Confirmation of Manufacturer Registration

Dear Greg Miller,

On behalf of our Commissioners and our Executive Director, let me take this opportunity to welcome the Open Source Digital Voting Foundation to the EAC's Voting System Testing and Certification Program. We have reviewed your registration package and have found that it meets all of the requirements noted in our Program Manual. As such, this letter is official acknowledgement that the Open Source Digital Voting Foundation is now officially registered and may participate in the EAC's Voting System Testing & Certification Program.

In addition, the Open Source Digital Voting Foundation will now be included in the EAC's listing of registered voting system manufacturers publicly available at www.eac.gov. Furthermore, the Open Source Digital Voting Foundation has been assigned the following unique three-letter identification code: OSD. This code will be used by our Voting System Testing & Certification Program to identify the Open Source Digital Voting Foundation and its products.

Finally, we strongly encourage you to regularly visit the EAC's Web site (www.eac.gov) for the latest Notices of Interpretation and Clarification, news, program manuals, and updates. The information contained in the Notices of Interpretation and Clarification is critical to understanding testing standards and program requirements. It is a manufacturer's responsibility to ensure they adhere to all procedural requirements of the program. Copies of the EAC Voting System Testing and Certification Program Manual (V.1.0) and the EAC Voting System Test Laboratory Program Manual (V.1.0) have been attached to this correspondence for your reference.

If you have any questions or need further information about this matter, please do not hesitate to contact us at your earliest convenience. We thank you in advance for your cooperation in this matter.

Sincerely,

A handwritten signature in black ink that reads "Brian J. Hancock".

Brian J. Hancock
Director of Voting System Testing and Certification
