Re: Liberty Vote USA Inc. ECO-101177 Submitted for Approval

Dear Victor Vasquez,

The EAC has reviewed Engineering Change Order **ECO-101177**, including supporting documentation and analysis provided by the voting system test lab. This minor change adds the Dell P2426H monitor as a display device for server and client workstations for new or existing installations for all Democracy Suite system configurations, given that its predecessor, the Dell P2425H monitor, is no longer commercially available. This minor change does not alter the system's reliability, functionality, capability, or operation. Based on the information provided, it has been determined that no further testing is necessary.

The systems impacted by this ECO are:
All D-Suite EMS configurations

This correspondence is to inform you that Liberty Vote USA Inc. **ECO-101177** is approved.

Sincerely,

Brooke Watters
Director, Testing and Certification Program
U.S. Election Assistance Commission
