Re: Election Systems & Software, Inc (ES&S) ECO ESS-1182 Submitted for Approval

Dear Chris Bruscano,

The EAC has reviewed Engineering Change Order (ECO) ESS-1182 and supporting documentation from the test lab. This minor change does not affect the system's reliability, functionality, capability, or operation. No further testing is required.

This ECO modifies the DS300 Smart Card Module Kit to improve kit retention during installation and insulate from electrical contact. ES&S identified a potential issue during preventive maintenance, and these changes were implemented as a preventive measure to reduce the risk of shield failure.

The EAC certified systems impacted by this ECO are:

EVS 6.5.0.0
EVS 6.4.0.0
EVS 6.3.0.0

This correspondence is to inform you that Election Systems & Software, Inc (ES&S) **ECO ESS-1182** is approved.

Sincerely,

Sean Pumphrey
Field Services Specialist
U.S. Election Assistance Commission
