Re: Election Systems & Software, Inc (ES&S) ESS-1210 Submitted for Approval

Dear Chris Bruscano

The EAC has reviewed Engineering Change Order **ESS-1210**, including supporting documentation and analysis provided by the voting system test lab. This minor change adds an improved plug adhesive and screws for the DS300 display bezel to prevent adhesive failure and the loosening of rubber stoppers. It does not alter the system's reliability, functionality, capability, or operation. Based on the information provided, it has been determined that no further testing is necessary.

The systems impacted by this ECO are:

EVS 6.3.0.0
EVS 6.4.0.0
EVS 6.5.0.0

This correspondence is to inform you that Election Systems & Software, Inc (ES&S) **ESS-1210** is approved.

Sincerely,

Brooke Watters
Director, Voting System Testing and Certification
U.S. Election Assistance Commission
