

**Errata Note: 2024 EAVS Comprehensive Report**

July 17, 2025

Maine requested a correction to an erroneous footnote in the 2024 EAVS Comprehensive Report following the initial publication of the comprehensive report on June 30, 2025. These corrections are documented below. This update does not affect Maine’s EAVS data.

**Election Administration and Voting Survey: 2024 Comprehensive Report**

Section of Report	Page	Currently Reads	Should Read	Note
Chapter 3: Voter Registration	143, Footnote 65	"Maine also had the highest proportion of SDR registrations in 2022 among NVRA states, and one of the highest in prior elections, probably related to the fact that this state was NVRA-exempt when the law was first implemented because it had SDR in 1993; however Maine lost its exemption in 2011 when it temporarily discontinued SDR before reinstating it later that year."	"Maine started using SDR more than 50 years ago and has a history of SDR accounting for a large percentage of their registrations. However, Maine did not seek an NVRA exemption because the state did not offer SDR in every voting place at the time the NVRA was implemented. The state has complied with the NVRA since 1995, when the law took effect."	This error was corrected in the PDF version of the report released on June 30, 2025. Printed versions of the report have not been corrected.
