State of Montana EAC HAVA Section 251 Report for 2004

ORIGINAL

1) A list of expenditures made with respect to each category of activities described for the use of funds.

Title III, Section 301: The expenditures during the applicable period were mainly for precinct counters for Flathead, Missoula, Rosebud, Valley, Broadwater, and Dawson counties.

Amount: \$376,760.75.

Title III, Section 303: The expenditures under this section were to pay a county election administrator for expenses for meetings related to the implementation of the computerized statewide voter registration list.

Amount: \$145.10.

2) The number and type of articles of voting equipment obtained with the funds.

Counties purchased approximately 163 M100 precinct counters with the funds spent during this reporting period. The counties provided a 50% match. Dawson County was paid part of the state's 50% share during this reporting period and part during the next reporting period.

3) An analysis and description of:

The activities funded to meet HAVA requirements:

The precinct counters were funded to meet the Title III, Section 301 requirement that a voting system (including any lever voting system, optical scanning voting system, or direct recording electronic system) shall, if the voter selects votes for more than one candidate for a single office, notify the voter that the voter has selected more than one candidate for a single office on the ballot, notify the voter before the ballot is cast and counted of the effect of casting multiple votes for the office, and provide the voter with the opportunity to correct the ballot before the ballot is cast and counted.

The precinct counters are being provided in addition to extensive educational efforts under HAVA including establishing a voter education program specific to each county voting system that notifies each voter of the effect of casting multiple votes for an office, and providing the voter with instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error).

The payments to the county election administrator for travel to initial meetings on the computerized statewide voter registration list were of a small amount, but will increase in the next reporting period and will include additional individuals and groups. These meetings are necessary to successfully implement the voter registration list with maximum input from as many interested individuals and groups as possible.

How such activities conform to the submitted State plan:

ORIGINAL

Precinct Counter Purchases:

Statement from 2003 Montana HAVA Plan: The state of Montana currently meets the private and independent provision for verifying votes, the opportunity for voters to change their ballot or correct any errors, and our voting systems preserve the privacy of the voter and confidentiality of the ballot (except for the visually impaired). These high standards will not waiver under HAVA.

Implementation: The Secretary of State continues the procedures above and has strengthened its policies by the purchasing of precinct counters and through education programs.

Payment of Expenses for Meetings to Implement Computerized Statewide Voter Registration List:

Partial Statement from 2003 Montana HAVA Plan: Section 303 of HAVA requires states to implement a "single, uniform, official, centralized, interactive, computerized statewide voter registration list that is defined, maintained, and administered at the state level." The list must contain the name and registration information of every legally registered voter in the state and must assign a unique identifier to each voter in the state.

Montana currently has a central database but not all of the information required under HAVA is in our database. In addition, official voter registration records are created and maintained at the county level. Each county election official updates and separately maintains voter registration records. Software and vendors differ from county to county. . . .

Implementation: The state's payment of a county election administrator for travel expenses for meetings is consistent with the State Plan goal to ensure that all county level voter registration records are successfully converted to state level voter registration lists.
