Re: Unisyn Voting Solutions ECO-1028 Submitted for Approval

Dear Chris Ortiz,

The EAC has reviewed Engineering Change Order ECO-1028, including supporting documentation and analysis provided by the voting system test lab. This minor change to the new adaption to mount an FVS atop of the OVO ballot box does not alter the system's reliability, functionality, capability, or operation. Based on the information provided, it has been determined that no further testing is necessary.

The ECO impacts the following systems:

OpenElect 2.2
OpenElect 2.2.3

This correspondence is to inform you that Unisyn Voting Solutions ECO-1028 is approved.

Sincerely,

Jonathan Le
Sr. Election Technology Specailist, U.S. Election Assistance Commission
