Precinct workers gone after probe

By BEN EVANS, The Herald-Sun
March 29, 2004 10:05 pm

DURHAM -- The Durham County Board of Elections has cleaned house at an eastern Durham polling precinct and will hire new precinct judges after a state investigation into ballot fraud in the November election found irregularities but no clear-cut wrongdoing.

The state Board of Elections closed its investigation Monday without recommending criminal charges. Instead, the state agency recommended that the six judges and assistants from the Durham precinct step down, even those who were not involved in the alleged incident. Durham elections Director Mike Ashe said precinct officials already have agreed to that request.

"Something happened in the precinct. The numbers don't jibe, and precinct officials were making allegations," Ashe said. "On any given Election Day, the huge, huge majority of our precincts score an A-plus. On this day in this particular precinct, they scored a D-minus, and it's disappointing."

"I don't know if anyone will ever know what happened," he said, emphasizing that the allegations involved only a handful of ballots and would not have affected the election's outcome even if proven true.

The probe centered around chief judge Inez Gooch of Precinct 52, located at Evangel Assembly of God on Lynn Road, off Miami Boulevard in eastern Durham.

One of Gooch's fellow precinct workers, Ruthy Jones, told county elections officials that she saw Gooch sitting at a precinct table filling out a stack of about four to six ballots on Election Day. Jones said she asked Gooch what she was doing with the ballots, and Gooch responded that she was holding them for her children, who are voting-age adults, Jones said.

Later, Jones, a Republican, saw Gooch, a Democrat, walking toward the ballot tabulator with a handful of ballots. Knowing that Gooch already had voted her own ballot, Jones said she confronted Gooch as she tried to insert a ballot into the tabulator, telling Gooch that she was breaking the law. Gooch relented and walked back to her workstation, sliding the ballots into a storage tub containing election supplies, Jones said.

After the polls closed, the official vote count found that the number of ballots inserted into the tabulator didn't match the number of "authorization to vote" forms that had been handed out that day. The authorization forms are the documents handed out after voters verify their names and addresses. Voters then exchange those forms for ballots at a separate table.

In addition -- after a narrow margin in the City Council race between Diane Wright and Thomas Stith prompted a recount -- officials found eight more ballots in Precinct 52 than were originally counted on

016811

Election Day.

Gooch, who refused to discuss the situation Monday, has denied submitting fraudulent ballots for family members, and the state investigator said his probe uncovered no pattern or clear evidence of willful wrongdoing.

"When it was presented to us, we pretty much thought it was a shut and closed case, but when we started looking at it, we realized it was a little more muddled than that," state elections Director Gary Bartlett said. "[Our investigator] tried to get as close to the truth as he could."

Ashe said Monday that he was pleased with the investigation. But in a memo sent to the state in November, he wrote that he suspected misconduct and that Precinct 52 had been having administrative problems for years.

In the memo, he "surmis[ed]" that Gooch was illegally filling out ballots. He suggested that the ballots Jones saw Gooch put in a storage bin on Election Day were subsequently found and included in the recount, explaining the higher number of ballots in the second count.

"I believe that other precinct workers were either 'in on it' or at a minimum looked the other way," he wrote.

Another finding from the probe was that one of Gooch's daughters, Sandra F. McCallum, was working as a precinct assistant in Gooch's precinct, even though the state bars family members from working together in precincts.

Precinct judges are recommended by local political parties and appointed by county elections boards. They are paid between \$85 and \$125 for their work on Election Day, plus additional payments of between \$15 and \$25 for training sessions.

Police NewsCourt date postponed in PBA election case

UTICA — A court date for a civil action by Utica police officers alleging ballot box tampering in the most recent police union election was adjourned to April 17 and 18, court officials said Thursday.

The legal action, requesting a new election, was filed in state Supreme Court last month by Utica police Sgt. Gary Glatt, who was defeated by incumbent Sgt. James Franco in a bid for the John E. Creedon Police Benevolent Association presidency during the Dec. 9-10 election.

The action alleges a discrepancy in vote tallies as well as improper placement of the ballot box and the immediate disposal of the ballots after the election, court documents state.

Police arrest 3 on drug charges

UTICA — Police Thursday arrested three people and seized an ounce of crack cocaine with a street value of \$2,500, marijuana and money in the 1200 block of Whitesboro Street, the state police Community Narcotics Enforcement Team said.

Terrel L. Loadholt, 24, was charged with criminal possession of crack cocaine with intent to sell, a felony. Two other Uticans, ages 22 and 27, were charged with unlawful possession of marijuana.

Loadholt was sent to Utica City Jail pending his arraignment today. The other two were released on appearance tickets to return to Utica City Court.

HEADLINE: Rights panel suspects bias in Florida vote debacle

BYLINE: DeWayne Wickham

BODY:

The U.S. Commission on Civil Rights' preliminary report on Florida's badly flawed presidential voting was short and to the point. The sworn testimony of more than 100 witnesses at the panel's two fact-finding hearings and weeks of probing by commission investigators were summed up in a single sentence of the four-page statement the body issued last week.

At this phase of its investigation it appears "that the evidence may ultimately support findings of prohibited discrimination," the commission concluded. Not surprisingly, the reaction from Florida Gov. Jeb Bush, on whose desk the buck for the election mess stops, quickly dismissed the panel's finding.

In a statement released by his office, Bush said he has "yet to be presented with any evidence of intentional discrimination" in the voting that took place in his state's 67 counties.

The good news buried beneath this pile of blame and buck dodging is that we're in the home stretch of the search for answers to the gnawing question of what went wrong in Florida. The commission's final report, which is expected to be released this summer, likely will bring to an end the last of the federal and state investigations spawned by widespread accusations of voting irregularities and disenfranchisement in Florida during the presidential election.

Answer still far off

The bad news is that it doesn't look as if we're any closer to an answer that will dispel the widely held belief that it took an act of grand larceny to foist George W. Bush into the White House, or rebuff the counter that those who level this charge are a bunch of world-class sore losers.

The arguments over whether Bush or Al Gore won Florida — a victory that would have given either candidate enough Electoral College votes to be president — have only become more heated recently as media reports on the results of unofficial recounts of contested ballots produce conflicting conclusions of what might have resulted from a more complete tally of ballots cast in the Sunshine State.

016821

Last month, *The Miami Herald* and USA TODAY announced that an analysis of undervotes in Miami-Dade County revealed that had Gore gotten the hand recount of votes in that county, Bush still would have been declared the winner in Florida. This report left Republicans giddy and Democrats questioning the process.

On Saturday, the roles reversed when *The Palm Beach Post* reported that its review of uncounted ballots in Palm Beach County showed that Gore would have picked up enough votes to overtake Bush's slim victory margin in Florida, if every ballot with a hanging chad, pinhole or dimple in that county had been counted.

Panel looks to future

Wisely, the Civil Rights Commission is focusing on the future, not the past. "In the final analysis, new recounts of old ballots are an academic exercise," the panel said in its preliminary report, which was adopted by a 6-to-2 vote. "Voting is the language of our democracy and regrettably, when it mattered most, real people lost real opportunities to speak truth to power in the ballot box."

The commission believes that Florida officials may have consciously or unconsciously brought about acts of illegal voter discrimination through its use of a database of disqualified voters. The list was supposed to be used to keep convicted felons from voting and to block votes cast by people registered in more than one county or in the name of a deceased person.

A spokesman for ChoicePoint — the company that compiled the list — said Florida officials directed it to include all possible combinations of names that might help election officials ferret out ineligible voters. That list, the commission said, kept hundreds of eligible people from voting in the presidential election.

Preventing a repeat of this grievous error and ratcheting up the pressure on Florida's reluctant legislature to appropriate money that counties with aging, faulty voting machines can use to modernize their election system are the best things that can come out of the commission's ongoing inquiry.

Getting these things done won't settle the nettlesome question of whether last year's presidential election was won or stolen, but it will go a long way toward ensuring that Florida won't be the epicenter of another election debacle.

DeWayne Wickham writes weekly for USA TODAY.

Fraud Provisional
TN

Election panel debates 'fraud'

By Craig Boerner, cboerner@nashvillecitypaper.com
January 12, 2005

The Davidson County Election Commission is debating whether to forward potential cases of perjury or election fraud during the November presidential election to District Attorney General Torry Johnson's office.

Commissioner Lynn Greer wants board members to join him in sending a strong message that there is a legal way to vote.

Greer said 31 provisional voters, for example, are still listed as felons who have not had their voting rights restored.

"If we have some people who have broken the law then we ought to enforce the law," he said.

Other board members aren't as concerned because the votes in question were caught and didn't count.

"The provisional counting board caught the mistake. It's not like the vote became part of the record," Commissioner A.J. Starling said.

"They didn't get away with it. The system works. I don't know if we need to go any further if the system works."

Commission staff members are working to confirm felon status and also to determine which persons were sent a notice of being purged from the voting rolls.

The staff is also investigating if previously registered felons declared their conviction on the application completed to cast a provisional ballot.

Greer's six-part motion to be discussed at the March board meeting doesn't stop at felons; it also includes college students and poll workers.

One request is to "cease to hire" officers of election at precincts that allowed more than five provisional ballots from residents whose address was outside that officer's precinct.

"If we have ineffective poll officials then we don't need to use them again," Greer said. "The truth is these people were trained. They went into breakout sessions learning how to do this provisional voting and they had plenty of chances to ask questions.

By allowing 158 voters to vote at the wrong precinct, poll officials essentially ensured that the person's vote would not count, board members said.

"To turn around and say that, because those officers allowed them to vote, we don't need them anymore is ridiculous," Starling said. "... We are already having enough problems getting people to work at these polls."

Staff is also contacting provisional voters using a university/college campus P.O. box as their address to request they prove residence in Davidson County because a person does not gain residence solely by being a student.

This motion would affect 142 provisional voters from Tennessee State University and 25 Vanderbilt University students.

"What that would do, in my opinion, is frighten people from coming to vote in the first place," Starling said. "If you are prosecuting folks, I'm not going to take a chance if I'm not sure. That defeats the purpose of the provisional ballots."

Other cases include 34 provisional voters who were registered in another jurisdiction. If they voted

016824

in two jurisdictions then they could be convicted of election fraud.

Three voters were denied at early voting because they didn't live in Davidson County but came back and voted on election day.

Greer also wants to know how many of the 693 provisional voters denied for being "not timely registered" actually submitted a voter registration form prior to the election.

Norfolk pastor sentenced for casting illegal ballot

By MICHELLE WASHINGTON, The Virginian-Pilot

© January 14, 2004

Last updated: 11:17 PM

VA

NORFOLK — On a November day more than two years ago, Chester Moody made his vote count.

The only problem was that it shouldn't have.

A 1986 felony conviction for larceny by check in Chesapeake cost Moody his voting rights. He obtained a voter identification card in 1999, despite never having his rights restored. On Nov. 6, 2001, Moody tried to cast a vote in the general election at the Campostella precinct.

Election officials told him he could not legally vote because of the conviction, but they gave him a conditional ballot and said they would hold it until his voter qualifications could be investigated.

Instead, according to prosecutors, Moody "waited until the voting officer was momentarily distracted, rushed to the ballot box, and slid his ballot in."

Moody entered an Alford plea Tuesday in Norfolk Circuit Court to a misdemeanor charge of illegal voting, a crime that is rarely prosecuted. The plea means he does not admit guilt but acknowledges that prosecutors have enough evidence to convict him.

Judge Jerome James sentenced him to a year in jail but suspended the time on the condition that he remain on good behavior for two years. As part of his plea agreement, he also must "refrain from attempting to vote unless and until he is legally able to do so."

Outside the courtroom, Moody said the court process "coerced" his plea.

"The case is over 2 years old," he said. "The voter identification card I had received was arbitrarily and capriciously ruled issued erroneously."

Moody, 68, wore a black parson's suit with a white collar, a crucifix dangling from his neck. He is an associate pastor at the Garden of Prayer Temple, Church of God in Christ, on Church Street.

Moody said he sought restoration of his voting rights. He said prosecutors manufactured the charge in retaliation because he served as a spiritual adviser to someone who filed a lawsuit against the city of Chesapeake.

And he complained that prosecutors repeatedly delayed his case to force him to plead guilty.

"They sat on it and used it in a timely fashion," he said.

Court and state voter records tell a different story.

Moody's court file brims with requests from prosecutor Marcia Ziegler to have his bond revoked because he refused to cooperate with the court's pretrial services unit.

He never reported to the officers after being assigned to the service in June.

016826

Court documents show that Moody also failed to stay in touch with his court-appointed attorneys. Lawyer Charles Jenkins asked to withdraw as counsel from the case because Moody never contacted him between July and October.

Another lawyer, Mike Kmetz, asked to withdraw because Moody refused to cooperate and made demands that Kmetz file a motion to transfer the case to federal court.

Two other lawyers withdrew because of conflicts or other causes. Cheryl Footman Banks, who represented Moody on Tuesday, was at least the fifth lawyer to handle his case.

On another occasion, Moody's case was delayed because he asked for a jury trial. And in February, his case was delayed because "he was confused as to the trial date and failed to appear," according to the documents.

A judge issued an order for his arrest when he failed to appear in court in July.

John Merkel, Norfolk's deputy registrar, said Moody registered to vote in the spring of 1999, before the city had computerized databases to check whether a person was eligible to enroll. The city got that system in the fall of 1999, Merkel said.

"Now if you fill out a card, someone goes to a computer, types in your name and Social Security number and does a match," he said. For people on felony conviction lists, he said "flashing lights go off and you won't be allowed to register."

Even so, he said, the registration form asks applicants about felony convictions.

When the board caught the mistake that fall, it sent Moody a letter saying his name had been removed from the voter rolls. That made his card invalid.

When Moody cast his vote anyway, said Commonwealth's Attorney John R. Doyle III, his ballot counted when it should not have. Election officials had no way to tell which ballot was Moody's or how he voted, and his vote could not be deducted from the total.

"I'm sure they freaked," Doyle said. Bernie Henderson, deputy secretary of the commonwealth, said Moody's voting rights were never restored.

Doyle said his office has never prosecuted a similar case, and he never saw one during the five years he served on the electoral board.

If prosecutors didn't enforce it, he said, all kinds of people could sneak into polling places and vote illegally.

"You have to have zero tolerance," he said.

Inquiry finds evidence of fraud in election

Cast ballots outnumber voters by 4,609

By GREG J. BOROWSKI
gborowski@journalsentinel.com

Posted: May 10, 2005

Investigators said Tuesday they found clear evidence of fraud in the Nov. 2 election in Milwaukee, including more than 200 cases of felons voting illegally and more than 100 people who voted twice, used fake names or false addresses or voted in the name of a dead person.

Officials said charges will be filed in coming weeks, as individual cases are reviewed and more evidence is gathered.

Nonetheless, it is likely that many - perhaps most - of those who committed fraud won't face prosecution because city records are so sloppy that it will be difficult to establish cases that will stand up in court.

And even now, three months after the investigation, officials have not been able to close a gap of 7,000 votes, with more ballots cast than voters listed. Officials said the gap remains at 4,609.

U.S. Attorney Steve Biskupic likened it to trying to prove "a bank embezzlement if the bank cannot tell how much money was there in the first place."

Biskupic announced the preliminary findings at a news conference, along with Milwaukee County District Attorney E. Michael McCann, who is also overseeing the joint inquiry.

Tuesday's announcement comes after a Journal Sentinel investigation that found widespread problems with the election in the city, including that the election totals themselves were not double-checked by city and county panels charged with doing so.

Some of the problems identified by the newspaper, such as spotty compliance with procedures to verify same-day registrants, are broader and are the subject of a statewide audit approved by lawmakers.

Tuesday's announcement could breathe new life into the Republican-backed photo ID debate, which did not survive a veto from Democratic Gov. Jim Doyle and might instead eventually go to voters as a proposed constitutional amendment.

A photo ID requirement might have caught some of the problems highlighted in Tuesday's preliminary report. It notes cases of people voting in the name of a dead person or as someone else. Investigators located some people listed as voting who said they did not vote.

In other cases, according to Tuesday's report, people "registered and voted with identities and addresses that cannot in any way be linked to a real person."

Officials did not identify how many fit each category.

Investigators have focused only on the City of Milwaukee in reviewing duplicate-voting offenses. Officials said Tuesday, though, that they would expand the review of felons voting illegally to Milwaukee suburbs.

The newspaper found at least 278 felons who voted statewide, though only a partial review could be completed because of a state law that bars public access to birthdates of voters.

Election Investigation

U.S. Attorney Steven M. Biskupic (left), with Milwaukee County District Attorney E. Michael McCann, delivers the preliminary findings of a task force examining possible election fraud at the Federal Courthouse on Tuesday

Preliminary Findings

More than 200 felons voted illegally, while still on probation or parole. Although the cases will be hard to prosecute, investigators are now looking at Milwaukee suburbs for similar problems.

More than 100 people voted twice or used false addresses, fake names or voted as a dead person. Charges will be filed against some of these people.

4,609 more ballots were cast than voters listed.

Investigators have

016828

Tracking illegal votes

The fraud investigation has focused on the more than 70,000 people who registered to vote on election day, not the other 200,000-plus voters. That is because registration cards provide a paper trail, which officials said would be stronger in court than computerized records.

It is unclear what identification these 100-plus people provided at the polls to register. State law allows utility bills and leases to be used or for one voter to vouch for another.

Biskupic, appointed by a Republican, and McCann, a Democrat, said they had pledged to avoid partisanship in the matter and avoided questions relating to reforms and proposals.

The announcement, though, prompted renewed calls for photo ID from Republicans, while Doyle pushed again for his set of reforms, which he said would do more to tackle specific problems.

For instance, investigators found "deputy registrars" working for registration drives had submitted at least 65 fake names, though no one apparently voted from the addresses. Doyle's plan would prohibit offering financial incentives, such as paying by the signature, in such drives.

In Madison, Doyle said a photo ID requirement is unnecessary. He urged prosecution of any offenders.

"I don't think many people, if they know there are real consequences for voting twice, and that there have been prosecutions for voting twice, are going to do it because the risk of being caught and the penalty far outweighs the advantage of casting one extra vote," Doyle said.

In response to the findings, Sen. Joe Leibham (R-Sheboygan) said as early as next month he would advance a bill similar to the one vetoed by Doyle. It also could be part of the recommendations from a Legislative Council task force that has been meeting on reforms.

While Doyle has argued the measure would make Wisconsin one of the strictest states in the nation, very few other states allow same-day registration.

Assembly Speaker John Gard (R-Peshtigo) said if Doyle again vetoes the requirement, he would move to make it part of the state constitution, a two-year process that requires a statewide referendum but does not require the approval of the governor.

"The next presidential election in Wisconsin, I guarantee you'll need a photo ID to vote," said Gard, who is running for the U.S. House. "I'll get this done if it is the last thing I do around here."

U.S. Rep. Mark Green, a Green Bay Republican who has introduced a national photo ID requirement, said: "People are having their faith in the election system shaken. This news will make it much, much worse."

Green is running for governor, as is Milwaukee County Executive Scott Walker, who also backs a photo ID requirement.

"Clearly, there is proof that fraud took place in the November 2 election," Walker said.

Milwaukee Mayor Tom Barrett attended the news conference, an unusual occurrence for an announcement by prosecutors.

From the start, Barrett said he welcomed the inquiry but also noted at several points in recent months that he had seen no hard evidence of fraud in the system.

He acknowledged Tuesday the findings pointed to fraud and said again "any individual who committed fraud (should) be prosecuted."

Asked if a photo ID requirement would have made a difference, he said it would not have prevented felons from voting and would have had little impact on other problems.

Biskupic said there was no indication of a widespread conspiracy to commit voter fraud, or of any knowledge or involvement by poll workers or any other city officials.

Archived Coverage

 [Archive: Previous coverage of the investigation into Milwaukee's Nov. 2, 2004 election](#)

The city's record-keeping problems meant investigators from the FBI and Milwaukee Police Department have logged more than 1,000 hours reviewing the 70,000 same-day registration cards, including 1,300 that could not be processed because of missing names, addresses and other information.

Indeed, about 100 cards described as "of interest to investigators" cannot be located, officials said. And within the past few weeks, police found a previously lost box of the cards at the Election Commission offices.

Biskupic and McCann said they remain troubled that three months after the investigation began that city officials have been unable to account for a gap of about 4,600 votes, with more ballots counted than people listed as voting.

That reflects a new assessment of the 7,000-vote gap first identified by the Journal Sentinel. Although city election officials initially blamed postelection data entry for the flaws, the newspaper found gaps existed at dozens of wards, with more votes counted than people tallied in log books.

The gap has been narrowed to 4,600 by a closer review of election day logs and other records, which authorities placed off-limits to the newspaper during the investigation.

McCann said: "I will not be satisfied if we cannot uncover that - what the explanation is, or a reasonable explanation."

In all, about 277,000 people in Milwaukee voted in the election. Thus, the cases identified in the investigation constitute a small portion of the total vote.

The findings, however, carry extra significance in a state that had an 11,000-vote margin in the presidential contest, one of the closest in the nation.

Democrat John Kerry topped President Bush in Wisconsin, mainly because of Kerry's margin in Milwaukee and Madison.

Had a larger state, such as Ohio, gone the other way, it could have led to a Florida-style recount here that would have turned on many of the issues that instead were left for the newspaper to uncover in its extensive investigation.

The federal-local investigation was launched Jan. 26, a day after the Journal Sentinel reported that some 1,200 votes in the November election came from invalid addresses.

Among other findings, some 1,300 same-day registration cards were processed by poll workers who allowed people to vote even though the cards were incomplete. Some 548 had no address listed and 48 gave no name - yet the person was allowed to vote. Another 141 listed addresses outside the city.

The newspaper was denied access to those cards, on the recommendation of the city attorney's office, citing the inquiry.

Felons voted

Reviewing information it had access to, including a computerized list of people recorded as voting, the newspaper identified at least 278 felons who illegally voted statewide, though the vast majority came from within the city.

The real number is likely far higher because the newspaper was able to review only about 38% of the 2.98 million people who voted in the state because of the law that bars access to birth dates. The newspaper was able to link various databases and compare them to a state list of felons on probation or parole at the time of the election.

In response to the newspaper's reports, Doyle and many Republican lawmakers said that rule should be rescinded.

In Wisconsin, only felons who have completed probation or parole are allowed to vote.

Biskupic and McCann said these cases can be hard to prosecute, since it must be established that the felon knew he or she was not allowed to vote and voted anyway.

Thus it is unclear how many of the 200 felons investigators had identified will ultimately be charged.

The newspaper also identified numerous cases in Milwaukee where the same person appears to have voted twice, though that analysis was hampered by major computer problems at the city.

016830

Those problems, which city officials labeled a "glitch," meant hundreds upon hundreds of cases where people are incorrectly listed as voting twice. These are in addition to cases of double voting identified by investigators.

The investigators have been focusing on 100-plus cases in this area. The cases take on many forms.

For instance, non-residents used non-existent city addresses to vote in Milwaukee. Officials are checking to see if they also voted elsewhere, such as from their actual address.

Officials indicated some of the fraud cases could be handled at the federal level because the election involved federal candidates, while other cases could involve state charges.

McCann and Biskupic asked anyone with information on possible fraud call the election task force at (414) 935-7802.

In March, Lisa Artison, a Barrett appointee, resigned as executive director of the Election Commission. She had been under fire for her handling of the election.

Sharon Robinson, head of the Department of Administration, has been overseeing the office and is chairing a city task force reviewing the election. Its report could be issued this month.

Patrick Marley of the Journal Sentinel staff contributed to this report.

82 felons voted in Nov. 2 election

Public records law hinders analysis; more illegal ballots likely cast in presidential race

By GREG J. BOROWSKI
gborowski@journalsentinel.com

Posted: March 17, 2005

At least 82 felons voted illegally in the presidential election Nov. 2 in Milwaukee, though the total is likely far higher, a new computer analysis by the Journal Sentinel has found.

Indeed, there are more than 600 potential matches between felons on probation and parole and names and middle initials of people who voted in the city. But a full analysis could not be completed by the newspaper because of a 2003 state law that bars access to birth dates of voters.

The newspaper, though, was able to do a partial analysis by combining several computer databases to capture birth dates for about 39% of those who voted in the November election.

That showed at least 82 votes by felons, who are not allowed to vote until their probation or parole has been completed.

Illegal votes by felons are part of an investigation into possible voter fraud in the city.

U.S. Attorney Steven Biskupic and Milwaukee County District Attorney E. Michael McCann launched the investigation after the Journal Sentinel revealed major problems. Those included 1,200 votes from invalid addresses; 7,000 more ballots cast than people later recorded as voting by the city; and 1,300 same-day registration cards that could not be processed because of missing information.

The review of felons underscores how the lack of access to birth dates limits the public's ability to identify who has voted.

It also provides clear evidence of fraudulent voters in the November election, in which Democrat John Kerry topped President Bush by about 11,000 votes in Wisconsin.

"Anybody found to have voted illegally should be penalized," said Sharon Robinson, acting head of the city Election Commission, when told Thursday of the newspaper's findings.

She said the office's procedure is to delete names of felons from the registration rolls when made aware of convictions. It is unclear, though, how effective this has been or how many remain on the list.

In addition, same-day registration allows anyone to present ID and vote. That makes it difficult, if not impossible, for poll workers to identify felons who should not vote.

"Election signs and materials spell out the penalties," said Robinson, noting voters are expected to comply with laws.

Robinson was named to head a team of city managers helping run the office after the resignation of Lisa Artison on March 1.

Four years ago, the newspaper found that 361 felons voted illegally. Three were charged by McCann, but those charges were dropped when prosecutors couldn't establish that the felons knew they were ineligible to vote.

Felons who vote commit another felony, punishable by up to four years in prison and a \$10,000 fine.

Biskupic declined to comment Thursday on the newspaper's findings, speaking on behalf of the agencies involved, which include the FBI and Milwaukee Police Department. The investigation was launched Jan. 26.

election

Investigators have access to the full birth date information that is off-limits to reporters and the general public. They would be able to make the same comparison the newspaper did, matching the names of voters to felons who remain ineligible to vote.

Additional legwork would then be needed to establish legal cases against any felons. For instance, investigators may have to show the felon knew he or she was ineligible to vote and did so anyway.

Several felons listed as voting who were reached by the Journal Sentinel hung up when asked whether they voted.

"I'm not interested in this right now," said one, after denying he had voted in the election.

Didn't know they shouldn't

Ronald Gay, 42, who voted from an address in the 4300 block of N. 36th St., could not be reached, but a woman who identified herself as his wife said Gay had definitely voted.

"He voted the same night I did," said the woman, who would give her name only as "Mrs. Gay." Later she asked: "Will he get in trouble for that?"

The woman said she and Ronald Gay are separated and that Gay now lives out of state. He could not be reached for comment.

"I don't think he was aware" he shouldn't vote, the woman said. "If he was aware of it, I would have told him not to."

Although the newspaper has identified 82 felons who voted, it could not determine the actual number.

Because the 2003 change in state law restricted public access to birth date information, as well as driver's license and Social Security numbers, only election workers are allowed to see such information, as a guard against identity theft.

Arguing that the change went too far, state Rep. Mark Gundrum (R-New Berlin) said this week he would draft a bill to reinstate public access to birth dates, a critical means of identifying specific voters.

Gundrum called on investigators to take a hard line with any violation they find.

"It will immediately help clamp down on the abuse of the system," Gundrum said. "There has got to be some oversight on the system to make sure there is integrity to the system."

In Milwaukee, the situation has been compounded by the city's unwillingness to confirm any of the 600 potential matches the newspaper identified between felons and voters.

Officials have cited the ongoing investigation as a reason for withholding election material.

In an attempt to get around the roadblock, the newspaper combined information from several computer databases. This provided an accurate view of felons who voted but also a partial one - the newspaper could link birth dates with only about 39% of the 277,000 people who voted Nov. 2.

To complete its partial analysis, the newspaper began with the city's own computerized list of everyone recorded as having voted. It then used voter ID numbers - a six-digit code used by the city to track voters - to match the 2004 list against a separate computer database obtained in 2000.

That list included anyone registered in the city at the time and their birth dates. The match allowed the newspaper to capture birth date information for 107,616 of those who voted in November.

That list was then matched against a computer database from the state Department of Corrections that listed all felons on probation or parole at the time of the election, along with their birth dates.

There were 82 matches.

The actual number, though, is likely much higher.

016833

First, the list could not be checked against 61% of those who voted. Second, the 7,000-vote gap - between votes cast and those recorded as

voting - means thousands of voters are not even on the city's computer list.

In addition, the newspaper in earlier reviews found hundreds of cases in which voter names were incorrectly listed twice in the computer system.

Voter gap could be larger

That means the 7,000-vote gap may actually be larger.

Likewise, the 1,300 same-day registration cards the city could not process are not in the database. Many of those were missing names or addresses.

Indeed, flawed recordkeeping by the city may mean that some felons who voted are not in the computer records and the reverse - that some who didn't vote are listed as voting.

Annette Deans, who worked at the polls Nov. 2, said she is perplexed as to why her husband, Arthur Deans, 48, is listed as having voted.

"I know he can't vote," said Annette Deans. She added that her husband, convicted of a drug-related offense, did not vote, but that she did.

While the city's computerized list of voters show Arthur Deans as voting, they do not list Annette Deans as voting.

"There were a lot of flaws (at the polls) that day," said Annette Deans. "We didn't have any room to breathe."

Prosecutors accuse 12 felons of voting illegally

Michael Kiefer

The Arizona Republic

Dec. 8, 2005 12:00 AM

Maricopa County Attorney Andrew Thomas announced Wednesday that his office had filed voter fraud charges against 12 county residents who voted in elections even though they were convicted felons.

Thomas called the charges, which are punishable by three years in prison, a "commitment to clean up the voter rolls."

"If we are to have confidence in our election results and preserve our right of self-government, we must ensure that only those with the right to vote do in fact vote," he said.

The voters were caught when they filled out jury questionnaires asking if they had felony convictions.

Review of Election Starts in Confusion

Court: About 1,500 ballots are reported missing in the legal dispute over Compton's June 5 mayoral contest.

By JOHN L. MITCHELL
TIMES STAFF WRITER

November 16 2001

The first day of a court-ordered review of Compton's contested June 5 municipal election got off to shaky start Thursday when 1,500 unused ballots were reported missing.

The Superior Court judge hearing former Mayor Omar Bradley's lawsuit alleging voting fraud dispatched Los Angeles County sheriff's deputies to retrieve the ballots. City officials claimed they were left at Compton City Hall by error and would be presented in court today.

However, Bradley said the confusion over the missing ballots strengthens his claims that he was cheated out of the election. "This is unheard of, unheard of," Bradley said in the courtroom Thursday afternoon.

After the court session finished, Bradley's attorney, Bradley Hertz, said: "In the least, the city clerk has a disorganized office and at most, perhaps, a cesspool of illegalities."

Bruce Gridley, the attorney for the city, denied any wrongdoing by the city clerk and said the mistake was made earlier this month when sheriff's deputies picked up boxes of ballots stored from a different election.

The ballot review began Thursday with an election expert inspecting the votes in court and tallying the overall totals, not conducting a candidate-by-candidate recount. He used an automatic counting machine, which can handle more than 1,000 cards a minute and was set up on a table near the jury box.

Scott D. Martin, the election specialist whose company supplied the Compton ballots, inspected the initial batch for texture, printing and color. He pronounced them legitimate.

"They all look like ours," said Martin, of the Anaheim-based firm Martin & Chapman Co.

Once all the ballots are accounted for, court officials estimated, it will take about three days to process the 10,600 cast in June and the additional 20,000 ballots printed for that election but reportedly not used.

The review was ordered by Judge Judith Chirlin, who is hearing the lawsuit brought by Bradley and two City Council candidates on his slate against current Mayor Eric Perrodin, City Clerk Charles Davis and the city of Compton. Bradley lost the mayor's office by 281 votes to Perrodin, a Los Angeles County deputy district attorney. Bradley's side accuses the Perrodin camp of such fraud as stuffing boxes with counterfeit ballots and

016836

having noncitizens vote, allegations Perrodin and Davis deny.

Martin on Thursday said the first bunch of absentee ballots were uniform except that they varied in color in four shades ranging from lavender to white.

Bradley's attorney Hertz, who had offered to give Martin a magnifying glass and flashlight, wondered why the ballots could vary so much in color. "We are intrigued by that," Hertz said.

But Martin said the differences were not significant and resulted from being printed in different batches.

Both sides planned to have experts on hand Thursday. When Bradley's specialist was unable to attend the court session, his side accepted the defense experts.

LOS ANGELES

Judge Orders Inspection of Ballots in Compton

Court: The ruling involving 10,600 votes is a victory for ex-Mayor Omar Bradley, who lost his reelection attempt and is claiming fraud.

By JOHN L. MITCHELL
TIMES STAFF WRITER

November 15 2001

A day after a startling setback in his legal battle to regain his title as Compton's mayor, Omar Bradley scored a victory Wednesday when a Superior Court judge ordered the inspection of 10,600 ballots.

Judge Judith Chirlin said she was motivated to unseal the boxes because it was important to "instill confidence in the people of Compton who will have to accept the results of this [election] process."

The boxes may be opened at 9 a.m. today if the plaintiffs' ballot expert can make it. But attorneys said that it was more likely that the inspection would begin Monday. In his lawsuit, Bradley, who lost the June 5 election by 261 votes to Deputy Dist. Atty. Eric Perrodin, alleges that the voting was marred by counterfeiting and other irregularities.

On Tuesday, a key witness who was expected to testify on Bradley's behalf dealt a blow to the plaintiffs. Compton school board member Basil Kimbrew denied seeing counterfeit ballots, and accused Bradley's attorney of trying to bribe him. Bradley W. Hertz, the former mayor's lawyer, has said Kimbrew committed perjury on the stand.

Brian Pierik, the lawyer representing Compton and Perrodin, argued Wednesday that there was not enough evidence to open the ballot boxes and that Hertz waited too long to make the request.

But, he added, he was confident that no counterfeit ballots would be found.

Pierik questioned Bradley, who took the witness stand for the first time, about his relationship with Kimbrew, considered a longtime adversary of Bradley.

Pierik asked if they were such opponents in Compton, why did Bradley believe Kimbrew when the school board member told him about the fraud at a meeting in September.

"Every dark cloud has a silver lining, even Mr. Kimbrew," Bradley said with a smile. "That can only be proven by what is in the box."

Under rules agreed to by attorneys, the ballots will be inspected by experts from both sides. Though the vote

016838

will not officially be recounted, the total votes cast will be tallied and the ballots will be inspected for authenticity. The count is expected to take two to three days.

Deborah Seiler, who publishes the California Elections Report, will be coming from Sacramento, Hertz said. The defendant's expert will be available Thursday morning.

Bradley and two City Council nominees who ran on his slate, Melanie Andrews and Frank K. Wheaton, are accusing Perrodin, City Clerk Charles Davis and the city of Compton of wholesale election fraud. They say there were irregularities in more than 500 votes, including some in which the signatures didn't match those on the voting rolls.

Can anyone count votes?

CA

Friday, November 9, 2001
©2001 San Francisco Chronicle

URL: <http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2001/11/09/ED192020.DTL>

COUNTING BALLOTS in San Francisco will never be easy. Super-heated interest groups, pushy political leaders and on-the-move apartment dwellers can challenge any registrar of voters.

What's needed are experienced hands, clear rules and reliable operations. This city has none of these.

It goes too far to cry foul, as some partisans in Tuesday's election charge.

But vote counting in San Francisco has become a sad circus with ballot boxes diverted and poorly secured. City Administrative Officer Bill Lee and Elections Director Tammy Haygood refused to spell out what was taking place amid rumors of anthrax-tainted envelopes and a counting room out of sight from election observers.

The city needs an accounting of the tangled events that took place Tuesday night, as Supervisor Aaron Peskin has requested from Haygood. City Attorney Louise Renne is right to ask Secretary of State Bill Jones to investigate the confusion.

San Francisco needs a broader answer to the desultory performance it regularly gets from its elections team. Dating back to 1995, the city has botched the job through improper forms, irregular hours or or computer breakdowns. A succession of registrars never took charge.

San Francisco is still counting ballots long after other Bay Area counties have posted results and hauled vote machines back to storage. What makes this city immune to efficiency?

There are partial answers. Few registrars put up with demands for multilingual forms, absentee ballot requests generated by interest groups and high-pressure watchdogs assigned to the office by candidates and causes.

Also, both Mayor Willie Brown and his foes on the Board of Supervisors have feuded unhelpfully. Haygood, the present registrar, has no background in running elections. The office routinely asks for extra money when it busts its budget because of poor planning and overspending. A new plan, passed by voters,

takes the job away from the mayor's indirect rule and gives it to a commission, meaning more roiling changes.

Voting habits add complications. Nearly a fifth of Tuesday's ballots were absentee or provisional, which require hand checking. Provisional ballots are cast by voters, often residents who recently moved, who don't show up on polling-place books and may be registered elsewhere.

No question: There are headaches in running elections. But, whether in San Francisco or Florida, voters who exercise their sacred right should have their ballots counted with care and precision.

Count uproar eclipses S.F. election reform 63% of fed-up voters approved overhaul

Ilene Leichuk, Chronicle Staff Writer

Friday, November 16, 2001

©2001 San Francisco Chronicle

OK

URL: <http://www.sfgate.com/cgi-bin/article.cgi?file=/chronicle/archive/2001/11/16/MN232343.DTL>

San Francisco -- Lost in the shadow of San Francisco's bizarre ballot controversy last week, voters approved a measure that demands the city clean up the beleaguered Elections Department -- and end its history of elections problems.

Proposition E passed with nearly 63 percent of the vote, a strong signal that voters are fed up with slow counts, conspiracy theories about missing ballots and the director's office revolving door.

Proposition E creates a new seven-member commission to run the Department of Elections and hire a director -- replacing a system that has produced five directors in as many years and is under investigation by the secretary of state.

That could mean the newest elections chief, Tammy Haygood, who is already in the hot seat after last week's election, could be replaced by the new commission.

The proposition was one of several written by the Board of Supervisors to shrink the power of the mayor, who is in control of the elections office. Mayor Willie Brown's chief administrative officer, Bill Lee, has chosen the past few elections' directors, including hiring Haygood a few months ago.

"Prop. E is the first step to ensuring honest and independent elections in San Francisco for the first time in 25 years," said Supervisor Tony Hall, one of the measure's authors.

Hall has a personal interest. He believes votes were tampered with during his tight race last fall against Brown-backed Supervisor Mabel Teng. Hall won by 38 votes.

"I think there's been a lot of maneuvering," Hall said. "I think some elections have been manipulated."

But the mayor has recently defended the elections staff for doing good work under unusual amounts of scrutiny. As for his influence over Haygood or other directors, Brown has said he steers clear of the department precisely so he won't be accused of pulling strings.

Lee also insists that San Francisco runs clean elections.

In fact, few allegations of fraud have ever been proved, although grand jury studies have found bureaucratic fumbles.

"Running the elections office is the most difficult job in the city because if someone loses, they always want to blame the elections office," Lee said.

Haygood saw exactly how difficult her job could be last week, when two controversial measures to create a public power agency hung in the balance.

016841

Miscommunication by Haygood and her staff about whether absentee ballots were moved from City Hall sparked several tense news conferences with the elections director. Despite early denials by elections officials, absentee ballots arriving in the mail were moved to a separate building as a precaution against an anthrax threat. That angered public power advocates who argued that those ballots weren't watched and might have been easy targets for tampering.

History fueled the controversy. Past election follies in the city include incorrectly printed sample ballot books, misplaced and duplicate ballots and wet ballots that had to be dried in a microwave.

Making matters worse, allegations hanging over the November 2000 election remain unresolved. The secretary of state is expected in the coming days to release a report after a six-month investigation into the department's actions in that election.

Proposition E attempts to restore voter confidence. Seven city agencies each will appoint one member to the new Elections Commission, including the mayor and Board of Supervisors. The measure calls for the commissioners to take office in January.

Others making appointments to the commission are the district attorney's office, the city treasurer's office, the board of education, the city attorney's office and the public defender's office -- all headed by elected officials.

City employees from other departments are banned from helping with elections, except on election day, without Board of Supervisors approval.

The measure also mandates that sheriff's deputies escort ballots every step -- from polls to City Hall -- on election day.

The measure further requires poll workers to post how many ballots were cast at their sites and how the precinct voted. The new computerized Eagle machines, where voters deposit their ballots after voting, can make that information available in seconds.

"Then there can't be an allegation made (on election night) that more ballots suddenly appeared from somewhere," said Supervisor Matt Gonzalez, who helped write the proposition.

Jim Chappell of the San Francisco Planning and Urban Research Association, which opposed Proposition E, said cutting the mayor's alleged influence on the cash-strapped and short-staffed department wouldn't solve anything.

"Adequately funding the department will make it different," Chappell said.

Local election reform might not stop here with supervisors considering a variety of other measures.

City attorney candidate Jim Lazarus, who is vying against Dennis Herrera in the Dec. 11 runoff, said that if elected, he would create a legal elections task force that would include representatives of the secretary of state and district attorney.

San Bernardino County Computers Scramble Elections

CA

Glitch: Programmer's error leaves 33 races in doubt. Some counted as last night have won, red-faced officials say.

By BUCK WARGO
SPECIAL TO THE TIMES

November 10 2001

ONTARIO -- Computer ballot-counting errors in San Bernardino County this week have thrown 33 races into doubt and may be so serious that those listed as getting the least votes actually might be winners, the registrar of voters said Friday.

A county employee erroneously programmed the computer so that, for instance, it sometimes read the punch-card lists from the bottom up. A hole punched for the last candidate listed in a race, therefore, would have been read as a vote for the first, county spokesman David Wert said.

A recount of all 82 races and 85,000 ballots cast on Tuesday will be completed by next Tuesday, he said. "There are going to be at least a few races in which people who appeared to have won and were the high ... [vote-getters] were actually the low ...," Wert said. "Some races are going to be reversed."

Most of the races affected were school boards or community college districts throughout San Bernardino County. Nine were in water districts or special districts. No city races were affected.

"It is going to be a long three days," said Bill Klein, who had appeared to be an upset winner in the Chino Valley Unified School District, ousting one of two longtime incumbents. "It is a case where you are frustrated, shocked and concerned."

In the Ontario-Montclair School District, 20-year incumbent David Van Fleet of Ontario said he was shocked to see the final tally showing that he finished sixth out of seven candidates. He had expected to finish in the top three and win his sixth term.

"Everyone that came up to me afterward said they went out and voted for me," he said. "They asked me how could I lose. I couldn't explain it."

The name of the programmer responsible was not released, but officials said the person is a veteran county employee. The employee reported that tests before the election showed the system was working correctly, said Registrar Ingrid Gonzales, who oversees elections.

The county brought in a consultant, software provider DIMS Inc., on Thursday to review the programming and found the errors, Gonzales said. The testing and analysis the employee said had been done apparently was not, Gonzales said.

016846

In some cases, the computer began counting in the middle of the ballot, so some holes weren't counted at all, Gonzales said.

Based on the review by DIMS, the candidates' totals will certainly change in 26 races. Officials are not sure what effect, if any, the error had on the other seven races in doubt.

"For some races, it may not have any effect on people who were going to lose anyway, but a significant number of races could be changed," Gonzales said.

The city election results will be counted Tuesday as well, just to make sure there were no problems and to give people confidence in the results, Gonzales said. A test showed the computer was programmed correctly for municipal races, she said.

Officials became concerned Tuesday night when the computer showed no votes cast for the Big River Community Services District board of directors.

An extensive review of the election system was conducted Wednesday through Friday, and widespread errors were found, Gonzales said. A letter was mailed to more than 300 candidates on Wednesday notifying them of potential problems.

"This is certainly rare, but it happens," said Gonzales, who has served eight years as registrar and 21 years in the field. "You hear stories across the nation about elections being tainted. I never thought it would happen here."

From now on, an outside firm will be brought in before all elections to confirm that computers are properly programmed.

"It's hard to describe how personally disappointed I am that this has happened," Gonzales said. "I would like to assure the public that we know exactly how this error occurred and that measures are underway to prevent it from ever happening again."

County officials said the good news is that using a card-counting system means that ballots are still around to be recounted. If the same error had occurred with an electronic voting system, there would be no paper record, Wert said.

The employee responsible for the error has been disciplined, but Wert declined to say how. Gonzales said the person still is on the job but has been taken off computer programming duty.

Officials: Should Sequoia's proposal be tossed?

November 12, 2001

By Deborah O'Neil and Thomas C. Tobin
St. Petersburg Times

The Louisiana court documents paint a damning portrait: Voting equipment executive Phil Foster received manila envelopes stuffed with as much as \$40,000, to be delivered as kickbacks.

That money was part of a vast voting machine scandal that resulted in charges against 25 people, three of whom told prosecutors Foster was involved.

But Foster's bosses at Sequoia Voting Systems were so confident of his innocence that they let him take a lead in trying to sell, among other packages, \$2 million worth of touch-screen voting equipment to Indian River County and \$15.5 million worth to Pinellas County.

Indian River County commissioners Tuesday voted to void the deal they had already signed with Sequoia when they learned of Foster's Louisiana indictment.

Every Florida corporation is complete and includes articles of incorporation, corp minutes, corp bylaws, corp book, corp seal, stock certificate, preliminary name search & attorney fee plus s.h. Miami. Also Florida Corporations available for immediate delivery

Now, amid intense statewide scrutiny, the commissioners are joining their Pinellas colleagues in weighing whether unproven accusations against a company representative should be enough to throw out Sequoia's proposal.

The entire nation is watching as Florida reforms its election process, said Susan MacManus, a University of South Florida political scientist and chairwoman of the Florida Elections Commission.

"Anything related to voter equipment that even smells bad will be and should be carefully investigated for the good of all," MacManus said. "The scrutiny doesn't stop at the county boundary. It goes national."

In Tampa, Hillsborough County has recently launched a review of the case against Foster, said Supervisor of Elections Pam Iorio.

"I think it is important to know what litigation the companies are facing across the country," Iorio said. "These (the charges against Foster) are very serious allegations."

But others wonder how much the charges matter. In Tallahassee, Leon County Supervisor of Elections Ion Sancho, whose county boasted the lowest error rate in the state in the presidential election, said that while news about Foster "raises the specter of impropriety, I don't know to what degree you could point to the company as bad."

Sequoia's product, he said, "is as good as what I use."

And the quality of the machines is why Indian River County chose Sequoia, said Kay Clem, the county's elections supervisor.

She said she made the decision knowing all about Foster's legal problems, adding, "I thought everybody knew about it."

"I'm not buying Phil Foster," Clem said. "I'm buying Sequoia's voting system."

Foster's charges are part of a decade-long corruption scandal that reached as high as the state's elections commissioner. Foster is charged with two counts of conspiracy to commit money laundering and one count of conspiracy to commit malfeasance in office.

Already, 15 people have pleaded guilty in the case, said Assistant District Attorney Sandra Ribes in Baton Rouge.

Three of them, including Foster's brother-in-law and the state commissioner of elections, pointed the finger at Foster in their guilty pleas. According to court records, Foster had Sequoia designate his brother-in-law, J. David Philpot, as its exclusive agent in Louisiana.

Then-Louisiana Elections Commissioner Jerry Fowler declared Philpot the sole source of a certain type of voting machine, allowing them to circumvent the state's bidding laws and inflate the prices of the machines.

016847

Foster and Philpot also arranged to sell counters for voting machines at inflated costs, according to court records.

Money was funneled to Fowler in kickbacks, and court records indicate Foster played a role in passing along the cash.

On at least five occasions, Philpot handed Foster manila envelopes with \$20,000 or \$40,000 of kickback cash to give to another person involved in the scandal, Philpot says in court documents.

Also, Fowler told prosecutors that Foster would put cash kickbacks in a desk drawer for him. Foster's Baton Rouge lawyer, Karl Koch, said the case against his client is built on statements by admitted criminals.

"My investigation of the charges reveals he hasn't done a thing in the world wrong," he said.

Foster didn't know what was in the sealed envelopes he brought to Louisiana for his brother-in-law, who was in Birmingham, Ala., Koch said.

"Phil wasn't handed bundles of cash or wads of cash," Koch said.

Nor was Foster in a position to get his brother-in-law named as a company agent, Koch said.

Both Foster and Sequoia have fully cooperated with the investigation, Koch said.

Clem has stressed that the

016848

company has not been implicated.

Sequoia President Peter Cosgrove said the company has nothing to hide. The company assumed, he has said, that Pinellas and Indian River officials were aware of Foster's legal problems, which he said were "well, well known."

The company has not removed Foster from his responsibilities as Sequoia's southeastern vice president, Cosgrove said, because it doesn't believe he has done anything wrong.

"We will not put down an innocent man," he said.

However, if Pinellas prefers, Sequoia will withdraw him from the project, Cosgrove said.

Clem, in fact, has said she dealt not with Foster but with John Krizka, Sequoia's agent in Jupiter.

Indian River County Administrator Jim Chandler, however, has said Foster was the one who negotiated the final price with him.

Cosgrove added that the charges should not affect the county's decision about the purchase of the new voting equipment. All the reasons that Pinellas and Indian River officials intended to buy the system remain, he said.

"None of those reasons have changed," Cosgrove said.

"Follow The Chad"

an investigation
into the ownership
of america's
"election services industry"

an american election

BAY OF PIGS 2000: THE FLORIDA SURPRISE

It has all the ingredients of a Silent Coup in some
jerkwater Banana Republic...

There are shadowy figures from Organized Crime
rubbing elbows in Miami restaurants with "retired"
CIA agents and Bay-of-Pigs-era Cubans...

"Business" is conducted ever-so-discreetly, covert op
style, behind the heavy velvet drapes of dummy
"front" companies...

And since these are rarely bloodless affairs, there's a
dead body (or two or three) lying around somewhere
in the background. In court, one lawyer has even
called it a "sinister conspiracy," language
uncharacteristically-blunt for civil proceedings.

But this coup isn't just another Central American
"transfer-of-power;" it involves, instead, the possible
subversion of the very democratic process itself.

Only this time it didn't take place in a country with a
foreign-sounding name...but in the United States of
America.

In November. In Florida.

"Tangled Webb City"

Here's a brief run-down on a few of our "players:"

watch a clip
(1minute 30 sec.)
from
"Follow the chad!"

Harold and Herb Webb are twin brothers operating election service industry companies in New Jersey. These companies, Garden State Elections and Elec-tec, were used to conceal transactions involving election services industry giant Sequoia Pacific, according to court documents, which fingered that company last week for orchestrating a 10-year long bribery scheme involving the Commissioner of Elections for Louisiana.

order a signed advance copy of "barry and the boys" now!

But Harold and Herb Webb aren't even the only Webb's in this tangled scheme...Industry giant Sequoia Pacific's General Manager's name is Hugh Webb.

Harold Webb, Herb Webb, and now Sequoia's Hugh Webb. Is it just a 'tangled Webb?'

Or something *more*?

"We don't know why we broke into the Watergate, honest."

read the INTRODUCTION

Herb Webb, president of a firm proven to have acted illegally on Sequoia Pacific's behalf, denied to this reporter even *knowing* Hugh Webb.

Part I

Sequoia Pacific head honcho Hugh Webb returned the favor, denying knowing either Herb *or* Harold Webb... a neat trick, since Harold Webb has admitted to prosecutors that he was acting on behalf of Hugh Webb's company.

PART II

Part III

Prosecutors have the ability to untangle this tangled Webb. The question is: *will they?*

Part IV

There is even *another* extended "family," that of Sequoia Pacific's Southern Regional Sales Manager Phil Foster, with deep connections to the bribery scheme... Phil Foster is about to be indicted in Louisiana, while his brother-in-law, David Philpot, is soon to stand trial.

And then there is also James Foster, of James Foster Associates, the Texas firm which printed Florida's Republican absentee ballot applications...Remember *them*? The ballot applications where a voter i.d number had been "*inadvertently*" left off?

"Follow the Chad"

Sequoia Pacific operates through a number of dummy front companies.

Pasquale "Rocco" Ricci's company, International Voting Machines, was really Sequoia Pacific. Harold Webb's Garden State Elections was really Sequoia Pacific. So was Herb Webb's Elec-tec. This is a list which could quickly grow much longer.

Many Florida Counties involved in the Vote Snafu used tabulating machines from Sequoia Pacific disguised as being from other vendors; Sequoia actually supplied both computer and punch card systems to Florida, in counties where their name has not yet surfaced.

The reason for all this elaborate deception? Clearly, some people have gone to some little trouble in an elaborate attempt to conceal Sequoia Pacific's role. Why?

A reporter for the Fresno Bee interviewed Hugh Webb recently. He told us, about Webb, "I was taken aback by his secretive nature."

There is a joke making the rounds just now in Southern State Capitals; like much humor it contains an uncomfortable truth that cannot yet be spoken in polite company...

"The *real* vote snafu in Florida," goes the joke, "concerns what happened after the Sunshine State purchased used election machines from the state of Louisiana, and on *those* machines Edwin Edwards was elected President in a landslide."

There's a hidden truth behind the sarcasm: Edwards is the convicted former Louisiana Governor, and the 'one-liner' describing this budding scandal threatening

016853

to burst out in screaming Technicolor is this:

"Florida used the same (doctored) machines as Louisiana. And they came from the same 'shadowy' sources."

(to be continued.)

State is ordered to seize ballots in Detroit election

BY BEN SCHMITT
FREE PRESS STAFF WRITER

November 24, 2005

Acting on a request from defeated Detroit mayoral candidate Freman Hendrix, a Wayne County judge ordered the Michigan Secretary of State's Office on Wednesday to take control of all the ballots in the Nov. 8 election and keep them locked in a vault until a recount can be done.

A federal investigation of possible irregularities with absentee ballots, trouble with vote-tabulating equipment on election night, the fact that about 3,000 votes weren't counted until two days after the election and suspicious of ballot tampering led to the request.

Detroit city attorneys vehemently opposed Hendrix's move, calling it unnecessary. Detroit City Clerk Jackie Currie, who oversaw the election, did not object.

After Wednesday's ruling by Chief Circuit Judge Mary Beth Kelly, state elections officials had trucks en route to Detroit to take control of the ballots. State Elections Director Chris Thomas said the office would keep the ballots in a state building in Detroit.

The ruling came a day after Hendrix filed the request for a recount in an election that he lost to incumbent Mayor Kwame Kilpatrick by more than 14,000 votes.

Nonetheless, Hendrix's attorney, Elizabeth Hardy, said Hendrix had no choice but to request the ballot seizure after learning that Department of Elections rooms, where ballots were being held, were left open without a security guard during Tuesday's meeting of the city Board of Canvassers to certify the election.

Hardy also said Hendrix suspects there was fraud in the election. The suspicion "is based upon very pronounced anomalies in the election results," Hardy said. "If there was fraud, there obviously would be a motivation to destroy the evidence of fraud."

City Attorney Ruth Carter said there is no evidence of tampering and urged Kelly not to be persuaded by perceptions that something is amiss.

"There's no evidence of fraud," Carter said.

But Kelly said that ordering the state to take the ballots wouldn't harm either candidate.

"If there is to be a recount, the mayor has a stake in it," Kelly said. "I think the integrity of that recount is served by having the ballots removed from the possession of the city. I also think the public interest is served."

Kilpatrick has not yet decided whether he will file an objection to the recount, which county officials said will cost \$250,000 to \$500,000.

Kelly noted that Currie, through her private attorney, Steven Reifman, did not object to the state taking control of the ballots.

Freman Hendrix

MS

Kelly said Currie's acceptance of Hendrix's request -- coupled with concerns over ballot security and election irregularities -- caused her to make the decision. She noted that Detroit officials had lost track of ballots in nine precincts and did not count them until two days after polls closed.

In one case on election night, a poll worker took home two computer data packs containing ballot information and didn't turn them in until the following day.

"I don't think anyone can dispute that there have been irregularities," Kelly said.

Kelly had already granted federal prosecutors' Election Day request that the state preserve absentee ballots to make sure Currie's office handled them fairly and legally.

On Tuesday, city Department of Elections Director Gloria Williams asked Thomas to take possession of all the ballots, and he refused. Carter argued that Thomas' refusal showed the state has no concerns about tampering.

Sheriff's office joins watch over Detroit ballots

MT

2 judges divide on security needs

BY KATHLEEN GRAY and BEN SCHMITT
FREE PRESS STAFF WRITERS

November 26, 2005

So who's minding the ballots from Detroit's election?

Seems like just about everybody at this point.

Responding to an emergency request from Mayor Kwame Kilpatrick, a Wayne County judge, early Thursday, ordered the county sheriff's department to guard a Secretary of State office to make sure no one tampers with ballots cast in the Nov. 8 election.

Those guards are in addition to the Michigan State Police troopers already protecting the ballots at the office in Detroit's New Center, where they were taken Wednesday after another Wayne County judge ordered them held for safekeeping.

Even before the election, there were concerns about the counting of absentee ballots. Since then, it has only gotten more complicated.

On Wednesday, Freman Hendrix, who lost the election to Kilpatrick by more than 14,000 votes, won an order from Chief Circuit Judge Mary Beth Kelly to place the ballots in the state's control until Hendrix's recount request is considered by the county.

Then, in the wee hours Thursday, Circuit Judge Cynthia Stephens signed an order granting Kilpatrick's request that the sheriff's department provide additional security.

Kilpatrick's lawyers said it was essential to maintain the integrity of the ballots. Questions of tampering had already been raised: Detroit officials lost track of ballots in nine precincts and did not count them until two days after polls closed. In one case on election night, a poll worker took home two computer data packs containing ballot information and didn't turn them in until the next day.

"When I spoke to the people from the state Bureau of Elections, they were not sure what security would be available," said Kilpatrick lawyer Reginald Turner. "Needless to say, all the parties in this matter have an interest in the security of the ballots."

State Elections Director Chris Thomas said as soon as the state took custody of the ballots, a trooper was dispatched to guard them.

"This is more theater than anything else. These ballots are getting more security than any ballots in the history of the state," said Thomas, who has noted that there has been no evidence yet of vote tampering. "It's very disappointing."

In Kilpatrick's request, Turner said they couldn't reach the other parties involved in the case. They also said they couldn't reach Kelly.

Detroit Mayor Kwame Kilpatrick was granted a request Thursday to increase security for ballots from the Nov. 8 election.

016857

But Kelly and lawyers for Hendrix and for City Clerk Jackie Currie, who is named as a defendant in Hendrix's lawsuit, said Friday that they weren't called.

"I was physically available Wednesday and Thursday," said Kelly.

"Clearly, Judge Stephens has no jurisdiction to act in this matter. Her order is void and will be vacated first thing Monday morning,"

Hendrix's lawyer, Elizabeth Hardy, said the mayor's representatives are showing their "desperation to take control of the ballots."

Currie's lawyer, Steven Reifman, added, "I am shocked by the procedure and the fact that nobody made any attempt to communicate."

Lott says voting fraud is problem

By Kevin Walters

American Staff Writer kwalters@hattiesb.gannett.com

Even though both Rep. Mike Lott, R-Hattiesburg, and Secretary of State Eric Clark favor voter identification, a rift between the two over the matter was exacerbated by comments Lott made during a speech Monday.

"Our secretary of state told me face-to-face that apparently we don't have much voting fraud because we don't hear much about it," Lott told about 40 people at the Lake Terrace Convention Center during his Legislative Update speech. "I told him face-to-face we have a lot more rapes going on on our college campuses than we know about because they don't get reported. Just because they're not reported does not mean that it's not happening."

Voter identification would require voters to show proof of who they are before they vote.

As an example of voter fraud, Lott, 47, who is seeking the Republican nomination to challenge Democratic U.S. Rep. Gene Taylor for the 4th District House of Representatives seat, cited a voter list he said was used at a voting precinct in Clinton in the November election that he said had numerous discrepancies such as:

- Eight voters' names in a row, all in alphabetical order. "It was amazing that people came in in alphabetical order to vote," Lott said.
- A man's name was repeated twice in the voter roll - in two different styles of handwriting, Lott reported.
- That same man's wife was also on the roll, Lott said, although the woman had been dead for three years.

Lott said later that he was uncertain if the person who showed him the information - whom he did not identify - had alerted authorities about the fraud.

The Hinds County District Attorney's office did not return a call about this matter.

Clark said later Monday he had no knowledge of the Clinton voter roll problems, but said Lott had misrepresented his side of their conversation about voter identification legislation in Mississippi.

"I'm sorry that Rep. Lott decided he needed to misquote me and be critical,"

016859

FBEO

Clark said in a phone interview. "I have the strongest track record of anybody in the state of combating voter fraud."

Lott also said Monday that Mississippi could lose \$40 million in federal funding if legislators do not pass voter I.D. during this session.

But Clark's office said Monday that Mississippi's share of money from the federally funded Help America Vote Act is actually \$34 million and that the federal funding is not endangered. The money would be used to upgrade the state's outdated voting equipment.

Called for clarification about the federal funding, Lott said he and other legislators in the House were misled last year about a deadline existing this year to receive the funding.

"We were led to believe that this had to be passed, that we were pushing against a deadline and we would not receive the money," Lott said later after he personally called Clark's office for more information. "There seems to be a lot of changing of minds going on in the secretary of state's office."

Clark said he is trying to improve voting rolls by tightening absentee ballot procedures and removing the names of dead people and those in jail.

"However much there is (of voter fraud) is too much," Clark said.

The Denver Post

ca

Baker blamed for downed machines needed in recall vote

By George Merrill
Denver Post Staff Writer

Thursday, February 12, 2004 -

ARAPAHOE COUNTY - County officials have said they will have to spend nearly \$100,000 to replace batteries in 800 voting machines to ready them for Tracy Baker's recall election Feb. 24.

County Attorney Kathryn Schroeder placed the blame on Baker, saying that maintaining the machines is one of the most basic parts of his job as clerk and recorder.

"It is crucial to holding our elections," Schroeder said.

A county employee has accused Baker of ordering him to discontinue maintenance of the machines, effectively disabling them. The employee is now on leave after filing a complaint against Baker with the Equal Employment Opportunity Commission.

"It is an act of sabotage," said Marl Newman, the attorney for Woodrow Barnes, the employee making the claims.

Newman said that when her client protested Baker's order, Lisa Sale - Baker's girlfriend and assistant chief deputy - told him, "Well, that is (the county's) problem, and they can deal with that."

The problem was discovered in October, but officials said the batteries can't be recharged once they are drained.

Denver attorney Rick Daily said that if the county could prove Baker told an employee to neglect equipment, Baker could face criminal charges.

Baker denies any responsibility for the gaffe. He said Barnes' and Newman's claims were "libelous."

Baker said he installed the election machines himself in 1986 and would never sabotage them. County officials are at fault for placing Barnes, who was responsible for the machines, on leave, Baker said.

CT

Caruso is campaigning to bring election reform to Bridgeport

 [PRINT ARTICLE](#)

(09/23/03) BRIDGEPORT - After his failed run in the Bridgeport Democratic mayoral primary, State Representative Chris Caruso (D-Bridgeport) has decided not to challenge the results in court. Instead, he plans to file fraud complaints with the state Elections Commission.

Caruso says he discovered that 144 people went into the polling places, but their names were not check off on a voting list. He also alleges some voters were able to vote twice while other were denied voting privileges.

By not going to court, Caruso has given up the possibility of a judge overturning the election, which means he won't have a chance to run for mayor in November.

As for any fraud in the Primary election, it will be up to the state Elections Commission to investigate.

Ballots held in county races

Albany – Court order sets out extensive process to verify absentee votes in three Democratic primaries

By CATHY WOODRUFF, Staff writer
First published: Saturday, March 6, 2004

All absentee and paper ballots and 47 voting machines used in three Democratic primaries for the Albany County Legislature were impounded Friday under a court order that also sets out an extensive process for verifying the votes.

State Supreme Court Justice Louis Benza signed the order requested by Democratic primary candidates Wanda Willingham and Lucille McKnight, both incumbents, and Ward DeWitt, who challenged District 4 incumbent Virginia Maffia-Tobler.

The three candidates, all African-Americans represented by attorney Paul DerOhannesian, asked that no winners be certified in the special primaries until voting machines are inspected and recanvassed and the validation of absentee and other paper ballots is completed.

The court order and heightened ballot scrutiny are the latest developments in a hotly contested special election ordered by federal courts earlier this year to correct district lines that shortchanged minority voters.

In all three races, significant numbers of absentee ballots remain to be counted, including many that were distributed by a Democratic ward leader and other supporters of the three candidates' opponents.

"There is at least the perception of the possibility of influence on voters with someone delivering ballots and looming over you as you fill it out," DeWitt said Friday. "The process is fraught with the opportunity for influencing the voter."

The closest race, according to unofficial machine tallies, is in Legislative District 3, where Willingham holds a slim 217-213 lead over Jestin Williams.

However, Board of Elections records show that 225 absentee ballots were issued for District 3. More than half – 131 – were released to 3rd Ward Leader Jamie Gilkey -- who backs Williams -- for delivery to voters.

Of the 139 absentees returned to the board as of Thursday afternoon, 105 were handled by Gilkey.

Willingham called the distribution of so many ballots through a partisan campaign worker "an embarrassment to the Albany County Democratic Party." She said she believes she has been targeted by a small party faction "because I have my constituents at heart, not the interests of a particular administration at City Hall or the head of the county Democratic Committee."

Efforts to reach Mayor Jerry Jennings and Democratic Chairwoman Betty Barnette for comment Friday were unsuccessful.

Many District 2 absentee ballots also were handled by Gilkey and an associate who worked for

McKnight's challenger, Marilyn Hammond.

In unofficial machine results, McKnight trails Hammond, 210-177. Of 113 absentee ballots issued, 11 were released to Gilkey and 27 to Dennis Bagley, a Democrat who ran against Common Council member Carolyn McLaughlin, Willingham's sister, in 2001.

Bagley and Gilkey, an employee of the Albany Housing Authority, distributed 18 of the 41 absentee ballots returned for District 2.

Hammond and Williams both released statements Friday asking that all the absentee votes be counted and the results allowed to stand.

"They shouldn't try to use the courts to block the will of the voters," Hammond said. "We should just let everyone's voice be heard in the political process and count all the votes."

Williams said: "Those ... people have a right to have their votes counted."

McKnight, however, said Bagley and Gilkey's control over distribution of so many ballots in her heavily minority district makes it unclear whose voice is speaking through those votes.

"Why are these two white men serving as an agent for someone trying to defeat two black women?" she asked, referring to Bagley and Gilkey.

Hammond and Williams, like McKnight and Willingham, are black.

In District 4, where new district boundaries were supposed to improve chances for minority voters to elect candidates of their choice, unofficial machine tallies show DeWitt, who is black, trailing incumbent Maffia-Tobler, who is white, 168-157.

Some 195 absentee ballots were issued in District 4, including 26 to Tyler Trice, who DeWitt says seemed to be participating in the Maffia-Tobler campaign. Trice has been an employee of the Albany Housing Authority, though it could not be determined on Friday whether he still is. He ran unsuccessfully for the city school board in 2002, with the backing of the mayor.

Trice handled 17 of the 101 absentee ballots for District 4 returned by Thursday afternoon, according to Board of Elections records.

per machine may also be needed in polling places that have large numbers of elderly voters or persons with limited ability in English because such voters may require more time.

FEDERAL OBSERVERS MONITOR STATE AND LOCAL ELECTIONS IN 15 COUNTIES IN 8 STATES

The Justice Department sent 160 federal observers and 39 Civil Rights Division personnel to 15 counties in 8 states to monitor the November 4 state and local elections. Reasons for the observers varied with the counties.

For three counties, the federal observer authority came from court orders. Observers were sent to another eight counties based on special coverage provisions of the Voting Rights Act. Federal observers monitored eight counties in Mississippi: Humphrey; Jones; Kemper; Leake; Neshoba; Newton; Noxubee; and Winston. They also observed elections in Wayne County (Hamtramck), Michigan; Passaic County, New Jersey; and Berks County, Pennsylvania.

Civil Rights Division personnel, most of whom were attorneys, monitored elections in San Francisco County, California; Jefferson County, Kentucky; Essex County (Lawrence), Massachusetts; Queens County, New York; and Harris County, Texas.

The observers and Department personnel monitored to determine whether these counties and localities were complying with federal voting laws, including minority language provisions of the Voting Rights Act; whether voters are challenged improperly on the basis of race, color, or language minority. The observers also monitored to determine whether jurisdictions were permitting voters who are blind, disabled, or unable to read or write to have assistance by a person of their choice, as well as permitting all eligible voters to cast a ballot.

ONONDAGA COUNTY N.Y. IMPROVES ITS PROCEDURES TO ENSURE VOTING MACHINE BALLOTS ARE CORRECT

The Onondaga County, New York Board of Election Commissions following the election November 4 introduced improved procedures for voting machine preparation to ensure that all candidate's names are on the ballot, and that they are in the right row or rows.

Onondaga County uses AVM lever voting machines in which the names of the candidates are on strips that are inserted into the ballot face of each machines. On election morning in November, election officials were advised that one voting machine had been set up incorrectly.

When election officials checked the machine after 26 persons had voted, they discovered that *no* Democratic candidates were listed because that machine contained no B row strips. Instead the machine had two C row strips with the names of the Independence Party candidates. Technicians inserted a row B strip that contained the names of Democratic candidates, but the strip contained the wrong ballot style for that election district. The name of county legislative candidate Donald MacLaughlin never appeared in the Democratic row on that machine.

The omission took on added importance when the votes were tallied and MacLaughlin lost to incumbent Republican Bernard Kraft by only 165 votes. MacLaughlin's name, which should have

appeared twice -- as the nominee of the Democratic and Working Families Party -- only appeared once on this voting machine as the nominee of the Working Families Party. Kraft's name appeared on the ballot face three times, as the nominee of the Republican, Conservative, and Independence Parties.

After examining the situation, MacLaughlin conceded the election because the error could not have reversed the outcome. Only 164 votes had been cast on the machine in question of which MacLaughlin received 40 votes on the Working Families row. Because no other candidate on the Working Families line received more than 10 votes on this machine, it appeared that some voters Democrats who wished to voted for MacLaughlin as a Democrat found his name on the Working Families party line.

Onondaga's corrective actions. Onondaga election procedures will now require two persons (rather than one) to check both the front and back of each voting machine when it is set up. Polling place officials will have a checklist of items they must check off including verification of each party strip, and each name on each strip.

In addition, the ballot style numbers, which had been printed in small type, will now be printed in large numerals so that ballot style numbers will not be easily confused. In this election for example, with the small print it was easy to confuse ballot style 36 with ballot style 38. The row initials, Row A, B, C, D, or E, will also be printed in large letters on the right side of the ballot strip.

TAVARES, FLORIDA SAVES \$5,000 FLIPPING COINS INSTEAD OF CONDUCTING COUNCIL ELECTION

The City of Tavares, Florida decided that \$4,500 to \$5,000 it would have to spend on an election to determine which councilmembers would serve two-year terms, and which one would serve a one-year term could be better spent elsewhere. With the agreement of the only three candidates for at-large council seats, the city council passed a resolution to settle the matter by flipping coins rather than going to the voters.

Three at-large council seats were up for election in November, 2003, with two of them for two-year terms. The third seat, held by Councilmember Nancy Clutts, was for the one-year remainder of a term to which Councilmember Norb Thomas had originally been elected.

Only three candidates, including Clutts, qualified to run for council, therefore all were deemed elected. Because the city charter failed to specify how the three seats were to be assigned, the city council resolved the matter in September by resolution rather than holding a November election.

The resolution provided that on November 5 the three newly-elected council members simultaneously flip a coin provided to them by the City Clerk. *"The two candidates whose coins land on the same face (either both heads or tails) shall be deemed elected to the two year council terms. The candidate whose coin lands on the opposite face shall be deemed elected to a one-year term."* The resolution provided for a re-toss if all coins land on the same face.

City Clerk Nancy Barnett, who supplied half-dollar coins for the flip, told *Election Administration Reports* the candidates had to flip three times before they produced a 2-1 split that determined the terms.

Police NewsCourt date postponed in PBA election case

UTICA — A court date for a civil action by Utica police officers alleging ballot box tampering in the most recent police union election was adjourned to April 17 and 18, court officials said Thursday.

The legal action, requesting a new election, was filed in state Supreme Court last month by Utica police Sgt. Gary Glatt, who was defeated by incumbent Sgt. James Franco in a bid for the John E. Creedon Police Benevolent Association presidency during the Dec. 9-10 election.

The action alleges a discrepancy in vote tallies as well as improper placement of the ballot box and the immediate disposal of the ballots after the election, court documents state.

Police arrest 3 on drug charges

UTICA — Police Thursday arrested three people and seized an ounce of crack cocaine with a street value of \$2,500, marijuana and money in the 1200 block of Whitesboro Street, the state police Community Narcotics Enforcement Team said.

Terrel L. Loadholt, 24, was charged with criminal possession of crack cocaine with intent to sell, a felony. Two other Uticans, ages 22 and 27, were charged with unlawful possession of marijuana.

Loadholt was sent to Utica City Jail pending his arraignment today. The other two were released on appearance tickets to return to Utica City Court.

HEADLINE: JUDGE REVOKES BAIL IN TRIAL OF EX-UNION CHIEF

BYLINE: By William Murphy. STAFF WRITER

BODY:

A former top city labor official had his \$125,000 bail revoked yesterday after a court-appointed psychiatrist found he was not mentally fit to be tried on charges of stealing more than \$1 million from his union.

Al Diop, 67, who had been in an in-patient program at Lenox Hill Hospital, was ordered transferred to a jail ward at Bellevue Hospital by State Supreme Court Justice William Leibovitz.

The judge set Dec. 8 for a court hearing at which the Manhattan district attorney's office can challenge the finding of the court-ordered evaluation.

The embezzlement trial would be Diop's second in connection with prosecutors' probe into widespread fraud at District Council 37, an umbrella organization representing 125,000 municipal workers. Diop was previously convicted of fraud for rigging a vote to ratify a controversial five-year contract that gave city workers no raise for the first two years.

Prosecutors and defense attorney Ramon Pagan said it was unlikely Diop would be sentenced as scheduled next week on his conviction over the contract vote.

An investigation by the Manhattan district attorney's office had found that top union leaders stuffed ballot boxes, opened ballot envelopes and misreported votes.

Diop had been president of Local 1549, representing 22,000 city clerical workers, and was a member of the DC 37 executive board.

The vote fraud led to a deeper investigation that resulted in convictions for a variety of charges, including a scheme that inflated the price of holiday turkeys given to union members, with the supplier kicking back a percentage of the inflated bills to union leaders.

Diop's attorney said the finding by the court-appointed psychiatrist was consistent with what private psychiatrists at Lenox Hill had found.

"The court has not yet made a determination on his fitness to proceed or his mental competency," Pagan said, adding that all reports so far were recommendations to the court, not legal findings.

"The prosecution will now have an opportunity to challenge the finding of the court-appointed forensic psychiatrist," Pagan said.

Diop faces up to four years in prison for his conviction in the vote fraud.

His three codefendants in the case involving the theft of money pleaded guilty last month. One agreed to a sentence of probation; two accepted pleas calling for prison terms of 1 1/2 to 4 1/2 years in prison and 2 to 6 years in prison.

Councilman charged with vote tampering

Friday, November 11, 2005

ASSOCIATED PRESS

NS

TRENTON - The state Attorney General's Office on Thursday announced the indictment of an Atlantic City councilman on charges of tampering with absentee ballots before the city's June 7 primary election for mayor and city council.

Marty L. Small, 31, has been charged with 10 counts of tampering with public records and one count of hindering or preventing voting. An arraignment is expected in the coming weeks in state Superior Court in Atlantic County.

"The integrity of the ballot is paramount to our democracy, and we will prosecute those individuals who attempt to tamper with any citizen's vote," Attorney General Peter C. Harvey said in a news release.

Small is accused of filing absentee ballot applications for 10 people. He represented himself as their "authorized messenger," when he had no such designation from the voters.

A registered voter in New Jersey has the option of having a person pick up their absentee ballot if they are unable to file for the ballot themselves.

Small faces up to 5½ years in prison and \$160,000 in fines if convicted, though incarceration is considered unlikely.

Sunland Park voting machine seized by state

*Steve Ramirez
Las Cruces Sun-News*

SUNLAND PARK -- A voting machine at the Sunland Park Municipal Building allegedly used for absentee voting was confiscated Wednesday by New Mexico State Police.

Dofia Ana County District Attorney Susana Martinez said 111 votes had been registered on the voting machine from Feb. 4 until 2 p.m. Wednesday.

State elections supervisor Larry Dominguez said the voting machine and a registry of absentee voters in Sunland Park were seized after officials with the New Mexico Bureau of Elections, a division of the New Mexico Secretary of State Office, found out that the voting machine was apparently used before the use was allowable.

The voting was for Sunland Park's March 2 municipal elections. Registered voters in the city will elect a mayor, three city council members and a municipal judge. Dominguez said that until Wednesday absentee voting should have been conducted on paper ballots, sealed in envelopes and placed in a locked box that will not be opened by city officials until after polls close.

Judge throws out election fraud case

TN

By George Brown

A judge threw out a court case over an election controversy Tuesday. But the man who filed the lawsuit still insists someone may have tampered with election results. John Willingham alleges fraud and uncounted votes. He was in court Tuesday asking a judge to force the election commission to turn over raw data from each voting machine. But after two hours in court, the problem lay in the proof. And the judge said Willingham had none.

The allegations center around the recent city mayoral election. Willingham says there were indications of fraud and voting machines that malfunctioned, perhaps playing a part in his 45,000 vote loss to mayor Willie Herenton. Willingham said, "It caused me a great deal of concern. It actually caused me to go into hibernation for a day or two." Willingham says exit polls at one precinct showed he got 43 votes, but only 12 were officially tallied. Asked if he thought there could be a conspiracy to fix elections, he said he wouldn't rule it out. "There is a lot of money and power invested by constituents of insiders in this city who want not want to see a change."

Willingham's attorney said he might be able to prove their allegations if the election commission would turn over data it has withheld. The election commission however said the requests were too broad and some information confidential. Attorney Robert Spence said, "It's one thing to sit around the coffee table and make wild allegations. It's another to file a lawsuit in a court of law."

Willingham said his suit was not meant to benefit him, but to clear the air over elections. "It's for the people of Memphis-Shelby County if there is a wrong we need to know it and if there is a hole in the dike we need to plug it." Chancery Judge Walter Evans however felt there was no proof of fraud and threw the case out.

In the hall outside the courtroom, Willingham told me he feels part of the problem is voters don't get a receipt of how they voted. That will change however in two years when federal laws will require such receipts.

Keeping it Legal - - Authorities confiscate ballots from Alamo election

By Ryan Gabrielson
Monitor Staff Writer
rgabrielson@themonitor.com

ALAMO - The Hidalgo County Elections Division and District Attorney's Office impounded ballots and other records from Alamo City Hall Monday amid allegations that voting in the run-off election was tampered with. Much of the concerns centered on mail-in, or early, votes.

Commissioner Diana Martinez defeated Alamo attorney Veronica Moncivais by nearly a two-to-one margin for Place 2 on the Alamo City Commission Saturday. The runoff was required because neither Martinez nor Moncivais received 50 percent of the vote in the Nov. 4 general election.

Moncivais and one of her supporters, Joey Lopez, filed complaints with Hidalgo County District Attorney Rene Guerra on Monday about city officials' actions during the voting and ballot counting.

Teresa Navarro, Hidalgo County elections administrator, with an order from Judge Aida Flores of the 398th district court, removed a box of mail-in and regular ballots. The materials will be examined as part of a criminal investigation, Navarro said.

An elections clerk and Hidalgo County Sheriff's deputy also participated in the seizure.

Throughout the runoff there have repeatedly been complaints called in to the elections division, Navarro said. The seizure Monday was triggered by several concerns.

"If there is just the slightest indication that an election is compromised," an investigation is warranted, Navarro said. "The city of Alamo has found itself in an unfortunate situation."

Last Thursday the election's presiding judge, who oversees voting, resigned after it was discovered he had authored and distributed a flier supporting Martinez.

Among the complaints issued by Moncivais were that early, mailed in, ballots may have been opened before official counting began and that Alamo Mayor Rudy Villarreal had access to parts of city hall where voting was taking place. Both Villarreal, who has openly supported Martinez, and Alamo City Secretary Margot Saenz have denied any wrong doing.

"On (Dec.) 5, 2003, while in the city secretary's office, I noticed an open early mail-in ballot, and when I questioned Margot Saenz about the open envelope, she informed me that the main man had delivered the said ballot open," Moncivais said in a sworn affidavit.

"As we were talking to her, one of the city's mail men, (Commissioner) Robert de la Garza, arrived at her office and I asked him if they had delivered any open main-in ballots. Mr. De la Garza then informed me that no mail-in ballots had been delivered open," the candidate's affidavit said.

General voting for the commission runoff was Dec. 6. Saenz did not immediately return a call for comment from The Monitor on Monday.

De la Garza was reelected to the city commission in November; four years ago

he shared a campaign ticket with Villarreal and Martinez. Some of the allegations focus on Villarreal's visit to city hall late Saturday afternoon as residents continued to vote and ballot counting had begun. The mayor and city secretary said he came in to fill out a Texas Municipal League conference registration form, which was already a day past the early registration deadline, and to check his mail. Lopez said in his affidavit that he saw Villarreal in Saenz's office going over a list of Alamo residents that showed who had voted and that there were open mail-in ballots beneath the mayor's right arm. "When I questioned what he was doing, I was told by the city secretary, 'He's the mayor, he can be here if he wants to.'"

"Oh, he's lying," Villarreal said. "There was no list of voters."

Lopez had also said Saturday night that Villarreal left without any mail, a point the mayor denies.

"If that's the biggest complaint they have got, they've got nothing. If there was anything going on I think I would have locked the door," Villarreal said. Additionally, Villarreal's car was parked Saturday in the city hall's lot. Too close, Moncivais said, for the elected official. When the concern was brought to Saenz, the city secretary went outside and moved the mayor's car.

"My complaint to her and the police was that she should have been inside the building overseeing the election and the mail-in ballots and not being the mayor's personal servant," Moncivais' affidavit states. The mayor said Moncivais' complaints have more to do with the election's outcome than with anything he or Saenz are accused of doing. "She's a sore loser, when you lose by that many votes," Villarreal said. The investigation will be conducted by the District Attorney office and should be done quickly in about six weeks, Navarro said. "The residents of Alamo deserve that," she said. No vote fraud plot found

Inquiry leads to isolated cases, Biskupic says

By **STEVE SCHULTZE**
sschultze@journalsentinel.com

F.B.E.A.

Posted: Dec. 5, 2005

The nearly yearlong investigation into voter fraud in 2004 has yielded no evidence of a broad conspiracy to try to steal an election, U.S. Attorney Steve Biskupic said Monday.

He predicted that perhaps "a couple of dozen" isolated cases of suspected fraud might be charged, and he said that sloppy recordkeeping by election officials was a key impediment to proving such cases.

Nothing in the cases that his office has examined has shown a plot to try to tip an election, Biskupic said during a meeting with Journal Sentinel editors and reporters.

Critics had raised such fears of partisan voter fraud schemes in the election aftermath. But Biskupic said, "I wouldn't say that at all."

He said, "We don't see a massive conspiracy to alter the election in Milwaukee, one way or another."

Biskupic, a Republican whom President Bush appointed in 2002, and Milwaukee County District Attorney E. Michael McCann, a Democrat, announced a joint effort to investigate allegations of illegal voting in January.

That followed Journal Sentinel stories on widespread problems in Milwaukee, including flawed voter counts, votes cast from invalid addresses, outdated poll lists and discrepancies between the number of ballots cast and voters listed at dozens of polling places.

The newspaper found similar problems elsewhere in the state.

Four of the 18 people accused of felonies in the investigation have been convicted, officials said Monday.

Here is the breakdown of cases:

- Federal prosecutors have charged 14 people: 10 felons with voting illegally and four people with double voting.

Four of the felons accused of illegal voting were convicted, one was acquitted and five cases are pending, Assistant U.S. Attorney Rick Frohling said.

None of the four people charged with double voting has been convicted. Charges against one person were dismissed because of mental incompetence, one person was acquitted, one trial resulted in a hung jury, and one person who agreed initially to plead guilty now wants a trial, Frohling said.

Two of those charged with double voting were driven to several polling places in the same van, but the driver hasn't been identified, and no evidence of an organized conspiracy has been uncovered, Frohling said.

• McCann's office has charged four people with felonies in Milwaukee County Circuit Court. Two people affiliated with the Association of Community Organizations for Reform Now were charged with filing false voter registrations, and two felons were accused of illegal voting. None of those cases has been resolved.

Biskupic said he had hoped to complete his portion of the investigation this year to avoid dealing with such matters in 2006 - another election year.

Voting Probe

Archived Coverage

 **Archive:** Previous coverage of the investigation into Milwaukee's Nov. 2, 2004 election

 **Section:** State politics

He said, however, that the investigation will likely spill over into next year, which will feature elections for governor, Congress and most of the state Legislature.

Biskupic declined to estimate when his part of the inquiry might be done.

Assistant District Attorney David Feiss said the district attorney's office also likely won't complete its inquiry this year.

Feiss, too, wouldn't say how much longer the investigation would last.

Biskupic said recordkeeping problems have been rampant.

He said that jurors interviewed after acquittals told prosecutors the record problems created doubt as to whether fraud had occurred.

"I don't know how you are going to prove a case when there is no paper trail," Biskupic said.

In addition, he said, it was "extremely difficult" to prove that felons ineligible to vote did so intentionally.

State law bars felons who haven't completed probation or parole from voting.

Defendants have argued that they didn't know they were barred from voting as felons, Biskupic said.

"Once people hear that argument can get them off in front of a jury, you tend to hear it more," he said.

Partisan split

The 2004 vote problems took on added significance because of the close outcome of the presidential election in Wisconsin. Democrat John Kerry beat Bush by 11,000 votes, one of the closest margins in the country.

Republicans have argued that fraud appears to be rampant in Milwaukee and that stricter controls must be enacted.

Democrats have said that the main problem is clerical shortcomings, not fraud.

That only 18 voter fraud cases have been charged doesn't mean it's not a major problem in Wisconsin, state Republican Party Chairman Rick Graber said.

"For anyone to sit back and say our election system doesn't have problems, that is just blatantly false," Graber said. "The questions raised in 2004 still haven't been answered."

He criticized Democratic Gov. Jim Doyle for vetoing legislation that would have required photo identification at the polls.

Milwaukee Mayor Tom Barrett, a Democrat, said the results of the investigation confirm his view of a year ago, that there were only isolated instances of fraud.

"Initially, there were people painting this picture of some sort of conspiracy where there were bands (of scammers) getting together to try to defraud the system, and that obviously has not happened," Barrett said.

Barrett said he supports prosecution of lawbreakers and is critical of state officials, who said they're unlikely to complete a statewide voter list in time for April elections.

Biskupic said he worried that cases of voter fraud could spawn a partisan battle, in which the losing side perceives that the winner had some unfair advantage and becomes "more inclined to do something" illegal to even the score in the next election.

2 McKees Rocks council candidates charge Election Day cheating at polls

Tuesday, November 29, 2005

By Jim McKinnon, Pittsburgh Post-Gazette

Two African-American candidates for borough council in McKees Rocks filed a complaint yesterday, alleging that supporters of their opponent illegally entered voting booths to help voters write in their candidate's name.

Incumbent Democratic Councilwoman Wanda Jones Dixon and newcomer Renee Surgest have asked Common Pleas Court to declare them both winners of the two available council seats.

Though not all write-in ballots have been counted, it appeared yesterday that the write-in candidate, David Rugh, got the most votes with 148.

Mrs. Dixon retained her seat by coming in second. Ms. Surgest missed being elected because of the write-in campaign.

The two women had been among the Democrats' endorsed slate of candidates and both won the party's nomination in the primary election last spring.

Mrs. Dixon said in a letter to the Allegheny County Elections Division that she only learned of the write-in campaign on Election Day, Nov. 8, in a conversation with borough Councilman Keith Schwab.

Mrs. Dixon, in her letter of complaint, said that Mr. Schwab told her, "The Democratic Party is running a Mickey Mouse campaign against you and Ms. Surgest."

Ms. Surgest, in a separate letter, said that supporters of Mr. Rugh temporarily blocked her entrance to the polling place when she went there to vote.

She said that she witnessed a polling judge enter the voting booth with at least one voter.

County Elections Director Mark Wolosik said the petition, filed yesterday at the deadline to do so, is allowed when a candidate feels an irregularity affected the results of the election.

The two women's opponents have until Friday to respond to the petition.

The plaintiffs also charge racism, arguing that the borough's Democratic Party intentionally campaigned against them to prevent black candidates from being elected.

A hearing on the complaint had not been set yesterday.

Straight-line ballots don't jibe, Dries says

BY SHAWN A. HESSINGER

For the second election in a row, the numbers don't add up.

Whether the result of human error or a technical malfunction, a glitch in the results of the Nov. 6 general election in Schuylkill County will likely lead to a recount of all 43,069 ballots cast.

Archives

- [Today's News](#)
- [Past 7 days](#)
- [Full Archives](#)

At issue is a discrepancy in the number of party-line votes: Ballots are run through the optical-scanning machines at the STS building in Saint Clair twice, and the two reports didn't match, according to Elizabeth J. Dries, director of the county Election/Registration Bureau.

Contact Us

- [Newsroom](#)
- [Subscribe Online](#)
- [Circulation](#)
- [Our Store](#)

Dries said she became aware of the problem Election Night when she noticed 271 party-line Republican ballots and 10 Democratic ones had been cast in Eldred Township; however, only 248 people voted.

There could have been at least two reasons for this, she said:

One, halfway through the night she noticed the technician from the county machines' supplier, Elections Systems & Software, Omaha, Neb., was hand-entering data contrary to procedures.

Two, the counting machines have to be reprogrammed for each precinct; perhaps that didn't happen, particularly since one of the county machines broke down and three of the other four malfunctioned at various points in the evening.

The county commissioners, sitting as the county Board of Elections, were planning to convene a special meeting at 8:30 a.m. Friday where they plan to approve the recount. A recount of all the ballots was also conducted in the May primary.

"We want to make sure everything is right," said commissioners Chairman Forrest L. Shadle.

Commissioners Jerome P. Knowles and Edward D. Barket concurred when contacted separately.

016888

All three said they doubted the glitch had effected the outcome of the election significantly, but Barket said in isolated incidences like the passage of an Act 50 referendum in the Blue Mountain School District by just seven votes, the recount could make a difference.

"What went wrong? We don't know," said Barket.

All three commissioners have discussed the need to improve the current vote-tallying situation, but disagree on solutions.

Knowles insists the problem has to do with the technical support being provided by Elections Systems & Software, pointing to the fact that for some time the county had no problems with its machines until the primaries in May when the company sent a subcontractor to provide technical support.

Though the current technician was an employee of the company, both Knowles and Barket expressed a lack of confidence in his performance.

Dries said she didn't stop the technician from hand-entering data because the machines were malfunctioning and she didn't think she had much choice but to proceed.

Barket said he would have to wait to see how the newly reprogrammed machines would handle the recount before deciding whether he believed the machines or the personnel were at fault.

The recount will probably be done Friday or Saturday and Elections Systems & Software has promised to supply two technicians and special reprogrammed boards for the vote tally machines, Barket said.

River Rouge Mayor Greg Joseph was to be sworn in Tuesday evening despite an investigation under way. Michigan State Police are in the midst of a voter fraud investigation.

State police are looking into allegations that Joseph's supporters passed out absentee ballots to residents of senior apartment building in the city and reportedly coerced them into voting for Joseph. Investigators are also looking into allegations that Joseph's supporters offered payments of up to \$25 for votes, Local 4 reported.

Joseph reportedly received about 700 absentee votes, about 10 times the amount that his opponent received, Local 4 reported.

The mayor denied the allegations and called claims made against him the comments of a sore loser. Joseph was to be sworn in on Tuesday evening for his fourth term.

Joseph is also being investigated by state police and the FBI in two other cases, Local 4 reports. No charges have been filed.

Ugly politics

Tuesday, November 6, 2001

Voter intimidation still persists in Passaic County. In recent days, some Hispanic and black residents of the city of Passaic have received postcards in the mail warning ominously of "armed law enforcement officers" at the polls and fines or prison for anyone violating voting laws.

The brightly colored postcards are printed in both Spanish and English and imply that voters must live at the address where they are registered in order to vote. That is incorrect. A voter can live at a different address within the county and still vote by provisional ballot on Election Day. The new address will be verified later.

"Our motto is that no voter will be turned away at the polls," said Walter Timpone, the federal election monitor for Passaic County who called the postcards an "outrage."

Mr. Timpone is right. A history of allegations of voter discrimination against Latinos caused the U.S. Department of Justice to sue the county and the city of Passaic two years ago. The county's election system is now monitored under a subsequent settlement with the federal government, in which it agreed to make voting more accessible to Spanish-speaking residents.

The postcards are an obvious and ugly attempt to frighten and confuse minority voters and keep them away from the polls. It is not clear how many postcards were sent or who sent them. On Sunday, a press conference at Passaic City Hall drew Sen. Robert Torricelli, D-N.J., two members of Congress, and state and city officials, who denounced the postcards and urged all citizens to vote today. Reps. Robert Menendez, D-Union City, and William Pascrell Jr., D-Paterson, called the postcards an attempt at voter suppression, which is a federal crime. Mr. Pascrell said those who sent the postcards are "scoundrels and cowards and should go to jail."

The Democratic State Committee has asked federal officials to investigate the mailings for possible violation

of federal law.

Mr. Timpone, the federal election monitor, has said recently that progress has been made in making the voting process in the county more accessible and welcoming to minority voters. But he is staying on until the end of this year to work out remaining problems.

What happens today at the polls should indicate whether Mr. Timpone's job is done, or whether he has even more work to do in Passaic County.

Voting is a sacred right, guaranteed and protected by the Constitution. No one should be afraid to vote, and those who would frighten American citizens who want to vote should be severely punished.

NEW JERSEY

JERSEY CITY: MAN PLEADS IN ARMS CASE A Jersey City man arrested in a sting operation this month pleaded not guilty yesterday in West Palm Beach, Fla., to attempted exportation of illegal arms and money laundering. Diaa Mohsen and another man, Mohammed Malik, also of Jersey City, were charged last week with attempting to violate the federal Arms Export Control Act after they allegedly discussed the purchase of missiles and machine guns with an undercover agent and an informant. Tara Bahrapour (NYT)

PATERSON: ELECTION TO BE SCRUTINIZED The Justice Department said yesterday that it would send 28 election observers to watch for irregularities in today's Republican primary in Passaic County. The department's action comes after an announcement last week by a court-appointed election monitor that violations persisted in Passaic City's May 8 municipal election, including poll workers' refusal to provide provisional ballots, and intimidation of voters by representatives of candidates. A 1999 federal court decree followed complaints by Hispanic voters that they were disenfranchised, in violation of the Voting Rights Act. Steve Strunsky (NYT)

CONNECTICUT

HARTFORD: HOUSE PASSES BUDGET At the start of a three-day special session, the House of Representatives yesterday unanimously approved a two-year compromise state budget totaling \$26.4 billion. The 144-to-0 vote (with 7 House members absent) sends Connecticut's first late budget since 1991 to the State Senate, which is expected to approve it by today or tomorrow and pass it on to Gov. John G. Rowland, who could sign it into law by week's end. Paul Zielbauer (NYT)

HEADLINE: Public Hospital Workers Divided Over Union Vote

BYLINE: By STEVEN GREENHOUSE

BODY:

Just when District Council 37, New York City's largest municipal union, was starting to hold its head high again after a huge corruption scandal, along comes an election mess that seems stranger than the Florida recount after the 2000 election.

On Feb. 27, members of Local 420, one of the district council's largest locals, voted in the local's presidential election, but almost two months later, there is still no official victor.

A supposedly final vote count on March 11 showed that the challenger, Carmen Charles, a hospital technician on Roosevelt Island, won the race to head the local, which represents 7,500 workers at the city's public hospitals. That count gave Ms. Charles 580 votes and 526 to James Butler, who has run the local with a strong hand for three decades.

Mr. Butler appealed the results, ridiculing the voting process as unfair even though an election committee whose members he had appointed oversaw the balloting. After several hearings, that handpicked committee called for overturning Ms. Charles's apparent victory and holding a new election. The dispute is now before the district council's parent union.

"It's an absolute outrage," said Herman Benson, founder of the Association for Union Democracy, a Brooklyn-based group that fights union corruption. "Butler does everything possible to set it up so he can win, then he loses and then he has the election committee do his bidding. It's an atrocity."

The presidents of half of the 56 locals in District Council 37 were so upset that they wrote to the president of the parent union, the American Federation of State, County and Municipal Employees, saying: "The current situation regarding the election of Local 420's president is a disgrace. All members and every elected official in District Council 37 are having our reputations dragged through the mud."

This election mess comes after District Council 37 has struggled over the last four years to shed its image as a den of union iniquity. Since 1998, more than 20 council officials have been convicted of either rigging a contract-ratification vote or embezzling union money, with the leaders of the two largest locals found guilty of stealing more than \$1 million each. The rampant corruption led the council's parent union to put it under trusteeship for three years, a restriction lifted just two months ago.

Ms. Charles filed a formal appeal with the parent union, asking it to overturn the election committee's call for a new vote and declare her the winner. Gerald McEntee, president of the parent union, has ordered an expedited hearing next week to determine whether a new election is warranted.

"These are troubling allegations and they must be resolved immediately," said Mr. McEntee.

Mr. Butler's lawyer, Andrew Irving, argued that the election should be overturned on numerous grounds, including what many said was the intimidating atmosphere at the polling place, where the two sides angrily taunted each other. As a result, some union members left without voting.

Mr. Irving said, "The election on Feb. 27 was conducted in an atmosphere of chaos and intimidation and harassment,

with no real procedure to guarantee secrecy of the ballot."

In calling for a new vote, the election committee accepted that argument and an additional one — that the vote, in a union with many immigrants, was unfairly skewed by an article in a weekly newspaper, *The Chief*, that quoted Mr. Butler as calling his opponent "a stupid immigrant." Mr. Butler denies uttering such a slur about Ms. Charles, who is from Guyana.

The election committee also declared that some sample ballots had been placed in the ballot box even though Barbara Deinhardt, a lawyer who is District Council 37's ethical-practices compliance officer, had assured the committee that she had inspected all the ballots and had found no sample ballots mixed in.

Ms. Charles said that the intimidation at the voting place came from the Butler forces — a charge that Mr. Butler's supporters denied — and that the election committee did not do enough to stop it. "It's a disgrace," Ms. Charles said. "It's a total miscarriage of justice."

Under the parent union's constitution, when a local's election committee recommends overturning an election, the local's members must decide whether to uphold or reject that recommendation.

At a membership meeting on April 8, the chairman of the election committee asked for a vote but refused to finish counting the votes, several of Ms. Charles's supporters said, evidently because he saw that Ms. Charles had the votes to reject the committee's call for a new election. Nonetheless, the chairman, Alvin Mead, who declined to comment, ordered Local 420 to hold a new election.

Mr. Irving, who did not attend the meeting, said several of Mr. Butler's supporters told him that a full vote count was taken and that the majority backed overturning the election. Ms. Charles said that whoever maintained that the election committee had finished its vote count that night was dishonest or delusional.

Even before the election was held, Ms. Charles was accusing Mr. Butler of slanting procedures in his favor. He refused to hold the vote by mail, and, even though the union's members work in all five boroughs, he provided just one polling place, a community center near Harlem Hospital, his longtime power base.

In a brief telephone interview, Mr. Butler said: "The election's gone with the wind. I have no comment."

Although unwilling to discuss the election, he was eager to talk about Mayor Michael R. Bloomberg's proposed budget cuts. "It's a blood bath for the public hospitals, and we're not going to take it sitting down," he said. "We're going to take to the streets."

For decades, Mr. Butler has been one of the city's most colorful and militant union leaders. More than any other labor leader, he tangled with Mayor Rudolph W. Giuliani, often organizing rallies to protest proposed layoffs and hospital closings. Many New York radicals praised Mr. Butler for standing up to Mr. Giuliani when most union leaders seemed cowed by him.

Many union members talk of another side of Mr. Butler. Under him, members of Local 420 contributed several million dollars for a new union headquarters over the past five years, but the planned site is still an abandoned building. His salary is \$250,000 — almost 10 times the average pay of Local 420 members. After an accounting firm audited District Council 37's 56 locals after the corruption scandal, Mr. Butler allowed members to look at the report for just one hour each, and barred them from making copies.

New complaints plague election -- Some Hidalgo County voters claim harassment by campaign workers

March 02, 2004
Sarah Ovaska
The Monitor

EDINBURG — With election day just eight days away, the list of questionable election practices in Hidalgo County grew to include complaints of harassment by three politiqueras, or paid campaign workers, against elderly voters who requested ballots by mail.

The complaints were filed against workers for several different campaigns, including Lloyd Doggett, who is running for the U.S. Congressional seat in District 25; both candidates for the 92nd state District Court judge's race, incumbent Edward Aparicio and challenger Eric Jarvis; Lupe Treviño, who is running for Hidalgo County sheriff; and Aaron Peña, the incumbent state representative in District 40.

Official complaints were filed at the Hidalgo County Elections Department against Elizabeth Bouleris of Weslaco, Elvira Rios of McAllen and Elvira Martinez of McAllen, said Teresa Navarro, the county's election administrator.

Rios denied any wrongdoing and said she has always been respectful of elderly voters. Martinez and Bouleris could not be reached for comment.

Because the six complaints against the three women all came from elderly voters who vote by mail, Navarro said she felt someone was using 2002 lists of voters who vote by mail. The lists were deemed not public by the Texas Legislature last year, but before that were considered public information.

Among the irregularities reported so far this year, last week someone requested a mail-in ballot for a dead voter; four people said their ballots were already sealed when they received them; and a Mercedes voter requested a mail-in ballot that was sent somewhere else.

Meanwhile, a group of 13 family members and friends who vote in Hidalgo County, but are temporarily living in Houston drove down to Hidalgo County to vote this weekend because they were afraid of their mail-in ballots being stolen, Navarro said.

"Because of all the publicity, they're afraid their ballot was intercepted," Navarro said.

An elderly Weslaco couple went to the elections department on Saturday claiming that Bouleris was telephoning them repeatedly and asking them to vote for Treviño and Aparicio with their mail-in ballots, according to Navarro.

The couple came in and turned in their ballots without voting because they were upset about being contacted repeatedly by Bouleris, Navarro said.

"They came in and turned in their ballots and said they're not voting," Navarro said.

The couple told her, "We don't want to vote because we've being harassed by an electioneer," she said

016898

Treviño said he hired Bouleris as a campaign worker to hand out literature about him. His campaign expenditure reports show he has paid Bouleris \$760 since Dec. 1.

"Of course I'm concerned about it, but I have a clear enough conscience to tell you that that is not the way I work," Treviño said.

He added that he has no control over what his campaign workers do.

"I'm not in direct supervision of anyone but myself," Treviño said.

Aparicio said he was shocked to hear about the complaint because Bouleris volunteered for his opponent, Jarvis.

"She's never helped me out in any campaign," Aparicio said. "She's working for the Eric Jarvis campaign."

Jarvis confirmed that Bouleris was a volunteer in the eastern part of the county for his campaign.

Three people from south McAllen filed complaints against Rios, claiming that she stopped by their houses repeatedly and tried to pressure them to vote for Treviño, Doggett and Jarvis.

Rios said she is respectful of elderly voters and that as a community leader in her south McAllen neighborhood, she tries to get people involved.

"That's not the way we work, we respect our senior citizens, we treat them with dignity," Rios said. "Whoever is trying to put my name in the dirt, I'm not going to let them."

Rios said some women have been going around her neighborhood claiming to be her, which may have led to the complaints.

All three candidates said they knew of no wrongdoing by Rios related to their campaigns.

"I haven't had to twist any arms to win votes here," Doggett said. "I don't want anyone associated with our campaign twisting arms."

Treviño also said the allegations were baseless, while Jarvis said he knows Rios as an involved volunteer.

"We hope that the people assisting us use their best judgment," Jarvis said. "I know for a fact that we're running a clean campaign."

In the third instance, an elderly woman from La Blanca came to the elections department and said a woman named Elvira Martinez came by her house and tried to convince her to vote for Peña, Navarro said.

"She (Martinez) went to her house and said, 'I have an application for you,'" Navarro said. "She (the elderly voter) was told, 'Don't complete the one you have, complete the one I have.'"

The La Blanca woman cast her vote in person this weekend after filing her complaint.

Martinez could not be reached for comment and Peña did not return several phone calls left for him. Peña's campaign indicated that they had no one named Elvira Martinez working for them.

Navarro said any voters afraid that their mail-in ballots have been tampered with could cancel their ballots by coming into a polling place and signing an affidavit. They can then vote in person.

016899

The AARP said seniors should be not be deterred from voting.

"It (mail-in voting) truly does assist people that can't vote on Election Day," said George Kelemen, director of advocacy for AARP's Texas chapter. "It is unfortunate that these opportunities are being manipulated or abused."

Keleman suggest that if a voter needs assistance, they ask someone they trust to help out.

Ex-Legislator Accused Of Vote Fraud

Faces 7 Felony Counts Of Absentee Ballot Fraud

ADVERTISEMENT

By LYNNE TUOHY
Courant Staff Writer

August 12 2003

Former Hartford state Rep. Barnaby Horton was arrested Monday and charged with seven counts of absentee ballot fraud - all felonies - in connection with his unsuccessful Democratic primary battle last fall against Kenneth R. Green.

The violations allegedly occurred at the Betty Knox apartment complex on Woodland Street in Hartford, where one resident, Silas Woodward, told investigators Horton sat at his kitchen table as Woodward completed the ballot, and pointed to his own name and that of state Sen. Eric Coleman, another Hartford Democrat, as the boxes to check.

"Against his wishes, Woodward checked the box, thereby casting a vote for Horton," the arrest warrant affidavit states. "Woodward stated he felt compelled to vote for Horton because of Horton's presence while Woodward completed the ballot."

Horton, 34, also was charged with making a false statement to the State Elections Enforcement Commission. In a sworn affidavit he supplied to the commission dated Sept. 6 - four days before the primary - Horton stated, "At no time did I handle or assist residents with any absentee ballots, nor did I leave with anyone's absentee ballot."

The arrest warrant affidavit alleges that not only did Horton leave the complex with ballots, but also brought along postage stamps and affixed them to the envelopes.

Horton, accompanied by his lawyer, Austin J. McGuigan, and several family members, turned himself in to the chief state's attorney's office in Rocky Hill Monday morning. He was released on his written promise to appear in Hartford Superior Court Aug. 25. Neither Horton nor McGuigan returned phone calls seeking comment.

Horton is perhaps best known as the lead plaintiff in the landmark Horton vs. Meskill lawsuit that led to the 1977 Supreme Court ruling that forced the state to better equalize school funding.

The chief state's attorney's office's recently formed public integrity bureau is handling the prosecution.

Hartford Democratic Chairman Noel F. McGregor said Horton's arrest "sends a message that you have to play by the rules."

016901

"I'm not the type of person to pour salt in a wound, but people have to understand that you can't break the law," McGregor said. "There're no shortcuts."

Horton, a lawyer, was serving his second term as state representative when redistricting forced him into a primary battle with four-term Democrat Green, of Bloomfield. Their respective districts were now one. It was Green who launched the elections enforcement commission investigation last October, with allegations that Horton was present when absentee ballots were being completed and that he also took possession of some absentee ballots. The residents interviewed by investigators bore out Green's allegations.

Frances Huckaby said she was in Woodward's apartment when Horton was there, and also filled out her ballot in his presence, though she shielded it so no one would see which boxes she checked. Horton took the sealed ballot form from her. Huckaby said she asked fellow resident Rosalind Sailor why she was taking Horton door to door. "Sailor reportedly responded that people let you in if you're with someone from the building," the affidavit states.

Another resident, Alma Daigle, told investigators that shortly before the primary, Horton knocked on her door and asked if she had received her absentee ballot. Daigle said she had, but needed help completing it because of her poor vision.

Daigle said Horton left, but returned about half an hour later with another resident. Horton then explained the ballot to Daigle, she said, and read the names of the candidates. Daigle told him she always voted for the white candidate, according to the affidavit. Horton, who is white, pointed to the candidate she wanted, and she checked the box. Horton also offered to mail the ballot and left Daigle's apartment with it, she told the investigators.

Sailor gave conflicting statements to investigators on different occasions, but repeatedly said she did not see Horton handle absentee ballots. When investigators contacted Sailor again in December, she refused to cooperate. "If you want to do something to Barnaby Horton, you'll have to do it on your own. I don't want to be bothered anymore," the affidavit quotes her as saying. She also said "it seems like a witch hunt."

Chief State's Attorney Christopher L. Morano begs to differ.

"The independence of the voter when they're making a decision is paramount in the way we conduct elections," he said Monday. "The thrust and intent of the law is to make sure the voter is making the decision of their own volition, and not with the sense that anyone is twisting their arm."

Green said he was not surprised by the arrest.

"These actions were really quite extensive and quite a violation," he said. "I think that these things need to be investigated and dealt with to the fullest extent. We need to have the public trust."

In September, according to the affidavit, Horton and his lawyer at that time, R. Bartley Halloran, both broached the subject of reaching a "settlement" with elections enforcement lawyers. Halloran told them Horton "could not unequivocally state that he was not present when a voter or voters were completing their absentee ballots," the affidavit states.

The state lawyers invited Halloran and Horton to provide the commission with an explanation or defense for Horton's conduct, but said they heard nothing back.

Morano said the investigation is ongoing, but that he doesn't anticipate additional arrests.

The charges include four counts of unlawful possession of another's absentee ballot and three counts of being present, as a candidate, when absentee ballots were being filled out. All seven counts are Class D felonies, each punishable by up to five years in prison and a \$5,000 fine. The false statement charge is a Class A misdemeanor, punishable by up to a year in jail and a \$1,000 fine.

It's not clear what impact, if any, a felony conviction would have on Horton's license to practice law in the state.

Horton's is the first major absentee ballot scandal to hit Hartford since the 1996 arrest of former 4th District state Rep. Edwin Garcia, D-Hartford, and six campaign workers. Garcia ultimately resigned his state office and from his job as a Hartford police sergeant. He was sentenced to a year of home confinement, which a judge lifted after five weeks, and two years' probation after pleading guilty to three felony counts.

HEADLINE: CHAPTER ONE;
THE CAMPAIGN BEGINS

BYLINE: JAMES O'TOOLE, POLITICS EDITOR, POST-GAZETTE

BODY:

"I'm a uniter, not a divider," George W. Bush frequently reminded us.

After the longest, most expensive and, arguably, most unpredictable presidential campaign in history, the Texas governor, and, at long last, president-elect, will have ample opportunity to prove that.

He will take the oath of office to preside over an electorate divided evenly between its preference for him and his chief opponent. His ascension follows an election that reflected the nation's sharp divisions along lines of race, gender and geography.

It was an election waged in the context of a decade-long economic boom that seemed to have anesthetized most of the country to the toxic partisanship and bitterness that had consumed the political classes of Washington through impeachment and government shutdowns.

One of the prime arguments for the candidacy of the affable Texan was his vow to shift the tone in Washington, to discourage the scorched-earth tactics that seemed to make every Washington political dispute degenerate into litigation.

It will not be easy, as Bush takes office after a post-balloting brawl replete with mutual charges of intimidation, illegitimacy and election theft. The path to confirmation of his crucial Florida victory became a full-employment program for lawyers.

But at least the equipoise that propelled this election from the ballot boxes to the courts was not the product of passionate ideological battles or deeply polarizing personalities. Policy differences were confined to a relatively narrow slice near the center of the political spectrum.

Bush proclaimed himself a conservative, but a "compassionate" one, and he avoided the ideological militancy that had sent Newt Gingrich's negative numbers soaring. Gore relied on populist rhetoric, but, to the occasional frustration of more liberal members of his party, advanced the policies of a centrist New Democrat.

From the perspective of arithmetic, the division in Election 2000 is clear. The new president captured the White House with a bare majority of 271 electoral votes, while losing the popular vote by a small margin. He will work with a Congress similarly split down the middle: a 50-50 Senate; and a House in which his own party is clinging by its fingernails to a five-seat advantage.

The stage for that shaky victory was set by a one-vote margin at the U.S. Supreme Court, overruling a one-vote decision by Florida's high court.

But all this division may be more of a matter of numbers than of conflicting beliefs. In the face of the major parties' ideological evolution and the competition by two relatively uncharismatic candidates trying to appeal to the middle, many voters simply seemed to have a hard time making up their minds.

The campaign begins

President Clinton ousted the father of the Texas governor in 1992, but the 1990s brought plenty of good news to the GOP, as well. Republicans took over the Congress for the first time in 40 years in the midterm election of 1994. GOP strength grew in state legislatures across the country. Nearly two-thirds of Americans lived in states with Republican governors.

But as the decade wore on, most of the good news for the party came from outside Washington. In 1995, the Gingrich-led GOP partisans, emboldened by their victory the previous year, shut the federal government down in a budget face-off with Clinton. They blinked before the president did, and they paid for it at the ballot box.

In 1996, Clinton coasted to re-election, and the strength of the economy that would boom on through his second administration was a big plus for Gore.

The downside of Gore's Clinton ties was just coming into view in the last weeks of the 1996 campaign, with charges of fund-raising abuses by the Democrats.

Still to surface were names such as Monica Lewinsky, Linda Tripp and Kenneth Starr. The impeachment scandal would tarnish Clinton's place in history and serve as a drag on Gore's chances to succeed him. But the issue was a double-edged sword, as congressional Republicans found when they lost seats in 1998 as their efforts to campaign on the scandal turned off many voters.

To many members of the Republican establishment outside Washington, Texas Gov. George W. Bush was seen as the antidote to that politically poisoned atmosphere. The Texas governor didn't have the longest resume in GOP politics. But he had cultivated a reputation for attracting Democratic support on the way to his landslide election to a second term. As the son of the former president he had instant name recognition.

Through 1999, Bush continued to attract support from party leaders, notably his fellow governors and the deep pockets of the GOP's big contributors. He was well on his way to amassing the war chest that would allow him to decline federal matching funds for the primary season. That, in turn, enabled him to confront his competition unfettered by the state-by-state limits on primary spending that are imposed on candidates who accept the federal campaign aid.

The Iowa edge

Over the last three decades, Iowa has become the starting blocks for the presidential race.

In 1972, the first year of the early February Iowa caucus schedule, the returns were received without fanfare in a back room behind the Democratic Party's downtown Des Moines office.

Since then, the caucuses have grown into a gargantuan production attracting millions of dollars, hundreds of reporters, and candidate pilgrimages that start more than a year in advance.

That's the process that gave former President George Bush what he described as "big mo" in 1980 — and just short of 20 years later, the younger Bush moved quickly to set up the most extensive, sophisticated organization the state had ever seen.

The Iowa caucus process has long been controversial. Why, its critics ask, should this atypical homogenous state have such an outsized influence on the selection of the president? But the caucuses are the epitome of fairness and rationality compared with an even earlier Iowa event — the straw poll — that assumed a crucial role in winnowing the GOP field for 2000.

In the summer of 1999, Bush's high poll numbers and financial advantages were clear, but he had yet to be tested by voters outside his state. Many observers still saw the GOP contest as relatively fluid — so wide open, in fact, that it had attracted a dozen formal or informal candidates. They included the millionaire Steve Forbes; Pat Buchanan, the conservative who had been a force in the previous two GOP nomination battles; Elizabeth Dole, the former transportation secretary and spouse of the party's last nominee; and, in a gift to political cartoonists and late-night comics everywhere, former Vice President Dan Quayle.

As a fund-raising and party-building tool, the Iowa GOP appropriated the state fairgrounds in August 1999 for a presidential straw poll. Any Iowa Republican could vote so long as he or she bought a \$25 ticket.

Bush won big.

Buchanan would soon migrate to the Reform Party. Quayle and former Tennessee Gov. Lamar Alexander, both of whom had banked on grass-roots organizations in Iowa, dropped out as well. Dole, her campaign starved for funds, would soon follow. The straw poll went a long way toward performing the winnowing chore that the caucuses themselves had performed in previous years. Before a single official vote was cast, the potential GOP field was cut in half.

Gore goes populist

Gore's supporters had started his Iowa groundwork even earlier.

He had skipped the caucuses during his abortive presidential run in 1988. But he devoted plenty of attention to them this time round. Throughout his vice presidential tenure, Gore cultivated the state's activists, raised money for its Democratic legislators, sent Christmas cards all over the state.

Several Democrats had made noises about running for the Democratic nomination. But in the end, the only one to challenge Clinton's heir apparent was former Sen. Bill Bradley of New Jersey. In the Senate, Bradley had compiled a mainstream centrist record. But in some respects, he ran against Gore from the left, particularly in his call for a system of tax credits to allow universal health care coverage.

Bradley criticized the Clinton-Gore health care record. He mocked Gore's wonkish immersion in the details of policies across the range of government. Instead, Bradley promised to concentrate his presidency on a few Big Ideas, such as improved race relations and universal health care.

Despite Gore's long cultivation of the state, Bradley clearly thought he could sneak up on the vice president in the caucuses.

Gore, meanwhile, had suffered continual criticism of his campaign organization and persona throughout the summer of 1999.

He tried to reinvent his campaign by moving his headquarters from the lobbyist lairs of Washington back to his former political base in Nashville.

This symbolic return to his roots would not be requited in electoral votes there the following fall, but it seemed to pay off in the short term. On the stump, Gore became a more aggressive, effective candidate.

Gore made subtle adjustments in his apparel to complement his new sleeves-rolled-up campaign style. Mixed with the Washington uniform of blue suits and white shirts were fashion-forward earth-toned suits along with khakis and jeans.

Meanwhile, Bradley proved a surprisingly maladroit candidate. In a Des Moines debate just three weeks before the caucuses, Gore attacked his challenger for voting against rural flood relief. Bradley wasn't able to rebut the criticism, even though Gore had seized on Bradley's vote against a single amendment to an overall relief bill that Bradley had supported.

Days before the Iowa election on which he had waged so large a bet, Bradley's attempts to get his message out were obscured by reports that he had suffered a recurrence of an irregular heart beat. The condition was not life-threatening physically, but it was nearly fatal politically.

Gore, buoyed by newfound energy — along with the backing of the union and Democratic Party establishments — surged ahead.

Enter John McCain

As the caucuses and primaries drew closer, Bush's evident strength had allowed him, at least for the time being, to avoid stepping on one of the traditional land mines of the nominating process. Former President Richard Nixon's widely noted advice to Republican candidates was to run to the right during the primaries and tack back to the center in the general election. Bush resisted the temptation to cater to the right.

Through the wintry early weeks of 2000, Bush projected a big-tent version of Republicanism. At one of the final Iowa debates, he shrugged off the taunts of conservative candidate Gary Bauer, who demanded that Bush pledge to make

opposition to abortion a litmus test for Supreme Court nominees.

Bush's sense of political security was due for a reality check.

The same weekend as that debate, Joe Andrew, chairman of the Democratic Committee, was in Des Moines staging a bit of political theater. He led a gaggle of reporters and television cameras across a restaurant parking lot to witness a steamroller labeled, "Bush Tax Cut," steered by a Democrat in a George Bush mask, rolling over a tool box labeled, "Social Security Lock Box."

On its second try, the steamroller managed to shatter the box.

One of Gore's key Iowa organizers shook his head when the scene was described to him. He faulted the skit not for its sophomoric tone, but for its target.

"I think those DNC guys are making a mistake attacking Bush," he said. "I'd be more worried about running against the other guy."

The other guy was Sen. John McCain. Citing a lack of resources, the Vietnam War hero and former POW decided to skip the Iowa competition and instead concentrate on New Hampshire, which would vote a week later.

New Hampshire, like several of the early Republican primaries, permitted crossover voting by independents and Democrats. The Arizona senator had compiled a strongly conservative record, but his appeal crossed party lines.

Some analysts noted that as Bradley's Iowa weakness became increasingly apparent, some of his New Hampshire support from independents migrated not to Gore but to McCain.

That phenomenon proved an omen for the general election. Gore and Bush secured their respective party bases in both New Hampshire and Iowa, as they would in the general election. But for many independents and swing voters, the more attractive candidates were Bradley and McCain.

Gore and Bush came out of Iowa buoyed by landslide victories. Gore would beat Bradley again in New Hampshire, although not by as large a margin. But Bush barely had time to savor his Iowa victory.

Crack in the facade

McCain had spent virtually all his time in New Hampshire. He had carpet-bombed the state with inspirational biographical videotapes. And it paid off. Buttressed by the support of many independents and Democrats, his campaign notched a decisive 18-point victory.

A winning personality and a big-tent philosophy had been among the most powerful engines of Bush's candidacy. Money was another. But until New Hampshire, Bush also had drawn crucial momentum from a sense of inevitability.

For one tense and increasingly bitter month, McCain changed that.

Democratic rules barred any state, except for the traditional gatekeepers of Iowa and New Hampshire, from choosing delegates before March 7. There were no similar restrictions on the Republican side, where several states would choose delegates in the weeks between New Hampshire and Super Tuesday.

The result was that the political and media spotlight temporarily shifted almost exclusively to the GOP side.

Delaware held a little-noticed GOP primary the week after New Hampshire, but the prime focus for the campaigns and the media was South Carolina, where Bush and McCain would face off on Feb 19. By then, every other candidate except Alan Keyes had dropped out of the Republican field.

A chastened Bush now found it necessary to heed Nixon's advice. His campaign shifted to the right in South Carolina. Almost his first stop in the state was Bob Jones University, a citadel of Christian fundamentalism where interracial dating was banned and where a former university president had condemned Roman Catholicism as a cult.

McCain, proclaiming himself a champion of reform, charged around the state giving interview after interview on his campaign bus, the "Straight Talk Express."

Rebounding from New Hampshire, the Bush campaign tried to preempt the challenger's rhetoric as well as his

stagecraft. Bush rallies now took place in front of a giant banner sporting his new campaign slogan, "A Reformer with Results." He rode a bus called the "Victory Express." He suddenly embraced the town meeting format that had brought success to both McCain and Gore.

Bare knuckles show

Through the winter, the Republican race had remained fairly civil.

South Carolina changed that. Things got rough fast.

Bush professed outrage at a McCain ad comparing his veracity to Clinton's. McCain was the brunt of e-mail and whispering campaigns charging that he was wavering in his opposition to abortion.

It was the most expensive, hardest-fought primary in the state's history. In the end, Bush rose from the canvas of his New Hampshire defeat to deliver a body blow to McCain's insurgent candidacy. The senator conceded in a remarkably bitter speech, full of indignation and invective at Bush's tactics. It seemed his colorful campaign had run out of gas.

But three days later, Michigan's Republican Party had another primary. Bush's forces felt secure there, in part because of his support from the state's energetic governor, John Engler. But Michigan, like New Hampshire and South Carolina, allowed crossover voting by independents and Democrats.

Since there was no Democratic contest competing for their attention that day, many chose to vote in the GOP primary, most of them for McCain.

It was another sharp-elbowed contest. In a controversial speech, McCain denounced Christian conservative icons Pat Robertson and Jerry Falwell as voices of intolerance. Robertson, himself a former GOP presidential candidate, repaid the favor with thousands of recorded phone calls critical of McCain. McCain's supporters filled the phone lines with calls reminding Catholic voters of Bush's appearance at Bob Jones University.

McCain shocked just about everyone and won Michigan — along with a same-day victory in his home state of Arizona. Recrimination and doubt returned to the Bush campaign.

They would be exorcised by Bush's commanding showing two weeks later.

Until March 7, the nomination fights had been rewarded chiefly in the currencies of momentum and publicity. On March 7, Super Tuesday, the real prize, convention delegates, came to the fore. Sixteen states conducted primaries or caucuses for both parties that day.

The balloting fell on Mardi Gras, and was a fat Tuesday indeed for the well-financed frontrunners who could fight on many fronts simultaneously.

Bush and Gore swept the table. On that day, both parties' nominations were effectively decided.

State Supreme Court Overturns Law Barring Employer Coercion in Voting

The Kentucky Supreme Court in a split decision has overturned that state's law forbidding an employer from coercing or directing an employee to vote for a candidate (*Kentucky Registry of Election Finance v. Blevins*, Ky., 1999-SC-0890-DG, 9/27/01).

The court's 4-3 majority said the state law forbidding employer coercion with regard to voting violates the First Amendment.

The state law says an employer may not "give out or circulate any statement or report that employees are expected to or have been requested or directed by the employer ... to vote for any person."

The law was challenged in a case involving Fayette County Clerk Don Blevins, who in 1994 sent a letter to his employees saying that a candidate for the state Senate, Don Todd, was a "good personal friend." The brief letter concluded: "I'd very much appreciate your vote and support for him."

A complaint was filed with the Kentucky Registry of Election Finance against Blevins by the Fayette County Republican Party chairman. The state agency and a three-judge panel found that Blevins had violated the state law. Blevins appealed and a state appeals court ruled that the law forbidding employer coercion regarding elections was unconstitutional. That decision was appealed to the state Supreme Court, which affirmed the appeals court ruling.

Subjective Line

"The line between persuasion and coercion is drawn subjectively and depends on one's point of view," said the majority opinion, written by Justice Bill Graves. "Consequently, a penal prosecution cannot proceed based on the perceptions of the recipient of a letter."

Graves added that the state law "is inconsistent with the First Amendment and patronizes the employee because it assumes the employee lacks a free will when voting a secret ballot. ... Blevins letter did not cross the threshold of persuasion or impair the important governmental interest of ensuring free elections and assuring the people that the voting process is fair."

A dissenting opinion by Justice Martin Johnstone, joined by two other justices, said the majority ruling "sets back Kentucky's compelling state interest in preventing employer coercion of state employees during partisan campaigns to the political dark ages."

Johnstone cited a series of U.S. Supreme Court decisions, which he said established that the state "has broad power to place even-handed restrictions on the partisan activities of public employees like Blevins. Indeed, such restrictions are deemed necessary in order to ensure that public service is determined by merit and not by patronage."

Allegations Of Fraud, Intimidation In Md. Race

Townsend, Ehrlich Get Ready for Tight Finish

MD

By Lori Montgomery
Washington Post Staff Writer
Tuesday, November 5, 2002; Page B01

Maryland's fiercely contested race for governor spawned a flurry of allegations of election fraud and voter intimidation yesterday as Democrat Kathleen Kennedy Townsend and Republican Robert L. Ehrlich Jr. approached today's election locked in a statistical dead heat.

In Baltimore, the Democratic National Committee filed a lawsuit seeking to prevent the Ehrlich campaign from using off-duty police officers as poll workers. That plan, the suit alleged, could have the "effect of intimidating, threatening and coercing African-American citizens from exercising their right to vote."

But Democrats later agreed to drop the action after Ehrlich agreed that the officers would not wear uniforms, badges or sidearms or identify themselves as police officers.

Meanwhile, the Maryland attorney general approved a Democratic plan to pay more than 1,000 people \$100 each to coax voters to the polls today, as evidence emerged that Republicans, too, considered employing the controversial get-out-the-vote tactic they had decried as a violation of state election laws.

A Democratic campaign worker spotted a poster on a bulletin board at Bowie State University advertising "paid work" on Election Day. The poster offers \$125 and a "free T-shirt" for a full day's work, and assures applicants that the job could help fulfill "community-service" requirements ordered by a court.

The poster directs applicants to call Rep. Ehrlich's Prince George's County headquarters. A woman who answered the phone and identified herself as "Laura at the Bob Ehrlich for governor office" said: "Uh, actually, we've discontinued that program."

The practice of paying people on Election Day to distribute campaign literature and lobby for candidates is a long tradition in Maryland, but it was banned by the General Assembly in the late 1970s. Last week, Maryland Republicans cried foul when they spotted fliers being distributed at the lieutenant governor's campaign rallies that offered people as much as \$110 to help get out the vote.

Maryland Democrats responded by saying that they intended to exploit what they described as a loophole in the law that allowed them to hire people to get out the vote on a nonpartisan basis without advocating any candidate or party.

Attorney General J. Joseph Curran Jr., a Democrat, promptly vowed to study the matter but cautioned Sunday that paying even nonpartisan workers "may not be a very good idea," if technically legal.

In an opinion issued yesterday, Curran's office said it is illegal to pay people for "walk-around services," such as distributing campaign literature or coaxing people to vote, while the polls are open. But it is not illegal, the opinion says, to pay "an individual who simply urge[s] a voter to perform his or her civic duty . . . in a neutral manner," as long as the person does not say or do or wear anything that expresses "support for a particular candidate."

Maryland Democrats said the opinion allows them to proceed with plans to hire more than 1,000 people, primarily in heavily Democratic precincts in Baltimore and Montgomery and Prince George's counties, to

016911

knock on doors and lure people to the polls.

"They're going to have stickers to urge people to go vote. All their literature and door hangers will be all about getting out and voting," said Democratic Party spokesman David Paulson.

GOP spokesman Dan Ronayne called Curran's opinion "one more example of the arrogance of this monopoly" of Democrats who rule Annapolis. "Bob Ehrlich will have an army of volunteers out working on his behalf on Election Day. The difference between his and Kathleen Townsend's will be that his didn't require a hundred-dollar bill to go out and show their support," Ronayne said.

At a rally in Arbutus, Ehrlich blasted the Democrats, saying, "They know it's against the law, but they're going to do it anyway."

When asked about Ehrlich's plan to pay poll workers an even higher price than the Democrats are paying, Schurick said he would make sure the campaign's Prince George's operation does not follow through on the poster's promises.

"No one is being paid out of this office on Election Day," Schurick said.

Meanwhile, a national watchdog group called on the Internal Revenue Service to investigate a Prince George's church for its efforts on Townsend's behalf. Americans United for Separation of Church and State accused the Rev. John A. Cherry, a pastor at From the Heart Church Ministries, of urging his congregation to vote Democratic in violation of the church's tax-exempt status.

The incident occurred Sunday, the group said, when Townsend appeared before Cherry's 24,000-member congregation during a campaign swing through the county.

Citing a report in The Washington Post, the group said Cherry "urged the congregation to follow a partisan course in the election." Mimicking a flip of voting lever, Cherry said, "I don't care what your persuasion is, you need to pull out your Democratic finger."

"If it sounds like I'm endorsing," he added, "take it as you want to."

As the charges and countercharges mounted, state prosecutor Stephen Montanarelli said he will be taking "certain steps to monitor" today's election, including asking local police to look into allegations of election fraud.

Meanwhile, both parties lined up scores of lawyers and poll watchers to monitor the election in anticipation of further allegations -- or election returns so close that they require a recount, as happened in 1994.

WH woman accused of voting fraud

In an investigation by the State Attorney's Office, Amber Moye, of Winter Haven, was found to have "cast a fraudulent ballot."

According to a complaint affidavit, Moye " knowingly voted a fraudulent ballot in the November 2003 election held in the town of Dundee after being advised by the Polk County Supervisor of Elections that it was a felony violation to vote if she was not a resident of Dundee."

The Polk County Supervisor of Elections Office had received a telephone request for an absentee ballot for Moye, who reportedly had a Dundee address. The ballot material was sent and then returned reflecting a Winter Haven forwarding address.

Barbara Osthoff, assistant supervisor of elections, advised that she contacted the clerks office for Winter Haven in an attempt to confirm the Winter Haven address of Moye. Based on the new address being outside of the Dundee city limits, the ballot was "rejected as illegal."

Moye stated, in the investigation, that she voted because that was where she was registered ad she never changed the registration because she was only temporarily living in Winter Haven. Moye said that she would be moving back to Dundee within 30 days.

Voting fraud is a third-degree felony, punishable of up to five years in jail, according to Assistant State Attorney Chip Thullberry. In this instance Moye will not serve jail time but will instead have a pre-trial intervention that if she completes charges will not be filed against her.

According to Thullberry the pre-trial intervention is a diversion program that generally lasts 18 months and is a contract saying that the person, in violation of the law, agrees to a contract that they will stay out of trouble.

Firefighter Arrested, Released for Illegally Voting

IN

VOTER FRAUD CHARGES

Ronny Douglas

A firefighter accused of illegally voting was released on bond Thursday. Police say 58-year-old Ronny Douglas voted from an Anderson address while actually living 7 miles away in Pendleton.

Authorities say Douglas registered under the address of his rental property in Anderson. His wife told investigators that they've lived in Pendleton since their 1992 wedding.

Madison County Voters Registration Records show Douglas using the Anderson address for voting since 1984. He also allegedly filed fraudulent applications for absentee ballots in the 2000 and 2002 elections.

Douglas faces perjury charges.

Health district member faces vote-fraud charges

Christina Leonard
The Arizona Republic
Jan. 4, 2005 12:00 AM

AZ

A Maricopa County grand jury has indicted a member of the county's new special health care district on a dozen charges related to election fraud.

James J. Chavez, 50, faces felony charges ranging from fraudulent schemes to false voter registration. He is scheduled to appear in court for his arraignment Jan. 12.

In November, Chavez narrowly beat out three competitors for the District 5 seat of the Maricopa County Special Health District board. District 5 encompasses the southwest Valley.

Chavez said Monday that the accusations are false. And he said he is confident that justice will prevail.

"We'll have to let this play out," he said. "This is politically motivated. Unfortunately, I got more votes than anyone else."

County officials declined comment Monday.

The indictment, returned Dec. 29, alleges that Chavez provided nominating documents knowing they contained false information and improperly voted in several elections, among other charges.

Campaign opponent Sylvia Moreno challenged Chavez's standing by claiming that he did not live within the proper district boundaries in the southwest Valley and that he provided health care services through his organization.

A Maricopa County Superior Court judge in December dismissed the civil suit against Chavez because there wasn't enough evidence to move forward with the case.

Chavez said the latest allegations revolve around the same issues, and he hopes "the same thing happens here."

Chavez is former president and chief executive officer of Corazon de Oro Community Services.

He said people should know the other side of the story: "People voted for me because they know I've served the community of District 5 with my heart and soul."

Voting rolls go unchecked in San Bernardino County

By KATHLEEN STINSON

Staff Writer

County elections officials have no idea how many non-U.S. citizens may be voting because no one checks voter registration for proof of citizenship.

The main way elections officials discover non-citizens who vote is through tips from citizens, said Chief Deputy Registrar Donna Manning.

When filling out the voter registration form, each voter signs a declaration, under penalty of a felony conviction, that he/she is a U.S. citizen, 18 years of age or older on or before the next election and not in prison or on parole. The citizenship information is only checked randomly.

Once a year the registrar of voters office "bumps" its registration files up against the jury service forms filled out by people called for jury duty, Manning said. The two forms are compared for citizenship discrepancies.

"Out of a thousand forms, you get a very small percentage -- one or two -- about a handful a year that don't match," Manning said, adding some say they are not citizens to get out of jury duty.

Assemblywoman Sharon Runner, R-Antelope Valley, said she "absolutely believes" voters should have to provide proof of citizenship when registering to vote. With people being paid to register voters, this leaves open the potential for voter fraud, Runner said.

The issue of voter fraud was prominent in the 1996 congressional race between Rep. Robert Dornan and Loretta Sanchez in Orange County. An investigation by Secretary of State Bill Jones revealed that Hermandad Mexicana Nacional had registered 490 documented non-citizens to vote, 303 of which voted in the election.

Assemblyman Mark Wyland, R-Escondido, introduced a bill in the past legislative session to require voters to provide proof of citizenship when registering to vote. Assembly Bill 934 failed to pass in the 2005 Legislative

session but is expected to come up again in the upcoming session, Runner said.

The Registrar of Voters office also checks for duplicate voter registrations within the county and against a 57-county statewide list maintained by the Secretary of State's office when the registration form is initially entered into the system.

Man charged with vote fraud

CA

**By ERIC STERN
BEE CAPITOL BUREAU**

SACRAMENTO — A Tracy man faces five felony counts of forging voter registration cards for the November 2004 election, the California secretary of state's office said Wednesday.

It was the second time prosecutors have filed registration-fraud charges related to last year's election in San Joaquin County, where the Democratic and Republican parties invested tens of thousands of dollars to increase voter rolls.

The effort was tied to the hotly contested state Senate race between Democratic Sen. Mike Machado of Linden, who edged out Republican challenger Gary Podesto, the former mayor of Stockton.

"This past election was really rampant" with suspicious voter registrations, said Deborah Hench, the top election official in San Joaquin County.

She alerted state election-fraud investigators about her concerns last year as 30,000 new voters were registered between the June primary and the November general election.

Authorities said they don't believe that any faked voter-registration cards led to fraudulent votes, but orchestrating phony voter registrations is a crime.

Political parties or their contractors generally pay between \$5 and \$8 for each registration card filled out.

Hench said her office flags registration cards that don't match addresses, birth dates and other information.

"As long as parties pay for registration, we get some made up," Hench said.

Mathew Cross, 20, of Tracy, could face more than five years in prison, said Scott Fichtner, chief deputy district attorney in San Joaquin County. Cross is scheduled to be arraigned June 23.

In interviews with state investigators, Cross said soliciting citizens to register was hard work and that forging cards increased his commissions, according to a news release from Secretary of State Bruce McPherson's office.

Cross did not return a phone call seeking comment. He is on probation after pleading guilty last year to felony marijuana possession, the district attorney's office said.

Bonnie Fetters, 47, of Stockton pleaded guilty in October to voter registration fraud. She was sentenced to 30 days in jail and three years of probation, the district attorney's office said.

Bee Capitol Bureau reporter Eric Stern can be reached at 916-326-5544 or estern@modbee.com.

Voter cards suspect

County thinks some registrations are fake

By David Siders
Record Staff Writer
Published Wednesday, March 24, 2004

San Joaquin County has warned the state it is examining 1,500 voter-registration cards and suspects several are fraudulent, Registrar of Voters Deborah Hench said Tuesday.

Hench said the cards are being examined after elections officials discovered a new registration card with an incorrect address for someone who already had correctly registered to vote.

And several registration cards in the batch have signatures that look similar, Hench said.

The cards were received after the deadline for voting in the March 2 primary and therefore did not affect that election, she said.

The number of registration cards sent to the state Elections Fraud Investigations Unit could be much fewer than 1,500. Hench said her office will determine which ones to send.

The review comes as elections officials continue counting provisional ballots cast March 2.

"It just causes more work for us," Hench said.

::: Advertisement :::

Meanwhile, in a separate fraud investigation, a Stockton woman pleaded guilty Tuesday to a misdemeanor charge of forging six registration cards in 2001.

Rhonda Kenya Felix, 29, was paid \$4 for each Republican voter she registered, according to court documents. Felix and five others in 2001 were the subject of a fraud

investigation into the registering of Republicans in San Joaquin County.

In the case, David Vance, the owner of the company that hired Felix, said Felix was paid \$633 for one batch of registration cards but was not paid for a second batch, because it appeared she forged the cards, court documents said.

Felix declined to discuss the case.

"I don't want my name in the paper," she said.

Vance said his company, Vance Petition Circulators of Stockton, pays workers to register voters, often outside grocery and department stores. The completed forms are then given to the office of the registrar of voters.

The company hasn't had fraudulent registration cards returned to it since Felix did so in 2001, he said.

"Some of the people that have gone to jail for this have done it for, like, 10 bucks," he said.

Hench said paying collectors per registration encourages fraud. The practice, however, is legal.

"I think (Vance) hires people that are not always on the up and up," she said.

Vance said he hires collectors by word of mouth. Most collectors want to get accurate names on registrations, not collect more money, he said.

"You've got to give everybody a shot, as long as they've got some kind of intelligence," he said.

Felix was sentenced in San Joaquin County Superior Court to 30 days in jail.

BJ00:36

FOR IMMEDIATE RELEASE
Thursday, March 9, 2000

Contact: Shad Balch
Beth Miller

**Secretary of State Investigation Nabs Husband and Wife
for Elections Fraud**

Couple Charged With Submitting Forged Voter Registration Cards

STOCKTON --- Investigators with Secretary of State Bill Jones' Elections Fraud Investigations Unit (EFIU) and prosecutors from the San Joaquin County District Attorney's office today arrested Daniel Williams, Sr. and Carolyn Williams, husband and wife, on charges of submitting fraudulent voter registration cards to the San Joaquin County Registrar of Voters.

The couple, who worked for Green Petition Management and Campaign Services, allegedly submitted eight voter registration cards containing forged signatures to the San Joaquin County Registrar of Voters. After examining the cards, the county registrar suspected fraud and requested that Secretary of State Bill Jones' EFIU open an investigation.

"100 percent participation with zero tolerance for fraud – that's been my message consistently for the last five years," said Secretary of State Bill Jones. "People think that in a state as large as California, it might be easy to get away with a small-scale criminal violation of elections law. But my message can't be more clear: every single allegation of elections misconduct will be investigated and prosecuted to the fullest extent of the law," added Jones.

The secretary of state EFIU investigators and prosecutors with the district attorney's office arrested Daniel and Carolyn Williams this morning on charges of violating Elections Code Section 1801 and Penal Code Sections 115a and 470, submitting a false affidavit and forging signatures. The pair will be held in custody until their arraignment tomorrow at the San Joaquin County Courthouse at 1:30 p.m.

Since established by Secretary Jones in 1995, nearly 200 cases of elections fraud have been referred by the secretary of state's EFIU to county district attorney's for prosecution, and in 1999, 61 percent of cases referred have resulted in convictions.

American Center for Voting Rights Refers Voter Fraud Investigation to Department of Justice, Congressional Oversight Panel

U.S. Newswire
MediaLink Worldwide

1 hour, 52 minutes ago

To: State Desk

Contact: Jim Dyke for American Center for Voting Rights, 843-722-9670

COLUMBUS, Ohio, March 21 /U.S. Newswire/ – Today the American Center for Voting Rights (ACVR) referred a compendium of preliminary findings of registration fraud, intimidation, vote fraud and litigation to the U.S. Department of Justice ([news - web sites](#)). The report was previously made available to the House Administration Committee who will hold a field hearing on election fraud in Columbus today.

A report focused on similar fraudulent activity in Florida will be made available to the public in the coming weeks. Among the Florida report's findings were a box of 180 ACORN voter registrations surfacing just one week before election day that prompted a statewide investigation into the group's practices.

The Ohio report states, "Third party organizations, especially ACT, ACORN and NAACP engaged in a coordinated "Get Out the Vote" effort. A significant component of this effort appears to be registering individuals who would cast ballots for the candidate supported by these organizations. This voter registration effort was not limited to the registration of legal voters but, criminal investigations and news reports suggest, that this voter registration effort also involved the registration of thousands of fictional voters such as the now infamous Jive F. Turkey, Sr., Dick Tracy and Mary Poppins. Those individuals registering these fictional voters were reportedly paid not just money to do so but were, in at least one instance, paid in crack cocaine."

After giving the report to the Department of Justice ([news - web sites](#)), ACVR General Counsel Thor Heame stated in testimony prepared for delivery before the House Administration Committee, "there can be no doubt that election safeguards are critical to protecting our elections. When Dick Tracy's fraudulent vote is counted, an honest Ohio voter is disenfranchised. So I find it is beyond the pale that the same organizations who unsuccessfully sought to remove election safeguards by judicial fiat during the election are once again seeking to eliminate these safeguards by state and federal legislation while continuing their battle in the courts." Hearne will testify on this issue today before the House Administration Committee.

ACVR is a non-partisan 501(c)(3) legal and education center committed to defending the rights of voters and working to increase public confidence in the fairness and outcome of elections. The group is compiling similar reports for the states of Pennsylvania and Wisconsin which will be released in the coming weeks. To download a copy of the report or for more information on ACVR, please visit <http://www.ac4vr.com>

Political activist seeks vindication as ruling nears

By Darryl McGrath, Globe Correspondent, 1/8/2004

NY

ALBANY, N.Y. -- A disbarred Wall Street lawyer, convicted of the almost unheard-of felony charge of illegal voting, is seeking vindication through a last-ditch appeal to the US Supreme Court.

The appellant is John Kennedy O'Hara, a longtime Brooklyn political activist who ran several insurgent campaigns against the Brooklyn Democratic machine until 1996, when he was convicted of voting using an address that was not his permanent residence. He says party bosses targeted him for prosecution to silence him.

The Supreme Court is scheduled to decide tomorrow whether it will accept the appeal. The case has wended through state and federal courts, an odyssey that has included a conviction, a reversal on appeal, a hung jury in a second trial, and then another conviction. A state appeals court in Albany upheld the second conviction.

O'Hara has made a full-time pursuit out of seeking an overturn of his conviction and reinstating his right to vote and his ability to practice law. He faced up to 28 years in prison on seven charges of illegal voting, but instead was sentenced to 1,500 hours of community service. He has spent that time picking up garbage in Brooklyn parks. His appeals have cost him tens of thousands of dollars, but he said he has persevered on behalf of other activists who might be intimidated by fears of similar prosecutions.

"If you're going to start prosecuting people for voting, there's not much left after that," he said. "You don't have much choice when you're a convicted felon and a disbarred attorney, because you're wrecked."

He said Brooklyn District Attorney Charles Hynes, backed by the Brooklyn Democratic Party, selectively prosecuted him for voting using the address he shared for a year with his then-girlfriend, even as he maintained his longtime apartment 14 blocks away in Brooklyn.

O'Hara practiced at a Wall Street law firm while also following his political passions. He thinks mainstream Democrats wanted to silence him because of his habit of running for office and also running the campaigns of insurgent candidates.

In 1996, O'Hara was among several people who filed a federal lawsuit seeking new primaries in elections for legislative offices and judgeships. In such races in Brooklyn and much of New York City, the primaries almost always decide the winner. O'Hara, an unsuccessful candidate for a state Assembly seat that year, was charged with illegal voting a few weeks later. The elections from which the criminal charges stemmed had occurred four years earlier.

A spokesman for Hynes dismissed O'Hara's accusation of selective prosecution.

"Mr. O'Hara has had a day and a half in court, and the district attorney's position has been consistently upheld," spokesman Jerry Schmetterer said. "We've been commenting on this for a long time, and going to the Supreme Court -- he's certainly entitled to do it, but this case has already been adjudicated three times."

O'Hara is the first person convicted of illegal voting in New York since Susan B. Anthony, who voted in a federal election in Rochester in 1872, when only men had the right, said O'Hara's attorney, Barry Fallick. Others have noted the rarity of O'Hara's conviction.

"Usually cases like this aren't prosecuted," said Lee Daghljan, a spokesman for the New York State Board of Elections. "They're not high on most DAs' lists, this sort of thing."

016923

Illegal voting was seldom prosecuted in New York City even when it was a blatant part of politics, said Dan Lorello, a state archivist. "Illegal voting happened all the time in New York City in the 19th century. You voted early and often. Dead people, ballot stuffing -- it was like Chicago. But nobody really got convicted."

Given that history, and the brutal style of Brooklyn politics, the prosecution of O'Hara has raised some eyebrows. The David-vs.-Goliath nature of O'Hara's battle against the Brooklyn District Attorney's office also has won O'Hara the support from the editorial pages of several New York newspapers.

"From the Brooklyn DA's perspective, it's proven to be a mistake to have prosecuted the case, even though he won, because he's gotten so much bad publicity over it," said Erik Engquist, a political columnist for Courier Life Publications, a group of Brooklyn community newspapers.

"The suggestion that it wasn't politically motivated is just absurd. Brooklyn politics is not for the fainthearted. There is retribution, there is recrimination if you cross certain lines. John O'Hara did cross those lines, but on the other hand, he was never important enough to justify the response he got. He has suffered greatly from this experience. And he is clutching to the thinnest thread of legal hope."

The New York State Court of Appeals in Albany upheld O'Hara's conviction in a 5-to-2 vote in 2001. The Second Circuit Court of Appeals subsequently refused to grant him an appeal.

O'Hara, who participated in his first political campaign at age 12 by handing out fliers for George McGovern, said waiting for the Supreme Court's decision is relatively easier because he has suffered many defeats. "You have to hang in there," he said. "You have to give it a shot."

Fake Votes From Rikers?

Sources say bosses used inmate IDs

By Dan Janison
STAFF WRITER

June 23, 2003

Probers in the widening city Correction Department political scandal have been told of alleged efforts by Rikers Island supervisors to falsify voter registrations and absentee ballots, Newsday has learned.

The Bronx district attorney's office and a grand jury investigating the case have interviewed jail supervisors and officers who allegedly did campaign work on city time last year, Rikers sources said.

A key figure in the probe is Anthony Serra, the former three-star Rikers chief with Republican Party ties who is already facing grand-larceny and false-filing charges related to allegedly diverting correction personnel and equipment for work on his suburban home.

One theory under investigation, sources say, is that the registrations were made in the name of inmates to help election candidates favored by bosses - either with or without the inmates' knowledge.

Inmates are not barred from voting unless serving time for felony convictions. Most city jail inmates - a constantly churning population of as many as 14,000 at a time - are detainees awaiting trial.

City voting scandals of the past have involved the use of absentee ballots to cast phantom votes, such as nursing-home officials who filled in clients' ballots.

Correction Department spokesman Tom Antenen said that in all of last year's election cycle, there were 48 requests from city inmates for absentee ballots.

"We pick up the ballots at the Board of Elections and deliver them to inmates requesting them," he said. "When they fill them out, we deliver them to the Board of Elections."

Of the 48 delivered to the board in the last election, however, 16 were certified, meaning accepted as valid by the board, according to the department.

"The rest were not certified," Antenen said. "Either they failed to sign the form or they were not registered, that type of stuff."

016925

Antenen said he had no knowledge of a vote probe. The city Department of Investigation declined to comment. Board of Elections officials had no comment.

After months of scandals in the city's massive jail system, no criminal charges have been filed regarding the campaign operations.

When Serra was indicted in February, Bronx prosecutors said the counts of grand larceny, defrauding the government and falsifying business records filed against him involved his personal use of jail personnel and resources to run errands and work on his Putnam County house.

Most of the indictment's 89 counts strictly hold Serra responsible for false sign-in sheets and overtime reports filed on behalf of an aide. These counts cite allegedly false department reports filed bi-weekly between June 2002 until October 2002.

One key period was omitted from the charges: Aug. 31 to Sept. 16. That's the period surrounding the statewide party primaries, which were Sept. 10. At the time, Serra was a "security consultant" by the state GOP to help Gov. George Pataki win a second ballot line, the Independence Party nomination.

Officers were surreptitiously videotaped, reportedly doing campaign work, on that day, as shown weeks later on WABC-TV. Serra, dropped as a consultant, has pleaded not guilty to the charges. He has resigned from the department.

A key question is whether prosecutors will account for the missing 17-day period by adding charges involving the campaign operations allegedly conducted from Rikers Island.

"During that period, people under Serra's control were rolling their eyes and grumbling that they had to pick up campaign and election-related items," said an official who declined to be identified, recalling September's primary effort.

"They were talking about having to pick up absentee ballots and voter registration forms," the official said. "Apparently they needed to get people registered to vote in the Independence primary."

Sources said Serra conducted campaign business out of the trailer on Rikers that served as his office at the time. Two wardens under Serra's command allegedly directed submission of voter-registration cards, informants said.

The review has arisen along with other allegations of partisan abuse within the department. Deputy Warden Lionel Lorquet stated in court papers that he found an official of the department's investigations unit videotaping his house, where he was to host a mayoral campaign fund-raiser for Democrat Mark Green in 2001.

Barberton couple subject of voting probe

Elections board refers case of questionable New Franklin address to sheriff

By Lisa A. Abraham

Beacon Journal staff writer

The Summit County Board of Elections has asked for a criminal investigation into a Barberton couple who allegedly falsified in New Franklin last month.

Charles I. Worrell Jr. and Jerolyn Worrell of Vanderhoof Road did not attend a hearing Tuesday before the board to answer voter registration.

The board voted unanimously to refer the case to the county sheriff and prosecutor for investigation.

Board Deputy Director Marijean Donofrio said she spoke with Jerolyn Worrell, who said her husband was disabled and they attending the hearing. The Worrells did not return a phone call seeking comment Tuesday.

The board's investigation began after Mark Kochheiser, New Franklin zoning inspector, questioned why the Worrells voted i their address -- 2751 Vanderhoof -- is actually in Barberton.

Board staff searched records and found that Charles Worrell registered to vote in June at 2751 Vanderhoof Road, but in Oct voting address to 2571 Vanderhoof. In June, Jerolyn Worrell registered to vote at 2571 Vanderhoof.

The board's investigation determined that there is no such address as 2571 Vanderhoof Road. Staff also found documentati Worrells live at 2751 Vanderhoof in Barberton, including a flier calling for the replacement of Al Bollas as mayor of New Fra bottom of the flier states: ``Bollas for 4 more years? Now is the time for change," and lists ``Geri Worrell, 2751 Vanderhc Ohio" as the distributor.

Bollas beat challenger Harry Gehm by about 400 votes.

Elections Board Director Bryan Williams said it appears the pair did not move, but changed addresses with the board to ind moved to a part of the road that is in New Franklin, not Barberton.

``We don't know why they did what they did. We just know what they did," Williams said.

Falsification of voter registration is a felony.

Lisa A. Abraham can be reached at 330-996-3737 or labraham@thebeaconjournal.com

LA

6 face voting-related charges

By BRUCE SCHULTZ

Acadiana bureau

LAFAYETTE -- A federal grand jury has accused St. Martinville City Councilwoman Pamela Champagne Thibodeaux of conspiracy and submitting false information for voter registration, while St. Martin Parish authorities have charged five people with voter irregularities.

The four-count federal indictment, returned last week but unsealed Tuesday, accuses Thibodeaux of conspiracy and three counts of submitting false information to register to vote during her 2002 re-election campaign for the District 3 seat on the St. Martinville City Council.

"It's never going to end," she said Tuesday morning before referring any questions to attorney Gerald Block of Lafayette.

Block declined to comment.

Under state law, Thibodeaux will not have to step down from office unless she is convicted of any of the four felony charges.

In state court, Assistant District Attorney Chester Cedars said he has charged Lillian Bernard, Thibodeaux's brother Burton Champagne, Albert Decuir, Reid Foti and Hardy "Joey" Theriot, former St. Martinville Section 8 housing administrator. Cedars said more people will be charged, but he would not say who they will be.

The federal indictment claims Thibodeaux persuaded three people, Stacy Richard, Carrie Fruge and Decuir, to fill out voter registration cards on March 5, 2002.

"It was part of the conspiracy that, in order to increase the likelihood of being elected to the City Council ... Thibodeaux would ask persons living in the St. Martinville, Louisiana, area but not in her district to agree to falsely register in her district," the indictment reads.

She brought voter registration cards to the co-conspirators and asked them to fill out the cards with everything but their address, the indictment indicates, and Thibodeaux wrote the address of 320 Oliver St. in St. Martinville for Richard, Fruge and Decuir. None of the three are charged in the federal case, which has been assigned to U.S. District Judge Richard Haik.

016928

Cedars said Bernard is charged with two misdemeanors for voting on April 6, 2002, and on May 4, 2002, knowing she was unqualified to vote in the District 3 race.

Decuir and Champagne are each accused of a felony for filing their voter registration cards with an address within District 3, and two misdemeanors for voting in the primary and runoff with improper registrations, Cedars said.

Foti, an electrician for the city of St. Martinville, is accused of two felony counts of filing two false voter registrations, one for himself and one for Bernard, the prosecutor said, and two misdemeanors for voting in the two District 3 elections based on those improper registrations.

Theriot, former director of the St. Martinville Housing Authority, is accused of a misdemeanor for voting absentee in March 2002, knowing he was not qualified to vote in the municipal election.

Cedars said the cases will be vigorously prosecuted.

"It's going to be addressed with the severity of the offenses," he said.

Four local residents are charged with election fraud

Times Staff

EAST PROVIDENCE – A father and son duo and a Seekonk husband and wife have been charged with election fraud stemming from last fall's primary race in East Providence, the state Attorney General's Office announced Friday.

C. Richard Costa, 77, of Bristol, his son Keith Costa, 45, of East Providence; and Antonio Arruda, 51 and Aida Arruda, 50, both of Seekonk, are accused of fraudulently casting or attempting to cast ballots in a voting district other than where they lived in the Sept. 14 East Providence Primary.

The four individuals reportedly face a total of 15 counts, both felonies and misdemeanors, according to published reports.

Last fall, Thomas Reilly, a member of the East Providence Board of Canvassers, filed a complaint alleging voter fraud, and the Rhode Island State Police conducted an investigation. Both the Costas and the Arrudas were originally charged last October with voting illegally.

According to police, the Costas are alleged to have registered for the East Providence Democratic Primary using the business address of Keith Costa's auto body shop, James Auto Body, 175 Taunton Ave., East Providence.

Police also allege the Arrudas used the address of a Dunkin Donuts that they own in East Providence when they registered to vote in the primary.

All of the defendants are scheduled for a pre-arraignment conference in Providence County Superior Court on Aug. 30.

St. Louis Sees Specter of Vote Fraud

By B. DRUMMOND AYRES Jr.

ST. LOUIS, March 3 — When it comes to American cities with a notorious history of election fraud, St. Louis can hold its own. Its political past is replete with instances in which people no longer alive got to vote, not to mention people who never lived.

In last November's presidential election, some voters filed a lawsuit midway through Election Day demanding that voting hours be extended. They said that election officials had permitted polling places to become chaotically crowded, possibly in a deliberate effort to depress the city's heavy black vote.

The hours were extended, then it was discovered that the chief plaintiff in the lawsuit had been dead the better part of a year.

Come Tuesday, the people of St. Louis will head to the polls again, this time to nominate candidates for the April 3 mayoral election. And once again the integrity of the city's voting system is as much at issue as what the various candidates have to say about the city's economic and social problems. Once again, there are bold headlines and live-at-6 broadcasts about scores of bogus registrations, secret grand jury investigations and accusations of blatant race-based disenfranchisement.

"It's the same old never-ending St. Louis story," said James Shrewsbury, a city alderman and veteran of the city's political wars. "It's what happens when you have an old city that insists on hanging on to the bad old political ways. I know. At one point, somebody out there reregistered my long-dead mother."

None of Tuesday's mayoral candidates have been accused of wrongdoing. But there is no shortage of whispering — unsubstantiated — that some of them have supporters who would not hesitate to write down a bogus name or address. There also is plenty of talk — unsubstantiated — that Republican election officials are intent on making it difficult for blacks to vote, while Democratic election officials are intent on making it too easy for blacks to vote.

And, some election officials and political professionals say, there is always the real possibility that some of the fraud and disenfranchisement exists only in the imagination of those who want to make an opponent or another party look bad. Likewise, it is said that some of the most egregious fraud, like registering dead aldermen, may well have been perpetrated by people hired to sign up new voters and paid on a per-person basis.

Whatever the case, this much is certain:

A grand jury is investigating a report by election officials that hundreds of fraudulent names and nonexistent addresses were found on about 3,800 voter registration cards turned in last month just hours before the deadline for signing up for Tuesday's election.

01693

"It's just incredible what we've uncovered," Kevin Coan, an election official, said. "Would you believe the names of three dead aldermen? Of course you would. This is St. Louis."

A coalition of civic and church groups, Citizens Concerned with African-American Voter Disenfranchisement, says that although voting fraud is a problem in St. Louis, the city's election officials have gone overboard on tightening voting regulations. The group is contemplating legal action if election officials do not take steps to make it easier for St. Louis residents to vote, particularly blacks, who account for half of the city's 333,960 residents.

"We're not charging specific fraud or specific partisan politics or specific racism, though we aren't naïve," Richard Gaines, a coalition official, said. "What we are charging is that it is not easy to vote in this town if you are black. There's always another form to fill out or another official to see or another office to visit. That has to change."

The city prosecutor, Jennifer Joyce, and state election officials say they are so concerned about voting irregularities that they will send poll observers on Tuesday to keep an eye on things. "We're going to make sure that the process is not tainted in any way," Ms. Joyce promised a few days ago.

And the United States attorney general, John Ashcroft, a Missourian, says he will send in several Justice Department "monitors" and take "appropriate action" should there be any violations of voting rights or instances of voter fraud.

The mayoral candidates seeking nomination on Tuesday — four Democrats and two Republicans — are saying little about voting irregularities other than to call for a clean election. Instead, they are trying to keep the focus on improving the sometimes marginal quality of health care, schooling and economic opportunity in the city.

St. Louis is one of the country's most heavily Democratic cities. So only the Democratic primary is being watched carefully, since winning it is tantamount to winning office. And that primary, if the polls have it right, seems most likely to end up as a down-to-the-wire race between a former mayor, Freeman Bosley Jr., and the president of the city's Board of Aldermen, Francis Slay.

The incumbent mayor, Clarence Harmon, has disappointed many voters over the past four years and appears to have little chance of being re-elected.

Mr. Bosley, who is black, has the support of one of the city's most influential blacks, Representative William Lacy Clay Jr., and probably will get most of the black vote.

Mr. Slay is white and probably will get most of the white vote.

Mr. Harmon, who is black, captured the mayor's job four years ago by unseating Mr. Bosley. He did it with the help of white votes. Where the now disenchanted Harmon supporters go on Tuesday — blacks and whites — could decide the race.

The other Democratic candidate is Bill Hass, a school board member. The Republican candidates are Michael Chance and Francis Wildhaber.

MO

**FBI subpoenas records from Election Board
Of the Post-Dispatch**
© 2001 St. Louis Post-Dispatch

The Federal Bureau of Investigation has subpoenaed St. Louis Election Board records on all people who registered to vote, cast ballots or whose efforts were rejected from Oct. 1 through March 6.

The FBI subpoena also seeks all internal board correspondence, including memos and e-mail.

The action, taken Monday, is the first indication that the Justice Department or its agencies appear to be launching a federal investigation into accusations of vote fraud or attempted fraud in the Nov. 7 general election and the city's March 6 mayoral primary.

St. Louis Police Officer Craig Bentrup controls the crowd outside the Board of Election Commissioners building Nov. 7, 2000.

A federal inquiry would be in addition to an investigation by a St. Louis grand jury, ordered by city Circuit Attorney Jennifer Joyce, into 3,800 suspect voter-registration cards turned in at the deadline for the March 6 primary.

Some of those cards sought to register prominent people already on the rolls, as well as several deceased aldermen and a dog.

Regarding Monday's action, local FBI spokesman Peter Krusing would say only that "a subpoena was served."

He declined further comment. The Justice Department also declined to comment Monday, as did the office of U.S. Attorney Audrey Fleissig.

However, sources with some of the agencies confirmed that the serving of the subpoena signals involvement by an arm of the Justice Department or one of its task forces.

The Post-Dispatch witnessed the serving of the subpoena, which occurred about 3:30 p.m. Monday when an FBI agent, accompanied by a uniformed officer, walked into the Election Board headquarters at 208 South Tucker Boulevard.

The agent read aloud from the two-page subpoena, which was given to one of the employees. None of the board's officials or commissioners were present. Afterward, no workers would comment and none of the commissioners could be reached.

The FBI subpoena gives the Election Board until 9:30 a.m. on May 6 to turn over mandated documents to the Eastern District Circuit Court at the Eagleton federal courthouse. The subpoena states the documents will be given to a federal grand jury.

The subpoena seeks all records pertaining to any person who registered to vote between Oct. 1 and March 6, or whose voter-registration application was rejected.

It also demands all records of anyone who cast absentee ballots or regular ballots during that period, as well as anyone who was turned away at the polls and barred from voting.

The scope of that demand is enormous. The city residents affected would include:

Voters who cast absentee or regular ballots - almost 125,000 on Nov. 7 and close to 83,000 on March 6.

At least 143 unregistered people who, according to former Missouri Secretary of State Bekki Cook, were illegally allowed to cast ballots on Nov. 7.

Hundreds of registered voters who, according to a postelection investigation by Cook, were improperly prevented from voting on Nov. 7.

At least 15,000 people who registered to vote, or attempted to do so, between Oct. 1 and March 6. That includes the 3,800 suspect voter cards.

Sources say U.S. Attorney General John Ashcroft might recuse himself from the investigation - as may some of his aides - because city voters played a role in Ashcroft's Nov. 7 defeat in his bid for a second term in the U.S. Senate.

Sen. Christopher "Kit" Bond, R-Mo., said Monday, "All St. Louis voters should support this law-enforcement investigation because it may be our city's best chance to clean up our elections and our image."

Earlier this month, Bond called for further investigations because his office had learned from state election officials that 24,000 registered voters in the city, and 33,000 in St. Louis County, also were registered to vote elsewhere in the city or state.

Missouri Secretary of State Matt Blunt says he is collecting voter records to determine whether any of those voters illegally cast multiple ballots in the Nov. 7 or March 6 elections.

Bond has been calling for federal involvement since he and other Republicans alleged vote fraud in St. Louis in the Nov. 7 elections. They were upset by Democratic efforts to keep St. Louis' polls open an extra three hours, until 10 p.m. A local judge approved the request, but a state appeals court ordered the polls closed about 7:45 p.m.

Democrats blamed crowds at the polls on Nov. 7 and confusion over an "inactive voter list" of more than 30,000 registered voters. That list was not distributed to poll workers, causing a crush of angry would-be voters at the downtown Election Board shortly before the polls closed.

But in February, some Democrats alleged attempted vote fraud when the 3,800 suspect voter-registration cards turned up at the registration deadline for the March 6 Democratic mayoral primary.

As a result of the allegations swirling around those cards, the hotly contested primary was conducted under the scrutiny of an unprecedented number of observers dispatched by federal, state and local election officials, or law enforcement agencies.

The Election Board also has been reeling from the arrest on March 1 in Alton of the city's then-top GOP elections official, Kevin Coan. He stands accused of attempting to solicit a minor over the Internet; the "minor" turned out to be fictitious and part of an Alton sex-sting operation.

Several of the board's key employees or commissioners have resigned or are on leave. Gov. Bob Holden, who appoints the four-person board of commissioners, has said he plans to name a new board soon.

FBI advances Missouri voter fraud probe

By Jerry Seper
THE WASHINGTON TIMES

The FBI has ratcheted up its investigation into Missouri's Nov. 7 presidential election and a separate March 6 mayoral primary in St. Louis, ordering local election commissioners to hand over thousands of documents in an ongoing search for voter fraud.

A subpoena in the FBI's continuing probe, issued without statement Monday, calls for the St. Louis Election Board of Commissioners to surrender voter registration records and other documents. The records are expected to show, among other things, that dead people and a dog were able to cast ballots in one or both of the elections.

The FBI, along with a state grand jury, is looking to examine 3,800 potentially fraudulent voter registration records. Federal and state investigators also want to review all election documents relating to people who registered to vote between Oct. 1 and March 6; records showing whose voter-registration applications were rejected; documents showing who cast absentee ballots; and records of those who were turned away from the polls or otherwise barred from voting.

Investigators also are examining documents relating to 143 unregistered voters known to have voted in the Nov. 7 election.

The Board of Commissioners, which also has been asked by the FBI to turn over all of its related internal correspondence and e-mail, has until May 6 to hand over the documents.

"Voter confidence in the outcome of elections is essential to our democratic system," said Sen. Christopher S. Bond, the Missouri Republican who initially called for the probe. "Events in St. Louis remind us once again how important it is to guard rigorously against any and all attempts to exploit voting laws for political purposes.

"Apparent attempts to break the law in St. Louis are an affront to citizens who follow the law and undermine our faith in the election process," he said.

The FBI and the grand jury initially focused on accusations of widespread voter registration and balloting irregularities during the Nov. 7 election, including a petition prompted by Democratic Party officials to keep the polls open in St. Louis for an additional three hours. The petition, signed by a voter who died in 1999, was later overturned

by an appellate court, although the polls remained open an additional 45 minutes.

Texas Gov. George W. Bush won the Nov. 7 presidential election in Missouri over Vice President Al Gore with 51 percent of the vote. But John Ashcroft, now attorney general, lost his Senate seat to the late Gov. Mel Carnahan, who had died in a plane crash a month earlier. Mr. Carnahan's widow, Jean, was appointed to his seat. Despite questions about the vote and suspected irregularities, Mr. Ashcroft did not challenge the results. St. Louis' high Democratic totals figured prominently in Mr. Ashcroft's defeat.

Questions also surfaced after the March 6 mayoral primary, when it was reported that at least three dead aldermen had registered to vote in the election. The primary was won by Alderman Francis G. Slay, ensuring that St. Louis would get a new chief executive for the third time in the past eight years.

Mr. Bond, along with the Landmark Legal Foundation, a Washington-based public-interest law firm, initially sought the investigation in November. They told the Justice Department that widespread voter irregularities by Democrats had tainted both elections. Rep. William

L. Clay, Missouri Democrat, later charged that thousands of registered voters — mostly minorities — were turned away from the polls by Republicans.

Landmark's president, Mark Levin, said in a letter last month to Lee J. Radek, head of the Justice Department's public-integrity section, that shortly after a St. Louis judge ordered the polls to stay open longer on Nov. 7, prerecorded telephone messages from the Rev. Jesse Jackson informing residents they could vote late "began ringing into St. Louis households." He also said Mr. Gore personally called a popular radio talk show to say the polls would stay open late.

"If the citizens of Missouri are to have any confidence at all in the integrity of their elections, then the U.S. Justice Department must hold the St. Louis Election Board and anyone else responsible under the U.S. Voting Rights Act," Mr. Levin said.

FBI officials in St. Louis confirmed that a subpoena was issued but declined to comment on the investigation. U.S. Attorney Audrey Fleissig in St. Louis and Justice Department officials in Washington also have declined to comment.

Voter fraud in Worcester City Council election being investigated

WORCESTER, Mass. Voter fraud has been alleged in a Worcester City council race.

Candice Mero Carlson lost the November eighth District Two election by 102 votes to Councilor Philip Palmieri.

However Carlson charges that two prominent Palmieri supporters -- bar owner and Worcester magazine publisher Paul Giorgio and Boston lobbyist Paul Pezzella -- voted for Palmieri, although they don't live in the district. And she has asked Worcester District Attorney John Conte to investigate her allegations.

Carlson said her charges are not about changing the results of the election, which she says she clearly lost. She says the state's voter fraud statute carries criminal fines and penalties, and she wants them carried out if the law was violated.

A spokeswoman for Conte told the Telegram and Gazette of Worcester the matter is under investigation.

Palmieri says he is happy with the election results, and says Carlson's complaint is an Election Commission matter.

Hidalgo County voting rolls will not be subpoenaed

By Andrea Hauser

The Monitor

McALLEN — A controversial study alleging that 16,000 potentially dead and ineligible people are still registered on Hidalgo County voter rolls will not be subpoenaed, Hidalgo County District Attorney Rene Guerra said.

County Elections Administrator Teresa Navarro requested on Monday that the list of potentially dead voters be subpoenaed by the attorney general's office and Guerra so that names could be examined and taken off election rolls immediately to prevent possible voter fraud.

But Guerra said he thinks the study, paid for by the Hidalgo County Republican Party, is not credible and is part of a Republican agenda to discredit the elections department and Navarro.

"I cannot issue a subpoena on a witch hunt," he said. "I don't believe that these people are being righteous about their claim. Show me one document that shows a dead person voted, then I can issue a grand jury subpoena for a private company."

Compiled by Austin-based Voter Views Information Systems, the study was released Oct. 22 by Hidalgo County Republican Party Chairman Hollis Rutledge and claims that approximately 4,223 names included in the sampled voter rolls are of dead people, some from as far back as 1982.

Study results from 912 of those names also claim that 130 deceased voters cast ballots in the March primary election. If the study is valid, it would indicate substantial voter fraud.

The Hidalgo County Republican Party on Saturday decided not to release details from the study immediately, opting instead to form a task force to discuss the matter. No one outside the party has seen the study or been able to verify its claims independently.

"He's (Rutledge) made allegations. Those are strong allegations, and I've got to turn them over," Navarro said. "I wouldn't be doing my job if I didn't turn it over the attorney general or the D.A. based on allegations that they made. It's my job to turn it over to them and they do with it what they need to do."

Jane Shepperd, spokesperson for Attorney General John Cornyn's office, said the office has not received the request yet or made any decision regarding it.

Information from the Texas Ethics Commission indicates that a large part of Voter Views clientele is made up of Republican candidates or groups, which Democratic party officials said discredits the study because it is not a non-partisan business.

But Robert Edwards, general manager and a partner in Voter Views, said public records available about the company do not indicate all of its clientele, which includes a number of groups and consultants for both the Democratic and Republican parties.

Edwards said public records used by Voter Views to determine whether the names were of eligible voters are also not accepted by the elections department because the elections code process of verifying a death is more detailed and work-intensive.

"We're talking massive amounts of information coming through the hole every month and she (Navarro) has to process it," Edwards said. "I'm waiting to see how things are going. I would love to be an active part of helping the county assimilate the information on a monthly basis because we definitely could do it. We don't want it to be a situation like it's turning into. We don't want it to be a finger-pointing situation.

"We simply were asked to analyze the voter rolls. Once we did that job, we walked away."

Seattle sex columnist Dan Savage will be charged with felony voter fraud for allegedly casting a vote in Iowa's first-in-the-nation presidential caucuses, a Des Moines attorney said Monday.

The Polk County attorney's office is poised to charge Savage with two counts of voter fraud, according to attorney Mark Weinhardt, who is representing Savage.

Savage faces a felony charge and a serious misdemeanor charge, which could land him behind bars for a total of six years if he's convicted, Weinhardt said. Weinhardt, who said he hadn't seen official court documents, declined to comment further.

Savage claimed that he used his temporary address at Des Moines' Kirkwood Hotel to vote in the January caucuses. In the days after the caucuses, he wrote an article for online magazine Salon.com called "Stalking Gary Bauer." Savage, who is gay, wrote that he tried to infiltrate the conservative Republican's Iowa campaign as an act of protest. He also claimed that he attempted to infect Bauer with the flu bug by licking door knobs at the campaign headquarters.

Loras Schulte, who headed Bauer's Iowa campaign, said he was pleased to hear that Savage would be charged. "The reason it was important to me was because the whole process of our caucuses and voting is very dear to my heart," Schulte said.

"For someone . . . with so careless disregard for the privilege one has in voting . . . it didn't sit well with me."

Deputy Polk County Attorney Joe Weeg declined to comment on the Savage case, saying the matter remained under investigation.

Savage could not be reached for comment.

Arrests sought in election fraud

2 accused of falsifying voter registration cards

By **DERRICK NUNNALLY** and **GREG J. BOROWSKI**
dnunnally@journalsentinel.com

Posted: May 11, 2005

Two arrest warrants were issued Wednesday alleging election fraud by two voter-registration workers employed last year to sign up new voters.

According to warrants filed by the Milwaukee County district attorney's office, Urelene Lilly, 48, and Marcus L. Lewis, 23, both admitted to authorities that they filled out multiple voter-registration cards using fictitious information to earn money from Project Vote, which paid workers such as them \$40 per day plus \$1.75 for each registration above the daily quota of 24 new voters.

Project Vote registered about 40,800 names in Milwaukee County alone, according to a national spokesman.

District Attorney E. Michael McCann would not say when or if more information on other allegations of voter fraud might be available.

The warrant filed for Lilly says she was addicted to crack cocaine when the alleged fraud happened, and that she handed in "approximately 75 fraudulent voter registration cards," using names taken from the phone book, made-up birthdates and Social Security numbers, then had her 15-year-old daughter sign each card. She turned in no valid registrations, the warrant says, and is charged in connection with nine registrations for people who didn't vote in the November presidential election.

Lewis' warrant says he was fired by Project Vote for submitting a registration card in the name of a dead person, but before he did that, he allegedly turned in duplicate cards for the same voter on "numerous" occasions. He admitted turning in multiple entries for some family members, the warrant says.

Lilly and Lewis were charged with five felonies each: three counts of forgery, one count of election fraud and one count of misconduct in public office, because they had been sworn in as deputy voter registrars for the registration effort. If convicted as charged, each could face a maximum possible sentence of 25 years in prison.

The charges came a day after McCann and U.S. Attorney Steve Biskupic announced that their probe into election irregularities in the city of Milwaukee had turned up clear evidence of voter fraud.

The probe, launched in January after reports by the Journal Sentinel detailed widespread election problems, found more than 200 felons who illegally voted in the city, while still on probation or parole, and at least another 100 cases in which people voted twice, or used fake names, false addresses or the names of dead people to vote.

Investigators also said officials had been unable to eliminate a 7,000-vote gap cited by the newspaper, in which more ballots were counted than people who had been recorded as voting. City officials had resolved some of the questions, but investigators said a gap of about 4,600 remains.

Biskupic and McCann also said they had found about 65 false names that had been submitted by deputy registrars, such as the two charged Wednesday.

Additional charges are expected to be filed. Prosecutors have warned, however, that the cases may be hard to prove because the city records are so sloppy.

The issue of fraudulent registrations came up even before the Nov. 2 election, as various groups made major pushes to get likely supporters

signed up to vote.

Project Vote is a national non-profit group headed by the former head of the Ohio Democratic Party. It was one of several groups that ran large-scale registration drives in Wisconsin, a key battleground state.

"We are proud of what we did, and we think we caught virtually all the cards that may have been allegedly created by these people," said Brian Mellor, a national coordinator for Project Vote.

In October, the Journal Sentinel reported that two of Project Vote's workers in Milwaukee were felons on probation, which makes it illegal for them to vote and, thus, to register voters. A week later, before the Nov. 2 election, Racine County officials issued felony charges against two Project Vote workers on allegations of falsifying registration cards.

The charges are similar to those filed Wednesday by McCann.

In the Racine case, charges were filed against Robert Marquise Blakely, 24, and Damien D. Jones, 25, both of Milwaukee. Both men pleaded not guilty.

Jones had been fired as the group's leader for Racine and Kenosha counties after the Racine clerk's office raised questions about registration cards he had submitted. As in the Milwaukee cases, the pay for the two was based, in part, on how many signatures they submitted.

Earlier this year, Gov. Jim Doyle called for a state law that would bar groups from paying registration workers on a per-signature basis, or basing pay on meeting a signature quota. That proposal, part of a broader reform package, has not been acted on by the state Legislature.

Sheila Lalwani of the Journal Sentinel staff contributed to this report from Racine.

Voter Fraud Suspect Reaches Agreement

SD?

RAPID CITY (AP) – A Rapid City man, who has been accused of voter fraud, will make a plea agreement.

Lyle Nichols had been accused of falsifying voter registration cards during last year's campaign. He faced up to five years in prison on each of five counts of fraud.

But his attorney said Thursday that a plea agreement has been reached with the state Attorney General's Office which would lessen the charges to class six felonies.

The agreement is expected be finalized in court next week.

Nichols was arrested last October after the Pennington County auditor's office noticed irregularities in registration cards that were submitted. Authorities said at the time that more than 230 registrations were pulled because of accuracy concerns.

Hamilton Co. Election Chief Suspects Fraud

December 18, 2002

CHATTANOOGA (AP) -- Hamilton County's elections chief says a review of records from a county commission primary show some voters used other names to cast ballots.

County election administrator Fran Dzik said she has advised District Attorney Bill Cox that about possible voter fraud.

Dzik made the comment Wednesday in chancery court, where a judge held a hearing on a dispute over the county election commission's denial of records to the Chattanooga Times Free Press.

Judge Frank Brown did not immediately rule on the newspaper's request for records.

Incumbent William Cotton won the county commission District four primary by 34 votes on May seventh. Cotton could not be reached by telephone for comment.

Vote fraud suspected in House District 137

Loser in primary suspected in bogus registration swaps

By **JOE STINEBAKER**
Copyright 2005 Houston Chronicle

Harris County officials are investigating allegations of vote fraud in connection with a legislative primary in southwest Houston last year.

County Tax Assessor-Collector Paul Bettencourt, who serves as the county's voter registrar, asked the district attorney to investigate after discovering what he thinks was a pattern of improper voter registrations in state House District 137.

Neither District Attorney Chuck Rosenthal nor the investigator in the case could be reached for comment Friday.

Bettencourt and state Rep. Scott Hochberg, D-Houston, the incumbent, said the investigation is a continuation of one begun last year and is focused on Bernardo Chike Amadi, who unsuccessfully challenged Hochberg in the March Democratic primary. Amadi could not be reached for comment Friday.

Bettencourt said he has given the district attorney information about at least 157 voters, and perhaps hundreds more, whose addresses were changed to make it look as if they were residents of District 137.

Officials think the registrations were moved into the district without the voters' knowledge in the hope that they would support Amadi, a Nigerian immigrant, because they also were African immigrants.

The initial investigation began early last year based on complaints from voters, Bettencourt and Hochberg said, but stalled after investigators were unable to question Amadi.

More evidence surfaced recently in connection with the election challenge filed by former state Rep. Talmadge Heflin, a Republican who is contesting his 33-vote loss in District 149 to Hubert Vo.

Election board confronts rep for voting equipment

February 6, 2004

Greenwood -- Members of the Johnson County Election Board on Thursday blasted a representative from Election Systems & Software for providing allegedly illegal voting equipment during last year's general election. The state's election commission had not certified the software used in the machines as reliable and accurate, which meant counties should not have used it.

The company left Johnson County officials with the impression that everything they had received was approved by the state, election board member Jean Harmon said. Voters in Wayne and Henry counties also used the machines.

ES&S representative Wesley Wiley read a statement from the company standing by the reliability of machines but saying that the equipment had all been returned to a previous version of the software that was certified by the state.

"That reinstallation is complete," he said. "Our focus now is to make sure voters, election administrators and poll workers are educated about the systems."

That may not be enough, Harmon said.

"When you sold the equipment to the county, you told us the equipment was certified," she told Wiley. "We held an illegal election. We have every reason to doubt this company and their equipment, its integrity."

Wiley said he hopes the state will still approve the most recent version of the software in time for this year's election. There is no penalty under Indiana law for using illegal equipment to conduct an election.

State, federal officials launch anti-fraud effort

By Michele McNeil Solida

michele.mcneil.solida@indystar.com

October 30, 2002

With less than a week to go before Tuesday's election, state and federal officials stepped up their efforts to catch and deter voter fraud.

Indiana Secretary of State Sue Anne Gilroy and U.S. Attorney Susan Brooks announced their voter integrity effort Tuesday, when they urged voters to be on the lookout for election corruption.

They asked voters to be vigilant and to call state or federal officials with complaints.

"I spend a lot of time encouraging people to vote, and I don't want voters to lose their voice. We're asking voters to not let that happen," said Gilroy, who is Indiana's chief election officer.

Just a phone call away are lawyers with the secretary of state's election division, officials with the U.S. attorney's office and FBI agents. Staffers from each office will be on duty Election Day to take complaints.

Gilroy touted this as an improved and better-publicized partnership between federal and state officials -- one that will allow election complaints to be handled better and resolved more quickly.

Election fraud is a federal offense that can bring up to five years in prison, said Brooks, who represents the southern district of Indiana. Election crimes include failing to count all votes, providing false information to poll workers, buying votes and threatening people not to vote.

On the same day Indiana announced its effort, President Bush signed into law election reform legislation. It requires each state to maintain a statewide voter registration list, to make polling places accessible for people with disabilities and set up a voter fraud hotline. Indiana is already undertaking these initiatives, Gilroy said.

"Again, we're ahead of the curve," she said.

*Protect Voters
Rights KS*

State, federal officials to monitor Kansas elections
By JOHN L. PETTERSON
The Kansas City Star

TOPEKA - Kansas and federal officials announced Wednesday they will team up to protect the rights of Kansas voters as they go to the polls on Tuesday.

Secretary of State Ron Thornburgh and U.S. Attorney Eric Melgren said at a joint press conference they will be prepared to protect Kansans from election fraud.

"We will be proactive to ensure public confidence in the integrity of the election process by protecting voting rights and prosecuting voting crimes," Melgren said.

"This is in no way suggesting that we anticipate problems with the state of Kansas election officials."

The U.S. attorney said most election crimes are easily recognized. They include voter bribery, voter intimidation and ballot forgery.

Other forms are more subtle. For example, it is a crime to seek out the elderly, socially disadvantaged or the illiterate to unfairly influence their votes.

Leon Patton, an assistant U.S. attorney, has been assigned to be the person who will field voting complaints and initiate investigations in conjunction with the FBI.

Reports of possible violations of state voting laws will be forwarded to the Kansas attorney general.

Patton can be reached in Kansas City, Kan., at (913) 551-6730. The U.S. attorney's office also may be reached on Tuesday in Topeka at (785) 295-2850 and in Wichita at (316) 269-6481.

FBI agents can be reached on Tuesday in Kansas City at (816) 512-8200, in Topeka at (785) 235-3811 and in Wichita at (316) 262-0031.

In Topeka, the secretary of state's telephone number is (785) 296-4564.

"It should be easier to vote and harder to cheat," Thornburgh said. "If any Kansan has a problem or question between now and Election Day, pick up the phone and let us know."

To reach John L. Petterson, who covers Kansas government and politics, call (785) 354-1388 or send e-mail to jpetterson@kcstar.com.

**District election officer appointed
HE WILL SUPERVISE OFFICIALS RECEIVING REPORTS OF FRAUD**
By Louise Taylor
HERALD-LEADER STAFF WRITER

If you suspect or see skulduggery at the polls on Tuesday, a special team of G-men will be available to look into your complaint.

U.S. Attorney Gregory Van Tatenhove appointed his assistant Thomas Self as district election officer yesterday for the eastern half of Kentucky. The move was made in the wake of U.S. Attorney General John Ashcroft's Oct. 8 announcement that the government was bucking up its efforts to prosecute election crime.

Self, a federal prosecutor for 23 years who specializes in election fraud, will serve two years in the position. He will supervise a team of FBI agents and U.S. postal inspectors who will be on duty election day to receive complaints of fraud.

Van Tatenhove said election crimes such as vote buying and ballot forgery are easy to recognize, but others -- such as seeking out the elderly, illiterate or disadvantaged to badger for votes -- are more subtle.

"Election fraud dilutes the worth of votes honestly cast," Van Tatenhove said. "It also corrupts the essence of our representative form of government."

If you suspect election fraud, there are several numbers to call: The U.S. attorney at (859) 233-2661; the FBI at (502) 583-3941; the U.S. Postal Inspection Service at (859) 231-6778; or the state attorney general at 1-800-328-8683 (VOTE).

No bail, no release in vote fraud

By Michael Baker

The Fresno Bee

Published 09/18/03 05:20:28

A judge denied requests from a former Mendota mayor and an alleged accomplice to be released without posting bail after the two men pleaded innocent Wednesday to voter fraud charges.

Robert Rasmussen, 54, who served on the Mendota City Council from 1992 until he was voted out in 2000, faces five charges related to forging signatures on petitions to recall Mendota's mayor and mayor pro tempore in 2001.

Steve Burrola, a former employee at Rasmussen's security company, faces three charges related to the fraud.

A conviction on one of the election fraud counts is punishable by up to three years in prison.

Rasmussen's attorney, Randall ShROUT, cited his client's heart problems and depression when asking for his release.

ShROUT said Rasmussen has no other criminal history except for a no-contest plea to a misdemeanor charge of theft from an elderly person.

Burrola's attorney, George Herman, noted that the incident dates back to 2001.

Burrola told the judge that he has stayed out of trouble since his 1996 parole on a drug-related conviction.

Fresno County Superior Court Judge Alan M. Simpson denied both men's requests.

Rasmussen's bail remained at \$22,000 and Burrola's at \$12,000. He scheduled Sept. 30 for the defendants' preliminary hearing, when a judge determines whether there is sufficient evidence to hold suspects for trial.

Authorities say Burrola forged several signatures at the direction of Rasmussen, who knew he didn't have enough signatures to qualify the recall.

In July 2001, the Fresno County Clerk/Registrar of Voters Victor Salazar disqualified the last recall attempt, saying 61% of the signatures on one petition and 57% on another were not valid.

He said the most prevalent violation was information completed by the petition circulator instead of the petition signer.

report
suspected
fraud GA

U.S. Attorney staff to hear midstate voter complaints

By Debbie Rhyne
Telegraph Staff Writer

Middle Georgia voters who encounter Election Day problems can pass their complaints on to federal prosecutors.

Middle District of Georgia U.S. Attorney Max Wood announced Monday that he will staff the district's six federal courthouses Nov. 5 and again Nov. 6 for voters who want to report suspected election fraud or problems with election procedure.

"We want to make every effort to be available should there be any problems on Election Day," Wood said. "We are not poll watching, nor do we have a significant history of election fraud on the Macon Division.

"However, in light of the problems Florida had in their transition to electronic voting, we must be prepared in case problems arise."

Georgia is using statewide electronic voting machines for the first time - a move that was pushed through after the country watched Florida's problems with paper ballots in the 2000 presidential election. Florida switched to the electronic voting for this year's primary, but again experienced a number of problems, including complaints of poorly trained poll workers and voters being turned away because machines weren't working.

Wood said his staff's role will not be the same as those of election monitors or poll watchers, who are typically personnel from the U.S. Department of Justice and get involved "when there is a documented history of election abuse."

An example of a county that would warrant Justice Department scrutiny is Dodge County, where a vote-buying scandal in the mid-1990s ultimately netted 30 convictions. An investigation found problems with votes being cast multiple times by the same person as well as votes being cast by both dead people and convicted felons.

Dodge County is part of the Southern District, which announced earlier this month it too will have staff available at its federal courthouses.

While based in Macon, the middle district covers a 70-county area and also has offices in Albany, Athens, Columbus, Thomasville and Valdosta. The courthouses in all of these cities will be staffed for the election.

Vote Fraud: Back to the Future

Well, everybody knows that election officials never cheat, and after all, nobody can prove they cheat. The only thing that we know is that they're all from the same political party. And nobody would ever think that they would dare violate their oaths of office. And if I sound cynical about it, I am.

—Attorney Albert Jordan

Push-polling, like street money, gives an unsavory taint to the already maligned field of politics. But if there is any corruption that goes straight to the foundations of American democracy, it is vote fraud—a catchall term that includes ballot-box stuffing, phony voter registrations, and the manufacture of absentee ballot submissions. Nothing else in this book so convincingly proves that a free system such as ours, with its bias toward minimal control of the electoral process, keeps generating the same kinds of corruptions every few decades. This study of current vote fraud will remind us that we can never declare victory over, and we must be ever-vigilant about, corruption—particularly those practices that tempt politicians with the promise of power while operating in the shadows and on the hidden periphery of politics.

The idea of progress is fundamental to understanding the American character. As a people, we have always wanted to believe that the future is destined to be better than the past by dint of our unceasing

Vote Fraud

efforts at improvement, which we have usually managed to bring about. Unsavory practices such as election fraud belong in the dustbin of our discarded and long outgrown history. Surely, the ballot boxes in Texas are no longer stuffed! Votes are not stolen or manufactured anymore in Alabama! Elections in Philadelphia and California are certainly clean now! The press does not look for what it does not expect to find, and the public ignores the occasional muffled sounds emanating from ballot boxes hither and yon.

But the press and the public are in for a rude shock. Voting fraud is back, is becoming more serious with each passing election cycle, and soon—because of recent changes in the law—is destined to become even worse.¹ For our purposes here, we define voting fraud as any serious violation of election laws controlling the registration of voters or the casting of absentee, mail-in, or polling-site ballots. Many of the examples in this chapter are derived from local elections, but the corrupt practices certainly extend to elections for district, state, and national offices. After all, generally the same group of political party organizers, consultants, and precinct workers are employed at all levels. Christmas past and Christmas future are merging for those who profit from such perfidy. And it is past time for the press and public to receive a loud wake-up call, lest the ultimate corruption in a democratic system—the stealing of elections—becomes widespread, corroding trust in the essential process of democracy itself.

In this chapter, we focus on four U.S. locales—Philadelphia, Alabama, Texas, and California—to illustrate the current slide back to the bad old days of election fraud. Our interviews and other research have convinced us that we could just as easily have selected at least a dozen other states or many dozens of sizable cities to prove our thesis. The quartet we have chosen demonstrate the problem dramatically—maybe fulsomely. The scale of fraud may sometimes be small compared with the anything-goes days of a century ago, but several kinds of fraud are clearly ingrained and resurgent, and this trend ought to be of immediate and pressing concern to all people who care about the integrity of the American political system.

America's Sordid History of Voting Fraud

Our nation has a long and depressing history as a happy haven for the vote thief. For much of the last century and a good part of this one, elections in many states and localities became contests of the voting fraud capacities of various factions and parties. The chief question on Election Day sometimes was: who could manufacture the requisite number of votes most easily and shrewdly, giving the other side insufficient time to make necessary adjustments to its tallies and insufficient evidence to cry foul convincingly.

Sometimes no specific evidence of fraud was required to know it had taken place. For the 1844 election, New York City had a reasonably large voter pool of 41,000, but the turnout on Election Day was far more spectacular: 55,000, or 135 percent of the entire pool of voters! As one observer put it, "the dead filled in for the sick," and the city's dogs and cats must have been imbued with irresistible civic spirit, too.²

The nation as a whole got a taste of this kind of election snake oil in the 1876 presidential election, arguably the most corrupt in America's history before or since. On Election Day, Democrat Samuel J. Tilden of New York garnered about a quarter million more popular votes than Republican Rutherford B. Hayes of Ohio, and Tilden was the undisputed leader in states with 184 electoral votes (with 185 required for victory).³ However, twenty electoral votes in Florida, Louisiana, South Carolina, and Oregon were in dispute. Tilden had actually carried the first three of these states, but GOP-controlled election boards disqualified enough Democratic votes, for dubious reasons, to potentially tip the states to Hayes. Congress established a fifteen-member electoral commission, supposedly nonpartisan, to arbitrate the disputes, but the commission's partisan breakdown turned out to be eight Republicans to seven Democrats. As a result, every single controversial electoral vote was awarded to Hayes by a vote of eight-to-seven, and Hayes took office in 1877—and was called "His Fraudulency" by Democrats throughout his one term.

Historians and political scientists faithfully cataloged the abominable arts that were practiced at America's polls throughout the

centuries. Not long after the Hayes-Tilden election, for example, the "use of direct bribery in the United States" became "widespread."⁴ Most states and large localities began formally registering voters in this period, and it thus became more difficult to simply stuff the ballot box or hire so-called floaters or repeaters to vote twice or thrice.⁵ Resourceful political organizers changed tactics and began to buy votes on a large scale. One study in 1892 concluded that almost 16 percent of all voters in Connecticut were "purchasable."⁶ In 1910, a judge in Adams County, Ohio, convicted 1,679 persons of selling their votes—more than a quarter of all the electors; further, his inquiries showed that fully 85 percent of the county's voters had engaged in buying or selling their votes at some time in their lives!⁷

Ballot-box stuffing was not abandoned everywhere, of course, as suggested by the exceedingly close 1960 presidential election, which Democrat John F. Kennedy won over Republican Richard M. Nixon by only 118,574 votes.⁸ Strong suspicions exist that the Illinois electoral votes were stolen for Kennedy by Mayor Richard J. Daley, who late on election night magically produced just enough of a massive margin in Chicago to overcome Nixon's large lead in the rest of the state. (Thanks to a 319,000-vote advantage in Chicago, Kennedy won a paper-thin victory of 8,858 out of more than 4.7 million votes cast in the state—and thus captured all twenty-seven Illinois electors.)

The loss of Illinois would have reduced Kennedy's Electoral College majority edge to just six, and had he lost Texas as well, the election would have been Nixon's. In Texas, too, substantial voter fraud may well have occurred, though it is impossible to say whether fraud accounted for Kennedy's entire 46,242-vote majority out of over 2.3 million votes cast. One thing is for certain, though: Kennedy's running mate, U.S. Senator Lyndon B. Johnson of Texas, knew where all the votes were buried, and he had practiced electoral skulduggery before.⁹ Having lost an agonizingly close U.S. Senate race in 1941 to former Governor Pappy O'Daniel, whose supporters may have stolen it, Johnson was determined to turn the tables when he ran again in 1948. LBJ's alliance with South Texas's political boss, Judge George Parr, known as the "Duke of Duval County," helped him do it. As in 1941, the Democratic primary battle between Congressman Johnson and former Governor Coke Stevenson was as

tight as a tick, and the vote was so close it all came down to Voting Box 13 in Alice, Texas, in the heart of Parr's territory. Several days after the election, Parr's precinct man in charge of Box 13, Luis Salas, "found" 203 more votes, 202 of them for Johnson.¹⁰ Amazingly, these good citizens had voted in alphabetical order, with the same handwriting and blue pen.¹¹ Moreover, the discovered ballots gave the victory to LBJ by a statewide margin of only 87 votes. Thus was a U.S. senator created by corruption and sent on his path to the Oval Office.

While there is little to admire in the low standards Johnson set, his sins must be interpreted in context. Voting fraud was a way of life in parts of Texas in the 1940s, just as it has been, at various times, in Chicago, Louisiana, West Virginia, New Jersey, and many other places. For much of our history vote fraud has been as American as (sour) apple pie. This is a humbling and sobering reality, and we need to remember this whenever we feel the urge to sanctimoniously condemn wide-scale fraud in other countries' elections. Election reformers still have a full plate right here in the United States.

The Philadelphia Story

The city where the American democracy was born is now proof of America's continuing corruption of the electoral process.¹² In 1993, a special election was held to fill the vacated 2nd Senatorial District seat in Philadelphia, Pennsylvania. The contestants for the seat, which would determine the balance of power in the state Senate, were Republican Bruce Marks and Democrat William Stinson. Even though the district was substantially Democratic, Marks had come close to winning it in 1990 against veteran state senator Francis Lynch, and after Lynch's death in May 1993, Marks decided to try again. His new opponent, Stinson, was often described as a classic Philly Democratic pol, a deputy mayor who lost a 1991 Democratic primary for a city council seat by a mere seventeen votes.

The battle was fierce, and the campaign attracted statewide attention because the Senate was then divided evenly, twenty-four Democrats to twenty-four Republicans. With a pro-GOP, anti-

Clinton tide running across the country in fall 1993, Marks appeared to surge. Sure enough, Marks received more Election Day votes (those cast in polling places on the day of the election) than his opponent—19,691 to Stinson's 19,127. Yet Stinson garnered an extraordinary proportion of the absentee ballots to turn the tide—1,396 to Marks's 371, yielding totals of 20,523 and 20,062, respectively. The Philadelphia County Commissioners (Democrats Margaret Tartaglione and Alexander Talmadge Jr., and Republican John F. Kane), sitting in their capacity as the County Board of Elections, certified Stinson as the victor of the race on November 18, 1993. State Democrats arranged for Stinson to be sworn into office quickly, before a court could issue an injunction to stop it.

While the board's imprimatur ordinarily would have marked the conclusion of the election, in the case of the Second District it marked the beginning of a lengthy inquiry, by the end of which Stinson was indicted (though not convicted) and Judge Clarence Newcomer of the U.S. District Court for the Eastern District of Pennsylvania condemned the commissioners for permitting blatant violations of state election law and overturned the result of the special election. Stinson was eventually cleared of criminal charges of absentee ballot fraud, but in the civil proceedings, Newcomer found sufficient proof to implicate Stinson in a conspiracy to steal the election, and Stinson was ousted from office. (Several Stinson staffers were even less fortunate; their involvement in the fraud resulted in criminal prosecution and conviction.¹³) *Marks v. Stinson*,¹⁴ the conclusion of candidate Marks's civil challenge to Stinson's victory, marked an extraordinary but necessary intervention of a federal judge into the state's political process to redress claims of civil and voting rights violations. Newcomer's order to certify Marks as the winner on the basis of the machine vote total without considering the absentee ballots cast appears to be unprecedented in modern times.¹⁵

The vote fraud was documented beyond question.¹⁶ Despite Pennsylvania's strict laws regarding application for, completion, and return of absentee ballots,¹⁷ the Stinson campaign and related organizations engaged in the systematic distribution and collection of absentee ballots, which circumvented the normal process. More remarkably, the Democratic members of the Board of Elections themselves were implicated in the conspiracy, despite the procedural

safeguards they were legally required to observe in order to prevent absentee voting fraud. The electoral process was corrupted not just by a campaign but by those charged with overseeing it.

The competition for the Second District seat was tight enough to convince members of the Stinson organization that fraud was required to ensure victory. In both predominantly white and minority areas, Stinson's campaign and related Democratic Party organizations engaged in a widespread effort to file fraudulent applications for absentee ballots and then ensure the proper choice was made when applicants returned their ballots. Some of the applicants did not realize what they were doing, some were not even registered, and others were browbeaten and intimidated. The Democratic commissioners played a key role in the plot; as Marks recalled, they and their staffs "illegally [gave] absentee ballots directly to my opponent's campaign and to [Democratic] committee people."¹⁸

Absentee voting in Pennsylvania is not unlike that of most states: exacting statutory guidelines determine the method of application, completion, return, and processing of an absentee ballot. Absence from the state or county of residence, or disability, are legitimate reasons to vote absentee. An absentee ballot cannot be requested more than fifty days prior to the election and must be requested at least seven days before the election. A voter is required to submit an absentee ballot request to his or her local board of elections by the Tuesday prior to the election. Although the Philadelphia board's official policy required a check of each applicant's signature against the file copy, in actual practice it did not do so. When any absentee application is approved, statutory language requires the board of elections to return an absentee ballot only to the applicant, who must mail or return the ballot to the board in person prior to the Friday preceding the election.

The Stinson campaign used two distinct ploys to put illegally obtained absentee votes in its column. First, from July through September of 1993, campaign workers solicited hundreds of absentee applications as part of a canvass and registration effort in predominantly white Democratic precincts. Contrary to election law, "many persons who were hesitant to register because they simply did not want to go to the polls were told that they could fill out an absentee application and obtain a ballot out of convenience."¹⁹ The

dates of the applications were left blank to conceal the fact that they were requested either before or after the filing deadline. When William Jones, a Stinson worker, approached the candidate to express his concern over the scheme, Stinson told him "that he was never going to lose another election because of absentee ballots."²⁰ Robert O'Brien, a campaign staffer, instructed subordinates to deliver the completed applications to the election board's office. As a result, the board sent over 500 ballots to the campaign, which O'Brien then distributed to workers, who proceeded to take them to homes of voters. As Stinson had instructed, the workers directed voters to "either check off the straight Democratic box, or to check off the individual Democratic names, and then to return the completed absentee ballot to O'Brien."²¹ About 450 ballots supporting Stinson found their way back in this manner.

More dubious still was the Stinson effort to elicit absentee applications and "correctly" complete ballot packages in Hispanic and African-American precincts. Late in the campaign, polling results provided by the Democratic State Committee indicated Stinson was trailing Marks. The decision was made to target minority precincts in a last-ditch effort to turn the tide in his favor. In essence, the Stinson campaign workers convinced some minority voters that, in Marks's words, "if they wanted to vote from the convenience of their own home that they could do so, and they could just fill out the application and say that they were out of town or make up some medical reason."²² Ruth Birchett, who directed the Stinson campaign in minority areas, was explicitly assured by both the candidate and one of the election board's Democratic commissioners that the scheme was legitimate, although others in the Stinson organization recalled that a hard-edged cynicism permeated the effort. For example, one staffer reported that the not-funny "joke" in the Stinson campaign was that the Hispanics would sign anything, "a problem exacerbated by the fact that the absentee ballot application included no Spanish language instructions. Some Hispanics were apparently not even aware they were voting. Lydia Colon, for example, thought she was signing a form to request removal of a pile of refuse from her back yard. However, the Democratic canvasser who connived her into signing the ballot did not count on her subsequent decision to go to her polling place on election day and attempt to vote."²³

The execution of the minority plan mirrored the one used for the majority white precincts: applications were solicited and submitted by the Stinson workers, who then received, distributed, and returned about 600 ballots. Likewise, campaign workers instructed voters to mark their ballots for Stinson. The special twist was that the field staffers were paid one dollar per correctly marked ballot returned. In other words, the Stinson workers distributing the applications and ballots took the supposedly neutral polling place to the voters while serving simultaneously as remunerated flushers and haulers.

The Stinson organization received the funds to implement this plan from several sources, including the Committee for a Democratic Majority PAC (\$4,000) and a PAC associated with Democratic State Senator Vincent Fumo (\$4,000).²⁴ The money also paid for a phone bank operated in English and Spanish, to inform voters of the "new way to vote." From direct testimony, the dates of the street money contributions, and the receipts retained for payments to workers, Judge Newcomer determined that the ballots—cast overwhelmingly for Stinson—could not have been returned prior to the absentee ballot deadline. Further, it was clear to the court that campaign workers aided completion of the ballots "in the homes of voters and often directed, coerced, and/or intimidated voters to vote for Stinson; . . . [and] the campaign workers had a political and financial interest in obtaining votes for Stinson."²⁵

Compounding this disturbing pattern was the active assistance given the Stinson campaign by two election commissioners, both Democrats. These officials casually waived normal procedures, helped to process absentee applications for unregistered citizens, and permitted campaign workers to distribute ballots—all in contravention of the rules, and all consciously designed to result in a Stinson victory.²⁶ Judge Newcomer reserved some of his harshest language for Democratic commissioners Talmadge and Targaglione, since they "could have prevented much of the illegal activity that occurred even if the Stinson campaign had acted illegally."²⁷ If the commissioners had required that existing written procedures be followed, for example, the wrongdoing that altered the outcome of the election could not have happened. As Republican election attorney Jack Connors, who worked on this case, suggested, "You had

built-in arrogance of power in a local board of elections that had been in one party's control for over twenty years. The reason why this case is so outrageous . . . was that they thought they were going to get away with this."²⁸

This particular instance of fraud, unlike so many others, had a just ending that served as a powerful warning to vote-tamperers. After concluding that nearly 600 absentee ballots had been cast after the deadline by unregistered people, Judge Newcomer stated firmly that "Bruce Marks would have won the 1993 Special Election in the Second Senatorial District" had it not been for the Stinson organization's violation of state election law.²⁹ Newcomer then evicted Stinson from the state Senate, gave his seat to Marks, and with it, control of the Senate to the Republican Party.

But we need to remember that the Philadelphia fraud was widespread, well established, relatively easy to accomplish, and stayed hidden for a good while. Only an aggressive, generously financed, and thoroughly politicized legal assault on the system that stole an election managed to right the balloting wrong. Most candidates are not so well positioned to pursue suspected fraud—and as a consequence, one suspects, similar or more subtle shenanigans elsewhere may go undetected and unexposed.

Sweet Home Alabama: Southern Fried Voting Fraud

As Philadelphia's state Senate election suggests, it is the close election that often leads to revelations about voting fraud. (The candidates in close or disputed races are almost inevitably involved in court brawls, and their investigations can turn over rocks that hide sleazy shenanigans.)

Such has recently proved to be the case in Alabama as well. The 1994 election for chief justice of the state Supreme Court yielded a dead heat, with Democratic incumbent Sonny Hornsby losing to Republican Perry Hooper Sr. by fewer than 300 votes out of 1.2 million cast. It had been a high-stakes race, with the trial lawyers backing their former association president (Hornsby) with at least

016957

\$198,519 in campaign expenditures and Alabama business persons and groups spending many tens of thousands of dollars on their favorite son (Hooper).³⁰ To maintain his narrow lead, Hooper and his supporters launched a preemptive legal challenge after suspecting widespread fraud. Hooper's legal maneuvers were aimed at preventing the counting of 1,700 disputed absentee ballots—ballots that came disproportionately from solidly Democratic counties. The litigation was ultimately successful, permitting Hooper to finally be sworn in as the state's chief justice on October 20, 1995—eleven months after the election.³¹ And along the way to this belated victory, the Hooper forces uncovered some disturbing facts about Alabama's electoral process.

Once again, it is the absentee ballots that present an occasion for sin. In Greene County, a heavily Democratic part of Alabama's "black belt," almost a third of the vote was cast absentee, compared to well under 10 percent just about everywhere else. Dozens of absentee ballots were mailed by elections officials to a nonexistent post office box, with many of the ballots allegedly being picked up at the post office by an unknown individual.³² Local resident Paul Harrington readily observed the telltale signs of absentee fraud. During a meeting with the clerk of the Circuit Court of Greene County (who served as the manager of absentee ballots), Harrington found the clerk had discovered that

approximately 60 applications for absentee ballots were received requesting that the absentee ballots be sent to Post Office Box 115, Eutaw, Alabama, 35462. According to [the clerk], however, she later learned that no such post office box existed. However, as absentee election manager, she was unable to recover all the ballots. . . . Approximately 10 to 20 were . . . picked up by someone from the post office and the post office was unable to identify the individual or individuals retrieving the ballots.³³

Several dozen other absentees were sent to two Democratic officials, with the party chairman's home listed as the "permanent address" for many of the absentee voters.³⁴ Other absentee ballots went to the local sewer and water authority, a woman who had moved out of

the county six months earlier, and a man who had died well before the absentee balloting period began. This dead man somehow voted, by the way, while other legitimate voters showed up at Greene County polls on Election Day only to be told they were ineligible because they had supposedly already voted by absentee.³⁵

Similar problems cropped up in other Alabama localities. In Houston County, in the far southeast corner of Alabama, a man "dead for seven years," according to his wife, has regularly been recorded as voting by absentee,³⁶ despite the difficulties in delivering a ballot to the afterlife. Reportedly, political activists would also provide absentees to eligible persons and then take them away after the ballot had been signed, with candidate choices marked only in pencil (or not marked by the presumed voter at all).

Then there were the helpful visits to nursing homes in Montgomery and elsewhere. For example, a young woman observed with absentee ballot materials showed up at the capital city's Tyson Manor Nursing Home shortly before the 1994 elections and "assisted" incapacitated and even comatose patients with their ballots. As one visitor reported: "I had seen [a particular patient] in the bed many times in the past . . . [and] I thought she was comatose . . . [she] was incapable of filling out the forms or even making a mark on the papers. She died three days after this event, which would have been before the election on November 8, 1994."³⁷ A patient with severe Alzheimer's disease supposedly cast a ballot in another nursing home even though her daughter testified that this was not possible and the woman had been removed from the voting rolls at the family's request the previous summer.³⁸ As the daughter recalled, "her name still appeared on the list in November, 1994," even though "no member of the family" had applied for an absentee ballot.³⁹

Suspicious circumstances were identified all over the Alabama map. Some voting machines were apparently programmed to facilitate voting for Democratic candidates and to discourage GOP votes,⁴⁰ according to an affidavit of John Russell Campbell:

You could vote the straight Republican ticket by punching one button at the top of the Republican column and it would light up all of the officials' names in the Republican column. And

"EVERYBODY'S DOIN' IT": BIPARTISAN CORRUPTION

then you could reach over and punch the button of individual Democratic candidates or independent candidates and it would light up and cancel the [individual] light on the Republican side and then . . . the votes would be cast. You could not do that if you were voting the straight Democratic ticket. If you punched the light at the top of the Democratic ticket, it would light up the entire Democratic ticket. But if you reached over and tried to vote individual Republican candidates, nothing would happen. The light wouldn't come on and it wouldn't cancel the light on the individual Democratic candidate.

Many absentee ballots from unregistered individuals and other unqualified people were counted by local election officials even though the ballots were challenged by authorized poll workers. Under state law, these suspect ballots are supposed to be separated out from unchallenged ballots so that they can be carefully reviewed; instead, the signed cover sheets were removed and they were mixed in with all other ballots—so it was impossible to identify and retrieve them.⁴¹ The situation apparently approached the proportions of a parody, Campbell said:

Despite my requests (over about a thirty-minute period of time), the Committee continued to open affidavit envelopes and separate them from the ballots at a feverish pace. Whenever I was able to stop the process of opening the affidavit envelopes at one end of the table, the Committee members at the other end would frantically begin ripping envelopes open and separating the ballots.

And despite the closeness of the election, which was obvious to everyone on election evening, the ballots were not secured in many counties. Some ballot boxes were missing, votes from one precinct were combined with another, seals on various containers of votes had been broken, and ballot boxes were openly available in unwatched public rooms.⁴²

John Campbell, the dumbstruck Alabama poll watcher, summed up his reactions after a long election day of observing arbitrary, conspicuous, and downright illegal actions by local officials charged

Vote Fraud

with safeguarding the electoral process: "When I was asked to serve as a Ballot Security Attorney, I could not believe that the election officials in Wilcox County would be capable of tolerating, much less participating in, the type of activities that were described to me as having occurred in the past. Not only was it as bad as it had been described to me, it was worse. I was shocked."⁴³

Somewhat surprisingly, Campbell's description of Wilcox County's elections received backing from Dan Warren of the county's own Board of Registrars. When we contacted Warren, he refused to address Campbell's specific allegations but said they were "the tip of the iceberg" and that "there will never be a fair election in Wilcox County."⁴⁴

Of course, there is no mystery about the systemic source of Alabama voting corruption. Election laws and procedures are followed—or ignored—in each county at the discretion of a board comprised of the local sheriff, the probate judge, and the circuit court clerk. Frequently, these individuals are all members of the same political party. An experienced Alabama attorney, currently involved in the search for voting fraud in his state's 1994 elections, offered us an overview of the state's election system:

Do y'all understand how the system is rigged to begin with? Basically what happens is that you're not going to second-guess elections in the absence of strict proof. And then what you do is make sure the people who control the proof are in the inner circle of your party. And therefore, as the process unwinds in the wee hours of the [election] night, based on the information that's available from the media outlets, the inner circle comes up with what [votes] they need. Who's going to rat on them? Who's going to tell on them? Well, everybody knows that election officials never cheat, and after all, nobody can prove they cheat. The only thing that we know is that they're all from the same political party. And nobody would ever think that they would dare violate their oaths of office. And if I sound cynical about it, I am.⁴⁵

All in all, the Alabama electoral process does not seem likely to be

656910

be another deeply ingrained custom in a traditional state slow to change.

California: The Golden State for Vote Fraud

If mega-state California, as advertised, is the trendsetter for the rest of America, voting fraud will truly be a Malibu-sized wave of the future. For the Golden State has exceptionally serious difficulties in its system of registration, absentee balloting, and election-day voting.

The fundamental difference between California and Philadelphia or Alabama is that the breakdown of the electoral process begins at a much earlier stage than absentee balloting. The voter registration setup is the first source of trouble; not to put too fine a point on it, it is nothing short of a disgraceful mess. California has not thoroughly purged its voting rolls of those who are no longer eligible to vote since 1979, when advocates of greater political participation secured passage of a law permitting the removal of voters' names from the rolls only by means of an inconclusive "negative purge." Voters who have not cast a ballot in two consecutive general elections are sent a postcard asking whether they still live at the listed address. Only if the card is returned as undeliverable is the name stricken. So long as the card is not returned, for whatever reason, the name stays.

Many voters who have died or moved are thus retained on the registration rolls, and as a result there are literally millions of inaccurate or wrongful registrations on file. Many voters have moved out of California but remain on the rolls. Some have simply changed addresses within the state and have duplicate registrations (one each in the new and old locations). In many localities of California, a duplicate registration is recorded if a voter who has moved within a city or county makes the slightest addition or deletion (for example, of an initial or nickname) when he re-registers. A sample of 940 voters requesting absentee ballots in Tulare County discovered, for example, that 92 people had relocated (according to other voters currently residing at each address). Partial voter files showed 20 of this group were recorded as voting in the 1994 general election at their old address. It is not clear whether they returned to vote there,

or they had voted twice (at an old and new address), or there was some other explanation.⁴⁶ Other voters have died or been convicted of felonies; either condition normally makes a person ineligible (though a Chicagoan might disagree). And at least a few individuals register twice in order to vote twice. In 1994, there were cases of people (1) voting both absentee *and* on Election Day, (2) voting two absentee ballots, and (3) voting at two different polling places on Election Day.⁴⁷

Phony registrations encourage shenanigans in any place, and California's massively erroneous voter list is an engraved invitation to commit fraud. Incredibly, the most recent official estimates of the "deadwood" on the California voter rolls range from 14 percent to 24 percent of the more than 14 million registered voter total—meaning between 2 million and 3.4 million phony registrations crowd the books.⁴⁸ Every election cycle, deadwood voters cause state and local governments to waste \$5 to \$8 million of taxpayers' money printing and mailing voter pamphlets, unneeded ballots, and the like.⁴⁹

Among the many factors responsible for this monumental ineptitude is the failure of bureaucrats at various levels to share death and incarceration records with registrars, as they are supposed to do;⁵⁰ the appalling lack of a centralized statewide voter registration list that could at least reduce or eliminate the extraordinary number of duplicate registrations; and most important for our purposes, the existence of a burgeoning, legal campaign industry whose *raison d'être* is the registration of citizens. Political parties, individual campaigns, and ideological interest groups contract with the consulting organizations to find and register eligible persons at a per-head price that ranges from \$1 to \$10. The profit incentive demands a large volume of registrants, obviously, and so the paid solicitors avariciously sign up whoever they can find, often without regard to the legal niceties, including illegal and legal aliens, some juveniles and infants, fictitious individuals, companion animals (known in less sensitive states as "pets"), and even the dead (or "life-challenged" voters). As one California elections official asserted, "You're just asking for trouble. . . . Anytime you pay to register people, you're going to have fraud."⁵¹

Because California registrars have "a ministerial duty to accept a

registration without investigation, absent any challenge to its validity," the state's registration system is "a system of self-certification, [with no] certainty that a registrant is who he or she claims to be."⁵² Since it is widely acknowledged that prosecution for registration fraud is given a very low priority by law enforcement agencies, this is yet another green light to sloppy or unethical work by paid voter solicitors.⁵³

The lamentable results of widespread registration solicitation are to be found all over California. In the city of Los Angeles, paid solicitors added over 4,000 fraudulent registrations just in 1992.⁵⁴ In Glendale, bounty hunters "found" 190 unregistered voters in a single apartment building, and signed them up (along with a dog)—even though many were apparently already registered.⁵⁵ Jailed felons have registered while incarcerated, and other new voters have illegally listed business addresses (including department stores) as their supposed place of abode.⁵⁶ Illegal and legal aliens are, without question, on the rolls in many areas. A single precinct in San Diego County was found to have 30 verifiable legal aliens out of just 313 registered voters.⁵⁷ Illegals voted in Fresno and Tulare County in November 1994;⁵⁸ and a prominent legal alien—a Mexican businessman and a publisher of a Spanish language newspaper—registered to vote in 1987, while in the United States on a tourist visa, and cast a ballot in both 1992 and 1994 despite his lack of American citizenship.⁵⁹ Even Mario Aburto Martinez, the Mexican citizen who assassinated the ruling party's 1994 presidential nominee Luis Donaldo Colosio in Tijuana, was a registered voter in San Pedro.⁶⁰

The use of paid solicitors for partisan registration efforts has plagued California for a decade or longer. The Republican Party, finding its share of the registration rolls lacking, engaged in a year-round registration drive as early as 1986. During that year, the party employed approximately 2,000 bounty hunters and paid them \$1 to \$4 per Republican registrant as part of its centralized, coordinated registration campaign. The simultaneous Democratic Party registration drive, though less organized, also utilized paid workers, employing 250 bounty hunters in Orange County alone.⁶¹ In one recent case of bounty hunter abuse, two workers retained by political consultant Michael Long for Republican Brooks Firestone's campaign for the state assembly were arrested for registering the inhabitants of

a graveyard and were actually charged with election fraud. Long's firm paid the two, and approximately fifty others, about \$3 per completed Republican registration card. Unlike their companions, the two copied names from tombstones and submitted the cards to their employer, who reviewed the cards and then forwarded them to the Firestone campaign, which in turn submitted the cards to county officials.

Neither Firestone nor Long's firm was apparently aware the registration cards were fraudulent, and Firestone noted, "We had no intention of engaging in fraudulent registration whatsoever. . . . It wouldn't do us any good, because dead people don't vote."⁶² Of course, while the dead logically cannot vote, neither should they be able to register. No evidence suggests that the Firestone campaign intended to capitalize on the life-challenged registrants, but less scrupulous candidates may not find the legal or ethical principles involved very compelling.

The tried-and-true fraud associated with absentee balloting is part of the California picture, too, mirroring the conditions already identified in Philadelphia and Alabama. Jim Boren, reporter for the *Fresno Bee*, described the bold and "sophisticated" pattern of activity by campaign staffers and candidates: "They know what the exact turnaround should be in neighborhoods. The campaigns mail the absentee requests to the elections office, and then they literally follow around the postmen and women as they deliver the absentee ballots back to the residences. They go up to the residences, offer people a stamp, and make sure they vote."

This harvesting of absentees (sometimes called "ballot farming") may simply seem like savvy politics, but violations of law are involved.⁶³ A recent *San Francisco Chronicle* investigation of one county's elections found that signatures on dozens of absentee ballot request forms did not match the registration signatures on file, yet the ballots were still mailed; and that 1,500 suspect absentee ballots were simply filed away and never referred to the district attorney for investigation.⁶⁴ At times, local candidates have directly obtained absentee ballots from the elections office and personally delivered the ballots to voters, entering their homes while the voters were casting them. Campaign workers have also punched holes in the ballots for voters, instructed people who to vote for, handed out free postage

stamps, or simply taken the completed ballots away with them, and occasionally engaged in intimidation of voters during the balloting process.⁶⁵ All of these activities can result in misdemeanor or felony charges under existing law. Two recent city council elections in Stockton and Inglewood have been overturned because of absentee ballot hanky-panky of this sort.⁶⁶

Of course, the ultimate form of absentee balloting is voting by the dead. Many years ago, if you planned to remain politically active once deceased, you had to arrange burial in Chicago or Louisiana. Now, apparently, California is an acceptable alternative. For example, in Alameda County a deceased woman's 1994 absentee ballot was cast—the registrar suspects that either her daughter or roommate did it,⁶⁷ and in San Francisco one Lazarus who had passed away twelve years earlier (in April 1982) came back to vote in 1994.⁶⁸

The dead are not the only unexpectedly energetic voters on election days in California. Some registered Golden Staters are such good citizens they vote twice—this a result of the widespread duplicate registrations mentioned earlier. In one study of five Central Valley counties following the 1994 general election, 3,300 voters were found to have registered twice. With only very partial records available on some of these voters, 90 were identified as having cast at least two ballots.⁶⁹ (Had all data been accessible, the number of "vote-early-and-often" citizens would almost certainly have been higher.) A number of people may also be voting under the names of registered voters who, for whatever reason, are not expected to show up at the polls. On general Election Day 1994 at a Kern County precinct, for instance, a woman was in the process of casting her ballot when another woman (with two female friends) entered the polling place and requested a ballot under the name of the woman who by chance was already in the voting booth. As the legitimate voter objected and stared in disbelief, the impersonator and her accomplices fled the area.⁷⁰

As if all this were not enough to malign California's unsecured electoral system, the record-keeping and vote certification are so sloppy that almost nothing adds up correctly. When the state's Fair Elections Foundation, a nonprofit watchdog group, examined the November 1994 returns from seven counties, the county registrars inexplicably reported totals that differed by many thousands from

ange County, the registrar claimed 627,223 votes had been cast but the secretary of state's office released a final count of 618,448. To make matters worse, the tallies by poll workers of votes cast in each precinct frequently differed from the tallies recorded by the county registrars. In Los Angeles County, fully 40 percent of the 6,104 precincts showed a disparity between the counts of the poll workers and the registrars.⁷²

Computer software glitches may well account for some (though not all) of these errors. Still, the mistabulations add to the seeming haphazardness of the laid-back California elections process. When combined with the abundant evidence of voter fraud (both potential and actual), there is but one reasonable conclusion: let honest California elections officials beware, and let concerned citizens be about the business of reform.

These recent California experiences also point to a noteworthy irony that applies to other states and the nation as a whole: laws intended to encourage voting have sometimes become an entrée for vote fraud. The last quarter-century has seen an opening up of the electoral process almost everywhere, as regulations concerning registration and balloting were eased to maximize convenience and turnout. But undeniably there is a hidden cost to these benefits: the resurgence of fraud apparent around the country. Remedies that neatly cure one ill frequently and surprisingly cause another. Just as with well-intentioned campaign finance schemes, the "law" of unintended consequences prevails—and it is a rule rarely given much thought when many reforms are first designed.⁷³

Vote Fraud in Texas: The Wild, Wild Southwest

As we have already demonstrated in this chapter, the Lone Star state—whatever the extent of its electoral hijinks—will never walk alone in the field of voting fraud. Nevertheless, fraud in contemporary Texas is still breathtaking in its boldness and scope, amply fulfilling the state's "bigger and better" stereotype. Reformers bent on cleaning up political excesses had best hope that the state's informal slogan, "Don't Mess with Texas," does not extend to the registration and voting system.

076962

fraud found in Philadelphia, Alabama, and California: voting by illegal aliens, ballots from the living dead, manipulation of the elderly, double voting, absentee ballot shenanigans, street money incentives, and so on. In addition, some traditions and laws unique to Texas create conditions that spawn even more corruption.

The most egregious of the state's election law provisions permits people to come to the polls on Election Day, and without a recorded registration, to cast a ballot as long as they sign a sworn statement swearing that they are in fact registered in that precinct.⁷⁴ These ballots are *not* kept separate so that they can be challenged or checked later. Just in Harris County (the Houston area), 6,707 individuals *who were actually ineligible* voted this way in the 1992 presidential election.⁷⁵ Of this substantial total, 1,262 had *never* been registered *anywhere*, and twenty-five of the illegal voters were *convicted felons* not permitted to vote because of their crimes.⁷⁶ It took Harris County seven months to conduct the check, long after the election results had been certified. And of course, once again no one knows whether the illegal ballots affected the election since these provisional votes were not segregated from the clearly legal ones. Incidentally, even though it is a felony for a person to "vote or attempt to vote in an election in which the person knows he is not eligible to vote," no punishment is designated for those who "unintentionally" violate the law. Surprise: not a single one of the 6,707 illegal voters was prosecuted because it is very difficult to prove criminal intent.⁷⁷ Nor was this merely a localized problem affecting Houston. In the same 1992 general election, over 3,000 unregistered, ineligible people cast a ballot in Tarrant County (the Fort Worth area).⁷⁸

Moreover, Texas has an extraordinarily generous "early voting" system⁷⁹ that permits *anyone* age 65 or older, for instance, to use a mail-in ballot (the same kind of ballot as the absentee, except that senior citizens need not be away from home on Election Day or incapacitated to use it). Generally, as Texas examples will show, the more substitutes there are for in-person voting, and the more frequently they are used, the greater the opportunities for voter fraud. To make matters worse, Texas does not require mail-ins and absentee ballots to be accompanied by a witness or notary signature on the sealed envelope that actually contains the completed ballot.⁸⁰ Nor is even a full signature by the *voter* necessary on this envelope, even

though a space is provided. Many elections officials permit *any* mark (an "X" or a check) to suffice—making it impossible to verify the voter's signature and easing fraudulent efforts by people who come into possession of absentee or mail-in ballots. In addition, some registrars do not seem to match and carefully compare the signatures on the mail-in ballot application and the actual ballot envelope. One watchdog group counts over 200 instances of apparently differing signatures on the applications and envelopes in the 1994 Democratic primaries just in Galveston County; several races were decided by fewer than 200 votes.⁸¹ A follow-up investigation by the Galveston district attorney's office found "some violations of the Texas Election Code," including a mentally and physically incapacitated voter's ballot being cast by a caretaker who lived in the voter's home.⁸²

Some of the elderly—especially the infirm and the poor—are vulnerable to manipulation under this Texas regime. A Lone Star state form of street money pays individuals to organize absentee and mail-in voters.⁸³ (In Hispanic areas these activists, each paid around \$100 per week, are referred to as the *politiqueras*.) Typical of these activists' targets in recent elections was Edward Taylor of Houston, a seventy-nine-year-old retiree. Prior to a 1993 municipal election, a woman Taylor had never met before arrived at his home and presented him with an absentee ballot *application*, which she mailed after Taylor signed it. Very shortly after the postman delivered the ballot to Taylor's mailbox, the woman returned. Taylor related the events that followed in a sworn affidavit:

Shortly after I received the ballot, the same woman, in the company of a man, came to my house. . . . She used a hole punch to vote my ballot. She then told me to sign my ballot. This woman then put my ballot in the envelope as I was not allowed to mail in my ballot. The woman then took my ballot with her when she left.⁸⁴

As is needless to point out, this entire procedure is not just unorthodox but blatantly illegal.⁸⁵

Compared with some others, Taylor was well treated, and actually given a role . . .

of his ballot. One married couple, Maria and Jesus Casteneda, were misled when a "helper" showed up at their house.⁸⁶ Instead of aiding them in marking their ballots for an independent candidate for city clerk, David Pena, as the couple requested, the helper tricked them into checking the "straight Democratic" ticket box. As Jesus Casteneda recalled, "I later found out that I had not actually voted for David Pena and that [the helper] made me believe I did."⁸⁷ Another "helper" aided a husband and wife, Charles and Gloria Scott, by voting their ballots and falsifying the certificate signatures on the carrier envelopes.⁸⁸ Even more remarkable was the story of Mr. and Mrs. Jim Cheney Jr.⁸⁹ Neither of the Cheneys applied for an absentee ballot in 1993, but two arrived anyway. (Someone unknown to them did the application paperwork.) Soon after, Mrs. Cheney received a woman visitor who offered to take her to the polls on Election Day. She declined, indicating she did not plan to vote; she also pointed out the two unrequested ballots, which the visitor cheerfully took off Mrs. Cheney's hands. Of course, the ballots were cast and counted in the election. This was particularly noteworthy in the case of Mr. Cheney, who had died in September 1992. Mr. Cheney came back again to his old home in March 1994, when he seemingly could not resist applying for an absentee ballot to vote in the federal and state primary elections. (Fortunately, the bogus application was rejected this time by an alert registrar.)

In South Texas, meanwhile, remarkably little has changed politically since the days of LBJ's vote stealing. The sheriff is still the premiere power in most counties, with great influence over the electoral process. Some public officials (especially sheriffs) are again on the take, with drugs rather than moonshine being the source of their ill-gotten gains.⁹⁰ And all kinds of fraudulent shenanigans remain a staple of political life there. In recent elections, substantial charges included voting by non-citizens, the mailing of blocks of absentee ballots directly to a political party's headquarters, voting twice, intimidation of voters at the polling places, and campaign workers following around postal delivery persons in order to take mail-in ballots from voters' mailboxes shortly after they were delivered.⁹¹ Poll workers have also observed official election judges—supposedly neutral arbiters—exhorting voters in line at the polling places to support a favored candidate or party.⁹² And the beat goes

To paraphrase John Donne, no state (except Hawaii) is an island, so Texas shares vote abuse practices with other parts of America. As in Philadelphia, fraud in Texas is bold. As in Alabama, Texas fraud is traditional and institutionalized. As in California, vote fraud in the Lone Star state is assisted by lax state laws that practically invite trouble. But as long-time residents of the state are fond of bragging to outsiders, everything is bigger in Texas, where vote fraud combines all of the polling problems observed elsewhere on our American journey.

Election Fraud in Perspective

What conclusions are reasonable, now that this electoral tour of some diverse precincts is over? As we asserted at the outset, contrary to the belief of some that voter fraud is a thing of the past existing today only in isolated pockets, if at all, the evidence accumulated in this chapter's case studies strongly suggests a persistent pattern of criminal fraud that is well organized and a continuing part of the political culture in some areas. The fact that fraud is generally not recognized as a serious problem by press, public, and law enforcement creates the perfect environment for it to flourish.

The role played by the news media deserves a special comment. Many of the stories we have just reviewed received little or no national press attention, even when the local media carried news accounts. Perhaps they were seen merely as "isolated" incidents of interest only to the citizens directly affected. Remarkably, though, some of these cases of fraud attracted amazingly light attention from the local news organizations themselves. Partly, as noted at the outset, this results from the mistaken belief among journalists that vote fraud is no longer a serious problem. But it also reflects a lack of knowledge even among opinion makers about vote fraud's resurgence. Less charitably, the coverage vacuum may also be another indication of a disease some reporters may have contracted from extended contact with political professionals: a blasé attitude about some unsavory aspects of the electoral sausage-making process.

In contrast to the absence of the press, the alert reader has probably already noticed that Democrats feature prominently in almost

7969

Democrats take umbrage, and the Republicans mount a high horse, an explanation is in order. First, the GOP is fully capable of voting hijinks when circumstances permit. For example, the two Ventura County workers who were arrested in October 1994 for collecting the names of newly registered voters from tombstones were working on behalf of a Republican candidate for the legislature.

Another hotbed of Republican vote fraud is rural southeastern Kentucky, where a sizable number of GOP local candidates, consultants, and precinct workers have recently been caught paying off voters to cast their absentee ballots "correctly," among other offenses.⁹³ Several decades later, the price of a vote was still reasonable—five dollars or a half-pint of whiskey—but by the 1980s and 1990s a combination of inflation and candidate competition had driven the per-vote cost to about \$50.⁹⁴ Despite the substantial increase, various local Republican politicians and their absentee-ballot "brokers"—frontmen who give people cash in exchange for their marked and signed absentees—were more than willing to pay the price.⁹⁵

"It's a way of life," commented former assistant state attorney general Dale Wright, who was assigned to the vote fraud hotline in his office. "It is basically conceded in Kentucky that people have a constitutional right to sell their vote. We laugh about there being three Kentucky cash crops: tobacco, marijuana, and votes."⁹⁶ Wright describes a particularly blatant form of vote-buying in some Kentucky precincts:

Sometimes the buying or selling [of votes] is done right at the door of the polling place. The [vote-buyers] are stationed at the end of the road leading to the [precinct], and trucks stop and the drivers are given a kind of business card. Then these [bought] voters go into the polls and the [partisan] election judges see the card, know exactly where it came from, and watch to see that the voter votes correctly . . . Then one of the judges will tear off a certain corner of the card. When the voter drives off, he stops to see the vote buyer at the end of the road, presents the torn card, and is paid.⁹⁷

Moreover, in some parts of the state, says Wright, "The patriarch or

family to the highest bidder, and once [he or she's] been paid, [all family members] file for absentee ballots, sign them, and turn them over" to the party or candidate's agent. By the way, Wright knows whereof he speaks, and not just because he worked in law enforcement. "Hell, I was part of it. My first year out of law school, in 1971, I hauled half-pint whiskey bottles all [election] day around the polling places, and I took the money to the family patriarchs" at a time when he was active in partisan politics.

Kentucky and a few other places aside, Republicans have fewer opportunities for vote fraud available to them. In many states, particularly in the South and some border states, the GOP has rarely if ever controlled the local and legislative offices necessary to set the rules and manipulate the election process. Alabama and Texas clearly demonstrate this, although in those states and elsewhere in Dixie, Republicans are beginning to make the necessary gains at the ballot box that will change the balance of power in many localities.

In and out of the South, another factor is also at work: the hard reality of economic and class politics. In most areas, the Republican base consists primarily of white-collar, managerial professionals, as well as Christian conservatives. Neither group is easily induced to commit fraud; community standards, cultural values, "clean government" orientation, high education level, and/or the lack of a financial incentive to commit fraud for just a few dollars work against any Republican Party operative who seeks to draft them into any illegal schemes.

By contrast, the pool of people who appear to be available and more vulnerable to an invitation to participate in vote fraud tend to lean Democratic in their partisan predisposition, such as low-income minorities.⁹⁸ The usual turnout among African Americans and Hispanics is disproportionately low, and Democratic organizers are often desperate to boost their participation rate. Some liberal activists have even partly justified fraudulent endeavors on this basis; those making this case say it is unfair that the voices of the poor and dispossessed are muted at the ballot box, and therefore extraordinary measures (for example, stretching the absentee ballot or registration rules) are required to compensate.⁹⁹ To most observers, though, the rationalization that the end justifies the means is not very convincing. The 1993 passage of the "Uniformed Services of the Health Care Act" . . .

reduced whatever cogency such an argument possessed. (This bill, which also potentially increases the opportunities for vote fraud, is discussed in chapter 11.)

Less partisan readers might wonder more about the breadth of election fraud. Are polling problems restricted just to the four hot spots we investigated, or do they characterize the American electoral process generally and range more widely? Our strong suspicion—based on dozens of unexplored tips from political observers and interviewees—is that some degree of vote fraud can be found almost everywhere, and serious outbreaks can and do occur in every region of the country. In New Jersey, for instance, nearly 1,000 illegal votes were cast in Hudson County (Jersey City) in a 1989 election, including some by people who were unregistered and others who were dead.¹⁰⁰ In addition, several dozen psychiatric patients—some of whom believed Franklin Roosevelt or Harry Truman was still president—managed to cast absentee ballots in a local 1993 election in Secaucus.¹⁰¹ And, one of our interviewees, Republican political consultant Ed Rollins, claimed in a session with us that in the 1993 New Jersey gubernatorial election, there were precincts with 100 to 200 votes recorded for the Democratic candidate, Governor James Florio, before the polls opened. Rollins blamed "Democratic sheriffs in control of the machines."¹⁰²

Granted, vote fraud has been a staple of New Jersey's history; as one chronicler wrote, "What Renaissance Italy was to art, the old-time Garden State was to vote fraud."¹⁰³ However, places with relatively spotless records, where the authorities are convinced that the electoral process is clean, may be especially vulnerable to fraud. Virginia is a perfect example. Though administratively well run, the elections process in the prideful Old Dominion may be too reliant on an outdated "honor system" and sense of civic security. One can cast a ballot in Virginia on Election Day without displaying any identification. All one must do is give a name and an address to a poll worker who then checks the official voter list—a procedure potentially wide open to fraudulent manipulation.

Whether fraud is Democratic or Republican, or located in the North or the South or the West, the effect on American democracy is similar. While electoral hanky-panky affects the outcome in only a small proportion of elections (mainly in very tight races), even one

fraudulent ballot is too many. The superstructure of any representative democracy ultimately rests on the soundness and integrity of the elections that produce its governors. Most important of all, citizens must have complete confidence that the declared winners are the actual winners; otherwise, the motivation to participate in elections is destroyed. Millions of citizens are already convinced that their one vote matters too little to exercise the franchise. Once the pattern of election fraud becomes too obvious for the media to ignore, and the public begins to suspect or believe elections can be stolen, then American democracy's currently tenuous hold on many individuals may well dissipate.

Therefore, the need for reform is urgent and clear. Voter turnout in the United States is traditionally too low, and cynicism among citizens too high, to permit the malodorous malady of election fraud to continue unchecked—or to spread. Fortunately, some simple procedural changes, combined with newly advanced technology, can make a real difference in this corrupt province, and proposals in both categories will be set forth in chapter 11.

Notes

- In a letter to Gibson dated August 9, 1993, Secrest accused the reporter of "a pattern of very disturbing behavior . . . potentially including . . . receipt of stolen materials, . . . fraudulent means to acquire propriety [sic] trade materials, and . . . harassment of employees in a dark parking lot as they left work." No action followed, and the facts of Gibson's reporting were never convincingly challenged or refuted.
43. The average population of registered voters per district was approximately 30,000, so as many as one of every twenty households containing a registered voter was being reached—a sizable proportion if one's goal was to spread rumors.
 44. Nine separate questions in the poll posed negative arguments about Orrock. The respondent was asked to state whether each argument was "a very persuasive reason not to reelect him," "an only somewhat persuasive reason," or "a not at all persuasive reason."
 45. Wisconsin Republicans have also been targeted in state legislative races. These push-polls were reportedly conducted by the National Education Association's Wisconsin affiliate. See Harwood and Pearl, "In Waning Campaign Hours." See also Judy Williams, "5th District Candidates Pull Plug on Phone Calls," *Appleton (Wisconsin) Post-Crescent*, October 9, 1994, p. B8; and Judy Williams, "Candidates at Odds Over Phone Tactics," *Post-Crescent*, October 29, 1994, p. B1.

CHAPTER 10. VOTE FRAUD

1. In the 1994 general elections there were several well-publicized close contests in which vote fraud was alleged, including the Maryland gubernatorial race, won by Democrat Parris Glendening over Republican Ellen Sauerbrey by 5,993 votes out of more than 1.4 million cast; a North Carolina U.S. House contest in District 7 won by incumbent Democrat Charles G. Rose over Republican Robert Anderson by 3,821 votes out of 121,519 cast; and a California U.S. House race in District 36 between incumbent Democrat Jane Harman and GOP challenger Susan Brooks, which Harman won by only 812 votes of 195,808 cast. In this chapter, however, we have chosen to focus on less well-known examples that are indicative of systemic corruption.

8. For further details on the 1960 election, see Theodore C. Sorensen, *Kennedy* (New York: Harper and Row, 1965), chap. 8, pp. 211–23; Stephen E. Ambrose, *Nixon* (New York: Simon & Schuster, 1987), chap. 26, pp. 584–608; and Theodore White, *The Making of the President 1960* (New York: Pocket Books, 1961).
9. As Johnson underling L. E. Jones later reported, LBJ had an early introduction to the (under) world of voter fraud. Working for the left-leaning Maury Maverick in his winning 1934 congressional campaign, Johnson sat at a table covered with money and paid barely bilingual Mexican-Americans in multiples of \$5 bills. Jones realized that Johnson was paying each man \$5 for each eligible voter in his family. See Robert A. Caro, *The Years of Lyndon Johnson: The Path to Power* (New York: Alfred A. Knopf, 1982), pp. 276–77. Johnson put this experience to good personal use in 1937, campaigning in his successful bid to fill Texas's Tenth Congressional District seat, which had been vacated by the death of James P. Buchanan. Caro reports that Johnson bought votes in African-American and Czech communities.
10. Parr ordered Salas to come up with the needed votes in a meeting attended by Johnson himself, according to Salas. Decades later, Salas admitted that two deputy sheriffs added the extra names to the voter list, at his direction. Most observers at the time strongly suspected this skulduggery, but efforts in the Democratic state committee and in the courts to change the results failed. See James W. Mangan, Associated Press interview, July 30, 1977. For a more extensive account of Johnson's Box 13 shenanigans, see Caro, *The Years of Lyndon Johnson*, chaps. 14 and 15, pp. 318–412.
11. The hundreds of previous signatures were written in different color inks, and were clearly signed by each individual voter separately.
12. The first draft of the Philadelphia section was researched and written by University of Virginia graduate student Charles H. Woodcock.

Notes

13. See "Stinson Cleared of Election Fraud," United Press International regional news, June 22, 1994. There was insufficient evidence to tie Stinson directly to the fraudulent efforts made on his behalf. The Democrat had been specifically charged with unsealing and counting absentee ballots, as well as unlocking voting machines in his own precinct. For a description of the pretrial proceedings, see Marc Duvoisin, Daniel Rubin, and Henry Goldman, "Stinson, 2 Aides Are Indicted; Charges Center on Absentee Ballots," *Philadelphia Inquirer*, March 13, 1994, p. A1.
14. Newcomer's final opinion in the *Marks v. Stinson* case (1994 U.S. Dist. LEXIS 5273; hereafter, *Marks v. Stinson*) was actually the second time he ordered Stinson stripped of the seat and certified Marks. The proceedings occurring prior to his April 26, 1994, decision are complicated, and an accounting of the entire obstacle course Marks was forced to run in order to gain redress would require a chapter in itself.

Marks's appeal through the state court system proved futile. The Marks campaign was actually aware that absentee malfeasance had occurred prior to election night. Even so, Steve MacNett, a Pennsylvania lawyer who worked on Marks's appeal, explained that at each of several stages of the appeal process, "the apparent over-politicization of the Pennsylvania Courts, especially in Philadelphia," prevented successful action. MacNett continued, "[The] three judges he was before in Philadelphia, each of them has deep ties to the Democratic party establishment" (interview with Steve MacNett, July 18, 1995).

Marks's inability to gain redress quickly was compounded by the actions of the County Board of Elections, which prompted Judge Clarence Newcomer to note that "the actions of the board [of Elections] were designed to, and did in fact, prevent any realistic opportunity to appeal the certification in the State court system. . . . Defendants allege plaintiffs consistently failed to avail themselves of the proper appeal procedures. Plaintiffs were never given the opportunity to present their claims because the safeguards failed at every level" (1994 U.S. Dist. LEXIS 5273, 58).

With his appeal to the State Supreme Court pending, Marks filed for redress in federal court. Judge Newcomer found his claims compelling, and on February 18, 1994, delivered his initial injunction stripping Stinson of the seat, threw out all absentee ballots, and ordered the Board of Elections to certify the victor of the machine vote, that is, Marks. While federal judges have in the past overturned the results of state elections on civil and voting rights grounds, this was the first occasion a federal judge simply installed the opposing candidate in office rather than ordering a new election.

However, Newcomer was found to have exceeded his authority by the court of appeals. (See his original opinion, *Marks v. Stinson*, 1994 U.S. Dist.

Notes

LEXIS 1586, order overturned.) The Third Circuit Court of Appeals upheld the portion of Newcomer's order stripping Stinson of the seat, but vacated his order to install Marks. While the Circuit Court agreed the District Court was correct to claim jurisdiction, proof of voter fraud was not sufficient to award the seat. Writing for the court, Judge Stapleton, stated, "The district court should not direct the certification of a candidate, unless it finds, on the basis of record evidence, that the designated candidate would have won the election but for wrongdoing" (19 F.3d 873, 889 [3d Cir. 1994]). The appellate judges relied on *Griffin v. Burns* (570 F.3d 1065 [1st Cir. 1978]) to suggest that Newcomer's order to install Marks might be unconstitutional, creating an opportunity for voters to challenge the decision under the Federal Voting Rights Act. Because Newcomer's order voided all absentee ballots cast, it inevitably voided some that were lawfully and properly cast. The First Circuit in *Griffin* "concluded that rejection of a ballot where the voter has been effectively deprived of the ability to cast a legal vote implicated federal due process concerns" and possible Fourteenth Amendment violations (*Marks v. Stinson*, 19 F.3d at 889).

The second opinion, which we discuss in the text, was the result of the circuit court's remand to Newcomer. See particularly Newcomer's analysis of the number of illegal absentee ballots and the statistical tests used to corroborate his findings. Newcomer went to great pains to show that the Stinson campaign's "dollar a ballot" drive produced approximately 600 fraudulent votes (greater than the 461 needed to change the election results). He also found via expert testimony that Stinson received approximately 1,000 more absentee votes than expected.

The story does not end here, however. Stinson unsuccessfully appealed Newcomer's second opinion to the Third Circuit in August 1994, and then in January 1995, to the U.S. Supreme Court, which declined to overturn or comment upon the judgment. In the (presumably) final chapter of the story, Marks ironically lost his hard-won seat in the regular 1994 general election to Nina Tartaglione, the daughter of Democratic County Commissioner Margaret Tartaglione, who had been implicated in the scandal that denied Marks the seat to begin with. (See "Recount Shows Marks Still a Loser," United Press International regional news, November 14, 1994.)

15. See, for example, *Griffin v. Burns* (570 F.2d. 1065, 1st Cir. 1978), the case cited by the Third Circuit panel to justify remanding the case to the district court. In this case, Providence election officials distributed absentee ballots for a primary city council contest, although Rhode Island law only provides for absentee voting in general elections. The Rhode Island

Notes

tees in primary elections, decertified the primary victor, and ordered recertification based only on machine votes—which also changed the outcome of the election. However, the circuit court agreed with absentee voters' claims that the lower court ruling effectively disenfranchised them, vacated the order to certify on the basis of the machine count, and ordered a special election. Note, however, that the *Burns* case did not involve fraud per se, and the Third Circuit left Newcomer the option to certify Marks if he found the Republican would have been elected but for the wrongdoing.

16. See "Improper Ballots Turned Election," *Philadelphia Inquirer*, March 25, 1995, p. A1. The *Inquirer's* investigation, which required a massive effort, indicated that at least 540 absentee ballots cast for Stinson were tainted, a number that exceeded his margin of victory.
17. PA Stat. Tit. 25, 3146.1–3146.6 (1994).
18. Interview with Bruce Marks, July 18, 1995. In addition, several hundred rejected applications (some of which were for unregistered individuals, and some of which were simply fraudulent) were covertly returned to the Stinson campaign to prevent their discovery. These documents are public records, and should have been preserved for two years.
19. *Marks v. Stinson*, 1994 U.S. Dist. LEXIS 5273 p. 23.
20. *Ibid.*, p. 26. As noted above, Stinson had narrowly lost an election for a Philadelphia city council seat in a June 1991 Democratic primary. For a fuller account of Jones's recollections of his work for Stinson, see also Henry Goldman and Sergio Bustos, "Campaign Worker Says Stinson Ignored Warning on Ballots," *Philadelphia Inquirer*, February 8, 1994, p. A1. Stinson, on the other hand, challenged Jones's credibility and claimed that he deliberately maintained his ignorance of many details of his campaign, including the absentee ballot program. See Mark Fazlollah, "Stinson Said He Stayed Clear of Details," *Philadelphia Inquirer*, February 8, 1994, p. A1. Stinson's argument, however, contradicts the testimony of many of those who worked on his campaign; see Marc Duvoisin, "Absentee-ballot Quest Described as Obsessive; Aides Say Stinson Discussed It Frequently," *Philadelphia Inquirer*, March 13, 1994, p. A1. Ironically, Marks later recalled that Daniel McElhatton, Stinson's opponent in the 1991 city council primary, was one of the sources who suggested he investigate Stinson's use of absentee ballots: "I ran into [Daniel McElhatton] who had run against my opponent in a 1990 primary, . . . and he just recommended to me that I look into the absentee ballots" (interview with Bruce Marks, July 18, 1995).
21. *Marks v. Stinson*, p. 23.
22. *Ibid.* See also *Marks v. Stinson*, p. 31, where Judge Newcomer notes the scheme: Hispanic and black voters were also told "that the law had been

Notes

- changed and there was a 'new way to vote' from the convenience of one's home."
23. For a more complete account, see "Voters Say Ballots Were Forged," *Philadelphia Inquirer*, November 21, 1993, p. A1; and John F. Dickerson, "Is This Seat Stolen? Angry Republicans Contend That Dirty Tricks at the Polls Tipped the Balance of Power in Pennsylvania," *Time*, February 7, 1994, p. 34.
 24. *Mark's v. Stinson*, p. 36.
 25. *Ibid.*, p. 39.
 26. One of the Democratic commissioners even gave an order to "stay out of it" to an elections board employee who ascertained that unregistered citizens had applied for absentee ballots and so informed the commissioner.
 27. *Mark's v. Stinson*, p. 55.
 28. Interview with Jack Connors, July 18, 1995.
 29. *Mark's v. Stinson*, p. 47.
 30. Office of Alabama Secretary of State, Elections Division. As was the case with the Philadelphia story, where party control of the Pennsylvania state senate was at stake, the significance of the Alabama election was tied to a larger issue current in the state at the time. Tort reform, which gained national prominence in the Republican Party's "Contract with America," is an especially significant issue in Alabama, as in many states where judges are elected. Plaintiff trial lawyers categorically oppose regulatory efforts to limit jury awards for punitive damages and pain and suffering in civil liability suits. Alabama is distinguished by the large dollar amounts that juries award to plaintiffs, and by the fact that the state appeals courts, including the Supreme Court, often maintain the amounts set by juries. Hornsby is the past president of the Alabama Trial Lawyers Association and is critical of tort reform. Hooper and the Alabama Business Council are outspoken proponents of reforming tort award limits. The Hornsby-Hooper race is therefore symbolic of the wider issue.
 31. The United States Court of Appeals for the 11th Circuit requested that the state Supreme Court clarify the status of the 1,700 absentee ballots under Alabama electoral law prior to ruling on the merits of Hooper's supporters' claims. A five-judge panel of the state Supreme Court (not including Hornsby), all Democrats, ruled on March 15, 1995, that by Alabama Code 17-10-7, the ballots were in substantial compliance with Alabama electoral law and should be counted despite the fact that the affidavits attached to the ballots were not notarized or witnessed by two individuals, as required. This ruling would place their colleague Hornsby back on the bench. The circuit court is currently considering the panel's opinion and as Hamner noted, "This isn't even close to being over." (See

Notes

- Ronald Smothers, "Court Orders Votes Counted in Alabama," *New York Times*, March 16, 1995, p. A23.) However, in September 1995 a U.S. district court judge in Mobile threw out the disputed absentee ballots, and the U.S. Court of Appeals then upheld the judge's decision, thereby clearing the way for Hooper's swearing-in, at long last. (See "Chief Justice Takes Office in Alabama," *New York Times*, October 22, 1995, p. A25.)
32. Affidavit of Paul J. Harrington, November 20, 1994. All affidavits cited in this section are public record, and were submitted as documentation for *Larry Roe et al. v. Mobile County Appointing Board et al.* (Civil Action 94-885-AH-S).
 33. Affidavit of Paul J. Harrington, November 20, 1994.
 34. Affidavit of Pam Montgomery, November 11, 1994.
 35. Affidavit of H. O. Kirksey, November 21, 1994.
 36. Affidavit of Anthony J. Keith, November 14, 1994. See also affidavit of Juanita Crawford, November 1994.
 37. Affidavit of Jacquelyn Gandy, November 22, 1994.
 38. Testimony of Helen Watts, from transcript of Civil Action 94-885-AH-S, *Larry Roe et al. v. Mobile County Appointing Board et al.* (preliminary injunction hearing before Judge Alex Howard [U.S. District Court, Southern District of Alabama]), pp. 122-28.
 39. *Ibid.*
 40. Affidavit of John Russell Campbell, November 15, 1995.
 41. *Ibid.* See also affidavit of John Modris Grods, November 14, 1994.
 42. Testimonies of William Moulton and Murphy Gewin, from transcript of Civil Action 94-885-AH-S, *Larry Roe et al. v. Mobile County Appointing Board, et al.* (request for temporary restraining order before Judge Alex Howard [U.S. District Court, Southern District of Alabama]), pp. 48-63 and 109-11.
 43. Affidavit of John Russell Campbell, November 15, 1994.
 44. Telephone interview with Dan Warren, July 20, 1995. Warren is a member of the Board of Registrars.
 45. Telephone interview with attorney Albert Jordan (of Wallace, Jordan, Ratliff, Byers, & Brandt), March 27, 1995.
 46. See Doug Haaland and Doug Swordstrom, "A Report on Election Law Irregularities: California 16th Senate District," personally published report, January 27, 1995, p. 8.
 47. See "Report of the Fair Elections Foundation (II)" (Costa Mesa, Calif.: self-published, winter 1995), pp. 34-48.
 48. See "Report of the 1995 Elections Summit" (Sacramento, Calif.: Office of the California Secretary of State, April 18, 1995), pp. 11-14. Karen Saranita, of the nonpartisan watchdog group Fair Elections Foundation, estimated that the deadwood clogging the registration rolls was in the

016970

Notes

- range of 14–17 percent, while Trudy Shaffer, of the California League of Women Voters, cited an estimate of 24 percent from a study conducted in the 1980s.
49. Secretary of State Jones estimated “deadwood” costs for the state of California at between \$3 and \$5 million. Similarly, Associated Press reporter Doug Willis estimated that registration inaccuracies cost the state government \$5 million and local governments an additional \$3 million. See “Report of the 1995 Elections Summit,” p. 14; and Doug Willis, “Deadwood on Voter Registration Rolls Wastes Millions for Taxpayers,” AP News Analysis, May 1, 1995.
 50. The lists have apparently been lost in the shuffle of bureaucracy, and the names of dead voters who passed away in the early 1980s are still on the rolls in good standing. This problem was discussed at length at the Election Summit. (See the “Report of the 1995 Elections Summit,” p. 13.)
 51. Ventura County elections head Bruce Bradley, as quoted in the *Los Angeles Times*, October 28, 1994, p. B1.
 52. See “Report of the 1995 Elections Summit,” p. 16.
 53. *Ibid.*
 54. See “Report of the Fair Elections Foundation (I),” p. 4. The Los Angeles County registrar’s office disputes this figure. In an interview with the authors on July 20, 1995, Wendell Patterson, manager of the records division, said there is “no positive proof” that 4,000 people illegally registered to vote, and he stressed that under California law, when a person signs the affidavit on the registration card, the registrar cannot challenge its authenticity or any information on the card. Of course, this provision of the law in itself may be a problem.
 55. Robert B. Gunnison, “Registrars Seek Voting Reform,” *San Francisco Chronicle*, February 23, 1995, p. A16.
 56. See Haaland and Swordstrom, “A Report on Election Law Irregularities,” p. 9.
 57. See “Report of the Fair Elections Foundation (I),” p. 61.
 58. Haaland and Swordstrom, “A Report on Election Law Irregularities,” pp. 7, 9. In a letter to us dated July 13, 1995, Norma Logan, assistant registrar in Fresno County, wrote that while she has “no direct knowledge or proof that illegal aliens are voting,” there are “many allegations about it, and the possibility is that some may be voting.”
 59. See “Report of the Fair Elections Foundation (I),” p. 62. The man in question is Eduardo Rivera, who publishes *Nuestra Gente*.
 60. See Shawn Hubler, “County Ordered to Tighten Rules for Voter Registration,” *Los Angeles Times*, March 30, 1994, p. B3. He registered in September 1990, when he was nineteen years old, and re-registered in 1993, changing his address and his party affiliation from American Independ-

Notes

- dent to Democrat. There is no record of Martinez actually casting a ballot. His intention may have been to gain documentation in order to qualify for welfare benefits, as Congressman Steve Horn pointed out. (See *Congressional Record*, April 20, 1994.) Or like other illegals, he could have been seeking a voter registration card in order to obtain a separate border-crossing card that facilitates transit across the border and qualifies the holder for a California driver’s license. (A notarized voter card can be used to secure the border document—see the “Report of the Fair Elections Foundation [I],” p. 4.)
- Ironically, Luis Donaldo Colosio, the man Aburto assassinated, had pledged to depart from the fraudulent electoral practices that have severely damaged the credibility of the Institutional Revolutionary Party (PRI), including massive, systemic voter fraud. To his credit, as president of the PRI, Colosio conceded his party’s loss to the right wing National Action Party (PAN) candidate in the gubernatorial race in Baja California Norte, the first such defeat in 60 years. (See Larry Rother, “Mexico’s Ruling Party Concedes First Defeat in a Governor’s Race,” *New York Times*, July 6, 1989, p. A1.) However, Colosio was also the campaign manager of former President Carlos Salinas’s 1988 presidential campaign, the conclusion of which was marred by widespread evidence that the PRI stole the election from Salinas’s opponent, Cuauhtemoc Cardenas. See David Gardner, “Mexico’s New Man Bows to the Past; Mexican Elections,” *Financial Times*, May 22, 1988, p. 4.
61. See Lanie Jones, “Veteran GOP Director Leads Charge in Voter Registration Campaign,” *Los Angeles Times*, October 5, 1986, pt. 2, p. 1.
 62. See Matthew Mosk, “Two Accused of Voter Registration Fraud,” *Los Angeles Times*, October 28, 1994, p. B1. This case is also mentioned later in the chapter. In another example of registration excess, twenty-six transient residents of a Salvation Army shelter were registered and requested absentee ballots, but left before the election. See Robert B. Gunnison and Susan Yoachum, “Abuses Cast Doubt on State Voting System,” *San Francisco Chronicle*, February 22, 1995, p. A1; and Robert B. Gunnison, “Registrars Call for State Voting Reform,” *San Francisco Chronicle*, March 27, 1995, p. A15.
 63. Under California election law, a “helper’s punching holes in other people’s absentee ballots, his or her instructing voters in their choice of candidates, or handing out free stamps are misdemeanors, and his or her handling or mailing of another individual’s absentee ballot is a felony offense.” Now a sophisticated process, absentee “farming” skirts the law, and in some cases violates it.
 64. See Gunnison and Yoachum, “Abuses Cast Doubt on State Voting System,” p. A1.

65. Ibid.
66. Ibid. According to the article, although it is illegal for a candidate to electioneer "while in the residence or in the immediate presence of the voter, and during the time he or she knows the absentee voter is voting," candidates have admitted on the record to engaging voters completing absentee ballots. As explained by Fresno City Council candidate Dan Ronquillo, "there was nothing wrong with entering voters' homes and answering their questions while they voted." (Quoted in Ibid.) However, evidence existed that Ronquillo did more than answer questions; as Gunnison and Yoachum found, "Some voters said in interviews that they felt pressured by Ronquillo. 'He wanted to help me fill out my ballot,' said one elderly voter. 'You know, that's as private as my purse.'"
- Ronquillo's actions certainly had precedents in Fresno. City councilman Homero Espinoza, elected in 1992, was found guilty of voter fraud in 1995. Among other offenses during his campaign, Espinoza personally took and cast other people's absentee ballots, in some cases having the unmarked ballots mailed to his own post office box. Espinoza won by just thirty-four votes in an election where an extraordinarily high 35 percent of the ballots were cast by absentee voters. (Probation report of Homero Espinoza, Fresno County Superior Court Case No. 503088-7, released to us by letter on May 30, 1995, by County Counsel Phillip S. Cronin.)
67. Letter to the authors from Bradley J. Clark, Registrar, County of Alameda, dated July 31, 1995. Mr. Clark pointed out two loopholes in the California process for removing the deceased from the voting rolls: "Alameda County residents who die outside the county have their death records reported in the county of death. These records are then forwarded to the state registrar of vital statistics who in turn sends reports back to the county of residence. There can be a lag of six months to a year to receive this information. Alameda county residents who die outside the state have their death recorded in the state of death. Due to confidentiality laws in many states, these records are never provided to us."
68. See "Report of the Fair Elections Foundation (II)," p. 15. This San Francisco man somehow awoke from a severe case of methadone poisoning, which left him in rigor mortis on April 1, 1982. But he stiffly registered as a Democrat on September 29, 1991, and cast his ballot via coffin in the 1994 general election.
69. Haaland and Swordstrom, "A Report on Election Law Irregularities," p. 6.
70. Ibid., p. 10. The legitimate voter was interviewed and signed an affidavit for the report's authors.
71. See "Report of the Fair Elections Foundation (II)," p. 51.
72. Ibid., p. 24.
73. This "law" is applied to the world of campaign finance in Larry I. Sabato

- Paying for Elections: The Campaign Finance Thicket* (New York: Prior Press, 1989), pp. 19-24.
74. Texas election law permits "election officers, watchers, or any other person lawfully in the polling place" to challenge any voter's eligibility, including absence from registration rolls. Following the challenge, the voter is given the opportunity to rebut the reasons given by executing an affidavit that states the facts necessary to support the voter's eligibility vote." If such an affidavit is produced, the voter may proceed to vote at his or her ballot is not separated from those of unchallenged voters. If the voter refuses to execute the affidavit, he or she is simply not permitted to vote. See Tex. Elec. Code Ann. 63.010 (West, 1994).
75. See Alan Bernstein, "Thousands Voted in 1992 Sans Registration," *Houston Chronicle*, October 24, 1994, p. A1. The total voter turnout in Harris County (including the 6,707 ineligible persons) in November of 1992 was 958,234.
76. Note that 5,277 registrations had expired, and 143 were living in another county.
77. As Alan Bernstein of the *Houston Chronicle* explained it to us in a telephone interview on April 20, 1995, "The registrar's office took [the 6,707 illegal cases in Harris County] en masse to the district attorney's office who took them to a grand jury, and the grand jury said, 'To hell with that we have got [serious crimes] going on to worry about.'"
78. See Selwyn Crawford, "Vote Fraud Allegations are Probed; Registration of 3,000 in Tarrant Doubted," *Dallas Morning News*, May 27, 1994, p. A33.
79. Early voting is available to all voters twenty days before Election Day, although most voters must appear at a designated polling site in person. Exceptions are made for certain individuals and groups, such as the elderly; this is explained in the text following. In 1992, over 40 percent of the registered voters cast an early ballot in some of Texas's most populous counties. See Edwina Rogers, "Election Daze: Is Early Voting Coming to Your State Near You?" *Campaigns and Elections* 15 (September, 1994): 36-37.
80. The signature of a witness is required on the mail-in-ballot application and the certification on the carrier envelope only if another signs for the voter, perhaps if he or she is illiterate or otherwise incapacitated. See Tex. Elec. Code Ann. § 87.041.(b)(2) (West, 1994).
81. See Kevin Moran and Bob Sablatura, "Mail-in Fraud Allegations Probed," *Houston Chronicle*, October 5, 1994, p. A1.
82. Press release, Office of the Criminal District Attorney, Galveston County, Texas, December 20, 1994, pp. 1-3.
83. For example, the campaign of U.S. Representative Craig Washington of Houston made five separate payments in February and March 1994.

Notes

- ing \$22,505 to the "Acres Home Community Relations" group for an "early voting drive" (Federal Election Commission). This group has been suspected of orchestrating some of the mail-in abuses involving early voters, according to reporter Alan Bernstein of the *Houston Chronicle*, but "nobody has ever proved anything on them." (Telephone interview with Alan Bernstein, April 20, 1995.)
84. Affidavit of Edward Taylor, subscribed December 7, 1993, by R. M. Simmons, Harris County, Texas.
 85. According to Texas elections law, it is a misdemeanor to "prepare the voter's ballot in a way other than the voter directs," or "suggest by word, sign, or gesture how the voter should vote." (See Tex. Elec. Code Ann. § 64.036, [a][2-3] [West, 1994].) These stipulations apply to both the polling place and early voting by mail.
 86. Affidavits of Maria Gloria Casteneda, subscribed by Debra Ann Garza, October 27, 1992, and Jesus Casteneda, subscribed by Debra Ann Garza, October 28, 1992. Mr. and Mrs. Casteneda, who intended to vote for David Pena, were told by "helper" Federico Pilon that marking the ballot in the straight Democratic ticket oval would cast their vote for Mr. Pena. Pena was an independent candidate.
 87. Affidavit of Jesus Casteneda, subscribed by Debra Ann Garza, October 28, 1992.
 88. Affidavit of Celia Seymour, subscribed by Henry Rodriguez, December 3, 1994. Ms. Seymour interviewed Mr. Charles Scott and his son and discovered that Mr. Scott and his wife did not prepare the ballots, nor did they sign the carrier envelopes as required. Mr. Scott had signed his mail in application, and his wife placed her "mark" on the signature line, which would have been appropriate only if she were visually disabled or if a language barrier existed. The interloper, a neighbor, requested the Scotts' absentee ballots and indicated which candidate should be selected. Once the ballots were sealed in the carrier envelopes, the "helper" signed Mr. Scott's name on the envelope certification and requested that the Scotts' son sign for Mrs. Scott. The discrepancy in signatures *should* have rendered the ballots invalid.
 89. Affidavit of Curley Cheney, subscribed by Catherine A. Platz, December 17, 1994; interview with A. Glenn Diddel, April 24, 1995; the death certificate of James Cheney Jr., dated September 17, 1992; and the falsified applications for mail-in ballots for both Curley and James Chaney Jr., dated November 23, 1993, and February 17, 1994. Although the spellings of the names differ by one letter, the applications were matched to the Cheneys by address.
 90. In the past two years, sheriffs in two South Texas counties have been implicated, and other counties' officials are undergoing investigation.

Notes

- Brigido Marmolejo, sheriff of Hidalgo County for twenty years, was prosecuted and convicted for accepting bribes from a drug dealer. (See James Pinkerton, "Bribes Cost Sheriff His Job, Respect," *Houston Chronicle*, November 13, 1994, p. 1.) In Zapata County, Judge Jose Luis Guevera, Sheriff Romeo Ramirez, and County Clerk Arnoldo Flores were either convicted of or pleaded guilty to drug related charges. Interestingly, Judge Guevera's opponent alleged vote fraud in a primary election, the results of which were overturned by a state judge. See David McLemore, "Fallout from Drug Sting Has County in Quandary; Zapata Officials Going to Prison, Who'll Lead?" *Dallas Morning News*, July 3, 1994, p. A1; also, James Pinkerton, "Trafficking and the Long Arm of the Law," *Houston Chronicle*, July 31, 1994, p. 1.
91. See David McLemore, "Starr County Denies Election Irregularities," *Dallas Morning News*, August 21, 1994, p. A47. Also, telephone interviews with David McLemore, April 18, 1995; Bruce Sherbert, Dallas County election administrator, April 20, 1995; and David Pena, April 20, 1995. Pena was an unsuccessful candidate for city clerk in Starr County. These kinds of fraudulent activities, it should be noted, are not limited to South Texas in the Lone Star state. See Sylvia Martinez and Frank Trejo, "Hopefuls, Backers Accused of Fraud, Document Tampering in Two Districts," *Dallas Morning News*, May 5, 1995, p. A30; and Todd J. Gillman, "Dallas JP Loser Alleges Voting Fraud," *Dallas Morning News*, May 17, 1994, p. A21. Also see the affidavit of Victor Cantu, August 25, 1992, regarding favoritism in the mailing of absentee ballots.
 92. Affidavits of Mary Ramirez, November 12, 1992; and of Sonia Garza, November 15, 1992.
 93. Political scientist Louise Overacker, in her *Money in Elections* p. 34, explained the Kentucky operation this way: "The Republican organization in Louisville, Kentucky, has worked out a novel method of payment [for votes]. In the local election of 1925 aluminum discs the size of a half dollar bearing the imprint of a bulldog were distributed to the faithful by precinct workers. These bulldog checks were then taken to a district paymaster and redeemed for \$2.00. By this plan the use of money around polling places was avoided and only a few persons were entrusted with cash."
 94. These estimates were given by veteran Kentucky journalist Al Cross of the *Courier-Journal* in an interview with the authors, June 29, 1995. Another prosecutorial source told us the usual price was "more like \$20 . . . but the highest that I heard was \$150. . . . It depends on the market and how tight the race is."
 95. The absentee ballots were either sent directly to the voters, who marked

016973

simply had the voter sign pre-marked ballots. Once the voters signed off, they would receive the payoff.

The Kentucky legislature had attempted to curb vote fraud by passing reform legislation in 1988 that made purchasing or selling votes a felony offense. (Rigging election machinery and electioneering within 500 feet of the polls were also severely punished.) (See Kentucky Revised Statutes, Title X, at 117.235.) The new law apparently did indeed stem fraud at the polling places, where illicit activity is easily observable, but it may simply have channeled more fraud into the relatively hidden absentee process. As a result of the recent disclosures of absentee fraud, the legislature has passed still more reforms, including two mandates directly affecting absentee voting. Now, no individual is permitted to assist more than two voters, and citizens are allowed to vote by mailed absentee ballot only if they are certifiably disabled, or living outside their county, or serving in the military. (Kentucky Revised Statutes, Title X, at 117.075.) Other people who wish to vote prior to the election day must do so *in person* at their county courthouse. (Kentucky Revised Statutes, Title X, at 117.077.)

Unlike some of the other states we have investigated, Kentucky has taken vote fraud seriously. As George Russell, executive director of the State Board of Elections commented, "I think you'll find that the Attorney General, Secretary of State, and the General Assembly are completely committed to eliminate vote fraud. Of course, that's the *present* Attorney General, Secretary of State, and General Assembly" (interview with George Russell, July 27, 1995). The state election system is well administered; statewide registration records are computerized, and voters are identified by a unique number to prevent duplicate registration. Sources differed on whether the revisions of the election code, or a more active, aggressive approach to combating electoral abuses on the part of the State Board of Elections, secretary of state, and the state attorney general have contributed to a decrease in election fraud. In any case, there was a significant decrease in the number of calls made to the attorney general's statewide vote fraud hotline in 1994 and 1995. See, for example, John Voskuhl, "Primary '95: State's Vote-Fraud Hot Line Rings Only Three Times," *Courier-Journal*, May 24, 1995, p. B5.

96. Interview with Dale Wright, July 19, 1995.
97. Ibid.
98. The same class and economic distinctions can explain the presence or absence of "street money" in any community.
99. A couple of our Democratic interviewees alluded to this reasoning in off-the-record comments.
100. United Press International, "Election Officials: Four Dead People Cast Ballots in Hudson," January 12, 1989.
101. Peter J. Simonson, "Judge's Ruling Leaves Sequence Movable; Chal-

lenge to Just's Victory to Proceed," *Bergen Record*, January 22, 1994, p. A4.

102. Interview with Ed Rollins, May 26, 1995.
103. The author of the observation is journalist Marc Mappen. See the retelling of a classic 1889 ballot-box stuffing in Hudson County in Marc Mappen, "Jersey-ana," *New York Times*, November 13, 1994, section 13, p. 17.

NOTES TO CHAPTER 11

The quotation at the beginning of the chapter is from Merrill D. Petersen (ed.), *The Portable Thomas Jefferson* (New York: Penguin Books, 1977), p. 198. We have now come full circle. The first part of this Jefferson citation appeared in the introductory discussion of corruption.

1. As did a number of other candidates, none of whom was ever called to account by the IRS.
2. Title 26, Internal Revenue Code, Sec. 527.
3. President Nixon and high-ranking members of his administration attempted to use the Internal Revenue Service to retaliate against critics and opponents. As John Dean explained in a memo made public during his explosive testimony before the 1973 Senate Watergate hearings between June 25 and 27, the goal was to "maximize the fact of our incumbency with persons known to be active in their opposition to the administration. Stated a bit more bluntly—how we can use the available federal machinery to screw our political enemies." Grants, contracts, litigation, prosecution, and audits were possibilities Dean raised.

In addition, attempts were made to gain access to IRS information for use against "enemies." When initial attempts to gather the "dirt" failed, Nixon brought pressure to bear on both Internal Revenue Service Commissioner Johnnie Waters (who was later replaced) and Treasury Secretary George Shultz.

Another document Dean made public was the actual "priority list" of opponents (compiled by then-special White House counsel Charles Colson), which included prominent corporate executives (such as Arnold M. Picker of the United Artists Corporation), labor union officials (such as Alexander Barkan of AFL-CIO COPE and Leonard Woodcock of the UAW), Democratic congressmen (such as Ronald Dellums and John Conyers), and media figures and entertainment personalities (such as Daniel Schorr, Mary McGrory, and Paul Newman).

For a fuller account, see Bob Woodward and Carl Bernstein, *The Final Days* (New York: Simon and Schuster, 1976), p. 89; and Mercer Cross and Eldler Witt (eds.), *Watergate: Chronology of a Crisis* (Washing-

Columbus

Con Artist Poses as Elections Worker

OM

March 25, 2004

The Franklin County Board of Elections is warning residents of a scam artist. ONN-affiliate WBNS reports that an identity thief is prowling the streets of northeast Columbus. He goes door-to-door asking people to register to vote. He shows them a picture I.D., a clip board and a palm pilot. After he receives personal information, he attempts to steal money.

At least six people have complained to the Board of Elections about the scam, but the county says elections officials don't go door-to-door.

The safest way to register is to contact the Board of Elections directly.

However, not everyone who comes to your door and asks to register you to vote is out to scam you.

Many legitimate groups are having voter registration drives to get more people to the polls for the November elections.

LUCAS COUNTY BOARD OF ELECTIONS

Vote certification prompts recount in 4 local contests

By FRITZ WENZEL
BLADE POLITICAL WRITER

The Lucas County Board of Elections certified the Nov. 4 general election yesterday, finalizing its results after an arduous process that had elections workers meticulously examining votes cast in every one of the county's 530 precincts.

The certification triggers recounts of four races or ballot issues:

- Sylvania City Council.
- Oregon City Council.
- The village of Waterville.
- The Swanton School District.

No date was set for those recounts, but they'll be done in the next two weeks, said Joe Kidd, elections director.

The board of elections' unusual attention to detail was required after it was discovered that some poll workers had trouble following unfamiliar sets of directions required because of new electronic voting machines. On two earlier occasions, meetings to certify the election were canceled because the board was not finished with its work.

Poll workers also found themselves scrambling on Election Day because they were short-handed. Many booth official jobs went unfilled, elections records show.

Two workers responsible for recruiting Republican poll workers have been suspended for failure to do their jobs. They face a hearing Dec. 16 to determine their employment status.

Mr. Kidd said problems were to be expected because it was the first countywide election using new machines. He said he believes the March primary election will run much better.

In a related matter, the board directed Mr. Kidd to seek more information from the office of Secretary of State Kenneth Blackwell about a January deadline for counties to pick which voting machine they wish to buy under the federal Help America Vote Act.

The board wants to know if it will be granted more time to decide in light of a recent study that revealed the machines up for sale in Ohio have security flaws.

Mr. Blackwell has ordered the companies to fix the flaws before their machines are allowed in Ohio, but those repairs are not expected to be completed by the January deadline.

Paula Ross, chairman of the elections board, said she didn't want to be forced to choose voting machines until the flaws are fixed.

The Beacon Journal

Summit elections worker fails polygraphs

OH

No. 2 official admitted drug, alcohol use before petition query, sources say

By Julie Wallace
Beacon Journal staff writer

A Summit County Board of Elections employee quizzed as part of a probe into a candidate's missing petitions failed two polygraph tests after admitting using drugs and alcohol before the tests, law enforcement officials said.

Several sources familiar with the investigation identified the employee -- who was not named in a news release issued Tuesday by the Summit County Sheriff's Office -- as Deputy Director John Schmidt, a Democrat who holds the No. 2 position in the board's office.

Schmidt declined to comment. His lawyer, Carmen Roberto, said Schmidt did not fail the polygraphs; he said the results were inconclusive on both tests.

Sheriff Drew Alexander, a Republican, said 11 full-time employees were asked to submit to lie-detector tests in the investigation into the June disappearance of election petitions belonging to Akron City Councilman Joe Finley, D-2. Finley is a maverick often at odds with his party's local leaders.

Eight of those 11 full-time employees easily passed the polygraph.

Three others were tested twice. Two of them had results that initially were labeled inconclusive but later were determined by polygraph examiner Bill Evans to be truthful.

The third employee also underwent two voluntary tests -- showing up and acknowledging to Evans that he had used marijuana and alcohol prior to the appointments, Alexander said.

Alexander, who declined to confirm that the employee is Schmidt, said no charge would be filed against the employee over his admitted drug use because the tests were voluntary.

``Both times, he failed miserably at over \$500 a pop," Alexander said. ``That's enough polygraph examinations. I have no confidence that he'd come in and take a third or fourth and not try to beat it."

No charge likely now

Alexander said the failed tests elevate the individual to a potential suspect, but no charges are likely at this point.

``He's a person of interest -- certainly a person of interest," Alexander said. ``But... we need a witness or a confession. Until one of those two come forth, we just can't arrest on the fact that he failed a polygraph."

Alexander's office released the information as part of a status update on the investigation. It began after Finley discovered his petitions were missing when he went to the board's Grant Street office to have them filed minutes before the 4 p.m. June 26 deadline. He had submitted the petitions earlier that week for signature verification.

A judge ultimately ordered that Finley be placed on the ballot, and elections board officials asked the sheriff's office to investigate the disappearance of the petitions.

Tuesday's update said the board's offices were searched twice, and detectives interviewed 28 of the

016978

employees. Those 28 were the ones identified as having been around the office from 11 a.m. to 12:30 p.m. June 25 -- the period in which, detectives determined, the petitions had disappeared.

More interviews

Most of the part-time employees -- generally college-age students who are relatives of political operatives in the area -- have not been interviewed. But after meeting with election officials Monday to brief them on the investigation, the detectives agreed to interview those part-timers.

``They felt we needed to interview everybody," Alexander said. ``We interviewed the people we thought were in the area during the timeline when the petitions were missing. But to satisfy everybody, we'll interview everybody."

Detectives will track down those people, many of whom have returned to college. Phone interviews will be arranged if possible; lie-detector tests will be initiated only if something of interest is learned, Alexander said.

Those who worked for the board over the summer include the two children of former Akron Service Director Joe Kidder; the son of Wayne Jones, a leader in the county Democratic Party; the daughter of Akron Council President Marco Sommerville, D-3; the son of Akron Councilman Mike Freeman, D-9; and the son of Kevin Davis, a campaign aide for Akron Mayor Don Plusquellic. The Republican part-timers also had political ties -- albeit to lesser-known precinct committee representatives, rather than officeholders and party leaders.

Schmidt, lawyer respond

Schmidt, contacted Tuesday, said he couldn't discuss the allegations and would not acknowledge whether he was the employee in question.

Roberto, Schmidt's lawyer, did deny that Schmidt had admitted using drugs or alcohol before either of his tests.

``I was at the second test. It did not happen," Roberto said.

If investigators ask Schmidt to take a drug test, Roberto said he would encourage his client to do so.

Schmidt, a Cuyahoga Falls City Councilman, was hired at the elections board in September 2002 to replace Yolanda Walker, who took a job leading the Summit County Solid Waste Authority.

Russ Pry, chairman of both the Summit County Democratic Party and the elections board, said he expects the allegations in Alexander's news release will be the topic of an upcoming executive session of the elections board.

Board Director Edna Boyle, a Republican who took over at the board at the end of July, said personnel problems exist that the board needs to address.

``Those are very serious allegations that are made in the statement, and I hope they are dealt with as soon as possible so we can get back to the reason we are here -- to have fair elections," Boyle said. ``We need to not lose focus of that here, and I'm afraid we will with all that is going on."

Alex Arshinkoff, chairman of the Summit County Republican Party and an elections board member, said the release is the latest blow to the troubled board.

``This matter is bad enough in and of itself, but what makes it more troubling is that the petition that was stolen is a Democrat who is a maverick and who has endorsed the Republican candidate for mayor, Bryan Williams," the GOP leader said.

``It certainly adds another element of discomfort for the Board of Elections inasmuch as it adds another layer of politics to this outcome and action."

TN

Atchley Named By Mattice As District Election Officer posted October 29, 2002

United States Attorney Harry S. "Sandy" Mattice, Jr. today announced the appointment of Assistant United States Attorney Chuck Atchley to serve as district election officer for the Eastern District of Tennessee.

This appointment was made pursuant to a nationwide Department of Justice Voting Integrity Initiative announced by Attorney General John Ashcroft in Washington, D.C. earlier this month. The purpose of this nationwide federal law enforcement program, which the Department has implemented during national general elections since the late 1960's, is to ensure public confidence in the integrity of the election process by strengthening and enhancing the Department's efforts to protect voting rights and to prosecute election crime throughout the country, officials said.

Mr. Mattice said, "Election fraud dilutes the worth of votes honestly cast. It also corrupts the essence of our representative form of government. As a crime against both the individual and the government, it will be dealt with promptly and aggressively."

As district election officer, Mr. Atchley will supervise the investigation and prosecution of election fraud matters in the Eastern District of Tennessee, and will coordinate the District's efforts with Department of Justice prosecutors in Washington, D.C. As part of his responsibilities as district election officer, Mr. Atchley will supervise a team of Special Agents of the Federal Bureau of Investigation (FBI) during the November 5 election, including the preceding early voting period.

These individuals will be on duty throughout the election period to receive complaints of election fraud. AUSA Atchley can be reached by the public at the following telephone numbers: (865)545-4167 and (865)607-8727.

The FBI also will have special agents available in each field office and resident agency in this district to receive allegations of election fraud during the election period. The FBI can be reached by the public at: (865)544-0751.

Mr. Mattice stated that most forms of election crime are easily recognized, such as voter bribery, voter intimidation, and ballot forgery. Other forms of election fraud are more subtle. It is, for example, a federal offense to seek out the elderly, the socially disadvantaged, or the illiterate for the purpose of subjugating their electoral will. Furthermore, every voter has the right to mark his or her ballot in private, free from the watchful eye of election partisans.

Mr. Mattice said, "The detection of election fraud depends in large part on the watchfulness and cooperation of the American electorate. It is imperative that those who have been asked to participate in questionable election practices, or who have observed or have specific information regarding electoral corruption, make that information available immediately to my Office or to the FBI. The cooperation of this country's citizens in helping to protect the sanctity of the ballot box is crucial."

The 2002 Help American Voter Fraud Act

http://www.pardonmyenglish.com/archives/2005/10/the_2002_help_a.html

VT

October 06, 2005

Want to vote by phone? Apparently, it is a possibility...

Americans may soon be able to use the telephone to vote in local elections, and could someday dial in their decision in national races, the WALL STREET JOURNAL reports on Thursday.

The 2002 Help America Vote Act, which was created to simplify the voting process following the debacle in Florida during the 2000 presidential election, helped fund the development of new voting systems.

Vermont is the first state to commit to phone-voting technology. By the November 2006 elections, all of the state's voters who are unable to mark their own paper ballots are slated to use a new telephone voting system. The Vote-by-Phone, initially will be used only in polling places – but there are plans to expand the system to voters' homes!

The irony here is that an action taken to curtail voter fraud will lead to provisions that will make it easier to commit voter fraud. I can hear the stories now, Democratic operatives will either be A) knocking on doors on Election Day and physically making the calls themselves (which would likely be prohibited); B) employee phone technicians to make calls on behalf of real voters, fooling the system to believe that they are indeed calling from the actual address; C) pay for phone numbers for non-existent or dead persons and voting for them D) all of the above and much, much more. I can see it now, every phone booth will become the residence of a "registered Democrat" who votes party line.

The sad thing is, this not far-fetched.

GOP: Gov.'s bill would encourage voter fraud

Thursday, January 08, 2003

By **TERRENCE DOPP**
Trenton Bureau

TRENTON -- The floodgates for rampant voter fraud would be thrown wide open under legislation being pushed by Gov. James E. McGreevey, Republicans charged Wednesday.

A bill up for a vote in the state Senate would prohibit so-called "third party" registration groups and poll workers from checking voters' identification. Administration officials said the checks would prove a deterrent to some urban voters with little identification.

But critics of the plan maintain it would inject uncertainty into the process by making it unclear exactly who is voting and how often.

"You can't put people through the third degree to vote or else no one would vote. People should not be hassled before they enter the voting booth," said McGreevey spokesman Micah Rasmussen. "He wants as many people to exercise their rights as possible."

Legislators in the Assembly passed the measure 72-3 on Dec. 15.

The bill is an updated version of one McGreevey vetoed Dec. 8 because he said it was too strict in requiring the identity checks. It springs from the federal Helping America Vote Act (HAVA) passed in October 2002 after the contested presidential election two years before.

State funding for election reforms, establishing a grievance procedure for those who feel they've been wronged at polls and a limited prohibition on paper ballots were part of the original bill. It also doled out about \$4 million in federal funding.

Rasmussen said state election monitors told the administration to change the bill to match federal requirements, which do not allow identity checks.

Ramon de la Cruz, the state's lead figure in enacting HAVA, said the issue shows the growing pains of states grasping to meet federal guidelines foisted upon states with no appropriation and arbitrarily drawn timeframes.

HAVA was intended to increase voter turnout and to insure all votes are cast legally.

One GOP lawmaker said under McGreevey's HAVA plan, there would be no safeguarding the security or integrity of ballots.

"The governor's recommendations provide that when a person is registered to vote through the actions of a third party, such as through a voter registration drive, no identification shall be required to ensure the identity of that person," Sen. Thomas Kean, R-Union, said in a letter to

016932

Attorney General Peter Harvey calling for a halt to implementing McGreevey's proposal should it clear the Legislature.

"The provision clearly violates both the letter and spirit of the federal law, and invites nothing less than the imprimatur (approval) of the state government for institutionalized voter fraud," Kean added in the letter.

Federal lawmakers issued states a number of mandates with HAVA, including issuing money to scale back the use of paper ballot voting machines. So far the state has received \$13 million under HAVA and is awaiting over \$20 million more, de la Cruz said.

Passage of the act followed the defeat by President Bush of then-Vice President Al Gore after senior citizens in Florida said they voted incorrectly because of punch card ballots.

Fraud Lawsuit Targets Gerson Election

NY

Forged Signatures ON Petitions

By Daryl Kahn
Staff Writer

August 7, 2003, 7:25 PM EDT

According to her death certificate, Elsie Roloan died 9:30 p.m. on June 22, 2001. But her signature appears next to the date June 26, 2003 in an election petition for Manhattan Councilman Alan Gerson and a slate of Democratic judges and party leaders running for office.

This is one of the allegations of election fraud being brought Friday in Supreme Court by a political opponent of the councilman.

The court's decision could determine who will win the race for the 1st District council seat in the heart of the financial district.

The two petitions being challenged, 216 and 219, are, according to court documents, "replete with forged signatures" and note "that it is a travesty for these petitions to have been certified by The Board of Elections."

Among the other allegations made in the court documents are that illegal aliens collected a majority of the signatures, a violation of election law, and that many of the signatures and the witnesses signing them were forged.

Gerson denied the allegations and said that he has no tolerance for "shenanigans" in his campaign. But he added that he and his campaign had nothing to do with the collection of the petitions.

"I have no control or oversight over the petitions in question," he said. "This suit is a total waste of the judiciary's time. It's frivolous."

A candidate is required by law to certify in a cover sheet that the petitions filed with the Board of Elections are valid.

A candidate needs 900 valid signatures to get on the primary ballot. But even if a candidate has enough legitimate signatures, a judge can, if he finds that the petitions are "permeated with fraud," kick a candidate off the ballot.

Norma Ramirez, who filed the suit, said Gerson knew that many of the signatures were fraudulent, including sheet number 126 in petition 219 — where the dead woman's signature shows up.

"Of course he knew," she said.

She said Gerson is part of the city's Democratic Party machine and that these tactics are commonplace.

016984

"This is about what's been going on for years," she said. "This is about the little people fighting against the machine."

Ramirez was candidate for Female Party Leader in the 64th Assembly District who was knocked off the ballot by a lawsuit brought by Alice Cancel alleging fraud on her petitions. Cancel is also listed on the petition.

The 1st District's borders encompasses one of the most important political regions in the city. Within its borders are the World Trade Center site and the Lower Manhattan Development Corporation steering its future, Wall Street and Chinatown.

The fallout from Friday's decision is crucial because of the party make-up of the district. Like most districts in the city, its voters are overwhelmingly Democrats, at 64 percent. Only 11 percent of the voters are Republican, and the remaining 25 percent are either with smaller parties or unaffiliated.

Political analysts say it is highly likely that the winner of the Sept. 9 Democratic primary will capture the 1st District seat in the November election.

The other names listed on the suit are: John Quinn, candidate for male assembly district leader in the 64th Assembly District, and Shlomo Hagler, Kathryn E. Freed and Marcy Friedman, all Democrats running to fill judge vacancies in Manhattan Civil Court.

Questions Face Elections Board Before Primary

By DIANE CARDWELL

With less than a week to go before a hastily rescheduled primary, the city's Board of Elections is facing a set of serious challenges, from trying to inform poll workers of the new elections schedule, to figuring out whether possible runoffs in some citywide races would have to be held using paper ballots, to a lawsuit filed by a group of voters and candidates seeking to postpone the primary election yet again.

At a meeting of the board yesterday, commissioners were still debating where the board would operate from next Tuesday, since the attack on the World Trade Center disabled their computer system, too.

"I think they have a very daunting challenge to pull off the primary and the runoff and the general election," said Gene Russianoff, staff lawyer at the New York Public Interest Research Group, who was at the meeting.

Mr. Russianoff said that one of the biggest problems was informing poll workers that they would be needed Tuesday. The board has resorted to advertising in the print media, but the advertisements only announce the date of the rescheduled primary and are not addressed directly to poll workers.

Board officials said yesterday that workers would be told by elections officials, but Mr. Russianoff said that he still had concerns, given "the low amount of information about the election" that had been getting out. "The fear is that maybe some poll sites would not be able to open up," he said.

Another problem facing the board is how to get its 6,700 voting machines ready for a general election after a runoff, said Gary Berzansky, the chief custodian of the machines. With a possible runoff now moved to Oct. 11, he told the board, he would not have enough time to retrieve the machines, tabulate the results and then to prepare and truck the machines out again for the general election. Mr. Berzansky suggested that any runoff be conducted with paper ballots. He said his office was down by 17 technicians and described his staff, which has worked "45 straight days with no day off in sight," as irritable, tired and very upset about the attacks.

One commissioner said paper ballots would subject the board to allegations of manipulating the elections.

"I'm not trying to manipulate any election," Mr. Berzansky replied. "I'm trying to be realistic."

In the end, the board rejected the proposal, even as Mr. Berzansky said that he could not guarantee that the machines would be ready.

One plaintiff in the lawsuit, Shirley Kwan, who is the campaign treasurer for Kwong Hui, one of the nine City Council candidates who are also plaintiffs in the suit, told the board that the city was not ready for the election.

"Like many other residents who live in the downtown area, we all have been victims of the tragedy and we need time to heal," she said later. Many residents are not getting the services they need, she said, and are so focused on finding places to stay or getting health care that they cannot focus on the election. The state passed legislation this week that will allow anyone in the affected area below Canal Street to vote by mail-in or absentee ballot.

Joseph Gentili, deputy director of the board, declined to discuss the lawsuit, but Mr. Russianoff said that it was not inconceivable that a judge would postpone the election, although the board had already addressed some of the issues the suit raises.

The board also received notice yesterday that the Police Department would be able to provide officers at the 1,300-odd polling sites. Mr. Gentili said that instead of having two officers splitting the shifts at each site, one officer would work for the entire day. The board also learned that the Police Department would not be able to provide an early unofficial count as it has in years past on election night because the computer lines linking the department to the elections board no longer exist. The first results, Mr. Gentili said, would therefore be the board's own official count, which would not be available until later in the week.

Near the end of the meeting, the commissioners discussed the possibility of making a public service announcement to inform those people who voted on Sept. 11, before the election was scuttled because of the attacks, to return to the polls on Tuesday. Mayor Rudolph W. Giuliani was suggested as the person to make the announcement, but Mr. Gentili nipped that idea in the bud.

"I think the mayor has a lot more things to do," he said.

Four Knott County men, including two-term Judge-Executive Donnie Newsome, were indicted yesterday on federal charges of vote-buying stemming from the troubled May 1998 primary election.

Donnie Newsome, shown in 1997, is the first Kentucky elected official in at least five years to be charged with buying votes.

Newsome, 52, and Willard Smith, 54, both of Hindman, and Keith Pigman, 45, of Garner were charged by a federal grand jury in London, Ky., with one count of conspiracy to pay voters to cast absentee ballots in the primary election in which Newsome was running for judge-executive.

Newsome, the first Kentucky elected official in at least five years to be indicted on votebuying charges, also is charged in two counts of the six-count indictment with paying and aiding the paying of between \$50 and \$100 to two voters in the primary. Smith is charged with four counts of paying voters.

Pigman is charged with two counts of paying voters and aiding the paying of voters.

In a separate indictment, Newton J. Johnson, 33, of Brinkley, is charged with four counts of paying voters in the 1998 primary. Johnson also was charged with one count of making false statements to the FBI about his involvement in paying voters and two counts of obstructing justice by urging two witnesses to lie to the grand jury investigating the vote-buying allegations.

Newsome, Smith and Pigman each face up to five years in prison and a \$250,000 fine if convicted. Johnson faces up to 10 years in prison and a \$250,000 fine if found guilty.

An arraignment date in U.S. District Court in Pikeville hasn't been scheduled.

Newsome, who defeated three-term incumbent Homer Sawyer in the May 1998 primary and won re-election last November, didn't return phone calls to his home yesterday.

Convenient
online payment!

"...they do so much more."

University Hospital

Reached by phone, Pigman said he wasn't aware of the indictment.

"I have no idea what's going on," he said. "I'm amazed."

A Newton J. Johnson of Brinkley also said he had heard nothing about the indictment.

Smith couldn't be reached for comment yesterday evening.

Assistant U.S. Attorney Thomas L. Self and Richard Pilger, a trial attorney with the U.S. Justice Department, are prosecuting the case. The FBI conducted the investigation.

The May 1998 primary election in Knott County drew widespread notoriety in 1999 after six county residents were charged in a federal indictment with conspiring to buy votes of students at Alice Lloyd College, a small private college in Pippa Passes.

It also attracted the interest of federal and state investigators because of the unusually high number of absentee ballots.

Later, state and federal authorities descended on Knott County amid allegations of election fraud. Five of the six people charged with conspiring to buy the college students' votes were convicted or pleaded guilty to federal charges.

So far this year, federal prosecutors have taken aim at alleged vote-buying, a practice that Greg Van Tatenhove, U.S. Attorney for Kentucky's Eastern District, said jeopardizes democracy. "Representative government is diminished when the worth of honest ballots is diluted by ballots bought by those who seek to corrupt the election process."

In March, a federal grand jury in Lexington charged nine people with conspiring to buy votes under the guise of paying people to transport voters to the polls in lawyer John Doug Hays' unsuccessful race last year for Pike County district judge. Hays, his wife, Brenda Hays, and lawyer and coal operator Ross Harris are among those facing charges.

All nine have pleaded innocent.

Last month in Knott County, six men were indicted on federal charges that they paid people to vote in the 1998 primary election.

Five of the six also are charged with lying to the FBI about alleged vote-buying.

The six are charged in five federal indictments returned by a federal grand jury in London. Indicted were Ronnie Neal Slone, 55, and Brady Warren Slone, 57, both of Pippa Passes; Phillip Slone, 53, and Jimmy Calhoun, 33,

016939

both of Hindman; Patrick Wayne Madden, 45, of Littcarr; and Jimmy Lee Conley, 33, of Lackey.

All six have entered innocent pleas.

About Top Jobs

PIKEVILLE, Ky. — Two brothers were acquitted yesterday of charges that they bought votes in a primary election in Knott County five years ago.

A jury deliberated less than two hours before finding Brady Slone, 57, and Ronnie Slone, 55, both of Pippa Passes, innocent of the charges in U.S. District Court in Pikeville.

"This was a case of mind over matter," Ronnie Slone said. "The FBI knew in their minds that we were innocent, but it didn't matter. They brought scum in here to testify against us."

The key prosecution witnesses were three women, two of whom acknowledged in court that they were hooked on prescription drugs around the time of the 1998 primary election. Each testified that Ronnie Slone, an insurance agent, paid her \$100 to vote for certain candidates. They said Brady Slone, a retired public school principal, stood nearby when the payments were made.

Defense attorneys called a Knott County physician and a pastor as character witnesses who testified that the Slone brothers had unblemished reputations for integrity and truthfulness.

Ned Pillersdorf, attorney for Brady Slone, said he believes the lack of credibility of the

016991

prosecution's witnesses, coupled with the Slones' record of community service, led to the acquittal.

"Prosecutors shouldn't have selected this case, with the underwhelming credibility of the witnesses," Pillersdorf said. "There are plenty of unsavory characters that bear looking into. My client is a hero who was injured in combat. You don't try to convict a Vietnam veteran with shrapnel in his head on the testimony of noncredible witnesses."

Brady Slone received the Purple Heart for the injury he received in February 1967.

"This government sent me to war as a combat medic and destroyed my life, and now this government treats me like scum," said Brady Slone, who wept after the verdict was read. "I don't like it."

One of the prosecution witnesses, Monica Miller, a former Hindman resident who now lives in Cincinnati, testified that Ronnie Slone paid her for her vote while Brady Slone stood nearby. Prosecutors claimed Brady Slone was acting as a lookout.

Miller and her friends Ann Slone and Jana Slone, who may be distant relatives of the brothers, each testified that they went to the Knott County Courthouse together, voted, then drove to the outskirts of town where they were paid.

All three of the women needed the money, said federal prosecutor Richard C. Pilger from the U.S. Department of Justice in Washington.

"These women were exploited," Pilger said. "They were poor, hard-pressed women. The kind of people susceptible to selling their votes."

FBI Special Agent Tim Johnson said he contacted the three women as part of his investigation. He said they were "very reluctant" to answer his questions.

Johnson, who testified that he had interviewed about 175 people in his investigation, said the U.S. attorney's office had agreed to grant immunity to the women for the crime of selling their votes if they cooperated.

"They didn't want to be here," Pilger told jurors in the Pikeville courthouse. "They didn't want to get these guys in trouble. They had no reason to lie."

However, defense attorney Steve Owens, representing Ronnie Slone, said the women had changed their stories numerous times. He said they even acknowledged that their testimony in court differed from their original statements to the FBI.

The Slones became the second and third Knott County residents acquitted of vote buying charges in Eastern Kentucky since June.

On June 20, a federal jury found Jimmy Lee Conley, 33, of Lackey, innocent of buying votes in the same primary election.

Conley was the first of about 20 Eastern Kentuckians indicted this year on charges of election fraud to go to trial.

Two other people indicted in the Knott County probe pleaded guilty to vote fraud earlier this month. Phillip Slone, 53, of Hindman, and Newton J. Johnson, 40, of Brinkley, admitted paying voters \$50 to vote in the primary election.

Five other Knott Countians remain under indictment on federal vote fraud charges, stemming from the same primary election. All have entered innocent pleas.

And in Pike County, 10 people, including a former state senator and his wife, are under indictment on charges of vote fraud involving a race last year for district judge. They, too, have entered innocent pleas.

About Top Jobs

PIKEVILLE, Ky. — Defense attorneys wasted no time yesterday attacking the credibility of witnesses who'll testify against Knott County Judge-Executive Donnie Newsome and a campaign worker in their election-fraud trial.

"You're not going to hear from one single credible witness that they are guilty," said Scott C. Cox, a Louisville attorney representing Newsome in the U.S. District Court trial in Pikeville.

Newsome, 52, and Willard Smith, 54, both of Hindman, are accused of buying votes in the 1998 Democratic primary.

Federal prosecutor Richard Pilger told jurors in his opening statement that at least one witness is unable to read, another has mental problems and another is a convicted felon. All were poor and easy prey for unscrupulous candidates, he said.

"We will prove to you that Donnie Newsome picked exactly that kind of people in anticipation of this day," Pilger said.

NEWSOME AND Smith were among several people charged after an FBI investigation into the 1998 primary. U.S. District Judge Danny Reeves said the trial is expected to take several days, perhaps extending into next week.

Pilger said authorities suspected something was amiss in the election when they saw large numbers of absentee votes being cast.

"This was a flag to the FBI," Pilger said. "This was an indication of vote buying."

Pilger and Assistant U.S. Attorney Tom Self, having failed to win convictions in two vote-fraud trials in Pikeville since June, asked that the trial be moved elsewhere.

016993

Self said he feared publicity and the political influence of the defendants could hurt the chances of a fair trial in Pikeville.

The judge also expressed concerns about pretrial publicity surrounding the case but opted to keep the trial in Pikeville.

In a trial last month, Brady Slone, 57, and Ronnie Slone, 55, both of Pippa Passes, were found innocent of buying votes in the same primary. They became the second and third Knott County residents acquitted of vote-buying charges. In June a federal jury found Jimmy Lee Conley, 33, of Lackey, innocent of buying votes.

Three other people indicted in the Knott County investigation have pleaded guilty to buying votes. Phillip Slone, 53, of Hindman; Newton J. Johnson, 40, of Brinkley; and Jimmy Calhoun, 33, of Hindman, admitted paying voters \$50 each.

The trial of the remaining defendant, Patrick Wayne "Buck" Madden, 45, of Littcarr, is scheduled for Oct. 7.

PILGER TOLD jurors in his opening remarks that Newsome, a former state representative, wanted to be boss of Knott County and bought votes and conspired to buy votes to achieve that position.

"Every citizen is entitled to participate in voting without the taint of vote buying," he said.

Cox said Newsome won the election by working hard. "His campaign strategy was to wear the leather off the soles of three or four pairs of shoes."

The same strategy, Cox said, won Newsome election to two terms in the legislature.

"Believe me," Cox told the jury, "there are two sides to this story."

HERALD-LEADER

Knott man gets 20 months for vote fraud

HE WAS ONE OF 12 PEOPLE CONVICTED IN VOTE-BUYING SCHEME

ASSOCIATED PRESS

PIKEVILLE - A Knott County man has been sentenced to 20 months in prison for buying votes in the 1998 primary election.

Patrick Wayne Madden, 46, of Littcarr, will serve two years probation when he is released.

U.S. District Judge David Bunning imposed the sentence yesterday, saying he hopes the punishment will deter others from buying votes in eastern Kentucky.

Madden, who was not a candidate in the election, pleaded guilty. He was among a group of Knott County residents charged in an FBI crackdown on election fraud that netted 12 convictions.

Knott County Judge-Executive Donnie Newsome, a former state representative, was among those caught in the crackdown. He was convicted in federal court Oct. 1 of one count of conspiracy to buy votes and two counts of buying votes.

Newsome's sentencing is scheduled for March 16. He faces three to 15 years in prison.

Another Knott County man, Willard Smith, was convicted in the same trial of one count of conspiracy to buy votes and four counts of buying votes. Smith faces five to 25 years in prison at his sentencing on Feb. 17.

© 2004 Lexington Herald-Leader and wire service sources. All Rights Reserved.
<http://www.kentucky.com>

016995

The authors of the study conclude "It would be difficult to imagine a jurisdiction adopting a new technology for voting if it were not satisfied that the proposed innovation was at least as good as the present system on every one of the first ten criteria, and better than the present system on the last seven."

The study urges caution but identified telephone, kiosk, and Internet as three options sufficiently evolved to support testing in a fully functional pilot. Of these, the study said telephone offers the potential for the most significant impact on the largest base of Canadians.

Legislation recently passed by parliament and awaiting royal assent would authorize studies of newer technology and voting.

STUDENT ABSENTEE VOTES

An elementary school physical education teacher and two other Knott County, Ky. residents were convicted April 19 in federal court in Pikesville, Ky. for conspiring to buy absentee ballots from 12 students who attend a small private college. The twelve person federal jury, which deliberated for seven hours over a two-day period, failed to agree on a verdict for two other defendants, one of whom was the brother of the county attorney on the ballot. These two defendants face a retrial in June.

The jury convicted Caney Creek Elementary School physical education teacher Phillip D. Sparkman, of twelve counts of vote fraud and of one count of lying to the FBI. Lola Jean Stone, a sister of one of the candidates on the ballot, was convicted of seven counts and of lying to the FBI. Charlie Maggard was found guilty of three counts of vote fraud. The maximum federal penalty for each offense is five years in prison and a \$250,000 fine. Sentencing will occur later this summer.

After the Alice Lloyd College students were granted immunity, they testified that they were paid \$30 to cast their ballots in 1998 for a slate of local candidates. According to student testimony, they received their payment for votes from Stone after they went to her store where they wore "I Vote" stickers and purchased a peach-flavored "Mr. Fizz" soft drink.

The trial began April 4 but was suspended for a week during Pikesville "Hillbilly Days" celebration. Although all vote buying charges were related to local offices, the federal prosecutors had jurisdiction because federal candidates were on the same ballot.

David Randall Gayheart, the nephew of the County Clerk, was named in a separate indictment for seven counts of paying or offering to pay college students to vote for his uncle, lying to the FBI, and three counts of asking others to lie to the FBI. Gayheart pleaded guilty January 3 to buying votes and co-operated with prosecutors. He is awaiting sentencing.

Kentucky Secretary of State John Y. Brown instituted a "Fraud Busters" program in 1996 to curb vote buying abuses. The state legislature authorized \$10,000 to finance the program which offers a reward of \$1,000 for information leading to a felony indictment for vote fraud. State officials said that the Pikesville convictions, however, were based on complaints made to the FBI, not to state officials.

CHICAGO SUN-TIMESwww.suntimes.com[Back to regular view](#)<http://www.suntimes.com/output/news/cst-nws-stlouis30.html>[Print this page](#)MO?
SL?**5 in E. St. Louis convicted of vote fraud**

June 30, 2005

BY JIM SUHR

EAST ST. LOUIS, Ill. -- A federal jury Wednesday convicted the head of this city's Democratic Party and four others of scheming to buy votes with cash, cigarettes and liquor last November to get key Democrats elected.

Jurors in the monthlong trial deliberated more than five hours before convicting local Democratic Party chairman Charles Powell Jr., 61, and Kelvin Ellis, 55, the city's former director of regulatory affairs, of felony conspiracy to commit vote fraud. Also convicted were Democratic precinct committee members Sheila Thomas, 31, and Jesse Lewis, 56, and City Hall worker Yvette Johnson, 46.

Ellis, Thomas, Lewis and Johnson also were convicted of one count apiece of election fraud for allegedly paying at least one person to vote -- or offering to do so. Powell was never charged with that count.

Jurors set aside defense claims that the government's case was flimsy because of unreliable witnesses whose testimony often contradicted each other and, at times, was recanted.

Not much direct evidence

"I respect the jury, but I am disappointed," Ellis' attorney, John O'Gara, said after the verdicts. He said the defense would consider asking for a new trial.

A date for sentencing was not immediately set.

"We'll take it one step at a time in terms of where we go from here," said Johnson's attorney, Pearson Bush, who declined to elaborate.

Messages left with attorneys for Powell and Thomas were not immediately returned. Voice mail for Lewis' attorney was full.

Prosecutors provided little evidence directly linking the defendants to the alleged vote-buying, often relying on secretly recorded audiotapes in which they say those accused could be heard talking about paying \$5 per vote in the Nov. 2 election -- and whether that amount would be enough.

A federal prosecutor in the case referred calls to his boss, U.S. Attorney Ron Tenpas, who did not immediately return messages left at his office.

Witnesses called liars

Prosecutors alleged that money flowed from the Belleville-based St. Clair County Democrats to their East St. Louis counterparts in a bid to elect certain Democratic candidates, including Mark Kern as St. Clair County Board chairman.

Kern, who narrowly won the race, has denied the allegations and has not been charged with any wrongdoing.

Powell lost his re-election bid to the City Council in April after his arrest.

016997

State records showed that tens of thousands of dollars were transferred from the county Democrats to the committeemen days

before the Nov. 2 election. Party leaders said it was for legitimate expenses, including rides to the polls for people without cars.

Defense attorneys called the audiotapes -- the cornerstone of the government's case -- meaningless entrapments by opportunistic informants intent on seizing power for themselves. Defense attorneys called the prosecution's key witnesses liars.

"I would say jurors looked at these tapes and listened to them, and I'm guessing they are using the interpretations these very faulty witnesses gave them to reach their conclusion," O'Gara said after the verdicts. "I would not have trusted the government's presentation."

Witnesses disagree in vote fraud case

By Michael Shaw
Of the Post-Dispatch
Thursday, Jun. 16 2005

The government's witnesses in the East St. Louis vote fraud trial don't agree on one of the most surprising aspects of the testimony so far: whether St. Clair County Board Chairman Mark Kern knew vote buying was taking place in East St. Louis during the November election.

The first witness testified two weeks ago that during a telephone conference call in October, she heard prominent Democrat Kelvin Ellis solicit funds from Kern, then a candidate for the job, to pay reluctant voters.

Sandra Stith, a Democrat worker during the Nov. 2 election who already has pleaded guilty to buying votes, is the only other government witness to that call.

She took the stand Thursday and said she remembered the Oct. 21 call. But she said she didn't remember the alleged discussion about more money being needed to swing the election in Kern's favor because some residents perceived him as racist.

"Do you recall any comments about money during that conversation?" Assistant U.S. Attorney Mike Carr asked her.

"No," she replied.

Carr ended his questioning of Stith soon after that exchange.

Five East St. Louis Democratic Party workers are on trial in federal court at East St. Louis, accused of a conspiracy to buy votes in the Nov. 2 election to get Kern and other prominent party members elected. Defendants include Ellis and city party Chairman Charles Powell Jr.

Kern, who would have lost the race without the East St. Louis turnout, has not been charged and has denied any wrongdoing.

Other controversial developments on Thursday led U.S. District Judge G. Patrick Murphy to send the jury home for the day to allow lawyers to prepare for today's proceedings.

Today, prosecutors are expected to present witnesses who will testify that Powell directly paid residents to vote, something his lawyer, Bruce Cook, said left him blindsided. Powell is only charged with leading a conspiracy to buy votes, not with purchasing the votes themselves.

Murphy, the judge, said he was surprised, too, but ruled the evidence was admissible. One witness, identified Thursday as Douglas M. Alexander, 45, is expected to testify Powell paid him \$10 to vote.

Two others, Stephen Young and his wife, Terrell Crow-Young, had been expected to testify that Powell's associate paid them to vote Nov. 2, according to a prosecutor's document filed in the case. But they won't be allowed to testify because they accidentally attended a portion of the trial Thursday morning. Any witness is supposed to be barred from hearing another's testimony, so Murphy excluded them.

Authorities have interviewed at least one other man who said that Powell's associate paid him to vote, according to documents. Cook and other lawyers, who previously had questioned the lack of testimony from actual voters, said Thursday that they wanted extra time to prepare a defense in light of these witnesses.

016999

In another twist, Murphy and the prosecutor, Carr, argued about whether the judge had said in front of the jury that Thursday's testimony by Stith was "damaging" to the government's case.

Carr claimed it happened when jurors were present. Murphy claimed he never said "damaging" in front of the jury. A transcript of the proceedings shows the judge saying "I believe that the witness gave damaging testimony to the government" in front of the jury.

March 28, 2004

7 hit in voter fraud case

MS

- Defeated Tippah County sheriff's candidate among persons named

The Associated Press

RIPLEY — Seven people have been charged with voter fraud in Tippah County, according to the attorney general's office.

While specific individuals were named in the indictments as the candidates for which votes were allegedly bought, Randall L. Wilbanks, a defeated candidate for Tippah County sheriff, was the only one named as a defendant.

Attorney General Jim Hood, whose office investigated the case, said the document must contain those names.

Named in three separate indictments were Wilbanks, 60; Joe Daniel Barnes, 52; and James D. Johnson, 66, all of Ripley; and Melba Sue Selmer, age and address unavailable. Each is charged with one count of conspiracy to commit voter fraud and 16 counts of voter fraud.

In a second indictment, Christopher R. Mathis, 40, of Tiplersville, Billy Gene Barnes, 49, of Walnut, were indicted on three counts of bribery.

In the third indictment, Roy Lee Richardson, 40, of Corinth, is charged with one count of attempting to bribe an elector and three counts of bribery for allegedly paying four individuals \$15 each to vote for three candidates.

Ky. Jury Convicts 2 Men of Election Fraud

Ky. Jury Convicts 2 Men of Election Fraud in 2002 Races; Both Men Face About 2 Years in Prison

The Associated Press

LONDON, Ky. Sept. 16, 2004 — A Kentucky businessman was found guilty Thursday of election fraud for orchestrating a scheme to buy votes from impoverished mountain residents in two races in 2002.

The jury deliberated about four hours before returning the verdict against Ross Harris, a Pikeville coal operator whom prosecutors portrayed as the kingpin of the election fraud conspiracy. An associate was also convicted, and both men face about two years in prison.

The verdicts came after a trial in which various witnesses told of voters gathering in a church parking lot in an Appalachian county to collect \$10 bills after leaving the polls in the 2002 election. Others testified about large contributions to some candidates before the election to be used to buy votes.

In closing arguments Wednesday, federal prosecutor Ken Taylor described Harris as a behind-the-scenes political player who "secretly funds campaigns with illegal contributions."

Defense attorney Larry Mackey said the depiction was false. He said his client was being treated for life-threatening cancer during the period in question and would not have taken time from his hospital bed to help buy votes in the elections.

"We appreciate the jury's attention throughout the trial, but at the end of the day we're disappointed with the verdict," Mackey said, who vowed to appeal.

Harris was convicted on one count of conspiracy to commit mail fraud and to buy votes, three counts of mail fraud and one count of structuring withdrawals from a bank account to avoid federal reporting requirements.

Glen Turner, an executive in Harris' mining company, was convicted of conspiracy to commit mail fraud and two counts of mail fraud. The mail fraud counts involve the sending of bogus campaign finance reports to the state.

Prosecutors claimed Harris illegally contributed some \$40,000 to a former state senator's unsuccessful judicial race, and that Harris and Turner gave an additional \$25,000 to the re-election campaign of a judge. They said the money was used in a scheme disguised as a "get out the vote" effort.

The two men showed no reaction as the verdict was read. Both men declined to comment to reporters afterward.

Imprisoned judge-executive testifies in election fraud trial

ROGER ALFORD
Associated Press

LONDON, Ky. - Imprisoned Knott County Judge-Executive Donnie Newsome testified Thursday that he received \$25,000 in cash from two eastern Kentucky businessmen who are on trial for election fraud.

Newsome, who is serving 26 months in federal prison after being convicted of election fraud last year, agreed to testify against Ross Harris of Pikeville and Glen Turner of Drift in exchange for a lighter sentence. Defense attorneys claim Newsome made up the story about illegal cash contributions in an effort to get leniency.

Prosecutors claim Harris is the kingpin in a scheme to buy votes from impoverished mountain residents. They allege that Harris illegally funneled money into Newsome's 2002 re-election campaign.

Newsome - dressed in white shoes, jeans and a red shirt - said he was given cash contributions on three occasions: One for \$5,000 from Harris; two for \$8,000 and \$12,000 from a man he said he believed to be Turner.

"I used it in my campaign," Newsome said. "When I needed it, I would put it in my account."

Newsome said he received \$60,000 in cash donations for his re-election campaign that year and an additional \$14,000 in checks.

Newsome, who has continued to serve as judge-executive despite his conviction, said he didn't use any of the money to buy votes.

Newsome is expected to be called back to the witness stand when the trial resumes Friday morning in U.S. District Court in London. His brother, Bobby Newsome, also is scheduled to testify. Prosecutors said Bobby Newsome was present when Turner gave the judge-executive money.

Harris also is accused of funneling money into a Pike County campaign in an unsuccessful effort to defeat an incumbent judge, whom he blamed for a sex scandal involving one of his friends. The FBI alleged that Harris conspired to influence the election by providing money for a scheme disguised as a "get out the vote" effort. That involved paying people to haul voters to the polls.

Defense attorneys say the only financial contribution Harris made to the John Doug Hays campaign for Pike County district judge was a legal donation of \$1,000.

A jury of 11 women and five men has been listening to testimony for 1 1/2 weeks.

The charges against Harris and Turner are the latest in a string of federal election fraud cases from the region. Hays and seven others are scheduled for trial in October.

Assistant U.S. Attorney Ken Taylor contends that Harris illegally funneled some \$40,000 into Hays' unsuccessful campaign after a sex scandal resulted in the resignation of Pike County Circuit Judge Charles Lowe Jr. Taylor said Harris and Lowe were close friends.

Lowe resigned last year rather than face possible removal by the Judicial Conduct Commission for a sexual relationship with a woman involved in an adoption and child custody dispute in his courtroom.

Taylor said Harris was so angered by the scandal that he tried to lash out at the woman, Debbi Hylton-Mullins, and her husband, Pike County District Judge Darrel Mullins, who was seeking re-election at the time.

Hays was running against Mullins.

KY

Man charged with offering beer for vote

LUDLOW, Kentucky (AP) -- A man tried to buy a vote with a 12-pack of beer, according to police in northern Kentucky.

Edward Lucas offered the beer to an 18-year-old student at Ludlow High School in exchange for a no vote on a proposed increase in school property taxes, Ludlow police officer James Tucker said in an affidavit.

Lucas was charged Friday with making or receiving expenditures for vote, a class D felony that can land him in prison for one to five years.

Lucas, 40, denied the charge.

"I don't know the boy, and that's not exactly what was said," Lucas said.

"I said, 'I hope it doesn't go through and if it doesn't, I'm going to have a big beer party.'"

Lucas was arrested Friday and released on bond Saturday.

Police dispute his version of the exchange, but declined to give specifics.

The tax increase was on the ballot Tuesday and lost.

It would have generated about \$75,000 a year for school construction projects.

Appy voting fraud claims probed

The Post

VA
May 11, 2005

Email to a friend Voice your opinion

Virginia State Police are investigating allegations of voting fraud during last year's Appalachia town council election, Wise County Commonwealth's Attorney Chad Dotson confirmed Monday.

State police are looking at claims that supporters of an unidentified council candidate offered food, cigarettes and liquor to residents of the Inman Village public housing complex in exchange for letting the supporters fill out their absentee voting ballots, according to a story in Sunday's Roanoke Times.

Voters in the May 2004 election returned incumbent Councilman Ben Cooper to office and chose newcomers Eddie Gollaway and Owen "Andy" Sharrett III for the three open seats on the five-member council.

Cooper, a former mayor and acting town manager, led the polling with 351 votes, followed by Gollaway with 340 and Sharrett with 312.

Falling short were longtime councilman and current Mayor Gary Bush, with 244 votes; incumbent Rick Bowman with 221 votes; and former councilman Debbie Bouton with 212 votes. Also, Ben Surber received 28 votes despite having announced that he dropped out of the race.

The Roanoke Times story reported that of 585 people who voted, 108 cast absentee ballots - an absentee rate of 18 percent, compared with a usual statewide rate of about 5 percent.

The story quotes three Inman Village residents as confirming their absentee ballots were filled out by someone other than themselves. The Roanoke Times did not identify the candidate or the candidate's supporters who allegedly bribed the residents, because so far no charges have been filed in the investigation.

Dotson Monday said the investigation is ongoing, but he hopes to receive a state police report in about two weeks. At that time, he said, he will determine if anything in the report merits the filing of criminal charges.

Dotson declined to discuss details of the investigation, but acknowledged he's heard the Inman Village allegations detailed in the Sunday article.

Voting fraud not a problem in Madison

Phil Brinkman Wisconsin State Journal
May 10, 2005

John Hill really does exist. So do Katie Katz, Donald Schamun, James Kuehl, Janet Griesel, Sandra Angell, John Amundson and Deb Spees.

Brian Stoll is out there, along with Daniel Jay Lee and David Cimino. Angela Franzke moved; so did Nathan Greenawalt, Scott Lueck, Eric Sherman and Paul Sonntag. But they're real people.

In fact, if you took the time, you'd likely find the vast majority - if not all - of those once thought to be Election Day phantoms in Madison are living, breathing voters.

Authorities continue to investigate voting irregularities in Milwaukee, including more than 100 cases of suspected double voting.

But in Madison, where 1,194 address verification cards sent to voters who registered on Election Day in November were returned as nondeliverable, investigators now say only 16 may be problematic.

"The vast majority of them - almost all of them - on their face appear to be someone who moved between voting day and the time when these were mailed out," Dane County District Attorney Brian Blanchard said.

Most of the others either wrote down the wrong ZIP code on their registration forms, forgot to include their apartment numbers in their address or inadvertently wrote down an old address. The post office likely could find them, but election rules require the cards be returned if the address is incorrect or incomplete.

"It doesn't make me feel good," said John Hill, 59, an Army veteran and longtime Madison resident whose voter registration card was sent back to the Madison city clerk because he wrote his ZIP code as 53704 instead of 53705. "I know I didn't cheat, and I know it was all a big mistake. People just make too big a deal of the little things."

Innocent mistakes Such innocent mistakes, which happened thousands of times around the state, have tended to amplify the far more serious - but much smaller number - of likely fraudulent votes such as those announced Tuesday in Milwaukee. Identification advocates regularly cite the number of returned registration cards as evidence Wisconsin needs to require voters to show photo identification at the polls.

Opponents point out such a requirement would do little to stop most of the problems that have been identified, such as people writing down the

017007

wrong address or felons voting, and say it could disenfranchise some elderly or poor voters.

Supporters note the current system, in which registered voters need show no identification and new voters need only a utility bill or another registered voter to vouch for them, invites abuse.

The GOP-led Legislature recently passed a bill requiring a photo ID to vote, but Democratic Gov. Jim Doyle vetoed it.

A hearing on a proposed state constitutional amendment requiring such identification (AJR 36) is planned for 10 a.m. Thursday in Room 300 Northeast of the state Capitol.

At first glance, many of the verification cards that were returned suggested possible voter fraud: The addresses didn't exist, or the person on the card didn't live there.

One card, filled out by a John Amundson, gave an address of "6 S. Madison," not an actual residence. But Amundson is very real. The 45-year-old information technology manager actually lives at 6 S. Yellowstone Drive.

"Sounds like I spaced out the 'Yellowstone,'" Amundson said. "It certainly sounds like the kind of thing I could do."

A letter carrier couldn't find Janet Griesel at 710 Wheeler Road. That's because Griesel moved about two years ago to 710 Malvern Hill Drive from 1630 Wheeler Road. Her card mixed the two, creating an address that doesn't exist.

"My husband probably filled it out for me because I have a vision problem," Griesel said. "He was in a hurry to write his and mine, and I bet that's what he did. Unbelievable."

Katheryn Katz put down the address of her sorority house at 103 Langdon St. when she registered to vote Nov. 2 in her first presidential election. The city clerk sought to confirm her address in January, but by then she had moved to Seville, Spain, where the 21-year-old UW-Madison junior is studying Spanish politics and history.

Sandra Angell moved to her new house five years ago, but for reasons she can't explain, she wrote down her old address on Starker Avenue when she went to vote.

Cheating can be risky Kevin Kennedy, executive director of the state Elections Board, wasn't surprised at the low number of potential fraud cases in Madison. Defrauding the current system is easy but chancy, and the payoff of throwing a few votes toward one candidate probably isn't worth the risk of 4 years in prison, he said.

Allegations of massive fraud, such as one person vouching for a busload of potential voters, are probably apocryphal, Kennedy said. Something like that would make an impression on poll workers, who haven't reported any such incidents, he said.

Voters can cheat the system. They can, for example, claim to be someone else. But that can be risky, Kennedy said, since it depends on the cheater knowing that the other person hasn't voted yet and that the poll worker doesn't know the person whose identity is being used.

To register as a fictional voter, the person would need to forge documents, such as utility bills, used to verify the person's address. Beginning in 2006, federal law also will require voters to list their driver's license number or, if they don't have a driver's license, the last four digits of their Social Security number.

State Rep. Jeff Stone, R- Greendale, the lead sponsor of efforts in the Assembly to require photo ID at the polls, said the numbers from Madison suggest "a degree of accuracy in the way the system functioned" unlike in Milwaukee.

But he maintained photo ID would improve the system further by allowing poll workers to make a positive identification of the voter, even if the address is outdated, incorrect or fraudulent.

"I think that's something that would improve the potential for pursuing charges against someone who voted improperly," Stone said.

Charges unlikely In Madison, at least, the odds of such charges look exceedingly slim. If someone wanted to forge an identity and vote fraudulently, finding that person is probably next to impossible, Blanchard said.

Then, too, explanations for the 16 cards investigators have pulled out for further inquiry may prove to be as benign as the other 1,178.

On Tuesday, the Wisconsin State Journal found one of those voters, Brian Stoll. He and his wife live where they said they lived on their registration card, at 9921 Soaring Sky Run. But, while the property was recently annexed by Madison, the post office still considers it a Verona address and returned the card.

Stoll, 38, said he's used to such confusion over his address and was willing to overlook his brief tenure as a criminal suspect.

"As long as I didn't end up in jail and I can explain the circumstances, I guess it's OK," he said.

FBI's Sham Candidate Crawled Under W.Va.'s Political Rock

By Michael E. Ruane
Washington Post Staff Writer
Friday, December 2, 2005; A01

The three men were sitting in a car outside a rural elementary school in West Virginia when the candidate handed over \$2,000 in cash and said, "Buy all the votes you can."

In the hamlets and hollows of Logan County, where political shenanigans are legendary and it's said that a vote can be bought for a pint of whiskey or a \$10 bill, some say there was nothing extraordinary about the transaction.

Here's what made it unusual: Although Thomas E. Esposito was on the ballot as a candidate for the state House of Delegates, he wasn't really running for office.

The small-town lawyer and former mayor was just bait. And when the FBI lowered him into the murky waters of southern West Virginia politics last year, it dangled him like a shiny lure.

The whole affair landed yesterday in a Charleston courtroom, where a defense attorney cried foul, accusing the government of "outrageous" conduct and of violating the sanctity of the election process. He said the charade robbed 2,175 citizens who voted for Esposito -- unaware he wasn't for real -- of a constitutional right.

But a federal judge sided with the government, ruling after a 30-minute hearing that corruption in Logan County had been endemic "for longer than living memory" and that the bogus election campaign might have been the only way to root it out.

In Logan County, which is about an hour south and a world removed from Charleston, there are people who agree. "This stuff has been going on since I was a kid," Kenneth McCoy, 54, a disabled miner, said this week. "They had to come up with some way to stop it. Personally, I have no problem with it."

Political corruption in southern West Virginia goes back generations, residents and observers say.

"Federal authorities have been intervening in southern West Virginia for 80 years, at least," said Topper Sherwood, co-author of a 1994 book on longtime Logan County political chieftain Raymond Chafin. "More often than not, their role is to come in and remove power from those who have acquired it illegally."

Moss Burgess, 62, a retired Logan County high school chemistry teacher who has run unsuccessfully for local office, said: "I'm glad that somebody's trying to clean up the system in this county. Most people, they've more or less accepted it as common."

U.S. District Judge David A. Faber, chief judge for the Southern District of West Virginia, asserted in yesterday's ruling: "It has been nearly impossible to prosecute corruption in Logan County because persons with knowledge of it are reluctant to testify against others in their community."

The advertisement is a black and white image. On the left, the Sprint logo is visible with the tagline "Together with heart." and "Yes you can:" next to it. On the right, there is a small inset photo of a man in a suit talking on a mobile phone. Below the photo, a dark rectangular box contains the text "With Sprint, yes you can." in a light-colored font.

017010

The current case began in 2003, when Esposito, a lawyer who had been mayor of the City of Logan for 16 years, entered a plea agreement with the government in a corruption case, according to court papers. He had been accused of paying the \$6,500 bar tab of a local magistrate for reasons not specified and then paying the magistrate to keep quiet about the arrangement. The magistrate was later indicted on an extortion charge.

Under the plea agreement, Esposito began helping the Justice Department in its investigation of county political corruption, which the department described as "commonplace and widespread."

Assistant U.S. Attorney R. Booth Goodwin II, in a court filing last month, said that as Esposito met under cover with people about vote buying in the run-up to the 2004 primaries, investigators concluded that a campaign sting could provide a "virtual treasure trove of evidence."

"Without that step, it was feared, the undercover operation would dissolve, and a valuable opportunity to catch a number of persons in the act . . . would be lost," Goodwin wrote. So the government had Esposito run. He entered the race Jan. 30, 2004, filing the appropriate papers with the West Virginia secretary of state. He was one of 10 Democratic candidates for four seats in House District 19, which includes Logan County.

"He had signs; he had stickers; he showed up at campaign events," said Chris Stratton, a reporter for the Logan Banner newspaper. "All that stuff was for show. It was there to make him look like a legitimate candidate."

Gregory J. Campbell, the attorney for Perry French Harvey Jr., 56, the defendant in the case, said: "The government knew that all this was false. [Esposito] was bait. Nothing more, nothing less. They tossed him out there, and they were seeing who'd come packing. And he was live bait. He was out there, and he was active."

According to court papers, on April 12, 2004, Esposito met with Harvey, a retired coal miner, and another man, Ernie Ray Mangus, at a political rally at the elementary school. They sat in Esposito's car, and Esposito gave Mangus the \$2,000. Mangus, who Campbell said has been granted government immunity, gave half the money to Harvey.

"The other guy gives my guy 1,000 bucks, and that was as far as it goes," Campbell said in a telephone interview Tuesday. "The other guy has been given immunity and will testify that my client knew that the money was to buy votes. . . . [Harvey] was told by the guy that had the money, 'Esposito gave me this and said buy all the votes you can.' My guy said, 'I ain't buying any votes,' and didn't."

Harvey, who voted for Esposito, was indicted Aug. 17 on one count of conspiracy to buy votes. He is scheduled to go on trial Dec. 14. Yesterday's ruling was on his attorney's October motion to have the charges dismissed. Esposito, reached at his law office in Logan County, declined to comment yesterday.

The FBI withdrew Esposito from the race two days after the meeting with Harvey and Mangus, and the Justice Department has said it took great pains to alert the public by way of the media. But his name remained on the ballot, and on primary day -- May 11, 2004 -- he got more than 2,000 votes, placing last in the field.

"By placing a false candidate in the election, a sham candidate, one [the government] knew could not take office, every vote that was cast for Esposito was a vote that an honest voter could have cast for an honest candidate," Campbell wrote in his motion to have the charges dismissed.

But Goodwin, the government attorney, countered in a filing that the decision to have Esposito run was approved by his office, the local FBI special agent in charge and the agency's Criminal Undercover Operations Review Committee in Washington, whose approval is required for all sensitive FBI undercover operations.

"Esposito did not engage in any unlawful conduct by becoming a candidate for the House of Delegates," Goodwin wrote. "Rather, his candidacy merely provided the stage on which defendant acted."

"The conduct of the United States in carrying out the undercover investigation was necessary and proper to root out

017011

systemic corruption," he wrote.

Judge Faber noted yesterday that previous rulings have held that for a government investigative action to be improper it "must be so outrageous as to shock the conscience of the court."

"Here, in looking at the totality of the circumstances," he wrote, "the court's conscience is not shocked in the slightest."

During the hearing, Campbell said, the judge asked him: What else could the Justice Department have done?

"Not violate the constitutional rights of the voters of Logan County," he said he replied.

Logan Clerk to Plead Guilty in Election Fraud Case

Posted 11/29/2005 06:08 PM

Voter Fraud in West Virginia

Story by The Associated Press

Logan County Clerk Glen Dale Adkins plans to plead guilty in the ongoing probe of election fraud in southern West Virginia.

Federal prosecutors Tuesday requested a plea hearing date for the 57-year-old. His defense lawyer disclosed plea negotiations earlier this month when his scheduled U-S District Court trial was postponed.

A federal grand jury indicted Adkins, also known as "Hound Dog," in July on charges alleging he conspired with others to bribe voters in elections between 1992 and 2002.

As part of their vote-buying probe, prosecutors previously landed guilty pleas by Logan County's sheriff and the city of Logan's police chief, prompting both to resign.

Like those former officials, Adkins is a Democrat. That party dominates both counties, and the election fraud charges largely focus on Democratic Party primaries.

West Virginia Democrats on Defensive After Fraud Probe

WV

CHARLESTON (AP) - West Virginia Democrats are on the defensive after the latest wave of election fraud charges again involve the Mountain State's dominant political party.

A federal magistrate last week arraigned and set July 11 trial dates for five men charged in an investigation into vote-buying in southern West Virginia.

Like five other area residents previously charged in the probe, the Lincoln County men are accused of aiding Democratic candidates with an alleged scheme to exchange cash or liquor for votes.

And like the 2004 round of criminal charges, the most recent indictment targets a Democratic officeholder: Lincoln County Circuit Clerk Greg Stowers. The then-sheriff of neighboring Logan County, Johnny "Big John" Mendez, was charged with vote-buying last year. Mendez resigned, pleaded guilty and was sentenced to home confinement and probation.

Stowers, 48, has vowed to fight the conspiracy count facing him. Though a lawyer, Stowers declined to comment on the pending case last week.

Gov. Joe Manchin considers the Stowers family to be political allies. Greg Stowers' brother, Lyle, volunteered for his campaign and was a "big supporter," Manchin spokeswoman Lara Ramsburg said.

Though no Republican has been named in the election fraud case, the state GOP has not been immune to criminal charges. A Republican state Senate candidate, Mark Anthony Reynolds of Fairmont, was convicted on federal wire fraud and obstruction of justice charges last year and sentenced to 10 years in prison. Reynolds had posed as a Republican Party insider as part of a shakedown scheme, prosecutors said.

And a pending Federal Election Commission complaint alleges former state GOP Chairman Kris Warner violated the law by pairing his brother's name with President Bush's on yard signs during Monty Warner's unsuccessful run for governor. The signs drew complaints from the Bush campaign before the election, and helped fuel the push to remove Kris Warner as chairman. He resigned last week.

The investigations are not a Democrat or Republican issue, Ramsburg said. "This is a law enforcement issue, just as the Republican Party leadership, specifically the Warners, are currently under federal investigation for things that happened during the campaign."

Political corruption is not new in West Virginia. Convictions have been numerous and both parties have a former governor sent to federal prison.

Republican Gov. Arch Moore pleaded guilty to five corruption-related felonies 15 years ago. Among his crimes, the three-term governor passed around \$100,000 in unreported campaign cash "to influence, secure, and retain the votes and influence of voters" during his successful 1984 campaign.

Democrat Wally Barron was cleared of a 1968 bribery indictment but in 1971 was indicted again on jury tampering charges stemming from his 1968 trial. He spent four years in prison.

The latest federal indictment alleges the Lincoln County defendants aimed to maintain power over county jobs, road gravel and paving materials, and property tax assessments, among other areas. Toward that end, the conspiracy sought to buy votes to secure the election of certain candidates, including Stowers, "to countywide office," the charges allege.

That has not prevented state Republicans from raising the question of wrongdoing by other Democratic candidates on the "slates" allegedly passed out by the conspirators. Several of the charges focus on the 2004

017014

primary, when Gov. Joe Manchin, U.S. Rep. Nick Rahall and even Sen. John Kerry, D-Mass., the Democrat's eventual nominee for president, were on the ballot.

Raleigh County businessman Rick Snuffer, for instance, offered Friday to seek Rahall's seat "if Rahall is forced to leave office due to the expanding level of indictments and investigations into voter fraud."

Snuffer, who ran unsuccessfully for the 3rd District seat last year, noted that "I understand no one has publicly tied the Congressman to vote buying and other voting improprieties."

Republican U.S. Attorney Kasey Warner's office filed the vote-buying charges. The cases are being handled by two assistant prosecutors whose tenure in that office precedes that of Kasey Warner, a Bush appointee.

Kasey Warner has repeatedly said he has erected an "incredibly high wall" to separate the activities of his office from the political activities of his brothers, Monty and Kris.

NY

Free beer if you register to vote

Joseph Spector and Enid Arbelo
Staff Writers

(June 18, 2004) — Here's a way to get young people registered to vote: Give them free beer.

That's the plan at today's East End Festival. Monroe County Democrats have teamed up with High Falls Brewery to offer two free 2-ounce beers to those who register to vote at the festival.

Then the new voter can go into a real voting booth and pick the brew they liked the most. The promotion is called "Register Your Taste."

The goal is to encourage people older than 21 to register to vote and to simulate the experience of voting. But alcohol treatment counselors fizzled on the idea, saying organizers shouldn't link drinking with the civic duty of voting.

"I think there are other ways to motivate people to vote other than give them alcohol," said Elaine Milton, director of the chemical dependency clinic at the Family Service of Rochester Inc.

Molly Clifford, head of the Monroe County Democrats, stressed that the event is not aimed at encouraging alcohol consumption and that the samples are small.

The initiative, backed by High Falls CEO Tom Hubbard and Moe Alaimo, president of the East End Business District, will also take place at two other East End festivals later this summer and at two Red Wings games.

The booth will be open from 6 to 8 tonight at Alaimo's store, Havana Moe's, 200 East Ave.

Voting for Beer

Question: What do you think about the plan to register people over age 21 to vote with free beer?

- It's a good idea to encourage the democratic process.
- This is a disgrace because it encourages the consumption of alcohol.
- This is a cheap ploy to get votes.
- This is my type of political party!
- How many times can I register?

"It's just a fun way to get young people interested in voting," Clifford said.

The festival is a great place to promote voting because of the captive audience, said Christopher Burns, co-founder of the Rochester Young Professionals.

"Young people like to drink and politics is not something they usually think about," said Burns, 29.

"I hope people won't be inebriated when they vote, but it seems like a fun way to get people involved in the voting process."

Participants will vote between High Falls' two new beers, Dundee's Amber Lager and Pale Ale, both to be introduced this fall. Hubbard said the event is a good marketing opportunity for the local company and a way to help a good cause. About 20,000 people, largely those in their 20s, attend each East End festival.

Clifford said she and Hubbard developed the idea, a nonpartisan affair, because locally and nationally it's difficult to get young people to vote.

Statistics show that the 18-to-24 age group has the lowest percentage of registered voters and number of people who come to the polls.

Since 1972, the young voter participation rate has declined by about 13 percent overall — the largest drop of any age group, according to the National Association of Secretaries of State. In Monroe County, less than 8 percent of registered voters are ages 18 to 24, also the lowest of any age group.

Jennifer Kunselman, 27, of Rochester said festival attendees could benefit from being able to register to vote there. Yet she said having the option at a Red Wings game would be even better.

"I think it's important to target a younger audience," Kunselman said. "But there is a whole other population that won't be frequenting the festival."

David Mammano, president of the local chapter of the Young Entrepreneurs Organization, said the idea is good because it promotes voting, but he doubts it will help. He said people will vote if they want to, not because of free beers.

"Maybe they will have better luck if they have beer on Election Day."

Defendant in voting scandal to tell side

August 20, 2005

Marc B. Geller

The Monitor

McALLEN — One of the people at the center of a purported votes-for-money scheme in the McAllen city elections expects to testify before the grand jury next week.

"I contacted (assistant criminal district attorney) Paul Tarlow and I said that I wanted to go before the grand jury; I wanted to tell them my side of the story," said Jose "Joey" Lopez, 22, of McAllen, on Friday. "I don't know if anybody is going to hear me, but I'm going to be able to go over there and tell them what truly happened."

The grand jury is investigating allegations that politiqueras, or paid political operatives, violated laws governing early voting via mail.

Hidalgo County District Attorney Rene Guerra also has said grand jurors would be reviewing surveillance recordings in which Lopez is heard offering Othal Brand Jr. 400 mail-in ballots in exchange for \$4,000. Brand is the son of former mayor Othal Brand Sr., and manager of the elder Brand's recent mayoral campaign.

Brand Jr. has said he called the FBI immediately after his first meeting with Lopez and was referred to the Texas Rangers. Sgt. Israel Pacheco, a Texas Ranger who conducted his own investigation, has said that he directed Brand to make the recordings.

Grand jurors are likely to hear a much different account of what happened from Lopez than the account they heard from Brand Jr. in earlier testimony.

Lopez acknowledges that he accepted money from Brand Jr., but maintains that he never had access to any ballots and denies he had any intention of actually delivering any. Lopez also asserts that Brand Sr. initiated the negotiations for the mail-in ballots and that Brand Jr. contacted law enforcement only after Lopez failed to deliver them.

"This guy wanted to get his dad elected by all means necessary, including getting a kid like me to try to get him votes," Lopez said. "I couldn't do it for him, so I kept on making excuses, and he kept on giving me money."

Brand Jr. disputes Lopez's account and doesn't think the grand jury will buy it.

"I've got nothing to hide," the younger Brand said. "I have no worries about anything that he would want to say to them."

Brand Jr. declined to discuss his own testimony before the grand jury, citing instructions from the District Attorney's Office.

State law prohibits disclosure of the proceedings of a grand jury.

"I cannot tell you who is or who is not going to testify before the grand jury," Tarlow, the assistant criminal DA, said. "What goes on in the grand jury room is secret, as a matter of law."

Guerra, the DA, said Wednesday that the grand jury continues to investigate the McAllen election scandal and could issue indictments as early as next week.

017018

Brand Jr. said he was optimistic the outcome will help bring integrity to future elections in the Rio Grande Valley.

"I'm just hoping that the grand jury has some impact on cleaning up the voting system," he said. "I certainly hope that will have some impact in deterring anybody attempting to do any voter fraud of any type in any election."

His optimism is guarded, however, in the event the grand jury indicts voters but not politiqueras.

"It will not deter politiqueras at all," he said. "If they think they're going to curb the activity by going after voters in the 75- to 100-year range, that's not going to accomplish anything."

Earlier this week, the grand jury investigating the McAllen elections indicted two women for voting twice in the San Juan city election. Maria Louisa Rodriguez and her daughter of the same name were charged with illegal voting, a third-degree felony that carries a two- to 10-year prison sentence and a maximum \$10,000 fine.

The politiqueras who brought the mother and daughter to vote for a second time on Election Day were identified in an internal city memorandum, but Guerra said neither of the women — Cindy Rodriguez, wife of City Commissioner Bobby Rodriguez, and Vicki Loreda, wife of ex-mayor Robert Loreda — would face charges.

Lopez, for his part, said he's prepared to face the consequences of accepting more than \$1,000 from Brand Jr. and breaching their verbal agreement, but added that he plans to fight any charges that he violated election laws.

"I feel like I'm part victim," he said. "It's like I'm being accused of something that I didn't do. I should have never gotten into it or even messed around with it, but I felt that I needed the cash. ..."

"I just want to make sure that they get my side of the story and they get what I feel is the true side of the story."

DA INVESTIGATES ALLEGED BRIBES FOR EARLY VOTES

TX

STAFF & WIRE REPORTS

September 09, 2003

LONGVIEW - Gregg County District Attorney William Jennings is investigating a Gregg County-area employer who allegedly gave a handful of \$10 Neal McCoy concert tickets to workers who cast early ballots in the constitutional amendments election.

Jennings said he is choosing not to identify the employer yet.

He said he began his investigation Friday afternoon after he was contacted by the county elections administrator who had received phone calls from media.

"An employer in Gregg County had given concert tickets in exchange for people voting," he said. "I've got no indication that there was an exchange of a ticket to vote a certain way. Obviously, there would be no way an employer would know how that person voted under our system."

He said that a half a dozen to two dozen people received tickets to the concert, performed last week.

"The concern is not with the voter. It is whether the employer went too far in encouraging the employee to vote," Jennings said.

The most serious allegation possible in this incident is a state bribery law, that, if violated, is a second-degree felony, punishable by two to 20 years in prison, Jennings said.

"I'm not sure that's the offense that's been committed just yet," he said. "I'll get the facts and apply the facts to the law and see where we go from there."

There may be other election code issues he will also look at, not quite as serious as the state bribery law, he said.

The high-profile amendment on the ballot is Proposition 12, which would ratify limits on non-economic damages in medical malpractice lawsuits and clear the way for future Legislatures to set similar caps in other civil suits as well.

There are 22 proposed amendments on Saturday's election ballot. Early voting ended Tuesday.

Doctors, hospitals and other health care providers are waging a strong campaign for Prop. 12, while plaintiffs' lawyers and some consumer groups are fighting it.

The proposal has attracted a larger-than-normal early voting turnout in Gregg County for a constitutional amendments election, the county's elections administrator, Hattie Owen, told the Houston Chronicle in Tuesday's editions.

Meanwhile, Kathy Allbright, a paralegal at a Longview law firm, said she was puzzled when on the

017020

second day of early voting she went to cast her ballot at the Gregg County courthouse and was asked by an elections official if she were "legal or medical."

"She (the elections official) said the medical people were asking for receipts showing that they had voted because they were getting bonuses," Allbright said.

But Owen said rumors that health-care providers had offered their employees bonuses for voting were unsubstantiated.

Jennings also said in his investigation he had not found any of these other rumors to be substantiated.

Lawyer admits voting twice in four elections

A Kansas City, Kan., lawyer admitted today to illegally voting in both Kansas and Missouri.

James D. Scherzer, 68, pleaded guilty in federal court in Kansas City to four counts. He cast double votes in two elections in 2000 and two elections in 2002. He will be sentenced later to a maximum on each count of one year in prison, one year of probation and a fine of up to \$100,000.

Scherzer was charged after an investigation by *The Kansas City Star* found thousands of double-registered voters in the area and several hundred cases of possible double voting. Scherzer declined comment Monday.

Previously, he told a reporter that he acted on his own with no particular motive.

"I don't have some rationale, or a highfalutin story," he said.

No sentencing date has been set.

Man Pleads Guilty To Voting In Kansas, Missouri

Mon Mar 28, 3:41 PM ET

A Kansas man pleaded guilty in federal court Monday to voting in federal elections in both Kansas and Missouri.

James D. Scherzer, 68, of Kansas City, Kan., pleaded guilty to a federal charge accusing him of four counts of voting fraud, which is a misdemeanor civil rights violation. The information, which was filed on Dec. 13, 2004, replaces a criminal complaint filed against Scherzer on Oct. 21, 2004.

- [Unclaimed Property? Show Me The Money](#)
- [Get A Great Deal On Your Next Car](#)

Federal investigators said that Scherzer voted twice, in both Wyandotte County, Kan., and Kansas City, Mo., in the primary and general elections in 2000 and in the primary and general elections in 2002. As a resident of Kansas, Scherzer was not qualified to vote in Missouri.

"We take vote fraud seriously because it diminishes the value of legitimate votes cast by qualified voters. The Equal Protection Clause of the Fourteenth Amendment guarantees qualified voters the right to have their votes counted without being diluted by spurious ballots cast by unqualified voters," U.S. Attorney Todd P. Graves said a news release.

Scherzer could face a maximum of one year in jail and a \$100,000 fine.

Recounts serious matter

BY RICK THURMOND / SUN CHRONICLE STAFF

Eleanor Ruest, a longtime North Attleboro election commissioner, is not amused.

For days on end, jokes and gibes have been directed at Florida election officials who, for just as long, have been squinting through pinpricks in stacks of punch card ballots, trying to divine each voter's intent in the closest presidential election in more than a century. "What else would you expect to see," Ruest huffed. "Anyone who thinks that's funny obviously has never been through a recount."

MJS

While the eyes of a nation look south to Florida and what seems an electoral train wreck, Ruest and others who have been through recounts say what's going on now in Florida has happened here, and can happen almost anywhere a voter walks up to a ballot box.

Messy litigation in a high-profile election? Massachusetts has been there, done that.

Four years ago, after a recount, it came down to the courts to decide who would be the Democratic nominee to represent Massachusetts' 10th Congressional District. That Democrat still holds the seat.

Voter fraud?

While election officials say outright fraud is so rare these days it's inconsequential, an Attleboro man came forward after the April 1996 primary to say he voted three times -- in North Attleboro -- just to prove it could be done.

Cliffhangers?

An Attleboro city council race in 1985 hung by a single chad, those pesky bits of paper that can dangle from a ballot when a vote is cast. After a recount, the victor suddenly was the loser -- again, by a single chad hanging from one of those punch card ballots.

017025

"No election is perfect. They can't be," Ruest said. "You've got humans and you've got machines. Both make mistakes."

Part of the system

Like it not, mistakes are part of the system. Mistakes usually don't matter, the reasoning goes, because they are random and are spread across the ballot.

"This goes on all over the country," said Rebecca Mercuri, a visiting professor of computer science at Bryn Mawr College in Pennsylvania and a frequent expert witness on computer security and voting systems.

"Voting anomalies happen all over the country, in most states," she said. "Most voting systems have an error rate of between 2 and 5 percent. Most election officials will admit to that."

The problem in Florida, and with this presidential election in general, is the margin of victory seems to be far less than the accepted margin of error.

"Flaws don't matter if the vote is 60-40," said Victor DeSantis, a political science professor at Bridgewater State College. "Those flaws show up when the vote is 50-50."

In Florida, much of the blame has been leveled at the now-infamous punch card ballot, a voting system that has been outlawed in Massachusetts since September 1998.

Massachusetts Secretary of State William Galvin threw out that type of ballot because of the havoc it caused in the 1996 Democratic primary for Massachusetts' 10th congressional seat.

The primary night count gave Philip Johnston a 266-vote lead over William Delahunt out of more than 35,000 votes cast. A subsequent recount whittled Johnston's lead to 181 votes, but still he prevailed.

Delahunt, dissatisfied with the outcome of the recount, took the matter to Superior Court where Judge Elizabeth Donovan re-examined the ballots by hand.

In question were almost 1,000 punch cards that had been blanked by voting machines and tossed out, mostly at polls in Weymouth, Abington and Orleans.

The judge determined in many cases that electronic scanners read ballots as blank only because they had not been punched

017026

cleanly through. She gave the election to Delahunt by 108 votes.

Johnston was campaigning with First Lady Hillary Clinton at a Democratic unity rally when that thunderbolt struck. He promptly filed an appeal with the Supreme Judicial Court, arguing that if ballots were left blank or were only slightly indented, it was because voters hadn't made up their minds.

But that would have meant, in Weymouth alone, almost 23 percent of voters had intentionally cast blanks and, Delahunt argued, they turned out on a stormy night to do it.

The Supreme Judicial Court affirmed Judge Donovan's ruling.

Galvin said he knew of nothing like that happening before in voting for such a high state office, and ordered state monitors to the polls for the Nov. 5 presidential election in cities and towns that used the punch card ballot.

The problem with punch cards is that votes aren't always cleanly punched through, and when they are, chad can then shift around, jamming other holes so that those votes are misread.

Attleboro area election officials had long been aware of the pitfalls of punch card ballots, and for the most part had junked them before the statewide ban was imposed.

"You could run the ballots through three times and get three different results because those chad would fall off," said North Attleboro Elections Chairwoman Diane Szpila.

North Attleboro discarded punch cards after an acrimonious election to build a new middle school in January 1995. A recount was held when the new school was approved by a 158-vote margin out of 5,290 votes cast. The school lost eight votes in the recount, but overall the project prevailed.

"A lot of the chad were still hanging on when we did the recount," Szpila said.

Ruest, who was elections chairwoman at that time, called that election, "the straw that broke the camel's back."

"Hardly any of them went through the first time," she said.

Election officials are told to keep punch card ballots away from moisture, lest they become even more difficult to punch through. So where were those ballots stored for years in

Attleboro? On the basement floor of city hall, said Jessie Joubert, who worked for more than two decades in the city elections office.

Problems can also occur when the ballots are misaligned.

"We found a lot of ballots where the punches weren't where they should have been," Joubert said. "There was nothing we could do. The machine automatically canceled them out. We had a lot of those, I'll tell you."

In 1985, Tony Viveiros beat incumbent Thomas Dudson by one vote in the initial count for the Ward 2 city council seat. He lost by one vote in a recount.

"It was just like what you're seeing on TV now in Florida," he said. "Election people looking up at a ballot, trying to figure out what was the voter's intent. If there was a hanging chad, it had to be more than half-way through."

"I broke into tears when it was all over," Viveiros said.

And what of punch card ballots?

"I hate 'em with a passion," he said.

Bill Crowley, an Attleboro election commissioner, is more blunt. "They're a bitch," he said.

"We would have disagreements every election because the count was off all the time," Crowley said. "If we had 1,000 ballots, maybe the count would come out 995. On occasion, we'd run them through two or three times until the count came close to what it was supposed to be.

"That's sad, but that's the way it worked," he said. "Those machines just weren't 100 percent."

Punch card ballots are still widely used across the United States, despite their drawbacks, experts say.

In Massachusetts, four types of voting systems are used.

By far the most common is an optical scanning system which reads marks a voter makes on a ballot. It's in use throughout the Attleboro area and in 908 precincts in 147 cities and towns.

Old-style lever machines, which aren't manufactured anymore, are used in 434 precincts in 23 communities.

Paper ballots are still used in 79 towns.

Four communities, Dighton, Franklin, Lawrence and Milton, still use a variation of the punch card ballot, although unlike in Florida, the names of candidates are printed on the card.

But even those systems can stumble.

"In any system, people can make mistakes," said Brian McNiff, spokesman for the secretary of state's office. "They can make mistakes with an opti-scan."

"I'm not sure the secretary would ever get into the acceptance rate of errors," he added.

Crowley said optical scanners are far better than the old punch card system, although "they're still subject to error."

"We have people who still try to punch holes through the ballot, or make an X or they circle the little oval they're supposed to fill in," he said.

And, sometimes optical scanners misread marks even when the marks are penciled in correctly.

"Readers, anything that scans things optically, have an error rate," Mercuri said.

"Even the SAT people will admit to an error rate," she said, referring to college entrance tests which for years have relied on optical scanners.

With the electoral mess in Florida flickering on television sets 24 hours a day, there have been rumblings in Congress to devise some kind of unified voting system.

It'll never happen, said Bruce Schulman, a history professor at Boston University.

"It's one of those things like the Electoral College," he said. "Legislation will be filed to reform it, but it won't get very far.

"Technologically, it's possible and it should be done," Schulman said. "But it won't be done for two reasons. First, it's too expensive. That's why so many cities are still using this ancient stuff. Then, there's the political side. Laws and established tradition say that states and local governments administer elections."

A statewide unified voting system hasn't even been discussed

in Massachusetts, McNiff said.

A unified system is, so far, unworkable and unnecessary, Mercuri said.

"As long as you have a system that allows a manual recount, then you have the possibility of a recount," she said. "That's what most municipalities do.

"As long as you're willing to accept that, then every vote does count.

"Even a punch card you can hold in your hand; you can see the chad," she said. "You don't get that with an Internet system or a computer system where you touch the screen. There's no audit trail."

Besides, Mercuri said, "As a programmer, I could write an interface that would send 10 percent of Gore's vote to Buchanan. Even some high school students could do that."

And what of voter fraud?

So far, there have been no substantial charges of outright fraud in this election, although some college students in Wisconsin have admitted to casting multiple votes as a prank.

Those reports brought memories flooding back to Edmund Morrison, a South Attleboro man who said he cast three votes in North Attleboro during an April 1996 primary, just to prove it could be done.

Morrison said he did so because he had overheard a group of women in a North Attleboro restaurant talking about how they had voted more than once in the middle school election a year earlier.

Morrison had just moved from North Attleboro at that time, and still was listed on the town's voter registration rolls. He said he cast one vote as himself then used the names of two friends to cast opposing votes that canceled each other out.

"I didn't do any malice," he said. "I just wanted to show how easy it was to do, and that voters should be required to show some form of identification."

That little act could have cost Morrison a \$10,000 fine and up to five years in prison, but the court declined to prosecute because, other than his own word, there was no proof he had committed fraud.

To this day, Morrison is unapologetic.

“Those college kids proved, again, how easy it is,” he said.
“I think it smells to high heaven.”

And North Attleboro election officials are still unsure
Morrison really did what he said he did.

“I think it was wishful thinking on his part,” Ruest said. “He
was all too anxious to call the Boston Globe.

“I looked over the voting list a long time, but I couldn't find
anything.”

Dems blast GOP efforts on voter fraud

By Jim Drinkard, USA TODAY

Mixed

WASHINGTON — Efforts by the Justice Department and the Republican Party to guard against voter fraud have ignited a long-smoldering dispute that could have an impact on close national elections less than two weeks away.

The Republican Party has compiled a national database of 3,273 names of people who it says apparently voted more than once in the 2000 elections. It is turning the list over to local authorities for investigation and possible prosecution.

But early looks at the data by state officials have found little evidence of multiple voting.

At the same time, the Justice Department is mounting what it calls an unprecedented effort to police voter discrimination at polling places and prosecute voting fraud. Attorney General John Ashcroft held a daylong "Voting Integrity Symposium" this month to train more than 300 representatives of FBI and U.S. attorney's offices across the nation "to prevent election offenses and to bring violators to justice."

Some Democrats accuse the GOP of aiming to intimidate voters — particularly minorities and new immigrants, who they believe lean Democratic.

"The last thing we need are partisan efforts that could make it harder for law-abiding citizens to vote on Election Day," said Sen. Chris Dodd, D-Conn., chairman of the committee that oversees elections.

The stakes are immense. Majorities in the House and Senate hang on a handful of races scattered across the country. Both parties say the outcome will hinge on which side does the best job getting its supporters to the polls.

The skirmish is emblematic of longstanding tension between the Republicans and Democrats. It was evident most recently in the struggle over legislation in Congress to fix the election process after ballot problems in 2000. That legislation was stalled for months while Democrats and Republicans argued over whether to include anti-fraud provisions, including identification requirements for new voters, that had been sought by Republicans.

Connecticut, the first state to check the GOP's multiple-voting data, found it "highly flawed."

Officials said that at least 51 of 54 names listed as voting both in Connecticut and elsewhere were erroneous.

Secretary of State Susan Bysiewicz, a Democrat, called the list "a deliberate attempt to distract election officials across the country from their responsibility to encourage voter participation."

In North Carolina, officials found that the first name on the double-voting list was that of state Rep. Martha Alexander, a Democrat who chairs the General Assembly's panel on election laws. "It's got to be two people with the same name and birth date," said Gary Bartlett, director of the state Board of Elections.

Shad Balch, a spokesman for California Secretary of State Bill Jones, a Republican, said, "It looks like we're going to be able to refute their claims."

- Voting more than once

017032

Party spokesman Kevin Sheridan said the project was carefully done using publicly available voting records and other material.

"The intent was to provide it to authorities interested in our research ... and to take any action they deem necessary to clean up the process or to bring legal action against people involved," he said. Although the GOP knows in some cases the political affiliation of the voters on its list, "we're not making that available," he said.

Regarding the Justice Department's anti-fraud effort, Wade Henderson of the Leadership Conference on Civil Rights called it "a solution in search of a problem" and "a warmed-over plan for voter intimidation."

There is concern among civil rights advocates that Justice's investigation of alleged fraudulent voter registrations in South Dakota on and near Indian reservations is scaring off potential voters.

Ashcroft spokesman Mark Corallo dismissed the concerns: "The only people intimidated are the people who were going to cast fraudulent ballots, and that's the point here." Even so, the issue has flared in other places, as well:

- Party officials in Arkansas are trading charges of fraud and voter intimidation. Republicans say Democrats have generated bogus voter registrations; Democrats say Republicans have tried to photograph and intimidate minority voters waiting in line to cast early ballots in Pine Bluff.
- The Texas GOP on Oct. 10 announced a "ballot integrity" program to guard against voter fraud by "our less ethical opponents." The effort, detailed on the state party's Web site, calls for recruiting poll watchers who will look for irregularities on Election Day.

Bysiewicz defends state voting rolls

Lolita C. Baldor, Register Washington Bureau October 22, 2002

WASHINGTON — Recent suggestions that up to 54 Connecticut voters may have cast ballots in two different states in 2002 are not true, Secretary of the State Susan Bysiewicz said Monday after a weeklong investigation.

Bysiewicz said the data provided by the Republican National Committee was "highly flawed" since more than half of the people named never even voted in Connecticut in 2000.

"It appears that the RNC has made allegations that were completely unfounded," she said. "And I hope this was not an attempt to distract voting officials or discourage voters from participating on Election Day."

Of the 54 voters listed by the RNC as possibly voting in two states, 15 voted only in Connecticut; 29 voted only in a state other than Connecticut; three were only registered in Connecticut and four names were discounted because they had different dates of birth.

Ultimately, she said, the names of three voters have been referred to the FBI and U.S. Attorney because Bysiewicz has been unable to get the necessary voting information from the other state.

RNC spokesman Dan Ronayne made it clear when the initial documents were released Oct. 8 that Republican officials were not charging anyone with wrongdoing or election fraud. Instead, he said the RNC had analyzed its voter lists, compared records, found the discrepancies and released them to state authorities to point out possible problems.

"To say this was an attempt to take time away from the election is patent nonsense," he said, adding that RNC officials were

"very disciplined" in their research.

Bysiewicz acknowledged that state officials found that some of the problems were caused by errors by local voting officials who entered the wrong names into the computer.

When voters cast their ballots on Election Day, the poll workers check off their names on large sheets.

That information is later transferred into the computer - which is where some of the errors occurred, Bysiewicz said.

She added that the problems with the 51 voters already cleared lead her to believe that the three names still being investigated also may simply be a case of human error.

Ronayne said Bysiewicz should examine and correct the problems, "instead of engaging in partisan accusations - after all, we all share the same goal: clean and fair elections."

"Our only motivation is to promote clean and fair elections, and the Secretary of the State has apparently found problems in the record-keeping in Connecticut as a result of an investigation brought on by our research," he said.

The RNC also turned over the names of about 7,700 voters who may be registered in Connecticut and one other state. Bysiewicz said she has referred those names to local voting officials in the various towns.

The officials have until the end of the year to research the voters and determine if the records are correct.

Despite Crackdown, Some Double Voting

Worst Problems Cited Involve D.C., Md.

DC / MD / VA

By Dan Keating
Washington Post Staff Writer
Thursday, October 31, 2002; Page B08

Double voting in the District and Maryland has persisted despite a 1998 effort to crack down on the practice, according to election records, and local officials say that an election reform law signed this week by President Bush will not fully address the problem.

Records indicate that two dozen voters cast ballots in both the District and Maryland in the Sept. 10 primary and that 90 voters did so in the November 2000 election. Double voting in the District and Virginia appears to be far less common -- the records show only six people voting in both the District and Northern Virginia in November 2000.

A provision in the new federal law requires states to create centralized, computerized voter rolls to prevent multiple voting by people registered in more than one place. The District and Maryland already have such records, however. The problem is that different jurisdictions seldom compare registration lists or voting records to spot duplicate names, Washington area elections officials said.

The last time such a review was done was in 1998, when D.C. elections officials looked at voting records and gave the U.S. attorney's office the names of 261 people who appeared to have double-voted in the District and Prince George's County during the previous three years.

But that investigation did not lead to any prosecutions, said Channing Phillips, a spokesman for the U.S. attorney in the District. Phillips said yesterday that officials could not find the paperwork explaining why no one was prosecuted, and Alice P. Miller, executive director of the D.C. Board of Elections and Ethics, said her office could not locate those records either.

Miller said the District has not made a more recent attempt to find double-voters, in part because the city's drive to obtain and install new voting equipment was a higher priority.

A review by The Washington Post found that more than 10,000 people are registered to vote in both the District and either Prince George's or Montgomery counties. The Post found people listed as having cast ballots in the District and Maryland on the same day by studying voter histories that were based on signatures collected when voters checked in at the polls.

When contacted by a reporter, the voters said that they had cast a ballot only once and that the records must be wrong.

"That must be a mistake," said Denise Daniels, 33, listed as voting in both Prince George's and the District in 2000 and 2002. "I'm going. I have to go. I don't know what this is about."

Harold Bobbitt Jr. also is listed as a double-voter.

"I moved to College Park," he said. "I'm no longer a District voter. I started voting in College Park in 2000, but I didn't vote in D.C. That might be a mistake in the D.C. computer."

Bobbitt noted that he has the same name as his father, Harold Nathaniel Bobbitt Sr. The voting records,

017030

however, indicate that ballots were cast in the District and Maryland in 2000 and 2002 by Harold Nathaniel Bobbitt Jr., age 46. And Bobbitt and his father are listed as having voted in last month's D.C. primary.

The most prolific repeat voter, according to the records, is Betty J. Johns, 69, listed as casting ballots in both Maryland and the District in the 1996 and 2000 presidential elections, as well as in the Democratic primaries in the District and Prince George's on Sept. 10. A woman who answered the phone at her residence said no one there would talk to a reporter.

Larry Poteat Jr., 22, moved to Prince George's County this year from the District but was listed as voting in both places in September. His father, Larry Poteat Sr., said that he voted in the primary in the District, yet there is no record of the father's vote.

"If they don't have me down as voting, something's crazy," the father said. "They gave both of the votes to [my son], in Prince George's and D.C."

Election officials said it is possible for precinct workers to make mistakes when recording who voted. Such errors also would be a serious problem, voting reform activists say, because they could make it impossible to compare the number of ballots counted with the number of people listed as voting. Matching those two figures is a first step in making sure that ballots were not discarded and that phony ballots were not counted.

In the District, vote fraud is a felony punishable by five years in prison or a \$10,000 fine. In Maryland, the punishment is a fine of up to \$2,500 and up to five years in prison.

When registering to vote, people are asked on a form where they were previously registered, but some don't fill it out. The form is then sent directly to the previous jurisdiction if it is in the same state. But if it is not in the same state, the form goes to the capital of the state where they used to live, which slows down the process, election officials said.

Officials said the best way to weed out such names is to compare lists of all registered voters, which the District initiated in 1998. Election supervisors in Prince George's and Montgomery said it would be up to the state to launch such an effort.

Reform advocates said cleansing registration lists of old names and maintaining accurate voting records are crucial steps in ensuring clean elections.

"It doesn't matter what kind of voting equipment you have if you have dirty voter rolls and you don't have the people to keep them clean," said Deborah Phillips of Arlington, former head of the Voting Integrity Project.

No fraud found in Duval vote

FBI probe finds no double ballots cast THE ASSOCIATED PRESS

JACKSONVILLE - Investigators found no evidence that anyone cast more than one ballot in the November election in Duval County, although an investigation into fraud allegations from early voting in the county continues.

County Elections Supervisor Jerry Holland said the FBI investigation didn't turn up any evidence that voters cast more than one ballot in the county either on Nov. 2 or in absentee voting.

Officials said in January that a review of voting records uncovered more than 50 cases in which it seemed the same person had cast an absentee ballot and voted on Election Day or otherwise voted twice in some way, such as voting in two places, leading U.S. Attorney Paul Perez to launch a federal investigation.

But Holland said each apparent case of double voting was attributed to a clerical error, such as someone signing the voter rolls at one polling place before being told they had to go to another location to vote. One case involved a father and son with the same name who signed in the wrong place.

About 380,000 people voted in the November election in Duval County, so the votes in question represented less than one-50th of 1 percent.

"These results show voters that they can have confidence in the elections office," Holland said.

Double voting is punishable by up to five years in prison and a \$10,000 fine.

The FBI will continue to look into some allegations of potential voter fraud that stemmed from early voting in the county, Holland said.

"These results show voters that they can have confidence in the elections office."

FL

Florida has more double voters than any other state

By Sam Trantum
Staff Writer

More than 361,100 people were registered to vote in multiple states during the 2000 elections, and 1,636 of those apparently cast more than one ballot, according to the Republican National Committee.

Florida was the worst offender in both categories, with 67,065 duplicate registrants and 307 double-voters, according to the committee's report.

While the Republicans insist they released the report in an attempt to help state officials run clean elections, Democrats say it is a partisan ploy – part of the GOP's national strategy for Nov. 5.

Florida elections officials say have not looked into the Republicans' claims but at least two other states have investigated.

Connecticut Secretary of State Susan Bysiewicz, a Democrat, said her office found that 53 of 54 supposed Connecticut double-voters -- including six who allegedly had cast ballots in both Connecticut and Florida -- had not cast ballots in more than one state. The office did not investigate the claims of duplicate registration.

"We have highly flawed data and not one shred of evidence to support the very serious allegation of double-voting," Bysiewicz said.

She said her office had been unable to get the information it needed to figure out whether the 54th person on the list had voted in Virginia as well as Connecticut, so it referred the case to the FBI.

"Of course she's going to say that there's no cases of this happening," RNC spokesman Kevin Sheridan said. "The secretary of state is in an election fight, and she's defending her own record."

New York City elections officials also are investigating the Republicans' claims of voting fraud. There has been no resolution of the issue so far, spokeswoman Naomi Bernstein said.

Registering in more than one place is easy to do and isn't illegal if it isn't intentional.

"I think it's something that people do once. They move someplace and do it again," National League of Women Voters spokeswoman Kelly Ceballos said. "They might not be aware of it."

The problem is there's no good way to make sure someone doesn't vote in more than one state.

There's no official national voter database, and in many states there isn't even a statewide voter database. The RNC pieced together its national database by buying voter lists state by state, county by county.

Voting twice in the same election wouldn't be too hard, either. A voter could cast an absentee ballot in one state and vote in person in another, for example. Such double-voting

has long been rumored to be practiced by part-time residents of Florida.

"I'm sure that a lot of people that winter down here are registered down here just like they are up north," Boynton Beach resident Dan Winters said.

Casting multiple votes in one election is a felony, elections officials say.

By releasing the report on double-voting, the RNC was just trying to help ensure clean elections, Sheridan said.

"We tried to do nothing but be helpful to the authorities," Sheridan said.

But Bysiewicz said she did not think the RNC's intentions are so innocent.

"I believe this is a deliberate attempt to distract election officials across the country from their responsibility to encourage voter participation and administer fair elections," she said.

Republicans shouldn't spend so much time trying to keep people who shouldn't be voting from casting ballots, said Kevin Jefferson, president of the Democratic National Committee's Voting Rights Institute.

"What they should be doing is making sure that people are going to the polls, that they have the right to cast the ballot and have that ballot counted across Florida," Jefferson said.

Voter names found twice

By Keith Ervin and Justin Mayo
Seattle Times staff reporters

Just one month before voters decide the future of King County's Democratic executive, Ron Sims, Republican Party leaders yesterday accused his administration of failing to remove thousands of duplicate registrations from the voter rolls.

GOP officials and Republican members of the Metropolitan King County Council said they officially will challenge the registrations of about 2,050 voters Monday.

In all, they said they found nearly 3,400 voters they suspect are registered twice with the county's Elections Office. They say they are challenging only those they can fully document.

Duplicate registrations can occur when voters re-register with new addresses or name changes if their old registrations aren't deleted from the voter database. The duplications alleged by the Republicans represent less than half a percent of King County's more than 1 million registered voters.

If duplicate registrations are not purged from the rolls, those voters could cast more than one ballot in an election, which is illegal. Republicans yesterday released the names of 16 voters they say voted twice in the contested 2004 governor's race.

Illegal votes, accounting errors and mishandled ballots in King County played a prominent role in Republican Dino Rossi's lawsuit challenging the election of Democrat Christine Gregoire as governor last year. Chelan County Superior Court Judge John Bridges ruled in June that he did not find a basis for overturning the election.

Election officials and Sims quickly said yesterday that at least one name on the GOP's duplicate-voters list appeared to be a mistake — and they questioned the Republicans' motives in making a media splash.

Elections Office spokeswoman Bobbie Egan said a woman singled out by the Republican Party as having voted twice in the 2004 general election and again in the 2005 primary actually appears to be two women with the same name but different birthdates.

At least two other names on the list of suspected double voters have been referred to the county Prosecutor's Office, and criminal charges have been filed against one person.

Elections Director Dean Logan said the Republicans seemed more interested in scoring partisan political points than in solving problems.

But Republican County Councilman David Irons, who is running against Sims for county executive, said his party's analysis of the voting list shows that Sims and Logan aren't doing their jobs.

017041

Irons has repeatedly called for Logan's dismissal and has proposed a county charter amendment that would put elections in the hands of an elected auditor.

"It's a sad day that we're here again talking about election flaws from this election and past elections," Irons said. "Dean Logan, why didn't you do the data search that, quite frankly, any high-school computer student could do?"

Logan took the unusual step of meeting with reporters before the Republican news conference to defend his record and attack his critics. About 40 election workers attended the meeting to show support for their boss.

"This has gone beyond interest in the elections and election integrity. In essence, this is a witch hunt trying to make this a top-tier campaign issue," Logan said later.

Logan said his office, as part of routine list maintenance, has purged the voter list of 9,100 voters' duplicate registrations and has dropped the names of 8,900 dead voters this year.

He said County Councilwoman Kathy Lambert, R-Woodinville, asked him several weeks ago to look at a Republican Party list of apparent duplicate voters and he agreed to do so. But instead of bringing him the list so he could check those registrations, Logan said, he learned yesterday morning the Republicans were preparing to release their findings directly to news media.

When Logan reminded her of that conversation yesterday, Lambert said, she told him that Republicans would give Logan their list and any future lists so errors in the voter rolls could be corrected.

The voter challenges being prepared by the Republicans will address two categories of suspected double registrations: voters who have exact matches of birthdate, address, and first, middle and last names; and women with matching first names, addresses and birthdates. The second group, numbering 3,702, are believed to have changed their last names because of marriage or divorce.

The Republicans are not at this time challenging 2,650 registrations of voters who they believe moved to new addresses but whose previous registrations were not purged. They will continue to investigate those voters, said party vice chairwoman Lori Sotelo.

Election 2005

Woman allegedly voted twice in elections

By Keith Ervin

Seattle Times staff reporter

A woman accused by the King County Republican Party of voting twice in the November 2004 election and again in last month's primary is under a criminal investigation for double voting, a county election official said yesterday.

The Elections Section referred the case to the county prosecutor's office Aug. 31 to investigate whether she voted twice in 2004, election spokeswoman Bobbie Egan said.

The woman, who lives in a downtown Seattle apartment building, has not been charged with a crime. The Seattle Times does not generally name suspects until they are charged.

She was on a list of 16 voters identified by the Republican Party as having voted twice in the 2004 election. The Seattle woman was the only person on the list accused of voting twice in each of two recent elections.

Egan said Wednesday the woman's name appeared twice in the voter-registration database with two different dates of birth, so it seemed there might be two voters with the same name.

Egan didn't realize on Wednesday that the woman's name had been forwarded to prosecutors, she said yesterday. She said she didn't know how election officials learned she might have cast extra ballots.

The woman apparently has had two registrations since 2004, but routine computer checks for duplicate registrations didn't bring up her name because she was registered under two different birth dates, Egan said.

Republican leaders said Wednesday they had found more than 3,000 voters who appear to be registered more than once, allowing the possibility of double voting. Their investigation of voter records is continuing.

6 accused of casting multiple votes

By Keith Ervin

Seattle Times staff reporter

Criminal charges have been filed against six more King County voters for allegedly casting more than one ballot under a variety of circumstances in last November's election, prosecutors said yesterday.

Two defendants, William A. Davis of Federal Way and Grace E. Martin of Enumclaw, were accused of casting absentee ballots in the names of their recently deceased spouses, Sonoko Davis and Lawrence Martin, respectively.

A mother and daughter were also charged with casting a ballot in the name of the mother's dead husband. The mother, Harline H.L. Ng, and her daughter, Winnie W.Y. Ng, both of Seattle, signed their names as witnesses to the "X" marked on the ballot of Jacob Ng, who had died in February 2004.

Jared R. Hoadley of Seattle was accused of casting a ballot in the name of Hans Pitzen, who had lived at the same Seattle address as Hoadley and who died last May.

Dustin S. Collings, identified as a homeless Seattle resident, was charged with casting two ballots, both using the alias of Dustin Ocoilain, a name that was listed twice on the voter-registration rolls.

The defendants are charged with repeat voting, a gross misdemeanor that carries possible jail time of up to one year and a fine of up to \$5,000.

Election officials asked prosecutors to investigate the voters after news reporters and a blogger reported that they may have voted twice. The voters will be arraigned July 5 in King County District Court.

Two other voters previously received deferred sentences — and avoided jail time — after they pleaded guilty to charges of repeat voting.

The King County Sheriff's Office is investigating several other cases, prosecutors reported yesterday. The investigations resulted from the intense scrutiny surrounding the governor's election in which Democrat Christine Gregoire defeated Republican Dino Rossi by 129 votes after he narrowly won two earlier vote counts.

After the November election, prosecutors also successfully challenged the voter registrations of 648 felons whose right to vote had not been restored.

Man charged with voting twice says he filled out extra card by mistake

By **GEORGIA PABST**
gpabst@journalsentinel.com

Posted: Sept. 21, 2005

A 25-year-old Milwaukee man charged with voting twice in the Nov. 2 presidential election said Wednesday he filled out two on-site voter registration cards that day by mistake, but only voted once.

Testifying in his own defense, Enrique Sanders said he couldn't remember for whom he voted, though he knew it wasn't President Bush.

After irregularities appeared in Milwaukee's vote, a joint state and federal investigation led to illegal voting charges against more than a dozen people. Sanders is one of the first to go to trial.

"There's no evidence he was paid to vote and he's not even sure who he voted for," his attorney, Brian Mullins, told jurors during closing arguments. He said Sanders has a learning disability and has trouble reading and remembering.

But Assistant U.S. Attorney Richard Frohling asked jurors, if Sanders didn't care about the election, why did he wait in line at the Franklin Pierce School polling place for more than 1 1/2 hours to cast his ballot?

"He wanted to make sure his vote counted and it was important enough to make his vote count twice," he said.

Frohling said Sanders' two registration cards each show different numbers. Election officials testified that a number means a person was issued a ballot.

But Sanders insisted he did not vote twice. He said he went to the poll with his girlfriend, but the line was long so he took her home and returned alone.

Tiffany Harrell testified that she and Sanders got registration cards, and she said she thought Sanders put the card in the visor or door of his car.

Sanders said when he returned, he filled out one registration form in line with the address 1133 W. Highland. But there is no address and he actually had lived at 1133 N. 18th St.

He said when he gets rushed or is in a crowd, he tends to make mistakes. At the desk, he said, he told the poll worker he made a mistake and filled out another card. He said he didn't know what the worker did with the other card and said it might not have been destroyed as it should have been.

But Milwaukee police officers on said voting cards indicated that Sanders had been given two ballots.

Frohling said Sanders originally told police he couldn't explain why there were two registration cards. Milwaukee Police Officer Neil Saxton testified that Sanders' demeanor was different, too: "He spoke more clearly and concisely and didn't act like he didn't understand."

The jury is expected to decide the case today. Sanders faces up to five years in prison and a \$10,000 fine if convicted.

Earlier in the day, Kimberly Prude was convicted by a different federal jury of voting in the election. She was an ineligible felon at the time.

Nothing points to fraud in 9 double voting cases

But U.S. attorney expects other charges in election investigation

By **GREG J. BOROWSKI**
gborowski@journalsentinel.com

Posted: Aug. 22, 2005

Investigators found no evidence of fraud in nine cases of potential double voting cited this month by the state GOP, but U.S. Attorney Steven Biskupic indicated Monday the ongoing investigation will likely lead to more charges.

The state Republican Party used U.S. Postal Service change of address records to track voters from city to city.

At an Aug. 9 news conference, party officials said that they had found nine cases where people were listed as having voted in the November presidential election in Milwaukee while also casting ballots in Chicago, Madison or Minneapolis.

Biskupic said investigators reviewed each case cited and found assorted clerical errors and other inconsistencies, but no fraud.

He is leading the ongoing investigation with Milwaukee County District Attorney E. Michael McCann. They launched the probe after the Journal Sentinel found widespread irregularities in the vote, including thousands more votes tallied in Milwaukee than people recorded as having voted.

Biskupic and McCann have said more than 200 felons illegally voted in the city while still on probation or parole. At least another 100 people voted fraudulently, including voting twice, from non-existent addresses or voting in the name of a dead person.

So far, 10 felons have been charged with voting illegally. Two others have been charged with double voting. In addition to those federal cases, two were charged in Milwaukee County Circuit Court with falsifying voter registration cards. None of the cases has gone to trial.

"There still is no evidence of a widespread conspiracy," Biskupic said. "But there still is plenty of evidence of double voting and the like."

The GOP highlighted its allegations on the same day Republican lawmakers sent to Gov. Jim Doyle a bill that would have required voters to show a photo ID at the polls. Doyle quickly vetoed the bill, as he had done with two previous versions of the measure.

Doyle spokeswoman Melanie Fonder said Monday that the Republicans were grandstanding with their allegations of fraud.

"It's very clear this was just politics and not about real election reform," she said.

Amendment possible

After Doyle's veto, Republican lawmakers said they are now considering working to put a photo ID requirement on the ballot as a proposed constitutional amendment, which would bypass the governor. Such an amendment would require passage in two sessions of the Legislature and then be approved in a statewide vote. Backers say it is needed to help curb fraud and tighten up a system that is among the most open in the nation. Critics say the bill would disenfranchise the elderly and the poor.

Doyle has indicated he would back a requirement that voters show an ID, such as a utility bill, but has balked at the GOP demand that it be a

Election Investigation

photo ID.

At its news conference, the GOP said it had nine cases of apparent double voting but refused to provide details to the media. The party's news conference was held outside a home on Milwaukee's east side.

The Journal Sentinel reviewed voting records at that address and found three people recorded as voting: Stuart and Gayle Schenk and their son, Joseph. The Schenks told the newspaper that Joseph had moved to Chicago to join the Franciscan order of the Roman Catholic Church and did not vote here.

They could not be reached for comment Monday.

Poor recordkeeping

In a letter issued Monday, Biskupic's office outlines what it found in each of the nine cases.

Six of the names were incorrectly included in the city Election Commission's database of Nov. 2 voters because of clerical errors.

For instance, names were not recorded correctly in polling place logbooks. Or the wrong name was recorded when names from the books were later scanned into a computer.

In the other three cases, the letter says, the individuals voted only in Milwaukee. For instance, someone with a similar name but different birth date voted in the other city.

The letter underscores the level of recordkeeping problems in the Election Commission office.

During its investigation, the newspaper found hundreds of cases where people were listed in the database as voting twice, something city officials blamed on a computer glitch. The newspaper also found dozens of cases where the number of voters recorded in logbooks was different from the votes counted in the precinct.

"These raised a flag with us because of everything that has gone on over there," said Rick Wiley, executive director of the state Republican Party. "We're going to continue our investigation into what we consider a mess over there."

Wiley said the party last week sent 10 more names of potential double voters to investigators.

He also said before holding its news conference, the party had sent 49 cases of potential double voting within the city of Milwaukee to investigators. Of those, Wiley said, investigators had indicated 48 of the cases were not cases of fraud, while the other is being looked at as a fraudulent vote.

"The governor continues to blame this on clerical errors," Wiley said. "But the investigation has made it clear. People have been charged with voting fraudulently in this election."

Sue Edman, the new executive director of the city Election Commission, said she is working to clean up the system to cut down on clerical problems.

Charge reduced in voter fraud

WF

College student gets probation for casting 2 ballots

By Dan Wilson
Post-Crescent staff writer

APPLETON — A college student who voted in two cities last spring received probation Monday after a felony charge was reduced to a misdemeanor in a plea agreement.

Outagamie County Circuit Judge Dee Dyer placed Michael R. Howard of Appleton on probation for one year and ordered him to perform 150 hours of community service. Dyer also ordered the record of Howard's conviction expunged after he successfully completes probation.

Howard, 20, 1036 E. Moorpark Ave., was charged with felony voter fraud, but Assistant Dist. Atty. John Daniels told Dyer the facts justified amending the charge to making a false statement on a voter registration form, a misdemeanor.

Howard voted in the nonpartisan election last April by absentee ballot in Appleton and in person in Eau Claire, where he attends college.

"He did not vote twice for the same individuals," said Daniels. "Therefore, the state does not believe at his young age he should be labeled a felon for the rest of his life."

According to Daniels, the elections in both cities were local, and there were no state or national issues on the ballot.

Dyer asked Howard, who has good grades, how he could contemplate voting twice in the same election.

"I became aware of the city council elections and not thinking, I did it," Howard said.

Dan Wilson can be reached at 920-993-1000, ext. 304, or by e-mail at dwilson@postcrescent.com

Ex-Candidate Accused of Voting Twice in Elections

NY

By Karen Freifeld
STAFF WRITER

October 23, 2002

The former Conservative party candidate for lieutenant governor was arraigned yesterday on an indictment charging him with illegal voting.

Daniel Mahony, who was once Tom Golisano's running mate, allegedly voted twice in two general elections. In November 2000 and November 2001, he voted with both an East 14th Street address and an East 55th Street address, according to the Manhattan District Attorney's office. Mahony has denied that charge.

The politician was removed from this year's ballot because he said that, as of Aug. 14, he was no longer a resident of New York State. But prosecutors said a check of records show he is still listed as a tenant at the East 14th Street address.

Additionally, prosecutors in District Attorney Robert Morgenthau's office said their investigation uncovered evidence that Mahony faked a photo that he used as evidence in trying to get a parking fine reduced.

For that, Mahony was charged with a felony count of offering a false instrument for filing. Like the felony illegal voting charge, it is punishable by up to four years in prison.

Mahony, who was led to a Manhattan State Supreme Court courtroom yesterday in handcuffs but released on his own recognizance, pleaded not guilty.

Alan Futerfas, his attorney, later said he thought the charges were "unwarranted," and was disappointed they were brought. He also said he had never before seen a felony charge for a parking ticket.

The attorney said Mahony was an official resident of Connecticut.

County Probes Voter Fraud

May 12, 2005
James Osborne
The Monitor

San Juan mayor's victory upheld

SAN JUAN — Mayor-elect San Juanita Sanchez's three-vote victory stood up in a recount Wednesday, but the city election will undergo further scrutiny when a county investigation into voter fraud begins later this week.

Hidalgo County Elections Administrator Teresa Navarro emerges from behind closed doors Wednesday at Austin Middle School in San Juan after a ballot recount from Saturday's mayoral race.

Hidalgo County Elections Administrator Teresa Navarro said she could go to a grand jury as early as next week, once she reviews election records to determine just how many people voted more than once in the city election.

On Monday two women admitted to having voted twice after being pressured to do so by politiqueras.

"It's under review until next week. From there it could go to the grand jury and then it could be investigated by the District Attorney's office," Navarro said.

"Depending on what we're able to get, if we feel something was orchestrated we proceed with the case ... a lot of the time a voter will say an election worker coerced them, but it depends on the individual."

Illegal voting is a Class A misdemeanor, carrying a possible \$4,000 fine and one-year jail sentence, according to the Texas Election Code.

Suspicion first arose Monday morning when three uncounted ballots were found under a box in the vote counting room by City Secretary Vicki Ramirez. All three votes for mayor were cast for veteran City Commissioner Eleazar Romero. Two of the voters admitted they voted during the early voting period before being taken by the politiqueras to vote "curbside" Saturday.

Curbside voting allows an elderly or disabled voter to cast their ballot from a vehicle without having to enter a polling station. The election official outside — in this case Ramirez — is supposed to make sure the individual is in fact elderly or disabled and cross-reference their name against a voter list before allowing them to cast a ballot.

"From what I understand, that didn't happen," Navarro said.

Ramirez declined to comment.

Romero said again he has no knowledge of any wrongdoing within his campaign.

"That's the county's deal, and I don't really have anything to say about that," he said.

"I played no part in that. If something did take place, I had no knowledge of that."

Both Sanchez and Romero accompanied county election officials around the city's polling stations Wednesday morning, as they checked the voting machine tallies against those recorded by city election officials. In tow were around 25 of Sanchez's friends and family, who waited anxiously for word Monday's election result would hold up.

017050

After officials counted up the paper mail-in and curbside ballots, the final tally was announced as 1,126 to 1,123 in favor of Sanchez.

For Sanchez, who lost to outgoing Mayor Robert Loredó in 2003, the news ended a difficult few days in which she had to sit in on a meeting concerning the three uncounted votes only hours after the funeral of her father, who died in a household accident Friday.

"It was a sigh of relief in that I'm finally on the different end of this," Sanchez said.

"But I had faith. I've been through so much this week, with the passing of my father, it puts everything in perspective."

Romero said he would not contest the election result in court.

"I'm going to let this one go by; she won fairly," he said.

"I wish Ms. Sanchez all the luck in the world."

Sanchez will be sworn in as mayor at a special meeting Tuesday evening. Asked if she expected any difficulties in serving alongside commissioners whom she has openly criticized for years, the 41-year-old attorney was optimistic.

"I'm anxious to get started and work with everyone who's there," she said.

"If they're willing to do the things they said they wanted to do for the city, which are a lot of the same things I want, then I think we can work together."

Five local voters cast two ballots each in primary

By: Lauren Hutton, Courier Staff

March 25, 2004

Visit

Photo

CTIC

A handful of Montgomery County voters tried to get more bang for their ballot during the March 9 primary elections.

According to Montgomery County Elections Administrator Carol Chedsey Gaultney, five of the county's registered voters cast a ballot in both the Republican and Democratic primaries, which violates the election code. None of the races was affected by the discovery.

"It came to my attention late last week when entering voter history into the computer," Gaultney said. "Most people don't understand the primary system in Texas."

That was the case for Jay Marshall Smith, 22, of Conroe, who said it was his first time to vote.

"When I went to vote, I did not see a sign that (the poll) was only for Republican voters," he said Wednesday. "By the time I figured it out, it was already too late."

Smith, who then went to vote in the Democratic primary, said he hopes to see better signs next election.

Gaultney has passed the voter information to District Attorney Michael McDougal, who can decide whether to prosecute the Class C misdemeanor violation, punishable by a fine of up to \$500 fine.

Montgomery County Republican Party Chairman Dr. Walter Wilkerson said the District Attorney's office at least should interview the voters to learn their motives.

In these cases, according to Montgomery County Democratic Party Chairman Raymond McNeel, district attorneys usually do not prosecute because they have larger fish to fry.

McDougal did not return calls Wednesday.

"The larger concern is making the public aware of this problem," McNeel said. "What I care about is that the public know they can't do this."

Another person who learned his lesson was Dieter Hellerbach, 70, of The Woodlands.

His wife Edda said her husband was new to voting in America, since he was from Germany.

"He did not understand what the primary was about," she said.

When voters go to the primary polls, they must sign the polling book, which is a "voter's affidavit."

This says that the voter understands that it is a criminal offense to knowingly vote in a primary election or participate in a convention of another party during the same voting year.

Gaultney said this also means county residents who voted in either primary

Hello,
 Well, here's my recent voting experience. Like any good voter, I showed up at BB Rice, the sign at the door confused me a little...it said that Democrats had to vote elsewhere, I forget the exact wording and rationalization, but since I had decided to vote Republican, I turned right and walked down the hall. I was the only voter in the building, what's going on there? Showed them my card and they informed me I was at the wrong place, and gave me directions to the right one. I backtracked, down Loop 336 to the Conroe YMCA. Parked, and did a walking tour of the facility. I'd never been there before. After walking a mile or so, and was about to give up, I spotted some movement in a small building out back and despite having to walk another mile, decided to check it out. Turned out it was the polling place. Again, I was the only voter there. The poll people told me how they were starving, seems like someone forgot to pick up there order of food at Vernon's. I offered to help, but they assured me they were ok and could stick it out. Like a good MC Democrat, I cast my vote for Jenkins, Dean, and left. The whole experience leaves me wondering if some "powers that be" are trying their best to keep MC citizens from voting.

It is true that something needs to be done to prevent something like this to happen again. However, it appears to me that on the Republican side they rubber stamp the voters card. Does the Demos do the same? If, so how come the second voting table didn't see it? Maybe, the both election judges need to determine how that system failed. It shouldn't cost a lot of time or money as a volunteer.

Someone dropped the ball. If, this would have been the general election I'm affraid you would probably see Demos screaming to recount. This may not be a big issue, but it does say that our penciling in process is a little out dated. Does anyone agree with that?

Hearne man sentenced in illegal voting case

Associated Press

COLLEGE STATION -- A man has been fined \$2,500 and sentenced to five years probation after he pleaded guilty to illegal voting for casting 34 ballots during the May municipal elections in nearby Hearne.

Charles Workman did not cast a vote in his own name during the election, in which incumbent Mayor Ruben Gomez was re-elected.

But authorities said he did vote for nearly three dozen other residents using absentee ballots. He also forged forms saying some people had moved from one home to another.

Workman will not be allowed to campaign or collect absentee ballots during his probation, Robertson County District Attorney John Paschall told the Bryan-College Station Eagle for today's editions.

The district attorney said Workman is the fifth person to plead guilty to similar charges brought by a grand jury in August. At least one person will serve jail time for his role, he said.

Paschall could not immediately recall the names of the other four individuals.

Workman was one of 17 people indicted in the voting fraud case in August. Another Hearne resident, Corona Williams, was indicted on seven counts of illegal voting Wednesday.

Allegations of voter fraud surfaced shortly after the May 3 election. The election had a 45 percent voter turnout, which is high for Hearne, and nearly 50 percent of the votes were absentee ballots, mailed in by people who claimed to be disabled.

Illegal voting is a third-degree felony punishable by two to 10 years in prison and a fine of up to \$10,000.

Absentee Votes Worry Officials As November 2, 2004, Nears by Michael Moss

absentee ballots in Florida](#) |

| [Back — University Of Florida Professor Sees Red Over Absentee Ballot by Amy Reinink](#) |

September 13, 2004 — As both major political parties intensify their efforts to promote absentee balloting as a way to lock up votes in the presidential race, election officials say they are struggling to cope with coercive tactics and fraudulent vote-gathering involving absentee ballots that have undermined local races across the country.

Some of those officials say they are worried that the brashness of the schemes and the extent to which critical swing states have allowed party operatives to involve themselves in absentee voting — from handling ballot applications to helping voters fill out their ballots — could taint the general election in November.

In the four years since the last presidential election, prosecutors have brought criminal cases in at least 15 states for fraud in absentee voting. One case resulted in the conviction of a voting-rights activist this year for forging absentee ballots in a Wisconsin county race. In another case, a Republican election worker in Ohio was charged with switching the votes of nursing-home residents in the 2000 presidential race. And last year in Michigan, three city council members pleaded guilty in a vote-tampering case that included forged signatures and ballots altered by white-out.

The increasing popularity of absentee voting is reshaping how and when the country votes. Since the last presidential election, a growing number of election officials and party operatives have been promoting absentee balloting as a way to make it easier for people to vote and alleviate the crush of Election Day. At least 26 states now let residents cast absentee ballots without needing the traditional excuse of not being able to make it to polling places. That is six more states than allowed the practice in 2000.

As a result, as many as one in four Americans are expected to vote by absentee ballot in the presidential race, a process that begins today, nearly two months before Election Day, as North Carolina becomes the first state to distribute ballots.

But some experts say that concerns about a repeat in problems with voting machines is overshadowing the more pressing issue of absentee ballot fraud.

"Everybody was worried about the chads in the 2000 election," said Damon H. Slone, a former West Virginia election fraud investigator, "when in fact by loosening up the restrictions on absentee voting they have opened up more chances for fraud to be done than what legitimate mistakes were made in Florida."

017055

Yet many states — including battlegrounds in the presidential campaign — have abandoned or declined to adopt the safeguards on absentee voting that election officials have warned they will need to prevent rigged elections, an examination by The New York Times has found.

Only 6 of the 19 states where polls have shown that voters are almost evenly divided between President Bush and Senator John Kerry still require witness signatures to help authenticate absentee ballots. Fourteen of the 19 states allow political parties to collect absentee voting applications, and 7 let the parties collect completed ballots, raising the possibility that operatives could gather and then alter or discard ballots from an opponent's stronghold.

Most of the swing states even let party operatives help voters fill out their absentee ballots when the voters ask for help. And political parties are taking advantage of vague or nonexistent state rules to influence people who vote at home. In Arizona this month, a county judge ruled that a campaign consultant had improperly held on to more than 14,000 absentee ballot applications he collected this summer to help nearly a dozen Republican candidates in the primary. But holding on to such applications for at least a few days is now common practice by both major parties in states like Arizona, which require only that they be turned in within a "reasonable" period of time. This allows campaigns to bombard voters with mailings and house calls just as their ballots arrive.

Some operatives boast that this absentee electioneering lets them avoid the century-old anti-fraud rules that force them to stay out of polling places. But while acknowledging the value of legitimate get-out-the-vote campaigns, election officials say absentee voting is inherently more prone to fraud than voting in person since it has no direct oversight.

"Loosening the absentee balloting process, while maybe well intentioned, has some serious consequences for both local races and the general election," says Todd Rokita, secretary of state in Indiana, where fraud investigations are under way in at least five communities.

The more blatant cases of criminal misconduct have prompted some state officials to seek new legal powers in fighting fraud, including making it a crime to lie about not being able to vote in person in those states that require an excuse.

A matter for the states

Top

The Justice Department says the Constitution mandates that states run elections, and it generally can intervene only on civil rights matters like ensuring that non-English-speakers are not excluded.

In the mayoral race last year in East Chicago, Indiana, federal officials declined to act on the pleas of one candidate's supporters, who foresaw trouble in absentee voting. Two weeks before the election, in the Democratic primary, the campaign of the challenger, George Pabey, was tipped to shenanigans, and his supporters asked the United States attorney there to safeguard the balloting. The prosecutor referred the matter to the Justice Department's civil rights division, which did not show up until a year later, to monitor a different election.

Mr. Pabey lost the race. Last month, the state Supreme Court voided the election after a judge found that the *"zealotry to promote absentee voting"* resulted in residents being coerced into voting with offers of jobs and other assistance.

There are now criminal investigations of the election by local, state and federal authorities, with five people already charged. Some voters who agreed to vote absentee in return for polling-place jobs say they had no idea this was improper.

"That's how I thought it was, you get paid to vote," Larry Ellison of East Chicago, 32, said in a recent interview, adding that he needed the \$100 he received for his vote to buy medicine for his seizures.

In North Carolina, three university students were charged with felonies last year, accused of voting both absentee and at the polls after they responded to campus fliers that offered free concert tickets worth \$22.50 for voting absentee.

017056

Signatures and excuses

[Top](#)

Since 2000, when mail-in votes became crucial to President Bush's narrow victory in Florida, several groups that studied election irregularities have issued warnings about absentee voting. One commission, whose co-chairman was former President Jimmy Carter, found that most election officials had grown lax in handling absentee ballots.

"For practical reasons, most states do not routinely check signatures either on applications or on returned ballots, just as most states do not verify signatures or require proof of identity at the polls," wrote John Mark Hansen, dean of the social sciences division at the University of Chicago, who directed research for the commission's 2001 report.

Also in 2001, an international association of election officials called the Election Center produced a report that noted the growing importance of absentee voting and concluded, *"Strict procedures and penalties to prevent undue influence and fraud must be adopted by jurisdictions seeking expanded absentee access or all-mail elections."*

Gary Bartlett, an association member and the director of elections in North Carolina, said, *"It seems like whenever there is hanky-panky in elections, it's usually through absentee voting."*

In 2002, North Carolina stopped requiring an excuse to vote absentee, but at the same time it barred anyone but voters and their relatives from handling absentee applications. In addition, the state requires two witness signatures on absentee ballots, which Mr. Bartlett says is a powerful tool against fraud.

In Oregon, where all voters now cast their ballots by mail, officials have adopted several safeguards, including the use of a scanner that produces an image of the voter's registration signature for instant comparison with the signature on the absentee envelope. But Melody Rose, an assistant professor of political science at Portland State University, who has studied the state's elections, said she was concerned that political operatives could still collect ballots.

"We are a battleground state, and it is likely to be a very tight race," Ms. Rose said. *"What is to stop some individual from saying, 'This is a red neighborhood' or 'This is a blue neighborhood and I'm going to go and volunteer to take ballots and dump them in the river.'"*

The ballot gatherers

[Top](#)

This year, the Pennsylvania Supreme Court barred election officials from letting political operatives collect completed ballots, citing fraud concerns. But some efforts to limit the role of operatives in absentee voting have been derailed by political jockeying, and the fears, expressed mostly by Democrats, that such controls could diminish turnout.

Three towns in Connecticut tested a program last summer that barred political parties from handling ballot requests. But while the effort was deemed a success, the Legislature declined to make the ban permanent statewide, said Jeffrey B. Garfield, executive director of the State Elections Enforcement Commission.

Campaign workers *"tend to target people who are elderly, infirm, low-income, non-English-speaking,"* Mr. Garfield said. *"So there is a psychology of almost fear and intimidation."*

In other cases, new controls have caused interest groups to seek new ways to grab absentee votes. Two years ago, after Iowa placed new restrictions on who can handle ballot applications, political activists discovered an arcane rule that lets almost any people [sic] who can gather 100 signatures set up their own polling place where residents can vote early.

After several churches did so last year to fight a casino initiative, unions in Cedar Rapids said they hoped to collect 1,000 votes for Mr. Kerry on October 10, 2004, by setting up voting booths at a Teamsters hall during a rally for workers and their families.

The local elections director, Linda Langenberg, said the law required only that their voting booths be set up more than 30 feet away from any electioneering; nonetheless, Ms. Langenberg

017057

said, she is concerned. *"I won't let them have voting in the same building where they are having a rally,"* she said.

Elsewhere, some experts contend that regulators have undermined efforts to fight voting fraud. In West Virginia, Mr. Slone said that three years ago he was forwarding information to the Federal Bureau of Investigation about absentee votes being swapped for \$15 and flasks of whiskey when a new secretary of state replaced him with compliance officers who he said did not have the skill to ferret out fraud.

"Absentee voting is one of the most abused things in the state," Mr. Slone said in an interview. And while it mostly surfaces in local elections, he said, the same culprits may be turning out votes in national races, too.

The West Virginia secretary of state's office denies that it has diminished its antifraud effort.

In East Chicago, many voters said their faith in the election process was shaken by the debacle last year in the mayor's race.

The challenger, Mr. Pabey, won the race based on polling-place votes but lost to Mayor Robert A. Pastrick by 278 votes when the absentee ballots were counted. Within days, a civic group, Women for Change, sent 50 volunteers — nurses, secretaries, mill workers — knocking on doors of absentee voters to investigate.

The admissions they got from dozens of voters led Judge Steven King of Lake County Superior Court to render a 104-page decision chock-full of testimony from poor residents like Shelia Pierce. Ms. Pierce said she had been facing eviction when she let an operative working for the mayor's campaign, Allan Simmons, fill out her absentee ballot in return for the promise of a \$100 job working outside the polls on Election Day. She said he later threatened her to keep her from testifying.

Mr. Simmons has been charged with three counts of attempted obstruction of justice and six counts of ballot fraud. He has denied the charges. Mr. Pastrick has not been charged with wrongdoing and has denied any involvement in fraud.

In the same election, Elisa Delrio says a local official offered her a \$160 job at the polls and even took her absentee ballot to the hospital where she was having surgery. But when she voted instead for Mr. Pabey, her ballot, which she handed to the official, disappeared and was not counted, election records showed.

"It made me so angry," Ms. Delrio says. *"Voting is sacred."*

Judge King stopped short of voiding the election, saying the 155 votes he had thrown out did not change the outcome, but the Supreme Court of Indiana concluded that it was impossible to determine the true winner. A new election is scheduled for October 26, 2004.

Alexis Rehrmann contributed to this article.

Absentee Voting Practices Result In Felony Charges Against Orlando, Florida Mayor, Judge, Campaign Manager, And Others

'Ballot king' was paid by Orlando Mayor Dyer, other politicians to collect absentee ballots in Florida by Mark Schueb

Gag order lifted, revealing claims about top officials

January 8, 2005 — The lawyer for Orlando, Florida's "ballot king" said Friday that his client was paid by Orlando Mayor Buddy Dyer and a who's who of Central Florida politicians to gather absentee votes, an allegation that if true means they may have broken the law.

Answering media questions at the Orange County Courthouse minutes after an unofficial gag order was lifted, attorney Dean Mosley for the first time described a statement that campaign consultant Ezzie Thomas gave prosecutors four months ago in exchange for immunity.

According to his lawyer, Thomas told prosecutors that he did the potentially illegal work for the campaigns of Dyer; former Orlando Mayor Glenda Hood; U.S. Senator Mel Martinez; state Senator Gary Siplin, D-Orlando; Circuit Judge Alan Apte and perhaps others.

"The problem is that you're not supposed to be paid to collect absentee ballots," Mosley said.

That practice, which political experts say permeates elections throughout Florida, is emerging as the focus of an ongoing state criminal probe of possible fraud during last year's mayoral election.

Mosley said Thomas was known to specialize in gathering absentee votes, and that's why he was hired — even though paying ballot brokers became illegal when Florida lawmakers cracked down on election fraud six years ago.

In 1998, the Legislature tightened absentee-voting laws, a response to voter fraud in the 1997 Miami mayoral election that included paying residents for their votes, ballots cast by people who lived outside the city and much more. A judge eventually nullified that election.

The new law made it a crime to pay or accept money *"for distributing, ordering, requesting, collecting, delivering or otherwise physically possessing absentee ballots."*

Mosley's description of his client's statement to prosecutors provides the clearest picture yet of the 10-month-old probe of possible election fraud. The investigation began with questions about the 2004 election that kept Buddy Dyer in the Orlando mayor's office, but has since widened with Thomas' testimony to include other politicians.

The allegations center on Thomas, a retired businessman who for years has tried to increase voting in Orlando's black community. Thomas' election work, which often involved helping elderly residents vote by absentee ballot, was at first on a strictly volunteer basis as president of the nonprofit, nonpartisan Orange County Voters League.

But in 1998, Thomas began profiting from his expertise at bringing in scores of absentee votes by hiring himself out to political campaigns looking for an edge on Election Day.

He has said he works only for candidates whom he supports. That has mostly been Democrats, but he also has worked for Republicans, including Glenda Hood — mayor of Orlando at the time but now responsible for ensuring the integrity of Florida elections as Florida secretary of state.

017059

On Friday, Mosley verified that Thomas' statement to prosecutors — given with the promise of immunity — concerned ballot-collection work for Martinez when he ran for county chairman in 1998, Hood's 2000 mayoral campaign, Siplin's and Apte's campaigns in 2002, and Dyer's mayoral campaigns in 2003 and 2004.

None of those politicians returned calls seeking comment on Friday, though Dyer's lawyer said the mayor had done nothing wrong and is the victim of politically motivated attacks.

Thomas also has worked on the campaigns of state Rep. Bruce Antone, D-Orlando; Orange County Commissioner Homer Hartage and judicial candidate Norberto Katz, but Mosley did not say whether those campaigns were discussed with prosecutors.

While Dyer and other politicians have never hidden the fact that they have hired Thomas to help on their campaigns, the mayor has denied that Thomas' only task was to gather absentee votes. Dyer's campaign treasurer reports, for instance, indicate Thomas was paid \$10,000 for vague "get-out-the-vote" efforts.

But Mosley indicated that Thomas was hired only because of his work with absentee voters.

"His specialty was absentee-ballot work," Mosley said Friday. "It would be logical to conclude he was paid for the work he specializes in."

Dyer's criminal attorney, Robert Levanthal, called Mosley's comments "inappropriate and suspect." He said Thomas was hired for general campaign work in Orlando's black community — not to gather absentee ballots.

"People are taking potshots at Mayor Dyer for their own political purposes," said Levanthal, adding that Thomas was hired by other campaign managers, not by Dyer himself.

Even though political experts say it is common to pay campaigners to encourage absentee voting, no one has been prosecuted for it since lawmakers made it a third-degree felony. Most interpret the law to prohibit only paying ballot brokers per vote and paying voters directly.

"All the campaigns rely very heavily on absentee ballots," Levanthal said.

State investigators began looking into the 2004 mayor's race within several weeks of the March election, after receiving a complaint from Brian Mulvaney, whose brother, Ken Mulvaney, finished in second place.

At the same time, Ken Mulvaney filed a separate civil lawsuit, seeking to have the results thrown out. His initial allegations centered on whether Thomas mishandled or altered ballots for Dyer, but the investigation has now evolved to focus on the untested state statute governing so-called "ballot brokers" such as Thomas.

Mulvaney's lawsuit remains unresolved, and the candidate has been thwarted in attempts to get Thomas to testify about his role in the election. In a closed-door hearing in November, Thomas persuaded the court to protect him from having to testify in the civil case, lest his words be used against him in the state's ongoing criminal probe.

On Friday, the Orlando Sentinel successfully petitioned the court to have transcripts of that closed hearing released. That record, which describes the nature of Thomas' statement to prosecutors, has not yet been transcribed, but the judge's ruling left Mosley free to describe what was said.

Mulvaney said he will eventually prove his case.

"I'm very confident, and have been from Day One, that there was fraud in the mayoral election," Mulvaney said.

That's what 5th Circuit State Attorney Brad King is trying to determine. He inherited the case from Orange/Osceola State Attorney Lawson Lamar, who excused himself because Apte was once a prosecutor in his office.

King has remained tight-lipped about the investigation but said this week not to expect a resolution to the case for at least two to three months.

Mark Schlueb can be reached at mschlueb@orlandosentinel.com or 407-420-5417.

Orlando, Florida, mayor and judge indicted in absentee ballot case

Top

Also indicted with Mayor Buddy Dyer were Ezzie Thomas, who worked for the Dyer campaign; Orange County Circuit Court Judge Alan Apte; and Patricia Beatty Phillips, the campaign manager.

March 12, 2005 — Mayor Buddy Dyer turned himself in on Friday to face a felony charge of paying someone to collect absentee ballots before his election in a tight race last year. Governor Jeb Bush swiftly suspended Mr. Dyer, as required by Florida law, in a case that has roiled this city for months and even caused a brief firestorm in the presidential election.

A grand jury handed up sealed indictments on Thursday for Mr. Dyer and three others: Patricia Beatty Phillips, his campaign manager; Ezzie Thomas, who worked for the Dyer campaign as a get-out-the-vote consultant; and Judge Alan Apte of Orange County Circuit Court, who was charged with illegally paying Mr. Thomas to collect absentee ballots before his own 2002 campaign.

The indictments, unsealed on Friday, came after a long investigation that drew criticism from state and national Democrats during the re-election campaign of President Bush, Governor Bush's older brother. Some elderly black residents of Orlando said that agents from the Florida Department of Law Enforcement, which conducted the investigation and reports to Governor Bush, had intimidated them during interviews at their homes about the absentee ballots they cast in the mayoral race last March.

Democratic groups then accused Governor Bush's administration of trying to suppress the black vote in Orlando, a coveted swing city, before the presidential election, an accusation that Mr. Bush dismissed as outrageous.

Governor Bush suspended Mr. Dyer hours after the mayor surrendered at the Orange County Jail, where he was released on his own recognizance. Florida law calls for the governor to suspend public officials charged with felonies while their case is pending and to remove them if they are convicted. The charges - for Mr. Dyer, Ms. Phillips and Judge Apte, paying for absentee ballot collection, and for Mr. Thomas, receiving payment for such collection - are third-degree felonies that carry a potential sentence of up to five years.

Brad King, the special prosecutor who conducted the investigation, is a Republican.

"Orlando is obviously a very important government," said Jacob DiPietre, Mr. Bush's spokesman, *"and the governor thought it important, for continuity, to act as soon as possible."*

Mr. Dyer, who has said all along that his campaign paid Mr. Thomas \$10,000 for get-out-the-vote work but that he was not aware of any illegal activity, held a brief news conference Friday to proclaim his innocence. He said the charges were *"politically motivated."* He then added, *"I do not believe any employee of my campaigns intentionally violated any campaign laws while conducting the business of the campaign."*

A city attorney said Councilman Ernest Page, the mayor *pro tem* and a Republican, would take over the mayoralty until a special election was held. He said the Orlando City Council would meet within 10 days to set the date for the election.

Mr. Dyer, a 47-year-old Democrat, vowed to fight the charges and return to his job, which pays \$144,349 a year. He first won election to the nonpartisan mayoralty in 2003.

The indictments follow a civil suit filed by Ken Mulvaney, a local businessman who was Mr. Dyer's Republican opponent in last year's mayoral race. Though Mr. Dyer, a former state senator, defeated Mr. Mulvaney by nearly 5,000 votes, he avoided a runoff by only 234 votes. Mr. Mulvaney sued, charging that several thousand absentee ballots should be disqualified as fraudulent. The lawsuit is still pending. Mr. Mulvaney's brother, Brian, filed a criminal complaint with similar allegations.

017061

At issue is whether Mr. Thomas, a retired television repairman and activist in Orlando's black community, mishandled absentee ballots while working for the Dyer campaign. A state law passed in 1998 prohibits providing or accepting "*pecuniary gain*" for "*distributing, ordering, requesting, collecting, delivering or otherwise physically possessing absentee ballots.*" The law was passed after the results of a Miami mayoral race were thrown out because of absentee ballot fraud. No one has been prosecuted under the law until now.

An initial state investigation last May found no evidence of wrongdoing, but the Florida Department of Law Enforcement reopened the case weeks later, saying it was acting on new information. The Orlando Sentinel has reported that some voters interviewed by the department said Mr. Thomas helped them fill out absentee ballots or collected their ballots while they were still unsealed.

Mr. Thomas's lawyer, Dean Mosley, said on Friday that his client was an "*old man*" — he is 74 — and was unfairly accused. Mr. Thomas testified Wednesday under limited immunity. He cannot be prosecuted for his own statements but can be based on evidence presented by others.

Politicians from both parties have paid Mr. Thomas to get out the vote, including Glenda Hood when she was running for mayor here and Senator Mel Martinez when he was seeking a county office. Both are Republicans.

Mr. Dyer, one of the state's more prominent Democrats, ran unsuccessfully for state attorney general in 2002 before becoming mayor of this city of 186,000 in 2003. In a deposition earlier this year, he said he had no knowledge of what Mr. Thomas did for his campaign. On Friday, Mr. Dyer said that Mr. Thomas "*simply helps older African-Americans participate in the voting process.*"

Judge overturns Greensboro mayor's election

Monday, January 23, 2006 9:59 PM CST

David Goodwin / Managing Editor

After finding that 162 votes in the 2004 Greensboro mayor's race were cast illegally, Hale County Circuit Judge William Shashy set aside the election Greensboro mayor J.B. Washington Monday, and declared challenger Vanessa Hill the rightful winner.

After throwing out 162 absentee ballots for a variety of reason - including forgery, lack of voter identification and absence of postmarks - Shashy declared Hill the winner of the long-disputed Sept. 14, 2004 election, 664-614.

Hill had only received second- and third-hand reports of the decision Monday afternoon, but said, "If indeed that is so, I congratulate the people of Greensboro."

"I hope my supporters, as well as those who didn't support me, will work together to make Greensboro a more pleasant place to live and to help it grow for the people," she said.

Hill's attorney, Walter Braswell of Birmingham, credited the victory to a network of volunteers in Greensboro and throughout the state who refused to allow the election to be stolen.

Alabama
Absentee ballots remain a concern

Fraud probes lessen number, but it is still above average

By Adam Jones
Staff Writer
Tuscaloosa News
June 4, 2006

TUSCALOOSA | Despite successful voter fraud prosecutions linked to absentee ballots in Greene County, an abnormally high number of absentee ballots have been reported in Black Belt counties such as Hale and Perry counties.

But some Black Belt politicians contend most fraud investigations have turned up little and argue that the high number of absentee ballots can be attributed to the fact that many voters in the region work outside their counties.

Perry County had the most absentee ballot requests for Tuesday's selection with about 2,080, nearly 24 percent of the county's 8,800 voters.

The state average for absentee ballots is 3 percent in any given election. More absentee ballots than that is considered abnormal.

Probate Judge Donald Cook, who is not seeking re-election, said he had hoped efforts to curb absentee voting would cut down the practice.

"I really though we had done something toward cleaning up the absentees, but it doesn't look like that's happened," he said. "Any election we have is always determined by what's in the absentee box, but that's how it's been done for three decades at least."

Absentee ballots were lower than normal in neighboring Hale County, which has seen absentee numbers more than 1,000 and approaching 15 percent of registered voters. This election, there are about 825 absentee ballots, said Probate Judge Leland Avery. That's about 7 percent of the county's registered 11,300 voters.

Avery said publicity of absentee ballot abuse in recent elections, an investigation by Attorney General Troy King into voting fraud and an offer by State Auditor Beth Chapman to offering reward for tips leading to a voter fraud conviction have helped deter absentee voters.

"That's about half of what it usually is," Avery said. "People don't want to get involved with absentees because of the voter fraud investigation."

Beverly Bonds, an officer with the Democracy Defense League in Hale County, said the number of absentee requests surprised her, but said the publicity of vote fraud has helped.

"A lot of people have changed their minds about this," she said.

In Greene County, 425 absentee ballots were requested. Calls to the county registrars' office Friday to get the number of registered voters of Tuesday's primary elections were unsuccessful. Greene County has a population of about 9,700, according to census data.

Even if every person in the county were registered and voted Tuesday, absentee ballots would be above the state average of 3 percent of votes cast.

017065

"Any time there's over 4 percent of the registered population, anytime there's anywhere near 4 percent, it's abnormal and highly suspicious," said Kirkland Byers, founder of the Alabama Voting Integrity Project, in a previous interview. "From my experience, there could be a lot of challenged absentee ballots again."

In some documented cases of fraud in Greene County and elsewhere, workers applied for absentee ballots for people who no longer lived in the county and had ballots sent to fraudulent addresses. Workers collected the ballot, cast the vote and returned it.

Elsewhere, Sumter County officials had 892 absentee requests, about 9 percent of the more than 9,800 voters.

Similar-sized counties such as Pickens and Fayette had less than 2 percent of registered voters request an absentee ballot. In Tuscaloosa, with more than 86,000 voters, less than 1 percent will vote absentee.

Alabama
AG King announces election hotline

The Associated Press
July 16, 2006

The Alabama attorney general's office will make a toll-free hotline available to voters and election officials for Tuesday's primary runoff election.

Attorney General Troy King said his office will answer questions, examine any allegations of election fraud and actively investigate any legitimate complaints of wrongdoing in the election.

Anyone can call 1-800-831-8814 with any questions about election law or to report information about any alleged violations or voter fraud.

Tyson examining disputed ballots

Saturday, August 26, 2006

By **BILL BARROW**

Capital Bureau

MONTGOMERY -- Mobile County District Attorney John Tyson Jr. confirmed Friday that his office is looking into possible voter fraud in the disputed Democratic runoff for Alabama House District 98 between Darren Flott and James Gordon.

"I've sent my investigators to pick up the ballots and the information associated with them so that we can review it to determine whether or not we need to formally open a criminal investigation," Tyson said.

Tyson declined to comment further about the District 98 election but added, "In general, voter fraud is a fraud committed against every other voter in Alabama. Our intention both now and in the future is to see that election laws are observed."

At issue are scores of absentee ballots that Alabama Democratic Party officials earlier this week found to be forged, some on behalf of mentally incompetent citizens.

In Montgomery, a spokesman for Alabama Attorney General Troy King said the attorney general's office has not received a complaint about the District 98 case.

"We do investigations that we have not received a formal complaint on, but that is not the usual case," said Chris Bence. "Since we don't have a complaint, I can't address whether or not we would be involved in it, because it's the policy of the office not to discuss matters that are or could become investigations."

Tyson, a Democrat, and King, a Republican, meet in the Nov. 7 general election for attorney general.

The Democratic Party ruling, released Wednesday, threw out 78 votes from original runoff winner Flott and four votes from Gordon, who filed an election contest after July 18 returns reflected a Flott victory.

The decision erased Flott's margin and made Gordon the party's nominee. Flott has appealed within the party's quasi-judicial procedures. The party's final decision can be appealed to state Circuit Court.

With no Republican in the race, the eventual winner is expected to succeed Rep. Bill Clark, D-Prichard. Clark endorsed Gordon.

The party's decision made no determination about who might be responsible for any ballot fraud. Gordon suggested after the July 18 runoff that Flott's campaign made a concerted effort to increase the candidate's absentee ballot support. Flott has denied any illegal actions or any special effort to distribute or gather absentee ballots.

July returns showed Flott with 320 percent more absentee votes than he received in the June primary. Gordon posted about a 70 percent increase. Absentee ballots were 15.5 percent of the total runoff turnout. In

June, absentee votes were 4.6 percent of the total cast.

According to state election law, anyone "guilty of any kind of illegal or fraudulent voting must, on conviction, be imprisoned in the penitentiary for not less than two nor more than five years, at the discretion of the jury."

Knowingly providing false information in order to vote is a Class A misdemeanor punishable by a jail sentence of not more than one year and a maximum fine of \$2,000.

Bence, King's spokesman, said he would expect the party to file a complaint about fraud with appropriate authorities. "I would expect any party, Democrat or Republican, Libertarian or anybody, that if they become aware of a law being broken, especially relative to the election process, that they would file a complaint," he said.

Democratic Party Executive Director Jim Spearman told the Press-Register earlier this week that the party does not have specific rules requiring that it forward findings of fraud to investigators. But, he added, the party would not withhold any information authorities sought.

The state Democratic

Executive Committee is scheduled to meet today in Montgomery. It was not clear late Friday whether anything concerning the District 98 dispute will be discussed.

PRESS-REGISTER

Both sides raise questions about ballots

Tuesday, August 22, 2006

By DAN MURTAUGH
Staff Reporter

Attorneys for candidates Darren Flott and James Gordon spent Monday alleging that scores of absentee ballots were forged in last month's Democratic runoff for Alabama House District 98.

A panel of state Democratic Party leaders did not rule Monday on the election contest that Gordon had filed after Flott won by 65 votes. Amy Burks, vice chairwoman for the state party, said a ruling probably would be handed down today.

Gordon's attorneys alleged that signatures were forged on at least 75 absentee ballots, including 29 that belonged to people who were mentally incompetent.

Flott's attorneys questioned the validity of 55 more ballots because of signature inconsistencies and other problems.

The ballots in question were not opened, so neither side knows for whom they were cast.

Returns from the July 18 runoff show Flott with 283 absentee votes to Gordon's 143. That 140-vote advantage is more than double Flott's overall margin of victory. Gordon posted a 75-vote advantage among ballots actually cast July 18 in precincts around the district.

Gordon led a three-man field in the June 6 primary. In that round of voting, he garnered 85 absentee votes, while Flott received 69. Absentee votes were 15.5 percent of the total July turnout and 4.6 percent of the total turnout in June.

Flott, a respiratory therapist, and Gordon, a chiropractor, are both from Eight Mile. They sat quietly next to one another during the hearing at the Riverview Plaza Hotel. The hearing began Aug. 14 in Montgomery but moved to Mobile at the

request of Gordon's lawyer, James Anderson.

Monday's hearing began with Gordon's attorneys reading a deposition from a doctor about the mental competency of several people who cast absentee ballots in the runoff. That part of the hearing was held in private because of concerns about publicly airing people's medical information.

Afterward, Richard Roper, a retired document examiner for the Alabama Department of Forensic Science, spent about two hours detailing the minutiae of signatures -- things such as pen pressure, tapering finishing strokes and how a person scrawled an "X".

He said signatures on about 75 absentee ballots did not match signatures on affidavits, driver's licenses or voter registration forms.

Flott's attorneys argued that the inconsistencies in the signatures could be due to the old age of the signers. Addie Clark, a 78-year-old woman whose signature was alleged to have been forged, testified that she did sign her ballot.

Flott's lawyers then showed the panel 55 more ballots, they thought were questionable. They did not hire an expert to examine the signatures on the ballots, and Burks did not let them use Roper because he was being paid by Gordon's team.

Gordon: Absentees had mass forgeries

Tuesday, August 15, 2006

By **BILL BARROW**
Capital Bureau

MONTGOMERY -- An attorney for Mobile chiropractor James Gordon said Monday that he will present evidence of widespread absentee ballot forgeries, some on behalf of mentally incompetent or unaware senior citizens, as he challenges respiratory therapist Darren Flott's Democratic runoff win in Alabama House District 98.

The election contest hearing, in which Gordon is protesting the 65-vote margin Flott captured July 18, opened here Monday before a group of state Democratic Party leaders. But the panel, acting on the request of Gordon's lawyer, voted to move the hearing to Mobile, where attorney James Anderson said he can more easily obtain relevant election records and testimony. The five-person board plans to reconvene this coming Monday morning at an undetermined site.

The two candidates, both residents of Eight Mile, remained silent during the proceedings. Flott has denied that his campaign engaged in any concerted effort to distribute or collect absentee ballots.

Anderson said during the hearing that he plans next week to call as expert witnesses a handwriting expert and a medical doctor. He had already given the panel the names of 313 absentee voters whose ballots could be at issue in the case.

Anderson said the handwriting expert is reviewing signatures on voters' absentee applications and on documentation that must accompany a ballot when it is returned to the Mobile County absentee ballot office. Those records, along with the ballots themselves, must be maintained in case of an election contest.

A former statewide judicial candidate, Anderson frequently represents clients involved in voting disputes.

During a recess, Anderson showed the Press-Register a voter's absentee application marked with a legible signature, but whose ballot was returned signed with an "X." He said there are several other similar instances.

Further, Anderson said he expects his forensics expert to identify scores of cases where the handwriting of the voter's signature appears to be similar to that of the required witness or where the signature on a voter's application appears different from the signature on the returned ballot.

Anderson said he has not inspected any actual ballots, which means it cannot be known whether the discrepancies involve votes that went for Flott. Ballots can be reviewed only in court or in front of the quasi-judicial panel convened to hear Gordon's contest.

Absentee ballots are numbered, however, so in Monday's proceeding, individual ballots could be matched with the 313 names.

Runoff returns show Flott with 283 absentee votes to Gordon's 143. That 140-vote advantage is more than double Flott's overall margin of victory. Gordon posted a 75-vote advantage among ballots actually cast on July 18 in precincts around the district.

Gordon led a three-man field in the June 6 primary. In that round of voting, Gordon garnered 85 absentee votes. Flott received 69. Absentee votes were 15.5 percent of the total July turnout and 4.6 percent of the total turnout in June.

In previous public comments, Gordon has called particular attention to the Eight Mile Nursing and Rehabilitation Center, where, according to Mobile County election records, almost 70 residents applied for absentee ballots, with at least 58 returning completed ballots. The records offered no indication about which candidates individual voters supported.

An administrator at the St. Stephens Road facility has told the Press-Register that he was unaware of any unusual voting practices connected to residents there. Gordon has suggested that Flott's work as a respiratory therapist gives him personal connections to the center, a charge Flott has denied.

Monday's hearing was a series of small defeats for Flott, whose attorneys argued that the complaint should be thrown out because of alleged procedural violations. Flott's attorneys also said Anderson failed in his pre-hearing filings to provide evidence of any illegal votes.

Christopher Couch, who practices in the Birmingham office of Mobile-based Miller, Hamilton, Snider & Odom, then argued unsuccessfully against moving the

rest of the hearing to Mobile.

With no Republican in the race, the eventual winner in the dispute will succeed the retiring Rep. Bill Clark, D-Prichard. Clark endorsed Gordon.

Group battles voter fraud

By Francis X. Gilpin
October 10, 2006
Montgomery Advertiser

GREENSBORO -- LaKiesha M. Williams got a surprise last year when she went to vote in this west Alabama city of fewer than 3,000. Somebody else had already cast her vote -- by absentee ballot.

Williams, 30, remembers applying for an absentee ballot by mail. But Williams is sure she never received it.

"I'm still ticked off," said Williams. "No matter what, I still can't get that vote back."

Williams' experience in Hale County is hardly unique. Elections in Alabama's portion of the impoverished Black Belt have been tainted for decades by slipshod processing of absentee ballots. Some of those implicated in the vote fraud have held public office themselves.

But there is growing recognition that desperately needed new industry will continue to elude the region until local elections are cleaned up. The Black Belt Action Commission, a state panel trying to improve the local standard of living, has declared vote fraud to be the region's biggest challenge, even ahead of improving public education.

Citizens are no longer standing by while they say their elections are hijacked. A group of mainly Hale County residents formed the Democracy Defense League last year to encourage law enforcement officials to investigate election fraud here and elsewhere in Alabama. In addition, the DDL is lobbying state officials to tighten absentee-voting procedures.

"We can't change state law from Hale County," said DDL co-founder Perry Beasley, who helped spearhead the last major vote-fraud prosecution in the county before his retirement from the Alabama Bureau of Investigation. "It has to come from Montgomery."

Faye Cochran, who chairs the local board of registrars, recalls a lull in suspiciously high absentee voting after the ABI probe, which sent a former Greensboro city council man to state prison in 2001 on election-related forgery charges. But recent Black Belt elections have resumed the historical pattern. The losers of two 2004 mayoral elections, including one in Greensboro, have gone to court to overturn what they claim were fraudulent results.

Alabama Attorney General Troy King has been investigating potential vote fraud. To date, however, the only thing resembling an arrest nabbed somebody from King's own staff. Last fall, George Barrows had to turn himself in to the Hale County sheriff after a woman accused the King investigator of harassing her while serving a subpoena. A judge later dismissed the case.

With voters due at the polls again Nov. 7, DDL members are getting edgy.

"The same thing's going to go on unless something is done to stop it," said Cochran.

Judge versus judge

The most recent round of contested Black Belt elections began with a 2002 race for Hale County commissioner. Yolanda A. Watkins unseated incumbent Commissioner James "Buster" Brown by 34 votes in a Democratic primary. Brown promptly filed a challenge, blaming his defeat on illegal votes acquired through bribery and intimidation. Brown wasn't alone with his concerns.

017075

Edgar W. Greene Jr., the district attorney at the time for the circuit covering Hale County, received complaints that unregistered voters had cast absentee ballots while legitimate absentee votes weren't tabulated. Greene sought to impound the ballots as evidence, but Circuit Judge Marvin W. Wiggins wanted them, too.

Wiggins unilaterally deemed the ballots to belong with Hale County's circuit clerk, Gay Nell Tinker, who also happens to be the judge's sister. But Hale County Probate Judge Leland Avery refused to turn over the election records. That prompted Wiggins to order Avery's arrest.

While Avery sought refuge in an appeal to the state Supreme Court, the probate judge stored the ballots at a local bank. The ballots were nearly destroyed when an arsonist torched the 95-year-old bank building in the wee hours of July 7, 2002. Fortunately for Greene's probe, the ballots survived because they were secured in a fireproof vault. A fire marshal's investigation into the unsolved arson remains open, according to state officials.

The Supreme Court eventually awarded custody of the ballots to Greene, who had argued that Tinker, as the county's absentee voting manager, shouldn't have access to the disputed ballots while his office investigated the election.

The justices also found that Wiggins had no business getting involved in the matter because no legal action was filed in his court. Wiggins says he cannot answer questions about the 2002 case because it may be part of the attorney general's current investigation.

Brown, who has since passed away, withdrew his 2002 election challenge because he didn't want to impede the criminal investigation. But Greene filed no charges. His successor, District Attorney Michael W. Jackson, speculates that Greene's probe died with Brown.

King's investigation is believed to be focusing on the 2004 Greensboro mayoral election.

Cochran, whose office is in charge of Hale County's voter rolls, says the attorney general opened his inquiry even before the controversial mayoral runoff. In the weeks leading up to the Greensboro election, Cochran says her office received a slew of change-of-address forms purportedly from voters moving inside the city limits. Cochran says she was suspicious of who was bringing many of the forms to her office.

It was Aaron Evans, the former city councilman who was ousted from office following a 1998 election-fraud conviction. State records show Evans, 55, who was also a former city police officer, got released from prison in 2003 after serving about two years on charges of forging absentee ballot documents for a 1995 Greensboro election. Upon his release, Evans was welcomed back to Greensboro with a parade and a new city job.

In a telephone interview, Evans spoke only briefly about his election activities before hanging up.

"I wasn't guilty then and I'm not guilty now," Evans said. "You have a good day."

Cochran says she began checking some of the city addresses listed on the forms that Evans turned in. At one address, there was nothing but a fire hydrant.

"One of them was this rundown mobile home," she called Cochran. "No way anybody could live in it. The windows were out. Vines were growing even into the mobile home."

Who's the mayor?

017076

J.B. Washington claimed the Greensboro mayor's office in a Sept. 14, 2004, run off with 762 votes to Vanessa Hill's 672. His tally included 251 absentee votes, about a third of his total.

Hill filed an election challenge with Tinker in the circuit clerk's office. But it wasn't easy. At first, Tinker refused Hill's filing, according to court records. Then, the clerk demanded a \$2,500 cash bond. Hill's lawyer, Walter E. Braswell of Birmingham, stated in a court filing that the bond demand was unprecedented for a Hale County election challenge. Finally, after accepting Hill's legal paper work, Tinker neglected to have the documents served on Washington until ordered by a judge, according to Braswell.

Tinker declined a request for an interview. The circuit clerk says she isn't interested in what the DDL or its allies have to say.

"They're anti-Gay Nell anyway," Tinker said. "I'm going to let God handle it. This comes up every election cycle. All I'm going to say is whatever God has in mind is fine with me."

A Montgomery County circuit judge was assigned to hear Hill's legal challenge to the Greensboro mayoral election outcome. In January, Judge William Shashy threw out 148 illegal absentee ballots, effectively declaring Hill to be Greensboro's mayor. Washington remains mayor of the Hale County seat, more than two years after the polls closed, as he appeals to the state Supreme Court.

Braswell summed up Hill's case at a court hearing before a special master appointed by Judge Shashy. "We're here because there was an attempt to steal this election," said Braswell, a former federal prosecutor.

Shashy tossed out more than half of Washington's 251 absentee votes. The judge cited absentee ballot affidavits that were forged, ballot envelopes that contained none of the required postmarks, and ballots that had been cast by voters who didn't show valid identification.

During court proceedings, Hill attorney Braswell linked Tinker to suspect ballots.

"The record would show that on more than 50 of the illegal votes she was the notary," Braswell said during the special master's hearing.

The special master, Montgomery attorney James H. Anderson, cautioned that court clerks often notarize official documents.

In a subsequent Supreme Court filing, however, Braswell pointed out that Tinker and her husband, state Sen. Bobby D. Singleton, D-Greensboro, were active supporters of Washington's mayoral campaign. Braswell went on to note that Tinker notarized "numerous absentee affidavits later found to be false or forged," while Singleton's name "appears as a witness on a number of the disqualified ballots." Those ballots were counted for Washington on election night, Braswell added.

Singleton says he and his wife did nothing improper to help get Washington elected. The senator says the rejected absentee ballots with signatures witnessed by him were tossed out because there were questions about voter identification, not the validity of the signature.

"Absentee voting is a legal process," Singleton said. "They want to make it out like there is something wrong with it."

Across the county line in Marion, absentee ballots have taken center stage in another disputed 2004 mayoral election.

Both the declared winner, Anthony J. Long, and the losing candidate, Robert D. Bryant, depended heavily on absentee votes. About 58 percent of Long's total vote came from absentee ballots. Bryant's campaign manager, Perry County Commissioner Albert F. Turner, seized on the unusually high figure, despite his own candidate relying on absentee ballots for nearly 36 per cent of his vote.

Although some experts say absentee percentages above single digits are out of the norm, Birmingham election lawyer Edward Still says the Black Belt's commuting workforce votes absentee in higher numbers because workers cannot get to the polls on Election Day.

At a Perry County trial in 2005, Bryant's lawyer introduced evidence that dozens of Long's absentee ballots were mailed to the same two post office boxes. While fending off additional allegations that felons voted illegally for the winner, Long's attorney questioned the legality of several absentee ballots notarized by Turner and other Bryant supporters.

Both sides claim they proved more than 100 absentee votes should be disallowed. Circuit Judge Marvin Wiggins, who presided at the trial, has yet to render a decision more than a year after testimony concluded. Wiggins says he cannot comment on pending cases.

Albert Turner, 42, son of a legendary Alabama civil- rights activist who beat a 1985 vote-fraud indictment, couldn't be reached for comment at his Perry County office. The younger Turner has expressed disappointment that the DDL didn't assist Bryant.

"This showed that their real purpose is not to fight voter fraud at all," Turner told the Demopolis Times last year. "I feel their real purpose is to gain political power in Hale and Perry counties."

Unhappy novice voter

DDL leaders may have hesitated because of an episode from Turner's unsuccessful 2005 election campaign against Ralph A. Howard for the Alabama House of Representatives.

Cynthia Y. Davis, a Francis Marion High School student at the time of the 2005 election, states in an affidavit that she was taken out of class and transported by Turner to her Perry County polling place. One of Turner's campaign workers then escorted the 18-year-old Davis in to vote for the first time.

Davis says the Turner campaign worker stood over her while she marked a ballot for Howard. When the Turner worker saw that, Davis says the woman grabbed the ballot and requested another from election officials. This time, leaving nothing to chance, the Turner worker marked the ballot for Turner and dropped it into a tabulating machine, according to Davis. "My rights were deprived," Davis said.

Like LaKiesha Williams, Davis filed a complaint with law enforcement. After Williams filed hers with the Hale County sheriff, she says she received a series of telephone calls, including a few from Sen. Singleton.

Before the 2005 House election, Williams says in a sworn statement, the senator's wife and his aunt, Shirley Pickens, visited her at home. Williams says Tinker and Pickens had her sign some paperwork and told her to expect an absentee ballot in the mail within a few days. But Williams was adamant that she never received the ballot, as the women had promised.

When the absentee ballot didn't arrive, Williams says she went to the polls on May 3, 2005, expecting to support Howard, who won the open House seat that day. Instead, Williams says she later learned that an absentee ballot in her name had been marked for Turner.

017078

In a phone call after she filed the sheriff's complaint, Williams claims Singleton suggested she recant the allegations against his wife and his aunt. "Don't help the white man," Williams says Singleton told her. Both Williams and Singleton are African-Americans.

Pickens had a simple response to the accusations from Williams: "Those are lies." She declined further comment.

Singleton, who won a special Senate election last year with 42 percent of his vote coming from absentee ballots, denied making the statements attributed to him. The senator says he only suggested Williams, a friend of his family, report the incident to District Attorney Michael Jackson. "I didn't trust the sheriff to do the right thing," said Singleton.

Hale County Sheriff Larry Johnson says he turned over the Williams complaint to the state attorney general because it concerned possible voter fraud. Johnson added that he did not forward the case file to Jackson's office because the district attorney is Singleton's friend and would have a potential conflict of interest.

Singleton says the DDL pressured Williams into complaining. The senator accused the DDL, with a predominantly white membership, of attempting to restore white politicians to their former positions of county power.

"The whites, they've stolen elections year after year after year," Singleton said. "Now the black folk have taken over the county and are voting for their own. Then, it's voter fraud." Beverly M. Bonds, DDL's secretary and treasurer, says the election reform group has black and white members.

DDL leaders say they are somewhat relieved that Tinker was soundly defeated in this year's Democratic primary for circuit clerk. But, four months after the primary, Tinker hasn't taken down all of her campaign signs.

Tinker declined to say whether she might try to keep her job by running a write-in campaign for this fall's general election. Since her name won't appear on the ballot, Tinker may serve as the county's absentee voting manager next month.

Alabama

Voting fraud hurts democracy (Montgomery Advertiser editorial)

Montgomery Advertiser
Editorial
October 8, 2006

There are few things more important to a functioning democracy than the sanctity of the ballot and a sense among potential voters that elections are honest and fair.

If people come to believe that their vote truly doesn't count, or that their legitimate vote is offset by an illegitimate one, then faith in the democratic process is eroded. The result is low voter turnout and lack of faith in government.

That's why it is crucial that federal, state and local authorities come down hard on anyone who in any way attempts to stuff ballot boxes or buy votes or unduly influence individual voters.

In Alabama, unfortunately, one way that the voting system historically has been abused has been through misuse of absentee ballots. Past court cases have disclosed numerous instances where the outcomes of elections have been skewed by people who manipulate absentee ballots in one way or another.

In an article on Page 1A today, Montgomery Advertiser reporter Francis X. Gilpin explores problems with voting in several counties in West Alabama that center on absentee ballots.

This isn't just a West Alabama issue, however.

The state was shocked in 2000 to learn that 11 people in Winston County in North Alabama were indicted in a federal state investigation into voter fraud. Among the indicted were the sheriff, the circuit clerk, a district judge and the county commission chairman. Nine of them pleaded guilty to charges involving such things as buying of absentee ballots with money or alcohol. In the affected Republican primary election that year, there were 1,102 absentee ballots cast. During a subsequent election there were about 150.

But despite that case, the abuse of absentee ballots seems centered in West Alabama, including Hale, Marion and Perry counties.

There some voters have shown up at the polls to vote only to find that someone had filed for an absentee ballot in their name and voted it without their knowledge. In other instances, large numbers of absentee ballots have been sent to one address. Reporters have found instances where absentee ballots were mailed to addresses where no one lived.

The sheer number of absentee ballots cast in some elections raises serious questions about voter fraud. It is not uncommon for 20 or 25 percent of the total vote in a West Alabama county or city election to be cast by absentee ballots, when 2 to 5 percent is the norm in other parts of the state.

For years some political leaders have defended those large absentee ballot percentages by claiming that large numbers of voters from those affected counties have to commute long distances to work and cannot get back to their home communities in time to vote.

But that explanation simply doesn't hold up to rational scrutiny.

Consider that the U.S. Census Bureau lists the commuting time to work for Hale County residents at about 29 minutes on average, compared to about 25.5 minutes for the nation as a whole. That might justify absentee ballot use slightly above the state and national norm, but not five or six times the norm.

017080

Nor does it explain why it is common for one candidate in an election to get a ridiculously high percentage of their votes from absentee ballots while their opponents get relatively few.

If the use of absentee ballots were simply a function of a high percentage of workers who commute, then all candidates should get higher than average absentee votes.

But as Gilpin's reporting shows, often those votes are outrageously skewed in favor of one candidate. Something is clearly amiss when one candidate gets 39 percent of his or her votes from absentee ballots while their opponent gets 2 percent, for instance. In one election, one candidate, Albert F. Turner, got 59 percent of his votes from absentee ballots while only 1 percent of his opponent's votes were absentee.

Such numbers defy logic.

It is crucial that federal and state law enforcement officials, especially Alabama Attorney General Troy King, not tolerate such abuses. We urge King to make it a priority to thoroughly investigate any substantive allegations of voter fraud and to prosecute all violators to the full extent of the law. We also urge him to ensure that the election process in November is closely monitored.

In a democracy, voter fraud cannot be tolerated. The entire democratic process depends upon the public believing in the sanctity of the ballot.

AG's office subpoenas election records

By: Evelyn Pelfrey, Media General News Service

The Alabama Attorney General's office is investigating the June 6 primary election in Barbour County, according to Joy Patterson in the AG press office. She confirmed Friday that Barbour County Probate Judge Nancy Robertson and Sheriff Marshall Williams, Jr. have complied with subpoenas to turn over all of the ballots and the voting machines stolen from one precinct before the polls opened on election day.

"It is part of an investigation into alleged voting irregularities and theft of voting machines," Patterson said.

Patterson said no further information is being released at this time.

"I don't know what they're looking for," Robertson said. "I don't have a clue."

Williams and Circuit Court Clerk David Nix managed the primary election because Robertson was running for a second term as probate judge.

"I haven't done anything wrong and I don't think any of the other election officials have done anything wrong," Williams said. "It is a big job and we handled it according to the law."

Shortly after the primary election, it was discovered that the 690 Clayton precinct votes had been left off of the unofficial summary report on election night, so a computerized re-count was conducted.

"The central counting machine kept dropping the Clayton Courthouse votes," Robertson said. "It was a computer glitch."

After the re-count, in which Robertson gained 491 more votes, the results were re-certified by the Barbour County Democratic Executive Committee.

"It didn't change the runoffs or the other races' results," Robertson said.

The stolen voting machine and handicap voting machine, which had no ballots in them, were found unharmed the next day on the side of the road.

"They didn't take any ballots," Williams said. "Our ballots are numbered and they have to correspond with the voter list."

A spare voting machine was rushed to the precinct on election day so votes were not missed.

Williams said the investigation into the theft is at a standstill.

"I have no leads, no nothing on it," Williams said. "I still think it was young people with no motive, really."

Williams and Robertson said they don't think the attorney general's investigation will reveal anything that would change the primary election results.

Robertson beat challenger Orvie Locklar, chief investigator for the Barbour County District Attorney's

017082

Office, by 55 percent to 44 percent of the primary vote. Two of the local races ended up in a run-off, scheduled for July 18.

In the six-man sheriff's race for the office Williams is vacating, two sheriff's deputies are in a run-off.

Grady Wilburn Bush got 21 percent of the primary vote to Leroy Upshaw's 33 percent.

In the District Six county commission race, which includes the Mount Andrew Community Center precinct where the voting machines were stolen, incumbent commissioner Pat Ivey got 363 votes in the primary to Jason Guice's 325 and Debbie Tyler's 96.

Absentee voter records were not subpoenaed, according to Nix, who is the absentee election manager.

"The absentee ballots are turned over to a polling board," Nix said.

Robertson said she held on to the black data packs from the voting machines in case another re-count is necessary.

Why renew Voting Rights Act? Ala. town provides answer

By DeWayne Wickham

When Asian-American residents of Bayou La Batre, a small Alabama town that was made famous by Forrest Gump, went to the polls in August 2004, they might have had one of the film's most memorable lines on their mind. "Momma always said life was like a box of chocolates. You never know what you're gonna get," Gump, the title character in the Oscar-winning movie, said prophetically in the opening scene. After being urged by several candidates to vote in the municipal election, many of the Southeast Asian-Americans in the town of about 3,000 had their ballots challenged. Nearly 50 of them were forced to fill out paper ballots and have another registered voter vouch for them.

Huynh

Despite these hurdles, Phuong Tan Huynh — the first Asian-American to run for City Council there — defeated Jackie Ladnier in the October runoff, but only after the Justice Department intervened.

Tuesday, the Lawyers' Committee for Civil Rights Under Law, a non-partisan group, released a 187-page report that argues the need for reauthorizing the sections of the Voting Rights Act that are set to expire next year. One of them empowered the Justice Department to send observers to monitor Bayou La Batre's runoff election.

Though the law "has accomplished much during its first 40 years, more remains to be done in order to protect the rights of racial and ethnic minorities to fully and equally participate in the electoral process," the report concludes.

Prime example

What happened in Bayou La Batre is proof of that. The voter challenges came from supporters of Ladnier, who is white. The challengers complained that the Asian-American voters were not citizens, had criminal records or didn't live in Bayou La Batre.

Ladnier told the *Mobile Register* he knew that some of the Asian-Americans had been in trouble with the law. "A lot of them we didn't know but had to make a judgment, say if someone came and met them outside and ... seemed to be guiding them through it," he told the newspaper. "Also, we figured if they couldn't speak good English, they possibly weren't American citizens."

That's just the kind of knee-jerk opposition the Voting Rights Act is supposed to guard against.

"We can confirm that there were race-based challenges to Vietnamese voters in the city's primary election," Justice Department spokesman Eric Holland told me. "We monitored the election and in concert with local officials prevented any race-based challenges" in the runoff. That's the sort of good news ending that drafters of the report, "Protecting Minority Voters: The Voting Rights Act at Work 1982-2005," want to safeguard.

Support, but concern

Both President Bush and the Republicans who control Congress support renewal of the Voting Rights Act. But that hasn't stanching the concerns of civil rights activists.

"The president has made a general statement of support for reauthorization of the Voting Rights Act ... (but) the devil is in the details," Theodore Shaw, the president of the NAACP Legal Defense Fund, said during a January conference call with The Trotter Group, an organization of black columnists.

Likewise, Karen Narasaki, executive director of the Asian American Justice Center, told the group that she fears conservatives will weaken the law even as they renew it. "You can reauthorize something, but it does not necessarily mean that it is actually going to be effective and strong" when the process is completed, she said.

And that's what worries me. The renewable sections of the Voting Rights Act are the heart of this important law. They require "preclearance" of voting law changes; they permit the use of federal election monitors and language assistance for voters in jurisdictions that have a history of discriminatory treatment of minority voters.

It was these protections that paved the way for the election of Phuong Tan Huynh — and which need to be renewed intact.

DeWayne Wickham writes weekly for USA TODAY.

Initiative: Check voting machines

By Howard Fischer

CAPITOL MEDIA SERVICES

PHOENIX — A self-described grass-roots organization wants to force a sample manual count of ballots cast with electronic voting machines to ensure they are recording votes accurately. Arizona Citizens for Election Reform has filed the necessary papers to begin circulating petitions to put the issue on the November ballot. The group has until July 6 to get 122,612 valid signatures.

But Kevin Tyne, deputy secretary of state, said the measure is unnecessary and would be a step backward. He said all the research shows machines are more accurate than hand-counted ballots.

Stefan Silverston, vice chairman of the citizens group, said there is a concern that electronic machines — particularly the touch-screen machines that are becoming more popular — are subject to tampering and other problems that could change the outcome of an election. One provision of the initiative would require all machines to produce a paper receipt people can review to make sure their vote was recorded properly. Tyne said that's already a requirement for the touch-screen machines the state is buying for use by the visually handicapped. Most other machines use paper ballots marked by individuals, which are fed into optical scanners.

The proposal also would require that a sample number of electronic votes be compared with paper ballots. If the difference in count at any polling places is more than four, a full hand count would be required. Silverston said that would ensure the machines are accurate. Tyne said that ignores evidence showing the hand counts are more likely to produce errors than the machines. But he acknowledged there have been problems with machines. Most recently, there was a recount of ballots in a Republican legislative primary in Phoenix, made necessary by the closeness of the vote. But the recount — in this case, feeding the same paper ballots back through scanners again — produced nearly 500 additional votes and changed the outcome of the race.

Harper withdraws his election lawsuit

Casey Newton

The Arizona Republic

Jan. 12, 2006 12:00 AM

A state senator investigating a disputed election has withdrawn a lawsuit seeking access to the ballots, but he said he would file a new suit soon.

Sen. Jack Harper, R-Surprise, said he decided to drop his suit in Superior Court after the Maricopa County Attorney's Office opposed his request for a continuance.

He said he needed more time to read a report by an outside investigator, which he expected to receive late Wednesday.

The investigator, Douglas Jones, and the circumstances of his hiring have brought criticism to Harper.

The controversy concerns the September 2004 District 20 primary race, in which John McComish defeated Anton Orlich after a recount found more than 400 new votes and reversed the initial outcome.

After the Senate refused to pay for Harper's investigation into the recount, Harper turned to the weekly newspaper *New Times*, which paid \$3,000 for a University of Iowa computer-science expert to examine the results.

Last week Democratic Sen. Bill Brotherton filed an ethics complaint against Harper, arguing he might have acted improperly in issuing a legislative subpoena to assist in an inquiry funded by a private party.

Harper said he expected to file a new lawsuit after Jones releases his report.

"If Jones says that he cannot determine where the nearly 500 new votes showed up, then we need to see the ballots," Harper said. "And I understand that his report says that he needs to see the ballots."

Efforts to reach Jones on Wednesday were unsuccessful.

County Attorney Andrew Thomas said that if Harper needed more time to build his case, he shouldn't have requested an emergency court order to grant access to the ballots.

"For him to file this lawsuit, claim it was an emergency, then ask for a delay, and dismiss his lawsuit when he didn't receive it, makes absolutely no sense," Thomas said. "The reality is, he filed a frivolous lawsuit, the taxpayers of Maricopa County are out thousands of dollars in attorneys' fees devoted to responding to this suit, and rather than facing the music in court, he's dismissed the action and refuses to accept responsibility for what he's done."

Voting expert says ballots from primary should be examined

Harper to face ethics panel

Casey Newton

The Arizona Republic

Jan. 13, 2006 12:00 AM

A voting-technology expert is calling for the examination of ballots cast in a District 20 primary election, saying it is the only way to quell concerns that the ballots were tampered with.

While the report gives support to those who have questioned the handling of the September 2004 recount, the circumstance of its release could mean trouble for the state senator who sponsored it.

"Without empirical examination of a random sample of voted ballots, there is no way to decide between the hypothesis that ballots have been altered and the hypothesis that ballots were miscounted by poorly calibrated machines," University of Iowa Associate Professor Douglas Jones wrote in a report released Thursday.

The study's release marked the latest chapter in a saga that began as a simple inquiry into the results of an election.

It has grown into a contentious fight over voting machines, Senate ethics and the role of the press in government investigations.

State Sen. Jack Harper, who had commissioned the report, said he was disturbed by the possibility that someone tampered with ballots cast in the Republican primary between John McComish and Anton Orlich.

McComish beat Orlich after a recount found nearly 500 new votes, reversing the initial outcome.

"I'm very alarmed that Dr. Jones believes one of the options may be fraud," said Harper, R-Surprise.

Last year, an investigation by the Maricopa County Attorney's Office found no wrongdoing in the handling of the recount.

But the appearance of so many new votes has baffled investigators, Jones included. He was traveling Thursday and could not be reached for comment.

The results of Jones' examination were first published Wednesday on the Web site of *New Times*, the weekly newspaper that agreed to pay for the study after the Senate refused.

Sen. Bill Brotherton said Thursday that he would pursue an ethics complaint against Harper, arguing he used his legislative subpoena power to "provide a scoop for a newspaper."

The Senate Ethics Committee is expected to discuss the issue next week.

In a story in Thursday's *New Times*, Editor Rick Barrs defended the paper's decision

017087

to pay for the outside expert.

"It's done frequently across the country," he wrote. "Otherwise, public officials would get away with way more cover-ups."

But Brotherton, D-Phoenix, rejected what he described as an "ends-justify-the-means mentality" among those seeking access to the ballots.

"What I believe is that whatever the circumstances, you should do the right thing in the right manner," Brotherton said.

Harper said he plans to file a lawsuit seeking access to the ballots.

He added that he had received an offer from an unnamed outside group to fund the ballots' examination, should one be allowed.

Still, Harper acknowledged that the Ethics Committee inquiry could be cause for concern.

"If they let the facts speak for themselves, I don't have anything to worry about," Harper said. "If politics comes into it, then who knows what'll happen."

The Birmingham News

Ex-sheriff, attorney deny conspiracy

Tuesday, January 10, 2006

VAL WALTON
News staff writer

Former Jefferson County Sheriff Jim Woodward and attorney Albert Jordan told jurors in their federal trial Monday they did not conspire to illegally run criminal history checks on absentee Bessemer voters for Woodward's election contest.

Woodward, testifying in his own defense, said he gave Sheriff's Department employees authorization to conduct background checks using restricted federal databases as part of a legitimate investigation into allegations of voter fraud in Bessemer.

His office started receiving more calls about voting irregularities following the Nov. 3, 1998, general election, he testified.

"I felt that it was necessary to investigate these complaints of voter fraud," Woodward said during the fourth day of testimony. "I felt there was a lot of evidence there."

Woodward testified he brought in the Alabama Bureau of Investigation and tried to get the state Attorney General's office to also investigate.

But Justice Department lawyers contend Woodward's investigation of voter fraud began only after election officials announced he lost the general election to his Democratic challenger, Mike Hale.

The prosecution said Woodward and Jordan, who headed Woodward's legal battle to regain his office, searched for ways to challenge those votes and zeroed in on absentee ballots, particularly those cast in the Bessemer Cutoff that went decisively for Hale.

Asked about timing:

Prosecutor Natasha Tidwell quizzed Woodward during cross-examination about the timing of the probe, suggesting the two men initiated a cover-up on Nov. 20, 1998, using complaints from earlier elections after media reports that criminal databases were being used illegally.

Woodward denied the accusation.

Woodward testified his purpose was above board to "ferret out" voter fraud crime and to prosecute.

"Was it a legitimate investigation?" his attorney Al Agricola asked.

"Absolutely," Woodward answered.

017089

Woodward said he sought Jordan's assistance because of his past expertise in challenging voter fraud.

"He was my attorney," Woodward said. "I thought I could provide my attorney with anything."

Jordan is accused of calling Royce Fields, then an assistant sheriff in command of the Bessemer division, to get absentee voter lists in Bessemer and to run the checks using department employees, including secretaries.

Prosecutors said Jordan had no independent authority to access the database or have access to the results from the restricted National Crime Information Center database.

Jordan told jurors he never called Fields and did not authorize anyone to conduct criminal checks.

"I didn't ask him to do anything," he said.

Fields testified last week that Jordan, with Woodward's approval, called him two days after the election for the checks. Fields said Woodward later directed him to take the results to Jordan's office.

Testimony disputed:

Jordan disputed Fields' testimony.

Jordan said he was unaware that Fields and a private investigator were coming to his office. He said he also did not know the information Fields brought contained information from the restricted database. He did recall seeing notations on the voter list, which is public information, he testified.

Jordan said he did not assist Woodward in investigating voter fraud but offered a recommendation for the checks to be conducted in a non-discriminatory way.

Jordan's attorney, Bill Clark, suggested Fields, who was granted immunity from prosecution as an unindicted co-conspirator, suggested running the background checks.

Woodward filed an election contest on Nov. 24, 1998. Jordan said information used for the challenge came from other sources such as a list of people suspected of voter fraud provided by Lawrence McAdory, a former state representative.

Also Monday, defense lawyers presented witnesses to testify about the men's character. The defense rested, and the prosecution did not offer any rebuttal witnesses.

Jurors will return to the courtroom today for closing arguments.

Worley: Chapman plan is a 'stunt'

Wednesday, May 17, 2006

By **BILL BARROW**
Capital Bureau

MONTGOMERY -- Secretary of State Nancy Worley, a Democrat, has accused Republican Beth Chapman of politicizing the voting process by promising to watch polls in a heavily Democratic county and offering monetary rewards to voter fraud whistleblowers.

Chapman, the state auditor running for secretary of state, announced her plans last week in a made-for-TV news conference, complete with Chapman and a group of Hale County voters raising purple index fingers, a la Iraq, in support of honest elections.

Chapman said the Hale voters invited her to spend the June 6 primary in their county, long a hotbed for election disputes and alleged irregularities. It was her idea, she said, to offer two \$5,000 rewards to voters who provide information about primaries that leads to voter fraud convictions.

The intent, Chapman said, is merely to highlight the need for "honest and fair elections." Worley cast the exercise as a cynical political ploy.

"To take a very serious matter such as voter fraud and turn it into a political stunt is an affront to the Legislature who passed the voter fraud laws, the district attorneys who enforce the laws and the citizens of Alabama who may call the attorney general's office or the secretary of state's office at any time to report voter fraud," she said.

Worley said offering cash rewards could lead citizens to manufacture fraud that they could then report. "We should encourage all Alabamians to follow the law, not offer them monetary rewards to do what is right," she said.

Chapman retorted Tuesday: "If someone is willing to commit voter fraud to get money, chances are they've committed voter fraud before, and if not, they will in the future."

She challenged Worley to match her offer: "Then we'll have \$20,000 to work with ... and we can get four convictions, because I'm sure there will be at least four instances of voter fraud in this state on June 6th."

Chapman said she has not asked Attorney General Troy King whether she can use campaign money or must instead use personal funds for the rewards.

"I won't even ask that question until there's a need to pay," she said. "My hope and my prayer is that there won't be one incident of voter fraud. I'm an optimist. I believe people will do the right thing, whereas Ms. Worley believes that some people may commit voter fraud as a way to get money. ... That doesn't sound like a very clear trust of the people to me."

Disputed Hale County elections have landed in court in recent years. The U.S. Justice Department, which

enforces provisions of the Voting Rights Act; has sent observers and investigators to the county more than 20 times, according to published reports.

State Sen. Bobby Singleton, D-Greensboro, recently testified before a federal panel that white poll watchers at majority black precincts had closed polls early. And earlier this year, the Alabama Democratic Party took over the local party's duties to handle candidate qualifying.

Unopposed in the GOP primary, Chapman awaits the Democratic nominee in the Nov. 7 general election. Worley faces a primary challenge from Ed Packard, one of her employees in the secretary of state's elections division. The secretary of state is the top election official in Alabama.

Chapman and Worley have fired veiled shots at one another before. As state auditor, Chapman appoints registrars in 66 of Alabama's 67 counties. She has generally been critical of how Worley has dealt with registrars and other local officials when administering elections and implementing new policies related to federal voting laws.

Currently, the federal government is suing Worley over the state's noncompliance with some federal election law changes. Worley has also faced criticism over high staff turnover and her purchase of a luxury sport utility vehicle for her official use rather than the standard edition included on the state purchase list.

Prop. 200 focus of House hearing

Chris Ramirez

The Arizona Republic

Aug. 4, 2006 12:00 AM

Proposition 200 has helped prosecutors find - and, for the first time, prosecute - non-citizens who have tried to vote in Arizona elections, Maricopa County Attorney Andrew Thomas told a congressional subcommittee.

Thomas and Secretary of State Jan Brewer on Thursday each testified to the Committee of House Administration that the controversial law is a safeguard against voter fraud.

And although the number of cases at this point is small and there are plenty who say the issue is overblown, the pair stressed that fraud is a reality.

"We're only now just chipping away at this problem," Thomas said.

Thursday's hearing was the latest in a series of 21 hearings that have crisscrossed the nation this summer. Leaders of the U.S. House of Representatives have been holding the sessions to get input for a proposed immigration-reform law.

Critics of Proposition 200 dismissed the hearings as a sham and a tactic to delay passage of a comprehensive immigration bill.

"We don't need Congress to come here and tell us our immigration policy has problems," state Rep. Steve Gallardo, D-Phoenix, said in a press conference before the hearing. "We need them to go back to Washington and fix them."

Last year, 10 non-citizens who registered to vote were indicted, Thomas said. Four actually voted. Prosecutors also are reviewing another 149 voter-fraud cases involving non-citizens attempting register.

"When non-citizens vote, their votes undermine the franchise of all American voters," Thomas said. "This may represent only a fraction of the fraud that's probably going on."

Prosecutors also have brought charges against 13 convicted felons who voted in recent elections, Thomas said.

Phoenix immigration attorney Daniel Ortega, who also testified, disputed claims

that voter fraud involving immigrants was a rampant problem. Proposition 200 will do "disproportionate harm" to minority voters, particularly those living in poverty, he said.

"It's a harmful solution to a problem that doesn't exist," Ortega said.

Outside the hearing, religious groups and immigrant advocates demonstrated against Proposition 200 and criticized both the law and the hearing series.

Roberto Reveles, president of the We Are America Coalition, believed the proposition alienates voters and discourages others, including the disabled and first-time voters, from casting ballots.

"The only fraud that's going on is the fraudulent notion that there's hordes of illegal immigrants going to the polls," he said. "They're trying to create fear."

At one point, a crowd of about 70 pro-immigration demonstrators gathered near the Capitol lawn. A lone Spanish-speaking anti-immigration supporter heckled them.

A shouting match ensued, but there the heckler walked away without incident.

The next hearing in Arizona will be Aug. 17 in Sierra Vista.

October 18, 2006

California Letter Investigated for Warning to Immigrants

By JESSE MCKINLEY

SAN FRANCISCO, Oct. 17 — Federal and state authorities are trying to determine who sent a letter to some Latinos in Southern California that falsely suggested that it would be a crime for immigrants to vote in the coming election.

The letter, written in formal, sometimes clumsy Spanish and signed “Sergio Ramirez,” was mailed last week to an undetermined number of people with Spanish surnames in Orange County, the authorities said. It advised recipients that “if you’re an immigrant, voting in a federal election is a crime that can result in incarceration,” or deportation.

While illegal immigrants are barred from voting, legal immigrants who have become citizens are permitted to do so.

The letter also stated that the federal government had installed a computer system to verify the names of new registered voters who vote in October and November and that anti-immigration groups would be able to access that information. Election Day is Nov. 7, but early voting is allowed Oct. 20-29 in Orange County.

Cynthia Magnuson, a spokeswoman for the Justice Department, which along with the California attorney general’s office is investigating the letter’s source, said there was no such database.

“The letter contains false information,” Ms. Magnuson said.

The letter was printed on stationery labeled with the name of the California Coalition for Immigration Reform, a strident anti-illegal-immigration group whose Web site features a video on how illegal immigrants bring disease to the United States.

But Barbara Coe, the group’s leader, told The Los Angeles Times, which first reported the letter on Tuesday, that her group had not sent or authorized it, and that she did not know a Sergio Ramirez. On Tuesday, Ms. Coe did not return repeated phone calls and e-mail seeking comment.

Some Latino leaders expressed doubts on Tuesday about Ms. Coe’s denial and said they suspected the letter was part of a concerted, long-term effort on the part of groups like hers to intimidate voters.

“They’re taking as much action as they can to make the lives of Latinos as miserable as possible,” said Brent Wilkes, the national executive director of the League of United Latin American Citizens, a civil rights group.

Gov. Arnold Schwarzenegger called the letter racist and urged Bill Lockyer, the California attorney general, to prosecute those responsible with a hate crime. A collection of other civil rights groups also called on Attorney General Alberto R. Gonzales to investigate the letter as a violation of federal voting laws.

Nathan Barankin, a spokesman for Mr. Lockyer, said his office had been alerted to the letter on Monday morning, after a weekend in which Latino leaders fielded calls from outraged constituents.

“They could be naturalized citizens or they could be fourth-generation Californians,” Mr. Barankin said of the recipients. “What we do know is that some of the recipients of this letter are legal and longtime registered voters in California.”

Mr. Barankin said the letter could have violated two California laws. One bans the use of coercion or intimidation in an effort to prevent someone from voting; the other makes it illegal to knowingly challenge a person’s right to vote on fraudulent and spurious grounds.

It was unclear, Mr. Barankin said, how many of the letters were distributed, but his office expected more complaints.

“We’re going to determine who sent it, and why they sent it and then from that, if there’s enough evidence to prosecute,” Mr. Barankin said.

Orange County, between Los Angeles and San Diego, has seen a substantial increase in its Latino population over the last two decades. A 2005 estimate by the Census Bureau reported that nearly one in three Orange County residents was of Latino or Hispanic origin.

Representative Loretta Sanchez, a Democrat from Garden Grove, in northern Orange County, said that she had heard from a handful of constituents in her district who received a letter, and that she feared it could scare off first-time voters.

“Santa Ana and Anaheim are the new Ellis Island of the United States,” Ms. Sanchez said, mentioning two Orange County cities with large Latino populations. “New people are becoming citizens every day, and who knows the sophistication level when they get a letter like this?”

But others thought the letter would have little effect.

“I think Latino voters are astute enough not to be intimidated,” said John Trasviña, the interim president and general counsel for the Mexican American Legal Defense and Educational Fund in Los Angeles. “And they’ve seen the same tactics used against them in the recent past as well as the farther ago past. And they won’t take it.”

State Investigating Intimidating Letter Sent to O.C. Latinos

Anti-illegal immigrant group disavows the letter, which focuses on voting issues.

By Jennifer Delson, LA Times Staff Writer
October 17, 2006

The state attorney general is investigating a Spanish-language letter warning some Orange County Latinos that they could be jailed or deported if they vote in the November election.

The letter, which purports to be from a Huntington Beach-based group, also warns that the state has developed a tracking system that will allow the names of Latino voters to be handed over to anti-immigrant groups.

"You are advised that if your residence in this country is illegal or you are an immigrant, voting in a federal election is a crime that could result in jail time ...," the letter says.

The letterhead resembles that of the California Coalition for Immigration Reform, a group that advocates tightening the border, among other things. But the group's founder, Barbara Coe, said she believed it was fraudulent. She said she did not know the person who signed the letter, "Sergio Ramirez," that she did not authorize it and was unaware of anyone in her group who did.

Nonetheless, it has riled Latino leaders and voters.

One person who received the letter is the wife of a Garden Grove City Council candidate. She said her husband, Benny Diaz, called friends after the letter arrived and found five others with Latino surnames who had received the note.

"It's a very malicious and degrading letter. It's to pull Latinos down and make them afraid," said Diaz, who is president of the Garden Grove chapter of the League of United Latin American Citizens.

"Of course it's going to affect me and any other Latino candidate in Orange County," he added.

John Trasviña, interim president and general counsel for the Mexican American Legal Defense and Educational Fund, said he had asked the U.S. Department of Justice to investigate the letter.

Sen. Gloria Romero (D-Los Angeles), who called on California Secretary of State Bruce McPherson and state Atty. Gen. Bill Lockyer to investigate, believes the letter is an effort to scare Latinos from voting in Orange County.

"You can't help but feel disgusted with the contents of this letter.... I'm not just going to sit silent," said Romero, who is up for reelection in November.

Lockyer spokesman Nathan Barankin said the letter was "something we are investigating aggressively right now," he said.

The sender could be charged with a felony and receive up to three years in state prison, he said.

Trasviña wants an investigation of a "potential violation" of federal election law, which prohibits intimidation, threats or coercion.

He said he was aware of six people who received the letter, all of whom "appear to be naturalized citizen voters from Latin American countries." Voters' birthplaces are available from voter registration records.

Coe said that in the last four days she had taken dozens of calls from irate Orange County Latinos who received the letters, which does not have the group's logo — an outline of the state

of California — but has a variation of an eagle logo used on the group's website.

The letter "puts a shadow on our credibility, that we would target certain people who might be citizens of our country," Coe added.

She said her group was investigated by the FBI in 1996 and 1998 because members held signs near polls stating that only citizens can vote.

The letter's assertion that immigrants can't vote is untrue, because immigrants who become naturalized citizens can register to vote. Trasviña said that an undocumented immigrant who voted could be subject to deportation and jail.

The letter's assertion that the state has developed a computer system that will make it easy to track down immigrants and illegal residents, however, is false, he said.

Amin David, who leads the civic group Los Amigos of Orange County, said the Spanish used in the letter is very formal, perhaps suggesting it was written by a non-native speaker. The Spanish includes grammatical errors.

Officials probe mailer that warns Latino voters

By Aurelio Rojas - Bee Capitol Bureau

Published 12:00 am PDT Wednesday, October 18, 2006

Gov. Arnold Schwarzenegger said Tuesday that whoever sent a mailer to Latino voters in Orange County warning them it is illegal for immigrants to vote committed an act of political intimidation and should be prosecuted "to the fullest extent of the law."

"Nothing is more un-American than the kind of political intimidation represented by these acts," Schwarzenegger said in a statement. "Further, targeting voters of Hispanic descent is racist and constitutes a hate crime under California law."

Secretary of State Bruce McPherson said he has "ordered a thorough, prompt and vigorous investigation" of the mailer sent to Latinos warning them they could be jailed or deported if they vote in the Nov. 7 election.

The mailer, written in Spanish, erroneously states that it is a crime for immigrants to vote. It also says the state has developed a computer system -- available to anti-immigration groups -- that will make it easy to track down the names of Latino voters.

"You are advised that if your residence in this country is illegal or you are an immigrant, voting in a federal election is a crime that could result in jail time," the mailer says.

017101

Investigators for the state attorney general's office today are scheduled to interview the founder of the Huntington Beach organization whose letterhead resembles that on which the mailer was sent.

But Barbara Coe, chairwoman of the California Coalition for Immigration Reform, said her group had nothing to do with the mailer.

"It was on altered letterhead," said Coe, whose group was investigated twice by federal officials in the 1990s for allegedly intimidating Latino voters. "We did not send it, and we would never send a letter to individuals. We don't know what their status is."

In a letter issued Tuesday, the Mexican American Legal Defense and Educational Fund and 21 other Latino and Asian American civil rights organizations requested that U.S. Attorney General Alberto Gonzales conduct a federal investigation into voter intimidation and suppression tactics in Orange County.

"The letter is a naked attempt to intimidate duly registered Latino citizens from exercising their right to vote," said John Trasvina, MALDEF's interim president.

MALDEF noted the letter misleadingly claims that voting by all immigrants is illegal -- naturalized citizens can register to vote -- and that anti-immigrant groups have access to a federal government database of voters.

Coe's group was investigated in 1996 by the FBI and in 1998 by the U.S. Department of Justice after members held signs near polling stations stating only citizens can vote. No charges were filed.

Coe said investigators from the state attorney general's office called her Tuesday to inform her they would visit her today.

Nathan Barankin, a spokesman for state Attorney General Bill Lockyer, confirmed Coe's account and said his office has launched a vigorous investigation.

Under state law, the sender of the mailer could be charged with a felony and receive up to three years in state prison.

Barankin emphasized it is not illegal for immigrants to vote.

"If that were true, then Arnold Schwarzenegger couldn't vote," said Barankin, referring to the Austrian-born governor.

Most of the mailers have been sent to homes in Garden Grove, where Democratic Assemblyman Lou Correa -- a Latino -- is in a heated race against Republican Assemblywoman Lynn Daucher for a state Senate seat.

Phil Angelides, the Democratic nominee for governor, charged the mailers are designed to suppress the Latino vote in Orange County.

He noted that in the 1980s the Republican Party hired uniformed security guards to stand outside polling stations.

In response to allegations that voters were intimidated, the state enacted a series of laws aimed at such tactics.

"This is the latest in a disgraceful pattern of efforts to intimidate Latino voters and silence their voice at the polls," Angelides said in a statement.

Officials welcome FBI probe; hope it will end recount controversy

Federal intervention puts state inquiry on hold

By Phil Riske

Negotiations between Senate and Maricopa County officials to examine a random sample of ballots from a 2004 recount election were underway when FBI agents took control of all 17,000 ballots for a U.S. Justice Department investigation.

Under a U.S. District Court grand jury subpoena and after two days of arrangements with federal officials, County Treasurer David Schweikert turned over all District 20 Republican primary ballots and original envelopes in which early ballots were placed. The materials will undergo forensic examination by the FBI to determine whether there was ballot tampering, said Barnett Lotstein, special assistant county attorney.

"We accomplished our objective and that was of an independent review," Mr. Lotstein said. "With the grand jury involved, theoretically every investigation is a criminal investigation, but there is no targeted suspect.

"They will not do a recount, which is one of the concerns [County Attorney] Andrew Thomas had. In our judgment, there was no tampering," Mr. Lotstein said.

Senate President Ken Bennett said, "I'm glad that the ballots are going to be looked at." He added, however, that he would have preferred the Senate complete its investigation, which was launched by Sen. Jack Harper, R-4.

"I could not support what I felt was his [Mr. Harper's] goal of doing a full recount," Mr. Bennett said. "I was looking forward to the Senate wrapping it all up because of all the publicity about it..."

Federal officials would not comment on the investigation, and it remained a mystery who contacted the Justice Department.

What happened in 2004

On primary election night 2004, conservative candidate Anton Orlich led moderate John McComish by four votes, triggering an automatic recount. (State law requires a recount when the spread is 50 or fewer votes in a legislative race.)

The recount, where 489 additional votes were tabulated, gave Mr. McComish the nomination by 13 votes, triggering an 18-month controversy that has seen an unsuccessful lawsuit by Mr. Orlich, a review of the vote by the Maricopa County Attorney's Office that found no wrongdoing and, more recently, Mr. Harper's Senate investigation.

As part of that investigation, *New Times* reporter John Dougherty, Mr. Orlich and Mr. Harper paid expenses for Iowa University voting machine expert Douglas Jones to come to Phoenix and conduct an audit of machines used in the recount with sample ballots that he had marked with a variety of pens.

While he did not allege fraud in the recount, Mr. Jones concluded there was an opportunity for wrongdoing. His report, which was later paid for by the Senate, confirmed what the county had said were problems with the sensitivity of Opti-Scan machines to read different marks made by voters who mailed in early and absentee ballots.

Mr. Jones said that only an audit of the recount ballots could determine the disparity in the District 20 results.

With the backing of 20 other senators, Mr. Harper had planned to subpoena the county for access to the ballots, but the Justice Department intervention has put his investigation on hold.

"It was my hope the Senate could have gotten to the bottom of what had happened," he said. "It didn't look like we were making progress. I'm ecstatic the Justice Department is stepping in, and we can be sure that an independent expert is going to be inspecting the ballots, and the questions that have surfaced will be answered.

"I imagine the Justice Department wouldn't have gone out on a limb unless they had probable cause. They pretty much know more than I do. I think information I know probably doesn't rise to probable cause," said Mr. Harper, who had called for a federal investigation in a press conference, but would not confirm or deny that he contacted the Justice Department.

"I had heard the Justice Department was interested," he said. "Actually, there are many things under investigation, and I probably shouldn't talk about the details of the investigation."

Secretary of State Jan Brewer, the state's chief elections officer, said she has sought more information about the recount problems and has no objection to an examination of the ballots.

"That's what we've said all along: Just go through the appropriate measures to obtain them, and that's what they've done," she said upon learning of the Justice Department action. "Certainly it has reached a high level."

Mrs. Brewer said there has been a lot accurate and inaccurate information about the recount, and "The public and the people are really, really confused." She said she believes there was no fraud committed in the recount, and only the results of the federal investigation will determine the level of public confidence in the state election system.

In a Jan 26 letter to Mrs. Brewer, the Arizona ACLU asked Mrs. Brewer to "take control" and order an independent examination of the recount ballots.

Karen Osborne, county elections director, said, "We are just very pleased that a neutral agency — certainly with the FBI capability — has the ballots, and they can make their forensic examination, and we can get this issue settled once and for all."

Sen. Huppenthal: Pull samples from another district

Sen. John Huppenthal, R-20, says he studied Mr. Jones' analysis of the vote disparity, adding that votes from another district should be included in the federal investigation.

"The statistics indicate something strange happened," he said. "They're not only going to have to look at the District 20 ballots, they're going to have to look at another district and pull out a sample because they're not going to have a comparison by just looking at District 20.

"This could be cleared up in as little as a week, and I hope they don't go and bunker down for months. That would be inappropriate."

Mr. Jones, who said he was surprised and puzzled by the FBI intervention, agrees with Mr. Huppenthal about comparing the District 20 ballots with another district.

"That would make good sense in terms of good science to find out what's normal," he said. "From the legislative perspective, finding out what's normal is even more important than finding out whether there was wrongdoing here."

If the FBI conducts a criminal investigation, Mr. Jones said, information will be slow in coming to the public, and there will be little benefit to the Legislature.

Sen. Harry Mitchell, D-17, is sponsoring a bill requiring that the speaker of the House or the Senate president must first approve the issuance of a legislative subpoena, and that the state pay all expenses resulting from a subpoena.

"Maybe the cost will be the federal government's, not us," he said upon learning of the Justice Department's action.

Mr. Lotstein said the federal grand jury subpoena does not mean there is a grand jury investigation — that it's the process for acquiring the ballots, which were stored in a warehouse near Sky Harbor International Airport.

By law, ballots with federal office races must be held for 18 months, he said. Because of federal requirements, the county was reluctant to turn the ballots over to Mr. Harper.

"Now it's [the ballot examination] independent," Mr. Lotstein said. "Orlich will have no input. Harper will have no input. The *New Times* will have no input. They'll do it and put it to bed, and that's the end of it."

Mr. Orlich still refuses to comment for the record, but he denied he contacted the Justice Department.

Carol Corsica, chairman of Arizona Citizens for Election Reform (ACER) said she is worried nothing will come of the investigation.

"Mostly I'm concerned if an investigation is going to be done and made public," she said.

ACER has filed to place an elections reform measure on the general election ballot.

Rep. John McComish said, "After letting the news settle in for a little bit, it may be a good thing it's in the hands of the [federal government]. He said the public should wait for a report on the investigation before they lose confidence in the election system.

Feds look into 2004 primary ballots

Feb. 2, 2006 12:00 AM

The FBI took control of ballots cast in a 2004 Republican primary on Wednesday, a move that could put to rest a long-running dispute over who won the race.

At issue is the outcome of the close contest between John McComish and Anton Orlich. McComish prevailed after an automatic recount found nearly 500 new votes, reversing the initial outcome. Although election officials insist nothing is wrong with Maricopa County's voting machines, the recount has raised questions about the machines' reliability.

And while the U.S. Attorney's Office wouldn't comment on their subpoena of more than 11,000 ballots, county officials are hopeful the investigation will put to rest concerns that the ballots could have been tampered with between the primary and the recount.

While the investigation won't change the election's outcome, County Treasurer David Schweikert said he hopes the Department of Justice investigation puts the issue to rest.

Arizona
Arizona Ballot Could Become Lottery Ticket

By RANDAL C. ARCHIBOLD
New York Times
July 17, 2006

TUCSON, July 13 — To anyone who ever said, "I wouldn't vote for that bum for a million bucks," Arizona may be calling your bluff.

A proposal to award \$1 million in every general election to one lucky resident, chosen by lottery, simply for voting — no matter for whom — has qualified for the November ballot.

Mark Osterloh, a political gadfly who is behind the initiative, the Arizona Voter Reward Act, is promoting it with the slogan, "Who Wants to Be a Millionaire? Vote!" He collected 185,902 signatures of registered voters, far more than the 122,612 required, and last week the secretary of state certified the measure for the ballot this fall.

If the general election in 2004 is a guide, when more than 2 million people voted, the 1-in-2-million odds of winning the election lottery would be far better than the Powerball jackpot (currently about 1 in 146,107,962) but not nearly as great as dying from a lightning strike (1 in 55,928).

"People buy a lot of lottery tickets now," Mr. Osterloh said, "and the odds of winning this are much, much higher." (And most of the time there is not much lightning in Arizona.)

If some see the erosion of democracy in putting voting on the same plane as a scratch-and-win game — and some do — Mr. Osterloh sees the gimmick as the linchpin to improve voter turnout and get more people interested in politics.

In 2004, the year of a heated presidential election, 77 percent of registered voters cast ballots in Arizona, but in 2002 — the year Mr. Osterloh, a Democrat, ran for governor in what might politely be called a dark-horse campaign — it was 56 percent. Primary election turnouts are much lower.

About 60 percent of the voting-age population is registered, though that includes people who are ineligible to vote, like illegal immigrants and felons.

"Basically our government is elected by a small minority of citizens," said Mr. Osterloh, 53, a semiretired ophthalmologist who has helped write and campaign for various successful ballot initiatives.

Curtis Gans, director of the Center for the Study of the American Electorate in Washington, said the idea of a voter lottery had come up in other states, but he could not recall any moving forward with it. And he's glad.

"People should not go vote because they might win a lottery," Mr. Gans said. "We need to rekindle the religion of civic duty, and that is a hard job, but we should not make voting crassly commercial."

Editorial writers, bloggers and others have panned the idea as bribery and say it may draw people simply trying to cash in without studying candidates or issues.

"Bribing people to vote is a superficial approach that will have no beneficial outcome to the process, except to make some people feel good that the turnout numbers are higher," said an editorial in The Yuma Sun. "But higher numbers do not necessarily mean a better outcome."

The initiative calls for financing the award through unclaimed state lottery prize money, private donations and, if need be, state money. A spokeswoman for the Arizona Lottery Commission said its unclaimed prize pot fluctuated greatly, but it now stood at more than \$1 million.

Mr. Osterloh said private donors could add their own incentives, like a car dealership offering a new car to a random voter.

But he may be getting ahead of himself. There is the not-so-small matter of whether such a voter lottery is legal.

Passage of the initiative would supersede a state law barring any exchange of a vote for money, legal experts agreed, but whether it would get around similar federal laws was a matter of debate.

One federal statute calls for fines or imprisonment of up to one year to anyone who "makes or offers to make an expenditure to any person, either to vote or withhold his vote, or to vote for or against any candidate; and whoever solicits, accepts, or receives any such expenditure in consideration of his vote or the withholding of his vote."

"It's clearly illegal," said Jack Chin, a professor at the University of Arizona law school who has studied voting rights issues.

"This is cute and clever, but even though it responds to a real problem, it does so in a way that threatens to degrade the process," Mr. Chin said.

But Mr. Osterloh, who has a law degree, and the lawyer who helped write the initiative, Anthony B. Ching, a former state solicitor general, said the laws were meant to stop individuals from buying or selling votes for particular candidates or parties. In this case, it would be a state-sanctioned program with a high purpose and, they add, offering the chance to win — voters opt into the program — was not the same as giving everybody money to vote.

"I don't think the federal law would cover this kind of situation," Mr. Ching said.

State political leaders so far are keeping their distance.

Gov. Janet Napolitano, a Democrat who will also be on the November ballot as a candidate for reelection, has declined to take a position. The leaders of the State Senate and House, both Republicans, did not answer messages seeking comment.

But Mr. Osterloh presses on. He predicted the idea would spread to the two dozen states that allow citizen ballot initiatives if it was successful here.

The local chapter of We Are America, a group seeking to register Latinos to vote after large pro-immigration demonstrations last spring, plans to promote the initiative in its voter education and registration drives.

"We've certainly tried everything else, and people don't seem to turn out," said Roberto Reveles, president of the group.

And some voters are giving it serious thought.

"I'm pretty up on the issues, so I don't need it," said Beverly Winn, a grocery store clerk here. "But who wouldn't take money if they offer it?"

Dozens of New O.C. Democrats Were Signed Up as Republicans

Registrar will turn over 100 cases of improper registration for possible prosecution. The GOP practice of paying for new voters is blamed.

By Jean O. Pasco

Times Staff Writer

March 2, 2006

Orange County election officials said Wednesday they were preparing to turn over 100 instances of improper voter registration for possible criminal prosecution.

Included are three dozen complaints of Democrats being signed up as Republicans in one of the county's most competitive legislative districts.

Most of the examples being handed over to the district attorney's office emerged from a routine review by county officials, but Democrats independently found others.

The Democratic Voter Education and Registration Fund found numerous problems with registrations in central Orange County's 34th state Senate District, spokesman Paul Hefner said, including invalid phone numbers and addresses on hundreds of forms.

"You don't have to go to Washington to find the latest Republican scandal; they're footing the bill for registration fraud right here in California," Hefner said from Sacramento.

At issue is a GOP registration effort that began two years ago, said county GOP Chairman Scott Baugh. The Republican Party has paid bounties of up to \$10 for each new voter, hoping to make the central county friendlier turf for GOP candidates.

Baugh said the first complaints, from six people, came in February after welcome letters were sent to the new voters. Three registration workers have since been fired for being too aggressive or for submitting faulty paperwork, he said.

"We have no interest in bullying people into becoming Republicans because that's lost bounty money, lost mailing costs, and they're not going to vote Republican," Baugh said.

In complaints submitted to the registrar's office, several Democrats said they were either pressured into registering as Republicans or had their party switched without their knowledge.

"I told the gentleman that I was a Democrat, but he wanted to sign me up as a Republican so he can get credit for it," Xochi Avila of Anaheim wrote in a complaint. "I was not happy about it, but I went along with it."

Another voter, Araceli Mendez of Buena Park, said she was asked to sign a petition and the worker "changed my party to Republican. I informed him that it was Democrat, and he said it wouldn't change my party. I was lied to."

Neal Kelley, acting registrar of voters, said each voter was sent a notification card from the county to confirm that the registration information was correct. Filing false voter affidavits is a felony punishable by fines and up to three years in prison.

"When bounties are involved, this kind of thing happens," he said. "The parties have been very responsive to problems, and we're able to catch who is doing it."

The 34th Senate District currently is represented by Sen. Joe Dunn (D-Santa Ana), who must leave because of term limits and is running for state controller. The district includes Anaheim, Buena Park, Fullerton, Garden Grove, Santa Ana, Stanton and Westminster.

A lively Democratic primary contest is expected between Assemblyman Tom Umberg (D-Anaheim) and Orange County Supervisor Lou Correa of Santa Ana. Republicans so far in the race are Assemblywoman Lynn Daucher (R-Brea) and Lupe Moreno, an anti-illegal-immigration activist from Santa Ana.

The filing deadline for candidates is March 10.

County GOP reports possible voter registration fraud

By TRACIE TROHA

Staff Writer

SAN BERNARDINO -- The San Bernardino County Republican Party has asked the District Attorney's office to investigate more than 3,000 instances of voter registration fraud during the past two months.

The party alleges the fraud may have been committed by individuals hired by the GOP's voter registration consultant, John Burkett of Riverside, to conduct registration drives in the county.

Kari Verjil, county registrar of voters, said many of the registration forms the county received from the drives had the same last four digits of a social security number and did not have the required driver license numbers.

"There is a possibility that someone made up the last four social security numbers to turn the cards in," Verjil said.

Republican staffers and the Registrar of Voters office also found registration forms filled out by a coordinator rather than a registrant and received complaint letters from registrants who were not U.S. citizens or did not register as Republican.

County Republican Party Chairman Bill Postmus said he halted the paid voter registration program and ordered that no one involved in the registration drives be paid until the county's investigation is complete and all the forms are verified as authentic. The party also hasn't paid Burkett's firm for any voter registrations this year.

"I spoke to Mike Ramos, the district attorney, this morning and asked for an immediate investigation with respect to this," Postmus said. "These people need to be prosecuted to the full extent of the law."

Verjil said a member of her staff will also be contacting some of the voters by mail to ask for their driver license numbers in order to verify authenticity.

017113

Veril and Postmus said these alleged acts of fraud were caught through the state's new Cal Validator system. The system, first introduced in January, checks newly registered voters against their state driver license or social security numbers.

"Prior to January 1 California election officials didn't have the ability to verify each and every registration card in this manner," said Adam Aleman, county GOP Executive Director.

Postmus said he does not believe High Desert residents were impacted by the possible case of fraud.

San Bernardino residents who believe they may have been improperly registered to vote should call the Registrar of Voters office at (909) 387-8300.

Calif. GOP halts fee-based voter registrations amid fraud probe

Associated Press

SAN BERNARDINO, Calif. - California Republican Party officials say they've suspended their fee-based voter registration program while prosecutors in San Bernardino county investigate whether people were improperly signed up.

"Having just one instance of voter fraud is too many," California Republican Party Chairman Duf Sundheim said in a statement released Tuesday. "Any sign of voter fraud must be investigated and those responsible for the fraud should be prosecuted to the full extent of the law."

Under the program, workers were paid \$3 for each person they registered as a Republican.

However, election officials discovered thousands of registration forms that appeared to be filled out by the signature gatherers rather than the person supposedly registering to vote. Additionally, some people who claimed to be Democrats were allegedly registered as Republicans, and some non-citizens were apparently registered to vote.

Similar problems were discovered in Orange County.

The registration cards in both counties were collected by people working for Tom Bader and Associates, an Orange County petition-circulating firm. Company president Tom Bader was a leading figure in the recall of former Gov. Gray Davis.

Bader said Tuesday that he tries to run a clean operation "and all you can do is enforce the standards and not pay people when you catch fraud."

In the statement released Tuesday, the California Republican Party encouraged the secretary of state to aggressively investigate voter fraud allegations.

The state GOP pays more than 120 companies and organizations throughout California to register voters. The program was credited with adding 750,000 Republican voters to state voter rolls during the last three years.

State Democrats also run a so-called bounty program, but pay \$4 per registration form only to volunteers affiliated with party clubs or committees, said party Chairman Art Torres.

017113

GOP spokesman Hector Barajas said the party will continue using volunteers to register people to vote.

Candidate vows to stay in race despite letter to Hispanic voters

By PETER PRENGAMAN

Associated Press Writer

October 20, 2006

GARDEN GROVE, Calif. (AP) – A Republican congressional candidate who acknowledged his campaign sent a letter threatening Hispanic immigrant voters insists he will stay in the race despite mounting pressure for him to step aside.

Tan D. Nguyen, a Vietnamese immigrant trying to unseat a popular Democratic incumbent, resisted calls on Thursday from leaders in his own party to quit the race. He said he had no prior knowledge of the letter that wrongly told thousands of Orange County immigrants they could be jailed if they voted.

"I did not do this. I did not approve of any letter," Nguyen told The Associated Press in a telephone interview. He said he has since fired his campaign's office manager, who he said helped produce the mailer.

County Republican Chairman Scott Baugh said that after speaking with state investigators and the company that distributed the mailer, he believes Nguyen had direct knowledge of the "obnoxious and reprehensible" letter. He said the party's executive committee voted unanimously to urge Nguyen to drop out of the race against Democratic U.S. Rep. Loretta Sanchez.

"I learned information that allows me to draw the conclusion that not only was Mr. Nguyen's campaign involved in this, but that Mr. Nguyen was personally involved in expediting the mailer," Baugh said in a telephone interview.

State and federal officials were investigating the mailing for possible violations of election law. Investigators met with Nguyen for two hours Thursday, said his attorney David Wiechert, who declined to elaborate.

"Mr. Nguyen has no intention of dropping out of the race. He would do the public a disservice if he dropped out," Wiechert said.

The letter, written in Spanish, was mailed to an estimated 14,000 Democratic voters in central Orange County. It warns, "You are advised that if your residence in this country is illegal or you are an immigrant, voting in a federal election is a crime that could result in jail time."

Immigrants who are adult naturalized citizens are eligible to vote.

017117

Numerous political leaders denounced the letter, including Gov. Arnold Schwarzenegger, who called it "a despicable act of political intimidation and a hate crime."

Illegal immigration has been a centerpiece of Nguyen's campaign to oust Sanchez, a five-term congresswoman who said she hasn't spoken to Nguyen and never saw him as a threat to her re-election.

"If it is in fact this guy (who sent the letter), the most disgusting and saddest thing about it is that it comes from another immigrant," said Sanchez, who was born in the U.S. to Mexican parents. "These communities have spent years trying to get naturalized immigrants to vote."

Nguyen's campaign Web site says he was born in 1973 in Vietnam, where his family fled the communist regime.

In 2004, he unsuccessfully ran in the Democratic primary to challenge GOP Rep. Dana Rohrabacher in a heavily Republican coastal district. He later changed his party affiliation and declared his bid to upset Sanchez.

Orange County for years has been a battleground on immigration issues.

One founder of the Minuteman civilian border patrol group ran for Congress here and cities have debated issues such as the value of public centers for day laborers and the use of local police to arrest illegal immigrants.

Associated Press writers Michael R. Blood in Los Angeles, Don Thompson and Steve Lawrence in Sacramento and Michael J. Sniffen in Washington contributed to this report.

S.B. County Probes Voter Signup Firm

Thousands of allegedly flawed GOP registration forms submitted by a Riverside company are being checked. ID's are said to be lacking.

By Ashley Powers

Times Staff Writer

March 7, 2006

San Bernardino County prosecutors are investigating a signature collection firm that submitted thousands of flawed voter registration forms on behalf of the county's Republican Party, authorities said.

The district attorney's public integrity unit launched an investigation after the registrar of voters received complaints from people who said they had been improperly registered as Republicans during a recent GOP registration drive.

County voting officials said they found problems with many of the nearly 3,000 registration forms submitted by the company, including 1,800 that lacked voters' driver's license numbers or other official forms of identification, which were required by a state law this year.

The district attorney's office is also investigating whether the same political firm, John Burkett Petition Management of Riverside, was responsible for the large number of signatures declared invalid in a recent petition drive in Rialto, said Deputy Dist. Atty. Frank Vanella.

County GOP officials said they had severed ties with the owner of the firm, John Burkett, who had run the party's registration drive since January.

Burkett said Monday that the allegations seemed "impossible" and that he only recently became aware of the state law requiring official documentation numbers on the forms.

"For somebody to pop up and say 3,000 are bad ... it sounds kind of incredible," he said.

Burkett has run his company — with more than 100 signature-gatherers in Riverside and Arizona — for nearly two decades, contracting mainly with Republican organizations.

"I know John verifies every voter registration that comes across his desk," said his sister-

in-law Barbara Burkett, who runs the firm's Arizona office. "He calls the person. He's honest like you wouldn't believe. He'd never cheat at all."

Republicans have aggressively courted voters in rapidly growing San Bernardino County.

They hold a registration edge over Democrats, 42% to 38%, and hold four of five seats on the Board of Supervisors.

Burkett said he had worked with the county GOP since 2000. His firm is paid for each voter registration form it collects, usually \$3. But the San Bernardino County Republican Party recently offered \$6 for each GOP voter registered in the San Bernardino and Ontario areas, said party officials.

County Registrar Kari Verjil said Burkett dropped off nearly 3,000 voter registration forms a few weeks ago, along with petitions that supported "Jessica's Law," a proposed state initiative that would bar convicted sex offenders from living in many California neighborhoods.

Voting officials immediately noticed problems.

More than half of the forms lacked an identification number, such as a driver's license number, they said.

They also discovered a few people had been registered multiple times, and received one complaint from someone who was not a U.S. citizen and couldn't understand how he could be eligible to vote.

Verjil contacted the district attorney's office and state officials. The county is sending letters to the people on the forms to see whether their registration is legitimate, she said.

Officials with the San Bernardino County GOP said they also noticed irregularities on registration forms, such as repeated names, and had contacted the registrar's office, said Adam Aleman, the executive director.

Burkett billed the party \$25,000, which Aleman said would not be paid until the investigations were complete.

The district attorney's office had already been asked to look into possible improprieties in a Rialto signature drive that Burkett led.

About 4,800 of more than 5,600 signatures submitted were found to be invalid and were tossed out by election officials.

A community group called Voice United had hired Burkett's firm to promote a ballot initiative that would have required voter approval for the city to contract with the county to provide city police services.

In Riverside County, Burkett has turned in cards with missing or incomplete information and wrong addresses, said Rebecca Martine, chief deputy registrar of voters.

Residents have also complained that the person registering them incorrectly marked them as a Republican, she said.

"We'll start actually taking a closer look at all the registration cards, whether they're from him or another paid contractor, just to make sure that we're not going to face the same problem," said Riverside County Registrar Barbara Dunmore.

San Bernardino County's investigation comes after an unrelated investigation into possibly fraudulent voter registration cards in Orange County.

Election officials last week turned over 100 instances of allegedly improper voter registration to the district attorney's office in Orange County, including three dozen complaints of Democrats being signed up as Republicans.

Times staff writers Susannah Rosenblatt and Lynn Doan contributed to this report.

Election Updates

How to steal an election: steal the ballots

There is a story circulating on the news wires on how someone stole balloting materials just before Tuesday's California primary elections in Fresno ... but was caught. Here's the relevant part of the report from the [Fresno Bee](#):

A Sanger man was arrested Tuesday on suspicion of stealing 1,000 blank election ballots, two voting machines and a bag containing other supplies that had been assigned to a poll worker in Fresno.

...

Victor Salazar, Fresno County clerk, said an investigation by Fresno County sheriff's deputies was started when a worker in charge of the election equipment failed to show up Tuesday morning at her polling station at 8234 E. Belmont Ave.

Salazar said the worker, Regina Pico, 19, was trained as an inspector at the polling place and had been given the blank ballots and other equipment for setting up the station.

Pico had stored the property in a garage on East Garrett Avenue in southeast Fresno. She told investigators that when she when she got ready to report to the polling station about 3 a.m. Tuesday, the election equipment was gone.

Salazar said when his office was notified of the missing ballots, they were declared void so they could not be used.

Another inspector was sent to the polling station with replacement ballots and equipment. Salazar estimated the value of the voting machines at \$3,500 to \$5,000 each.

...

Arrest made in theft of ballots

Sanger man also is accused of taking two voting machines.

By Louis Galvan / The Fresno Bee

(Updated Thursday, June 8, 2006, 4:49 AM)

A Sanger man was arrested Tuesday on suspicion of stealing 1,000 blank election ballots, two voting machines and a bag containing other supplies that had been assigned to a poll worker in Fresno.

Fresno police Sgt. Tim Tietjen said all of the items were recovered and that the suspect, Sonny James Avalos, 20, was arrested at his home on the 1200 block of O Street in Sanger.

017122

Avalos was booked into Fresno County Jail on suspicion of grand theft of polling equipment.

Victor Salazar, Fresno County clerk, said an investigation by Fresno County sheriff's deputies was started when a worker in charge of the election equipment failed to show up Tuesday morning at her polling station at 8234 E. Belmont Ave.

Salazar said the worker, Regina Pico, 19, was trained as an inspector at the polling place and had been given the blank ballots and other equipment for setting up the station.

Pico had stored the property in a garage on East Garrett Avenue in southeast Fresno. She told investigators that when she got ready to report to the polling station about 3 a.m. Tuesday, the election equipment was gone.

Salazar said when his office was notified of the missing ballots, they were declared void so they could not be used.

Another inspector was sent to the polling station with replacement ballots and equipment. Salazar estimated the value of the voting machines at \$3,500 to \$5,000 each.

Each of the 422 voting polls in Fresno County was issued two voting machines, he said.

Salazar applauded the work of Fresno police, sheriff's deputies and Sanger police in resolving the case.

Allegations of bogus voting, coercion emerge in tiny LA suburb

By MICHAEL R. BLOOD
AP Political Writer Thursday, April 13, 2006

VERNON, Calif. (AP) -- It took a judge's order to force the first local election in 25 years in this gritty industrial city -- and it was an election replete with allegations of voter intimidation, harassment and undercover surveillance.

Then, after polls closed Tuesday, a clerk promptly carried a metal ballot box into the City Council chamber and announced he wouldn't count the votes.

The bizarre, and some say illegal, decision comes as the latest eyebrow-raising political turn in Vernon, a city on the edge of Los Angeles where the mayor and City Council members have served for decades and most of the voters hold municipal jobs while living in city-owned houses.

It's the latest twist in a story that began when a trio of new residents filed as candidates earlier this year to contest three of the City Council's five seats.

One of them is Don Huff. The paper company salesman alleges that soon he was being shadowed by private investigators, and that it wasn't long before city crews shut off the power and police watched his building. Eventually Huff, 41, was evicted, and lately he's been living in his car.

"They wanted to run us out, totally," he said. "The mayor owns the whole town. He controls it."

Huff filed a lawsuit along with the other two newcomers after the city of fewer than 100 residents threw their names off the ballot. The judge reinstated them as candidates.

In their legal papers, the challengers charge that voters here are beholden to a City Hall that dispenses paychecks and sweetheart rents. Vernon, they say, is the epitome of a company town where the government has become the company.

On Tuesday, acting City Clerk Bruce Malkenhorst Jr. said he would keep the ballot box locked until the court fight is resolved. An attorney for the challengers, Albert Robles, called the decision to commandeer the votes "absolutely not legal."

If nothing else, it might be unprecedented.

"I've never seen anybody, en masse, take an election and say, 'I'm not going to count the ballots until a court tells me,'" said election-law attorney Fred Woocher, who is not involved in the dispute.

Although within sight of downtown Los Angeles, Vernon is a world away.

Founded in 1905, the motto of the 5-square-mile city is "Exclusively Industrial." Rugged roads and railroad tracks cut through a densely packed maze of warehouses, meatpacking plants, fuel tanks and an occasional overgrown, vacant lot. There is no high school, no movie theater, no parkland.

Under an unusual arrangement, Vernon owns virtually all the roughly two-dozen homes in town. In its century-long history, it's had just four mayors, all related to its founders. Mayor Leonis Malburg has held public office since the Eisenhower administration -- first as a councilman and as mayor since 1974.

017124

About the only city official to talk in recent days has been police Chief Sol Benudiz, who released a statement that the department is committed to the rights and safety of all residents.

Councilman William Davis, questioned outside his home Tuesday, referred calls to City Hall. Attorneys representing Vernon and the city clerk's office did not respond to repeated phone calls.

In legal papers, city officials charged that the new residents were part of a group, linked to a corrupt politician from the nearby city of South Gate, trying to engineer a coup. The city alleges the group tried to gain control of buildings to plant "phony" residents in the community, and used "strong-armed thugs" to intimidate one property owner where they hoped to open a 60-bed halfway house as part of the scam.

"The fact that Vernon is a unique industrial city with less than 90 registered voters makes it an easy target for voter fraud," according to city papers filed Tuesday that sought to strike voter registrations for several people it said were linked to the scheme.

Last year, the Los Angeles Times reported that a city administrator had been paid \$600,000 in annual salary, bonuses and other compensation, and his benefits included a leased Cadillac Escalade, use of a city-owned apartment and \$120,000 for limousine services. The administrator, Bruce V. Malkenhorst Sr., father of the current clerk, retired last year.

Robles said at a Wednesday news conference that he also planned to file a federal complaint accusing the city of violating voters' civil rights.

GOP Challenging Voter Registrations

Civil Rights Groups Accuse Republicans Of Trying to Disenfranchise Minorities

By Jo Becker

Washington Post Staff Writer

Friday, October 29, 2004; Page A05

Republicans yesterday continued to challenge the validity of tens of thousands of voter registrations in Ohio and other key states in the presidential election while a coalition of civil rights and labor groups sued the GOP, contending the Republican efforts were aimed at removing eligible minority voters from the rolls.

After initially saying he would not contest a Wednesday ruling halting the challenges, Secretary of State J. Kenneth Blackwell (R) worked with other election officials who asked the U.S. Court of Appeals for the 6th Circuit in Cincinnati to allow GOP challenges to 35,000 voters from mostly urban and minority areas to proceed before the election. As of late last night, the court had not ruled.

Also yesterday, Republicans in Wisconsin attempted to challenge the registrations of 5,600 voters in Milwaukee but were turned down in a unanimous decision by the city's bipartisan election board.

The Republican challenges in Ohio, Wisconsin and other battleground states prompted civil rights and labor unions to sue in U.S. District Court in Newark, saying the GOP is violating a consent decree, issued in the 1980s by Judge Dickinson R. Debevoise and still in effect, that prevents the Republicans from starting "ballot security" programs to prevent voter fraud that target minorities.

Judith A. Browne, acting co-director of the Advancement Project, which filed the lawsuit along with the Leadership Conference on Civil Rights, said the Republican "challenges were, and currently are, used to disenfranchise minority voters."

But Republicans denied that they were targeting black voters. Bobby Burchfield, an attorney for the Republican National Committee, told Debevoise that "troubling reports" of fictitious names such as Mary Poppins appearing on Ohio's rolls prompted the challenges.

Debevoise, who scheduled a hearing for Monday, expressed concern that widespread challenges on the fear of fraud could unnecessarily disrupt polling places.

The legal maneuvering is a testament to the legalization of presidential politics that resulted from the bitterly disputed presidential contest in 2000 between George W. Bush and Al Gore, which deadlocked in Florida. Both parties have embarked on litigation over voting rules in many states and have thousands of lawyers poised for Election Day.

The move in Milwaukee, a heavily minority and Democratic stronghold, is part of a national effort by Republicans in many battleground states to challenge voter registrations.

017126

A similar effort by a former Nevada GOP operative to question 17,000 Democratic voters in Las Vegas was rejected earlier this month by election officials there. Republicans have also filed plans in Florida and Colorado to place watchers who can challenge voters in those key states on Election Day.

Challenge rules vary by state. In general, challengers must supply evidence that the voter may not be eligible. Grounds can include that a voter is not a U.S. citizen, is not a resident of the state or county where he or she is registered, or is younger than 18. The complaints are settled by election board members or precinct judges.

Republicans argue that their program -- the most robust in recent history -- is necessary because unprecedented voter registration drives by Democratic-leaning interest groups have produced thousands of phony registrations. But Democrats say that the GOP's Milwaukee challenges are a perfect example of the party trying to imply fraud where none exists. Lawyers for John F. Kerry's campaign successfully argued before the election board there that the analysis the GOP used to challenge voters was riddled with mistakes.

Courts in the past found that Republicans used tactics that were aimed at intimidating minority voters and suppressing their votes. The consent decrees in New Jersey stemmed from several incidents in the 1980s.

In 1981, the Republican National Committee sent letters to predominantly black neighborhoods in New Jersey, and when 45,000 letters were returned as undeliverable, the committee compiled a challenge list to remove those voters from the rolls. The RNC sent off-duty law enforcement officials to the polls and hung posters in heavily black neighborhoods warning that violating election laws is a crime.

In 1986, the RNC tried to have 31,000 voters, most of them black, removed from the rolls in Louisiana when a party mailer was returned. The consent decrees that resulted prohibited the party from engaging in anti-fraud initiatives that target minorities or conduct mail campaigns to "compile voter challenge lists."

Undeliverable mail is the basis for this year's challenges in Ohio. Republicans also sent mail to about 130,000 voters in Philadelphia, another heavily black and Democratic stronghold.

The civil rights groups and labor unions, which are backed by the Democratic Party, also charged that GOP plans to put challengers in thousands of precincts nationwide on Election Day are race-based. In several Florida counties, for instance, GOP challengers will disproportionately be based in black precincts.

Republicans said their plans involve putting challengers in precincts won handily by either Bush or Gore and has nothing to do with race.

Special correspondent Michelle Garcia in Newark contributed to this report.

Mom was dead but still cast ballot

By Howard Pankratz
Denver Post Staff Writer
DenverPost.com

Winston Keyes apparently believes so much in the right to vote that he voted for his dead mother, investigators said.

Keyes, 44, is accused of sending in a 2005 general-election ballot for his mother, Della Mayo, in October, although she died in July.

According to an arrest warrant, Keyes provided some critical evidence against himself.

In August, Keyes went to the Denver district attorney's office and filed a complaint against the mortuary that hand led his mother's funeral.

He handwrote the complaint on the district attorney's economic-crime-unit form, which was used to eventually link him to the bogus ballot.

Kent Prose, a handwriting expert for the unit, determined by comparing the handwriting on the complaint with the writing on the ballot that it was Keyes who forged his mother's absentee ballot.

Investigators said in court documents that Keyes admitted to signing the absentee ballot and said he often voted for his mother and signed her name to absentee ballots in previous years.

When the election commission first received the ballot, the signature on the absentee-ballot envelope appeared to match the known signature of Mayo. However, during the signature-verification process, it was discovered by the commission staff that Mayo had died earlier in 2005 and her voter status had changed from "active" to "death delete" on Sept. 20.

Prose said in court documents that an examination of the "Della Mayo" signature revealed unusual pen-lifts, called "patching," and indications of slow line speed, indicating that the signature was simulated to look like Mayo's. Keyes has been charged with one count of forgery.

Voter fraud probed in state

Double dippers, felons targeted

By Susan Greene and Karen E. Crummy
Denver Post 24 March 2005

Hundreds of Coloradans are being investigated for voter fraud in the November election.

Prosecutors in at least 47 counties are probing cases involving accusations of forged signatures, felons voting or people who attempted to vote twice.

At least 122 voters gave new meaning to the adage "vote early and vote often" by apparently casting absentee ballots through the mail, then showing up in person to vote on Election Day. And, officials say, at least 120 felons statewide cast ballots and now face possible prosecution.

So far, there have been at least two indictments - both in El Paso County - and prosecutors expect more to follow elsewhere in the state.

"Obviously these numbers are higher than we want them to be," said Dana Williams, a spokeswoman for Secretary of State Donetta Davidson, who was not available for comment Wednesday.

It's unclear whether prosecutors have enough evidence in the cases to prove criminal intent.

More than four months after the Nov. 2 election, 47 of 64 counties have reported voting irregularities to Davidson's office. This is the first year the state has required reports on suspected voting fraud.

Scrutiny of voting practices increased dramatically in Colorado and elsewhere in the nation after election snafus in Florida held up the outcome of the 2000 presidential race for weeks.

Counties also referred possible criminal fraud to their own district attorneys.

The Denver Election Commission, which experienced by far the most voting problems, failed to meet Davidson's March 11 deadline for reporting cases to the state. On Wednesday, an election official told The Denver Post that 81 Denverites voted twice and 52 felons cast ballots.

Last week, Jefferson County's election department sent 286 cases to its district attorney to investigate. Of those, 30 involved people who attempted to vote twice, and 256 stemmed from

017129

ballots bearing suspicious signatures.

Jefferson County election director Susan Miller noted that voters probably didn't succeed in having more than one ballot counted because her county has safeguards to make sure only one vote per person is tallied.

Miller's staff discovered the signature problems by comparing signatures on 130,000 absentee ballots cast in Jefferson County with those signed on voters' registration cards. That process is required by a state law passed in 2003.

Colorado is one of a handful of states that require election officials to verify signatures on mail ballots.

"Colorado has substantially more security measures than federal law requires and more in combination than virtually any other state," said Mary Wickersham, who analyzes state election laws.

In October, The Post found as many as 6,006 felons who should have been ineligible to vote were registered to do so in Colorado. State law says that "no person while serving a sentence of detention or confinement in a correctional facility, jail, or other location or while serving a sentence of parole shall be eligible to register to vote or to vote in any election."

Davidson last fall said she was unaware state felons were registered and pointed blame at the state Department of Corrections for failing to give her a list of prisoners and parolees. Correction officials, in turn, said she never asked.

Davidson later passed a set of emergency rules requiring counties to flag the names of felons on registration rolls. Felons were allowed to cast emergency, or "provisional," ballots as a matter of policy because Davidson didn't want to "needlessly disenfranchise anyone."

In El Paso County, election officials turned over 23 cases of prisoners or parolees who voted.

"This is the first year we would have caught them because of the emergency rules," said Marguerite Duncan, El Paso County's election manager.

But felons may be tough to prosecute because many, especially parolees, didn't know they shouldn't vote.

"They don't make really good criminal cases because it's difficult to prove criminal intent, that there was a knowing violation of election law," said 4th Judicial District Attorney John Newsome of El Paso County.

Bill Thiebaut of Pueblo's 10th Judicial District countered that felons are responsible for knowing law.

"If people violate it, sometimes you just have to send a message that they have to be more cognizant of what's going on," he said.

In the Arapahoe County-based 18th Judicial District, officials reported several cases of voters mistakenly filling out and signing their spouse's ballots, and residents submitting ballots sent to

voters who previously lived at the same address.

A husband and wife in Douglas County each cast absentee ballots, then cast provisional ballots at the polls for fear their mail-in votes wouldn't count.

"They were not trying to intentionally vote twice. They just wanted to make sure their vote counted. Those aren't the kind of cases we'd be likely to prosecute," said spokesman Mike Knig

"What you'll see is a lot of stuff forwarded to the DA and almost no prosecutions," Wickersham added.

Election-law changes proposed recently by Davidson and state lawmakers deal less with voter fraud than with tightening security around voter-registration drives. Bills stem from news last fall that some workers who were paid to sign up new voters were forging registration documents.

Fourth Judicial District officials have indicted Joseph Battles and Keith Bohannon on 19 and 29 counts of forgery, respectively, related to voter-registration drives. Battles is set for arraignment in May, and Bohannon is scheduled for a jury trial in June, Newsome said.

S.B. County Probes Voter Signup Firm

Thousands of allegedly flawed GOP registration forms submitted by a Riverside company are being checked. ID's are said to be lacking.

By Ashley Powers
Times Staff Writer

March 7, 2006

San Bernardino County prosecutors are investigating a signature collection firm that submitted thousands of flawed voter registration forms on behalf of the county's Republican Party, authorities said.

The district attorney's public integrity unit launched an investigation after the registrar of voters received complaints from people who said they had been improperly registered as Republicans during a recent GOP registration drive.

County voting officials said they found problems with many of the nearly 3,000 registration forms submitted by the company, including 1,800 that lacked voters' driver's license numbers or other official forms of identification, which were required by a state law this year.

The district attorney's office is also investigating whether the same political firm, John Burkett Petition Management of Riverside, was responsible for the large number of signatures declared invalid in a recent petition drive in Rialto, said Deputy Dist. Atty. Frank Vanella.

County GOP officials said they had severed ties with the owner of the firm, John Burkett, who had run the party's registration drive since January.

Burkett said Monday that the allegations seemed "impossible" and that he only recently became aware of the state law requiring official documentation numbers on the forms.

"For somebody to pop up and say 3,000 are bad ... it sounds kind of incredible," he said.

Burkett has run his company — with more than 100 signature-gatherers in Riverside and Arizona — for nearly two decades, contracting mainly with Republican organizations.

"I know John verifies every voter registration that comes across his desk," said his sister-

in-law Barbara Burkett, who runs the firm's Arizona office. "He calls the person. He's honest like you wouldn't believe. He'd never cheat at all."

Republicans have aggressively courted voters in rapidly growing San Bernardino County.

They hold a registration edge over Democrats, 42% to 38%, and hold four of five seats on the Board of Supervisors.

Burkett said he had worked with the county GOP since 2000. His firm is paid for each voter registration form it collects, usually \$3. But the San Bernardino County Republican Party recently offered \$6 for each GOP voter registered in the San Bernardino and Ontario areas, said party officials.

County Registrar Kari Verjil said Burkett dropped off nearly 3,000 voter registration forms a few weeks ago, along with petitions that supported "Jessica's Law," a proposed state initiative that would bar convicted sex offenders from living in many California neighborhoods.

Voting officials immediately noticed problems.

More than half of the forms lacked an identification number, such as a driver's license number, they said.

They also discovered a few people had been registered multiple times, and received one complaint from someone who was not a U.S. citizen and couldn't understand how he could be eligible to vote.

Verjil contacted the district attorney's office and state officials. The county is sending letters to the people on the forms to see whether their registration is legitimate, she said.

Officials with the San Bernardino County GOP said they also noticed irregularities on registration forms, such as repeated names, and had contacted the registrar's office, said Adam Aleman, the executive director.

Burkett billed the party \$25,000, which Aleman said would not be paid until the investigations were complete.

The district attorney's office had already been asked to look into possible improprieties in a Rialto signature drive that Burkett led.

About 4,800 of more than 5,600 signatures submitted were found to be invalid and were tossed out by election officials.

A community group called Voice United had hired Burkett's firm to promote a ballot initiative that would have required voter approval for the city to contract with the county to provide city police services.

In Riverside County, Burkett has turned in cards with missing or incomplete information and wrong addresses, said Rebecca Martine, chief deputy registrar of voters.

Residents have also complained that the person registering them incorrectly marked them as a Republican, she said.

"We'll start actually taking a closer look at all the registration cards, whether they're from him or another paid contractor, just to make sure that we're not going to face the same problem," said Riverside County Registrar Barbara Dunmore.

San Bernardino County's investigation comes after an unrelated investigation into possibly fraudulent voter registration cards in Orange County.

Election officials last week turned over 100 instances of allegedly improper voter registration to the district attorney's office in Orange County, including three dozen complaints of Democrats being signed up as Republicans.

Voter Fraud Charges Probed

State has launched an inquiry into allegations of improper Republican registrations in Orange and Riverside counties.

By Ashley Powers and Susannah Rosenblatt
Times Staff Writers

April 8, 2006

Investigators for California's attorney general and secretary of state have launched an inquiry into allegations of voter registration fraud in Orange and Riverside counties, state officials said Friday.

The investigation comes a month after the California Republican Party suspended its paid voter registration program, following the discovery by elections officials in Orange and San Bernardino counties of thousands of flawed registration forms submitted by private firms the county parties had hired.

Elections officials turned over those forms to local prosecutors and the secretary of state. The state Democratic Party requested that the attorney general investigate, calling the allegations "even more disturbing than first thought."

A statement released Friday by the California Republican Party said it welcomed the inquiry and that "one instance of voter fraud is one too many and any suggestion of voter fraud must be investigated."

Riverside, Orange and San Bernardino counties have recently received complaints from residents who said they had been improperly registered as Republicans, elections officials said.

It was unclear Friday whether the allegations in Riverside County stemmed from those complaints. "To my knowledge, we don't have any gross irregularities in our registrations in Riverside County," said county Registrar Barbara Dunmore.

Orange County officials did not return phone calls seeking comment. The San Bernardino County district attorney's office has chosen to head its own investigation, though there appears to be "significant overlap" in the conduct of signature-gatherers in the three counties, said Nathan Barankin, a spokesman for Atty. Gen. Bill Lockyer.

The state GOP voter registration program paid private contractors \$3 for each new

registration submitted. It was credited with adding 750,000 Republican registrations to state voter rolls in the last three years.

State Democrats run a similar program, but said they pay only volunteers affiliated with party clubs or committees.

In Orange County, the voter fraud allegations have centered on a subcontractor working for Bader & Associates, a Newport Beach-based signature-collection firm headed by Thomas Bader, who ran voter registration programs for the state Republican Party from 2003 to 2005.

Contractor Christopher Dinoff appears to be connected to the 100 or so cases of alleged improper registration, Orange County election officials have said. Bader also hired John Burkett, who took charge of the San Bernardino County GOP's registration program this year.

Election officials said Burkett had turned in thousands of flawed voter registration forms to the San Bernardino County registrar's office, including 1,800 that lacked driver's license numbers or other forms of required identification.

After the allegations, state Sen. Debra Bowen (D-Marina del Rey), who is running for secretary of state, last month amended a pending bill so that it would ban so-called "bounty" programs in which political parties pay for each signature or registration collected.

O.C. voters were duped into GOP registration

Petitioners lie, cajole and commit forgery while duping more than 100 O.C. residents into joining the Republican Party.

By TONY SAAVEDRA, KIMBERLY KINDY and BRIAN JOSEPH

The Orange County Register

More than 100 Orange County residents who thought they were simply signing petitions to cure breast cancer, punish child molesters or build schools were duped into registering as Republicans, an Orange County Register investigation found.

The ruse took place over several days in December and January at shopping centers throughout Anaheim, Santa Ana, Buena Park, Westminster and Garden Grove, where paid petitioners begged, cajoled, lied and committed forgery to get so-called Republican converts. Petition circulators were paid as much as \$7 for each GOP registration.

Orange County election officials have received complaints from 167 people who were flipped to the Republican Party without their permission. The Register found the problem was far wider, interviewing 112 others who were not only switched, they were tricked and deceived. Among the victims is a lifelong Democrat who was pressured to fill out forms even though she didn't have her glasses and couldn't see what she was signing.

The Register traced the bogus registrations to Christopher Scott Dinoff, who took out 13,000 blank affidavit cards from the Orange County Registrar of Voters Office, records show.

Each affidavit is numbered, linking Dinoff to the doctored cards.

Dinoff, who was fired from the Orange County Republican registration drive for being too aggressive, declined to comment. It is unlikely that he acted alone; professional petition circulators such as Dinoff usually hire other people to help harvest signatures.

"I think they need to be punished," said Ericka Lopez of Anaheim, who said she was unwillingly switched from Libertarian to Republican in January. "We were deceived."

California Secretary of State Bruce McPherson is looking into the allegations of voter registration fraud in Orange County, as well as in San Bernardino and Riverside counties, where hundreds of complaints have been linked to a petitioner identified as John Burkett.

A spokeswoman for McPherson declined to comment on the Register's findings. In Orange County, local GOP Chairman Scott Baugh said he considers his party a victim in the scam.

"Not only do we get hit for the dollars we are paying vendors, but if they are reluctant Republicans, we are also wasting money on follow-up mailers and efforts to contact (them)," Baugh said.

Virtually all the victims interviewed by the Register told the same story:

They were asked to sign petitions while shopping. Without realizing it, they also signed voter registration cards listing their party designation as Republican. When pressed for an explanation, signature gatherers said they needed to list people that way because it was a Republican-sponsored petition. They said it wouldn't change the party affiliation. Sometimes petitioners told victims to leave blank the box designating party.

017137

Other signature gatherers were more creative.

Consider what happened to Carol Heckerman.

Without her glasses, everything was a blur for the 64-year-old Anaheim woman.

She could barely see as she pushed her loaded shopping cart through the hazily lighted parking lot outside an Anaheim Wal-Mart.

And she sure couldn't read the small print when a signature gatherer stuck a voter registration card beneath her nose, Heckerman said.

"Don't worry," Heckerman recalls the man saying, "I'll fill it out for you."

That's how Heckerman, a Democrat since John F. Kennedy occupied the White House, became an Orange County Republican.

Many of those interviewed by the Register were college students or people with a limited command of English.

"We really don't know how the system works, and we're a little more naive than the rest of the population," said Evelyn Maldonado, 19, a Santa Ana College sophomore who was approached by a signature gatherer after class.

The registration drive was concentrated mostly in the heavily contested 34th Senate District, where the GOP is beefing up its ranks to challenge the Democrat incumbent. However, the bogus registrations may give Republicans a false sense of strength that could bite them at the polls.

"I got a surprise for them," said Joseph Serio, a 40-year-old freight agent who was flipped from "Decline to State" to Republican.

"I thought I was just filling out a petition to keep child molesters away from schools, then they threw this other (stuff) in," Serio said, "They were camouflaging another agenda."

Dinoff was hired by a subcontractor for Bader and Associates, the Newport Beach consultant used by the GOP to conduct the registration drive.

Consultant Tom Bader said his firm tries to weed out bad registrations by analyzing the forms, looking for patterns that could indicate fraud. Bader said none was found. He added that the only group that profits from forged registrations are the street-level bounty hunters.

"I don't believe any companies would do it intentionally," Bader said. "They'd be nutty to try anything like that."

Orange County Republican officials say they took immediate action when they learned of "over-aggressive" petitioners, refusing to pay for anymore registrations from Dinoff.

But Frank Barbaro, Orange County Democratic Party chairman, isn't so sure that the Republican Party is blameless. Barbaro said the GOP benefited because the boosted numbers strengthened the party's fundraising ability in the heated 34th District.

"It gives the Republicans all this energy," Barbaro said. "They take those numbers around the state and raise money, saying, 'We can win that district.'"

017138

tricks of the trade

Sean Dailey, an 18-year-old Cypress College student, said he was among those hired to harvest signatures outside a Buena Park Wal-Mart. Dailey said he quit after two weeks because he was uncomfortable with the tactics taught by a supervisor he knew only as "Dan."

"It was supposed to be on the up and up," Dailey said. "But the guy was sitting there telling people they could make \$15,000 a week – tax-free money." Dailey said he was wary about accepting money under the table.

He said his group met at an apartment near Anaheim Plaza, where the cash was distributed and the registration cards were collected at the end of the day. Many of the party affiliations were switched in the field – right in front of victims. In other cases, the cards were doctored at the apartment, Dailey said.

The tables turned on Dailey when his own registration card, and those of his father and brother, were forged as well – unbeknown to him.

His father, Kenneth Dailey, learned of the deception from a reporter.

"That's a crock," roared Kenneth Dailey. "I ain't never been a Republican. I signed a petition for my kid. ... I never did anything that declared 'Republican.'"

The Lies

Celia Trevino and her husband, Joseph, both 71, tried to ignore the young couple waving a clipboard at them as they left the Anaheim Wal-Mart.

But the petitioners said the two words Celia Trevino couldn't ignore: child molesters.

"Right away, your bulb lights up," Trevino said. That night the Trevinos, lifelong Democrats, left the parking lot as Republicans. But they didn't know it until they got a card from the Orange County registrar's office.

Deborah Haertel thought somebody screwed up when she got a postcard welcoming her to the Republican Party. But she grew concerned when more and more GOP mailers began to arrive.

"Excuse me. I am NOT a Republican," said Haertel, 42. "I think they have no business taking over your life and turning it into something else without your permission. It's sneaky and underhanded."

Lessie Wood, another victim, doesn't want to stay Republican any longer than she has to. Wood said she was told that her signature on an anti-pedophile petition wouldn't count unless she was Republican. She now plans to change back to the Democratic Party.

"I didn't want to be Republican," said Wood, 49, of Stanton. "But I wanted my signature to count."

Sonia Olivarez, 26, didn't really understand what the pushy man outside the Santa Ana Target store wanted her to sign. But the mother of three was in a hurry to pick up her kids from school. So she pushed her pen across everything the man put in front of her.

Now she is Republican, at least on paper.

GOP finds faked voter affidavits

By Kevin Yamamura -- Bee Capitol Bureau

Published 12:01 am PDT Friday, September 1, 2006

Several GOP voter-registration workers created fake individuals in documents submitted to the California Republican Party, which said Thursday that it discovered the fraudulent activity through an internal review and forwarded its findings to Secretary of State Bruce McPherson.

GOP spokesman Patrick Dorinson said the party caught the undisclosed number of falsified voter affidavits early enough that it avoided registering any fraudulent names with the state.

The documents were filed two weeks ago by an unnamed Southern California subcontractor hired by the party's principal registration vendor, California Grassroots Mobilization, according to Dorinson. The party has since fired the subcontractor, and Dorinson said California Grassroots Mobilization is working with the party to expose the fraudulent actions.

Dorinson would not name the subcontractor or the workers. Nor did he disclose how many fraudulent documents the party found because he said the matter is under investigation.

"We felt it was necessary to come forward because we're trying to maintain the integrity of our program," Dorinson said.

McPherson, a Republican, said in a statement he will conduct a full investigation, adding that "if credible evidence of wrongdoing is found, we will work with local prosecutors to vigorously prosecute to the fullest extent of the law."

Vote fraud case raises bullying cries

By DAVID KARP, Times Staff Writer
Published September 28, 2004

ORLANDO - Local politicians call him the absentee ballot king.

Before each election, Ezzie Thomas appears at the homes of hundreds of black voters and picks up their absentee ballots.

In a predominately black Orlando neighborhood, it seems everyone knows the 73-year-old Thomas. He was the local television repair man for years, extending credit to black residents when no one else would.

But now Thomas' tactics in the spring Orlando mayoral election are at the center of a controversy that once again has put Florida elections in the national spotlight. The Florida Department of Law Enforcement investigated Thomas, closed its case, then reopened it. Now the U.S. Department of Justice and the U.S. Commission on Civil Rights are investigating the FDLE investigation.

Critics of Thomas' methods argue they are illegal and give Democrats an edge. Critics of the FDLE investigation say all candidates go after absentee ballots like Thomas does and call the probe an attempt to scare black residents into not voting in November, which would help Republicans.

"If there was evidence of widespread absentee ballot fraud, I don't think anyone would question their right to investigate," said Democratic lawyer Joseph Egan, who wonders why the FDLE would focus so hard on someone like Thomas.

Since the investigation began, writers from the *New York Times*, the *Los Angeles Times* and *The Independent* of London have weighed in. An international elections commission began interviewing witnesses last week.

How did something so local become so big?

It started on election night in March at the Orange County Supervisor of Elections Office. As results in the mayor's race trickled in, it appeared challenger Ken Mulvaney may have won enough votes to force a runoff election with Buddy Dyer.

But someone told Mulvaney's brother that Dyer had swept the absentee ballots. Brian Mulvaney was new to campaigns, but he could not see how that could happen.

The next day two black activists called Brian Mulvaney and told him to look at the absentee ballots. It turned out Thomas' signature was on about 265 absentee ballots as a witness. Other people who were paid \$100 by Thomas witnessed another 100 ballots.

Mulvaney's group began knocking on voters' doors. Most voters whom Thomas helped were elderly. A few were blind.

Exactly what happened in some of those homes is in dispute. Thomas, who was paid \$10,000 by the Dyer campaign, says he only showed voters how to properly fill out ballots. He also would take a ballot if people asked.

But others said Thomas did more.

Some voters handed Thomas blank ballots, without votes marked. Others didn't seal ballots in an envelope.

"He'll tell you where to sign it," said Rose Lee Jackson. "I never sealed none of them."

"He'd be the one to write it all out," said Martha Glenn. "He asked me who do I want to vote for. He had the people's names. He'd call them off and everything."

No one claimed Thomas gave them money. No one saw Thomas change a vote.

Democrats say minority voters accept the practice, which makes it easier to vote. Critics say it invites fraud. It also violates a seldom-enforced law against getting paid to request, collect or physically possess absentee ballots.

Republicans, who have mastered absentee ballot campaigns, say they don't collect voters' ballots by hand.

"I've never heard of that," said consultant Mark Proctor. "That's pretty aggressive."

* * *

A week after the election, Brian Mulvaney called Orlando police. "What was happening was illegal," he said.

Months passed. Then he read in the *Orlando Sentinel* that Dyer had been cleared.

017142

In a letter, FDLE regional director Joyce Dawley said the agency found no basis to charges that Dyer campaign staffers had illegally collected absentee ballots.

Dawley said later that someone - she can't recall who - asked her to issue the letter.

Mulvaney called FDLE and asked how agents could clear Dyer when they had not interviewed him.

Dawley apologized and said she only meant to clear Dyer, not close the entire case.

After she met with Mulvaney, the investigation began again. A week later, FDLE agents talked about big-time charges. Agent Wayne Ivey told the *Sentinel* the investigation could lead to racketeering charges.

* * *

In early June, FDLE agents began knocking on voters' doors in Lake Mann Homes, a public housing complex on Orlando's west side.

When they first stopped by Hattie Bowman's house, she wasn't home. So agents questioned her 9-year-old daughter. They wanted to know where mom was, who she was with, what type of car she drove.

When Bowman returned, she could see firearms under the agents' coats. They told her they were conducting a criminal investigation.

"When they said 'criminal,' I said, 'Oh my God,'" Bowman said. They wanted to ask her 19 questions - on tape.

"As scared as I was," she said, "I didn't believe it."

She knew it was legal to vote by absentee ballot. And she did that again during the Aug. 31 primary.

About a mile away, agents asked voter Annie Justice if Thomas bribed her.

"If he bought votes, I want my money," she joked.

The agents didn't frighten her either, she said.

"I am not easily intimidated - believe me," she said.

In late June, Thomas called a news conference to decry the FDLE's tactics. Democratic activists claimed scores of voters were too scared to vote absentee.

"There are African-Americans who believe that if you vote absentee, you will have cops showing up at your door," said Egan, the Democratic lawyer.

New York Times columnist Bob Herbert compared the FDLE to sheriffs who suppressed the black vote in the segregated South.

FDLE agents said they behaved professionally and will release tapes of the interviews at the end of the investigation to show it.

"The notion that anyone was intimidated is more of a political notion than a factual reality," spokesman Tom Berlinger said.

One thing is certain. Egan said Thomas "is scared to death."

Thomas' criminal defense lawyer has begun cooperating with prosecutors and now defends the FDLE's conduct. "They were just doing their job," attorney Dean Mosley said.

Prosecutors questioned Thomas under a subpoena that gave him immunity from prosecution, Mosley said.

"I can't believe they want to prosecute a 73-year-old man who thought he was doing a public service," Mosley said. "I think their target is some elected officials."

Meanwhile, Thomas spends his days behind the screen door of his ranch house. For November's general election, he doesn't plan to collect a single absentee ballot.

Election chief warns of absentee scam

People posing as election officials are visiting residents of several counties and offering to take absentee ballots.

By STEPHEN HEGARTY, Times Staff Writer
Published October 22, 2004

Pasco elections officials have a warning for the county's absentee voters: **Don't give your ballot to a stranger claiming to be from the elections office.**

They're not who they say they are.

"The people who are soliciting your ballots in this manner are not elections officials," Pasco Elections Supervisor Kurt Browning warned Thursday.

The warning came after a phone call from a west Pasco woman. Other Florida counties have gotten similar complaints.

"We've had a bunch of them - 100 at least," said Bob Sweat, elections supervisor for Manatee County. "It's probably going on all over the state of Florida."

The Pasco woman said someone came to her home to collect her absentee ballot earlier this week. She said she was led to believe they were from the elections office. The woman told the strangers she hadn't completed the ballot, but they took it anyway.

The deception is the latest sign of the lengths to which some partisans appear ready to go in this election. Elections officials worry there will be many more complaints of overly aggressive behavior in attempts to affect the outcome of the presidential race.

Browning's office had not yet received the woman's absentee ballot Thursday. Given the circumstances, Browning arranged to send her another.

Other counties have had numerous complaints about similar misrepresentations.

"We've had a few people with those complaints - I'd say less than 10," said Dan Nolan, chief of staff for Hillsborough Supervisor of Elections Buddy Johnson. Johnson said he routinely advises voters to send their absentee ballots in via mail, or to bring it directly to his office.

In Manatee, there have been numerous complaints, and the Sheriff's Office is investigating.

017145

Manatee Elections Supervisor Sweat said the people collecting the ballots appeared to know exactly who had absentee ballots. It is possible for political parties, candidates and political groups to get lists of voters who request the absentee ballots.

Sweat said it appeared the collections were occurring in neighborhoods full of low-income, minority and elderly residents.

Several political-oriented groups are working hard to get their supporters to vote early, either through absentee ballots or early voting. It is legal for them to collect absentee ballots and turn them in to an elections office, so long as they don't misrepresent themselves or alter the ballots.

In his warning, Browning said, "I need to make it very clear that my office will never show up at your place of residence to collect your absentee ballot."

Because the presidential race is so close in Florida and its 27 electoral votes could decide who will take the White House, political groups are aggressively working to get their supporters to vote. Many say, though, that they are keeping their hands off the actual ballots.

A representative from the group Americans Coming Together said Thursday that they urge people to request absentee ballots, then collect the request cards and turn them in to elections officials. They have turned in thousands of requests in the Tampa Bay area. However, ACT stays away from the actual ballots, according to Tait Sye, state communications director for ACT, a Democratic voter mobilization group.

"We have turned in thousands of request cards for Pasco," Sye said. "But we are not collecting the absentee ballots, period."

017146

Florida Absentee Ballots-Party Affiliation Noted

Note: It is a long established practice in election fraud to "lose" mailed ballots belonging to members of the opposition party. Black Democrats in Florida have been particularly susceptible to "lost" ballots.

[EJF comments and annotations in Courier font.]

August 21, 2004 — The three letters on the front of the envelope containing Ben Hebblethwaite's absentee ballot screamed at him: DEM.

His party affiliation was marked in clear, if tiny, print on the address label directing the ballot to his Gainesville home.

Hebblethwaite, a professor of Haitian/Creole at the University of Florida, thought about the Gainesville postal worker he'd seen with a photo of President Bush tacked to his post-office cubicle. He thought about the slim margin in the 2000 presidential election and he thought about the statewide problems that year.

And then he panicked.

"If the election hinges on 200 votes, it would be pretty tempting, pretty easy, for a postal worker to slip a thousand ballots in the back of his truck," Hebblethwaite said. *"I have a great respect for postal workers, and I believe the large majority do respect our laws and democracy. God forbid such a crime would occur, but this is an invitation to commit a crime."* [Mail ballots are handled by many individuals besides postal workers. And often the ballots are bundled by party affiliation. Makes it quite easy to "lose" some.]

State law doesn't prohibit supervisors of elections from putting a voter's party affiliation on mailing materials, and some state and county officials dismissed Hebblethwaite's worry as trivial [A standard tactic by election officials. No one knows anything about elections but them.]

But others said with more people voting with absentee ballots, the supervisor of elections should be careful to a fault to protect absentee voters' privacy. [The basic problem here is that **no** ballots should be voted by mail if election fraud is to be minimized.]

"While it may not be strictly prohibited under state law, the overall intent of state law is to give the absentee voter the same degree of privacy an in-person voter would have," said Elliot Mincberg, vice president and legal director of **People for the American Way**, a national liberal advocacy group active in Florida politics. *"Other counties have found a way to deal with that. I think to better comply with the spirit of the law, as many counties do, that it's best to not have that information on the outside of the envelope."* [The better way to deal with this is to ban absentee/mail ballots in most cases as was done in the past.]

Florida Division of Elections lets each of the 67 county supervisors of elections decide how to best sort their absentee ballots, and using party affiliation is a common practice, according to a spokesman for that agency.

First complaint

[Top](#)

Alachua County Supervisor of Elections Beverly Hill said her office's computer system automatically puts a voter's party affiliation on the mailing label for outgoing ballots and also on the return-address label on the envelope carrying it back to her office.

"People get upset about different things during the course of an election, and we understand that," Hill said. *"But over 5,000 ballots have gone out now, and he's the only one to complain. His complaint is legitimate, but certainly for now, we'll continue in this election to do that."* [Typical reaction of election officials is to stick their heads in the sand and pretend the problem does not exist.]

01714^{PM}

No change expected

[Top](#)

Supervisor of elections staffers said they have used the same procedure in general elections and will likely do so again this November. [And since the problem doesn't exist, there is no need to fix it.]

Chuck Floyd, former chairman of Alachua County Democratic Executive Committee, said a concerned absentee voter could always go to the supervisor's office to vote or mail the ballot back inside another plain envelope.

Hebblethwaite said that doesn't ease his concern about the ballot's trip from the supervisor's office to his mailbox. Also, he said, he wanted to vote absentee in the first place to avoid the inconvenience of a trip downtown on election day — a practice many supervisors of elections are promoting. [And is that because they want to make election fraud easier?]

In addition, said other local officials, it should be just as easy to change the practice in the elections office.

"I don't see the need for us to advertise a person's party affiliation on the outside of the ballot," said Travis Horn, Alachua County Republican Executive Committee chairman. *"I would like to think the things this man is worried about don't happen, but I would also like to think there aren't bad people in the world. It seems a little bit naive to approach the issue that way."*

Public record

[Top](#)

A voter's party affiliation is already public record, Hill said, meaning anyone can provide a specific name to the supervisor of elections, then look at that information on a computer screen.

Hebblethwaite said he understands his name is already public record, but the likelihood of anyone getting it would be remote.

"It would take a very concerted criminal effort to look up all the voter rolls, carry a list around and match all the thousands of strange names to those on absentee ballots," Hebblethwaite said. [Actually, candidates and parties do this on a regular basis for mail campaigns, to walk precincts, identify voting trends, and other efforts to get out the vote and manipulate elections.]

A wider fear

[Top](#)

Hebblethwaite's outrage highlights a wider fear that during an election year in Florida, anything can happen, some officials said.

"People got so excited about the problems that the state of Florida experienced in 2000 that there seems to be a degree of almost paranoia about the efficiency of our voting system," Floyd said. *"I'm encouraged that people are concerned about the safety of the voting system, but I'd like to re-emphasize that we didn't experience any problems in Alachua County in 2000 and don't anticipate we will in 2004."* [But see October 21, 2004, story by [News4Jax.com](#) of investigation of vote fraud where "Alachua County learned people had their party affiliation changed to Republican against their will. The problem was discovered in a batch of 1,200 forms turned in by one man. Each of the forms registered voters as Republican."]

Hebblethwaite said he senses the paranoia, too. Even more reason to take extra care with even the finest details of policies and procedures, he said.

"Everyone knows Florida is the laughing stock of the United States when it comes to elections," Hebblethwaite said. *"The fact that we are perpetuating these kinds of problems so indifferently is very troubling."*

017148

Candidates weigh in

[Top](#)

Hill, who leaves her post this November, said she would let her successor decide whether to change the practice. Four Democratic candidates compete this month to run against Republican Ernesto Herrera for the spot in November.

Candidate Barbara Sharpe said she would research the issue if elected, but didn't know enough about it to comment now.

Kate Barnes, Pam Carpenter and Doug Hornbeck all said they would work to find a way to keep the party affiliation off the envelopes.

Hebblethwaite said he'll be watching the supervisor's race — and the mail — carefully.

"God help me if that sticker is on there again," Hebblethwaite said. "I'll certainly have to hand-deliver it if that happens."

State officials look into Milledgeville elections

By Keich Whicker
TELEGRAPH STAFF WRITER

MILLEDGEVILLE - The Secretary of State's Office is investigating a complaint by a former Milledgeville City Council candidate about possible wrongdoing in the city's November 2005 elections.

Benjamin Lewis, a political newcomer who failed to unseat incumbent Richard Mullins in the city's District 5 council contest, said he lodged an official complaint with the state earlier this month alleging election fraud and other voting irregularities on Election Day.

Lewis also said that he was not at liberty to discuss the specifics of his grievance because of the ongoing investigation.

According to city election results in District 5, Mullins defeated Lewis 426-320, a difference of 106 votes. In that contest, Mullins collected 118 absentee votes, while Lewis received 91.

Patti Rushin, the city's elections superintendent, confirmed that state investigators are in town.

"I'm not at liberty to divulge the names of the individuals being investigated, or the allegations, but my office and the Baldwin County Board of Registrars are cooperating fully with the investigation," she said.

State officials would not comment on the investigation, except to say that it exists and is focused on absentee ballots. Kara Sinkule, a spokeswoman for the Secretary of State's Office, said the evidence that has been collected will not be made public until after it is presented to the State Election Board in late February or early March.

Milledgeville City Manager E. Scott Wood said he believes the 2005 election was conducted properly by city employees and that he has no personal knowledge of any wrongdoing within the scope of his influence.

Lewis said several other complaints have been filed, but Wood said he knows of only one complaint to the state.

"I have no reason to believe or suspect any employee or agent of the city conducted him or herself inappropriately or mismanaged their election responsibilities," Wood said. "So we don't have any reason to consider it a city government issue. Now, if an individual did something illegal beyond the city's knowledge, then that's an issue between the secretary of state and that particular individual. And I expect and hope that individual is held appropriately accountable."

Absentee ballots are why then-Mayor Floyd Griffin Jr. requested the state dispatch election monitors to Milledgeville ahead of the Nov. 7 general election.

At the time, Griffin said he was concerned with changes brought about by House Bill 244, the so-called "voter ID bill," which allowed a person to request an absentee ballot without having to prove their identity or specify any reason as to why they needed it. Griffin said he viewed this as a loophole that could be taken advantage of by parties intent on election fraud.

At least three other candidates in the 2005 election were concerned about the legitimacy of absentee ballots. Lewis, Ken Morgan and Donald Hill each filed protests about absentee ballots with the Baldwin County Board of Registrars in the final days leading up to the general election. During an emergency meeting held Election

017150

Day, four absentee ballots from a group of eight that were challenged were thrown out by the board.

At the meeting's conclusion, Lewis admonished the board for not doing enough to curb irregularities and said he thought anyone who committed fraud by absentee ballot should be prosecuted and convicted in a court of law. He also said instances of voter fraud and other forms of voter intimidation were widespread within the city, a claim Hill agreed with.

A total of 408 absentee votes were cast in Milledgeville's general election, while an additional 81 absentee ballots were returned in the special runoff election between Hill and District 3 incumbent Denese Shinholster.

The majority of the absentee ballots in the election were cast in Districts 3 and 5, where Shinholster ultimately defeated Hill 195-120 in a runoff and Mullins overcame Lewis.

A total of 81 absentee votes were counted in the District 3 runoff between Shinholster and Hill, and 209 were counted in the District 5 contest between Lewis and Mullins. Those numbers illustrate that about one of every four voters from those two race's respective electorates voted through absentee ballots.

In both cases, the two successful incumbents collected more votes from absentee ballots than their opponents.

Now They're Registered, Now They're Not

Election Officials Express Dismay at Extent of Misinformation, Variety of Tricks Targeting Voters

By Jo Becker and David Finkel

Washington Post Staff Writers

Sunday, October 31, 2004; Page A22

As if things weren't complicated enough, here comes the dirt.

Registered voters who have been somehow unregistered. Democrats who suddenly find they've been re-registered as Republicans. A flier announcing that Election Day has been extended through Wednesday.

Dirty tricks are a staple of campaigns, but election officials say this year's could achieve new highs in numbers and new lows in scope, especially in key battleground states such as Florida and Ohio, where special-interest groups have poured in to influence the neck-and-neck race between President Bush and Sen. John F. Kerry.

"In my 16 years as an election administrator, I've never seen anything like this," said Ion Sancho, supervisor of elections in Leon County, Fla. "I see it as an expression of a political culture that has evolved in the United States of win at any cost. It's not partisan, but it's just lie, cheat and steal, and ethics be damned."

The problem in Leon County: Students at Florida State and Florida A&M universities, some of whom signed petitions to legalize medical marijuana or impose stiffer penalties for child molesters, unknowingly had their party registration switched to Republican and their addresses changed.

Officials say students at the University of Florida in Alachua County have made similar complaints and that about 4,000 potential voters in all have been affected. Local papers have traced some of the problems to a group hired by the Florida Republican Party, which has denounced the shenanigans. Switching voters' party affiliations does not affect their ability to vote, but changing addresses does, because when voters shows up at their proper polling places, they will not be registered there.

The college scam has also made an appearance in Pennsylvania, along with a separate scam last week in Allegheny County, where election officials received a flurry of phone calls about fliers handed out at a Pittsburgh area mall and mailed to an unknown number of homes. The flier, distributed on bogus but official-looking stationery with a county letterhead, told voters that "due to immense voter turnout expected on Tuesday," the election had been extended. Republicans should vote Tuesday, Nov. 2, it said -- and Democrats on Wednesday. A criminal investigation has been launched.

Authorities in several states also are investigating claims, by former employees of groups paid by both the Republican Party and Democratic-leaning interest groups, that they destroyed or did not turn in new registrations by voters of the opposite party.

Clouding investigations are claims and counterclaims not only about tricks, but double dirty tricks.

017152

In Wisconsin, a flier is circulating in Milwaukee's black neighborhoods that purports to be from the "Milwaukee Black Voters League." "If you've already voted in any election this year, you can't vote in the presidential election," the flier reads. "If you violate any of these laws, you can get ten years in prison and your children will get taken away from you."

Chris Lato, a spokesman for the Wisconsin Republican Party, called the fliers "appalling" but wondered whether Democratic interest groups might be to blame. He said circulators falsely claiming to represent the Republican Party might be trying to gin up turnout among black voters.

"First of all, the claim was false, and it seems a little obvious," he said. "We have a lot of these shadowy Democratic groups here in Wisconsin, and I wouldn't put it past 'em to do something like this to muck up the works."

Meanwhile, in Lake County, Ohio, some voters received a memo on bogus Board of Elections letterhead, informing voters who registered through Democratic and NAACP drives that they could not vote. Election officials referred the matter to the sheriff.

Lawyers for the Ohio GOP, who have charged Democratic groups with registering fictitious characters such as Mary Poppins, said Friday that they condemned election fraud and misinformation campaigns of any kind. But some local Lake County Republicans have adopted the double-dirty-trick explanation, saying the Democrats are out to make the GOP look bad.

Whatever the motive, election officials say that voters are genuinely confused by the misinformation. In the Cleveland area, election officials said they received a spate of complaints after voters began receiving phone calls incorrectly informing them that their polling place had changed. In addition, unknown volunteers began showing up at voters' doors, illegally offering to collect and deliver completed absentee ballots to the election office.

Jane Platten, a spokeswoman for the Cuyahoga County Board of Elections, said officials have not identified who is behind the tricks. "We've never seen anything like this before, where there seems to be a concerted effort to to give voters misinformation," she said.

In South Carolina, Charleston County election officials warned voters Friday to ignore a fake letter that purports to be from the NAACP. The letter threatens voters who have outstanding parking tickets or have failed to pay child support with arrest.

"Thankfully, we got this in time to do something about it," said the Rev. Joe Darby, first vice president of the South Carolina state conference of the NAACP, who learned about the letter his organization supposedly had written when it showed up in his own mailbox. "This isn't new -- it's the South Carolina politics of ignorance. And it's not surprising, because this is one of those every-vote-counts elections. But I don't think people will be fooled."

U.S. Elections Assistance Commission Withheld Report Showing 'Voter Fraud' (as Opposed to ELECTION Fraud) Not a Problem!

Democracy Hater, GOP Operative, Thor Hearne of the Phony Anti-American Front Group 'American Center for Voting Rights' is Back Spreading Propoganda for the Republicans!

And the U.S. Commission on Civil Rights is Set to Help Them in a Hearing this Friday...

The U.S. Elections Assistance Commission (EAC) is now doing the bidding of the RNC, according to an article today from USA TODAY.

It seems that the EAC commissioned, received, and then buried a report concerning the issue of Voter Fraud (as opposed to *Election* Fraud and other legitimate disenfranchisement issues) when they didn't like the results they received. The report, which the commission received four months ago but failed to release, found "little evidence" of the "problem" now being pushed nationwide by GOP operatives as evidence that disenfranchising Photo ID requirement laws should be passed in states across the country.

Such laws have been passed, and found unconstitutional from Georgia to Arizona to Missouri, yet the proponents of this scam — who have shown themselves willing to stoop to any level to keep Democratic-leaning voters, who are far more likely to lack drivers' licenses, from voting — have been keeping up their ongoing and expensive propaganda campaign.

Members of the commission were reportedly split on whether to release the report publicly. That internal battle four months ago may have led to at least one resignation from the commission, The BRAD BLOG has learned. Now chaired by outgoing Bush-appointee Paul DiGregorio since the original chair Rev. DeForest Soaries resigned in frustration, citing lack of support for true electoral reform from both the White House and Congress, the EAC has been much criticized for their failure to oversee implementation of and standards for new Electronic Voting Systems across the country.

The item today from *USA TODAY* suggests that the commission may now have become entirely politicized and polarized...

WASHINGTON — At a time when many states are instituting new requirements for voter registration and identification, a preliminary report to the U.S. Election Assistance Commission has found little evidence of the type of polling-place fraud those measures seek to stop.

017154

USA TODAY obtained the report from the commission four months after it was delivered by two consultants hired to write it. The commission has not distributed it publicly.

A [blog item](#), also posted today by *USA Today*, includes a link to the now [unearthed report \[PDF\]](#) which the EAC had sought to bury.

The report goes on to quote from GOP operative Mark F. "Thor" Hearne, who is still pushing his deceitful line about the non-existent "epidemic" of voter fraud in the country. Unfortunately, it is Hearne himself who appears to be the fraud, as [The BRAD BLOG](#) revealed in a [series of reports](#) beginning in March of 2005.

The RNC and the White House, via Hearne, their main operative on the Photo ID canard, have spread phony propaganda suggesting an epidemic of *voter* fraud in America ever since the 2004 election, when hundreds of thousands of voters were disenfranchised at the hands of GOP operatives.

Hearne and his motley crew created the phony, self-described "non-partisan" GOP front group, calling themselves "American Center for Voting Rights" (ACVR), as we [first revealed](#) on March 22nd, 2005, shortly after they were the only "Voting Rights" group called to testify before congressional hearings held by the now-disgraced Rep. Bob Ney (R-OH) on what went wrong in Ohio's 2004 Presidential Election.

Hearne testified before Ney's House Administration Committee on behalf of ACVR just three days after the group was created. He testified only that he was "a long time voting rights advocate," and didn't bother to mention that he had been the General Counsel for Bush/Cheney '04 or that ACVR's co-founder was Jim Dyke, the RNC Communications Director.

Dyke now [works out of Dick Cheney's office](#) in the White House. After exposure of the sham organization by this reporter, the group eventually added "[Democrat](#)" [Brian Lunde](#) as Executive Director. Lunde is a close advisor to Karl Rove and worked hard for Bush in 2004 and to retain a Republican Majority.

The group has been pushing phony stories about "Voter Fraud" to encourage disenfranchising Photo ID laws in states around the country ever since. The ACVR was even [behind the creation](#) of the Baker/Carter Commission, which also called for restrictive Photo ID laws.

From *USA TODAY* again...

Conservatives dispute the research and conclusions. Thor Hearne, counsel to the American Center for Voting Rights, notes that the Justice Department has sued Missouri for having ineligible voters registered, while dead people have turned up on the registration rolls in Michigan. "It is just wrong to say that this isn't a problem," he says.

That's one reason the commission decided not to officially release the report. "There was a division of opinion here," Chairman Paul DeGregorio says. "We've seen places where fraud does occur."

The consultants found little evidence of that.

In the meantime, the sham continues this Friday when the U.S. Commission on Civil Rights will hold a hearing to discuss some of these matters. But the speakers list, The BRAD BLOG has learned, is made up most of the usual Photo ID Suspects.

The list includes the same old crew: Hearne, Prof. Robert Pastor (Executive Director of the cooked Baker/Carter Commission, who went ballistic in a BRAD BLOG interview last year) and the *Wallstreet Journal's* ultra-con John Fund, who wrote a book full of this propoganda some years ago that served to launch the current insidious movement.

The only invited speaker representating anything close to an *actual* legitimate voting rights activist is Donna Brazile of the DNC's Voting Rights Institute. We have warned her that it would seem she is being set up by appearing with this barrel of bad apples.

For more information on the "non-partisan" tax-exempt ACVR scam and the snakeoil salesmen who invented it, Bush/Cheney '04 National General Counsel Mark F. "Thor" Hearne and RNC Communications Director Jim Dyke, please see BRAD BLOG's full Special Coverage of the "American Center for Voting Rights" at <http://www.BradBlog.com/ACVR.htm>.

The complete press release for the U.S. Commission on Civil Rights hearing this Friday is posted in full below...

FBI beefs up staff to probe pols

By Alexander Bolton

Federal law-enforcement officials say they witnessed a dramatic jump in campaign-finance and other election-related crimes in the 2004 presidential election year and are determined to beef up their policing of candidates running for federal and local office around the country this year.

Illegal fundraising schemes appear to have grown in number and sophistication as candidates have needed to raise more and more money to be competitive. Several members of Congress have recently found themselves caught up in fundraising controversies.

In the past year and a half, the Federal Bureau of Investigation (FBI) has reassigned nearly 200 agents to the problem of public corruption, bringing to 600 the total number of agents working on public-integrity cases.

While the Justice Department's increased focus on public corruption has been talked about in Washington, the FBI's elevation of such crimes among its priorities is less known. Even less noticed has been the FBI's new focus on violations of election law, which for years law-enforcement officials considered minor crimes, lawyers specializing in the field said.

But that is changing as candidates and their supporters have become bolder and more creative in skirting fundraising and election law. Furthermore, legislation Congress passed in 2002 making many election-law violations felonies has given law-enforcement officials greater incentive to investigate and prosecute.

Chip Burrus, assistant director of the FBI's Criminal Investigative Division, who is in charge of all public-corruption investigations, explained the new emphasis on election crimes in an interview Monday.

"We kept getting a lot of reports from the field regarding different schemes that were coming up that involved election issues," he said. "These schemes are getting a lot more complicated than they ever have been before."

Burrus said that the bureau had previously designated "two or three agents" 30 days before Election Day to respond to allegations of voter

017157

fraud. Often, these agents couldn't do much before the election for fear of being accused of interfering in the election.

"We always seemed to be chasing the problem instead of getting ahead of it," he said. "Now we have agents looking for this stuff every day," instead of waiting until late September or October.

A spokesman for the Department of Justice said that the department has focused on public corruption for a long time and that the FBI has started to bring itself more "in line" with that focus.

In 2000, when George W. Bush and Al Gore squared off for the White House, the FBI opened only eight election-law-related cases. Two years later, during the 2002 midterm election, the bureau opened 19 such cases. But in 2004 the FBI investigated 68 potential violations of election law, according to statistics provided by the agency.

The number of cases opened in 2005 dropped to 21, but law-enforcement officials are anticipating another surge this year.

To prepare, the FBI has trained 60 agents spread throughout all 56 field offices in campaign-finance and election law. Two members of the Federal Election Commission helped instruct the agents. So did Kenneth Gross, a prominent Washington-based campaign-finance lawyer, who gave them insight into the strategies and perspectives of defense lawyers.

"We'll put as many agents as we need to on these cases," Burrus said. He added that public-corruption crimes are now fourth among the FBI's priorities, after terrorism, counterintelligence and computer crimes, such as Internet fraud and identity theft. Burrus said the effort is not a reaction to the high-profile scandal involving former lobbyist Jack Abramoff, who has pleaded guilty to conspiring to bribe public officials.

Observers of elections applaud the renewed commitment to ensuring that local and federal candidates follow the law, yet some say that law enforcement should be careful not to intimidate voters or tarnish candidates.

"Failure to enforce laws means that some campaigns are playing by the rules while others benefit by not playing by the rules," said Spencer Overton, a law professor at George Washington University.

"In the same token, however, we should ensure that enforcement is evenhanded and not politically motivated, said Overton, who has written a new book, *Stealing Democracy: The New Politics of Voter Suppression*. "We don't want the improper enforcement of laws to either chill grassroots political activity or favor one political party to the

detriment of the other.”

FBI officials say that the bureau generated the initiative and that it was not imposed on it by the administration. Supervisory Special Agent Michael Elliot, an official who helped train agents said they were given clear instructions to treat election cases very sensitively.

Election experts said that the instances of ballot fraud and voter suppression do not appear to have increased in recent years but that there has been more suspicious or outright improper fundraising.

Tova Andrea Wang, a fellow at the Century Foundation, a liberal-leaning public-policy organization, who specializes in election reform said she doubts that anyone knows the amount of election fraud committed in the country. In contrast to the perceived growth in improper fundraising activities, Wang said, she believes that cases of ballot fraud are “extremely isolated” and have not increased in recent years.

But experts who follow campaign fundraising paint a different picture.

Nick Nyhart, the executive director of Public Campaign, a liberal group that advocates for the public financing of campaigns, said he suspects that many interactions between candidates and political donors are improper.

A candidate-donor relationship that has come under media scrutiny has been the one between Rep. Jerry Lewis (R-Calif.), chairman of the House Appropriations Committee, and the investment company Cerberus Capital Management. One day after political donors linked to Cerberus gave Lewis’s political action committee \$110,000, the House passed a bill that preserved funding for a Navy project important to the firm that Lewis had criticized. Lewis, who then was chairman of the House defense-spending subcommittee, was responsible for crafting the bill.

Lewis has denied having known at the time that Cerberus had an interest in the Navy project.

“There’s no doubt it was an underpoliced area in the past,” said Norm Ornstein, a scholar at the conservative American Enterprise Institute who specializes in elections and politics, referring to activities covered by election law. “I think we’re seeing a lot more questionable activity. I trace a lot of it to the leadership PAC phenomenon.”

Ornstein explained that lawmakers who do not face tough reelection races nevertheless feel pressure to raise a lot of money through political action committees for other candidates to ingratiate themselves with the party leadership. He noted that Lewis won his position as chairman

of the Appropriations Committee in part because of the vast amount of money he raised for Republican candidates and that a significant portion of the funds came from Cerberus.

Supporting the assertion that illegal campaign-finance schemes have grown in number, the Federal Election Commission has recently handed out several of its largest fines in agency history. For example, in April the agency fined Freddie Mac a record \$3.8 million for illegally using corporate resources to raise more than \$1.5 million for Republican lawmakers, including Rep. Michael Oxley (R-Ohio), chairman of the House Financial Services Committee.

Nyhart, however, predicted that candidates' and donors' shady practices will drop once word spreads that the FBI is paying more attention.

"If they know that their FBI agents in every field office are looking over their shoulders, I think they'll be careful in not engaging in direct quid pro quos when it comes of campaign promises," he said.

Georgia

REGISTRATION IN GEORGIA: Bogus addresses clutter voter rolls (EAC is mentioned)

Atlanta Journal-Constitution
Alan Judd - Staff
Tuesday, January 10, 2006

The grimy stucco storefront at 169 Trinity Ave. houses the Atlanta Recovery Center, a shelter for homeless men fighting drugs and alcohol. It also is home --- on paper, anyway --- to 208 registered voters.

One purportedly is 102 years old. Four are sex offenders who list the shelter as their permanent residence. Twenty of the 208 have cast ballots at least once since 2004.

It's anybody's guess, though, as to where they actually live or where they should be registered to vote. With at least three registered twice, it's not clear how many of them really exist.

That uncertainty underscores a basic flaw that permeates Georgia's voter registration system. While lawmakers debate anti-fraud legislation that would require voters to show photo identification at the polls, an analysis by The Atlanta Journal-Constitution shows the system is ripe for abuses that the voter-ID proposal might not detect.

Georgia relies on an honor system that assumes voters live at the addresses they submit when they register. These addresses determine voters' precinct assignments and, consequently, the elections in which they may cast ballots.

The honor system failed in the Atlanta City Council's 6th District, the Journal-Constitution found.

Five votes separated the two candidates in November's election. But the newspaper identified seven voters who claim as their home addresses one of two UPS Stores on Monroe Drive, where each rents a mailbox. Another voter in the 6th District last November recorded his address as an apartment at 541 10th Street N.E. --- the location of the tennis courts at Grady High School.

None of those eight --- whose ballots could have swayed the election's results --- should have been allowed to vote while registered at inaccurate addresses. But they are just a few among at least 2,000 in Fulton and other metro Atlanta counties who claim to reside at addresses that are not residential at all.

The rolls contain voters who list home addresses at the Fulton County Jail, Atlanta City Hall, downtown office towers like the Equitable Building, churches, homeless shelters, schools, the Journal-Constitution's headquarters, even the county government complex on Pryor Street --- the same address as the election office.

More than 1,000 voters in metro Atlanta registered from addresses that actually are commercial mailbox facilities such as UPS Stores, according to the Journal-Constitution's analysis. About 700 of those voters are registered in Fulton County, 132 in DeKalb and 91 in Gwinnett. The rest are dispersed across the metro area.

The findings, particularly concerning the 6th District council race, did not surprise John Sullivan, Fulton County's voter registration chief.

"If you start digging in any close election," Sullivan said, "it's possible to find enough to overturn the election."

'What difference does it make?'

017161

On Larry Royster's voter registration record, his home address is listed as Apartment F913 at 1579 Monroe Drive in Atlanta. No such apartment exists. Instead, that address is a mailbox inside the UPS Store across from Ansley Mall.

Royster, 59, was one of the seven people with addresses at UPS Stores who voted in the 6th District on Nov. 8. Like Royster's, the others' registrations reflect an apartment number that is merely a mail drop.

"I'm a trucker," said Royster, who declined in a brief telephone interview to say where he lives. "I'm on the road most of the time. What difference does it make?"

State law requires that voters provide accurate home addresses to keep them from influencing the outcome of elections for which they are not eligible to cast ballots. Although knowingly giving false information on a voter registration application is a felony, officials say they have prosecuted few, if any, voters who provided an inaccurate address.

On Monday, the first day of their 2006 session, state lawmakers moved quickly to advance a bill that would require voters to present a government-issued photo identification card, such as a driver's license, at polling places. The bill, similar to one passed last year but temporarily blocked by a federal judge, passed the House Governmental Affairs Committee on Monday and could come before the full House for debate by the end of the week. The measure, however, would not require voters to document their residence.

Following inquiries by the Journal-Constitution, officials recently sent letters to voters --- 526 in Fulton County, 132 in DeKalb --- who cited addresses at commercial mailbox outlets. The letters instructed the voters to document their true residence or risk being deleted from the voting rolls. Gwinnett County also is checking its rolls.

DeKalb's elections board meets on the matter today. Fulton's board has scheduled a hearing for Jan. 25.

Linda Latimore, DeKalb's elections registrar, said her staff located the 132 voters at 14 commercial mailbox outlets. She does not think the improper registrations were part of an organized effort to commit election fraud.

"I think a lot of it is innocent," Latimore said. "Maybe they live in apartments and don't think the mail there is secure."

"People move in and out for convenience's sake," she said. "They just use that as their address."

Susan Segars, for instance, uses a box at a UPS Store at 1425 Market Blvd. in Roswell to collect her mail. She lives nearby, in the same voting precinct. So, she said, listing the mailbox address on her voter registration form made sense.

"It's more secure," she said. The voter rolls are public record, she said, and "I don't like to publish my address."

Segars, 43, votes regularly --- 10 times this decade. But she said she has never tried to hide from poll workers the fact that her residence doesn't match her address in their files.

"They know it," she said. "I tell them every time."

Detection difficult

Despite some voters' frankness, election officials say detecting inaccurate addresses is difficult.

017162

For years, prospective voters had to register in person at a county election office. That changed after Congress adopted the National Voter Registration Act of 1993, commonly known as the motor voter law because it allows residents to register to vote while obtaining or renewing a driver's license.

The law requires prospective voters to document only their identity, not their residence, said Chris Riggall, a spokesman for Secretary of State Cathy Cox, Georgia's chief elections officer. And the documentation of identity is not rigorous; an easily obtained Social Security card will suffice.

County election registrars plug applicants' information into a statewide computer database. If an address is on a real street, the registration goes through. The database disregards whether the address is residential, commercial or even industrial.

"It's not an extensively vetted process," Riggall said.

A few states, such as California, canvass neighborhoods to spot-check their voter lists, according to the U.S. Election Assistance Commission, a federal agency that certifies state voting systems. Wyoming checks property ownership lists and car registrations, and Massachusetts compares its voter rolls against an annual statewide census of street addresses.

In metro Atlanta, officials said, rapid growth creates problems.

"We've got so many areas now where it's residential today, and tomorrow it's gone commercial," said Lynn Ledford, Gwinnett County's elections supervisor. Her staff is compiling a list of commercial addresses to compare against voter registration applications.

No one denies that the potential for abuse is high. Anyone who filled out a phony registration application could also present a false identification card at the polls, possibly at numerous locations, casting any number of fraudulent ballots.

Sullivan, of Fulton's elections office, said workers discovered an apparent scheme to submit fraudulent registrations in 2004.

About 5,000 applications for registration arrived in the mail, filled out in similar, if not identical, handwriting, Sullivan said. Workers also noticed that many forms appeared to have been filled out in sequence, possibly from a telephone directory.

The county sent letters to each of the purported applicants. "Of course," Sullivan said, "we had very, very few responses."

Officials discarded nearly all the apparently bogus applications, but never identified the culprit.

"We kept a bunch of trash off the rolls," Sullivan said. "But this isn't a tiny community where everybody knows everybody. Basically, whatever's on the document is what we have to deal with."

Sometimes, even blatant discrepancies slip by the workers who punch data from applications into the statewide database.

For several years, workers have processed applications from people who say they live at the Atlanta Recovery Center on Trinity Avenue, two-tenths of a mile and just around the corner from the Fulton elections office. The center offers 187 beds for temporary, "transitional" housing for homeless men looking for a place to live, said William Cowins, its operations manager. Some former clients use the center as a mail drop, Cowins said.

017163

The applications failed to raise doubts, even coming from a man who registered to vote on July 28, 2003 - -- the day he supposedly turned 100. The fact that a man with the same name, born 48 years later, had also registered at the same address in 2001 slipped by, as well.

Cowins said the man receives outpatient mental health care at the VA Medical Center in DeKalb County and is "one of our best clients." He was surprised the man is registered to vote, especially as a centenarian.

"He's nowhere near 102," Cowins said. "But next week, he'd tell you he's 202."

REGISTRATION PROCESS

When Congress passed what became known as the motor voter law in 1993, it intended to make registering to vote as easy as possible for as many people as possible. Here is how the registration process works:

1. A prospective voter may submit an application for registration by mail, while obtaining or renewing a driver's license, or in person at the county elections office. An applicant is supposed to submit one of about a dozen documents, such as a copy of a Social Security card, to prove his or her identity. No proof of residence is required.
2. Applications submitted through driver's license offices or by mail go to the Georgia secretary of state's office, which distributes them to the appropriate county elections office.
3. Workers at the county level put information about prospective voters into a statewide computer database. It is designed to prevent duplicate registrations by comparing registrants' Social Security numbers.
4. Before assigning a voter to a precinct, election workers check whether a registrant's reported address exists, but not whether it's actually a residence. Post office boxes are not accepted.
5. Twice a year, the Secretary of State's office compares a change-of-address database from the U.S. Postal Service against its own registration database to find voters who have moved but have not updated their registration.
6. When inaccurate registration addresses are found, officials send letters to voters instructing them to document their residence, appear at a hearing of the county elections board or risk being deleted from the voter rolls.

ANALYZING THE DATA

To identify voters who do not appear to live at the addresses for which they are registered, The Atlanta Journal-Constitution compared a statewide voter registration database with a list of more than 100 commercial mailbox outlets in metro Atlanta. The newspaper also checked for voter registrations in the downtown business district and at government facilities.

David A. Milliron, the Journal-Constitution's database editor, supervised the analysis. Additional analysis was provided by Group 1 Software, a subsidiary of Pitney Bowes Inc.

McDonough election lawsuit to be dropped

By Michael Davis

One of the lawsuits contesting the outcome of the McDonough's November elections will be dropped, an attorney for one of plaintiffs said Tuesday.

A suit filed in Henry County Superior Court by McDonough resident Scott Reeves contesting his father's loss of the election for an at-large seat by three votes will be dropped, said his attorney Everett Mechem. Longtime Councilman B.P. "Doc" Reeves, lost the Nov. 8 contest to Gina Riffey by a vote of 637-635.

A separate suit, however, will continue with a Friday hearing scheduled for 10 a.m.

Kathy Hubert, Scott Reeves' sister, is contesting her loss of the election to the District III seat on the council to engineer Wayne Smith, by a 245-244 margin.

Mechem is representing Hubert in that suit as well.

The suits allege voting irregularities - specifically that voters cast ballots in races outside their districts - and seeks a new election.

A recount was conducted Nov. 10 and resulted in one more vote for Billy Copeland, who was sworn in Tuesday as the city's mayor, but no other changes.

Henry County is named in the suit because the election was conducted by its election department at the request of the city of McDonough.

GOP's 2 take aim at fraud in voting However, the men have differing views on which safeguards Iowa should use to achieve accuracy.

JONATHAN ROOS
REGISTER STAFF WRITER

The two Republicans seeking to become their party's nominee for Iowa secretary of state share a common worry — voter fraud.

Former Assistant U.S. Attorney Robert Dopf and Des Moines podiatrist Chuck Allison, competitors in the June 6 primary, agree that Iowa's voting system is vulnerable to abuse because of the increasingly common practice of voting by absentee ballot.

While Iowa has a history of fair and honest elections, "if you open the door even a crack, the cheaters come running through," said Dopf, 57, who worked as a federal prosecutor in Iowa's Southern District from 1982 until this year.

Said Allison, 51, who made an unsuccessful bid for the Legislature two years ago, "We're making it so easy to defraud the system that we might not be able to detect it."

The winner in the primary will face Democrat Michael Mauro, the Polk County auditor, in the November general election.

Chet Culver, the current secretary of state, is seeking the Democratic nomination for governor.

In addition to overseeing elections, the Iowa secretary of state is responsible for registering corporations to transact business in the state, among other duties.

Allison and Dopf object to Gov. Tom Vilsack's executive order last summer that restored the voting rights of tens of thousands of felons who had completed their sentences. Before the order, the governor had been considering individual citizenship requests from felons.

Vilsack, a Democrat, said he wanted to speed up the process and help felons rejoin society so they could become productive citizens.

Allison said he would seek to have the next governor or the Legislature reverse the felon voting order. "I don't think the system was broken to begin with," he said.

"What was done was shameful," said Dopf, who sees Vilsack's blanket order as part of a larger Democratic strategy to gain an electoral advantage. "That policy decision should have been left to the Legislature."

The GOP candidates have found common cause in portraying Mauro, the brother of Polk County supervisor John Mauro, as an cog in the "machine-style politics" of Polk County Democrats.

Dopf, in a press release, said that Michael Mauro received a \$300 campaign contribution from Ramona Cunningham, former director of an Iowa job training agency, Central Iowa Employment and Training Consortium, that is under investigation for dishing out big salaries and bonuses to her and other agency executives.

Dopf also noted that Michael Mauro's son, Steve, works for the agency, commonly referred to as CIETC.

"The whole episode has been a black eye for our state and offers a preview of what could happen to the office responsible for overseeing the integrity and fairness of Iowa's elections if the Democrats prevail," Dopf said.

Michael Mauro has denounced attempts to link him to the salary scandal, saying that Republicans are trying to embarrass people for political gain.

"Hopefully, people will see through that kind of nonsense," he has said.

The two GOP candidates for secretary of state have slung few darts and arrows at each other.

Dopf believes he has the best chance of winning in November, given his experience as a federal prosecutor whose duties

Chuck Allison

AGE: 51

PARTY: Republican

HOME: Des Moines

EDUCATION: Bachelor's degree in history from Bellevue University in Nebraska, 1979; master's degree in history from the University of Northern Iowa, 1989; doctorate in podiatric medicine from Des Moines University, 1995

CAREER: Served in Army and Air Force before starting podiatry practice

FAMILY: Married; three children and three grandchildren

included monitoring elections for signs of fraud and prosecuting election law violations.

Allison, who lost to Democrat Rick Olson of Des Moines in an Iowa House contest in 2004, said that he has the edge because he got into the secretary of state race earlier than Dopf.

Allison would tighten voting laws by eliminating the use of "third party" couriers to deliver absentee ballots. He also favors requiring voters to show photo IDs, which he said would be no different than requiring people to produce identification when they cash checks or board airplanes.

One of Dopf's priorities is legislation requiring electronic voting machines to print paper records that could be used to verify the machines' accuracy. He also favors shortening the period for casting absentee ballots, as well as instructing people to give a reason why they are unable to go to the polls to vote.

Bi-state election officials meet

By Jo Mannies
Monday, Apr. 10 2006

Election officials from eight jurisdictions on both sides of the river met Monday at the St. Louis Election Board to discuss setting up a task force "to share voter information in order to combat voter fraud."

The city Election Board release said that, "participants included Madison County Clerk **Mark Von Nida**; Monroe County Clerk **Dennis M. Knobloch**; St. Clair County Clerk **Robert Delaney**; Jefferson County Clerk **Janet C. McMillian**; St. Charles County Clerk **Richard Chrismer**; East St. Louis Election Board Director **James Lewis**; St. Louis County Election Board Chairman **John Diehl, Jr.**; St. Louis City Election Board Chairman **Edward R. Martin, Jr.** and St. Louis City Election Board Member **Clarence E. Dula**."

"Participants agreed to formalize their new relationship in the form of a task force for voter election with details forthcoming," added the release, which was sent out by the city Election Board.

"...Sharing vital records and registered voter information will enable the election authorities to cross check voter information and help eliminate duplicate voter registrations and the registrations of deceased voters," it said. "A more open line of communication between jurisdictions in the bi-state area will promote information sharing and the creation of an inter-jurisdictional support network to address situations and concerns faced by election authorities. The participants plan to meet quarterly to discuss on-going problems and potential solutions."

Absentee voter fraud untouched by ID law
Most frequent form of cheating may be eased by recent rules

By [ALAN JUDD](#)
The Atlanta Journal-Constitution
Published on: 01/29/06

Bunnis Williams left nothing to chance.

Determined to win a fifth term on Valdosta's City Council in 2001, Williams falsified voters' applications for absentee ballots. He filled out some ballots himself. Then, records show, he mailed them in — unwittingly including his fingerprints and sealing his fate as a convicted felon.

Williams pleaded guilty in 2003 in a case that epitomizes the most common form of election fraud in Georgia: the manipulation of absentee ballots.

The case underscores what's missing in a new state law requiring voters to show government-issued photo identification at the polls.

The law is designed to ensure voters are who they say they are. It does nothing, however, to address widespread irregularities in absentee voting, the subject of more allegations filed with the State Election Board than all other abuses combined. Since the beginning of 2004, 16 of 27 cases brought before the board involved absentee balloting.

If anything, critics say, the new measure may enable more fraud.

It does not change a law enacted in 2005 allowing voters to request an absentee ballot without saying why they want one. Even some supporters of the law say such "no-fault" or "no-excuse" voting assists schemes to cast ballots for the dead, the infirm or those who simply choose not to exercise their franchise.

But Gov. Sonny Perdue, who signed the measure into law Thursday, and others say it is a strong shield against electoral cheating, a protector of the integrity of the ballot box.

Perdue and Republican lawmakers dismiss Democrats' complaints that the voter identification bill is misguided. The governor and his allies contend that enough safeguards exist to combat absentee ballot fraud.

"There's a huge distinction as we have gone to electronic ballot boxes in Georgia, without

a paper trail, which concerns some of us," Perdue said during a news conference Thursday. With absentee ballots, "you have a signature record, a paper trail that can be tracked back."

The new law's chief sponsor, Sen. Cecil Staton (R-Macon), said he wanted to close loopholes that regulating absentee balloting would not address.

"I think it's quite disingenuous to say that all the fraud is in the absentee ballots," Staton said. "How can we say that when the system we previously had allowed for virtually no way to catch it?"

House Speaker Glenn Richardson said he told critics to draft separate legislation if they wanted to address absentee balloting.

"All they did was come back with proposals to put back the law as it existed before we changed it," said Richardson (R-Hiram). "That's no solution."

Democrats have accused the General Assembly's Republican majority of pushing the voter ID law for political gain, not to prevent fraud. They have complained bitterly that the law will hurt minority voters, the poor and others who don't possess acceptable identification.

By not addressing absentee voting, "it says to me they're not interested in cleaning up voter fraud, period," said Georgia Secretary of State Cathy Cox, who is seeking the Democratic nomination for governor.

Votes cast in person are secure, Cox contends, but "there's very little, if any, control over the process when the ballots have left the elections office."

David Worley, a Democratic appointee to the State Election Board, said the bill was "designed to correct a problem that doesn't exist."

"There have been no cases that have come to the State Election Board of people trying to vote and claiming to be someone else," he said. "At every regular meeting of the State Election Board, there have always been cases involving allegations of absentee ballot fraud."

Few ballots can swing vote

Outside the debate over Georgia's voter ID law, Democrats and Republicans generally agree that fraud is an inherent risk in absentee balloting.

The Commission on Federal Election Reform — headed by former President Jimmy Carter, a Democrat, and former Secretary of State James Baker, a Republican — last year called absentee ballots "the largest source of potential voter fraud."

Citizens who fill out ballots at locations like nursing homes are susceptible to intimidation, the commission said. Its report also suggested blank absentee ballots could be intercepted in the mail and that voting by mail makes vote-buying schemes more difficult to detect.

In a paper published in 2001, Hans A. von Spakovsky, an Atlanta lawyer whom President Bush recently appointed to the Federal Elections Commission, made a similar point. He asserted that by loosening restrictions on registration and absentee voting, recently enacted laws "make it possible for an individual to register to vote, request an absentee ballot, and cast a vote without any election official ever seeing that individual and making sure they really exist."

In Georgia, most fraud cases originate in rural counties, where even a few votes can swing an election.

In Coffee County in 2000, for instance, campaign workers for Sheriff Carlton Evans illegally collected absentee ballots from a handful of voters, according to State Election Board records. The voters told investigators they had no idea whether the sheriff or his opponent ended up receiving their votes. Evans won the primary but committed suicide three months later as state and federal agents tried to arrest him on drug charges.

The election board later fined five of Evans' campaign workers \$1,000 each for violating election laws.

Two of the five had been fined \$1,000 each in 1999 in a scheme to manipulate absentee ballots in a 1996 Coffee County Commission race. In that case, the election board cited three workers for the winning candidate and two for the loser.

Evidence showed the five workers mishandled 101 ballots. The winning candidate's margin of victory: 44 votes.

Absentee ballots have become more common, officials said, especially since 2001, when Georgia approved voting during the week leading up to an election day.

In the 2004 general election, at least 20 percent of votes in 49 Georgia counties were cast through absentee or early voting, according to an Atlanta Journal-Constitution analysis of a state database. Voters who come to the polls early must show identification, just as they would on election day, but those who mail in absentee ballots need not. The election board has investigated allegations of absentee ballot fraud in 13 of those counties since 1999.

In other counties, spikes in absentee voting have raised concerns about fraud.

Before the July 2004 primary election, twice as many voters in one Atkinson County Commission district applied for absentee ballots as in any other district. Supporters of the losing candidate alleged that the winner, Jerry Metts, registered several illegal

017171

immigrants and collected absentee ballots from seven of them, all in violation of state law. Investigators said one immigrant told them Metts had filled out his ballot.

After an investigation by the Georgia Bureau of Investigation, a grand jury indicted Metts in October 2004. Two months later, however, a judge dismissed the charges.

Metts acknowledges that he collected absentee ballots but he says he didn't know state law prohibited candidates from submitting ballots on voters' behalf, according to his lawyer, Shea Browning. Metts denies registering illegal immigrants.

The election board is awaiting the results of an administrative court hearing before deciding whether to impose civil penalties against Metts.

Critics of the new voter identification law note that it would not have prevented the alleged improprieties in Atkinson County or other cases involving absentee ballots. The only check of an absentee voter's identity is an election officer's effort to determine whether the signature on the ballot matches the signature on the voter's registration record.

Randy Evans, a lawyer for the Georgia Republican Party and its appointee to the election board, said the incidence of absentee ballot fraud shows that "we're not short of people who want to defraud the system."

But he said: "That's actually encouraging. That means we're detecting it."

GEORGIA 2006

Letters on voter ID under fire
200,000 mailed out after law struck down

By ERNIE SUGGS
The Atlanta Journal-Constitution
Published on: 10/13/06

Less than a week after a judge struck down Georgia's photo ID requirement for voters because it violated the state Constitution, nearly 200,000 letters — not the originally reported 20,000 — were sent out to registered voters, notifying them they may not have a valid driver's license or state-issued photo ID.

Photo ID is not required to vote Nov. 7. A state judge ruled Sept. 19 that Georgia's voter ID law violated the state Constitution.

David Worley, a Democratic appointee to the State Election Board, is threatening to file a complaint with the U.S. Justice Department, charging the board with voter suppression for mailing the letters after the law was struck down.

The letter suggests that if a voter does not have a photo ID, they will not be allowed to vote on Election Day.

"Essentially, this is a taxpayer-funded voter suppression effort by the Republicans and a willful violation of the court's order," Worley said. "I think it is a violation of the Voting Rights Act, and I intend to take whatever legal action is available, including filing a complaint with the Justice Department. This shows the lengths to which Republicans are willing to go to stay in power."

The "Dear Georgia Voter" letter was part of a voter education campaign designed to remind voters about the January legislation that required voters to show one of six forms of government-issued photo identification at the polls. **Worley said that in early September the State Election Board voted to send out 300,000 letters to Georgians who were on the voter registration list but who did not have a driver's license.**

Tex McIver, the vice chair of the election board who authorized the \$55,000 mailing of the letters, said the board was only acting on an earlier order by U.S. District Judge Harold L. Murphy to educate the public about changes in Georgia voting law.

But Worley said letters should not have been sent out after the law was struck down in state court.

"I think it was necessary to send out the letter, but once the judge issued his order [voiding the law],

that necessity evaporated," Worley said. "At that point, sending out the letters was intentionally misinforming the voters. "

Worley said that at a Sept. 22 State Election Board meeting, he asked if the letters had been mailed.

"The vice chair said that at the time the order came down on the 19th, all but 20,000 of the letters had gone out," Worley said.

But according to a printing and postal delivery schedule provided on Wednesday by the State Elections Division of the Secretary of State's office, there were 79,496 letters delivered to the post office for mailing on Sept. 20 and another 115,747 sent on Sept. 25.

McIver said that he was told by staffers that only 20,000 letters had not been mailed and authorized that final batch to be sent after the Sept. 19 ruling. He said had he known that nearly 200,000 letters had not been sent, he would have still authorized the shipment.

"It doesn't change my opinion at all. I am under a federal order to educate these voters and that is what we were doing," McIver said of the letters mailed after the ruling.

"[Worley's] complaints were that this was adding to voter confusion, but everything we did was to prevent confusion," McIver said. "The letter should not confuse anybody. In it, we said that if you don't have a driver's license, go get a free one. That letter never said you can't use the 17 forms [of ID to vote]. It did say get a free ID. It also said you can vote absentee. It was not confusing."

But Jennifer Owens, executive director of the League of Women Voters of Georgia, isn't buying it. She said she has fielded several calls from confused voters and her office is in the process of mobilizing grass-roots efforts to meet with potential voters around the state to educate them on the voting process.

"From where we are sitting, this is one of the worst things that could happen as far as voter confusion," Owens said. "It certainly sends quite a clear message to those voters that they might have to show a driver's license. And if they are not paying attention to court rulings, they are not sure what they are gonna do. It raises red flags."

Carolyn Gray said her 90-year-old mother, Corrie Gray, received one of the letters.

Corrie Gray, who is black, has been voting for decades in Temple with a voter registration card and other forms of ID. She has never had a driver's license.

"She gets this letter, that she does not have photo ID. I knew that the photo ID had been blocked, so I was wondering why is this coming to her, when we know, it is not required," said Carolyn Gray. "If I had not been paying attention, I would have been running around trying to get her a photo ID. For her and a lot of elderly black folks, getting a photo idea is hell on wheels."

Worley said that he was going to ask Secretary of State Cathy Cox — who chairs the State Election

Board — to call an emergency meeting next week.

Chris Riggall, Cox's spokesman said it is unprecedented that the elections board would have sent out the letters, since traditionally it was the job of the election division of the Secretary of State's Office. The General Assembly put the elections board — which is majority Republican — in charge of informing voters of the changes in voting law, Riggall said.

"There is a majority on the election board, which [Cox] is not in, that has made sure that Tex [McIver] would be the point person and the board has directed the elections division to stay out of this project," Riggall said. "It has been a situation in which the board, under Mr. McIver's leadership, has undertaken this and they have called the shots."

McIver said sending the letters after the judge's ruling has been helpful.

"By continuing to mail them, it helps me refine that list," said McIver, adding that several people have responded to the letters telling the state that they do have driver's licenses. "This was a way of building a better, cleaner, smarter, more accurate list."

Current law, which will be in effect for the Nov. 7 elections, allows voters to show one of 17 forms of identification, including some non-photo ID such as a utility bill or Social Security card. It also allows voters to sign a statement swearing to their identity if they can't produce identification.

Election board letter

Dear Georgia Voter,

You are receiving this letter from the State Election Board because your name appears on a list of registered voters who may not have a driver's license or photo ID card from the Georgia Department of Driver Services (DDS).

If you DO have a Georgia driver's license or an unexpired photo ID from DDS, we ask that you contact your county Voter Registrar's office and let them know. You do NOT need to do anything else.

If you DO NOT have a Georgia driver's license or an unexpired photo ID from DDS you can receive a FREE Georgia Voter Identification Card at your local Voter Registrar's office in the county where you live.

You do not need a FREE Georgia Voter Identification Card to vote IN PERSON, if you have ANY of the following so long as it is valid and contains your photograph:

- a U.S. military identification card;

- a state or federal employee identification card;
- a U.S. Passport; a tribal identification card; OR,
- a photo identification card issued by any branch, department, agency, or entity of Georgia, any other state, or the United States.

All Georgia voters can vote ABSENTEE BY MAIL. You do NOT have to have any excuse and you do NOT need a photo ID.

For more information or if you have any questions, call your county Voter Registrar's office; or visit www.sos.state.ga.us to get more information on how to get a FREE Voter Identification Card.

Toss fraud charges, party leader asks

Associated Press
February 22, 2006

ANDERSON, Ind. -- The chairman of the Madison County Democratic Party is seeking to have voter fraud charges against him dismissed because the court in which they were filed was not selected at random.

A judge asked prosecutors and attorneys for Tom Ashley on to file briefs on their arguments following a court hearing Tuesday.

Ashley, 71, of Anderson was arrested in December 2004 on voter fraud charges resulting from a state and federal probe of the 2003 municipal election. Ashley is accused of offering to illegally deliver absentee ballots cast by two Anderson residents.

Prosecutors filed all the cases against Ashley and some others in the Judge David Hopper's court. But Ashley's attorney, Jeff Lockwood, argued that the cases involved different voters and prosecutors should have filed the cases in courts picked at random as required by an Indiana Supreme Court ruling.

Deputy Prosecutor Steve Koester said the cases were filed in the same court because all the alleged crimes took place during a specific time in 2003. "That's the local rule we go by," he said.

Lockwood disagreed.

"If that is the case every burglar would be considered a co-defendant," Lockwood said. "This is a manipulation of the system by the prosecutor's office."

Hopper gave Lockwood 10 days to file supporting documents and Koester five days to answer those pleadings.

12 charged in Lake Co. voter fraud

Associated Press

HAMMOND, Ind. -- Twelve more people, including a former East Chicago city councilman and a Lake County sheriff's deputy, have been accused of involvement in voter fraud during the 2003 primary elections in Lake County.

The 56 felony counts issued Wednesday against the 12 mean that 34 people are now face criminal charges related to the 2003 election.

"With the May primary election less than six weeks away, this latest round of charges serves as a reminder that we take our citizens right to a fair and legal election process seriously," Lake County Prosecutor Bernard Carter said.

Indiana Attorney General Steve Carter said the new charges were the latest sign that Lake County residents were tired of public corruption.

"Each time there are more arrests and more charges filed, more pieces to the puzzle come to light," Carter said.

Among those charged was former East Chicago Councilman Randall Artis, 49. He was charged with seven felony counts, including allegations he induced a person to apply and to vote in a precinct where she did not live and induced a person to commit perjury.

Artis, a councilman from 1992 until his resignation last year, pleaded guilty in September to federal conspiracy and fraud charges in a \$20 million sidewalk project that prosecutors say was done to influence voters before the city's 1999 primary election.

A message seeking comment was left for his defense attorney, Thomas Vanes of Merrillville. Artis has not yet been sentenced for the sidewalk project convictions.

Others charged included a sheriff's deputy who also is a precinct committeeman. He faces felony charges of receiving and examining ballots and inducing others to commit perjury.

Voting system change unlikely

*By Joe Wessels
Post contributor*

Voting absentee in Kentucky isn't likely to become as easy as it is in Ohio anytime soon.

Ohioans are enjoying the benefit of their first election cycle where any or no excuse is good enough to qualify for an absentee ballot. Previously, a voter had to be working at the polls, out of the county on Election Day or incapacitated to qualify for an absentee ballot.

Now, just asking earns the privilege and many have. Thus far there have been 28,000 requests turned in to the Hamilton County Board of Elections alone. That's up from 19,000 actual absentee ballots counted in 2002, the last gubernatorial election, said John Williams, executive director of the Hamilton County Board of Elections.

But not in Kentucky. Easing the requirements for absentee voting - which some claim is another form of early voting - has not even been raised in the Kentucky General Assembly during the three years Secretary of State Trey Grayson has been in office, said Les Fugate, communications director for Grayson.

"We are far from that," Fugate said. "Kentucky will probably not be going to no-excuse voting for some while."

The reason: Concern about fraud. While so-called "no excuse" absentee voting makes it easier for voters to vote, it also increases the chance for corruption, a major problem in the commonwealth, Fugate said.

"Absentee votes provide a little easier way to rig the system," Fugate said. "And there's little demand from the citizenry to change (the law)."

Fugate pointed to criminal indictments that grew out of the May 2006 primary in Bath County, Kentucky as a reason to be cautious about

relaxing absentee voting requirements. There a candidate for county attorney was accused of buying votes through absentee voters.

In another case, a high-profile state senator in eastern Kentucky is under investigation for voting improprieties, Fugate said.

In Ohio, however, elections officials are concerned they'll be swamped come Nov. 7. The combination of a state law that prohibits votes from being counted prior to the close of polls on Election Day, new identification requirements and new electronic voting machines could be just too much to handle.

Beyond that just the length of the ballot is daunting. Ballots are printed on 8 ½ X 17 inch paper this year and in some parts of the county the ballot is four pages long, three pages in the rest of the county.

Williams said he is working with new electronic equipment that scans ballots and may utilize a feature that can scan the documents - but not count the votes - to ease the vote-counting chaos Nov. 7. The saved data can then quickly count the scanned ballots on Election Day.

"We are working on procedures to handle things smoothly," Williams said.

Previously, punch card ballots could be piled on top of one another and be run through a machine quickly.

With new scanned ballots, the machines are slower and could dramatically slow the vote-counting process if they are not scanned ahead of time, Williams said.

Williams said the new procedures have created new challenges for his employees, but overall he thinks the new rules are positive.

"I would like to think it's a good thing," he said. "If everybody does their part, it should be a good thing."

Voters can request absentee ballots through noon on Nov. 4, but must have them back to the Board of Elections before 7:30 p.m. Nov. 7 to be counted.

Voters can visit <http://www.hamilton-co.org/BOE/> to download the absentee voter ballot request form.

Vote fraud is suspected in Bath County

CLERK SAYS ATTORNEY GENERAL'S OFFICE IS INVESTIGATING

By Samira Jafari

ASSOCIATED PRESS

PIKEVILLE - A Bath County election official suspects the high number of absentee ballots this year are indicative of vote fraud and says officials from the state attorney general's office are investigating.

"Looks like a lot of vote-buying going on," Bath County Clerk Glen Thomas said yesterday. "We've had the attorney general's office here, yes."

Vicki Glass, spokeswoman for Attorney General Greg Stumbo, wouldn't confirm or deny any investigation into Bath County or other districts. She said state and federal investigators "are looking into voter-related issues out in the field in various counties across the state," but declined to elaborate.

So far, Bath County has reported 586 absentee ballots either mailed out or cast on voting machines -- that's a 64 percent jump from the 239 reported during the primary in 2002, the last major election year.

"A large number of absentee ballots are a concern in any case," said Assistant U.S. Attorney Ken Taylor, though he declined to discuss specific local elections. "Absentee ballots historically have been a way for a person buying votes to ensure he's getting what he's buying."

Thomas said vote-buying in Bath County is no secret, but few will admit that it's going on. He said investigators from Stumbo's office obtained information on every voter who required voting assistance at the ballot machine, but "until they can get somebody to come forward, they can't do anything."

In the past, voter assistance has been a way for some political workers to accompany voters at the booth and influence their vote with cash.

Kentucky election officials anticipate more than 31,000 absentee ballots for the May 16 primary because of the large number of local and judicial races and what is known as a "perfect storm" -- a phenomenon every 24 years when almost every judicial seat is open.

In 2002, some 31,235 absentee ballots were either mailed out or recorded in courthouse machines for the May primary. As of this week, more than 17,000 were mailed out and nearly 10,000 votes were cast on machines.

There's a handful of counties reporting significant increases in absentee ballots that are considered high, sometimes as much as three times the number in 2002.

Christian County reported 163 in 2002 and 471 this week; Kenton County reported 224 in 2002 and 585 this week; and McCracken County reported 89 in 2002 and 320 this week.

State election officials stressed that increases in absentee ballots could also be a result of a hotly contested local race or more people working outside of their home counties who don't want to take time off from their jobs on voting day.

But Clay County Sheriff Edd Jordan said major increases in absentee ballots should always be a big concern.

In 2002, Jordan shuttered voting machines for the primary when some 300 people lined at the courthouse to cast absentee ballots. Jordan said he shut down the machines because the crowd had grown unruly, and even though he couldn't prove it, he suspected vote-buying as well.

017182

The number of absentee ballots mailed out or cast on machines in Clay County has dropped from 884 in May 2002 to 296 this week -- a 66 percent decrease.

Jordan credits his actions in 2002 and keeping a close watch on the machines since then for the decline.

"So far this year, it's been clean as a whistle," Jordan said, "and I hope it stays like that."

Panel acts to restore elections credibility

By William Lamb
ST. LOUIS POST-DISPATCH
Monday, Jan. 30 2006

ST. CLAIR COUNTY

In an effort to restore credibility to the electoral process in East St. Louis, the St. Clair County Board agreed Monday night to promote more cooperation among county election officials and the East St. Louis Board of Election Commissioners.

The 21-6 vote to accept recommendations of an ad-hoc vote-fraud review committee came hours after two East St. Louis women were sentenced in federal court for their roles in exchanging cash for Democratic votes in the November 2004 election.

County Board Chairman Mark A. Kern appointed the committee in August, two months after five East St. Louis Democrats, including party Chairman Charles R. Powell Jr., were convicted of conspiracy to commit vote fraud. The bipartisan committee, which met a dozen times over five months, recommended continued funding of the East St. Louis Election Board at its current level of \$97,143 annually, backing away from a proposal to cut the annual appropriation to the state-mandated minimum of \$21,200.

In addition, the St. Clair County clerk's office will be encouraged to work more closely with the Election Board in training poll workers, educating voters and upgrading antiquated voting equipment.

The six County Board members who objected - all Republicans - said the document would do little to bring accountability to the process.

"It's a step in the right direction," said Steve Reeb, a Republican. "We just didn't go far enough."

Earlier Monday in U.S. District Court in East St. Louis, Sheila Thomas, a former Democratic precinct committeewoman, was sentenced to 18 months in prison and two years of supervised release for her role in the vote-buying scheme. Yvette Johnson, a former volunteer in the city's code-enforcement department, was sentenced to two years' probation, including five months of home confinement.

Thomas and Johnson, who were convicted in June, were the first suspects to be sentenced for their role in the scheme, which prosecutors said involved the transfer of \$79,000 from the St. Clair County Democratic Party to precinct committeemen in East St. Louis.

Prosecutors alleged that Democratic Party officials in East St. Louis distributed the money among city residents in increments of \$5 and \$10 to buy votes for prominent Democrats, including Kern, who was mayor of Belleville at the time. He defeated Reeb in the race for County Board chairman, in part because of a strong showing in East St. Louis.

Three others who were also convicted in June for their role in the vote fraud

017184

scheme are still awaiting sentencing. Kelvin L. Ellis, 55, the former director of regulatory affairs for East St. Louis, and Jesse Lewis, 56, a precinct committeeman, are scheduled to be sentenced on Feb. 6. Powell, 61, the chairman of the East St. Louis Central Committee, is due to be sentenced on Feb. 13. Three other committeemen and an election worker pleaded guilty in March.

Workers are sentenced in vote fraud case

By JIM SUHR
ASSOCIATED PRESS WRITER

EAST ST. LOUIS, Ill. -- A former Democratic election worker in this impoverished city was sentenced Monday to a year and a half in federal prison for scheming to buy votes in the November 2004 election. A City Hall volunteer also accused in the scheme was given probation.

U.S. District Judge G. Patrick Murphy said the case reflected an American election process "under attack" by fraud.

Former precinct committee member Sheila Thomas and her attorney, Paul Sims, declined to comment after the sentencing. Yvette Johnson told reporters: "I'm just glad that it's over."

The two were convicted last year of felony conspiracy to commit vote fraud, along with a local Democratic Party chairman, a former city official and another precinct worker who are expected to be sentenced in February.

Prosecutors said the defendants schemed to buy votes with cash, cigarettes and liquor. Their case rested largely on secretly recorded audiotapes in which the defendants could be heard talking about paying \$2, \$5 or more per vote to get key Democrats elected in East St. Louis.

The city of 31,500 people, across the Mississippi River from St. Louis, became one of the nation's poorest cities with the decline of its smokestack factories and the exodus of whites in the 1960s. Its schools were broke for years and the deed to City Hall once went to a man to cover a multimillion-dollar judgment over a jail beating.

Vote fraud panel attracts little interest

BY ALIANA RAMOS
News-Democrat

Since its appointment, the Vote Fraud Review Committee has struggled to get public input about ways to address vote fraud in St. Clair County.

In June, five Democratic party members were convicted of vote buying by a federal jury.

"After the trial, this (vote fraud) became a big deal," said Robert Hillebrand, the spokesman for the committee, and former St. Clair County judge. "Both (political) parties saw that some action should be taken."

The Vote Fraud Committee has met about seven times since September and has had little or no participation from residents, said Hillebrand. About 20 people attended the last meeting in East St. Louis in December.

Hillebrand credits poor attendance because the meetings have not received enough publicity. "Also, a lot of people got real incensed about this after the trial, but now interest has tapered off," he said.

Hillebrand said the committee's mission is to put together recommendations for the St. Clair County Board. The committee hopes to submit its report by the end of the month, he said.

"We want to get input and hear what people have to say and what suggestions they may have," Hillebrand said.

So far, recommendations the committee has received included providing more training and better compensation for election workers, and educating the public about what is vote fraud. At the East St. Louis meeting, county clerk candidate Matt Hawkins suggested creating photo voter identification cards.

A spokesman for the American Civil Liberties Union in Illinois disagreed with the idea of creating a photo identification card in order to vote.

"It creates essentially, a poll tax," said Ed Yohnka, director of communications for the ACLU in Illinois. "Now, voter registration cards are sent in the mail. It (a photo) would create real impediments for seniors, and for those who do not have transportation to get to a site."

Yohnka also was concerned about the price it would cost to get the photo ID and said it would not guarantee that vote fraud would stop.

"This would compel them to pay to vote, for something that is a constitutional right," he said. "There could still be fraud with a voter ID card. We see that all the time with driver's licenses."

Illinois State Election Board General Counsel Steve Sandvoss said a county clerk could not legally impose a photo ID because there is no provision for such a measure in the Illinois code of statutes. "It's up to election judges to enforce the laws."

St. Clair County residents will have one last chance to meet with members of the Vote Fraud Committee, before the group turns its recommendations in to the County Board. The last planned public meeting is at 7 p.m. Tuesday at the O'Fallon Log Cabin, in O'Fallon Community Park.

Secretary of State to investigate fraud allegations in Clay County

By Art Jester, Jennifer Hewlett And Jim Warren
HERALD-LEADER STAFF WRITERS

State and federal officials will investigate an alleged vote-fraud scheme yesterday in six of Clay County's 20 precincts, Secretary of State Trey Grayson said last night.

"This will be high priority for the (state) attorney general's office and the U.S. attorney to pursue," Grayson said. "That one sounds like something happened."

Grayson said his office received about 15 phone calls regarding possible fraud in Clay County. The alleged fraud involved deliberate misinformation about the voting process, he said.

Poll workers allegedly told voters that they had already cast their vote, even though voters were still looking at a screen that only summarized their selections.

The "voter would leave without the ballot being cast," he said.

Someone would then delete or alter what a voter had put on the ballot, he said.

Clay County has been plagued for decades by allegations of election fraud and vote-buying, but some county leaders had thought a recent federal drug-and-corruption case might make this year different.

"We've got some hope for a clean election," the Rev. Doug Abner, pastor of the Manchester Community Church, said last month. "We ain't had one in 150 years -- probably ain't never had one."

Vicki Glass, spokeswoman for state Attorney General Greg Stumbo, declined to comment on the allegations other than to say that agents were sent to counties where there were allegations of vote fraud or other violations.

After all polls closed, Glass said the attorney general's office had received 184 complaints statewide.

Most machines work well

Meanwhile, voters in Fayette County and elsewhere generally adjusted quickly and smoothly to new electronic voting machines.

"Everything went better than normal," said County Clerk Don Blevins.

Grayson said he was "pleasantly surprised by the voter's reaction, especially in Fayette County, which was the largest jurisdiction with all new equipment."

Deanna Smith, 41, a school counselor, seemed to speak for most voters regarding the new machines.

"I was concerned that maybe they would be too high-tech for some older people who weren't too used to computers, but they were quite simple," she said after voting at Bluegrass Community & Technical College on Leestown Road.

Rose Gavenois, a Harrods Hill precinct voter, saw a generational advantage to the new equipment.

017188

"I think the younger people will like them because they're like a video game," she said.

Although there were some voting machine problems in Fayette County early in the day, most were minor and were corrected promptly.

Kitty Ware, election coordinator for the Fayette County Clerk's office, said technicians were called to six or seven precincts to correct problems. The county usually has four to six such calls.

Meanwhile, statewide voter turnout seemed below the 35 percent predicted by the Secretary of State's office.

"It was poor, but not surprising," said Ferrell Wellman, an Eastern Kentucky University journalism professor and election night analyst for WLEX-TV.

In Lexington, the turnout was about 25 to 26 percent, and statewide turnout was about 18 to 19 percent, Wellman said.

Voter fraud proceedings under way

*By David Phelps
The Natchez Democrat*

VIDALIA — Jury selection in the trial of Henrietta Williams concluded late Wednesday, setting the scene for the first of Ferriday's five voter fraud defendants to have her day in court.

Williams will face a sole charge of filing or maintaining false public records. The charge stems from a complaint about the absentee ballot of Maude Williams from the 2004 Ferriday mayoral election.

Williams is also facing 21 other counts of the same nature associated with the ballots of Estella, Lillie and Frederick White from the same election.

Four others, Justin Conner, Willie Robinson, Emerson Slain and James Skipper, are co-defendants in that matter.

After Monday's continuance, attorneys for the Louisiana Attorney General's office said they had planned to try Williams on all of her charges separately.

But Wednesday, the state's lead attorney on the case, Butch Wilson, said a late disclosure of additional discovery materials relating to the Whites' case led them to pare down her trial to the one charge, which carries a maximum penalty of five years in prison and/or a \$5,000 fine.

It took all day for Wilson, David Caldwell, his assistant, and defense counsel William Yarbrough to interview and argue about who would sit in judgment over Williams.

Just more than half of the 200 subpoenaed potential jurors reported for duty.

Many had either received excused absences, had moved away, or had not been able to be found by Concordia Parish Sheriff's deputies charged with hand-delivering the subpoenas.

It took only two panels — of 14 people each — of prospective jurors to find the six members and one alternate who will hear the case.

Each panel was questioned at length by both sides and then the lawyers retired to chambers for the selection process.

During this process, each side was granted six peremptory strikes. Ad hoc Judge Sharon Marchman also considered requests from both sides for causal strikes of potential jurors whose answers to questions drew suspicion as to their impartiality. One prospective juror

017190

said — “I know the defendant and would tend to believe her over someone I’ve never met.”

After the causal strikes, each side made their peremptory strikes. While any potential juror could be singled out to be excused, the side making the request had to give a race-neutral reason for doing so.

The first panel yielded four jurors, the rest came from the second group.

Four of the six jurors are female. All are white. The alternate is a black male.

The defendant is black.

All six jurors must vote unanimously to convict.

The trial begins at 9 a.m. today. Marchman said a decision on whether to try to wrap it up in one day would be made in the afternoon.

Under Louisiana law, when a crime is not necessarily punishable by hard labor, a six-person, one-alternate jury is used.

When hard labor is necessarily the punishment — as in cases involving violent crimes — a 12-person, two-alternate jury is used.

Federal Officials to Oversee St. Landry Parish Election

The federal Department of Justice announced Thursday they will be stepping in to oversee Saturday's elections in St. Landry Parish.

This will be the first time that federal officials will observe a St. Landry Parish election.

According to the St. Landry Parish commissioner of courts, they'll be in place to make sure that all procedures are followed correctly.

Clerk of Court Charles Jagneaux says officials are looking for election fraud, vote buying, and any irregularities in the election system.

According to local voting authorities, the announcement came as a surprise.

Federal authorities will arrive in Opelousas on Friday to discuss their role in the voting process.

Possible fraud cases highlight need for election reform

By DAVID ABRAMS, Staff Writer

The Anne Arundel County Board of Elections has reported seven cases of possible "double voting" from the last presidential election, and one criminal case is pending in state court.

While elections officials stress that fraud isn't rampant in the state, the issue is taking on new urgency as the 2006 contests approach.

The General Assembly last week overrode the governor's vetoes of bills that will allow people to vote up to a week before an election and cast provisional ballots anywhere in Maryland.

"The word 'fraud' is coming about more and more," said Barbara Fisher, the county's elections chief. "I think people are thinking there's a lot more of it than there really is. But I'm not trying to downplay it."

State Prosecutor Robert A. Rohrbaugh said he has received 17 complaints of double voting statewide.

"We investigate all the allegations the various state boards of elections forward to us," he said. "We just don't ignore them."

Next month, Christopher E. Gummer of Parkville will face charges in District Court in Annapolis of voting twice, according to court documents. The charge, which carries a \$2,500 fine and up to five years in prison, is being prosecuted in Annapolis because the state elections board is located here.

Mr. Gummer and his attorney, Paul Feeley, could not be reached for comment.

Mr. Rohrbaugh said he could not comment on the pending cases being handled by his office, which is empowered to investigate election violations statewide.

But with statewide elections coming this November, where voters will pick a governor, congressmen, county executives and County Council members, Republicans are warning that changes to the law this late in the game could lead to fraud. Democrats, meanwhile, say

they want to make sure there are as few roadblocks to people voting as possible.

"Vote early, vote often, vote everywhere, and no ID required," said Del. Don Dwyer Jr., R-Glen Burnie. "That causes me great concern. It was the Democratic majority in this state that made that decision."

There are more than 3 million voters in the state, according to the state Board of Elections. That includes about 1.7 million Democrats and more than 900,000 Republicans.

In Anne Arundel County, there are about 300,000 registered voters, including 135,000 Democrats and nearly 120,000 Republicans.

State Elections Administrator Linda Lamone said that with only one criminal case pending after an election where 2.4 million people cast ballots in 2004, "The numbers speak for themselves."

But Mr. Dwyer said he believes there is more voter fraud in Maryland than the numbers show.

"If those numbers are factual, I'd have to say that's a pretty good batting average," Mr. Dwyer said. "But I would also say that based on the interviews with all of the elections officials, the concern of fraud is high on the radar screen."

Mr. Dwyer said he saw a young couple and an elderly woman at three different polling sites on Election Day in 2004, and saw at least one of them vote at two. But he lost a piece of paper where he wrote down the names.

"I witnessed it with my own eyes," Mr. Dwyer said.

He decided to conduct a survey, and mailed out a questionnaire to all 24 election boards in the state. Eleven responded, and six said they had "reported incidents of vote fraud," or "double voting," to the State Board of Elections Administrator that have "not been addressed, charged or prosecuted."

Mrs. Fisher also said she supports requiring voters to present identification at the polls, and her board supports requiring potential voters to present proof of citizenship when registering. Both proposals have failed in the legislature.

Mrs. Fisher said the state board doesn't have to report back to a county board to confirm whether any action was taken.

"The reason I said 'Yes'(to the fraud questionnaire) is we send information to them for informational purposes only," Mrs. Fisher said.

Nine of the boards reported that they support requiring identification at the polls and proof of citizenship on registration forms.

Ms. Lamone said local board members are entitled to their opinions, and she doesn't take a position on legislation, but "We have a history of trusting the voters in Maryland."

House Speaker Michael E. Busch, D-Annapolis, said lawmakers will do everything they can to ensure a secure system.

"No one condones any fraud in any type of election," he said. "Any election board that thinks they are going to face that should come to Annapolis or to the local governments and make sure they have the resources that fraud or any other contempt of the election could be stopped or stymied."

The state is completing a new database that will help make the system more reliable, where poll workers will be able to look up voter information in real time.

Jim Praley, an attorney for the county elections board, said there is a delicate balance when changing election rules.

"I dare say no system is perfect," he said. "Part of the tension is on the one hand you want to remove as many barriers as possible and allow as many people to vote as possible. On the other hand, you want to have strict controls."

Mr. Praley said double voting is a loaded term, because any provisional ballots are checked before the vote is counted.

As an attorney with the county board for 20 years, Mr. Praley said he could remember only two cases of voter fraud. In one case, a man voted under multiple different names.

"He had registered his cat to vote, I believe," Mr. Praley said.

- No Jumps-

Election brings few surprises; allegations of vote buying surface

ROGER ALFORD
Associated Press

FRANKFORT, Ky. - Voters ousted two Democratic legislators in Tuesday's primary election, one of them a veteran House leader, while the only two Republicans with opposition won handily.

The Democratic casualties included state Rep. Gross Lindsay of Henderson, chairman of the House Judiciary Committee who has served in the legislature for 23 years, and Chuck Meade, a first-term Democrat from Floyd County in eastern Kentucky. Eleven other Democratic incumbents survived the primary, which was marred by allegations of voter fraud.

"It looks like we might have some fraud issues to deal with," said Les Fugate, spokesman for Secretary of State Trey Grayson. "We've got allegations of vote buying."

Senate President David Williams, R-Burkesville, easily defeated two challengers to win the Republican nomination for his seat, and one of his Senate Republican allies, Julie Denton, R-Louisville, also won her party's nomination.

Williams had stirred controversy earlier this year by engineering a deal to give the University of the Cumberlands, a private Baptist college, \$11 million in state funding for a pharmacy school.

In a primary election fraught with allegations of improprieties at the polls, especially in the mountain counties, Kentucky voters also chose four Democratic challengers to face the state's Republican delegation in Congress.

John Yarmuth, founder of an alternative weekly newspaper in Louisville, will challenge five-term Republican U.S. Rep. Anne Northup in November for the 3rd District seat.

In the 2nd District, state Rep. Mike Weaver of Radcliff defeated James Rice of Campbellsville and takes on Republican U.S. Rep. Ron Lewis, who is in his sixth full term in the fall.

In the 1st District, former one-term U.S. Rep. Tom Barlow defeated Eric Streit of Paducah and Jim Blook of Scottsville. Barlow will challenge six-term U.S. Rep. Ed Whitfield in November.

And in the 5th District, Kenneth Stepp of Barbourville won the nomination over James Tapley and will face 13-term Republican U.S. Rep. Harold "Hal" Rogers in the 5th District.

In Louisville, voters chose a Supreme Court nominee who could become the first black to serve on the state's highest court if he wins in the general election. That nominee, Court of Appeals Judge William E. McNulty, will face Jefferson County Circuit Judge Ann O'Malley Shake in November. If Shake wins, she would be only the third woman to serve on the Supreme Court.

Despite relatively low voter turnout across Kentucky, election officials received numerous allegations of improprieties at the polls on Tuesday. Some voters voiced suspicions that their votes may have been changed on new electronic voting machines after they left the booth.

Fugate said turnout was on track to add up to about 35 percent of the state's registered voters, who will choose their parties' nominees for the largest general election in state history, involving more than 4,000 races.

Problems reported across the state ranged from hiccups with new electronic voting machines to

017196

allegations of vote fraud to people being wrongly purged from voter rolls, Fugate said.

Fugate said his office fielded allegations of vote tampering mainly from Clay County voters, who suspected that their votes were changed on new electronic voting machines after they left the booth.

"We've told various authorities to look into this," Fugate said.

By early afternoon, at least eight voters - including an elected official - reported being improperly removed from voter rolls. Warren County Commonwealth's Attorney Chris Cohron reported that his name was among more than 8,000 names purged last month by the state, but he was ultimately allowed to vote.

The secretary of state's office last month purged the names because they were also registered in either Tennessee or South Carolina. However, a judge ruled on Monday that those purged could vote as long as they could prove they were Kentucky residents.

After discovering he had been dropped from the voter rolls, Cohron was lucky that the clerk of court was at his polling place and able to help speed his return to active voter status.

"You got me on that one," Cohron said of his being dropped from the rolls. "I assume it was some sort of clerical error."

Turnout varied from county to county, Fugate said. In Jefferson County, voting was light, but places such as Scott County saw heavier turnout, he said.

"It really depends upon what's on the ballot locally and how important those races are to people," Fugate said.

Officials received more than 100 calls to an election hot line telephone number where people could report voting problems, said Vicki Glass, spokeswoman for the attorney general's office.

Bath County candidate indicted in alleged vote-buying scheme

SAMIRA JAFARI
Associated Press

PIKEVILLE, Ky. - A Bath County candidate for judge-executive and seven others have been charged in vote-buying schemes, in which they allegedly helped voters cast absentee ballots under false pretenses, according to two federal indictments unsealed Thursday.

Danny Michael Swartz, who ran against Judge-Executive Walter ShROUT and Harold Hunt in the May 16 primary, was charged with conspiracy and buying votes in the indictment handed down by a federal grand jury July 7. ShROUT won the primary.

Tammy Brown Manly and David Allen Hunt, two ShROUT supporters in Bath County, about 110 miles northwest of Pikeville, were also charged in the same scheme.

The indictment was unsealed after the three were arrested Thursday. They were released the same day.

Five others were charged with conspiracy and buying votes in the primaries for judge-executive and county attorney, though the second indictment from July 7 does not identify the candidates that would have benefited from the scheme. William Mike Butcher, Anthony "Buck" White, Norman Lewis Crouch and Steven and Belinda Jean Crouch, who are married, were also arrested and released Thursday.

A total of 525 voters cast absentee ballots in the Bath County Courthouse within the two weeks before the primary. State law allows voters who need assistance using voting machines to be assisted by another person.

The defendants allegedly directed voters to tell voting officials that they were blind, disabled or illiterate in English, or that they would be absent on election day. According to the indictment, 254 voters claimed they needed assistance casting absentee ballots.

017193

Butcher accompanied 75 voters to the booth. Manly accompanied 44.

The defendants also allegedly paid some voters between \$30 to \$60 to sway their vote.

Bath County Clerk Glen Thomas told the Associated Press in a May 11 interview that he alerted federal and state investigators to his district after watching hundreds of absentee ballots roll in that week.

"Looks like a lot of vote-buying going on," Thomas said at the time.

The number of absentee ballots cast this year in Bath County was nearly double the 239 reported during the primary in 2002, the last major election year.

Swartz and Hunt did not return messages from the Associated Press Thursday. Manly's number was unlisted, and she could not be reached for comment.

Secretary of State to investigate fraud allegations in Clay County

By Art Jester, Jennifer Hewlett And Jim Warren
HERALD-LEADER STAFF WRITERS

State and federal officials will investigate an alleged vote-fraud scheme yesterday in six of Clay County's 20 precincts, Secretary of State Trey Grayson said last night.

"This will be high priority for the (state) attorney general's office and the U.S. attorney to pursue," Grayson said. "That one sounds like something happened."

Grayson said his office received about 15 phone calls regarding possible fraud in Clay County. The alleged fraud involved deliberate misinformation about the voting process, he said.

Poll workers allegedly told voters that they had already cast their vote, even though voters were still looking at a screen that only summarized their selections.

The "voter would leave without the ballot being cast," he said.

Someone would then delete or alter what a voter had put on the ballot, he said.

Clay County has been plagued for decades by allegations of election fraud and vote-buying, but some county leaders had thought a recent federal drug-and-corruption case might make this year different.

"We've got some hope for a clean election," the Rev. Doug Abner, pastor of the Manchester Community Church, said last month. "We ain't had one in 150 years -- probably ain't never had one."

Vicki Glass, spokeswoman for state Attorney General Greg Stumbo, declined to comment on the allegations other than to say that agents were sent to counties where there were allegations of vote fraud or other violations.

After all polls closed, Glass said the attorney general's office had received 184 complaints statewide.

Most machines work well

Meanwhile, voters in Fayette County and elsewhere generally adjusted quickly and smoothly to new electronic voting machines.

"Everything went better than normal," said County Clerk Don Blevins.

Grayson said he was "pleasantly surprised by the voter's reaction, especially in Fayette County, which was the largest jurisdiction with all new equipment."

Deanna Smith, 41, a school counselor, seemed to speak for most voters regarding the new machines.

"I was concerned that maybe they would be too high-tech for some older people who weren't too used to computers, but they were quite simple," she said after voting at Bluegrass Community & Technical College on Leestown Road.

Rose Gavenois, a Harrods Hill precinct voter, saw a generational advantage to the new equipment.

017200

"I think the younger people will like them because they're like a video game," she said.

Although there were some voting machine problems in Fayette County early in the day, most were minor and were corrected promptly.

Kitty Ware, election coordinator for the Fayette County Clerk's office, said technicians were called to six or seven precincts to correct problems. The county usually has four to six such calls.

Meanwhile, statewide voter turnout seemed below the 35 percent predicted by the Secretary of State's office.

"It was poor, but not surprising," said Ferrell Wellman, an Eastern Kentucky University journalism professor and election night analyst for WLEX-TV.

In Lexington, the turnout was about 25 to 26 percent, and statewide turnout was about 18 to 19 percent, Wellman said.

Voter fraud charges still tripping up voting rights group

ANDREW WELSH-HUGGINS
Associated Press

COLUMBUS, Ohio - An advocacy group that registered about a million voters two years ago is wrestling with new charges of voter fraud and sloppy work weeks before crucial midterm elections.

In Philadelphia, the city's voter registration office has rejected about 3,000 cards submitted by the Association of Community Organizations for Reform Now since April because of missing information or invalid addresses.

Election officials in three of Ohio's largest counties have cited problems with hundreds of voter registration cards. ACORN is accused of submitting cards with nonexistent addresses, forged signatures and, in one case for someone who died seven years ago.

"In my opinion there's a lot of words but little action in terms of fixing the problem," said Matt Damschroder, the elections board director in Franklin County in Ohio.

County election officials in Denver forwarded about 200 cards to the secretary of state's office after discovering identical handwriting on signatures. Colorado officials investigated similar problems two years ago.

ACORN, which has about 220,000 members nationally, registered 1.2 million people to vote in 2004 and is running voter registration drives in 17 states this year.

The nonprofit dispatches workers and volunteers to poor neighborhoods, gas stations, courthouses and other places to sign up new voters such as April Harris, 40, a car wash manager in Jacksonville, Fla., who said the group's pitch "made me feel I can try to change things."

Voter registration has become a battle cry for parties and advocacy groups in recent years. In the Nov. 7 election, Democrats hope to regain control of the U.S. House and narrow or erase the GOP majority in the Senate. Ohio, which gave President Bush the White House in 2004, has tight campaigns for governor and U.S. Senate this fall in two of the most closely watched races in the country.

ACORN also was accused of fraud in 2004 in Ohio, Florida, Minnesota, North Carolina and Virginia and in 2003 in Missouri.

Prosecution is rare, and federal lawsuits against the group were dismissed in Florida. More often, the allegations have led to changes in state law.

ACORN says it's working to reduce problems, and officials with the Ohio group promise to fire any workers found committing fraud.

"We'll continue to personally encourage people to register to vote and exercise their franchise, and we're going to continue to stand up for people's voter rights," said Kevin Whelan, a spokesman for the New Orleans-based group.

Such statements do little to appease critics. Even groups supporting the organization's efforts question why fraud allegations keep cropping up.

017202

"They're sort of their own worst enemy," said Bill Faith, who directs Ohio's largest homeless advocacy group and shares many of ACORN's goals.

"They want low-income people to register to vote but because of the kind of problems that come from their program, it provokes a reaction from the Legislature that actually makes it harder to run such programs," Faith said.

The Denver Election Commission says it's been unsuccessful in working with ACORN to reduce problems with voter registration cards.

ACORN says it meets regularly with election officials to address concerns. The Colorado chapter has registered about 42,000 voters since 2004.

"We hold our workers to a very high standard, we ensure they make every vote count and we're going to continue to do that work," said Ben Hanna, head ACORN organizer in Colorado.

In Franklin County, prosecutors are looking at almost 400 cards the county elections board said included already registered voters or people with the wrong address.

The elections board is also looking at hundreds of other ACORN cards with alleged irregularities. The Hamilton County board is concerned about errors and missing information on hundreds of ACORN cards, while problems with about a dozen cards were reported in Summit county.

Meanwhile, ACORN continues a largely successful legal campaign to reduce voting obstacles for the poor. In September a federal judge in Ohio threw out a requirement that individuals who register voters - instead of groups - must turn in the completed forms, in a lawsuit brought by ACORN and other voting rights groups.

ACORN has filed a similar suit against Georgia's voter registration laws. It won a similar case in Washington state this year and in Maryland last year.

In a steady rain outside the Franklin County Courthouse, ACORN employee Carlos McCoy - wearing sunglasses and juggling a black umbrella and clipboard - politely but assertively approaches person after person, asking if they're registered to vote.

Only 17, McCoy is already a veteran ACORN canvasser, having worked at similar jobs since 2004. A high school senior, he spent a few days registering voters for \$9 an hour before school started.

He attributes problems with other ACORN workers to inexperience and asking the wrong questions. He says he took the job for the money but also because he likes being involved in politics and community organizing. A resident of the city's poor south side, he says the work affects his life.

"You want where you live to be taken care of," McCoy said.

Report: Voter fraud may be overstated

By WILL LESTER
Associated Press Writer

WASHINGTON (AP) -- The most common form of voter fraud involves absentee ballots, including forgery and coercion in getting older or ailing voters to fill them out, according to a preliminary report to the U.S. Election Assistance Commission.

But the report, delivered in May, suggested that reports of polling place fraud involving "dead" voters and voting by felons and non-citizens might be overstated. The researchers said there is far more anecdotal evidence about voter fraud than specific verifiable claims.

"On balance, more researchers find it to be less of a problem than is commonly described in political debate," the report said.

"Many times people put their own partisan spin on voter fraud and voter intimidation," EAC Chairman Paul DeGregorio said Wednesday.

DeGregorio said the report was only preliminary and cautioned that more investigation is needed to understand the amount of voter fraud in this country.

"Many times you see people attempting to commit fraud, but it never gets to the level of being reported," said DeGregorio, a former elections official in St. Louis. He noted a case of more than 1,400 suspect voter registration cards being investigated in St. Louis.

The preliminary report was prepared by Tova Wang, an elections expert at the Century Foundation think tank and Job Serebrov, an Arkansas attorney.

Conservatives have argued the problem of voter fraud is severe in some states, while liberals generally argue that voters face too many restrictions.

New state laws requiring voters to present identification at polling places have faced legal challenges in states such as Arizona and Georgia.

"It's absolutely a serious problem," said Thor Hearne, counsel to the American Center for Voting Rights. "It's an unfortunate reality, particularly in battleground states."

Those problems include voter fraud and voter intimidation, he said.

The final voter fraud report is expected after the Nov. 7 midterm elections, DeGregorio said.

Election leaders to battle vote fraud

Local county clerks and election board chiefs from both sides of the river have formed a task force in an effort to battle vote fraud.

They met Monday in St. Louis to discuss common problems.

The group decided to form the task force and meet quarterly. According to metro-east county clerks, the first thing on the agenda is to share vital records and registered voter information. Sharing the information will enable the election authorities to cross-check voter information and help eliminate duplicate voter registrations and the registrations of deceased voters.

For more about the task force, see the Friday edition of the News-Democrat.

Woman is sentenced to service, meditation in vote fraud case

By Robert Patrick
ST. LOUIS POST-DISPATCH
Saturday, Apr. 01 2006

A woman who filled out St. Louis voter registration cards for well-known, dead local politicians in 2001 was sentenced Friday to probation, community service and transcendental meditation training for election fraud and drug violations.

Michelle Robinson, 36, pleaded guilty of 13 election law violations as well as possession of crack cocaine and a crack pipe.

Robinson was part of Operation Big Vote, a bid to boost the participation of black voters in the 2001 mayoral election.

Big Vote turned in thousands of cards on Feb. 7, 2001. Election workers noticed the names of several dead former aldermen, triggering state and federal criminal investigations.

Robinson admitted in court Friday that she had filled out 13 fake cards, including ones for now-deceased Aldermen Albert "Red" Villa and Nellene Joyce, whose daughter is St. Louis Circuit Attorney Jennifer Joyce.

Other cards turned in by Big Vote workers had made-up names and nonexistent or vacant addresses. Some cards were filled out multiple times for the same person.

Robinson got four years of probation on both the drug and election charges but could face three years in jail if she violates her probation.

She also must complete 180 hours of community service and get training in transcendental meditation. Circuit Judge David Mason has advocated the relaxation and stress-management program for years.

Six other Big Vote workers pleaded guilty in December of 2004. Five were sentenced to probation and 100 hours of community service. One, who had a prior drug conviction, got the nine months that he had already spent in jail. One is still being sought.

A St. Louis jury found Nonaresa Montgomery, head of Big Vote, guilty in February 2005 of lying to a grand jury during the investigation. Montgomery lied when she told grand jurors that she had no way of tracking the cards that Big Vote turned in.

As part of a deal with prosecutors, Mason banned her from organized political activity, sentenced her to two years' probation and 80 hours of community service teaching young people about the importance of complying with voter registration laws.

From Holland to Detroit, votes were cast by 132 dead people; Detroit's voting records are riddled with inaccuracies, casting doubt on elections' integrity

In Mich., even dead vote

From Holland to Detroit, votes were cast by 132 dead people; Detroit's voting records are riddled with inaccuracies, casting doubt on elections' integrity

Lisa M. Collins / The Detroit News
February 28, 2006

DETROIT -- Fred Douglas Henley would have been 75 years old when the city of Detroit says he walked into a polling precinct and voted on Nov. 8. Henley, however, died the day before the election, and his voting address long has been vacant and boarded up. Blanche Credit died in 2003. But she's recorded as voting in November, too.

Then there's Michael Hollingsworth, whom the Detroit Department of Elections says voted at his precinct despite serving a life sentence for first-degree murder. And Jennifer Pinkerton is recorded as voting, but she lives in Westland.

It's impossible to say whether Henley, Credit, Hollingsworth and Pinkerton are names used by someone to cast fraudulent votes or whether they simply represent clerical errors. But a Detroit News review of voter and registration files, criminal and death records shows that Detroit's election records are so plagued with mistakes and inconsistencies -- including voter registry rolls packed with as many as 20,000 dead people and roughly 100,000 wrong addresses -- that the overall integrity of Detroit elections is in question.

Detroit, experts say, may be a worst-case example of tainted election records. But the city isn't alone. Across Michigan, 132 people were listed as having voted in November's local elections although they had recently died, says Mark Grebner, whose company, Practical Political Consulting in East Lansing, analyzes voter rolls. About 26 of those were in Detroit, which held by far the largest election, Grebner said.

Problems such as these have prompted Secretary of State Terri Lynn Land to call for major statewide election reform in Michigan, including purging faulty voter rolls in virtually every jurisdiction.

The News' analysis of the city's Nov. 8 election found:

- Ballots recorded as being cast by voters who could not have voted legally because they had died, were serving a criminal sentence or did not live in the city. Felons can vote in Michigan, but not while serving a sentence.
- Nearly 500 names of individuals older than 95 were recorded as having voted on Nov. 8, including nearly 200 over the age of 100 born as early as 1858. While some of the records are correct, the birthdays in most cases were recorded in error.
- Clerical errors so pervasive that it is difficult to determine in many instances who actually voted. Incorrect addresses, wrong birthdates and expired residencies; typographical errors in names and addresses; and garbled spellings are regularly recorded and kept on the city's active voter list. Thousands of properties that are abandoned or vacant remain on the voter rolls.

Among the most common mistakes occur when election workers record a vote under a similar name, or confuse voters with their parents or other relatives.

The News did not review every vote cast, but instead targeted voter records based on several factors, such as the voter's birth year or voting history. Though limited and somewhat random searches were done, each search found voting records in error or highlighted names of voters who in fact could not have voted.

Difficulties in city record-keeping are compounded by the fact that many Detroiters are transient, and many do not have driver's licenses, making data hard to verify. For instance, the city recorded Lawanda Danette Williams as having voted Nov. 8 from her address at 19936 Ilene St. Williams has moved several times since living there.

"I couldn't have voted in Detroit. I was living in Southfield," Williams said. "That house has been vacant since 2002."

Detroit's newly elected clerk, Janice Winfrey, says she's ordered her staff to purge at least 50,000 names from the voter rolls by March; she's targeting bogus addresses as well.

"We've got a lot of cleaning up to do," Winfrey said.

Organized fraud isn't found

After years of research, Grebner and his partner, Alan Fox, have found roughly 350,000 outdated records in Detroit's voter rolls, including 20,000 names of deceased individuals and 50,000 names of people who have left Detroit. Grebner says another 30,000 entries in the system are duplicates: mainly, two spellings of the same name.

"That's worse than the average in the state by a considerable margin," he said. "And it allows for mismanaged elections and for the possibility of vote fraud because the records cannot be depended on. There are registrations for people that have died, for people that are living elsewhere, and that allows for situations where other people could vote with their names."

But Grebner says he's never found evidence of organized fraud in Detroit.

Winfrey says she's going to address the issue with aggressive training and recruitment of poll workers.

"Those in need financially may not be the best poll worker," Winfrey said. "We hope to find quality workers who want to be involved because of an intrinsic value, and not what they can get out of it."

Winfrey's new director of elections, Daniel Baxter, says cleaning the voter rolls is his first priority.

"We think if we can resolve the low-hanging-fruit issues, then one step at a time we can bring back the integrity of the process," Baxter said.

Although there's no proof of fraud, there have been numerous allegations of fraud and documented instances of violations of election law -- particularly relating to absentee ballots.

In October, The Detroit News reported how former Detroit City Clerk Jackie Currie hired election assistants to help people in hospitals, group homes and the elderly and infirm vote by absentee ballot -- sometimes in ways that appeared to violate restrictions on election workers helping disabled people mark ballots.

017207

Subsequently, state election officials said they also observed similar apparent violations of state law.

Prompted by the stories, the Federal Bureau of Investigation launched a probe into the city's absentee ballot program, and Wayne County Chief Judge Mary Beth Kelly ordered the state of Michigan and two consultants to oversee the counting of absentee ballots for the November election.

The federal investigation continues, and the FBI retains possession of the city's absentee ballots and other documents, Winfrey said.

In addition to cleansing voter rolls statewide, Land's reforms also would clarify rules for the handling of absentee ballots by local election officials -- a direct result of irregularities uncovered in Detroit.

Winfrey's efforts are already taking effect. Grebner says he was "shocked" when reviewing the city's election data this month.

"I was startled at how much improvement I see," Grebner said. "There was so little obvious error in the file, it didn't look like Detroit."

Issue isn't Detroit's alone

Problems with voter rolls do not stop at Eight Mile. The city of Holland, population 30,000, recorded 11 deceased people as having voted in November's local election, Grebner says.

"That a city 1 percent the size of Detroit would actually have a bigger problem with dead people voting than Detroit did, that says something," Grebner said.

Holland City Clerk Jennifer French says she had no idea there was such a problem.

"I'm not aware of any of those issues," French said. "That would surprise me a lot."

Keeping names of the deceased and nonresidents on the rolls is the problem, for it allows votes to accidentally be marked in those names, Grebner says. But Land's spokeswoman, Kelly Chesney, says purging voter rolls is complicated by restrictive federal rules governing the removal of names from voter lists. Substantial mailings and notifications are required.

"It was set up to protect voters from disenfranchisement," Chesney said.

It's also costly, which is why the state last year began to reimburse local governments for the initial costs of mailing the federally required notices when names are deleted.

Absentee vote teams abound

Although there's no evidence of widespread ballot fraud, numerous prominent Detroiters who have run for office have reported being contacted by people who offered to deliver votes and other considerations for a price.

Former Mayor Dennis Archer and mayoral candidate Freman Hendrix, among others, have told The News that it is common practice in Detroit for political operatives to approach candidates and request money and postage stamps in exchange for delivering absentee ballots.

The Rev. Horace Sheffield, a Detroit political insider who has run for office, says that all Detroit candidates have "their cadre of troops who get absentee votes."

"I've run for public office, and I've had these people approach me," Sheffield said. "Politicians do whatever they can do to secure votes and that includes paying people who are known throughout our history to obtain votes."

While such activity in the past could have impacted several thousand absentee ballots, enough to influence a City Council race, the numbers are not great enough to affect a mayoral race; Kilpatrick won by some 14,000 votes.

"If (fraud) is happening, it's minuscule," said State Rep. Lamar Lemmons III, D-Detroit. Some credit Lemmons with winning the election for Kilpatrick with his team of neighborhood activists who targeted unlikely voters.

"There's no organized, orchestrated mass voter fraud going on in the city, as people would like to believe."

Jury deadlocked in activist's fraud trial

ST. JOSEPH (AP) -

March 26, 2006 - 9:19AM

The jury in the election fraud trial of a Benton Harbor community activist is deadlocked on all five charges.

But yesterday, Berrien County Judge Al Butzbaugh denied a request by the Reverend Edward Pinkney's attorney to declare a mistrial.

The judge instead ordered jurors to resume deliberations Monday.

The charges stem from Pinkney's role in last year's recall election of City Commissioner Glenn Yarbrough. Pinkney is accused of offering cash payments to sway voters, trying to influence absent voters and improperly possessing absentee ballots.

The election results were later thrown out, and Yarbrough was re-elected to his seat.

Dems try to stop voter ID measure

Aimed at poll fraud, it invites bias, they argue

BY KATHY BARKS HOFFMAN
ASSOCIATED PRESS

July 19, 2006

LANSING -- The Michigan Democratic Party, the Michigan Legislative Black Caucus and the Democratic caucuses in the state House and Senate filed a friend-of-the-court brief Tuesday in a case that could decide whether Michigan can require voters to show photo identification at the polls.

The Michigan Supreme Court voted 5-2 in April to issue an advisory opinion on the constitutionality of a 1997 state law requiring voters to show photo identification to get a ballot. A court spokeswoman said the ruling would be binding, although it could be appealed to the U.S. Supreme Court.

Former Attorney General Frank Kelley, a Democrat, issued an opinion nine years ago that the law violated the equal protection clause of the 14th Amendment of the U.S. Constitution, which guarantees U.S. citizens the right to vote.

Opponents of the law say the requirement would keep poor people, nondrivers and others away from the polls. They cite figures showing that about 370,000 of the state's registered voters do not have driver's licenses or state ID cards.

But supporters say the law is needed to prevent election fraud. The U.S. Justice Department, for example, has been investigating allegations that Detroit votes were cast last year in the names of dead people.

Michigan Republican Party Chairman Saul Anuzis supports the requirement, noting that Indiana recently began requiring photo IDs. Although Democrats in that state are challenging the law and saying they received hundreds of complaints about the requirement, Anuzis said that's largely a result of people who are still learning about the law.

"From the things that I read, apparently things went very well. There weren't any hitches," he said.

Democratic Gov. Jennifer Granholm, the Detroit chapter of the National Association for the Advancement of Colored People, the Michigan Civil Rights Commission, Kelley and

017210

several county clerks also are filing briefs with the court opposing the photo ID requirement.

They say the move to require photo IDs is aimed at keeping low-income and minority voters, who tend to support Democratic candidates, from voting, and they say worries about fraud are overblown.

"Voter impersonation at the polls -- which is the only form of electoral fraud addressed by the photo identification requirement -- is a nonexistent problem," the Michigan Democratic Party wrote in its brief.

Party Chairman Mark Brewer said in a news release that "this Republican law will have the same practical result as a poll tax; it will lead to the suppression of the vote of the poor, racial and ethnic minorities, and elderly and disabled voters."

"In an election year, the people of Michigan need to be especially vigilant in ensuring all election-oriented efforts are not a partisan power grab," he added.

But Anuzis rejected those arguments, noting that the House already has passed a bill offering anyone who couldn't afford to pay the \$10 fee to obtain a state ID card the chance to get one for free. The bill now is before the Senate Committee on Government Operations.

"If you want to vote, you can get an ID card. It doesn't keep anyone away from the polls," he said.

The high court has asked Republican Attorney General Mike Cox to submit separate briefs, one arguing that the law is constitutional and the other arguing it is unconstitutional.

The court also invited the state Bureau of Elections, Michigan Democratic Party and Michigan Republican Party to file arguments. It has yet to hear oral arguments in the case.

Supreme Court spokeswoman Marcia McBrien has said the court would decide whether the state law was constitutional on its face. She added that parties could challenge the state law in federal court.

Small's absentee case will go to trial

By DEREK HARPER Staff Writer, (609) 272-7203
(Published: May 31, 2006)

MAYS LANDING — Atlantic City Councilman Marty Small will head to trial this summer over alleged absentee ballot crimes after he rejected two separate plea offers Tuesday.

After he confirmed Small was turning down both offers, Atlantic County Superior Court Judge Michael A. Donio tentatively scheduled the start of what likely will be a multi-week trial for Aug. 7.

The first rejected offer would have attempted to place Small in the pre-trial intervention program.

While the state was opposed to that, state Deputy Attorney General Ronald Epstein said if the court allowed Small to enter the PTI program, then the state would ask Small to give up both his school job and City Council seat. For three years Small also would not be allowed to vote or handle absentee ballots.

With the second rejected offer, Small would have pleaded guilty to the lesser charge of keeping a voter from voting.

In exchange, he would have been removed from City Council, paid a \$5,000 fine and served three years' probation. During that time, he would not be allowed either to run for election or handle absentee ballots.

The sticking points with both deals apparently were Small having to give up his 2nd Ward City Council seat or his job coordinating Atlantic City elementary school children's after-school activities, or both, attorney Stephen Funk said. He said the rejected deals "would prevent him (Small) from continuing to serve the people of Atlantic City."

A state grand jury indicted Small in November on 10 third-degree charges that alleged he was not the proper person to handle 10 separate Atlantic City residents' messenger absentee ballots.

The 11th fourth-degree charge alleged Small kept a person from voting by discarding otherwise valid absentee ballots.

All charges stemmed from last June's Atlantic City primary, in which now-Mayor Bob Levy triumphed over then-Mayor Lorenzo Langford in a race for the Democratic nomination. Levy, who won at the polls, then handily carried the November election, and ultimately did not need any of the votes Small is alleged to have handled.

If he is found guilty of just one of the 10 third-degree charges, Small, who has professed dreams of being a school athletic-program supervisor, could be stripped of his council seat and barred from future public employment.

017212

Epstein said the statutes list up to 51 years of imprisonment if Small is found guilty on all counts. Judge Donio said that estimate is far-fetched, a more likely term could be three to five years in prison.

If probation is involved, Donio said it could also mean up to 364 days in the Atlantic County jail. A day-reporting option also might not be available, Donio said, especially if Small were stripped of employment.

Further, if Small decides to plead guilty now, the penalty will be more severe and up to the discretion of the court.

Discussions between Small, Funk and state officials apparently continued up to the last minute. At about 10 a.m., state investigator Kim Husband and Epstein left Donio's courtroom to meet in an adjacent courtroom anteroom. About 15 minutes later, Epstein and Funk huddled in the hallway outside Donio's courtroom.

After Funk left to talk with Small, he returned with paperwork signifying his client would not take either plea.

Afterward, Small declined comment on Funk's advice, but Funk said while there was a risk going to trial, he said he was confident he and his client would prevail.

It is unclear what Small sought in exchange for his plea.

Many political observers, including City Council President Craig Callaway, said they believed Small was indicted because the state wanted someone to provide evidence against the absentee-ballot strategies used by Callaway and his friends and family.

Neither Epstein nor Husband would comment, and when asked what Small sought, Funk said "that's none of your business."

Voters testify in absentee-ballot trial involving A.C. councilman

By DEREK HARPER Staff Writer, (609) 272-7203

Published: Wednesday, August 16, 2006

MAYS LANDING — The so-called voters included new citizens who worked in Atlantic City's hospitality industry, noncitizens who knew they couldn't vote and a sickly widow and former election poll worker who thought she was signing a petition to get a good Democrat on the ballot.

And even though Atlantic City Councilman Marty Small was sitting just a couple of dozen feet away, no one recognized the popular City councilman who purportedly handled their ballot.

The second day of Small's absentee-ballot trial included hours of testimony from the nine people for whom records said Small delivered absentee ballot applications in the June 2005 primary.

During cross-examination, defense attorney Ed Jacobs tried to undercut the testimony while emphasizing that more people than Small worked the election.

Small faces eight third-degree charges of illegally taking an absentee ballot application to the Atlantic County Clerk's Office when he was not the authorized bearer. The ninth charge, a fourth-degree count, alleges that because Small discarded some ballots, he illegally kept a person from voting.

The ballots were ultimately not needed because Mayor Bob Levy, whom Small supported, won at the polls.

If convicted of any third-degree charges, Small faces removal from City Council, the loss of his Atlantic City School District activities coordinator job and being barred from any future public employment.

The first voter to testify, Amanda Medina, is a Trump Taj Mahal Casino Resort card dealer who now lives in Ventnor. She said she has never been a registered voter.

017214

At some point before the June 2005 primary, two Hispanic women came to her house and tried to get her to sign some school board election documents. In a hurry, Medina said she signed the unspecified papers to get them away.

"They told me they would take care of it all," Medina said.

But those were not her signatures on the civilian absentee ballot form, she testified, and she said no one ever gave her a ballot, even though one was cast.

Another person, Norma Cruz, testified through a Spanish interpreter that two black men visited her before the primary but left because of the language barrier. Another person brought a petition that she signed.

A Hispanic woman later visited her. "She told me someone had signed my signature using my name," she said. "And they came to see if I was an invalid" as the application said.

The last of nine voters to testify, Lillian Sfrizi, is an 84-year-old widow from Philadelphia who left the resort May 23, 2005.

She moved with difficulty in the courtroom, walking with a cane.

The former Democratic poll worker said people came to her North Bellevue Avenue home telling her they wanted her to sign a petition to put a person on the ballot. Then ill, she said she signed something on a clipboard. With a magnifying glass she identified her signature on an absentee ballot application Tuesday.

On cross-examination, she said she would never have signed the application because she knew the process and signed up to vote absentee after her husband died.

In other testimony, Jacobs attacked the state's case in a withering 50-minute cross-examination of Kim Husband, the state Office of Government Integrity's lead investigator.

Husband testified that the ballot bearer should know the voter, but when Jacobs asked him where that rule was written in the law, Husband couldn't answer. Jacobs then pointed out that the law said an Atlantic County voter or any relative could handle the ballot applications.

Jacobs prodded Husband until Deputy Attorney General Ron Epstein, who is handling the prosecution, could stand it no more.

"I object!" Epstein said. "There is no foundation that (Husband) knows the law."

017215

"I agree," Jacobs said with a slight smile. "There is no foundation."

Husband testified that he singled out Small because only 16 or 17 of the 75 absentee ballots applications that Small returned were actually used to vote. Jacobs asked Husband if he knew the average return rate on absentee ballots and other comparable figures, but Husband said he did not know.

Former Atlantic County Board of Elections Chairman Mark Stein's testimony also undercut the state's fourth-degree charge of hindering a voter.

Stein said the state attorney general's office had ordered the board to tell poll workers at noon on the primary Election Day not to accept provisional ballots without a court order. That decision changed earlier policy accepting provisional ballots from any problem voters, which is the current policy.

It helped Small, because it put some of the responsibility for the voter's inability to vote on the state.

Several city residents joined Small's half-dozen friends and family who sat behind the councilman. It included City Hall employee Floyd Tally, who entered the courtroom around 4:20 p.m. and later left to join City Council President Craig Callaway, Public Works Director David Callaway and others in the hallway outside.

The courtroom group included City Councilman Gene Robinson, who arrived at about 1:15 p.m., following the lunch break, and stayed until the 5 p.m. end.

Robinson is one of the more than 180 people Small's defense said they plan to call. On Monday, Jacobs successfully moved to have the prosecution's witnesses ordered to leave the courtroom. It is unclear if Robinson's appearance will keep him from testifying for Small.

Everything Jersey

The Star-Ledger

Absentee ballot reforms could increase fraud

Monday, October 23, 2006

BY CARLY ROTHMAN

Star-Ledger Staff

Danes Exantus was shocked last June when he went to vote in a Roselle primary race for borough council and was turned away.

Poll workers said he had already cast an absentee vote, but Exantus, a 44-year-old Haitian immigrant, didn't remember filling out a ballot.

All he remembered was signing a bunch of papers a strange man had brought to his home one morning as he unloaded groceries from his car, and then giving the same man another bunch of signed papers from a package mailed to him by the Union County clerk.

Exantus thought the man was helping him register to vote.

"He stole my ballot," Exantus said. "Nobody can vote for me. This is not fair."

Exantus, who testified in a local election challenge last month, is one of a growing number of voters and critics who have raised questions about the state's new "no-excuse" absentee ballot law, passed in June 2005, which expanded the right to vote by absentee ballot from sick or out-of-town voters to any voter at all.

The law was supposed to boost participation by making voting more convenient. But critics say it may also put voters and candidates at increased risk of fraud in next month's election.

"Absentee balloting is the most common target of fraud. It's the most vulnerable link in our election system," said Toby Moore, a project manager for the Commission on Federal Election Reform at American University's Center for Democracy and Election Management.

Twenty-nine states currently offer no-excuse absentee voting, said Sean Greene, research director at electionline.org, a nonprofit, nonpartisan group tracking

017217

election issues with funding from the Pew Charitable Trusts.

Proponents of no-excuse absentee voting say it gives people more time to vote and cuts down long lines on Election Day.

"We were looking at the national trends, and looking to make voting in New Jersey more convenient," said Assemblyman David Mayer (D-Camden), one of the law's primary sponsors.

"Anything that makes access to the ballot easier for voters is a plus," said Sandra Matsen, advocacy coordinator and past president of the League of Women Voters of New Jersey, which supported the bill.

But some observers say there is conflicting data on whether absentee ballots actually increase voter turnout -- "It sort of depends who you talk to," Greene said -- and skeptics say absentee voting is a confusing process that removes traditional means of oversight, such as poll workers and challengers.

These were the concerns at the heart of the Roselle election challenge in which Exantus testified. It involved a local candidate for borough council who accused her opponent's campaign of encouraging inexperienced voters to cast absentee ballots, and then illegally helping voters to complete and deliver their ballots.

The case is now in its third appeal after a Superior Court judge threw out 31 suspect absentee ballots last month and overturned the election result.

The Roselle challenge could offer a glimpse of the future, as political campaigns statewide embrace absentee ballots as a way to reach out to new or infrequent voters.

"There's now a part of the get-out-the-vote effort targeted to people who don't vote very often," said Sen. Raymond Lesniak (D-Union). "It's very important for us as elected officials to ensure that the maximum number of people have the opportunity to vote."

Mayor Michael A. Pacio of Roseland is one such elected official. Currently running for re-election as a write-in candidate, Pacio said his campaign recently mailed absentee ballot applications to all registered voters in Roseland.

Absentee ballots are "good things for what I'm trying to do here," Pacio said. "Especially on write-ins, for some reason the machine scares (voters). This way ... they're not pressured, and they don't need to go to the polls that day."

But while Renee Steinhagen, executive director of the NJ Appleseed Public Interest Law Center, said there is nothing wrong with encouraging voters to cast

absentee ballots, she cautioned that a fine line exists between help and fraud.

"There's a difference between getting out the vote ... and then, in effect, voting for them," she said, noting the absentee ballot has no safeguards to ensure a voter is "not having an outsider standing over their shoulder."

Steinhagen, who helped represent the Roselle challengers independently of her job at the law center, said voters need to read the instructions and be savvy about the rules and process – which can be confusing.

Voting by absentee requires two steps. Voters must first apply to their county clerk for an absentee ballot. When they get the ballot in the mail, voters must fill out the ballot and other enclosed forms completely, and send the ballot to the election board in specially marked envelopes. Anyone assisting a voter in filling out any of these documents must sign them in front of the voter.

"If those rules aren't followed, the opportunity for fraud is enhanced," Steinhagen said.

Steinhagen supported New Jersey's expanded absentee ballot law when it first passed, but said she is now encouraging the New Jersey Public Advocate to examine the law to improve it.

Lesniak, the most powerful Democrat in Union County, agreed the process should be streamlined.

"It's not a simple ballot to figure out," he said. "I think election officials need to look at making it more understandable."

Although Danes Exantus is now a registered voter and understands the voting process, he said is angry and discouraged by what happened last spring. The June primary was the first time he tried to vote in a U.S. election -- and he said it will be his last absentee vote.

"I don't want to do that no more," he said.

The Press of Atlantic City

Little proof, much distrust at Atlantic County meeting on ballot fraud

By THOMAS BARLAS Staff Writer, (609) 272-7201

Published: Wednesday, May 31, 2006

Updated: Thursday, June 1, 2006

PLEASANTVILLE — A town meeting called by Atlantic County officials to find evidence of messenger ballot fraud turned up more citizen frustration Tuesday night than hoped-for facts.

Residents complained of inaction by law enforcement, lax ballot-handling procedures and what they contended was malaise on behalf of election officials in investigating possible messenger ballot fraud.

While some residents promised to eventually provide proof of voter fraud, or direct investigators to people who could, a few were plainly distrustful of anyone involved in the election process.

Atlantic City resident Steve Young said he's already provided law enforcement with what he said was documented proof of messenger ballot-abuse, but no action was taken. He was reluctant to turn over more information to members of the Atlantic County Board of Chosen Freeholders, who called the meeting Tuesday.

"Whom would you trust?" he demanded, saying no one is guaranteeing protection for people who have been intimidated into signing for messenger ballots they never received.

Young eventually turned over copies of his alleged proof, with county officials saying they would forward them to the proper authorities.

Former Atlantic City Mayor Lorenzo Langford said Superior Court judges have already thrown out elections after ruling hundreds of votes were cast fraudulently.

"Anytime you have a judge say he has evidence in his hands of voter fraud, that's all the evidence you need," Langford said. "What was done (by law enforcement)? Absolutely nothing. It was three years ago. It doesn't take three years to find the guilty parties."

Tuesday's meeting at the city's municipal complex was called because of what the freeholders said has been years of voter fraud involving messenger ballot use primarily here and in Atlantic City. They claim an inordinate number of messenger ballots — totalling in the hundreds — helped swing election victories to candidates who initially lost based on voting machine tallies.

Atlantic County Prosecutor Jeffrey S. Blitz said after the last Atlantic City Board of Education election, in which messenger ballots played a large role in the outcome, that he is investigating voter-fraud claims. Blitz would only say that the investigation began before recent complaints about messenger ballot use in the Board of Education election.

Messenger ballots are part of the absentee ballot system. They are supposed to be used in the last seven days before an election by a person who is sick or confined and therefore can't get to the polls.

Republican Frank Blee and Democrat James Whelan, assemblymen who represent the 2nd Legislative District, which includes Pleasantville and Atlantic City, are both planning to introduce legislation that would change the way messenger ballots are used.

During Tuesday's meeting, local resident Gus Harmon told the freeholders he knows of at least one incident when a person who went to the polls to vote was told he had already voted via absentee ballot. That person had no knowledge of applying for an absentee ballot, he said.

An Atlantic City resident said she also knows of several elderly people who were intimidated into applying for absentee ballots, which they also never got. She alleged she saw people taking those ballots out of mailboxes.

Local resident Joseph Yeoman said he turned over 140 fraudulent absentee ballots to the Atlantic County Prosecutor's Office during the 2004 general election.

"They were all checked by handwriting experts who certified that the same person filled out the ballots," he said.

But the biggest call on Tuesday was to somehow unify to fight the alleged abuse of messenger ballots.

"This is not a white issue or a black issue or a Republican issue or a Democratic issue," he said. This is a people problem."

TODAY'S SUNBEAM

Possible P.G. voting problems probed

Thursday, June 08, 2006

By CHRISTOPHER WEIR

Staff Writer

PENNS GROVE -- The Salem County Prosecutor's Office announced Wednesday it is conducting an investigation into possible voting improprieties in Tuesday's Democratic Primary Election in the Borough of Penns Grove.

Salem County Prosecutor John T. Lenahan said his office was contacted Wednesday by the Salem County Board of Elections and informed of several possible problems with the Penns Grove Democrat primary.

"The Board of Elections brought to our attention several possible improprieties which we will be investigating vigorously in the next several days," Lenahan said.

"Unusual" has been the word that several county officials have used to describe Tuesday's Democrat primary in Penns Grove in which the outcome was determined by a large amount of absentee ballots that were cast.

Democrats John Scarpaci and Sonya Worley, who received 398 votes and 405 votes respectively, defeated candidates Richard A. Rowe and Robert T. Walters, who received 269 votes and 261 votes respectively.

It was the absentee ballots cast in the Democrat Party election in the borough that made the difference. In all, 330 absentee ballots were turned in from Penns Grove Democrats.

Countywide, in the Democrat and Republican primary election together, a total of 435 absentee ballots were cast -- 330 of them from Penns Grove.

On the absentee ballots turned in from Penns Grove, 308 votes were cast for Scarpaci, 307 for Worley, 20 for Walters and 16 for Rowe.

The election was clouded in controversy prior to Tuesday with allegations of voter fraud levied by one Penns Grove Democrat organization against another.

Members of the Stevenson Club recently filed a complaint with the Prosecutor's Office against the Penns Grove Democrat Municipal Committee alleging voter fraud by the origination.

The complaint cited, among other things, a high number of absentee ballots that were filed in the community and the fact that many of the residents applying for the ballots selected only two messengers -- Irene Scarpaci, Chairperson of the Municipal Democrat Committee, and Jose Mercado.

Irene Scarpaci, the wife of candidate John Scarpaci, said she knows Mercado but that he's not a member of her organization.

John Scarpaci and Worley were backed by the Penns Grove Democrat Municipal Committee while Rowe and

017222

Walters were backed by rival Democrat organization, The Stevenson Club.

Irene Scarpaci said the high number of newly registered voters this year was due to an extensive get-out-the-vote campaign conducted by the Democrat Municipal Committee.

She also said that the large number of votes for her organization's candidates by people who cast absentee ballots were due to her organization promoting their candidates to the people when they conducted their voter drive.

"All of the absentee ballots that our organization turned in were within the restraints of the law," Irene Scarpaci said Wednesday. "If any of the members of the Stevenson Club have any problem with the law, I suggest they get in contact with their legislators."

Stevenson Club member and borough Councilman A.J. Crescenzi said his organization will be investigating the ballots of those who voted to make sure that they are all legal residents of Penns Grove.

Crescenzi said that if it turns out that some of the ballots were not legitimate, the Stevenson Club will be pursuing a legal course of action.

Chairperson of the Board of Elections Carol Waddington Wednesday described the Penns Grove election as "different and unusual."

Waddington said that she doesn't remember an election where that many absentee ballots were cast in a town the size of Penns Grove. She also said it was odd that only a few messengers were selected to deliver a large number of the absentee ballots.

"It's not unusual for messengers to carry five to 10 ballots, but this was just more than the ordinary amount," Waddington said. "At the same time, it's not illegal, and there is no limit to the amount of ballots a messenger can handle."

Waddington said she couldn't recall an election whose outcome was determined by such a large number of absentee ballots.

Waddington also said it was also unusual that the majority of people casting absentee ballots chose Scarpaci and Worley, and that those people didn't choose candidates in other races such as sheriff, freeholder, or senator.

In the Democrat sheriff's race, for instance, only 79 of the 330 absentee voters cast a ballot for candidate William Higgins. Likewise for county freeholder. Out of the 330 ballots, Beth E. Timberman received only 53 votes and Jeff Hogan received only 47 votes. There had been a potential from those absentee ballots for Higgins, Timberman and Hogan to each to receive up to 330 votes.

The same was reflected in the U.S. Senate and U.S. House of Representatives races. Only 206 of the 330 voters picked a Democrat Senate candidate and only 57 voters chose a Democrat House candidate.

County Clerk Gilda Gill on Wednesday echoed Waddington's opinion that the election was different than usual.

"Penns Grove always has a good amount of absentee ballots, but this year's number was unusually high," Gill said.

Suspect voter cards found

By *Jo Mannies*

© 2006 ST. LOUIS POST-DISPATCH

Tuesday, Oct. 10 2006

St. Louis Election Board officials say they've discovered at least 1,492 "potentially fraudulent" voter registration cards - including three from dead people and one from a 16-year-old - among the thousands pouring in before today's voter registration deadline for the Nov. 7 election.

City Republican elections director Scott Leiendecker said the board's staff expects to find even more bogus voter-registration applications among the thousands remaining to be processed. The board plans to turn all the questionable cards over to city Circuit Attorney Jennifer Joyce for investigation and possible prosecution, said board chairman Kimberley Mathis.

The board says all the questionable cards were turned in by one group - the Association of Community Organizations for Reform Now, commonly known as ACORN.

Brian Mellor, the group's election counsel, said that it welcomed any prosecutions of workers who turn in fraudulent cards. "We try very hard to monitor the employees, but there are chances of things slipping through," he said.

Mellor said his group pays the workers \$8 an hour to register voters and not by the number of registrations they collect.

But Mellor added that he was angry that Leiendecker had said nothing about the questionable cards during a meeting Tuesday afternoon. Leiendecker replied the cards weren't the purpose of the meeting, which he said focused on missing information on some of the voter registrations.

Statewide, ACORN has turned about 40,000 new voter registrations in recent weeks, Mellor said. About 15,000 were collected in the city of St. Louis and 5,000 in St. Louis County. The rest were primarily in the Kansas City area.

ACORN's voter-registration collections have come under fire in recent weeks in several states, including Ohio and Pennsylvania. Mellor and national ACORN communications director Kevin Whelan said that most of the allegations have turned out to be unfounded. Mellor detailed the findings of various investigations into ACORN's 2004 voter-registration activities that he said also turned up no wrongdoing.

In St. Louis three years ago, the city Election Board reported finding more than 1,000 suspicious voter registration cards turned in by ACORN. No one appears to have been prosecuted in that case, although Joyce's office has obtained convictions regarding fraudulent voter-registration cards turned in by people working for other, now-defunct groups.

The latest batch of questionable cards tied to ACORN included one that attempted to register Miya Hinton, who is listed as a 20-year-old residing at an address in the 4800 block of Sacramento Avenue. It turns out that Hinton is 16 and lives at a different address in that block.

Her mother, Monique Hinton, alerted the Election Board after the family received the board's standard letter confirming the new registration. Hinton

says she became concerned about how someone had obtained some of her daughter's personal information, such as the correct month and day she was born.

"Her rights are being violated," Hinton said.

Miya Hinton's signature appears to have been forged on the voter registration card, Leiendecker said.

Hundreds of the questionable voter-registration cards have suspicious signatures, with some showing similar handwriting, said Bettie Williams, board voter registration supervisor.

The circuit attorney's office said it couldn't comment until it received the cards.

Whelan and Mellor also disputed a separate controversy, ignited by a local political blog, pubdef.net, where a former ACORN employee alleged that she and other voter-registration workers had been told to promote the candidacy of state Auditor Claire McCaskill, a Democrat running for the U.S. Senate.

Both ACORN officials said that's not true and that ACORN workers are only promoting Proposition B, the Nov. 7 ballot proposal to increase Missouri's minimum wage to \$6.50 an hour, from the \$5.15 an hour it is now. That ballot proposal is the chief reason why ACORN has been so active in registering Missouri voters, they said.

McCaskill said she knew nothing about ACORN's activities; a state Republican Party spokesman said it was concerned about the blog's account.

Election Board questions about voter roll names 'shows system is working'

By **Jo Mannies**

POST-DISPATCH POLITICAL CORRESPONDENT

Wednesday, Oct. 11 2006

Missouri Secretary of State Robin Carnahan on Wednesday praised the St. Louis Election Board's staff for raising questions about the validity of at least 1,492 new voter registrations, including three from dead people and one from a 16-year-old.

"It shows the system is working," Carnahan said. She added that the discovery of the questionable registrations should not be interpreted as "voter fraud," since no votes have been cast.

Wednesday was Missouri's deadline for voters seeking to register in the Nov. 7 election.

However, Missouri Republican Party executive director Jared Craighead contended Wednesday that the questionable registrations "underscores the need" for stricter voter identification requirements in Missouri.

The state GOP party supports the new state law that would require voters on Nov. 7 to show government-issued photo identification - such as drivers license or passport - before they can vote. The Missouri Supreme Court is considering the fate of that law, which was blocked by a lower-court judge. Among other things, the judge cited the costs of the birth certificates or other documents needed to get the IDs.

Carnahan, a Democrat, said that the voter identification law would have done nothing to curb those who seek to register bogus voters. "History has shown that most of the voter fraud in this state has involved absentee ballots, where people don't show up at the polls," she said. Carnahan noted that the voter ID law did not mandate such IDs for absentee voters.

Missouri Democratic Party spokesman Jack Cardetti said, "Any registration that turns out to be fraudulent should be prosecuted."

Meanwhile, the Missouri Republican Party announced that it was filing a complaint with the Federal Election Commission against the group accused of collecting the questionable registrations - the Association of Community Organizations for Reform Now.

City Republican Elections Director Scott Leiendecker said that no other group was being accused of submitting questionable voter registrations.

The Democrat

Jury convicts Williams

By David Phelps
The Natchez Democrat
March 10, 2006

VIDALIA — It took the Attorney General's office all day to make its case against Henrietta Williams.

It took the jury just 16 minutes to find her guilty of tampering with the absentee ballot of Maude Lee Williams.

"We feel like justice was done," Assistant Attorney General David Caldwell said. "This kind of thing needs to stop, and I think the jury sent a clear message."

The state sent the jury a pretty clear message itself, putting eight people on the stand who gave testimony that the women who signed as witnesses on Maude Williams' ballot affidavit had not been present at her house when she signed — or didn't sign, a matter of debate — her ballot April 1, 2004.

The ballot affidavit in question — the ballot itself is not a matter of public record — contained Maude Williams' personal information in a hand everyone, from the defendant to the state's handwriting expert, agreed was that of Henrietta Williams.

Filling out information on an absentee ballot for an infirm person, as the 80-year-old Maude Williams certainly appeared in court to be, is not a crime, if that person is registered as handicapped with the registrar of voter office, which she was not.

The state wasn't worried about that, however. It was the signatures of the two witnesses on the affidavit that were the basis of the filing or maintaining false public records charge.

Caldwell and Butch Wilson, who led the prosecution, put five witnesses on the stand, who all said Shirley Mason and Eloise Polk were not present at the time of the ballot's signing.

"What is a witness?" Wilson asked in his closing argument. "It's a person who's there and sees something happen. If you're not there, you can't be a witness."

This made the witness signatures false information, the filing of which is a crime.

Defense counsel William Yarbrough argued that two of the state's witnesses, Polk and Mason, had lied during their initial interview with authorities — in which they said they had watched Maude Williams sign — and were lying this time as well.

As for two other of the state's witnesses — Maude Williams' granddaughters Renacia Reed and Felicia Williams, the later who filed the complaint — Yarbrough said in his closing statement they were upset because they had wanted to take their grandmother's ballot to vote for the losing candidate in the election.

And, finally, Yarbrough argued for a close reading of the ballot affidavit.

“Even if Mason and Polk signed it elsewhere, there is no false information on the document,” he said.

Time and again, Yarbrough tried to make Maude Williams' signature an issue, but the state countered that Henrietta Williams was not accused of forgery. Ad hoc Judge Sharon Marchman, working through laryngitis, agreed with the state.

The jury did, too, to Wilson's satisfaction.

“With the clear and incontrovertible evidence the state put before the jury, there wasn't much else they could have done,” Wilson said.

The speed of the verdict didn't surprise him either.

“I'm not surprised by anything a jury does.”

Henrietta Williams will be sentenced April 4. She could receive up to five years and or a \$5,000 fine. A pre-sentencing investigation will take place before the hearing.

She was remanded and Marchman set her bond at \$25,000. Friends of hers said they expected her to post the bond.

Yarbrough said his client plans to appeal the verdict.

The trial was just the opening salvo in the Ferriday voter fraud saga.

Williams is one of five Ferriday residents accused of 21 counts of forging, filing false ballots and conspiracy relating to the absentee ballots of Estella, Lillie and Frederick White.

The Attorney General's office decided to try Williams first on the sole unrelated count after a late disclosure of discovery material prompted the continuance of the other matters.

The two sides will hold a status conference after the April 4 sentencing hearing.

U.S. Says Blacks in Mississippi Suppress White Vote

By ADAM NOSSITER

MACON, Miss., Oct. 5 — The Justice Department has chosen this no-stoplight, courthouse town buried in the eastern Mississippi prairie for an unusual civil rights test: the first federal lawsuit under the Voting Rights Act accusing blacks of suppressing the rights of whites.

The action represents a sharp shift, and it has raised eyebrows outside the state. The government is charging blacks with voting fraud in a state whose violent rejection of blacks' right to vote, over generations, helped give birth to the Voting Rights Act of 1965. Yet within Mississippi the case has provoked knowing nods rather than cries of outrage, even among liberal Democrats.

The Justice Department's main focus is Ike Brown, a local power broker whose imaginative electoral tactics have for 20 years caused whisperings from here to the state capital in Jackson, 100 miles to the southwest. Mr. Brown, tall, thin, a twice-convicted felon, the chairman of the Noxubee County Democratic Executive Committee and its undisputed political boss, is accused by the federal government of orchestrating — with the help of others — “relentless voting-related racial discrimination” against whites, whom blacks outnumber by more than 3 to 1 in the county.

His goal, according to the government: keeping black politicians — ones supported by Mr. Brown, that is — in office.

To do that, the department says, he and his allies devised a watertight system for controlling the all-determining Democratic primary, much as segregationists did decades ago.

Mr. Brown is accused in the lawsuit and in supporting documents of paying and organizing notaries, some of whom illegally marked absentee ballots or influenced how the ballots were voted; of publishing a list of voters, all white, accompanied by a warning that they would be challenged at the polls; of importing black voters into the county; and of altering racial percentages in districts by manipulating the registration rolls.

To run against the county prosecutor — one of two white officeholders in Noxubee — Mr. Brown brought in a black lawyer from outside the county, according to the supporting documents, who never even bothered to turn on the gas or electricity at his rented apartment. That candidate was disqualified. Whites, who make up just under 30 percent of the population here, are circumspect when discussing Mr. Brown, though he remains a hero to many blacks. When he drove off to federal prison to serve a sentence for tax fraud in 1995, he received a grand farewell from his political supporters and friends, including local elected officials; whites, on the other hand, for years have seen him as a kind of occult force in determining the affairs of the county.

Still, many whites said privately they welcomed the Justice Department's lawsuit, which is scheduled for trial early next year.

"In my opinion, it puts the focus on fair play," said Roderick Walker, the county prosecutor Mr. Brown tried to oust, in 2003. "They were doing something wrong."

Up and down South Jefferson Street, though, in the old brick commercial district, the white merchants refused to be quoted, for fear of alienating black customers. "There's a lot of voting irregularities, but that's all I'm going to say," one woman said, ending the conversation abruptly.

The Justice Department's voting rights expert is less reserved. "Virtually every election provides a multitude of examples of these illegal activities organized by Ike Brown and other defendants, and those who act in concert with them," the expert, Theodore S. Arrington, chairman of the

political science department at the University of North Carolina at Charlotte, wrote in a report filed with the court.

Mr. Brown is coolly dismissive of the case against him. He has no office at the white-columned Noxubee County Courthouse, but that is where he casually greets visitors, in a chair near the entrance. A loquacious man, he both minimizes his own role and portrays himself as a central target. Far from being the vital orchestrator portrayed by the government, “when I was in Maxwell prison in ’95 and ’96, the show went right on,” he said.

There are so few whites in the county, Mr. Brown suggests, that the tactics he is accused of are unnecessary to keep blacks in office.

“They can’t win anyway unless we choose to vote for them,” he said with a smile. “If I was doing something wrong — that’s like closing the barn door when the horse is already gone.”

He sees the lawsuit against him as merely the embittered reaction of whites who feel disenfranchised, and he scoffs at a consent decree signed last year in which county officials agreed not to harass or intimidate white candidates or voters, manipulate absentee ballots, or let poll workers coach voters, among other things. “I wouldn’t sign my name,” Mr. Brown said.

But the Justice Department is pressing ahead with its suit, and wants to force Mr. Brown to agree to the same cease-and-desist conditions as his fellow county officials.

The state’s Democratic establishment has hardly rallied around Mr. Brown; privately some Democrats here express disdain for his tactics. Instead, he is being defended by a maverick Republican lawyer who sees the suit as an example of undue interference in the affairs of a political party.

“To do what they want to do, they would virtually have to take over the Democratic Party,” said the lawyer, Wilbur Colom, adding that Mr.

Brown's notoriety had made him the focus of the investigation. "I believe they were under so much pressure because of Ike's very sophisticated election operation. He is a Karl Rove genius on the Noxubee County level."

In Jackson, though, a leading light in Mr. Brown's own party, Mississippi Secretary of State Eric Clark, a longtime moderate in state politics, refused to endorse him.

"Anybody who tries to prevent people from voting is breaking the law," Mr. Clark said. "I certainly suspect some of that has been going on."

Back in Macon, in the shadow of the courthouse green's standard-issue Confederate monument, Mr. Brown spoke of history: "They had their way all the time. They no longer have their way. That's what it's all about." The case is "all about politics," he said, "all about them trying to keep me from picking the lock."

But Mr. Walker, the county prosecutor, insisted the past had nothing to do with the case against Mr. Brown. "I wouldn't sit here and pretend black people haven't been mistreated," he said. "I hate what happened in the past. But I can't do anything about it."

Voter fraud concerns raised

By Reuben Mees

With a special election less than a month away that could shift the balance of Hattiesburg's power structure, representatives of candidates and political interests are trying to make sure the potential for voter fraud is minimized.

Scott Tyner and Clint Martin, Hattiesburg residents who worked as poll watchers for Mayor Johnny DuPree in the 2005 election, spoke to the Hattiesburg Election Commission Monday and asked what would be done to address claims Tyner made following the June 7, 2005, municipal election. Tyner was a poll watcher at the Woodley precinct.

Tyner, whose complaint will be heard next week, has alleged that white poll workers at Woodley allowed a few white residents to vote more than once while steps were taken to prevent a few black residents from voting there.

"I take issue to certain people being denied their inalienable rights," Martin said.

Election commission chairwoman Karlynn Courtney said that with the Aug. 29 election confined to one precinct, it should be easier for the commission to respond to any reported incidents.

"If a poll worker sees something they need to call one of the election commissioners immediately or City Hall, and we will do our best to respond and resolve it," she said.

Tyner said he would like the commission to have a more diverse group of poll workers in this and future elections.

Tyner made his initial Woodley complaint Aug. 5, 2005, but it was not addressed at the time because the election commission disbands after a municipal election.

Meanwhile, new appointees to the election commission were caught up in the department head standoff at City Hall. The appointees were not approved until two weeks ago.

Republican mayoral candidate Betsy Rowell, who also complained shortly after the 2005 election regarding practices at the Rowan precinct and the handling of a ballot box, said she believes such problems need to be addressed at the state level.

She did not file a formal complaint.

"We need voter ID," Rowell said. "That solves a lot of issues, but that's a stretch."

But she also said getting nonbiased people working the polls is a critical issue as well.

"What is important is to have people who conduct those elections be people who are neutral. These are people who are appointed by the mayor. That is part of the process that needs looked at," she said.

017233

Sue Bush, who was at the meeting representing candidate Dave Ware, said it will be important to analyze recent voter registrations as well as get good poll workers to reduce any possibility of fraud.

"There is potential for it (voter fraud) to be there, and we are going to try to keep it from happening," Bush said.

As of Monday morning, 474 people in Ward 4 had registered for the special election, Forrest County Deputy Circuit Clerk Carolyn Nelson said. About 170 of those were new voters while the remainder were change of addresses, she said.

During the 2005 election, there were just under 5,000 registered voters in Ward 4, City Clerk Eddie Myers said.

Registrations postmarked on or before July 30 still are arriving and will be added to the voter rolls.

Nelson said the voter registration bank is purged on a monthly basis as the circuit clerk's office receives information from the city or other voting jurisdictions that voters have moved or died.

Paper ballots will be used in the special election, and that decision has caused some criticism.

Myers said the election commission selected paper ballots because they are cheaper to produce and the city does not have to rent optical scan machines or use electronic machines election officials have not been trained on.

"If someone comes in to vote under a different name, they can do that just as easily whether it's a paper ballot or a machine," he said.

Paper ballots are typically counted at the precinct immediately after the polls close and then sent to City Hall for certification later in the evening.

Election results, however, are not official until the election commission rules on all provisional or affidavit votes cast on the day of the election, Ward 4 election commissioner George DeCoux said. That could take two or more days depending on voter turnout.

Article published Aug 11, 2006

Commission addresses voter fraud concerns

By Reuben Mees

The seven poll workers at each of the three voting precincts in the Aug. 29 special election will represent both a political and racial cross section of city residents, Hattiesburg Election Commission members said Thursday.

"We expect to have a diverse group," Ward 4 Commissioner George DeCoux said.

His comments came after a public hearing in which Scott Tyner and Clint Martin expressed concerns over issues they saw while working as poll watchers during the 2005 municipal elections.

The concerns came forward after the election commission re-formed in mid-July to prepare for the special election to fill the Ward 4 City Council seat.

Tyner, who was stationed at the Woodley precinct in 2005, complained of instances where he alleged black voters were turned away from the polls without being advised of their right to vote by affidavit ballot, while white voters in similar situations were given a regular ballot and allowed to vote.

Election law states that any voters who believe they are registered at a specific precinct can cast an affidavit ballot there and the election commission is responsible for determining within days of the election if the vote is valid.

Tyner, who said he has been closely studying election and voter fraud issues for the past six years, cautioned the election board that election fraud occurs a little at a time.

"When you've got a few people cheating here and a few people cheating there, you've got 5 percent and that's enough to make a difference in an election," he said.

Commission Chairwoman Karlynn Courtney said the commission decided to use some of the best poll workers they knew from all five wards of the city to work this election.

"The (election) code says we should get poll workers from the precinct, but it does allow us to go outside the precinct or outside the ward when we feel it's necessary," she said.

While Tyner mentioned several poll workers by name, Courtney said those people would not be working the polls in the special election to avoid any potential problems.

Both Tyner and Martin said they believe that having a diverse group of individuals working the polls is the best solution.

"I think election officials should be more diverse," Martin said. "If it's a predominantly white area, there should be some black folks in there and vice versa if it is a predominantly black area."

Martin, who was a poll watcher at the Timberton precinct, complained that a group of developmentally challenged individuals were assisted while voting. Commissioner Daisy Lee

Wade said she responded personally to that situation and made poll workers aware of their responsibilities.

Tyner, however, agreed with the commission that paper ballots are the fairest way to keep potential fraud from the election.

"I am glad y'all chose paper ballots," he said. "They do have their problems, but there are far more problems with the machines that haven't been resolved yet."

The election commission opted to use the paper ballot because it is cheaper and does not require special training to use as do the new touch-screen machines that are being used in this year's statewide races.

City Clerk Eddie Myers said paper ballots have been the norm for special elections since at least 1992.

While Tyner spoke as a Democratic poll watcher, Democratic Executive Committee member Brown Miller said the party was not backing Tyner's complaint.

"We didn't authorize any poll watcher during this election to represent our party," Miller said. "We've got as good a system here as they do anywhere, and we always have a task on our hands to find people who can be fair and learn what you try to train them."

Immigration: Lawmakers debate use of ID to fight voter fraud

By ASSOCIATED PRESS
August 3, 2006

New Mexico legislators testify at one of 26 House hearings held to explore immigration issues

LAS CRUCES -- State Rep. Justine Fox-Young, testifying at a U.S. House field hearing Thursday, argued stronger voter identification is needed to prevent fraud, but others cautioned such requirements could discriminate against minorities.

The hearing was scheduled to investigate issues related to voting by noncitizens, but U.S. Rep. Vernon Ehlers, R-Mich., chairman of the House Committee on Administration, said he wanted to hear more about all types of fraud. "I kept trying to steer away from that," he said. "It's part of the problem, but it's not the whole problem."

At a later hearing in Phoenix, government officials also argued that stronger voter identification is needed to prevent illegal immigrants from casting ballots.

Fox-Young, R-Albuquerque, said it's hard to determine the extent of voting by illegal immigrants in New Mexico. She suggested voters should be required to show proof of citizenship, such as a federal voter-identification card that includes a photo.

"There is no systematic method for detecting fraud," she said.

Kathleen Walker, an El Paso immigration attorney and president elect of the American Immigration Lawyers Association, said any requirement to show identification would be difficult for some groups.

Kimmeth Yazzie, a program specialist with the Navajo Election Administration, said an ID requirement would be difficult for Navajos, many of whom live in rural areas without physical addresses and don't like to have their photos taken for religious reasons.

017237

Ehlers said he thinks certain organizations are taking advantage of immigrants by registering them to vote and using their identities to commit fraud. He said he doubts there's much of a problem with individuals who aren't citizens trying to cast ballots.

U.S. Rep. Zoe Lofgren,

D-Calif., a committee member, said the 26 hearings around the country represent an attempt to draw attention from a stalemate between the House and Senate regarding immigration reform, along with other problems.

"The Republicans have been in charge of this. They have the Senate and the House, and they haven't done anything," she said. "These field hearings aren't a suitable answer to that lack of action."

Ehlers and U.S. Rep. Steve Pearce, R-N.M., who was invited to participate in the two-hour meeting in his home district, said that's not the case.

"We're not distracting anyone," Ehlers said.

The problem we have here is the Senate has never sent the (immigration) bill to us, and it has nothing to do with whether we're holding hearings or not."

Pearce said he has been concerned about voting irregularities for some time. Although the last federal election was two years ago, Pearce said it often takes time for hearings to be scheduled.

"I think the main thing we did was bring the issue out publicly and talk about it on the record," he said.

Comments

By Linda Bence (Submitted: 08/05/2006 12:20 pm)

Why is it so hard to understand, Maria, that if you are supposed to be tested for your verbal and written understanding of our language in order to become a citizen, that you should be able to function well enough to vote. Those who required translation in order to vote JUST might NOT be citizens. Developmentally disabled CITIZENS in our country are allowed assistance with voting with a person of their choice. If they can prove they are citizens, they should be allowed to vote whether or not they understand

017238

who or what they are voting for. The problem with the last election with Florida is that apparently a large number of Israelis are allowed to vote with dual citizenship and they were too stupid to punch their chads.

By Maria Leyba (Submitted: 08/05/2006 6:53 am)

Linda Bence: would you also like to cut voting rights for developmentally disabled folks too? I mean your proposal would include them too. Strip them of those rights, right? They can't understand so they got no vote.

By Linda Bence (Submitted: 08/05/2006 12:14 am)

Where is there discrimination if EVERYONE is required to produce proper documents that you are a U.S. citizen that entitles you to vote. If every race and nationality is asked for the same documents, there is no discrimination. If you are unable to provide these documents because you do not understand what is asked for, you should not be voting. Voters should become informed. All persons seeking U.S. citizenship must show ability to read and understand English in order to gain citizenship. So, if you don't understand what is required for voting, you are most likely NOT entitled to vote.

By paul david (Submitted: 08/04/2006 1:28 pm)

Is there any evidence that voter registration fraud is a problem? The BIG fraud is in denying people the right to vote, miscounting or destruction of ballots, and tampering with machines. I doubt Rep. Young Fox's Republican constituents really support a national ID program.

By Eric Scott (Submitted: 08/04/2006 7:48 am)

Ed would you prefer the Supreme Court selecting our President from now on?

By ed forde (Submitted: 08/04/2006 7:39 am)

Apparently they have not heard the threats of certain Hispanic Immigrant groups to deliberately register noncitizens to vote, with the goal of electing officials who would change or eliminate all laws related to immigration, such as open borders.

By Lewis Morris (Submitted: 08/04/2006 7:06 am)

Preventing crime outweighs bruised egos.

White House linked to Election Day ploy

By Associated Press
April 11, 2006

WASHINGTON - Democrats plan to ask a federal judge today to order GOP and White House officials to answer questions about possible phone jamming in a civil lawsuit alleging voter fraud.

Democrats said the phone-jamming scheme was designed to keep New Hampshire Democrats from getting out the vote in the 2002 Senate race.

When staff and volunteers were to make phone calls to get Democrats to the polls, Republicans are said to have planned to keep phone lines busy.

Repeated hang-up calls that jammed telephone lines at a Democratic get-out-the-vote center occurred in a Senate race in which Republican John Sununu defeated Democrat Jeanne Shaheen, 51 percent to 46 percent, on Nov. 5, 2002.

Phone records introduced in criminal court Monday show key Republican figures in the scheme had regular contact with the White House and the Republican Party as the plan was unfolding.

It has been suggested Republicans and the White House made plans in a series of phone calls made within a three-day period around Election Day 2002.

The records show President Bush's campaign operative James Tobin, who was recently convicted in the case, made two dozen calls to the White House as the phone jamming operation was finalized, carried out and then abruptly shut down.

The national Republican Party, which paid millions in legal bills to defend Tobin, says the contacts involved routine election business and it was "preposterous" to suggest the calls involved phone jamming.

The Justice Department has secured three convictions in the case but hasn't accused any White House or national Republican officials of wrongdoing, nor made any allegations suggesting party officials outside of New Hampshire were involved. The phone records of calls to the White House were exhibits in Tobin's trial but prosecutors did not make them part of their case.

Besides the conviction of Tobin, who was the Republicans' New England regional director, prosecutors negotiated two plea bargains: one with a New Hampshire Republican Party official and another with the owner of a telemarketing firm involved in the scheme. The owner of the subcontractor firm whose employees made the hang-up calls is under indictment.

Phone records show that most calls to the White House were from Tobin, who became Bush's presidential campaign chairman for the New England region in 2004. Other calls from New Hampshire senatorial campaign offices to the White House could have been made by a number

017240

of people.

A GOP campaign consultant in 2002, Jayne Millerick, made a 17-minute call to the White House on Election Day, but in an interview said she did not recall the subject. Millerick, who later became the New Hampshire GOP chairwoman, said she did not learn of the jamming until after the election.

A Democratic analysis of phone records introduced at Tobin's criminal trial show he made 115 outgoing calls - mostly to the same number in the White House Political Affairs Office - between Sept. 17 and Nov. 22, 2002. Two dozen of the calls were made from 9:28 a.m. the day before the election through 2:17 a.m. the night after the voting.

There were also other calls between Republican officials during the period that the scheme was hatched, conducted and canceled.

Prosecutors did not need the White House calls to convict Tobin and negotiate the two guilty pleas.

Whatever the reason for not using the White House records, prosecutors "tried a very narrow case," said Paul Twomey, who represented the Democratic Party in the criminal and civil cases. The Justice Department did not say why the White House records were not used.

The Democrats, in their civil case motion, said they were entitled to know the purpose of the calls to government offices "at the time of the planning and implementation of the phone-jamming conspiracy . . . and the timing of the phone calls made by Mr. Tobin on Election Day."

While national Republican officials have said they deplore such operations, the Republican National Committee said it paid for Tobin's defense because he is a longtime supporter and told officials he had committed no crime.

By Nov. 4, 2002, the Monday before the election, an Idaho firm was hired to make the hang-up calls. The Republican state chairman at the time, John Dowd, said he learned of the scheme that day and tried to stop it.

Dowd, who blamed an aide for devising the scheme without his knowledge, contended the jamming began on Election Day despite his efforts. A police report confirmed the Manchester Professional Fire Fighters Association reported the hang-up calls began about 7:15 a.m. and continued for about two hours. The association was offering rides to the polls.

Bar codes on ballots proposed to fight voter fraud Also: 5,000 reasons to remember

Pataki

Dan Barrick & Meg Heckman

Monitor staff

If the phone-jamming trial of former national Republican operative James Tobin was the main attraction in last week's voter-fraud revue, the tiff between Warren Henderson and Kathy Sullivan over alleged fraud in last month's mayor's race in Manchester was a mere sideshow.

But Henderson, chairman of the state Republicans, hopes the Legislature remembers the Manchester dispute when the new session opens. A proposal from the House Election Law Committee is designed to protect the state from the prospect of unscrupulous voters who take advantage of same-day registrations by lying on domicile or citizenship affidavits.

The plan would be to mark the ballots of same-day registrants with special bar codes that match their registration cards, to identify specific votes in the event of an affidavit challenge and election recount. That's according to Rep. Bill O'Brien of Mont Vernon, who led the election law subcommittee that studied the issue.

For those who missed the Manchester mess while paying attention to the higher-profile Tobin trial, Henderson filed an additional election-law complaint against Geoff Wetrosky, who stayed with Democratic Party Chairwoman Sullivan while working as campaign manager for incumbent Mayor Bob Baines, who lost to Republican Frank Guinta.

Last month, Henderson filed multiple complaints and contacted the police after Wetrosky was spotted removing Guinta signs and taking them back to Sullivan's house. Democrats said the signs were taken from the public right-of-way, not private property, and the police found no evidence to the contrary.

Last week, Henderson asked the attorney general to investigate Wetrosky for voting in Manchester on a same-day registration, then skipping town. And he criticized Democrats for "picking and choosing the wrongdoing they condemn."

"All he was (doing) was flopping in Kathy Sullivan's house. He has no ties to New Hampshire," Henderson said.

Sullivan called Henderson a "jerk" and told the AP he was trying to ruin the life of Wetrosky, a young campaign worker who Sullivan said plans to return to New Hampshire after a trip home to South Dakota for the holidays.

Henderson believes the state's open voting laws provide an invitation to fraud.

No one on the election law subcommittee wanted to scrap same-day registration. This would open a "Pandora's box of problems," like potentially diminishing the state's high voter turnout, said O'Brien, a Republican. Marking ballots and registration cards with matching codes is an alternative.

Meanwhile, Republicans are watching to see if Wetrosky - a former John Kerry campaigner whose salary in Manchester was paid by Kerry, according to Roll Call - comes back to the Granite State. Attempts to reach him at his mother's house in Beresford, S.D., were unsuccessful.

More to come?

After Tobin was convicted for his role in the plot to jam Democratic phone banks in 2002, the prosecution said the federal government's investigation is ongoing.

Former state Republican executive director Chuck McGee and GOP consultant Allen Raymond both pleaded guilty for their involvement last year, and both testified that Tobin was the link between them.

Henderson said he believes the matter ended with those three, and the prosecutor's statement was just a stock response. But state Democrats suggest that others were involved. Specifically, they'd like to link the case to the allegations of corruption swirling about former House majority leader Tom DeLay and lobbyist Jack Abramoff, who were indicted on different matters last fall.

Four days before the 2002 election, New Hampshire Republicans received \$5,000 from DeLay's political action committee and \$5,000 each from two Indian tribes represented by Abramoff, who has close ties to DeLay. The total nearly equals the \$15,600 that McGee sent Raymond to pay for the phone jamming a few days later.

Little that came out in testimony in Tobin's trial suggested additional involvement, save for McGee's mention of "a gentleman by the name of Darrell Henry" who was "up from Washington volunteering." After McGee's boss, then-chairman John Dowd, ordered him to call off the phone plot, a disgruntled McGee mentioned his displeasure to Henry in the Manchester field office.

Henry surprised McGee by indicating he had heard about the plan and would "call some of his associates to pick up where we left off." That didn't make sense, McGee testified, because he had submitted a list of six specific numbers to Raymond for a telemarketing firm to jam. "I took it as bravado," McGee said. "I just took it as (Henry) was trying to be a nice guy and make me feel good."

But Sullivan believes Henry's name is a sign of a broader "culture of corruption" in the Republican Party. Henry was no college kid volunteering on election day; he's the director of government affairs for the American Gas Association in Washington.

Henry did not return calls placed to his office and cell phone last week.

Return visit?

Anti- eminent domain advocate Logan Darrow Clements appeared on Fox News's Hannity & Colmes Thursday to announce a rally in Weare next month.

Remember Clements? He's the Californian who was so rankled by the U.S. Supreme Court's Kelo vs. New London eminent-domain decision last June that he came up with a proposal to seize Justice David Souter's Weare farmhouse and replace it with the Lost Liberty Hotel.

In the Kelo case, a five-justice majority upheld the right of the city of New London, Conn., to take private property for the purposes of redevelopment and tax-base expansion. On Fox News, Clements invited viewers to join him in Weare Jan. 21 and 22 for a signature-harvesting effort. Clements needs just 25 signatures to get the Lost Liberty Hotel plan on the March town meeting ballot, but he said his goal is 3,000 signatures, for the sake of emphasis.

The weekend doesn't need to be all work, Clements said. On his freestarmedia.com site, he's urged like-minded folks to "make a vacation of it. New Hampshire offers great options for the whole family: skiing, snowmobiling, ice fishing, throwing snowballs at rotten politicians."

With Hannity encouraging him, Clements called his own effort "a modern-day Boston Tea Party" and a chance to home-school "five special needs students"- aka the justices who wrote the majority opinion. If Lost Liberty is a success, Clements said, he'll go on to propose economic development projects at the homes of the other four justices, too.

Pataki goes Platinum

New York Gov. George Pataki became one of the crowd when he spoke at a holiday party Wednesday for GOP donors in Concord. By pledging \$5,000, Pataki became the first of the potential 2008 presidential candidates to join the state party's Founders program, which recognizes major donors.

Massachusetts Gov. Mitt Romney and Senate Majority Leader Bill Frist of Tennessee have made themselves available for fundraisers but not pledged themselves, said Henderson, the party chairman.

The Republican State Committee launched the Founders program this fall to give special recognition to top-tier annual contributors and to encourage more donations. In the

Founders program, those who give \$1,000 are known as Directors, those who contribute \$5,000 are Platinum members and those who put up \$10,000 are Chairman's Select donors.

So far, there are two members of the Chairman's Select club: U.S. Sens. Judd Gregg and John Sununu.

Pataki joined six other donors in the Platinum ranks: state Rep. Jim Coburn of Windham, Fidelity Investments, Manchester mayor-elect Guinta, Rep. Richard "Stretch" Kennedy of Contoocook, former state senator and gubernatorial candidate Bruce Keough of Dublin, and former ambassador Joe and Augusta Petrone, also of Dublin.

Five donors have contributed at the \$1,000 Directors level.

On a roll

Speculation is growing among competitors in the eight-team Feds Bowling League that the judicial chambers at U.S. District Court in Concord contains a secret candlepin lane.

Judge Steven McAuliffe, who presided over the Tobin trial, is captain of the top team (McAuliffe's Marauders) in the federal standings at Boutwell's Bowling Center.

McAuliffe himself has an 89 average after 27 strings, including the second best men's triple of the season. In one three-game stretch he rolled a scorching 309.

Did White House help jam phone calls in election?

By LARRY MARGASAK

Apr 11, 2006, 01:25

Republican officials describe the two-dozen calls to the White House around Election Day 2002 as normal conversations about a close Senate race in New Hampshire.

Democrats have suggested in a court filing that another subject was discussed: a GOP scheme that jammed phone lines to keep state Democrats from being encouraged to vote.

The phone-jamming operation has led to three federal convictions and a pending indictment. Prosecutors have not raised questions in court about the White House conversations _ but records of the calls were available to them as criminal court exhibits.

The records show that Republican campaign operative James Tobin, who recently was convicted in the case, made two dozen calls to the White House within a three-day period around Election Day 2002 _ as the jamming operation was finalized, carried out and then abruptly shut down.

The national Republican Party, which paid millions in legal bills to defend Tobin, says it was "preposterous" to suggest the calls involved phone jamming.

Democrats have filed a motion asking a federal judge to order GOP and White House officials to answer questions about the phone jamming. The filing is part of the Democrats' civil lawsuit that alleges Republican voter fraud and seeks monetary damages.

Repeated hang-up calls that jammed telephone lines at a Democratic get-out-the-vote center occurred in the race that brought victory to GOP Sen. John Sununu. He defeated Democrat Jeanne Shaheen, 51 percent to 46 percent, on Nov. 5, 2002.

Besides the conviction of Tobin, the Republicans' New England regional director, prosecutors negotiated two plea bargains: one with a New Hampshire Republican Party official, and another with the owner of a telemarketing firm involved in the scheme. The owner of the subcontractor firm whose employees made the hang-up calls is under indictment.

The phone records show that most calls to the White House were from Tobin, who became President Bush's presidential campaign chairman for the New England region in 2004. Other calls from New Hampshire senatorial campaign offices to the White House could have been made by a number of people.

Virtually all the calls to the White House went to the same number, which currently rings inside the political affairs office. In 2002, White House political affairs was led by now-RNC chairman Ken Mehlman. The White House declined to say which staffer was assigned that phone number in 2002.

"As policy, we don't discuss ongoing legal proceedings within the courts," White House spokesman Ken Lisaius said.

A GOP campaign consultant in 2002, Jayne Millerick, made a 17-minute call to the White House on Election Day, but said in an interview she did not recall the subject. Millerick, who later became the New Hampshire GOP chairwoman, said in an interview she did not learn of the jamming until after the election.

A Democratic analysis of phone records introduced at Tobin's criminal trial show he made 115 outgoing calls _ mostly to the same number in the White House political affairs office _ between Sept. 17 and Nov. 22, 2002. Two dozen of the calls were made from 9:28 a.m. the day before the election through 2:17 a.m. the night after the voting.

017246

Prosecutors did not need the White House calls to convict Tobin and negotiate the two guilty pleas.

Whatever the reason for not using the White House records, prosecutors "tried a very narrow case," said Paul Twomey, who represented the Democratic Party in the criminal and civil cases. The Justice Department did not say why the White House records were not used.

The Democrats said in their civil case motion that they were entitled to know the purpose of the calls to government offices "at the time of the planning and implementation of the phone-jamming conspiracy ... and the timing of the phone calls made by Mr. Tobin on Election Day."

While national Republican officials have said they deplore such operations, the Republican National Committee said it paid for Tobin's defense because he is a longtime supporter and told officials he had committed no crime.

By Nov. 4, 2002, the Monday before the election, an Idaho firm was hired to make the hang-up calls. The Republican state chairman at the time, John Dowd, said in an interview he learned of the scheme that day and tried to stop it.

Dowd, who blamed an aide for devising the scheme without his knowledge, contended that the jamming began on Election Day despite his efforts. A police report confirmed the Manchester Professional Fire Fighters Association reported the hang-up calls began about 7:15 a.m. and continued for about two hours. The association was offering rides to the polls.

Robert Kelner, a Washington lawyer representing the Republican National Committee in the civil litigation, said there was no connection between the phone jamming operation and the calls to the White House and party officials.

"On Election Day, as anybody involved in politics knows, there's a tremendous volume of calls between political operatives in the field and political operatives in Washington," Kelner said.

Voter Challengers Will Be Allowed

A federal appeals court has cleared the way for political parties to challenge voters' eligibility at polling places throughout Ohio, ruling early Tuesday that their presence on Election Day was allowed under state law.

Overturing the orders of two federal judges from the day before, a three-judge panel of the 6th U.S. Circuit Court of Appeals ruled 2-1 early Tuesday to grant emergency stays that will allow Republicans and Democrats one challenger per precinct each.

The judges also consolidated the two appeals, which stemmed from separate lawsuits in Cincinnati and Akron.

Plaintiffs' appeals to the U.S. Supreme Court were unsuccessful. Early Tuesday, Justice John Paul Stevens, who handles appeals from Ohio, refused a request to stay the 6th Circuit decision.

Republicans say they wanted challengers in many polling places because of concerns about fraud. Democrats have accused the GOP of trying to suppress Democratic turnout.

Hundreds of thousands of voters have been newly registered in a state President Bush and Sen. John Kerry both say they need to win.

The 6th Circuit judges said that while it's in the public interest that registered voters cast ballots freely, there is also "strong public interest in permitting legitimate statutory processes to operate to preclude voting by those who are not entitled to vote."

They also said smooth and effective administration of the voting laws means that the rules can't be changed hours before the election.

The dissent by Judge R. Guy Cole said the citizens of Ohio have the right to vote without the "threat of suppression, intimidation or chaos sown by partisan political operatives."

He said partisan challengers are seeking to target precincts that have a majority black population, and that when "the fundamental right to vote without intimidation or undue burden is pitted against the rights of those seeking to prevent voter fraud ..." the court must err on the side of voters.

Mark Weaver, legal counsel for the Ohio Republican Party, said Republican challengers had been told Monday to show up outside the polls pending the appeals court ruling. "We think the 6th Circuit made the right decision," he said.

"The state law is an important safeguard against election fraud," he said. David Sullivan, a spokesman for the Ohio Democratic Party, said Democratic challengers would be at the polls to protect voters' rights.

"It is unfortunate that a court of appeals has permitted the Republican Party to continue its plan to challenge voters on Election Day, but we were prepared for this outcome," he said in a statement released Tuesday.

Stevens acted on his own in what is known as a chambers opinion that did not involve the other Supreme Court justices. Technically, the plaintiffs could ask that all justices be consulted, but - given the time constraints

- the full court rarely disagrees with one of its individual justices in such matters.

"That reasonable judges can disagree about the issue is clear enough," Stevens wrote. "The allegations of abuse made by the plaintiffs are undeniably serious - the threat of voter intimidation is not new to our electoral system - but on the record before me it is impossible to determine with any certainty the ultimate validity of the plaintiffs' claims."

Two federal judges ruling on separate cases Monday had barred political party representatives from challenging voters at polling places throughout Ohio, saying poll officials should handle disputes over voter eligibility.

U.S. District Judge Susan Dlott in Cincinnati said plaintiffs in a lawsuit likely would be able to prove that Ohio's law allowing polling place challengers was unconstitutional. The GOP appealed her ruling to the 6th Circuit.

Dlott said the presence of challengers inexperienced in the electoral process questioning voters about their eligibility would impede voting.

She ruled in a lawsuit by a black couple who said GOP plans to deploy challengers to largely black precincts in heavily Republican Hamilton County, which includes Cincinnati, was meant to intimidate and block black voters.

In the second case, U.S. District Judge John Adams of Akron said poll workers are the ones to determine if voters are eligible. Adams ruled in a suit by the Summit County Democratic Party, which claimed the law allowing registration challenges is unconstitutional because it does not give a disqualified voter a chance to appeal in time to cast a ballot.

He wrote that representatives could not be at the polls for the sole purpose of challenging voters' qualifications.

The 6th U.S. Circuit Court of Appeals said the Ohio law authorizing the presence of challengers at the polling places is presumed to be constitutional and "has been on the books for a decade." Based on the two lower court rulings, Secretary of State Kenneth Blackwell's office had told county elections boards to bar all challengers from polling places.

After the appeals court disagreed in its overnight ruling and allowed the challengers, secretary of state spokesman Carlo LoParo said he assumed poll workers wouldn't learn of the news until voting began at 6:30 a.m. Tuesday.

"Our concern at this point is trying to figure out a way to get that information to Ohio's poll workers," he said. Also Monday, the Ohio Supreme Court clarified that political parties are allowed one challenger apiece for each precinct. The GOP registered about 3,500 challengers, and

Democrats say they've registered thousands but won't give a specific number. Under state law, voters may be challenged on their citizenship, age or residency.

Poll workers generally would challenge someone if his or her signature didn't match the one in the poll book, or if the poll worker recognized the individual as someone who didn't belong in that precinct.

Republicans have said they plan to check names of voters against lists of absentee ballots and of people who have died recently.

Ohio to Delay Destruction of Presidential Ballots

By IAN URBINA

With paper ballots from the 2004 presidential election in Ohio scheduled to be destroyed next week, the secretary of state in Columbus, under pressure from critics, said yesterday that he would move to delay the destruction at least for several months.

Since the election, questions have been raised about how votes were tallied in Ohio, a battleground state that helped deliver the election to President Bush over Senator John Kerry.

The critics, including an independent candidate for governor and a team of statisticians and lawyers, say preliminary results from their ballot inspections show signs of more widespread irregularities than previously known.

The critics say the ballots should be saved pending an investigation. They also say the secretary of state's proposal to delay the destruction does not go far enough, and they intend to sue to preserve the ballots.

In Florida in 2003, historians and lawyers persuaded state officials not to destroy the ballots in the 2000 presidential election, and those ballots are stored at the state archive.

Lawyers for J. Kenneth Blackwell, the Ohio secretary of state, said although he did not have the authority to preserve the ballots, Mr. Blackwell would issue an order in a day or two that delays the destruction and that reminds local elections officials that they have to consult the public records commissions in each county.

Federal law permits, but does not require, destroying paper ballots from federal elections 22 months after Election Day.

The critics say their sole interest in the question is to improve the voting system.

“This is not about Mr. Kerry or Mr. Bush or who should be president,” said Bill Goodman, legal director of the Center for Constitutional Rights, a New York group that is part of the lawsuit. “This is about figuring out what is not working in our election system and ensuring that every cast vote counts.

“There is a gap between the numbers provided in the local level records, which until recently no one has been allowed to see, and the official final tallies that were publicly released after this election, and we want to figure out why that gap is there.”

The planned action of Mr. Blackwell, a Republican who is running for governor, and the threatened suit could draw attention to possible irregularities in the election that he supervised.

017251

The suit would follow what researchers call the first time anyone other than county and state officials in Ohio have been given such extensive access to the main material from the previous presidential election.

After eight months inspecting 35,000 ballots from 75 rural and urban precincts, the critics say that they have found many with signs of tampering and that in some precincts the number of voters differs significantly from the certified results.

In Miami County, in southwestern Ohio, official tallies in one precinct recorded about 550 votes. Ballots and signature books indicated that 450 people voted.

The investigation has not inspected all 5.6 million ballots in the election because the critics were not given access to them until January. That followed an agreement by the League of Women Voters, a plaintiff in another election suit against the state, that it was not contesting the 2004 results, Mr. Goodman said.

The new suit, to be filed in Federal District Court in Columbus, would be argued on civil rights grounds, saying the state deprived voters of equal treatment.

Last week, lawyers sent a legal notice to Mr. Blackwell notifying him that suit was pending and asking him to issue an administrative order directing the 88 county election boards to retain the 2004 records.

017252

“The decision of who decides whether the records will be preserved is quite simply not the secretary’s to make,” said Robert A. Destro, a lawyer for the secretary of state’s office.

Mr. Destro said preservation decisions belonged to the county public records commissions, the county boards of elections and the Ohio Historical Society.

“But by issuing this order,” Mr. Destro added, “the secretary of state will prevent any records from being destroyed for at least several months while this matter is studied more closely.”

Steven Rosenfeld, a freelance reporter formerly with National Public Radio, said the investigative team analyzed three types of sources. They are poll books used by officials to record the names of voters casting ballots, signature books signed by voters and used to verify that signatures match registration records, and optical scan and punch card ballots, used by 85 percent of the voters in the state. The rest used touch-screen machines.

“We’re not claiming that what we found reveals a huge conspiracy,” Mr. Rosenfeld said. “What we’re claiming is that what we found at least reveals extremely shoddy handling of ballots, and there are some initial indications of local-level ballot stuffing.”

In Miami County, Mr. Rosenfeld said, the team found discrepancies of 5 percent or more in some precincts between the people in the signature books and the certified results.

017253

In 10 southwestern counties, he said, the team found thousands of punch card ballots that lacked codes identifying the precinct where the ballot was cast. The codes are typically necessary for the machines processing the ballots to “know” to record which candidate receives the votes.

Mr. Rosenfeld is a co-author of a book that The New Press is to publish next month, “What Happened in Ohio?: A Documentary Record of Theft and Fraud in the 2004 Election.” The other co-authors are Harvey Wasserman, an election rights advocate and an adjunct professor of history at Columbus State Community College, and Robert J. Eitrakis, a lawyer who is running for governor as an independent.

Robert F. Bauer, a lawyer from Washington who represented Mr. Kerry and the Democratic National Committee on voting issues before the 2004 election, was skeptical about the critics’ case.

“The major discrepancies that they are identifying are not materially different than what has already been highlighted,” Mr. Bauer said.

On Tuesday, Mr. Kerry sent a fund-raising e-mail message calling for support for Representative Ted Strickland, the Democrat who is running for governor. Mr. Kerry wrote that Mr. Blackwell “used his office to abuse our democracy and threaten basic voting rights” in 2004.

Multiple suits failed in challenging the 2004 election in Ohio, and most studies after the election concluded that irregularities existed, but that they would not have changed the outcome.

In January 2005, the Democratic members of the House Judiciary Committee issued a report finding “massive and unprecedented voter irregularities and anomalies” in the election.

In March 2005, the Democratic National Committee issued a report that said 2 percent of the Ohio electorate, or “approximately 129,543 voters,” had intended to vote but did not do so because of long lines and other problems at polling stations.

But the report said those and other frustrated voters “would not have erased Bush’s 118,000 vote margin in the state.”

The Columbus Dispatch

Ohio's Greatest Online Newspaper

500 new voters might not exist

State activists might be charged over questionable registrations

Friday, August 11, 2006

Robert Vitale and Mark Niquette

THE COLUMBUS DISPATCH

Workers paid by a liberal group to register voters in Franklin County have turned in more than 500 forms with nonexistent addresses and potentially fake signatures, elections officials said yesterday.

Board of Elections Director Matthew Damschroder said he has forwarded the cards to county authorities for possible criminal charges.

Elections workers verifying new voter forms discovered signatures with the same handwriting, addresses that were for vacant lots and incorrect information for voters who already were registered, Damschroder said. One card had the name of an East Side man who's dead.

All the questionable cards were turned in by workers for Ohio ACORN, a group that's also paying people to gather signatures for a proposed November ballot initiative to raise the state's minimum wage.

Katy Gall, the group's head organizer, said ACORN is cooperating with the investigation and already has fired some of its paid circulators.

"We are interested in seeing people who are gaming the system prosecuted," she said.

ACORN, the Association of Community Organizations for Reform Now, faced similar problems in 2004 during a drive that added 189,000 new voters to Ohio's rolls. Prosecutors were unable to trace the originators of some falsified forms, but one ACORN worker was indicted by a Franklin County grand jury.

State law now requires people paid for registering voters to add their own names to the forms. James Lee, a spokesman for

Secretary of State J. Kenneth Blackwell, said the new provisions make it easier to investigate problems.

Lee said Blackwell's office also has had inquiries recently about potential voter-registration fraud in Cuyahoga and Summit counties.

In its six Ohio offices, ACORN has about 50 circulators who are paid between \$8 and \$11 an hour, Gall said. The group has eight circulators in Columbus.

Gall complained that the state's election-law changes make it harder for groups to catch problems because circulators must submit forms directly to elections offices in person or by mail.

In 2004, ACORN began running its own checks on voter forms before submitting them to the Franklin County Board of Elections.

Lee, however, said internal checks are still possible.

It's a felony in Ohio to submit voter-registration forms with false information. The penalty is up to 18 months in jail.

Damschroder said he doesn't think the fake forms were submitted by people intending to cast fake ballots in November.

"I think it's just somebody out there trying to make a fast buck," he said.

ACORN is helping lead the coalition that collected more than 765,000 signatures to put the minimum-wage issue on the Nov. 7 ballot, but Gall said the group has no concerns about the signatures its circulators obtained.

Franklin County elections workers will verify those collected locally, Damschroder said.

rvitale@dispatch.com

mniquette@dispatch.com

THE PLAIN DEALER

Voter registrations examined for fakes

Friday, August 11, 2006

Aaron Marshall and Diane Suchetka

Plain Dealer Reporters

Potentially fraudulent voter registration cards have turned up in at least three Ohio counties, and 500 have been turned over to a prosecutor to determine if a crime has been committed.

Matt Damschroder, director of the Franklin County Board of Elections, said the 500 cards his office referred to County Prosecutor Ron O'Brien Wednesday were collected between March and July by workers for ACORN, the Association of Community Organizations for Reform Now.

"From my perspective, both ACORN and the public are being defrauded by these apparently illegal voter registration forms," Damschroder said.

Problems include multiple cards in the same handwriting, people being registered to vote at vacant lots and people being registered with a bogus birthdate or address.

Similar problems have surfaced in Cuyahoga and Summit counties.

Election workers in Cuyahoga County are reviewing an unspecified number of cards that appear to be duplicates of those already on file, except for one piece of information such as a birth date or Social Security number.

They cannot tie those cards to any group, Board of Elections spokeswoman Jane Platten said.

She said it will be up to the board to decide whether to hand the cards over to the prosecutor.

In Summit County, Board of Elections Director Bryan Williams said this week he will ask the board to investigate about a dozen potentially bogus registration cards

submitted by people believed to have been hired by ACORN.

In Franklin County, Damschroder said that the board has met weekly with the organization since March to try to avoid faked voter registration forms.

Katy Gall, head organizer for Ohio ACORN, said the group had "red-flagged" a number of cards. "As part of our own quality control system, we had been setting aside cards that looked to have obvious problems," she said.

ACORN, which has collected 12,000 cards in Franklin County, pays workers by the hour, not by the signature, Gall said. It has fired a number of workers this year, she said.

Gall said a new election law that requires individuals, not groups, to turn in the cards, makes it more difficult for ACORN to detect fraud. "It really limits our ability to do quality control on voter registration because we don't hand into the board of elections, the circulator does."

Voters report fake calls

Instructions to change polling place don't come from board of elections

Friday, October 22, 2004

Suzanne Hoholik

THE COLUMBUS DISPATCH

The caller interrupting a North Side couple's dinner earlier this week said he was from the Franklin County Board of Elections.

He told the elderly woman that her voting site had changed and that on Nov. 2 she and her husband should cast their ballots at a South Side precinct. The caller even left the phone number of the board.

Her husband, who didn't want their names published out of fear of retribution, called the board, sat through a long menu of automated options and finally spoke with an employee.

"They said there was no way in the world they would make such a call," he said. "I think it's hankypanky and somebody in the election is trying to kill some votes."

At no time, Elections Director Matthew Damschroder said, does the board call voters.

"The only communication from the board of elections is printed on official board of elections paper with the logo," he said.

"If they're saying they're the board of elections, that's a violation of the law. My recommendation to them would be to cease and desist."

His office has received about a dozen calls since last week from voters checking on similar calls.

Damschroder said there are two scams: The caller tells voters their precincts have changed or the caller offers to pick up an absentee-ballot application, deliver the ballot to the voter and return the completed ballot to the elections office.

By law, the elections board mails absentee ballots and the only deliveries are made to voters in nursing homes by both a Republican and Democratic elections worker. The only person who can return an absentee ballot, besides the voter, is an immediate family member.

Poll information

Polls will be open from 6:30 a.m. to 7:30 p.m. Nov. 2. Voters are responsible for knowing their polling place and should contact their board of elections by phone or visit its Web site to verify their voting location. Boards of elections will not call voters to verify but might mail a reminder card.

Election scam

The Franklin County Board of Elections does not make phone calls to voters. If you receive a call, contact the board at 614-462-3100 or at boe@co.franklin.oh.us.

Source: Franklin County Board of Elections

017260

"People are calling saying, 'I got a call last night when I was watching Oprah from this group,' " Damschroder said. "By law, the board of elections does not give anybody a ballot to deliver."

Carlo LoParo, spokesman for Secretary of State J. Kenneth Blackwell, said he hadn't heard about the scams. But he said he was glad to hear that voters who had received calls reported them to the elections board.

"Election fraud, voter intimidation or providing voters with wrong information is unacceptable," he said. "Anyone engaging in this activity will be prosecuted to the fullest extent of the law.

"Anyone contemplating this type of malicious activity should think twice."

All county boards of elections already had planned to send cards informing voters of their voting precinct, Damschroder said, a move that could combat some of these calls.

"The cards will be dropped (in the mail) next Monday for delivery Wednesday," he said.

Everything Jersey

The Times

Aide tells of tossed ballots

Testimony differs from election chief

Wednesday, September 27, 2006

BY LINDA STEIN

TRENTON -- In what can only be described as surreal testimony at the trial to overturn the May mayoral election, Mayor Douglas Palmer's campaign manager testified yesterday that he shredded three absentee ballots and a volunteer for the Tony Mack campaign claimed that a dead woman voted.

At issue in the trial -- prompted by a lawsuit filed by Mack and now in its third week before Superior Court Judge Linda R. Feinberg -- is whether the irregularities uncovered in that election rise to a level of fraud which would mandate a new election.

Yesterday, Bandele McQueen, Palmer's campaign manager, said that he was instructed by Mercer County Superintendent of Elections Bettye Monroe to destroy three absentee ballots found at the Palmer campaign headquarters late in the afternoon on Election Day.

McQueen said Monroe instructed him to destroy the ballots because she had allowed those voters, Rebecca Lyles, Paulette Dowling and Bruce McKay, to vote instead at their polling places on the voting machines.

This corroborated earlier testimony from Lyles.

Asked by Mack's lawyer, Scott Capriglione, if it was proper to destroy ballots, McQueen said: "I was following the directions of the superintendent of elections."

In previous testimony Monroe denied that she told McQueen to shred the ballots.

Late yesterday, Mercer County Republicans issued a press release saying they are calling on Gov. Jon Corzine to ask Monroe to step down from her appointed position.

Cathy Tramontana, the chairwoman of the Mercer County Republican Committee, called McQueen's testimony "the straw that broke the camel's back. How much longer can we allow Ms. Monroe to continue making a mockery of the election process?"

Monroe could not be reached for comment.

McQueen also denied that Palmer campaign workers were forced to fill out absentee ballots, saying it was an option provided so that "if they worked from 6 a.m. to 8 p.m. they would have a chance to vote."

Shuantae Bellamy, who volunteered for the Mack campaign, said he observed politically biased behavior by poll workers at the East 12 poll, where he had been a challenger.

Poll workers would make phone calls to help people find their proper polling spot when they clearly planned

017262

to vote for Palmer while not providing such aid to those who seemed to favor other candidates, Bellamy said.

One woman voter whose name was similar to her mother's expressed surprise on seeing the poll book because it appeared that her mother, who was deceased, had voted, Bellamy testified.

After the election, Bellamy said he was reviewing the poll books for the Mack campaign at the superintendent's office. While there he said he saw Ruth Cunningham, a Palmer worker, put a poll book into a folder and leave with it. He also alleged that Cunningham gave a poll book to Charles Hill, another person involved in the Palmer campaign. The poll book contains names and signatures of people who voted.

"She put the book directly in the folder and gave it to him," Bellamy said when cross-examined by Rocky Peterson, Palmer's lawyer. Bellamy said he complained to Monroe that the books were taken off the premises.

"Who else am I supposed to tell? She runs the place," Bellamy said.

Daniel R. Toto, a campaign consultant for Mack, said there were problems at several polling spots on May 9. He rushed to West 16, where a machine was accidentally shut down early in the morning, and told the poll workers they must give voters provisional ballots rather than turn them away.

At another spot in the North Ward, he discovered police were not allowing voters to park near the polling spot, he said. Also, some people in the North Ward were sent to Lawrence to vote and had trouble finding their polling spot, Toto said.

"People not knowing where to go to vote was rampant," he said.

Toto also described a long wait at the county clerk's office for the results which he said were finally given by somebody from Councilman Manny Segura's campaign, not a county official.

When the trial resumes at 9 a.m. today, Feinberg said she plans to rule on whether to allow Capriglione to call Palmer to the stand. Peterson objected to that, saying there was no reason to call the mayor. Capriglione said he also plans to recall Monroe to the stand, in what is likely the last day of the plaintiff's case.

NEW JERSEY DAILY BRIEFING; Ballot Fraud Charges Filed

By TERRY PRISTIN

Andrew Amato, a Hoboken City Councilman, was indicted yesterday on charges that he paid seven people \$40 each to apply for fraudulent absentee ballots on behalf of the Republican candidate for Hudson County Executive. The candidate, William Macchi of Jersey City, was easily beaten by Robert C. Janiszewski, the incumbent, and was not aware of the illegal activity, said Patrick Sharkey, an assistant prosecutor for Hudson County. Some of the voters thought they were being paid for work on the Macchi campaign, Mr. Sharkey said.

GOP questions reliability of registered voters list

By Kate Nash (Contact)
Wednesday, September 20, 2006

SANTA FE — With the general election 49 days away, state Republican Party officials claim they're being stonewalled in their effort to prevent fraud at the polls.

Party members have asked for documents they say could expose whether non-residents or non-U.S. citizens could be registered and vote.

Their requests have gone largely unanswered by Gov. Bill Richardson's administration, the Republicans say.

"We could have determined anyone who is deceased, not a U.S. citizen or who lives out of the state," said Marta Kramer, Republican party executive director. "The 2006 election is going to be at risk for widespread voter fraud."

However, spokesmen for two departments involved in the matter deny withholding information and say they've complied with the requests or are working on them.

The Secretary of State's Office is working on the party's request for the names of people whose voter registration cards were returned to the state earlier this year — more than 201,000 of them.

Spokesman Ray Baray said the office is waiting on the Attorney General's Office to determine which parts of the voter-card information it can release to the party.

The Republicans say that list could give them information on people who are registered but shouldn't be.

With that information, the party could then petition to have those voters removed from the rolls. The deadline to do that is Sept. 26.

"We think it's public information and we should be able to get it," Kramer said.

The party also asked the Taxation and Revenue Department for information on non-U.S. citizens who have been issued drivers' licenses.

017265

It received a stack of documents from the Taxation and Revenue Department, much of which was redacted.

A letter to GOP officials says information that doesn't have to be disclosed because of attorney-client or executive privilege was redacted or excluded from the response.

Department spokesman David Harwell said the redacted information is protected by a federal law that protects drivers' privacy rights.

The department "always complies with public information requests and has nothing to hide," he said.

The GOP also requested the results of an audit of the documents immigrants used to get drivers' licenses in the state.

Harwell said that audit will be complete this fall.

More than 30,000 immigrants in New Mexico have received licenses since a 2003 law allowing them to be issued using a Mexican-government-issued identification card.

The Republicans say they'd like to know that immigrants who aren't U.S. citizens aren't registering to vote.

"We know in Tijeras they were allowing people to get drivers' licenses, what else are they allowing them to do? Are they allowing them to register to vote?" Kramer asked.

The November election includes a gubernatorial race, a matchup for attorney general, and a contest in the state's 1st Congressional District.

The Associated Press contributed to this report.

NEW MEXICAN

State to probe claims of vote buying

By Andy Lenderman The New Mexican
February 21, 2006

Attorney General Patricia Madrid

Several investigators from the state Attorney General's Office were scheduled to arrive in Española today to look into allegations of voters being paid for their votes in the city's election.

The Rio Grande Sun quoted anonymous voters in its Feb. 16 edition that said they were offered money to vote early in the Española municipal election.

For example, one source told the Sun that a campaign operative voted for him in the voting booth.

The mayor's seat and four city council seats are up for grabs. The election is March 7, but early voting has already begun. "No one is allowed to buy a vote, period," Attorney General Patricia Madrid said in a Monday news release. "It is a felony ... to offer a bribe for a vote." Madrid called the Sun report "disturbing." Secretary of State Rebecca Vigil-Giron, the state's chief elections official, said she has consulted Madrid about the election. Vigil-Giron also said she received a call that an early voter in Española was not offered assistance when she needed it, was asked to recite the alphabet by a poll worker and was asked whom she was voting for.

"That's ridiculous. Intimidation," Vigil-Giron said. "Is this something that has raised a red flag? Yes, definitely."

There are two slates of candidates running for office in Española. One is led by mayoral candidate and current Councilor Joseph Maestas, called "Moving Española Forward." The second is called "Team One Choice" and is led by former City Councilor Floyd Archuleta, who also is running for mayor. Each team has four candidates for the open council seats.

Maestas said his team demanded an investigation into the matter from Madrid's office after the Sun's story broke.

"The 'Moving Española Forward' team feels that if it's true, the people of Española deserve better," Maestas said. "And if laws have been broken, those that broke them need to be prosecuted to the fullest extent."

Archuleta said he welcomes any investigation and that he is not aware of any of his workers behaving that way.

"I am confident of our campaign workers out there, that they're doing everything properly and legally," Archuleta said.

He said his team has several campaign workers in the field, and many have offered to give people a ride to the polls. Many campaigns around New Mexico have offered voters a ride to polling places.

"And I'm not aware of anyone in our campaign group that is offering any money or any kind of gifts for people's vote, and I would not tolerate any worker that would do that," Archuleta said. "So if there is any of that, I would terminate that person from campaigning."

Washington Times

Voter fraud uncovered in New Mexico

Washington, DC, Nov. 9 (UPI) -- Observers watching the counting of New Mexico's 2004 provisional and absentee ballots have uncovered evidence of voter fraud, Opinion Journal said Tuesday.

O.J. political diarist John Fund said the Bernalillo County clerk "told media outlets that observers had discovered instances of voter fraud" during the attempt to qualify 18,000 provisional and absentee ballots cast in last week's presidential election.

"In counting the first 5,000 provisional ballots," Fund reported, "observers turned up ⁵³ instances of individuals voting more than once. They also found four voters who were dead and dozens of felons attempting to vote. In two cases, the same individual tried to vote three times: early, absentee and on Election Day."

The issue is not likely to die a quiet death. New Mexico Secretary of State Rebecca Vigil-Giron asked the state supreme court Monday to overturn a lower court ruling allowing Republican observers into the polls in Sandoval and Dona Ana counties. Vigil-Giron, a Democrat and elected official, is also seeking permission to evict the observers the Bernalillo County clerk allowed in to watch the counting, contending that New Mexico law does not provide for observers to be part of the review process.

President Bush currently leads in New Mexico, a state he lost by 366 votes in 2000 after a disputed vote count. In the 2004 count, Bush is ahead by 8,300 votes, or about 1 percent.

Voting testimony continues in election fraud trial

Thursday, September 21, 2006

BY ROSE Y. COLÓN

TRENTON -- The question of how three electoral employees processed 56 absentee ballot applications in 15 minutes was the focus of yesterday's trial over charges of fraud in the city's May 9 mayoral elections.

The validity of the absentee ballot applications was questioned by an attorney for losing mayoral candidate Tony Mack.

Mack, a Mercer County freeholder, is seeking to void the results of the city's mayoral race which propelled Mayor Douglas H. Palmer to a sixth term.

Mack contends Palmer's election team committed several voting infractions involving absentee ballots.

Palmer has repeatedly denied the accusations saying Mack filed the lawsuit because he simply can't accept he lost the election.

The process used to review 56 absentee ballot applications came under fire yesterday when Scott Capriglione, an attorney representing Mack, said the handwriting on the applications was not properly reviewed -- suggesting that the ballot applications were processed in a big hurry to help with Palmer's re-election.

Capriglione claimed it was virtually impossible for three people to diligently process 56 applications in only 15 minutes, as the 3 p.m. deadline for filing approached.

He said it was unclear whether some election workers actually signed applications on behalf of applicants.

Capriglione said applications that were not properly filled out should not have been certified.

The absentee ballot applications in question were processed between 2:15 p.m. and 2:30 p.m., according to three witnesses, one of whom was County Clerk Paula Solami-Covello.

Bonnie Epps, an 18-year employee of the county clerk's election office, said it was not unlikely that three employees could process 56 applications so quickly because each takes only "about two minutes."

Epps said applications are stamped when received and the signature on the document is compared to a digital signature in the voter registry.

An absentee ballot is then printed and mailed out to the applicant, she said.

Solami-Covello testified that Epps and two other employees followed protocol when processing the 56

017269

absentee ballot applications.

She said the only employees authorized to process applications were Epps, Mercer County election supervisor Brian Basford and temporary worker Helen Holmes.

She said a total of 480 absentee ballots were sent out to voters before the May 9 election.

Solami-Covello said she was not directly involved in the mayoral election process because it was a city election and not a county race.

Capriglione claimed Solami-Covello's workers don't accurately keep track of visitors or absentee ballots. He said the visitor's log supports his allegation because it does not contain the names of everyone who visits the office.

"Visitors should sign the log but they are not required by law to do so," Solami-Covello said.

Sarah Crowley, an attorney for Solami-Covello, said the visitor's log is irrelevant because absentee ballot applications may be downloaded via the Internet or photocopied from newspaper advertisements.

Deputy County Clerk Walker Worthy was also asked to testify at the trial.

Worthy said he did not observe any irregularities regarding the reading of election booth vote cartridges or the tally of votes on May 9.

Attorneys representing Mack have alleged that fraud committed on election night includes the delivery of seven unsealed bags containing provisional ballots and the destruction of several other ballots.

A Palmer attorney disputed the claim that the clerk's office hadn't kept track of visitors and absentee ballots handed out.

"Those allegations are nonsense," said Rocky Peterson, an attorney defending the Palmer election campaign.

The trial is expected to reconvene Monday.

Ballot probe yields charges

Albany Housing Authority ex-employee is indicted for alleged role in effort to manipulate absentee voting

By **MICHELE MORGAN BOLTON**, Staff writer

First published: Friday, December 16, 2005

Correction: An earlier version of this story contained some errors. Jamie Gilkey is 45 years old. Michael Brown and Jestin Williams are no longer defendants in a federal civil rights lawsuit filed in the case. The date of the 2004 Albany County legislative special election was April 27.

ALBANY -- An Albany County grand jury has indicted a Democratic Party insider for his role in an alleged conspiracy to manipulate absentee ballots in the 2004 primary for County Legislature.

Jamie Gilkey, 47, is named in a sealed indictment that Albany County Judge Stephen W. Herrick is expected to open this morning, sources familiar with the case said Thursday.

At issue are about 160 absentee ballots applied for by predominantly poor and minority tenants of the Albany Housing Authority, where Gilkey worked. The ballots were released by the county Board of Elections to Gilkey and Common Council member Michael Brown to deliver to the voters before the April 27 election. The grand jury was asked to determine if Gilkey improperly filled out the voters' applications by designating himself as the one to personally distribute the paper ballots.

"I have nothing I can say about anything," Gilkey said, when reached on his cellphone Thursday.

District Attorney David Soares declined public comment on any aspect of the grand jury process.

Soares' Public Integrity Unit has been investigating for six months after the newly elected district attorney pledged to provide a single system of justice for every Albany County resident.

Gilkey, a former reporter for The Record newspaper in Troy, recently worked at the Albany Public Library after losing his housing authority position.

He now freelances as a reporter with the Scotia-Glenville Spotlight.

Gilkey is also a defendant in a federal civil rights lawsuit filed by attorney Paul DerOhannesian on behalf of county legislators Lucille McKnight, Wanda Willingham, the Albany NAACP and several voters who sued in April 2004 under the U.S. Voting Rights Act.

Brown and Gilkey were supporting candidates Jestin Williams and Marilyn Hammond for county legislative seats against incumbents McKnight and Willingham.

In the primary, Willingham held a narrow lead over Williams, while Hammond led McKnight by a handful of votes.

State Supreme Court Justice Joseph Teresi ordered a revote for March in the Willingham-Williams race, and Willingham won. In the November general vote, McKnight ran on the Working Families Party line and defeated Hammond.

Last January, in a deposition in the lawsuit, Gilkey invoked the Fifth Amendment protection against self-incrimination 60 times when asked about his role in the disputed primary and handling of absentee ballot applications.

In July, Brown invoked the constitutional protection more than 160 times while under oath and even refused to acknowledge that he knew Gilkey or was a member of the Democratic Party.

The federal lawsuit also names the Albany Housing Authority, where Gilkey and Williams worked. In February, the housing authority settled its part of the litigation by agreeing to prohibit its employees from having anything to do with residents' voting activities.

Albany County Attorney Michael Lynch, who represents the Board of Elections, declined comment, citing pending litigation.

Michele Morgan Bolton can be reached at 434-2403 or by e-mail at mbolton@timesunion.com.

Ward leader denies fraud

Democrat Jamie Gilkey charged with falsifying ballot in 2004 legislative primary

By **MICHELE MORGAN BOLTON**, Staff writer

First published: Tuesday, December 20, 2005

ALBANY -- A Democratic city ward leader denied allegations Monday that he intentionally altered an absentee ballot for a county legislative primary in February 2004 and then knowingly filed the forgery with the Albany County Board of Elections.

Jamie Gilkey of 89 Columbia St. was released on his own recognizance shortly after Albany County Judge Stephen W. Herrick read a two-count sealed indictment charging him with second-degree forgery and first-degree filing a false instrument.

Gilkey faces up to seven years in state prison if convicted of both felonies.

Attorney William Dreyer represents the Albany Public Library worker and freelance newspaper reporter. He entered a plea of not guilty for Gilkey and had no further comment.

Criminal charges unveiled on Monday follow a six-month investigation by District Attorney David Soares' new Public Integrity Unit. Soares wouldn't say if more charges are pending in what some see as one of the largest voter fraud cases in the state.

"There was an attempt here to deprive a person of liberties," Soares said. "I made a promise to prosecute cases with one standard of justice. We have done our job."

Gilkey is accused of altering the paperwork of Deborah Williams-Muhammad at or near her New Hope Terrace home on Feb. 11, 2004, by crossing out the address where the ballot should be sent -- writing, instead, "Hold for Jamie Gilkey."

Then, on Feb. 17, Gilkey, "did knowingly offer or present a written instrument containing a false statement ... with the intent to defraud the Albany County Board of Elections," according to documents.

Gilkey is also named in a federal lawsuit filed by county legislators Lucille McKnight and Wanda Willingham, the Albany NAACP and several voters, including Williams-Muhammad, who sued in April 2004 under the U.S. Voting Rights Act.

At issue are about 160 absentee ballots applied for by poor, sick and minority tenants of the Albany Housing Authority, where Gilkey worked. The ballots were released by the county Board of Elections to Gilkey and Common Council member Michael Brown to deliver to the voters before the March 2 election that year.

Last January, in a deposition in the lawsuit, Gilkey invoked the Fifth Amendment protection against self-incrimination 60 times. Brown later invoked the Fifth Amendment 160 times.

Monday, NAACP executive board member Aaron Mair said Gilkey is a pawn in a decades-old political machine: "My belief is, at the end of the day, you have to look to the party chairwoman who has pretty much turned a blind eye. Her silence speaks volumes."

City treasurer Betty Barnette leads the county Democratic Party.

"I, just like others in the county, will be watching the merits of this case unfold," Barnette said, scoffing at the thought she knew anything about the alleged scam: "No one has called me from Mr. Soares' office. Unless Mr. Mair has some proof, I would ask him to leave me alone."

Plaintiffs in the federal case called for a criminal investigation based on testimony in a state court proceeding and federal depositions, said their lawyer, Paul DerOhannesian: "(They) feel there are changes that the county of Albany needs to implement to avoid the manipulation and tampering of absentee ballots which it has failed to control," he said. "Effecting those changes is why we are pursuing the federal lawsuit."

Indians still face obstacles in voting

By Mary Clare Jalonick, Associated Press Writer

LAKE ANDES — When Charon Asetoyer went to vote a few years ago, she was met with unfriendly words and an offensive gesture. A white man, apparently unhappy with the idea of an American Indian walking into the polls, asked her in vulgar terms what she was doing there.

She told him she was there because she had a right to vote and went back to her car to wait for him to leave. Only after he sped away did she walk inside.

Discrimination against Indians is commonplace here, she said. And nowhere is that more evident than in the polling booth.

Asetoyer, an Indian who lives on the Yankton Sioux Indian Reservation in the quiet flatlands of southeastern South Dakota, compares her home to the South in the 1960s.

“It’s outright racism,” she said.

Many on this reservation say that kind of behavior is normal in Charles Mix County, a poor, rural section of South Dakota farm country where Indians constitute about one-third of the population. Asetoyer, a quietly determined activist who moved here from California years ago, calls it a land-based struggle, where many of the conflicts are “border issues.”

The problem is not limited to South Dakota. As Congress considers reauthorize parts of the Voting Rights Act, many Indians say they aren’t satisfied with federal and state protections of their voting rights. Although the landmark law has brought them a long way from the day when some state governments required they be “civilized” to cast ballots, they say they still suffer from intimidation, restrictive voting requirements and long distances to polling places.

“There’s no question that there still is some subtle discouragement,” said former Sen. Ben Nighthorse Campbell, R-Colo., a member of Colorado’s Northern Cheyenne Tribe. “We’ve come a long way but we have a long way to go.”

A year away from reauthorization — parts of the Voting Rights Act are set to expire in 2007 — members of Congress are keeping quiet about possible changes to the law. But tribes expect changes, and they worry that could reverse a growing electoral clout among many Indian nations in their states.

Recent successes for Indian voters include the 2002 Senate election in South Dakota, when Sen. Tim Johnson, a Democrat, barely won re-election with 524 votes and a huge increase in turnout on reservations. In Washington state, a surge of Indian votes had a major effect on Democratic Sen. Maria Cantwell's narrow win in 2000. In Arizona, reservations helped seat Democratic Gov. Janet Napolitano in 2002.

Despite these achievements, tribes point to restrictive voting laws throughout the country. South Dakota's new voter identification law — passed after Johnson's election — requires residents to show photo identification at the polls, a problem for many on the reservations who don't have IDs. The law permits those without identification to sign an affidavit, but opponents argue there is confusion about what is allowed. The American Civil Liberties Union has challenged other voter-identification statutes seen as restrictive to Indians in Albuquerque, N.M. and Minnesota.

"The tribes are still very concerned about the targeted efforts to disenfranchise their vote," Jacqueline Johnson, executive director of the National Congress of American Indians, said. "We are having to change a mindset that exists."

Others imply the problems are exaggerated. Chris Nelson, South Dakota's Republican secretary of state, focuses on the positive — a huge differential in Indian turnout between 2000 and 2004, after two major Senate races — and said he has seen little evidence of voter intimidation.

Nelson said he is willing to support removing some federal protections on South Dakota's reservations. Shannon and Todd Counties — historically home to the state's largest population of Indians — are included in Section 5 of the Voting Rights Act, meaning that any major changes in election policy there must be federally approved.

Nelson said that thousands of local decisions have gone through the department without being rejected. The state is working to ensure that the Indian vote is protected, he said, lessening the need for federal help.

"Has the preclearance requirement done anything to improve the ability of Indians to vote in those counties? The answer is no," Nelson said.

He said the increase in turnout has nothing to do with federal law but with interest in particular elections and strong get-out-the-vote efforts in the state.

Former Sen. Campbell disagrees.

"If those federal protections weren't there, Indians wouldn't have a chance at voting," he said. "The law probably ought to go farther."

Indians in Washington and on the reservations are reluctant to say what exactly they would like to change about the Voting Rights Act, because there isn't much consensus yet. Some suggest adding counties with increased federal protections, instead of

removing them, and expanding a section of the law that allows bilingual assistance in polling stations.

Others suggest a larger number of polling places, more Indian poll watchers and more general oversight on election day.

One issue they all agree on is that current protections need to be retained.

“There are going to be some changes, and we really need to watch what those changes are,” Robert Cournoyer, chairman of the Yankton Sioux tribe, said.

Sen. Johnson said that Congress will have to maintain some protections to keep Indians’ trust in the system — and voting levels high.

“There’s still a lack of trust and confidence between Native Americans and state institutions, and keeping some federal oversight is something that Native Americans want to have,” he said. “Its presence contributes to a higher confidence level.”

If current trends continue, say some on the Yankton reservation, Indians could start to have more of a say about what happens in Washington. As their numbers have increased at the ballot box, Indian activists say the age-old perception that votes don’t count on reservations is slowly dissipating.

Oliver Semans, an Indian who has organized several South Dakota get-out-the-vote campaigns, said he has tried to strengthen participation by equating low voting levels with high poverty levels. This has worked to some extent, he said.

“You give us 20 years, we’ll have our country back,” Semans said.

Indians in Charles Mix County appear slightly less confident as tensions have escalated in recent years.

The county received national attention during the 2004 election, when the state ousted Senate Democratic Leader Tom Daschle in favor of Republican Sen. John Thune. The night before the election, Daschle’s campaign asked for a temporary restraining order against Republican poll watchers who were allegedly intimidating Indian voters. A judge granted the order for Charles Mix County, a ruling Republicans charge was purely political.

This year, a group of people in the county are quietly circulating a petition to divide the county, separating the reservation from the whiter areas.

Petition sponsors have not publicly identified themselves, but Asetoyer and others speculate it is intended to keep Indians off the county commission.

Sharon Drapeau, a native of the Yankton reservation who narrowly lost a race for the

county commission, said it may get worse for Indian country before it gets better as tensions rise.

“You have to get that scab off and let it bleed to clean it,” she said.

Some provisions of Voting Rights Act expire in 2007

Most aspects of the Voting Rights Act, first passed by Congress in 1965, will never expire. But some key provisions will expire in 2007 without congressional action:

- **Clearance:** This section of the law, commonly known as Section 5, requires local officials in nine states to get any changes to voting practices or procedures cleared beforehand by federal officials to ensure that local officials do not try to discriminate against minorities. Those nine states are Alabama, Alaska, Arizona, Georgia, Louisiana, Mississippi, South Carolina, Virginia and Texas. Parts of seven other states are affected — California, Florida, Michigan, New Hampshire, New York, North Carolina and South Dakota.

- **Language requirements:** Requires that large communities of people who speak limited English must have access to ballots in their native language. Under the requirement, known as Section 203, local jurisdictions must provide bilingual ballots and election materials if more than 5 percent of the voting age population or at least 10,000 citizens fall into a certain language minority group. The illiteracy rate of the minority group must also be higher than the national average. Only four minority groups are covered: American Indians, Asian Americans, Alaskan natives and Hispanics.

- **Election monitoring:** Allows the attorney general to assign federal election examiners and poll watchers to certain areas.

South Dakota poll worker faces forgery charges

© 2002 CNN

Saturday, November 2, 2002, Pierre, South Dakota (CNN) — A South Dakota election worker will be arrested on charges of forging absentee ballot applications, the state's attorney general announced Friday.

Many voters will continue with older voting technology, while newer methods are being tested around the country. CNN's Kate Snow reports.

Becky Red Earth-Villeda, also known as Maka Duta, is expected to be charged on multiple counts of forgery in Minnehaha County, where Sioux Falls is located, according to a statement from Attorney General Mark Barnett.

"Maka Duta will be arrested in the ordinary course of events," said Barnett. *"No evidence has been obtained that shows she has cast or made an attempt to cast actual ballots."*

A local Sioux Falls newspaper, the Argus Leader, reported that the woman apparently tried to burn the original applications, but then decided to retrieve them, according to Barnett.

The woman told the attorney general she copied the applicants' names from the original documents because they had been filled out wrong, then she apparently tried to replicate the voter's signature on the corrected form, the newspaper reported.

County auditors alerted the state's Division of Criminal Investigation about allegations of bogus ballot applications, according to Barnett's office. At least 30 DCI agents are working on the case and have interviewed over 400 people in 25 South Dakota counties.

DCI agents also conducted a lengthy interview with Maka Duta Tuesday.

The information obtained is still being processed.

"Voters should proceed as normal and go to the polls on the 5th," said Barnett.

It is not clear how many absentee ballot applications are believed to have been forged, but Barnett told the Argus Leader between 80 and 100 are suspected in one county alone.

Shelby County General Elections Sample Ballot

Imposter alleged, but vote goes on

By Halimah Abdullah and Marc Perrusquia

Contact

August 3, 2006

Hours before polls were set to open to decide the largest ballot in Shelby County's history, agents with the Tennessee Bureau of Investigation opened a late-night criminal probe at the elections operation center.

Elections officials called in the TBI after someone impersonating a precinct official picked up ballot supplies, including a list of registered voters, for Precinct 49-1, said election commissioner O. C. Pleasant Jr.

Election Commission chairman Gregory Duckett and Dist. Atty. Gen. Bill Gibbons also confirmed that TBI agents were at the operations center investigating a single precinct.

The TBI action began late Wednesday afternoon as election workers made last-minute preparations for today's vote, which features the largest ballot in Shelby County history with 141 races.

Duckett said the loss of the precinct box and the investigation would not affect the integrity of the election.

"Some precautionary measures have been put in place to insure that the election will not be compromised," Duckett said.

The day before an election all the officers in charge of the county's 279 precincts come to the operations center and pick up metal ballot boxes and election supplies, said election commissioner Richard Holden.

The supplies include things such as ballot applications, signs, and the poll book with the names of registered voters.

017279

When picking up their supplies, the officers are supposed to present an appointment letter and identification.

Elections officials discovered the problem when the real precinct worker arrived at the operations center, Pleasant said.

"They said somebody had come by and picked it up on your behalf. She said, 'No, I didn't send anybody by,' " Pleasant said.

Precinct 49-1 is located at Alton Elementary School at 2020 Alton in South Memphis. It is a majority black precinct with 843 voters.

"It's being put under surveillance to watch and see if anybody comes during the night to try and do something at the polling place," Pleasant said.

The TBI has been leading a Voter Task Force to answer criminal and legal questions during the elections, a signal of continuing concerns with the process that began with allegations of vote fraud in last fall's District 29 state Senate race.

In June, three Shelby County poll workers were indicted on charges they faked votes in an effort to throw that election to Ophelia Ford.

As voting begins this morning, voters will brave predicted 100-degree temperatures and could face waits of more than an hour and an additional eight to 10 minutes in the voting booth.

Throw in the three-way split in the hotly contested GOP Senate race. Mix in the at-times vitriolic tenor in the 20-candidate Ninth Congressional District primaries and the 44-candidate Charter Commission race. Toss in dozens of ballot-stretching judicial elections and newer model touch-screen voting machines and you get a recipe for a potential political perfect storm.

The U.S. Justice Department will have observers at the polls to ensure compliance with the Voting Rights Act.

"Candidates have been working pretty hard on getting out the vote," said Marcus Pohlmann, a political science professor at Rhodes College.

"That, coupled with the sheer number of races and the handful that are actually contested, will mean that turnout will be high."

017280

If early-voter turnout -- 78,899 -- is any indication, such predictions will bear out. That turnout reflects 13 percent of the county's 604,000 registered voters. The earlier record was 24,000 votes cast four years ago in the county primary.

"Don't be surprised Thursday night if the results are late coming -- it's the longest ballot in Tennessee history and most counties are using voting machines they've never used before," said State Election Coordinator Brook Thompson. "I expect it is really going to be a late night."

Thompson expects between 1.2 million and 1.3 million of Tennessee's registered voters to cast ballots. Some 447,910 voters cast ballots during the three-week early voting period.

Tennessee is the only state holding an election today. The state Constitution says judicial and county general elections shall be held on the first Thursday in August.

Indicted poll worker denies being on the run

By Marc Perrusquia

Contact

June 23, 2006

As a 69-year-old grandmother, Verline Mayo couldn't help but chuckle when asked about authorities' claims she was a fugitive who led deputies on a two-day chase.

The now-fired Shelby County poll worker was indicted Tuesday on charges she faked votes to help Ophelia Ford win last fall's District 29 state Senate race. But when it came time to book her, authorities couldn't find Mayo.

By Wednesday, when Dist. Atty. Gen. Bill Gibbons announced indictments against Mayo and two other election workers, she still hadn't been found.

"It's safe to say that this individual was tipped off and is evading arrest," Gibbons told reporters at a Wednesday morning news conference.

Mayo turned herself in minutes later, then bonded out of jail.

Safe at home Thursday, Mayo vented, denying the charges against her and insinuations she had run from the law.

"I had a good feeling they were going to charge me," Mayo said by phone from her North Memphis home. "... (But) nobody tipped me off."

Mayo said she initially didn't know she was wanted. She said she plans to file a complaint against the Sheriff's Office for "Gestapo" tactics used in pursuing her. She said deputies followed her to a hospital and later "broke into" her daughter's house.

Sheriff's spokesman Steve Shular said deputies were only doing their jobs when they pursued Mayo to a Baptist hospital and later went through a window at a relative's home.

"Once there's a warrant for someone's arrest, we're instructed to go get them," he said.

Shular said the sheriff's fugitive office received a warrant to arrest Mayo about 3:30 p.m. Tuesday and went to Baptist where she was being treated in the emergency room for a minor injury. But she checked out moments before deputies arrived.

A deputy later called Mayo and told her of the warrant but "the call was disconnected by Ms. Mayo," Shular said. On Wednesday morning, deputies briefly searched the North Memphis home of Mayo's daughter after entering through a window. Deputies believed the home possibly was Mayo's primary residence, giving them legal authority to enter, he said.

Meantime, the Tennessee Bureau of Investigation is probing Gibbons' concern that someone may have leaked indictment details to Mayo, said TBI spokesperson Jennifer Johnson.

As for Mayo, who faces 20 felony counts of voting fraud, she says she's innocent but has few resources to fight back.

"I deny all these charges," she said. "(But) the only justice you can get is what you pay for."

Three Shelby County poll workers charged with election fraud

By Marc Perrusquia

Contact

June 21, 2006

Three Shelby County poll workers and three others have been charged with election fraud in connection with Ophelia Ford's razor-thin Dist. 29 state senate victory last fall.

Poll workers Gertrude Otteridge and Mary L. McClatcher have been indicted on multiple counts of making false entries on election documents, official misconduct and other crimes.

A third poll worker, not yet in custody, also was charged.

Three voters also were indicted late Tuesday by a Shelby County grand jury for illegally registering or voting in the Sept. 15 special election.

Dist. Atty. Gen. Bill Gibbons is scheduled to release details at an 11 a.m. news conference Downtown.

The charges follow an investigation by The Commercial Appeal last winter that found that someone forged the names of two dead voters on ballots cast in the Sept. 15 election in Precinct 27-1, a now-dissolved North Memphis precinct that voted heavily for Ford.

Ford, a Democrat, defeated Republican challenger Terry Roland by just 12 votes in a race in which 8,748 ballots were cast, and her victory came under intense scrutiny. Following intense political tussling, that included a lawsuit in federal court, the Senate voted in May to void Ford's victory and oust her from office.

She has not been charged with any wrongdoing.

Chillicothe Gazette

Board dismisses situation over multiple vote

The Gazette staff

The Board of Elections Tuesday unanimously voted to take no further action in a situation concerning a resident who voted twice in the November election.

Kenneth Hitchens was present at the meeting and explained it was just a misunderstanding and he didn't vote twice on purpose.

After he voted Oct. 24 at the board of elections office during a visit to change his address, he simply forgot about it, Hitchens said. Then, a few days later when he received his voter registration card with his precinct on it, he went to his polling place to vote.

"I just did what the card said," Hitchens said.

Ballot fraud constant concern

By Rich Cholodofsky
TRIBUNE-REVIEW
Friday, April 16, 2004

GREENSBURG - All that prevents absentee ballot fraud is a carefully crafted signature, county elections officials said this week.

Handwritten names on applications for absentee ballots and also on the envelopes sent along with ballots provide a safeguard against bogus voting.

"It's signature comparison. That's the only method anyone can use. How else would you know?" said Paula T. Pedicone, director of the Westmoreland County Election Bureau.

Signature comparisons are used by most stores to ensure shoppers are the proper owners of credit cards.

Elections officials said signatures also are the best method to properly identify voters who cast absentee ballots usually sight unseen. Signatures of registered voters are kept on file with county election bureaus and compared with a new signatures required of them before they vote.

Absentee ballots bear new signatures required as part of an application request and also on the envelope sent with the ballots.

"The only reason we wouldn't count an absentee ballot is if the envelope isn't signed. The signature is the key, if it is not there or if (the ballot) is too late," Pedicone said of why a ballot would be discounted.

The county election bureau must receive applications for absentee ballots by April 20 for voters to participate in the April 27 primary. All properly signed ballots must be returned to the county by 5 p.m. April 23.

Elections officials concede that the absentee ballot system could be targeted for potential fraud, but the signature requirement has prevented most attempts.

017285

Pedicone said she can't recall any instances in Westmoreland County where the validity of absentee ballots was called into question.

Just seven years ago in Fayette County, authorities prosecuted three people, including former U.S. Rep. Austin J. Murphy, for a scheme in which absentee ballots were forged with the names of residents at a Wharton Township nursing home.

Authorities were able to use handwriting experts to determine the ballots in question were not signed by the nursing home residents.

Fayette County set up a procedure in which each application for an absentee ballot is numbered to protect against potential fraud.

Laurie Nicholson, director of the Fayette County Election Bureau, could not be reached for comment.

State officials said there are no other election laws or requirements in place specifically geared to prevent fraud.

"After (signatures), it is for each county to decide what to do," said Pennsylvania Department of State spokesman Brian McDonald.

Other forms of identification will be required this year for all first-time voters, both via absentee ballots and at the polls.

Under the federal government's Help America Vote Act, all first-time voters are required to present identification in addition to a signature comparison. Most other forms of identification, including drivers' licenses, firearms permits or bank statements, can be used, McDonald said.

The secondary identification also is required for first-time voters who cast absentee ballots. Voters will be required to send in a copy of another form of identification with the absentee ballots, McDonald said.

If voters show up at the polls or cast absentee ballots without the secondary form of identification, those votes will be considered provisional. They will be counted only after county election officials confirm they were submitted by properly registered voters.

Earlier this year the state Supreme Court further tightened the threshold election bureaus can use to keep track of absentee ballots.

The state's high court ruled those ballots either must be mailed in or hand-delivered by the voter. No third parties can bring in absentee ballots.

That ruling came as Democrats and Republicans fought over nearly every one of the more than 2.2 million votes cast last November in the race for Superior Court judge. That election eventually was won by Republican Montgomery County attorney Susan Gantman, who defeated Westmoreland County Judge John Driscoll, a Democrat, by just 28 votes.

Republicans and Democrats went to court challenging the validity of hundreds of absentee ballots brought to the Allegheny County Election Bureau members on behalf of a group of Democratic voters. Those votes eventually were ruled invalid.

Westmoreland County never has accepted absentee ballots submitted by third parties, Pedicone said.

Driscoll still is contesting Gantman's election in federal court, challenging several counties, including Westmoreland, for not properly differentiating the use of alternative ballots.

Alternative ballots, like absentee ballots, are sent in via mail. But unlike absentee ballots, alternative ballots can be submitted to the election bureau until the day of an election and are only to be used by elderly, handicapped voters whose polling places are not accessible to them.

No alternative ballots have been requested so far this spring in Westmoreland County, Pedicone said.

'A Rich History of Corruption'

Voter fraud in Pennsylvania? Gov. Rendell isn't worried.

BY JOHN FUND

Thursday, April 13, 2006 12:01 a.m.

HARRISBURG, Pa.--Over five years after the near meltdown of the Florida presidential recount, politicians are still arguing over how best to reform state election laws. Ground zero in that battle now is Pennsylvania, which features two close statewide races, for governor and U.S. senator.

Democrats claim anything that impedes or discourages someone from voting is a violation of the Voting Rights Act. Republicans insist the state's rancid history of voter fraud requires preventive measures. The conflict of visions, to borrow Thomas Sowell's phrase, couldn't be more complete.

Take the bill the GOP-controlled Legislature passed, which would require voters show a form of official ID or a utility bill; another bill would end Philadelphia's bizarre practice of locating over 900 polling places in private venues, including bars, abandoned buildings and even the office of a local state senator. City officials admit their voter rolls are stuffed with phantoms. The city has about as many registered voters as it has adults, and is thus a rich breeding ground for fraud.

But Democratic Gov. Ed Rendell vetoed both bills last month, saying that in a time of voter apathy "the government should be doing everything it can to encourage greater participation." He warned that requiring an ID could disenfranchise the homeless, nursing-home residents and the poor. Mr. Rendell says there is no evidence people routinely impersonate others to vote. He also says requiring an ID at the polls doesn't combat absentee ballot fraud. True enough; election officials properly worry that some 25% of voters now don't show their face when voting. In 1998, Austin Murphy, a former Democratic congressman, pleaded guilty to fraudulently voting absentee ballots for nursing-home residents near Pittsburgh.

But Mr. Rendell's history doesn't inspire confidence that he takes fraud of any kind seriously. In 1994, Philadelphia Democrat Bill Stinson was booted from office as a state senator by a federal judge who found his campaign had rounded up 250 tainted absentee ballots. Mr. Rendell, then Philadelphia's mayor, had this reaction to the Stinson scandal: "I don't think it's anything that's immoral or grievous, but it clearly violates the election code." In 1997, Mr. Rendell admitted to the Journal's editorial board that Philadelphia judges had "a rich history of corruption" that called into question how fairly city laws are enforced.

Now governor, Mr. Rendell isn't eager to depart from business as usual. In 2004, a court had to order him to make changes in the deadlines for absentee military ballots so they would be counted. At the same time, his secretary of state asked prison wardens to post a document outlining how prisoners could vote absentee. When GOP Rep. Curt Weldon held a news conference to denounce illegal voting by prisoners, a TV camera crew captured voter operatives behind him carrying absentee ballots out of the prison.

Still, many liberals insist fraud isn't an issue in Pennsylvania. "Show us the fraud," said Elizabeth Milner, chairman of the state's League of Women Voters, urging a veto of voter ID. Well, Donna Hope of Philadelphia can show her, because in 2004 an organizer for Voting is Power, an offshoot of the Muslim American Society, registered her to vote despite her admission that she was a noncitizen. Although she was turned away from the polls for that reason that November, someone eventually voted in her name.

Ms. Hope, a citizen of Barbados, said the women registering her told her that if she "had been in the U.S. for seven years or more you can register to vote." Jocelyn Budd, the woman who is listed on Ms. Hope's registration form, recalls canvassing her street but not specifically registering her. "I heard that people were forging [registration] cards to meet goals, but I never falsified any information," she says.

As for the group that registered Ms. Hope, Noreen S. Ahmed-Ullah of the Chicago Tribune reported in 2004 on internal Muslim American Society documents which showed it is the "public face" in the U.S. of the Muslim Brotherhood, an international group that has spawned violent organizations including Palestinian Islamic Jihad and Hamas.

MAS leaders say the documents obtained by the Tribune are either outdated or inaccurate. Shaker Elsayed, a top MAS leader, says that while the group was founded by Brotherhood members, it is independent. An MAS spokesman denies the group has any connection to registration fraud.

Irregularities like these are representative of mushrooming fraud, and the general public clearly believes some safeguards are needed. Despite claims by NAACP chairman Julian Bond that voter ID laws represent "an onerous poll tax," polls show upward of 80% favor them. Andrew Young, the former Atlanta mayor and U.N. ambassador, believes that in an era when people have to show ID to rent a video or cash a check "requiring ID can help poor people." He notes that his native Georgia is deploying a mobile bus to issue free voter IDs.

But no antifraud laws will work if prosecutors and judges don't crack down on election irregularities. Several tell me they fear being accused of racism and aiding voter-suppression tactics if they pursue touchy fraud cases. One district attorney told the U.S. Government Accountability Office that he doesn't pursue phony voter registrations because they are "victimless and nonviolent crimes."

Even those few who are prosecuted often view the punishment as the cost of doing politics. Barbara Landers, a former Democratic state Senate aide, was convicted in 1994 on 30 counts of misleading absentee voters in the Stinson scandal. She was given a suspended sentence and fined only \$1,000. Last month, she pleaded guilty to misappropriating up to \$115,000 in state grants meant to help the needy. "If the book had been thrown at her for voter fraud, she might have been deterred from subsequent behavior," one Philadelphia prosecutor told me.

The integrity of the ballot box is just as important to the credibility of elections as access to it. In not closing off opportunities for fraud and chaos, Pennsylvania is inviting trouble in its fall elections that could rival that of Florida in 2000.

The Patriot-News

Voter fraud rarely occurs, officials say

Some question need to require identification

Friday, February 17, 2006

BY JACK SHERZER

Of The Patriot-News

With all the debate over whether voters should show identification when they come to the polls, some might think the courts are clogged with ballot-casting miscreants after every election.

Nope.

Local election and law enforcement officials said they can count on one hand, with fingers left over, prosecutions against people who tried to vote twice or pretended to be someone else to cast a ballot.

If the state election bureau, state police or attorney general's office kept statistics on it, the idea that it's a big problem might be put down as an urban myth. But those agencies don't keep track of it and officials said it hasn't been a problem.

But it's getting a lot of talk because of the Voter Protection Act, which has passed the state House and Senate. It would require voters to show a photo ID or at least something with their name on it, such as a utility bill or paycheck.

"I don't think Dauphin County has a problem," said county District Attorney Ed Marsico. In the 2004 election, when provisional ballots were introduced, there were half a dozen suspected cases of abuse, but none was prosecuted, he said. Before that, there might have been one case about 15 years ago, Marsico said.

In Cumberland County, District Attorney David Freed reported the same.

"We get complaints [on] just about everything else relating to voting except voter fraud at the polls," Freed said. "Pure voter fraud, somebody trying to vote with a fake ID or doing it in an intentional fashion, trying to defraud the election board, the complaints are extremely rare."

"I've been in this business 26 years and I don't remember one case that we ever had to take to the district attorney," said Elaine F. Ludwig, Lebanon County's chief clerk of elections.

With the statewide registration data base and provisional ballots, voter fraud is not a problem, Ludwig said. Introduced in 2004, provisional ballots allow someone whose eligibility is in question to vote on a paper ballot that is examined later.

How about Philadelphia?

"There have been instances, but I wouldn't say in every election," said Peter Berson, a Philadelphia assistant district attorney and assistant chief of the government fraud unit. In the 2004 election there might have been a couple dozen complaints, but no charges, he said.

"It wasn't any kind of widespread 'stuff the ballot box initiative' that maybe some people would portray it to be," Berson said. He said provisional ballots have helped.

Gov. Ed Rendell -- who was Philly's district attorney and later its mayor -- questioned where all the fraud talk was coming from.

Rendell has signaled he'll veto the bill and said "nobody has come anywhere close" to showing why it is necessary.

"I think it is some urban legend that feeds on itself without anyone looking for substantial fact," Rendell said. "I actually think it's an attempt to manipulate the voting system and it's pretty despicable because other states are trying to find ways to expand the voting system and get more people to vote."

Even in the last two presidential elections -- which in Philadelphia were monitored by poll watchers -- there weren't significant problems, Rendell said.

Yesterday, House Majority Leader Sam Smith, R-Jefferson, wrote a letter to Rendell urging him to sign the bill and highlighting past fraud cases, though they all

dealt with nominating petitions.

But Smith's spokesman, Steve Miskin, said there's likely more voter fraud occurring than the amount being cited, and said even one case is too many. He asked if it is really too much to ask people to show identification after Sept. 11, 2001.

Miskin said anyone who showed up to vote without an ID could still use a provisional ballot, so nobody would be disenfranchised.

"In this day and age when there are very close elections, even a small amount of fraud can affect the outcome of an election," Miskin said. "Anytime there is one vote that's stolen, it disenfranchises every other voter. ... If the governor is to veto this bill it would be similar to condoning fraud."

New Forms of Voter Suppression Spreading Across America

PFAW Foundation issues report documenting 'The New Face of Jim Crow'

People For the American Way Foundation issued a report today that documents the recent spread of new regulatory, legislative, and administrative tactics that suppress votes.

"Jim Crow is being reincarnated as an entrenched bureaucrat or politician raising barriers to the ballot box, and it is becoming much harder for many Americans to exercise their right to vote. The barriers range from obvious to insidious to unintentional, and they are proliferating across the nation," said PFAW Foundation President Ralph G. Neas. "Racial minorities, students, the poor and senior citizens are bearing the brunt of new rules and regulations that discourage and limit voting."

The report, titled [The New Face of Jim Crow: Voter Suppression in America](#), includes overviews of how the following policies and other emerging strategies are erecting new barriers to the ballot box:

- Overly strict voter identification requirements that make it harder for the up to 10 percent of Americans who do not have government-issued photo IDs to cast a vote;
- Burdensome voter registration rules that hobble the efforts of churches, community activists and nonprofits to register voters in traditionally disenfranchised communities, including minorities, students and immigrants;
- Provisional ballots that are cast, but often go uncounted—for example, more than one million provisional ballots went uncounted in 2004;
- Long lines and unequal distribution of resources at the polls, disproportionately affecting low-income neighborhoods;
- Felon disenfranchisement policies that make it difficult for men and women who have finished their sentences to regain voting rights and sometimes disenfranchise non-felons.

These policies are often put in place with the stated rationale that they are needed to reduce voter fraud, but almost no evidence indicates that such fraud is a problem. There is also scant evidence that such policies reduce what little fraud does exist.

"Every American citizen has the right to cast a vote that counts," said Neas. "It should be

017293

the goal of public officials to make it easier, not harder to vote. And it definitely should not be easier for some groups of citizens to vote than others. That's not fair, it's not democracy, and it's not the American Way."

Interviews with PFAW Foundation legal and public policy experts about these suppression strategies can be arranged via our communications department at 202-467-4999.

Board seeks state police probe

Charges include votes by people who are not United State citizens, people voting under assumed names, and ballots listed under names of people who did not vote

01:00 AM EDT on Thursday, September 21, 2006

BY RICHARD C. DUJARDIN
Journal Staff Writer

PROVIDENCE -- Allegations of voter fraud in several precincts in last week's Democratic primary emerged during a hearing at the state Board of Elections yesterday, prompting the board to call for a state police investigation.

Laura Perez, who lost to incumbent Grace Diaz in a race for House District 11, and Eulogio Acevedo, who came in third in a five-way race for City Council in Ward 8, said they were not seeking to overturn last week's election but that election officials should be aware of what they had found.

Perez said she saw one man who is not a United States citizen casting a vote in a District 11 precinct and said four neighbors told her they did not vote but a list provided by the Providence Board of Canvassers showed that someone voted under their names. She said she knows of someone who voted under an assumed name.

Acevedo, who was in a hotly fought race in which Leon F. Tejada edged Wilbur W. Jennings by 11 votes, appeared before the board with his wife, Maryelyn.

Maryelyn Acevedo said she knew three people who gave their mail ballots to workers from another political campaign but the votes apparently never made it to the board of elections. But her biggest concern, she said, was many of the 650 new registered voters in Ward 8 whose names were added this year.

She said campaign workers visited those addresses to distribute campaign material, but were told by people living at those addresses that they had never heard of those individuals.

"There were many many cases like that," she said. "There were at least 30."

017295

The board's vice chairman, Thomas V. Iannitti, and member John A. Daluz said the state police will investigate as it did two years ago because of voter fraud in East Providence.

The allegations of voter fraud surfaced as the board postponed until 4 p.m. Wednesday a hearing on a Jennings' challenge to Tejada's 11-vote win.

Jennings' attorney, Keven McKenna, wants the board to call a new election because some mail ballots never reached state election headquarters.

To support his case, he called Vue Xiong, of 50 Netop Drive, who testified that he filled out his ballot and handed it to Scott A. Slater, son of Rep. Thomas W. Slater, D-Providence, at 7:30 p.m. election night.

Scott Slater testified that he picked up Xiong's wife's ballot earlier in the day and picked up Xiong's after Xiong returned home from work. He said he gave the sealed ballot to campaign worker Deborah Wesiah for delivery to the state. According to a list provided by the state, Xiong's ballot was not received or counted.

McKenna said he would be able to identify two other people from Ward 8 whose mail ballots were not counted either, and that with more time he might be able to find other mail ballot recipients whose ballots were not delivered or countered.

The board gave McKenna until Wednesday to find witnesses.

According to Robert Rapoza, director of elections, 13 ballots were disqualified from the tally because they had been rejected by a voting machine either because the voter voted for two or more people in the same race or failed to connect the lines next to a candidate's name with the black markers.

35,000 DEAD ON VOTING LIST IN PROVIDENCE?

People: McKenna, Keven A

Author(s): KAREN A. DAVIS Journal Staff Writer

Section: Business

Publication title: Providence Journal. Providence, R.I.: Aug 24, 2002. pg. B.04

Source type: Newspaper

Abstract (Document Summary)

Democratic mayoral candidate Keven A. McKenna had sought to have the names removed, in an appeal of last week's decision by the Board of Canvassers to keep the voting list intact. The state board listened to McKenna's arguments at a hearing yesterday morning.

The board also denied McKenna's request to disqualify thousands of voters whose mailed voter notification cards were returned to the canvassers marked undeliverable or addressee unknown.

What they're doing is better than nothing," McKenna said, after the hearing. The future of Providence should be determined by voters who actually live in Providence, not be deceased voters, and voters voting twice under different names."

Full Text

Copyright Providence Journal/Evening Bulletin Aug 24, 2002

* Removing the names of deceased city residents from a list of eligible voters is among the tasks now facing the Providence Board of Canvassers.

* * *

PROVIDENCE - The state Board of Elections yesterday agreed that the Providence Board of Canvassers has been negligent in its duty to clean up its list of registered voters, but denied a mayoral candidate's request to purge as many as 35,000 people from the primary election rosters.

Democratic mayoral candidate Keven A. McKenna had sought to have the names removed, in an appeal of last week's decision by the Board of Canvassers to keep the voting list intact. The state board listened to McKenna's arguments at a hearing yesterday morning.

McKenna has alleged that the city voting roster is flawed: it lists some voters twice, retains the names of people who have died or moved out of state and includes people who fraudulently claim to live at a city address. He presented the board with a list of more than 100 registered voters who would have to be more than 100 years old, or deceased.

017297

McKenna took up the issue of the voting roster after sending campaign mailings to residents at three public housing high-rises and having 302 of the mailings returned by the postal service, stamped addressee unknown."

We all truly believe that Mr. McKenna has taken the high-ground on this issue," state board chairman Roger Begin said at the end of the three-hour hearing. We believe the Board of Canvassers in Providence has been negligent."

McKenna came to the state board with several requests, including removing the names of deceased voters.

That request was granted, the board ordered the canvassers to immediately contact the city and state keepers of vital statistics to get the names of residents who have died from January 1990 to Aug. 15 of this year. City officials must compare those names with its voting records and immediately expunge the names of the deceased.

McKenna's requests to remove the names of people he believes do not live in Providence and eliminate duplications created by people who are listed under married and maiden names were denied.

Robert Fontaine, executive director of the state board, said federal law is clear: voters cannot be removed from municipal voting lists within 90 days of an election unless they make the request in person or in writing to have their names taken off.

Armed with federal law and state statutes, the five-person state board did, however, fire a shot of disapproval at the way the city has kept its voting list.

It ordered the canvassers to after the Nov. 5 general election initiate a citywide mailing to verify the status of the city's voting list. If a voter is found ineligible to remain on the list, the canvassers must wait for the passing of two federal elections before they can label such voters inactive."

The board also denied McKenna's request to disqualify thousands of voters whose mailed voter notification cards were returned to the canvassers marked undeliverable or addressee unknown.

Laurence K. Flynn, executive secretary of the Board of Canvassers, has said that a computer miscue left out apartment numbers or other errors that caused between 23,000 and 27,000 of the cards to be returned to the board.

McKenna has charged that the seven boxes of returned cards number closer to 35,000 and were returned primarily due to voter fraud or because voters no longer live at their registered addresses.

State officials were insistent that the city has a duty to correct the computer problems

and notify those voters; they also took issue with the fact that city canvassers were a month late in mailing out the notification cards, as the state required following legislative redistricting.

The board ordered the canvassers to resend the cards by Friday. Asst. City Solicitor Raymond Dettore said canvassing officials will begin mailing the cards on Tuesday.

What they're doing is better than nothing," McKenna said, after the hearing. The future of Providence should be determined by voters who actually live in Providence, not be deceased voters, and voters voting twice under different names."

Abstract (Document Summary)

PROVIDENCE - The city Board of Canvassers voted yesterday to send certified letters to 302 would-be voters, agreeing that Democratic mayoral candidate [Keven A. McKenna] had reasonable cause to suspect those voters no longer live at their registered voting addresses.

The board voted to deny McKenna's request that they disqualify between 20,000 and 40,000 voters whose voting place notification cards were returned to the city as undeliverable or "addressee unknown."

Board member Mark Lomazzo who cast the dissenting vote in the 2- to-1 decision to deny McKenna's request said he agreed with McKenna's claim about the prevalence of out-of-town voters.

* The Providence Board of Canvassers agrees to look at 302 discrepancies, but denies a bid by mayoral candidate Keven A. McKenna to disqualify thousands of registered voters.

* * *

PROVIDENCE - The city Board of Canvassers voted yesterday to send certified letters to 302 would-be voters, agreeing that Democratic mayoral candidate Keven

017299

A. McKenna had reasonable cause to suspect those voters no longer live at their registered voting addresses.

The three-person board also voted to look into McKenna's claim that five people on the voting list have died and should be purged from the rolls.

However, the board voted to deny McKenna's request that they disqualify between 20,000 and 40,000 voters whose voting place notification cards were returned to the city as undeliverable or "addressee unknown."

Laurence K. Flynn, chairman of the canvassing board, said a glitch in the computer system caused mistakes to be made in the mailing of the notices. In most cases, the city's computer division erroneously mailed the notification cards to street addresses, as opposed to mailing addresses, Flynn said. In other cases, an apartment number was left off the address, causing the card to come back as undeliverable.

Flynn said the board plans to resend at least 20,000 voter place notification cards before the Sept. 10 primary. But, he said, that project is on hold by order of the city finance director, who wants to get the city tax bills printed first, Flynn said.

McKenna alleges that those would-be voters who he estimates number closer to 40,000 do not live in the city and are fraudulently qualified to participate in the Democratic primary election, an election that could determine the city's next mayor.

McKenna said he will meet the 48-hour deadline in which he has to decide whether to appeal the decision to the state Board of Elections.

"I find it outrageous that the city does not provide the resources to keep the voting lists up to date," McKenna said. As a result, "people who do not live in the city could be voting to determine the next mayor of the city of Providence," he said.

McKenna said he believes many city employees who live in Narragansett or elsewhere are among those seeking to fraudulently cast votes.

Board member Mark Lomazzo who cast the dissenting vote in the 2- to-1 decision to deny McKenna's request said he agreed with McKenna's claim about the prevalence of out-of-town voters.

He said he personally knows of three out-of-town residents who registered to vote in the city and used relatives' addresses to do so.

"What we do . . . it's a joke," Lomazzo said.

And, yet, board member George T. Smith Jr. acknowledged mistakes not fraud caused many notification cards to be improperly addressed.

017300

"You can't take away their right to vote because of our misinformation," Smith said.

McKenna first took on the the accuracy of the city voting roster in June after mailing campaign literature to residents of three high- rise apartments and having 302 of his mailings returned and marked "addressee unknown."

Yesterday, McKenna told the board, he has since talked with Providence Housing Authority executive director Stephen O'Rourke, who checked his tenant list and confirmed that none of the 302 people live in the elderly high-rises.

While Flynn insisted that the 20,000 or more returned notification cards do not signal massive voter fraud, McKenna tried to show that the system has multiple flaws.

As an example, he brought up the matter of a woman who is listed on the voting list twice once under her married name and once under her maiden name at two different Cumberland Street addresses.

Flynn questioned how the board would know about changes in names or addresses, unless notified by residents.

Calling it the "most sacred document in a democracy," McKenna said he believes the board and the city have a duty to actively find out whether voters have died, moved or changed their names due to marriage.

McKenna said canvassing board computers should be connected with those in the state Department of Vital Statistics and city Probate Court, to better track deaths and marriages.

City election officials have said federal law prevents them from acting on the people who they suspect no longer live at their registered addresses. But, McKenna told the board that the rules are different for primary races, which are not bound by the laws that apply to general elections.

Abstract (Document Summary)

PROVIDENCE - Mayoral candidate [Keven A. McKenna] has asked the Board of

017301

Canvassers to purge the city voting roster of citizens who vote from addresses at which they do not live.

"Hopefully, that astounding percentage of wrong addresses is not indicative of the entire voting list of the City of Providence," McKenna wrote in a June 16 letter to the city board, secretary of state's office and state Board of Elections. "However, I would hope that number would inspire your agencies to do their job and clean up the Providence voting rolls."

In his letter, McKenna asked the agencies to "restore integrity" to the voting system by doing a return mail purge of voter rolls; instituting a timely system of removing felons from the rolls, and developing an automatic electronic purging system that matches voting addresses with the city tax division and School Department, car registrations, the state Division of Taxation and the U.S. Postal Service.

* Mayoral candidate Keven A. McKenna challenges the addresses of 302 voters, after mailings were returned "address unknown."

* * *

PROVIDENCE - Mayoral candidate Keven A. McKenna has asked the Board of Canvassers to purge the city voting roster of citizens who vote from addresses at which they do not live.

Noting that 56 percent of his mailings to registered voters at four city high-rises have been returned to him, McKenna is challenging the addresses of 302 voters.

McKenna who got a list of 96,124 registered voters from the Board of Canvassers said he became concerned about the accuracy of the voting roster after his mailings came back to him stamped "address unknown."

"Hopefully, that astounding percentage of wrong addresses is not indicative of the entire voting list of the City of Providence," McKenna wrote in a June 16 letter to the city board, secretary of state's office and state Board of Elections. "However, I would hope that number would inspire your agencies to do their job and clean up the Providence voting rolls."

Laurence K. Flynn, chairman of the Board of Canvassers, said anyone who challenges the veracity of a voter's address must identify the voter and show reasonable cause to prove that the person does not live there. Flynn said a hearing is scheduled to allow a complainant to make his or her case and allow the challenged voter to respond.

Following that procedure, Flynn said, the board will "take a look at" McKenna's

017302

complaint.

However, Flynn said "you can't put a blanket challenge in on a bunch of registered voters [and] I believe that's what he's doing here."

In his letter, McKenna asked the agencies to "restore integrity" to the voting system by doing a return mail purge of voter rolls; instituting a timely system of removing felons from the rolls, and developing an automatic electronic purging system that matches voting addresses with the city tax division and School Department, car registrations, the state Division of Taxation and the U.S. Postal Service.

Flynn said addresses are automatically matched with state and federal agencies every four years. And his office periodically updates voter records, including routinely getting notification from the state vital statistics division when someone dies.

Still, Flynn said, he is not surprised that candidates have mail returned to them.

"We live in a transient city," said Flynn, who has been with the board for 19 years. "People move around in the city. . That's how it's always been."

McKenna implied that he is skeptical of the suggestion that a transient population is the reason for wrong addresses. In his letter, he suggested that a flawed system or corruption by public employees could be a more plausible reason for discrepancies.

While such discrepancies might not make much difference in statewide races, McKenna believes that they are very important in city races, where victory margins have historically been slim.

"The electoral future of Providence should not be determined by strangers," McKenna said in a statement. "The voting roll is the most sacred document in a democracy. Its integrity should not be allowed to be compromised by bureaucratic incompetence or by voter fraud."

E.P. voter fraud saga continues; charges dropped against one suspect

EAST PROVIDENCE - Though it is less than a year until the next city election, the aftermath of the 2004 election still remains, with the state evaluating claims of voter fraud in both the primary and general elections in East Providence.

More than 200 names were suspected initially, but the Attorney General focused on nine individuals. Last week, the office of the attorney general announced it would be dropping charges against one person alleged to be involved. According to the attorney general's office, the case against Ralph J. Accinno, of 61 Brian Hollow Road, Coventry, was dismissed because the court determined the statute of limitations had run out.

"Mr. Accinno was charged with voter fraud," said Mike Healey of the attorney general's office.

"Voter fraud carries only a one-year statute of limitations."

Though the alleged crimes happened in the fall of 2004, with the general election held that year on Nov. 2, the state police did not forward information to the attorney general's office for consideration until Oct. 30, 2005. The office reviewed the information presented and filed charges against the individuals on Nov. 1, 2005, two days later.

Mr. Accinno does not have a criminal history, according to a prior interview with the attorney general's office.

The attorney general's office maintained that the crime was not completed until the general election took place, meaning the charges were filed in time. However, the courts ruled that Mr. Accinno had allegedly turned in his absentee ballot on Oct. 29, 2004, and the case was dismissed.

Of the nine individuals who faced charges, two others, William C. Chase of West Greenwich and Donna Hammann of Earl Avenue, were previously dismissed on grounds that neither had signed their voter registration cards. Four other cases, those of Francis B. Sergeant Jr. of Providence, Anthony K. Gomes of Robinson Street, Thomas A. Correia of Bristol and Steven J. Sullivan, of Second Street, were previously handled through a diversion program which involves community service for first-time, non-violent felony offenders. None of the men had a prior criminal record, and two were elderly.

Antonio T. Ramos previously plead "no lo contendre" and received a deferred five-year sentence, which is not technically a felony conviction, though he must keep the peace and maintain good behavior for those five years.

The final case, that of Albert D. Oliveira, remains to be settled. The attorney general's office has not been able to locate either Mr. Oliveira or an address for him. A warrant for his arrest was issued on Jan. 9, 2006.

Eastover election panel says there was no fraud, counts ballots

By JOY L. WOODSON
jwoodson@thestate.com

Odell Weston and Walter Jones were declared the winners Thursday of the Eastover Town Council elections after 43 challenged votes were reviewed.

Eastover Election Commission chairwoman Ella Suber said none of the ballots challenged in Tuesday's election was thrown out on the basis of fraud.

About half of the challenged ballots were deemed valid and counted Thursday night, Suber said. Those ballots changed the results of the election, in which Geraldene Robinson and Jones on Tuesday were declared the winners.

The other half of the ballots were thrown out and not counted, largely because they had improper signatures, no signature at all or no signature of a witness, Suber said.

Weston and Jones each picked up 21 votes after the challenged votes were counted.

~~Robinson has accused Mayor Christopher Campbell of intimidating home-bound and elderly residents to vote for Weston and Jones.~~

Agents from the State Law Enforcement Division are continuing to investigate allegations of fraud.

Threatening, forging or coercing voters or votes is illegal.

"Let me assure you, and the good people of Eastover, that there has been no misconduct on my part on the matter of absentee ballots during Tuesday's election — of this I am absolutely positive," Campbell said Thursday in a written statement.

He later added that Robinson asked residents to vote by absentee ballot.

Two other candidates, Richard Johnson and Jo-Ann Simmons, said they also were concerned about fraud. But three election protest letters filed Thursday night by Robinson, Johnson and Simmons did not indicate fraud as a reason for the protest, Suber said. The letters allege there was improper notification of the election.

"This is ridiculous," Suber said after reading the letters.

~~After the election Tuesday, SLED officials seized absentee ballots, voter registration rolls and computers used to count ballots.~~

The investigation is being done in conjunction with the 5th Circuit Solicitor's Office, which filed a petition for seizure with the court. ~~That petition states there is belief that absentee ballots were possibly forged or falsely submitted.~~

017306

No town officials were named as suspects. And it was not known who contacted the solicitor's office.

Campbell stands by the election, saying "SLED is doing what they are required to do — investigate a complaint."

Campbell's supporters defended the mayor and their votes. They said there were similar accusations during the 2000 mayoral election when Campbell beat then-incumbant Robinson.

Edna Scott, 79, said she voted absentee and her sister, not the mayor, helped her fill out her form. She is disabled and uses a wheelchair.

"As a voter, each of us have our choice of candidates," she said. "I was not intimidated, not forced, but using the right of the voter to cast an absentee ballot."

Another voter, Dr. Vernishia Robinson, said she voted absentee because she works long hours and can barely make it home before 7 p.m. — the time polls closed.

"I was not pressured or coerced," she said, as she took a brief break between patients. "I voted for the candidates of my choice, and I'm upset that anyone would challenge my vote."

Dead men voting: In Daschle's home state, fraud wanders off the reservation

© 2002 Wall Street Journal
John Fund's Political Diary

Note: At the time this was written Senator Tom Daschle, a Democrat from South Dakota, was Majority Leader of the United States Senate.

October 16, 2002 — Today the Senate will approve and send to President Bush a landmark bill that will upgrade voting machines and begin to curb the voter fraud that is creeping into too many close elections. It can't come soon enough. Last week, a massive vote-fraud scandal broke out in a U.S. Senate race in Tom Daschle's home state of South Dakota that could determine control of that body.

The FBI and state authorities are investigating hundreds of possible cases of voter registration and absentee ballot fraud. Attorney General Mark Barnett, a Republican, says the probe centers on or near Indian reservations. *"All of those counties are being flooded with new voters,"* says Adele Enright, the Democratic auditor of Dewey County. *"We just got a huge envelope of 350 absentee ballot applications postmarked from the Sioux Falls office of the Democratic Party."*

Steve Aberle, the Dewey County state's attorney, says many of the applications are in the same handwriting. At least one voter, Richard Maxon, says his signature was forged. Mr. Aberle, a Democrat with relatives in the Cheyenne River tribe, says many Native Americans have wanted little to do with *"the white man's government."* But this year many tribal elections have been scheduled for November 5, [2002] the same day as the critical election for Democrat Tim Johnson's Senate seat. A Democratic Senatorial Campaign Committee memo last month noted that the *"party has been working closely with the Native population to register voters and Senator Johnson has set up campaign offices on every reservation."*

More and more counties are uncovering fraud. Rapid City officials are investigating two brothers who may have forged registrations. Denise Red Horse of Ziebach County died September 3 in a car crash. But both Ziebach and Dewey counties found separate absentee-ballot applications from her dated September 21 in bundles of applications mailed from Democratic headquarters. Maka Duta, who worked for the Democratic Party collecting registrations in Ziebach, bought a county history book that contains many local names. Some are turning up in the pile of new registrations. At least nine absentee ballot requests have been returned by the post office. Mable Romero says she received a registration card for her three-year-old granddaughter, Ashley. Some voters claim to have been offered cash to register to vote. In both Dewey and Ziebach counties, the number of registered voters easily exceeds the number of residents over 18 counted by the 2000 census.

Renee Dross, an election clerk for Shannon County, says her office has received some 1,100 new voter registrations in a county with only 10,000 people. *"Many were clearly signed by the same person,"* she says. Some registrants actually live in neighboring Nebraska. As in most states, South Dakotans are on an *"honor system"* and don't show photo ID to register or vote. Only the unprecedented flood of applications raised any suspicions.

State Democrats told the Christian Science Monitor they expect 10,000 new votes from the Indian reservations this year. In 1996, Senator Johnson won by only 8,600 votes. Russell LaFountain, the director of Native Vote 2008, says his organizers are encouraging *"strong absentee balloting."* Pine Ridge Reservation residents told me that 11 workers are being paid \$14 an hour to contact voters. The statewide Indian voter project is run by Brian Drapeaux and Rich Gordon, two former staffers for Senator Daschle. Democratic officials say they've fired Ms. Duta and claim they were the first to bring the fraud to light. Ms. Enright, the Dewey County auditor, says that claim isn't true and is *"pure spin."*

Voter fraud isn't unknown on reservations. Democrats have often given out free tickets to Election Day picnics for voters on the Pine Ridge Reservation, where 63% of people live below the poverty level. In 1998, that prompted U.S. Attorney Karen Schreier, a Democrat, and Attorney General Barnett, a Republican, to write an unusual joint letter to county auditors noting that

"simply offering to provide" food or gifts "in exchange for showing up to vote is clearly against the law." Amazingly, Kate Looby, the Democratic candidate for secretary of state this year, has criticized laws barring the holding of picnics for those who vote. She also wants to drop restrictions on absentee voting.

Making voting easy is desirable, but only if legitimate voters don't have their civil right cancelled out by those who shouldn't vote. In 1980, only about 5% of voters nationwide cast absentee or early ballots. Now nearly 20% do. *"Absentee voting is the preferred choice of those who commit voter fraud,"* says Larry Sabato, a professor at the University of Virginia. He suggests media outlets set up *"campaign corruption hotlines"* and begin taking voter fraud seriously. The Miami Herald won a Pulitzer Prize in 1998 after its stories on how 56 absentee-ballot *"vote brokers"* forged ballots in a Miami election. The sitting mayor was removed from office.

In Texas, Democrat state Rep. Debra Danburg, who chairs the state House elections panel, has tried without success to reform absentee-ballot laws that are so loose she says they make *"elderly voters a target group for fraud."* Eric Mountain of the Dallas County district attorney's office says some campaigns have paid vote brokers \$10 to \$15 a ballot. Many seniors are visited at home and persuaded to have someone mark an absentee ballot for them. Others have absentee ballots stolen from their mailboxes.

The law Congress is passing addresses some of the problems the federal government created with the 1994 Motor Voter Law. Let's hope the latest scandal in South Dakota — uncovered only due to incredibly sloppy cheating—prompts states to examine their own absentee-ballot laws so they will stop being treated as an engraved invitation to fraud.

No Action on Request to Void Election of Ophelia Ford

Dec 23, 2005, 10:08 AM EST

NASHVILLE, Tenn -A Senate committee looking into allegations of voter fraud in a special election declined Wednesday to seek throwing out the vote.

The winner of the September 15th election was Ophelia Ford and her victory was certified with a 13 ballot majority.

But *The Commercial Appeal* newspaper reviewed voter files and reported two people listed as voting in the election had died the previous month. The TBI was called in by the district prosecutor.

Terry Roland, the Republican candidate who lost the election, has repeatedly complained of voting irregularities.

Wednesday members of the Senate committee reviewing the election said they hadn't had time to review documents presented by Roland's attorney just before they met. They also noted the TBI hasn't had time to complete its investigation. The election was held to fill the seat of Ford's brother, longtime legislator John Ford, who resigned after he was indicted in a federal probe into allegations of bribery. In all, six current or former public officials are awaiting trial in Operation Tennessee Waltz.

017316

SOUTHERN STANDARD

Three more invalid votes found in state Senate election

NASHVILLE, Tenn. Copyright 2006 The Associated Press. All rights reserved. This material may not be published, broadcast, rewritten or redistributed. -- Officials have identified three more convicted felons voting in a disputed state Senate election in Memphis.

State Sen. Mike Williams, chairman of a special Senate committee investigating the election, said Tuesday that the three felons found by state election officials pushes the total number of improper votes to 12 -- one shy of the 13-vote margin of victory for Democratic state Sen. Ophelia Ford.

"We're going to ask our attorney to go to Memphis to see if he can find one more vote," said Williams, R-Maynardville.

The election victory placed Ford in the state Senate seat her brother John Ford held for three decades before resigning in May after a federal corruption indictment.

Republican challenger Terry Roland and his supporters have said as many as 150 other votes were improper, including ballots cast in the names of voters who were dead. Ford has not been accused of wrongdoing.

The full Senate voted last month to void the election, but a federal judge interrupted that process and said the Senate could proceed only if it has consistent standards for dismissing election results.

The push to oust Ford was led by Senate Majority Leader Ron Ramsey, who is also a member of the investigative committee. The Blountville Republican has said the election "stinks to high heaven" and that there was already enough evidence to void it.

The first of two Senate votes needed to oust Ford passed 17-14, but the federal judge intervened before the second vote.

Williams abstained and Sen. Don McLeary of Humboldt was the only Democrat to vote in favor of the measure. McLeary has since switched to the Republican Party.

Williams said the Senate vote was "more partisan than it was procedure" and opened the Senate up to the federal court decision.

Williams' committee last week hired former state Appellate Judge Ben Cantrell, a Republican, to help guide it through the court's decision and to investigate further questionable votes.

The committee voted last month to void nine votes, including some cast on behalf of dead

voters, felons and nonresidents.

State Election Coordinator Brook Thompson said the most recent improper votes were found through a check of records at the Administrative Office of the Courts and by confirming that one voter turned up by The Commercial Appeal newspaper had a criminal record.

Thompson said his office is working on a report on potential felons registered to vote across Tennessee.

While it is unknown for which candidate the disputed ballots were cast, improper votes equaling or exceeding the margin of victory would be enough to call the election into question, Williams said.

Ford, who fought the ouster on grounds that it disenfranchised voters in the majority black district, has asked the state to pay more than \$57,000 to her lawyers for their work her federal lawsuit.

The state attorney general's office, meanwhile, is appealing the federal court decision.

If Ford is ousted, the Republican-controlled Shelby County Commission will name an interim senator.

Also Tuesday, the Senate State and Local Government Committee unanimously advanced a measure to purge dead voters' names from elections records every 30 days in an effort to prevent repeats of the Memphis vote.

Accusations surround September's special election

Dec 12, 2005, 08:19 PM EST

Some serious accusations about September's special election to replace Senator John Ford.

Terry Roland's attorney's told a Tennessee Senate panel today that **four convicted felons -- 44 people who lived outside the district and even a person who died weeks before the election -- voted in the special election District 29 Senate Seat.**

"And we've come up with these names of people who don't reside where they say they resided, we've got a presumption that they should not be voting in this district," said Roland's attorney Richard Fields.

Attorney's for Ford and the Shelby County Election Commission argued that no election is perfect.

Roland's attorneys are asking that results of the special election be voided. The senate panel is scheduled to reconvene in Nashville December 21st.

On September 15th -- Ophelia Ford won the election for the District 29 Senate Seat.

Ford beat Republican Terry Roland by 13 votes. The special election was held because Ford's brother -- John Ford -- stepped down after being indicted in the Tennessee Waltz corruption scandal.

Two more apparently fake voter slips found

Other states have reported group tied to Democrats

By JESSICA FENDER
Staff Writer

Two more questionable voter registration forms have surfaced in Metro Nashville — but these were handed in by a political group that supports Democratic causes, election officials said Wednesday.

ACORN, a low-income community advocate organization, has made national news this month for allegedly submitting thousands of incomplete or apparently fraudulent forms in other states.

The two registration slips in Tennessee included accurate names and addresses but with the wrong Social Security numbers, signatures and birth dates.

Those were the same problems discovered last week in a dozen forms submitted in Davidson and Williamson counties by a canvassing group hired by the Republican National Committee.

ACORN canvassers have registered more than 500,000 people nationwide, including thousands in Tennessee, spokesman Kevin Whelan said. He did not know about the questionable forms in the Nashville area until contacted by The Tennessean.

"If there are any mistakes that appear to be any kind of misconduct — intentional or unintentional — we want to know about them," Whelan said. "We wouldn't continue to employ anyone not meeting (our) standards of integrity."

Whelan said workers are paid by the hour, not by the number of people they register. He said a second pair of eyes looks over cards, checking for irregularities and incomplete information.

Metro elections commission staff contacted the people whose names appear on the potentially fraudulent forms. The people said they had not filled out the forms and were

017314

already registered, according to staff notes.

Brook Thompson, state election coordinator, said questionable forms will go to the district attorney's office for investigation and potential prosecution. •

Voter Admits Voting In District 29 Despite Living in Another District

MEMPHIS - Jennings Bernard is no stranger to Memphis politics. He even has a daily talk radio show.

Bernard has rubbed elbows with some of Shelby County's top leaders. He even has a picture of himself side by side with the chairman of the election commission.

So you think Bernard should know better. For the past three decades he has voted in District 29. A district he doesn't live in.

"Over 32 years I have voted at my mother's house," says Bernard.

Bernard admits he's registered to vote at his parents address in the Hollywood area of Memphis which is District 29. But he really lives in the Fox Meadows community in District 33.

"We often see this happening all the time," says Bernard. "People have been doing it for years."

Bernard is one of 44 contested voters the State Senate is looking into. A member of the senate committee investigating this says Bernard's vote needs to be thrown-out.

"Just because you have a business in the district or know the issues in the district. There are no reason you could continue to vote in that district. So his vote needs to be disqualified," says TN. Senator Ron Ramsey.

Jennings Bernard says he'll always consider North Memphis home. But because of all this controversy he went ahead in registered in the district he really lives in.

"If it was a problem and I was voting for 32 years at the wrong place," says Bernard. "I think its incumbent on the election commission to find out if I was working in the wrong place, that's your job!"

The clincher: Bernard says he didn't vote for either Ophelia Ford or Terry Roland in this contested race. Bernard says he voted for perennial candidate Prince Mongo.

Voter fraud probe sought

Shelby ballots cast by 156 alleged outsiders

By Michael Erskine

Contact

August 12, 2006

The chairman of the Shelby County Democratic Party asked for a criminal investigation Friday into allegations of "possible fraudulent voting" in the Aug. 3 election.

Party chairman Matt Kuhn sent a letter to Dist. Atty. Gen. Bill Gibbons requesting he look into a claim that more than 150 citizens who live outside of Shelby County voted in the county election.

Jennifer Donnals, communications director for the DA's office, confirmed Gibbons received the letter.

"At this time, Gen. Gibbons will review it and make a determination, probably some time next week, on what action to take," she said.

In his letter, Kuhn cited a spreadsheet produced by John Harvey, a recent write-in candidate for sheriff. Using a database of driver's license information from across the state, Harvey found 156 people with addresses in Tennessee counties outside of Shelby who voted in early voting in the recent Shelby election.

In addition, he found five voters who appeared to be registered in both Shelby and Fayette counties.

Last month, a Nesbit man was charged by a Shelby County grand jury with voting twice -- once in Mississippi and once in Tennessee -- in the 2004 presidential election.

Kuhn wrote that he hoped Gibbons would "continue to vehemently prosecute those citizens who use a multiple franchise to invalidate the integrity of our Shelby County Elections."

"Should your investigation reveal any evidence of nonresidents voting in our Shelby County elections, we would hope that they would be prosecuted to the

fullest extent permissible under Tennessee law."

Four sue over vote outcome

Democrats claim irregularities, seek new elections in November

By Lawrence Buser

Contact

August 15, 2006

Four Democratic candidates who lost by narrow margins in races for clerks' positions filed suit Monday asking a judge to declare the Aug. 3 election void because of irregularities and to declare them winners or order new elections in November.

Juvenile Court Clerk candidate Shep Wilbun and Probate Court Clerk candidate Sondra Becton are plaintiffs in a suit filed by attorney Mark Allen.

Criminal Court Clerk candidate Vernon Johnson and Shelby County Clerk candidate Otis Jackson are plaintiffs in a suit filed by attorney Javier 'Jay' Bailey.

Both suits were filed near closing time Monday afternoon in Chancery Court. No hearing date has been set.

The suits allege a wide variety of irregularities, including voting by nonresidents, improper vote counting, voter intimidation, security breaches and mishandling of voting machines.

"There is substantial evidence to indicate that the integrity of the election process has been compromised so as to justify judicial intervention," Bailey said in his suit.

Allen said the election "should be declared null and void since fraud or illegality so permeated the conduct of the election as to render it incurably uncertain."

He alleges in the suit that 356 people voted twice during the early voting period and that another 3,000 voters from early voting could not be verified as being properly registered.

The lawsuits say "unofficial" and "preliminary" returns show:

In a bid to regain his old job, Wilbun, a former County Commissioner, lost to

017319

Juvenile Court Clerk Steve Stamson, 73,954 votes to 73,165. Becton, running against her former boss, lost to incumbent Probate Court Clerk Chris Thomas, 71,654 to 71,050.

Johnson, a bail bondsman, lost to Criminal Court Clerk Bill Key, 68,491 to 67,698. Jackson, a management consultant and former basketball star, lost to Shelby County Clerk administrative assistant Debbie Stamson, 72,123 to 71,645.

Figures provided to The Commercial Appeal by the Shelby County Election Commission, which are said to represent all 279 voting precincts, showed the races to be even closer than the totals reflected in the suits.

The final totals showed Steve Stamson winning by 313 votes over Wilbur, Thomas by 445 over Becton, Key by 621 over Johnson and Debbie Stamson by 303 over Jackson.

At its regular scheduled monthly meeting, the Election Commission certified all final vote totals from the Aug. 3 elections late Monday afternoon.

Greg Duckett, chairman of the election commission, said after the meeting that the commission had not received any notice about the lawsuit.

Cross-check Dist. 29 voters, Roland asks

Ophelia Ford likely will be seated in legislature while questions are resolved

By Richard Locker

Contact

January 7, 2006

NASHVILLE -- Attorneys for Republican Terry Roland have asked state officials to cross-check voters in the contested Senate District 29 election with death certificates and a national Social Security database.

Because of that request and a TBI investigation of the election expected to be finished this month, the chairman of a Senate committee hearing Roland's contest of the election said Friday the panel will likely be unable to settle the issue before the Tennessee legislature convenes Tuesday.

That means the declared winner of the election, Democrat Ophelia Ford, will be provisionally seated Tuesday unless a majority of the Senate votes against her. The state Constitution gives the Senate sole authority to seat its members.

Ford, D-Memphis, defeated Roland, a Millington businessman, by 13 votes in the Sept. 15 election. But Roland contested the results, charging that at least 68 votes were improperly or illegally cast, including at least two cast in the names of people who died weeks earlier.

A Senate committee of three Democrats and three Republicans was appointed to investigate the election and make a recommendation to the full Senate on whether to seat Ford, seat Roland, or call a new election.

After news of the two dead "voters" surfaced last month, Dist. Atty. Gen. Bill Gibbons asked the TBI to investigate. The chairman of the Senate committee, Sen. Mike Williams, said Friday he will ask the panel to delay its recommendation so it can deal with the new requests received from Roland's attorneys late Thursday and to await results of the TBI probe.

"I don't want the committee to make a recommendation for or against anyone without as

Mark
Humphrey/Associated
Press file photo

Although Democrat Ophelia Ford was sworn in as District 29 senator in September, a probe of "dead" people voting in the race against Republican Terry Roland won't be over before the Senate convenes Tuesday.

much information as possible," said Williams, R-Maynardville.

"The last correspondence we got from the Roland attorneys is to get a national Social Security database for a cross-check with voters. The state election coordinator says it would take at least two weeks to do that but I think this is of such importance that I would be in favor of doing that. And TBI says it thinks it can have a report to us by mid-January."

Although the committee may wait, Senate Republicans could challenge Ford's provisional seating Tuesday -- reportedly out of a concern that once seated, the state Constitution requires a two-thirds Senate vote to remove a member. The GOP has a 17-16 edge over Democrats in the Senate -- a majority required to sustain an election contest but short of the two-thirds required to oust a sitting member.

There are conflicting legal opinions on the issue.

Meantime, Shelby County Democrats said Friday they plan to file suit next week in Chancery Court to block a Roland move to invalidate 9 or 10 votes in the special election because voters failed to sign ballot applications.

The county Democratic Party leadership voted to retain attorney Jay Bailey, who said he will work free of charge. Invalidating the ballots would wrongly disfranchise voters for making simple mistakes, Bailey said.

"I do hope my vote will count," said voter Louvenia Hampton, 75, who appeared alongside party officials at an afternoon news conference. Hampton said she believes a poll worker failed to point out that she needed to sign her ballot application.

Absent poll worker got election-day pay

Yet 'signed' forms of 2 dead voters in precinct under probe

By Marc Perrusquia

Contact

January 15, 2006

A Memphis poll worker was paid \$95 for helping in the Sept. 15 election, yet records show she was out of town, and her supervisor says she never came to her assigned polling place.

Verline Mayo

The whereabouts of poll worker Vatricia A. McKinney are critical in ways that involve more than just taxpayer money.

McKinney's initials appear on ballot forms cast in the names of two dead voters -- records at the center of a voter fraud probe that could void Ophelia Ford's razor-slim state Senate victory.

McKinney's signature also appears on a form certifying voting machine totals at North Memphis' Precinct 27-1, where someone cast votes in the names of two elderly voters who had died weeks before the election.

However, McKinney, a public housing official, actually was in New York that Election Day on a taxpayer-funded trip, The Commercial Appeal has found.

Her sister -- untrained as a poll worker -- secretly filled in for her, in apparent violation of state election law.

McKinney, 52, and her sister, Mary L. McClatcher, 51, declined comment.

Precisely how it came that someone signed the names of two deceased voters into the precinct poll book that day remains unknown.

The precinct's ballot safeguards seem to have failed, and at different points in the day each of its three election judges left their posts.

"There were some unusual things going on," agreed Verline Mayo, the poll officer in charge at Precinct 27-1.

The precinct's dead voter scandal has triggered a criminal probe and has brought the

017323

Tennessee state Senate to the cusp of voiding Democrat Ford's narrow win over Republican challenger Terry Roland.

Ford won by 13 votes in a race in which nearly 8,500 ballots were cast.

Ford has been provisionally seated, yet senators say they will consider voiding the Dist. 29 election when the Tennessee Bureau of Investigation completes its probe.

Roland claims the election was plagued by widespread irregularities, and the controversy escalated last month after The Commercial Appeal found that ballots were cast in the names of two dead voters.

Joe L. Light, 70, died Aug. 6, and Archie L. Kirkwood, 72, died Aug. 30, yet signatures of both were written Sept. 15 into the poll book, the alphabetic roster of a precinct's registered voters kept on site on Election Day.

Records show Mayo, sisters McKinney and McClatcher and Kirkwood all once lived in the now-razed Oates Manor public housing development. There, McKinney and McClatcher had lived in an apartment next door to Kirkwood.

Ballot applications -- forms voters fill out before entering the voting booth -- suggest the Kirkwood and Light votes came back to back.

Ballot application no. 012028 was filled out in Kirkwood's name, and application no. 012029 in Light's name.

Each application lists the initials "VAM" -- Vetricia Ann McKinney -- as a poll worker processing the ballots. Poll workers are the army of citizen volunteers who get a modest day's pay to man voting sites.

Altogether, the "VAM" initials appear on ballot applications for 13 of the 31 votes cast at the precinct on Election Day, records examined by the newspaper show. A series of other records indicate a key role by McKinney at the poll that day:

McKinney's full signature appears on the precinct's Certificate of Results, a return sheet on which poll workers record voting machine totals, seal numbers and protective counter numbers designed to guarantee an election's integrity.

Thirteen days after the election, McKinney signed and cashed a \$95 check from Shelby County government's election payroll for her work.

Yet the day of the Sept. 15 election, McKinney was in New York on a five-day bus tour.

Public records maintained by Memphis Housing Authority show McKinney was among some 20 people who took the Sept. 11-16 tour as part of MHA's leadership retreat.

017324

McKinney is a public housing resident who also serves as the tenant representative on MHA's policy-making Board of Commissioners. Records show MHA paid McKinney a \$282 travel advance on Sept. 9. Overall, MHA estimates it spent \$673 to send McKinney on the retreat that included visiting lawmakers in Washington, touring affordable housing sites in Baltimore, and sightseeing in New York.

MHA special investigator Tony Olden, a chaperone on the trip, said he was in New York with McKinney and the others on Sept. 15 as they toured Rockefeller Center and Broadway. Olden said the group finally rolled back into Memphis about 10:30 p.m. on Sept. 16, the day after the election.

Asked whether McKinney ever made it to the Precinct 27-1 polling place on Election Day, officer in charge Mayo said, "No, she didn't come."

Instead, McKinney's sister came. Mayo identified that sister as Mary McClatcher, a FedEx employee who keeps an apartment in Frayser.

"Her sister worked in her place at the last minute," said Mayo. McClatcher wasn't paid, but Mayo said she believes McKinney gave her sister her pay.

State law allows a polling site election officer to fill a vacancy on the spot, provided the substitute is given an oath to uphold the law, and the move is reported to the local Election Commission.

That didn't happen, said Shelby County elections administrator James Johnson, who heads the Election Commission's professional staff. Johnson said he's never heard of McClatcher, and her name isn't among the county's roster of poll workers.

"They're supposed to call and let us know who that person is," Johnson said. "I don't have any records that say (Mayo called in the replacement.) Because all records indicate that Vetricia McKinney signed for this information ... Signed in the morning. Signed in the evening."

Mayo, 68, didn't say why she didn't report the substitution, but former congressman Harold Ford Sr., who has been conducting his own review of the irregularities, said Mayo only reluctantly told him of the substitution.

"She said there was something that was wrong. There was a person who was supposed to work who did not work and (she) didn't report that to the Election Commission."

Election Commission Chairman Greg Duckett has said he believes a poll worker or someone with specialized election knowledge forged the dead voter ballots -- a contention Mayo rejects. She told a reporter it would have been "easy" for two people to have come in off the street and posed as Light and Kirkwood.

"See the thing about it, (voting) was so slow that day, and I left," Mayo said. She said

she went to vote in a different precinct, and in that time less-experienced poll workers could have been fooled.

Both sisters declined interviews.

"I have nothing to tell you. Talk to the TBI," McKinney said.

Said McClatcher: "Sir, whatever you need to know, you need to talk to the Election Commission. I have nothing to say."

Panel voids Ford's election

By John Rodgers, jrodgers@nashvillecitypaper.com
April 14, 2006

A special state Senate panel voted Thursday to recommend voiding Sen. Ophelia Ford's election, concluding its six-month-long investigation.

The committee, which consisted of three Republicans and three Democrats, voted 4-1 to void Ford's election.

Two Democrats, Minority Leader Jim Kyle (D-Memphis) and Roy Herron (D-Dresden), voted with two Republicans to void Ford's win while Sen. Joe Haynes (D-Nashville) was the only Senator voting to uphold it. Sen. Jeff Miller (R-Cleveland) was not present for the final tally.

"The election needed to be overturned because of all of the mistakes and the fraud and the illegality that did go on," said Senate Majority Leader Ron Ramsey (R-Blountville), who has been his party's point man on voiding Ford's contested election.

The panel will now send that report to the full Senate for a final vote to possibly oust Ford. But Ford's attorney, David Cocke, said he would move to go back to federal court, likely next week, as a result of the Senate panel's action.

Ford (D-Memphis) defeated Republican Terry Roland by 13 votes in a September special election for District 29. Ford replaced her brother, John Ford, who resigned from his seat after being indicted on corruption charges in the Tennessee Waltz sting.

Ophelia Ford was present at the first two hours of the hearing, but left prior to the start of the second half of the proceedings.

Haynes said no evidence of illegal or improper votes exists, making voiding the election unnecessary.

"I'm not willing to take away votes of the 29th District based on inferences," Haynes said. "I think that's wrong, and my conscience won't let me do it."

The "inferences" Haynes referenced include questionable votes from two people whose voter registrations were connected to business addresses.

Haynes said he doesn't think questionable ballots should be added to the 12 ballots the committee appeared to agree were improper.

"We think the burden of proof to set aside an election is a lot more than inference," Cocke said.

The 12 improper ballots the committee agreed upon consisted of two ballots cast with the names of dead people, seven cast by convicted felons, and three cast by people voting from outside the district.

Roland's attorneys were trying to reach 13 or more improper votes to satisfy existing state case law in *Emery v. Robertson County*, which found that an election can be voided if, in this case, 13 or more illegal votes were cast.

In the end, however, the committee never declared there were 13 or more illegal votes. Rather, its members voted to void the election based on another standard in the same case law that allowed nullifying an election if it were "incurably uncertain."

Ophelia Ford attended the first two hours of a legislative panel hearing that recommended voiding her election of a state Senate seat. Photo by Josh Anderson.

"And that's one of the standards the court outlined in *Emery v. Robertson County*," said the committee's special counsel, former state Court of Appeals judge Ben Cantrell.

Roland's attorneys had challenged the residency addresses of 44 Memphis-based voters, with the Senate sending affidavits to verify their residences. Based on the responses, Cantrell confirmed, however, that just one person voted outside of Senate District 29.

Cocke, Ford's attorney, said he would move to take the case back to court before a final Senate vote, which would take place Wednesday at the earliest.

In January, federal judge Bernice Donald prohibited the Senate from proceeding in possibly voiding Ford's election until a hearing could take place in Memphis.

After the January hearing, Donald ruled, among other findings, that a voter's constitutional rights must be ensured before an election could be voided.

Cocke said the seven convicted felons who voted "didn't get any due process notice."

Senators will continue Ford vote review

They'll meet in Nashville Tuesday, a day ahead of Memphis court hearing

By Richard Locker

Contact

January 20, 2006

NASHVILLE -- A Senate committee is resuming its probe of Shelby County's Senate District 29 election after the Republican push to expel Sen. Ophelia Ford was halted by a Memphis federal judge.

The special committee plans to meet here Tuesday to hear final arguments by lawyers for Ford and her Republican opponent, Millington businessman Terry Roland. It will also review a report by the state election coordinator comparing Social Security numbers of voters in the special Sept. 15 election and deceased people.

The committee chairman, Sen. Micheal Williams, R-Maynardville, said Thursday he plans to ask the bipartisan panel to vote on its recommendation to the full Senate on whether to seat Ford or void the election. Roland's formal contest of the election, which initiated the committee's review, asks that the election be vacated.

Williams said he does not expect a separate TBI investigation to be finished by next week. But the TBI probe requested by Shelby County Dist. Atty. Gen. Bill Gibbons is focused on possible criminal activity in the election -- particularly the use of two dead people's identities to cast two votes -- and not on who won or lost and other issues the committee is examining.

Fallout from U.S. Dist. Judge Bernice Donald's restraining order late Wednesday intensified in Nashville Thursday before the legislature adjourned for the weekend. Senate Republican Leader Ron Ramsey deferred indefinitely his resolution to void the election and expel Ford when the measure was called up on the Senate's agenda.

Its passage had been a virtual certainty until Ford's attorneys filed a federal lawsuit in Memphis Wednesday afternoon to block it. "I'm surprised and disappointed, but that's part of it," Ramsey said.

The restraining order bars the Senate from affirming or voiding the election and removing Ford until at least next Wednesday, when Donald holds a hearing on the due process, voting rights and equal protection issues raised in Ford's lawsuit.

017329

A key issue in the suit is the Senate Republican majority's push to approve the resolution *before* the investigating committee completes its work. After failing to persuade his party leaders to wait on the committee, Williams halted the panel's work on Tuesday, saying "there's no need" to continue if the Senate was going to void the election before it submitted its findings.

But with the resolution on hold, Williams announced the committee will meet Tuesday to conclude its work and write a report to the full Senate -- in advance of Wednesday morning's court hearing in Memphis.

"We want to hear the final arguments of both sides and then vote our recommendation," Williams said.

Also Thursday, members of the Black Caucus rallied in support of Ford and against the Senate Republicans' planned move.

"We are profoundly disappointed in the Senate's action," said caucus chairman Rep. Johnny Shaw, D-Bolivar. "It was the Senate that asked for the investigation of the election. We're not making a racial issue out of this; we're saying the process needs to work. The TBI report isn't in yet."

Ford was present for both the Senate session and an earlier Democratic Caucus meeting to explain the restraining order to its members. Said she: "I am very pleased about the court order. I have no further comment to the media."

There was concern among senators about whether they are to appear in Donald's court Wednesday. Ford's complaint listed as defendants all 32 members of the Senate other than herself.

Sen. Mark Norris, R-Collierville, said that as a Memphis lawyer and defendant, he feels obligated to attend and argued against the Senate's plan to reconvene at 10 a.m. Wednesday -- an hour and 15 minutes after the Memphis hearing begins.

Poll worker now faults machines in dead vote

By Marc Perrusquia

Contact

January 24, 2006

In a new twist to Shelby County's dead voter scandal, the officer in charge of a North Memphis voting precinct now says she encountered late-night voting machine troubles.

Verline Mayo gave the account Monday while defending her poll workers at North Memphis' Precinct 27-1, where someone used the names of two dead voters to cast ballots in the disputed Sept. 15 state Senate election.

A majority of senators, alleging fraud and other irregularities, want to void the District 29 election narrowly won by Ophelia Ford.

In a series of interviews since last month, Mayo has said she believes any fraud was committed by people posing as voters -- not by poll workers as Election Commission Chairman Greg Duckett says he suspects.

On Monday, Mayo added to her account, saying for the first time that she had difficulties getting her voting machines to tally, a problem that she says caused Precinct 27-1 to report returns as much as an hour late.

During that time, poll workers may have innocently filled in blanks on paper ballot applications, she said.

"There's no record that happened," said James Johnson, Shelby County elections administrator. Johnson said Precinct 27-1 didn't report late.

He said he doesn't know why Mayo is now saying that, but said her accounts are beginning to sound "like a cover story."

Records show someone signed the names of Joe L. Light, 70, and Archie L. Kirkwood, 72 -- both of whom died weeks before the Sept. 15 election -- to vote at Precinct 27-1.

An investigation by The Commercial Appeal also found that poll worker Vatricia A. McKinney, 52, whose initials appear on ballot applications for both dead voters, actually was in New York that day. Though McKinney was paid \$95, her sister, Mary L. McClatcher, 51, secretly worked in her place.

017331

In television interviews Monday, a tearful McKinney admitted she didn't work the polls that day but said she'd told Mayo ahead of time she wouldn't be there. Meantime, McClatcher told Fox News 13 she signed her sister's name and initials on election documents at Mayo's direction.

Mayo confirmed that she told McClatcher to sign in as McKinney, who was to give her pay to her sister. Doing otherwise would have required McClatcher to wait several weeks to get paid, Mayo said.

Mayo, 68, a former public housing leader who for years has been Precinct 27-1's officer in charge, then gave this explanation for the dead voter ballots:

Poll workers are supposed to initial ballot applications just before voters enter the booth, but workers may have waited until the end of the day. When poll workers finally initialed the applications, they may not have initialed the correct ones.

Mayo offered that explanation because several poll workers -- including McClatcher -- knew deceased voter Kirkwood and would not have been fooled by someone posing as her.

Mayo said poll workers had extra time to fill in blanks because of problems getting the two voting machines to tabulate.

Mayo said she called Election Commission inspector Eddie Hayes to come help fix the problem -- an allegation Hayes denies.

"She's changing her story every three days, it seems to me," said Hayes, who earns a living as a funeral director for the Ford Funeral Home, owned by relatives of Ophelia Ford.

Hayes said he's worked as an Election Day inspector for about 20 years, long before he went to work for the Ford Funeral Home.

The Election Commission's Johnson said there's no records of any vote tally delay at Precinct 27-1, and poll workers aren't supposed to initial ballot applications after the fact. "That's not the way they're trained."

Ford Sr. sees GOP hand in dead vote

Republican leader calls former congressman's claim 'absurd'

By Marc Perrusquia
December 16, 2005

As a Shelby County voter fraud investigation lurches forward, former congressman Harold Ford Sr. isn't waiting for answers.

Ford said Thursday he's opened his own investigation into allegations that two dead voters cast ballots in the September state Senate race that his sister, Ophelia Ford, won by 13 votes.

Ford said he's not prepared to make any accusations, yet suggested evidence of any skulduggery will lead to Republicans, not his own Democratic Party.

"It's gotten to (where people are saying), 'Hey, we're out here voting dead people.' It is clear that is not the case. We know that for a fact," said Ford.

"We're going to get all the facts. The other side's got all the information, and I think that they are well aware of what took place and what went on."

Shelby County Republican Party Chairman Bill Giannini called Ford's statements "absurd."

"Tell Harold Ford Sr. that the folks at the Flat Earth Society say hello," Giannini said.

"All we said from day one is we wanted this (tight election) to be looked at. And for Harold Ford Sr. to get involved in it at this point is certainly puzzling."

Emotions have flared since Ophelia Ford won a squeaker Sept. 15 over Republican challenger Terry Roland for the Dist. 29 Senate seat vacated by another Ford sibling. John Ford resigned in May after his indictment on bribery charges.

Contesting the results, Roland is asking the Senate to overturn the election, alleging widespread voting irregularities.

Meantime, an investigation by The Commercial Appeal found that the names of two elderly voters who died weeks before the election were used to cast ballots in a North Memphis precinct.

Requesting a criminal probe, Shelby County Election Commission Chairman Greg Duckett said he believes as many as five ballots may have been forged in heavily

017333

Democratic Precinct 27-1. Those ballots include the two cast in the names of dead voters as well as three others, he said.

Duckett said authorities are suspicious, in part, because ballot applications for all five votes appear to contain similar handwriting.

Duckett said at a Wednesday press conference he suspects the culprit is a poll worker or someone with specialized election knowledge, a suspicion advanced Thursday by longtime commissioner O.C. Pleasant.

"It took several persons involved to make happen what did happen," Pleasant said. "I don't know where it will lead to."

Citing the criminal probe, election officials have declined to release the names of poll workers who manned the Precinct 27-1 polling place at Fire Station No. 6, at 924 Thomas.

Verline Mayo, the official in charge of the polling place, said she had no clue how votes were registered for Joe L. Light, 70, and Archie L. Kirkwood, 72, both of whom died weeks before the election.

"I don't know how that could have happened," said Mayo, 68, a longtime North Memphis resident who has worked as an Election Day poll worker since 1964 and who has overseen Precinct 27-1 for several years.

"We've got a pretty good clean record up there."

Speaking in her North Memphis home, Mayo said she didn't have all the names of the poll workers who worked with her on Election Day.

Dist. Atty. Gen. Bill Gibbons said he called the Tennessee Bureau of Investigation on Tuesday to open a criminal probe but said the investigation likely won't start in earnest until next week.

Not waiting around, Ford Sr. said he's already made several calls and intends to interview all 32 of the living voters who cast ballots in Precinct 27-1. Including ballots of the two dead voters, 34 votes were cast in the precinct, and 32 of them were for Ophelia Ford.

"We want the truth to come out," said Ford, 60, a lobbyist who served in Congress until 1997. His son, Rep. Harold Ford Jr., succeeded him.

Ford Sr. first called the newspaper on Wednesday to make it clear that his family business, N.J. Ford & Sons Funeral Home, didn't bury Light or Kirkwood. On Thursday, Ford confirmed that J.E. Herndon, the funeral home operator who buried

Kirkwood, also works for the Ford Funeral Home as an embalmer.

"This was an inside job," he said. "Why would Ophelia Ford want to get into the Election Commission and vote the dead?"

Despite his own suspicions, Ford said he believes fraud may be limited to the ballots of the two dead voters. The other three ballot applications with similar handwriting likely involved a poll worker assisting illiterate voters, he said.

Republicans invested a lot of money in North Memphis' Democratic precincts in advance of the election, Ford said, indicating that that's the trail to follow.

"I see the trend where this is going to be headed," he said, "and it's not coming to us."

Joe Ford suggests independent election probe

County colleagues rebuff idea of hiring investigator

By Michael Erskine

Contact

December 20, 2005

Shelby County Commissioner Joe Ford said Monday the commission should look at hiring an independent investigator to probe voting irregularities in his sister's controversial state Senate win.

Joe Ford

Ford, who made his suggestion during the commission's regular meeting, said he had no plans to introduce such a proposal himself.

"I just wanted to bring that to the table," he said, citing the emotional strain the controversy has put on his family and the need to resolve it quickly.

Dist. Atty. Gen. Bill Gibbons has asked the Tennessee Bureau of Investigation to conduct a criminal probe into the September special election to fill the Dist. 29 state Senate seat.

Ophelia Ford, Joe Ford's sister, was victorious by just 13 votes in winning the seat vacated by another sibling, John Ford, who resigned in May following his indictment on bribery charges.

An investigation by The Commercial Appeal found the names of two voters who died weeks before the election were used to cast ballots in a heavily Democratic North Memphis precinct.

Joe Ford's comments Monday came during a discussion about the pending purchase of new voting machines by the Election Commission.

Steven J. Mulroy, a law professor and member of the Democracy Project, a coalition of local citizens groups, urged commissioners to buy machines that use a "voter-verified paper audit trail." Such a feature would allow voters to see a paper record of their choices before they finish casting their ballots.

Election officials have not decided whether to invest in such a feature, but Ford said it sounded like a good idea to him, and launched into his comments about hiring an investigator to probe the recent election.

Ford's fellow commissioners did not respond during the meeting, but many were clearly

surprised by his suggestion.

Three commissioners interviewed after the meeting all said they had no intention of intervening in a matter that should be left to criminal investigators.

"It will be taken care of, and I don't think the commission needs to get into that," said Commissioner Joyce Avery.

Chairman Tom Moss and Commissioner Deidre Malone echoed Avery's sentiments.

"I just think we need to be aware of it, and we need to be updated on it. And I think that's what our role should be," Malone said.

Moss said he did not expect the commission would have much interest in hiring an investigator.

Ford later said in an interview he may ask Moss to put the item on the commission's agenda after the holidays if the matter hasn't been resolved.

He said he knows the idea of spending taxpayers' money to hire another investigator would not go over too well with his colleagues.

"Will it happen? Probably not," Ford said, adding, "We want to just be treated fairly."

Roland to ask to void election

Senate panel to meet today about District 29 balloting

By Richard Locker
December 21, 2005

NASHVILLE -- Lawyers for Republican Terry Roland will ask a state Senate committee today to recommend the Senate District 29 election be declared void because "there were widespread violations of election laws," they said in a new filing.

Democrat Ophelia Ford was declared the winner by 13 votes in the special Sept. 15 election to replace her brother, former senator John Ford. But Republicans contend in a Tuesday filing that it should be voided because "more than 13 illegal votes were counted."

The six-member committee of Senate leaders, three Democrats and three Republicans, meets here at 9 a.m. today to try to settle the contest and report its recommendations to the Senate.

Ultimately, the 33-member Senate must decide whether to seat Ford when it convenes Jan. 10 or declare the seat vacant. The Shelby County Commission would appoint an interim senator until a new election.

The Senate also would decide whether to order a special election or wait until the regular election, when the District 29 seat is on the ballot for a full four-year term.

In their latest filing, Roland's lawyers took issue with the conclusion last week by state Election Coordinator Brook Thompson that only six or seven improper or illegal votes have been confirmed, including two cast in the names of people who died weeks before the election.

Thompson's report to the committee concluded that election law is so complex on what constitutes legal residence that it would take testimony from and investigation of each of 40 voters that Republicans claim do not live at the address where they are registered to vote.

"We think the evidence is pretty clear that the election should be declared void," GOP attorney Maclin Davis of Nashville said. "But in order for us to ask that Terry Roland be declared the winner, we would have to prove that 14 votes for Ms. Ford were illegal. It's very difficult to prove who somebody voted for."

The only Shelby member of the committee, Senate Democratic Leader Jim Kyle, said

Tuesday he doesn't know what the panel will do today.

"I think if we can resolve it, we will. We have to file a report to the Senate by Jan. 10 when we go into session and that is the first order of business."

Other members are Republicans Michael Williams, Maynardville; Jeff Miller, Cleveland; Ron Ramsey, Blountville, and Democrats Roy Herron, Dresden, and Joe Haynes, Nashville.

AG's Office Investigating 2004 Hidalgo County Election

March 17, 2006, 03:34 PM EST

Reported by Ray Pedraza

The Texas Attorney General's Office is investigating 12 Texas counties, including Hidalgo, over allegations of fraud in a recent democratic primary.

Could politiqueras have changed the outcome of a big race?

On Thursday, there was a swarm of activity at the Hidalgo County elections department as workers sorted through three thousand mail-in ballots from the 2004 democratic primary.

Elections Administrator Teresa Navarro says Texas Attorney General Greg Abbot has requested the ballots because of allegations of fraud.

"Basically what we're doing to help the Attorney General's Office is we're collecting all of the mail-in ballot information, and making them copies since the originals cannot be released. And we're going to ship them to the attorney general's office for their review," explained Navarro.

The request to her office came through an official document obtained by Action 4 News.

According to the memo, the AG's office received "allegations of improprieties with an unknown number of absentee mail-in ballots in that election".

And Navarro says the same request is being made from 11 other Texas counties.

"So that could only lead you to believe that it's probably not a local race, it's probably a federal race that they are looking at," said Navarro.

So, what candidate is making a fuss? Navarro says she can't release that but she can tell us what will happen if there is evidence to support the allegations.

"They will be able to conduct the investigation to determine if they're able to find any one person who did tamper with the mail-in ballot that belonged to another voter. And as a result of that, you could see indictments."

Navarro says Abbot has been very aggressive in pursuing complaints about politiqueras and mail-in ballots. She says this is just more proof of that.

State targets election fraud

Attorney general calls problem an epidemic in Texas

12:00 AM CST on Sunday, January 29, 2006

By GROMER JEFFERS JR. / The Dallas Morning News

Attorney General Greg Abbott has directed his office to work with law enforcement officials in 48 counties to stamp out voter fraud.

In announcing the effort last week, Mr. Abbott called voter fraud a Texas epidemic and said the "integrity of our democratic election process must be protected."

The initiative includes counties with populations over 100,000, including Dallas County. And it will focus on 14 counties where Mr. Abbott has previously investigated or prosecuted violations of the state's election code. Dallas County is not among those.

"We're trying to get the word out that this has been a problem in our state," said Tom Kelley, a spokesman for Mr. Abbott.

Election and law enforcement officials from various counties had not heard about Mr. Abbott's initiative or from his office when the plan was announced Wednesday.

"I don't have any firsthand knowledge of this," said Dallas County Elections Administrator Bruce Sherbet. "We have not been contacted by anybody."

The Dallas County district attorney's public integrity unit had also not been officially informed of the plan.

After sporadic issues involving potential voter fraud, Dallas County has not had a major case of election code abuse since 2003.

That was the year the Legislature, on the strength of a push from the Dallas area, passed legislation setting guidelines for mail and absentee voting. The guidelines include a requirement that those conducting absentee ballot campaigns must disclose certain information if they handle a ballot or application, including their names.

"We haven't had a single incident come up since 2003," Mr. Sherbet said.

During the last legislative session in Austin, Republican lawmakers pushed election reform measures, including a failed bill that would have required voters to present a photo ID to cast a ballot.

State Rep. Rafael Anchía, D-Dallas, said he supports Mr. Abbott's efforts, but he is also concerned about voter suppression and intimidation.

"Cleaning up elections is good," he said. "But we need to make sure that we take a comprehensive view of those other problems that undermine elections."

Democrats say AG illegally targeting minority, elderly voters

09/21/2006

By JEFF CARLTON / Associated Press

The state attorney general is using a 2003 law about mail-in ballots to intimidate elderly, disabled and minority voters who typically favor Democrats, according to a civil lawsuit filed Thursday by the Texas Democratic Party.

The lawsuit aims to overturn parts of the Texas Election Code that criminalize people who help voters with their mail-in ballots.

The defendants are Secretary of State Roger Williams and Texas Attorney General Greg Abbott, a pair of Republicans accused by Democrats of selectively targeting blacks, Hispanics and old people through his voter fraud task force.

The statutes in question make it illegal for anyone other than voters to possess their own mail-in ballots. That prevents political parties and community activists from helping voters mail their ballots, a "common practice by individuals, political parties and other organizations ... to maximize voter turnout," the lawsuit reads.

Abbott's voter fraud task force has 13 open cases, all involving Democrats, according to the Texas Democratic Party. Twelve of the 13 defendants are black or Hispanic, and in eight of those cases Abbott prosecuted someone for mailing or delivering someone else's sealed ballot, Democrats said.

"A lot of the cases we are looking at, the ballots have not been tampered with and people have not coerced other people into voting," said Amber Moon, a Texas Democratic Party spokeswoman. "These are community activists trying to help their friends and neighbors vote."

Besides the state Democratic Party, the other plaintiffs are six individuals: five political activists and a 78-year-old wheelchair-bound woman in Fort Worth who needs help voting, including the actual mailing of her ballot, according to the lawsuit.

Texas Solicitor General Ted Cruz, the state's chief appellate lawyer, said the lawsuit has no basis.

017348

"The plaintiffs are a combination of political operatives and individual criminals who have already pleaded guilty to voter fraud," Cruz said in a statement issued by Abbott's office. "We will vigorously defend this baseless lawsuit to ensure that admitted criminals like the plaintiffs will not be able to defraud Texas voters and undermine the integrity of Texas elections."

A spokesman for Williams said the secretary of state will continue to forward allegations of voter fraud to the attorney general.

"Secretary Williams feels it is important that the state takes a tough stance on voter fraud," spokesman Scott Haywood said.

In a statement, Texas Democratic Party Chairman Boyd Richie said Abbott is trying "to create a backdrop of fear and intimidation in certain Texas communities."

"The Texas Democratic Party adamantly opposes real voter fraud, but it is shameful for Greg Abbott to exploit the law to target minority and senior voters," Richie said.

DA drops charges against Brand Jr.

April 13, 2006

Marc B. Geller and Brittney Booth
Monitor Staff Writers

Guerra: Not enough evidence

EDINBURG — One of the first orders of business for Hidalgo County District Attorney Rene Guerra on Wednesday — the morning after his latest election victory — was to make an unusual courtroom appearance to personally request the dismissal of felony voter fraud charges against two men indicted in connection with last year's McAllen city election.

Judge Rose Guerra Reyna of the 206th state District Court granted the request and dropped the charges of unlawfully buying and selling balloting materials against Othal Brand Jr., 52-year-old son of former McAllen Mayor Othal Brand, and Jose "Joey" Eliseo Lopez, 22. Guerra said he believes a crime was committed, but that there was not enough evidence to prove who was doing the soliciting.

There was enough evidence, though, to still charge Lopez with theft in connection with the purported votes-for-money scheme, Guerra said, alleging Lopez took between \$1,500 and \$20,000 from Brand Jr. for votes Lopez failed to deliver. Lopez pleaded not guilty to that charge when arraigned Wednesday after his other charge was dismissed and was released from jail just before 5:30 p.m. after posting a \$1,000 personal recognizance bond.

Why Brand Jr. is in the clear, if Guerra says there is enough evidence to try Lopez for taking money from the former mayor's son, is a bit fuzzy.

Brand Jr. and Lopez were among nine people indicted in late December following a nearly six-month grand jury investigation into complaints that politiqueras, or paid political operatives, disenfranchised elderly voters in the McAllen election last May. Brand Sr. was in the running to get back his old job at the time.

The former mayor later endorsed Alma R. Garza, one of Guerra's challengers in the Democratic primary election for Hidalgo County district attorney, which Guerra ultimately won in a run-off Tuesday after unofficial results showed him with 55.2 percent of the votes.

Guerra said that requesting to dismiss the charge against Brand Jr. any earlier could have raised questions about the integrity of the District Attorney's Office or even opened Guerra up to political bribery charges if the Brands expressed support for his re-election campaign.

"One of the things that I wanted to do was to make sure that whatever action I took on Othal Brand (Jr.) with this case, it would not be used as a political football for and against me, or for and against my opponent," Guerra said, when asked about the timing of his request to dismiss the charges.

Still, Garza alleges Guerra used politiqueras, including those indicted by the same grand jury that tagged Brand Jr. and Lopez, in his election.

One of those indicted, Elvira Rios, attended Guerra's victory party Tuesday. But Guerra said she did not work for his campaign and that he only recently learned of her history. He said no one indicted in connection with last year's votes-for-money scandal was used for his campaign. He directed the question of why Rios, who is indicted on three misdemeanor counts in connection with last year's alleged voter fraud, attended the party to her.

She hung up on a reporter who called her cell phone.

017345

Brand Jr., Lopez and Rios emerged as central figures in a purported votes-for-money scheme after audio and video recordings surfaced in June. Lopez was heard offering Brand Jr., his father's campaign manager at the time, 400 mail-in ballots for \$4,000.

While Guerra said there is no doubt in his mind that a crime was committed, the audio and video recordings simply don't make it clear enough who was the one soliciting the ballots and who was the one solicited.

"That's the basis for dropping the indictment against both individuals," he said. "It doesn't reflect on the grand jury and that's not my intent."

However, all three of the 12 grand jurors that The Monitor contacted Wednesday said they were "shocked" or "surprised" to learn the voter fraud charges against Lopez and Brand Jr. were dismissed.

"I'm extremely surprised," said grand juror Vicky Guerrero, regional sales manager at Univision Radio. "After reviewing all the evidence for six months, the grand jury as a whole felt that we had enough to hand down the indictment, so I'm pretty shocked."

Grand jurors Ana Verley and Evelyn Escamilla expressed similar sentiments, though they said the final decision whether to proceed with the charges rested squarely with the district attorney.

"We weren't there to judge guilt or innocence," said Verley, the grand jury's forewoman, who is also known locally for her work with Mothers Against Drunk Driving.

"We were strictly there to review the evidence that was presented to us," Verley said.

Brand Jr. said he was confident all along that the evidence would back up his claim that he broke no law.

He maintained all along that he made the recordings at the direction of law enforcement to catch Lopez in the act of proffering mail-in ballots.

"The only time I was concerned was until I was able to document what I had done with the FBI and the Texas Ranger," he said, referring to letters he received from those law enforcement agencies that made it clear he contacted them before making the audio and video recordings.

"Once those letters were in my hands, my concern was over," he said.

Lopez, for his part, has said that he accepted money from Brand Jr., but maintains that he never had access to any ballots and denies he intended to deliver any. Lopez also has asserted that the elder Brand initiated the negotiations for the mail-in ballots and that the younger Brand contacted law enforcement only after Lopez failed to deliver them.

"I'm happy, but there's a part of me that's disappointed," Lopez said about the outcome Wednesday. "God had a plan for me. He had a purpose for me. And what happens when you walk away from God's purpose, you end up doing stupid stuff like this, so I guess this is a wake-up call for me. ...

"I'm praying that the DA will consider my case for deferred probation, being that it's my first offense, and I'm happy about the first dismissal."

Rios' attorney, Michael Garza, said he did not know if his client worked for Guerra, but said he expects Rios will be exonerated of the charges.

"We think the charges are unfounded," he said.

Even though Guerra was careful to not make his request to drop the unlawful vote buying and selling charges until after his grueling race to capture his seventh four-year term, his decision could still be used as fodder for

his opponents.

For now, Garza — who may still seek a recount in Tuesday's run-off, and has until two days after the April 20 vote canvassing to do so — is focused on reports she said she received of voter harassment at polling locations in Edinburg and Alamo on Tuesday. She has already reported the complaints to Hidalgo County Election Administrator Teresa Navarro.

Because of the volatility around the district attorney's race, Navarro requested an inspector from the Texas Secretary of State to monitor polling places, and is now waiting for his official report. Anecdotally, he told Navarro that, for at least this week's election, everything seemed in order.

Voter registrations faked in GOP drive

About 150 forms questioned in Metro, Williamson County

By JESSICA FENDER,
BONNA de la CRUZ
and BRAD SCHRADE
Staff Writers

At least five apparently bogus voter registration forms were submitted to the Metro Nashville election commission by a worker with ties to the Republican National Committee, and up to 150 other registrations have been called into question, The Tennessean has learned.

Election officials in Williamson County said they were probing three to five potentially fraudulent forms that might or might not be related to the Metro cases.

The five Metro forms contain the names, addresses and phone numbers of bona-fide citizens, but the birth dates, Social Security numbers, signatures and some other details are wrong. Four of the citizens told The Tennessean that they did not submit the forms.

The five contain a signature with a surname of Morrison and a first name that is illegible but appears to begin with a "D." Metro staff said the registration forms bearing that signature were submitted in the name of Tennessee Victory 2006, a booster group advocating for GOP candidates in the state. A sixth form also apparently contains bogus information but does not bear a Morrison signature.

"I think it's pretty scary," said Jon Glassmeyer of east Nashville.

He discovered his name had been used when he received a new voter registration card in the mail though he's been registered for 20 years. He first noticed that the birth date was wrong and then that the Social Security number was off, too.

He's never heard of anyone named Morrison.

Mark Tripp, also of east Nashville, said he didn't know about the potential fraud until told about it last night by The Tennessean. The newspaper had obtained copies of his

017348

registration forms — both his older, correct one and the newer one.

"It's disconcerting," Tripp said. "You're all the time hearing about people getting their identity stolen. I work two jobs to support my family, and then to have somebody do that. What are they trying to do?"

Tripp said he did not know anyone with the name Morrison and said no one had permission to sign any registration documents on his behalf.

Some of the forms bearing the Morrison signature also list an address of an Intown Suites in Antioch.

Tennessee Victory 2006 is a joint effort between the state Republican Party and the Republican National Committee.

State Republican Party Executive Director Chris Devaney said that the RNC was running the show at Tennessee Victory in August, when the registrations were apparently collected.

"We try to recruit people who are upstanding citizens and follow the letter of the law and hope they never engage in any kind of activity like that," Devaney said.

Contacted by telephone Thursday evening, RNC spokesman Danny Diaz declined to answer questions about whether RNC officials worked in Tennessee at all.

The potentially fraudulent forms could be the handiwork of a political worker who was paid by the number of new voters registered, said Jon Crisp, chairman of the Nashville-Davidson County Republican Party.

"I think this is more financial fraud, not election fraud," Crisp said.

He said he heard about the 100 to 150 questionable forms earlier this week and did not believe a local GOP volunteer was behind it. Instead, he said, political groups contract with companies that pay people to register voters.

"I think this is someone trying to pump up their numbers," Crisp said. "I don't care if my side did it or the other side did it, it needs to be prosecuted."

Diaz and Devaney de-clined to say how their organizations hire and compensate people

017349

who sign up voters. Neither could say whether a D. Morrison was affiliated with their organizations.

State Election Coordinator Brook Thompson said the strategy behind the fraud was unclear, but that the system's safeguards appeared to have caught it.

"At first blush it does not appear that the problem lies with somebody doing something trying to falsify a vote," Thompson said. "It's more an issue of registration problems. The question is, why would they do that?"

Fraudulently registering to vote is illegal in Tennessee and can bring up to six years in prison and permanent loss of voting rights. The signatures on the Metro forms were made directly under a printed warning that lying on the form is a felony.

The flowing signature of Larry Vance of Bellevue didn't look anything like the much smaller script he used to sign his name on his original voter registration card in 1968. Metro noted discrepancies on the two forms and sent him a letter, his wife, Carol Vance, said.

Brian Belt of Hermitage, a Tennessean copy editor, caught the error himself when a new card arrived in the mail for him bearing a wrong birth date.

The phony forms were submitted to the commission Sept. 6, and residents reported the fraud as early as two weeks ago.

Ray Barrett, Davidson County's elections administrator, said his office had been looking into the matter and planned to tell the state election commission next week. He said findings would move to the district attorney's office for possible criminal prosecution.

After inquiries by The Tennessean, Barrett's office informed both agencies Thursday.

In Williamson County, Elections Administrator Ann Beard said the five or fewer cases were turned over to Thompson's office. Thompson said his staff received the reports within the past two weeks and had asked the district attorney general there to review the cases.

In most cases, Beard's staff caught the discrepancies before new registration cards were mailed out. However, someone illegally tried to register a boy under the age of 18, Beard

said. The teen's mother called to say a voter registration card had arrived for her son.

"It appears to me the applications were brought in by an individual maybe from a group and who had maybe gotten the information off some other form of ID," Beard said. •

12 voter-registration forms may be phony

National GOP official says it hired canvassers

By JESSICA FENDER
Staff Writer

A canvassing group hired by the Republican National Committee is responsible for 12 potentially phony voter-registration forms found in Davidson and Williamson counties, election officials said Friday.

Liberty Consultants also worked in Rutherford County, where the elections administrator said he fielded calls from residents who complained canvassers with the group made them sign a petition before registering, though the 800 forms submitted by the group were legitimate.

Several other Midstate county election commissions reported no contact with the group.

RNC spokesman Danny Diaz confirmed Friday that his organization hired the company to register Tennesseans to vote and said it is monitoring the situation.

"It's a good thing this has been brought to our attention," Diaz said. "If anyone has done any wrongdoing, they should be held responsible."

Liberty Consultants workers were banned from Tennessee Wal-Marts in late August because of the group's partisan nature, namely its connection to former Arizona GOP leader and Christian Coalition activist Nathan Sproul. Sproul denied wrongdoing in 2004 when some of his former workers said they were asked not to register Democrats and reported Democrat forms were thrown away, The Associated Press reported.

Diaz said he did not know personally whether RNC officials knew about Sproul's connection to Liberty Consultants. He could not provide more information.

The state Republican Party had no contact with Liberty Consultants or knowledge of the company's connections, said Chris Devaney, executive director.

"I don't know all the ins and outs, but I don't think they were here too long," Devaney

017352

said. "People involved in these kind of election activities should be punished to the fullest extent of the law."

It appears the canvassers operated in Tennessee between at least early August and early September, according to dates on the forms.

During that time, a woman named Susan Williamson picked up thousands of blank voter-registration forms from the Metro elections commission, though at first she didn't return many, said Joan Dixon, Metro chief elections deputy.

Williamson told Dixon that Liberty Consultants was working for Tennessee Victory 2006, a booster group promoting GOP candidates throughout the state, Dixon said. Tennessee Victory is backed by the RNC and the state GOP.

Williamson used the same Murfreesboro Pike address, that of an Antioch hotel, used by two canvassers who signed the forms.

A signature of Jason Holly was on some Williamson County forms. Another signature of the surname Morrison and an illegible first name, which starts with a "D," was on forms in Davidson and Williamson counties.

The registration forms, six in Metro and six in Williamson County, contain the names, addresses and phone numbers of people, but personal information such as Social Security numbers, signatures and birth dates are incorrect.

Election officials have speculated the forgers may have been paid by the number of signatures they collected.

Phone calls to Susan Williamson were answered by a voice mail message saying her phone was off or out of range. Dixon said she's been unable to contact Williamson for weeks. •

Cross-check Dist. 29 voters, Roland asks

Ophelia Ford likely will be seated in legislature while questions are resolved

By Richard Locker

Contact

January 7, 2006

NASHVILLE -- Attorneys for Republican Terry Roland have asked state officials to cross-check voters in the contested Senate District 29 election with death certificates and a national Social Security database.

Because of that request and a TBI investigation of the election expected to be finished this month, the chairman of a Senate committee hearing Roland's contest of the election said Friday the panel will likely be unable to settle the issue before the Tennessee legislature convenes Tuesday.

That means the declared winner of the election, Democrat Ophelia Ford, will be provisionally seated Tuesday unless a majority of the Senate votes against her. The state Constitution gives the Senate sole authority to seat its members.

Ford, D-Memphis, defeated Roland, a Millington businessman, by 13 votes in the Sept. 15 election. But Roland contested the results, charging that at least 68 votes were improperly or illegally cast, including at least two cast in the names of people who died weeks earlier.

A Senate committee of three Democrats and three Republicans was appointed to investigate the election and make a recommendation to the full Senate on whether to seat Ford, seat Roland, or call a new election.

After news of the two dead "voters" surfaced last month, Dist. Atty. Gen. Bill Gibbons asked the TBI to investigate. The chairman of the Senate committee, Sen. Mike Williams, said Friday he will ask the panel to delay its recommendation so it can deal with the new requests received from Roland's attorneys late Thursday and to await results of the TBI probe.

"I don't want the committee to make a recommendation for or against anyone without as

Mark
Humphrey/Associated
Press file photo

Although Democrat Ophelia Ford was sworn in as District 29 senator in September, a probe of "dead" people voting in the race against Republican Terry Roland won't be over before the Senate convenes Tuesday.

much information as possible," said Williams, R-Maynardville.

"The last correspondence we got from the Roland attorneys is to get a national Social Security database for a cross-check with voters. The state election coordinator says it would take at least two weeks to do that but I think this is of such importance that I would be in favor of doing that. And TBI says it thinks it can have a report to us by mid-January."

Although the committee may wait, Senate Republicans could challenge Ford's provisional seating Tuesday -- reportedly out of a concern that once seated, the state Constitution requires a two-thirds Senate vote to remove a member. The GOP has a 17-16 edge over Democrats in the Senate -- a majority required to sustain an election contest but short of the two-thirds required to oust a sitting member.

There are conflicting legal opinions on the issue.

Meantime, Shelby County Democrats said Friday they plan to file suit next week in Chancery Court to block a Roland move to invalidate 9 or 10 votes in the special election because voters failed to sign ballot applications.

The county Democratic Party leadership voted to retain attorney Jay Bailey, who said he will work free of charge. Invalidating the ballots would wrongly disfranchise voters for making simple mistakes, Bailey said.

"I do hope my vote will count," said voter Louvenia Hampton, 75, who appeared alongside party officials at an afternoon news conference. Hampton said she believes a poll worker failed to point out that she needed to sign her ballot application.

Group supports vote-count lawsuits

By Pamela Perkins

Contact

September 24, 2006

A coalition of civic groups and citizens has formed to build support for Democratic candidates who lost clerks' races by slim margins in the Aug. 3 election and filed lawsuits alleging voting irregularities.

The Coalition for Fair Elections -- which includes the Southern Christian Leadership Conference, Operation Push, the Memphis Baptist Ministerial Association -- held one of its first mobilization rallies at the National Civil Rights Museum Saturday to make certain votes are properly counted.

Juvenile Court Clerk candidate Shep Wilbun, Probate Court Clerk candidate Sondra Becton, Criminal Court Clerk candidate Vernon Johnson and Shelby County Clerk candidate Otis Jackson filed lawsuits asking a judge to declare the election void due to the alleged irregularities that include voting by nonresidents, improper vote counting, voter intimidation, security breaches and mishandling of voting machines.

The suit is set to be heard by a special judge on Oct. 2.

"What we're trying to do here is to start a new movement," Wilbun said. "To ensure that when your vote is counted, it is counted accurately."

The coalition, which also includes some election officials, local community associations and citizens, asked rally attendees to find voters who may have seen suspicious activity at the polls and attend court hearings to support the suing candidates, as well as help with legal fees.

"We feel they have a very good case," said Rev. Ralph White, pastor of Bloomfield Full Gospel Baptist Church in South Memphis. "You can tell your friends. You can tell your families. And we can make a difference."

Elections administrator sends complaints to state office

March 14, 2006

Victoria Hirschberg

The Monitor

McALLEN — It's been a week since the primary, but politics continue as usual.

Since Friday, March 10, Hidalgo County Elections Administrator Teresa Navarro has sent three letters to the Secretary of State regarding questionable incidents. In all three cases, she is requesting assistance and possible investigations by the Attorney General's office.

Complaints usually come after early voting ends, she said, and must be reported to the state office. Much of the noise is about the close county judge race between incumbent Ramon Garcia and Juan de Dios "J.D." Salinas. Unofficial numbers show that Salinas won by about 300 votes.

"I have to answer all complaints," Navarro said. "Sometimes they come towards the end of early voting. That's kind of how it's done. And sometimes (voters) don't know if it's a complaint or not."

In one case, Navarro suspects politiquera swindling after an elderly Sullivan City resident claimed an electioneer took the mail-in ballot with a signature but no marks for candidates. The voter then requested cancellation of the mail-in ballot.

In another matter, Navarro writes that two campaign volunteers wasted her time by alleging hundreds of people voted at the University of Texas-Pan American library when elections records show a different story.

During early voting, Eddie Roux and Ricky Roux — who volunteered for Garcia — collected about 400 signatures from students who claim they voted early at the University of Texas-Pan American library. Eddie Roux said he collected signatures because Elections Department numbers first indicated that 302 people voted Feb. 23, but then only showed 73 voted.

Navarro said there was an initial mistake in tallying the vote, but 73 is correct. Also, she said many of the people who signed are not registered voters.

Eddie Roux said Navarro didn't give him a straight answer on the matter. Also, Roux said it doesn't help that Navarro is the sister of Alma Walzer, who worked as Salinas' campaign manager. Previously, Walzer worked as a Monitor reporter and for Garcia's 2002 campaign.

"We stand by our signatures," Eddie Roux said. "We know we didn't do anything wrong. (Navarro's) numbers were the ones that alerted us. All we did was take a poll."

Navarro said there is no connection between her job as elections administrator and her sister's work.

In another case, Navarro also requested state assistance and possible investigation into Garcia's public claims of voter irregularities and voting machine malfunctions. She also writes that an election worker said he was intimidated after Garcia sent representatives to his home to ask questions about the election.

Garcia denies that allegation and said Navarro is being "overly sensitive."

017357

She maintains that it is protocol and it is upsetting that Garcia has created the appearance of wrongdoing and made statements to the media without telling her.

Garcia has not conceded yet, but has not requested a recount either. As for the results, the Hidalgo County Democratic Chairman Juan Maldonado will canvass, or certify, the vote totals Friday.

Secretary of State Spokesman Scott Haywood said the complaints are most likely under review. If the office deems a further investigation is necessary, the complaint will be forwarded to the Attorney General's Office or a local authority.

Victoria Hirschberg covers Hidalgo County government and general assignments for The Monitor. You can reach her at (956) 683-4466. For this and more on local stories, visit www.themonitor.com.

POLL POSITION

March 05, 2006
James Osborne
The Monitor

Joel Martinez
Clara Casas helps elderly voter Roberto Garza cast his vote on a portable voting machine in the car Friday in front of the Jose Pepe Salinas Center early voting substation in Pharr.

Officials watch politiqueras following voter fraud indictments

Every election you'll find them outside your neighborhood polling station, usually behind the wheel of a large van loaded with the elderly and disabled — voter registration cards in hand.

They like to call themselves "campaign workers," as do the politicians who most make use of their services, but everyone else refers to them as politiqueras, a derivative of the Spanish word "politico," or politician.

For a fee that some estimate to be as high as \$10,000, a politiquera guarantees so many votes (usually 300 to 500). Using a list of registered voters, they will take people, mostly senior citizens, to the polls or offer assistance in filling in their mail-in ballots.

Once the election results are in, the loser, who probably hired a few of them, will inevitably complain about their presence, while the winners, who almost certainly hired a few of them, brush off questions on the subject.

Typically, that's where the dialogue ends.

But in December, a Hidalgo County grand jury brought indictments against 10 people, most of them politiqueras, in connection with alleged voter fraud in the May 2004 city elections in McAllen and La Joya. The McAllen allegations involve the massive number of mail-in ballots received by Ric Godinez, who eventually lost to Mayor Richard Cortez in a runoff.

Many of those ballots were found to be filled out in the same handwriting, a few even in the names of the deceased, and while there's nothing illegal about helping an incapable voter fill out a ballot, failing to identify yourself as assisting is a felony.

How many of those people will actually stand trial remains to be seen — District Attorney Rene Guerra is particularly fickle about prosecuting voter fraud cases — but the indictments have set off a chain reaction of politiquera bashing, most notably from Hidalgo County Democratic Party Chairman Juan Maldonado.

The longtime politico and former mayor of San Juan has since gotten agreements from virtually every Democrat running in Tuesday's primary to pay politiqueras by check instead of cash, which he says will provide greater transparency and cut down on the fraud many officials are now calling endemic to the politiquera system.

Many observers reject such characterizations as woefully overblown, that politiqueras largely provide a valuable service of increasing voter turnout.

Whatever your opinion of politiqueras and what they do, one thing you can be certain of when you walk into the polls on Tuesday is that the politiquera stepping out of the van in front of you will be more closely watched than ever before.

Duval election numbers raise fraud allegations

Web Posted: 03/29/2006 12:00 AM CST

George Zarazua
Express-News Staff Writer

SAN DIEGO — Allegations of voter fraud have resurfaced in Duval County, where records show one of every two voters who cast a ballot in this month's Democratic primary did so away from the polls.

Longtime County Clerk Oscar Garcia Jr. said the number of mail-in ballots in the primary was unusually high, considering that more than half the 5,641 votes cast were done so by absentee voting.

That's 2,958 ballots sent via mail, more than all the early voting in the county's 2004 primary. Then, the number of early votes cast both in person and by mail totaled 2,864.

As a result, voter turnout this March in Duval County was among the best in Texas, with 57 percent of the registered voters participating in an election that drew little interest statewide. Texas averaged a paltry 8 percent turnout for this year's Democratic primary.

Republicans did not have contested primaries in Duval County, infamous for a 1948 election in which enough missing votes were found in a rogue ballot box to propel Lyndon B. Johnson into the U.S. Senate.

Mail-in vote totals for some Texas Counties

Bandera: 19

Bexar: 2,877

Duval: 2,958

Karnes: 296

Lavaca: 61

Zavala: 251

Graphic

017361

Jon West, assistant district attorney for Past mail-in vote scandals this South Texas county, said he called for a state investigation after receiving a handful of complaints from residents about mail-in vote irregularities during the primary.

The residents complained about receiving rejected mail-in ballot forms at their homes, although they were unaware who had sent them in the first place, West said.

"In one instance, it was the lady's deceased father's name that was on the ballot," West said. "We know he didn't fill it out.

"There's something obviously wrong with those cases. How widespread it is, I don't know."

West said the volume of mail-in ballots does raise eyebrows, especially because fraud is more often found to occur during absentee voting in modern elections, in which even sparsely populated counties, such as Duval, rely on electronic voting to determine winners.

Unlike the strict oversight at polling places, election experts argue, the state's laws on absentee voting are weak and prone to abuse.

Texas allows residents to vote by mail if they are 65 or older, disabled or expect to be out of the county during the early voting period and on the day of the election. It also allows some voters in jail to cast ballots via mail.

For Duval County, this isn't the first time mail-in ballots have raised concerns. Although the election fraud incident of 1948 continues to be the most notorious in state politics, voting practices have been legally challenged in the county as recently as six years ago.

A defeated candidate for tax assessor-collector in 2000 challenged the outcome of the race in court, arguing that election officials wrongly dismissed mail-in votes cast for him.

A state district judge in Corpus Christi disagreed, finding several other mail-in ballots for Zaragoza Gutierrez had been cast improperly. The judge dismissed several votes and upheld Carlos J. Montemayor Jr.'s victory.

"The scent of voter fraud" and "illegal conduct which caused illegal votes to be counted" swirled around the pool of mail-in ballots, the Dallas Morning News quoted state District Judge Mike Westergren in his ruling.

Duval County isn't the only county from which the Texas attorney general's office has heard complaints from this year regarding mail-in ballots.

Election officials in Ector County asked state officials to investigate potential voting irregularities there as well.

017362

Mitzi Scheible, the county's assistant elections administrator, said officials began looking into mail-in ballots for the Precinct 4 county commissioner after one of the candidates complained about missing votes, saying "he had men working for him" and "knew how many ballots they had sent in."

Scheible said an initial review of the ballots showed some had similar handwriting and didn't include signatures from those who helped fill them out, as required under state law.

In both the Duval and Ector cases, the Texas secretary of state's office sent a letter to Attorney General Greg Abbott's office requesting an investigation. Abbott's office refused to say if it was investigating.

Alicia G. Saenz, Democratic party chairwoman for Duval County, said she's not surprised with the county's voter turnout. This year's race featured two prominent local races, for county judge and county treasurer. But Saenz said she was surprised with the number of mail-in ballots.

"I know that they do," Saenz said of workers who go around town encouraging voters, even if it has to be through mail-in ballots. "I've heard that. Some people are bothered by it. I'm bothered by it, too."

Rolando Rios, a San Antonio voting rights attorney, said he doesn't believe there is such rampant fraud with absentee voting in Texas to outweigh the need for a system that gives many a voice in the political process.

Election experts also argue that another reason why mail-in ballot fraud isn't unusual is because most culprits go unpunished.

Even the legendary "Duke of Duval," George Parr, whose influence was known to help rig many elections in favor of his supporters, was never convicted of voter fraud.

Parr's dynasty eventually collapsed after the federal government convicted him on income tax evasion charges. He committed suicide in 1975, 25 years after the "Box 13" scandal in 1948.

A black-and-white picture of the ballot box remains on display at the Duval County Museum.

"The slogan in Duval County is 'Vote early, vote often,'" said a woman visiting the museum on a recent afternoon.

AG INVESTIGATING BALLOT ALLEGATIONS

ASSOCIATED PRESS

EDINBURG (AP) - The Texas Attorney General's Office is investigating allegations of wrong doing involving mail-in ballots cast in the 2004 Democratic primary, according to a letter sent to the Hidalgo County Elections Administrator.

"This office has received allegations of improprieties with an unknown number of absentee mail-in ballots in that election," read a March 10 letter from the Attorney General's Office.

It requested a copy of each mail-in ballot application and a copy of each official carrier envelope returned in that election, said Hidalgo County Elections Administrator Teresa Navarro.

Attorney General's spokesman Tom Kelley said the office does not comment on or acknowledge whether investigations are under way.

Texas voter fraud law under fire

Web Posted: 09/17/2006 11:49 PM CDT

Polly Ross Hughes

Express-News Austin Bureau

AUSTIN — Willie Ray, 69, said she thought she was teaching her granddaughter civics lessons in democracy, but instead the two black women in Texarkana ended up with criminal records for voter fraud.

Gloria Meeks of Fort Worth, also 69, said she stepped out of her morning bath last month and screamed. Two voter fraud investigators from Attorney General Greg Abbott's office were peeking in the bathroom window, Meeks said in a sworn statement.

Abbott's office declined to discuss specifics, but said its investigation of Meeks has been "conducted professionally and properly, to the full extent allowed by law."

At issue for the three North Texas women and others investigated by Abbott is a 2003 Texas law that makes it a crime to put other voters' absentee ballots in the mail or deliver them to election officials.

Backers of the law say it's needed to prevent election fraud by paid political operatives who take advantage of the elderly or even steal their votes. Detractors say the law is overly broad, goes too far in criminalizing legitimate political activity and infringes on voters' rights to assistance in casting ballots.

This week, a Washington-based voting rights attorney aligned with Texas Democrats plans to challenge the state law in federal court, arguing it violates the Voting Rights Act and the U.S. Constitution's guarantees of free speech, free association and equal protection.

Democrats complain, and the suit will argue, that Abbott is selectively enforcing the law against Hispanics and blacks to intimidate minority voters and dilute their strength at the polls.

Abbott, a Republican, said he's enforcing state law to root out an "epidemic" of fraud and to prevent "cheaters" from abusing or intimidating the elderly or disabled. For too long, he argues, Texas officials have failed to hold accountable those who undermine the electoral process.

017365

"This has to do with breaking state law, falsifying state documents, registering illegal people to vote, casting votes for people who are dead, casting votes for other people," he said.

Last month, Abbott announced the indictment of a Hispanic Port Lavaca city councilwoman on allegations she falsely registered and encouraged noncitizens to vote and told one voter how to mark a ballot. Also last month, a Corpus Christi woman pleaded guilty to marking ballots for other voters without their consent, a felony. And, in July 2005, another woman pleaded guilty to mailing in a ballot for her dead mother.

Yet of the 13 individuals indicted for voter fraud during Abbott's term, 10 are accused of simply possessing another's absentee ballot for delivery to election officials or to a mailbox, Democrats say. Such activities had been legal until the 2003 law turned them into crimes.

Both Democratic and Republican political activists have traditionally assisted elderly or homebound voters who need help in voting, said attorney J. Gerald Hebert, executive director of the Washington-based Campaign Legal Center, who plans to file the lawsuit on behalf of Democrats.

"Now, merely possessing the mail-in ballot of another person is a misdemeanor. If you do it for several voters, it becomes a felony. It is my view that this is unconstitutional," said Hebert, who headed the Justice Department's voting section of the civil rights division until 1994.

Democrats also complain that of the 13 indicted individuals, 12 are minority women and only one is an Anglo male. Moreover, Abbott's voter fraud indictments include zero Republicans.

"I think it's evident that Abbott's practice of singling out minorities and seniors is a shallow political effort to suppress the votes," said Texas Democratic Party spokeswoman Amber Moon. "It's being done disingenuously. The majority of these cases are well-meaning folks who are simply trying to help their neighbors to vote."

Former state Rep. Steve Wolens, a Democrat from Dallas, authored the 2003 law creating criminal penalties for individuals who knowingly possess or transport another voter's official ballot.

It is an affirmative defense to prosecution, however, if the person assisting the voter is a relative or a registered voter living at the same address, as well as if the individual provides his or her printed name, signature and address on the outside of the envelope carrying the ballot.

Wolens said he is not familiar with Abbott's enforcement of the 2003 law. He said he wrote the law to stop underhanded tactics used against him in his own Democratic primaries and against his wife in her first Dallas mayoral race.

017366

"The problem I had seen was where these vote harvesters would go to old folks homes and bring empty ballots — and vote for the actual voter — and then deliver them in these sacks just like piles of stolen money," he said.

Lawyers from the Texas NAACP and the Mexican American Legal Defense and Educational Fund testified against the law because it targets a form of voting that is traditional among minorities.

Nina Perales, an attorney for MALDEF, said many elderly Hispanic voters prefer to vote absentee because they fear intimidation at the polls. It is common, she said, for trusted women in the community known as *politiqueras* (political women) or *comadres* (friends) to help the elderly apply for absentee ballots and then return to pick up the completed and sealed ballots.

The women sometimes are paid by political candidates as part of a get-out-the-vote effort, Perales said, but she sees nothing wrong with helping homebound people vote.

Rep. Marc Veasey, D-Fort Worth, said blacks and Hispanics could fear voting in the future, especially if investigators visit their homes and ask questions about how they cast their ballots and who helped them.

"You're sending a bad message to people who have already had to go through quite a bit, as far as their voting rights are concerned," he said. "You're basically asking them to go through this again. That's really the sad part."

Before last spring's primary, Abbott launched an education campaign in 44 Texas counties with either a history of voting fraud or a population exceeding 100,000. Hebert plans to argue, however, that Abbott's Power Point presentation uses racial cues, linking blacks to voter fraud.

For instance, one slide alerts authorities that specialty stamps can be a tip-off to fraud. It depicts a postage stamp of a black woman holding a black baby, highlighting the disease sickle cell anemia, a genetic malady that affects blacks.

Tom Kelley, a spokesman for Abbott, said the stamp was included in the presentations because it was among evidence uncovered in one of Abbott's fraud investigations.

Another slide, noting that all rules apply for early voting, shows a photograph of only black people in line to cast ballots.

Kelley said there was "absolutely no reason whatsoever" that the only individuals portrayed voting in the voter fraud package are black. He said the slide itself does not say those pictured committed a wrong.

017367

"It's simply symbolic of what a polling place looks like on voting day or in early voting," said Kelley, adding Abbott's staff found the photo on the Internet while looking through clip art.

Ray, who's a Texarkana city councilwoman, said that because she is getting older, she had hoped during the general election of 2004 to teach her granddaughter, Jamillah Johnson, 30, how to help the homebound — whether it's delivering their ballots or their groceries

She said local officials gave no warning about Wolens' election law change before the general election in 2004, so she took Johnson with her to pick up ballots for mailing.

The two later agreed to plead guilty to handling absentee ballots, paying fines of \$200 each and serving probated sentences of six to eight months.

Another election is coming, and Ray wonders what effect the voter fraud prosecutions will have on the next round of absentee voting.

"A lot of blood has been shed for the rights of people to vote," she said. "I just hope those rights are not taken away or people are frightened so bad they won't vote."

Investigation into fraud allegations begins

August 11, 2006

Kaitlin Bell

Monitor Staff Writer

EDINBURG — A grand jury investigation into the Alton city elections may begin soon, after county elections officials opened a locked ballot box on Thursday to look for evidence of voter fraud.

Armed with a judge's order authorizing her to open the locked ballot box, Elections Administrator Teresa Navarro separated 85 disputed mail-in ballots from various voter tallies, sign-in sheets, unused ballots and other materials mixed in since the May elections.

Sheriff's deputies seized the locked box from Alton City Hall in mid-June, but Navarro said she had held off opening the box until she knew there was a "strong likelihood" a grand jury would investigate the city's elections.

Navarro's office has received more than 20 official complaints, including some from elderly residents alleging the mayor's wife took their mail-in ballots before they had selected a candidate.

The mayor and his nephew, Commissioner Arturo Galvan, Jr., were both behind their chief opponents on Election Day and in early votes cast on electronic machines, but they won all but a handful of the mail-in votes.

Other complaints involved Mayor Salvador Vela, who began a 17th year in office after winning re-election in May, and Commissioner Ricardo Garza, who was not up for re-election this year.

District Attorney Rene Guerra was out of town and declined to make detailed statements about the case Thursday, but he confirmed he told Navarro that he will push for the grand jury to investigate the elections sooner, rather than later.

"Whatever we need to do, we'll do," Guerra said in a short cell-phone interview from El Paso.

017369

A district attorney for 23 years, Guerra has traditionally been reluctant to push forward with elections cases, saying convictions are notoriously difficult to win. But Navarro said she's confident the district attorney is sufficiently pursuing the case.

"It's a priority. He may not have used that word with you," she said, referring to Guerra's statements in the media, "but he knows it's a priority."

This is not the first time Vela or his wife, Sylvia Vela, are embroiled in elections controversies.

Sylvia Vela pleaded no contest in 1994 to charges of tampering with mail-in ballots, and Navarro said she heard a host of informal complaints about the mayor in 2001 that resembled current ones. Those included allegedly improperly contacting the city secretary, who oversees elections, during the voting period, Navarro said.

Dealing with the current complaints is complicated by how Alton stored its elections records this year, Navarro said.

City Secretary Janie Gaytan, who had been in her post a year and had never overseen city elections, inadvertently stored ballots, vote tallies and other materials in a single locked box.

State law requires ballots sealed for 22 months after elections, but Gaytan opened the box whenever she needed to refer to records, Navarro said. She said she suspects no wrongdoing on Gaytan's part, as the city secretary had contacted both her and the Texas Secretary of State with concerns both before and after Election Day.

Gaytan, who was present while Navarro unlocked the ballot box and a staffer recounted the ballots, declined to comment. But she did not appear nervous, smiling and chatting with elections staffers and reporters.

Garza, the city commissioner named in complaints, also declined to comment.

The mayor did not return two calls left on his cell phone Thursday afternoon.

Anita Lugo, who lost to Vela in May and has encouraged citizens to submit complaints to Navarro, welcomed Thursday's events.

"I know it's been very, very disappointing to many of our citizens, who keep asking is anything going to happen?" she said of an investigation into the Velas' purported election-time conduct. "But I'm glad they're finally looking into it."

Navarro predicted her staff would have itemized and inspected the elections materials within a week or two, and that the grand jury would begin its investigation shortly thereafter.

017370

Past investigations in 2001 and 2005 have taken a year and six months, respectively, she said, but predicted this one would go faster as her staff is now more experienced and can more efficiently provide information to the grand jury.

Challenge planned to voter fraud law

By AMAN BATHEJA
STAR-TELEGRAM STAFF WRITER

Gloria Meeks said she was just drying off from her bath when she saw the two men looking into her bathroom window.

She screamed, setting off a confrontation that is expected to land in federal court today with a tangle of allegations about overzealous investigators and racism.

Meeks, 69, of southeast Fort Worth, said the two men were investigators with Texas Attorney General Greg Abbott's office, undermine efforts in the black community to get out the vote.

State officials will say only that Meeks is under criminal investigation.

The Lone Star Project, a group based in Washington, D.C., that supports Democrats, said it plans to file a lawsuit in federal court to use the encounter as an example of what it calls heavy-handed tactics in the state's enforcement of a voter fraud law that violates the U.S. Constitution and the federal Voting Rights Act.

Meeks' lawyer, Gerry Hebert, said his client has been targeted as part of a broader investigation by the attorney general's office of voter fraud in Tarrant County and across the state.

The local allegations apparently stem from a complaint about the possible illegal handling of mail-in ballots in a Fort Worth neighborhood in May.

"We think the law is overly broad," said Hebert, a longtime lawyer for the Texas Democratic Party who is affiliated with the party. "It is penalizing conduct that is a very legitimate activity in a political election."

The attorney general's office has prosecuted just over a dozen people for voter fraud since 2005. All appeared to be support candidates, although the office is investigating cases involving Republican candidates as well, said Angela Hale, a spokeswoman.

Some Democratic activists, however, say Abbott's prosecution is a thinly veiled attempt to frighten elderly people in minority neighborhoods from voting.

"What is apparent is the attorney general is less interested in trying to find real circumstances of voter fraud and what he's doing is protecting the Republican Party," said Matt Angle, the Lone Star group's founder.

Angle said most of the cases prosecuted involved people who were helping elderly people vote by mailing their ballots for them under the 2003 law. He noted that the practice has a long tradition in Fort Worth's African-American neighborhoods, thanks to activists such as the late Izean Davidson.

The law, if fully enforced, could hamper efforts by low-income minorities to vote, said Art Brender, chairman of the Tarrant County Democratic Party, who is a lawyer working on the suit.

"In the minority community, they're trying to stop people from voting absentee," Brender said. "The way they're doing it is through people on technical violations of the election code."

On its Web site, the Lone Star Project has highlighted Meeks' experience as an example of flagrant abuse by Abbott's office.

Meeks, a Democratic activist, said the two men invaded her privacy by looking into her window Aug. 10. She said the men they thought they were looking into a kitchen window, according to a sworn statement by Meeks.

"I doubt that those agents would have been peeking in the windows of homes in Highland Park or Westover Hills," Angle said.

Hale would not give details on the criminal investigation of Meeks but said it stems from a complaint by a Tarrant County resident.

"It is not uncommon ... for targets of criminal investigations to make baseless allegations of law enforcement in order to deflect serious criminal allegations they face," Hale said.

"The investigation is expected to move forward regarding her in the near future," Hale said.

Hebert suggested that the allegation came from the opponent of a candidate whom Meeks supported.

"It's fairly common for people who lose elections to try and put the blame on anyone but themselves," Hebert said. "They're not true, and in Gloria's case, it certainly is not true."

Meeks has worked for candidates in various local races, including the heated race in May between Fort Worth school Trustee challenger Shirley Knox Benton. Moss said Meeks operated a phone bank for her.

"You can't find a person with better values than Gloria Meeks, and I can't determine why a person would want to attack her who appears as though African-Americans are being attacked."

Knox Benton said Wednesday that she will not comment about the investigation.

Hale said the attorney general's office is not targeting Democrats but is responding to complaints that often have been filed against them.

Some Tarrant County Democrats agree that the fraud problem may be unique in their party because of intense competition for votes in minority communities.

Sharon Armstrong, a longtime Democratic activist in southeast Fort Worth, said she believes that problems have existed for years with candidates buying votes through mail-in-ballot schemes.

"It's a method that people have used for years to get into office," Armstrong said.

Armstrong said she supports the legislation being challenged by the Lone Star Project. She called it a good start to address the problem, but said repealing it would hurt minority communities.

"These communities are going to remain undeveloped because of the voter fraud," Armstrong said.

IN THE KNOW

Voter fraud law

Texas Attorney General Greg Abbott's office is coming under fire for his enforcement of a 2003 state law addressing voter fraud.

The law prohibits people from possessing mail-in ballots that are not their own unless they are related to or living with the voter.

The law is intended to prevent campaign workers from intimidating senior citizens into filling out mail-in ballots for certain candidates.

Voter fraud and disenfranchisement

by kos

Sun Oct 31, 2004 at 05:21:55 PM PDT

Here's a sampling of what we face nationwide.

In West Virginia -- it was bad enough the **first time**.

In a letter, Berkeley County clerk John Smalls cites calls from a cell phone were made to Eastern Panhandle democrats telling them that they were not registered to vote. The letter also said the calls informed democrats in some cases they wouldn't be able to vote on Election Day [...]

It's considered an improper act because when upset citizens called the voter registration office to make sure they were registered to vote, indeed they were. So, who made these misleading calls? The Berkeley County Clerk's Office traced the number voters gave as the source back to the Eastern Panhandle Republican Headquarters.

Bad enough the first time, as I said. Problem is, despite their "slap on the wrist" (or because of it), local Republicans are still up to the same dirty tricks. From an email statement today: Democratic leaders in one of the nation's most hotly-contested battleground states are receiving reports of voter-suppression activities that can be traced back to the Republican Party. The suppression activities have continued despite warnings from officials in Berkeley and Jefferson Counties.

Hopefully these WV Republicans face the same fate as those in Ohio who tried to challenge 35,000 new voters for no reason other than disenfranchisement. After hundreds of hearings found **zero** illegal registrations, the entire lot of challenges was **thrown out** and the Republican masterminds now face criminal charges.

Speaking of Ohio, I got this from a Toledo volunteer:

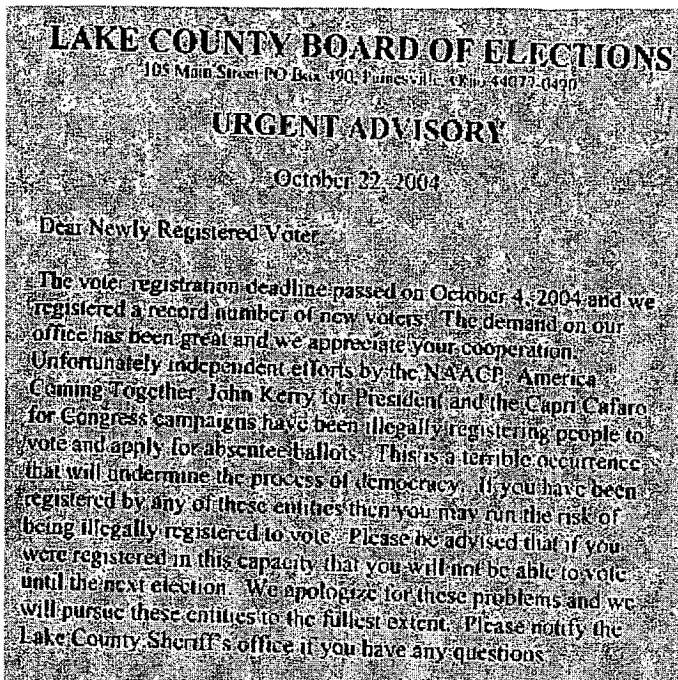

I worked all day yesterday at the largest Toledo area Kerry GOTV phone bank at Gallon and Takacs law offices, 3516 Granite, Sylvania. Out of the 8 phone banks that we had here in the Toledo area yesterday, ours produced one third of all of the contacts made.

Both the local phone company and our phone systems provider have confirmed to us that phone relay point into the building was purposely severed. Many volunteers were rerouted to other locations and several also had to rely on cell phones when we found our lines down this morning. We thought it was a coincidence until the phone company verified to us that the lines were intentionally cut.

More Republican dirty tactics.

And more Ohio, check out this letter supposedly sent from the Lake County (Painesville) Board of Election to newly registered Democrats:

017374

Of course, the letter is not from the Board of Election, and it's obviously all bullshit. (From Law Geek.)

In Milwaukee, Wisconsin, the GOP wants to take a page from the Ohio playbook.

Citing a new list of more than 37,000 questionable addresses, the state Republican Party demanded Saturday that Milwaukee city officials require identification from all of those voters Tuesday.

If the city doesn't, the party says it is prepared to have volunteers challenge each individual - including thousands who might be missing an apartment number on their registration - at the polls.

In Ohio, the "questionable addresses" were those where GOP-sent registered mail wasn't accepted. Wherever the WI GOP's list comes from, it's definitely not reality.

City Attorney Grant Langley labeled the GOP request "outrageous."

"We have already uncovered hundreds and hundreds and hundreds of addresses on their (original list) that do exist," said Langley, who holds a non-partisan office. "Why should I take their word for the fact this new list is good? I'm out of the politics on this, but this is purely political."

Still in Wisconsin, let's head to the ultra-liberal University of Wisconsin -- Madison, which should be a **huge source** of Kerry votes on Tuesday.

UW-Madison students in six residence halls received misleading information this week about how to vote, triggering allegations of dirty tricks.

The Dave Magnum for Congress campaign and the College Republicans took responsibility and apologized for the mailing Friday evening, insisting it was an honest error.

But a progressive group called it a deliberate attempt to confuse student voters. And University of Wisconsin-Madison Chancellor John Wiley, saying he was concerned that students

017375

might not know where to vote, had e-mails sent to all students Friday afternoon containing correct information.

The Campus Republican flyer told students they could vote at the polling location of their choice. Obviously, voters must vote in their assigned polling location.

The College Republicans, of course, are mired in a scandal of their own -- **bilking innocent seniors** of more than \$6 million.

The College Republican National Committee has raised \$6.3 million this year through an aggressive and misleading fund-raising campaign that collected money from senior citizens who thought they were giving to the election efforts of President Bush and other top Republicans.

Many of the top donors were in their 80s and 90s. The donors wrote checks -- sometimes hundreds and, in at least one case, totaling more than \$100,000 -- to groups with official-sounding names such as "Republican Headquarters 2004," "Republican Elections Committee" and the "National Republican Campaign Fund." [...]

Some of the elderly donors, meanwhile, wound up bouncing checks and emptying their bank accounts.

"I don't have any more money," said Cecilia Barbier, a 90-year-old retired church council worker in New York City. "I'm stopping giving to everybody. That was all my savings that they got."

Barbier said she "wised up." But not before she made more than 300 donations totaling nearly \$100,000 this year, the group's fund-raising records show.

Makes you glad to be a Democrat, huh? We all knew College Republicans were slime. Now we have hard evidence. I hope to see some of those scum carted off to jail. But I digress, since cheating the elderly of their life savings isn't really voter fraud or supression.

Let's wrap up in Alabama, where Democratic areas have been infested with this flyer:

017376

**Attention:
Jefferson
County!!!!**

**See You At The Poles
November 4th, 2004.**

**To Find your local polling
place, call Jefferson
County Voter's
Registration
Commission.**

Update: Here's another one -- a fake letter, supposedly from the NAACP, threatening South Carolina blacks with arrest if they vote with outstanding parking tickets, or if they haven't submitted a credit check, provide two forms of photo identification, a Social Security card, a voter registration card and a handwriting sample.

017377

Voter Fraud Charges Out West

TEMPE, Ariz., Oct. 14, 2004

(CBS) By CBSNews.com Chief Political Writer David Paul Kuhn

Officials in Oregon have launched a criminal investigation after receiving numerous complaints that a Republican-affiliated group was destroying registration forms filed by Democratic voters statewide, Oregon Secretary of State Bill Bradbury told **CBSNews.com**.

Meanwhile, **CBS affiliate KLAS-TV** is reporting accusations of similar malfeasance in Nevada.

Both state's allegations are linked to a Phoenix political consulting firm called Sproul & Associates run by Nathan Sproul, former head of the Arizona Republican Party. Sproul & Associates has received nearly \$500,000 from the Republican National Committee this election cycle, according to the Center for Responsive Politics.

Calls from **CBSNews.com** to Sproul were not returned.

Late Thursday afternoon, two Democratic senators, Patrick Leahy of Vermont and Ted Kennedy of Massachusetts, sent a letter to Attorney General John Ashcroft asking the Justice Department to "launch an immediate investigation into the activities of Mr. Sproul and his firm."

According to **KLAS-TV**, a former employee claimed hundreds, if not thousands, of Democratic registration forms were destroyed by a Sproul & Associates group called Voters Outreach of America.

The former employee first told local Nevada reporters that he had personally witnessed his boss shredding eight to ten voter registration forms, according to Steve George, a spokesman for the Nevada Secretary of State.

KLAS-TV quotes the chair of the Nevada Republican Committee, Earlene Forsythe, as saying, "The Republican National Party would never intentionally hire any staff people to come into the state to intentionally do voter fraud."

While Nevada is considering an investigation, Oregon's is well underway. Bradbury expects to have more than 200,000 new registered voters in Oregon by Election Day, when all the forms are tallied and verified. He said that they are now paying particular attention to issues of improper registration.

"We've had three [voter registration] complaints filed and we forwarded them to the attorney general who's doing the criminal investigation," Bradbury, a Democrat, said in an interview. "The complaints specifically name Sproul."

In Nevada and Oregon, Sproul allegedly canvassed voters for which candidate they intend to support. If voters were leaning Republican, the group is said to have assisted in their registration. If they leaned Democratic, the group allegedly ignored them or later destroyed the form.

It is illegal to destroy voting registration material.

"I've never seen this before. The allegations that are being made just totally offend me, not only because they are illegal," Bradbury said. "Regardless of whether it is a Democratic, Republican or Independent form, there is no better way to disenfranchise a voter than to say you are registered and then throw away a voter registration form."

Both Oregon and Nevada are considered battleground states in the presidential election. Though polls show Oregon likely to go to Democrat John Kerry, Nevada remains a dead heat between Kerry and President Bush.

Concerns over Sproul's practices were initially raised in early September when a Medford, Oregon, county librarian, Meghan O'Flaherty, received a fax from Sproul requesting to hold a voter registration drive at the local library on behalf of a nonpartisan group called America Votes. As a precaution, O'Flaherty did her own research on Sproul.

"I was just being a good reference librarian and checking the facts. We want to be sure someone who claims to be nonpartisan is nonpartisan," O'Flaherty said. "I didn't want anything going on here in the library that would call into question our neutrality."

The fax from Sproul was also received by three other Oregon libraries. **CBSNews.com** obtained a copy of the fax, as well.

In part, the fax reads: "Our firm has been contracted to help coordinate a national nonpartisan voter registration drive, America Votes!, in several states across the nation." The one-page fax also claims, "We will equally register all those who wish to register to vote."

However, Cecile Richards, the president of America Votes, said in a letter to Sproul that he "had never even heard of Sproul & Associates," and asked that "he refrain from using the name 'America Votes' in any of your activities from this point forward."

Part of the problem, said Bradbury, the Oregon secretary of state, is the "bounty system" where people are "paid by the signature for circulating petitions and that led to significant fraud."

"I have not seen a bounty system for voter registration before," Bradbury continued. "It's not illegal but I've never seen that before."

In Nevada, the allegations of voter registration malfeasance have irked local election officials. The Nevada Secretary of State's office has contacted the Department of Justice in Washington. An investigation is not yet underway.

"The allegations are that there was a group that was doing voter outreach in Las Vegas – Voters Outreach of America – allegedly made by one of its former workers that the group would destroy Democratic voter registration forms," said George, the spokesman for the Nevada Secretary of State's office.

In Las Vegas, the Clark County registrar's office has in the last month alone received more than 100,000 new registrations. Though it has only five electoral votes, the possibility that Nevada could go for either Bush or Kerry has brought the state to the forefront of the presidential race.

"If the allegations are true," George said "it could" involve hundreds if not thousands of voter registration forms. "We are looking at what state and federal laws may have been broken."

VOTER FRAUD ALLEGATIONS: Judge denies request

Democratic Party loses bid to reopen voter registration

By ADRIENNE PACKER
REVIEW-JOURNAL

District Judge Valerie Adair on Friday denied the Democratic Party's request to reopen voter registration to voters whose forms might have been destroyed by a Republican-backed organization.

In denying the Democratic Party's petition, Adair said extending registration could "open the floodgates" to allow people not affected by the purported fraud to register. Such a move would be inviting "additional fraud and manipulation," she said.

"This court does not believe that there is any way to ensure that only those individuals legitimately affected will register if the time period is extended," the judge said. "There is no guarantee that hundreds of people will not seek to register or claim that they have been impacted."

The appropriate remedy under Nevada law is for those who believe they've been wrongfully denied the right to vote to file individual lawsuits against the Clark County registrar asking to be included on the voter rolls, Adair said.

"The interests of the affected individuals do not justify overriding the statutes enacted by our Legislature and embarking upon a highly dangerous path where the claims of a single individual can impact the voter registration practice of an entire county," Adair said.

The judge pointed to a disclaimer on registration forms that says if voters do not return registration forms themselves or personally mail them to the elections office, they risk not being registered.

Clark County Deputy District Attorney Mary-Anne Miller said elections staff could not process some 58,000 absentee ballots, oversee early voting, and handle a court order to register hundreds of new voters. She said the county could not guarantee voters' information would be in order by the Nov. 2 general election.

Clark County Registrar of Voters Larry Lomax said he was satisfied with Friday's ruling.

"What we wanted was a quick decision, and that's what we got," Lomax said.

Voter registration fraud has plagued Clark County since spring, but Lomax said early in the process it was money-driven. Some voter registration outfits were paying canvassers \$3 per form submitted, not by the hour.

But former Voter's Outreach of America employee Eric Russell told KLAS-TV, Channel 8 a different story earlier this week. Russell said the Republican-backed organization paid only for Republican forms and tore up any Democratic registration forms.

"I have proof. I have a witness. It happened," said Russell, who was disappointed in Adair's ruling.

Two other former employees, Tyrone Mrasak and Ashlee Tims, have told similar stories about their experiences working for Voter's Outreach.

Chris Carr, executive director of the state Republican Party, said organizations tied to the Democrats are not innocent of political tricks against the GOP. On Friday, he presented three registration forms submitted by Moving America Forward that listed addresses that do not exist or are empty lots. Moving America Forward is a Democratic group linked to New Mexico Gov. Bill Richardson.

"The Democrats have used selective outrage," Carr said. "This is nothing more than a thinly veiled, politically motivated effort to draw media attention away from the real issues just days prior to early voting."

Carr called a recent Channel 8 report that two Republican Party registration supervisors instructed a female employee to destroy Democratic forms "outrageous."

The woman who launched the allegations, Patricia Parker, was a Democrat who eventually switched parties, Carr said. The employees Parker accused of destroying Democratic forms work at party headquarters and are experienced and professional, he said. Parker could not be reached for comment.

Republicans outraged by the accusations said some party workers believe Democratic operatives are volunteering in their office under the guise of being Republicans and then using their employee status to add credibility to their unfounded claims.

When asked if he suspected the same, Carr responded: "Absolutely. That's going to cross your mind."

The controversy surrounding the validity of the Democrats' recent claims have reached Washington D.C., where representatives of both parties are accusing each other of trying to steal the heated presidential election.

During a rally Friday morning at the West Las Vegas Library, U.S. Senate candidate

6

Barack Obama of Illinois, who rose to political stardom with his rousing speech during the Democratic National Convention, expressed concerns about trickery.

"We get bamboozled sometimes, but not this time," he said.

Clark County Commissioner Yvonne Atkinson Gates, who is also chairwoman of the Democratic National Committee's Black Caucus, told the crowd of about 300 that Republicans have twice tried to pull "shenanigans."

She referenced the attempt to remove 17,000 Democratic voters from the rolls by a Republican and the recent allegations of Republican operatives destroying Democratic voter registration forms.

"They stole the election four years ago in Florida, and we're not going to tolerate it Nov. 2," Atkinson Gates said.

Former Sen. Bob Dole lodged similar allegations against the Democratic Party in a statement issued through the Bush-Cheney campaign.

"Here we go again," Dole said. "In 2000, Democrats tried to disenfranchise military voters in Florida. They tried to do it again in 2004 using the same cast of characters."

Party representatives are painting Nevada, a contentious battleground for the presidential election, as the Florida of the 2004 elections. In Florida, some voters used punch-card ballots, resulting in a significant number of votes that could not be detected.

Donna Brazile, who ran Al Gore's 2000 presidential campaign and is now in charge of the party's voter national protection efforts, paid a brief visit to Las Vegas on Friday.

"We're trying to prevent it from becoming a Florida," Brazile said of Nevada. "We're determined not to let Florida happen again, and what happened here in Nevada has gone in the books as a Florida-style attack."

Eric Herzik, a political science professor at the University of Nevada, Reno, won't dismiss the possibility that Democrats are trying to lay the groundwork to later challenge an unfavorable election result.

"It certainly isn't a stretch to think this is part of a broader legal strategy," he said. "This isn't just in Nevada. They have teams of lawyers looking for things all over."

Agreed, said David Damore, an assistant political science professor at the University of Nevada, Las Vegas.

"If you read the aftermath of Florida, they (Democrats) got overwhelmed down there. In that sense, they are prepared" this time, Damore said. "I imagine if the shoe was on the

other foot, you'd see the same thing (from Republicans). It's just good strategy."

"There are a lot of Democrats still bitter over 2000," Damore said. "This may be overreacting in that sense, but there's a lot at stake."

The Democrats' claims of voter fraud did not surprise Republicans, said Carr, chairman of the state party. The Republican Party referred to an Election Day manual published Thursday on www.drudgereport.com.

A portion of the manual, which a Democratic official said is authentic, says: "If no signs of intimidation techniques have emerged yet, launch a 'pre-emptive strike,' " such as issuing a press release "quoting party/minority/civil rights leadership as denouncing tactics that discourage people from voting."

Clark County Democratic Party officials said after Adair's ruling Friday they had not decided whether to appeal.

"We're still considering our legal options," said Jon Summers, a spokesman for the state Democratic Party.

However, he pointed out that Adair in her remarks from the bench said defrauded voters have another legal remedy.

"If they are a victim of this company, they can come back and file their own individual lawsuits," Summers said.

The FBI and the Nevada Secretary of State's office are looking into the Democrats' allegations, but neither agency has concluded that laws were violated.

Campaign 2004: Voter registration workers cry foul

Wednesday, October 20, 2004

By Dennis B. Roddy, Pittsburgh Post-Gazette

An ostensibly nonpartisan voter registration drive in Western Pennsylvania has triggered accusations that workers were cheated out of wages and given instructions to avoid adding anyone to the voter rolls who might support the Democratic presidential nominee.

Sproul & Associates, a consulting firm based in Chandler, Ariz., hired to conduct the drive by the Republican National Committee, employed several hundred canvassers throughout the state to register new voters. Some workers yesterday said they were told to avoid registering Democrats or anyone who indicated support for Democratic nominee John F. Kerry.

"We were told that if they wanted to register Democrat, there was no way we were to register them to vote," said Michele Tharp, of Meadville, who said she was sent out to canvass door-to-door and outside businesses in Meadville, Crawford County. "We were only to register Republicans."

Tharp said volunteers were sent door-to-door to seek registrants but were instructed to first ask prospective new voters which candidate they planned to support.

"If they said Kerry, we were just supposed to say thank you and walk away," Tharp said.

Brenda Snyder, a volunteer with the Republican Victory Center in Erie said workers "absolutely never" were told not to register Democrats. She said some workers were not paid "because of discrepancies in their paychecks" and said the party was attempting to correct the problem. Tharp, for instance, said she was paid only \$14 for 15 hours of work after being hired at a rate of \$11 per hour.

Heather Layman, a spokesperson for the Republican National Committee, confirmed Sproul's role in the effort and said that complaints by 45 to 50 workers who had not been paid had been straightened out. Layman denied that the canvassers avoided registering Democrats and suggested that Democrats were orchestrating the charges.

"I do smell politics here if that's what they're saying," Layman said.

Much of the controversy yesterday centered on the registration drive in Crawford County, where canvassers claimed to be owed thousands of dollars after hunting out Bush supporters.

"If they were a Kerry voter, we were just supposed to walk away," said Michael Twilla, of

017385

Meadville, who said he has been paid for only eight of 72 hours he worked.

Twilla provided the Post-Gazette with a copy of the script he said he had been given.

It instructs the canvassers to hand unregistered Bush supporters a clipboard with a registration form, and to advise them the canvassers will personally deliver the forms to the local courthouse.

A lower portion of the form also advises the canvassers to ask undecided voters two questions: "Do you consider yourself pro-choice or pro life?" and "Are you worried about the Democrats raising taxes?" If voters say they are pro-life, the form says, "Ask if they are registered to vote. If they are pro-choice, say thank you and walk away."

The form also tells canvassers, "If anyone asks who you are working for, it's 'Project America Vote.' "

America Votes, whose name is similar, is a self-described nonpartisan voter registration organization sponsored by generally liberal-leaning groups.

Several canvassers said they had been instructed to skip the lower portion of the form and others said they were told to say they were working for a local employment agency.

Twilla said the canvassers were told to say they worked for Career Concepts, a local employment agency. Career Concepts was contracted by a Florida firm, Apple One, to assist them in locating temporary employees. A spokeswoman for Career Concepts last night said her firm did not employ the canvassers.

Sproul's role in voter registration drives this month triggered official investigations in several other states, with canvassers alleging they had been told to discard Democratic registration forms, leaving voters who thought they had registered off the rolls.

The firm has a contract with the Republican National Committee to register new voters and has operated using the name Voters Outreach of America. Sproul's chairman, Nathan Sproul, is a former executive director of the Arizona Republican Party.

The firm attracted attention in Pittsburgh last month when Sproul employees called a Carnegie Library official to request space outside the buildings to register voters.

Holly McCullough, special assistant to the library director, said a woman from the firm said they were working for America Votes, the nonpartisan but liberal leaning organization.

McCullough said she agreed to allow the group to set up at the libraries.

"I said there has to be no issue advocacy. It has to do nonpartisan voter registration and they said that was right," McCullough said. Instead, several days later, McCullough received a call from Ryan Hughes, director of the Woods Run library branch, saying patrons had

017386

complained about the behavior of the canvassers.

Hughes said a patron came in the library Sept. 7 "and said 'There's this person out there asking me who I was voting for.' "But McCullough said she also became concerned because she discovered that Sproul was not working for America Votes, and that the registration drive was being organized by the Republican Party.

Ten people, including former mayor, indicted for voter fraud

AP Associated Press

(12/22/05 - EDINBURG, TX) - Ten people, including the son of long-term former McAllen Mayor Othal Brand, were indicted Wednesday on allegations of voter fraud, Hidalgo County District Attorney Rene Guerra.

Guerra said a grand jury handed up 43 counts in the indictment ranging from unlawful assistance of voters, which he said meant telling people who to vote for, to unlawful solicitation of ballots for money.

Guerra said the investigation started in July after Brand's loss in the mayoral election in May.

Othal Brand Jr. is accused in a vote-buying scheme and could get up to two years in jail if convicted, he said.

Reached Wednesday, Brand Jr. said the indictment was "news to me."

He said he didn't want to comment until he read it.

Also indicted was La Joya city secretary Elvira Rios, who's accused of using her daughter's name for voting materials.

Guerra said defendants would be summoned for arraignments.

Vote fraud training called legit

Web Posted: 03/17/2006 12:00 AM CST

Guillermo Contreras
Express-News Staff Writer

The Texas attorney general's office this week defended examples given in materials used to train law officers to watch for voter fraud, saying viewers must look at them in the proper context.

Critics took issue this week with two examples in a PowerPoint presentation used by the attorney general's office to train law officers to recognize election fraud. The critics argued the examples give poll monitors huge discretion that could result in voters inappropriately being turned away.

One example pictured apparel with logos of the Dallas Cowboys as a possible violation of a section of the state election code that bars in polling places badges, insignias and emblems that relate to any candidate, measure or political party on the ballot.

The other example gives law officers tips on what to look for when examining documents for fraud, including "unique stamps" on mail-in ballots. Appearing next to those words is a postage stamp of a black woman kissing a black child. The stamp promotes testing for sickle cell disease. The racial undertones of that example riled some critics.

Tom Kelley, spokesman for the attorney general's office, offered an explanation: "Our efforts in education are intended solely for law enforcement, not the general public. The example of the Dallas Cowboys shirt is a specific example of a real-life example involving a referendum for a new Cowboys stadium in Arlington, Texas. The example of the sickle cell stamp is a piece of evidence a grand jury relied on to issue an indictment in Bowie County.

"Unfortunately, there have been numerous instances of voter fraud in the state of Texas. These instances have led to nearly a dozen indictments across the state," Kelley said.

The state's stance, however, did little to appease critics like Common Cause Texas and the Mexican American Legal Defense and Educational Fund, groups that say the approach will intimidate voters and result in lower turnout.

One political analyst said the state's approach profiles minorities and assumes they go to the polls to cheat.

017389

"If you start with the assumption that people go to church to steal from the offering plate, you'd make people very uncomfortable," said Andy Hernandez, a political scientist at St. Mary's University. "After a while, they're going to stop going to your church."

The training was offered to 44 counties where voter fraud had occurred, or where the population is at least 100,000. The training took place before early voting began in the March primary.

The crackdown on voter fraud was backed by cases that resulted in indictments and by an editorial Feb. 6 in the San Antonio Express-News, according to the attorney general's office.

The training was offered to law enforcement agencies in Bexar County, but was not used here.

65-Year-Old Woman Arrested For Illegal Voting

(CBS 42) CORPUS CHRISTI A 65-year-old Corpus Christi-area woman has been sentenced to probation and fined for ~~illegally voting other people's ballots.~~

Maria Dora Flores pleaded guilty Friday to two third-degree felony illegal voting counts.

The Texas attorney general's office says Flores admitted marking ballots for other voters without their permission during the early voting for the March primaries.

She's been sentenced to two years of probation, fined 750 dollars and restricted from future campaign work.

Former GC Mayor Convicted on 16 Counts of Election Fraud

Lisa Watson McCarty
Publisher

Charles S. Dougherty, Jr. was fined \$32,000 and handed down a 32-day jail sentence. He is expected to appeal the decision.

Last Friday Gate City's former mayor was convicted of 16 counts of election fraud in relation to the May 4, 2004 municipal election.

Charles Dougherty Jr. was indicted by the Scott County Special Grand Jury in August 200 on 37 counts of election fraud dealing mainly with securing absentee votes. In February, the former mayor was acquitted on two counts of conspiring to interfere with voting rights.

He faces another 15 felony counts with the trial on those counts scheduled for October.

This time round the jury of six men and six women deliberated a little more than 90 minutes during their lunch hour on Friday, July 21 before rendering a unanimous guilty verdict.

They took more time to settle on how to penalize Dougherty and spent nearly 2 hours behind closed doors deciding his penalty.

During opening statements on Thursday morning, Scott County Special Prosecutor Joel Branscom told the jury he wasn't seeking jail time for Dougherty but noted during closing arguments that the jury would know the specific punishment to fit the crime.

Branscom complained that Defense Attorney Carl McAfee tried to "muddy the waters" by reading new wording on the indictments but ultimately the case boiled down to how much cheating and corruption they [the jury] could handle.

017392

"This case is about how much corruption you as representatives of this community are willing to take," the prosecutor explained to the jury.

Dougherty was fined \$2,000 on each of the 16 counts (\$32,000) and ordered to serve 2 days in jail on each of the 16 counts (total of 32 days). He remains free on bond while waiting for his official sentencing.

Although Thursday and Friday's case involved 9 counts of aiding and abetting violations of absentee voting procedures and 9 counts of making false statements on absentee applications, Branscom agreed to drop two of the charges involving Vernoi Littrell but remained determined on the other 16 charges.

Littrell, who is confined to his home with a health condition, was listed as working a 13-hour at his job at Food Lion and was unable to testify in the trial.

Eight witnesses, many of them friends of Dougherty, testified they probably weren't stricken by some of various ailments listed on their absentee applications. Nor were any of them vacationing in another state, an explanation cited on some of the other applications.

Although it was clear, many of the victims suffered from health problems, a few of them became upset when the prosecutor suggested they were homebound.

Lucian Kinhead, who resides in Gatewood Apartments, testified he didn't fill out the application but did sign it at the request of former councilman Jack Anderson. He admitted that he had known Anderson for years and knew Dougherty on sight.

"Hell, no I didn't know signing the form committed a felony," Kinhead stated. "If I knew I could get in trouble, I wouldn't have signed it."

The World War II veteran, who suffers from several health problems, admitted he had voted absentee several times because Anderson asked him to but owned a car and could have driven himself to the polls on that May day.

Gary Falin also explained that Dougherty came to his home in April and asked him if he wanted to vote. Falin testified Dougherty drove him to the registrar's office where he voted in person after the former mayor told a staff member in the office Falin would be traveling to West Virginia on election day.

"I didn't tell him that," Falin said. "I've never been to West Virginia and I had never planned to go there."

Falin, who is employed by Wal-Mart contractor, commented that he voted for the candidates he wanted to but hadn't really thought about voting until Dougherty came by his home.

After Branscom questioned whether he would lie in order to vote, Falin said wouldn't lie in order to vote.

"I didn't say anything," Falin added. "Charles Dougherty did when he told them I was going to West Virginia."

Penny Hammonds testified Dougherty drove her and her husband, Rickey, to vote at the registrar's office in early April 2004. According to her testimony, Scott County Registrar Willie Kilgore filled out the absentee application for her and listed her reasons for wanting the absentee ballot was because the couple was going to Gatlinburg, Tenn.

Hammonds said that the former mayor told Kilgore Hammonds and her husband would be in Gatlinburg on election day.

"I've always wanted to go there, maybe I would get to this time," Hammonds said.

017393

She added her father, Alfred 'Hagan' Cassell, had asked her to vote and called Dougherty to assist the couple. Hammonds also said Dougherty showed which candidates to vote for because she "don't know nothing about" voting.

Hammonds' husband, Rickey, echoed his wife's sentiments. He admitted that he suffered from a nervous condition and was physically disabled. Again Rickey Hammonds told the same story as his wife did including Dougherty suggesting to the registrar the couple was going to Gatlinburg.

"If I knew I was going to get into trouble by signing this paper, I wouldn't have," stated Ricky Hammonds, who clearly remembered signing his application in blue ink. "I've never been to Gatlinburg."

Rickey Hammonds also testified that Scott County Registrar Kilgore filled out his paperwork and instructed Dougherty to show him how to vote. He recalled voting for Dougherty and Anderson but couldn't remember who else he marked on the ballot.

Dougherty's attorney Carl McAfee asked Rickey Hammonds about prescribed medications he might be taking that could affect his memory. Branscom countered that none of the medications her husband was taking would cause his wife, Penny's memory to fail.

During her testimony, Shirley Smallwood verified that Dougherty brought an absentee application to her home in Weber City where she was living. Although she had lived in Gate City with her husband, after their divorce Smallwood had moved part of her furniture out of her Gate City home to Weber City.

She admitted to having crippling arthritis and bad headaches and to living at least part of the time in Weber City but voted absentee in the May 4, 2004 election.

McAfee argued that Smallwood lived part of the time in Gate City and part of the time in Weber City and added that she wanted to help Dougherty win re-election.

Smallwood's mail ballot was mailed to her Gate City address and she filled out the ballot on her own.

McAfee explained that the registrar allowed Smallwood to vote because the office mailed her an absentee ballot.

Mavis Graham also admitted on the witness stand that she allowed Dougherty to fill out her application while she was cooking dinner.

According to court records, her reasons for voting absentee were due to a heart attack and being confined to her home. Graham explained to the prosecutor during his direct questioning she had had a heart attack in 1976 and was able to get out as much as she used to.

Graham said she was involved in a car accident in 2002 and her doctor had commented several times that she wasn't as active as she used to be.

Branscom asked how she had come to court on that day and Graham said she drove herself.

Graham said she shopped for herself, met friends in Kingsport, Tenn. to eat out and generally liked to keep busy. She stressed that she wouldn't lie for anyone because although she wasn't confined to her home, she "didn't get out much."

Branscom countered that anyone could say they didn't get out much anymore including him after the birth of his and his wife's child but that it didn't prove he couldn't leave his home.

Gladys Cleek stated that her son was married to Dougherty's sister and although she owns two cars she did indeed suffer from arthritis. She recalled the day Dougherty dropped by her house, she was lying on the couch in her living room to ease the pain.

Cleek said she asked Dougherty to stop by after finding out from her homebound neighbor his intentions to bring absentee applications.

She admitted she wasn't confined to her home but voting absentee would save her a trip to the polls on election day. On re-direct by Branscom, Cleek said she drove herself to vote at Gate City Middle School in the 2004 presidential election.

Alfred 'Hagan' Cassell told a similar story in that he, too, was driven to the registrar's office by Dougherty. But Cassell said he originally wasn't going to the office to vote and went to talk to the "Kilgore girls."

After the application was completed by Assistant Registrar Tammy Presley, Dougherty said Cassell was going to be in the hospital on May 4, 2004 and Cassell signed the application.

He testified that the women employed in the office were his friends and he liked to go visit them.

"I didn't know it was time to vote but they wanted to know if I wanted to," Cassell said.

He admitted that he couldn't read nor write very well and said Scott County Registrar Kilgore marked his ballot for him after consulting a piece of paper where Cassell said he wrote the names of the candidates he wanted.

Former electoral board member Sherry Wilson began the day's testimony by helping the prosecutor introduce the absentee applications into evidence. Wilson stated that Virginia law does not allow absentee voting based on a voter's age after Branscom pointed out many of the absentee voters were older.

During cross examination, McAfee suggested that all of absentee voters involved in the trial were because the electoral board and registrar didn't do their jobs properly.

Wilson explained that only the electoral board secretary, registrar or assistant registrar were authorized to approve absentee applications and as the third member of the three-member board she had no authority to approve or deny applications.

When McAfee questioned whether Wilson knew if there was some type of relationship between staff in the registrar's office and Dougherty to cause them to help him out, Wilson said she had no hard proof only rumor and speculation.

She also added there was no procedure in Virginia law to challenge absentee votes unless a contest suit was filed in the election. In this case, the challenger, Mark Jenkins contested the results of the election which were overturned by a three-member panel of judges appointed by the Virginia Supreme Court. Dougherty received 357 votes compared to Jenkins' 355 vote total.

The candidates receiving the four highest vote counts were appointed to the Gate City Town Council. They, in turn, selected a fifth member and appointed Jenkins as mayor.

Betty Pendleton, a former clerk in the registrar's office, also testified after she was subpoenaed by the defense. Branscom had originally subpoenaed Pendleton but released her shortly after the day began.

The prosecutor said he had no intentions of calling Pendleton to the stand because prosecution witnesses are immune from prosecution of their crimes.

McAfee became very upset and said he should have been advised of her release. He demanded Pendleton be subpoenaed for the defense as well as Scott County Registrar Willie Mae Kilgore.

Although McAfee planned to bring Pendleton back into the courtroom as his witness, Branscom granted her immunity to testify but not before some legal maneuvering in front of Judge Birg Sergent.

017395

Branscom told the judge that Pendleton would have to be advised of her rights prior to her testimony and that things she said in court might be used against her. Sergeant also advised Pendleton that she could invoke her fifth amendment right to remain silent if her testimony might be viewed as incriminating.

Pendleton was informed of her rights and took the stand, still as a prosecution witness where she immediately invoked her Fifth Amendment rights. Several minutes later after McAfee stated he had no defense witnesses, Branscom granted immunity to Pendleton, which allowed her to testify for the defense.

Pendleton stated that when applications were brought in for ballots to be mailed, she used the computer system to access the voter's information record. Once that application was approved, then a ballot and mailing label was printed. If the voter came in person, after their application was approved then they voted in person.

Pendleton testified that she couldn't remember if Dougherty was present when some of the day's earlier witnesses had voted. She explained that lots of people were in and out of the office and it was difficult to remember everyone.

Pendleton admitted that Dougherty visited the office more than Jenkins but couldn't remember exactly when the former mayor was there. During her 24 years of employment in the registrar's office, Pendleton said she never favored one candidate over another.

"I tried to be honest not because I was for Charles [Dougherty] to win this election," she said.

Pendleton also said that the number of absentee votes cast in the election (158) was about the same as previous years. Dougherty received 138 of those votes cast while Jenkins only earned 20 absentee votes.

McAfee said during his closing argument that Dougherty hadn't interfered with the voting rights of any of the witnesses and that other candidates received more absentee votes than he did.

He also pleaded with jury to that put the stigma of a felony conviction on his client.

"A felony conviction is a felony conviction," McAfee said. "It is an offense that hangs with you throughout your life. It will not go away."

McAfee also poked fun at the large number of media representatives in the courtroom including reporters from Richmond, Roanoke, Bristol, Kingsport and locally.

"For some reason or another, this is bigger news than what's going on in the Middle East, the way they've been covering it," McAfee said.

But Branscom summed it up by explaining the purpose of elections.

"This is what we are in the Middle East fighting for – free votes," Branscom said. "This is what we believe in. It's about how much corruption you are willing to accept in Scott County."

According to Virginia Code 24.2.1012: "Any public official who knowingly violates any of the provisions of the law concerning absent voters and thereby aids in any way the illegal casting, or attempting to cast a vote, or who connives to nullify any provisions of this chapter in order that fraud may be perpetrated, shall forever be disqualified from holding office in the Commonwealth and shall forever be disqualified from exercising the right of franchise."

It is unclear whether Friday's guilty verdict threatens Dougherty's employment. He is currently employed by the Southwest Virginia Regional Jail in Duffield as a jailor.

Bond may be revoked for suspect in Appalachia election fraud case

03/29/2006

By STEPHEN IGO

WISE - A bond revocation hearing for one of the 14 individuals indicted in an alleged election fraud and government corruption scandal in Appalachia has been rescheduled for Monday.

The bond revocation hearing was continued from 1 p.m. Tuesday upon a request by Stephanie Pease, an Abingdon attorney representing Adam Brody Sharrett, the brother of former Town Councilman Andy Sharrett, also indicted by a Wise County grand jury in an alleged conspiracy to commit election fraud and other alleged illegal activities before, during and after the 2004 town elections in Appalachia. Andy Sharrett resigned from the Town Council last week.

Arrestment of 13 of the 14 individuals charged in the alleged conspiracy took place two weeks ago. Betty Chloe Sharrett Bolling, a great-aunt to Adam and Andy Sharrett, was arraigned Monday. She had gall bladder surgery just before the en masse arraignment hearing before Circuit Judge Tammy McElyea. McElyea has scheduled an Oct. 3 jury trial for all 14, with a pair of pretrial conferences scheduled for Aug. 3 and Sept. 26.

Adam Sharrett has been free on unsecured bond. One of the terms of his bond is not to have contact with any prosecution witnesses. Special Prosecutor Tim McAfee said Tuesday that Adam Sharrett jeopardized the terms of his bond as a result of an alleged March 17 altercation during a youth dance at the Appalachia Rescue Squad.

McAfee said a prosecution witness, Lora Bowers, dropped her daughter and a friend of her daughter's off at the dance, then parked at a market not far from the rescue squad facility to wait for the girls. At around 10 p.m., McAfee said the girls returned to Bowers' vehicle, the daughter in tears. The girls "basically tell Miss Bowers there was an incident involving a boy at the dance and some girl got slapped by another girl," McAfee said, and that chaperones of the dance or members of the rescue squad kept Bowers' daughter and another girl in an office and would not allow them to leave or contact their parents.

017397

McAfee said Bowers walked up the street to get the names of those who held her daughter against her will, and the two women allegedly involved in the incident - one of them, McAfee said, is Adam Sharrett's girlfriend - were standing outside at the entrance. McAfee said a "sort of heated exchange between Miss Bowers and the two women" ensued, and Adam Sharrett allegedly injected himself into the dispute.

McAfee said Bowers' statement to Virginia State Police investigators alleges that Adam Sharrett "uttered words related to the (election fraud conspiracy) investigation that related to Bowers," and that Sharrett allegedly poked a finger in her face while making disparaging comments about Bowers' role in the probe.

At that point, McAfee said Bowers was asked to enter the rescue squad building to await the identities, in writing, of the two individuals who allegedly held her daughter against her will. Instead of the promised note bearing the identities of the two women, McAfee said Appalachia Police Officer Lee Ray Williams arrived and allegedly "became antagonistic with her."

In her statement to the VSP, McAfee said Bowers alleged that Williams slapped her hand or arm when Bowers attempted to give her cell phone to her daughter to call 911. Bowers alleges Williams prevented her from calling for outside law enforcement assistance and, instead, arrested her for disorderly conduct and hauled her to the magistrate at the Wise County Courthouse. McAfee said Bowers attempted to file an assault warrant against Williams, but the magistrate denied Bowers' request.

Based upon Bowers' interview with VSP investigators and statements of other witnesses, the allegations against Adam Sharrett, "if true, would be in violation of the court's order, and we filed a motion to revoke his bond," McAfee said.

Besides Adam and Andy Sharrett, those indicted include their parents, Owen Anderson "Dude" Sharrett Jr. and Belinda Carolyn Sharrett, who were on the town payroll as the director of parks and recreation and as a clerk in Town Hall, respectively, until they were suspended without pay by the Town Council. Two brothers of Dude Sharrett, Dennis Martin "Boogie" Sharrett and Kevin Lee Sharrett, have also been indicted on various charges, including charges against Kevin Lee Sharrett involving the alleged importation of illicit drugs to Appalachia to spice up alleged voter bribery enticements such as packs of cheap cigarettes, six-packs of beer and bags of pork rinds.

Appalachia Mayor Ben Cooper heads the indictment list that bears a host of charges including tampering with absentee ballots and forgery. He relinquished his duties as town manager but rescinded an intention to resign as mayor yet remain on the council. Cooper is still mayor and on the council.

Two suspended law enforcement officials are among those indicted. Suspended without pay are former Chief Law Enforcement Officer Benjamin Graham Surber and former Police Officer Walter Mike Baber. Surber is accused of doing little more than collect a paycheck as a figurehead to allegedly provide Cooper full control over the police department, while charges against Surber and Baber include seizure of private property for personal use.

Indicted for allegedly making false statements on a request for voter assistance forms at the polls on election day are Betty Roxann Riddle, Krystal Shana Chandler Turner and Natasha Sharrett Mullins. A former U.S. Postal Service employee, Don Houston Estridge, is charged with illegally diverting absentee ballots to the alleged conspirators.

Vote fraud case hangs on red ink, ballots

A defense attorney conceded that some of the defendants are "as crooked as a barrel of fish hooks." But not his client.

By Laurence Hammack

WISE -- It seemed a little strange that so many people in Appalachia wanted to vote by absentee ballot in the 2004 town elections.

Stranger still that so many of the voters were nursing home occupants, Alzheimer's patients, alcoholics, residents of low-income neighborhoods and other citizens not known for their regular participation in democracy.

And stranger still that so many of their applications for absentee ballots were filled out in red ink.

"It was just kind of odd that so many people in Appalachia happened to have a red ink pen when they needed to sign something," special prosecutor Tim McAfee told a Wise County jury Wednesday.

As authorities continued to investigate the election, collecting thousands of pages of documents and eventually finding the incriminating red pen, they pieced together what has been called the biggest case of election fraud in recent state history.

Now it's up to the jury to see if the pieces fit to form a conviction.

Outlining his evidence in opening statements, McAfee described how a corrupt slate of candidates bought votes with bribes, cited false reasons to obtain absentee ballots for their ill-gotten supporters, diverted those ballots from the mail before they reached the intended voters and used the stolen documents to vote repeatedly for themselves through forgery and fraud.

Even defense attorney Walt Rivers conceded that some of the defendants were "as crooked as a barrel of fish hooks."

But not his client, Don Houston Estridge, Rivers told the jury.

017400

Estridge, a former postal worker who prosecutors say played a key role in diverting mail in ballots to the other conspirators, is maintaining his innocence in a trial that began Tuesday and is expected to last through next week.

There appears to be no direct evidence that Estridge stole blank ballots so that others could steal votes.

Instead, prosecutors will rely on circumstantial evidence and the testimony of co-defendants. Of the 14 people charged in the case, 12 have agreed to cooperate with authorities.

At the center of the conspiracy, McAfee said, is Ben Cooper.

Cooper is the former mayor and acting town manager of Appalachia, an economically depressed town of about 1,900 that sits not far from the Kentucky state line, surrounded by dormant coal mines.

Obsessed with a desire for power and a deep dislike for Vern Haefele, who was Appalachia's town manager in 2004, Cooper set out to win re-election to the council at any cost, McAfee said.

He enlisted the help of two town employees, parks and recreation director Owen "Dude" Sharrett and his wife, town clerk Belinda Sharrett. Because Haefele had expressed concerns about the Sharretts' competence and had suggested their jobs be eliminated, McAfee said, they were eager to join a political effort to remove the town manager.

In fact, one of Cooper's two running mates for council was the Sharretts' son, Owen "Andy" Sharrett. Seven members of the Sharrett family have been charged with assisting the Cooper campaign.

Estridge was pulled into the scheme for two reasons, McAfee said: As a letter carrier in Appalachia, he had access to the ballots the other conspirators needed. And a personal dispute he had with town leaders at the time over a land transaction made him a willing agent for change.

As Election Day approached, the defendants fanned out to find the kind of voters they could control, visiting nursing homes and housing projects.

"They are the people who don't know how to fight back," McAfee said of the victims. "They were easy targets for this conspiracy."

Although some voters have said, and the indictment alleges, that they were given beer, cigarettes and even pork rinds in exchange for their votes, McAfee downplayed that aspect of the case, focusing instead on stolen mail and forged ballots.

"This is not about pork rinds," he told the jury.

However, it was a complaint by Christina McKinney, who said Dude Sharrett offered her cigarettes and pork rinds for her vote, that started the investigation in May 2004. By then, Cooper, Andy Sharrett and a third member of the slate who has not been charged had been elected.

Cooper and Sharrett resigned after they were indicted in March. Estridge, 63, resigned from the postal service in February. Victor Dubina, a spokesman for the postal service, said he could not say if the resignation was related to the criminal charges.

Although no one apparently saw Estridge steal any absentee ballots, McAfee is asking the jury to consider circumstantial evidence, including the following:

- Of 57 documented cases of voter fraud (authorities suspect the actual number is much higher), 30 of the voters who never received absentee ballots were on Estridge's mail route.
- A computer-generated list of voters found in Cooper's house had the name "Don" written next to many of the names. A search of the Sharrett home the same day produced a pen with red ink on top of a pile of absentee ballot applications.
- Cooper was a regular visitor to the Appalachia post office where Estridge worked, and some employees heard him ask the letter carrier about whether certain absentee ballots had arrived in the weeks before the election.

While Estridge admitted that he "ran his mouth a lot" in the community while supporting Cooper and his running mates, he plans to testify that he did nothing illegal, Rivers told the jury.

Rivers suggested that the postal employee best positioned to help the corrupt candidates was the Appalachia postmaster, Sid Cooper -- Ben Cooper's brother.

"He had the keys to the post office," Rivers said of Sid Cooper, who has not been charged. "He was the first one in the door every morning, and Ben Cooper was right on his heels."

Although Ben Cooper has agreed to cooperate with prosecutors, Rivers said he does not expect him to say anything to incriminate his brother.

"Somebody is being protected. Somebody is being covered. And somebody is being dumped on," Rivers said.

Pointing to his client as he sat alone at the defense table, Rivers said: "That man right there is being dumped on."

Inquiry into vote buying expands

State police searched the offices of Appalachia's town hall and police department.

By Laurence Hammack

981-3239

A state police investigation into election fraud in Appalachia has reached past the town's 2004 elections and into its town hall, its police department and the homes of its top officials.

Armed with a dozen search warrants, police officers swarmed into the small coal-mining town in far Southwest Virginia on Monday morning to seize potential evidence from government buildings.

No charges have been filed. Court records indicate that authorities are looking into suspicions of both election fraud and the government corruption that it spawned.

Among the claims: that some votes were bought with promises of cigarettes and six-packs of beer, that absentee ballots were stolen from voters' mailboxes and fraudulently cast, and that one of the candidates for the town council went on to head the town police department, now suspected of illegally seizing drugs, money and property.

"It was a very disturbing discovery today," special prosecutor Tim McAfee said after a day of police searches. "We've got pre-election misconduct, we've got Election Day misconduct, and we've got post-election misconduct."

In addition to seizing evidence from the town hall and the police department, authorities also raided the homes of a town council member, the police captain and the mayor.

The investigation will even reach into the mouths of six suspects, with police planning to take saliva swabs that will be compared to DNA recovered from the envelopes that contained dozens of disputed absentee ballots.

Nearly two years ago, town resident Christina McKinney sparked the probe when she complained that family members of Andy Sharrett, one of seven candidates running for the council, enlisted her to vote by absentee ballot -- only to take her ballot from her

mailbox and cast it in her name.

McKinney said she and other residents of her government-subsidized apartment complex were offered cigarettes, beer and even a bag of pork skins in exchange for their votes.

When authorities checked out her story, "what stuck out like a neon light flashing was the fact that there was not just one incident, but there were probably 60 or 70 voters where it looked like something had happened," McAfee said.

Since then, the election probe has led authorities to look into the town's police department.

"The investigation into the election fraud claims by many voters has revealed a conspiracy by a lot of individuals to violate the election laws, with one of the goals being to allow the creation of a police department that was controlled and would permit certain illegal activities to occur," McAfee said.

Search warrants identify police Capt. Benjamin Surber, who was once a candidate for the town council.

Shortly before the 2004 election, Surber withdrew from the race and supported a slate of three candidates that included Sharrett and incumbent councilman Ben Cooper. Both Sharrett and Cooper were elected; the new council then named Cooper mayor.

Not long after the new council took over, Surber was named police captain, the de facto head of a five-man department that has no chief, McAfee said.

Search warrants executed on Surber's home and police headquarters show that authorities are interested in examining the workings of the department since May 2004.

The warrants authorized police to seize records related to Surber's hiring and other personnel issues. Authorities also were looking for paperwork involving drug arrests, search warrants, the use of confidential sources, seizures of money and property, and the work schedules and mileage claims of individual police officers.

Evidence uncovered Monday indicates that drugs were often seized without proper warrants or record keeping, McAfee said, and that there is little accounting for what happened to it afterward.

In addition to the police department, authorities are focusing on what happened in the Sharrett home on Lee Street.

Councilman Andy Sharrett shares the home with two family members implicated in the search warrants. His father, Owen "Dude" Sharrett, is head of the town's parks and

recreation department. His mother, Belinda Sharrett, is a bookkeeper at town hall.

The warrants seek saliva samples from all three Sharretts, in addition to various records and paperwork that might have been in their home.

Cooper's home also was searched Monday, and he and Surber will be required to submit saliva samples.

Police also are seeking DNA samples from two other people, and McAfee said the investigation could extend beyond the six people named in search warrants executed Monday.

A 60-page affidavit that details what investigators have found to date -- and which convinced a judge that there was sufficient evidence to issue the 12 search warrants -- remains sealed in Wise County Circuit Court. What's known is that authorities are investigating the following crimes: voting more than once in the same election, theft of ballots and other voting records, aiding or abetting in the violation of absentee voting procedures, and hindering a citizen's right to vote -- a charge that has been used to allege vote buying.

Nearly 20 percent of the votes cast in the town election were by absentee ballot, nearly four times the state average.

McAfee said he might be ready to seek charges by the end of February. But that could depend on whether state police continue to discover illegal activity they were not aware of, as happened Monday.

"We're going to investigate everything," the prosecutor said, "because we can't trust any of it."

VIRGINIA MEETING & CONFERENCE PLANNER

14 charged in election fraud receive warning

Judge orders them to avoid 100 witnesses in town of Appalachia

BY KATHY STILL

MEDIA GENERAL NEWS SERVICE

Wednesday, March 15, 2006

WISE -- The tiny town of Appalachia got smaller yesterday for the 14 people indicted last month on charges of scheming to rig the 2004 Town Council race.

Mayor Ben Cooper, Councilman Andy Sharrett and the others indicted received a warning from Circuit Judge Tammy McElyea during their arraignment to stay away from those named in a five-page list of witnesses and absentee voters.

All pleaded not guilty and waived their right to a speedy trial. The judge set an Oct. 3 trial date.

They could be jailed if they contact the people on the list. However, avoiding more than 100 people in a town of 1,800 could prove difficult for those accused in the scheme, which authorities say involved buying votes to put Cooper in power so others could get town jobs or freely break the law.

Appalachia, once a bustling town surrounded by vibrant coal camps, now has just one bank, one grocery store, one post office, one Dollar General store, a couple of convenience stores, two traffic lights and a handful of specialty shops.

The town has plenty of churches. Still, some of those charged worship at the same places as the people they've been warned to avoid.

Patti Page Church, the mayor's attorney, summed up the situation for the judge near the end of the 90-minute arraignment.

"It's a very small community," she said. "It's a mile from traffic light to traffic light. The chances of running into somebody on this list at church or the Payless Supermarket are good."

017406

Tim McAfee, the special prosecutor who asked the court to prohibit contact, agreed with Church. He said a chance encounter on a grocery-store aisle would not be a concern.

It would be a different matter if one of the 14 charged initiated contact, McAfee said.

Some of those charged serve as volunteer emergency-medical technicians. Their attorneys asked the judge and the prosecutor to clarify what would happen if their clients responded to an emergency involving someone on the list.

Provide the care needed and avoid other contact, the judge said.

"This is probably going to be a very complicated matter," she said.

The first hour of the arraignment was chaotic. Nearly as many lawyers as those charged milled around the courtroom chatting with one another and with prosecutors. They talked with the judge at the bench and made it impossible for people to follow the proceedings.

The room settled down when paperwork was completed. The lawyers and those charged gathered around the judge's bench for the arraignment.

McElyea warned those charged not to miss a pretrial hearing or any court appearance.

The 14 were named in a 300-page indictment alleging election fraud and related charges. The indictment includes 269 counts.

In addition to the mayor and the councilman, police Capt. Ben Surber, Officer Mike Baber and town workers Belinda Sharrett and her husband, Dude Sharrett, were indicted. The four employees were suspended without pay by the Town Council this month.

Other members of the Sharrett family -- Adam Brody Sharrett, Betty Chloe Bolling, Dennis "Boogie" Sharrett and Kevin Sharrett -- also face charges. Bolling was not arraigned yesterday because of an illness. She will be arraigned later.

Former mail carrier Don Estridge and voters Betty Riddle, Krystal Turner and Natasha Mullins also face charges in the vote-buying conspiracy.

Cooper has resigned as town manager but not as mayor.

Kathy Still is a staff writer for the Bristol Herald Courier.

NURSING HOME MAIL BALLOT FRAUD

Back in February I reported on a tip from a reader who wrote that a family member who is legally incompetent and living in a Lynnwood nursing home had voted by mail last November.

we found out my wife's' uncle who is declared 'incompetent' by the State and has a legal guardian, voted and is now a PAV as well. Besides being blind with cerebral palsy he cannot read nor write.

I now have documents from the Snohomish County Auditor confirming the reader's story. It strongly suggests that some of the caretakers at the nursing home conspired to fraudulently vote on behalf of individuals who weren't capable of voting.

Wallace Murphy, 77, is the disabled man whose family sent me the tip. This set of documents includes a court filing showing that Mr. Murphy has been declared to be an "incapacitated person" with a guardian, which under current state law means that he's legally ineligible to vote.

Nevertheless, the caretakers at the Manor Care facility in Lynnwood registered him to vote and voted on his behalf. Mr. Murphy's relative stressed that his mental capabilities are diminished and indicated that he was almost certainly taken advantage of

Current events have really no meaning as you might inquire about who is the President and he may say Kennedy or Reagan or whoever you say at the time. This set of documents includes the voter registration forms and absentee ballot outer envelopes for Mr. Murphy and six other Manor Care residents. All of the registration forms were filled out on March 9, 2004 in the same handwriting and by someone who had access to the residents' Social Security and WA state ID numbers.

Take a look at Murphy's registration card (page 1) and his absentee ballot envelope (page 3). His legal name is Wallace J. Murphy, but he was registered as Wally I. Murphy. The "signature" on his registration form (again, he never learned to write) does not match the "signature" on his ballot envelope. The witness was the same for both signatures.

Other interesting aspects of these registrations --

* In most cases, the signatures on the registration forms do not match the signatures on the ballot envelopes.

* Whoever pre-filled the registration forms assumed that the residents didn't have a driver's license, entering "N/A". Somebody went back later and where applicable overwrote this with an ID number. I looked up these numbers at the

DOL: None of these are driver's licenses. The few that actually check out are **identification cards.**

* Some of the signatures purportedly from different individuals look suspiciously similar.

* It's possible that some of the other individuals who were registered on March 9 are otherwise qualified to vote but simply needed a little help with the mechanics, but I doubt that all of them were competent to vote. I tried to call one of them and it was clear he/she didn't have the mental capacity to have a telephone conversation.

* The Snohomish County Auditor was also negligent here. Three of these absentee ballot signatures clearly don't match the registration signatures -- Murphy, Rosen and Erickson -- and the ballots were witnessed by someone from Manor Care. But state law requires that a witnessed absentee ballot have two witnesses to be counted. Nevertheless, these voters were credited and their ballots appear to have been counted.

The state legislature in its paroxysm of "election reform" legislation actually did address the issue of vote fraud by nursing home officials who take advantage of the mentally incapacitated -- they passed a law to ensure that it's going to happen more often than ever before.

A felon but not a fraud: No charges for voter with prison I.D.

By GINA BARTON
gbarton@journalsentinel.com

Posted: March 16, 2006

Federal prosecutors have dismissed a fraud charge against a convicted felon who voted in the November 2004 election after learning that he had shown his prison I.D. as proof of identity at the polls.

Advertisement Derek G. Little was charged in July with a federal felony because he voted despite being on supervised release for a felony conviction of maintaining a drug trafficking place. Felons are ineligible to vote while they remain under court supervision.

Little, 45, admitted that he voted, according to court records. But Little recently proved that when he registered at the polling place on the day of the election, he presented his Department of Corrections identification card, which spells out "OFFENDER" in bold letters. According to the government's motion to dismiss the indictment, that action would have made it difficult to prove Little acted "willfully and with the intent to defraud state residents of a fair and impartially conducted election process."

"I expect that should have raised a red flag," city Election Commission Executive Director Susan Edman said of the prison I.D. "That shouldn't have been accepted, really."

Democrats submit complaint against Newcomer

Vote fraud alleged; Newcomer says he checked with state

By BRIAN HUBER - GM Today Staff

January 4, 2006

WAUKESHA - The Democratic Party of Waukesha County is seeking a special prosecutor to investigate its allegations 33rd state Assembly District candidate Scott Newcomer engaged in voter fraud.

Newcomer dismissed the complaint Monday as being "politically motivated," saying he checked with an attorney for the state Elections Board on whether he could vote from a Delafield address where he plans to build a house.

Scott Newcomer, winner of the 33rd Assembly District Republican primary election, greets supporter Jim Somers on December 14 at his victory party at Seven Seas restaurant in Hartland.

The Democratic Party sent a complaint and letter to District Attorney Paul Bucher alleging Newcomer, who lives in Elm Grove, voted in the Dec. 13 primary election for the Assembly seat using a Nagawicka Road address in Delafield. Democratic Party

Chairman Rick Congdon said in a release the property is occupied only by a backhoe.

"Unless Scott Newcomer was living in the cab of the backhoe on his vacant lot," he could not have legally voted from that address, Congdon said in the release.

Congdon asked Bucher to appoint a special prosecutor for the case because political consultant R.J. Johnson is advising both Bucher and Newcomer in their respective campaigns. Bucher is running for state attorney general.

Newcomer said the residency issue was raised as part of the primary campaign. Newcomer said he recently bought the property, stayed there for the summer and September and had the house razed so a new one can be built.

017411

He said he obtained an opinion from George Dunst, attorney for the state Elections Board, that said he could vote from the Delafield address if he did not vote from the Elm Grove address.

"I did my due diligence up front knowing there might be an issue with my residency and my voting," he said, adding that he also voted in the Oct. 18 county executive election from the Delafield address.

Bucher said he had not received a copy of the complaint as his office was closed Monday for the New Year's holiday.

"Procedurally if they are going to file a complaint by the media it kind of tips their hand as to motive and agenda," Bucher said. "The fact they filed it with the media rather than my office tells me it's politically motivated."

But Bucher said he would review the complaint and determine whether a special prosecutor is needed.

"We are putting the cart before the horse in this case, which I don't like to do. If A, B, and C occur, I probably would request a special prosecutor, but until I review the complaint, talk to George Dunst and see the substantive aspects of the complaint, it'd be professionally inappropriate to say what I would do. ... I will review it in the ordinary course as always and act appropriately."

Newcomer, who faces Democratic challenger Patrick Byrne in the Jan. 10 election for the 33rd District seat, said he was not worried about the complaint.

"He (Congdon) is trying to create a formal issue out of it and it's just politics," he said. "It's part of the game."

Most West Virginia Residents Believe Vote Buying a Problem

Posted 12/22/2005 06:00 AM

According to a poll commissioned by The State Journal, 69 percent of registered voters in West Virginia believe vote buying happens either very often or somewhat often.

Story by Beth Gorczyca

Ask most West Virginians whether corruption and vote buying mar political races, and about seven times out of 10 people will say yes.

They just don't think it happens in their neck of the woods.

According to a poll commissioned by The State Journal, 69 percent of registered voters in West Virginia believe vote buying happens either very often or somewhat often. About 21 percent of voters say they don't think it happens very often, and 2 percent say it never happens.

When asked whether voter fraud occurs in their home county, voters are a little more optimistic. About 9 percent said it never happens in their county, while 31 percent said it doesn't happen very often. A combined 49 percent said votes are bought either somewhat or very often.

"It's a little concerning that 69 percent of people believe vote buying occurs," said Mark Blankenship, senior vice president of RMS Strategies, the Charleston-based research company that conducted the poll from Nov. 22 to Dec. 1.

RMS Strategies interviewed 400 registered voters in West Virginia for the poll. The margin of error is plus or minus 4.9 percentage points.

Blankenship said residents' perceptions about how often voter fraud occurs in their communities differ based on where they live.

"Southern West Virginians are more likely to believe vote buying and political corruption happens very often in their county, while people living in the Northern Panhandle are less likely to believe its happening," Blankenship said.

Specifically, 11 percent of Northern Panhandle residents believe political corruption happens very often compared to the 35 percent of southern residents and between 14 and 16 percent of residents in the Eastern Panhandle, north-central region and the eastern mountains. About 23 percent of residents in the metro area between Charleston and Huntington believe voter fraud occurs very often.

Blankenship said some of those differences may be linked to the amount of attention vote buying and political corruption have received in different regions during the past several months. Newspapers and television stations in the Charleston-Huntington area, as well as the southern region, have had numerous stories about elected officials investigated for election tampering, bribery and other charges. Several public officials from Lincoln and

Logan counties have been sent to jail.

In the poll, voters were asked how much they have read, seen or heard relating to political corruption in West Virginia.

Only 5 percent of people from the Eastern Panhandle said they had heard a lot about the issue, compared to 29 percent in the Charleston-Huntington area.

Overall, 56 percent of residents said they had either heard very little or nothing about political corruption in recent months. Forty-four percent said they had heard either some or a lot about the issue.

"There has been a lot of media attention about election corruption ... but awareness is tough to achieve," Blankenship said. "But since the allegations were first made, nearly half of the entire sample is aware of the issue."

Sixth Lincoln resident pleads to election fraud

By LAWRENCE MESSINA
Associated Press Writer

CHARLESTON, W.Va. (AP) -- The final defendant pleaded guilty Friday in the federal case alleging election fraud in Lincoln County, though prosecutors don't consider their investigation closed.

Wandell "Rocky" Adkins admitted that he distributed \$6,000 in cash to two precinct captains to buy votes during last year's Democratic Party primaries. Bribed voters were also given a slate, or list of candidates for whom they were to cast ballots.

Adkins, 50, said he got the money from Gregory Brent Stowers, who was Lincoln County's circuit clerk before resigning Thursday and pleading guilty in the case. Stowers, who also stepped down from the state Democratic Party's executive committee, admitted to providing Adkins with the cash.

Adkins, of Ferrellsburg, pleaded guilty to a charge filed Friday by prosecutors, who in exchange have agreed to dismiss the six counts in the pending indictment that target him. As part of the plea deal, Adkins has agreed to cooperate with prosecutors and faces up to two years in prison at a March 15 sentencing. He remains free on bond.

Adkins is the last of six defendants in the case to plead guilty this week; they had been slated for trial Jan. 3. But hints that Stowers, 48, was negotiating with prosecutors last week prompted a rush of guilty pleas, starting with Lincoln County Assessor Jerry Dale Weaver on Tuesday.

Weaver, 56, admitted to the case's core allegation: that a group in Democrat-dominated Lincoln County routinely conspired to buy votes in elections dating back to 1990 to retain control of county offices.

Prosecutors allege that led by Stowers, the conspirators sought to keep power so they could fix traffic tickets, parcel out road gravel and asphalt, tamper with property tax assessments, offer public jobs and otherwise peddle influence in the region.

"I've collected and given out cash to buy votes. I've given gravel for votes," Stowers said in a statement issued after Thursday's guilty plea.

The vote-buying probe began last year in Logan County, where the officials who resigned and pleaded guilty have included the county sheriff and the city of Logan's police chief.

017415

Earlier this month, Logan County Clerk Glen Dale "Hound Dog" Adkins pleaded guilty to selling his vote for \$500 in the 1996 Democratic primary.

Stowers and other defendants in both the Logan and Lincoln county cases have agreed to cooperate with prosecutors investigating election fraud.

"We will follow all leads that are presented to us," Acting U.S. Attorney Chuck Miller said at a Thursday news conference.

A national survey conducted by Rasmussen Research on behalf of WorldNetDaily.com shows nearly half of Americans believe the Democratic Party is most responsible for voter fraud, and two-thirds of those sampled suspect government files and databases are subject to misuse during political campaigns.

The scientific telephone sampling of 1,000 voters taken last weekend found that 48.8 percent of respondents believed the Democratic Party was more culpable in alleged voter fraud, while only 15.7 percent believed the Republicans were.

Ironically, more of the respondents had voted for Al Gore for president than for George Bush. Of those sampled, 48.1 percent had cast their ballots for Gore and 46.5 percent had supported Bush.

A whopping 66 percent of those sampled said they believe government files and databases are abused in political campaigns, while only 12.7 percent said they were not.

Younger voters were more inclined to believe voter fraud and irregular voting practices -- including the intentional casting of illegal ballots -- were widespread problems in the U.S. electoral system. They were also more likely to suspect misuse of government resources in campaigns.

Asked if young people could have confidence in a system they view as corrupt, Karen Saranita of the Institute for Fair Elections responded, "How could anybody?"

"People misunderstand the term voter fraud," she said. "Fraud is a precise legal term. It is a criminal intent to do something illegal." Saranita, who heads the non-partisan organization, explained that when someone votes twice, that's voter fraud. Someone

registers their dog, that's voter fraud. Someone who's not a citizen voting, that's voter fraud. That's not what's going on in Florida." Instead, that state's predicament is a question of process -- which kinds of chads will be counted and which will not, she said.

Though the WND/Rasmussen survey polled voters around the country, Saranita believes most participants likely had Florida in mind given the massive media coverage of events there.

The Florida Supreme Court recently decided to allow selected counties to finish their hand recounts, as long as the counts are completed and reported by 5 p.m. Sunday. However, the court set no uniform standard as to which kinds of chads -- dimpled, "pregnant," or hanging -- should be counted.

"I'm afraid [the situation in Florida] is really going to undermine what little confidence people have in our system," Saranita continued. "Maybe it will be a wake-up call. My experience says it won't. My experience says that six months from now it won't be an issue" due to America's "short attention span."

As for Americans' overwhelming finger-pointing at Democrats when assigning blame for voter fraud allegations, Saranita said the poll results could be explained by bad public relations on the part of the Democratic Party and Vice President Al Gore's campaign. A 5-page memo circulated by Gore staff provided tips on how to challenge, and ultimately throw out, military absentee ballots that historically favor Republicans. Additionally, Gore's repeated calls for recounts have reflected badly on Democrats, she said.

"In some ways, people may see that as fraud. That could have a lot to do with it. It's a mess. It's embarrassing. It's going to make for some rather loud Thanksgiving dinners," said Saranita.

The survey, taken on Nov. 19, has a margin of sampling error of +/- 3 percentage points with a 95 percent level of confidence.

This is WND's second poll in conjunction with Rasmussen/Portrait of America. The first poll, conducted in August, surveyed Americans on the proper role of the press in a free society.

All-mail voting may cut fraud

By Keith Ervin
Seattle Times staff reporter

King County Executive Ron Sims' proposal for all-mail voting could reduce the possibility of fraud by election workers, a leading critic of electronic voting says.

Bev Harris, founder and executive director of Renton-based Black Box Voting, said voting by mail would eliminate more than 500 tamper-prone voting machines. It also would allow the county to buy more secure high-speed counting equipment, she said.

Sims last week proposed to simplify elections in 2006 or 2007 by ending poll voting at all but a handful of regional centers. He cited voters' trend toward mail voting, with 70 percent of county voters casting absentee ballots in November's general election.

Sims has asked Elections Director Dean Logan to submit a plan for mail voting by Jan. 31. The switch would require approval by the County Council.

Harris, the nation's best-known promoter of improved safeguards against election rigging on computerized voting equipment, will meet with Sims Wednesday to discuss ways of improving election security in King County.

Logan and Harris have disagreed often on election-security issues, but they agree on one thing: The county should acquire high-volume, digital-scan counting machines if it becomes the largest vote-by-mail county in the nation.

"There's no question that for a county the size of King County we would need a higher-speed tabulation system than we have now. She's right. That's the next iteration," Logan said.

Harris likes the new digital technology because the counting machines would record an electronic image of every ballot cast — images she said citizens could review to verify the vote counts reported by the county.

"This is the best example in voting of how you can actually use technology to make it more transparent and also, I think, make it more efficient. It's wonderful," Harris said.

The state Republican Party has opposed all-mail voting in King County, saying signature-verification procedures now in use are inadequate to confirm a voter's identity.

Harris said all-mail balloting would eliminate the county's "most serious vulnerability" to a rigged election: the 500-plus polling-place inspectors who take voting machines home for up to a week before each election. Inspectors are responsible for delivering voting machines, ballots and other supplies to polling places on Election Day.

The security of those voting machines, manufactured by Diebold Election Systems, became a national issue this month when a computer-security expert used a credit-card-sized memory card to reverse the outcome of a simulated election in Leon County, Fla.

The mock election was arranged by Black Box Voting.

Diebold and King County officials say the Florida test ignored a number of safeguards that are designed to prevent and detect vote tampering.

There is no evidence that memory cards have been maliciously reprogrammed in a real election. Cards can't be removed from voting machines without breaking a numbered plastic seal.

But Leon County Elections Supervisor Ion Sancho said the mock election was disturbing because neither the Diebold voting machine nor the Diebold central tabulator showed any evidence of tampering.

"Quite frankly, this is a hole I could drive a Mack truck through," Sancho said. "I could rig elections, leave no fingerprints, and how would the voters ever know?"

Sancho said Leon County is switching from Diebold to rival vendor Election Systems & Software, and plans to discontinue sending voting machines home with poll workers.

In the mock election, Finnish security expert Harri Hursti reprogrammed a memory card in a Diebold AccuVote machine so that it reported election results that differed from the ballots that were put into the machine.

Harris said, after observing King County's insertion of memory cards into AccuVote machines before the Nov. 8 election, that controls were inadequate to prevent election workers from secretly replacing some legitimate cards with tampered cards.

Diebold spokesman David Bear said results were altered in the Leon County mock election only because officials there violated standard election practices by giving the testing team "complete and unfettered access" to a counting machine.

Although some people "are going to believe conspiracy theories," Bear said, "we have to believe what history tells us. The systems are safe, they're secure, they're accurate. They've been validated by voters, by election officials, by institutes of higher learning, by the market."

King County Elections Assistant Director Sherril Huff Menees said it is "a pretty far-fetched supposition" to suggest that anyone could throw an election without getting caught.

Paper ballots are used for manual recounts of three precincts chosen by the major parties after every election, and recounts of all affected precincts are also required by law in close races.

Diebold has been a target of electronic-voting critics since 2003, when Harris discovered computer source code for the company's voting equipment on the Internet. She said some other manufacturers' voting equipment also may have serious security problems.

Wally O'Dell resigned this month as president and CEO of Diebold Inc., parent company of Diebold Election Systems, after stock prices fell.

Dead voted in governor's race King County investigating 'ghost voter' cases

By PHUONG CAT LE AND MICHELLE NICOLOSI
SEATTLE POST-INTELLIGENCER INVESTIGATIVE REPORTERS

At least eight people who died well before the November general election were credited with voting in King County, raising new questions about the integrity of the vote total in the narrow governor's race, a Seattle Post-Intelligencer review has found.

The evidence of votes from dead people is the latest example of flaws in an election already rocked by misplaced votes and allegations that there were thousands more votes counted than actual voters.

County officials say they are investigating the cases pointed out by the P-I. "These are not indications of fraud," said Bill Huennekens, King County's elections supervisor. "Fraud is a concerted effort to change an election."

The P-I review found eight people who died weeks before absentee ballots were mailed out, between Oct. 13 and 15, but were credited with voting in King County. Among them was an 81-year-old Seattle woman who died in August but is recorded as having voted at the polls.

The state is required by law to send monthly lists of the deceased to county auditors so they can purge those names from their voter rolls. But those lists are sent only every few months. That means thousands of deceased voters may have been sent absentee ballots.

"If we don't receive a notice that they're dead, then we have no way of taking them off the rolls," said Dean Logan, the county's elections director. Relatives of the deceased can and do cancel some registrations, he said.

Doris McFarland said she voted for her husband, Earl, who died Oct. 7.

"I called up the elections board and said, 'Can I do it because he wanted me to vote?' " the Duvall woman said. "The person ... said, 'Well, who would know?' I said, 'I don't want to do anything that is wrong.' "

Huennekens disputed that election workers would say such a thing.

McFarland said she signed her husband's name and mailed in his ballot, along with her own. She said she had power of attorney for her 92-year-old husband, who was blind.

"If I did something that wasn't right, you can just throw that ballot out," McFarland said last night.

017422

Huennekens said one of the P-I's eight cases involved an administrative error that showed a deceased person as voting and would be corrected. In four cases, the signatures on the ballot matched. Huennekens said officials needed further information or could not track down enough information on the other cases.

Election officials said that if cases merit potential fraud, they would forward them on for prosecution.

King County keeps a voter list as a record of who voted in elections and to establish requirements for levies and bonds, Logan said.

The preliminary voter list shows that Mary Coffey mailed in a ballot. But the 51-year-old Seattle woman died about two weeks before absentee ballots were mailed.

"She couldn't have (voted). She died on Sept. 29," said her husband, Michael Coffey. He added that he voted by mail, but destroyed his wife's ballot when it arrived in the mail.

"I don't see how she could have voted. It doesn't make sense. There has to be some kind of error that happened."

Election officials were still looking into what happened in her case.

Bob Holmgren said yesterday that he voted on behalf of his late wife, Charlette Holmgren, who died Sept. 29. The West Seattle man filled out his own ballot and hers, and signed both of them.

"Her vote was important to her," Holmgren said. "She was very strongly against Governor-elect Gregoire." Election officials said all signatures on absentee ballots were doubled-checked against the signature on record.

"Our system of allowing people to vote absentee and never checking anything is designed for voter convenience at the expense of security," said Chris Vance, chairman of the state Republican Party.

He said the GOP has found cases of dead people casting ballots, and it plans to challenge the race results.

Votes from the 2004 election have been heavily scrutinized. With Democrat Christine Gregoire set to take office on Wednesday, Republicans are searching for ways to contest the election and force a revote.

Kirstin Brost, spokeswoman for the state Democratic Party, said, "We're very satisfied with the results of this election. It's the most closely examined election in our state's history."

017423

James M. Courneya of Auburn died three months before the election. But the King County voter list shows that he voted absentee.

"He couldn't have. He died Aug. 7," said his wife, Anna Courneya, who resides at the same address as her late husband. She said her husband didn't receive a ballot but she did. She voted absentee but the King County voters list doesn't register her vote, only his.

Huennekens said Anna Courneya voted using her husband's ballot, and because she didn't cast a separate one, that ballot was valid.

The state Health Department sends out lists of the deceased "every two to three months," not every month as the law states, said Jennifer Tebaldi, who helps oversee the department's vital statistics operation.

"We have an informal understanding with the counties that we send it when there's a bulk of information to send."

County auditors received lists of the deceased from the state three times last year -- on Jan. 28, May 5 and Nov. 1, a day before the election. Most of the names they received in May were of people who died in 2003, because of a lag of four to six months in collecting and sending data.

Secretary of State Sam Reed said a statewide voter database, expected in 2006, would improve the process.

He said he hasn't seen the problem of dead people voting occur in Washington. Voter fraud is a serious crime that may be punished with up to 10 years in prison and up to a \$10,000 fine, he said.

"We do not expect people to sit down and vote a ballot just because it happens to arrive in their homes," Reed said. "Double-checks are in place."

Rosalie B. Simpson, 81, died of a massive heart attack Aug. 4, but voter rolls show she voted at the polls.

If a voter dies after having voted, it's still perfectly legal, Logan said.

Owen Skau of Federal Way made his choices before he died last October, said his wife, Maya.

"He filled it out," she said. "He always voted. ... He filled out his vote before he fell and had a heart attack. But he had it filled out. I went ahead and mailed it in."

Other voting problems may also be raised. Timothy Harris, general counsel for the Building Industry Association of Washington, which is preparing a court challenge of the

governor's race, said his group has documented about 50 felons who did not have their voting rights restored but voted in Pierce County.

55,000 dead or duplicate voters deleted from state database

By Andrew Garber
Seattle Times Olympia bureau

OLYMPIA — The Secretary of State's Office has deleted about 55,000 registrations from Washington's voter rolls after finding duplicate records and dead voters with the aid of a new statewide database.

The database, put in place earlier this year, allowed the state to find 19,579 dead people still on the rolls and 35,445 duplicate voter records.

"It's a critical piece to help regain the trust and confidence of the voters of the state of Washington," Secretary of State Sam Reed said Friday. "I think we are slowly but surely rebuilding trust in the system."

Voter confidence was shaken in 2004, when Democratic Gov. Christine Gregoire narrowly beat Republican Dino Rossi after two recounts. The tumultuous election was replete with lost ballots, mismatched signatures, and dead people and convicted felons casting ballots. Rossi challenged the election in court and lost.

Several changes were made by the state Legislature to help keep the problems from happening again, including moving the primary back from the third Tuesday in September to the third Tuesday in August, starting in 2007. That move is expected to give election workers more time to get out absentee and overseas ballots to voters for the general election.

The scrub of the state database found few cases of potential voter fraud. About 30 cases of possible double voting were forwarded to county officials for investigation, Reed said.

The database was paid for with federal money as part of the national 2002 Help America Vote Act. It consolidates individual lists kept by the state's 39 counties into one database.

The information can be cross-checked with records at the state Department of Licensing, the Department of Health, the Department of Corrections and the Social Security Administration.

Booker Stallworth, a spokesman for the Evergreen Freedom Foundation, disagreed that the database will help restore voter confidence.

"The problems we experienced in the 2004 election, that fiasco, have not been addressed in a systematic way," he said. "There are things that can be done that can actually restore voter confidence in the system."

For example, his group advocates requiring all registered voters in the state to supply their legal name and proof of citizenship to guarantee the accuracy of the voter rolls.

Reed said he hasn't pushed for that type of requirement because courts in other parts of the country have viewed such actions as discriminatory.

Reed said his office will do regular checks throughout the year to keep the database up to date and purge names of people who have died or have duplicate registrations. Duplications can occur when people move to a different county and register to vote, but fail to notify officials of the change.

The state also is checking the database for the names of people who are registered to vote and are currently serving time for a felony conviction. So far the state has found about 900 names of people who could be in prison but still are on voter-registration rolls.

"Those are being investigated," Reed said.

A King County Superior Court judge recently struck down a state law that bars felons, who are out of prison, from voting until they have paid all their court-ordered fines and fees. The state is appealing that ruling, but for now Reed's office is not purging those voters.

The Associated Press contributed to this report.

Inquiry into 4 possible cases of ballot fraud

3 county residents suspected of voting for dead relatives

Wednesday, January 26, 2005

By MICHELLE NICOLosi

SEATTLE POST-INTELLIGENCER REPORTER

The King County Prosecutor's Office has asked the King County sheriff to investigate four possible cases of voter fraud: three in which county residents are suspected of having voted for dead relatives and one case in which a person is suspected of voting twice.

Officials would not release the names of the people who are being investigated, as they have not been charged with a crime.

The Prosecutor's Office forwarded the cases to the sheriff Thursday. The county elections office reported the cases to the Prosecutor's Office last Wednesday, said prosecutor's spokesman Dan Donohoe.

"We had an initial review of the complaints and determined that we needed some additional investigation," Donohoe said. "It will be a couple of weeks before we can have a decision whether a charge can be filed."

The Seattle Post-Intelligencer reported Jan. 7 that at least eight people who died well before the November general election were credited with voting in King County.

Two people contacted by the P-I -- Doris McFarland of Duvall and Bob Holmgren of West Seattle -- said they had filled in ballots for their dead spouses. McFarland said yesterday that she had no comment; Holmgren could not be reached for comment.

This month, Holmgren said his wife, Charlette Holmgren, died Sept. 29 at 57. He said she had asked her husband of 40 years to vote for her in the event that she was unable.

Bob Holmgren said: "I honored my wife's request. I did her last wish for her. At the time, I really thought, honestly, it wasn't going to make a difference -- this one vote -- but it was going to make a difference for her. Who would ever guess the (governor's race) vote was going to be that close?"

Washington Republicans -- who are suing to have the results of the governor's race thrown out -- say ballots cast for dead voters and by felons, along with other previously reported problems, could easily have affected the outcome of the election.

017428

Democrat Christine Gregoire defeated Republican Dino Rossi by 129 votes in a hand recount of almost 2.9 million ballots statewide. Rossi had won the initial count and a subsequent machine recount. In a lawsuit, Republicans are trying to prove that mistakes made in the election process invalidate the result.

Donohoe said he could not confirm whether McFarland and Holmgren are among the cases under investigation. If those under investigation are charged and found guilty, they could be sentenced to as much as a year in jail, he said.

Subject August Progress Report - Eagleton Institute of Politics

Hi Karen,

Attached is the August progress report in fulfillment of our Contract to Provide Research Assistance to the EAC for the Development of Voluntary Guidance on Provisional Voting and Voter Identification Procedures. Please note, as per your instructions earlier this month, that the financial report will be sent via Fedex under separate cover to: Ms. Dianna Scott, Administrative Officer, EAC. Also attached to the progress report is a finalized list of our Peer Review Group members. If you have any questions regarding this report, please contact Tom O'Neill at (908) 794-1030 or [REDACTED]

Have a great day,
Lauren Vincelli

OUTLINE

- Introduction
- Provisional Voting
 - Task 3.5
- Voter Identification Requirements
 - Task 3.10
 - Task 3.11
- Project Management
 - Task 3.1
- Financial Report

INTRODUCTION

This report describes our progress from August 1 through August 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

Research on Provisional Voting and a draft of reports on the analysis and alternatives were substantially completed in preparation for the September 6 briefing for the EAC. Important reports such as the National Survey of Local Election Officials' Experience with Provisional Voting; Statistical Review Provisional Voting in the 2004 Election; State-by-state Narrative of Developments in Provisional Voting; and the compilation of Provisional Voting statutes, regulations, and litigation from the 50 states, were all completed in August.

We made further progress on recruiting a balanced and authoritative Peer Review Group (which, as this report is written, is receiving all the documents listed above for review). Ingrid Reed of Eagleton will coordinate the work of the Peer Review Group. A list of the members of the Peer Review Group is attached.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to Tom O'Neill at: tom_oneill@verizon.net or (908) 794-1030.

PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to provisional voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, and Task 3.5 is well underway.

Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of provisional voting and develop alternative means to achieve the goals of provisional voting.

LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with provisional voting in 2004, for which the Eagleton team has lead responsibility.

Description: The Moritz team has created a 50-state chart to summarize information on provisional voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and is near completion with this research.

Progress: We completed the state by state summaries of provisional voting in August. Also complete is a memorandum outlining provisional voting legislative changes since the 2004 election. This material was sent to the EAC as part of the package for briefing on September 6.

Challenges: The variety in the form and frequency of provisional voting legislation from state to state makes creating a snap-shot view across states a challenge.

Work Plan: The analysis of all the information, data, and survey results concerning provisional voting data will be completed in September, on schedule. The alternatives document should also be complete in September, pending response from the EAC on which direction those alternatives should follow.

PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team has researched and compiled a narrative of each state's experience with provisional voting in 2004. The report findings from the survey of 400 local election officials is now complete. The survey results improve our understanding of actual practice in administering provisional voting, including the steps local officials took to prepare for the election.

PROVISIONAL VOTING NARRATIVES

Description: To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with provisional voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to provisional voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

Progress: A state-by-state narrative of developments in Provisional Voting is complete and has been distributed to the EAC and the Peer Review Group. This work has been crucial to the process of constructing our draft analysis and recommendation of alternative approaches for provisional voting required under Task 3.5.

Challenges: The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent multiple revisions in order to incorporate the most up-to-date material available. Had the Election Day Study been available, this task would probably have been simplified considerably.

Work Plan: We completed revisions of the narratives.

SURVEY OF COUNTY ELECTION OFFICIALS

Description: The Center for Public Interest Polling (CPIP) at Eagleton conducted a national survey of county election officials to measure several aspects of provisional voting.

Progress: The analysis of the survey results and findings report are complete.

Work Plan: We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5.

017435

VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of provisional voting, and is becoming the principal focus of our research.

Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

Description: The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

Progress: We are refining the 50 state (plus District of Columbia) chart of data on voter identification. So far collected are voter identification statutes for 35 states. Summaries of the existing voter identification statutes have been written for forty states.

Challenges: Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

Work Plan: The state by state voter identification statute summaries will be completed for the remaining ten states and D.C. and the review of the chart will be completed. Analysis of voter identification data will begin.

SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern, and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

Individual narratives for the states with significant activity in voter ID will provide a resource for understanding the wide range of experience in the 2004 election. The narratives will include an appraisal of the prevalence and nature of vote fraud, a focus of the concern with

increasing the rigor of voter ID requirements. The next key milestones will be the completion of the state database and drafting the first narratives.

VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

Description: We are creating a database and gathering statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election.

Progress: The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also utilized exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout. The analysis of that data is underway.

Challenges: The main challenges to this task include gathering the complete set of changes to Voter ID laws over the past 5 years, and then incorporating those changes into a sound statistical methodology.

Projection: We will continue to work towards resolving the methodology issue, and ultimately produce a final report on this subject. The analysis of the impact that voter identification requirements have upon voter turnout should be completed around mid-September.

PROJECT MANAGEMENT

PEER REVIEW GROUP

Description: A feature of our proposal was the creation of a Peer Review Group (PRG). The Peer Review Group will review our research and methodology and provide valuable feedback and suggestions for the direction of our work.

Progress: The composition of the Peer Review Group has been determined and the membership has been submitted to the EAC. Additionally, as of the date of this report all PRG members have received their first mailing, which included several reports from our research, and a draft of our analysis and alternatives outline for their review.

Challenges: Our timeline for circulating and discussing our research with the PRG has been compromised due to delays in completing the recruitment of members of the group.

Projections: We are in the process of scheduling our first conference call with PRG members for the week of Sept. 19, 2005.

COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

INFORMATION SYSTEM

Description: The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding provisional voting and voter identification.

Progress: At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. As we near the end of the Provisional Voting research and move into the Voter Identification research, we will re-evaluate the volume of files contained in the Information System and update the system.

Projections: The entire project team continues to review all project drafts, and will staff members combine and format all documents and materials in preparation for our final reporting to the EAC.

INTRANET

Description: All project team members have signed on to the Intranet site. The Intranet facilitates the exchange of information and collaboration among project participants.

Progress: Project team members regularly post drafts, completed materials and spreadsheets online for internal review. The intranet has been extremely helpful to team members and serves as an internal website with announcements and important documents readily available to all team members.

FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project August 1 - August 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer, EAC .

Subject: October Progress Report

Karen,

017441

Attached is the Progress Report for October. Please note that this report includes an attachment showing how our study classifies each state on key variables, such as counting out-of-precinct ballots, requirements for ballot evaluation, and other variables. It also displays how the data we used differs for some states for the vote counts reported by the Election Day Survey. We believe that our data is more accurate and complete (see for example the data for New Mexico and Pennsylvania).

I look forward to responding to any questions or concerns you or others at the EAC may have.

Tom O'Neill

OUTLINE

- Introduction
- Provisional Voting
 - Task 3.5
- Voter Identification Requirements
 - Task 3.10
 - Task 3.11
- Project Management
 - Task 3.1
- Financial Report

INTRODUCTION

This report describes our progress from October 1 through October 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

In October we focused on finalizing our Provisional Voting analysis paper, including the development of recommendations to the EAC for a draft guidance document and best practices. These policy prescriptions are based on our research and the comments of the Peer Review Group. We completed a careful review of our data to reconcile it with other sources and identify the latest, most reliable information to use in the analysis. (See the attachment to this Progress Report for the details.) The importance of this demanding effort was described in September's Progress Report.

Also in October we revised the schedule for the project in light of the additional time that has been needed for review of earlier drafts by the EAC and the late completion of the Election Day Study. We will seek a meeting with the EAC in the next several weeks to confer about the schedule to complete the project and alternative approaches that could speed the conclusion of our work.

We will submit to the EAC a final draft of our report, a preliminary guidance document, and draft best practices before Thanksgiving. We project that EAC will take 3 to 4 weeks to review and react to that final draft. And we understand that after its review, the EAC will decide if it should move towards issuing a Guidance Document or recommending best practices. If the EAC does decide to issue a Guidance Document on Provisional Voting, the time needed for a review by the advisory boards is likely to delay a public hearing until early February.

This report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to [REDACTED] or by telephone at (908) 794-1030.

PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Work on the first of these must be complete before proceeding to later tasks. Task 3.4 was completed in August, Tasks 3.5 and 3.6 are nearing completion.

Task 3.5: Analysis and Alternative Approaches. Assess the potential, problems, and challenges of Provisional Voting and develop alternative means to achieve the goals of Provisional Voting.

LEGISLATION, REGULATIONS, AND LITIGATION

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation. This information constitutes the compendium of legislation, administrative regulations, and case law called for under this task. It has provided a base of understanding for the analysis of states' actual experience with Provisional Voting in 2004, for which the Eagleton team has lead responsibility.

Description: The Moritz team has created a 50-state chart to summarize information on Provisional Voting, compiled statutes, case law and administrative procedures regarding Provisional Voting and has completed this research.

Progress: We have completed the memorandum outlining Provisional Voting legislative changes since the 2004 election and we are continuing to clarify the laws prior to these changes.

Challenges: The variety in the form and frequency of Provisional Voting legislation from state to state makes creating a snap-shot view across states a challenge.

Work Plan: The final analysis will be sent to the EAC by Thanksgiving.

PREPARATION FOR AND EXPERIENCE WITH PROVISIONAL VOTING

The Eagleton team has researched and compiled a narrative of each state's experience with Provisional Voting in 2004. The report findings from the survey of 400 local election officials are now complete. The survey results have proven to be instrumental in shaping our understanding of actual practice in administering Provisional Voting, including the steps local officials took to prepare for the election.

PROVISIONAL VOTING NARRATIVES

Description: To construct the narratives, a researcher examined newspaper accounts, state websites, and reports from third-party organizations to gather information on the experience with Provisional Voting in the 2004 election. To organize the information derived from this examination, we created an information system that catalogues information about the states (i.e. whether a state was new to Provisional Voting, the percentage of provisional votes counted, the method of notifying voters if their vote was counted, etc.) and combined it with Moritz's collection and analysis of statutes, regulations and litigation.

Progress: We completed a state-by-state narrative of developments in Provisional Voting and distributed it to the EAC and the PRG. This work has been helpful in understanding the context of the data collected on provisional voting from the states.

Challenges: The primary obstacle to constructing the narratives was difficulty in communicating and obtaining necessary information from various state officials. As a result, the narratives underwent several revisions to incorporate up-to-date and reliable information. Now that so many other analyses, including the Election Day Survey, have been released, we were challenged by different interpretations of the same basic facts. But the reconciliation of interpretation and data collection has been invaluable in establishing rigor in our report.

Work Plan: We completed revisions of the narratives incorporating comments from the PRG and addressing any discrepancies between our findings and other interpretations of similar information included in other studies.

PROVISIONAL VOTING STATISTICAL ANALYSIS

Description: During October the Eagleton research team continued to check its statistical analysis, and worked to reconcile the classifications of this analysis (such as states counting only those provisional ballots cast within the proper precinct versus states that counted ballots cast within the proper county) with the classification made in other parts of this study or in other studies (such as the Election Day Study or *Electionline* reports).

Progress: The effort to double check all of the classifications used in the study is complete. The results of this effort are displayed in the attachment to this progress report, "Characteristics of the Provisional Voting Process -- Classification of the States,"

017446

beginning on page 9. Only Delaware and Arkansas remain unclear in regard to one of the measures, and both states have been contacted to receive clarification in this area..

Challenges: The difficulties encountered have been a result of communication delays and time constraints. Some states have been more responsive to our inquiries about their practices than others. Overall, this is not an irresolvable problem but it does slow the process of completion down.

Work Plan: By early-November the final revision of the statistical analysis, which includes full reconciliation of all data within the study, will be complete. The reconciliation of data is displayed in the attachment to this progress report.

SURVEY OF COUNTY ELECTION OFFICIALS

Description: The Eagleton Center for Public Interest Polling (CPIP) conducted a national survey of county election officials to measure several aspects of Provisional Voting.

Progress: The analysis of the survey results and findings report is complete. As a result of the critique by the PRG, the research team is revising and clarifying the descriptions of the survey design and sample selection process to make the research methods more transparent.

Work Plan: We used the information from the survey in drafting the analysis and alternatives document required under Task 3.5. We will include necessary clarifications regarding survey design and sample selection in the final analysis and alternatives document.

<p>Task 3.6: Prepare preliminary draft guidance document.</p>
--

The report and recommendations now nearing completion constitutes the draft preliminary guidance document. Based on our conversation with the EAC, the draft gives the EAC the option of proceeding with a guidance document or issuing recommendations to the state for best practices, recommendations that would not constitute voluntary guidance. Before proceeding to Task 3.7 (revise the guidance document for publication) or 3.8 (arrange a public hearing on the draft guidance), we will await the EAC's decision on how to proceed.

VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is becoming the principal focus of our research.

Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

Description: The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

Progress: The 50 State (plus the District of Columbia) chart has been completed, the voter identification statutes have been collected for all states and D.C., and summaries of the existing voter identification statutes have been written for all states and D.C.

Challenges: Identifying the relevant statutes has been challenging because of the different terminology used from state to state to codify voter identification issues, and because many states have scattered election law provisions throughout their codes. This variety from state to state makes creating a snap-shot view across states a challenge.

Work Plan: Analysis of voter identification data has begun and will increasingly become the central focus of our work.

SUPPLEMENTS TO LEGAL ANALYSIS

To supplement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

VOTER ID AND TURNOUT ANALYSIS

The second supplemental analysis will provide objective information on a contentious feature of the debate over voter ID in the states: the effects of more rigorous voter ID regimes on voter turnout and the relationship between the voter ID regime and vote fraud. As part of this effort, Eagleton is undertaking a statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters.

Description: We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election

Progress: The collection of data for the Voter ID-Turnout analysis is complete. The assembled database contains population demographic data, voter registration data and voter turnout data from all 50 states, 3113 Counties, and the District of Columbia. We have also used exit poll data collected on Election Day 2004 as a resource for understanding the demographics of voter turnout.

Challenges: The analysis of these data had been postponed until the data reconciliation of Provisional Voting is complete. As a result of the extensive revision and data reconciliation efforts aimed at the Provisional Voting section of our work VID had been temporarily placed on hold. We are now beginning data analysis on the impact of voter identification requirements on voter turnout.

Work Plan: The analysis of the impact that voter identification requirements have upon voter turnout should be completed by early December. Early January is our target to deliver the draft report and outline of alternative policies to the Peer Review Group. In mid January, the EAC would receive a draft report and recommendations that take into account the comments of the PRG.

PROJECT MANAGEMENT

PEER REVIEW GROUP

Description: A feature of our proposal was the creation of a Peer Review Group (PRG). It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

Progress: Eagleton has stayed in touch with members of the Peer Review Group since the September 21st conference call, and has solicited their final comments on the Provisional Voting research. During October, we telephoned two members who did not participate in the conference call to confirm their commitment to serving as members of the Peer Review Group. Profess Guy Charles affirmed his interest. Professor Pamela Karlan did not return the call. The revisions in the schedule for the project have now made it possible to begin the process of scheduling a meeting of the PRG to consider our draft report and recommendations on Voter Identification Issues. We anticipate that meeting will take place the second week of January.

Challenges: No new challenges were encountered during October.

COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

INFORMATION SYSTEM

Description: The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

Progress: At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole. Upon their completion, new documents continue to be added.

Projections: The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

INTRANET

Description: All project team members have signed on to the Intranet site, and regularly post drafts, completed materials and spreadsheets online for internal review. The Intranet facilitates the exchange of information and collaboration among project participants.

FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project October 1- October 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

ATTACHMENT TO OCTOBER PROGRESS REPORT

Characteristics of the Provisional Voting Process Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The categories analyzed here are:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

Please note that:

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and did include it in our analysis.

New vs. Old States

We classified states as “new” or “old” based on the 2001 Electionline study of provisional voting¹ and condensing its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We collapsed all of the states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots as “old” states, because the states in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as “new” states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline’s map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct’s list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter’s name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island’s first use of provisional voting was in 2004 and, therefore, classified the state as “new” to the system of provisional balloting.

¹ This study can be found at: <http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf>.

Table 1 CATEGORIZATION OF STATES -- Old vs New		
Old States	New States	HAVA Exempt or NA
Alaska	Connecticut	Idaho
Alabama	Delaware	Maine
Arkansas	Georgia	Minnesota
California	Hawaii	New Hampshire
Colorado	Illinois	North Dakota
DC	Indiana	Wisconsin
Florida	Louisiana	Wyoming
Iowa	Massachusetts	
Kansas	Missouri	
Kentucky	Montana	
Maryland	Nevada	
Michigan	Oklahoma	
Mississippi	Pennsylvania	
Nebraska	Rhode Island	
New Jersey	South Dakota	
New Mexico	Tennessee	
New York	Utah	
North Carolina	Vermont

Oregon		
South Carolina		
Texas		
Virginia		
Washington		
West Virginia		
26	18	7

Statewide List of Registered Voters

The Electionline preview of the 2004 Election² was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline’s criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases

² “Election Preview 2004: What’s changed, What Hasn’t and Why”. This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

017453

because we found they had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

Table 2			
CATEGORIZATION OF STATES -- Statewide Registration Database			
Had Database 2004	No Database A-N	No Database N-W	HAVA Exempt or NA
Alaska	Alabama	Ohio	Idaho
Arizona	Arkansas	Oregon	Maine
Connecticut	California	Pennsylvania	Mississippi
Delaware	Colorado	Rhode Island	Minnesota
District of Columbia	Florida	Tennessee	New Hampshire
Georgia	Iowa	Texas	North Dakota
Hawaii	Illinois	Utah	Wisconsin
Kentucky	Indiana	Vermont	Wyoming
Louisiana	Kansas	Virginia	
Massachusetts	Maryland	Washington	
Michigan	Missouri		
New Mexico	Montana		
Oklahoma	Nebraska		
South Carolina	Nevada		
South Dakota	New Jersey		
West Virginia	New York		
	North Carolina		
16	27		8

Minnesota has a statewide database but was excluded from the analysis because it did not offer provisional ballots and was exempt from the HAVA requirements.

Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election². States that evaluated ballots cast in a precinct where the voter was not registered were categorized as “out-of-precinct.” States that invalidated such ballots were categorized as “In-precinct only.”

Table 3
CATEGORIZATION OF STATES – Counting Out-Of-Precinct Ballots

Out-of-Precinct	In-Precinct Only	HAVA EXEMPT OR NA
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi

	Virginia	
	West Virginia	
17	26	7

Voter Identification

We relied on Electionline studies, including the Voter Identification study³ and the 2004 Election Preview, to classify the states on their requirements for voter identification. Each state’s categorization is taken directly from the Electionline studies except Hawaii.⁴ The five different, and increasingly rigorous, categories are: Give Name (8 states), Sign Name (14 states), Match Signature (8 states), Provide ID (15 states), and Photo ID (5 states).

³ This study can be found at: <http://electionline.org/Portals/1/Publications/Voter%20Identification.pdf>

⁴ In 2004, ElectionLine listed Hawaii as requiring identification. Our review of statutes revealed that Hawaii could require photo ID. Since that is the most rigorous form of identification that may be required of voters, we classified Hawaii under this category.

017455

Table 4**CATEGORIZATION OF STATES -- Forms of Identification Required**

States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.

Give Name	Sign Name	Match Signature	Provide ID	Photo ID
<i>Maine</i>	California	Illinois	Alabama	Florida
Massachusetts	DC	Nevada	Alaska	Hawaii
<i>New Hampshire</i>	<i>Idaho</i>	New Jersey	Arizona	Louisiana
North Carolina	Indiana	New York	Arkansas	South Carolina
Rhode Island	Iowa	Ohio	Colorado	South Dakota
Utah	Kansas	Oregon	Connecticut	
Vermont	Maryland	Pennsylvania	Delaware	
<i>Wisconsin</i>	Michigan	West Virginia	Georgia	
<i>Wyoming</i>	Minnesota		Kentucky	
	<i>Mississippi</i>		Missouri	
	Nebraska		Montana	
	New Mexico		<i>North Dakota</i>	
	Oklahoma		Tennessee	
	Washington		Texas	
			Virginia	
9	14	8	15	5

South Dakota complicates the effort to assign each state to a category. It permits voters to sign an affidavit that would allow them to vote without presenting photo ID. While Hawaii did not normally require photo ID, its statutes gave challenged voters the opportunity to respond by producing a photo ID.

Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

Table 5				
CATEGORIZATION OF STATES – Ballot Evaluation Methods				
<i>States in italics are exempt from HAVA or did not report Provisional Ballot data and are not included in the analysis.</i>				
Signature Match	Data Match	Affidavit	Return with ID	NA
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire

Data Collection

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state’s election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

Table 6	
Updated information by State	
Received Updated Data	Did Not Receive Updated Data
California	Alabama
District of Columbia	Alaska ⁵
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland ⁶	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska ⁷	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
26 States	25 States

⁵ Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

⁶ Maryland reported provisional ballots that were counted per county, but not number cast.

⁷ Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

017455

Data Differences with Election Day Study

The data used in this study differs from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished, on the schedule laid out in our work plan. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

State	EDS Numbers Cast/Counted	Our Numbers Cast/Counted	Differences	Updated Info from State?
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No
Colorado	51,529/39,086	51,477/39,163	52/77	No
Georgia	12,893/4,489	12,893/3,839	0/650	No
Hawaii	346/25	348/25	2/0	Yes
Iowa	15,406/8,038	15,454/8,048	48/10	Yes
Kansas	45,535/32,079	45,563/31,805	28/274	Yes
Montana	688/378	653/357	35/21	Yes
Nebraska	17,421/13,788	17,003/13,298	418/490	Yes
Nevada	6,153/2,446	6,154/2,447	1/1	Yes
New Mexico	6,410/2,914	15,360/8,767	8,950/5,853	Yes
N. Carolina	77,469/50,370	77,469/42,348	0/8,022	No
Ohio	157,714/123,902	158,642/123,548	928/354	Yes
Pennsylvania	No data	53,698/26,092	N/A	Yes
Texas	35,282/7,156	36,193/7,770	911/614	Yes
Vermont	121/30	101/37	20/7	No
Virginia	4,608/728	4,609/728	1/0	Yes
Washington	92,402/73,806	86,239/69,273	6,163/4,533	Yes
Wisconsin	374/119	373/120	1/1	No

- Project Management
 - Task 3.1
- Financial Report

INTRODUCTION

This report describes our progress from December 1 through December 31, 2005. It includes brief descriptions of key tasks; progress made; challenges encountered or anticipated; milestones reached; and projections for work to be completed in the coming month.

In December we continued to make progress in the research needed for the draft report on voter identification requirements. We completed a careful review of data on the effect of various voter id regimes on turnout and worked to reconcile that information other sources and identified the latest, most reliable information to use in the analysis.

We still await the EAC's comments on our Provisional Voting analysis paper, which included our recommendations to the EAC for best practices. Since the submission of our Provisional Voting report to the EAC on November 28, 2005, our efforts have been entirely aimed at the completion of the voter identification research. We have been advised that EAC will take several weeks to review and react to our final draft on provisional voting.

As a result of such unanticipated delays we have revised the schedule for the project. Early in this reporting period, we requested from EAC a no-cost extension of the contract through the end of February. At this point, we have extended the no-cost extension request through March, so that we will have adequate time to revise our report once we receive feedback from the EAC.

In the meantime, as we await a response from the EAC, we are moving ahead quickly on the statistical analysis of voter identification data and summarizing the legal research that was

completed earlier. We are working with the Peer Review Group to arrange a date for it to comment on the draft of the Voter ID analysis and recommendations.

This Monthly Progress Report is divided into 3 sections: Provisional Voting, Voter Identification Requirements, and Project Management. Each section references specific tasks described in paragraph 3 of the contract. The Financial Report will be sent separately by the Rutgers Division of Grant and Contract Accounting.

Please direct questions or comments about this report to tom_oneill@verizon.net or by telephone at (908) 794-1030.

PROVISIONAL VOTING

Tasks 3.4 – 3.9 in our contract relate to Provisional Voting. Task 3.4 was completed in August, and Tasks 3.5 and 3.6 were completed in November. We await comments from EAC on the draft report.

Task 3.6: Prepare preliminary draft guidance document.

The report and recommendations which were sent to the EAC on November 28, 2005 recommends against the adoption of a guidance document per se and advises that the EAC adopt its recommendations as best practices. That recommendation followed agreement by the EAC with that course of action. The submission of that report and recommendations, however, constitutes the document required under this task. Before proceeding to Task 3.7 (revise the guidance document for publication) or 3.8 (arrange a public hearing on the draft guidance), we await the EAC's decision on how to proceed.

VOTER IDENTIFICATION REQUIREMENTS

The contract lists 7 tasks (3.10 – 3.16) related to Voter Identification Requirements. The research on Voter ID requirements is proceeding concurrently with our work on the experience of Provisional Voting, and is the principal focus of our research at this time.

Task 3.10: Legislation, regulations, and litigation

The research team at the Moritz College of Law has the lead responsibility for the collection and analysis of legislation, administrative procedures and litigation with regard to Voter Identification Requirements. This collection of material is nearing completion. It will constitute the compendium of legislation, administrative regulations, and case law called for under this task.

Description: The Moritz team has compiled statutes on Voter Identification, and will provide a summarized analysis of this research to the project team for review.

Progress: we have completed: the 50 state (plus D.C.) chart, the collection of voter identification statutes for all states and D.C., and summaries of the existing voter identification statutes. Moritz has completed its review of voter identification litigation and has summarized the results in a memo. Moritz and Eagleton have reviewed all research, clarified the categorization of that research on our charts, and reconciled the research categories used in the two different analyses.

Challenges: The biggest challenge in the reconciliation process is understanding the comparative strengths of different primary source materials. Despite the necessity this has created to reconcile conflicting data from time to time, the collaboration has strengthened the rigor of our efforts by shining a light on the raw data.

Work Plan: During January, we will continue our analysis of our voter identification research, and we will complete the memo summarizing the major litigation surrounding voter identification requirements. We will identify the most important issues and best practices in the area of voter identification, and to develop our voter identification document for the EAC.

RESEARCH EFFORTS

To complement the legal analysis, the Eagleton team is undertaking two research efforts: First, compiling information on the debate over voter ID in the states; and second, estimating the effect on turnout of different voter ID regimes. Tracking the continuing political debate over voter identification reveals that the relatively narrow HAVA requirements for voter identification have apparently sparked in many states a broader concern and a sharp political debate over rigorous identification requirements for all voters. The research follows these developments both to monitor possible secondary effects of

HAVA on voter ID, and to provide a rich collection of alternative approaches for consideration.

In the upcoming month, Eagleton will continue to examine and categorize voter registration forms across the states to see what forms of identification are requested from mail-in registrants in order to highlight how easily accessible states make information about voter identification. The difficulty will be determining the 2004 status of the states, especially because most of this material is gathered from state websites which at this point have been updated since 2004.

VOTER ID AND TURNOUT ANALYSIS

The statistical analysis to gauge the effect of a state's voter ID regime on turnout, especially turnout by minority and elderly voters, as projected, was completed during the month of December.

Description: We have created a database and gathered statistics on the effects of state-level voter identification requirements on voter turnout at the county-level in the 2004 election. In November, we have analyzed both aggregate- and individual-level data to determine whether there is any relationship between voter turnout and the various forms of voter identification states require.

Progress: During December, the analysis was completed for two data sets: County-level data that includes registration and turnout rates for 2000 and 2004, as well as Census measures and indicators of the type of voter identification requirements that were in existence at the time of the 2004 presidential election. The second data set consists of the voter supplement to the November 2004 Current Population Survey. This data set allows for testing of the same hypotheses at the individual level. The findings from the aggregate data set suggest that voter ID requirements have their greatest effect at the registration stage, as opposed to the turnout stage. A number of control variables were added to the analysis and the results of these efforts will be summarized in our report.

Challenges: These analyses use hierarchical linear modeling. Because voter identification requirements vary by state, one must pay special attention to other, unseen state-level influences on the data. The models are difficult to run and interpret, so the analyses are time-consuming

Work Plan: We will draft the findings from the statistical analyses by the end of January. The report will tie these findings to the research findings summarized in the litigation memos to create our first draft Voter Identification report.

017465

017464

PROJECT MANAGEMENT

PEER REVIEW GROUP

Description: A feature of our proposal was the creation of a Peer Review Group (PRG). It reviews our research and methodology and provides valuable feedback and suggestions for the direction of our work.

Progress: During the month of December, Eagleton contacted the PRG Members to reschedule the potential conference call session for mid-February due to the delays in getting the EAC's feedback on our report. We have asked the PRG members to reserve a couple of dates in mid-February for a conference call meeting to review the Provisional Voting report with the EAC's comments and the first draft of our Voter Identification Report.

Challenges: No new challenges were encountered during December.

COORDINATION AND INFORMATION MANAGEMENT

Collecting and merging information and data from myriad sources is a demanding requirement of this research. We have developed two principal mechanisms to facilitate the analysis of the material collected or created in the project: an information system and an internal website for easy access to drafts and reports.

INFORMATION SYSTEM

Description: The statutory data and reports prepared by the Moritz College of Law is being merged with the political and procedural data and analysis prepared by the Eagleton Institute of Politics to provide a cohesive final product to the EAC, which will include a compendium of case law and statutes regarding Provisional Voting and voter identification.

Progress: At this point in the research process, many documents are complete after a lengthy process of circulating drafts among team members. We have reorganized our system by separating final drafts from earlier versions of documents, discarding dated files contained in the Information System, and updating the system as a whole. Upon their completion, new documents continue to be added. During December we rearranged the folders on the hard drive and created a master document detailing which folder each report, memo, or data source could be found in.

Projections: The entire project team continues to use the Information System which contains the above referenced research, in working toward the preparation for our final reports to the EAC.

01/20/05

INTRANET

Description: All project team members have signed on to the Intranet site, and regularly post drafts, completed materials and spreadsheets online for internal review. The Intranet facilitates the exchange of information and collaboration among project participants.

FINANCIAL REPORT

The financial reporting for this project is supervised and prepared by the Division of Grant and Contract Accounting (DGCA) at Rutgers. Financial reporting on grant accounts is limited to actual expenses that have been incurred during the reporting period. Our contact at DGCA is: Constance Bornheimer, (732) 932-0165, EXT. 2235.

A detail of expenses incurred from project December 1- December 31, 2005, will be sent under separate cover to: Ms. Dianna Scott, Administrative Officer at the EAC.

Subject Voter ID Paper --Final Draft

Karen,

017468

Attached is the final draft of the Voter ID paper, with recommendations for the EAC to consider promulgating as best practices. Two appendices are included as part of the draft and a third, the statistical analysis of the effects of different voter ID requirements on turnout, is attached separately to this email.

We look forward to discussing this final draft with you and with the commissioners on April 3. I'll be preparing a Powerpoint presentation for that meeting. Any guidance you can give me later this month on particular questions that briefing should address would be appreciated.

The Moritz-Eagleton team will be meeting next Tuesday at 9:30 a.m.. If you have preliminary comments you would like us to consider, that meeting would be a most convenient occasion to discuss them.

REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

1. Introduction and Report Background

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve implementation of the requirements for voters to show identification pursuant to [statute or regulation citation] It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

2. Voter Identification –Background and Approach of the Study

Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The burden of providing required ID documents on the voter may be greater at the polls on Election Day than at the time of registration. The burden of checking ID, even as simple as a signature match, can be much greater on election workers at the polls than on those registering voters. Poll workers may be faced with long lines and limited time. This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.¹ The emphasis here is on Voter ID on Election Day and afterwards as election judges evaluate provisional

¹ As the Carter-Baker Commission noted, photographic ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify identification. Commission on Federal Election Reform, pp 46-47.

• 017470 •

**Deliberative Process
Privilege**

FINAL D R A F T

ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

This analysis takes a view of voter ID issues broader than the rather narrow identification requirements in HAVA. Much of the national ferment over voter ID goes beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those casting a ballot for the first time who had not registered in person. The controversy in the states over voter ID stems from the HAVA requirements, goes beyond those requirements, and sets the context for the analysis here.²

Identification is often described as the critical step in protecting the integrity of the ballot, the process that ensures that the potential voter is eligible and permitted to cast a ballot and one ballot only. In fact, ensuring ballot integrity requires a perspective that takes in the entire voting process. Protecting the integrity of the ballot requires more than preventing the ineligible from voting. It also should ensure that all those who are eligible and want to vote can cast a ballot that counts, and that they can effectively cast a ballot for the candidate of their choice. The protection effort must take into account all forms of voting, including absentee ballots, and embrace each step in the process. A voting system that establishes onerous requirements for voters to identify themselves may prevent the ineligible from voting, but it may also prevent the eligible from casting a ballot. If the ID requirements of a ballot protection system block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or forget to bring to the polls the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This analysis does not include consideration of the incidence of vote fraud, the forms that it takes, nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. The EAC has commissioned a separate study of vote fraud and instructed us not to address that issue in this research.

² Harvard Law Review 119:1127. "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA. . . . HAVA makes explicit that it shall not 'be construed to prevent a State from establishing election technology and administration requirements that are more strict than' HAVA itself provides. The states have accepted the invitation. "

FINAL D R A F T

Nonetheless, a broad view of ballot integrity is needed to appreciate the background and context of this narrower study. We explore the inter-relationships between Voter ID requirements and Provisional Voting and estimate the effects of various voter id requirements on turnout and on the casting of provisional ballots.

Voters lacking required ID, or who have ID that does not reflect their current address, may be able to vote only by casting a provisional ballot.³ To the extent that stricter voter ID requirements divert more voters to the provisional ballot, voter ID requirements can put stress on the already pressured management of the polling place. Administering provisional ballots is more expensive than the normal ballot. Scrutiny of ID can create lines at the polling places, lines made longer as voters are diverted to the provisional voting line. Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle that will keep more citizens from the polls. A review of voter identification practices should keep in mind that America's problem may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes will be more effective if based on clear standards –legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

- Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?
- How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?⁴
- How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity

³ For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

⁴ See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

FINAL D R A F T

that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?⁵

- How cost-effective is the system? Does it increase the security of the ballot at an affordable cost, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.
- If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?⁶
- Does it comply with the letter and spirit of Voting Rights Act?
- The seventh question is more difficult to measure than those described in the 6 questions outlined above. The Voter ID requirements should have a neutral result on the composition of the qualified electorate. That is, those requirements should not be designed to reduce the turnout of particular groups of voters who may have a propensity to support one party over another. Whatever the requirement may be, all citizens should be able to comply with it easily and at no or minimal cost.

Summary of findings and conclusions

Voter turnout at the state level in 2004 declined where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Including other factors beyond voter id requirements diminishes the influence of voter ID on turnout. But the analysis still offers some support for the hypothesis that as the burden of voter identification

⁵ In New York, in 2004, disparities in training and voting information were made all too apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

⁶ For example, the Carter-Baker Commission accompanied its recommendation for a national voter ID card with a recommendations for an affirmative effort by the states to reach out and register the unregistered, to use the new Voter ID regime as a means to enroll more voters.

FINAL D R A F T

requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.⁷ And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice that before states adopt a change described as increasing ballot security, states should publish an analysis of the number of eligible, potential voters that the new requirement may keep away from the polls or be permitted to cast only a provisional ballot as well as an estimate of the number of ineligible voters who will be prevented from voting.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. The data should be analyzed to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent and should describe the dynamics of voter ID in preserving the security of the ballot?

⁷ Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.

FINAL D R A F T

- Useful information could be supplied by exit polling. It would identify those who had cast a provisional ballot and ask why they were unable to cast a regular ballot. Answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
- Polling to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter id requirements on electoral participation.
- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three criteria: the convenience of the voter, the total time allowed to evaluate ballots⁸, and the safe harbor provision in presidential elections.

⁸ Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

3. Voter ID and Turnout

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, *Voter ID Requirements*. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility.

TABLE 1 -- Voter ID Requirements

State	Forms of ID Required 2004	Current ID Requirement for First-Time Voters	Current ID Requirements for All Other Voters	Verification Method for Provisional Ballots

^In Florida and Louisiana, states that required a photo id in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

^^In these states in 2004, voters lacking a photo ID could vote by providing other ID.

*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

**State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

***Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

****Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

*****Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compare to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

*****Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

In 9 states, voters were required merely to state their names so that poll workers could locate them in the registration book. In 14 states, voters signed their names. In 8 states, voters' signatures were matched with a specimen signature. In 15 states voters had to show some form of ID, not necessarily an official picture ID. And in 5 states, voters were required to show an official photo ID, although in 2004 voters who lacked a picture ID could execute an affidavit and vote a regular ballot.

017477

FINAL D R A F T

This neat assignment of each state to one of a few categories may fail to reflect actual practice at a polling place. Like any system run by fallible people it is subject to wide variation in practice. Voters may be confronted with demands for identification at variance with state statutes or legislation. Other voters may be waved through the process without a look at any document, no matter what the regulations may say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters may encounter.

It is not practical to attempt to capture the wide variety of how voter ID requirements may be actually implemented across the nation's tens of thousands of polling places. Recognizing that means that the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

Effect of Voter ID requirements on Turnout

Summary of Findings and Conclusions

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau.⁹

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each

⁹ See Appendix ____ for the full report on voter ID and turnout.

017478

FINAL D R A F T

level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous. a form of identification, and providing a form of photo identification.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

01-27-09

FINAL D R A F T

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	63.1 %	State Name	61.3 %
Sign Name	58.6 %	Sign Name	60.4 %
Match Signature	62.1 %	Match Signature	59.2 %
Provide Non-Photo ID	57.8 %	Provide Non-Photo ID	57.6 %
Provide Photo ID	57.3 %	Swear Affidavit	58.7 %
Average Turnout (All States)	59.6 %		

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political-- also affect voter participation. Multivariate models that take into account other predictors place the effects of voter identification in a more accurate context. To consider that broader context, our multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground for president, governor or senate voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-

FINAL D R A F T

Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line.

In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line.

Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. (Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting.) Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age in years, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note

FINAL D R A F T

that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

Discussion and Conclusions of the Analysis

The results presented here give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

FINAL D R A F T

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.
- Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.
- Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.
- Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the elderly, while they would be slightly less likely to vote as requirements range from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

The data examined in this analysis could not capture the dynamics of how identification requirements might lower turnout. Do these requirements dampen turnout because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most

FINAL D R A F T

effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

017434

4. Litigation over Voter ID Requirements

There have been a handful of cases challenging identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether or not laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (*Common Cause v. Billups*), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on cases challenging requirements that voters present some form of identifying documents if the photo identification is the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

Photo ID. Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*,

FINAL D R A F T

Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at *1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at *1, 3. The court's decision in this case indicates that courts are likely to look strictly on photo ID requirements.

Privacy. In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions

FINAL D R A F T

suggest that best practice may be to conform to the NVRA's limitation on requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

FINAL D R A F T

5. Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

This information would allow a more informed judgment to be brought to bear in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

017488

FINAL D R A F T

HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

6. Conclusions

The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.¹⁰ The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That research might address that, so far as may be

¹⁰ In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." The exclusion of voters through restrictive ID requirements could affect election outcomes as much as fraud by voters at the polls. *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

FINAL D R A F T

necessary to reduce vote fraud, could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended by our colleague Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed. ¹¹

¹¹ "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they *register* to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote. These electronic photos should satisfy the anti-fraud concerns of conservatives as much as printed photos that citizens would be required to bring to the polls. . . . Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier. "

FINAL D R A F T

APPENDIX –Court Decisions and Literature on Voter Identification and Related Issues

Court Decisions

Summary of Relevant Cases:

Challenges Prevailed:

American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14th Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14th Amendment EPC: likely to prevail

Greidinger v. Davis, 1993

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
 - 14th Amendment EPC: no classification (applied strict scrutiny)
 - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
 - Compelling interests: preventing voter fraud (deemed compelling)
 - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
 - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

Challenges Rejected:

League of Women Voters v. Blackwell, 2004.

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

Colorado Common Clause v. Davidson, 2004

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
 - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
 - Substantive due process and equal protection
 - No improper discrimination

017492

FINAL D R A F T

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

McKay v. Thompson, 2000

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
 - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
 - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
 - Substantive due process: ruled that internal use of SS# not a burden
 - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
 - P&I, Article IV: does not protect in-state citizens
 - P&I, 14th Amend.: no protection for privilege where Congress authorized its infringement

Kemp v. Tucker, 1975

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
 - VRA: ruled that race was not made a "qualification" for voting
 - 15th Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
 - 14th Amendment EPC: ruled there was no distinction among voters

Perez v. Rhiddlehoover, 1966

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
 - VRA: ruled that it was not a "test or device" because it applied equally
 - 15th Amendment: same reasons

Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:

American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at *1 (D. Minn. Oct. 28, 2004).

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at *1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating

017493

FINAL D R A F T

between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at *1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at *3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:

***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that

017494

FINAL D R A F T

provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at *1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at *6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at *10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of

FINAL D R A F T

several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

Current Litigation Concerning Voter ID Issues¹²

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

¹² As of January 2, 2006

FINAL D R A F T

Georgia (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)¹³. In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.¹⁴ As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

Indiana (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

¹³ Litigation documents are available at the Election Law @ Moritz website.

<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

¹⁴ GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

FINAL D R A F T

Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.¹⁵ The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

¹⁵ According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

Analytic Tasks

- Identify how voter ID requirements were implemented around the county to provide a baseline for consideration of other approaches.
- Diagnose the problems and challenges of voter ID and hypothesize alternative approaches.
- Recommend alternative approaches.
- Identify appropriate policy objectives by which to assess alternative approaches to voter ID.

Focus

HAVA's narrow ID requirements draw attention to the issue and helped spark the current debate.

National debate now goes beyond HAVA to focus on stricter ID for all would-be voters.

- Therefore our work takes a broad view of the issue.

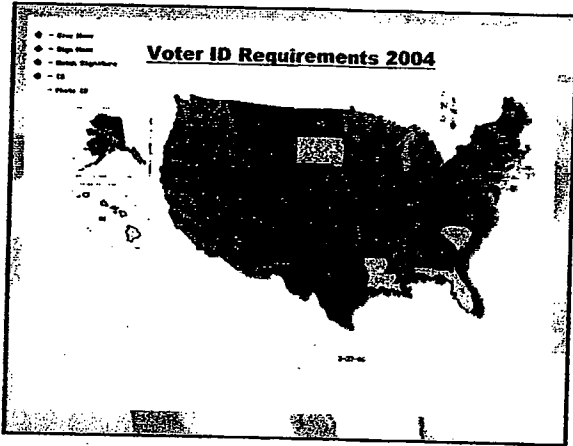

Voter ID and Ballot Integrity

Voter ID – a critical step in protecting the integrity of the ballot by checking that the potential voter is eligible and permitting the voter to cast a ballot and one ballot only.

- Ensuring ballot integrity requires a perspective that takes in the entire voting process.
- Requires more than preventing the ineligible from voting.
- Also should ensure that all those who are eligible and want to vote can cast a ballot that counts.

Vote Fraud Excluded From This Analysis

- Assessing the effectiveness of voter ID in preventing vote fraud should logically include an estimate of the nature and frequency of vote fraud.
- EAC commissioned a separate analysis of the incidence of vote fraud.
- Our analysis does not take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Limitations of the data

2004 data did not permit conclusions about the effect of signature ID laws such as those recently passed in Iowa and Indiana.

The 5 states that required photo ID in 2004 (Alabama, Georgia, Kansas, Louisiana, and Mississippi) who signed an affidavit provided another form of identification to cast a regular ballot.

Analysis of Turnout and Voter ID Requirements

Tim Vercellotti

ID requirements affect turnout

Turnout declined with stricter voter ID requirements

63% of the voting age population turned out in states that required voters to state their names

- 57.9% turned out in states that required photo ID
- Including all states beyond voter ID requirements diminishes the influence of voter ID on turnout.
- Requirement most noticeable in counties with many Hispanic residents or people below the poverty line.

State Voter ID and Turnout

Variation in Turnout Based on Voter ID Requirements

Voter Identification Required in the States	Mean Voter Turnout for States in that Category	
	Maximum Requirement	Minimum Requirement
State Name	63%	61.3%
Sign Name	60%	60%
Match Signature	59.2%	58.2%
Provide Non-Photo ID	57.8%	57.6%
Provide Photo ID	57.3%	Swear

017512

Reports from the voters

CPA in November 2004 asked respondents about their confidence voting.

Stricter ID requirements exert a negative effect on whether survey respondents said they would vote.

- Decline from *Sign* to *Photo ID* was 2.5%
- Small negative effect persists when controlling for other variables such as background state and demographics.

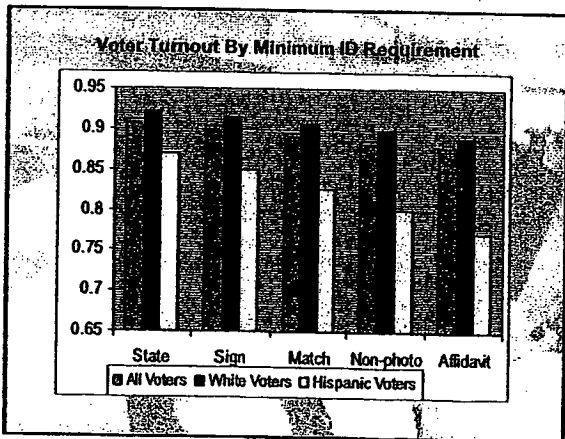

Effect of Stricter Voter ID requirements

Significant reduction in probability of voting by:

- Voters below the poverty line
- Voters with less than a high school education
- Young voters

No effect on the probability of voting by:

- African American voters
- Voters with some college education

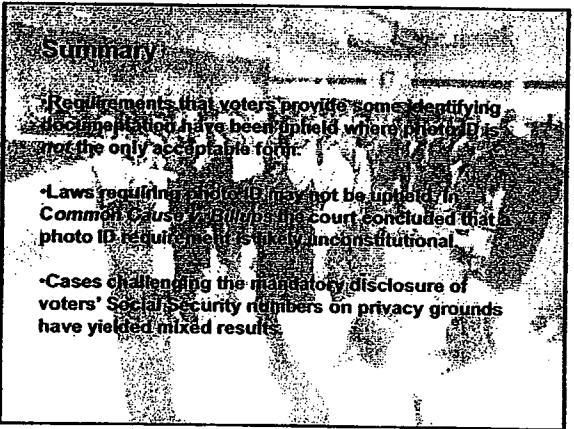

017513

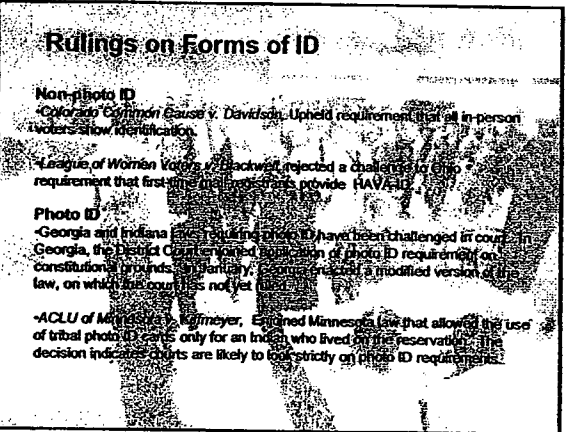

Trends in Litigation

Dan Tokaji

Summary

- Requirements that voters provide some identifying information have been upheld where photo IDs are not the only acceptable form.
- Laws requiring photo IDs may not be upheld. In *Common Cause v. Billups*, the court concluded that photo ID requirements are unconstitutional.
- Cases challenging the mandatory disclosure of voters' social security numbers on privacy grounds have yielded mixed results.

Rulings on Forms of ID

- Non-photo ID**
 - *Common Cause v. Davidson*: Upheld requirement that all in-person voters show identification.
 - *League of Women Voters v. Blackwell*: Rejected a challenge to Ohio requirement that first-time voters provide HAVA ID.
- Photo ID**
 - Georgia and Indiana laws requiring photo ID have been challenged in court. In Georgia, the District Court upheld the photo ID requirement on constitutional grounds. In Indiana, the court struck down a modified version of the law, on which the court has not yet ruled.
 - *ACLU of Minnesota v. Meyner*: Enjoined Minnesota law that allowed the use of tribal photo ID cards only for an Indian who lived on the reservation. The decision indicates courts are likely to look strictly at photo ID requirements.

Privacy

• *Greene v. Davis* (4th Cir. 1993) struck down on due process grounds a Virginia requirement that voters provide Social Security numbers to register. Public disclosure of these Social Security numbers was intended to prevent fraud.

• BUT *McKay v. Thornburg* (6th Cir. 2000) rejected privacy claims based to a Tennessee law requiring Social Security numbers for voter registration.

• NVRA permits requiring only the minimum information needed to prevent duplicate voter registration and ensure eligibility. The distinction between the two cases appears to be between the use of Social Security numbers for internal purposes, which was deemed permissible, and the disclosure of those numbers to the public, which took place in *Greene*.

Conclusions

• Courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot.

• Courts will balance the legitimate interest in preventing election fraud against:

- Citizen's right to privacy
- Reasonableness of requirements for identify documents

• To forestall destabilizing challenges to election outcomes, voter ID requirements should be limited to the minimum needed to prevent duplicate registration and ensure eligibility.

Conclusions, Recommendations and Discussion

Tom O'Neill

Policy Perspective

If the ID requirements that block ineligible voters from the polls also prevent eligible voters from casting a ballot because they lack ID, the integrity of the ballot may not have been improved.

Policy Perspective Questions

- Are voter ID requirements based on valid studies of the incidence of the vote fraud they aim to prevent?
- Is the increase in ballot security promised by voter ID requirements reasonably proportional to the cost, measured in both monetary and other terms?
- Can all citizens comply with the requirements easily?
- If a requirement is likely to reduce turnout of eligible voters, what steps can or will be taken to ameliorate the adverse consequences?
- Do the requirements have a neutral result on the composition of the qualified electorate?

Continuing uncertainty

- Dynamics of Voter ID requirements, that is how they work in practice, are not well understood.
- Policy process should recognize this uncertainty – less certainty, more humility.
- Improve debate by additional research sponsored by the EAC.

Conclusions

More information is needed about:

- The kinds of vote fraud that could be prevented by more rigorous voter ID so that it is possible to evaluate tradeoffs between ballot access and ballot integrity.
- Why potential voters may be required to cast a provisional ballot.
- The ID-related reasons for rejecting provisional ballots during the 2006 and subsequent elections.
- The experience of voters in meeting ID requirements.

The EAC should:

A. Recommend the publication of a "Voting Impact Statement" by states considering changing their voter ID requirements. It would estimate the number and demographics of:

1. Eligible potential voters that a proposed stricter ID requirement may keep away from the polls or be permitted to cast only a provisional ballot; and
2. Assess the number of ineligible voters who will be prevented from voting by stricter ID requirements.

The EAC should:

B. Encourage or require the states to:

1. Collect and report reliable, credible information on the relationship between ballot access and ballot security.
2. Survey provisional voters (anonymously) to determine why they were unable to cast a regular ballot.
3. Conduct pre-election polling to ask voters what they know about the voter ID requirements.

Examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification.

Consider factors:

- a. Convenience of voters
- b. Total time allowed to evaluate ballots
- c. If a ballot provision in presidential

Time period	Number of States	% PB Counted
< 1		35.4%
1	15	47.1%
> 1	14	60.5%

Advise the states that to forestall destabilizing effects on election outcomes, voter ID requirements should be limited to the minimum needed to prevent duplicate registration and ensure eligibility.

Briefing for

U. S. Election Assistance Commission

April 3, 2006

TO: Thomas Wilkey
FROM: Karen Lynn-Dyson
SUBJECT: Peer Review of Eagleton Statistical Analyses
DATE: April 14, 2006

As we've discussed, there are lingering doubts on the part of several Commissioners and EAC staff about the accuracy and validity of the statistical analysis which Eagleton has performed on its voter identification study. Many of Eagleton's conclusions, observations and recommendations rest on this statistical analysis.

A statistical analysis was also performed on Eagleton's study of provisional voting. Although their conclusions and recommendation do, in some measure, rely on their statistical analysis and research, they do not appear to be as critical to this study's findings as they are for the voter identification study.

Before a final Eagleton report on Provisional Voting and Voter Identification are given to the EAC Standards Board and Board of Advisors for review at their May meeting, I recommend that a small peer review group be convened by the EAC. A review by a small panel, comprised of 3-4 experts with backgrounds in election research methodologies and statistics, should yield us the validation and verification of the reliability and validity of the Eagleton research, which we are seeking.

I am further recommending that such a panel be convened either telephonically or in person at EAC's offices on May 10 or May 11. In addition to select EAC staff and interested Commissioners, Eagleton's key researchers/statisticians responsible for conducting the research and analysis would be present during the review. Prior to the review panelists would be given background materials describing, in detail, the methodology and analysis used in the provisional voting and voter identification studies.

The peer review panelists which have been recommended to me include:

Jonathan Nagler- NYU
Jan Leighley- University of Arizona
Ben Highton -UC Davis
Adam Berinsky- MIT
Bernard Grofman- UC Irvine

017519

There may be one or two others whom the Commissioners or EAC staff may wish to recommend.

As you will note, the proposed review panel represents a wide geographic diversity. While budgetary constraints might make a one day in-person peer review meeting unrealistic, it is likely to yield a richness of review and exchange that will not be possible through a series of conference calls with the review panel. Such a one-day peer-review meeting is likely to cost in the range of \$7,000. This figure would include a small honoraria that would be given to each peer reviewer.

I look forward to your comments and recommendations. Planning for such a review will need to begin as soon as possible.

Subject Revised Voter ID Analysis

Karen,

Attached is Tim Vercellotti's Voter ID analysis revised to use Citizen Voting Age population as the base for turnout calculations and to take account of comments or issues raised by the EAC and our Peer Review Group. This draft is for distribution to the reviewers who will meet by teleconference on May 11, at, we understand, 11:30 a.m.

You are receiving this at the same time that it is being distributed to the Engleton-Moritz team so that the new reviewers will have a week to prepare for our conversation on the 11. Early next week you will receive a revised summary paper on Voter ID that incorporates the new data and findings in Tim's revised analysis. That too will be for distribution to the new reviewers.

017821

Analysis of Effects of Voter Identification Requirements on Turnout

Tim Vercellotti

Eagleton Institute of Politics

Rutgers University

May 4, 2006

Introduction

A key area of disagreement in the policy debate over voter identification requirements concerns whether such requirements dampen voter turnout. Opponents of voter identification laws argue that they constitute an institutional barrier to voting, particularly among the poor, African-Americans, Hispanics, the elderly and people with disabilities (Baxter and Galloway 2005, Electionline.org 2002, Jacobs 2005, Young 2006). This argument holds that voter identification requirements create an extra demand on voters, and thus may discourage some of them from participating in elections. Further, critics of voter identification requirements contend that the effect is greater for some specific types of requirements. For example, critics argue that requiring voters to produce government-issued photo identification on Election Day is more demanding than, say, requiring that they state their names at the polling place. Supporters of voter identification requirements, on the other hand, argue that the requirements are necessary to combat voter fraud, safeguard the integrity of the electoral process, and engender faith in the electoral process among citizens (Young 2006).

This report examines the potential variation in turnout rates based on the type of voter identification requirement in place in each state on Election Day 2004. It draws on two sets of data – aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. Classification of voter identification requirements comes from a review of state statutes conducted by the Moritz College of Law at the Ohio State University.

Types of voter identification requirements

Based on research performed for this study by the Moritz College of Law, states had one of five types of requirements in place on Election Day 2004. Upon arrival at polling places, voters had to: state their names (nine states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (eight states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).¹ It was then possible to code the states according to these requirements, and test the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification.

¹ Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

017522

Deliberative Process
Privilege

But election laws in numerous states offer exceptions to these requirements if individuals lack the necessary form of identification, and laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot (as opposed to a provisional ballot). Thus it is also possible to categorize states based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). For the purposes of this analysis I treated the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit.

Estimating turnout among citizens in the voting-age population

This report examines turnout among U.S. citizens of voting age in both the aggregate- and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

In the aggregate data, determining the percentage of the voting-age population that has U.S. citizenship posed a methodological challenge. The Census Bureau gathers information on the citizenship status of adults ages 18 and older only during the decennial census. While the Census Bureau provides annual estimates of the population to account for changes between decennial censuses, the bureau does not offer estimates for the proportion of the adult population who are citizens as part of the annual estimates. To address this issue I estimated the 2004 citizen voting-age population for each county using a method reported in the analysis of the 2004 Election Day Survey conducted for the U.S. Election Assistance Commission (U.S. Election Assistance Commission, 2005). I calculated the percentage of the 2000 voting-age population who were citizens in 2000, and applied that percentage to the July 1, 2004 estimates for voting-age population in each county. In other words, I assumed that the percentage of the voting-age population that had U.S. citizenship in 2004 was similar to the percentage of the voting-age population who were citizens in 2000.²

² McDonald and Popkin (2001) recommend an even more stringent approach to voter turnout calculations. They point out that voting-age population estimates include adults who are ineligible to vote (such as convicted felons), and the estimates overlook eligible citizens living overseas. While estimates of the voting-eligible population are available at the state level, I was unable to find such estimates for individual counties, which provide the unit of analysis for the aggregate data analyzed here.

Analysis of aggregate data

If one treats maximum voter identification requirements as an ordinal variable, with photo identification as the most demanding requirement, one finds some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ($r = -.30, p < .0001$). In considering the array of minimum requirements, with affidavit as the most demanding requirement, voter identification also is negatively correlated with turnout ($r = -.20, p < .0001$). Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

[Table 1 here]

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters.

Voter identification requirements alone, however, do not determine voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. I estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. I coded the voter identification requirements on a scale of one to five, with one representing the least demanding form of identification and five representing the most demanding form of identification. To capture electoral context I included whether the county was in a presidential battleground state (any state in which the margin of victory for the winning candidate was five percent or less), and whether the county was in a state with a competitive race for governor and/or the U.S. Senate (also using the threshold of a margin of victory of five percent or less). Drawing from U.S. Census projections for 2003, I included the percentage of the voting-age population in each county that was Hispanic or African-American to control for ethnicity and race. I controlled for age using the 2003 Census projection for the percentage of county residents age 65 and older, and I controlled for socioeconomic status by including the percentage of individuals who fell below the poverty line in each county in the 2000 Census.

I estimated a series of random intercept models to account for the likelihood that data from counties were correlated within each state (for further explanation of random intercept and other multilevel models, see Bryk and Raudenbush 1992, Luke 2004, Singer 1998).³ The

³ The data analyses provided evidence that there was, indeed, a clustering of data within each state. The intraclass correlation, bounded by 0 and 1, measures the variation between the states. A random intercept model using only the

dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the estimated citizen voting-age population that voted in the 2004 election.

[Table 2 here]

Turning first to an analysis using the maximum identification requirements, those requirements had a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. Both contextual factors (whether the county was in a state that was a battleground state and whether that state had a competitive race for governor and/or U.S. Senate) increased voter turnout. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-Americans in the county exerted a positive effect on voter turnout, and the percentage of individuals living below the poverty line had a negative effect. The effect of the percentage of Hispanic adults in the county on turnout fell just short of statistical significance ($p = .05$).

I then sought to test the hypothesis that voter identification requirements dampen turnout among minorities and the poor, a claim voiced by some critics of the requirements. To test this idea I incorporated a series of interactions between the maximum voter identification requirements and the percentage of African-Americans, Hispanics, and poor individuals in the counties. The interaction involving African-Americans was not significant, but those involving Hispanics and poor individuals were significant.⁴ In addition, adding the interactions to the model resulted in the percentage of Hispanics in the population having a direct and negative effect on turnout. The interactions suggest that voter identification requirements have a greater effect for Hispanics and those living below the poverty line. A chi-square test of the difference in the deviance for each model (represented by $-2 \log$ likelihood in Table 2), shows that the model with interactions provides a better fit to the data ($p < 0.005$).

I also estimated the effects of the minimum voter identification requirements holding constant the effects of electoral context and the demographic variables.

[Table 3 here]

The effects of the minimum requirements fell short of statistical significance ($p = 0.08$). The battleground state variable continued to exert a positive influence on turnout, while the presence of a competitive race for governor and/or U.S. Senate had no statistically significant effect. As in the maximum identification requirement model, as the percentage of the population that is poor increased, turnout declined. As the percentage of elderly increased, so did turnout. The proportion of African-Americans in the population had a positive effect on turnout, while the percentage of Hispanics did not affect turnout.

intercept as a predictor generated an intraclass correlation of .43, indicating considerable variation between the states.

⁴ The interactions are labeled in Tables 2 and 3 as VID*African-American, VID*Hispanic, and VID*Poverty. To calculate the effects of voter identification requirements for a specific group, one must add the estimates for voter identification, the group, and the interaction. Doing so for Hispanic adults results in an estimate of $-0.13 [-0.03$ (voter id) $- 0.13$ (Hispanic) $+ 0.03$ (voter id X Hispanic)].

Adding interactive effects to the model resulted in a statistically significant and negative effect of minimum voter identification requirements on turnout. The percentage of Hispanic adults in the county had a significant and negative effect on turnout, and the percentage of individuals below the poverty line continued to have a negative effect. Interactions between the percentages of Hispanics and those below the poverty line and minimum voter identification requirements also were significant. The percentage of African-Americans in the county and the interaction between African-Americans and voter identification requirements were not significant. A chi-square test for the difference in fit between the two models showed that the model with interactions provides a better fit to the data ($p < .025$).

Analysis of the aggregate data at the county level generates some support for the hypothesis that as the demands of voter identification requirements increase, turnout declines. This is particularly so for counties with concentrations of Hispanic residents or individuals who live below the poverty line. But aggregate data cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote. For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).⁵ Married individuals also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993). To fully explore the effects of voter identification requirements on turnout, it is important to examine individual-level data as well.

Individual-level analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the advantages of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.⁶ The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The analyses reported here are based on reports from self-described registered voters. I omitted those who said they were not registered to vote. I also excluded those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. In addition, I eliminated from the sample respondents who said they were not U.S.

⁵ A reviewer for an earlier version of this paper recommended adding an education variable to the aggregate model. One version of the aggregate model not reported here included the percentage of adults in the county who had at least a college degree. The measure was highly collinear with the percentage of residents living below the poverty line, necessitating removal of the college degree variable from the model.

⁶ It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

citizens because the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey.

The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.⁷ As in the analysis of aggregate data, I coded voter identification requirements for each respondent's state of residence on a scale of one to five, with one representing the least demanding requirement (stating one's name) and five representing the most demanding requirement (photo identification or affidavit).

In addition to the voter identification requirements, the models include two other state-level factors that might have influenced turnout in 2004: whether the state was considered a battleground state in the presidential election, and whether there was a gubernatorial and/or U.S. Senate race in the state (see Alvarez and Ansolabehere 2002, Alvarez et al. 2004, and Kenny et al. 1993 for similar approaches). As in the aggregate data analysis, the threshold that determined whether the state was a battleground state or had a competitive statewide race was a margin of victory of five percent or less. At the individual level, I controlled for gender, age in years, education, household income, and dummy variables representing whether a voter was Black/non-Hispanic, Hispanic, or another non-white race (with white/non-Hispanic voters as the omitted category for reference purposes).⁸ Drawing on previous research on voting behavior, I also controlled for whether an individual was employed, or at least a member of the workforce (as opposed to being a full-time student, a homemaker, or retired). Both employment and workforce membership have been shown to be positive predictors of turnout (see Mitchell and Wlezien 1995). Marital status, whether one is a native-born citizen and residential mobility also have emerged as significant predictors of turnout (Alvarez and Ansolabehere 2002, Alvarez et al. 2004, Kenney et al. 1993, Wolfinger and Rosenstone 1980). I included in the model variables for whether a respondent was married (coded 1 if yes, 0 otherwise), and whether one was a native-born citizen (coded 1 if yes, 0 otherwise). I measured residential mobility by coding for whether the respondent had moved to a new address in the six months prior to the interview (coded 1 if yes, 0 otherwise).

Results

The dependent variable is whether a respondent said he or she voted in the November 2004 election (coded 1 for yes, 0 for no). I estimated models using probit analysis, which

⁷ The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

⁸ Asian-Americans are included in the "other non-white races" category. In response to a request from officials at the U.S. Election Assistance Commission who had read an earlier version of this paper and were curious about the experiences of Asian-Americans, I ran models using Asian-Americans as a separate category in addition to the models presented here. Voter identification requirements did not have a statistically significant effect on whether Asian-American voters said they turned out in the 2004 election.

017527

calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted. I estimated the models using robust standard errors to control for correlated error terms for observations from within the same state.

[Table 4 here]

The two models in Table 4 use either the maximum or minimum voter identification requirements in each state. The two models generate virtually identical results. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, African-American voters were more likely than white voters to say they had cast a ballot, while those of other non-white races were less likely than white voters to say they had turned out. Hispanic voters were not statistically different from white voters in terms of reported turnout. Consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

While the probit models provide statistical support for the influence of voter identification requirements and other variables on turnout, probit coefficients do not lend themselves to intuitive interpretation. Another common approach in studies of election requirements is to examine how the predicted probability of voter turnout would vary as election requirements vary. I used the probit coefficients to calculate the predicted probability of voting at each level of voter identification requirements while holding all other independent variables in the models at their means.⁹ I calculated the probabilities taking into account both maximum and minimum requirements, with photo identification serving as the most demanding of the maximum requirements and affidavits as the most demanding minimum requirement.

[Table 5 here]

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 0.912 for stating one's name to 0.887 for photo identification under the maximum requirements. In other words, the probability of voting dropped with each level of voter identification requirement, with a total drop of .025, or 2.5 percent, across the five types of identification.¹⁰ When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.

Among the key variables of interest in the debate over voter identification requirements are race, age, income, and education. Given the large sample size (54,973 registered voters), it

⁹ In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Lóng 1997).

¹⁰ The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

was possible to break the sample into sub-samples along those demographic lines to explore variation in predicted probability by group. I disaggregated the sample by the variable of interest, omitting that variable while I re-ran the probit model with the remaining predictors of voter turnout, including the voter identification requirements.¹¹ If the analysis showed that the voter identification requirements had a statistically significant effect on turnout, I used the probit coefficients from the model to calculate the predicted probability of voting for each group across the five requirements while holding the other variables in the model constant.

[Table 6 here]

Both the maximum and minimum identification requirements had negative and statistically significant effects for White/Non-Hispanic voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.2 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of Black/Non-Hispanics voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name was the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent.

The effects of voter identification requirements also varied by age, with the greatest variation occurring among voters ages 18 to 24.

[Table 7 here]

Voters in that age group had a predicted probability of 83.9 percent when the maximum requirement was stating one's name, and the probability dropped 8.9 percentage points if voters would have to provide photo identification. The range was from 83.1 percent to 75.4 percent under the minimum requirements. The gap in probability narrowed in older age groups (4.8 percent for the maximum requirements and 5.8 percent for the minimum requirements for those ages 25 to 44; 1.8 percent for the minimum requirements for those ages 45 to 64, and 2.4 percent for the minimum requirements for those ages 65 and older).

Breaking down the 18- to 24-year-old age group by race shed additional light on the effects of voter identification requirements on specific groups.

[Table 8 here]

The gap in predicted probability that White/Non-Hispanic voters in the 18- to 24-year-old category would turn out was 9.2 percent when the identification requirements varied from stating one's name to providing photo identification. The gap was 7.8 percent when taking into account the minimum requirements. The effects of maximum voter identification requirements also were statistically significant for African-Americans in the 18- to 24-year-old age group, with a gap in

¹¹ See Nagler 1991 for a similar approach in analyzing the effects of registration closing dates broken down by education levels.

the predicted probability of voting of 10.6 percent. Maximum and minimum voter identification requirements were not a significant predictor of voting among Hispanics ages 18 to 24.

Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.¹²

[Table 9 here]

While the maximum set of requirements did not have a statistically significant effect for voters living below the poverty line, the minimum set of requirements had a significant and negative effect. The probability of voting was .784 for poor voters if they would have to identify themselves by giving their name, and the probability declined to .731 if they would have to provide an affidavit attesting to their identity. Both the maximum and minimum sets of requirements had a significant and negative effect on voters living above the poverty line, but the difference in probability across the effects was narrower (2.3 percent for the maximum requirements and 3.1 percent for the minimum requirements). Given that political discourse about voter identification requirements includes concerns about the effects of the requirements on poor and minority voters, I also ran probit analyses for sub-samples of white and minority voters who fell below the poverty line. The voter identification requirements did not exert statistically significant effects on turnout among poor White/Non-Hispanic and Hispanic voters, but did have a significant effect on Black/Non-Hispanic voters who were below the poverty line.¹³ Allowing the maximum voting requirement to vary from the least to the most demanding, the probability that African-American voters below the poverty line said they had voted dropped by 7.5 percent.

The effects of voter identification requirements varied across education levels as well, with those lowest in education demonstrating the widest variation in probabilities as identification requirements ranged from least to most demanding.

[Table 10 here]

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The difference from the lowest to the highest requirement among the minimum requirements was 7.4 percent. The difference in probabilities ranged from 3.3 percent for the maximum requirements to 4.5 percent for the minimum requirements for voters with a high school diploma. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

¹² I coded respondents as being above or below the U.S. Census Bureau's 2004 poverty line based on respondents' reported annual household income and size of the household.

¹³ The lack of significant effects for poor Hispanic voters is in contrast to the results from the aggregate data analysis. The sub-sample of poor Hispanic voters was small ($n = 491$), which may have contributed to the lack of statistical significance.

Discussion and conclusion

The results presented here provide evidence that as the level of demand associated with voter identification requirements increases, voter turnout declines. This point emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall effect for all registered voters was fairly small, but still statistically significant.

The effects of voter identification requirements were more pronounced for specific subgroups. Hispanic voters and the poor appeared to be less likely to vote as the level of required identification became more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households were 5.3 percent less likely to vote as the requirements varied from stating one's name to attesting to one's identity in an affidavit. African-American voters from households below the poverty line were 7.5 percent less likely to vote as the maximum requirements varied from stating one's name to providing photo identification.

Effects of voter requirements also varied with education. Registered voters who had not graduated from high school were 6.7 percent less likely to say they voted as the maximum requirements ranged from stating one's name to providing photo identification. When considering the minimum requirements, those with less than a high school education were 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name. Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit. Breaking down the age group by race, the effects were significant for young White/Non-Hispanic and Black/Non-Hispanic voters.

The results shed additional light on the effects of voter identification requirements on two groups often projected as being particularly sensitive to such requirements: African-American voters and elderly voters. The effects on African-American voters were pronounced for two specific sub-samples: African-American voters living below the poverty line and those in the 18- to 24-year-old age group. Also, the elderly, while they would be slightly less likely to vote as requirements ranged from least to most demanding, would not necessarily be affected in the dramatic manner predicted by some opposed to photo identification requirements in particular.

In examining the effects of voter identification requirements on turnout, there is still much to learn. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If these requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements?¹⁴ Or, do the requirements result in some voters

¹⁴ The individual-level data offer some insight here. If advance knowledge of the voter identification requirements were to dampen turnout, it is reasonable to expect that advance knowledge of those requirements also could discourage some individuals from registering to vote. I ran the same probit models using voter registration as the dependent variable (coded 1 if the respondent said he or she was registered, and 0 if the respondent was not

being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

registered). Neither the maximum nor minimum array of voter identification requirements had a statistically significant effect on the probability that a survey respondent was registered to vote.

Advisors and Standards Board meetings

Tom-

To reiterate the details of our discussion:

By May 17 I will have received all of the materials you wish distributed to the EAC Board of Advisors and Standards Boards. You have indicated that this will be the Provisional Voting paper and the Voter ID paper, only.

On Tuesday, May 23 from 2:30-4:00 PM, Tom O'Neill and Ed Foley will present the Provisional Voting report to the EAC Standards Board. Julie Thompson-Hodgkins will be the resource person for that session

On Wednesday, May 24 from 1:40-2:45 PM, Tom O'Neill, Dan Tokaji, and Tim Vercellotti will present the Voter Identification report to the EAC Standards Board. Julie Thompson-Hodgkins will be the resource person for that session.

On Wednesday, May 24 from 8:30-9:15 am, Tom O'Neill and Ed Foley will present the Provisional Voting report to the EAC Board of Advisors. Julie Thompson-Hodgkins will be the resource person for that session.

On Wednesday, May 24 from 11:00-11:55 am, Tom O'Neill, Dan Takaji and Tim Vercellotti will present the Voter Identification report to the EAC Board of Advisors. Julie Thompson-Hodgkins will be the resource person for that session.

If you have further questions regarding the details of these sessions, please do not hesitate to contact me.

Subject Voting Fraud-Voter Intimidation Project Briefing

Dear Commissioners:

Attached is our consultants' analysis of the literature reviewed for the Voting Fraud-Voter Intimidation preliminary research project. It was not included in the information packets delivered to you on Friday, May 12, because we did not receive it until today. I thought you might be interested in having it prior to tomorrow's briefing.

Literature-Report Review Summary.doc

017546

Existing Research Analysis

There are many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. There is little research that is truly systematic or scientific. The most systematic look at fraud is the report written by Lori Minnite. The most systematic look at voter intimidation is the report by Laughlin McDonald. Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. It is hoped that this gap will be filled in the "second phase" of this EAC project.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book. Again, this is something that it is hoped will be addressed in the "second phase" of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.
- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.

- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

Report Background

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud --multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

- Opponents seek to forestall more stringent identification requirements, such as for government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters --such as, they argue, racial and ethnic minorities, the young, and elderly voters-- may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate and investigates whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout, and important first step in assessing tradeoffs between ballot security and ballot access. The aim is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis was conducted to examine the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on turnout and on vote fraud is to collect more information on both topics systematically and regularly.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:¹ the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.² Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, although it used different statistical methods and two different sets of data on turnout in 2004 election, it points to the same general finding. As discussed at greater length in the appendix to this report, stricter voter identification requirements were correlated with reduced turnout in the models employed.³ As explained below, these models find that a statistically significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible

¹ See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

² The EAC has contracted with other researchers to study vote fraud issues.

³ Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

voters, however, the tradeoffs between ballot security and ballot access cannot be assessed fully.

Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.⁴ The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be *asked* to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be *required* to do or show, in order to cast regular ballot (again leaving aside a state challenge process). We have included "maximum" requirements in our analysis, and not simply "minimum" requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the "maximum" of being asked to show photo ID may deter some voters even though the "minimum" would allow them to vote without photo ID.

⁴ Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis's aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names. With the addition of the registration closing data to the aggregate analysis, photo id is no longer a

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

significant predictor of turnout. Signature match and non-photo id remain significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a “maximum” requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a “minimum” requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the “on the ground” experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.⁵ And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls– are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls

⁵ Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.

3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC can also use this information to encourage the states to assess the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
 - I. Useful information could be supplied by state-sponsored surveys of voters by local election officials. It would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
 - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
 - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks statutory or regulatory requirements. Such reports should be available to the public.
4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors:

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

the convenience of the voter, the total time allowed to evaluate ballots⁶, and the safe harbor provision in presidential elections.

5. Recommendations to the states from EAC should reflect current judicial trends.

Requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more uncertain.

SUMMARY OF RESEARCH

Background and Approach of the Study

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the

⁶ Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.

- Brians and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.

- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.⁷ The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.⁸

⁷ As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

⁸ Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.⁹ Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter

⁹ "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.¹⁰ Voter ID requirements that require voters to bring a document to the polls –rather than simply sign their names– may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.¹¹ And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards –legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest 7 questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?¹²

¹⁰ For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

¹¹ The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

¹² "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." *Harvard Law Review* 127:1144 (2006)

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?¹³
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?¹⁴
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.¹⁵ A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.
5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?¹⁶
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it,

¹³ See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

¹⁴ In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

¹⁵ "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." *Harvard Law Review* 127:1144 (2006)

¹⁶ For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," *62 Washington and Lee Law Review* 937 (2005).

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

Voter ID and Turnout

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).¹⁷ Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.¹⁸

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum

¹⁷ Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

¹⁸ As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a “minimum” requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state’s voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.¹⁹ Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state’s legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

¹⁹ One state election official told us that, “We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren’t that way, but it probably is.”

* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

¹ Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

² Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

³ Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

⁴ Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

⁵ Voters lacking a photo ID could vote by providing another form of ID in 2004.

⁶ Voters lacking a photo ID could vote by providing another form of ID in 2004.

⁷ Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

⁸ Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ($r = -.30, p < .05$). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ($r = -.20, p = .16$). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	64.2 %	State Name	63.0 %
Sign Name	61.1 %	Sign Name	60.4 %
Match Signature	60.9 %	Match Signature	61.7 %
Provide Non-Photo ID	59.3 %	Provide Non-Photo ID	59.0 %
Provide Photo ID	58.1 %	Swear Affidavit	60.1 %
<i>Average Turnout (All States)</i>	60.9 %		

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables in subsequent analyses.²¹

Voter identification requirements are just one factor that may affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American²²
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

²¹ The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

²² The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that voter identification requirements such as signature matching, a non-photo ID or a photo ID are associated with lower turnout than in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.²³

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum

²³ This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

requirements, a signature match, non-photo identification or photo identification were correlated with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.²⁴ Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.²⁵ The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens; the questionnaire design skipped those individuals past the voter registration and turnout questions in the survey. In addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have

²⁴ For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).²⁴ Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

²⁵ It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

influenced turnout in 2004.²⁶ The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.²⁷

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant, correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.²⁸ Table 3 below shows predicted probabilities (calculated from the probit coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.²⁹

²⁶ The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

²⁷ The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

²⁸ A probit model is a popular specification of a generalized linear regression model, using the probit link function.

²⁹ In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

Table 3. Predicted probability of voter turnout – all voters		
	Maximum requirement	Minimum requirement
State name	91.7%	91.5%
Sign name	89.9%	90.2%
Match signature	Not significant	Not significant
Non-photo ID	89.0%	89.0%
Photo ID	88.8%	—
Affidavit	—	87.5%
Total difference from “state name” to “photo ID” or “affidavit”	2.9%	4.0%
N	54,973	
<p>Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies stating one's name to providing photo identification or an affidavit, with all other variables held constant. N.S. = nonsignificant coefficient in the probit model.</p> <p>Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.</p>		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.³⁰ In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those lower in education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum requirement compared to states where stating one's name was the maximum or minimum requirement.

³⁰ The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

Race and ethnicity have generated particular interest in the debate over voter ID requirements.³¹ The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

Varying voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

³¹ Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

In the aggregate data, the match signature requirement, the provide a non-photo ID requirement, and the photo ID requirement were all correlated with lower turnout compared to requiring that voters state their names.

The signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names. That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day , or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*). Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

Photo ID. Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.³² Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL

³² Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

2428690, at *1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at *1, 3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

Privacy. In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Developments since 2004

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at

REVISED FINAL D R A F T
For review by the EAC's Advisory Boards

the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

Conclusions

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.³³

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents

³³ In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

Subject Re: Next steps

Tom-

Indeed, the Commissioners were to review next steps with the Voter Identification research paper and next steps with the Provisional Voting report during yesterday's meeting.

As you are aware, your Provisional Voting report stimulated a great deal of discussion at last week's Standard Board and Board of Advisors meetings. Given this fact and the various political exigencies which surround the topic of voter identification, the Commissioners wish to take more time to consider thoroughly and carefully, how they wish to proceed with the delivery of an EAC research report on provisional voting and voter identification.

I will let you know in the next week to ten days, the outcome of the Commissioner's discussion on how they wish to proceed with Eagleton's studies on these topics.

Karen,

While we were in Washington for the meetings of the advisory boards, you told me the Commissioners were to meet today, June 1, and would reconsider the Voter ID paper. As you can, no doubt, imagine, we are all interested in learning the outcome of that discussion.

We also look forward to your guidance concerning the next steps to complete the work on the Provisional Voting report that we presented to the advisory boards last week.

Tom O'Neill

Washington, DC 20005
Fax: (202) 566-3127

June 8, 2006

Dear Chairman DeGregorio:

Karen Lynn-Dyson relayed the Commission's decision in your meeting of June 1 to take more time to consider how to proceed with the delivery of EAC research reports on provisional voting and voter identification.

The Eagleton-Moritz research team, of course, encourages the Commission's thoughtful consideration of the two reports, but we are mindful of the need to deliver revised documents that respond to the Commission's comments by the close of our contract on June 30th. We believe that if we receive the Commission's final comments on the Provisional Voting report by June 19 we will be able to complete any additional work that the Commission might request and incorporate the results in our final reports before the end of the contract period.

Based on suggestions raised at the meetings, we already plan to supplement the Provisional Voting report with some brief, additional information about the influence of the fail-safe ballot provisions of the National Voting Rights Act on the experience with provisional voting in 2004.

We understand that the Commission must submit the final draft Voter ID report to the same review process by your advisory boards as was followed with the Provisional Voting paper. We understand that step is a prerequisite for wider release. We would appreciate your advice on how to handle this review, given the rapidly approaching end of our contract.

We hope the commission will use both reports, as intended from the outset of this project, as the basis for recommendations for better, if not best, practices to the states. If the Commission cannot decide to issue such recommendations to the states, we hope it will promptly release the reports to provide the states and the broader elections community with this information, analysis and perspective on the issues.

We recognize, based on the reactions at the meetings of the Standards Board and, particularly, the Board of Advisors, that some of the findings, conclusions, and recommendations of the reports will be controversial with some of the Commission's constituencies. But we also believe, based on the comments of the Peer Review Group, the advisors assembled by the Commission, and our response to their critiques, that the reports are grounded on solid research by a well-qualified, nonpartisan team and that the reports will provide new information for the policy process. We believe this information will contribute to achieving the EAC mission of providing helpful information that the states may or may not choose to implement.

The information in the reports can improve the policy process by raising the level of debate over increasingly volatile issues related to election administration. We believe our reports will prove useful to the states as they complete preparations for the 2006 elections. Moreover, the elections community is aware of this work, and awaits the analysis and conclusions.

We look forward to working with you to conclude this research in a way that will serve the public interest.

Very truly yours,

The Research Team

This research report on Provisional Voting in the 2004 election is part of a broader analysis that also includes a study of Voter Identification Requirements, a report on which is forthcoming. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The Moritz College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

The Peer Review Group improved the quality of our work by critiquing drafts of our analysis, conclusions and recommendations. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in the policy recommendations of the report.

EXECUTIVE SUMMARY

Background and Methodology

This report to the United States Election Assistance Commission (EAC) presents recommendations for best practices to improve the process of provisional voting. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under contract to the EAC, dated May 24, 2005.

The Help America Vote Act of 2002 (HAVA, (Public Law 107-252) authorizes the EAC (SEC. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient. Section 302(a) of HAVA required states to establish provisional balloting procedures by January 2004.¹ The process HAVA outlined left considerable room for variation among the states, arguably including such critical questions as who qualifies as a registered voter eligible to cast a provisional ballot that will be counted and in what jurisdiction (precinct or larger unit) the ballot must be cast in order to be counted.²

The general requirement for provisional voting is that, if a registered voter appears at a polling place to vote in an election for Federal office, but either the potential voter's name does not appear on the official list of eligible voters for the polling place, or an election official asserts that the individual is not eligible to vote, that potential voter must be permitted to cast a provisional ballot. In some states, those who should receive a provisional ballot include, in the words of the EAC's Election Day Survey, "first-time voters who registered by mail without identification and cannot provide identification, as required under HAVA. . ." ³ HAVA also provides that those who vote pursuant to a court order keeping the polls open after the established closing hour shall vote by provisional ballot. Election administrators are required by HAVA to notify individuals of their opportunity to cast a provisional ballot.

¹The Election Center's National Task Force Report on Election Reform in July 2001 had described provisional ballots as providing "voters whose registration status cannot be determined at the polls or verified at the election office the opportunity to vote. The validity of these ballots is determined later, thus ensuring that no eligible voter is turned away and those truly ineligible will not have their ballots counted." It recommended "in the absence of election day registration or other solutions to address registration questions, provisional ballots must be adopted by all jurisdictions." See www.electioncenter.org.

² The 2004 election saw at least a dozen suits filed on the issue of whether votes cast in the wrong precinct but the correct county should be counted. One federal circuit court decided the issue in *Sandusky County Democratic Party v. Blackwell*, 387 F.3d565 (6th Cir. 2004), which held that votes cast outside the correct precinct did not have to be counted. The court relied on the presumption that Congress must be clear in order to alter the state-federal balance; thus Congress, the court concluded would have been clearer had it intended to eliminate state control over polling location (387 F.3d at 578). An alternative argument, that HAVA's definition of "jurisdiction" incorporates the broader definition in the National Voting Rights Act, however, has not been settled by a higher court. But for now states do seem to have discretion in how they define "jurisdiction" for the purpose of counting a provisional ballot.

³ The definition of who was entitled to a provisional ballot could differ significantly among the states. In California, for example, the Secretary of State directed counties to provide voters with the option of voting on a provisional paper ballot if they felt uncomfortable casting votes on the paperless e-voting machines. "I don't want a voter to not vote on Election Day because the only option before them is a touch-screen voting machine. I want that voter to have the confidence that he or she can vote on paper and have the confidence that their vote was cast as marked," Secretary Shelley said. See <http://wired.com/news/evote/0,2645,63298,00.html>. (Our analysis revealed no differences in the use of provisional ballots in the counties with these paperless e-voting machines.) In Ohio, long lines at some polling places resulted in legal action directing that voters waiting in line be given provisional ballots to enable them to vote before the polls closed. (Columbus Dispatch, November 3, 2004.)

Our research began in late May 2005. It focused on six key questions raised by the EAC.

1. How did the states prepare for the onset of the HAVA provisional ballot requirement?
2. How did this vary between states that had previously had some form of provisional ballot and those that did not?
3. How did litigation affect implementation?
4. How effective was provisional voting in enfranchising qualified voters?
5. Did state and local processes provide for consistent counting of provisional ballots?
6. Did local election officials have a clear understanding of how to implement provisional voting?

To answer those questions, we:

1. Surveyed 400 local (mostly county) election officials to learn their views about the administration of provisional voting and to gain insights into their experience in the 2004 election.
2. Reviewed the EAC's Election Day Survey, news and other published reports in all 50 states to understand the local background of provisional voting and develop leads for detailed analysis.⁴
3. Analyzed statistically provisional voting data from the 2004 election to determine associations between the use of provisional voting and such variables as states' experience with provisional voting, use of statewide registration databases, counting out-of-precinct ballots, and use of different approaches to voter identification.
4. Collected and reviewed the provisional voting statutes and regulations in all 50 states.
5. Analyzed litigation affecting provisional voting or growing out of disputes over provisional voting in all states.

Our research is intended to provide EAC with a strategy to engage the states in a continuing effort to strengthen the provisional voting process and increase the consistency with which provisional voting is administered, particularly within a state. As EAC and the states move forward to assess and adopt the recommendations made here, provisional voting merits continuing observation and research. The situation is fluid. As states, particularly those states that did not offer a provisional ballot before 2004, gain greater experience with the process and as statewide voter databases are adopted, the provisional voting process will demand further, research-based refinement.

KEY FINDINGS

Variation among the states

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million, or just over 63%, were counted. Provisional ballots accounted for a little more than 1% of the final vote tally. These totals obscure the wide variation in provisional voting among the states.⁵

⁴ Attachment 1 provides detailed information on how this study classifies the states according to the characteristics of their provisional voting procedures. It also describes how the data used in the statistical analysis may differ from the data in the Election Day Survey, which became available as our research was concluding.

⁵ HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

- Six states accounted for two-thirds of all the provisional ballots cast.⁶
- The percentage of provisional ballots in the total vote varied by a factor of 1,000 -- from a high of 7% in Alaska to Vermont's 0.006%.
- The portion of provisional ballots cast that were counted ranged from 96% in Alaska to 6% in Delaware.
- States with voter registration databases counted, on average, 20% of the provisional ballots cast.
- States without databases counted ballots at more than twice that rate: 44%.⁷
- States that provided more time to evaluate provisional ballots counted a greater proportion of those ballots. Those that provided less than one week counted an average of 35.4% of their ballots, while states that permitted more than 2 weeks, counted 60.8%.

An important source of variation among states was a state's previous experience with provisional voting and with the fail-safe voting provision of the National Voting Rights Act. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.⁸ Part of that difference was due to how states had implemented the National Voting Rights Act, particularly in regard to voters who changed address within weeks of the election. Voters in California, for example, who moved within their county must cast a provisional ballot, the information from which is used to update the voter's address. Other states, Tennessee for example, found that some fail-safe voters were reluctant to vote by provisional ballot. As a result, Tennessee abandoned provisional voting for those who moved within counties and allows failsafe voters cast a regular ballot. Relatively fewer provisional ballots would tend to be cast in such states.

Variation within states

Within states, too, there was little consistency among different jurisdictions. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This variation suggests that additional factors (including the training of election judges or poll workers) beyond statewide factors, such as experience or the existence of voter registration databases, also influence the use of provisional ballots.

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the provisional ballot.

⁶ California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

⁷ As the Carter-Baker Commission report put it, "provisional ballots were needed half as often in states with unified databases as in states without." Report on the Commission on Federal Election Reform, "Building Confidence in U. S. Elections," September 2005, p. 16.

⁸ See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

Resources available to administer provisional voting varied considerably among and within states. Differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.

In precincts located in districts where many voters live in poverty and have low levels of income and education, the voting process, in general, may be managed poorly. Provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

The lessons of litigation

Successful legal challenges highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. Most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots. This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second –and significantly– the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right – the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot.

States move to improve their processes

Shortly after the 2004 election, several states came to the conclusion that the administration of their provisional voting procedures needed to be improved, and they amended their statutes. The new legislation highlights areas of particular concern to states about their provisional voting process.

- Florida, Indiana, Virginia, and Washington have clarified or extended the timeline to evaluate the ballots.

- Colorado, New Mexico, North Carolina, and Washington have passed legislation focused on improving the efficacy and consistency of the voting and counting process.
- Colorado, Arkansas, and North Dakota took up the issue of counting provisional ballots cast in the wrong precinct.

The wide variation in the implementation of provisional voting among and within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices that draw on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting. The important effect of experience on the administration of the provisional ballot process indicates that the states have much they can learn from each other.

SUMMARY OF RECOMMENDATIONS FOR BEST PRACTICES

State efforts to improve the provisional voting process have been underway since the 2004 election. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states.

Take a quality-improvement approach

Defining what constitutes a successful provisional voting system is difficult. Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. A first step is for states to recognize that improving quality begins with seeing the provisional voting process as a system and taking a systems approach to regular evaluation through standardized metrics with explicit goals for performance. EAC can facilitate action by the states by recommending as a best practice that:

- Each state collect data systematically on the provisional voting process to permit evaluation of its voting system and assess changes from one election to the next. The data collected should include: provisional votes cast and counted by county; reasons why provisional ballots were not counted, measures of variance among jurisdictions, and time required to evaluate ballots by jurisdiction

Emphasize the importance of clarity

Above all else, the EAC should emphasize the importance of clarity in the rules by which each state governs provisional voting. As state legislators and election officials prepare for the 2006 election, answers to the questions listed in the recommendations section of this report could be helpful. Among those questions are:

- Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate?
- Do the procedural requirements of the system permit cost-efficient operation?
- How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

Court decisions suggest areas for action

The court decisions following the 2004 election also suggest procedures for states to incorporate into their procedures for provisional voting. EAC should recommend to the states that they:

- Promulgate clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards.
- Provide effective materials to be used by local jurisdictions in training poll workers on such procedures as how to locate polling places for potential voters who show up at the wrong place.
- Make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office. Poll workers need appropriate training to understand their duty to give such voters a provisional ballot.

Assess each stage of the provisional voting process

Beyond the procedures suggested by court decisions, states should assess each stage of the provisional voting process. They can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process.

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot. Our recommendations for best practices to avoid error at the polling place include:

- The layout and staffing of the multi-precinct polling place is important. States should ensure that training materials distributed to every jurisdiction make poll workers familiar with the options available to voters.
- The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting and include take-away information for the voter on the steps in the ballot evaluation process.
- Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. Best practice for states should provide guidelines (as do Connecticut and Delaware) to estimate the supply of provisional ballots needed at each polling place.

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted.

- State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Kansas allows voters to proffer their ID by electronic means or by mail, as well as in person.
- More provisional voters have their ballots counted in those states that count ballots cast outside the correct precinct. While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots

are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence.

- If a state does require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location. While the best practice might be for poll workers to direct the voter to correct precinct poll workers' advice is not always correct, and the voter should be protect against ministerial error.
- Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected. Colorado's election rules offer particularly clear guidance to the official evaluating a provisional ballot.

In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. Our research did not identify an optimum division of the five weeks available.

- The best practice here is for states to consider the issue and make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

After the election, timely information to voters about the disposition of their provisional ballot can enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

- Best practice for the states is to establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

Final observation

The detailed examination of each stage in the provisional voting process can lay the foundation each state needs to improve its system. Efforts to improve provisional voting may be most effective as part of a broader effort by state and local election officials to strengthen their systems. Collecting and analyzing data about those systems will enable states to identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as ways to reduce the need for voters to cast their ballots provisionally.

Provisional Voting in 2004

In the 2004 election, nationwide about 1.9 million votes, or 1.6% of turnout, were cast as provisional ballots. More than 1.2 million or just over 63% were counted. Provisional ballots accounted for a little more than 1% of the final vote tally.

These totals obscure the wide variation in provisional voting among the states.⁹ Six states accounted for two-thirds of all the provisional ballots cast.¹⁰ State by state, the percentage of provisional ballots in the total vote varied by a factor of 1,000 – from a high of 7% in Alaska to Vermont's 0.006%. The portion of provisional ballots cast that were actually counted also displayed wide variation, ranging from 96% in Alaska to 6% in Delaware. States with voter registration databases counted, on average, 20% of the provisional ballots cast. Those without databases counted provisional ballots at more than twice that rate, 44%.

An important source of variation was a state's previous experience with provisional voting. The share of provisional ballots in the total vote was six times greater in states that had used provisional ballots before than in states where the provisional ballot was new. In the 25 states that had some experience with provisional voting before HAVA, a higher portion of the total vote was cast as provisional ballots and a greater percentage of the provisional ballots cast were counted than in the 18 new to provisional balloting.¹¹

- The percentage of the total vote cast as provisional ballots averaged more than 2% in the 25 experienced states. This was 4 times the rate in states new to provisional voting, which averaged 0.47%.¹²
- The experienced states counted an average of 58% of the provisional ballots cast, nearly double the proportion in the new states, which counted just 33% of cast provisional ballots.
- The combined effect of these two differences was significant. In experienced states 1.53% of the total vote came from counted provisional ballots. In new states, provisional ballots accounted for only 0.23% of the total vote.

Those voting with provisional ballots in experienced states had their ballots counted more frequently than those in the new states. This experience effect is evidence that there is room for improvement in provisional balloting procedures, especially in those states new to the process.¹³ That conclusion gains support from the perspectives of the local election officials revealed in the survey conducted as a part of this research. Local (mostly county level) election officials from "experienced" states were more likely to:

⁹ HAVA allows the states considerable latitude in how to implement provisional voting, including deciding who beyond the required categories of voters should receive provisional ballots and how to determine which provisional ballots should be counted.

¹⁰ California, New York, Ohio, Arizona, Washington, and North Carolina. The appearance of Arizona, Washington and North Carolina on this list shows that the number of provisional ballots cast depends on factors other than the size of the population.

¹¹ See the appendix for our classification of "old" and "new" states and explanation of why the total is less than 50.

¹² To compensate for the wide differences in vote turnout among the 50 states the average figures here are calculated as the mean of the percent cast or counted rather than from the raw numbers of ballots cast or counted.

¹³ Managing the provisional voting process can strain the capacity election administrators. For example, Detroit, counted 123 of the 1,350 provisional ballots cast there in 2004. A recent study concluded that Detroit's "6-day time limit to process provisional ballots was very challenging and unrealistic. To overcome this challenge, *the entire department's employees were mobilized to process provisional ballots.*" (emphasis added.) GAO Report-05-997, "Views of Selected Local Officials on Managing Voter Registration and Ensuring Citizens Can Vote," September 2005.

- Be prepared to direct voters to their correct precincts with maps;
- Regard provisional voting as easy to implement;
- Report that provisional voting sped up and improved polling place operations
- Conclude that the provisional voting process helped officials maintain accurate registration databases.

Officials from “new” states, on the other hand, were more likely to agree with the statement that provisional voting created unnecessary problems for election officials and poll workers.

If experience with provisional voting does turn out to be a key variable in performance, that is good news. As states gain experience with provisional ballots their management of the process could become more consistent and more effective over subsequent elections. Further information from the EAC on best practices and the need for more consistent management of the election process could sharpen the lessons learned by experience. The EAC can facilitate the exchange of experience among the states and can offer all states information on more effective administration of provisional voting.

Concluding optimistically that experience will make all the difference, however, may be unwarranted. Only if the performance of the “new” states was the result of administrative problems stemming from inexperience will improvement be automatic as election officials move along the learning curve. Two other possibilities exist. Our current understanding of how provisional voting worked in 2004 is not sufficient to determine unambiguously which view is correct.

1. “New” states may have a political culture different from “old” states. That is, underlying features of the “new” states political system may be the reason they had not adopted some form of provisional voting before HAVA. The “new” states may strike a different balance among the competing objectives of ballot access, ballot security and practical administration. They may ascribe more responsibility to the individual voter to take such actions as registering early, finding out where the right precinct is, or re-registering after changing address. They may value keeping control at the local level, rather than ceding authority to state or federal directives. The training they offer poll workers about provisional ballots may not be as frequent or effective as in other states. If the inconsistent performance in the “new” states arises out of this kind of political culture, improving effectiveness in the use of the provisional ballots – as measured by intrastate consistency in administration— will be harder and take longer to achieve.¹⁴
2. “Old” states may devote fewer resources to updating their registration files or databases because they consider provisional ballots as a reasonable fail safe way for voters with registration problems a way to cast a ballot. The adoption of statewide voter registration databases in compliance with HAVA therefore may reduce the variation in the use of provisional ballots among the states.

Other influences decreasing consistency among the states include:

¹⁴ Despite differing political cultures among states and the latitude HAVA provides states, the statute does, indeed impose some degree of uniformity on issues that Congress thought essential. For example, before HAVA, took effect, “no state gave the voter the right to find out the status of their ballot after the election. ” Now all offer that opportunity. See Bali and Silver, “The Impact of Politics, Race and Fiscal Strains on State Electoral Reforms after Election 2000,” manuscript, Department of Political Science, Michigan State University. Resisting HAVA’s mandates through foot-dragging lacks any legitimate foundation in law or policy.

- The more rigorous the verification requirements, the smaller the percentage of provisional ballots that were counted. Some states verified provisional ballots by comparing the voter's signature to a sample, some matched such identifying data as address, birth date, or social security number, others required voters who lacked ID at the polling place to return later with the ID to evaluate the provisional ballot, and some required provisional voters to execute an affidavit.¹⁵
 - In the 4 states that simply matched signatures, nearly 3.5% of the total turnout consisted of provisional ballots, and just under three-fourths of those ballots (73%) were counted.
 - In the 14 states that required voters to provide such additional information as address or date of birth just over 1.5% of the total turnout consisted of provisional ballots, and 55% of those ballots were counted.
 - In the 14 states that required an affidavit (attesting, for example, that the voter was legally registered and eligible to vote in the jurisdiction) just over one-half of a percent (0.6%) of turnout came from provisional ballots, and less than one-third of those (30%) were counted. (But note that HAVA requires all voters to certify that they are eligible and registered in order to cast a provisional ballot, which is functionally an affidavit. The 14 states described here used an explicit affidavit form.)
 - In the 10 states that required voters to return later with identifying documents just under 1.5% of the total turnout came from provisional ballots, and more than half (52%) of these were counted. Voters apparently found this requirement less onerous than the affidavit, even though it required a separate trip to a government office
- Voter registration databases provided information that reduced the number of provisional ballots counted.¹⁶ In states using provisional voting for the first time, states with registered-voter databases counted only 20% of the ballots that were cast. States without such databases counted more than double that rate (44%). As HAVA's requirement for adoption of statewide databases spreads across the country, this variation among states is likely to narrow. Real-time access to a continually updated, statewide list of registered voters should reduce the number of provisional ballots used and reduce the percentage counted since most of those who receive them will be less likely to be actually registered in the state.
- States that counted out-of-precinct ballots counted 56% of the provisional ballots cast. States that counted only ballots cast in the proper precinct counted an average of 42% of provisional ballots.¹⁷
 - In experienced states, the disparity was even more pronounced: just over half of provisional ballots cast were counted in states requiring in-district ballots, while more than two-thirds were counted in those allowing out-of-precinct ballots.
 - If all states had counted out-of-precinct ballots, perhaps 290,000 more provisional ballots would have been counted across the country.¹⁸

¹⁵ See Table 2 in Appendix 2 for information on the verification method used in each state.

¹⁶ The Election Day Survey found that states using statewide voter registration databases reported a lower incidence of casting provisional ballots than states without voter registration databases, suggesting that better administration of voter registration rolls might be associated with fewer instances where voters would be required to cast a provisional ballot due to a problem with their voter registration.

¹⁷ The Election Day Survey concluded that: "Jurisdictions with jurisdiction-wide provisional ballot acceptance reported higher rates of provisional ballots cast, 2.09 percent of registration or 4.67 percent of ballots cast in polling places, than those with in-precinct-only acceptance, 0.72 and 1.18 percent, respectively. Predictably, those jurisdictions with more permissive jurisdiction-wide acceptance reported higher rates of counting provisional ballots, 71.50 percent, than other jurisdictions, 52.50 percent."

- States that provide a longer the time to evaluate provisional ballots counted a higher proportion of those ballots.¹⁹
 - Fourteen states permitted less than one week to evaluate provisional ballots, 15 states permitted between one and two weeks, and 14 states permitted greater than two weeks²⁰.
 - Those states that permitted less than one week counted an average of 35.4% of their ballots.
 - States that permitted between one and two weeks counted 47.1%.
 - States that permitted more than 2 weeks, counted 60.8% of the provisional ballots cast²¹.
 - The effect of allowing more time for evaluation is felt most strongly in states where more than 1% of the overall turnout was of provisional ballots. In states where provisional ballots were used most heavily, those that permitted less than one week to evaluate ballots counted 58.6% while those that permitted one to two weeks counted 65.0% of ballots, and those states that permitted greater than three weeks verified the highest proportion of provisional ballots, at 73.8%.

Variation Within States

Not only was there little consistency among states in the use of provisional ballots, there was also little consistency within states. This was true in both new and old states. Of the 20 states for which we have county-level provisional ballot data, the rate of counting provisional ballots varied by as much as 90% to 100% among counties in the same state. This suggests that additional factors beyond statewide factors, such as verification requirements or the time provided for ballot evaluation, also influence the provisional voting process. Reacting to the lack of consistency within states, the Carter-Baker Commission recommended that "states, not counties or municipalities, should establish uniform procedures for the verification and counting of provisional ballots, and that procedure should be applied uniformly throughout the state."²²

Electionline reported that:

- In Ohio some counties counted provisional ballots not cast in the assigned precinct even though the state's policy was to count only those ballots cast in the correct precinct.
- Some counties in Washington tracked down voters who would otherwise have had their provisional ballots rejected because they had failed to complete part of their registration form, gave them the chance to correct those omissions, and then counted the

¹⁸ This estimate is a rough approximation. States that recognize out-of-precinct ballots counted, on average, 56% of the provisional votes cast. Applying that ratio to the 1.9 million provisional ballots cast nationwide would result in 1.1 million provisional ballots that would have been counted if all states accepted out-of-precinct votes. States that did not recognize out-of-precinct ballots counted 42% of the provisional ballots cast, or about 813,000 ballots, for a difference of about 290,000 votes.

¹⁹ See Appendix, Relationship Between Time Allotted to Verify Provisional Ballots and the Level of Ballots that are Verified, David Andersen, The Eagleton Institute of Politics

²⁰ Many thanks to Ben Shepler, of the Moritz College of Law, for assembling complete data on the time requirements states permitted for the counting of provisional ballots.

²¹ 43 states are included in this analysis, including Washington D.C. The 7 election-day registration states are omitted, as is Mississippi, which never provided data on provisional ballots. North Carolina is also omitted from the regressions, as it does not have a statewide policy on how it verifies provisional ballots.

²² Recommendation 2.3.2 of the Report of the Commission on Federal Election Reform, "Building Confidence in U.S. Elections," September 2005, p.16. The report also observed that, "... different procedures for counting provisional ballots within and between states led to legal challenges and political protests. Had the margin of victory for the presidential contest been narrower, the lengthy dispute that followed the 2000 election could have been repeated."

provisional ballot. This would probably not have come to light except for the sharp examination caused by the very close election for governor.

Resources available to administer provisional voting varied considerably among and within states. The result is that differences in demographics and resources result in different experiences with provisional voting. For example, the Election Day Survey found that:

- Jurisdictions with lower education and income tend to report more inactive voter registrations, lower turnout, and more provisional ballots cast.
- Jurisdictions with higher levels of income and education reported higher average numbers of poll workers per polling place or precinct and reported lower rates of staffing problems per precinct.
- Staffing problems appeared to be particularly acute for jurisdictions in the lowest income and education categories. Small, rural jurisdictions and large, urban jurisdictions tended to report higher rates of an inadequate number of poll workers within polling places or precincts.
- Predominantly non-Hispanic, Black jurisdictions reported a greater percentage of polling places or precincts with an inadequate number of poll workers. Predominantly non-Hispanic, Native American jurisdictions reported the second highest percentage of staffing problems.

The conclusions to be drawn from these findings are clear. In voting districts with lower education levels, poverty, and inadequately staffed polling places, the voting process is unlikely to function well. More people will end up casting provisional ballots. That makes the provisional voting process especially important in such districts. But if jurisdictions struggle with regular voting, how well are they likely to do with the more complicated provisional balloting process? In precincts where the voting process, in general, is managed poorly, provisional ballots cannot be expected to work much better. In these areas, the focus should be on broader measures to improve the overall functionality of struggling voting districts, although improving the management of provisional balloting may help at the margin.

Effectiveness of Provisional Voting

The certainty of our conclusions about the effectiveness of provisional voting is limited because of the complexity of the problem and a lack of important information. An ideal assessment of how well provisional ballots worked in 2004 would require knowing the decisions of local officials in 200,000 precincts on how to inform voters about provisional voting; their performance in providing a provisional ballot to those qualified to receive one, and their decisions whether to count a provisional ballot. Information needed about the eligibility or registration status of provisional voters is also not available.

We see no automatic correlation between the quality of a state's voting system and either the number of provisional ballots cast or counted. Low numbers could reflect accurate statewide voting data and good voter education. Or they could suggest that provisional ballots were not made easily available. High numbers could be seen as signifying an effective provisional voting system or a weak registration process. But we do know that in 2004 provisional ballots allowed 1.2 million citizens to vote, citizens who would otherwise have been turned away from the polls.

Since we do not know how many registered voters who might have voted but could not, we cannot estimate with any precision how effective provisional voting was in 2004. The Cal Tech – MIT Voting Technology Project, however, estimated that 4 – 6 million votes were lost in the

2000 presidential election for the reasons shown in Table 1 below. The estimate is an approximation, but it may provide data good enough for a general assessment of the size of the pool of potential voters who might have been helped by the provisional ballot process.

Estimates of Votes Lost In 2000 Presidential Election

Votes Lost (Millions)	Cause
1.5 – 2	Faulty equipment and confusing ballots
1.5 – 3	Registration mix-ups
<1	Polling place operations
?	Absentee ballot administration

Table 1 Cal Tech – MIT Voting Technology Project Estimates
 4 – 6 million votes are lost in presidential elections due to the causes shown in the table. Registration mix-ups (e.g., name not on list) and polling place operations (e.g., directed to wrong precinct) are the causes most likely to be remedied by provisional voting.

The table shows that the universe of voters who could be helped by provisional voting might be 2.5 – 3 million voters. In 2004, about 1.2 million provisional voters were counted. A rough estimate of the effectiveness of provisional voting in 2004, then, might be 40% to 50% (ballots counted/votes lost)²³. Whatever the precise figure, it seems reasonable to conclude that there is considerable room for improvement in the administration of provisional voting.

Legislative Response

Indeed, several states²⁴ came to the conclusion that the administration of their provisional voting procedures needed to be improved and amended their statutes after the 2004 election. State legislation adopted since the election points to particular areas of concern.

- Not enough time to examine and count the provisional ballots. Florida, Indiana, Virginia, and Washington all have clarified or extended the timeline to evaluate the ballots. But taking more time can prove a problem, particularly in presidential elections with the looming deadline to certify the vote for the Electoral College.²⁵

²³ Another interpretation of the data should be considered. The Census Bureau's Current Population Survey (CPS) developed the category of "registration mix-ups" to assess the states' registration systems. After each election the CPS asks people if they were registered and if they voted. The CPS gives breakdowns of reasons why people did not vote. Survey responders tend to deflect blame when answering questions about voting. In the narrow context of provisional ballots, 'registration problems' would cover only voters who went to the polls where the determination that they were not registered was wrong or they were registered, but in the wrong precinct. If they were in the wrong precinct, provisional voting can help them in only 17 states. In 2004, only 6.8% of those not voting and registered blamed registration problems, while 6.9% reported so in 2000.

²⁴ Twelve states made statutory or regulatory changes: Arizona, Arkansas, Colorado, Florida, Georgia, Indiana, Louisiana, Montana, New Mexico, North Carolina, Virginia and Wyoming. See Table 4 in Appendix 2.

²⁵ The resources available to evaluate and count provisional ballots within a tight schedule may not be easily available. The General Accounting Office reports that Detroit, where 1,350 provisional ballots were cast and 123 counted, found the 6-day time frame for processing provisional ballots "very challenging and unrealistic. To overcome this challenge, the entire department's employees were mobilized to process provisional ballots." The report also found that in Los Angeles County, "staff had to prepare duplicate ballots to remove ineligible or invalid contests when

01760

- Lack of uniform rules for counting ballots and effective training of the election officials in interpreting and applying those rules to determine the validity of ballots. Colorado, New Mexico, North Carolina, and Washington have all passed legislation focused on improving the efficacy and consistency of the voting and counting process.

Litigation

Successful legal challenges to the process highlight areas where provisional voting procedures were wanting. A flurry of litigation occurred around the country in October 2004 concerning the so-called “wrong precinct issue” – whether provisional ballots cast by voters in a precinct other than their designated one would be counted for statewide races. These lawsuits were largely unsuccessful in their stated goal: most courts, including the U.S. Court of Appeals for the Sixth Circuit (the only federal appeals court to rule on the issue), rejected the contention that HAVA requires the counting of these wrong-precinct provisional ballots.

This litigation was significant nonetheless.

- First, the Sixth Circuit decision established the precedent that voters have the right to sue in federal court to remedy violations of HAVA.
- Second –and significantly– the litigation clarified the right of voters to receive provisional ballots, even though the election officials were certain they would not be counted. The decision also defined an ancillary right –the right to be directed to the correct precinct. There voters could cast a regular ballot that would be counted. If they insisted on casting a provisional ballot in the wrong precinct, they would be on notice that it would be a symbolic gesture only.
- Third, these lawsuits prompted election officials to take better care in instructing precinct officials on how to notify voters about the need to go to the correct precinct in order to cast a countable ballot – although the litigation regrettably came too late to be truly effective in this regard. In many states, on Election Day 2004, the procedures in place for notifying voters about where to go were less than ideal, reflecting less-than-ideal procedures for training poll workers on this point.

There was also pre-election litigation over the question whether voters who had requested an absentee ballot were entitled to cast a provisional ballot. In both cases (one in Colorado and one, decided on Election Day, in Ohio), the federal courts ruled that HAVA requires that these voters receive a provisional ballot. Afterwards, it is for state officials under state law to determine whether these provisional ballots will be counted, in part by determining if these provisional voters already had voted by absentee ballot (in which case one ballot should be ruled ineligible, in order to avoid double voting). These decisions confirm the basic premise that provisional ballots should be available whenever voters believe they are entitled to them, so that their preferences can be recorded, with a subsequent determination whether these preferences count as valid votes.

voters cast their ballots at the wrong precinct. To overcome this challenge, staffing was increased to prepare the duplicate ballots.” In a close, contested election, “duplicate” ballots would doubtless receive long and careful scrutiny.” See Appendix 7, GAO, “Views of Selected Local Election Officials on Managing Voter Registration and Ensuring Eligible Citizens Can Vote,” September 2005. (GAO Report-05-997)

017608

RECOMMENDATIONS

Because every provisional ballot counted represents a voter who, if the system had worked perfectly, should have voted by regular ballot, the advent of statewide registration databases is likely to reduce the use of provisional ballots. The one area in which such databases may not make a difference is for those who voted by provisional ballot because they did not bring required identification documents to the polling place. The statewide voter registration database will facilitate verifying that ballot, but the voter will still have to vote provisionally. Beyond that exception, even with statewide registries in every state, provisional voting will remain an important failsafe, and voters should have confidence that the failsafe will operate correctly.

The wide variation in the implementation of provisional voting among and particularly within states suggests that EAC can help states strengthen their processes. Research-based recommendations for best, or at least better, practices based on the experience gained in the 2004 election can be useful in states' efforts to achieve greater consistency in the administration of provisional voting.

Recommendations for Best Practices

Recent legislative activity shows that state efforts to improve the provisional voting process are underway. Those states, as well as others that have not yet begun to correct shortcomings that became apparent in 2004, can benefit from considering the best practices described here. By recommending best practices, the EAC will offer informed advice while respecting diversity among the states. One way to strengthen the recommendations and build a constituency for them would be for EAC to ask its advisory committee members to recommend as best practices procedures that have worked in their states.

Self-evaluation of Provisional Voting –4 Key Questions

The first step to achieving greater consistency within each state is to think about provisional voting systematically. As legislators, election officials, and citizens in the states prepare for the 2006 election, they should ask themselves these questions about their provisional voting systems.

1. Does the provisional voting system distribute, collect, record, and tally provisional ballots with sufficient accuracy to be seen as procedurally legitimate by both supporters and opponents of the winning candidate? Does the tally include all votes cast by properly registered voters who correctly completed the steps required?
2. Is the provisional voting system sufficiently robust to perform well under the pressure of a close election when ballot evaluation will be under scrutiny and litigation looms?
3. Do the procedural requirements of the system permit cost-efficient operation? Are the administrative demands of the system reasonably related to the staff and other resource requirements available?
4. How great is the variation in the use of provisional voting in counties or equivalent levels of voting jurisdiction within the state? Is the variation great enough to cause concern that the system may not be administered uniformly across the state?

If the answers to these questions leave room for doubt about the effectiveness of the system or some of its parts, the EAC's recommendation of best practices should provide the starting point for a state's effort to improve its provisional voting system.

Best Practices For Each Step In The Process

We examined each step of the provisional voting process to identify specific areas where the states should focus their attention to reduce the inconsistencies noted in our analysis. We offer recommendations in each area appropriate to the responsibilities that HAVA assigns the EAC for the proper functioning of the provisional voting process.

The Importance of Clarity

The EAC should emphasize above all else the importance of clarity in the rules governing every stage of provisional voting. As the Century Foundation's recent report observed, "Close elections increasingly may be settled in part by the evaluating and counting of provisional ballots. . . . To avoid post election disputes over provisional ballots—disputes that will diminish public confidence in the accuracy and legitimacy of the result— well in advance of the election, states should establish, announce, and publicize clear statewide standards for every aspect of the provisional ballot process, from who is entitled to receive a provisional ballot to which ones are counted."²⁶

Litigation surrounding the 2004 election resulted in decisions that, if reflected in state statutes or regulations and disseminated in effective training for poll workers, can increase the clarity of provisional ballot procedures, increase predictability, and bolster confidence in the system. By taking the following steps, states can incorporate those court rulings into their procedures.

- Promulgate, ideally by legislation, clear standards for evaluating provisional ballots, and provide training for the officials who will apply those standards. For example, in Washington State, the court determined that an election official's failure in evaluating ballots to do a complete check against all signature records is an error serious enough to warrant re-canvassing.²⁷ Clear direction by regulation or statute on what records to use in evaluating ballots could have saved precious time and effort and increased the reliability of the provisional voting system.
- States should provide standard information resources for the training of poll workers by local jurisdictions. Training materials might include, for example, maps or databases with instruction on how to locate polling places for potential voters who show up at the wrong place. Usable and useful information in the hands of poll workers can protect voters from being penalized by ministerial errors at the polling place.²⁸
- State training materials provided to local jurisdictions should make clear that the only permissible requirement to obtain a provisional ballot is an affirmation that the voter is registered in the jurisdiction and eligible to vote in an election for federal office.²⁹ Recent legislation in Arizona indicates that recommendations should emphasize HAVA's requirement that persons appearing at the polling place claiming to be registered voters cannot be denied a ballot because they do not have identification with them. Poll

²⁷ See *Washington State Republican Party v. King County Division of Records*, 103 P3d 725, 727-728 (Wash. 2004)

²⁸ See *Panio v. Sunderland* 824 N.E.2d 488, 490 (NY, 2005) See also Order, *Hawkins v. Blunt*, No.04-4177-CV-C-RED (W.D. Mo. October 12, 2004). While rejecting the notion that all ballots cast in the wrong precinct should be counted, the court ruled that provisional votes cast in the wrong precinct should be thrown out provided that the voter had been directed to the correct precinct. This meant that provisional votes cast in the wrong precinct (and even the wrong polling place) would count if there were no evidence that the voter had been directed to a different polling place. The court placed a duty upon election officials to make sure the voters were in the correct locations. Note that this question would not arise in a state that counted ballots cast in the wrong polling place but within the correct county.

²⁹ *Sandusky County Democratic Party v. Blackwell*, 387 F.3d 565, 774 (6th Cir. 2004)

workers may need appropriate training to understand their duty to give such voters a provisional ballot.³⁰

A. Registration and Pre-Election Information for Voters

Providing crisp, clear information to voters before the election is important to the success of the provisional voting process. The better voters understand their rights and obligations, the easier the system will be to manage, and the more legitimate the appearance of the process. States can begin by assessing the utility and clarity of the information for voters on their websites and by considering what information might be added to sample ballots mailed to voters before elections. Best practices in this area would include:

1. If states require identification at the time of registration, the kind of IDs required should be stated precisely and clearly and be publicly and widely available in a form that all voters can understand. For example, "You must bring your driver's license. If you don't have a driver's license, then you must bring an ID card with your photograph on it and this ID card must be issued by a government agency."³¹
2. The process to re-enfranchise felons should be clear and straightforward. To avoid litigation over the registration status of felons, best practice should be defined as making re-enfranchisement automatic, or no more burdensome than the process required for any new registrant.³²
3. State or county websites for voters should offer full, clear information on boundaries of precincts, location of polling places, requirements for identification, and other necessary guidance that will facilitate registration and the casting of a regular ballot. An 800 number should also be provided. Models are available: the statewide databases in Florida and Michigan provide voters with provisional voting information, registration verification and precinct location information.

B. At the Polling Place

Avoiding error at the polling place will allow more voters to cast a regular ballot and all others who request it to cast a provisional ballot.

1. The layout and staffing of the polling place, particularly the multi-precinct polling place is important. Greeters, maps, and prominently posted voter information about provisional ballots, ID requirements, and related topics can help the potential voters cast their ballot in the right place. States should require poll workers to be familiar with the options and provide the resources needed for them to achieve the knowledge needed to be helpful and effective. Colorado has clear regulations on polling place requirements, including HAVA information and voting demonstration display.³³ Many states require training of poll workers. In some states that requirement is recent: after the 2004 election, New Mexico adopted a requirement for poll workers to attend an "election school."³⁴ A state

³⁰ *The Florida Democratic Party v. Hood*, 342 F. Supp. 2d 1073, 1075-76 (N.D. Fla. 2004). The court explained that provisional voting is designed to correct the situation that occurs when election officials do not have perfect knowledge and when they make incorrect determinations about eligibility (the "fail-safe" notion). Denying voters provisional ballots because of on-the-spot determinations directly contradicts this idea. Even before the cited decision, the Florida Secretary of State's office had determined that any voter who makes the declaration required by federal law is entitled to vote a provisional ballot, even if the voter is in the wrong precinct.

³¹ Websites in 29 states describe, with varying degrees of specificity, the identification voters may need. In 18 states voters can learn something about the precinct in which they should vote. And in 6 states (California, District of Columbia, Kentucky, Michigan, North Carolina, and South Carolina) they can verify their registration on the website.

³² The Century Foundation, *op. cit.*

³³ 8 Colo. Code Regs. § 1505-1, Rule 7.1.

³⁴ 2005 N.M. Laws 270 page no. 4-5.

statutory requirement for training could facilitate uniform instruction of poll workers in those states that do not already provide it.

2. The provisional ballot should be of a design or color sufficiently different from a regular ballot to avoid confusion over counting, as occurred in Washington State. The ballot might include a tear-off leaflet with information for voters such as: "Reasons Why Your Provisional Ballot Might Not Be Counted" on one side and "What to Do if My Provisional Ballot Is Not Counted" on the other.
3. Because provisional ballots offer a fail-safe, supplies of the ballots at each polling place should be sufficient for all the potential voters likely to need them. In 2004, some polling places ran out of ballots, with unknown effects on the opportunity to vote. In Middlesex County, New Jersey, for example, on Election Day the Superior Court ordered the county clerk to assure that sufficient provisional ballots were available at several heavily used polling places, and it authorized the clerk "in the event additional provisional ballots are required . . . to photocopy official provisional ballots."³⁵ At least two states, Connecticut and Delaware, provide guidelines to local election officials on how to estimate the demand for provisional ballots. Connecticut sets the number at 1% of the voters in the district, Delaware at 6%.³⁶ States that do not offer a practical method to guide the supply of provisional ballots at polling places should consider doing so. The guideline should take into account both the number of voters in the district and the number of provisional ballots actually cast in recent elections.
4. To achieve the procedural clarity needed to forestall disputes, states should establish a clear chain of custody for the handling of provisional ballots from production through distribution, collection and, finally, evaluation. A number of states have clear procedures for at least parts of this chain of custody. All states should examine their chain-of-custody requirements for clarity. Illinois includes the potentially beneficial requirement that ballots be transported by bi-partisan teams, which offers the potential to avoid some charges of election fraud.

C. Evaluating Voter Eligibility and Counting Provisional Ballots

The clarity of criteria for evaluating voter eligibility is critical to a sound process for deciding which of the cast provisional ballots should be counted. Public recognition of the validity of those criteria is important to establishing the legitimacy of the system as a whole. The experience in 2004 in North Carolina, Washington, and Ohio underlines the importance of clear criteria. As the Century Foundation report put it, "Whatever procedures the states choose [to determine if a provisional ballot should be counted], the paramount consideration—as with all others concerning provisional voting—is that they be clear and thus not susceptible to post-election manipulation and litigation."³⁷ Nonetheless, the *Panio v. Sutherland*³⁸ decision in New York shows the difficulty of defining the range of administrative errors from which the provisional voters should be held harmless. Even when the standard is "clerical error" judges can differ over what that means exactly. Possibly a state law might be able to clarify a definition by giving examples of clerical errors, but even then the definition is unlikely to be perfect.

³⁵ Voting Order, November 2, 2004, Superior Court of New Jersey, Law Division, Middlesex County.

³⁶ Connecticut: "Equal to or not less than 1% of the number of electors who are eligible to vote in any given district, or such other number as the municipal clerk and the registrars agree is sufficient to protect voting rights. Conn. Gen. Stat. Ann. § 9-232j. Delaware: Each County Department of Elections Office is required to provide to each election district a number of provisional ballots equal to 6% of registered voters in that district, with a minimum allocation of 15 ballots. Additional supplies to be delivered when the supply becomes "very low." Del.Code Ann. Tit 15 § 4948(e).

³⁷ The Century Foundation, op. cit.

³⁸ 4 N.Y.3d 123, 824 N.E.2d 488 (N.Y. 2005) and Memorandum (LaPlante—Foley) Provisional Ballot Cases by State, July 19, 2005.

1. State statutes or regulations should define a reasonable period for voters who lack the HAVA-specified ID or other information bearing on their eligibility to provide it in order to facilitate the state's ability to verify that the person casting the provisional ballot is the same one who registered. While there may be a concern to ensure that the individual who returns with the ID may not be the same individual who cast the provisional ballot, the spirit of HAVA demands that the opportunity to prove identity be provided after Election Day. A signature match can go far in establishing that the individual who voted and the individual returning later with identification is, in fact, the same person. Encouraging a voter who lacks ID on Election Day to return later to help the verification process by providing proper identification will strengthen the system and increase public confidence in the electoral process. Our data indicate that some voters would prefer to return with ID rather than to sign an affidavit, perhaps because of uncertainty about the legal process involved in the affidavit. At least 11 states allow voters to provide ID or other information one to 13 days after voting. Of particular interest is Kansas, which allows voters to proffer their ID by electronic means or by mail, as well as in person.³⁹
2. More provisional ballots are counted in those states that verify ballots cast outside the correct precinct.⁴⁰ While HAVA arguably leaves this decision up to the states, pointing out the effect of the narrower definition on the portion of ballots counted could be useful to the states in deciding this question. States should be aware, however, of the additional burden placed on the ballot-evaluation process when out-of-precinct ballots are considered. And tradeoffs are involved if out-of-precinct voters are unable to vote for the local offices that might appear on the ballot in their district of residence. One option for states is to involve the voters in the decision by pointing out that voters who cast their provisional ballots in the wrong precinct may not be able to participate in the local election. The voter could then decide to go to the correct precinct or vote provisionally for the higher offices at the top of the ticket only.
3. Alternatively, if a state chooses to require voters to appear at their assigned precinct, where the same polling site serves more than one precinct, a voter's provisional ballot should count so long as the voter cast that ballot at the correct polling site even if at the wrong precinct within that location.⁴¹ Ideally the voter could be directed to the correct machine, but poll worker advice will not always be correct. One way to assess the balance of issues here is to consider that, if a voter in a multi-precinct polling place is sent to the wrong machine, the error is probably the poll worker's, and the voter should not be penalized.

³⁹ In Kansas, the voter can provide ID to a County Election Officer any time before the County Board of Canvassers meets to count provisional ballots. KS. ST. 25-1122(d). ID can be presented in person, OR via mail or electronic means. *Id.* The Board must meet either on the Friday or Monday following a Tuesday election. *Id.* at 25-3104. Deadlines in other states are: Alabama – 5:00 P.M. on the Monday following the election AL ST § 17-10A-2(c)(1) Florida: until 5:00 P.M. on the third day following the election . Fla. Stat. Ann. § 101.048 (adopted after the 2004 election); Georgia—no later than 2 days after the election. GA ST § 21-2-417; 419. Illinois- 2 days to submit additional information 10 Ill. Comp. Stat. Ann. 5/18A-15(d); Indiana— in 2004 the deadline was the close of the polls IN. ST. §. 3-11.7-5-2(a). The time period was extended to 13 days by the adoption of Indiana Code 3-11-8, Section 25, Subsection (l); Maryland—until the meeting of the Election Board; MD ELEC LAW § 11-303. New Jersey— until the close of business on the second day after the election 19:53C-3(i). Nevada— until 5:00 P.M. on the Friday following the election NV ST 293.3085; New Mexico—until 7:00 P.M. on Election Day NM ADC 1.10.22 (8) (H).

⁴⁰ See Andersen, *op. cit.* pgs. 23 – 24 for an analysis of the significant effect of counting out-of-precinct ballots. The Election Day Survey found that, "Most notably, jurisdictions that permitted jurisdiction-wide acceptance of provisional ballots reported higher rates of provisional ballots being cast, but also reported a much higher incidence of provisional ballots being counted, than other jurisdictions."

⁴¹ Chances are administrative error accounts for the voter being directed to the wrong precinct under these circumstances.

4. Officials should follow a written procedure, and perhaps a checklist, to identify the reason why a provisional ballot is rejected (e.g., check the applicable box “unregistered voter”; “lack of signature match” “wrong precinct,” etc.) Those forms should be disclosed publicly when completed. Colorado’s election rules offer particularly clear guidance to the official evaluating a provisional ballot.⁴²

Colorado Rejection Codes (Any ballot given a rejection code shall not be counted):

RFS	(Rejection federal or state) No federal or state candidates or issues to duplicate.
RNS	(Rejection not signed) Provisional Ballot Affidavit not signed.
RIN	(Rejection incomplete information provided) Required information is incomplete and the designated election official is unable to confirm voter’s eligibility.
RNR	(Rejection not registered) Voter did not register by the voter registration deadline or by emergency registration, Colorado voter registration record was not found, or voter was previously cancelled and has not been reinstated pursuant to 1-2-605(10). C.R.S.
REE	(Rejection envelope empty) Provisional ballot envelope is empty.
RAB	(Rejection voter voted absentee) Designated election official has confirmed that voter voted an absentee ballot.
REV	(Rejection based on ballot cast in early voting) Voter voted early.
RIP	(Rejection based on incorrect party) Incorrect Party in Primary Election.
RFE	(Rejection felon not eligible to vote) Individual was convicted of a felony and is either serving a sentence of confinement or detention or is on parole.
RWC	(Rejection elector not registered in county or State of Colorado) Non-county or non-state resident; therefore voter not eligible to vote in the county where the provisional ballot was voted.
RID	(Rejection first time voter has not supplied identification upon registration or thereafter prior to and during time voter voted) First Time Voter who registered by mail or through a voter registration drive, is tagged as id deficient, and did not provide id at the time of voting.
RRD	(Rejection registration deficient) Voter had deficient or incomplete registration and required information was not provided prior to or at the time of filling in the provisional ballot envelope. Voter’s eligibility cannot be established.

D. Verification of Provisional Ballots

1. States that use the information on the provisional ballot to permit voters who have changed their addresses to update their registrations should adopt clear procedures on that process and specify how the new information will be communicated between different Boards of Elections.
2. In verifying provisional ballots, the time by which election officials must make their eligibility determinations is particularly important in presidential elections because of the need to certify electors to the Electoral College. States should consider in particular how to divide the time constraints imposed in presidential election by the safe-harbor provisions regarding certification to the Electoral College. Some part of this five-week period will be consumed by the eligibility evaluation, but states should take care to provide a sufficient period of time as well for challenges. If a state consumes 21 days

⁴² 8 CCR 1505-1, at 26.5.4, adopted august 4, 2005. See also 1-2-509(3) C.R.S.

017614

following the election in the eligibility evaluations, only two weeks will remain for legal challenges to be concluded. Is that sufficient? Or should the state provide the resources needed to complete the eligibility determinations in 10 days or two weeks, leaving three weeks or more for legal challenges in a close election? Our research did not identify an optimum division of the five weeks available. The prudent course here would be to encourage states to consider the issue and then make a careful decision about how to complete all steps in the evaluation of ballots and challenges to those determinations within the five weeks available.

E. Post-election Information for Voters

Timely information to voters about the disposition of their provisional ballot will provide helpful feedback and more important enable voters to determine if they are registered for future elections and, if not, what they need to do to become registered.

1. Establish mechanisms to ensure that voters casting provisional ballots are informed whether they are now registered for future elections and, if not, what they need to do to become registered.

F. State Laws Governing Litigation over Provisional Voting

1. Establish special, streamlined litigation procedures for Election Day complaints that individuals are being denied the right to cast a provisional ballot.

Broader Considerations

G. Integrity and the Appearance of Integrity

1. State laws or regulations providing for non-partisan or bi-partisan bodies to make a public determination of the validity of provisional ballots would increase confidence in the system.
2. To improve transparency, state laws or regulations should require the purging process for registration to be public and with an opportunity for voters to correct an erroneous determination that they should be purged.
3. State laws or regulation should require the evaluation process for provisional ballots to be public, while protecting the names of those who voted provisionally.

H. Continuous Assessment of the Provisional Ballot – Process and Performance

Defining what makes for a successful provisional voting system is difficult. The most successful system is probably not the one with the most provisional votes cast (that could indicate problems with the registration system). Nor is the system with the greatest number counted or with the fewest counted necessarily superior because the evaluation process could be flawed.

Defining quality requires a broad perspective about how well the system works, how open it is to error recognition and correction, and how well provisional voting processes are connected to the registration and voter identification regimes. The EAC should consider engaging one of the national quality organizations or processes, such as Six Sigma⁴³ or the Baldrige Quality

⁴³ Six Sigma is a measure of quality that strives for near perfection. Six Sigma is a disciplined, data-driven approach and methodology for eliminating defects (driving towards six standard deviations between the mean and the nearest specification limit) in any process – from manufacturing to transactional and from product to service.

process ⁴⁴ to evaluate the provisional ballot process. Pending such a review, the EAC can recommend that states take the following actions.

1. Recognize that the first step to improving quality is to see the provisional voting process as a system and take a systems approach to regular evaluation through standardized metrics with explicit goals for performance.
2. States should begin by collecting data systematically on the provisional voting process so that they can evaluate their voting system and assess changes from one election to the next. The effort should start in the 2006 election, and the data collected should include:
 - Provisional votes cast and counted by jurisdiction, say counties, with details on why the voter had to vote provisionally (lack of ID, not on list, challenged at polling place, issued absentee ballot, etc) and number of ballots actually counted in each category.
 - Reasons why provisional ballots were not counted, using categories such as those that have been adopted by Colorado, described earlier in this report.
 - Measures of variance among jurisdictions.
 - Number of poll workers trained in administration of provisional voting by polling place.
 - Number of jurisdictions posting information on provisional voting in the polling place.
 - Time required to evaluate ballots by jurisdiction.

Improving understanding of the provisional voting process through analysis of detailed information will enable state and local election officials to strengthen their systems. By collecting and analyzing this data states can identify which aspects of the registration and electoral system are most important in shunting voters into the provisional ballot process. Responsible officials can then look to their registration system, identification requirements or poll worker training as a way to reduce the need for voters to cast their ballots provisionally.

⁴⁴ The Baldrige Criteria for Performance Excellence provide a systems perspective for understanding performance management. They reflect validated, leading-edge management practices against which an organization can measure itself. With their acceptance nationally and internationally as the model for performance excellence, the Criteria represent a common language for communication among organizations for sharing best practices. The Criteria are also the basis for the Malcolm Baldrige National Quality Award process.

ATTACHMENT 1 – Data Sources for Classification of the States

Our research on provisional voting divided the various states into several categories to allow an assessment of how different factors may have influenced the process of casting and counting provisional ballots. This analysis was conducted before the release of the Election Day Study, and the categories we used may differ in some respects from its work. The variables used to analyze a state's use of provisional ballots were:

1. New vs. Old (states that used a provisional ballot before the 2004 election)
2. Use of a statewide database of registered voters vs. no use of a statewide database
3. Counting out-of-precinct ballots vs. not counting out-of-precinct ballots
4. Voter identification requirements
5. Method used to verify provisional ballots
6. Levels of provisional ballots cast and counted

We first assigned states within these categories based on classifications done by Electionline.org in its studies. The Electionline data was the only published information available at the time of our research. We reviewed the Electionline data carefully, and, in select cases, updated it with new, detailed information that had become available after its publication. The changes we made are explained below.

--Idaho, Maine, Minnesota, New Hampshire, Wisconsin and Wyoming were excluded from our analysis. They have election-day registration systems, and did not need to use HAVA-compliant provisional ballots.

--North Dakota does not register voters, so it also was excluded from HAVA requirements and did not use provisional voting.

--Mississippi has not reported its provisional voting results and could not be included in our analysis, though it was compliant in 2004.

--Pennsylvania did not report its totals for the Election Day Study, but we obtained information on Pennsylvania and included it in our analysis.

New vs. Old States

We classified states as "new" or "old" based on the 2001 Electionline study of provisional voting,⁴⁵ but condensed its classifications into a single dichotomous variable, new/old with all other cases excluded. The Electionline study divided states into five categories of their use of provisional ballots in the 2000 election:

1. Use of provisional ballots (P)
2. Limited use of provisional ballots (LP)
3. Affidavit ballots (A)
4. No system in place (N)
5. Unnecessary/Not Applicable (U/NA)

We included in the list of "Old States" all states listed as using provisional ballots, limited use of provisional ballots or affidavit ballots. States in all three categories would have been familiar with key aspects of provisional voting. States that had no provisional voting system in place for the 2002 election, and were HAVA compliant in 2004, were listed as "new" states, as 2004 would have been the first year in which they would be offering the option of provisional voting. States that were listed as unnecessary or not applicable were excluded from this study, as they were exempt from the HAVA regulations in 2004 because they either allowed same-day registration or did not register voters.

⁴⁵ This study can be found at: <http://electionline.org/Portals/1/Publications/Provisional%20Voting.pdf>

Rhode Island is the only state categorized as an old state by Electionline that we moved into the list of new states. Electionline's map shows Rhode Island as a state that used provisional voting in 2000, but in the state description, it is listed as having no system in place. We learned from the Rhode Island Board of Elections that the state had previously permitted potential voters to sign an affidavit if they did not appear on a precinct's list of registered voters, but felt they were registered to vote. Based on the signed affidavit, the election official would then contact a county official to see if the voter was on a more complete registration list. If the voter's name was on the complete list, that voter was permitted to cast a regular ballot. As this process did not grant the voter a provisional ballot, but served as a different type of administrative failsafe, we concluded that Rhode Island's first use of provisional voting was in 2004 and, therefore, classified the state as "new" to the system of provisional balloting.

Old States	New States	HAVA Exempt or NA
Alaska	Connecticut	Idaho
Alabama	Delaware	Maine
Arkansas	Georgia	Minnesota
California	Hawaii	New Hampshire
Colorado	Illinois	North Dakota
DC	Indiana	Wisconsin

Statewide List of Registered Voters

The Electionline preview of the 2004 Election⁴⁶ was the starting point for compiling a list of states that had a statewide database of registered voters. That study listed 34 States that did not have their statewide database systems complete, and 16 that did, including the District of Columbia. North Dakota does not register voters, so does not need to compile such a database. Electionline's criterion for concluding that a state had a statewide list was that the state have participation from all jurisdictions in a statewide system. We added Oklahoma to the list of states with statewide databases because we found it had met the Electionline criteria by the 2004 election, albeit too late for inclusion in the Electionline survey.

Out-of-Precinct Ballots

We based our classification of states that allow the counting of ballots cast outside the correct precinct on the data in the 2004 Electionline preview of the 2004 election². States that evaluated ballots cast in a precinct where the voter was not registered were categorized as "out-of-precinct." States that invalidated such ballots were categorized as "In-precinct only."

Table 2 CATEGORIZATION OF STATES -- Counting Out-Of-Precinct Ballots		
Out-of-Precinct	In-Precinct Only	HAVA EXEMPT OR NA
Alaska	Alabama	Idaho
Arkansas	Arizona	Maine
California	Colorado	Mississippi

⁴⁶ "Election Preview 2004: What's changed, What Hasn't and Why". This study can be found at: <http://electionline.org/Portals/1/Publications/Election.preview.2004.report.final.update.pdf>

⁴⁷ In Illinois, it is not clear that all counties followed this procedure. Some counties may not have counted out-of-precinct ballots.

Verification Method

We identified four different ways states assessed provisional ballots to determine if they should be counted: signature match, match voter data, signed affidavits, and bringing back identification later. We gathered information about these verification techniques by checking state websites and consulting journalistic accounts. We consulted state legislation to provide further information where needed.

Signature Match	Data Match	Affidavit	Return with ID	NA
Alaska	Alabama	Connecticut	Indiana	Idaho
California	Arizona	Delaware	Iowa	Maine
Florida	Arkansas	Georgia	Kansas	Mississippi
Oregon	Colorado	Hawaii	Maryland	Minnesota
	DC	Illinois	Michigan	New Hampshire
	Louisiana	Kentucky	Montana	N. Carolina*
	Missouri	Massachusetts	New Jersey	N. Dakota
	Ohio	Nebraska	New Mexico	Wisconsin
	Oklahoma	Nevada	Texas	Wyoming
	Pennsylvania	New York	Utah	
	Rhode Island	South Dakota		
	S. Carolina	Tennessee		
	Washington	Vermont		
	West Virginia	Virginia		
4	14	14	10	9

* North Carolina lacked clear standards to evaluate provisional ballots and is excluded from this analysis.

017620

Data Collection

To assemble our data for analysis, we began by using the data on provisional votes cast and counted reported by Electionline. To increase the accuracy of this data, we surveyed each state's election websites for updated data, and for reported numbers on the county level. We then sent emails to 49 (we excluded Alaska, see below) states and the District of Columbia, requesting updated data on the number of provisional votes cast and counted by county. We received information from 25 states by our cut-off date of August 25, 2005.

Table 4	
Updated information by State	
Received Updated Data	Did Not Receive Updated Data
California	Alabama
District of Columbia	Alaska ⁴⁸
Florida	Arizona
Hawaii	Arkansas
Indiana	Colorado
Iowa	Connecticut
Kansas	Delaware
Louisiana	Georgia
Maryland ⁴⁹	Idaho
Missouri	Illinois
Montana	Kentucky
Nebraska ⁵⁰	Maine
Nevada	Massachusetts
New Jersey	Michigan
New Mexico	Minnesota
Ohio	Mississippi
Oklahoma	New Hampshire
Oregon	New York
Pennsylvania	North Carolina
Rhode Island	North Dakota
South Dakota	South Carolina
Tennessee	Utah
Texas	Vermont
Virginia	Wisconsin
Washington	Wyoming
West Virginia	
26 States	25 States

⁴⁸ Alaska was not contacted via email, as the state does not have voting districts comparable to counties in other states and could not be matched with comparable census data.

⁴⁹ Maryland reported provisional ballots that were counted per county, but not number cast.

⁵⁰ Nebraska reported an incomplete list of provisional ballots cast and counted by county, but designated counties by number, rather than by name.

Data Differences

The data used in this study differ from the data reported in the Election Day Study for 19 states. The Election Day Study was not completed until well after our statistical analysis of provisional voting was finished. Where there are differences, they are typically very small, usually fewer than 100 votes either cast or counted. Of the 9 states that have differences of more than 100 votes cast or counted, 7 have reported their numbers directly to us and can be considered updated data that EDS had not obtained. For one of those states, New Mexico, EDS had incomplete data, and for another, Pennsylvania, EDS had no data at all. The data that we have collected reflects updated numbers from the states that have changed following recounts and litigation that altered how ballots were evaluated.

State	EDS Numbers Cast/Counted	Our Numbers Cast/Counted	Differences	Updated Info from State?⁵¹
Alabama	6,478/1,865	6560/1836	82/29	No
Alaska	23,285/22,498	23,275/22,498	10/0	No

The Research Team

This research report on Voter Identification Requirements in the 2004 election is part of a broader analysis that also includes a study of Provisional Voting, which has already been submitted to the EAC. Conducting the work was a consortium of The Eagleton Institute of Politics of Rutgers, The State University of New Jersey, and The Moritz College of Law of The Ohio State University.

The **Eagleton Institute** explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions.

The **Moritz College of Law** has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. Its contributions to election law have become well known through its Election Law @ Moritz website. *Election Law @ Moritz* illuminates public understanding of election law and its role in our nation's democracy.

Peer Review Group

A draft of this report and the statistical analysis in its appendix were critiqued by a Peer Review Group. The comments of its members improved the quality of our work. While the Group as a whole and the comments of its members individually contributed generously to the research effort, any errors of fact or weaknesses in inference are the responsibility of the Eagleton-Moritz research team. The members of the Peer Review Group do not necessarily share the views reflected in our recommendations.

REPORT AND RECOMMENDATIONS TO THE EAC VOTER IDENTIFICATION ISSUES

Report Background

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the United States Election Assistance Commission (EAC) (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

This study provides information on voter identification practices in the 2004 election. It makes recommendations for best practices to evaluate future proposals for voter ID requirements, including the systematic collection and evaluation of information from the states. The research was conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at the Ohio State University under a contract with the EAC, dated May 24, 2005. The work included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting as well as a statistical analysis of the relationship of various requirements for voter identification to turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

EXECUTIVE SUMMARY AND RECOMMENDATIONS

Background and Methods

This report arrives at a time of considerable ferment over the issue of voter identification. The debate across the nation over requiring voters to produce a specific identification document before being permitted to cast a regular (as opposed to a provisional) ballot, has revealed supporters and opponents in polarized camps.

- Proponents of stricter identification requirements base their case on improving the security of the ballot by reducing opportunities for one kind of vote fraud —multiple voting or voting by those who are not eligible. The proponents argue that their goal is to ensure that only those legally entitled to vote do so, and do so only once at each election.

- Opponents seek to forestall more stringent identification requirements, such as government-issued photo ID, in order to ensure broad access to a regular ballot. They fear that some voters—such as, they argue, racial and ethnic minorities, the young, and elderly voters— may lack convenient access to the required ID documents, or that such voters may be fearful of submitting their ID documents to official scrutiny and thus stay away from the polls.
- Both sides argue that their preferred policy will engender faith in the electoral process among citizens.

This report considers policy issues associated with the voter ID debate. It inquires whether empirical study can suggest a way to estimate the effects of different voter ID requirements on turnout. That analysis would constitute an important first step in assessing tradeoffs between ballot security and ballot access. The aim of this research is to contribute to the effort to raise the quality of the debate over this contentious topic. The tradeoffs between ballot security and ballot access are crucial. A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

As part of the project's effort to analyze the relationship between Voter ID requirements, turnout, and their policy implications, a statistical analysis examined the potential variation in turnout. This statistical study developed a model to illuminate the relationships between voter ID requirements and turnout. This model's findings and limitations suggest avenues for further research and analysis that may assist the EAC and the states as they explore policies to balance the goals of ballot integrity and ballot access.

The statistical analysis describes one possible way to estimate what might be the incremental effect on voters' access to the ballot of an increase in the rigor of voter identification requirements. We do not offer this statistical analysis as the last word, but rather as a preliminary word on the subject. Its findings must be regarded as tentative; the information (such as the specific reasons some potential voters are not allowed to cast a regular ballot) that that might permit greater certainty is simply not available. Indeed, as our recommendations indicate, the next step to improve understanding of the effects of stricter voter identification on

turnout and on vote fraud is to collect more information on both topics systematically and regularly.

Making a statistical estimate of the effect of voting regulations on turnout is difficult. The dynamics of turnout are complex, much studied, and only partially understood. Some agreement exists, however, that three factors that exert substantial influence on voter turnout are:¹ the socioeconomic status of the potential voter; legal requirements to vote; and the political context of the election. By focusing on how voters identify themselves at the polls, this report emphasizes legal requirements. The statistical analysis also considers some of the socioeconomic, racial, and age characteristics of the electorate, as well as the political context in 2004 (such as whether a state was a battleground in the presidential race).

Examining tradeoffs between ballot security and ballot access requires some measure of the effectiveness of voter ID requirements in reducing multiple voting or voting by ineligible voters. The existing evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification, is not sufficient to evaluate those tradeoffs.² Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. This research does not include consideration of vote fraud, nor does it estimate the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. Our analysis also cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

Despite these qualifications regarding the quality of the available data and the limitations of statistical analysis, however, the different statistical methods and two different sets of data on turnout in 2004 election used in the study point to the same general finding. Stricter voter identification requirements (for example, requiring voters to present non-photo ID compared to simply stating their names) were correlated with reduced turnout in the models employed, as described in detail in Appendix C.³ As explained below, these models find that a statistically

¹ See, for example, Tom William Rice and Patrick J. Kenney, "Voter Turnout in Presidential Primaries." 1985. Political Behavior, 7: 101-112. Identification requirements are not the only legal restrictions on voting. States also differ, for example, in their registration requirements (including how long before the election registration must take place and the identity documents required register).

² The EAC has contracted with other researchers to study vote fraud issues.

³ Appendix C: Tim Vercellotti, Eagleton Institute of Politics, *Analysis of Effects of Voter Identification Requirements on Turnout*. Using the aggregate data, photo ID did not have a significant effect on turnout, possibly because in the

significant relationship exists, even when controlling for other factors (such as whether the election was in a battleground state) that might affect turnout. (But note that in the model using the aggregate data, photo ID did not have a significant effect on turnout. The reason may have been that in this election, each state with a photo ID requirement provided an alternate way for those without a photo ID to cast a regular ballot.) Without knowing more about the effects of stricter voter ID on reducing multiple voting or voting by ineligible voters, however, the tradeoffs between ballot security and ballot access cannot be assessed.

Methodology

The report includes detailed information on the nature of the statutory requirements across the country in 2004 and on the statutes and court decisions that provide the legal context for the voter ID debate. We gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. Based on our interpretation of state statutes, supplemented in some cases by conversations with state election officials, we divided the states' ID requirements into five categories. We believe each category is more rigorous than the one preceding, based on the demands they make on voters.⁴ The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name." "Signature Match" requires poll workers to examine the signature and compare it to a sample, which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents may not be uniformly and conveniently available to all voters.

For each state, we identified both the "maximum" and "minimum" identification requirements. The term "maximum" refers to the most that voters may be asked to do or show at the polling place (putting aside cases in which particular voter's eligibility may be questioned pursuant to a state challenge process). The term "minimum," on the other hand, refers to the most that voters can be required to do or show, in order to cast regular ballot (again leaving aside a state

2004 election every state requiring photo ID provided an alternative way to cast a regular ballot for those voters who lacked photo identification. The individual data from the Current Population Survey did show a significant effect, but only for the overall sample and for white voters, which may be an artifact of the large sample size.

⁴ Even the most relaxed provisions for identification at the polls—anything stricter than the honor system used in North Dakota—will impose some burden on particular voters. Harvard Law Review 119:1146

challenge process). We have included “maximum” requirements in our analysis, and not simply “minimum” requirements, because simply asking voters to produce particular identifying information may have a deterrent effect, even if voters are ultimately allowed to cast a regular ballot without that identification. For example, in a state where voters are asked to show photo ID at the polling place, but still allowed to vote by completing an affidavit confirming their eligibility, the “maximum” of being asked to show photo ID may deter some voters even though the “minimum” would allow them to vote without photo ID.

It is worth emphasizing that, at the time of the 2004 election, there was *no* state that had a “minimum” requirement of showing photo ID – in other words, there was no state that required voters to show photo ID in order to cast a regular ballot. For this reason, our report does not measure the impact of laws, like those recently enacted in Indiana and Georgia, which require voters to show photo ID in order to cast a regular ballot without an affidavit exception.

To examine the potential variation on turnout rates associated with each type of voter ID requirements in effect on Election Day 2004, the statistical analysis drew on two sets of data. These were, first, aggregate turnout data at the county level for each state and, second, the reports of individual voters collected in the November 2004 Current Population Survey by the U. S. Census Bureau. Using two different data sets makes it possible to check the validity of one analysis against the other. It also provides insights not possible using only one of the data sets. The aggregate analysis cannot provide valid estimates on the effects of different ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates). The Current Population Survey data does permit that kind of analysis, although it has the disadvantage of relying on self-reports by respondents about their registration status and experience in the polling place.

To understand legal issues that have been raised in recent litigation over voter ID requirements, we collected and analyzed the few major cases that have been decided so far on this issue. The decisions so far provide some guidance on the constitutional and other constraints as to voter ID requirements.

Summary of Findings

As voter identification requirements vary, voter turnout varies as well. This finding emerged from both the statistical analysis’s aggregate data and the individual-level data, although not always

for both the maximum and minimum sets of requirements. The overall relationship between the stringency of ID requirements and turnout was fairly small, but still statistically significant.

In the model used with the aggregate data in the statistical analysis, for the maximum ID requirements, the match-signature requirement and the provide-a- non-photo-ID requirement, but not the photo ID requirement, were all correlated with lower turnout compared to requiring that voters state their names. When the registration closing deadline was added as an independent variable in the aggregate analysis, signature match and non-photo id remained significant and negative predictors in the model.

The reduction in turnout was not the same for all demographic groups in the citizen voting age population.

The non-photo identification requirement showed the most significant and consistent correlation with reduced turnout. This result may be surprising given the intense debates surrounding photo identification requirements. The effect of photo ID requirements cannot, however, be assessed from the data the statistical analysis examined, since none of the states had laws in 2004 that conditioned voting on presentation of photo ID. Each of the five states that had photo ID as a "maximum" requirement (i.e., the most that voters could be asked to show at the polls) accepted another type of identification or an affidavit as a "minimum" requirement in the 2004 election (i.e., they were allowed to cast a regular ballot with something less than photo ID).

Significant questions about the relationship of voter identification requirements to turnout remain unanswered. The data examined in this project could not capture the dynamics of how identification requirements might lower turnout. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? Other factors that may also be correlated with stricter ID laws – such as less user-friendly voter registration systems – may actually be causing lower turnout. The CPS data do not include the information needed to answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such

knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Our analysis of litigation suggests that the courts will look more strictly at requirements that voters produce a photo ID in order to cast a regular ballot, than at non-photo ID laws. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, a best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

The current lack of understanding of precisely how voter ID requirements affect turnout could be ameliorated by requiring the collection and reporting of additional data, including the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of surveys of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast.⁵ And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements –how more rigorous voter ID requirements may affect the decision by potential voters to go or stay away from the polls– are not perfectly understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements and the two important goals of ensuring ballot access and ensuring ballot integrity.

⁵ Arizona held its first election with its new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," *Arizona Republic*, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways that are not possible now because of insufficient data.

1. Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot that is actually counted.
2. Recommend as a best practice the publication of a "Voting Impact Statement" by states as they assess their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. A "Voter Impact Statement" would estimate the number and demographics of 1) eligible, potential voters that may be kept from the polls or permitted to cast a provisional ballot by a stricter ID requirement; and 2) and assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.
3. Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should publish an analysis of this information to provide a sound factual basis for the states to consider as they estimate the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. EAC might also use the information reported by the states to encourage further assessment by the states of the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections. Well-designed longitudinal studies in the states can show the results of changing voter ID requirements on electoral participation over time. The studies should include precinct-level data to provide the fine-grained analysis that can provide a solid foundation for policy.
 - I. Useful information could be supplied by state-sponsored surveys of voters conducted by local election officials. Such surveys would make clear why those who cast a provisional ballot were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.
 - II. Surveys to ask voters what they know about the voter id requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.
 - III. Spot checks by state election officials on how the identification process works at polling places could provide information on how closely actual practice tracks

statutory or regulatory requirements. Such reports should be available to the public.

4. Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots⁶, and the safe harbor provision in presidential elections.
5. Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is less certain.

SUMMARY OF RESEARCH

Background and Approach of the Study

Voter ID requirements are just one set of rules governing voting that may affect turnout. Social scientists have long studied how election rules affect participation in elections. The general view today is that the individual citizen makes the choice of whether to vote in a way similar to other decisions that a rational citizen makes, by comparing costs and benefits. The benefits of voting are fairly stable and hard to specify given the remote probability that any one vote will make a difference in an election. But whatever the benefit as perceived by an individual voter, as the costs of voting (for example, time, hassle, acquisition of information) increase, the likelihood that a citizen will vote decrease. Not all groups in the population calculate the cost of participation in the same way, so that election laws (such as registration or identification requirements) may affect different groups differently.

A short summary of some of the social science literature illustrates what may be a broad consensus that the rules of elections affect turnout, but note the important differences in the details of what groups may be most affected.

⁶ Our research on provisional voting reveals that states that provide more than a week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.

- Bowler, Brockington and Donovan in "Election Systems and Voter Turnout: Experiments in the United States". *The Journal of Politics*, 63:3 (August 2001) concluded that electoral systems help shape turnout by altering the benefits perceived by voters. For example, cumulative voting systems have 5% greater turnout than plurality systems
- The effect of registration systems has been the subject of many studies over the last 40 years. Kelley, Ayres, and Bowen in "Registration and Voting: Putting First Things First." *American Political Science Review*. 61:2 (June 1967) found that local variations in the rate of voting are most directly tied to variations in the rate of registering to vote, and that the rate of registering to vote in localities is most directly related to the laws and administration of the registration process. They concluded that the decline in voting over the past 80 years was due, in part, to the rise of registration laws.
- Briens and Grofman in "Election Day Registration's Effect on U.S. Voter Turnout." *Social Science Quarterly*. 82:1 (March 2001), found that relaxing registration laws produces higher turnout. In particular, they observed that relaxing registration laws is more likely to promote voter turnout among those with medium levels of income and education, rather than those at the lowest levels. Highton in "Easy Registration and Voter Turnout," *Journal of Politics*. 59:2 (May 1997), concluded similarly that registration laws affect voter turnout, but also observed that easier registration promotes turnout among those in lower socio-economic status.
- Mitchell and Wlezien. "The Impact of Legal Constraints on Voter Registration, Turnout, and the Composition of the American Electorate," *Political Behavior*. 17:2 (June 1995) agreed that easier registration promotes higher turnout, but also concluded that higher turnout from easier registration would be unlikely to change the composition of the electorate. Nagler in "The Effect of Registration Laws and Education on U.S. Voter Turnout." *American Political Science Review*. 85:4 (December 1991) found that registration laws decrease voter turnout by depressing the eligible electorate, but that lower educated people are not disproportionately impacted by these laws. But Rosenstone and Raymond E. Wolfinger in "The Effect of Registration Laws on Voter Turnout." *American Political Science Review*. 72:1 (March 1978) found that while registration laws did affect both voter turnout and the composition of the electorate, the sharpest effect of these restrictions was felt in the South and among the least educated.

- Squire, Wolfinger, and Glass in "Residential Mobility and Voter Turnout." *American Political Science Review*. 81:1 (March 1987) found that people who move constitute a major demographic group affected by registration laws. They estimated that altering laws to facilitate voting by recently moved people could increase turnout by 9%. Highton in "Residential Mobility, Community Mobility, and Voter Turnout." *Political Behavior*. 22:2 (June 2000) also found that people who move have lower turnout than stable residents, and estimated that the decline was more a result of registration laws than a loss of social connections.
- Highton and Wolfinger in "Estimating the Effects of the National Voter Registration Act of 1993." *Political Behavior*. 20:2 (June 1998) concluded that the Motor Voter laws led to a significant increase in voting; that eliminating voter purges for not voting also increases voting; and that these effects are felt most heavily by the young (under 30) and the mobile (moved within past 2 years). Knack, in "Does 'Motor Voter' Work? Evidence from State-Level Data." *Journal of Politics*., 57:3 (August 1995), also found that motor voter does lead to increased registration and voting, but that other parts of NVRA of 1993, like mail-in registrations, agency-based registrations, and limitations on voter purges had not been as influential two years after the passage of the act.

While voter ID may not have been the subject of as much research as the registration process, establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The pressures felt by the voter arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may feel under pressure when faced with long lines and limited time.

Voter ID requirements on Election Day

This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related.⁷ The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

⁷ As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

The report looks at voter ID issues that go beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures over voter ID ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. Current controversies in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.⁸

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare.⁹ Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit. Ultimately, a normative evaluation of whether a state should adopt a stricter voter ID requirement (and, if so, what particular form that new requirement should take) will weigh value judgments as well as available factual evidence. Nonetheless, this report has proceeded on the premise that

⁸ Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

⁹ "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." *Harvard Law Review* 119:1144. John Fund's 2004 book, *Stealing Elections: How Voter Fraud Threaten Our Democracy*, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about *disenfranchisement*; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with *voter fraud*.

increased understanding of the factual evidence relating to the imposition of voter ID requirements, based on available data and statistical analysis of that data, can help inform the policy process.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our study of the possible effects of voter ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot.¹⁰ Voter ID requirements that require voters to bring a document to the polls—rather than simply sign their names—may divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected.¹¹ And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the polls.

¹⁰ For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

¹¹ The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.

Evaluating the effect of different Voter ID regimes can be most effective when based on clear standards –legal, equitable, practical. The standards outlined here might be described as questions policy-makers should ask about Voter ID requirements. We suggest seven questions that address important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?¹²
2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?¹³
3. How practical is the requirement? (Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required?) Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?¹⁴
4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.¹⁵ A thorough, objective impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

¹² "Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . ." Harvard Law Review 127:1144 (2006)

¹³ See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

¹⁴ In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state's voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

¹⁵ "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at administering elections will courts likely demonstrate greater willingness to uphold strict identification requirements." Harvard Law Review 127:1144 (2006)

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?¹⁶
6. Does it comply with the letter and spirit of Voting Rights Act?
7. The seventh question is the most difficult to answer. How neutral is the effect of the Voter ID requirement on the composition of the qualified and eligible electorate? Might it, intentionally or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another without an offsetting decrease in vote fraud?

Voter ID and Turnout

Based on research for this study by the Moritz College of Law, states had one of five types of maximum requirements in place on Election Day 2004. These are shown in Table 1, *Voter ID Requirements*. The five categories: at the polling place, voters were asked to either: state their names (10 states); sign their names (13 states and the District of Columbia); sign their names, to be matched to a signature on file (seven states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (five states).¹⁷ Using this information made it possible to code the states according to these requirements, and examine the assumption that voter identification requirements would pose an increasingly demanding requirement in this order: stating one's name, signing one's name, matching one's signature to a signature on file, providing a form of identification, and providing a form of photo identification, however, in all "photo ID" states in 2004, voters without photo ID could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID). The report refers to this set of ID requirements as "maximum," the most rigorous ID the voter can be asked to present at the polling place in order to cast a regular ballot.¹⁸

Election laws in several states offer exceptions to these requirements if potential voters lack the necessary form of identification. Laws in those states set a minimum standard – that is the

¹⁶ For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 *Washington and Lee Law Review* 937 (2005).

¹⁷ Oregon conducts elections entirely by mail. Voters sign their mail-in ballots, and election officials match the signatures to signatures on file. For the purposes of this analysis, Oregon is classified as a state that requires a signature match.

¹⁸ As noted above, our analysis does not consider additional requirements that particular voters may be subjected to as part of an official challenge process, in the event that their eligibility is called into question.

minimum requirement that a voter may be required to satisfy in order to vote using a regular ballot. States can be categorized based on the minimum requirement for voting with a regular ballot. In 2004 the categories were somewhat different compared to the maximum requirement, in that none of the states required photo identification as a minimum standard for voting with a regular ballot. That is, voters who lacked photo ID would still be allowed to vote in all states, if able to meet another requirement. Four states required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). The analysis also examined this array of minimum identification requirements to assess how they correlated with turnout: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit. As noted above, *no* state had a "minimum" requirement of showing photo ID. This analysis therefore cannot estimate the effect of laws, such as those recently enacted in Indiana and Georgia that require voters to show photo ID in order to cast a regular ballot without an affidavit or other exception.

We recognize the difficulties in summarizing each state's voter ID requirements. The problem is illustrated by the number of footnotes to Table 1 below. The variety of statutory and regulatory details among the states is complex.

Moving beyond the statutes and regulations, we also recognize that the assignment of each state to one category may fail to reflect actual practice at many polling places. As in any system run by fallible humans, the voter ID process is subject to variation in practice.¹⁹ Voters may have been confronted with demands for identification different from the directives in state statutes or regulation. It seems reasonable to conclude, however, that while actual practices may vary, the variance is around each state's legal requirement for ID. The analysis of the effect of state requirements on turnout must be viewed with some caution. We believe that the categories used in this report provide an acceptable level of discrimination among voter identification regimes.

¹⁹ One state election official told us that, "We have 110 election jurisdictions in Illinois, and I have reason to believe [the voter ID requirements] are administered little bit differently in each one. We wish it weren't that way, but it probably is."

TABLE 1 – Voter ID Requirements²⁰

State	Maximum Forms of ID Required 2004	Current ID Requirement for First-Time Voters	Current ID Requirements for All Other Voters	Verification Method for Provisional Ballots

* States applies only HAVA's ID requirement, applicable to first-time voters who registered by mail and did not provide applicable ID at the time of registration.

¹ Arizona voters who lack a photo ID may present 2 forms of ID with no photograph.

² Florida required a photo ID in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo ID to cast a regular ballot, though voters without photo ID may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

³ Louisiana required a photo ID in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

⁴ Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

⁵ Voters lacking a photo ID could vote by providing another form of ID in 2004.

⁶ Voters lacking a photo ID could vote by providing another form of ID in 2004.

⁷ Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with the registration.

⁸ Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Relationship of Voter ID requirements to Turnout

The statistical analysis examined the potential variation in turnout rates based on the type of voter identification required in each state on Election Day 2004 using two sets of data: aggregate turnout data at the county level for each state, as compiled by the Eagleton Institute of Politics, and individual-level survey data included in the November 2004 Current Population Survey conducted by the U.S. Census Bureau.

The statistical analysis examined turnout among U.S. citizens of voting age in both the aggregate and the individual-level data. Determining citizenship status in the individual-level data simply involved restricting the analyses to individuals who identified themselves as citizens in the November 2004 Current Population Survey. (Those who said they were not citizens did not have the opportunity to answer the supplemental voting questions contained in the Current Population Survey.)

Findings of the statistical analysis

The analysis looked at the voter identification requirements in two ways, as a continuous variable and as a series of discrete variables. As a continuous variable the maximum voter identification requirements are ranked according to how demanding they were judged to be, with photo ID as the most demanding requirement. As discrete variables, the statistical analysis assume that stating name is the least demanding ID requirement and compare each other requirement to it.

The analysis treating the requirements as a continuous variable offers some statistical support for the premise that as the level of required proof increases, turnout declines. Averaging across counties in each state, statewide turnout is negatively correlated with maximum voter identification requirements ($r = -.30, p < .05$). In considering the array of minimum requirements, with affidavit as the most demanding requirement, however, the correlation between voter identification and turnout is negative, but it is not statistically significant ($r = -.20, p = .16$). This suggests that the relationship between turnout rates and minimum requirements may not be linear. Breaking down the turnout rates by type of requirement reveals in greater detail the relationship between voter identification requirements and voter turnout.

Table 2 – Variation in 2004 State Turnout Based on Voter Identification Requirements

Maximum Requirement		Minimum Requirement	
Voter Identification Required in the States	Mean Voter Turnout for States in that Category	Voter Identification Required in the States	Mean Voter Turnout for States in that Category
State Name	64.2 %	State Name	63.0 %
Sign Name	61.1 %	Sign Name	60.4 %
Match Signature	60.9 %	Match Signature	61.7 %
Provide Non-Photo ID	59.3 %	Provide Non-Photo ID	59.0 %
Provide Photo ID	58.1 %	Swear Affidavit	60.1 %
Average Turnout (All States)	60.9 %		

This table displays the mean turnout using the aggregate county level data for each state in 2004.

The aggregate data show that 60.9 percent of the estimated citizen voting age population voted in 2004. Differences in voter turnout at the state level in 2004 varied based on voter identification requirements. Taking into account the maximum requirements, an average of 64.6 percent of the voting age population turned out in states that required voters to state their names, compared to 58.1 percent in states that required photo identification. A similar trend

017645

emerged when considering minimum requirements. Sixty-three percent of the voting age population turned out in states requiring voters to state their names, compared to 60.1 percent in states that required an affidavit from voters. Given the lack of a clear, consistent linear relationship between turnout and minimum identification requirements, however, we opted to treat the voter identification requirements as a series of dichotomous variables.²¹(Dichotomous variables reflect either the presence or absence of a characteristic. In the dummy variable for non-photo ID, a state would be coded as 1 if it required non-photo ID, and 0 otherwise.)

Voter identification requirements are just one factor that might affect voter turnout. Multivariate models that take into account other predictors of turnout can paint a more complete picture of the relationship between voter identification requirements and turnout. This analysis estimated the effects of voter identification requirements in multivariate models that also took into account the electoral context in 2004 and demographic characteristics of the population in each county. While the model takes account of several important variables, statistical models do not capture all the messiness of the real world. It is a simplification of a complex reality, and its results should be treated with appropriate caution.

The model also took into account such variables as:

- Was the county in a presidential battleground state?
- Was the county was in a state with a competitive race for governor and/or the U.S. Senate?
- Percentage of the voting-age population in each county that was Hispanic or African-American²²
- Percentage of county residents age 65 and older
- Percentage of county residents below the poverty line

Another contextual factor to consider is voter registration requirements, such as the deadline for registration. As states set the deadline farther away from Election Day, the task of remembering

²¹ The voter identification requirements are coded as a series of dummy variables, coding each variable as one if the requirement existed in a given state, and zero otherwise. This yielded five dichotomous variables for maximum requirements (state name, sign name, match signature, non-photo identification, or photo identification), and five dichotomous variables for minimum requirements (state name, sign name, match signature, non-photo identification, or providing an affidavit). Omitted is the variable for stating one's name so that it could serve as the reference category in comparison with the other four identification requirements in each of the statistical analyses.

²² The U.S. Census projections for 2003 provided the data for the percentage of the voting-age population in each county that was Hispanic or African-American and for the percentage of county residents age 65 and older.

to register to vote becomes more challenging. Thus our model takes into account the number of days between each state's registration deadline and the election.

The dependent variable in each model using the aggregate data was voter turnout at the county level, with turnout calculated as the percentage of the citizen voting-age population that voted in the 2004 election.

The results of this modeling suggest that the stricter voter identification requirements of matching one's signature to a signature on file with election authorities or presenting a non-photo ID are associated with lower turnout compared to turnout in states that required voters to simply state their name, holding constant the electoral context and demographic variables.

Contextual factors, such as whether the county was in a battleground state or whether that state had a competitive race for governor and/or U.S. Senate, were associated with increased voter turnout. The time between the closing date for registration and the election was correlated with a slight negative effect on turnout. As the percentage of Hispanics in the county's population increased, turnout declined. The percentage of senior citizens in the county and household median income were associated with higher turnout. The percentage of African-Americans in the county did not have a significant effect in the model. The percentage of senior citizens in the county and household median income showed a positive correlation with turnout. In this aggregate model, the percentage of African-Americans in the county was not associated with a significant difference in turnout.

The relationship of the minimum voter identification requirements to turnout was not demonstrated. None of the dummy variables for voter identification requirements were statistically significant. (A "dummy variable" represents a particular attribute and has the value zero or one for each observation, e.g. 1 for male and 0 for female.) Being a battleground state and having a competitive statewide race were significant and positive, as was the percentage of senior citizens in the county and household median income. The percentage of Hispanics in the county's population continued to be associated with reduced turnout, as was the number of days between the closing date for registration and the election.²³

²³ This test incorporated a series of interactions between the maximum and minimum voter identification requirements and the percentage of African-Americans and Hispanics living in the counties. In each case the interactions did not improve the fit of the models to the data. See tables A-1 and A-2 in the appendix of Vercellotti's paper in the appendices.

Analysis of the aggregate data at the county level generates some support for the hypothesis that stricter identification requirements are correlated with lower turnout. For the maximum requirements, a signature match and non-photo identification –but not photo identification– were correlated at a significant level with lower turnout in 2004, compared to requiring that voters simply state their names.

Aggregate data, however, cannot fully capture the individual demographic factors that may figure into the decision to turn out to vote.²⁴ Voter identification requirements could have a relationship to the turnout of particular groups of voters, in ways that county-level aggregate data on turnout would not capture. To explore the effects of voter identification requirements on turnout more completely, it is important to examine individual-level data as well.

Individual-level Analysis

Individual-level turnout data exists in the November 2004 Current Population Survey conducted by the U.S. Census Bureau. The Census Bureau conducts the CPS monthly to measure unemployment and other workforce data, but the bureau adds a battery of voter participation questions to the November survey in even-numbered years to coincide with either a presidential or midterm Congressional election.

One of the of the CPS is the sheer size of the sample. The survey's Voting and Registration Supplement consisted of interviews, either by telephone or in person, with 96,452 respondents.²⁵ The large sample size permits analyses of smaller groups, such as Black or Hispanic voters or voters with less than a high school education. The statistical analysis in relying on the CPS is based on reports from *self-described* registered voters. Omitted are those who said they were not registered to vote, as are those who said they cast absentee ballots because the identification requirements for absentee ballots may differ from those required when one votes in person. Eliminated from the sample are respondents who said they were not U.S. citizens, who in this survey were not asked the voter registration and turnout questions. In

²⁴ For example, previous research has found that education is a powerful determinant of turnout (Wolfinger and Rosenstone 1980, but see also Nagler 1991).²⁴ Married people also are more likely to vote than those who are not married (Alvarez and Ansolabehere 2002; Alvarez, Nagler and Wilson 2004; Fisher, Kenny, and Morton 1993).

²⁵ It is important to note that the Census Bureau allows respondents to answer on behalf of themselves and others in the household during the interview. While proxy reporting of voter turnout raises the possibility of inaccurate reports concerning whether another member of the household voted, follow-up interviews with those for whom a proxy report had been given in the November 1984 CPS showed 99 percent agreement between the proxy report and the information given by the follow-up respondent (U.S. Census Bureau 1990).

addition to the voter identification requirements, the models include other socioeconomic, demographic, and political environment factors that might have influenced turnout in 2004.²⁶ The dependent variable in these analyses is whether a respondent said he or she voted in the November 2004 election.²⁷

In the model, three of the voter identification requirements have a statistically significant correlation with whether survey respondents said they had voted in 2004. That is, compared to states that require voters only to state their names, the requirement to sign one's name, provide a non-photo ID, or photo ID in the maximum requirements or affidavit in the minimum is associated with lower turnout.

Of the other state factors, only the competitiveness of the presidential race showed a significant correlation with increased turnout. In terms of demographic influences, African-American voters were more likely than white voters or other voters to say they had cast a ballot, while Asian-Americans were less likely than white or other voters to say they had turned out. Hispanic voters were not statistically different from white or other voters in terms of reported turnout. Consistent with previous research, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Among the age categories, those ages 45 to 64 and 65 and older were more likely than those ages 18 to 24 to say they voted. Respondents who had earned a high school diploma, attended some college, graduated from college or attended graduate school were all more likely to say they voted than those who had not finished high school.

While the probit models provide statistical evidence for the relationship of voter identification requirements and other variables to turnout, probit coefficients do not lend themselves to intuitive interpretation.²⁸ Table 3 below shows predicted probabilities (calculated from the probit

²⁶ The models are estimated using probit analysis, which calculates the effects of independent variables on the probability that an event occurred – in this case whether a respondent said he or she voted and using robust standard errors to control for correlated error terms for observations from within the same state.

²⁷ The U.S. Census Bureau reported, based on the November 2004 CPS, that 89 percent of those who identified themselves as registered voters said they voted in 2004 (U.S. Census Bureau 2005). Previous research has shown that, generally speaking, some survey respondents overstate their incidence of voting. Researchers speculate that over-reports may be due to the social desirability that accompanies saying one has done his or her civic duty, or a reluctance to appear outside the mainstream of American political culture (U.S. Census Bureau 1990). It is also possible that voting is an indication of civic engagement that predisposes voters to agree to complete surveys at a higher rate than non-voters (Flanigan and Zingale 2002). Hence the voter turnout rates reported in the CPS tend to be up to 10 percentage points higher than the actual turnout rate for the nation (Flanigan and Zingale 2002). Even with this caveat, however, the CPS serves as a widely accepted source of data on voting behavior.

²⁸ A probit model is a popular specification of a generalized linear regression model, using the probit link function.

coefficients) of voting for each level of voter identification requirements while holding all other independent variables in the models at their means.²⁹

Table 3. Predicted probability of voter turnout – all voters		
	Maximum requirement	Minimum requirement
State name	91.7%	91.5%
Sign name	89.9%	90.2%
Match signature	Not significant	Not significant
Non-photo ID	89.0%	89.0%
Photo ID	88.8%	---
Affidavit	---	87.5%
Total difference from “state name” to “photo ID” or “affidavit”	2.9%	4.0%
N	54,973	
<p>Figures represent the predicted probability of registered voters saying they voted as the identification requirement varies from stating one's name to providing photo identification or an affidavit, with all other variables held constant.</p> <p>Data source: U.S. Census Bureau, Current Population Survey, Voting and Registration Supplement, November 2004.</p>		

Taking into account that signature matches were not a predictor of turnout, the differences in predicted probability decline from stating one's name to providing a photo identification or affidavit. Voters in states that required photo identification were 2.7 percent less likely to vote than voters in states where individuals had to give their names.³⁰ In terms of the minimum requirement, voters in states that required an affidavit at minimum were 4 percent less likely to turn out than voters in states where they had to give their names.

The differences were more pronounced for those with fewer years of education. Constraining the model to show predicted probabilities only for those with less than a high school diploma, the probability of voting was 5.1 percent lower in states that required photo identification as the maximum requirement and 7 percent lower in states that required an affidavit as the minimum

²⁹ In the case of dichotomous independent variables, holding them at their mean amounted to holding them at the percentage of the sample that was coded 1 for the variable (Long 1997).

³⁰ The voter turnout percentages may seem disproportionately high compared to the turnout rates reported in the aggregate data analysis. It is important to consider that the turnout rates in the aggregate data were a proportion of all citizens of voting-age population, while the turnout rates for the individual-level data are the proportion of only registered voters who said they voted.

requirement compared to states where stating one's name was the maximum or minimum requirement.

Race and ethnicity have generated particular interest in the debate over voter ID requirements.³¹ The analysis using the aggregate data shed no light on the association between voter ID requirements and turnout for African-American and Hispanic voters. But in the models using the individual data, some significant relationships emerged for African-American, Hispanic and Asian citizens. For the entire population, the signature, non-photo identification and photo identification requirements all were associated with lower turnout compared to the requirement that voters simply state their names. These correlations translated into reduced probabilities of voting of about 3 to 4 percent for the entire sample, with larger differences for specific subgroups. For example, the predicted probability that Hispanics would vote in states that required non-photo identification was about 10 percentage points lower than in states where Hispanic voters gave their names. The difference was about 6 percent for African-Americans and Asian-Americans, and about 2 percent for white voters.

The model also showed that Hispanic voters were less likely to vote in states that required non-photo identification as opposed to stating one's name. Hispanic voters were 10 percent less likely to vote in non-photo identification states compared to states where voters only had to give their name.

More rigorous voter identification requirements were associated with lower turnout rates for Asian-American voters as well. Asian-American voters were 8.5 percent less likely to vote in states that required non-photo identification compared to states that require voters to state their names under the maximum requirements, and they were 6.1 percent less likely to vote where non-photo identification was the minimum requirement.

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data,

³¹ Incorporating discrete variables for Hispanics, African-Americans, and Asian-Americans into one model carries the implicit assumption that the remaining variables, including education and income, will influence each of these groups in a similar manner in terms of deciding whether to vote. These assumptions are not always born out by the data (see Leighley and Vedlitz, 1999.) To isolate the effects of voter identification and other variables on voter turnout within specific racial and ethnic groups, the sample is divided into sub-samples and the model re-run to calculate the data discussed and shown in Tables 5, 6, and 7 in Appendix C.

although not always for both the maximum and minimum sets of requirements. The overall relationship between ID requirements and turnout for all registered voters was fairly small, but still statistically significant.

In the aggregate data, the match-signature requirement and the provide-a-non-photo ID requirement were correlated with lower turnout compared to requiring that voters state their names. But the photo-ID requirement did not have an effect that was statistically significant, possibly because in 2004 each state requiring a photo-ID provided an alternative way to cast a regular ballot for voters who lacked that document.

In the model using the individual-level data the signature, non-photo ID, and photo ID requirements were all correlated with lower turnout compared to the requirement that voters simply state their names (in the entire sample and for white voters, but the statistical significance may be an artifact of the very large sample size). That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If ID requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is *not* the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only two cases have considered laws requiring voters to show photo ID (*Common Cause v. Billups* and *Indiana Democratic Party v. Rokita*). Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the only form accepted. In *Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in *League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). *Id.* This was found to be consistent with HAVA.

Photo ID. Since the 2004 election, two states have adopted laws requiring photo identification at the polls in order to have one's vote counted, without an affidavit exception: Georgia and Indiana.³² Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the plaintiffs' motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a

³² Indiana's law does allow voters without ID to cast provisional ballots, and then to appear before the county board of elections to execute an affidavit saying that they are indigent and unable to obtain the requisite ID without payment of a fee. But in contrast to other states, voters cannot cast a ballot that will be counted by submitting an affidavit at the polls, affirming that they are the registered voter and are otherwise eligible to vote.

substantial likelihood of succeeding on the merits at trial (*Common Cause v. Billups*, Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement (Indiana), legal challenges have also been filed. (*Indiana Democratic Party v. Rokita* and *Crawford v. Marion County Election Board*). On April 14, 2006, the district court granted defendants' motion for summary judgment, concluding that plaintiffs had failed to produce evidence showing that the state's ID law would have an adverse impact on voters. Another case of significance, for purposes of photo ID requirements, is *American Civil Liberties Union of Minnesota v. Kiffmeyer*, No. 04-CV-4653, 2004 WL 2428690, at *1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. *Id.* at *1.

3. These decisions indicate that courts are likely to carefully scrutinize the evidence regarding the impact of photo ID requirements.

Privacy. In *Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters' social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government's interest in preventing fraud. On the other hand, in *McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will carefully scrutinize the evidence, where states require that voters produce a photo ID in order to cast a regular ballot. The courts have used a

balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Developments since 2004

Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

- What is the overall incidence of vote fraud?
- How does fraud take place in the various stage of the process: registration, voting at the polls, absentee voting, or ballot counting?
- What contribution can tighter requirements for voter ID make to reducing vote fraud?
- What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgement in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID

With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the

Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the Statewide Voter Registration List. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

Conclusions

The analysis of voter ID requirements is complex. It takes into account important values associated with an electoral process, such as ballot access and integrity. The continuing effort to understand how voter ID requirements may affect turnout and the integrity of the ballot could benefit from additional factual information, including statistical analyses. Our research includes a statistical study of this kind. It indicated that the level of voter turnout in a state is correlated with the stringency of the voter ID requirement imposed by that state. Additional empirical research of this nature, with additional data collected by or for the EAC, would further illuminate the relationship between stricter voter ID rules and turnout, perhaps explaining if awareness of a strict ID requirement tends to discourage would-be voters from going to the polls. Or, additional research may shed light on whether, if voters did go to the polls, stricter Voter ID requirements will divert more voters into the line for provisional ballots. The consequence of increased reliance on provisional ballots can be longer lines at the polls and confusion, without necessarily a clear demonstration that the security of the ballot is correspondingly increased.³³

³³ In this connection, the Brennan Center's response to the Carter-Baker Commission report observes that, "while it might be true that in a close election "a small amount of fraud could make the margin of

The debate over voter ID in the states would be improved by additional research sponsored by the EAC. That might include longitudinal studies of jurisdictions that have changed voter ID requirements, as well as precinct-level analyses that would allow more finely tuned assessment of the correlation between stricter identification requirements and turnouts. Further research could also identify methods to eliminate the need for voters to bring specific identity documents with them to the polls, while assuring that each voter who casts a ballot is eligible and votes only once.

difference," it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome." *Response to the Report of the 2005 Commission on Federal Election Reform*, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005

Conclusions of the Statistical Analysis

The statistical analysis found that, as voter identification requirements vary, voter turnout varies as well. This finding emerged from both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements. The overall relationship between 10 requirements and turnout for all registered voters was fairly small, but still statistically significant.

In the aggregate data, the match-signature requirement and the provide-a-non-photo 10 requirement were correlated with lower turnout compared to requiring that voters state their names. But the photo-IO requirement did not have an effect that was statistically significant, possibly because in 2004 each state requiring a photo-IO provided an alternative way to cast a regular ballot for voters who lacked that document.

In the model using the individual-level data the signature, non-photo 10, and photo 10 requirements were all correlated with lower turnout compared to the requirement that voters simply state their names (in the entire sample and for white voters, but the statistical significance may be an artifact of the very large sample size). That the non-photo identification requirement was the most consistent in terms of statistical significance across the groups is intriguing given the intense debates surrounding photo identification requirements.

Significant questions about the relationship between voter identification requirements and turnout remain unanswered. The data examined in the statistical analysis could not capture the dynamics of how identification requirements might lower turnout, nor could they rule out that other attributes of a state's electoral system might explain the statistically significant correlations that the study found. If 10 requirements dampen turnout, is it because individuals are aware of the requirements and stay away from the polls because they cannot or do not want to meet the requirements? Or, do the requirements result in some voters being turned away when they can not meet the requirements on Election Day, or forced to cast a provisional ballot that is not ultimately counted? The CPS data do not include measures that can answer this question. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for election judges to handle questions about, and potential disputes over, voter identification requirements.

* States applies only HAVA's 10 requirement, applicable to first-time voters who registered by mail and did not provide applicable 10 at the time of registration.

¹ Arizona voters who lack a photo 10 may present 2 forms of 10 with no photograph.

² Florida required a photo 10 in 2004, but voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot. Florida subsequently changed its law to require that voters present photo 10 to cast a regular ballot, though voters without photo 10 may still cast a provisional ballot by signing an affidavit, which ballot should ordinarily be counted.

³ Louisiana required a photo 10 in 2004. Voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

⁴ Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

⁵ Voters lacking a photo 10 could vote by providing another form of 10 in 2004.

⁶ Voters lacking a photo 10 could vote by providing another form of 10 in 2004.

⁷ Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on 10 presented with the registration.

⁸ Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Voter ID Requirements State	Forms of ID Required 2004	Statutory Language	Statutory Citation
Alabama	Provide ID	<p>(b) Each elector shall provide identification to an appropriate election official prior to voting. A voter required to show identification when voting in person shall present to the appropriate election official either of the following forms of identification:</p> <p>(1) A current valid photo identification.</p> <p>(2) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. The term "other government document" may include, but is not limited to, any of the following:</p> <ul style="list-style-type: none"> a. A valid identification card issued by a branch, department, agency, or entity of the State of Alabama, any other state, or the United States authorized by law to issue personal identification. b. A valid United States passport. c. A valid Alabama hunting or fishing license. d. A valid Alabama permit to carry a pistol or revolver. e. A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States. f. A valid United States military identification card. g. A certified copy of the elector's birth certificate. h. A valid Social Security card. i. Certified naturalization documentation. j. A certified copy of court records showing adoption or name change. k. A valid Medicaid card, Medicare card, or an Electronic Benefits Transfer Card (formerly referred to as a "food stamp card"). <p>(c) For voters required to show identification when voting by mail, the voter shall submit with the ballot a copy of one of the forms of identification listed in subsection (b).</p> <p>(e) An individual required to present identification in accordance with this section who is unable to meet the identification requirements of this section shall be permitted to vote by a challenged or provisional ballot, as provided for by law.</p> <p>(f) In addition, an individual who does not have identification in his or her possession at the polls shall be permitted to vote if the individual is positively identified by two election officials as a voter on the poll list who is eligible to vote and the election official signs the voters list by where the voter signs.</p>	Ala. Code § 17-11A-1
Alaska	Provide ID	<p>Effective Date: June 24, 2003</p> <p>(a) Before being allowed to vote, each voter shall exhibit to an election official one form of identification, including</p> <ul style="list-style-type: none"> (1) an official voter registration card, driver's license, state identification card, current and valid photo identification, birth certificate, passport, or hunting or fishing license; or (2) an original or a copy of a current utility bill, bank statement, paycheck, government check, or other government document; an item exhibited under this paragraph must show the name and current address of the voter. <p>(b) An election official may waive the identification requirement if the election official knows the identity of the voter. The identification requirement may not be waived for voters who are first-time voters who initially registered by mail or by facsimile or other electronic transmission approved by the director under <u>AS 15.07.050</u>, and did not provide identification as required in <u>AS 15.07.060</u>.</p>	Alaska Stat. § 15.15.225

(c) A voter who cannot exhibit a required form of identification shall be allowed to vote a questioned ballot.

effective June 17, 2003

Arizona

B. If a statewide voter registration database is not yet operational, for any person who has registered to vote by mail for the first time in this state after January 1, 2003 or who is reregistering by mail after January 1, 2003 after moving from one county to another county in this state, the person shall comply with the following in order to be issued a ballot:

Ariz. Rev. Stat.
Ann. § 16-579

1. The person shall present either one of the following:

(a) A current form of identification that bears a photograph of the person and the name of the person.

(b) A current utility bill, bank statement, paycheck, government issued check or other government document that shows the name and registration address of the person.

2. If the person does not present a document that complies with paragraph 1, the person is only eligible to vote a provisional ballot as prescribed by § 16-584.

Arkansas

Provide ID

Effective Dec. 1, 2003
7-5-305. Requirements.

Arkansas Code
Annotated § 7-
5-305

(a) Before a person is permitted to vote, the election official shall:

(1) Request the voter to identify himself in order to verify the existence of his name on the precinct voter registration list;

(2) Request the voter, in the presence of the election official, to state his address and state or confirm his date of birth;

(3) Determine that the voter's date of birth and address are the same as those on the precinct voter registration list;

(4) If the date of birth given by the voter is not the same as that on the precinct voter registration list, request the voter to provide identification as the election official deems appropriate;

(5)(A) If the voter's address is not the same as that on the precinct voter registration list, verify with the county clerk that the address is within the precinct.

(B) If the address is within the precinct, request the voter to complete a voter registration application form for the purpose of updating county voter registration record files.

(C) If the address is not within the precinct, instruct the voter to contact the county clerk's office to determine the proper precinct;

(6) If the voter's name is not the same as that on the precinct voter registration list, request the voter to complete a voter registration application form for purposes of updating county voter registration record files;

(7) Request the voter, in the presence of the election official, to sign his name, including his given name, his middle name or initial, if any, and his last name in the space provided on the precinct voter registration list. If a person is unable to sign his signature or make his mark or cross, the election official shall enter his initials and the voter's date of birth in the space for the person's signature on the precinct voter registration list; and

(8)(A) Request the voter for purposes of identification to provide a valid driver's license, photo identification card issued by a governmental agency, voter card, social security card, birth certificate, United States passport, employee identification card issued by a governmental agency containing a photograph, employee identification card issued in the normal course of business of the employer, student identification card, Arkansas hunting license, or United States military identification card.

(B)(i) If a voter is unable to provide this identification, the election official shall indicate on the precinct voter registration list that the voter did not provide identification.

(ii) Following each election, the county board of election commissioners may review the precinct voter registration lists and may provide the information of the voters not providing identification at the polls to the prosecuting attorney.

(iii) The prosecuting attorney may investigate possible voter fraud; and

(9) Follow the procedures under §§ 7-5-310, 7-5-311, and 7-5-523, if the person is a disabled voter and presents himself or herself to vote.

California

Sign Name

Effective: July 16, 2003

Any person desiring to vote shall announce his or her name and address in an audible tone of voice, and when one of the precinct officers finds the name in the index, the officer shall in a like manner repeat the name and address. The voter shall then write his or her name and residence address or, if the voter is unable to write, shall have the name and residence address written by another person on a roster of voters provided for that purpose, whereupon a challenge may be interposed as provided in this article.

Cal. Elec. Code
§ 14216

(Enacted in 1994, no amendments since)

Colorado

Provide ID

(1) Except as provided in subsection (4) of this section, any eligible elector desiring to vote shall show his or her identification as defined in section 1-1-104(19.5), write his or her name and address on the signature card, and give the signature card to one of the election judges,
* * *

Colo. Rev. Stat.
Ann. § 1-7-110;
Colo. Rev. Stat.
Ann. § 1-1-104

(4) An eligible elector who is unable to produce identification may cast a provisional ballot in accordance with article 8.5 of this title.

(19.5)(a) "Identification" means:

(I) A valid Colorado driver's license;

(II) A valid identification card issued by the department of revenue in accordance with the requirements of part 3 of article 2 of title 42, C.R.S.;

(III) A valid United States passport;

(IV) A valid employee identification card with a photograph of the eligible elector issued by any branch, department, agency, or entity of the United States government or of this state, or by any county, municipality, board, authority, or other political subdivision of this state;

(V) A valid pilot's license issued by the federal aviation administration or other authorized agency of the United States;

(VI) A valid United States military identification card with a photograph of the eligible elector;

(VII) A copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the elector;

(VIII) A valid medicare or medicaid card issued by the United States health care financing administration;

(IX) A certified copy of a birth certificate for the elector issued in the United States; or

(X) Certified documentation of naturalization.

(b) Any form of identification indicated in paragraph (a) of this subsection (19.5) that shows the address of the eligible elector shall be considered identification only if the address is in the state of Colorado.

Connecticut Provide ID

Effective 5/28/2004

(a) In each primary, election or referendum, when an elector has entered the polling place, the elector shall announce the elector's street address, if any, and the elector's name to the checkers in a tone sufficiently loud and clear as to enable all the election officials present to hear the same. Each elector who registered to vote by mail for the first time on or after January 1, 2003, and has a "mark" next to the elector's name on the official registry list, as required by section 9-23r, shall present to the checkers, before the elector votes, either a current and valid photo identification that shows the elector's name and address or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows the name and address of the elector. Each other elector shall (1) present to the checkers the elector's Social Security card or any other preprinted form of identification which shows the elector's name and either the elector's address, signature or photograph, or (2) on a form prescribed by the Secretary of the State, write the elector's residential address and date of birth, print the elector's name and sign a statement under penalty of false statement that the elector is the elector whose name appears on the official checklist. Such form shall clearly state the penalty of false statement. A separate such form shall be used for each elector. If the elector presents a preprinted form of identification under subdivision (1) of this subsection, the checkers shall check the name of such elector on the official checklist. If the elector completes the form under subdivision (2) of this subsection, the assistant registrar of voters shall examine the information on such form and either instruct the checkers to check the name of such elector on the official checklist or notify the elector that the form is incomplete or inaccurate.

Conn. Gen.
Stat. Ann. § 9-
261

Delaware Provide ID

Effective May 10., 2004

(a) A voter, upon entering the room where an election is being held, shall announce his or her name and address and provide proof of identity, whereupon the clerks shall place a mark or make a notation of his or her name upon the election district record. In the event the voter does not have proof of identity with them, he or she shall sign an affidavit of affirmation that he or she is the person listed on the election district record.

15 Del. Code §
4937

D.C. Sign Name

Effective: July 9, 2002

(i)(1) A person shall be entitled to vote in an election in the District of Columbia if he or she is a duly registered voter. A qualified elector shall be considered duly registered in the District if he or she has met the requirements for voter registration and, on the day of the election, either resides at the address listed on the Board's records or files an election day change of address pursuant to this subsection.

D.C. Code § 1-
1001.07

(2) Each registered voter who changes his or her place of residence from that listed on the Board's records shall notify the Board, in writing, of the new residence address. A change of address shall be effective on the date the notification was mailed as shown by the United States Postal Service postmark. If not postmarked, the notification shall be effective on the date of receipt by the Board. Change of address notifications from registrants shall be accepted pursuant to subsection (g) of this section, except that any registrant who has not notified the Board of his or her current residence address by the deadline established by subsection (g) of this section may be permitted to vote at the polling place that serves the current residence address by filing an election day change of address notice pursuant to paragraph (4) of this subsection.

(3) Each registered voter who votes at a polling place on election day shall affirm his or her residence address as it appears on the official registration roll for the precinct. The act of signing a copy of the official registration roll for the precinct shall be deemed affirmation of the voter's address as it appears on the Board's registration records.

(Effective April 3, 2001)(not added as part of 2005 amendment)

Florida

Photo ID

101.043 (1) The precinct register, as prescribed in s. 98.461, shall be used at the polls in lieu of the registration books for the purpose of identifying the elector at the polls prior to allowing him or her to vote. The clerk or inspector shall require each elector, upon entering the polling place, to present a current and valid picture identification as provided in s. 97.0535(3)(a). If the picture identification does not contain the signature of the voter, an additional identification that provides the voter's signature shall be required. The elector shall sign his or her name in the space provided, and the clerk or inspector shall compare the signature with that on the identification provided by the elector and enter his or her initials in the space provided and allow the elector to vote if the clerk or inspector is satisfied as to the identity of the elector.

West's Fla.
Stat. Ann. §
101.043
& West's Fla.
Stat. Ann. §
97.0535

(2) Except as provided in subsection (3), if the elector fails to furnish the required identification, or if the clerk or inspector is in doubt as to the identity of the elector, such clerk or inspector shall follow the procedure prescribed in s. 101.49.

97.0535 (3)(a) The following forms of identification shall be considered current and valid if they contain the name and photograph of the applicant and have not expired:

1. Florida driver's license.
2. Florida identification card issued by the Department of Highway Safety and Motor Vehicles.
3. United States passport.
4. Employee badge or identification.
5. Buyer's club identification.
6. Debit or credit card.
7. Military identification.
8. Student identification.
9. Retirement center identification.
10. Neighborhood association identification.
11. Entertainment identification.
12. Public assistance identification.

(b) The following forms of identification shall be considered current and valid if they contain the name and current residence address of the applicant:

1. Utility bill.
2. Bank statement.
3. Government check.
4. Paycheck.
5. Other government document (excluding voter identification card).

Georgia

Provide ID

Version effective 1/1/2005-12/31/2005

(a) Each elector shall present proper identification to a poll worker at or prior to completion of a voter's certificate at any polling place and prior to such person's admission to the enclosed space at such polling place. Proper identification shall consist of any one of the following:

- (1) A valid Georgia driver's license;
- (2) A valid identification card issued by a branch, department, agency, or entity of the State of Georgia, any other state, or the United States authorized by law to issue personal identification;
- (3) A valid United States passport;
- (4) A valid employee identification card containing a photograph of the elector and issued by any branch, department, agency, or entity of the United States government, this state, or any county, municipality, board, authority, or other entity of this state;
- (5) A valid employee identification card containing a photograph of the elector and issued by any employer of the elector in the ordinary course of such employer's business;
- (6) A valid student identification card containing a photograph of the elector from any public or private college, university, or postgraduate technical or professional school located within the State of Georgia;
- (7) A valid Georgia license to carry a pistol or revolver;
- (8) A valid pilot's license issued by the Federal Aviation Administration or other authorized agency of the United States;
- (9) A valid United States military identification card;
- (10) A certified copy of the elector's birth certificate;
- (11) A valid social security card;
- (12) Certified naturalization documentation;
- (13) A certified copy of court records showing adoption, name, or sex change;
- (14) A current utility bill, or a legible copy thereof, showing the name and address of the elector;
- (15) A bank statement, or a legible copy thereof, showing the name and address of the elector;
- (16) A government check or paycheck, or a legible copy thereof, showing the name and address of the elector; or
- (17) A government document, or a legible copy thereof, showing the name and address of the elector.

(b) If an elector is unable to produce any of the items of identification listed in subsection (a) of this Code section, he or she shall sign a statement under oath in a form approved by the Secretary of State, separate and distinct from the elector's voter certificate, swearing or affirming that he or she is the person identified on the elector's voter certificate. Such person shall be allowed to vote without undue delay; provided, however, that an elector who registered for the first time in this state by mail and did not provide one of the forms of identification set forth in subsection (a) of this Code section at the time of registration and who is voting for the first time may vote a provisional ballot pursuant to Code Section 21-2-418 upon swearing or affirming that the elector is the person identified in the elector's voter certificate. Such provisional ballot shall only be counted if the registrars are able to verify current and valid identification of the elector as provided in this Code section within the time period for verifying provisional ballots pursuant to Code Section 21-2-419. Falsely swearing or affirming such statement under oath shall be punishable as a felony, and the penalty shall be distinctly set forth on the face of the statement."

Ga. Code Ann.
§ 21-2-417

Hawaii

Photo ID

effective June, 2003

(b) The voter shall present valid identification to the official in charge of the pollbook.

Haw. Code. R.
§ 2-51-80
(Paper ballots;
voting
procedure at the
polls), § 2-51-
83 (Punchcard

ballots; voting procedure at polls), 2-51-85.1 (Marksense ballots; voting procedure at the polls.) – All have same subsection (b)

Haw. Code. R. T. 2, SUBT. 4, CH. 51, Appendix

Do I Need an I.D. to Vote on Election Day?

Yes. Be sure to have an I.D. with a picture and signature (such as a Hawaii driver's license or state I.D. card) when you go to vote. The NVRAC card is not an acceptable form of identification.

From the 2004 version of the administrative code.

§ 11-136 Poll book, identification, voting.

Every person upon applying to vote shall sign the person's name in the poll book prepared for that purpose. This requirement may be waived by the chairperson of the precinct officials if for reasons of illiteracy or blindness or other physical disability the voter is unable to write. Every person shall provide identification if so requested by a precinct official. A poll book shall not contain the social security number of any person.

HRS 11-136

After signing the poll book and receiving the voter's ballot, the voter shall proceed to the voting booth to vote according to the voting system in use in the voter's precinct. The precinct official may, and upon request shall, explain to the voter the mode of voting.

Last amended 2003.

Idaho

Sign Name

(1) An elector desiring to vote shall state his name and address to the judge or clerk in charge of the combination election record and poll book.

Id. St. §34-1106

(2) Before receiving his ballot, each elector shall sign his name in the combination election record and poll book following his name therein.

(5) The elector shall then be given the appropriate ballots which have been stamped with the official election stamp and shall be given folding instructions for such ballots.

Illinois

Give Name

(Last amended in 1972)

Any person desiring to vote shall give his name and, if required to do so, his residence to the judges of election, one of whom shall thereupon announce the same in a loud and distinct tone of voice, clear, and audible; the judges of elections shall check each application for ballot against the list of voters registered in that precinct to whom absentee or early ballots have been issued for that election, which shall be provided by the election authority and which list shall be available for inspection by pollwatchers. A voter applying to vote in the precinct on election day whose name appears on the list as having been issued an absentee or early ballot shall not be permitted to vote in the precinct. All applicable provisions of Articles 4, 5 or 6 shall be complied with and if such name is found on the register of voters by the officer having charge thereof, he shall likewise repeat said name, and the voter shall be allowed to enter within the proximity of the voting booths, as above provided. One of the judges shall give the voter one, and only one of each ballot to be voted at the election, on the back of which ballots such judge shall indorse his initials in such manner that they may be seen when each such ballot is properly folded, and the voter's name shall be immediately checked on the register list. In those election jurisdictions where perforated ballot cards are utilized of the type on which write-in votes can be

10 Ill. Comp. Stat. 5/17-9

017667

cast above the perforation, the election authority shall provide a space both above and below the perforation for the judge's initials, and the judge shall endorse his or her initials in both spaces. Whenever a proposal for a constitutional amendment or for the calling of a constitutional convention is to be voted upon at the election, the separate blue ballot or ballots pertaining thereto shall, when being handed to the voter, be placed on top of the other ballots to be voted at the election in such manner that the legend appearing on the back thereof, as prescribed in Section 16-6 of this Act, shall be plainly visible to the voter. At all elections, when a registry may be required, if the name of any person so desiring to vote at such election is not found on the register of voters, he or she shall not receive a ballot until he or she shall have complied with the law prescribing the manner and conditions of voting by unregistered voters. If any person desiring to vote at any election shall be challenged, he or she shall not receive a ballot until he or she shall have established his right to vote in the manner provided hereinafter; and if he or she shall be challenged after he has received his ballot, he shall not be permitted to vote until he or she has fully complied with such requirements of the law upon being challenged. Besides the election officer, not more than 2 voters in excess of the whole number of voting booths provided shall be allowed within the proximity of the voting booths at one time. The provisions of this Act, so far as they require the registration of voters as a condition to their being allowed to vote shall not apply to persons otherwise entitled to vote, who are, at the time of the election, or at any time within 60 days prior to such election have been engaged in the military or naval service of the United States, and who appear personally at the polling place on election day and produce to the judges of election satisfactory evidence thereof, but such persons, if otherwise qualified to vote, shall be permitted to vote at such election without previous registration.

Indiana Sign Name

Iowa Sign Name

1. The board members of their respective precincts shall have charge of the ballots and furnish them to the voters. Any person desiring to vote shall sign a voter's declaration provided by the officials, in substantially the following form:

West's
Annotated
Indiana Code §
3-11-8-25
Iowa Code §
49.77

VOTER'S DECLARATION OF ELIGIBILITY

I do solemnly swear or affirm that I am a resident of the precinct, ward or township, city of, county of, Iowa.

I am a registered voter. I have not voted and will not vote in any other precinct in said election.

I understand that any false statement in this declaration is a criminal offense punishable as provided by law.

A. Identification of voters.

La. Rev. Stat.
Ann. 18:562

(1) A person who desires to vote in a primary or general election shall give his name and address to a commissioner, who shall announce the applicant's name and address to the persons at the polling place.

(2) Each applicant shall identify himself, in the presence and view of the bystanders, and present to the commissioners a Louisiana driver's license, a Louisiana special identification card issued pursuant to R.S. 40:1321, or other generally recognized picture identification card. If the applicant does not have a Louisiana driver's license, a Louisiana special identification card, or other generally recognized picture identification card, the applicant shall sign an affidavit, which is supplied by the secretary of state, to that effect before the commissioners who shall place the affidavit in the envelope marked "Registrar of Voters" and attach the envelope to the precinct register, and the applicant shall provide further identification by presenting his current registration certificate, giving his date of birth or providing other information stated in the precinct register that is requested by the commissioners. However, an applicant that is allowed to vote without the picture identification required by this Paragraph is subject to challenge as provided in R.S. 18:565.

Effective: 1/1/2002

Maine	Give Name	<p>The voting procedure is as follows.</p> <p>1. Name announced. A voter who wishes to vote must state the voter's name and, upon request, residence address to an election clerk who shall announce the name in a loud, clear voice.</p> <p>(In effect at time of 2003 amendment: 2003, c. 584, § 9)</p>	<p>Me. Rev. Stat. Ann. tit. 21-A, § 671</p>
Maryland	Sign Name	<p>10-310.</p> <p>(a) For each individual who seeks to vote, an election judge, in accordance with instructions provided by the local board, shall:</p> <p>(1) locate the individual's name in the precinct register and locate the preprinted voting authority card and then authorize the individual to vote a regular ballot;</p> <p>(2)(i) if the individual's name is not found on the precinct register, search the inactive list and if the name is found, authorize the individual to vote a regular ballot; or</p> <p>(ii) if the individual's name is not on the inactive list, refer the individual for provisional ballot voting under § 9-404 of this article;</p> <p>(3) establish the identity of the voter by requesting the voter to state the month and day of the voter's birth and comparing the response to the information listed in the precinct register;</p> <p>(4) verify the address of the voter's residence;</p> <p>(5) if any changes to the voting authority card are indicated by a voter, make the appropriate changes in information on the card or other appropriate form; and</p> <p>(6) have the voter sign the voting authority card and either issue the voter a ballot or send the voter to a machine to vote.</p>	<p>Md. Elec. Law § 10-310</p>
Mass.	Give Name	<p>Each voter desiring to vote at a polling place shall give his name and, if requested, his residence to one of the officers at the entrance to the space within the guard rail, who shall thereupon distinctly announce the same. If such name is found on the voting list, the election officer shall check and repeat the name and shall admit the voter to the space enclosed by the guard rail and, in case official ballots, other than those marked "Challenged Ballots" as provided by section thirty-five A, are used, such voter shall be given one ballot. The use of electronic means such as tape recording equipment or radio broadcasting equipment for the recording or broadcasting of the names of voters not yet checked as having voted shall be prohibited.</p> <p>Last amended in 1981</p> <p>(5B) Identification. If so authorized by the city or town clerk or registrars of voters, an election officer may request any voter to present written identification. Such requests shall not discriminate in any way, but shall be entirely random, consistent, or based on reasonable suspicion. For the purpose of 950 CMR 52.03(5B), of M.G.L. c. 54, § 76B, and of 950 CMR 52.03(5)(b), suitable written identification includes a driver's license, recent utility bill, rent receipt on a landlord's printed letterhead, lease, duplicate copy of a voter registration affidavit, or any other printed identification which contains the voter's name and address. If voters fail to present suitable written identification when so requested, they must still be allowed to vote, but an election officer or any other person may challenge their right to vote under M.G.L. c. 54, § 85 and 950 CMR 52.03(23).</p>	<p>Mass. Ann. Laws 54 § 76</p>
Michigan	Sign Name	<p>(1) At each election, before being given a ballot, each registered elector offering to vote shall identify himself or herself by presenting an official state identification card issued to that individual pursuant to Act No. 222 of the Public Acts of 1972, being sections 28.291 to 28.295 of the Michigan Compiled Laws, an operator's or chauffeur's license issued to that individual pursuant to the Michigan Vehicle Code, Act No. 300 of the Public Acts of 1949, being sections 257.1 to 257.923 of the Michigan Compiled Laws, or other generally recognized picture identification card and by executing an application showing his or her signature or mark and address of residence in the presence of an election official.</p>	<p>Mich. Comp. Laws Ann. § 168.523</p>

017670

If the voter registration cards are used in the precinct, the election official in charge of the precinct registration file shall compare the signature upon the application with the signature upon the registration card. If voter registration lists are used in the precinct, the election inspector shall determine if the name on the application to vote appears on the voter registration list. If the name appears on the voter

registration list, the elector shall provide further identification by giving his or her date of birth or other information stated upon the voter registration list. In precincts using voter registration lists, the date of birth may be required to be placed on the application to vote. If the signature or an item of information does not correspond, the vote of the person shall be challenged, and the same procedure shall be followed as provided in this act for the challenging of an elector. If the person offering to vote has signed the registration card or application by making a mark, the person shall identify himself or herself by giving his or her date of birth, which shall be compared with the date of birth stated upon the registration card or voter registration list, or shall give other identification as may be referred to upon the registration card or voter registration list. If the elector does not have an official state identification card, operator's or chauffeur's license as required in this subsection, or other generally recognized picture identification card, the individual shall sign an affidavit to that effect before an election inspector and be allowed to vote as otherwise provided in this act. However, an elector being allowed to vote without the identification required under this subsection is subject to challenge as provided in section 727.

(2) If, upon a comparison of the signature or other identification, it is found that the applicant is entitled to vote, the election officer having charge of the registration list shall approve the application and write his or her initials on the application, after which the number on the ballot issued shall be noted on the application. The application shall serve as 1 of the 2 poll lists required to be kept as a record of a person who has voted. The application shall be filed with the township, city, or village clerk. If voter registration cards are used in the precinct, the date of the election shall be noted by 1 of the election officials upon the precinct registration card of each elector voting at an election. If voter registration lists are used in the precinct, the election official shall clearly indicate upon the list each elector voting at that election. The clerk of a city, village, or township shall maintain a record of voting participation for each registered elector.

The Attorney General declared that this statute violated the Equal Protection Clause of the Fourteenth Amendment. Op. Atty. Gen. 1997, No. 6930. That decision is binding on all state agencies.

(Effective March 31, 1997)

Miss. Code
Ann. § 23-15-
541

When any person entitled to vote shall appear to vote, he shall first sign his name in a receipt book or booklet provided for that purpose and to be used at that election only and said receipt book or booklet shall be used in lieu of the list of voters who have voted formerly made by the managers or clerks; whereupon and not before, the initialing manager or, in his absence, the alternate initialing manager shall indorse his initials on the back of an official blank ballot, prepared in accordance with law, and at such place on the back of the ballot that the initials may be seen after the ballot has been marked and folded, and when so indorsed he shall deliver it to the voter, which ballot the voter shall mark in the manner provided by law, which when done the voter shall deliver the same to the initialing manager or, in his absence, to the alternate initialing manager, in the presence of the others, and the manager shall see that the ballot so delivered bears on the back thereof the genuine initials of the initialing manager, or alternate initialing manager, and if so, but not otherwise, the ballot shall be put into the ballot box; and when so done one (1) of the managers or a duly appointed clerk shall make the proper entry on the pollbook. If the voter is unable to write his name on the receipt book, a manager or clerk shall note on the back of the ballot that it was received for by his assistance.

Missouri

Provide ID

Mo. Rev. Stat.
§115.427.1

(Effective January 1, 1987)

1. Before receiving a ballot, voters shall identify themselves by presenting a form of personal identification from the following list:

- (1) Identification issued by the state of Missouri, an agency of the state, or a local election authority of the state;
- (2) Identification issued by the United States government or agency thereof;
- (3) Identification issued by an institution of higher education, including a university, college, vocational and technical school, located within the state of Missouri;
- (4) A copy of a current utility bill, bank statement, government check, paycheck or other government document that contains the name and address of the voter;
- (5) Driver's license or state identification card issued by another state; or
- (6) Other identification approved by the secretary of state under rules promulgated pursuant to subsection 3 of this section other identification approved by federal law. Personal knowledge of the voter by two supervising election judges, one from each major political party, shall be acceptable voter identification upon the completion of a secretary of state-approved affidavit that is signed by both supervisory election judges and the voter that attests to the personal knowledge of the voter by the two supervisory election judges. The secretary of state may provide by rule for a sample affidavit to be used for such purpose.

Last Amendment Effective July 2, 2002.

19:15-17. Comparison of signatures or statements made openly; provisional ballots for newly registered voters without proper identification

N.J. Stat. Ann.
19:15-17

a. The comparison of signatures of a voter made upon registration and upon election day, and if the voter alleges his inability to write, the comparison of the answers made by such voter upon registration and upon election day, shall be had in full view of the challengers.

b. If a voter has registered by mail after January 1, 2003 to vote for the first time in his or her current county of residence and did not provide personal identification when registering pursuant to section 16 of P.L.1974, c. 30 (C.19:31-6.4), the voter shall be permitted to vote starting at the first election held after January 1, 2004 at which candidates are seeking federal office after displaying one of the following items: (1) a current and valid photo identification card; (2) a current utility bill, bank statement, government check or pay check; (3) any other government document that shows the voter's name and current address; or (4) any other identifying document that the Attorney General has determined to be acceptable for this purpose. If the voter does not display one of these documents, the voter shall not be permitted to vote by machine but shall instead be provided with a provisional ballot, pursuant to the provisions of P.L.1999, c. 232 (C.19:53C-1 et seq.). This subsection shall not apply to any voter entitled to vote by absentee ballot under the "Uniformed and Overseas Citizens Absentee Voting Act" (42 U.S.C. 1973ff-1 et seq.) or to any voter who is provided the right to vote other than in person under section 3 of Pub.L.98-435, the "Voting Accessibility for the Elderly and Handicapped Act," or any other voter entitled to vote otherwise than in person under any other federal law. This subsection shall also not apply to any person who registers to vote by appearing in person at any voter registration agency or to any person whose voter registration form is delivered to the county commissioner of registration or to the Attorney General, as the case may be, through a third party by means other than by mail delivery.

c. Each county commissioner of registration shall collect and maintain, in the manner prescribed by the Attorney General, the information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31-6.4). Access to the personal identification information provided pursuant to subsection b. of this section and section 16 of P.L.1974, c. 30 (C.19:31-6.4) shall be prohibited, in accordance with subsection a. of section 6 of P.L.2001, c. 404 (C.47:1A-5).

Sign Name

Last Amendment Effective July 9, 2004

D. The judge assigned to the voter list used for confirmation of registration and voting shall determine that each person offering to vote is registered and, in the case of a primary election, that the voter is registered in a party designated on the primary election ballot. If the person's registration is confirmed by the presence of his name on the voter list or if the person presents a certificate under the seal and signature of the county clerk showing that he is entitled to vote in the election and to vote in that precinct, the judge shall announce to the election clerks the list number and the name of the voter as shown on the voter list.

N.M. Stat. Ann
§1-5-10
(Recompiled as
§1-12 -7.1 by
L. 2005, Ch.
270, §63,
effective July 1,
2005)

E. The election clerk shall locate that list number and name on the signature roster and shall require the voter to sign his usual signature or, if unable to write, to make his mark opposite his printed name. If the voter makes his mark, it shall be witnessed by one of the judges of the precinct board. If the signature roster indicates that the voter is required to present a form of identification before voting, the election judge shall ask the voter for a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck or other government document that shows and matches the name and address of the voter as indicated on the signature roster. If the voter does not provide the required identification, he shall be allowed to vote on a provisional paper ballot.

G. A voter shall not be permitted to vote until he has properly signed his usual signature or made his mark in the signature roster.

New York

Match Sig.

1. A person before being allowed to vote shall be required, except as provided in this chapter, to sign his name on the back of his registration poll record on the first line reserved for his signature at the time of election which is not filled with a previous signature, or on the line of the computer generated registration list reserved for his signature. The two inspectors in charge shall satisfy themselves by a comparison of this signature with his registration signature and by comparison of his appearance with the descriptive material on the face of the registration poll record that he is the person registered. If they are so satisfied they shall enter the other information required for the election on the same line with the voter's latest signature, shall sign their names or initials in the spaces provided therefor, and shall permit the applicant to vote. Any inspector or inspectors not satisfied shall challenge the applicant forthwith.

N.Y. Law § 8-304
(McKinney)

2. If a person who alleges his inability to sign his name presents himself to vote, the board of inspectors shall permit him to vote, unless challenged on other grounds, provided he had been permitted to register without signing his name. The board shall enter the words "Unable to Sign" in the space on his registration poll record reserved for his signature or on the line of the computer generated registration list reserved for his signature at such election. If his signature appears upon his registration record or upon the computer generated registration list the board shall challenge him forthwith, except that if such a person claims that he is unable to sign his name by reason of a physical disability incurred since his registration, the board, if convinced of the existence of such disability, shall permit him to vote, shall enter the words "Unable to Sign" and a brief description of such disability in the space reserved for his signature at such election. At each subsequent election, if such disability still exists, he shall be entitled to vote without signing his name and the board of inspectors, without further notation, shall enter the words "Unable to Sign" in the space reserved for his signature at such election.

3. The voter's signature made by him upon registration and his signature made at subsequent elections shall be effectively concealed from the voter by a blotter or piece of opaque paper until after the voter shall have completed his signature.

4. In any case where a person who has heretofore voted has placed his voting signature on the back of his registration poll record on the first or any succeeding line or lines at the time or times of an election, instead of on the last line of the space thereon required to be reserved for such voting signatures and on any lines next running upward therefrom, the inspectors of election shall obliterate such misplaced signature or signatures, initial the obliteration and require such voter to sign his name again in the correct place on such registration poll record.

5. Any person who has heretofore registered and who at such time placed his or her registration signature on the back of the registration poll record otherwise

than in the space required to be provided therefor at the bottom of such poll record, shall, before being permitted to vote at any election thereafter, subscribe a new registration signature for himself on the last line at the bottom of such poll record, and, at the same time, if the inspectors of election are satisfied that the signatures were made by the same person, obliterate his original registration signature placed elsewhere than on the bottom of such record. Such obliterations may be made by crossing out the signature so as to completely efface the same or by affixing thereover a piece of gummed tape of a size sufficient only to cover such signature and of a type adequate to fully conceal the same
Last Amended 1986

North Carolina Give Name

(a) Checking Registration. --A person seeking to vote shall enter the voting enclosure through the appropriate entrance. A precinct official assigned to check registration shall at once ask the voter to state current name and residence address. The voter shall answer by stating current name and residence address. In a primary election, that voter shall also be asked to state, and shall state, the political party with which the voter is affiliated or, if unaffiliated, the authorizing party in which the voter wishes to vote. After examination, that official shall state whether that voter is duly registered to vote in that precinct and shall direct that voter to the voting equipment or to the official assigned to distribute official ballots. If a precinct official states that the person is duly registered, the person shall sign the pollbook, other voting record, or voter authorization document in accordance with subsection (c) of this section before voting.

When an elector appears in a polling place to vote he shall announce his full name and address to the precinct election officials. He shall then write his name and address at the proper place in the poll lists or signature pollbooks provided therefore, except that if, for any reason, an elector shall be unable to write his name and address in the poll list or signature pollbook, the elector may make his mark at the place intended for his name and a precinct official shall write the name of the elector at the proper place on the poll list or signature pollbook following the elector's mark, upon the presentation of proper identification. The making of such mark shall be attested by the precinct official who shall evidence the same by signing his name on the poll list or signature pollbook as a witness to such mark.

Ohio Rev. Code Ann. § 3505.18

The elector's signature in the poll lists or signature pollbooks shall then be compared with his signature on his registration form or a digitized signature list as provided for in section 3503.13 of the Revised Code, and if, in the opinion of a majority of the precinct election officials, the signatures are the signatures of the same person, the clerks shall enter the date of the election on the registration form or shall record the date by such other means as may be prescribed by the secretary of state. If the right of the elector to vote is not then challenged, or, if being challenged, he establishes his right to vote, he shall be allowed to proceed into the voting machine. If voting machines are not being used in that precinct, the judge in charge of ballots shall then detach the next ballots to be issued to the elector from Stub B attached to each ballot, leaving Stub A attached to each ballot, hand the ballots to the elector, and call his name and the stub number on each of the ballots. The clerk shall enter the stub numbers opposite the signature of the elector in the pollbook. The elector shall then retire to one of the voting compartments to mark his ballots. No mark shall be made on any ballot which would in any way enable any person to identify the person who voted the ballot.

(Supervisor of Election)

(b) The voter shall sign the application in the presence and view of a bipartisan pair. They shall locate the voter's name on the certified voting list for the voting district. Upon finding the voter's name on the certified voting list for the district, they shall initial the ballot application in the place provided next to the word "Approved" and shall enter on the certified list of voters a proper notation that the applicant has voted in the election. They shall then return the ballot application to the voter who shall pass down the line and present it to the clerk. After the voter has handed the approved ballot application to the clerk, the clerk shall provide the voter with the appropriate computer ballot and security sleeve, the warden shall direct the voter to the voting booth which the voter shall use, and unless the voter needs instruction or assistance as provided in this chapter, the voter shall cast his or her vote, and if he or she desires place the voted computer ballot in a security sleeve, and shall proceed to the optical scan precinct count unit and shall personally place his or her voted ballot into the designated ballot slot on the unit, and after doing so, shall leave the enclosure at once. No voter shall remain within the voting booth longer than ten (10) minutes, and if the voter refuses to leave after the lapse of ten (10) minutes, the voter shall be removed from the voting booth by order of the warden. Except for the election officials and the election inspector, not more than two (2) voters in excess of the number of voting booths shall be permitted within the enclosed space at any time.

(Last amended 2004, Current through January 2005 Session)

South Carolina Photo ID

§ 7-13-710. Proof of right to vote; signing poll list; comparison of signatures.

S.C. Code Ann.
§ 7-13-710

When any person presents himself to vote, he shall produce his valid South Carolina driver's license or other form of identification containing a photograph issued by the Department of Motor Vehicles, if he is not licensed to drive, or the written notification of registration provided for by §§ 7-5-125 and 7-5-180 if the notification has been signed by the elector. If the elector loses or defaces his registration notification, he may obtain a duplicate notification from his county board of registration upon request in person, or by telephone or mail. After presentation of the required identification, his name must be checked by one of the managers on the margin of the page opposite his name upon the registration books, or copy of the books, furnished by the board of registration. The managers shall keep a poll list which must contain one column headed "Names of Voters". Before any ballot is delivered to a voter, the voter shall sign his name on the poll list, which must be furnished to the appropriate election officials by the State Election Commission. At the top of each page the voter's oath appropriate to the election must be printed. The signing of the poll list or the marking of the poll list is considered to be an affirmation of the oath by the voter. One of the managers shall compare the signature on the poll list with the signature on the voter's driver's license, registration notification, or other identification and may require further identification of the voter and proof of his right to vote under this title as he considers necessary. If the voter is unable to write or if the voter is prevented from signing by physical handicap, he may sign his name to the poll list by mark with the assistance of one of the managers.

South Dakota Photo ID

Last amended: 1968

When a voter is requesting a ballot, the voter shall present a valid form of personal identification. The personal identification that may be presented shall be either:

S.D. Codified
Laws § 12-18-
6.1

- (1) A South Dakota driver's license or nondriver identification card;
- (2) A passport or an identification card, including a picture, issued by an agency of the United States government;
- (3) A tribal identification card, including a picture; or
- (4) An identification card, including a picture, issued by a high school or an accredited institution of higher education, including a university, college, or

technical school, located within the State of South Dakota.

Tennessee

Provide ID

Identification of eligible voters

(a)(1) A voter shall sign an application for ballot, indicate the primary in which the voter desires to vote, if any, and present it to a registrar. The application for ballot shall include thereon a space for the address of the voter's current residence, and the voter shall write or print such address on the application when the voter signs it. The registrar shall compare the signature and information on the application with the signature and information on the duplicate permanent registration record. The registrar shall make a determination whether the voter's address is different from the address on the voter's permanent registration record or if the registration is in inactive status. If the voter has changed residence, or the voter's registration is inactive, the registrar shall follow the procedures for voting pursuant to § 2-7-140. If, upon comparison of the signature and other identification, it is found that the applicant is entitled to vote, the registrar shall initial the application and shall note on the reverse side of the voter's duplicate permanent registration record the date of the election, the number of the voter's ballot application, and the elections in which the voter votes. If the applicant's signature is illegible, the registrar shall print the name on the application. The registrar shall give the voter the ballot application which is the voter's identification for a paper ballot or ballots or for admission to a voting machine. The voter shall then sign the duplicate poll lists without leaving any lines blank on any poll list sheet.

Tenn. Code
Ann. § 2-7-
112

(2) In any computerized county, the county election commission shall have the option of using an application for a ballot as provided in this section, or using the computerized voter signature list. A computerized voter signature list shall include the voter's name, current address of residence, social security number or registration number, birth date and spaces for the voter's signature, elections voted, ballot number and precinct registrar's initials. The following procedures shall be followed in the case of computerized voter signature lists:

(A) The voter shall sign the signature list and indicate the election or elections the voter desires to vote in and verify the voter's address in the presence of the precinct registrar;

(B) The registrar shall compare the voter's signature and information on the signature list with other evidence of identification supplied by the voter. If, upon comparison of the signature and other evidence of identification, it is found that the applicant is entitled to vote, the registrar shall initial the signature list;

(C) If the applicant's signature is illegible, the registrar shall print the name of the applicant on the voter list; and

(D) If a voter is unable to present any evidence of identification specified in subsection (c), the voter shall be required to execute an affidavit of identity on a form provided by the county election commission.

(b) On offering to vote, a voter must present the voter's voter registration certificate to an election officer at the polling place.

Tex. Elec. Code
Ann. § 63.001

Utah

Give Name

(Last amended in 1997)

(1)(a) Any registered voter desiring to vote shall give his name, and, if requested, his residence, to one of the election judges.

(b) If an election judge does not know the person requesting a ballot and has reason to doubt that person's identity, the judge shall request identification or have the voter identified by a known registered voter of the district.

Utah Code
Ann. § 20A-3-
104

(3) If the election judge determines that the voter is registered:

(a) the election judge in charge of the official register shall:

(i) write the ballot number opposite the name of the voter in the official register; and

- (ii) direct the voter to sign his name in the election column in the official register;
- (b) another judge shall list the ballot number and voter's name in the pollbook; and
- (c) the election judge having charge of the ballots shall:
 - (i) endorse his initials on the stub;
 - (ii) check the name of the voter on the pollbook list with the number of the stub;
 - (iii) hand the voter a ballot; and
 - (iv) allow the voter to enter the voting booth.

(In effect at time of last update prior to 2005: Laws 2003, c. 37, § 1, eff. May 5, 2003)

Vermont

Give Name

Before a person may be admitted to vote, he or she shall announce his or her name and if requested, his or her place of residence in a clear and audible tone of voice, or present his or her name in writing, or otherwise identify himself or herself by appropriate documentation. The election officials attending the entrance of the polling place shall then verify that the person's name appears on the checklist for the polling place. If the name does appear, and if no one immediately challenges the person's right to vote on grounds of identity or having previously voted in the same election, the election officials shall repeat the name of the person and:

Vt. Stat. Ann.
tit. 17, § 2563

(1) If the checklist indicates that the person is a first-time voter in the municipality who registered by mail and who has not provided required identification before the opening of the polls, require the person to present any one of the following: a valid photo identification; a copy of a current utility bill; a copy of a current bank statement; or a copy of a government check, paycheck, or any other government document that shows the current name and address of the voter. If the person is unable to produce the required information, the person shall be afforded the opportunity to cast a provisional ballot, as provided in subchapter 6A of this chapter. The elections official shall note upon the checklist a first-time voter in the municipality who has registered by mail and who produces the required information, and place a mark next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting.

(2) If the voter is not a first-time voter in the municipality, no identification shall be required, the clerk shall place a check next to the voter's name on the checklist and allow the voter to proceed to the voting booth for the purpose of voting

(Last amended in 2003)

§ 24.2-643. Qualified voter permitted to vote; procedures at polling place; voter identification

Va. Code. Ann.

A. After the polls are open, each qualified voter at a precinct shall be permitted to vote. The officers of election shall ascertain that a person offering to vote is a qualified voter before admitting him to the voting booth and furnishing an official ballot to him.

B. An officer of election shall ask the voter for his full name and current residence address and repeat, in a voice audible to party and candidate representatives present, the full name and address stated by the voter. The officer shall ask the voter to present any one of the following forms of identification: his Commonwealth of Virginia voter registration card, his social security card, his valid Virginia driver's license, or any other identification card issued by a government agency of the Commonwealth, one of its political subdivisions, or the United States; or any valid employee identification card containing a photograph of the voter and issued by an employer of the voter in the ordinary course of the employer's business.

If the voter's name is found on the pollbook, if he presents one of the forms of

identification listed above, if he is qualified to vote in the election, and if no objection is made, an officer shall enter, opposite the voter's name on the pollbook, the first or next consecutive number from the voter count form provided by the State Board, or shall enter that the voter has voted if the pollbook is in electronic form; an officer shall provide the voter with the official ballot; and another officer shall admit him to the voting booth.

Except as provided in subsection E of this section, if a voter is entitled to vote except that he is unable to present one of the forms of identification listed above, he shall be allowed to vote after signing a statement, subject to felony penalties for false statements pursuant to § 24.2-1016, that he is the named registered voter who he claims to be. A voter who requires assistance in voting by reason of physical disability or inability to read or write, and who requests assistance pursuant to § 24.2-649, may be assisted in preparation of this statement in accordance with that section. The provisions of § 24.2-649 regarding voters who are unable to sign shall be followed when assisting a voter in completing this statement.

(Version in effect as of 2004- effective 4/12/2004)
29A.44.201.

Wash. Rev.
Code §
29A.44.201 &
29A.44.210

A voter desiring to vote shall give his or her name to the precinct election officer who has the precinct list of registered voters. This officer shall announce the name to the precinct election officer who has the copy of the inspector's poll book for that precinct. If the right of this voter to participate in the primary or election is not challenged, the voter must be issued a ballot or permitted to enter a voting booth or to operate a voting device. For a partisan primary in a jurisdiction using the physically separate ballot format, the voter must be issued a nonpartisan ballot and each party ballot. The number of the ballot or the voter must be recorded by the precinct election officers. If the right of the voter to participate is challenged, RCW 29A.08.810 and 29A.08.820 apply to that voter.

(In effect at time of last update prior to 2005: 2004 c 271 § 136, eff. June 10, 2004)

29A.44.210.

Any person desiring to vote at any primary or election is required to sign his or her name on the appropriate precinct list of registered voters. If the voter registered using a mark, or can no longer sign his or her name, the election officers shall require the voter to be identified by another registered voter.

The precinct election officers shall then record the voter's name.

Effective date: July 1, 2004

West Virginia

Match Sig.

(a) Any person desiring to vote in an election shall, upon entering the election room, clearly state his or her name and residence to one of the poll clerks who shall thereupon announce the same in a clear and distinct tone of voice. If that person is found to be duly registered as a voter at that precinct, he or she shall be required to sign his or her name in the space marked "signature of voter" on the pollbook prescribed and provided for the precinct. If that person is physically or otherwise unable to sign his or her name, his or her mark shall be affixed by one of the poll clerks in the presence of the other and the name of the poll clerk affixing the voter's mark shall be indicated immediately under the affixation. No ballot may be given to the person until he or she so signs his or her name on the pollbook or his or her signature is so affixed thereon.
* * *

W. Va. Code §
3-1-34 (a)

(c) When the voter's signature is properly on the pollbook, the two poll clerks shall sign their names in the places indicated on the back of the official ballot and deliver the ballot to the voter to be voted by him or her without leaving the

election room. If he or she returns the ballot spoiled to the clerks, they shall immediately mark the ballot "spoiled" and it shall be preserved and placed in a spoiled ballot envelope together with other spoiled ballots to be delivered to the board of canvassers and deliver to the voter another official ballot, signed by the clerks on the reverse side required by this subsection. The voter shall thereupon retire alone to the booth or compartment prepared within the election room for voting purposes and there prepare his or her ballot using a ballpoint pen of not less than five inches in length or other indelible marking device of not less than five inches in length. In voting for candidates in general and special elections, the voter shall comply with the rules and procedures prescribed in section five, article six of this chapter.

Wisconsin Give Name (In effect at time of last update prior to 2005: Acts 2003, c. 100, eff. 90 days after March 7, 2003)
6.79(2)(a) Except as provided in sub. (6), where there is registration, each person, before receiving a voting number, shall state his or her full name and address. Upon the prepared registration list, after the name of each elector, the officials shall enter the serial number of the vote as it is polled, beginning with number one. Each elector shall receive a slip bearing the same serial number. A separate list shall be maintained for electors who are voting under s. 6.15, 6.29 or 6.55(2) or (3) and electors who are reassigned from another polling place under s. 5.25(5)(b). Each such elector shall have his or her full name, address and serial number likewise entered and shall be given a slip bearing such number. Wis. Stat. § 6.79

Wyoming Give Name (In effect at time of last update prior to 2005: 2003 Act 327, § 4, eff. June 12, 2004)
(a) Unless a voter is challenged pursuant to W.S. 22-15-101 through 22-15-109, no identification shall be required when:
(i) Voting in person or by mail after having registered in person; or
(ii) Voting in person or by mail after having registered by mail and having previously voted in a Wyoming federal election. Wyo. Stat. Ann. § 22-3-118

(In effect at time of last update prior to 2005: Effective dates. -- Laws 2004, ch. 94, § 5, makes the act effective immediately upon completion of all acts necessary for a bill to become law as provided by art. 4, § 8, Wyo. Const. Approved March 5, 2004.)

**APPENDIX B: COURT DECISIONS AND LITERATURE ON VOTER
IDENTIFICATION AND RELATED ISSUE COURT DECISIONS**

June 28, 2006

017684

Summary of Relevant Cases:

Challenges Prevailed:

American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004

- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to “complete” a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14th Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14th Amendment EPC: likely to prevail

Greidinger v. Davis, 1993

- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
 - 14th Amendment EPC: no classification (applied strict scrutiny)
 - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
 - Compelling interests: preventing voter fraud (deemed compelling)
 - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
 - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

Challenges Rejected:

League of Women Voters v. Blackwell, 2004.

- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

Colorado Common Clause v. Davidson, 2004

- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
 - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
 - Substantive due process and equal protection
 - No improper discrimination
 - Preventing voter fraud is a compelling interest since it is irreversible once vote is cast

- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

McKay v. Thompson, 2000

- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
 - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
 - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
 - Substantive due process: ruled that internal use of SS# not a burden
 - Free Exercise, based on Bible's supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
 - P&I, Article IV: does not protect in-state citizens
 - P&I, 14th Amend.: no protection for privilege where Congress authorized its infringement

Kemp v. Tucker, 1975

- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
 - VRA: ruled that race was not made a "qualification" for voting
 - 15th Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
 - 14th Amendment EPC: ruled there was no distinction among voters

Perez v. Riddlehoover, 1966

- Statute: date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
 - VRA: ruled that it was not a "test or device" because it applied equally
 - 15th Amendment: same reasons

Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:

*American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at *1 (D. Minn. Oct. 28, 2004).*

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver's license) for use in "completing" an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at *1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at *1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at *3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

***Greidinger v. Davis*, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. 988 F.2d at 1350.

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:

***League of Women Voters v. Blackwell*, 340 F. Supp. 2d 823 (N.D. Ohio 2004).**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

***Colorado Common Cause v. Davidson*, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004).**

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that provisional ballots would not be counted if the voter applied for an

absentee ballot. 2004 WL 2360485, at *1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. *Id.* at *6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. *Id.* at *10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. *Id.* at 12. The Court also found no improper discrimination between voters. *Id.* Thus, the provision was upheld.

***McKay v. Thompson*, 226 F.3d 752 (6th Cir. 2000).**

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. *Id.* at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. *Id.* The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. *Id.* The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. *Id.* The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. *Id.*

***Kemp v. Tucker*, 396 F. Supp. 737 (M.D. Pa. 1975), *aff'd*, 423 U.S. 803.**

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." *Id.* at 739. The Court also rejected the equal

protection claim because the statutes did not create a distinction at all. *Id.* at 740 n.3. Since race is just one of several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

***Perez v. Rhiddlehoover*, 186 So. 2d 686 (La. Ct. App. 1966).**

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

***Friendly House, et al. v. Janet Napolitano et al.*, CV 04-649 TUC DCB**

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

Current Litigation Concerning Voter ID Issues¹

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

¹ As of January 2, 2006

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

Georgia (*Common Cause/Georgia v. Billups*):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia's new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. *Id.*

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32)². In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an "undue burden" on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the on-going litigation.³ As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

² Litigation documents are available at the Election Law @ Moritz website.

<http://moritzlaw.osu.edu/electionlaw/litigation/index.php>

³ GA Legislature May Revisit Voter ID Law, State Net Capitol Journal, Dec. 19, 2005.

Indiana (*Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board*):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party's complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15)

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment.⁴ The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. *Id.* Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves these decisions to state law. 42 U.S.C. § 15482(a).

⁴ According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

RE: October 16, 2006 Letter

Dear Congressman Holt:

Your letter of October 16, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study -- finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud -- as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

Paul S. DeGregorio
Chairman

PS EAC Board Status Report.doc

017693

INTRODUCTION

LEGAL AUTHORITY

Section 241 of the Help America Vote Act of 2002 (HAVA) requires EAC to conduct research on election administration issues. Among the tasks listed in the statute is the development of:

- nationwide statistics and methods of identifying, deterring, and investigating voting fraud in elections for Federal office [section 241(b)(6)]; and
- ways of identifying, deterring, and investigating methods of voter intimidation [section 241(b)(7)].

IMPETUS FOR AND FOCUS OF CURRENT RESEARCH

EAC's Board of Advisors recommended that the agency make research on these matters a high priority. In September 2005, the Commission hired two consultants with expertise on these subject matters (Job Serebrov and Tova Wang) to:

- develop a comprehensive description of what constitutes voting fraud and voter intimidation in the context of Federal elections;
- perform background research (including Federal and State administrative and case law review), identify current activities of key government agencies, civic and advocacy organizations regarding these topics, and deliver a summary of this research and all source documentation;
- establish a project working group, in consultation with EAC, composed of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation;
- provide the description of what constitutes voting fraud and voter intimidation and the results of the preliminary research to the working group, and convene the working group to discuss potential avenues for future EAC research on this topic; and
- produce a report to EAC summarizing the findings of the preliminary research effort and working group deliberations that includes recommendations for future research, if any;

PROJECT WORKING GROUP

Consultants and EAC worked together to select members for the Voting Fraud-Voter Intimidation Working Group that included election officials and representatives of advocacy groups and the legal community who have an interest and expertise in the subject matter. (See Attachment A for a list of members.)

The Working Group is scheduled to meet at EAC offices on May 18, 2006 to consider the results of the preliminary research and to offer ideas for future EAC activities concerning this subject.

DEFINITION OF ELECTION FRAUD

The consultants drafted a definition of election fraud that includes numerous aspects of voting fraud (including voter intimidation, which is considered a subset of voting fraud), but excluding campaign finance violations and election administration mistakes. This draft will be discussed by the Working Group and probably refined.

LITERATURE REVIEW

The consultants found many reports and books that describe anecdotes and draw broad conclusions from a large array of incidents. They found little research that is truly systematic or scientific. The most systematic look at fraud appears to be the report written by Lori Minnite, entitled "Securing the Vote: An Analysis of Election Fraud". The most systematic look at voter intimidation appears to be the report by Laughlin McDonald, entitled "The New Poll Tax". Books written about this subject seem to all have a political bias and a pre-existing agenda that makes them somewhat less valuable.

Moreover, reports and books make allegations but, perhaps by their nature, have little follow up. As a result, it is difficult to know when something has remained in the stage of being an allegation and gone no further, or progressed to the point of being investigated or prosecuted or in any other way proven to be valid by an independent, neutral entity. This is true, for example, with respect to allegations of voter intimidation by civil rights organizations, and, with respect to fraud, John Fund's frequently cited book, "Stealing Elections". Again, this is something that it is hoped will be addressed in the "second phase" of this EAC project by doing follow up research on allegations made in reports, books and newspaper articles.

Consultants found that researchers agree that measuring something like the incidence of fraud and intimidation in a scientifically legitimate way is extremely difficult from a methodological perspective and would require resources beyond the means of most social and political scientists. As a result, there is much more written on this topic by advocacy groups than social scientists. Consultants suggest that this gap will be filled in the "second phase" of this EAC project.

Other items of note:

- There is as much evidence, and as much concern, about structural forms of disenfranchisement as about intentional abuse of the system. These include felon disenfranchisement, poor maintenance of databases and identification requirements.
- There is tremendous disagreement about the extent to which polling place fraud, e.g. double voting, intentional felon voting, noncitizen voting, is a serious problem. On balance, more researchers find it to be less of a problem than is commonly described in the political debate, but some reports say it is a major problem, albeit hard to identify.
- There is substantial concern across the board about absentee balloting and the opportunity it presents for fraud.
- Federal law governing election fraud and intimidation is varied and complex and yet may nonetheless be insufficient or subject to too many limitations to be as effective as it might be.
- Deceptive practices, e.g. targeted flyers and phone calls providing misinformation, were a major problem in 2004.
- Voter intimidation continues to be focused on minority communities, although the American Center for Voting Rights uniquely alleges it is focused on Republicans.

INTERVIEWS

The consultants jointly selected experts from ???

017696

Common Themes

- There is virtually universal agreement that absentee ballot fraud is the biggest problem, with vote buying and registration fraud coming in after that. The vote buying often comes in the form of payment for absentee ballots, although not always. Some absentee ballot fraud is part of an organized effort; some is by individuals, who sometimes are not even aware that what they are doing is illegal. Voter registration fraud seems to take the form of people signing up with false names. Registration fraud seems to be most common where people doing the registration were paid by the signature.
- There is widespread but not unanimous agreement that there is little polling place fraud, or at least much less than is claimed, including voter impersonation, "dead" voters, noncitizen voting and felon voters. Those few who believe it occurs often enough to be a concern say that it is impossible to show the extent to which it happens, but do point to instances in the press of such incidents. Most people believe that false registration forms have not resulted in polling place fraud, although it may create the perception that vote fraud is possible. Those who believe there is more polling place fraud than reported/investigated/prosecuted believe that registration fraud does lead to fraudulent votes. Jason Torchinsky from the American Center for Voting Rights is the only interviewee who believes that polling place fraud is widespread and among the most significant problems in the system.
- Abuse of challenger laws and abusive challengers seem to be the biggest intimidation/suppression concerns, and many of those interviewed assert that the new identification requirements are the modern version of voter intimidation and suppression. However there is evidence of some continued outright intimidation and suppression, especially in some Native American communities. A number of people also raise the problem of poll workers engaging in harassment of minority voters. Other activities commonly raised were the issue of polling places being moved at the last moment, unequal distribution of voting machines, videotaping of voters at the polls, and targeted misinformation campaigns.
- Several people indicate – including representatives from DOJ -- that for various reasons, the Department of Justice is bringing fewer voter intimidation and suppression cases now and is focusing on matters such as noncitizen voting, double voting and felon voting. While the civil rights section continues to focus on systemic patterns of malfeasance, the public integrity section is focusing now on individuals, on isolated instances of fraud.

- The problem of badly kept voter registration lists, with both ineligible voters remaining on the rolls and eligible voters being taken off, remains a common concern. A few people are also troubled by voters being on registration lists in two states. They said that there was no evidence that this had led to double voting, but it opens the door to the possibility. There is great hope that full implementation of the new requirements of HAVA – done well, a major caveat – will reduce this problem dramatically.

Common Recommendations:

- Many of those interviewed recommend better poll worker training as the best way to improve the process; a few also recommended longer voting times or voting on days other than election day (such as weekends) but fewer polling places so only the best poll workers would be employed
- Many interviewed support stronger criminal laws and increased enforcement of existing laws with respect to both fraud and intimidation. Advocates from across the spectrum expressed frustration with the failure of the Department of Justice to pursue complaints.
 - With respect to the civil rights section, John Tanner indicated that fewer cases are being brought because fewer are warranted – it has become increasingly difficult to know when allegations of intimidation and suppression are credible since it depends on one's definition of intimidation, and because both parties are doing it. Moreover prior enforcement of the laws has now changed the entire landscape – race based problems are rare now. Although challenges based on race and unequal implementation of identification rules would be actionable, Mr. Tanner was unaware of such situations actually occurring and the section has not pursued any such cases.
 - Craig Donsanto of the public integrity section says that while the number of election fraud related complaints have not gone up since 2002, nor has the proportion of legitimate to illegitimate claims of fraud, the number of cases the department is investigating and the number of indictments the section is pursuing are both up dramatically. Since 2002, the department has brought more cases against alien voters, felon voters and double voters than ever before. Mr. Donsanto would like more resources so it can do more and would like to have laws that make it easier for the federal government to assume jurisdiction over voter fraud cases.

017699

- A couple of interviewees recommend a new law that would make it easier to criminally prosecute people for intimidation even when there is not racial animus.
- Several advocate expanded monitoring of the polls, including some associated with the Department of Justice.
- Almost everyone hopes that administrators will maximize the potential of statewide voter registration databases to prevent fraud.
- Challenge laws, both with respect to pre-election day challenges and challengers at the polls, need to be revised by all states to ensure they are not used for purposes of wrongful disenfranchisement and harassment
- Several people advocate passage of Senator Barak Obama's "deceptive practices" bill.
- There is a split on whether it would be helpful to have nonpartisan election officials – some indicated they thought even if elections officials are elected nonpartisanly they will carry out their duties in biased ways nonetheless. However, most agree that elections officials pursuing partisan agendas is a problem that must be addressed in some fashion. Suggestions included moving election responsibilities out of the secretary of states' office; increasing transparency in the process; and enacting conflict of interest rules.
- A few recommend returning to allowing use of absentee ballots "for cause" only if it were politically feasible.
- A few recommend enacting a national identification card, including Pat Rogers, an attorney in New Mexico, and Jason Torchinsky from ACVR, who advocates the scheme contemplated in the Carter-Baker Commission Report.
- A couple of interviewees indicated the need for clear standards for the distribution of voting machines

NEWS ARTICLES

Consultants conducted a search of related Nexis articles published between ? and ? The search terms used were jointly agreed upon, and are available upon request. A systematic, numerical analysis of the data collected during this review is currently being prepared. What follows is an overview provided by the consultants.

Overview of the Articles

???

Absentee Ballots

According to press reports, absentee ballots are abused in a variety of ways:

- Campaign workers, candidates and others coerce the voting choices of vulnerable populations, usually elderly voters.
- Workers for groups and individuals have attempted to vote absentee in the names of the deceased.
- Workers for groups, campaign workers and individuals have attempted to forge the names of other voters on absentee ballot requests and absentee ballots and thus vote multiple times.

It is unclear how often actual convictions result from these activities (a handful of articles indicate convictions and guilty pleas), but this is an area in which there have been a substantial number of official investigations and actual charges filed, according to news reports where such information is available. A few of the allegations became part of civil court proceedings contesting the outcome of the election.

While absentee fraud allegations turn up throughout the country, a few states have had several such cases. Especially of note are Indiana, New Jersey, South Dakota, and most particularly, Texas. Interestingly, there were no articles regarding Oregon, where the entire system is vote by mail.

Voter Registration Fraud

According to press reports, the following types of allegations of voter registration fraud are most common:

- Registering in the name of dead people;
- Fake names and other information on voter registration forms;
- Illegitimate addresses used on voter registration forms;
- Voters being tricked into registering for a particular party under false pretenses; and
- Destruction of voter registration forms depending on the party the voter registered with.

There was only one self evident instance of a noncitizen registering to vote. Many of the instances reported included official investigations and charges filed, but few actual convictions, at least from the news reporting. There have been multiple reports of registration fraud in California, Colorado, Florida, Missouri, New York, North Carolina, Ohio, South Dakota and Wisconsin.

Voter Intimidation and Suppression

This is the area which had the most articles, in part because there were so many allegations of intimidation and suppression during the 2004 election. Most of these remained allegations and no criminal investigation or prosecution ensued. Some of the cases did end up in civil litigation.

This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters' registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places;
- Improper demands for identification;
- Poll watchers harassing voters;
- Poll workers being hostile to or aggressively challenging voters;
- Disproportionate police presence;
- Poll watchers wearing clothes with messages that seemed intended to intimidate; and
- Insufficient voting machines and unmanageably long lines.

Although the incidents reported on occurred everywhere, not surprisingly, many came from "battleground" states. There were several such reports out of Florida, Ohio and Pennsylvania.

"Dead Voters and Multiple Voting"

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations turning out to be accurate according to investigations by the newspapers themselves, elections officials, and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking voter lists, a flawed registration list and/or errors made

in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person took criminal advantage of that. In total, the San Francisco Chronicle found 5 such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

Vote Buying

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations in three particular jurisdictions as detailed in the vote buying summary (attached). There were more official investigations, indictments and convictions/pleas in this area. All of these cases are concentrated in the Midwest and South.

Deceptive Practices

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida,

Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction of voter registration forms. There were no reports of prosecutions or any other legal proceeding.

Non-citizen Voting

There were surprisingly few articles regarding noncitizen registration and voting – just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case charges were filed against ten individuals. In one case a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

Felon Voting

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem has the large number of ineligible felons that remained on the voting list.

Election Official Fraud

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker's possession. In two cases workers were said to have changed peoples' votes. The one instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.

Recommendation

Phase 2 should include a Nexis search that specifically attempts to follow up on the cases for which no resolution is evident from this particular initial search.

CASE LAW RESEARCH

After reviewing over 40,000 cases from 2000 to the present, the majority of which came from appeals courts, consultants found comparatively few which are applicable to this study. Of those that are applicable, no apparent thematic pattern emerges. However, it seems that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility.

Recommendation

Because so few cases provided a picture of these current problems, consultants suggest that case law research for the second phase of this project concentrate on state trial-level decisions.

MAJOR VOTE BUYING CASES SUMMARY

Between 2001 and 2006, allegations and convictions for vote buying and conspiracies to buy votes were concentrated in three states: Illinois, West Virginia and Kentucky.

In East St. Louis, Illinois, nine individuals, including a former city council member and the head of the local Democratic Party, Charles Powell, Jr., were convicted or pled guilty to vote buying and conspiracy to commit election fraud during the 2004 general election. The government's conspiracy case was almost entirely based on taped conversations in which the defendants discussed buying votes for \$5 and whether this would be adequate. Federal prosecutors alleged that the vote buying was financed with \$79,000 transferred from the County Democratic Party shortly before the election, although county officials have not been charged. Four defendants were convicted of purchasing or offering to purchase at least one vote directly, while Democratic Party chairman was only convicted of conspiracy.² Earlier, three precinct officials and one precinct worker pled guilty to buying votes for \$5 or \$10 in that same election.³

Eastern Kentucky has witnessed a series of vote buying cases over the last several years. The most recent revolved around Ross Harris, a Pike County political fundraiser and coal executive, and his associate Loren Glenn Turner. Harris and Turner were convicted in September 2004 of vote buying, mail fraud, and several other counts.⁴ Prosecutors alleged Harris and Turner conspired to buy votes and provided the necessary funds in an unsuccessful 2002 bid for Pike County district judge by former State Senator Doug Hays. Harris supplied nearly \$40,000, Turner laundered the money through straw contributors, and the cash was then disbursed in the form of \$50 checks ostensibly for 'vote hauling', the legal practice of paying campaign workers to get voters to the polls which is notorious as a cover for buying votes.⁵ Harris attempted to influence the race on behalf of Hays in order to get revenge on Hays' opponent for a personal matter.⁶

⁵ "Jury weighing vote-fraud case," Lexington Herald Leader, September 16, 2004.

⁶ "Pike Election Trial Goes To Jury" Lexington Herald Leader, January 1, 2006.

A grand jury initially indicted 10 individuals in connection with the Harris and Turner case, including Hays and his wife, and six campaign workers. Of the remaining defendants, only one, Tom Varney, also a witness in the Hays case, pled guilty. The others were either acquitted of vote buying charges or had vote buying charges dropped.⁷ Prosecutors have announced that their investigation continues into others tied to Harris and may produce further indictments.

The Harris case follows a series of trials related to the 1998 Knott County Democratic primary. Between 2003 and 2004, 10 individuals were indicted on vote buying charges, including a winning candidate in those primaries, Knott County judge-executive Donnie Newsome, who was reelected in 2002. In 2004 Newsome and a supporter were sent to jail and fined. Five other defendants pled guilty to vote buying charges, and three were acquitted. The primary means of vote buying entailed purchasing absentee votes from elderly, infirm, illiterate or poor voters, usually for between \$50 and \$100. This resulted in an abnormally high number of absentee ballots in the primary.⁸ Indictments relating to that same 1998 primary were also brought in 1999, when 6 individuals were indicted for buying the votes of students at a small local college. Five of those indicted were convicted or pled guilty.⁹

Absentee vote buying was also an issue in 2002, when federal prosecutors opened an investigation in Kentucky's Clay County after an abnormal number of absentee ballots were filed in the primary and the sheriff halted absentee voting twice over concerns.¹⁰ Officials received hundreds of complaints of vote-buying during the 2002 primary, and state investigators performed follow up investigations in a number of counties, including Knott, Bell, Floyd, Pike, and Maginoff.¹¹ No indictments have been produced so far.

So far, relatively few incidents of vote-buying have been substantially identified or investigated in the 2004 election. Two instances of vote buying in local 2004 elections have been brought before a grand jury. In one, a Casey County man was indicted for purchasing votes in a local school board race with cash and whiskey.¹² In the second, the grand jury chose not to indict an

individual accused of offering to purchase a teenager's vote on a local proposal with beer.¹³

An extensive vote buying conspiracy has also been uncovered in southern West Virginia. The federal probe, which handed down its first indictment in 2003, has yielded more than a dozen guilty pleas to charges of vote buying and conspiracy in elections since the late 1980s. As this area is almost exclusively dominated by the Democratic Party, vote-buying occurred largely during primary contests.

The first phase of the probe focused on Logan County residents, where vote buying charges were brought in relation to elections in 1996, 2000, 2002 and 2004. In an extraordinary tactic, the FBI planted the former mayor of Logan City, Tom Esposito, as a candidate in a state legislative race. Esposito's cooperation led to guilty pleas from the Logan County Clerk, who pled guilty to selling his vote to Esposito in 1996,¹⁴ and another man who took money from Esposito for the purpose of vote buying in 2004.¹⁵

Guilty pleas were also obtained in connection with former county sheriff Johnny Mendez, who pled guilty to buying votes in two primary elections in order to elect candidates including himself. In 2000, with a large amount of funding from a prominent local lawyer seeking to influence a state delegate election for his wife, Mendez distributed around \$10,000 in payments to voters of \$10 to \$100. Then, in the 2004 primary, Mendez distributed around \$2,000 before his arrest.¹⁶ A deputy of Mendez', the former Logan police chief, also pled guilty to a count of vote buying in 2002.¹⁷

Prosecutors focusing on neighboring Lincoln County have alleged a long-standing vote-buying conspiracy extending back to the late 1980s. The probe identified Lincoln County Circuit Clerk Greg Stowers as head of a Democratic Party faction which routinely bought votes in order to maintain office. Stowers pled guilty in December 2005 to distributing around \$7,000 to buy votes in the 2004 primary. The Lincoln County Assessor, and Stowers' longtime political ally, Jerry Allen Weaver, also pled guilty to conspiracy to buy votes.¹⁸ These were accompanied by four other guilty pleas from party workers for vote buying in primaries. While most specific charges focused on

vote buying in the 2004 primary, defendants also admitted buying votes as far back as the 1988, 1990, and 1992 primaries.

The leading conspirators would give party workers candidate slates and cash, which workers would then take to the polling place and use to purchase votes for amounts between \$10 and \$40 and in one instance, for liquor. Voters would be handed the slate of chosen candidates, and would then be paid upon exiting the polling place. In other cases, the elected officials in question purchased votes in exchange for non-cash rewards, including patronage positions, fixed tickets, favorable tax assessments, and home improvements.¹⁹

The West Virginia probe is ongoing, as prosecutors are scrutinizing others implicated during the proceedings so far, including a sitting state delegate, who may be under scrutiny for vote buying in a 1990 election, and one of the Lincoln county defendants who previously had vote buying charges against him dropped.²⁰

**SUMMARY OF RECENT IRREGULARITIES IN SOUTH DAKOTA,
WASHINGTON STATE, AND WISCONSIN**

Summary of South Dakota Election Irregularities in 2002 and 2004

2002

In fall 2002, one of South Dakota's Senators, Democrat Tim Johnson, was up for re-election, and was engaged in a very close race with his Republican challenger, John Thune. Both parties were engaged in a massive voter registration effort, and registered over 24,000 new voters in the five months between the June primary and the November election, increasing the number of registered voters in the state from around 452,000 to 476,000.²¹

A month before the election, several counties reported irregularities in some of the voter registration documents they'd received. In response to these reports, South Dakota Attorney General, Mark Barnett, with the state US Attorney and the FBI, launched an investigation.²² Because of the importance of the race in determining the partisan balance of power in the Senate, the voter registration discrepancies got a good deal of national press, including a number of editorials accusing American Indians of stuffing ballot boxes.²³ The following allegations were also picked up by out-of-state newssources, including Fox News and the Wall Street Journal:

- Supporters of Thune, who lost the election by 524 votes, collected 47 affidavits from poll watchers claiming voting irregularities.
- Allegations were made that three individuals were offered money by Johnson supporters to vote.

Barnett, who was alerted to the affidavits when he read an early media report that referred to them, stated that these allegations were either false or didn't warrant concern. "Most of the stuff that's in those other 47 affidavits are the kind of problems that we see in every election. People parking too close to the polling place with a sign in their window, people shooting their

017712

mouths off at the polling place. The kind of things that local election officials generally do a pretty good job of policing.”²⁴ The allegations of voter bribery were false.

Though most of the allegations of fraud that were filed turned out to be false, Attorney General Barnett’s investigation did uncover two cases of voter registration fraud:

- The most high-profile case was that of Becky Red Earth-Villeda. Ms. Red Earth-Villeda was hired by the state Democratic party to register voters on the American Indian reservations. She was charged with 19 counts of forgery. No fraudulent voting was associated with Ms. Red Earth-Villeda, nor was there any evidence that fraudulent voting occurred in the state.²⁵ All charges were dropped in January 2004, when, in court, it was determined by the state handwriting specialist that Ms. Red Earth-Villeda had not forged the signatures.²⁶
- Lyle Nichols. Mr. Nichols was arrested for submitting five forged voter registration cards to his county office. He was working for an organization called the Native American Voter Registration Project, and was paid \$3 for each registration. The five charges were dropped after Mr. Nichols pleaded guilty to possession of a forgery, and was sentenced with 54 days in jail, which is how much time he’d already spent there because of the charges. ²⁷

2004

In October 2004, just before the general election, eight people working for a campus GOP Get-out-the-Vote organization resigned their positions after they were accused of submitting absentee ballot requests that had not been notarized properly. Because many of these ballot requests had already been processed and the ballots themselves had been cast, county auditors decided not to pursue the issue.²⁸

Besides this incident, there were no reports of voter registration or voting irregularities in the run-up to the November 2004 election, as there were in

2002.²⁹ However, as with the primary and special elections in June 2004, there were complaints about voter intimidation from American Indians attempting to vote, as well as difficulties with the adoption of the state's new photo identification regulations (after the 2002 election, the state legislature passed more stringent requirements about the kind of identification voters would need to provide at the polls.)

Incidents:

Voter Intimidation: The Four Directions Committee, an organization dedicated to helping American Indians register to vote and get to the polls, got a temporary restraining order on several Republican supporters who, they alleged, had been setting up video equipment outside of polling places on American Indian reservations and following around American Indians who voted early and recording their license plates. ³⁰

Vote Buying: A Republican election monitor from Virginia, Paul Brenner, claimed that Senator Tom Daschle's campaign was paying people to vote. Local county auditors believe Brenner started the rumor himself. As there was no evidence for either side, the claims were not taken seriously. ³¹

Summary of Election Irregularities in Washington State 2004

The 2004 Washington state gubernatorial election was decided by one of the narrowest margins in American electoral history; 261 votes – less than a millionth of the 2.8 million votes cast statewide - separated the leading candidate, Republican Dino Rossi, from his competitor, Democrat Christine Gregoire. The state law-mandated recount that followed brought the margin down to 42 votes, and the subsequent hand recount ordered by the state Democratic Party gave Gregoire the lead, with 129 more votes than Rossi.

The race was so close that the parties decided to go to court to dispute the tally – the Republicans wanted the election results set aside and to have a revote; the Democrats sought a court-legitimated win. Each side set out into the field to find a way to swing the election in their favor. The trial and accompanying investigation, which lasted through the spring of 2005, revealed a litany of problems with the state's election system:

³¹ Walker, Carson. "Some problems and oddities reported on Election Day." *Associated Press State and Local Wire*. November 2, 2004.

- The process by which absentee ballots are matched to the voters who requested them led to discrepancies between the number of absentee ballots received and the number of votes counted.³²
- After the final certification of the election results, King County discovered 96 uncounted absentee ballots, Pierce county found 64, and Spokane County found eight; all had been misplaced following the election, but there was no mechanism for reconciling the number of absentee ballots received with the number counted.³³
- Hundreds of felons who were ineligible to vote were able to cast ballots because they were not aware that they needed to apply to have their voting rights re-instated.³⁴
- The system for verifying the eligibility of voters who had cast provisional ballots was found to be questionable.³⁵
- Due to poll worker error, about 100 provisional ballots were improperly cast, and a hundred more were counted, though they were not verified as having been cast by eligible voters.³⁶

The trial also revealed that most of these problems were the result of understaffing and human error.³⁷ In total, 1,678 ballots were proven to have been cast illegally, but none of these votes was subtracted from the candidates' totals because no evidence was produced in court as to how each individual voted.³⁸ Further, despite the scrutiny that the election returns revealed, and the extensive discussion of voter fraud throughout the investigation, just eight cases of voter fraud were discovered:

- 4 people were accused of casting absentee ballots for their deceased spouses.³⁹
- A mother and daughter were charged with the absentee ballot of the mother's husband who had died earlier in the year
- 1 man cast the ballot of the deceased prior resident of his home.

Summary of Wisconsin Voting Irregularities November 2004

Instances of Illegal Voting, Milwaukee:

A probe led by U.S. Attorney Steve Biskupic and Milwaukee County District Attorney Michael McCann found about 200 cases of illegal felon voting and at least 100 cases of other forms of illegal voting in the city of Milwaukee. Of these, 14 were prosecuted:

- 10 were instances of felons voting while on probation or parole:
- 5 are awaiting trial. (one of them is DeShawn Brooks)⁴¹
- 1 has been acquitted⁴²
- 1 has been found guilty in trial (Kimberly Prude)²
- 3 have reached plea agreements (Milo Ocasio⁴³)
- [names: Ethel M. Anderson, Correan F. Edwards, Jiyto L. Cox, Joseph J. Gooden⁴⁴]

- 4 were instances of double voting:
- 1 produced a hung jury (Enrique Sanders)²
- 1 was found incompetent to stand trial and his case was dismissed
- 1 initially pleaded guilty but now wants a trial.⁴⁵
- 1 is awaiting trial.

Two of those accused of double voting were driven to multiple polling places in a van, but the identity of the driver of the vehicle is not known, and the DA does not suspect conspiracy.⁴⁶

In addition to these, four people were charged with felonies in the Milwaukee County Circuit Court; two cases were filed against people accused of sending in false registration cards under the auspices of the Association of

Community Organizations for Reform Now; the other two were felons who voted illegally.⁴⁷

Instances of Illegal Voting, Statewide:

The Legislative Audit Bureau, a nonpartisan research agency, released its analysis of state-wide 2004 election results in September 2005. The agency reviewed the names, addresses, and birthdates of over 348,000 individuals credited with having voted in November 2004, from the electronic voter registration records of 6 cooperating municipalities, and compared them to lists from the Department of Corrections of felons serving sentences on election day, and to lists from the municipalities (to check up on double-voting) and to lists from the US Social Security Administration. LAB's search revealed 105 "questionable" votes:

- 98 ballots cast by ineligible felons, 57 of which were in Madison, 2 in Waukesha, 15 in Eau Claire, 16 in Appleton, 1 in the Village of Ashwaubenon
- 2 instances of double-voting (one in Madison, one in Waukesha).
- 4 votes counted despite the voter's having died two weeks or less before the election.
- 1 case in which a 17-year-old voted in Madison.⁴⁸

The LAB referred the names of these people to the appropriate District Attorney for prosecution, and several cases are awaiting trial.

It should be noted that this study is not a complete survey of election returns state-wide in Wisconsin; the LAB's analysis is based on the voting records of the six municipalities that provided the LAB with sufficient information to conduct this study.

It should also be noted that the LAB discovered significant error in the data provided them by these municipalities, including:

- 91 records in which the individual's birthdate was incorrectly recorded as later than November 2, 1986;
- 97 cases in which a person was mistakenly recorded as having voted twice; and
- More than 15,000 records were missing birthdates, making it more difficult to determine voter eligibility by comparing these records to lists of felons and deceased persons.⁴⁹

⁴⁷ Milwaukee J-S. December 5, 2005.

⁴⁸ Borowski, Greg J. "State audit digs up wider vote problems; Thousands of voters on rolls more than once." *Milwaukee Journal-Sentinel*. September 17, 2005

General Findings

Both reports (the Legislative Audit Bureau's and the report of the Joint Task Force on Election Reform convened in Milwaukee) that did in-depth studies of the Wisconsin election returns in 2004 found that there was no evidence of systematic, wide-spread fraud.⁵⁰ As the above statistics indicate, there are very few cases in which an individual intentionally voted illegally, and the majority of the discovered instances of fraudulent voting involved felons who were unaware that they were committing a crime. Certainly the number of fraudulent votes, intentional and unintentional, is dwarfed by the amount of administrative error – and the amount of potential there was for fraud.

Registration Irregularities

Duplicate Registrations: In the data from the six participating municipalities, LAB found 3116 records for individuals who appear to be registered more than once in the same municipality (0.9% of the records they reviewed). These duplications were primarily the result of name changes, in which the registrar neglected to remove the old name from the registration list, previous addresses that were not deleted, and misspellings and other typographical errors.

Deceased Voters: The LAB study found 783 persons who were deceased, but whose records had not been eliminated from the registration lists. Most of the municipalities participating in the survey rely on obituaries and notifications from family members to purge their voter registration lists of deceased voters.

Felons: Comparing a list of felons from the Department of Corrections to their voter registration data lists, LAB found 453 felons who were registered to vote. This is largely because, although municipal clerks are informed of federal felony convictions, they have no way of obtaining records on state felony convictions.⁵¹

RE: October 18, 2006 Letter

Dear Mr. Neas:

Your letter of October 18, 2006 requests the release of EAC's Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group's concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study – finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud – as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,

Paul S. DeGregorio
Chairman

Subject Re: Question-Voting Fraud-Voter Intimidation Report

Tom:

I sent the consolidated draft of the report last week (minus the Nexis and case law charts) to the lawyers (with a cc: to you), along with the following comments:

- As you know, references to DOJ actions/responses have caused some concern at DOJ. But both consultants are adamantly opposed to EAC making substantive changes to their report. Perhaps using footnotes clearly labeled as EAC footnotes would be a method of addressing this issue?
- There are some recommendations regarding DOJ that we (the consultants and I) were told would not be supported by DOJ, and other references to DOJ, none of which have been reviewed by the department. I think we ought to give Craig Donsanto and John Tanner a chance to provide feedback on each of these sections.
- I am a little concerned about the naming of names, particularly in the section that addresses working group concerns. If we publish it as is, it might end up as fodder for some very negative newspaper articles.
