Re: Election Systems & Software, Inc (ES&S) ESS-1216 Submitted for Approval

Dear Chris Bruscano

The EAC has reviewed Engineering Change Order **ESS-1216**, including supporting documentation and analysis provided by the voting system test lab. The minor change adds a ferrite split/snap-on core to the Voter Session Light cable in the ExpressVote XL to mitigate an Electrostatic Discharge (ESD) test finding from the EVS-6.4.0.0 test campaign; this change does not affect the system's functionality, performance, accessibility, usability, safety, security, or certified configuration. Based on the information provided, it has been determined that no further testing is necessary.

The systems impacted by this ECO are:

- EVS 6.2.0.0
- EVS 6.3.0.0
- EVS 6.4.0.0

This correspondence is to inform you that Election Systems & Software, Inc (ES&S) **ESS-1216** is approved.

Sincerely,

Brooke Watters
Director, Testing and Certification Program
U.S. Election Assistance Commission
