

June 13, 2007

Dear Secretary of State:

I am writing to inform you that the U.S. Election Assistance Commission (EAC) has terminated CIBER Incorporated's application to become an interim accredited voting system test laboratory.

EAC terminated CIBER's application due to an unreported change in key staffing at the company's laboratory. Under the terms of EAC's interim accreditation program, CIBER should have notified EAC of these key staff changes. Given the limited scope of the interim program and the fact that the Commission closed the program on February 2007, the EAC saw no value in continuing the process. During the course of assessing CIBER under the interim program, EAC also identified issues regarding a number of nonconformities. The assessment reports and related correspondence are available at www.eac.gov by clicking on the Voting System Certification and Laboratory Accreditation link.

In addition, I want to bring to your attention that CIBER has applied for accreditation under the full program, and the National Institute of Standards and Technology (NIST) is currently evaluating its application. For more information and updates on this process, visit www.vote.nist.gov.

EAC established an interim accreditation program as we awaited the first recommendations from NIST. The interim program was necessary to prevent any interruption in service to the states, as the National Association of State Election Directors (NASSED) had terminated its program. Labs that received interim accreditation are authorized only to test to 2002 standards. EAC will cease testing voting systems to these standards in December 2007. In February, the EAC voted to close this interim program, as the full accreditation program is now up and running. For more information about the voting system certification and program, visit www.eac.gov.

Please let me know if you have questions or if we can be of further assistance.

Sincerely,

Donetta Davidson
Chair
U.S. Election Assistance Commission

Dear New York State Board of Elections:

I am writing to inform you that the U.S. Election Assistance Commission (EAC) has terminated CIBER Incorporated's application to become an interim accredited voting system test laboratory.

EAC terminated CIBER's application due to an unreported change in key staffing at the company's laboratory. Under the terms of EAC's interim accreditation program, CIBER should have notified EAC of these key staff changes. Given the limited scope of the interim program and the fact that the Commission closed the program on February 2007, the EAC saw no value in continuing the process. During the course of assessing CIBER under the interim program, EAC also identified issues regarding a number of nonconformities. The assessment reports and related correspondence are available at www.eac.gov by clicking on the Voting System Certification and Laboratory Accreditation link.

Decisions about EAC's interim program will not impact the state of New York's certification program, as EAC interim labs are only qualified to test to 2002 voting system standards. New York requires its voting systems to meet the 2005 voluntary voting system guidelines. Regardless, we feel it is our responsibility to inform you of EAC's decision.

In addition, I want to bring to your attention that CIBER has applied for accreditation under the full program, and the National Institute of Standards and Technology (NIST) is currently evaluating its application. For more information and updates on this process, visit www.vote.nist.gov.
