Therefore, please be advised that your company's declaration that certain information submitted in response to a Proposal is "confidential" will not be treated as such if the County receives a request for a copy of the Proposal. Tarrant County will of course make every effort to inform your company of such a request and to provide you with an opportunity to object to the release of any proprietary information per the procedure outlined in Texas Government Code Section 552.305. Notice to your company under Section 552.305 may be sent via either certified mail or e-mail using the contact information provided by you on the signature form. All proposals shall specify terms and conditions of payment, which will be considered as part of, but not control, the award of proposal. County review, inspection, and processing procedures ordinarily require thirty (30) days after receipt of invoice, materials, or service. No payments shall be made on invoices not listing a Purchasing Order Number.**

Continuing non-performance of the Vendor in terms of specifications shall be a basis for the termination of the contract by Tarrant County. Tarrant County shall not pay for work, equipment, or supplies which are unsatisfactory. The vendor will be given a reasonable opportunity before termination to correct the deficiencies. This, however, shall in no way be construed as negating the basis for termination for non-performance.

The **contract may be terminated** by either party upon written thirty (30) days notice prior to cancellation.

Proposals will be considered non responsive if they show any omissions, alteration of form, additions or conditions not called for, or inconsistencies of any kind. However, Tarrant County reserves the right to waive any inconsistencies and to make award in the best interest of the County.

Due care and diligence has been used in preparation of this information, and it is believed to be substantially correct. Tarrant County and its representatives will not be responsible for any errors or omissions in these specifications, nor for the failure on the part of the Respondent to determine the full extent of the exposures.

The successful Vendor may not assign their rights and duties under an award without the written consent of Tarrant County Purchasing Agent. Such consent shall not relieve the assignor of liability in the event of default by the assignee.

STATEMENT OF WORK

I. PURPOSE:

- A. The purpose of this Request For Proposal (RFP) is to purchase Elections Equipment that will best fit the culture, processes and needs of the Tarrant County Elections Administration Department. Tarrant County is looking for technology that will address the concerns of our voters: security, transparency and accessibility. These will be the main criteria for scoring. Second to that, innovation, simplicity and efficiency will be considered.
- B. The Elections Administration wants to ensure that any system purchased will allow the County to participate, if approved in the future by the Commissioner Court, in the Countywide Polling Place Program (commonly known as the "Vote Center Model"). Although no assurances can be made of when or if Tarrant County would join the program, the need arises in this RFP to identify a solution that will not limit the County's ability to join the program.
- C. Tarrant County has decided to acquire a solution based on the **Hybrid** voting model, also known as **Ballot Marking**. This is, a solution where the voter interacts with a direct-recording electronic (DRE) machine that is capable of producing a paper trail, which must be afterwards scanned by the voter in order to be counted. This offer must be made for three thousand (3,000) DRE devices and four hundred (400) ballot scanners.
- D. Tarrant County has \$14,000,000 immediately available to purchase new voting equipment.

II. CURRENT ENVIRONMENT:

- A. Tarrant County is the third (3rd) largest county in the State of Texas, and the 16th in the nation. With slightly over 1 million registered voters, Tarrant County is required to run multiple elections throughout the year for more than 40 cities and 75 different entities (mostly cities and school districts).
- B. The County is currently divided in almost 700 precincts, which require hiring over 1,500 poll workers on a countywide election for working at more than 350 polling places. For early voting, the usual countywide election requires between 50 and 70 locations, which are open up to 14 days before Election Day (with varying schedules).
- C. Voter Registration data is maintained in a system called VOTEC Election Management and Compliance System (VEMACS), provided by VOTEC Corporation. This system holds, besides the records of each individual registered voter, the definitions of the districts, precincts, polling places and ballot types amongst other information. Data needed to create the election in the voting and tabulation system is extracted in text files and fed to the current Election Management System (EMS), after which the processes of ballot design and voting machine configuration are started.

- D. Tarrant County currently uses two (2) types of voting machines, provided by HART Intercivic:
 - Direct-Recording Electronic (DRE): these devices are used in Early Voting and Election Day. They do not provide a Voter-Verified Paper Trail (VVPAT).
 - 2. Ballot Scanners: these are used only on Election Day, they allow voters to cast hand-marked ballots at the polling places.
- E. In addition to the types of voting machines listed above, Tarrant County also uses high-speed scanners to process large volumes of Absentee Ballot By Mail (ABBM) mailed by voters to the main office. The high-speed scanner feeds the backend engine, where ballot images are interpreted and converted into electronic vote records.
- F. Tarrant County recently purchased Electronic Poll Books (EPB) from Tenex Software Solutions, for modernizing and upgrading the voter check-in process at the polls. These devices were used for the first time in the September 8, 2018 Tax Ratification Election.
- G. Once results are tabulated, Tarrant County uses an Election Night Reporting (ENR) tool, provided by Scytl, to share the information with the public in an interactive fashion. Static result reports in PDF format are also posted on the County's web site.

III. MINIMUM REQUIREMENTS:

- A. Once all requirements have been met, the vendor must be able to produce, and enter into, a contract that is approved by the Secretary of State of Texas, as per section 125.003 of the Texas Elections Code. The vendor must also commit to maintaining the solution certified during the contract term. Tarrant County reserves the right to offer award to the next highest scoring vendor if the vendor recommended for award does not enter into a contract that is approved by the Secretary of State of Texas.
- B. The vendor must provide a copy of the following documentation from the Technical Data Package (TDP) submitted to the EAC when applying for the certification:
 - 1. Backend installation procedures, including pre-requisites, users and roles configuration and security settings.
 - 2. Election set up including configuration settings, report definition and data import/export.

 - 2. A Ballot-On-Demand system to generate Mail Ballots for voters who request them. This system will be used only at the main office of the Elections Administration. Each printer must be capable of printing full color, 2-sided ballots eleven (11) inches long at a rate of 25 ballots per minute. It must also support printing ballots up to nineteen (19) inches long.
 - 3. Voting and scanning devices, including all accessories and consumables needed for full operation: storage devices, power chords, cases, ballot boxes, etc.
 - 4. A high speed central scanning solution to be used for processing ballots that are mailed back by voters and accepted by the Ballot Board. The solution must be sized to scan, at least, one hundred and twenty (120) ballots per minute, eleven (11) inches long, at a minimum resolution of 200 dpi. It must accept ballots up to nineteen (19) inches long.
 - 5. A tabulation solution that is capable of processing all the results produced by the voting machines and generating all necessary reports. This system includes any and all components necessary for collecting results at temporary hubs on election night.
 - 6. The following services:
 - a. Training necessary for the Elections Administration to run the system without vendor intervention, including but not limited to: installation and configuration, user training, troubleshooting and maintenance.

TARRANT COUNTY

HISTORICALLY UNDERUTILIZED BUSINESSES (HUB) POLICY

I. POLICY STATEMENT

The Tarrant County Commissioners Court, being the policy development and budgetary control unit of county government, will strive to ensure that all businesses, regardless of size, economic, social or ethnic status have an equal opportunity to participate in the County's procurement processes. The County is committed to promote full and equal business opportunity for all businesses to supply the goods and services needed to support the mission and operations of county government, and seeks to encourage the use of certified historically underutilized businesses (HUBs) through the use of race, ethnic and gender-neutral means. It is the policy of Tarrant County to involve certified HUBs to the greatest extent feasible in the County's procurement of goods, equipment, services and construction projects while maintaining competition and quality of work standards. The County affirms the good faith efforts of firms who recognize and practice similar business standards.

II. DEFINITIONS

<u>Historically underutilized businesses (HUBs)</u>, also known as a disadvantaged business enterprise (DBE), are generally business enterprises at least 51% of which is owned and the management and daily business operations are controlled by one or more persons who is/are socially and economically disadvantaged because of his or her identification as a member of certain groups, including women, Black Americans, Mexican Americans and other Americans of Hispanic origin, Asian Americans, and American Indians.

<u>Certified HUBs</u> includes business enterprises that meet the definition of a HUB and who meet the certification requirements of certification agencies recognized by Tarrant County.

<u>Businesses</u> include firms, corporations, sole proprietorships, vendors, suppliers, contractors, subcontractors, professionals and other similar references when referring to a business that provides goods and/or services regardless of the commodity category.

<u>Statutory bid limit</u> refers to the Texas Local Government Code provision that requires competitive bidding for many items valued at greater than \$50,000.

III. POLICY GUIDELINES

- A. Tarrant County, its contractors, their subcontractors and suppliers, as well as all vendors of goods, equipment and services, shall not discriminate on the basis of race, color, creed, gender, age, religion, national origin, citizenship, mental or physical disability, veteran's status or political affiliation in the award and/or performance of contracts. All entities doing business or anticipating doing business with the County shall support, encourage and implement affirmative steps toward a common goal of establishing equal opportunity for all citizens and businesses of the county.
- B. Tarrant County will use and recognize the State of Texas certification process in conjunction with the implementation of this policy. The County does recognize other agencies' certifications. Tarrant County reserves the right to review the certification status of any vendor applying to do business with the County. This review will be accomplished to determine the validity and authenticity of the vendor's certification as a HUB.
- C. The Commissioners Court may establish HUB target goals. Through a systematic approach of soliciting quotes, bids and proposals from certified HUBs and in compliance with applicable state and federal law this policy will strive to meet those goals.
 - 1. Target goals should consider:
 - the availability of HUB firms within the specific category of goods or services to be procured; and
 - the diversity of the county's population.
 - 2. The goals should be reviewed and amended periodically.
 - 3. The program may apply to all County procurements including construction and professional services.
 - 4. Particular attention will be given to HUB participation on purchases in excess of the statutory bid limit.
 - The Commissioners Court herein establishes a 20% good faith target goal for Tarrant County.

- D. Tarrant County will actively seek and encourage HUBs to participate in all facets of the procurement process by:
 - Continuing to increase and monitor a database of certified HUB vendors, professionals and contractors. The database will be expanded to include products, areas of expertise and capabilities of each HUB firm.
 - 2. Continuing to seek new communication links with HUB vendors, professionals and contractors to involve them in the procurement process.
 - Continuing to advertise bids on the County's website and in newspapers including newspapers that target socially and economically disadvantaged communities.
 - 4. Continuing to provide bid notifications to minority Chambers of Commerce.
- E. As prescribed by law, the purchase of one or more items costing in excess of the statutory bid limit must comply with the competitive bid process. Where possible, those bids will be structured to include and encourage the participation of HUB firms in the procurement process by:
 - Division of proposed requisitions into reasonable lots in keeping with industry standards and competitive bid requirements.
 - Where feasible, assessment of bond and insurance requirements and the designing of such requirements to reasonably permit more than one business to perform the work.
 - 3. Specification of reasonable, realistic delivery schedules consistent with the County's actual requirements.
 - Specifications, terms and conditions reflecting the County's actual requirements are clearly stated, and do not impose unreasonable or unnecessary contract requirements.
- F. A HUB Policy statement shall be included in all specifications. The County will consider the bidder's responsiveness to the HUB Policy in the evaluation of bids and proposals. Failure to demonstrate a good faith effort to comply with the County's HUB policy may result in a bid or proposal being considered non-responsive to specifications.
- G. The Tarrant County Purchasing Department will actively seek the participation of HUB firms in the quotation process for purchases under the statutory bid limit. HUB firms will be identified on the computerized database and linked to the commodities they represent. Buyers will be encouraged to use available internal and external databases of certified HUB firms.

H. Nothing in this policy shall be construed to require the County to award a contract other than to the lowest responsive bidder meeting specifications. This policy is narrowly tailored in accordance with applicable law.

IV. ADMINISTRATIVE GUIDELINES

- A. The Tarrant County Purchasing Department shall serve as the County's HUB Office with responsibility for the implementation, monitoring and general operations of the HUB policy. The Purchasing Agent shall serve as the County HUB Officer.
 - 1. The HUB Officer will establish procedures to implement this policy across the full spectrum of the procurement process. The County HUB Office will periodically review with department head and elected officials regarding procurement opportunities.
 - 2. Managing the policy and training buyers and other County personnel in order to meet County goals will be the responsibility of the HUB Office.
 - The HUB Office will cooperate with other local government entities to increase HUB participation throughout the county and region. The HUB Office is encouraged to participate in educational and other outreach programs to assist HUB firms.
 - 4. The HUB Officer will receive and review complaints and recommendations regarding the implementation of the HUB Policy and the good faith efforts of bidders. Further, the HUB Office will audit for compliance to the HUB Policy on eligible projects after award, during the performance of the contract and after completion, while also making any recommendations to Commissioners Court regarding any irregularities or misrepresentation of facts as they relate to compliance with the policy. The HUB Office will review documentation submitted by HUB firms in compliance with this policy.
 - 5. An annual report along with recommendations shall be provided to the Commissioners Court and Purchasing Board. The annual report will provide statistical data and efforts reflected in the number of purchase orders, value of goods and services purchased, percentages to HUB firms, and outreach and marketing efforts. Other statistics may be required or requested by the Commissioners Court or Purchasing Board.
