Re: Clear Ballot Group, Inc. CBG-CV25-9 Submitted for Approval

Dear Rosemary Fedorchak

The EAC has reviewed Engineering Change Order **CBG-CV25-9**, including supporting documentation and analysis provided by the voting system test lab. This minor change enables the ClearCast Go software to utilize the status output of the existing Ultrasonic Sensor (USS) so the feature can be used during the November 2026 General Election. The USS hardware component was already included in the certified ClearVote 2.5 voting system, but was disabled during testing and does not alter the system's reliability, functionality, capability, or operation. Based on the information provided, it has been determined that no further testing is necessary.

The systems impacted by this ECO are:
ClearVote 2.5

This correspondence is to inform you that Clear Ballot Group, Inc. **CBG-CV25-9** is approved.

Sincerely,

Brooke Watters
Director, Voting System Testing and Certification
U.S. Election Assistance Commission
