a) Voting or attempting to vote at any election when not a lawfully registered voter.

(b) Voting or offering to vote more than once at the same election.

(c) Inducing or aiding any person to vote more than once at the same election.

Voting without being qualified is a class A misdemeanor.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION- - KENTUCKY

**119.025 Wrongful registration.**

Any person who knowingly or fraudulently causes himself to be registered in more than one (1) precinct, or to be registered more than once, or in a precinct other than the one in which he is a legal voter, or who registers under any name other than his real name, or who gives a false address, or who in any manner causes himself to be registered when he is not legally entitled to register, or who makes a false oath as to his ability to read or write, or who knowingly or fraudulently aids, abets, counsels or advises in the commission of any such act, shall be subject to the penalties prescribed for Class D felonies.

**119.155 Preventing voter from casting ballot -- Interfering with election.**

(1) Any person who unlawfully prevents or attempts to prevent any voter from casting his ballot, or intimidates or attempts to intimidate any voter so as to prevent him from casting his ballot, or who unlawfully interferes with the election officers in the discharge of their duties, shall be guilty of a Class D felony.

(2) Any person who, by himself or in aid of others, forcibly breaks up or prevents, or attempts to break up or prevent, or obstructs or attempts to obstruct, the lawful holding of an election, shall be guilty of a Class A misdemeanor.

**119.165 False personation of a voter -- Nonresident or unqualified person voting.**

(1) Any person who falsely personates a registered voter, and receives and casts a ballot by means of such personation, shall be guilty of a Class D felony. An attempt at such personation shall constitute a Class A misdemeanor.

(2) Any person who, by means other than falsely personating a registered voter, votes at an election in this state when he is a resident of another state or country, or votes more than once at an election, or votes by use of the naturalization papers of another person, shall be guilty of a Class D felony. Any person who knowingly votes or attempts to vote in a precinct other than the one in which he resides shall be guilty of a Class A misdemeanor, unless by voting in a precinct in which he does not live he is enabled to vote in a race or on a matter in which he could not vote in his proper precinct in which case he shall be guilty of a Class D felony. Any person who lends or hires his or another's naturalization papers to be used for the purpose of voting shall be subject to the same penalty.

(3) Any resident of this state who, by means other than falsely personating a registered voter, votes at a regular or special election before he has resided in this state thirty (30) days, or in the county and precinct where the election is held the time required by law, or before he has attained full age, or before he has become a citizen, shall be guilty of a Class B misdemeanor.

(4) Any person who, by means other than falsely personating a registered voter, votes in a primary election knowing that he is not qualified as provided in KRS 116.055, shall be guilty of a violation.

(5) Any person who applies for or receives a ballot at any voting place other than the one at which he is entitled to vote, under circumstances not constituting a violation of any of the provisions of subsections (1) to (4) of this section, shall be guilty of a Class A misdemeanor.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - LOUISIANA

§1461. Election offenses; penalties

A. No person shall knowingly, willfully, or intentionally:

- (1) Fail, refuse, or neglect to discharge any duty imposed upon him, either individually or in an official capacity, by any provision of this Title.
- (2) Being a commissioner, permit fraudulent votes to be cast, or knowingly count votes not entitled to be cast.
- (3) Have in his possession an official ballot in violation of any provision of this Title.
- (4) Offer, promise, solicit, or accept money or anything of present or prospective value to secure or influence a vote or registration of a person.
- (5) Forge, alter, add to, deface, take, destroy, or remove from proper custodial care any book, card, record, election return, nomination papers, withdrawals of candidacy, election supplies, election paraphernalia, or any affidavit or other document required or provided for under the provisions of this Title, unless required to be removed by a court of competent jurisdiction for inspection and photostatic copying for the court record.
- (6) Intimidate, deceive, or misinform, directly or indirectly, any voter or prospective voter in matters concerning voting or nonvoting or voter registration or nonregistration, including but not limited to any matter concerning the voluntary affiliation or nonaffiliation of a voter with any political party.
- (7) Vote or attempt to vote more than once at an election.
- (8) Offer money or anything of present or prospective value or use, directly or indirectly, any form of intimidation to influence the action or encourage inaction of any public official with regard to the duties of his office or to influence a commissioner or watcher in his decision to serve or not to serve as such or in the performance of his duties on election day.
- (9) Disobey any lawful instruction of the commissioners or a law enforcement officer assisting at the polls, or without lawful authority obstruct, hinder, or delay any voter on his way to or while returning home from any polling place where an election is being held or on his way to or while returning home from a place where he can legally exercise a vote concerning candidate representation of his party.
- (10) Vote or attempt to vote, knowing that he is not qualified, or influence or attempt to influence another to vote, knowing such voter to be unqualified or the vote to be fraudulent.
- (11) Register, vote, or attempt to register or vote in the name of another or in an assumed or fictitious name, or in any manner other than as provided in this Title.
- (12) Have in his possession the registration certificate of another with intent to violate any provision of this Title.
- (13) Supply a false answer or statement to an election official or in any document required by this Title, or execute an affidavit knowing it to contain false or incorrect information.
- (14) Forge the name of another or use a fictitious name on an affidavit or document required under this Title.

011828

(15) Unlawfully, directly or indirectly, possess, tamper with, break, impair, impede, or otherwise interfere with the maintenance, adjustment, delivery, use, or operation of any voting machine or part thereof or with any of the paraphernalia connected with or appertaining thereto.

(16) As a voter, commissioner, watcher, or person assisting a voter, allow a ballot to be seen, except as provided by law; announce the manner in which a person has cast his vote; place a distinguishing mark on a ballot with intent to make the ballot identifiable, or make a false statement concerning ability to mark a ballot without assistance.

(17) Give or offer to give, directly or indirectly, any money or thing of present or prospective value to any person who has withdrawn or who was eliminated prior or subsequent to the primary election as a candidate for public office, for the purpose of securing or giving his political support to any remaining candidates or to candidates for public office in the primary or general election.

(18) Being a physician, certify to the disability of a voter under R.S. 18:1304, or certify that a person will be hospitalized on election day, knowing such information to be false.

(19) Breach any mandatory provision of this Title.

(20) Procure or submit voter registration applications that are known by the person to be materially false, fictitious, or fraudulent.

(21) While in the voting booth assisting another person in voting, coerce, compel, or otherwise influence the assisted voter to cast his vote in a certain way.

(22) Being a commissioner, fail to identify an applicant to vote as required by this Title.

(23) Fail to submit to the parish registrar of voters a completed registration application collected through a registration drive within thirty days of receipt of the completed application from the applicant.

B. Whoever violates any provision of this Section shall be fined not more than one thousand dollars or be imprisoned for not more than one year, or both. On a second offense, or any succeeding offense, the penalty shall be a fine of not more than two thousand five hundred dollars or imprisonment for not more than five years, or both.

C.(1) Notwithstanding any other provision of law to the contrary and in addition to the penalties provided in Subsection B of this Section, any candidate who is elected to public office and is convicted of an election offense as provided in Paragraphs (A)(4), (6), (10), (13), (14), and (17) of this Section that is related to his campaign for such public office shall forfeit such public office. If such conviction becomes final prior to the candidate taking the oath of office for such public office, the candidate shall forfeit the public office and shall not be allowed to hold such public office and such public office shall be declared vacant at the time such conviction becomes final. If the conviction for such election offense does not become final until after such candidate has taken the oath of office for such public office, then, at the time such conviction becomes final, he shall forfeit such public office and shall be, ipso facto, removed from such public office and such public office shall be declared vacant.

(2) However, if such candidate held such public office at the time of the commission of the election offense, he shall be allowed to serve the remainder of the term he was then serving, but, at the time his conviction for the election offense becomes final, he shall forfeit the public office for the subsequent term. If he has taken the oath of office for the subsequent term, he shall, at the time the conviction for the election offense becomes final, forfeit such public office and shall be, ipso facto, removed from such public office and such public office shall be declared vacant.

(3) Any vacancy in a public office occurring as a result of the provisions of this Subsection shall be filled as in the case of ordinary vacancies and according to the constitution and laws of the state.

011829

§1461.1. Coercion; prohibited practices; penalties

A.(1) No person shall knowingly coerce or attempt to coerce another person to give or withhold a contribution to influence the nomination or election of a person to the office of president or vice president of the United States, presidential elector, delegate to a political party convention, United States senator, United States congressman, or political party office.

(2) No person based on an individual's contribution, promise to make a contribution, or failure to make a contribution to influence the nomination or election of a person to any of the offices listed in this Subsection shall directly or indirectly affect an individual's employment by means of:

(a) Denial or deprivation or the threat of the denial or deprivation of any employment or position.

(b) Denial or deprivation or the threat of the denial or deprivation of the loss of any compensation, payment, benefit, or other emolument derived from or related to such employment or position.

(c) Discharge, promotion, degradation, or change in any manner in rank, status, or classification, or the threat or promise to do so.

(3)(a) No person based on an individual's contribution, promise to make a contribution, or failure to make any contribution to influence the nomination or election of a person to any of the offices listed in this Subsection shall directly or indirectly affect an individual by means of:

(i) Denial or deprivation or the threat of the denial or deprivation of membership or participation in any organization.

(ii) Denial or deprivation or the threat of the denial or deprivation of the loss of any compensation, payment, benefit, or other emolument derived from or related to such membership or participation in any organization.

(iii) Discharge, promotion, degradation, or change in any manner in rank, status, or classification in any organization, or the threat or promise to do so.

(b)(i) No organization shall directly or indirectly have as a condition of membership or participation, the requirement that a person make a contribution to such organization which will be used by such organization for the purpose of supporting, opposing, or otherwise influencing the nomination or election of a person to any of the offices listed in this Subsection, for the purpose of supporting or opposing a proposition or question submitted to the voters, or for the purpose of supporting or opposing the recall of a public officer.

(ii) For the purposes of this Subparagraph, "contribution" shall have the same meaning as provided for in R.S. 18:1483(6) and shall also include any dues or membership fees of any organization.

(c) For the purposes of this Paragraph, "organization" shall mean a partnership, association, labor union, political committee, corporation, or other legal entity, including their subsidiaries.

(4) No political committee, candidate, or other person shall knowingly and willfully make a contribution or expenditure using funds which were obtained through any practice prohibited by this Section.

(5) Any contribution received by a candidate, political committee, or other person who makes expenditures or receives contributions which was obtained through practices prohibited in this Subsection shall escheat to the state and shall be paid over to the state by such candidate, political committee, or such other person.

(6) Penalties for violations of any of the provisions of this Section shall be as provided in R.S. 18:1461(B).

B. Terms used in this Section shall be defined as in Chapter 11 of this Title except that, for purposes of this Section:

011830

(1) "Candidate" shall mean a person who seeks nomination or election to the office of president or vice president of the United States, presidential elector, delegate to a political party convention, United States senator, United States congressman, or political party office. An individual shall be deemed to seek nomination or election to such office if he has, since prior participation in an election, if any, received and accepted a contribution or made an expenditure, or has given his consent for any other person or committee to receive a contribution or make an expenditure with a view to influencing his nomination or election to such office, or taken the action necessary under the laws of the state of Louisiana to qualify himself for nomination or election to such office.

(2) "Person who makes expenditures or receives contributions" shall mean any person, other than a candidate or a political committee, who makes any expenditure or who accepts a contribution, other than to or from a candidate or to or from a political committee, if either said expenditures or said contributions exceed five hundred dollars in the aggregate during the aggregating period provided in the Campaign Finance Disclosure Act which would be applicable to candidates as defined in this Subsection if they were candidates for purposes of the Campaign Finance Disclosure Act.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MAINE

**§602. Bribery in official and political matters**

1. A person is guilty of bribery in official and political matters if:

A. He promises, offers, or gives any pecuniary benefit to another with the intention of influencing the other's action, decision, opinion, recommendation, vote, nomination or other exercise of discretion as a public servant, party official or voter;

B. Being a public servant, party official, candidate for electoral office or voter, he solicits, accepts or agrees to accept any pecuniary benefit from another knowing or believing the other's purpose to be as described in paragraph A, or fails to report to a law enforcement officer that he has been offered or promised a pecuniary benefit in violation of paragraph A; or

C. That person promises, offers or gives any pecuniary benefit to another with the intention of obtaining the other's signature on an absentee ballot under Title 21-A, chapter 9, subchapter IV, or referendum petition under Title 21-A, chapter 11, or that person solicits, accepts or agrees to accept any pecuniary benefit from another knowing or believing the other's purpose is to obtain that person's signature on an absentee ballot or referendum petition, or fails to report to a law enforcement officer that the person has been offered or promised a pecuniary benefit in violation of this paragraph.

2. As used in this section and other sections of this chapter, the following definitions apply.

A. A person is a "candidate for electoral office" upon his public announcement of his candidacy.

B. "Party official" means any person holding any post in a political party whether by election, appointment or otherwise.

C. "Pecuniary benefit" means any advantage in the form of money, property, commercial interest or anything else, the primary significance of which is economic gain; it does not include economic advantage applicable to the public generally, such as tax reduction or increased prosperity generally. "Pecuniary benefit" does not include the following:

(1) A meal, if the meal is provided by industry or special interest organizations as part of an informational program presented to a group of public servants;

(2) A meal, if the meal is a prayer breakfast or a meal served during a meeting to establish a prayer breakfast; or

(3) A subscription to a newspaper, news magazine or other news publication.

**§603. Improper influence**

1. A person is guilty of improper influence if he:

A. Threatens any harm to a public servant, party official or voter with the purpose of influencing his action, decision, opinion, recommendation, nomination, vote or other exercise of discretion;

B. Privately addresses to any public servant who has or will have an official discretion in a judicial or administrative proceeding any representation, argument or other communication with the intention of influencing that discretion on the basis of considerations other than those authorized by law; or

C. Being a public servant or party official, fails to report to a law enforcement officer conduct designed to influence him in violation of paragraphs A or B.

2. "Harm" means any disadvantage or injury, pecuniary or otherwise, including disadvantage or injury to any other person or entity in whose welfare the public servant, party official or voter is interested.

3. Improper influence is a Class D crime. ]

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MARYLAND

**§ 16-101. Offenses relating to registration.**

(a) In general.- A person may not willfully and knowingly:

- (1) impersonate a voter or other person in order to register or attempt to register in the name of the voter or other person;
- (2) register to vote more than once;
- (3) falsify residence in an attempt to register in the wrong location;
- (4) secure registration through any unlawful means;
- (5) cause by unlawful means the name of a qualified voter to be stricken from a registry of voters;
- (6) prevent, hinder, or delay a person having a lawful right to register from registering, through the use of force, threat, menace, intimidation, bribery, reward, or offer of reward;
- (7) falsify any name on a registration;
- (8) misrepresent any fact relating to registration; or
- (9) induce or attempt to induce a person to violate any prohibition in items (1) through (8) of this subsection.

(b) Penalty.- A person who violates this section is guilty of a misdemeanor and subject to a fine of not more than \$1,000 or imprisonment for not more than 5 years or both.

(c) A person who violates this section is subject to § 5-106(b) of the Courts Article.

**§ 16-201. Offenses relating to voting.**

(a) In general.- A person may not willfully and knowingly:

- (1) (i) impersonate another person in order to vote or attempt to vote; or  
(ii) vote or attempt to vote under a false name;
- (2) vote more than once for a candidate for the same office or for the same ballot question;
- (3) vote or attempt to vote more than once in the same election, or vote in more than one election district or precinct;
- (4) vote in an election district or precinct without the legal authority to vote in that election district or precinct; or
- (5) influence or attempt to influence a voter's voting decision through the use of force, threat, menace, intimidation, bribery, reward, or offer of reward.

(b) Penalties.- A person who violates this section is guilty of a misdemeanor and on conviction is subject to a fine of not more than \$2,500 or imprisonment for not more than 5 years or both.

011833

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MASSACHUSETTS

Chapter 56: Section 8. Illegal registration

Section 8. Whoever causes or attempts to cause his name to be registered, knowing that he is not a qualified voter in the place of such registration or attempted registration; whoever registers or attempts to register under a name other than his own; whoever represents or attempts to represent himself as some other person to an election commissioner, registrar or assistant registrar; whoever gives a false answer to an election commissioner, registrar, or assistant registrar respecting any matter relating to his registration or his right to vote; whoever otherwise illegally registers or attempts to register; or whoever aids or abets any other person in doing any of the acts above mentioned, shall be punished by a fine of not more than ten thousand dollars or by imprisonment for not more than five years, or both.

Chapter 56: Section 26. Illegal voting or attempt to vote

Section 26. Whoever, knowing that he is not a qualified voter in any place, wilfully votes or attempts to vote therein; whoever votes or attempts to vote more than once on his own name, his name having been registered more than once; whoever votes or attempts to vote in more than one voting precinct or town, his name having been registered in more than one voting precinct or town; whoever votes or attempts to vote in any name other than his own, or knowingly casts or attempts to cast more than one ballot at one time of balloting; or whoever votes or attempts to vote otherwise illegally, shall be punished by a fine of not more than ten thousand dollars or by imprisonment for not more than five years, or both.

Chapter 56: Section 28. Illegal voting; aiding or abetting

Section 28. Whoever, at a primary, caucus or election, aids or abets a person who is not entitled to vote, in voting or attempting to vote, or in voting or attempting to vote under a name other than his own, or in casting or attempting to cast more than one ballot, shall be punished by a fine of not more than ten thousand dollars or by imprisonment for not more than five years, or both.

Chapter 56: Section 29. Unlawful interference with voter

Section 29. Whoever wilfully and without lawful authority hinders, delays or interferes with, or aids in hindering, delaying or interfering with, a voter while on his way to a primary, caucus or election, while within the guard rail, while marking his ballot or while voting or attempting to vote, or endeavors to induce a voter, before depositing his ballot, to disclose how he marks or has marked it, shall be punished by a fine of not more than five hundred dollars or by imprisonment for not more than one year.

Chapter 56: Section 31. Illegal challenges

Section 31. Any person challenging a qualified voter for purposes of intimidation, or of ascertaining how he voted, or for any other illegal purpose, shall be punished by a fine of not more than one hundred dollars.

Chapter 56: Section 32. Bribery of voter

Section 32. No person shall, directly or indirectly, pay, give or promise to a voter, any gift or reward to influence his vote or to induce him to withhold his vote.

Violation of any provision of this section shall be punished by imprisonment for not more than one year.

011834

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MICHIGAN

**168.931 Prohibited conduct; violation as misdemeanor; “valuable consideration” defined.**

(1) A person who violates 1 or more of the following subdivisions is guilty of a misdemeanor:

(a) A person shall not, either directly or indirectly, give, lend, or promise valuable consideration, to or for any person, as an inducement to influence the manner of voting by a person relative to a candidate or ballot question, or as a reward for refraining from voting.

(b) A person shall not, either before, on, or after an election, for the person's own benefit or on behalf of any other person, receive, agree, or contract for valuable consideration for 1 or more of the following:

(i) Voting or agreeing to vote, or inducing or attempting to induce another to vote, at an election.

(ii) Refraining or agreeing to refrain, or inducing or attempting to induce another to refrain, from voting at an election.

(iii) Doing anything prohibited by this act.

(iv) Both distributing absent voter ballot applications to voters and receiving signed applications from voters for delivery to the appropriate clerk or assistant of the clerk. This subparagraph does not apply to an authorized election official.

(c) A person shall not solicit any valuable consideration from a candidate for nomination for, or election to, an office described in this act. This subdivision does not apply to requests for contributions of money by or to an authorized representative of the political party committee of the organization to which the candidate belongs. This subdivision does not apply to a regular business transaction between a candidate and any other person that is not intended for, or connected with, the securing of votes or the influencing of voters in connection with the nomination or election.

(d) A person shall not, either directly or indirectly, discharge or threaten to discharge an employee of the person for the purpose of influencing the employee's vote at an election.

(e) A priest, pastor, curate, or other officer of a religious society shall not for the purpose of influencing a voter at an election, impose or threaten to impose upon the voter a penalty of excommunication, dismissal, or expulsion, or command or advise the voter, under pain of religious disapproval.

(f) A person shall not hire a motor vehicle or other conveyance or cause the same to be done, for conveying voters, other than voters physically unable to walk, to an election.

(g) In a city, township, village, or school district that has a board of election commissioners authorized to appoint inspectors of election, an inspector of election, a clerk, or other election official who accepts an appointment as an inspector of election shall not fail to report at the polling place designated on election morning at the time specified by the board of election commissioners, unless excused as provided in this subdivision. A person who violates this subdivision is guilty of a misdemeanor, punishable by a fine of not more than \$10.00 or imprisonment for not more than 10 days, or both. An inspector of election, clerk, or other election official who accepts an appointment as an inspector of election is excused for failing to report at the polling place on election day and is not subject to a fine or imprisonment under this subdivision if 1 or more of the following requirements are met:

(i) The inspector of election, clerk, or other election official notifies the board of election commissioners or other officers in charge of elections of his or her inability to serve at the time and place specified, 3 days or more before the election.

(ii) The inspector of election, clerk, or other election official is excused from duty by the board of election commissioners or other officers in charge of elections for cause shown.

(h) A person shall not willfully fail to perform a duty imposed upon that person by this act, or disobey a lawful instruction or order of the secretary of state as chief state election officer or of a board of county election commissioners, board of city election commissioners, or board of inspectors of election.

(i) A delegate or member of a convention shall not solicit a candidate for nomination before the convention for money, reward, position, place, preferment, or other valuable consideration in return for support by the delegate or member in the convention. A candidate or other person shall not promise or give to a delegate money, reward, position, place, preferment, or other valuable consideration in return for support by or vote of the delegate in the convention.

(j) A person elected to the office of delegate to a convention shall not accept or receive any money or other valuable consideration for his or her vote as a delegate.

(k) A person shall not, while the polls are open on an election day, solicit votes in a polling place or within 100 feet from an entrance to the building in which a polling place is located.

(l) A person shall not keep a room or building for the purpose, in whole or in part, of recording or registering bets or wagers, or of selling pools upon the result of a political nomination, appointment, or election. A person shall not wager property, money, or thing of value, or be the custodian of money, property, or thing of value, staked, wagered, or pledged upon the result of a political nomination, appointment, or election.

(m) A person shall not participate in a meeting or a portion of a meeting of more than 2 persons, other than the person's immediate family, at which an absent voter ballot is voted.

(n) A person, other than an authorized election official, shall not, either directly or indirectly, give, lend, or promise any valuable consideration to or for a person to induce that person to both distribute absent voter ballot applications to voters and receive signed absent voter ballot applications from voters for delivery to the appropriate clerk.

(2) A person who violates a provision of this act for which a penalty is not otherwise specifically provided in this act, is guilty of a misdemeanor.

(3) A person or a person's agent who knowingly makes, publishes, disseminates, circulates, or places before the public, or knowingly causes directly or indirectly to be made, published, disseminated, circulated, or placed before the public, in this state, either orally or in writing, an assertion, representation, or statement of fact concerning a candidate for public office at an election in this state, that is false, deceptive, scurrilous, or malicious, without the true name of the author being subscribed to the assertion, representation, or statement if written, or announced if unwritten, is guilty of a misdemeanor.

(4) As used in this section, "valuable consideration" includes, but is not limited to, money, property, a gift, a prize or chance for a prize, a fee, a loan, an office, a position, an appointment, or employment.

**68.932 Prohibited conduct; violation as felony.**

A person who violates 1 or more of the following subdivisions is guilty of a felony:

(a) A person shall not attempt, by means of bribery, menace, or other corrupt means or device, either directly or indirectly, to influence an elector in giving his or her vote, or to deter the elector from, or interrupt the elector in giving his or her vote at any election held in this state.

(b) A person not duly authorized by law shall not, during the progress of any election or after the closing of the polls and before the final results of the election have been ascertained, break open or

violate the seals or locks of any ballot box or voting machine used or in use at that election. A person shall not willfully damage or destroy any ballot box or voting machine. A person shall not obtain undue possession of that ballot box or voting machine. A person shall not conceal, withhold, or destroy a ballot box or voting machine, or fraudulently or forcibly add to or diminish the number of ballots legally deposited in the box or the totals on the voting machine. A person shall not aid or abet in any act prohibited by this subdivision.

(c) An inspector of election, clerk, or other officer or person having custody of any record, election list of voters, affidavit, return, statement of votes, certificates, poll book, or of any paper, document, or vote of any description, which pursuant to this act is directed to be made, filed, or preserved, shall not willfully destroy, mutilate, deface, falsify, or fraudulently remove or secrete any or all of those items, in whole or in part, or fraudulently make any entry, erasure, or alteration on any or all of those items, or permit any other person to do so.

(d) A person shall neither disclose to any other person the name of any candidate voted for by any elector, the contents of whose ballots were seen by the person, nor in any manner obstruct or attempt to obstruct any elector in the exercise of his or her duties as an elector under this act.

(e) A person who is not involved in the counting of ballots as provided by law and who has possession of an absent voter ballot mailed or delivered to another person shall not do any of the following:

(i) Open the envelope containing the ballot.

(ii) Make any marking on the ballot.

(iii) Alter the ballot in any way.

(iv) Substitute another ballot for the absent voter ballot that the person possesses.

(f) A person other than an absent voter; a person whose job it is to handle mail before, during, or after being transported by a public postal service, express mail service, parcel post service, or common carrier, but only during the normal course of his or her employment; a clerk or assistant of the clerk; a member of the immediate family of the absent voter including father-in-law, mother-in-law, brother-in-law, sister-in-law, son-in-law, daughter-in-law, grandparent, or grandchild; or a person residing in the absent voter's household shall not do any of the following:

(i) Possess an absent voter ballot mailed or delivered to another person, regardless of whether the ballot has been voted.

(ii) Return, solicit to return, or agree to return an absent voter ballot to the clerk of a city, township, village, or school district.

(g) A person who assists an absent voter who is disabled or otherwise unable to mark the ballot shall only render his or her assistance by showing the absent voter how to vote the ballot as the absent voter desires or by marking the ballot as directed by the absent voter. A person who assists an absent voter who is disabled or otherwise unable to mark the ballot shall not suggest or in any manner attempt to influence the absent voter on how he or she should vote or allow any other person to do so.

(h) A person present while an absent voter is voting an absent voter ballot shall not suggest or in any manner attempt to influence the absent voter on how he or she should vote.

(i) A person shall not plan or organize a meeting at which absent voter ballots are to be voted.

**168.932a Violations as felony; penalty.**

A person who does any of the following is guilty of a felony punishable by imprisonment for not more than 4 years or a fine of not more than \$2,000.00, or both:

(a) A person shall not, at an election, falsely impersonate another person, or vote or attempt to vote under the name of another person, or induce or attempt to induce a person to impersonate another person or to vote or attempt to vote under the name of another person.

(b) A person shall not assume a false or fictitious name to vote or to offer to vote by that name, enter or cause to be entered upon the registration book in a voting precinct a false or fictitious name, or induce or attempt to induce another person to assume a false or fictitious name in order to vote, by that name, vote, or offer to or enter or cause to be entered upon the registration book of a voting precinct, a false or fictitious name.

(c) A person who is not a qualified and registered elector shall not willfully offer to vote or attempt to vote at an election held in this state. A person shall not aid or counsel a person who is not a qualified and registered elector to vote or offer to vote at the place where the vote is given during an election.

(d) A qualified and registered elector shall not offer to vote or attempt to vote in a voting precinct in which the elector does not reside, except as otherwise provided in this act. A person shall not procure, aid, or counsel another person to go or come into a township, ward, or voting precinct for the purpose of voting at an election, knowing that the person is not qualified or registered to vote in that township, ward, or voting precinct.

(e) A person shall not offer to vote or attempt to vote more than once at the same election either in the same or in another voting precinct. A person shall not give 2 or more votes folded together.

**168.933 Perjury; definition.**

A person who makes a false affidavit or swears falsely while under oath under section 848 or for the purpose of securing registration, for the purpose of voting at an election, or for the purpose of qualifying as a candidate for elective office under section 558 is guilty of perjury.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MINNESOTA

**211B.07 Undue influence on voters prohibited.**

A person may not directly or indirectly use or threaten force, coercion, violence, restraint, damage, harm, loss, including loss of employment or economic reprisal, undue influence, or temporal or spiritual injury against an individual to compel the individual to vote for or against a candidate or ballot question. Abduction, duress, or fraud may not be used to obstruct or prevent the free exercise of the right to vote of a voter at a primary or election, or compel a voter to vote at a primary or election. Violation of this section is a gross misdemeanor.

**211B.13 Bribery, treating, and solicitation.**

Subdivision 1. **Bribery, advancing money, and treating prohibited.** A person who willfully, directly or indirectly, advances, pays, gives, promises, or lends any money, food, liquor, clothing, entertainment, or other thing of monetary value, or who offers, promises, or endeavors to obtain any money, position, appointment, employment, or other valuable consideration, to or for a person, in order to induce a voter to refrain from voting, or to vote in a particular way, at an election, is guilty of a felony. This section does not prevent a candidate from stating publicly preference for or support of another candidate to be voted for at the same primary or election. Refreshments of food or nonalcoholic beverages having a value up to \$5 consumed on the premises at a private gathering or public meeting are not prohibited under this section.

Subd. 2. **Certain solicitations prohibited.** A person may not knowingly solicit, receive, or accept any money, property, or other thing of monetary value, or a promise or pledge of these that is a disbursement prohibited by this section or section 211B.15.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MISSISSIPPI

**§ 23-15-17. Penalties for false registration.**

(1) Any person who shall knowingly procure his or any other person's registration as a qualified elector when the person whose registration is being procured is not entitled to be registered, or when the person whose registration is being procured is being registered under a false name, or when the person whose registration is being procured is being registered as a qualified elector in any other voting precinct than that in which he resides, shall be guilty of a felony and, upon conviction, be fined not more than Five Thousand Dollars (\$5,000.00) or imprisoned not more than five (5) years, or both. The same penalty shall apply to anyone who is disqualified for any cause and shall reregister before removal of such disqualification to avoid the same, and to all who shall in any way aid in such false registration.

(2) Any person who has reasonable cause to suspect that such a false registration has occurred may notify any authorized law enforcement officer with proper jurisdiction. Upon such notification, said law enforcement officer shall be required to conduct an investigation into the matter and file a report with the registrar and the appropriate district attorney. The registrar shall, within twenty-four (24) hours of receipt of the investigating officer's report, accept or reject the registration. Any person who so notifies an authorized law enforcement officer shall be presumed to be acting in good faith and shall be immune from any liability, civil or criminal, that might otherwise be incurred or imposed.

**§ 97-13-1. Bribery; influencing electors or election officers.**

If any elector, manager, clerk or canvasser at any election, or any executive officer attending the same, shall receive any gift, reward, or promise thereof or if any person shall offer such gift, reward, or promise thereof to influence any elector, clerk, canvasser, or any executive officer attending any election in his vote, opinion, action, or judgment in relation to such election, the person so offending shall, on conviction, be imprisoned in the penitentiary not more than two years or in a county jail not more than one year, or be fined one thousand dollars, or both.

**§ 97-13-35. Voting; by unqualified person, or at more than one place, or for both parties in same primary.**

**§ 97-13-36. Multiple voting; penalties.**

Any person who shall knowingly vote at any election in more than one (1) county or at more than one (1) place in any county, municipality or other political subdivision with the intent to have more than one (1) vote counted in any election shall be guilty of the crime of multiple voting and, upon conviction, shall be sentenced to pay a fine of not less than Five Hundred Dollars (\$500.00) nor more than Five Thousand Dollars (\$5,000.00), or by imprisonment in the county jail for no more than one (1) year, or by both fine and imprisonment, or by being sentenced to the State Penitentiary for not less than one (1) year nor more than five (5) years.

**§ 97-13-37. Intimidating, boycotting, etc., elector to procure vote.**

Whoever shall procure, or endeavor to procure, the vote of any elector, or the influence of any person over other electors, at any election, for himself or any candidate, by means of violence, threats of violence, or threats of withdrawing custom, or dealing in business or trade, or of enforcing the payment of a debt, or of bringing a suit or criminal prosecution, or by any other threat or injury to be inflicted by him, or by his means, shall, upon conviction, be punished by imprisonment in the county jail not more than one year, or by fine not exceeding one thousand dollars, or by both.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - MISSOURI

**Class one election offense defined.**

115.175. Any person who knowingly or willfully gives any false information for the purpose of establishing his eligibility to register to vote or who conspires with another person for the purpose of encouraging his false registration or illegal vote, or who pays or offers to pay, accepts or offers to accept payment for registering to vote or for voting, or who otherwise willfully and fraudulently furnishes false information to a registration official for the purpose of causing a false or fictitious registration, or who registers to vote with the intention of voting more than once in the same election shall be guilty of a class one election offense.

**Class one election offenses.**

115.631. The following offenses, and any others specifically so described by law, shall be class one election offenses and are deemed felonies connected with the exercise of the right of suffrage. Conviction for any of these offenses shall be punished by imprisonment of not more than five years or by fine of not less than two thousand five hundred dollars but not more than ten thousand dollars or by both such imprisonment and fine:

(1) Willfully and falsely making any certificate, affidavit, or statement required to be made pursuant to any provision of sections 115.001 to 115.641 and sections 51.450\* and 51.460, RSMo, including but not limited to statements specifically required to be made "under penalty of perjury"; or in any other manner knowingly furnishing false information to an election authority or election official engaged in any lawful duty or action in such a way as to hinder or mislead the authority or official in the performance of official duties. If an individual willfully and falsely makes any certificate, affidavit, or statement required to be made under section 115.155, including but not limited to statements specifically required to be made "under penalty of perjury", such individual shall be guilty of a class C felony;

(2) Voting more than once or voting at any election knowing that the person is not entitled to vote or that the person has already voted on the same day at another location inside or outside the state of Missouri;

(3) Procuring any person to vote knowing the person is not lawfully entitled to vote or knowingly procuring an illegal vote to be cast at any election;

(4) Applying for a ballot in the name of any other person, whether the name be that of a person living or dead or of a fictitious person, or applying for a ballot in his own or any other name after having once voted at the election inside or outside the state of Missouri;

(5) Aiding, abetting or advising another person to vote knowing the person is not legally entitled to vote or knowingly aiding, abetting or advising another person to cast an illegal vote;

(6) An election judge knowingly causing or permitting any ballot to be in the ballot box at the opening of the polls and before the voting commences;

(7) Knowingly furnishing any voter with a false or fraudulent or bogus ballot, or knowingly practicing any fraud upon a voter to induce him to cast a vote which will be rejected, or otherwise defrauding him of his vote;

(8) An election judge knowingly placing or attempting to place or permitting any ballot, or paper having the semblance of a ballot, to be placed in a ballot box at any election unless the ballot is offered by a qualified voter as provided by law;

(9) Knowingly placing or attempting to place or causing to be placed any false or fraudulent or bogus ballot in a ballot box at any election;

(10) Knowingly removing any legal ballot from a ballot box for the purpose of changing the true and lawful count of any election or in any other manner knowingly changing the true and lawful count of any election;

011841

- (11) Knowingly altering, defacing, damaging, destroying or concealing any ballot after it has been voted for the purpose of changing the lawful count of any election;
- (12) Knowingly altering, defacing, damaging, destroying or concealing any poll list, report, affidavit, return or certificate for the purpose of changing the lawful count of any election;
- (13) On the part of any person authorized to receive, tally or count a poll list, tally sheet or election return, receiving, tallying or counting a poll list, tally sheet or election return the person knows is fraudulent, forged or counterfeit, or knowingly making an incorrect account of any election;
- (14) On the part of any person whose duty it is to grant certificates of election, or in any manner declare the result of an election, granting a certificate to a person the person knows is not entitled to receive the certificate, or declaring any election result the person knows is based upon fraudulent, fictitious or illegal votes or returns;
- (15) Willfully destroying or damaging any official ballots, whether marked or unmarked, after the ballots have been prepared for use at an election and during the time they are required by law to be preserved in the custody of the election judges or the election authority;
- (16) Willfully tampering with, disarranging, altering the information on, defacing, impairing or destroying any voting machine or marking device after the machine or marking device has been prepared for use at an election and during the time it is required by law to remain locked and sealed with intent to impair the functioning of the machine or marking device at an election, mislead any voter at the election, or to destroy or change the count or record of votes on such machine;
- (17) Registering to vote knowing the person is not legally entitled to register or registering in the name of another person, whether the name be that of a person living or dead or of a fictitious person;
- (18) Procuring any other person to register knowing the person is not legally entitled to register, or aiding, abetting or advising another person to register knowing the person is not legally entitled to register;
- (19) Knowingly preparing, altering or substituting any computer program or other counting equipment to give an untrue or unlawful result of an election;
- (20) On the part of any person assisting a blind or disabled person to vote, knowingly failing to cast such person's vote as such person directs;
- (21) On the part of any registration or election official, permitting any person to register to vote or to vote when such official knows the person is not legally entitled to register or not legally entitled to vote;
- (22) On the part of a notary public acting in his official capacity, knowingly violating any of the provisions of sections 115.001 to 115.627 or any provision of law pertaining to elections;
- (23) Violation of any of the provisions of sections 115.275 to 115.303, or of any provision of law pertaining to absentee voting;
- (24) Assisting a person to vote knowing such person is not legally entitled to such assistance, or while assisting a person to vote who is legally entitled to such assistance, in any manner coercing, requesting or suggesting that the voter vote for or against, or refrain from voting on any question, ticket or candidate.

**Class three election offenses.**

115.635. The following offenses, and any others specifically so described by law, shall be class three election offenses and are deemed misdemeanors connected with the exercise of the right of suffrage. Conviction for any of these offenses shall be punished by imprisonment of not more than one year or by fine of not more than two thousand five hundred dollars, or by both such imprisonment and fine:

011842

(1) Giving, lending, agreeing to give or lend, offering, promising, or endeavoring to procure, any money or valuable consideration, office, or place of employment, to or for any voter, to or for any person on behalf of any voter, or to or for any person, in order to induce any voter to vote or refrain from voting or corruptly doing any such act on account of such voter having already voted or refrained from voting at any election;

(2) Making use of, or threatening to make use of, any force, violence, or restraint, or inflicting or threatening to inflict any injury, damage, harm or loss upon or against any person, in order to induce or compel such person to vote or refrain from voting at any election;

(3) Impeding or preventing, or attempting to impede or prevent, by abduction, duress or any fraudulent device or contrivance, the free exercise of the franchise of any voter or, by abduction, duress, or any fraudulent device, compelling, inducing, or prevailing upon any voter to vote or refrain from voting at any election;

(4) Giving, or making an agreement to give, any money, property, right in action, or other gratuity or reward, in consideration of any grant or deputation of office;

(5) Bringing into this state any nonresident person with intent that such person shall vote at an election without possessing the requisite qualifications;

(6) Asking for, receiving, or taking any money or other reward by way of gift, loan, or other device or agreeing or contracting for any money, gift, office, employment, or other reward, for giving, or refraining from giving, his or her vote in any election;

(7) Removing, destroying or altering any supplies or information placed in or near a voting booth for the purpose of enabling a voter to prepare his or her ballot;

(8) Entering a voting booth or compartment except as specifically authorized by law;

(9) On the part of any election official, challenger, watcher or person assisting a person to vote, revealing or disclosing any information as to how any voter may have voted, indicated that the person had voted except as authorized by this chapter, indicated an intent to vote or offered to vote, except to a grand jury or pursuant to a lawful subpoena in a court proceeding relating to an election offense;

(10) On the part of any registration or election official, refusing to permit any person to register to vote or to vote when such official knows the person is legally entitled to register or legally entitled to vote;

(11) Attempting to commit or participating in an attempt to commit any class one or class two election offense.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – MONTANA

**45-7-101. Bribery in official and political matters.** (1) A person commits the offense of bribery if he purposely or knowingly offers, confers, or agrees to confer upon another or solicits, accepts, or agrees to accept from another:

(a) any pecuniary benefit as a consideration for the recipient's decision, opinion, recommendation, vote, or other exercise of discretion as a public servant, party official, or voter;

(b) any benefit as consideration for the recipient's decision, vote, recommendation, or other exercise of official discretion in a judicial or administrative proceeding; or

(c) any benefit as consideration for a violation of a known duty as a public servant or party official.

(2) It is no defense to prosecution under this section that a person whom the offender sought to influence was not qualified to act in the desired way whether because he had not yet assumed office or lacked jurisdiction or for any other reason.

(3) A person convicted of the offense of bribery shall be imprisoned in the state prison for any term not to exceed 10 years or be fined an amount not to exceed \$50,000, or both, and shall forever be disqualified from holding any public office in this state.

**45-7-102. Threats and other improper influence in official and political matters.** (1) A person commits an offense under this section if the person purposely or knowingly:

(a) (i) threatens harm to any person, the person's spouse, child, parent, or sibling, or the person's property with the purpose to influence the person's decision, opinion, recommendation, vote, or other exercise of discretion as a public servant, party official, or voter;

(ii) threatens harm to any public servant, to the public servant's spouse, child, parent, or sibling, or to the public servant's property with the purpose to influence the public servant's decision, opinion, recommendation, vote, or other exercise of discretion in a judicial or administrative proceeding;

(iii) threatens harm to any public servant or party official, the person's spouse, child, parent, or sibling, or the person's property with the purpose to influence the person to violate the person's duty or to prevent the public servant or party official from accepting or holding any public office;

(iv) privately addresses to any public servant who has or will have official discretion in a judicial or administrative proceeding any representation, entreaty, argument, or other communication designed to influence the outcome on the basis of considerations other than those authorized by law;

(v) as a juror or officer in charge of a jury receives or permits to be received any communication relating to any matter pending before the jury, except according to the regular course of proceedings; or

(b) injures the person or property of a public servant or injures the servant's spouse, child, parent, or sibling because of the public servant's lawful discharge of the duties of the office or to prevent the public servant from discharging the public servant's official duties.

(2) It is no defense to prosecution under subsections (1)(a)(i) through (1)(a)(iv) and (1)(b) that a person whom the offender sought to influence was not qualified to act in the desired way, whether because the person had not yet assumed office or lacked jurisdiction or for any other reason.

(3) A person convicted under this section shall be fined not to exceed \$50,000 or be imprisoned in the state prison for a term not to exceed 10 years, or both.

**13-35-207. Deceptive election practices.** A person is guilty of false swearing, unsworn falsification, or tampering with public records or information, as appropriate, and is punishable as provided in 45-7-202, 45-7-203, or 45-7-208, as applicable, whenever the person:

(1) falsely represents his name or other information required upon his registry card and causes registration with the card;

(2) signs a registry card knowingly witnessing any false or misleading statement;

(3) knowingly causes a false statement, certificate, or return of any kind to be signed;

(4) falsely makes a declaration or certificate of nomination;

(5) files or receives for filing a declaration or certificate of nomination knowing that all or part of the declaration or certificate is false;

(6) forges or falsely makes the official endorsement of a ballot;

(7) forges or counterfeits returns of an election purporting to have been held at a precinct, municipality, or ward where no election was in fact held;

(8) knowingly substitutes forged or counterfeit returns of election in place of the true returns for a precinct, municipality, or ward where an election was held;

(9) signs a name other than his own to a petition, signs more than once for the same measure, or signs a petition while not being a qualified elector of the state; or

(10) makes a false oath or affidavit where an oath or affidavit is required by law.

**13-35-209. Fraudulent registration.** (1) No person may knowingly cause, procure, or allow himself to be registered in the official register of any election district of any county knowing himself not to be entitled to such registration.

(2) No person may falsely personate another and cause the person so personated to be registered.

(3) When, on the trial of the person charged with any offense under the provisions of this section, it appears in evidence that the accused stands registered in the register of any county without being qualified for such registration, the court shall order such registration canceled.

**13-35-215. Illegal consideration for voting.** No person, directly or indirectly, by himself or by any other person in his behalf, may:

(1) before or during any election, for voting or agreeing to vote or for refraining or agreeing to refrain from voting at the election or for inducing another to do so:

(a) receive, agree, or contract for any money, gift, loan, liquor, valuable consideration, office, place, or employment for himself or any other person; or

(b) approach any candidate or agent or person representing or acting on behalf of any candidate and ask for or offer to agree or contract for any money, gift, loan, liquor, valuable consideration, office, place, or employment for himself or any other person;

(2) after an election, for having voted or refrained from voting or having induced any other person to vote or refrain from voting at the election:

(a) receive any money, gift, loan, valuable consideration, office, place, or employment; or

(b) approach any candidate or any agent or person representing or acting on behalf of any candidate and ask for or offer to receive any money, gift, loan, liquor, valuable consideration, office, place, or employment for himself or any other person.

**13-35-218. Coercion or undue influence of voters.** (1) No person, directly or indirectly, by himself or any other person in his behalf, in order to induce or compel a person to vote or refrain from voting for any candidate, the ticket of any political party, or any ballot issue before the people, may:

(a) use or threaten to use any force, coercion, violence, restraint, or undue influence against any person; or

(b) inflict or threaten to inflict, by himself or any other person, any temporal or spiritual injury, damage, harm, or loss upon or against any person.

(2) No person who is a minister, preacher, priest, or other church officer or who is an officer of any corporation or organization, religious or otherwise, may, other than by public speech or print, urge, persuade, or command any voter to vote or refrain from voting for or against any candidate, political party ticket, or ballot issue submitted to the people because of his religious duty or the interest of any corporation, church, or other organization.

(3) No person may, by abduction, duress, or any fraudulent contrivance, impede or prevent the free exercise of the franchise by any voter at any election or thereby compel, induce, or prevail upon any elector to give or to refrain from giving his vote at any election.

(4) No person may, in any manner, interfere with a voter lawfully exercising his right to vote at an election so as to prevent the election from being fairly held and lawfully conducted.

(5) No person on election day may obstruct the doors or entries of any polling place or engage in any solicitation of a voter within the room where votes are being cast or elsewhere in any manner which in any way interferes with the election process or obstructs the access of voters to or from the polling place.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NEBRASKA

NRS 293.700 Bribery of elector. A person who bribes, offers to bribe, or uses any other corrupt means, directly or indirectly, to influence any elector in giving his vote or to deter him from giving it is guilty of a category D felony and shall be punished as provided in NRS 193.130.

NRS 293.710 Intimidation of voters.

1. It is unlawful for any person, in connection with any election or petition, whether acting himself or through another person in his behalf, to:

(a) Use or threaten to use any force, coercion, violence, restraint or undue influence;

(b) Inflict or threaten to inflict any physical or mental injury, damage, harm or loss upon the person or property of another;

(c) Expose or publish or threaten to expose or publish any fact concerning another in order to induce or compel such other to vote or refrain from voting for any candidate or any question;

(d) Impede or prevent, by abduction, duress or fraudulent contrivance, the free exercise of the franchise by any voter, or thereby to compel, induce or prevail upon any elector to give or refrain from giving his vote; or

(e) Discharge or change the place of employment of any employee with the intent to impede or prevent the free exercise of the franchise by such employee.

2. Unless a greater penalty is provided by law, any violation of this section is a gross misdemeanor.

NRS 293.780 Voting more than once at same election.

1. A person who is entitled to vote shall not vote or attempt to vote more than once at the same election. Any person who votes or attempts to vote twice at the same election is guilty of a category D felony and shall be punished as provided in NRS 193.130.

2. Notice of the provisions of subsection 1 must be given by the county or city clerk as follows:

(a) Printed on all sample ballots mailed;

(b) Posted in boldface type at each polling place; and

(c) Posted in boldface type at the office of the county or city clerk.

NRS 293.800 Acts concerning registration of voters; violations of laws governing elections; crimes by public officers.

1. A person who, for himself or another person, willfully gives a false answer or answers to questions propounded to him by the registrar or field registrar of voters relating to the information called for by the application to register to vote, or who willfully falsifies his application in any particular, or who violates any of the provisions of the election laws of this State, or knowingly encourages another person to violate those laws is guilty of a category E felony and shall be punished as provided in NRS 193.130.

2. A public officer or other person, upon whom any duty is imposed by this title, who willfully neglects his duty, or willfully performs it in such a way as to hinder the objects and purposes of the election laws of this State, except where another penalty is provided, is guilty of a category E felony and shall be punished as provided in NRS 193.130.

3. If the person is a public officer, his office is forfeited upon conviction of any offense provided for in subsection 2.

4. A person who causes or endeavors to cause his name to be registered, knowing that he is not an elector or will not be an elector on or before the day of the next ensuing election in the precinct or district in which he causes or endeavors to cause the registration to be made, and any other person who induces, aids or abets the person in the commission of either of the acts is guilty of a category E felony and shall be punished as provided in NRS 193.130.

5. A field registrar or other person who:

(a) Knowingly falsifies an application to register to vote or knowingly causes an application to be falsified;  
or

(b) Knowingly provides money or other compensation to another for a falsified application to register to vote,

is guilty of a category E felony and shall be punished as provided in NRS 193.130.

NRS 293.805 Compensation for registration of voters based upon number of voters or voters of a particular party registered.

1. It is unlawful for a person to provide compensation for registering voters that is based upon:

(a) The total number of voters a person registers; or

(b) The total number of voters a person registers in a particular political party.

2. A person who violates any provision of this section is guilty of a category E felony and shall be punished as provided in NRS 193.130.

NRS 293.810 Registration in more than one county at one time. It is unlawful for any person to be registered as a voter in more than one county at one time.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NEW HAMPSHIRE

**659:34 Wrongful Voting; Penalties for Voter Fraud. –**

I. A person is subject to a civil penalty not to exceed \$5,000 if such person:

(a) When registering to vote; when obtaining an official ballot; or when casting a vote by official ballot, makes a false material statement regarding his or her qualifications as a voter to an election officer or submits a voter registration form, an election day registration affidavit, a citizenship affidavit, a domicile affidavit, or an absentee registration affidavit containing false material information regarding his or her qualifications as a voter;

(b) Votes more than once for any office or measure;

(c) Applies for a ballot in a name other than his or her own;

(d) Applies for a ballot in his or her own name after he or she has voted once;

(e) Votes for any office or measure at an election if such person is not qualified to vote as provided in RSA 654; or

(f) Gives a false name or answer if under examination as to his or her qualifications as a voter before the supervisors of the checklist or moderator.

II. A person is guilty of a class A misdemeanor if, at any election, such person purposefully or knowingly commits any of the acts listed in paragraph I.

III. The attorney general is authorized to impose a civil penalty under paragraph I.

(a) The attorney general may impose a civil penalty by providing written notice to the person:

(1) Setting forth the date, facts, and nature of each act or omission which makes the person liable to pay a civil penalty;

(2) Specifically identifying the particular provision or provisions of the law involved in each violation;

and

(3) Advising the person of each penalty that the attorney general imposes and its amount.

(b) The written notice shall be served in hand or sent by registered or certified mail to the last known address of such person. The person shall have 30 days to pay any civil penalty assessed under this section to the secretary of state for deposit into the election fund established pursuant to RSA 5:6-d.

IV. The decision of the attorney general to impose a civil penalty may be appealed to superior court. An appeal must be filed within 30 days of the date on which the person received it.

V. The attorney general is authorized to institute a civil action to collect a penalty imposed pursuant to this section. The attorney general shall have the exclusive power to compromise, mitigate, or remit such civil penalties.

**659:40 Bribing; Intimidation. –** No person shall directly or indirectly bribe or intimidate any voter not to vote or to vote for or against any question submitted to voters or to vote for or against any ticket or candidate for office at any election. Whoever violates the provisions of this section shall be guilty as provided in RSA 640:2 or RSA 640:3.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NEW JERSEY

**19:34-11 Fraudulent voting; interference with election or canvass; third degree crime.**

19:34-11. Every person not entitled to vote who fraudulently votes, and every person who votes more than once at any one election; or knowingly hands in two or more ballots folded together; or changes any ballot after it has been deposited in the ballot box; or adds, or attempts to add, any ballot to those legally polled at any election, either by fraudulently introducing the same into the ballot box before or after the ballots therein have been counted; or adds to or mixes with, or attempts to add to or mix with, the ballots lawfully polled, other ballots while the same are being counted or canvassed, or at any other time, with intent to change the result of such election; or carries away or destroys, or attempts to carry away or destroy, any poll list, or ballots, or ballot box, for the purpose of breaking up or invalidating the election; or willfully detains, mutilates or destroys any election returns; or in any manner so interferes with the officers holding the election, or conducting the canvass, or with the voters lawfully exercising their rights of voting at the election, as to prevent the election or canvass from being fairly had and lawfully conducted, shall be guilty of a crime of the third degree.

Amended 1940, c.199, s.5; 1948, c.438, s.14; 2005, c.154, s.30.

**19:34-12 Attempt to cast illegal vote; third degree crime.**

19:34-12. Every person not entitled to vote who fraudulently attempts to vote, or who being entitled to vote attempts to vote more than once at any election, or who personates or attempts to personate a person legally entitled to vote, shall be guilty of a crime of the third degree.

**19:34-26 Perjury; subornation of perjury.**

19:34-26. If a person shall be guilty of willful and corrupt false swearing or affirming, or by any means shall willfully and corruptly suborn or procure a person to swear or affirm falsely, in taking any oath, affirmation or deposition prescribed or authorized by this title, he shall be deemed guilty of a crime of the third degree, and be deemed to be an incompetent witness thereafter for any purpose within this State, until such time as he shall have been pardoned.

Amended 2005, c.154, s.44.

**19:34-27 Improperly influencing or intimidating employees.**

19:34-27. An employer of any workman, or any agent, superintendent or overseer of any company or corporation employing workmen, or any person who shall directly or indirectly, by himself or by any other person in his behalf or by his direction, make use of or threaten to make use of any force, violence or restraint, or inflict or threaten to inflict by himself or by any other person any injury, damage, harm or loss against any person in his employ, in order to induce or compel such employee to vote or refrain from voting for any particular candidate at any election, or because of such employee having voted or refrained from voting for any particular candidate at any election, or who shall, by any duress, constraint or improper influence or by any fraudulent or improper device, contrivance or scheme, impede, hinder or prevent the free exercise of the franchise of any voter at any election, or shall thereby compel, induce or prevail upon any voter to vote for or against any particular candidate at any election, shall be guilty of a crime of the third degree.

Amended 2005, c.154, s.45.

**19:34-28. Threatening or intimidating voters**

No person shall, directly or indirectly, by himself or by any other person in his behalf, make use of, or threaten to make use of, any force, violence or restraint, or inflict or threaten the infliction, by himself or through any other person, of any injury, damage, harm or loss, or in any manner to practice intimidation upon or against any person, in order to induce or compel such person to vote or refrain from voting at any election, or to vote or refrain from voting for any particular person or persons at any election, or on account of such person having voted or refrained from voting at any election.

## STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NEW MEXICO

### 1-20-3. Registration offenses.

Registration offenses consist of performing any of the following acts willfully and with knowledge and intent to deceive any registration officer or to subvert the registration requirements of the law or rights of any qualified elector:

- A. signing or offering to sign a certificate of registration when not a qualified elector;
- B. falsifying any information on the certificate of registration;
- C. soliciting, procuring, aiding, abetting, inducing or attempting to solicit, procure, aid, abet or induce any person to register or attempt to register with the name of any other person, whether real, deceased or fictitious; or
- D. destroying the certificate of registration of any qualified elector, or removing such certificate from its proper binder or file, except as provided in the Election Code [Chapter 1 NMSA 1978].

Whoever commits a registration offense is guilty of a fourth degree felony.

### 1-20-8. False voting.

False voting consists of:

- A. voting, or offering to vote, with the knowledge of not being a qualified elector;
- B. voting, or offering to vote, in the name of any other person;
- C. knowingly voting, or offering to vote, in any precinct except that in which one is registered;
- D. voting, or offering to vote, more than once in the same election;
- E. inducing, abetting or procuring, or attempting to induce, abet or procure, a person known to not be a qualified elector to vote; or
- F. inducing, abetting or procuring, or attempting to induce, abet or procure, a person who, having voted once in any election, to vote, or attempt to vote again at the same election.

Whoever commits false voting is guilty of a fourth degree felony.

### 1-20-11. Offering a bribe.

Offering a bribe consists of willfully advancing, paying, or causing to be paid, or promising, directly or indirectly, any money or other valuable consideration, office or employment, to any person for the following purposes connected with or incidental to any election:

- A. to induce such person, if a voter, to vote or refrain from voting for or against any candidate, proposition, question or constitutional amendment;
- B. to induce such person, if a precinct board member or other election official, to mark, alter, suppress or otherwise change any ballot that has been cast, any election return, or any certificate of election; or
- C. to induce such person to use such payment or promise to bribe others for the purposes specified in this section.

Whoever offers a bribe is guilty of a fourth degree felony.

### 1-20-12. Accepting a bribe.

Accepting a bribe consists of knowingly accepting any payment or promise of payment, directly or indirectly, of money, valuable consideration, office or employment for the unlawful purposes specified in Section 1-20-11 NMSA 1978.

**1-20-14. Intimidation.**

Intimidation consists of inducing or attempting to induce fear in any member of a precinct board, voter, challenger or watcher by use of or threatened use of force, violence, infliction of damage, harm or loss or any form of economic retaliation, upon any voter, precinct board member, challenger or watcher for the purpose of impeding or preventing the free exercise of the elective franchise or the impartial administration of the election or Election Code [Chapter 1 NMSA 1978].

Whoever commits intimidation is guilty of a fourth degree felony.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NEW YORK

[All Cites to N.Y. Elec. Code]

§ 17-104. False registration. Any person who:

1. Registers or attempts to register as an elector in more than one election district for the same election, or more than once in the same election district; or,
2. Registers or attempts to register as an elector, knowing that he will not be a qualified voter in the district at the election for which such registration is made; or
3. Registers or attempts to register as an elector under any name but his own; or
4. Knowingly gives a false residence within the election district when registering as an elector; or
5. Knowingly permits, aids, assists, abets, procures, commands or advises another to commit any such act, is guilty of a felony.

§ 17-132. Illegal voting. Any person who:

1. Knowingly votes or offers or attempts to vote at any election, when not qualified; or,
2. Procures, aids, assists, counsels or advises any person to go or come into any election district, for the purpose of voting at any election, knowing that such person is not qualified; or,
3. Votes or offers or attempts to vote at an election, more than once; or votes or offers or attempts to vote at an election under any other name than his own; or votes or offers or attempts to vote at an election, in an election district or from a place where he does not reside; or,
4. Procures, aids, assists, commands or advises another to vote or offer or attempt to vote at an election, knowing that such person is not qualified to vote thereat; or,
5. Prompts a person, applying to vote, to falsely answer questions put to him by the inspectors concerning his identity or qualifications for voting; or,
6. Being an applicant for an absentee voter's ballot, makes a material false statement in his application, or a person who makes a material false statement in a medical certificate or an affidavit filed in connection with an application for an absentee voter's ballot; or,
7. Not being a qualified absentee voter, and having knowledge or being chargeable with knowledge of that fact, votes or attempts to vote as an absentee voter; or,
8. Fraudulently signs the name of another upon an absentee voter's envelope or aids in doing or attempting to do a fraudulent act in connection with an absentee vote cast or attempted to be cast; or,
9. Falsely pretends or represents to the inspectors of election or any of them that he is incapacitated to mark his ballot, for the purpose of obtaining assistance in voting under the provisions of this chapter,

Is guilty of a felony.

Any offer or attempt under this section shall be deemed to be the doing of any act made necessary by this chapter preliminary to the delivery of a ballot to an elector or the deposit of the ballot in the ballot box or his admission to the booth or voting machine enclosure.

§ 17-142. Giving consideration for franchise. Except as allowed by law, any person who directly or indirectly, by himself or through any other person:

1. Pays, lends or contributes, or offers or promises to pay, lend or contribute any money or other valuable consideration to or for any voter, or to or for any other person, to induce such voter or other person to vote or refrain from voting at any election, or to induce any voter or other person to vote or refrain from voting at such election for any particular person or persons, or for or against any particular proposition submitted to voters, or to induce such voter to come to the polls or remain away from the polls at such election or to induce such voter or other person to place or cause to be placed or refrain from placing or causing to be placed his name upon a registration poll record or on account of such voter or other person having voted or refrained from voting for or against any particular person or for or against any proposition submitted to voters, or having come to the polls or remained away from the polls at such election, or having placed or caused to be placed or refrained from placing or causing to be placed his or any other name upon the registry of voters; or,
2. Gives, offers or promises any office, place or employment, or promises to procure or endeavor to procure any office, place or employment to or for any voter, or to or for any other person, in order to induce such voter or other person to vote or refrain from voting at any election, or to induce any voter or other person to vote or refrain from voting at such election, for or against any particular person or for or against any proposition submitted to voters, or to induce any voter or other person to place or cause to be placed or refrain from placing or causing to be placed his or any other name upon a registration poll record; or,

011852

3. Gives, offers or promises any office, place, employment or valuable thing as an inducement for any voter or other person to procure or aid in procuring either a large or a small vote, plurality or majority at any election district or other political division of the state, for a candidate or candidates to be voted for at an election; or to cause a larger or smaller vote, plurality or majority to be cast or given for any candidate or candidates in one such district or political division than in another; or,

4. Makes any gift, loan, promise, offer, procurement or agreement as aforesaid to, for or with any person to induce such person to procure or endeavor to procure the election of any person or the vote of any voter at any election; or,

5. Procures or engages or promises or endeavors to procure, in consequence of any such gift, loan, offer, promise, procurement, or agreement the election of any person, or the vote of any voter, at such election; or,

6. Advances or pays or causes to be paid, any money or other valuable thing, to or for the use of any other person with the intent that the same, or any part thereof, shall be used in bribery at any election, or knowingly pays or causes to be paid any money or other valuable thing to any person in discharge or repayment of any money, wholly or in part expended in bribery at any election, is guilty of a felony.

§ 17-144. Receiving consideration for franchise. Except as allowed by law, any person who directly or indirectly, by himself or through any other person:

1. Receives, agrees or contracts for, before or during an election, any money, gift, loan or other valuable consideration, office place or employment for himself or any other person, for voting or agreeing to vote, or for coming or agreeing to come to the polls, or for remaining away or agreeing to remain away from the polls, or for refraining or agreeing to refrain from registering as a voter, or for refraining or agreeing to refrain from voting, or for voting or agreeing to vote, or for refraining or agreeing to refrain from voting for or against any particular person or persons at any election, or for or against any proposition submitted to voters at such election; or,

2. Receives any money or other valuable thing during or after an election on account of himself or any other person having voted or refrained from voting at such an election; or having registered or refrained from registering as a voter, or on account of himself or any other person having voted or refrained from voting for or against any particular person at such election, or for or against any proposition submitted to voters at such election, or on account of himself or any other person having come to the polls or remained away from the polls at such election, or having registered or refrained from registering as a voter, or on account of having induced any other person to vote or refrain from voting for or against any particular person at such election, or for or against any proposition submitted to voters at such election, is guilty of a felony.

§ 17-150. Duress and intimidation of voters. Any person or corporation who directly or indirectly:

1. Uses or threatens to use any force, violence or restraint, or inflicts or threatens to inflict any injury, damage, harm or loss, or in any other manner practices intimidation upon or against any person in order to induce or compel such person to vote or refrain from voting for or against any particular person or for or against any proposition submitted to voters at such election, or to place or cause to be placed or refrain from placing or causing to be placed his name upon a registry of voters, or on account of such person having voted or refrained from voting at such election, or having voted or refrained from voting for or against any particular person or persons, or for or against any proposition submitted to voters at such election, or having registered or refrained from registering as a voter; or,

2. By abduction, duress or any forcible or fraudulent device or contrivance whatever impedes, prevents or otherwise interferes with the free exercise of the elective franchise by any voter, or compels, induces or prevails upon any voter to give or refrain from giving his vote for or against any particular person at any election; or,

3. Being an employer pays his employees the salary or wages due in "pay envelopes," in which there is enclosed or upon which there is written or printed political motto, device or argument containing threats, express or implied, intended or calculated to influence the political opinions or actions of such employees, or within ninety days of a general election puts or otherwise exhibits in the establishment or place where his employees are engaged in labor, any handbill or placard containing any threat, notice or information, that if any particular ticket or candidate is elected or defeated, work in his place or establishment will cease, in whole or in part, his establishment will be closed up, or the wages of his employees reduced, or other threats, express or implied, intended or calculated to influence the political opinions or actions of his employees, is guilty of a misdemeanor, and, if a corporation, shall in addition forfeit its charter.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NORTH CAROLINA

§ 163-271. Intimidation of voters by officers made misdemeanor.

It shall be unlawful for any person holding any office, position, or employment in the State government, or under and with any department, institution, bureau, board, commission, or other State agency, or under and with any county, city, town, district, or other political subdivision, directly or indirectly, to discharge, threaten to discharge, or cause to be discharged, or otherwise intimidate or oppress any other person in such employment on account of any vote such voter or any member of his family may cast, or consider or intend to cast, or not to cast, or which he may have failed to cast, or to seek or undertake to control any vote which any subordinate of such person may cast, or consider or intend to cast, or not to cast, by threat, intimidation, or declaration that the position, salary, or any part of the salary of such subordinate depends in any manner whatsoever, directly or indirectly, upon the way in which subordinate or any member of his family casts, or considers or intends to cast, or not to cast his vote, at any primary or election. A violation of this section is a Class 2 misdemeanor.

§ 163-273. Offenses of voters; interference with voters; penalty.

(a) Any person who shall, in connection with any primary or election in this State, do any of the acts and things declared in this section to be unlawful, shall be guilty of a Class 2 misdemeanor. It shall be unlawful:

- (1) For a voter, except as otherwise provided in this Chapter, to allow his ballot to be seen by any person.
- (2) For a voter to take or remove, or attempt to take or remove, any ballot from the voting enclosure.
- (3) For any person to interfere with, or attempt to interfere with, any voter when inside the voting enclosure.
- (4) For any person to interfere with, or attempt to interfere with, any voter when marking his ballots.
- (5) For any voter to remain longer than the specified time allowed by this Chapter in a voting booth, after being notified that his time has expired.
- (6) For any person to endeavor to induce any voter, while within the voting enclosure, before depositing his ballots, to show how he marks or has marked his ballots.
- (7) For any person to aid, or attempt to aid, any voter by means of any mechanical device, or any other means whatever, while within the voting enclosure, in marking his ballots.

(b) Election officers shall cause any person committing any of the offenses set forth in subsection (a) of this section to be arrested and shall cause charges to be preferred against the person so offending in a court of competent jurisdiction.

§ 163-274. Certain acts declared misdemeanors.

Any person who shall, in connection with any primary or election in this State, do any of the acts and things declared in this section to be unlawful, shall be guilty of a Class 2 misdemeanor. It shall be unlawful:

- (1) For any person to fail, as an officer or as a judge or chief judge of a primary or election, or as a member of any board of elections, to prepare the books, ballots, and return blanks which it is his duty under the law to prepare, or to distribute the same as required by law, or to perform any other duty imposed upon him within the time and in the manner required by law;

011854

- (1a) For any member, director, or employee of a board of elections to alter a voter registration application or other voter registration record without either the written authorization of the applicant or voter or the written authorization of the State Board of Elections;
- (2) For any person to continue or attempt to act as a judge or chief judge of a primary or election, or as a member of any board of elections, after having been legally removed from such position and after having been given notice of such removal;
- (3) For any person to break up or by force or violence to stay or interfere with the holding of any primary or election, to interfere with the possession of any ballot box, election book, ballot, or return sheet by those entitled to possession of the same under the law, or to interfere in any manner with the performance of any duty imposed by law upon any election officer or member of any board of elections;
- (4) For any person to be guilty of any boisterous conduct so as to disturb any member of any election board or any chief judge or judge of election in the performance of his duties as imposed by law;
- (5) For any person to bet or wager any money or other thing of value on any election;
- (5a) Repealed by Session Laws 1999-455, s. 21, applicable to elections held on or after January 1, 2000.
- (6) For any person, directly or indirectly, to discharge or threaten to discharge from employment, or otherwise intimidate or oppose any legally qualified voter on account of any vote such voter may cast or consider or intend to cast, or not to cast, or which he may have failed to cast;
- (7) For any person to publish in a newspaper or pamphlet or otherwise, any charge derogatory to any candidate or calculated to affect the candidate's chances of nomination or election, unless such publication be signed by the party giving publicity to and being responsible for such charge;
- (8) For any person to publish or cause to be circulated derogatory reports with reference to any candidate in any primary or election, knowing such report to be false or in reckless disregard of its truth or falsity, when such report is calculated or intended to affect the chances of such candidate for nomination or election;
- (9) For any person to give or promise, in return for political support or influence, any political appointment or support for political office;
- (10) For any chairman of a county board of elections or other returning officer to fail or neglect, willfully or of malice, to perform any duty, act, matter or thing required or directed in the time, manner and form in which said duty, matter or thing is required to be performed in relation to any primary, general or special election and the returns thereof;
- (11) For any clerk of the superior court to refuse to make and give to any person applying in writing for the same a duly certified copy of the returns of any primary or election or of a tabulated statement to a primary or election, the returns of which are by law deposited in his office, upon the tender of the fees therefor;
- (12) For any person willfully and knowingly to impose upon any blind or illiterate voter a ballot in any primary or election contrary to the wish or desire of such voter, by falsely representing to such voter that the ballot proposed to him is such as he desires; or
- (13) Except as authorized by G.S. 163-82.15, for any person to provide false information, or sign the name of any other person, to a written report under G.S. 163-82.15.

§ 163-275. Certain acts declared felonies.

Any person who shall, in connection with any primary, general or special election held in this State, do any of the acts or things declared in this section to be unlawful, shall be guilty of a Class I felony. It shall be unlawful:

- (1) For any person fraudulently to cause his name to be placed upon the registration books of more than one election precinct or fraudulently to cause or procure his name or that of any other person to be placed upon the registration books in any precinct when such registration in that precinct does not qualify such person to vote legally therein, or to impersonate falsely another registered voter for the purpose of voting in the stead of such other voter;
- (2) For any person to give or promise or request or accept at any time, before or after any such primary or election, any money, property or other thing of value whatsoever in return for the vote of any elector;
- (3) For any person who is an election officer, a member of an election board or other officer charged with any duty with respect to any primary or election, knowingly to make any false or fraudulent entry on any election book or any false or fraudulent returns, or knowingly to make or cause to be made any false statement on any ballot, or to do any fraudulent act or knowingly and fraudulently omit to do any act or make any report legally required of such person;
- (4) For any person knowingly to swear falsely with respect to any matter pertaining to any primary or election;
- (5) For any person convicted of a crime which excludes him from the right of suffrage, to vote at any primary or election without having been restored to the right of citizenship in due course and by the method provided by law;
- (6) For any person to take corruptly the oath prescribed for voters;
- (7) For any person with intent to commit a fraud to register or vote at more than one precinct or more than one time, or to induce another to do so, in the same primary or election, or to vote illegally at any primary or election;
- (8) For any chief judge or any clerk or copyist to make any entry or copy with intent to commit a fraud;
- (9) For any election official or other officer or person to make, certify, deliver or transmit any false returns of any primary or election, or to make any erasure, alteration, or conceal or destroy any election ballot, book, record, return or process with intent to commit a fraud;
- (10) For any person to assault any chief judge, judge of election or other election officer while in the discharge of his duty in the registration of voters or in conducting any primary or election;
- (11) For any person, by threats, menaces or in any other manner, to intimidate or attempt to intimidate any chief judge, judge of election or other election officer in the discharge of his duties in the registration of voters or in conducting any primary or election;
- (12) For any chief judge, judge of election, member of a board of elections, assistant, marker, or other election official, directly or indirectly, to seek, receive or accept money or the promise of money, the promise of office, or other reward or compensation from a candidate in any primary or election or from any source other than such compensation as may be provided by law for his services;
- (13) For any person falsely to make or present any certificate or other paper to qualify any person fraudulently as a voter, or to attempt thereby to secure to any person the privilege of voting;
- (14) For any officer to register voters and any other individual to knowingly and willfully receive, complete, or sign an application to register from any voter contrary to the provisions of G.S. 163-82.4; or

(15) Reserved for future codification purposes.

(16) For any person falsely to make the certificate provided by G.S. 163-229(b)(2) or G.S. 163-250(a).

(17) For any person, directly or indirectly, to misrepresent the law to the public through mass mailing or any other means of communication where the intent and the effect is to intimidate or discourage potential voters from exercising their lawful right to vote.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – NORTH DAKOTA

**12.1-14-02. Interference with elections.** A person is guilty of a class A misdemeanor if, whether or not acting under color of law, he, by force or threat of force or by economic coercion, intentionally:

1.

Injures, intimidates, or interferes with another because he is or has been voting for any candidate or issue or qualifying to vote, qualifying or campaigning as a candidate for elective office, or qualifying or acting as a poll watcher or other election official, in any primary, special, or general election.

2.

Injures, intimidates, or interferes with another in order to prevent him or any other person from voting for any candidate or issue or qualifying to vote, qualifying or campaigning as a candidate for elective office, or qualifying or acting as a poll watcher or other election official, in any primary, special, or general election.

**12.1-14-03. Safeguarding elections.** A person is guilty of a class A misdemeanor if, in connection with any election, he:

1.

Makes or induces any false voting registration;

2.

Offers, gives, or agrees to give a thing of pecuniary value to another as consideration for the recipient's voting or withholding his vote or voting for or against any candidate or issue or for such conduct by another;

3.

Solicits, accepts, or agrees to accept a thing of pecuniary value as consideration for conduct prohibited under subsection 1 or 2; or

4.

Otherwise obstructs or interferes with the lawful conduct of such election or registration therefor.

As used in this section, "thing of pecuniary value" shall include alcoholic beverages, by the drink or in any other container.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - OHIO

**§ 3599.01. Bribery.**

(A) No person shall before, during, or after any primary, convention, or election:

(1) Give, lend, offer, or procure or promise to give, lend, offer, or procure any money, office, position, place or employment, influence, or any other valuable consideration to or for a delegate, elector, or other person;

(2) Attempt by intimidation, coercion, or other unlawful means to induce such delegate or elector to register or refrain from registering or to vote or refrain from voting at a primary, convention, or election for a particular person, question, or issue;

(3) Advance, pay, or cause to be paid or procure or offer to procure money or other valuable thing to or for the use of another, with the intent that it or part thereof shall be used to induce such person to vote or to refrain from voting.

(B) Whoever violates this section is guilty of bribery, a felony of the fourth degree; and if he is a candidate he shall forfeit the nomination he received, or if elected to any office he shall forfeit the office to which he was elected at the election with reference to which such offense was committed.

**§ 3599.02. Bribery offenses concerning voters or potential voters.**

No person shall before, during, or after any primary, general, or special election or convention solicit, request, demand, receive, or contract for any money, gift, loan, property, influence, position, employment, or other thing of value for that person or for another person for doing any of the following:

(A) Registering or refraining from registering to vote;

(B) Agreeing to register or to refrain from registering to vote;

(C) Agreeing to vote or to refrain from voting;

(D) Voting or refraining from voting at any primary, general, or special election or convention for a particular person, question, or issue;

(E) Registering or voting, or refraining from registering or voting, or voting or refraining from voting for a particular person, question, or issue.

Whoever violates this section is guilty of bribery, a felony of the fourth degree, and shall be disfranchised and excluded from holding any public office for five years immediately following such conviction.

**§ 3599.11. False registration; election falsification.**

(A) No person shall knowingly register or make application or attempt to register in a precinct in which the person is not a qualified voter; or knowingly aid or abet any person to so register; or attempt to register or knowingly induce or attempt to induce any person to so register; or knowingly impersonate another or write or assume the name of another, real or fictitious, in registering or attempting to register; or by false statement or other unlawful means procure, aid, or attempt to procure the erasure or striking out on the register or duplicate list of the name of a qualified elector therein; or knowingly induce or attempt to induce a registrar or other election authority to refuse registration in a precinct to an elector thereof; or knowingly swear or affirm falsely upon a lawful examination by or before any registering officer; or make, print, or issue any false or counterfeit certificate of registration or knowingly alter any certificate of registration.

No person shall knowingly register under more than one name or knowingly induce any person to so register.

No person shall knowingly make any false statement on any form for registration or change of registration or upon any application or return envelope for an absent voter's ballot.

Whoever violates this division is guilty of a felony of the fifth degree.

(B) (1) No person who helps another person register outside an official voter registration place shall knowingly destroy, or knowingly help another person to destroy, any completed registration form.

Whoever violates this division is guilty of election falsification, a felony of the fifth degree.

(2) (a) No person who helps another person register outside an official voter registration place shall knowingly fail to return any registration form entrusted to that person to any board of elections or the office of the secretary of state within ten days after that registration form is completed, or on or before the thirtieth day before the election, whichever day is earlier, unless the registration form is received by the person within twenty-four hours of the thirtieth day before the election, in which case the person shall return the registration form to any board of elections or the office of the secretary of state within ten days of its receipt.

Whoever violates this division is guilty of election falsification, a felony of the fifth degree, unless the person has not previously been convicted of a violation of division (B)(2)(a), (B)(2)(b), (C)(1), or (C)(2) of this section, the violation of this division does not cause any person to miss any voter registration deadline with regard to any election, and the number of voter registration forms that the violator has failed to properly return does not exceed forty-nine, in which case the violator is guilty of a misdemeanor of the first degree.

(b) Subject to division (C)(2) of this section, no person who helps another person register outside an official registration place shall knowingly return any registration form entrusted to that person to any location other than any board of elections or the office of the secretary of state.

Whoever violates this division is guilty of election falsification, a felony of the fifth degree, unless the person has not previously been convicted of a violation of division (B)(2)(a), (B)(2)(b), (C)(1), or (C)(2) of this section, the violation of this division does not cause any person to miss any voter registration deadline with regard to any election, and the number of voter registration forms that the violator has failed to properly return does not exceed forty-nine, in which case the violator is guilty of a misdemeanor of the first degree.

(C) (1) No person who receives compensation for registering a voter shall knowingly fail to return any registration form entrusted to that person to any board of elections or the office of the secretary of state within ten days after that voter registration form is completed, or on or before the thirtieth day before the election, whichever is earlier, unless the registration form is received by the person within twenty-four hours of the thirtieth day before the election, in which case the person shall return the registration form to any board of elections or the office of the secretary of state within ten days of its receipt.

Whoever violates this division is guilty of election falsification, a felony of the fifth degree, unless the person has not previously been convicted of a violation of division (B)(2)(a), (B)(2)(b), (C)(1), or (C)(2) of this section, the violation of this division does not cause any person to miss any voter registration deadline with regard to any election, and the number of voter registration forms that the violator has failed to properly return does not exceed forty-nine, in which case the violator is guilty of a misdemeanor of the first degree.

(2) No person who receives compensation for registering a voter shall knowingly return any registration form entrusted to that person to any location other than any board of elections or the office of the secretary of state.

Whoever violates this division is guilty of election falsification, a felony of the fifth degree, unless the person has not previously been convicted of a violation of division (B)(2)(a), (B)(2)(b), (C)(1), or (C)(2) of this section, the violation of this division does not cause any person to miss any voter registration deadline with regard to any election, and the number of voter registration forms that the violator has failed to properly return does not exceed forty-nine, in which case the violator is guilty of a misdemeanor of the first degree.

(D) As used in division (C) of this section, "registering a voter" includes any effort, for compensation, to provide voter registration forms or to assist persons in completing or returning those forms.

**§ 3599.12. Illegal voting.**

(A) No person shall do any of the following:

(1) Vote or attempt to vote in any primary, special, or general election in a precinct in which that person is not a legally qualified elector;

(2) Vote or attempt to vote more than once at the same election by any means, including voting or attempting to vote both by absent voter's ballots under division (G) of section 3503.16 of the Revised Code and by regular ballot at the polls at the same election, or voting or attempting to vote both by absent voter's ballots under division (G) of section 3503.16 of the Revised Code and by absent voter's ballots under Chapter 3509. or armed service absent voter's ballots under Chapter 3511. of the Revised Code at the same election;

(3) Impersonate or sign the name of another person, real or fictitious, living or dead, and vote or attempt to vote as that other person in any such election;

(4) Cast a ballot at any such election after objection has been made and sustained to that person's vote;

(5) Knowingly vote or attempt to vote a ballot other than the official ballot.

(B) Whoever violates division (A) of this section is guilty of a felony of the fourth degree.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - OKLAHOMA

§26-16-102.

Any person who votes more than once at any election or who, knowing that he is not eligible to vote at an election, willfully votes at said election shall be deemed guilty of a felony.

§26-16-103.

Any person who swears or affirms a false affidavit in order to become eligible to vote shall be deemed guilty of a felony.

§26-16-106.

Any person who offers, solicits or accepts something of value intended to directly or indirectly influence the vote of the person soliciting or accepting same shall be deemed guilty of a felony.

§26-16-109.

Any person who, by means of coercion or any other method, knowingly attempts to prevent a qualified elector from becoming registered, or a registered voter from voting, shall be deemed guilty of a felony.

§26-16-113.

Any person who interferes with a registered voter who is attempting to vote, or any person who attempts to influence the vote of another by means of force or intimidation, or any person who interferes with the orderly and lawful conduct of an election shall be deemed guilty of a misdemeanor.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - OREGON

**260.665 Undue influence to affect registration, voting, candidacy; solicitation of money or other benefits.** (1) As used in this section, "undue influence" means force, violence, restraint or the threat of it, inflicting injury, damage, harm, loss of employment or other loss or the threat of it, or giving or promising to give money, employment or other thing of value.

(2) No person, acting either alone or with or through any other person, shall directly or indirectly subject any person to undue influence with the intent to induce any person to:

- (a) Register or vote;
- (b) Refrain from registering or voting;
- (c) Register or vote in any particular manner;
- (d) Be or refrain from or cease being a candidate;
- (e) Contribute or refrain from contributing to any candidate, political party or political committee;
- (f) Render or refrain from rendering services to any candidate, political party or political committee;
- (g) Challenge or refrain from challenging a person offering to vote; or
- (h) Apply or refrain from applying for an absentee ballot.

(3) No person shall solicit or accept money or other thing of value as an inducement to act as prohibited by subsection (2) of this section.

(4) This section does not prohibit:

- (a) The employment of persons to render services to candidates, political parties or political committees;
- (b) The public distribution by candidates, political parties or political committees of sample ballots or other items readily available to the public without charge, even though the distributor incurs costs in the distribution;
- (c) Public or nonpromissory statements by or on behalf of a candidate of the candidate's intentions or purposes if elected;
- (d) A promise by a candidate to employ any person as administrative assistant, secretary or other direct personal aide;
- (e) Free custody and care of minor children of persons during the time those persons are absent from those children for voting purposes;
- (f) Free transportation to and from the polls for persons voting; but no means of advertising, solicitation or inducement to influence the vote of persons transported shall be used with that transportation;
- (g) Individuals or political committees from providing refreshments incidental to a gathering in support of or in opposition to a candidate, political committee or measure; or

(h) The public distribution of registration cards by a person approved by the Secretary of State under ORS 247.171 to print, copy or otherwise prepare and distribute registration cards, even though the distributor incurs costs in the distribution.

**260.695 Prohibitions relating to voting in elections conducted by mail or at polling place.** (1) No person shall print or circulate an imitation of the ballot or sample ballot, or a portion of the ballot or sample ballot, which contains information which will not appear, or deletes information which will appear, on the ballot or sample ballot, or that portion of the ballot or sample ballot, unless the imitation of the ballot or sample ballot, or portion of the ballot or sample ballot, contains the following statement in bold type: "NOT FOR OFFICIAL USE." This subsection does not prohibit the printing or circulation of an imitation of a ballot which illustrates the manner in which a candidate's name may be written in for an office.

(2) No person, within any building in which a polling place is located or, in an election conducted by mail, after the date that ballots are mailed as provided in ORS 254.470, within any building in which ballots are issued, or within 100 feet measured radially from any entrance to the building, shall do any electioneering, including circulating any cards or hand bills, or soliciting signatures to any petition. No person shall do any electioneering by public address system located more than 100 feet from an entrance to the building but capable of being understood within 100 feet of the building. The electioneering need not relate to the election being conducted.

(3) No person shall obstruct an entrance of a building in which a polling place is located. In an election conducted by mail, from the date that ballots are mailed as provided in ORS 254.470 until the time designated by the county clerk for closure of the building on election day, no person shall obstruct an entrance of a building in which a place designated for the deposit of ballots under ORS 254.470 or any voting booth maintained under ORS 254.474 is located.

(4) No person shall vote or offer to vote in any election knowing the person is not entitled to vote.

(5) No person at a polling place, other than an election board member, shall deliver a ballot to an elector.

(6) No elector at a polling place shall knowingly receive a ballot from any other person than an election board member.

(7) No person shall make a false statement about the person's inability to mark a ballot.

(8) No person, except an elections official in performance of duties or other person providing assistance to an elector as described in ORS 254.445, shall ask a person at the polling place for whom that person intends to vote, or examine or attempt to examine the person's ballot.

(9) No person shall show the person's own marked or punched ballot to another person to reveal how it was marked or punched.

(10) No elections official, other than in the performance of duties, shall disclose to any person any information by which it can be ascertained for whom any elector has voted.

(11) No person, except an elections official in performance of duties, shall do anything to a ballot to permit identification of the person who voted.

(12) No elector at a polling place shall deliver a ballot to an election board member except the ballot the elector received from an election board member. Nothing in this subsection shall prohibit a person from delivering any absentee ballot or ballots to an election board member.

(13) No person at a polling place, except an election board member, shall receive from an elector other than an absent elector a marked or punched ballot.

(14) No elector shall willfully leave in the polling place anything that will show how the elector's ballot was marked or punched. In an election conducted by mail, no elector shall willfully leave at any place

designated for the deposit of ballots under ORS 254.470 or in any voting booth maintained under ORS 254.474, anything that will show how the elector's ballot was marked or punched.

(15) No person, except an elections official in performance of duties, shall remove a ballot from any polling place, any place designated for the deposit of ballots under ORS 254.470 or any voting booth maintained under ORS 254.474.

(16) No person, except an elections official in performance of duties or a person authorized by that official, shall willfully deface, remove, alter or destroy a posted election notice.

(17) No person, except an elections official in performance of duties, shall willfully remove, alter or destroy election equipment or supplies, or break the seal or open any sealed package containing election supplies.

(18) No person other than an elections official shall attempt to collect voted ballots within 100 feet measured radially from a location designated for deposit of ballots under ORS 254.470.

(19) No person, except an elections official in performance of duties, in an election conducted by mail, shall establish a location to collect ballots voted by electors unless the person prominently displays at the location a sign stating: "NOT AN OFFICIAL BALLOT DROP SITE."

**260.715 Prohibitions relating to voting and ballots.** (1) A person may not knowingly make a false statement, oath or affidavit when a statement, oath or affidavit is required under the election laws.

(2) A person may not request a ballot in a name other than the person's own name.

(3) A person may not vote or attempt to vote more than once at any election held on the same date.

(4) A person, except an elections official in performance of duties, may not willfully alter or destroy a ballot cast at an election or the returns of an election.

(5) A person may not willfully place a fraudulent ballot among the genuine ballots.

(6) A person may not falsely write anything purporting to be written by an election board member on the ballot or ballot stub.

(7) A person may not commit theft of a ballot or tally or return sheet, or willfully hinder or delay the delivery of the tally or return sheet to the county clerk, or fraudulently break open a sealed tally or return sheet of the election.

(8) A person may not manufacture or knowingly use a fraudulent ballot return identification envelope or secrecy envelope or sell, offer to sell, purchase or offer to purchase, for money or other valuable consideration, any official ballot, replacement ballot, ballot return identification envelope or secrecy envelope. As used in this subsection, "ballot return identification envelope" and "secrecy envelope" mean those envelopes used to return ballots to the county clerk by absent electors or in elections conducted by mail.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – PENNSYLVANIA

**§ 3533. Unlawful voting.**

Any person who votes or attempts to vote at any primary or election, knowing that he does not possess all the qualifications of an elector at such primary or election, as set forth in this act, shall be guilty of a misdemeanor of the first degree, and, upon conviction thereof, shall be sentenced to pay a fine not exceeding ten thousand (\$10,000) dollars, or to undergo an imprisonment of not more than five (5) years, or both, in the discretion of the court.

**§ 3535. Repeat voting at elections.**

If any person shall vote in more than one election district, or otherwise fraudulently vote more than once at the same primary or election, or shall vote a ballot other than the ballot issued to him by the election officers, or shall advise or procure another so to do, he shall be guilty of a felony of the third degree, and, upon conviction thereof, shall be sentenced to pay a fine not exceeding fifteen thousand (\$15,000) dollars, or to undergo an imprisonment of not more than seven (7) years, or both, in the discretion of the court.

**§ 3539. Bribery at elections.**

Any person who shall, directly or indirectly, give or promise or offer to give any gift or reward in money, goods or other valuable thing to any person, with intent to induce him to vote or refrain from voting for any particular candidate or candidates or for or against any constitutional amendment or other question at any primary or election; or who shall, directly or indirectly, procure for or offer or promise to procure for such person any such gift or reward with the intent aforesaid; or, who with the intent to influence or intimidate such person to give his vote or to refrain from giving his vote for any particular candidate or candidates or for or against any constitutional amendment or other question at any primary or election, shall give to or obtain for or assist in obtaining for or offer or promise to give to or obtain for or assist in obtaining for such person any office, place, appointment or employment, public or private, or threaten such person with dismissal or discharge from any office, place, appointment or employment, public or private, then held by him, shall be guilty of a felony of the third degree, and, upon conviction thereof, shall be sentenced to pay a fine not exceeding fifteen thousand (\$15,000) dollars, or to undergo an imprisonment of not more than seven (7) years, or both, in the discretion of the court.

**§ 3547. Prohibiting duress and intimidation of voters and interference with the free exercise of the elective franchise.**

Any person or corporation who, directly or indirectly--

(a) uses or threatens to use any force, violence or restraint, or inflicts or threatens to inflict any injury, damage, harm or loss, or in any other manner practices intimidation or coercion upon or against any person, in order to induce or compel such person to vote or refrain from voting at any election, or to vote or refrain from voting for or against any particular person, or for or against any question submitted to voters at such election, or to place or cause to be placed or refrain from placing or causing to be placed his name upon a register of voters, or on account of such person having voted or refrained from voting at such election, or having voted or refrained from voting for or against any particular person or persons or for or against any question submitted to voters at such election, or having registered or refrained from registering as a voter; or

(b) by abduction, duress or coercion, or any forcible or fraudulent device or contrivance, whatever, impedes, prevents, or otherwise interferes with the free exercise of the elective franchise by any voter, or compels, induces, or prevails upon any voter to give or refrain from giving his vote for or against any particular person at any election; or

(c) being an employer, pays his employes the salary or wages due in "pay envelopes" upon which or in which there is written or printed any political motto, device, statement or argument containing threats, express or implied, intended or calculated to influence the political opinions or actions of such employes, or within ninety days of any election or primary puts or otherwise exhibits in the establishment or place where

his employees are engaged in labor, any handbill or placard containing any threat, notice, or information that if any particular ticket or candidate is elected or defeated work in his place or establishment will cease, in whole or in part, his establishment be closed up, or the wages of his employees reduced, or other threats, express or implied, intended or calculated to influence the political opinions or actions of his employees,

shall be guilty of a misdemeanor of the second degree. Any person or corporation, convicted of a violation of any of the provisions of this section, shall be sentenced to pay a fine not exceeding five thousand (\$5,000) dollars, or such person or the officers, directors or agents of such corporation responsible for the violation of this section, shall be sentenced to undergo an imprisonment of not more than two (2) years, or both, in the discretion of the court.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – RHODE ISLAND

**§ 17-23-4 Fraudulent or repeat voting.** – Every person who, in any election, fraudulently votes or attempts to vote, not being qualified, notwithstanding that person's name may be on the voting list at the polling place where the person votes or attempts to vote; or who votes or attempts to vote in the name of some other person, whether that name is that of a person living or dead, or of a fictitious person; or having voted in one town, ward, senatorial district, representative district, or voting district, whether the person's vote in that case was legal or not, votes or attempts to vote in the same or in another town, ward, senatorial district, representative district, or voting district; or who fraudulently votes or attempts to vote in a town, ward, senatorial district, representative district, or voting district other than in the town, ward, senatorial district, representative district, or voting district in which the person has his or her "residence", as defined in § 17-1-3.1, at the time of his or her voting or attempting to vote; or who aids, counsels, or procures any other person to so vote or attempt to vote, shall be guilty of a felony, and no person after conviction of this offense, shall be permitted to vote in any election or upon any proposition pending before the people, or to hold any public office. Voting, for the purposes of this chapter, shall consist in the casting of a vote, or attempting to cast a vote, whether or not the vote has been cast.

**§ 17-23-5 Bribery or intimidation of voters – Immunity of witnesses in bribery trials.** – Every person who directly or indirectly gives, or offers to agree to give, to any elector or to any person for the benefit of any elector, any sum of money or other valuable consideration for the purpose of inducing the elector to give in or withhold that elector's vote at any election in this state, or by way of reward for having voted or withheld that elector's vote, or who uses any threat or employs any means of intimidation for the purpose of influencing the elector to vote or withhold that elector's vote for or against any candidate or candidates or proposition pending at an election, shall be guilty of a felony, and no person after conviction of this offense, shall be permitted to vote in any election or upon any proposition pending before the people, or to hold any public office; and no evidence given by any witness testifying upon the trial of any charge of bribery shall be used against the person giving the evidence.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – SOUTH CAROLINA

**SECTION 7-25-10.** False swearing in applying for registration.

It is unlawful for a person to falsely swear in making an application for registration under this chapter. A person who violates the provisions of this section is guilty of a misdemeanor and, upon conviction, must be fined in the discretion of the court or imprisoned not more than three years, or both.

**SECTION 7-25-20.** Fraudulent registration or voting.

It is unlawful for a person to fraudulently:

- (1) procure the registration of a name on the books of registration;
- (2) offer or attempt to vote that name;
- (3) offer or attempt to vote in violation of this title or under any false pretense as to circumstances affecting his qualifications to vote; or
- (4) aid, counsel, or abet another in fraudulent registration or fraudulent offer or attempt to vote.

A person who violates the provisions of this section is guilty of a misdemeanor and, upon conviction, must be fined not less than one hundred dollars nor more than five hundred dollars or imprisoned not more than one year, or both.

**SECTION 7-25-30.** Repealed by 1984 Act No. 510 Section 19, eff June 28, 1984.

**SECTION 7-25-40.** Repealed by 1984 Act No. 510 Section 19, eff June 28, 1984.

**SECTION 7-25-50.** Bribery at elections; unlawful to accept bribery.

It is unlawful for a person to procure, by the payment, delivery, or promise of money or other article of value, another to vote for or against any particular candidate or measure at any election held within this State, whether general, special, or primary, for members of the Congress of the United States, members of the General Assembly of this State, sheriff, clerk, judge of probate or other county officer, mayor, and aldermen of any city or intendant and wardens of any incorporated town, or at any other election held within this State. It is also unlawful for a person to accept such procurements. The person promising and the person voting are each guilty of a felony and, upon conviction, for the first offense, must be fined not less than one hundred dollars nor more than five hundred dollars and imprisoned not more than five years. Upon conviction for a second or subsequent offense, the person must be fined not less than five hundred dollars nor more than five thousand dollars and imprisoned not more than ten years.

**SECTION 7-25-60.** Procuring or offering to procure votes by bribery.

(A) It is unlawful for a person at any election to:

- (1) procure, or offer or propose to procure, another, by the payment, delivery, or promise of money or other article of value, to vote for or against any particular candidate or measure; or
- (2) vote, offer, or propose to vote for or against any particular candidate or measure for the consideration of money or other article of value paid, delivered, or promised, vote or offer or propose to vote for or against any particular candidate or measure.

(B) A person who violates the provisions of this section is guilty of a felony. Upon conviction for a first offense, the person must be fined in the discretion of the court and imprisoned not more than five years.

Upon conviction for a second or subsequent offense, the person must be fined in the discretion of the court and imprisoned not more than ten years.

**SECTION 7-25-70.** Procuring or offering to procure votes by threats.

It is unlawful for a person, by threats or any other form of intimidation, to procure, offer, or promise to endeavor to procure another to vote for or against any particular candidate in any election. A person who violates the provisions of this section is guilty of a misdemeanor and, upon conviction, must be fined not less than one hundred dollars nor more than five hundred dollars or imprisoned not more than three years, or both.

**SECTION 7-25-80.** Threatening, intimidating, or abusing voters.

A person who, at any of the elections, general, special, or primary, in any city, town, ward, or polling precinct, threatens, mistreats, or abuses a voter with a view to control or intimidate him in the free exercise of his right of suffrage, is guilty of a felony and, upon conviction, must be fined in the discretion of the court or imprisoned not more than ten years, or both.

**SECTION 7-25-110.** Voting more than once at elections.

It is unlawful for a person qualified to vote at any general, special, or primary election for an office whether local, state, or federal to vote more than once at such election, for the same office. A person who violates the provisions of this section is guilty of a misdemeanor and, upon conviction, must be fined in the discretion of the court or imprisoned not more than three years.

**SECTION 7-25-120.** Impersonating a voter.

It is unlawful for a person to impersonate or attempt to impersonate another person for the purpose of voting in a general, special, or primary election, whether municipal or State. A person who violates the provisions of this section is guilty of a misdemeanor and, upon conviction, must be imprisoned not more than three years or fined not less than three hundred dollars nor more than twelve hundred dollars, or both. When a person who violates the provisions of this section is placed under bond, the bond may not be less than six hundred dollars nor more than twelve hundred dollars.

**SECTION 7-25-130.** Arrest of person who impersonates a voter.

If any manager of election of this State report to the sheriff or other peace officer that a person has violated Section 7-25-120 such peace officer shall arrest such person and have a proper warrant sworn out. Any sheriff or police officer refusing to make an arrest when demand is made by the proper authorities for any violation of Section 7-25-120 shall be subject to prosecution in the court of general sessions for malfeasance in office.

**SECTION 7-25-190.** Illegal conduct at elections generally.

A person who votes at any general, special, or primary election who is not entitled to vote, or who by force, intimidation, deception, fraud, bribery, or undue influence obtains, procures, or controls the vote of any voter to be cast for any candidate or measure other than as intended or desired by such voter, or who violates any of the provisions of this title in regard to general, special, or primary elections is guilty of a felony. Upon conviction, the person must be fined not less than one hundred nor more than one thousand dollars or imprisoned not more than five years, or both.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – SOUTH DAKOTA

- 12-26-7. Impersonation of registered voter as felony. A person who impersonates a registered voter and, as such, offers to vote at any election, is guilty of a Class 5 felony.
- 12-26-8. Voting more than once at any election as felony. A person who votes more than once at any election or who offers to vote after having once voted, either in the same or in another election precinct in South Dakota or elsewhere, is guilty of a Class 6 felony.
- 12-26-9. Good faith defense to prosecution for illegal voting. Upon any prosecution for procuring, offering, or casting an illegal vote, the accused may give in evidence any facts tending to show that he honestly believed upon good reason that the vote complained of was a lawful one; and the jury may take such facts into consideration in determining whether the acts complained of were knowingly done or not.
- 12-26-12. Persecution, threats, or intimidation to influence vote as misdemeanor--Obstruction of voter on way to polls. A person who directly or indirectly, intentionally, by force or violence, or by unlawful arrest, or by any abduction, duress, damage, harm, or loss, or by any forcible or fraudulent contrivance, or by threats to do or employ any of them, or by threats of bringing civil suit or criminal prosecution, withdrawal of customs or dealing in business or trade, or enforcing payment of debts, or by any kind of injury or threat of injury inflicted or to be inflicted on any voter or person to influence any voter, and attempted, done, or threatened, or caused to be attempted, done, or threatened by any person in his own behalf or in behalf of any other person or question voted upon or to be voted upon at any election, for the purpose of preventing, causing, or intimidating a voter to vote or refrain from voting for or against any person or question, or who does or causes to be done any of such things because of a voter having voted or refrained from voting on any such matter, or who intentionally and without lawful authority obstructs, hinders, or delays a voter on his way to any poll where an election is to be held, is guilty of a Class 2 misdemeanor.
- 12-26-15. Bribery of voter as misdemeanor--Acts constituting bribery. It is a Class 2 misdemeanor for any person, directly or indirectly, by himself or through any other person:
- (1) To pay, lend, contribute, or offer or promise to pay, lend, or contribute, any money or other valuable consideration, to or for any voter or to or for any other person, to induce such voter to vote or refrain from voting at any election or to induce any voter to vote or refrain from voting at such election for any particular person or to induce such voter to go to the polls or remain away from the polls at such election, or on account of such voter having voted, refrained from voting or having voted or refrained from voting for any particular person, or having gone to the polls or remained away from the polls at such election;
  - (2) To give, offer, or promise any office, place, or employment, or to promise to procure or endeavor to procure any office, place, or employment to or for any voter, or to or for any other person in order to induce such voter to vote or refrain from voting at such election for any particular person;
  - (3) To make any gift, loan, or promise, offer, procurement, or agreement as aforesaid to, for, or with any person in order to induce such person to procure or endeavor to procure the election of any person, or the vote of any voter at any election;
  - (4) To procure or engage, promise, or endeavor to procure, in consequence of any such gift, loan, offer, promise, procurement, or agreement, the election of any person or the vote of any voter at such election;
  - (5) To advance or pay, or cause to be paid, any money or other valuable thing to or for the use of any other person, with the intent that the same or any part thereof shall be used in bribery at any election, or to knowingly pay or cause to be paid any money or other valuable thing to any person in discharge or repayment of any money wholly or in part expended in bribery at any election.
- 12-26-15. Bribery of voter as misdemeanor--Acts constituting bribery. It is a Class 2 misdemeanor for any person, directly or indirectly, by himself or through any other person:

(1) To pay, lend, contribute, or offer or promise to pay, lend, or contribute, any money or other valuable consideration, to or for any voter or to or for any other person, to induce such voter to vote or refrain from voting at any election or to induce any voter to vote or refrain from voting at such election for any particular person or to induce such voter to go to the polls or remain away from the polls at such election, or on account of such voter having voted, refrained from voting or having voted or refrained from voting for any particular person, or having gone to the polls or remained away from the polls at such election;

(2) To give, offer, or promise any office, place, or employment, or to promise to procure or endeavor to procure any office, place, or employment to or for any voter, or to or for any other person in order to induce such voter to vote or refrain from voting at such election for any particular person;

(3) To make any gift, loan, or promise, offer, procurement, or agreement as aforesaid to, for, or with any person in order to induce such person to procure or endeavor to procure the election of any person, or the vote of any voter at any election;

(4) To procure or engage, promise, or endeavor to procure, in consequence of any such gift, loan, offer, promise, procurement, or agreement, the election of any person or the vote of any voter at such election;

(5) To advance or pay, or cause to be paid, any money or other valuable thing to or for the use of any other person, with the intent that the same or any part thereof shall be used in bribery at any election, or to knowingly pay or cause to be paid any money or other valuable thing to any person in discharge or repayment of any money wholly or in part expended in bribery at any election.

12-26-16. Acceptance of bribe by voter as misdemeanor--Acts constituting acceptance of bribe. It is a Class 2 misdemeanor for any person, directly or indirectly, by himself or through any other person:

(1) To receive, agree, or contract for, before or during any election, any money, gift, loan, or other valuable consideration, offer, place, or employment for himself or any other person, for voting or agreeing to vote, or for going or agreeing to go to the polls, or for remaining away or agreeing to remain away from the polls at any such election;

(2) To receive any money or other valuable thing during or after an election, for himself or any other person for having voted or refrained from voting at such election, or on account of himself or any other person having voted or refrained from voting for any particular person at such election, or on account of himself or any other person having gone to the polls or remained away from the polls at such election, or on account of having induced any other person to vote or refrain from voting, for any particular person at such election.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – TENNESSEE

**2-19-107. Illegal registration or voting.**

A person commits a Class E felony who:

(1) Intentionally and knowing that such person is not entitled to, registers or votes in any manner or attempts to register or vote in any manner where or when such person is not entitled to under this title, including voting more than once in the same election; or

(2) Votes in the primary elections of more than one (1) political party on the same day.

**2-19-115. Violence and intimidation to prevent voting.**

It is a Class A misdemeanor for any person, directly or indirectly, personally or through any other person:

(1) By force or threats to prevent or endeavor to prevent any elector from voting at any primary or final election;

(2) To make use of any violence, force or restraint, or to inflict or threaten the infliction of any injury, damage, harm or loss; or

(3) In any manner to practice intimidation upon or against any person in order to induce or compel such person to vote or refrain from voting, to vote or refrain from voting for any particular person or measure, or on account of such person having voted or refrained from voting in any such election.

**2-19-117. Procuring illegal vote.**

It is a Class E felony for any person to procure, aid, assist, counsel or advise another to vote in any convention, primary or final election, knowing such person is disqualified.

**2-19-126. Bribing voters.**

It is unlawful for any person, directly or indirectly, personally or through any other person to:

(1) Pay, loan, contribute, or offer or promise to pay, loan or contribute any money, property, or other valuable thing, to or for any voter, or to or for any other person, to induce such voter or any voter to vote or refrain from voting in any political convention, primary or final election of any kind or character, or to induce such voter or voters to vote or refrain from voting at any such convention, primary or final election for or against any particular person or measure, or on account of any voter having voted for or against any particular person or measure, or having gone to or remained away from the polls at any such convention, primary or final election;

(2) Give, offer, or promise any place, office or employment, or promise or procure any place, office or employment, to or for any voter, or to or for any other person, in order to induce such voter to vote or refrain from voting at any convention, primary or final election, or to induce any voter at such convention or primary or final election to vote or refrain from voting for any particular person or measure;

(3) Advance or pay or cause to be paid any money or other valuable thing to or for the use of any voter, or to or for the use of any other person, with the intent that the same or any part thereof shall be used in bribery at any primary or final election, or otherwise unlawfully used at, concerning, or in connection with any such primary or final election; or knowingly pay or cause to be paid any money or other valuable thing in discharge or repayment of money or other valuable thing wholly or in part expended in bribery or other unlawful use at or in connection with any such primary or final election; or

(4) Advance, pay or cause to be paid, as expenses or otherwise, to or for the use of any person, any money or other valuable thing in order to induce such person or any person to work for, solicit or seek to influence votes for or against any particular person or measure, at or in connection with any convention, primary or final election; or induce such person or persons to procure, solicit or influence any voter to attend, leave, or remain away from any such convention, primary or final election; or pay or cause to be paid any money or other valuable thing to or for the use or benefit of any person in discharge or payment of or for time, labor, expenses, or services alleged to have been spent, performed, incurred, or rendered for or against any person, at or in connection with any such convention, primary or final election; provided, that this shall not include payment of expenses for soliciting attendance of any person upon party conventions, primaries, or final elections; and provided further, that nothing herein shall be construed to prohibit expenditures otherwise allowed by law.

**2-19-127. Voter accepting bribe.**

It is unlawful for any person, directly or indirectly, personally or through any other person, to:

(1) Receive, agree to receive, or contract for, before or during any primary or final election or convention provided by law, any money, gift, loan, or other valuable consideration, or any office, place or employment for such person or for any other person, for voting or agreeing to vote, or for going to or remaining or agreeing to remain away from the polls, or refraining or agreeing to refrain from voting for any particular person or measure, at or in connection with any such convention, primary or election; or

(2) Receive any money or other valuable thing during or after any convention, primary or final election provided by law, on account of such person or any other person, for voting or refraining from voting for any person or measure, or for going to the polls or remaining away from the polls at any such convention, primary or final election, or on account of having induced any person to vote or refrain from voting for any particular person or measure at any such convention, primary or final election.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - TEXAS

Election code § 13.007. FALSE STATEMENT ON APPLICATION.

- (a) A person commits an offense if the person knowingly makes a false statement or requests, commands, or attempts to induce another person to make a false statement on a registration application.
- (b) An offense under this section is a Class B misdemeanor.
- (c) For purposes of this code, an offense under this section is considered to be perjury, but may be prosecuted only under this section.

Election code § 64.012. ILLEGAL VOTING.

- (a) A person commits an offense if the person:
  - (1) votes or attempts to vote in an election in which the person knows the person is not eligible to vote;
  - (2) knowingly votes or attempts to vote more than once in an election;
  - (3) knowingly impersonates another person and votes or attempts to vote as the impersonated person; or
  - (4) knowingly marks or attempts to mark another person's ballot without the consent of that person.
- b) An offense under this section is a felony of the third degree unless the person is convicted of an attempt. In that case, the offense is a Class A misdemeanor.

Penal Code § 36.02. BRIBERY.

- (a) A person commits an offense if he intentionally or knowingly offers, confers, or agrees to confer on another, or solicits, accepts, or agrees to accept from another:
  - (1) any benefit as consideration for the recipient's decision, opinion, recommendation, vote, or other exercise of discretion as a public servant, party official, or voter;
  - (2) any benefit as consideration for the recipient's decision, vote, recommendation, or other exercise of official discretion in a judicial or administrative proceeding;
  - (3) any benefit as consideration for a violation of a duty imposed by law on a public servant or party official; or
  - (4) any benefit that is a political contribution as defined by Title 15, Election Code, or that is an expenditure made and reported in accordance with Chapter 305, Government Code, if the benefit was offered, conferred, solicited, accepted, or agreed to pursuant to an express agreement to take or withhold a specific exercise of official discretion if such exercise of official discretion would not have been taken or withheld but for the benefit; notwithstanding any rule of evidence or jury instruction allowing factual inferences in the absence of certain evidence, direct evidence of the express agreement shall be required in any prosecution under this subdivision.
- (b) It is no defense to prosecution under this section that a person whom the actor sought to influence was not qualified to act in the desired way whether because he had not yet assumed office or he lacked jurisdiction or for any other reason.
- (c) It is no defense to prosecution under this section that the benefit is not offered or conferred or that the benefit is not solicited or accepted until after:
  - (1) the decision, opinion, recommendation, vote, or other exercise of discretion has occurred; or
  - (2) the public servant ceases to be a public servant.
- (d) It is an exception to the application of Subdivisions (1), (2), and (3) of Subsection (a) that the benefit is a political contribution as defined by Title 15, Election Code, or an expenditure made and reported in accordance with Chapter 305, Government Code.
- (e) An offense under this section is a felony of the second degree.

Penal code § 36.03. COERCION OF PUBLIC SERVANT OR VOTER.

(a) A person commits an offense if by means of coercion he:

(1) influences or attempts to influence a public servant in a specific exercise of his official power or a specific performance of his official duty or influences or attempts to influence a public servant to violate the public servant's known legal duty; or

(2) influences or attempts to influence a voter not to vote or to vote in a particular manner.

(b) An offense under this section is a Class A misdemeanor unless the coercion is a threat to commit a felony, in which event it is a felony of the third degree.

(c) It is an exception to the application of Subsection

(a)(1) of this section that the person who influences or attempts to influence the public servant is a member of the governing body of a governmental entity, and that the action that influences or attempts to influence the public servant is an official action taken by the member of the governing body. For the purposes of this subsection, the term "official action" includes deliberations by the governing body of a governmental entity.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – UTAH

**20A-1-601. Bribery in elections.**

- (1) It is unlawful for any person, directly or indirectly, by himself or through any other person to:
- (a) pay, loan, or contribute, or offer or promise to pay, loan, or contribute any money or other valuable consideration to or for any voter or to or for any other person:
    - (i) to induce the voter to vote or refrain from voting at any election provided by law;
    - (ii) to induce any voter to vote or refrain from voting at an election for any particular person or persons;
    - (iii) to induce a voter to go to the polls or remain away from the polls at any election;
    - (iv) because a voter voted or refrained from voting for any particular person, or went to the polls or remained away from the polls; or
    - (v) to obtain the political support or aid of any person at an election;
  - (b) give, offer, or promise any office, place, or employment, or to promise or procure, or endeavor to procure, any office, place, or employment, to or for any voter, or to or for any other person, in order to:
    - (i) induce a voter to vote or refrain from voting at any election;
    - (ii) induce any voter to vote or refrain from voting at an election for any particular person or persons; or
    - (iii) obtain the political support or aid of any person;
  - (c) advance or pay, or cause to be paid, any money or other valuable thing to, or for the use of, any other person with the intent that the money or other valuable thing be used in bribery at any election provided by law; or
  - (d) knowingly pay, or cause to be paid, any money or other valuable thing to any person in discharge or repayment of any money expended wholly or in part in bribery at any election.
- (2) In addition to the penalties established in Section 20A-1-609, any person convicted of any of the offenses established by this section shall be punished by a fine of not more than \$1,000, or by imprisonment in the state prison for not more than five years, or by both a fine and imprisonment.

**20A-1-602. Receiving bribe.**

- (1) It is unlawful for any person, for himself or for any other person, directly or indirectly, by himself or through any person, before, during or after an election to:
- (a) receive, agree to receive, or contract for any money, gift, loan, or other valuable consideration, office, place, or employment for voting or agreeing to vote, or for going or agreeing to go to the polls, or for remaining or agreeing to remain away from the polls, or for refraining or agreeing to refrain from voting, or for voting or agreeing to vote, or refraining or agreeing to refrain from voting for any particular person or measure at any election provided by law;
  - (b) receive any money or other valuable thing because the person induced any other person to vote or refrain from voting or to vote or refrain from voting for any particular person or measure at an election.
- (2) In addition to the penalties established in Section 20A-1-609, any person convicted of any of the offenses established by this section shall be punished by a fine of not more than \$1,000, or by imprisonment in the state prison for not more than five years, or by both a fine and imprisonment.

**20A-1-603. Fraud, interference, disturbance -- Tampering with ballots or records.**

- (1) It is unlawful for:
- (a) any person who is not entitled to vote to fraudulently vote; and
  - (b) any person to:
    - (i) vote more than once at any one election;
    - (ii) knowingly hand in two or more ballots folded together;
    - (iii) change any ballot after it has been deposited in the ballot box;
    - (iv) add or attempt to add any ballot to those legally polled at any election by fraudulently introducing the ballot into the ballot box either before or after the ballots have been counted;
    - (v) add to or mix, or attempt to add or mix, other ballots with the ballots lawfully polled while those ballots are being counted or canvassed, or at any other time;
    - (vi) willfully detain, mutilate, or destroy any election returns;
    - (vii) in any manner, interfere with the officers holding an election or conducting a canvass, or with the voters lawfully exercising their rights of voting at an election, so as to prevent the election or canvass from being fairly held or lawfully conducted;
    - (viii) engage in riotous conduct at any election or interfere in any manner with any election officer in the discharge of his duties;
    - (ix) induce any election officer, or officer whose duty it is to ascertain, announce, or declare the result of any election or to give or make any certificate, document, or evidence in relation to any election, to violate or

refuse to comply with his duty or any law regulating his duty;

(x) take, carry away, conceal, remove, or destroy any ballot, pollbook, or other thing from a polling place, or from the possession of the person authorized by law to have the custody of that thing; or  
(xi) aid, counsel, provide, procure, advise, or assist any person to do any of the acts specified in this section.

(2) In addition to the penalties established in Section 20A-1-609, any person convicted of any of the offenses established in this section shall be punished by a fine of not more than \$1,000, or by imprisonment in the state prison for not more than five years, or by both a fine and imprisonment.

**20A-2-401. Fraudulent registration -- Penalty.**

(1) It is unlawful for any person to willfully cause, procure, or allow himself to be registered to vote, knowing that he is not entitled to register to vote.

(2) It is unlawful for any person to willfully cause, procure, advise, encourage, or assist any other person to be registered to vote, knowing or believing that the person is not entitled to register to vote.

(3) Any person who violates this section is guilty of a class A misdemeanor.

**20A-3-502. Intimidation -- Undue influence.**

(1) (a) It is unlawful for any person, directly or indirectly, by himself or by any other person on his behalf, to make use of any force, violence, or restraint, or to inflict or threaten the infliction of, by himself or through any other person, any injury, damage, harm or loss, or in any manner to practice intimidation upon or against any person in order to induce or compel that person to:

(i) vote or refrain from voting for any particular person or measure at any election provided by law; or

(ii) vote or refrain from voting at any election.

(b) It is unlawful for any person by abduction or duress, or any forcible or fraudulent device or contrivance whatever, to impede, prevent, or otherwise interfere with the free exercise of the elective franchise of any voter, either in giving or refraining from giving his vote at any election, or in giving or refraining from giving his vote for any particular person at any election.

(c) It is unlawful for any employer, corporation, association, company, firm, or person to:

(i) enclose their employees' salary or wages in envelopes on which there is written or printed any political mottoes, devices, or arguments containing threats, express or implied, intended or calculated to influence the political opinion, views, or action of the employees; or

(ii) within 90 days of any election provided by law to put up, or otherwise exhibit, in its, their, or his factory, workshop, mine, mill, boarding house, office, or other establishment or place where employees may be working or be present in the course of employment, any handbill, notice, or placard containing any threat, notice, or information, that if any particular ticket or candidate is or is not elected:

(A) work in the establishment will cease in whole or in part;

(B) the establishment will be closed;

(C) wages of workmen be reduced; or

(D) other threats, express or implied, intended or calculated to influence the political opinions or actions of employees.

(2) Any person, whether acting in his individual capacity or as an officer or agent of any corporation, who violates any of the provisions of this section is guilty of a class B misdemeanor.

**20A-3-505. False impersonation -- Double voting.**

(1) (a) It is unlawful for any person to apply for a ballot in the name of some other person, whether it is that of a person living or dead, or of a fictitious person, or who, having voted once at a primary or election, applies at the same election for a ballot in his own name or any other name.

(b) Any person who violates this section is guilty of a felony and shall be punished by imprisonment in the state prison for not less than one nor more than three years.

(2) (a) It is unlawful for any person to aid, abet, counsel, or procure another person to commit the felony prohibited in Subsection (1).

(b) Any person who violates this subsection is guilty of a felony and shall be punished by imprisonment in the state prison for not less than one nor more than three years.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - VERMONT

**§ 1971. Casting more than one ballot.**

A legal voter who knowingly casts more than one ballot at any one time of balloting for the same office shall be fined not more than \$1,000.00, if the offense is committed at a general election, and not more than \$100.00, if committed in town meeting.

**§ 1973. Voting in more than one place.**

A person who, on the same day, votes in more than one town, district, or ward for the same office shall be fined not more than \$1,000.00.

**§ 2014. Unqualified person voting.**

A person, knowing that he is not a qualified voter, who votes at a town, village or school district meeting or a general election for an officer to be elected at such meeting or election shall be fined not more than \$100.00.

**§ 2015. Fraudulent voting.**

A person who personates another, living or dead and gives or offers to give a vote in the name of such other person or gives or offers to give a vote under a fictitious name at a town, village or school district meeting or a general election, for an officer to be elected at such meeting or election, shall be imprisoned not more than one year or fined not more than \$100.00, or both.

**§ 2016. Aiding unqualified voter to vote.**

A person who wilfully aids or abets a person who is not a duly qualified voter in voting or attempting to vote at a general election shall be fined not more than \$100.00.

011882

**§ 2017. Undue influence.**

A person who attempts by bribery, threats or any undue influence to dictate, control or alter the vote of a freeman about to be given at a general election shall be fined not more than \$200.00.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - VIRGINIA

§ 24.2-1004. Illegal voting and registrations.

A. Any person who (i) votes knowing that he is not qualified to vote where and when the vote is to be given, (ii) procures, assists, or induces another to vote, knowing that such person is not qualified to vote where and when the vote is to be given, or (iii) wrongfully deposits a ballot in the ballot container or casts a vote on any voting equipment, is guilty of a Class 1 misdemeanor.

B. Any person who intentionally (i) votes more than once in the same election, whether those votes are cast in Virginia or in Virginia and any other state or territory of the United States, or (ii) procures, assists, or induces another to vote more than once in the same election, whether those votes are cast in Virginia or in Virginia and any other state or territory of the United States, is guilty of a Class 6 felony.

C. Any person who intentionally (i) registers to vote at more than one residence address at the same time, whether such registrations are in Virginia or in Virginia and any other state or territory of the United States, or (ii) procures, assists, or induces another to register to vote at more than one address at the same time, whether such registrations are in Virginia or in Virginia and any other state or territory of the United States, is guilty of a Class 6 felony. This subsection shall not apply to any person who, when registering to vote, changing the address at which he is registered, transferring his registration, or assisting another in registering, changing his address, or transferring his registration, provides the information required by § 24.2-418 on the applicant's place of last previous registration to vote.

§ 24.2-1005. Bribery, intimidation, etc., of person receiving ballot.

Any person who (i) by threats, bribery, or other means in violation of the election laws, attempts to influence any person in giving his vote or ballot or by such means attempts to deter him from voting; (ii) furnishes a ballot to a person who he knows cannot understand the language in which the ballot is printed and misinforms him as to the content of the ballot with an intent to deceive him and induce him to vote contrary to his desire; or (iii) changes a ballot of a person to prevent the person from voting as he desired, shall be guilty of a Class 1 misdemeanor.

This section applies to any election and to any method used by a political party for selection of its nominees and for selection of delegates to its conventions and meetings.

§ 24.2-1007. Soliciting or accepting bribe to influence or procure vote.

No person shall solicit or accept directly or indirectly any money or any thing of value to influence his or another's vote in any election. Any person violating the provisions of this section shall be guilty of a Class 1 misdemeanor.

This section applies to any election and to any method used by a political party for selection of its nominees and for selection of delegates to its conventions and meetings.

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - WASHINGTON

**RCW 29A.84.130**

**Voter violations.**

Any person who:

(1) Knowingly provides false information on an application for voter registration under any provision of this title;

(2) Knowingly makes or attests to a false declaration as to his or her qualifications as a voter;

(3) Knowingly causes or permits himself or herself to be registered using the name of another person;

(4) Knowingly causes himself or herself to be registered under two or more different names;

(5) Knowingly causes himself or herself to be registered in two or more counties;

(6) Offers to pay another person to assist in registering voters, where payment is based on a fixed amount of money per voter registration;

(7) Accepts payment for assisting in registering voters, where payment is based on a fixed amount of money per voter registration; or

(8) Knowingly causes any person to be registered or causes any registration to be transferred or canceled except as authorized under this title,

is guilty of a class C felony punishable under RCW 9A.20.021.

**RCW 29A.84.140**

**Unqualified registration.**

A person who knows that he or she does not possess the legal qualifications of a voter and who registers to vote is guilty of a class C felony.

**RCW 29A.84.620**

**Hindering or bribing voter.**

Any person who uses menace, force, threat, or any unlawful means towards any voter to hinder or deter such a voter from voting, or directly or indirectly offers any bribe, reward, or any thing of value to a voter in exchange for the voter's vote for or against any person or ballot measure, or authorizes any person to do so, is guilty of a class C felony punishable under RCW 9A.20.021.

**RCW 29A.84.630**

**Influencing voter to withhold vote.**

Any person who in any way, directly or indirectly, by menace or unlawful means, attempts to influence any person in refusing to give his or her vote in any primary or special or general election is guilty of a gross

misdemeanor punishable to the same extent as a gross misdemeanor that is punishable under RCW 9A.20.021.

**RCW 29A.84.640**

**Solicitation of bribe by voter.**

Any person who solicits, requests, or demands, directly or indirectly, any reward or thing of value or the promise thereof in exchange for his or her vote or in exchange for the vote of any other person for or against any candidate or for or against any ballot measure to be voted upon at a primary or special or general election is guilty of a gross misdemeanor punishable to the same extent as a gross misdemeanor that is punishable under RCW 9A.20.021.

**RCW 29A.84.650**

**Repeaters.**

(1) Any person who intentionally votes or attempts to vote in this state more than once at any election, or who intentionally votes or attempts to vote in both this state and another state at any election, is guilty of a class C felony.

(2) Any person who recklessly or negligently violates this section commits a class 1 civil infraction as provided in RCW 7.80.120.

**RCW 29A.84.655**

**Repeaters — Unqualified persons — Officers conniving with.**

Any precinct election officer who knowingly permits any voter to cast a second vote at any primary or general or special election, or knowingly permits any person not a qualified voter to vote at any primary or general or special election, is guilty of a class C felony punishable under RCW 9A.20.021.

**RCW 29A.84.660**

**Unqualified persons voting.**

Any person who knows that he or she does not possess the legal qualifications of a voter and who votes at any primary or special or general election authorized by law to be held in this state for any office whatever is guilty of a class C felony punishable under RCW 9A.20.021.

## STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION – WEST VIRGINIA

### **§3-9-10. Disorder at polls; prevention; failure to assist in preventing disorder; penalties.**

Any person who shall, by force, menace, fraud or intimidation, prevent or attempt to prevent any officer whose duty it is by law to assist in holding an election, or in counting the votes cast thereat, and certifying and returning the result thereof, from discharging his duties according to law; or who shall, by violence, threatening gestures, speeches, force, menace or intimidation, prevent or attempt to prevent an election being held; or who shall in any manner obstruct or attempt to obstruct the holding of an election, or who shall, by any manner of force, fraud, menace or intimidation, prevent or attempt to prevent any voter from attending any election, or from freely exercising his right of suffrage at any election at which he is entitled to vote, shall be guilty of a misdemeanor, and, upon conviction, fined not more than one thousand dollars, or confined in the county jail for not more than one year, or both, in the discretion of the court.

Any person who, being thereto commanded by the commissioners of election, or either of them, shall fail or refuse to assist to the utmost of his power, in whatever may be necessary or proper to prevent intimidation, disorder or violence at the polls, shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not less than ten nor more than one hundred dollars.

### **§3-9-13. Buying or selling vote unlawful; penalties.**

(a) It is unlawful for any person to offer or to pay money or any other thing of value to any person as consideration for the vote of the offeree or payee, as the case may be, to be cast for or against any candidate or issue in any election held in the state. Any person who violates the provisions of this subsection shall be guilty of a felony, and, upon conviction thereof, shall be fined not less than five thousand dollars or imprisoned for a period of not less than one year, nor more than five years, or both.

(b) It is likewise unlawful for any person to accept or agree to accept money or other thing of value as consideration for the vote of the acceptee, to be cast for or against any candidate or issue in any election held in the state. Any person who violates the provisions of this subsection shall be guilty of a misdemeanor, and, upon conviction thereof, shall be fined not less than one hundred dollars nor more than one thousand dollars or imprisoned in the county jail not more than one year, or both.

### **§3-9-16. Receiving or soliciting bribes by voters; penalties.**

Any voter who shall, before or during any election, directly or indirectly, by himself, or by any other person on his behalf, solicit, demand, receive, agree or contract for any money, gift, loan, or valuable consideration, office, place of employment, or solicit any endorsement on a note or other paper, public or private, for himself or for any other person, for voting or agreeing to vote, or for voting for any person or candidate or object, or agreeing so to vote, or from refraining or agreeing to refrain from voting at any election; or any person who shall, after any election, directly or indirectly, by himself, or by any other person on his behalf, solicit, demand or receive any money or valuable consideration on account of any person having voted or refrained from voting, or having induced any other person to vote or refrain from voting at any election, shall be guilty of a misdemeanor, and, on conviction thereof, shall be fined not more than one thousand dollars, or confined in jail for not more than one year, or both, in the discretion of the court.

### **§3-9-17. Illegal voting; deceiving voters; penalties.**

If any person knowingly votes when not legally entitled; or votes more than once in the same election; or knowingly votes or attempts to vote more than one ballot for the same office, or on the same question; or procures or assists in procuring an illegal vote to be admitted, or received, at an election, knowing the same to be illegal; or a legal vote to be rejected, knowing the same to be legal; or, with intent to deceive, alters the ballot of a voter by marking out the name of any person for whom such voter desires to vote; or, with like intent, writes the name of any person on such ballot other than those directed by the voter; or with like intent, makes any alteration thereof, whether such ballot be voted or not; or defrauds any voter at any election, by deceiving and causing him to vote for a different person for any office than he intended or desired to vote for, he shall be guilty of a misdemeanor, and, on conviction thereof, shall for each offense be fined not more than one thousand dollars or confined in the county jail for not more than one year, or both, in the discretion of the court.

## STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - WISCONSIN

**12.09 Election threats. (1)** No person may personally or through an agent make use of or threaten to make use of force, violence, or restraint in order to induce or compel any person to vote or refrain from voting at an election.

**(2)** No person may personally or through an agent, by abduction, duress, or any fraudulent device or contrivance, impede or prevent the free exercise of the franchise at an election.

**(3)** No person may personally or through an agent, by any act compel, induce, or prevail upon an elector either to vote or refrain from voting at any election for or against a particular candidate or referendum.

**12.11 Election bribery. (1)** In this section, "anything of value" includes any amount of money, or any object which has utility independent of any political message it contains and the value of which exceeds \$1. The prohibitions of this section apply to the distribution of material printed at public expense and available for free distribution if such materials are accompanied by a political message.

**(1m)** Any person who does any of the following violates this chapter:

**(a)** Offers, gives, lends or promises to give or lend, or endeavors to procure, anything of value, or any office or employment or any privilege or immunity to, or for, any elector, or to or for any other person, in order to induce any elector to:

1. Go to or refrain from going to the polls.
2. Vote or refrain from voting.
3. Vote or refrain from voting for or against a particular person.
4. Vote or refrain from voting for or against a particular referendum; or on account of any elector having done any of the above.

**(b)** Receives, agrees or contracts to receive or accept any money, gift, loan, valuable consideration, office or employment personally or for any other person, in consideration that the person or any elector will, so act or has so acted.

**(c)** Advances, pays or causes to be paid any money to or for the use of any person with the intent that such money or any part thereof will be used to bribe electors at any election.

**(2)** This section applies to any convention or meeting held for the purpose of nominating any candidate for any election, and to the signing of any nomination paper.

**(3) (a)** This section does not prohibit a candidate from publicly stating his or her preference for or support of any other candidate for any office to be voted for at the same election. A candidate for an office in which the person elected is charged with the duty of participating in the election or nomination of any person as a candidate for office is not prohibited from publicly stating or pledging his or her preference for or support of any person for such office or nomination.

**(b)** This section does not apply to money paid or agreed to be paid for or on account of authorized legal expenses which were legitimately incurred at or concerning any election.

**(c)** This section does not apply where an employer agrees that all or part of election day be given to its employees as a paid holiday, provided that such policy is made uniformly applicable to all similarly situated employees.

**(d)** This section does not prohibit any person from using his or her own vehicle to transport electors to or from the polls without charge.

011888

(e) This section does not apply to any promise by a candidate to reduce public expenditures or taxes.

**12.13 Election fraud. (1) ELECTORS.** Whoever intentionally does any of the following violates this chapter:

- (a) Votes at any election or meeting if that person does not have the necessary elector qualifications and residence requirements.
- (b) Falsely procures registration or makes false statements to the municipal clerk, board of election commissioners or any other election official whether or not under oath.
- (c) Registers as an elector in more than one place for the same election.
- (d) Impersonates a registered elector or poses as another person for the purpose of voting at an election.
- (e) Votes more than once in the same election.
- (f) Shows his or her marked ballot to any person or places a mark upon the ballot so it is identifiable as his or her ballot.
- (g) Procures an official ballot and neglects or refuses to cast or return it. This paragraph does not apply to persons who have applied for and received absentee ballots.
- (h) Procures, assists or advises someone to do any of the acts prohibited by this subsection.

**(2) ELECTION OFFICIALS.** (a) The willful neglect or refusal by an election official to perform any of the duties prescribed under chs. 5 to 12 is a violation of this chapter.

(b) No election official may:

1. Observe how an elector has marked a ballot unless the official is requested to assist the elector; intentionally permit anyone not authorized to assist in the marking of a ballot to observe how a person is voting or has voted; or disclose to anyone how an elector voted other than as is necessary in the course of judicial proceedings.
2. Illegally issue, write, change or alter a ballot on election day.
3. Permit registration or receipt of a vote from a person who the official knows is not a legally qualified elector or who has refused after being challenged to make the oath or to properly answer the necessary questions pertaining to the requisite requirements and residence; or put into the ballot box a ballot other than the official's own or other one lawfully received.
4. Intentionally assist or cause to be made a false statement, canvass, certificate or return of the votes cast at any election.
5. Willfully alter or destroy a poll or registration list.
6. Intentionally permit or cause a voting machine, voting device or automatic tabulating equipment to fail to correctly register or record a vote cast thereon or inserted therein, or tamper with or disarrange the machine, device or equipment or any part or appliance thereof; cause or consent to the machine, device or automatic tabulating equipment being used for voting at an election with knowledge that it is out of order or is not perfectly set and adjusted so that it will correctly register or record all votes cast thereon or inserted therein; with the purpose of defrauding or deceiving any elector, cause doubt for what party, candidate or proposition a vote will be cast or cause the vote for one party, candidate or proposition to be cast so it appears to be cast for another; or remove, change or mutilate a ballot on a voting machine, device or a ballot to be inserted into automatic tabulating equipment, or do any similar act contrary to chs. 5 to 12.
- 6m. Obtain an absentee ballot for voting in a nursing home or qualified retirement home or qualified community-based residential facility under s. 6.875 (6) and fail to return the ballot to the issuing officer.
7. In the course of the person's official duties or on account

of the person's official position, intentionally violate or intentionally cause any other person to violate any provision of chs. 5 to 12 for which no other penalty is expressly prescribed.

8. Intentionally disclose the name or address of any elector who obtains a confidential listing under s. 6.47 (2) to any person who is not authorized by law to obtain that information.

**(3) PROHIBITED ACTS.** No person may:

(a) Falsify any information in respect to or fraudulently deface or destroy a certificate of nomination, nomination paper, declaration of candidacy or petition for an election, including a recall petition or petition for a referendum; or file or receive for filing a certificate of nomination, nomination paper, declaration of candidacy or any such petition, knowing any part is falsely made.

(am) Fail to file an amended declaration of candidacy as provided in s. 8.21 with respect to a change in information filed in an original declaration within 3 days of the time the amended declaration becomes due for filing; or file a false declaration of candidacy or amended declaration of candidacy. This paragraph applies only to candidates for state or local office.

(b) Wrongfully suppress, neglect or fail to file nomination papers in the person's possession at the proper time and in the proper office; suppress a certificate of nomination which is duly filed.

(c) Willfully or negligently fail to deliver, after having undertaken to do so, official ballots prepared for an election to the proper person, or prevent their delivery within the required time, or destroy or conceal the ballots.

(d) Remove or destroy any of the supplies or conveniences placed in compartments or polling booths.

(e) Prepare or cause to be prepared an official ballot with intent to change the result of the election as to any candidate or referendum; prepare an official ballot which is premarked or which has an unauthorized sticker affixed prior to delivery to an elector; or deliver to an elector an official ballot bearing a mark opposite the name of a candidate or referendum question that might be counted as a vote for or against a candidate or question.

(f) Before or during any election, tamper with voting machines, voting devices or automatic tabulating equipment readied for voting or the counting of votes; disarrange, deface, injure or impair any such machine, device or equipment; or mutilate, injure or destroy a ballot placed or displayed on a voting machine or device, or to be placed or displayed on any such machine, device or automatic tabulating equipment or any other appliance used in connection with the machine, device or equipment.

(g) Falsify any statement relating to voter registration under chs. 5 to 12.

(h) Deface, destroy or remove any legally placed election campaign advertising poster with intent to disrupt the campaign advertising efforts of any candidate, or of any committee, group or individual under ch. 11, or alter the information printed thereon so as to change the meaning thereof to the disadvantage of the candidate or cause espoused. Nothing in this paragraph restricts the right of any owner or occupant of any real property, or the owner or operator of any motor vehicle, to remove campaign advertising posters from such property or vehicle.

(i) Falsely make any statement for the purpose of obtaining or voting an absentee ballot under ss. 6.85 to 6.87.

(j) When called upon to assist an elector who cannot read or write, has difficulty in reading, writing or understanding English,

(b) This section does not apply to money paid or agreed to be paid for or on account of authorized legal expenses which were legitimately incurred at or concerning any election.

011890

(c) This section does not apply where an employer agrees that all or part of election day be given to its employees as a paid holiday, provided that such policy is made uniformly applicable to all similarly situated employees.

(d) This section does not prohibit any person from using his or her own vehicle to transport electors to or from the polls without charge.

(e) This section does not apply to any promise by a candidate to reduce public expenditures or taxes.

**12.13 Election fraud. (1) ELECTORS.** Whoever intentionally does any of the following violates this chapter:

(a) Votes at any election or meeting if that person does not have the necessary elector qualifications and residence requirements.

(b) Falsely procures registration or makes false statements to the municipal clerk, board of election commissioners or any other election official whether or not under oath.

(c) Registers as an elector in more than one place for the same election.

(d) Impersonates a registered elector or poses as another person for the purpose of voting at an election.

(e) Votes more than once in the same election.

(f) Shows his or her marked ballot to any person or places a mark upon the ballot so it is identifiable as his or her ballot.

(g) Procures an official ballot and neglects or refuses to cast or return it. This paragraph does not apply to persons who have applied for and received absentee ballots.

(h) Procures, assists or advises someone to do any of the acts prohibited by this subsection.

**(2) ELECTION OFFICIALS.** (a) The willful neglect or refusal by an election official to perform any of the duties prescribed under chs. 5 to 12 is a violation of this chapter.

(b) No election official may:

1. Observe how an elector has marked a ballot unless the official is requested to assist the elector; intentionally permit anyone not authorized to assist in the marking of a ballot to observe how a person is voting or has voted; or disclose to anyone how an elector voted other than as is necessary in the course of judicial proceedings.

2. Illegally issue, write, change or alter a ballot on election day.

3. Permit registration or receipt of a vote from a person who the official knows is not a legally qualified elector or who has refused after being challenged to make the oath or to properly answer the necessary questions pertaining to the requisite requirements and residence; or put into the ballot box a ballot other than the official's own or other one lawfully received.

4. Intentionally assist or cause to be made a false statement, canvass, certificate or return of the votes cast at any election.

5. Willfully alter or destroy a poll or registration list.

6. Intentionally permit or cause a voting machine, voting device or automatic tabulating equipment to fail to correctly register or record a vote cast thereon or inserted therein, or tamper with or disarrange the machine, device or equipment or any part or appliance thereof; cause or consent to the machine, device or automatic tabulating equipment being used for voting at an election with knowledge that it is out of order or is not perfectly set and adjusted so that it will correctly register or record all votes cast thereon or inserted therein; with the purpose of defrauding or deceiving any elector, cause doubt for what party, candidate or proposition a vote will be cast or cause the vote for one party, candidate or proposition to be cast so it appears to be cast for another; or remove, change or mutilate a ballot on a voting machine, device

or a ballot to be inserted into automatic tabulating equipment, or do any similar act contrary to chs. 5 to 12.

6m. Obtain an absentee ballot for voting in a nursing home or qualified retirement home or qualified community-based residential facility under s. 6.875 (6) and fail to return the ballot to the issuing officer.

7. In the course of the person's official duties or on account of the person's official position, intentionally violate or intentionally cause any other person to violate any provision of chs. 5 to 12 for which no other penalty is expressly prescribed.

8. Intentionally disclose the name or address of any elector who obtains a confidential listing under s. 6.47 (2) to any person who is not authorized by law to obtain that information.

**(3) PROHIBITED ACTS.** No person may:

(a) Falsify any information in respect to or fraudulently deface or destroy a certificate of nomination, nomination paper, declaration of candidacy or petition for an election, including a recall petition or petition for a referendum; or file or receive for filing a certificate of nomination, nomination paper, declaration of candidacy or any such petition, knowing any part is falsely made.

(am) Fail to file an amended declaration of candidacy as provided in s. 8.21 with respect to a change in information filed in an original declaration within 3 days of the time the amended declaration becomes due for filing; or file a false declaration of candidacy or amended declaration of candidacy. This paragraph applies only to candidates for state or local office.

(b) Wrongfully suppress, neglect or fail to file nomination papers in the person's possession at the proper time and in the proper office; suppress a certificate of nomination which is duly filed.

(c) Willfully or negligently fail to deliver, after having undertaken to do so, official ballots prepared for an election to the proper person, or prevent their delivery within the required time, or destroy or conceal the ballots.

(d) Remove or destroy any of the supplies or conveniences placed in compartments or polling booths.

(e) Prepare or cause to be prepared an official ballot with intent to change the result of the election as to any candidate or referendum; prepare an official ballot which is premarked or which has an unauthorized sticker affixed prior to delivery to an elector; or deliver to an elector an official ballot bearing a mark opposite the name of a candidate or referendum question that might be counted as a vote for or against a candidate or question.

(f) Before or during any election, tamper with voting machines, voting devices or automatic tabulating equipment readied for voting or the counting of votes; disarrange, deface, injure or impair any such machine, device or equipment; or mutilate, injure or destroy a ballot placed or displayed on a voting machine or device, or to be placed or displayed on any such machine, device or automatic tabulating equipment or any other appliance used in connection with the machine, device or equipment.

(g) Falsify any statement relating to voter registration under chs. 5 to 12.

(h) Deface, destroy or remove any legally placed election campaign advertising poster with intent to disrupt the campaign advertising efforts of any candidate, or of any committee, group or individual under ch. 11, or alter the information printed thereon so as to change the meaning thereof to the disadvantage of the candidate or cause espoused. Nothing in this paragraph restricts the right of any owner or occupant of any real property, or the owner or operator of any motor vehicle, to remove campaign advertising posters from such property or vehicle.

011892

- (i) Falsely make any statement for the purpose of obtaining or voting an absentee ballot under ss. 6.85 to 6.87.
- (j) When called upon to assist an elector who cannot read or write, has difficulty in reading, writing or understanding English, or is unable to mark a ballot or depress a lever or button on a voting machine, inform the elector that a ballot contains names or words different than are printed or displayed on the ballot with the intent of inducing the elector to vote contrary to his or her inclination, intentionally fail to cast a vote in accordance with the elector's instructions or reveal the elector's vote to any 3rd person.
- (k) Forge or falsely make the official endorsement on a ballot or knowingly deposit a ballot in the ballot box upon which the names or initials of the ballot clerks, or those of issuing clerks do not appear.
- (L) When not authorized, during or after an election, break open or violate the seals or locks on a ballot box containing ballots of that election or obtain unlawful possession of a ballot box with official ballots; conceal, withhold or destroy ballots or ballot boxes; willfully, fraudulently or forcibly add to or diminish the number of ballots legally deposited in a ballot box; or aid or abet any person in doing any of the acts prohibited by this paragraph.
- (m) Fraudulently change a ballot of an elector so the elector is prevented from voting for whom the elector intended.
- (n) Receive a ballot from or give a ballot to a person other than the election official in charge.
- (o) Vote or offer to vote a ballot except as has been received from one of the inspectors.
- (p) Receive a completed ballot from a voter unless qualified to do so.
- (q) Solicit a person to show how his or her vote is cast.
- (r) Remove a ballot from a polling place before the polls are closed.
- (s) Solicit another elector to offer assistance under s. 6.82 (2) or 6.87 (5), except in the case of an elector who is blind or visually impaired to the extent that the elector cannot read a ballot.
- (t) Obtain an absentee ballot as the agent of another elector under s. 6.86 (3) and fail or refuse to deliver it to such elector.
- (u) Provide false documentation of identity for the purpose of inducing an election official to permit the person or another person to vote.
- (v) Corroborate any information offered by a proposed elector for the purpose of permitting the person to register to vote or to vote, knowing such information to be false.
- (w) Falsify a ballot application under s. 6.18.
- (x) Refuse to obey a lawful order of an inspector made for the purpose of enforcing the election laws; engage in disorderly behavior at or near a polling place; or interrupt or disturb the voting or canvassing proceedings.
- (y) After an election, break the locks or seals or reset the counters on a voting machine except in the course of official duties carried out at the time and in the manner prescribed by law; or disable a voting machine so as to prevent an accurate count of the votes from being obtained; or open the registering or recording compartments of a machine with intent to do any such act.
- (z) Tamper with automatic tabulating equipment or any record of votes cast or computer program which is to be used in connection with such equipment to count or recount votes at any election so as to prevent or attempt to prevent an accurate count of the votes from being obtained.
- (ze) Compensate a person who obtains voter registration forms from other persons at a rate that varies in relation to the number of voter registrations obtained by the person.

(zm) Willfully provide to a municipal clerk false information for the purpose of obtaining a confidential listing under s. 6.47 (2) for that person or another person.

(zn) Disclose to any person information provided under s. 6.47 (8) when not authorized to do so.

011894

STATUTES ON VOTE FRAUD AND VOTER INTIMIDATION - WYOMING

22-26-102. Registration offenses.

- (a) Registration offenses consist of performing any of the following acts with the intent to deceive a registration official or to subvert the registration requirements of the law or rights of a qualified elector:
- (i) Signing or offering to sign an application to register when not a qualified elector or to register under a false name;
  - (ii) Soliciting, procuring, aiding, abetting, inducing or attempting to solicit, procure, aid, abet or induce a person to register under the name of any other person, or a false name, or to register when not a qualified elector;
  - (iii) Destroying or altering a registration record when not authorized by law;
  - (iv) False swearing after being challenged.

22-26-106. False voting.

- (a) False voting consists of:
- (i) Voting, or offering to vote, with the knowledge of not being a qualified elector entitled to vote at the election;
  - (ii) Voting, or offering to vote, in the name of another person or under a false name;
  - (iii) Knowingly voting, or offering to vote, in a precinct other than that in which qualified to vote;
  - (iv) Voting, or offering to vote, more than once in an election.

22-26-109. Offering bribe.

- (a) Offering bribe consists of willfully advancing, paying, offering to pay or causing to be paid, or promising, directly or indirectly, any money or other valuable thing to a person, for any of the following purposes:
- (i) To induce a person to vote or refrain from voting for or against a candidate or ballot proposition or to sign or not sign a petition;
  - (ii) To induce an election official to mark, alter, suppress or change a ballot that has been cast, an election return, any certificate of election, or petition.

22-26-110. Accepting bribe.

Accepting a bribe consists of knowingly accepting any payment or promise of payment, directly or indirectly, of money or other valuable thing for any of the unlawful purposes specified in W.S. 22-26-109.

22-26-111. Intimidation.

- (a) Intimidation consists of:
- (i) Inducing, or attempting to induce, fear in an election official or elector by use of threats of force, violence, harm or loss, or any form of economic retaliation, for the purpose of impeding or preventing the free exercise of the elective franchise or the impartial administration of the Election Code; or
  - (ii) Soliciting the contribution of funds, other items of value or election assistance to the campaign of any candidate, candidate's committee, political action committee or sponsors of a ballot proposition, by use of threats of physical violence or any form of economic or official retaliation.
- (b) It is not a defense to a prosecution under this section that the defendant did not in fact possess the ability to carry out the threat made.

**Remarks by Paul DeGregorio  
Chairman, US Election Assistance Commission  
Voter Fraud/Intimidation Conference – Salt Lake City, Utah  
Center for Public Policy & Administration  
September 29, 2006**

Good afternoon, ladies and gentlemen. My name is Paul DeGregorio and I am the Chairman of the U.S. Election Assistance Commission. I would like to extend my thanks to Michael Alvarez, Thad Hall and Susan Hyde for organizing this conference and for inviting me to speak with you this afternoon.

My remarks today will focus on Voter Fraud and Voter Intimidation and how HAVA and the EAC address these issues.

The subject of voter fraud and voter intimidation can be a highly contentious issue. Since the 2004 election there has been a lot of discourse and writing about what constitutes election fraud and voter intimidation and how prevalent each may be in our society. While there are no clear numbers on the incidents of voter fraud and voter intimidation, what is clear is that the many groups are concerned about both issues and it is imperative that we continue to study and address them.

As you know, the EAC was created by The Help America Vote Act or "HAVA". HAVA represents the first major piece of federal legislation on national election reforms. Among other provisions, Section 241 of HAVA requires the EAC to conduct research on election administration issues. Among the tasks the EAC is to execute is the development of nationwide statistics and

methods of identifying, deterring, and investigating voting fraud and voter intimidation in elections for Federal office.

In September of 2005 the Commission hired consultants to begin a study of voting fraud and voter intimidation. This research project is charged with the development of a clear definition of what constitutes voting fraud and voter intimidation in Federal elections; identifying current activities of key government agencies, civic advocacy groups, and other organizations regarding these topics; the establishment of a working group of experts to discuss these issues; and production of a report to the EAC summarizing the findings that includes recommendations for future research if any. Our staff is reviewing the report that was submitted to the EAC last month and we expect to share our findings in the near future.

The lack of any solid statistics regarding voter fraud and intimidation can be attributed to two major factors. First is because there is wide disagreement about the definitions for the terms “fraud” and “intimidation.” Some only consider it fraud if it falls under the criminal definitions of fraud. While others consider any form of an ineligible voter attempting to vote as fraud. I have even had it suggested to me that election officials who allow voters to cast ballots on touch screen machines without a voter-verified paper trail is election fraud. If that’s the case, then we have a whole lot of fraud occurring out there.

The term intimidation is also wrought with ambiguity. Some only consider it intimidation if there is a physical or mental advantage of one party over the other, while others consider any difficulty in

the voting process as being intimidation. Because of these definitional differences there has been no clear way to study the amount of fraud or intimidation because everyone is using a different definition to help shape the statistics.

Also skewing the statistics about election fraud and voter intimidation is the political agenda or bias from both sides that accompanies much of the literature about the topic. Oftentimes we see fiery rhetoric on this issue that appears to me to want to “scare” people into voting or not voting. As a result of this political bias and the ambiguity that accompanies the terms “fraud” and “intimidation,” it is difficult to know when something has risen to the level to be considered fraud or simply is an accusation with no backing.

HAVA has several provisions that not only help to combat fraud but also make voting easier. Most notably section 303 of HAVA which requires each state to create “... a single, uniform, official, centralized, interactive, computerized statewide voter registration list...” This database is to be maintained at the state level and is to contain the name and registration information of every legally registered voter in the State.

The Statewide voter registration database is to serve as the single system for storing and managing the official list of registered voters throughout the state. It will be coordinated with other agencies databases within the state in order to insure the residence status of the voter.

The Statewide Voter Database serves a very important and specific function. It helps to prevent opportunities for fraud by allowing state election officials to check their registration information against the databases of other agencies in order to insure the status of the voters. Under HAVA, state election officials are given the right to remove those names that have been checked against state agency death records. Used correctly and efficiently, this would clearly help eliminate the problem of the use of a deceased person's name to vote or allow authorities to go after those who sign a dead person's name in the initiative or candidate petition process.

Also in section 303 of HAVA, State election officials are required to regularly update the registration list, removing only those individuals who are ineligible to vote in that election while updating the status of those eligible to vote. It is in this way that HAVA is helping to eliminate opportunities for fraud by eliminating ineligible voters from registration lists, while easing the process for those voters who are eligible.

One issue that has become particularly contentious is the issue of voter identification to combat voter fraud. As many of you know voter identification laws have lead to suits in Georgia, Indiana, Missouri, Ohio and Arizona with more to follow as states pass more identification laws.

In 2005-2006 the EAC commissioned research on voter identification practices in the 2004 election. To the surprise of no one the study found a lot of disagreement regarding the need for

voter identification laws and the way these laws should be applied.

Those in favor of voter identification laws argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election. They propose stricter voter identification requirements to prevent one form of voter fraud -- that being multiple voting or voting by those who are not eligible.

However, opponents argue that stricter ID laws interfere with legitimate voter's access to the ballot. They fear that some voters may lack convenient access to the required ID documents. Both sides assert that their policy will engender faith in the electoral process among citizens.

At the heart of this entire debate is the balance that needs to be struck between allowing those who are eligible to vote the ability to vote while preventing those who are not eligible to vote from voting.

From my own personal experience in traveling the world to improve the election process, especially in emerging democracies in Eastern Europe, Africa and Asia, I witnessed little, if any, resistance to ID requirements, including photo ID requirements. Indeed, I believe the Carter-Baker Commission has cited this phenomenon in their recommendations on this issue. In the recent Presidential election in Haiti, which is the poorest country in the Western Hemisphere, voters were required to show a photo ID to cast ballots. Statistics provided by IFES showed that over 3 million Haitian citizens, or about 80% of the voting age population,

registered to vote at centers that took their picture and fingerprints, and that produced the ID they used on Election Day. These IDs were paid for by the Organization of American States. On Election Day, 60% of the registered Haitians went to the polls, used their IDs, and cast ballots in the presidential election. By the way the 60% turnout matched the 2004 turnout in the US presidential election.

I cite this example and the Carter-Baker study to suggest that the first step that should be taken in order to find this balance is that more research needs to be conducted on the issue of voter identification. As was noted by the EAC's research, the amount of evidence available on how voter identification laws impacted both voter turnout and voter fraud is limited, at best. As more and more states implement these laws more information needs to be gathered in order to discover if these laws are preventing fraud, and what their impact is on voter turnout.

Courts have also greatly disagreed on the impact of voter identification laws. A recent decision in Georgia granted a preliminary injunction to enjoin the State of Georgia from requiring photo identification to be able to cast a ballot in person. The court in reaching its decision concluded that the injury to a voter who couldn't get the proper identification in time to vote was great and could not be tolerated. The court did point out that a State has a legitimate and important interest in attempting to combat voter fraud and in turn ensure the integrity of its elections.

This case is a perfect example of the struggle that legislatures, election officials, and courts are having with the issue of voter

fraud and voter identification. Most, if not all, recognize voter fraud as something that compromises the integrity of elections, but to what level are we willing to burden the legitimate voter to prevent this fraud from occurring?

Voter intimidation also has little valuable statistical information available. Again this is because “voter intimidation” is difficult to define and has rarely been prosecuted.

Many of the accusations of voter intimidation are brought against poll workers, most of whom are unaware of the possible intimidation taking place. For instance many of the accusations of intimidation by poll workers stem from poll workers making improper demands for identification, or poll workers questioning voters in what is a manner perceived as aggressive or intimidating. The solution to this problem is simple, proper poll worker training. Through proper training poll workers will know when and how ID or other verification documents are to be presented and the proper way to question voters at the polls. Also revisions to challenger laws can bring about more clarity about appropriate challenges and therefore less accusations of voter intimidation.

As more statistics are kept and the form and frequency of voter intimidation is better understood, states will be better prepared to prevent instances of voter intimidation and further improve the integrity of their elections. The EAC will continue work in this area so that we can hopefully see less rhetoric and more voter participation and trust in our elections.

Since I will be leaving the EAC in the not-too-distant future, I would like to take a few minutes to discuss the immense accomplishments of the EAC since I became a commissioner in December of 2003:

First, we distributed the 3 billion dollars that Congress appropriated to the states to improve their voting equipment and processes. This was truly an historic event in the field of American election administration.

Also, the EAC delivered the HAVA-mandated voluntary voting system guidelines (VVSG) within proscribed the 9-month deadline. As we develop future versions of the guidelines, we will be looking into the use of new technology and devices, as well as new software that is being created for current voting systems. Next Monday we will publish in the Federal Register the draft of our new Voting System Certification Program that we expect to finalize in December. I think you will find that this program will be a lot more rigorous and transparent than anything we have ever seen before. I encourage you to review it and give us your comments.

During the past 33 months we have issued guidance to states on statewide databases, accessibility requirements and how to use HAVA funds. And our new Inspector General and his staff are working vigorously to audit and account for the funds we distributed. On a daily basis we answer questions and offer guidance for election officials throughout the USA and indeed from all over the world.

In order to further support local election officials in this crucial election year we have released quick start guides on new voting systems, voting system security and testing, and poll worker recruitment and training. These guides provide a snapshot of processes and procedures for local election administrators to use when implementing new voting systems and security and testing older ones. It includes tips on receiving and testing equipment, poll worker training, security issues, and Election Day operations. In 2007, as part of our Clearinghouse responsibilities, we plan to distribute more comprehensive and detailed guides on these same important subjects.

In addition to the research projects that we have begun regarding election fraud and intimidation, we have several other research and data collection projects underway that will provide election officials and the public with valuable data to be used to improve the integrity of our elections. Already underway are studies on a number of topics including effective designs for ballots, polling places and websites; best practices for poll worker training, recruitment and retention, a study on vote count and recount procedures and the 2006 Election Day survey.

The HAVA College Poll Worker Program has awarded a total of almost \$1 Million in grants to help recruit a new generation of poll workers. Research is underway to find the best methods to recruit train and retain college poll workers.

We are also working hard to make sure the public is kept up to date on the future of elections and how it will affect the voting process. During tenure as Chairman we have held six public

meetings throughout the country. The topics that we have covered in these meetings include: How voting systems are certified, The National Voter Registration Act, Vote Count and Recount Procedures, Poll Workers, Effective management guidelines for voting systems, effective ballot and polling place designs, better ways to serve military and other overseas voters, voter information websites, and the EAC voting system certification program. As you can see, with a staff of just 23 people--and that number includes the Commissioners--we have accomplished a great deal in our short period of existence.

Twenty one years ago, I was probably the only one in this room who was heavily engaged as a professional election administrator. I have seen a lot of change since that time and no more so than in the past 5 years. Since the passage of HAVA, the nation has experienced significant changes in the electoral process. New voting systems have been purchased, replacing the antiquated systems that had been in place for decades. New statewide databases are in place. No one should be turned away at the polls anymore as provisional voting is the law of the land. Disabled voters, elderly voters and voter with language barriers have new tools that make it easier for them to cast their ballot.

Is America better off for all this change? You bet we are. Is the system perfect and free from errors, flaws, fraud and intimidation? Certainly not.

On November 7<sup>th</sup>, can voters have full trust and confidence in the election results that come out of all of these new devices, laws and procedures? In my view, they certainly can.

It's been an honor for me to have served at this historic time on this small but remarkable federal agency that touches the lives of every American. During my time on the commission, I have come to know many of you and of your deep conviction to help American improve and strengthen our system of democracy. And I want to thank you for your work and for the strong support you have given me and the commission since our start a mere 3 years ago.

You may know that during the 10 years preceding my appointment to the EAC, I worked as hard as I could to improve the election process in many emerging democracies throughout the globe. Whether it was in Congo or Cambodia, Russia or Romania, Slovakia or Sierra Leone, those 10 years were truly a wonderful opportunity that allowed me to touch the hearts and minds of many peoples, and experience firsthand the many similarities and few differences we actually have among each other in this world. I will be forever grateful to President George W. Bush for giving me the opportunity to do and experience the exact same thing in the United States of America while on the EAC. Thank you.

Detecting Attempted Election Theft: Vote Counts, Voting  
Machines and Benford's Law \*

Walter R. Mebane, Jr.<sup>†</sup>

April 19, 2006

\*Prepared for presentation at the 2006 Annual Meeting of the Midwest Political Science Association, Chicago, IL, April 20–23. Thanks to Daniel Dauplaise for sparking my interest in Benford's Law, and to Charlie Gibbons for several helpful suggestions.

<sup>†</sup>Professor, Department of Government, Cornell University, 217 White Hall, Ithaca, NY 14853–7901 (Phone: 607-255-2868; Fax: 607-255-4530; E-mail: wrm1@cornell.edu).

Fraudulent elections and disputes about election outcomes are nothing new. Gumbel (2005) reviews the sorry history of deceit and electoral manipulation in America, going back to the dawn of the republic. Throughout the world, in old and new democracies alike, allegations of vote fraud frequently occur (Lehoucq 2003). One new element is voting technologies that make some familiar methods for physically verifying the accuracy of vote totals impossible to use. The advent of electronic voting machines means that often now there are no paper ballots to be recounted. To steal an election it is no longer necessary to toss boxes of ballots in the river, stuff the boxes with thousands of phony ballots, or hire vagrants to cast repeated illicit votes. All that may be needed nowadays is access to an input port and a few lines of computer code. To detect such manipulations is a difficult and urgent problem. In terms of legitimacy it is not clear whether the worse problem is that erroneous election outcomes may occur or that many may not believe that correct outcomes are valid.

This paper introduces statistical methods intended to help detect election fraud. Other methods, using regression-based techniques for outlier detection, have previously been proposed to help detect election anomalies (e.g. Wand, Shotts, Sekhon, Mebane, Herron, and Brady 2001; Mebane, Sekhon, and Wand 2001). The methods described here are distinctive in that they do not require that we have covariates to which we may reasonably assume the votes are related across political jurisdictions. For one set of methods I describe—methods based on tests of the distribution of the digits in reported vote counts—all that is needed are the vote counts themselves. I study the application of those methods to both precinct-level and voting machine-level vote tabulations. Part of the potential practical relevance of these methods is that situations in which little more than the vote counts are available may arise frequently in connection with actual election controversies.

The other set of methods I describe, which are based on testing whether votes are randomly assigned to the voting machines used for a voting precinct, require candidate vote totals disaggregated to the level of individual voting machines. More than that, these methods also require that a fair amount is known about how the voting machines were used. For instance, for voting machines used during early voting periods,<sup>1</sup> we need to know on which days particular

---

<sup>1</sup>See Gronke, Bishin, Stevens, and Galanes-Rosenbaum (2005) for a discussion of early voting in Florida during the 2004 election.

machines were used, and at which early voting site. In fact it may be useful to know the exact time at which each vote was cast and on which machine. Such details are routinely available when some kinds of electronic voting machines are used, except that it may not be possible to tell when a particular vote was cast: transaction event logs maintained for each machine indicate when a vote was cast, but to help protect the secret ballot it is not possible to match an individual vote record (an individual ballot image) with a particular transaction.

Both methods depend in different ways on ideas about voter behavior. The methods that check whether votes are randomly assigned to machines assume that voters' choices between candidates do not depend on the particular voting machine they use. If a set of machines are all used in the same precinct during the same period of time, and yet the distribution of vote choices varies significantly across machines, then the idea is to attribute the variation to some kind of manipulation. Perhaps voters with different preferences were somehow directed to use different machines. Or perhaps some of the machines were hacked.

The methods that check the distribution of the digits in reported vote counts depend on ideas about voter choice behavior that differ substantially from the models usually used in research on political behavior. The digit-test methods are based on the expectation that the second digits of vote counts should satisfy Benford's Law (Hill 1995). Benford's Law specifies that the ten possible second digits should not occur with equal frequency. A fundamental question is why we should expect Benford's Law to apply to vote count data. Even though some have proposed to use the second-digit Benford's Law distribution to test for fraudulent votes (e.g., Pericchi and Torres 2004), prominent election monitors have strongly disputed such proposals (Carter Center 2005). I suggest that a behavioral focus on the individualized uncertainty in each person's vote choice may be inappropriate when thinking about vote counts for the purpose of trying to decide whether the counts are fraudulent. Indeed, leaving aside questions of vote fraud, to the extent that the familiar kinds of behavioral models cannot in general produce vote counts with second digits that follow the Benford's Law distribution—and, in general, they cannot—the fact that vote counts do often satisfy Benford's Law is strong evidence that the familiar behavioral models do not describe the votes people actually cast.

Even if Benford's Law typically describes vote count data, it does not follow that deviations from Benford's Law indicate election fraud. I present the results of some simulation exercises that

begin exploring what if any kinds of vote fraud a test based on the second-digit Benford's Law distribution can detect. In the limited range of simulations I have conducted so far, I find that the Benford's Law test is sensitive to some kinds of manipulation of vote counts but not to others. The test seems sensitive enough to warrant further exploration of its properties. I think it has an excellent chance of developing into a standard tool for forensically auditing elections.

I apply both the vote randomization test and the Benford's Law test to data from three Florida counties in the 2004 general election. The available data include ballot image and voting machine event log files for electronic early voting and electronic polling place votes in Broward, Miami-Dade and Pasco counties, including labels identifying the precinct and voting machine for each ballot.<sup>2</sup>

## A Randomization Test for Voting Machines

The first test addresses whether the distribution of the votes is the same on all of each precinct's voting machines. The idea is to assess whether the votes cast in each precinct were randomly and independently assigned to each machine used in the precinct. A manipulation of the vote that affected some machines but not others would probably cause the distribution of the votes among candidates to differ on the affected machines. Testing that the split of the votes is the same on all the machines used in a precinct is one way to check for such selective manipulation. Voter preferences vary substantially from precinct to precinct, but if a collection of machines is used to count the votes in a precinct, with all of the machines being used throughout the same period of time, and if each voter has the same probability of being assigned to each machine, then the split of the votes should be roughly the same on all of the precinct's machines.

To define the test, let  $\pi_{ijk}$  denote the probability that voter  $i$  in precinct  $j$  is assigned to vote using machine  $k$ , and let  $\rho_{ijkl}$  denote the probability that voter  $i$  in precinct  $j$  using machine  $k$  chooses candidate  $l$ . The number of voters in precinct  $j$  is  $n_j$ , the number of machines is  $m_j$ , and

---

<sup>2</sup>The ballot image and event log file data were supplied by David Dill. Additional data regarding characteristics of the machines used in Miami-Dade were supplied by Martha Mahoney. For more information about data sources see the Data Note.

$\sum_{k=1}^{m_j} \pi_{ijk} = 1$ . The number of votes expected for candidate  $l$  in precinct  $j$  on machine  $k$  is

$$V_{jkl} = \sum_{i=1}^{n_j} \pi_{ijk} \rho_{ijkl},$$

and the expected vote share for candidate  $l$  in precinct  $j$  on machine  $k$  is

$$R_{jkl} = \left( \sum_{i=1}^{n_j} \pi_{ijk} \right)^{-1} V_{jkl}.$$

If the probability of being assigned to a machine is the same for each voter in precinct  $j$ , then  $\pi_{ijk} = \pi_{jk}$ . If neither the choice the voter makes nor the choice that is recorded depends on either the machine or on how other voters are assigned to machines, then  $\rho_{ijkl} = \rho_{ijl}$ . If both of these conditions hold, the number of votes expected for candidate  $l$  in precinct  $j$  on machine  $k$  is

$$\tilde{V}_{jkl} = \pi_{jk} \sum_{i=1}^{n_j} \rho_{ijl},$$

and the expected machine vote share is

$$\tilde{R}_{jkl} = \frac{\tilde{V}_{jkl}}{n_j \pi_{jk}} = n_j^{-1} \sum_{i=1}^{n_j} \rho_{ijl}.$$

In this case the vote share expected for candidate  $l$  is the same for all the machines in precinct  $j$ .

**Remark 1** For candidate  $l$  in precinct  $j$ , for all voters  $i = 1, \dots, n_j$  and all machines  $k = 1, \dots, m_j$ , suppose that (a) the probability of being assigned to a machine is the same for each voter ( $\pi_{ijk} = \pi_{jk}$ ) and (b) the vote choice does not depend on the machine or on how other voters are assigned to machines ( $\rho_{ijkl} = \rho_{ijl}$ ). Then the same vote share is expected for candidate  $l$  on every machine used to count votes in the precinct, i.e.,

$$\text{for all } k, k' = 1, \dots, m_j, \quad \tilde{R}_{jkl} = \tilde{R}_{jk'l} = n_j^{-1} \sum_{i=1}^{n_j} \rho_{ijl}. \quad (1)$$

If condition (1) holds, then the proportion of votes cast for candidate  $l$  on one machine in a precinct should not be systematically different from the proportion of votes cast for  $l$  on the other machines in the precinct. The proportion for  $l$  on the other machines should tend to be a good

predictor for the proportion observed on machine  $k$ . When computing these predictor proportions I add small constants to both the numerator and denominator counts in cases where candidate  $l$  receives no votes on some set of  $m_j - 1$  machines in a precinct, and I add small constants to the denominator counts in cases where candidate  $l$  receives all the votes on some set of  $m_j - 1$  machines. These adjustments avoid making excessively sharp predictions. Formally, let  $n_{jk}$  denote the number of votes observed in precinct  $j$  on each machine  $k$ , with  $n_{jkl}$  denoting the number of votes on that machine for candidate  $l$ . Let  $\delta_{kk'} = 1$  if  $k = k'$ , otherwise  $\delta_{kk'} = 0$ . Assuming  $m_j > 1$ , , define adjustment indicators  $z_{jl}$  and  $a_{jl}$ :

$$z_{jl} = \begin{cases} 1, & \text{if, for any } k = 1 \dots m_j, \sum_{k'=1}^{m_j} (1 - \delta_{kk'}) n_{jk'l} = 0 \\ 0, & \text{otherwise,} \end{cases}$$

$$a_{jl} = \begin{cases} 1, & \text{if, for any } k = 1 \dots m_j, \sum_{k'=1}^{m_j} (1 - \delta_{kk'}) n_{jk'l} = \sum_{k'=1}^{m_j} (1 - \delta_{kk'}) n_{jk'} \\ 0, & \text{otherwise.} \end{cases}$$

Assuming  $m_j > 1$ , the proportion of votes for  $l$  predicted for machine  $k$ , using the votes for  $l$  on the machines other than  $k$  in precinct  $j$ , is

$$\check{p}_{jkl} = \frac{\sum_{k'=1}^{m_j} (1 - \delta_{kk'}) (n_{jk'l} + z_{jl}/2)}{\sum_{k'=1}^{m_j} (1 - \delta_{kk'}) (n_{jk'} + z_{jl}/2 + a_{jl}/2)}, \quad (2)$$

The adjustment indicators cause the constant  $1/2$  to be added to all the counts for machines in a precinct if any machine in the precinct would otherwise be facing a predicted proportion of zero or one based on the votes recorded on the other machines in the precinct.

I use the Pearson chi-squared statistic to implement a randomization test of whether (1) holds for each precinct. For precinct  $j$  the test statistic is

$$X_{jl}^2 = \sum_{k=1}^{m_j} \frac{(n_{jkl} - n_{jk}\check{p}_{jkl})^2}{n_{jk}\check{p}_{jkl}}.$$

Remark 1's assumptions (a) and (b) imply that every distribution of the observed votes among each precinct's  $m_j$  machines is equally likely, subject to the constraint that the number of votes on each machine remains constant throughout the permutations of the votes. Hence we may test

for (1) by checking whether the value of  $X_{jl}^2$  obtained using the observed data is large compared to the values obtained over all possible permutations of the observed votes. We fix the machine totals  $n_{jk}$  and the total number of votes for candidate  $l$  across all of the machines but shuffle the votes among the machines to obtain new sets of counts, say  $n_{jkl}^*$ . The constraint that the total number of votes for candidate  $l$  across all of the machines is fixed means that

$\sum_{k=1}^{m_j} n_{jkl}^* = \sum_{k=1}^{m_j} n_{jkl}$ . For each set of shuffled votes we compute the chi-squared statistic,

$$X_{jl}^{2*} = \sum_{k=1}^{m_j} \frac{(n_{jkl}^* - n_{jk}\tilde{p}_{jkl}^*)^2}{n_{jk}\tilde{p}_{jkl}^*},$$

where  $\tilde{p}_{jkl}^*$  denotes the predicted proportion (2) computed using the shuffled data. Because the number of permutations of the votes is large even for moderate numbers of votes and machines, I use a Monte Carlo approach that involves randomly sampling permutations in order to approximate the probabilities of observing values of  $X_{jl}^{2*}$  as large as  $X_{jl}^2$  or larger given the hypothesis that Remark 1's assumptions (a) and (b) hold. That is, assuming that (a) and (b) of Remark 1 hold, I estimate

$$g_{jl} = \text{Prob} \left( X_{jl}^{2*} \geq X_{jl}^2 \mid m_j, \{n_{jk} : k = 1, \dots, m_j\}, \sum_{k=1}^{m_j} n_{jkl} \right).$$

Let  $\hat{g}_{jl}$  denote the Monte Carlo estimate of  $g_{jl}$ .

To combine the test results from the many precincts there are to assess from each county, I use the false discovery rate (FDR) (Benjamini and Hochberg 1995; Benjamini and Yekutieli 2005). The randomization method treats each precinct independently, so it is appropriate to use the form of the FDR that assumes independence. Benjamini and Hochberg (1995) define this FDR as follows. For candidate  $l$ , sort the values  $\hat{g}_{jl}$  from all  $J$  precincts from smallest to largest. Let  $\hat{g}_{(j)l}$  denote these ordered values, with  $\hat{g}_{(1)l}$  being the smallest. For a chosen test level  $\alpha$  (e.g.,  $\alpha = .05$ ), let  $d$  be the smallest value such that  $\hat{g}_{(d+1)l} > (d+1)\alpha/J$ . This number  $d$  is the number of tests *rejected* by the FDR criterion. If Remark 1's assumptions (a) and (b) hold for all machines in all precincts, then we should find  $d = 0$ .

A limitation of this method is that in precincts where all or all but one of the machines have very small counts  $n_{jkl}$  or  $n_{jk} - n_{jkl}$ , the number of distinct possible values of  $X_{jl}^2$  may be too

small for the test based on the smallest observed tail probability to have any power. For instance, if  $\alpha = .05$  and  $J = 757$  (roughly the number of precincts in Miami-Dade County), then  $\alpha/J \approx .000066$ . A tail probability that small cannot occur in a precinct having three machines with  $n_{jk}$  values (1, 3, 1) and  $n_{jkl}$  values (1, 0, 0), as occurs in the ballot image data with the votes for president in one Miami-Dade election-day precinct. To mitigate this problem, I include in the analysis only precincts for which there are at least two machines  $k$  for which for candidate  $l$  we have both  $\sum_{k'=1}^{m_j} (1 - \delta_{kk'}) n_{jk'l} > 1$  and  $\sum_{k'=1}^{m_j} (1 - \delta_{kk'}) (n_{jk'l} - n_{jk'l}) > 1$ .<sup>3</sup>

## Data

I apply the randomization test to voting data from the 2004 general election in three Florida counties: Broward, Miami-Dade and Pasco (see the Data Note for details on sources and contents of the data). Table 1 shows the number of precincts in each county. On election day, some machines were used to record votes from more than one precinct. This occurred in cases where more than one precinct shared a polling place. Most voting occurred on election day, November 2, 2004, but the data also include votes cast during the 15-day early voting period (October 18 through November 1, 2004). Table 1 also shows the number of early voting sites used in each county (earlyvoting.org 2004; Miami-Dade County 2004; Browning 2004). In Broward and Pasco counties, voters from all precincts could vote at any early voting site. In Miami-Dade county, voters from each precinct could vote only at selected early voting locations. At early voting sites each voting machine was used for voters from multiple precincts. The voting data for the early voting period do not directly indicate the voter's precinct but instead indicate which of several ballot styles the voter used. Table 1 shows the number of styles used during early voting for each county.

\*\*\* Table 1 about here \*\*\*

The randomization test is meaningful for precinct  $j$  only if at least in principle every voter is equally likely to use each of the machines. The realities of voting in the Florida counties present some challenges to this requirement.

The most obvious challenges concern early voting. For much the same reason that we separate

---

<sup>3</sup>Probably it would be better to include only precincts where there are at least  $1/\alpha$  possible permutations of the votes for candidate  $l$ , subject to holding constant the machine totals  $(n_{j1}, \dots, n_{jm_j})$ .

the election day votes cast in different precincts from one another, we would also like to avoid grouping together votes cast at different early voting sites. Voters using different sites probably live in different places and are likely to have significantly different preferences. Moreover, in Miami-Dade, not every ballot style was available on every voting machine at each early voting site, so not every voter could use every machine. Unfortunately, neither the ballot nor the event log files contained any indication of the physical location where each voting machine was used. I used Personal Electronic Ballot (PEB)<sup>4</sup> codes recorded in the event log files to group machines together, the idea being that machines for which the same PEB was used must have been located at the same early voting site.<sup>5</sup>

Another concern with early voting is that not every voting machine was used every day during the early voting period. I used the event log files to identify the dates during the early voting period when each voting machine was used. I grouped machines together only if they were used on all the same days. The “site-days” entries in Table 1 show the number of unique combinations of the PEB-based location groupings with these date groupings in Broward and Pasco counties, and the “style-site-days” entry shows the number of unique combinations of the PEB-based location and ballot style groupings with the date groupings in Miami-Dade County. These serve as the “precincts”  $j$  for the early voting randomization tests. The “site-day-machines” and “s-s-d-machines” entries show the number of unique combinations of the site-days or style-site-days groupings with voting machines. These are the “machines”  $k$  for the early voting randomization tests.

Much as machines being used on different days is a concern during the early voting period, there is also a potential problem due to machines being used at different times during each day. Figure 1 illustrates several patterns of potential concern. The plots in the figure show the times at which votes were cast on each voting machine on election day in four Miami-Dade precincts. Each row of letters in each plot indicates the time at which a “vote cast” transaction occurs for a voting machine in the event log files, with a letter being plotted at each point when a vote was recorded. There is one row of letters for each voting machine used in each precinct. Times are shown using

---

<sup>4</sup>For a description of how PEBs are used in Election Systems & Software “iVotronic” voting machines, see (Electronic Frontier Foundation 2004).

<sup>5</sup>For Miami-Dade County it was possible to supplement the PEB information with copies of files that showed the location of all but 88 of the machines used during early voting. See the Data Note for details.

a 24-hour clock and resolved to the second. In precinct 109, most of the machines were used throughout the day, but the machine labeled “e” was not used after 10am. A reasonable guess is that the machine was pulled from service at that time. In precinct 233, the machine labeled “c” was not used after 8am, and the machine labeled “f” was not used before 2pm. In precinct 322, the machine labeled “b” was used only between 11:30am and 2:30pm. In precinct 326, the machines labeled “g” and “m” were used only after 1pm. If some machines were not available for use during substantial parts of the day, then Remark 1’s assumption (a) is not satisfied.

Questions about this assumption also arise for other machines that exhibit irregular usage. For instance, in precinct 109 the machine labeled “k” was used much less often in the afternoon than in the morning, and in precinct 326 the machine labeled “p” was used heavily only after 6pm.

\*\*\* Figure 1 about here \*\*\*

Instead of trying to exclude machines for which usage during the day seems not to match the pattern of the other machines in a precinct, I construct a measure of how similar the patterns of time usage are for a precinct’s machines and examine whether the measure is related to the tail probability estimates  $\hat{g}_{jl}$ . Let  $t_{jki}$  denote the time (in seconds) at which vote  $i$  was cast on machine  $k$  in precinct  $j$ . For each machine  $k$  in precinct  $j$ , I compute

$$\tau_{jk} = \frac{1 + (n_j - n_{jk})^{-2} \sum_{k'=1}^{m_j} (1 - \delta_{kk'}) \sum_{i=1}^{n_{jk}} \sum_{i'=1}^{n_{jk'}} (1 - \delta_{kk'}) |t_{jki} - t_{jk'i'}|}{1 + (n_{jk})^{-2} \sum_{i=1}^{n_{jk}} \sum_{h=1}^{n_{jk}} |t_{jki} - t_{jkh}|}$$

The denominator measures the mean absolute difference among the times at which votes were cast on machine  $k$ , and the numerator measures the mean absolute difference between the times at which votes were cast on machine  $k$  and the times at which votes were cast on every other machine  $k'$  in precinct  $j$ . The ratio  $\tau_{jk}$  achieves the lower bound of 1.0 if the mean absolute difference among the voting times on machine  $k$  is the same as the mean absolute difference between the voting times on  $k$  and the voting times on the other machines. The ratio increases as the voting times on machine  $k$  tend to differ on average more from the times on the other machines than they differ from one another. To compute a summary measure for each precinct  $j$ , I compute the geometric mean of the ratios  $\tau_{jk}$ , namely,

$$\tau_j = \left( \prod_{k=1}^{m_j} \tau_{jk} \right)^{1/m_j}$$

For the four precincts shown in Figure 1,  $\tau_j$  has the values  $\tau_{109} = 1.06$ ,  $\tau_{233} = 1.09$ ,  $\tau_{322} = 1.02$  and  $\tau_{326} = 1.05$ . The largest values for a machine in each of those precincts is  $\max_k(\tau_{109k}) = 4.2$ ,  $\max_k(\tau_{233k}) = 33.8$ ,  $\max_k(\tau_{322k}) = 3.5$  and  $\max_k(\tau_{326k}) = 1.8$ .

We might expect  $\hat{g}_{jl}$  to decrease as the dissimilarity between machines—measured by either  $\tau_j$  or  $\max_k(\tau_{jk})$ —increases. A weakness of this approach is that because it not possible to tell which ballot image corresponds to which event log entry, it is not possible to customize the vote-time dissimilarity measure for each candidate. Over all the votes cast, however, we can be reasonably sure that the times recorded in the event log files do correspond to the votes recorded in the ballot image files. Table 2 shows that for the most part the total counts of voting events and of ballot images are the same for each voting machine.

\*\*\* Table 2 about here \*\*\*

## Randomization Test Results

I examine the votes cast for the Republican and Democratic candidates for president (George W. Bush and John F. Kerry) and for U.S. Senator (Mel Martinez and Betty Castor). I also examine the votes Yes or No for eight state constitutional amendments that appeared on the ballot in Florida in 2004. These amendments are described in Table 3. In all cases I consider the shares for each candidate or for each amendment voting option out of all ballots cast, including in the denominator ballots for which no vote choice was indicated for the referent office or amendment. I analyze the early voting data separately from the election day data.

\*\*\* Table 3 about here \*\*\*

Figure 2 shows a typical pattern for the distribution of the estimates  $\hat{g}_{jl}$ . The values depicted are for election day precincts in Miami-Dade County. Most of the values are much larger than the test level  $\alpha = .05$ .

\*\*\* Figure 2 about here \*\*\*

There is no tendency for  $\hat{g}_{jl}$  to decrease as the dissimilarity in vote times between the machines in a precinct increases. The  $\hat{g}_{jl}$  values are not significantly correlated across precincts with either  $\tau_j$  or  $\max_k(\tau_{jk})$ . Indeed, for the Miami-Dade County election day data only seven of the twenty product moment correlations with each dissimilarity measure are negative, and the most negative

value found is  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk})) = -0.06$ , for the Amendment 3 No votes.<sup>6</sup> Similar results are found for the correlations between  $\log(\hat{g}_{jl})$  and  $\log(\tau_j)$  and between  $\log(\hat{g}_{jl})$  and  $\log(\log(\tau_j))$ .

The FDR test results reported in Tables 4, 5 and 6 do not provide much support for the idea that the votes cast in each precinct were randomly and independently assigned to each machine used in the precinct. For all three counties, in both the election day and the early voting data, there are many rejections of the hypothesis that (1) holds. There are somewhat more rejections among the election day vote counts. Pasco County early voting has the fewest rejections, with one rejection each for the Amendment 5 Yes votes and for the Amendment 7 No votes. For early voting in Broward County there are four rejections, for four of the amendment options. Notwithstanding the attempt to compare only similar machine counts to one another in the Miami-Dade County early voting data, by separating votes that occur at different sites, on different days and using different ballot styles, there are rejections in those data for nine of the twenty candidate and amendment options. The election day results show rejections for ten of the twenty options in Miami-Dade, thirteen of the twenty options in Broward and five of the twenty options in Pasco County.

\*\*\* Tables 4, 5 and 6 about here \*\*\*

On balance it seems unlikely that voting time dissimilarities between the machines in each precinct can explain the pattern of rejections for the election day votes. We have already reviewed the pattern of insignificant  $\text{cor}(\hat{g}_{jl}, \tau_j)$  and  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk}))$  values for the Miami-Dade election day data. For the Broward County data, only five of the  $\text{cor}(\hat{g}_{jl}, \tau_j)$  values and only six of the  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk}))$  values are negative, and all of those correlations are very small. The largest in magnitude is  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk})) = -0.04$  for the Amendment 6 No vote. For the Pasco county data, six  $\text{cor}(\hat{g}_{jl}, \tau_j)$  values and nine  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk}))$  values are negative, but these correlations are again small. The largest in magnitude does occur for one of the FDR rejections, namely the Amendment 7 No votes, for which  $\text{cor}(\hat{g}_{jl}, \tau_j) = -0.11$ . But  $\text{cor}(\hat{g}_{jl}, \tau_j) = -0.10$  for the Amendment 7 Yes votes, and for those votes there are no FDR rejections. For the votes for Bush and Kerry, which each show more than one FDR rejection,  $\text{cor}(\hat{g}_{jl}, \tau_j) > 0$ . For these latter two votes the  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk}))$  values are negative but small, respectively  $-0.03$  and  $-0.02$ . There is no significant relationship between the correlations  $\text{cor}(\hat{g}_{jl}, \tau_j)$  or  $\text{cor}(\hat{g}_{jl}, \max_k(\tau_{jk}))$  and the

---

<sup>6</sup>The largest positive correlation in the Miami-Dade data is 0.11 for  $\tau_j$ , for the Amendment 5 No votes.

number of FDR rejections for a particular candidate or amendment option.<sup>7</sup>

## Using Benford's Law to Test for Fraudulent Votes

One method that has been suggested for testing whether reported vote totals are fraudulent is to compare the digits occurring in the vote counts to the distribution of digits expected under Benford's Law. Benford's Law specifies that the different digits should not occur with equal frequency. That is, each of the nine possible first significant digits (1, 2, . . . , 9) should not each occur one-ninth of the time, each of the ten possible second significant digits (0, 1, . . . , 9) should not each occur one-tenth of the time, and so forth. Instead, according to Benford's Law the first and second significant digits should occur with the frequencies shown in Table 7. Tests against Benford's Law have been promoted for use to detect fraud in forensic financial accounting (Durtschi, Hillison, and Pacini 2004). In the realm of vote count data the relevance of Benford's Law has been controversial. Pericchi and Torres (2004) use tests of the second digits of vote counts against the Benford's Law distribution to raise the prospect of fraud in the Venezuelan recall referendum of August 15, 2004. This charge was specifically denied in the Carter Center report (Carter Center 2005, 132–133), based on technical analysis reported in Brady (2005) and Taylor (2005).

\*\*\* Table 7 about here \*\*\*

Why should Benford's Law apply to vote count data? A fundamental result is that Benford's Law does not in general hold for data that are simply random (Raimi 1976; Hill 1995). This property is one basis for its proposed use in financial fraud detection. If someone uses numbers taken directly from a table of random numbers to fill out faked financial records, the digits will occur with equal frequency. The positive case for using Benford's Law with financial data is not altogether perspicuous, however. Durtschi et al. (2004), for instance, rely on the supposedly complicated origins of financial data as the rationale for expecting Benford's Law to hold:

“Boyle (1994) shows that data sets follow Benford's Law when the elements result

---

<sup>7</sup>In the Broward County data, a Poisson regression of the number of FDR rejections on the values of  $\text{cor}(\log(\hat{g}_{jt}), \log(\max_k(\tau_{jk})))$  shows a marginally significant positive relationship: the coefficient estimate is 9.6 with a standard error of SE=5.8. But in the Miami-Dade County data the same kind of analysis shows a significant negative relationship between the same variables: the coefficient estimate is -18.1 (SE=4.9). In the Pasco County data the corresponding analysis produces a coefficient estimate of -1.9 (SE=6.0).

from random variables taken from divergent sources that have been multiplied, divided, or raised to integer powers. This helps explain why certain sets of accounting numbers often appear to closely follow a Benford distribution. Accounting numbers are often the result of a mathematical process. A simple example might be an account receivable which is a number of items sold (which comes from one distribution) multiplied by the price per item (coming from another distribution).” (Durtschi et al. 2004, 20–21)

The complexity rationale runs afoul of the way behavioral political scientists usually think about voting data. Students of voting behavior have developed a repertoire of models built on the idea that each individual’s vote choice is essentially a coin flip (i.e., a stochastic choice). For some elections the coin may have more sides than two, and for different people the probabilities of the various outcomes are different. But the overall vote counts are seen as merely the sum of all the different coin flip outcomes. Such a sum of random coin flips lacks the complexity needed to produce the Benford’s Law pattern in the vote counts’ digits. Taking voter turnout decisions into account does not essentially change the basic coin flip idea. In this case, to produce the coin flip probabilities the probability that each person votes is multiplied by the conditional probability that the person makes a particular choice among the candidates or ballot initiative options.

One can see this standard behavioral perspective at work in the analysis used to support the conclusions reached about the Venezuelan referendum by the Carter Center. This is most explicit in the analysis reported by Taylor (2005). Taylor writes, “we use the multinomial model (4) of a ‘fair election’ and find that its significant digit distribution is virtually identical to the observed distribution, which is different than Benford’s Law” (Taylor 2005, 22). Taylor also generates data using a Poisson model. As a general matter these two models are essentially the same—as Taylor (2005, 9) observes, the multinomial arises upon conditioning on the total of a set of Poissons. Neither has the complexity needed to produce digits that follow Benford’s Law.

The kind of complexity that can produce counts with digits that follow Benford’s Law refers to processes that are statistical mixtures (e.g., Janvresse and de la Rue (2004)), which means that random portions of the data come from different statistical distributions. There are some limits that apply to the extent of the mixing, however. If the number of distinct distributions is large, then the result is likely to be well approximated by some simple random process that does not

satisfy Benford's Law. So if we are to believe that in general Benford's Law should be expected to describe the digits in vote counts, we need to have a behaviorally realistic process that involves mixing among a small number of distributions.

Another issue concerns whether Benford's Law should be expected to apply to all the digits in reported vote counts. In particular, for precinct-level data there are good reasons to doubt that the first digits of vote counts will satisfy Benford's Law. Brady (2005) develops a version of this argument. The basic point is that often precincts are designed to include roughly the same number of voters. If a candidate has roughly the same level of support in all the precincts, which means the candidate's share of the votes is roughly the same in all the precincts, then the vote counts will have the same first digit in all of the precincts. Imagine a situation where all precincts contain about 1,000 voters, and a candidate has the support of roughly fifty percent of the voters in every precinct. Then most of the precinct vote totals for the candidate will begin with the digits '4' or '5.' This result will hold no matter how mixed the processes may be that get the candidate to roughly fifty percent support in each precinct. For Benford's Law to be satisfied for the first digits of vote counts clearly depends on the occurrence of brittle accidents in the distribution of precinct sizes and in the alignment of precinct sizes with each candidate's support. It is difficult to see how there might be some connection to generally occurring political processes. So we may turn to the second significant digits of the vote counts, for which at least there is no similar knock down contrary argument.

For an example that illustrates these ideas, consider Table 8. This table reports Pearson chi-squared statistics for two kinds of tests. First is whether the distributions of the first digits of the precinct vote counts for the major party candidates for president and for U.S. Senator and for the eight constitutional amendments on election day 2004 in Miami-Dade County match the distribution specified by Benford's Law. Second is whether the first digits occur equally often. For the Benford's Law test, let  $q_{B_1i}$  denote the expected relative frequency with which the first significant digit is  $i$ . These  $q_{B_1i}$  values are the values shown in the first line of Table 7. Let  $d_{1i}$  be the number of times the first digit is  $i$  among the  $J$  precincts being considered, and set

$d_1 = \sum_{i=1}^9 d_{1i}$ . The statistic for the first-digit Benford's Law test is

$$X_{B_1}^2 = \sum_{i=1}^9 \frac{(d_{1i} - d_1 q_{B_1 i})^2}{d_1 q_{B_1 i}}.$$

For the test that first digits occur equally frequently, the test statistic is

$$X_{U_1}^2 = \sum_{i=1}^9 \frac{(d_{1i} - d_1/9)^2}{d_1/9}.$$

Assuming independence across precincts, these statistics may be compared to the  $\chi^2$ -distribution with 8 degrees of freedom.<sup>8</sup> That distribution has a critical value of 15.5 for a .05-level test. Since all of the statistics reported in Table 8 greatly exceed that value, the hypothesis that the first significant digits follow Benford's Law may be handily rejected, as may be the hypothesis that the nine values (1–9) occur equally often.

\*\*\* Table 8 about here \*\*\*

In contrast, consider Table 9, which reports Pearson chi-squared statistics for tests of the distribution of the vote counts' second significant digits. For  $q_{B_2 i}$  denoting the expected relative frequency with which the second significant digit is  $i$  (given by the second line in Table 7), and with  $d_{2i}$  being the number of times the second digit is  $i$  among the  $J$  precincts being considered and  $d_2 = \sum_{i=0}^9 d_{2i}$ , the statistic for the second-digit Benford's Law test is

$$X_{B_2}^2 = \sum_{i=0}^9 \frac{(d_{2i} - d_2 q_{B_2 i})^2}{d_2 q_{B_2 i}}.$$

For the test that second digits occur equally frequently, the test statistic is

$$X_{U_2}^2 = \sum_{i=0}^9 \frac{(d_{2i} - d_2/10)^2}{d_2/10}.$$

These statistics may be compared to the  $\chi^2$ -distribution with 9 degrees of freedom, which has a critical value of 16.9 for a .05-level test. The results, reported in the first two columns of Table 9, give little reason to doubt that Benford's Law applies. Two of the twenty statistics are larger

---

<sup>8</sup>The consequences of dependence are unclear. It may develop that calibration is necessary to establish the correct distribution, especially when the number of precincts is not large. Similar comments apply to the  $X_{B_2}^2$  and  $X_{U_2}^2$  statistics introduced for second digits below.

than the critical value for a .05-level test. But if we consider the twenty tests to be independent, then with a single-test level of  $\alpha = .05$ , using the FDR gives no reason to be concerned unless we obtain a statistic larger than 25.46 (with a single-test level of .10, using the FDR establishes a 23.59 as the value beyond which we should be concerned).<sup>9</sup> The largest  $X_{B_2}^2$  value in the first column of Table 9 is 17.9. The results give reason to reject the assumption that the second digits are equally likely to take any of the ten possible values. The largest  $X_{U_2}^2$  value in the second column of Table 9 is 25.3.

\*\*\* Table 9 about here \*\*\*

The remaining columns of Table 9 show that what works for precincts need not work for voting machines. The middle columns report the results of applying the tests to the vote counts on the individual voting machines used on election day in Miami-Dade County. Acknowledging that some voting machines in Miami-Dade recorded votes from more than one precinct on election day, the last two columns show results from applying the tests to vote counts for each unique precinct-machine combination. Both forms of the analysis firmly reject the idea that Benford's Law describes the distribution of the second significant digits of the vote counts on election day voting machines in Miami-Dade County.

## Generating Vote Counts that Satisfy Benford's Law

Is there a family of processes that are behaviorally plausible from a political point of view and that are capable of producing precinct-level vote counts that satisfy Benford's Law for the second significant digits but not for the first significant digits? Can we explain why such a process would produce precinct counts that satisfy the second-digit Benford's Law but not machine counts that do so?

The second question has an answer that does not depend on the details of how the precinct counts may be generated, so let's consider it first. The point is to remember that a random process that is not a mixture does not in general produce digits that satisfy Benford's Law. Using that fact, we can explain the non-Benford machine counts in cases where votes are randomly assigned to the voting machines being used in each precinct. If the probability that each vote cast

---

<sup>9</sup>For 20 independent tests and single-test level  $\alpha = .05$ , the FDR gives  $0.0025 = .05/20$  as the first tail probability to be concerned about, which for the  $\chi^2$ -distribution with 9 degrees of freedom corresponds to a critical value of 25.46. The value of 23.59 is obtained analogously.

in precinct  $j$  is assigned to machine  $k$  is  $\pi_{jk}$ , then conditioning on the total number of votes cast in each precinct, the distribution of votes among the machines in precinct  $j$  is multinomial with outcomes proportional to  $\pi_j = (\pi_{j1}, \dots, \pi_{jn_j})$ . If the probability vectors  $\pi_j$  or the total number of votes cast vary across precincts, these multinomial distributions may vary considerably from precinct to precinct, but having a collection of vectors of counts each generated by a different multinomial distribution does not in general give counts that satisfy Benford's Law.

So what can produce precinct-level vote counts that satisfy the second-digit Benford's Law? For a behaviorally realistic process that involves mixing among a small number of distributions, we can think about political parties, or more generally about the coalitions that come together at election time. Usually each candidate (or each side) has a collection of core supporters. These core supporters are virtually certain to vote for their side. Viewed as coins, we might say these core supporters always come up "heads." Note that this virtual certainty of support for one candidate need not imply any loyalty to the candidate that lasts longer than election day. But at the time the candidate votes, it is there. Any voter who is not such a core supporter for any side may possibly vote for any of the available alternatives.<sup>10</sup> Using the mean probability that such available voters vote for each candidate, we obtain a model where the total vote for a candidate in each precinct is a mixture of two distributions: the distribution of core supporters and the distribution of available voters.

The following **R** (R Development Core Team 2003) function generates vote counts for one candidate across a set of simulated precincts from such a model.

```
pbenf <- function(size, nprecincts=500, lsplit=.1, hsplit=.1, bfrac=1/2) {
  z <- sapply(1:nprecincts,
    function(x){
      p2 <- c(runif(1,0,lsplit),runif(1,(1-hsplit),1));
      pf <- c(rbeta(1,1,bfrac),rbeta(1,bfrac,1));
      partypm <- rpois(2,size*pf/sum(pf));
      sum(votes <- rpois(length(partypm), lambda=partypm*p2))
    })
}
```

For each of the `nprecincts` simulated precincts the vector `p2` contains two numbers. The first

---

<sup>10</sup>I think it may be better to distinguish between those voters who have firmly made up their minds for whom they will vote when they arrive at the polls and those who have not. This would give a distinction between, say, "committed" and "undecided" voters. In future drafts of this paper I will likely shift to something like that usage.

number, drawn uniformly from the interval  $[0, \text{lsplit}]$ , represents the probability that available voters vote for the candidate. The second number, drawn uniformly from the interval  $[1 - \text{hsplit}, 1]$ , represents the probability that the candidate's core voters vote for the candidate. The vector `pf` represents the proportion of the voters in each precinct who are expected to be of each type. With the default argument value `bfrac = 1/2`, the first, Beta-distributed value in `pf` has a mean of  $2/3$  and the second value has a mean of  $1/3$ . The vector `partypm` contains the Poisson-distributed expected number of voters of each type. The vector `votes` contains the vote counts for the candidate from each type of voters in each precinct. These are summed to give the overall number of votes for the candidate in each precinct.<sup>11</sup>

Tables 10 and 11 show the results of a Monte Carlo simulation exercise using function `pbenf` to generate precinct vote counts for various choices of the function's arguments. The parameter denoted Size in the table refers to the `size` argument, which is the expected number of voters in each precinct. All the precincts generated by one invocation of `pbenf` have the same expected number of voters, although the actual number, which is Poisson distributed, varies over precincts. The parameter denoted Split in the table refers to the `lsplit` argument (the `hsplit` argument always has the value 0.1). The values in the Mean Votes column indicate the number of votes the candidate is expected to receive in each precinct given the corresponding parameter values.<sup>12</sup>

\*\*\* Tables 10 and 11 about here \*\*\*

In Table 10 one can see that in most cases the simulated vote counts satisfy the second-digit Benford's Law. In Table 11 the simulated vote counts satisfy the second-digit Benford's Law for small values of `lsplit` and Size values up to about Size=2000, and for for larger values of `lsplit` and Size=3000, but mostly not for Size values 2250, 2500 and 2750. These results suggest that the electoral coalition model that features two types of voters for each candidate can generate vote counts with second digits that satisfy Benford's Law for a wide variety of parametric

---

<sup>11</sup>If the only goal is to produce counts whose second digits usually satisfy the second-digit Benford's Law, then it is not necessary to have the expected number of voters (`partypm`) and the vote counts (`votes`) be Poisson distributed. If the `pbenf` function is changed to use the assignments `partypm <- size*pf/sum(pf)` and `votes <- partypm*p2`, then we get second-digit Benford's Law results very similar to those obtained for the baseline model for the conditions considered in the Monte Carlo simulations reported in Tables 10 and 11. This alternative specification demonstrates that the essential feature that produces the second-digit Benford's Law pattern is the mixture of the core and available voting groups, not variation that may occur in the sizes of voting precincts. Using the Poisson-distributed values may impart greater realism, and it is noteworthy that doing so does not reduce the function's ability to produce counts with digits that satisfy the second-digit Benford's Law.

<sup>12</sup>The `bfrac` argument always equals the default value, `bfrac = 1/2`.

configurations, although clearly not for all possible parameter values. Hence the electoral coalition model (or improved versions of it) may possibly explain the patterns we see in real election data. By the way, the vote counts produced by the `pbenf` function do not have first significant digits that satisfy the first-digit Benford's Law.

### Can Benford's Law Detect Vote Fraud?

Applying the second-digit Benford's Law test to other vote count data from the 2004 election in Florida produces some results that suggest that Benford's Law applies to the data and other results that raise questions. Table 12 reports results based on data from early voting in Miami-Dade county. Applying the FDR of Benjamini and Hochberg (1995) to the twenty tests for site-style-days, the results look fine if we use a single-test level of  $\alpha = .05$ , since no  $X_{B_2}^2$  value is greater than 25.46, but the results are problematic if  $\alpha = .10$  ( $X_{B_2}^2$  for the Amendment 7 Yes votes is 24.6, which is greater than 23.6). The election day precinct results for Broward, shown in Table 13, are similar. They are fine using the FDR with  $\alpha = .05$  but problematic using  $\alpha = .10$ : two of the Amendment vote counts have  $X_{B_2}^2 > 23.6$ . The Broward early voting results for counts at the level of ballot styles are fine if the FDR is used. The largest  $X_{B_2}^2$  value among these early voting tests is  $X_{B_2}^2 = 21.4$ , for the votes for Kerry. The election day results for Pasco, shown in Table 14, have one value of  $X_{B_2}^2$  large enough to reject the hypothesis that Benford's law applies even using the FDR among the twenty tests with  $\alpha = .05$ . This is the value  $X_{B_2}^2 = 29.5$ , which occurs for the Amendment 7 Yes votes. Considered on their own and using the FDR for twenty tests, the early voting machine-precinct results for Pasco are fine.

\*\*\* Tables 12, 13 and 14 about here \*\*\*

The results for voting machines in Tables 12, 13 and 14 further illustrate that the second-digit Benford's Law property mostly does not apply to the vote counts on machines in these Florida counties. The case that comes closest to being an exception is the machine results for early voting in Broward County. Many of those  $X_{B_2}^2$  values are unproblematically small, but three are larger than the  $\chi_9^2$  critical value for a single test at level  $\alpha = .05$ , and two are large even when we use the FDR. For the Amendment 8 Yes votes we have  $X_{B_2}^2 = 27.9$ , which is larger than the critical value for the FDR for twenty tests with  $\alpha = .05$ , and for the Amendment 7 Yes votes we have  $X_{B_2}^2 = 44.0$ , which is very large by any standard.

The value  $X_{B_2}^2 = 29.5$  that occurs for the election day precinct data from Pasco County is large enough to count as a rejection of the second-digit Benford's Law hypothesis even using the FDR among all 60 of the election day tests, pooling across the three counties: the quantile of  $\chi_9^2$  corresponding to a tail probability of  $.05/60$  is 28.35. If we pool over all 120 of the election day precinct and early voting site-style-day, style and machine-precinct tests, the value  $X_{B_2}^2 = 29.5$  is not problematic according to the FDR with  $\alpha = .05$ , since the quantile of  $\chi_9^2$  corresponding to a tail probability of  $.05/120$  is 30.13. But using  $\alpha = .10$  we again have a problem even when pooling over all 120 tests, because using the FDR we again arrive at the  $\chi_9^2$  quantile of 28.35.

Do the relatively large  $X_{B_2}^2$  values for the precinct-level vote counts suggest the counts have been fraudulently manipulated? The simulations reported in Tables 10 and 11 suggest that an electorally intelligible and benign process can produce counts that often satisfy the second-digit Benford's Law. Suppose we take a process that we know usually produces such counts and perturb it in ways that mimic some ways vote fraud may occur. Does the Benford's Law test signal that there has been a distortion? If so, we might conclude that the relatively large  $X_{B_2}^2$  values suggest that maybe there has been fraud. Because we know the Benford's Law test can fail even when there is nothing like fraud in the data generating process, such a result can do no more than suggest the possibility of fraud. But if the Benford's Law test does not catch perturbations that we inject into otherwise pristine data, then of course the test is not useful for detecting vote fraud. In this case the mostly clean precinct-level results should not give us any comfort.

I simulate three variations of each of two kinds of vote manipulation. The two basic manipulations I describe as (1) adding repeaters and (2) proportionally increasing or decreasing vote totals. The variations apply each manipulation either to all precincts or to precincts in which the unmanipulated votes fall above or below specified thresholds.

My conception of repeaters harks back to the classic manipulation Gumbel (2005) describes as having been perfected by several American city political machines in the late nineteenth and early twentieth centuries. Repeaters in the nineteenth century's Tammany Hall were the primary referents of the familiar phrase, "vote early and often." As Gumbel writes, "The repeaters carried changes of clothing, including several sets of coats and hats, so they could plausibly come forward a second or third or fourth time in the guise of an entirely new person.... Many of the repeaters sported full beards at the beginning of the day, only to end it clean-shaven" (Gumbel 2005, 74).

Nowadays repeaters might simply be a few lines of computer code hidden in a PEB.

I implement repeaters by adding to a candidate's vote total a number equal to a specified fraction of the expected number of voters in each precinct. The number of votes added does not depend on the number of votes the candidate would otherwise receive, so the number added is not a function of the candidate's true support. To implement this idea, I replace the last line in the function that is applied to each precinct in the `pbenf` function with the following two lines,

```
votes <- sum(rpois(length(partypm), lambda=partypm*p2))
votes + sum(partypm)*frac;
```

The argument `frac` specifies the fraction of the expected voter number that is to be added.

The idea of proportionally increasing or decreasing vote totals is intended to represent two kinds of situations. One is where votes from a candidate are simply tossed out. A proportional decrease in a candidate's votes corresponds to the case where a fixed proportion of the candidate's votes are discarded in each precinct. The other situation is where votes are swapped from one candidate to another candidate. The candidate from whom the votes are taken could suffer proportional decreases, while the candidate who is receiving the votes is experiencing proportional increases. It may be that the Benford's Law tests can detect either the decreases or the increases, but not both. I implement this idea by replacing the last line in the function that is applied to each precinct in the `pbenf` function with the following two lines,

```
votes <- sum(rpois(length(partypm), lambda=partypm*p2))
votes <- ceiling(votes*frac);
```

The argument `frac` specifies the proportion by which the votes are to be increased or decreased.

There are increases if `frac > 1` and decreases if `frac < 1`.

I also consider variations of repeaters and proportional adjustments in which the manipulations are done only for a subset of the precincts. The subset to which the manipulations are applied depends on the votes the candidate is receiving before the manipulation is applied. The threshold for applying the changes is always the number of votes the candidate is expected to receive in each precinct. For the simulation function `pbenf`, that expectation may be computed using the **R** code

```
meanpbenf <-
```

$$\text{size}*(1/(1+\text{bfrac}))*(\text{lsplit}/2) + \text{size}*(\text{bfrac}/(\text{bfrac}+1))*(1+\text{hsplit})/2;$$

The “Mean Votes” column in Tables 10 and 11 reports these expected vote values for a number of combinations of parameter values. In the case I designate as “below threshold,” the manipulation is applied if the candidate is receiving fewer than `meanpbenf` votes. In the “above threshold” case the manipulation is applied if the candidate is receiving more than `meanpbenf` votes.

In each case I simulate these vote manipulations starting with vote counts produced by `pbenf`, using parameters that tended to produce counts that satisfied the second-digit Benford’s Law for a wide range of expected numbers of voters in each precinct. In particular, referring to Tables 10 and 11, I use `Split = 0.1` (which is `lsplit = .1`). Using that `Split` value produced small values of  $X_{B_2}^2$  for expected numbers of voters per precinct (i.e., “Size”) ranging from 500 to 2,000 and precincts numbering from 500 to 1,000. Over that range of sizes, the Monte-Carlo estimated expected value of  $X_{B_2}^2$  is always smaller than the expected value of  $X_{U_2}^2$ , and often the expected value of  $X_{U_2}^2$  is very large.

The results in Table 15 show that the second-digit Benford’s Law test can sometimes but not always detect distortions from repeaters acting the same way in all precincts. The column labeled `Add` in the table shows the value of `frac`, which indicates how many votes were added as a fraction of the expected number of voters in each precinct. For example, with `Size = 500` and `Add = 0.05`, 25 votes were added to the candidates vote total in each precinct. We ask whether each averaged  $X_{B_2}^2$  statistic shown in the table exceeds the critical value for  $\chi_9^2$  for a test at level  $\alpha = .05$ , which is 16.9. For `Size = 2000` and 1,000 precincts, the average  $X_{B_2}^2$  value is always larger than 16.9, which suggests the Benford’s Law test would usually detect the manipulation in such precincts. With `Size = 2000` and 500 precincts, the average  $X_{B_2}^2$  is greater than 16.9 only for `Add = 0.10` or larger. So in such precincts it appears the test would usually detect repeaters only if they were as numerous as ten percent of the bona fide voters. With `Size = 1500`, the test typically triggers only for `Add` greater than 0.20. With `Size = 1000` or 500, the test triggers irregularly for some of the larger values of `Add`.

\*\*\* Table 15 about here \*\*\*

The results in Table 16 show that the Benford’s Law test is somewhat better able to signal manipulation when the repeater manipulation occurs in the precincts where the candidate is

otherwise getting more votes than would be expected based on the uncontaminated process, but the test does not do as well when the repeater manipulation is happening in precincts where the candidate is otherwise receiving fewer votes than would be expected. The averaged  $X_{B_2}^2$  values shown in the Above Threshold columns are typically larger than the corresponding columns in Table 15, while the averaged  $X_{B_2}^2$  values shown in the Below Threshold columns are typically smaller.

\*\*\* Table 16 about here \*\*\*

The results in Table 17 suggest that the Benford's Law test has only very limited ability to detect proportional increases or decreases in a candidate's vote that happen throughout all precincts. The "Prop." values in the table indicate the value of `frac` that was used. The values used range from a twenty percent reduction in the candidate's vote (Prop. = 0.8) to a twenty percent increase (Prop. = 1.2). The only situations in which significantly large average values of  $X_{B_2}^2$  occur are for 1,000 precincts with Size = 2000 and Prop. equal to 1.1 or greater, or with Size = 500 and Prop. = 0.8. Since a proportional adjustment that affects all precincts the same way is indistinguishable from a candidate's simply receiving greater or lesser support throughout the electorate, it is perhaps not surprising that the Benford's Law test has little ability to detect such a manipulation.

\*\*\* Table 17 about here \*\*\*

The results in Table 18 show that the Benford's Law test is much more effective when there are proportional increases that occur in the precincts where the candidate is otherwise getting more votes than would be expected based on the uncontaminated process. With 1,000 precincts, the average  $X_{B_2}^2$  values are significantly large in three-quarters of the Above Threshold instances where Prop. is greater than 1. With 500 precincts the average  $X_{B_2}^2$  values are significantly large when Prop. is greater than 1 only for Size = 2000, with one exceptional case occurring for Size = 500 and Prop. = 1.15. The Benford's Law test is mostly not more effective at detecting the proportional adjustment manipulation when it is happening in precincts where the candidate is otherwise receiving fewer votes than would be expected based on the uncontaminated process. There are significantly large average  $X_{B_2}^2$  values in the Below Threshold columns with Size = 500 and Prop. > 1, but for the most part the average  $X_{B_2}^2$  values in the Below Threshold columns are not large.

\*\*\* Table 18 about here \*\*\*

While the Benford's Law test can detect proportional increases in a candidate's support in many situations where only some of the precincts are being affected, it is not very effective at detecting proportional reductions. In Table 18, the average  $X_{B_2}^2$  values for most of the instances where  $\text{Prop.} < 1$  are not large.

## Benford's Law and Voting Machine Vote Counts

Whatever we may conclude about the extent to which the second-digit Benford's Law distribution applies to the precinct-level vote counts from the three Florida counties in 2004, the results in Table 9 and in the other tables show that the Benford's Law distribution in general does not apply to the vote counts on voting machines in these counties. Notwithstanding the evidence from the randomization tests that there is not much support for the idea that the votes cast in each precinct were randomly and independently assigned to the machines used in the precinct, I conjectured that random assignment of votes to machines may explain the non-Benford machine counts. Ignoring for a moment the question of how votes actually were assigned to machines in the counties, I now consider whether a process that does assign the votes randomly and independently does produce second-digit distributions that do not match the second-digit Benford's Law.

First I consider a process that has precincts that contain the same number of voters as were in the Miami-Dade election day precincts, but has votes determined according to mixture processes like those simulated in Table 10. To implement such a process in **R**, I create a matrix, `precinct.data`, that has two rows and as many columns as there are election day precincts. The first row contains the number of votes cast on election day in each precinct, and the second row contains the number of voting machines used on election day to record votes for that precinct.<sup>13</sup> The **R** function that uses the `precinct.data` matrix to simulate randomly assigning votes to machines is defined as follows.

```
pbenfm <- function(lsplit=.1, hsplit=.1, bfrac=1/2) {  
  z <- apply(precinct.data, 2,  
    function(x){  
      p2 <- c(runif(1,0,lsplit),runif(1,(1-hsplit),1));
```

---

<sup>13</sup>The total number of machines referenced in the `precinct.data` matrix corresponds to the number of precinct-machines indicated in Table 1.

```

pf <- c(rbeta(1,1,bfrac),rbeta(1,bfrac,1));
size <- x[1];
partypm <- rpois(2,size*pf/sum(pf));
votes <- sum(rpois(length(partypm), lambda=partypm*p2))
nmachines <- x[2];
mach <- rep(0,nmachines);
# allocate votes at random to the nmachines machines
if (votes > 0) mach <- table(sample(1:nmachines, votes, replace=TRUE));
return( mach )
})

```

The `pbenfm` function does not constrain the total number of votes on each machine to correspond to the number actually recorded on the machine in the original election day data. In `pbenfm`, each vote is equally likely to be counted on each of each precinct's machines.

Running such a simulation with parameters taken from the previously reported simulations sometimes but not always produces a pattern matching what occurs in the actual data.<sup>14</sup> Results are reported in Table 19. For the chosen set of Split values, ranging from 0.1 to 0.7, the second-digit Benford's Law always describes the digits in the simulated precinct vote counts. For Split values larger than 0.4, the digits in the simulated machine counts do not follow the Benford's Law distribution, which matches the pattern in the original data. But for Split = 0.3 or smaller, the machine counts do satisfy Benford's Law. Random assignment of votes to machines does not necessarily annihilate the Benford's Law pattern.

\*\*\* Table 19 about here \*\*\*

Randomly assigning the votes actually cast on election day in Miami-Dade County comes close to reproducing the Benford's Law test results reported, for precinct-machines, in Table 9. The first row in Table 20 shows what happens if the votes cast for Bush and Kerry are randomly assigned to machines, using the same procedure as in `pbenfm`. That is, in that program, instead of using votes simulated using the statistical mixture process, the results for "actual precincts" in Table 20 use the original vote counts for the respective candidates. So the results for precincts in that row are simply taken from Table 9. For both Bush and Kerry, randomly assigning the votes produces average  $X_{B_2}^2$  values that are only slightly smaller than the ones computed for the original precinct-machine counts. For the vote counts that actually occurred on election day, it seems that the approximation to random assignment to machines that did happen then is a large

<sup>14</sup>Parameters `hsplit` and `bfrac` are left at their default values.

part of the reason the machine vote counts are non-Benford.

\*\*\* Table 20 about here \*\*\*

Randomly assigning vote counts produced by simulations calibrated to mimic the votes actually cast on election day in Miami-Dade County muddies the waters a bit. Such results are reported in the second and third lines in Table 20. To produce those simulations, I used `rgenoud` (Mebane and Sekhon 2005; Sekhon and Mebane 1998) to find values for the parameters of the version of `pbenf` (using the Miami-Dade precinct sizes) that minimize the discrepancy between the second digits of the votes expected for each candidate and the second digits of the actual vote counts. Specifically, I used `meanpbenf` with `size` set equal to the actual Miami-Dade election day precinct sizes to compute expected vote counts, then chose values for the `lsplit` and `hsplit` parameters to minimize a chi-squared statistic in which the distribution of the digits of the expected vote counts produced by `meanpbenf` provides the expected values. Results using this calibration appear in the second line of Table 20.<sup>15</sup> The results in the third line of Table 20 follow upon using a version of the vote simulating function in which four parameters are calibrated. The expected vote function in this case is the following

```
meanpbenfB <-  
  size*(1/(1+lbfrac))*(lsplit/2) + size*(hbfrac/(hbfrac+1))*(1+hsplit)/2
```

With `meanpbenfB` I used `rgenoud` to minimize discrepancies with both the second digits of the counts and the counts themselves.<sup>16</sup> Figure 3, which presents density plots to compare the calibrated simulations to the actual precinct vote counts, suggests the calibrated simulations provide a better fit to the votes for Bush than to the votes for Kerry. In any case, neither the two-parameter calibration nor the four-parameter calibration leads to machine vote counts that consistently deviate from the second-digit Benford's Law distribution.<sup>17</sup>

\*\*\* Figure 3 about here \*\*\*

All told, nearly random assignment of votes to voting machines may explain the non-Benford machine counts so frequently observed in the data from the three counties, but it is not

---

<sup>15</sup>The calibration values for Bush are `lsplit = 0.1168443`, `hsplit = 0.5699924`. For Kerry the values are `lsplit = 0.1789472`, `hsplit = 0.6468790`.

<sup>16</sup>The calibration values for Bush are `lsplit = 0.1144489`, `hsplit = 0.9947601`, `lbfrac = 3.0359998`, `rbfrac = 2.6032223`. For Kerry the values are `lsplit = 0.4803455`, `hsplit = 0.9807219`, `lbfrac = 0.2774467`, `rbfrac = 2.1231147`.

<sup>17</sup>The calibrated simulation results presented in Table 20 use fixed precinct voter sizes; i.e., they use `partypm <- size*pf/sum(pf)` and `votes <- partypm*p2`.

appropriate to draw from that any wider message about how such randomization may affect Benford's Law tests. It is not clear what may be true in general.

## Discussion

Both the vote randomization test and the second-digit Benford's Law appear potentially useful for detecting election fraud. In both cases a number of issues remain unsettled.

The vote randomization test finds strong evidence that votes were not randomly and independently assigned to the various voting machines in use in precincts on election day in the three Florida counties. The test also suggests that votes were not randomly distributed among comparable machines during the early voting period. The principle question is why do the candidate and amendment option vote shares differ across machines. One innocent possibility is that we have not successfully grouped the machines into comparable sets. Differences in usage times during each day may explain the different vote shares. The measure  $\tau_{jk}$  may not be adequate, or my use of it may not be correct. There is also at least one distinction among voting machines that is not reflected in the tests reported in this paper. Some machines were specially equipped with audio capability to support independent voting by visually impaired voters. Perhaps the voters who used such machines had distinctive preferences. I did not separate out the audio-enabled machines principally because information to identify them all is lacking. I have information that identifies some of the audio-enabled machines in Miami-Dade County, but even for the machines designated as audio-enabled it is not clear from the records I have whether the audio capabilities were operating while the machines were being used.

Three classes of questions remain regarding the Benford's Law tests. First, this paper only suggests the range of mixture processes that might be behaviorally defensible and also tend to produce counts with digits that satisfy Benford's Law. Can processes with more heterogeneity in each precinct work? The simulations I have conducted so far to explore that suggest the situation is complicated. Second, how can we make sense of the fact that the mixture process produces counts that satisfy the second-digit Benford's Law for many but not all combinations of parameters? Third, what parameter values produce counts that closely match the counts that occur in real elections? The small calibration effort I attempted produced a pretty good

approximation to the counts for Bush on election day in Miami-Dade County but did not do as well for the counts for Kerry. Can calibration be elevated to become proper estimation? For instance, is there a rationale for treating the second digits of a set of counts as if they were sufficient statistics?

## Data Note

David Dill supplied ballot and event log files recovered from electronic voting machines in Broward, Miami-Dade and Pasco counties. The files were originally obtained by Martha Mahoney using open records requests funded by the Verified Voting Foundation. The ballot files indicate the choices made for each office by each voter and include labels identifying for each ballot the voting machine and the precinct (for election day ballots) or ballot style (for early voting ballots). The event log files show the time (resolved to the second) at which various transactions occurred on each machine, including the time at which each vote was recorded. It is not possible to match vote choices in the ballot files to voting events in the event log files.

Early voting polling site locations for many of the Miami-Dade machines was taken from a file supplied by Martha Mahoney (file "ev.xls," received by me on August 16, 2005). Of the 670 machines that recorded votes during early voting in Miami-Dade, 88 are not included in that file. Two files supplied by Martha Mahoney also were used to determine which Miami-Dade machines were operating with audio capability enabled. These are the "ev.xls" file and a file "Election.xls" (received by me on August 16, 2005) for the machines used on election day.

The data comprise files for electronic early voting and electronic polling place votes but do not include information about paper absentee votes.

Am. 7 No	14.3	44.3	157.7	346.9	8.9	9.6	5.7	8.7
Am. 8 Yes	7.1	3.8	74.6	6.3	4.3	6.2	27.9	42.9
Am. 8 No	13.9	26.1	15.9	21.7	6.7	7.3	4.0	7.7

Note: Each statistic is the Pearson chi-squared statistic, with nine degrees of freedom. In Broward, on election day each machine recorded votes for only one precinct. In the early voting data the number of votes on each style-machine combination was too small (mean = 16.7, median = 2) to support analysis for those combinations.

## **Justice Department Sends Election Observers to 22 States Across the Country in Unprecedented Monitoring Effort for a Midterm Election**

WASHINGTON – The Justice Department today announced that it is deploying an unprecedented number of federal personnel to monitor tomorrow's midterm election, sending more than 500 federal observers and more than 350 Justice Department personnel to 69 jurisdictions in 22 states – more than double the total sent on election day in 2002, which was the previous record for a midterm election.

Since the passage of the Voting Rights Act of 1965, the Justice Department has regularly sent observers and monitors around the country to protect election-related civil rights. This summer, President Bush signed the reauthorized Voting Rights Act, which protects the rights of Americans to participate in the electoral process without discrimination. Under the law, the Department of Justice is authorized to ask the Office of Personnel Management (OPM) to send federal observers to areas that have been certified for coverage by a federal court, or the Attorney General, pursuant to the Act. Federal OPM observers and/or Justice Department personnel will monitor polling place activities in 69 jurisdictions in 22 states throughout the country:

- Chambers County, Ala.
- Lee County, Ala.
- Tuscaloosa County, Ala.
- Apache County, Ariz.
- Cochise County, Ariz.
- Maricopa County, Ariz.
- Navajo County, Ariz.
- Pima County, Ariz.
- Pulaski County, Ark.
- Alameda County, Calif.
- Orange County, Calif.
- San Benito County, Calif.
- San Diego County, Calif.
- San Francisco, Calif.
- San Mateo County, Calif.

011972

- Santa Clara County, Calif.
- Ventura County, Calif.
- Adams County, Colo.
- Arapahoe County, Colo.
- Denver County, Colo.
- Broward County, Fla.
- Duval County, Fla.
- Hillsborough County, Fla.
- Osceola County, Fla.
- Palm Beach County, Fla.
- Cook County, Ill.
- Chicago, Ill.
- Ford County, Kan.
- Concordia Parish, La.
- New Orleans, La.
- St. Landry Parish, La.
- Boston, Mass.
- Springfield, Mass.
- Hamtramck, Mich.
- Noxubee County, Miss.
- Rosebud County, Mont.
- Colfax County, Neb.
- Bergen County, N.J.
- Essex County, N.J.
- Hudson County, N.J.
- Middlesex County, N.J.
- Salem County, N.J.
- Cibola County, N.M.
- Sandoval County, N.M.
- Kings County, N.Y.
- Queens County, N.Y.
- Richmond County, N.Y.
- Westchester County, N.Y.
- Cuyahoga County, Ohio
- Berks County, Pa.
- Bennett County, S.D.
- Buffalo County, S.D.
- Charles Mix County, S.D.
- Dewey County, S.D.
- Mellette County, S.D.
- Shannon County, S.D.
- Todd County, S.D.
- Ziebach County, S.D.
- Brazos County, Texas
- Ector County, Texas
- Fort Bend County, Texas
- Galveston County, Texas
- Hale County, Texas
- Medina County, Texas
- Travis County, Texas
- Williamson County, Texas
- Wilson County, Texas

011973

- King County, Wash.
- Pierce County, Wash.

The observers and monitors will watch and record activities during voting hours at select polling locations in the aforementioned cities and counties. Civil Rights Division personnel will coordinate the federal activities and maintain contact with local election officials. In addition, the Department has deployed observers and monitors who speak Spanish, as well as Arabic, and a variety of Asian and Native American languages.

The OPM observers and Department personnel will monitor whether certain counties and localities are complying with federal voting laws by, for example, determining whether any voters are challenged improperly on the basis of their race, color, or membership in a language minority group; complying with the language minority provisions of the Voting Rights Act; permitting voters who are blind, have disabilities, or unable to read or write assistance by a person of their choice; and permitting all eligible voters to cast a ballot, or at least a provisional ballot.

Voters will be able to file complaints online on the Voting Section home page at <http://www.usdoj.gov/crt/voting/index.htm>. Civil Rights Division personnel will be available at a specially staffed toll free number, 1-800-253-3931, to receive complaints, and on a dedicated TTY line for the hearing impaired, 1-888-305-3228.

More information about the Voting Rights Act and other federal voting laws is available on the Department of Justice's Web site at <http://www.usdoj.gov/crt/voting>.

## **FACT SHEET: PROTECTING VOTING RIGHTS AND PREVENTING ELECTION FRAUD**

"Just one instance of fraud or one citizen who cannot exercise the power to vote .... is too many. Our work continues until every qualified citizen in every community in America has an equal chance to vote - and to have that vote count." - Attorney General Alberto R. Gonzales, October 4, 2005

For over 30 years, the Justice Department has had an Election Day program to ensure the right of eligible voters to cast their votes and help shape the nation's political leadership.

The Department of Justice has responsibility for enforcing federal civil rights laws guaranteeing voting rights and for prosecuting voter fraud. The Civil Rights and Criminal Divisions of the Department of Justice are involved in election matters to ensure both ballot access and ballot integrity.

The Criminal Division and the Department's 93 U.S. Attorneys are responsible for enforcing the election fraud laws passed by Congress and signed by the President.

The Civil Rights Division is charged with enforcing the Voting Rights Act of 1965 as well as the National Voter Registration Act, both of which are designed to guarantee access to the polls on Election Day.

In October 2002, the Department established a new law enforcement initiative, called the Ballot Access and Voting Integrity Initiative, to provide increased protections against election fraud and voting rights abuses. The Initiative mandated increased Department-wide efforts to enforce federal civil rights laws guaranteeing voting rights as well as to deter, and if necessary, investigate and prosecute voter fraud.

The Justice Department will have its Election Day program in place for the November 8, 2005 elections.

Election Day Program

011975

"Election crimes strike at the core of our representative system of government. Vigorous investigation and prosecution of those who commit election crimes thus serves two important goals: first, to punish those responsible for these crimes and to dismantle their corrupt machines, and, second, to assure the public that the integrity of the election process is one of the Department's highest priorities." - Assistant Attorney General of the Criminal Division Alice S. Fisher

"Protecting access to the ballot for all eligible voters on Election Day is a major priority of the Civil Rights Division. We are committed to safeguarding the voting rights of all Americans." - Acting Assistant Attorney General for Civil Rights Bradley J. Schlozman

On November 8, 2005, the Department of Justice will have in place its nationwide program to guarantee access to the polls, protect individual voting rights, and deter voter fraud and voter intimidation. In those districts where voting activity will take place, federal prosecutors, investigators, and Civil Rights Division attorneys will be readily available to the public for the purpose of receiving complaints and taking any appropriate action when the polls are open on Election Day. When the polls open, the resources of the Department of Justice - both in Washington, D.C. and in the states - will be available to handle complaints, ensure access, and open investigations.

#### Criminal Division:

The Criminal Division's Public Integrity Section has assigned attorneys to assist with potential voter fraud cases, as needed.

Lawyers with the Public Integrity Section will be on duty from the time the polls open on the East Coast until the time they close on the West Coast to provide consultation and coordination with the Department's District Election Officers.

Since the 2002 commencement of the Ballot Access and Voting Integrity Initiative, the Criminal Division and the U.S. Attorneys' Offices have opened nearly 200 criminal investigations of alleged election fraud or voter intimidation. Over 120 of these investigations are currently pending. In addition, since the Initiative began, over 95 persons have been charged with election fraud offenses, and over 55 of these defendants have been convicted.

The Justice Department will enforce the laws that prohibit:

voter intimidation; voting by ineligible individuals; bribery of voters; destruction of valid ballots or registrations; altering vote tallies; multiple voting; absentee ballot fraud; malfeasance by election officials; and ballot- box tampering or destruction.

#### Civil Rights Division:

On Election Day, Civil Rights Division personnel will be available at a toll free number to receive complaints.

Since the passage of the Voting Rights Act of 1965, the Justice Department has regularly sent observers around the country to protect the voting rights of all citizens, including minority and elderly voters. This year, the Civil Rights Division will once again have monitors and observers in cities and towns across the country to ensure access to the polls, and to enforce our nation's civil rights laws.

The Division has been engaged in a major outreach effort to minority groups and election officials to inform jurisdictions of their obligations under the Language Minority Provision of the Voting Rights Act. The Division will enforce the law that requires jurisdictions meeting certain criteria to provide bilingual access to elections.

The Division will enforce existing consent decrees.

Background Information on the Justice Department's Mission to Protect Voting Rights  
and Prevent Election Fraud

The Ballot Access and Voting Integrity Initiative. In October 2002, then-Attorney General John Ashcroft ordered the creation of a Department-wide Ballot Access and Voting Integrity Initiative. The goals of this ongoing Initiative are to:

enhance the Department's ability to deter discrimination and voter fraud; and

prosecute violators vigorously whenever and wherever these offenses occur.

Civil Rights and Criminal Division Leaders Heading Initiative. To protect the vote of Americans, resources from across the Department of Justice have been committed to this effort. Acting Assistant Attorney General of the Civil Rights Division Bradley Schlozman and Assistant Attorney General of the Criminal Division Alice S. Fisher are leading this initiative.

Annual Voting Integrity Seminars. Each year since the start of the Initiative the Justice Department holds a training seminar in Washington, D.C., for District Election Officers of all 93 U.S. Attorneys' Offices. These annual two-day seminars provide comprehensive training to federal prosecutors on the handling of election fraud and voting rights violations. This year's conference was held on October 4-5.

Designating Federal Prosecutors to Address Voting Matters. The Attorney General directed all 93 U.S. Attorneys to designate a District Election Officer responsible for our efforts on Election Day. These officers are experienced Assistant U.S. Attorneys with knowledge of the laws that address election fraud, as well as laws that:

prohibit racial discrimination and voter intimidation;

govern absentee voting for uniformed and overseas citizens, the elderly, and citizens with disabilities; and

protect the voting rights of minority language Americans.

011977

District Election Officers. These officers are election experts in their districts, and implement the Department of Justice's response to election fraud and campaign financing crimes under the overall supervision of the Public Integrity Section pursuant to 9 U.S.A.M. 85.210.

State Coordination. Pursuant to the Initiative, District Election Officers meet before significant elections with state and local election and law enforcement officials to coordinate the handling of election matters and offer federal assistance in the investigation and prosecution of election-related crimes that may occur in their respective districts.

## **FACT SHEET: PROTECTING VOTING RIGHTS AND PREVENTING ELECTION FRAUD**

“Just one instance of fraud or one citizen who cannot exercise the power to vote .... is too many. Our work continues until every qualified citizen in every community in America has an equal chance to vote - and to have that vote count.” - Attorney General Alberto R. Gonzales, October 4, 2005

For over 30 years, the Justice Department has had an Election Day program to ensure the right of eligible voters to cast their votes and help shape the nation's political leadership.

The Department of Justice has responsibility for enforcing federal civil rights laws guaranteeing voting rights and for prosecuting voter fraud. The Civil Rights and Criminal Divisions of the Department of Justice are involved in election matters to ensure both ballot access and ballot integrity.

The Criminal Division and the Department's 93 U.S. Attorneys are responsible for enforcing the election fraud laws passed by Congress and signed by the President.

011978

The Civil Rights Division is charged with enforcing the Voting Rights Act of 1965 as well as the National Voter Registration Act, both of which are designed to guarantee access to the polls on Election Day.

In October 2002, the Department established a new law enforcement initiative, called the Ballot Access and Voting Integrity Initiative, to provide increased protections against election fraud and voting rights abuses. The Initiative mandated increased Department-wide efforts to enforce federal civil rights laws guaranteeing voting rights as well as to deter, and if necessary, investigate and prosecute voter fraud.

The Justice Department will have its Election Day program in place for the November 8, 2005 elections.

#### Election Day Program

“Election crimes strike at the core of our representative system of government. Vigorous investigation and prosecution of those who commit election crimes thus serves two important goals: first, to punish those responsible for these crimes and to dismantle their corrupt machines, and, second, to assure the public that the integrity of the election process is one of the Department’s highest priorities.” - Assistant Attorney General of the Criminal Division Alice S. Fisher

“Protecting access to the ballot for all eligible voters on Election Day is a major priority of the Civil Rights Division. We are committed to safeguarding the voting rights of all Americans.” - Acting Assistant Attorney General for Civil Rights Bradley J. Schlozman

On November 8, 2005, the Department of Justice will have in place its nationwide program to guarantee access to the polls, protect individual voting rights, and deter voter fraud and voter intimidation. In those districts where voting activity will take place, federal prosecutors, investigators, and Civil Rights

Division attorneys will be readily available to the public for the purpose of receiving complaints and taking any appropriate action when the polls are open on Election Day. When the polls open, the resources of the Department of Justice - both in Washington, D.C. and in the states - will be available to handle complaints, ensure access, and open investigations.

#### Criminal Division:

The Criminal Division's Public Integrity Section has assigned attorneys to assist with potential voter fraud cases, as needed.

Lawyers with the Public Integrity Section will be on duty from the time the polls open on the East Coast until the time they close on the West Coast to provide consultation and coordination with the Department's District Election Officers.

Since the 2002 commencement of the Ballot Access and Voting Integrity Initiative, the Criminal Division and the U.S. Attorneys' Offices have opened nearly 200 criminal investigations of alleged election fraud or voter intimidation. Over 120 of these investigations are currently pending. In addition, since the Initiative began, over 95 persons have been charged with election fraud offenses, and over 55 of these defendants have been convicted.

The Justice Department will enforce the laws that prohibit:

voter intimidation; voting by ineligible individuals; bribery of voters; destruction of valid ballots or registrations; altering vote tallies; multiple voting; absentee ballot fraud; malfeasance by election officials; and ballot- box tampering or destruction.

#### Civil Rights Division:

On Election Day, Civil Rights Division personnel will be available at a toll free number to receive complaints.

Since the passage of the Voting Rights Act of 1965, the Justice Department has regularly sent observers around the country to protect the voting rights of all citizens, including minority and elderly voters. This year, the Civil Rights Division will once again have monitors and observers in cities and towns across the country to ensure access to the polls, and to enforce our nation's civil rights laws.

The Division has been engaged in a major outreach effort to minority groups and election officials to inform jurisdictions of their obligations under the Language Minority Provision of the Voting Rights Act. The Division will enforce the law that requires jurisdictions meeting certain criteria to provide bilingual access to elections.

The Division will enforce existing consent decrees.
