1.0 INTRODUCTION

The purpose of the Test Case Procedure Specification is to document the functionality of the ES&S Election Voting System, or EVS, version 5.0. As part of the Functional Configuration Audit, Wyle must verify that the EVS performs as documented in the ES&S supplied Technical Data Package submitted to Wyle for the test campaign. Wyle must also validate that the EVS meets the requirements of the 2005 EAC Voluntary Voting Systems Guidelines (VVSG).

1.1 Scope

The scope of this procedure identifies all activities performed to verify the functionality of the ES&S Voting Systems EVS 5.0 system, from pre-voting to post-voting functions. These activities include:

Pre-voting: Verifying roles, user administration, database administration, defining the political subdivisions, defining election types, defining voting variations, defining the ballot contents, audio ballot definition, election definition loading, auditing election creation process, producing pre-election reports, adding to existing elections, updating existing elections, modifying ballot styles, verifying alternative language translations, and loading an election on precinct count devices.

Voting: Pre-election logic testing, diagnostic tests, opening the polls, activating ballots, voting and casting both normal and audio ballots, utilizing the usability and accessibility aspects of the accessible voting station, closing the polls, printing machine reports, performing post-election maintenance tasks, and executing special voting sessions such as the processing of absentee and provisional ballots

Post-Voting: Verifying election results, tabulation of results, consolidating voted data, Transport Media (TM) maintenance & cleaning, Transport Media logs, concluding an election, backing up results, aging election 22 months, deleting elections, and audit voting machine log

The specific applications of the EVS 5.0 Election Management System used in this test suite are:

- ElectionWare
 - Manage
 - Capture
 - Paper Ballot
 - Configuration
 - Package
- Election Reporting Manager (ERM)
- ES&S Event Log Service (ELS)
- Removable Media Service (RMS)
- VAT Previewer

(The remainder of this page intentionally left blank)

1.3 Terms and Abbreviations

The terms and abbreviations relevant to the test campaign are described in Table 1-1, below.

Table 1-1 Terms and Abbreviations

Abbreviation	Term	Definition
FCA	FUNCTIONAL CONFIGURATION AUDIT	Exhaustive verification of every system function and combination of functions cited in the manufacturer's documentation.
AES	ADVANCED ENCRYPTION STANDARD	A specification for the encryption of electronic data established by the U.S. National Institute of Standards and Technology (NIST) in 2001.
AT	ASSISTIVE TECHNOLOGY	Technology used by individuals with disabilities in order to perform functions that might otherwise be difficult or impossible.
ATD	DERIVED FROM "ATTENTION, DIAL"	---
BOD	BALLOT ON DEMAND	---
CD	COMPACT DISC	An optical disc used to store digital data.
CDMA	CODE DIVISION MULTIPLE ACCESS	A channel access method allowing several transmitters to send information simultaneous over a single communication channel and then employing a spread-spectrum technology and a special coding scheme, where each transmitter is assigned to a code, to allow multiple users to be multiplexed over the same channel.
CONG	COMMON NEXT GENERATION	---
CLI	COMMAND LINE INTERFACE	User interaction with a computer program where the user issues commands to the program in the form of successive lines of text.
COTS	COMMERCIAL OFF-THE-SHELF	A Federal Acquisition Regulation term defining a non-developmental item of supply that is both commercial and sold in substantial quantities in the commercial marketplace.
CVR	CAST VOTE RECORD	Archival record of all votes produced by a single voter. Discussion: Cast vote records may be in electronic, paper, or other form. Electronic cast vote records are also called ballot images.
DS200	DIGITAL SCAN 200	---
EAC	ELECTION ASSISTANCE COMMISSION	---
ECDSA	ELLIPTIC CURVE DIGITAL SIGNATURE ALGORITHM	A variant of the Digital Signature Algorithm which uses elliptic curve cryptography.
EDM	ELECTION DATA MANAGER	---
EEFF	ES&S ENCRYPTED FILE FORMAT	---
EMS	ELECTION MANAGEMENT SYSTEM	---
EQC	ELECTION QUALIFICATION CODE	---
EQSC	EQC SECURITY CODE	---
ERM	ELECTION REPORTING MANAGER	---
ES&S	ELECTION SYSTEMS AND SOFTWARE	---
ESC	ELECTION SECURITY CODE	---
EW	ELECTIONWARE	---
EUT	EQUIPMENT UNDER TEST	---
EVS	ES&S VOTING SYSTEM	---
EW	ELECTIONWARE	---
FM	FIRMWARE MEDIA	---
FIPS	FEDERAL INFORMATION PROCESSING STANDARD	A publicly announced standardization developed by the United States federal government for use in computer systems by all non-military government

		agencies and by government contractors, when properly invoked and tailored on a contract.
FVSS	FLORIDA VOTING SYSTEM STANDARDS	---
GB	GIGABYTE(S)	1 000 000 000 bytes.
GUI	GRAPHICAL USER INTERFACE	A user interface that allows users to interact with electronic devices using images rather than text commands.
HAL	HARDWARE ABSTRACTION LAYER	A routine in software that emulates some platform-specific details, giving programs direct access to the hardware resources
ID	IDENTIFICATION	---
IDE	INTEGRATED DEVELOPMENT ENVIRONMENT	A software application that provides comprehensive facilities to computer programmers for software development.
IMR	INTELLIGENT MARK RECOGNITION	---
IP	INTERNET PROTOCOL	IP is the primary protocol in the Internet layer of the Internet protocol suite and has the task of delivering packets from the source host to the destination host solely based on the IP addresses. For this purpose, IP defines datagram structures that encapsulate the data to be delivered.
JDBC	JAVA DATABASE CONNECTIVITY	This technology is an API for the Java programming language that defines how a client may access a database. It provides methods for querying and updating data in a database. JDBC is oriented towards relational databases.
LCD	LIQUID CRYSTAL DISPLAY	A flat panel display, electronic visual display, or video display that uses the light modulating properties of liquid crystals. Liquid crystals do not emit light directly.
LFS	LINUX FROM SCRATCH	Linux From Scratch is a way to install a working Linux system by building all components of it manually.
NVRAM	NON-VOLATILE RANDOM ACCESS MEMORY	A random-access memory that retains its information when power is turned off (non-volatile).
OS	OPERATING SYSTEM	---
PBM	PORTABLE BITMAP FORMAT	A monochrome format for graphics images, which was designed to be easily exchanged between platforms.
PKI	PUBLIC KEY INFRASTRUCTURE	A set of hardware, software, people, policies, and procedures needed to create, manage, distribute, use, store, and revoke digital certificates.
PPDM	POLL PLACE DATA MEDIA	---
PUB	PUBLIC KEY	One half of a cryptographic system requiring two separate keys, one of which is secret and one of which is public. Although different, the two parts of the key pair are mathematically linked. One key locks or encrypts the plaintext, and the other unlocks or decrypts the cipher text. Neither key can perform both functions by itself. The public key may be published without compromising security, while the private key must not be revealed to anyone not authorized to read the messages.
PVT	PRIVATE KEY	One half of a cryptographic system requiring two separate keys, one of which is secret and one of which is public. Although different, the two parts of the key pair are mathematically linked. One key locks or encrypts the plaintext, and the other unlocks or decrypts the cipher text. Neither key can

		perform both functions by itself. The public key may be published without compromising security, while the private key must not be revealed to anyone not authorized to read the messages.
QA	QUALITY ASSURANCE	---
QAP	QUALITY ASSURANCE PROGRAM	---
RCP	RICH CLIENT PLATFORM	---
RAS	REMOTE ACCESS SERVICE	---
RSA	RIVEST, SHAMIR AND ADLEMAN	A CRYPTOGRAPHY TECHNIQUE
RTR	REPORTING	---
SATA	SERIAL ADVANCED TECHNOLOGY ATTACHMENT	A HARD DISK INTERFACE TECHNOLOGY
SFTP	SSH FILE TRANSFER PROTOCOL	A network protocol designed to provide secure file transfer and manipulation facilities over SSH.
SSH	SECURE SHELL	---
SOP	STANDARD OPERATING PROCEDURE	---
SUT	SYSTEM UNDER TEST	---
TDP	TECHNICAL DATA PACKAGE	---
UELS	UNITY EVENT LOG SERVICE	---
UI	USER INTERFACE	---
USB	UNIVERSAL SERIAL BUS	---
VAT	VOTER ASSISTANCE TERMINAL	---
VSTL	VOTING SYSTEM TEST LABORATORY	---
VVSG	VOLUNTARY VOTING SYSTEM GUIDELINES	---
WYSIWYG	WHAT YOU SEE IS WHAT YOU GET	---
XFER	TRANSFER	Transfer rate of data, common derivatives gigatransfers per second (abbreviated GT/s) and megatransfers per second (MT/s).
XML	EXTENSIBLE MARKUP LANGUAGE	A markup language that defines a set of rules for encoding documents in a format that is both human-readable and machine-readable.
ZIP	"ZIP" meaning "move at high speed"	A file format used to compress data placed on ES&S media devices.

(The remainder of this page intentionally left blank)

2.0 DETAILS

The following subsections describe the requirements and sequence that the individual test cases will be run in to facilitate the creation and execution of all components of an election.

2.1 Inputs, Outputs, and Special Requirements

Input data will be entered into the EMS using both equivalence partitioning and boundary value testing. For each data entry point, an entry will be made for both invalid and valid data. For data entry points that support a range of data, an entry will be made below the range, within the range, and outside the range to test minimum and maximum values supported.

The inputting of invalid data and data outside boundary ranges will generate error conditions. During the execution of this entire test suite Wyle qualified personnel are to pay specific attention to the following error and privacy requirements:

Table 2-1 Error and Privacy Requirements

Section	Requirement
VI – 2.1.3.a	Restoration of the device to the operating condition existing immediately prior to an error or failure, without loss or corruption of voting data previously stored in the device.
VI – 2.1.3.b	Resumption of normal operation following the correction of a failure in a memory component, or in a data processing component, including the central processing unit.
VI – 2.1.3.c	Recovery from any other external condition that causes equipment to become inoperable, provided that catastrophic electrical or mechanical damage due to external phenomena has not occurred.
VI – 2.1.4.f	Protection against any attempt at improper data entry or retrieval.
VI – 2.1.5	System’s characteristics documented in sufficient detail for accredited test labs and system users to evaluate the adequacy of the system’s audit trail.
VI – 2.1.5.1	Audit records are prepared for all phases of election operations performed using devices controlled by the jurisdiction or its contractors. (Includes ballot preparation, election definition, system readiness tests, voting, and ballot-counting operations).
VI – 2.1.5.1.b.i	Generation, storage and reporting of all error messages as they occur to the user.
VI – 2.1.5.1.b.ii	All error messages requiring intervention by an operator or precinct official are displayed or printed unambiguously in easily understood language text, or by means of other suitable visual indicators.
VI – 2.1.5.1.b.iii	System use of numerical error codes for trained technician maintenance or repair containing the text corresponding to the code is self-contained, or affixed inside the unit device.
VI – 2.1.5.1.b.iv	All error messages written clearly.
VI – 2.1.5.1.b.v	The message cue for all systems shall clearly state the action to be performed in the event that voter or operator response is required.
VI – 2.1.5.1.b.vi	That an erroneous response would not lead to irreversible error.
VI – 2.1.5.1.b.vii	Nested error conditions are corrected in a controlled sequence such that system status shall be restored to the initial state existing before the first error occurred.
VI – 2.1.5.1c.i	The display and report of critical status messages use unambiguous indicators or English language
VI – 2.2.3.a	A detailed work plan or other documentation providing a schedule and steps for the software and ballot installation, which includes a table outlining the key dates, events and deliverables.
VI – 2.3.1.2.f	All paper-based precinct count equipment shall include a means of identifying device failure and corrective
VI – 2.3.3.1.b	All systems shall protect the secrecy of the vote such that the system cannot reveal any information about how a particular voter voted, except as otherwise required by individual State law.
VI – 2.3.3.2.d	All paper-based systems shall protect the secrecy of the vote throughout the process.
VI – 4.1.3.1	Voting systems shall accurately record all election management data entered by the user, including election officials or their designees. For recording accuracy, all systems shall:
VI – 4.1.3.1.a	Record every entry made by the user.
VI – 4.1.3.1.c	Verify the correctness of detection of the user selections and the addition of the selections correctly to memory.
VI – 4.1.3.1.e	Verify the correctness of detection of data entered directly by the user and the addition of the selections correctly to memory.
VI – 7.2.1.1.c	When the provision of accessibility involves an alternative format for ballot presentation, then all information presented to voters including instructions, warnings, error and other messages, and ballot choices shall be presented in that alternative format.
VI – 7.9.5.a	Voter privacy shall be preserved during the process of recording, verifying and auditing his or her ballot selections.

2.2 Test Case Sequences

Sequences have been developed to provide a logical order of test case execution. A “Run” is one set of test cases which are executed in order to exercise specific functionality of the System Under Test. The 7 runs in Attachment A were designed to cover the majority of the tests specific to EVS 5.0. The test cases not covered in these runs will be executed on an individual basis.

3.0 TEST COVERAGE REPORTING

The Test Suite validates the following functions supported by the EMS. The system hierarchy detailed in the Tables provided, have been truncated to 4 layers deep for clarity. The provided data reflects approximately 90% of the system hierarchy.

Battery Status		Field - Power Source un-editable	External
			Battery
		Field - Battery Strength un-editable	Good
		Done	Returns to main menu
Calibration Touch Screen		Calibrate	Target
		Done	Returns to main menu
Polling Place Info		Done	Returns to main menu
System Maintenance		Keyboard	Enters characters and numbers
		Case button	Changes the case of the characters
		Cancel	Returns to main menu
		OK	Correct password
			Incorrect password

Election Media Inserted Key Turned to ON

Zoom In/Out	increases the size of the displayed text and images		
-------------	---	--	--

Election Media Inserted Key Turned to On and Ballot inserted

English	Proceeds to voting instructions in English	Back	Returns to language selection screen
		Zoom in/out	Increases the size of the displayed text and images
		Exit return ballot	Continue voting
			Exit
		High contrast	Switches the screen to high contrast mode
Next	Proceeds to ballot presentation		
Espanol	Same navigation as English		
Zoom In/Out	Increases the size of the displayed text and images		
Exit Return Ballot	Continue voting	Returns to language selection screen	
	Exit	Returns ballot and goes to insert ballot screen	
High Contrast	Switches the screen to high contrast mode		

Election Media Inserted Key Turned to ON and Ballot inserted Misc. functions

Zoom In/Out with large contest	View all candidates		Yes Return to contest
	Did not view all candidates	Alert message about not viewing all candidates	No Proceed to next contest
Straight Party	Select all candidates for selected party for all contest		
Write in	Keyboard		
	Space	Inserts blank character	
	Backspace	Deletes previous character	

	Cancel Write-In	Returns to contest	
	Ok	Accepts write-in entry	Returns to contest
Summary selections	Touching a contest returns you to that race	Back	Returns to summary screen
		Zoom in/out	Increases the size of the displayed text and images
		Exit return ballot	Continue voting Exit
		High contrast	Switches the screen to high contrast mode
		Next	Goes to summary screen
Timeout	Alert that no input has been received for more than 5 minutes	Ok	Returns to the current screen
		Do nothing	Session expires after approx. 15min
Election Media Inserted Key Turned to On and Voted Ballot inserted			
English	Voted ballot review instructions presented	Back	Returns to language selection screen
		Zoom in/out	Increases the size of the displayed text and images
		Exit return ballot	Continue voting Exit
		High contrast	Switches the screen to high contrast mode
		Next	Summary selection screen presented
Espanol	Same navigation as English		
External buttons			
Up	Moves the cursor up		
Back	Switches to the previous screen		
Select	Selects the current item		
Forward	Switches to the next screen		
Down	Moves the cursor down		
Screen	Hides or shows the options on the screen		
	Pressing 4 times cancels the voting session		
Repeat	Repeats the current information		
	Holding the button will pause the sound		
Tempo up	Increases the tempo		
Tempo down	Decreases the tempo		
Volume up	Increases the volume		
Volume down	Decreases the volume		
Special Features			
Main Menu	System Maintenance	Ok	Correct password
