This is not to say that these alleged activities were confined to 2004 – there were several allegations made during every year studied. Most notable were the high number of allegations of voter intimidation and harassment reported during the 2003 Philadelphia mayoral race.

A very high number of the articles were about the issue of challenges to voters’ registration status and challengers at the polling places. There were many allegations that planned challenge activities were targeted at minority communities. Some of the challenges were concentrated in immigrant communities.

However, the tactics alleged varied greatly. The types of activities discussed also include the following:

- Photographing or videotaping voters coming out of polling places.
- Improper demands for identification
- Poll watchers harassing voters
- Poll workers being hostile to or aggressively challenging voters
- Disproportionate police presence
- Poll watchers wearing clothes with messages that seemed intended to intimidate
- Insufficient voting machines and unmanageably long lines

Although the incidents reported on occurred everywhere, not surprisingly, many came from “battleground” states. There were several such reports out of Florida, Ohio and Pennsylvania.

_“Dead Voters and Multiple Voting”_

There were a high number of articles about people voting in the names of the dead and voting more than once. Many of these articles were marked by allegations of big numbers of people committing these frauds, and relatively few of these allegations
turning out to be accurate according to investigations by the newspapers themselves, elections officials and criminal investigators. Often the problem turned out to be a result of administrative error, poll workers mis-marking of voter lists, a flawed registration list and/or errors made in the attempt to match names of voters on the list with the names of the people who voted. In a good number of cases, there were allegations that charges of double voting by political leaders were an effort to scare people away from the voting process.

Nonetheless there were a few cases of people actually being charged and/or convicted for these kinds of activities. Most of the cases involved a person voting both by absentee ballot and in person. A few instances involved people voting both during early voting and on Election Day, which calls into question the proper marking and maintenance of the voting lists. In many instances, the person charged claimed not to have voted twice on purpose. A very small handful of cases involved a voter voting in more than one county and there was one substantiated case involving a person voting in more than one state. Other instances in which such efforts were alleged were disproved by officials.

In the case of voting in the name of a dead person, the problem lay in the voter registration list not being properly maintained, i.e. the person was still on the registration list as eligible to vote, and a person taking criminal advantage of that. In total, the San Francisco Chronicle found 5 such cases in March 2004; the AP cited a newspaper analysis of five such persons in an Indiana primary in May 2004; and a senate committee found two people to have voted in the names of the dead in 2005.

As usual, there were a disproportionate number of such articles coming out of Florida. Notably, there were three articles out of Oregon, which has one hundred percent vote-by-mail.

*Vote Buying*

There were a surprising number of articles about vote buying cases. A few of these instances involved long-time investigations in three particular jurisdictions as detailed in the vote buying summary. There were more official investigations, indictments and convictions/pleas in this area. All of these cases are concentrated in the Midwest and South.

*Deceptive Practices*

In 2004 there were numerous reports of intentional disinformation about voting eligibility and the voting process meant to confuse voters about their rights and when and where to vote. Misinformation came in the form of flyers, phone calls, letters, and even people going door to door. Many of the efforts were reportedly targeted at minority communities. A disproportionate number of them came from key battleground states, particularly Florida, Ohio, and Pennsylvania. From the news reports found, only one of these instances was officially investigated, the case in Oregon involving the destruction
of voter registration forms. There were no reports of prosecutions or any other legal proceeding.

**Non-citizen Voting**

There were surprisingly few articles regarding noncitizen registration and voting—just seven all together, in seven different states across the country. They were also evenly split between allegations of noncitizens registering and noncitizens voting. In one case charges were filed against ten individuals. In one case a judge in a civil suit found there was illegal noncitizen voting. Three instances prompted official investigations. Two cases, from this Nexis search, remained just allegations of noncitizen voting.

**Felon Voting**

Although there were only thirteen cases of felon voting, some of them involved large numbers of voters. Most notably, of course, are the cases that came to light in the Washington gubernatorial election contest (see Washington summary) and in Wisconsin (see Wisconsin summary). In several states, the main problem has the large number of ineligible felons that remained on the voting list.

**Election Official Fraud**

In most of the cases in which fraud by elections officials is suspected or alleged, it is difficult to determine whether it is incompetence or a crime. There are several cases of ballots gone missing, ballots unaccounted for and ballots ending up in a worker’s possession. In two cases workers were said to have changed peoples’ votes. The one instance in which widespread ballot box stuffing by elections workers was alleged was in Washington State. The judge in the civil trial of that election contest did not find that elections workers had committed fraud. Four of the cases are from Texas.
Rough Summary of Department of Justice, Public Integrity Section Activities, October 2002-January 2006*

Prosecutions and Convictions—Individuals
Noncitizen voting: 20
Vote buying: 49
Double voting: 12
Registration fraud: 13
Civil Rights: 4
Voter Intimidation: 2
Unclear: 1

Open Investigations (note: a few cases overlap with prosecutions and convictions)
Noncitizen voting: 3
Vote buying: 25
Double voting: 15

Case Summaries

After reviewing over 40,000 cases, the majority of which came from appeals courts, I have found comparatively very few which are applicable to this study. Of those that are applicable, no apparent thematic pattern emerges. However, it seems that the greatest areas of fraud and intimidation have shifted from past patterns of stealing votes to present problems with voter registration, voter identification, the proper delivery and counting of absentee and overseas ballots, provisional voting, vote buying, and challenges to felon eligibility. But because so few cases provided a picture of these current problems, I suggest that case research for the second phase of this project concentrate on state trial-level decisions.

Determining a Methodology for Measuring Voter Fraud and Intimidation: Recommendations of Political Scientists

The following is a summary of interviews conducted with a number of political scientists and experts in the field as to how one might undertake a comprehensive examination of voter fraud and intimidation. A list of the individuals interviewed and their ideas are available, and all of the individuals welcome any further questions or explanations of their recommended procedures.

1) In analyzing instances of alleged fraud and intimidation, we should look to criminology as a model. In criminology, experts use two sources: the Uniform Crime Reports, which are all reports made to the police, and the Victimization Survey, which asks the general public whether a particular incident has happened to them. After surveying what the most common allegations are, we should conduct a survey of the general public that ask whether they have committed certain acts or been subjected to any incidents of fraud or intimidation. This would require using a very large sample, and we would need to employ the services of an expert in survey data collection. (Stephen Ansolobohere, MIT)

2) Several political scientists with expertise in these types of studies recommended a methodology that includes interviews, focus groups, and a limited survey. In determining who to interview and where the focus groups should be drawn from, they recommend the following procedure:

- Pick a number of places that have historically had many reports of fraud and/or intimidation; from that pool pick 10 that are geographically and demographically diverse, and have had a diversity of problems
- Pick a number of places that have not had many reports of fraud and/or intimidation; from that pool pick 10 places that match the geographic and demographic make-up of the previous ten above (and, if possible, have comparable elections practices)
- Assess the resulting overall reports and impressions resulting from these interviews and focus groups, and examine comparisons and differences among the states and what may give rise to them.

In conducting a survey of elections officials, district attorneys, district election officers, they recommend that:

- The survey sample be large in order to be able to get the necessary subsets
- The survey must include a random set of counties where there have and have not been a large number of allegations

(Allan Lichtman, American University; Thad Hall, University of Utah; Bernard Grofman, UC – Irvine)
3) Another political scientist recommended employing a methodology that relies on qualitative data drawn from in-depth interviews with key critics and experts on all sides of the debate on fraud; quantitative data collected through a survey of state and local elections and law enforcement officials; and case studies. Case studies should focus on the five or ten states, regions or cities where there has been a history of election fraud to examine past and present problems. The survey should be mailed to each state's attorney general and secretary of state, each county district attorney's office and each county board of elections in the 50 states. (Lorraine Minnite, Barnard College)

4) The research should be a two-step process. Using LexisNexis and other research tools, a search should be conducted of news media accounts over the past decade. Second, interviews with a systematic sample of election officials nationwide and in selected states should be conducted. (Chandler Davidson, Rice University)

5) One expert in the field posits that we can never come up with a number that accurately represents either the incidence of fraud or the incidence of voter intimidation. Therefore, the better approach is to do an assessment of what is most likely to happen, what election violations are most likely to be committed – in other words, a risk analysis. This would include an analysis of what it would actually take to commit various acts, e.g. the cost/benefit of each kind of violation. From there we could rank the likely prevalence of each type of activity and examine what measures are or could be effective in combating them. (Wendy Weiser, Brennan Center of New York University)

6) Replicate a study in the United States done abroad by Susan Hyde of the University of California- San Diego examining the impact of impartial poll site observers on the incidence of election fraud. Doing this retrospectively would require the following steps:

- Find out where there were federal observers
- Get precinct level voting information for those places
- Analyze whether there was any difference in election outcomes in those places with and without observers, and whether any of these results seem anomalous.

Despite the tremendous differences in the political landscapes of the countries examined by Hyde in previous studies and the U.S., Hyde believes this study could be effectively replicated in this country by sending observers to a random sample of precincts. Rather than compare the incumbent’s vote share, such factors such as voter complaints, voter turnout, number of provisional ballots used, composition of the electorate, as well as any anomalous voting results could be compared between sites with and without monitors.

For example, if intimidation is occurring, and if reputable monitors make intimidation less likely or voters more confident, then turnout should be higher on average in monitored precincts than in unmonitored precincts. If polling station officials are intentionally refusing to issue provisional ballots, and the polling station officials are
more likely to adhere to regulations while being monitored, the average number of provisional ballots should be higher in monitored precincts than in unmonitored precincts. If monitors cause polling station officials to adhere more closely to regulations, then there should be fewer complaints (in general) about monitored than unmonitored precincts (this could also be reversed if monitors made voters more likely to complain).

Again, random assignment controls for all of the other factors that otherwise influence these variables.

One of the downsides of this approach is it does not get at some forms of fraud, e.g. absentee ballot fraud; those would have to be analyzed separately.

7) Another political scientist recommends conducting an analysis of vote fraud claims and purging of registration rolls by list matching. Allegations of illegal voting often are based on matching of names and birth dates. Alleged instances of double voting are based on matching the names and birth dates of persons found on voting records. Allegations of ineligible felon (depending on state law), deceased, and of non-citizen voting are based on matching lists of names, birth dates, and sometimes addresses of such people against a voting records. Anyone with basic relational database skills can perform such matching in a matter of minutes.

However, there are a number of pitfalls for the unwary that can lead to grossly over-estimating the number of fraudulent votes, such as missing or ignored middle names and suffixes or matching on missing birth dates. Furthermore, there is a surprising statistical fact that a group of about three hundred people with the same first and last name are almost assured to share the exact same birth date, including year. In a large state, it is not uncommon for hundreds of Robert Smiths (and other common names) to have voted. Thus, allegations of vote fraud or purging of voter registration rolls by list matching almost assuredly will find a large proportion of false positives: people who voted legally or are registered to vote legally.

Statistics can be rigorously applied to determine how many names would be expected to be matched by chance. A simulation approach is best applied here: randomly assign a birth date to an arbitrary number of people and observe how many match within the list or across lists. The simulation is repeated many times to average out the variation due to chance. The results can then be matched back to actual voting records and purge lists, for example, in the hotly contested states of Ohio or Florida, or in states with Election Day registration where there are concerns that easy access to voting permits double voting. This analysis will rigorously identify the magnitude alleged voter fraud, and may very well find instances of alleged fraud that exceed what might have otherwise happened by chance.

This same political scientist also recommends another way to examine the problem: look at statistics on provisional voting: the number cast might provide indications of intimidation (people being challenged at the polls) and the number of those not counted.
would be indications of "vote fraud." One could look at those jurisdictions in the Election Day Survey with a disproportionate number of provisional ballots cast and cross reference it with demographics and number of provisional ballots discarded. (Michael McDonald, George Mason University)

8) Spencer Overton, in a forthcoming law review article entitled *Voter Identification*, suggests a methodology that employs three approaches—investigations of voter fraud, random surveys of voters who purported to vote, and an examination of death rolls provide a better understanding of the frequency of fraud. He says all three approaches have strengths and weaknesses, and thus the best studies would employ all three to assess the extent of voter fraud. An excerpt follows:

1. Investigations and Prosecutions of Voter Fraud

Policymakers should develop databases that record all investigations, allegations, charges, trials, convictions, acquittals, and plea bargains regarding voter fraud. Existing studies are incomplete but provide some insight. For example, a statewide survey of each of Ohio’s 88 county boards of elections found only four instances of ineligible persons attempting to vote out of a total of 9,078,728 votes cast in the state’s 2002 and 2004 general elections. This is a fraud rate of 0.00000045 percent. The Carter-Baker Commission’s Report noted that since October 2002, federal officials had charged 89 individuals with casting multiple votes, providing false information about their felon status, buying votes, submitting false voter registration information, and voting improperly as a non-citizen. Examined in the context of the 196,139,871 ballots cast between October 2002 and August 2005, this represents a fraud rate of 0.0000005 percent (note also that not all of the activities charged would have been prevented by a photo identification requirement).

A more comprehensive study should distinguish voter fraud that could be prevented by a photo identification requirement from other types of fraud — such as absentee voting and stuffing ballot boxes — and obtain statistics on the factors that led law enforcement to prosecute fraud. The study would demand significant resources because it would require that researchers interview and pour over the records of local district attorneys and election boards.

Hard data on investigations, allegations, charges, pleas, and prosecutions is important because it quantifies the amount of fraud officials detect. Even if prosecutors vigorously pursue voter fraud, however, the number of fraud cases charged probably does not capture the total amount of voter fraud. Information on official investigations, charges, and prosecutions should be supplemented by surveys of voters and a comparison of voting rolls to death rolls.

2. Random Surveys of Voters
Random surveys could give insight about the percentage of votes cast fraudulently. For example, political scientists could contact a statistically representative sampling of 1,000 people who purportedly voted at the polls in the last election, ask them if they actually voted, and confirm the percentage who are valid voters. Researchers should conduct the survey soon after an election to locate as many legitimate voters as possible with fresh memories.

Because many respondents would perceive voting as a social good, some who did not vote might claim that they did, which may underestimate the extent of fraud. A surveyor might mitigate this skew through the framing of the question ("I've got a record that you voted. Is that true?").

Further, some voters will not be located by researchers and others will refuse to talk to researchers. Photo identification proponents might construe these non-respondents as improper registrations that were used to commit voter fraud.

Instead of surveying all voters to determine the amount of fraud, researchers might reduce the margin of error by focusing on a random sampling of voters who signed affidavits in the three states that request photo identification but also allow voters to establish their identity through affidavit—Florida, Louisiana, and South Dakota. In South Dakota, for example, only two percent of voters signed affidavits to establish their identity. If the survey indicates that 95 percent of those who signed affidavits are legitimate voters (and the other 5 percent were shown to be either fraudulent or were non-responsive), this suggests that voter fraud accounts for, at the maximum, 0.1 percent of ballots cast.

The affidavit study, however, is limited to three states, and it is unclear whether this sample is representative of other states (the difficulty may be magnified in Louisiana in the aftermath of Hurricane Katrina’s displacement of hundreds of thousands of voters). Further, the affidavit study reveals information about the amount of fraud in a photo identification state with an affidavit exception—more voter fraud may exist in a state that does not request photo identification.

3. Examining Death Rolls

A comparison of death rolls to voting rolls might also provide an estimate of fraud.

Imagine that one million people live in state A, which has no documentary identification requirement. Death records show that 20,000 people passed away in state A in 2003. A cross-referencing of this list to the voter rolls shows that 10,000 of those who died were registered voters, and these names remained on the voter rolls during the November 2004 election. Researchers would look at what percentage of the 10,000 dead-but-registered people who "voted" in the November 2004 election. A researcher should distinguish the votes cast in the name of the dead at the polls from those cast
absentee (which a photo identification requirement would not prevent). This number would be extrapolated to the electorate as a whole.

This methodology also has its strengths and weaknesses. If fraudulent voters target the dead, the study might overestimate the fraud that exists among living voters (although a low incidence of fraud among deceased voters might suggest that fraud among all voters is low). The appearance of fraud also might be inflated by false positives produced by a computer match of different people with the same name. Photo identification advocates would likely assert that the rate of voter fraud could be higher among fictitious names registered, and that the death record survey would not capture that type of fraud because fictitious names registered would not show up in the death records. Nevertheless, this study, combined with the other two, would provide important insight into the magnitude of fraud likely to exist in the absence of a photo identification requirement.
Report Background
This report to the United States Election Assistance Commission (EAC) presents an analysis of voter identification requirements across the country and makes recommendations for best practices to improve implementation of voter ID requirements at the polls. It is based on research conducted by the Eagleton Institute of Politics at Rutgers, the State University of New Jersey, and the Moritz College of Law at Ohio State University under a contract to the EAC, dated May 24, 2005. The research included a review and legal analysis of state statutes, regulations and litigation concerning voter identification and provisional voting, a sample survey of local election officials, and a statistical analysis of the effects of various requirements for voter identification on turnout in the 2004 election. This report is a companion to a report on Provisional Voting submitted to the EAC on November 28, 2005 under the same contract.

The Help America Vote Act of 2002 (HAVA) (Public Law 107-252) authorizes the EAC (Sec. 241, 42 USC 15381) to conduct periodic studies of election administration issues. The purpose of these studies is to promote methods for voting and administering elections, including provisional voting, that are convenient, accessible and easy to use; that yield accurate, secure and expeditious voting systems; that afford each registered and eligible voter an equal opportunity to vote and to have that vote counted; and that are efficient.

Executive Summary
Methods
To explore the effects of voter ID requirements on electoral participation in 2004, as measured by turnout, we gathered information on the requirements in effect in the 50 states and the District of Columbia in that year. We assigned each state to one of five categories based on its ID requirements. The five categories are progressively more rigorous based on the demands they make on both voters1 (and, to some extent) on election workers. The categories range from "Stating Name" which we judge to be somewhat less demanding than "Signing Name."
"Signature Match" requires poll workers to examine the signature and compare it to a sample,

1 Even the most relaxed provisions for identification at the polls — anything stricter than the honor system used in North Dakota — will impose some burden on particular voters. *Harvard Law Review* 119:1146
which is slightly more demanding than the voter simply signing. "Present ID" requires voters to offer some documentary evidence of their identity, ranging from a utility bill to a passport. It is more demanding than the previous three categories because it requires that the voter remember to bring this documentation to the polls. (Even a simple ID, such as a utility bill, may not be available to some renters or, say, those in group housing.) We regard a government "Photo ID" as the most rigorous requirement. Such identity documents are not uniformly and conveniently available to all voters.

We collected data on turnout in all counties to permit an estimate of the relationship between the rigor of the ID requirements and the level of turnout. This aggregate analysis is useful, but does not provide valid estimates on the effects of different kinds of ID requirements on particular demographic groups (e.g., the old, the young, African-Americans, the poor, or high school graduates.) To allow that analysis, we used the Census Bureau's Current Population Survey from November 2004, which asked a large sample of Americans about their experience in the election. It has the disadvantage of relying on self reports by respondents about their registration status, citizenship, and experience in the polling place, but it provides the demographic data needed to supplement the aggregate analysis.

To understand the legal issues raised by voter ID requirements, we collected and analyzed the few major cases that have been decided on this issue. The decisions so far suggest the constitutional and other constraints to policies on voter ID requirements.

Findings
The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack precise information on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased.

Voter turnout at the state level in 2004 was lower in states where voter identification requirements were more demanding. While the trend is not perfectly linear, the data show a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. An average of 63.1 percent of the voting age population turned out in states that required
voters to state their names, compared to 57.3 percent in states that required photo identification. Those figures, however, probably overstate the effect since the inclusion of other factors beyond voter ID requirements in the analysis diminishes the extent of influence of voter ID on turnout. After taking account of the other factors, the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or people living below the poverty line.

Our analysis of litigation suggests that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen's right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, best practice for the states may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Evidence on the incidence of vote fraud, especially on the kind of vote fraud that could be reduced by requiring more rigorous voter identification is not now sufficient to evaluate the tradeoffs between ensuring ballot access and ensuring ballot integrity. The lack of full understanding of the dynamics of voter ID requirements on political participation can be remedied by requiring the collection and reporting of data on the reasons potential voters are required to cast a provisional ballot and the reasons for rejecting provisional ballots during the 2006 and subsequent elections. Also useful would be the results of exit polling of voters on their experiences in meeting voter ID requirements and on what type of ballot they cast. And, of course, more information is needed on the incidence and varieties of vote fraud, but that inquiry is outside the scope of this report.

A voting system that requires voters to produce an identify document or documents may indeed prevent the ineligible from voting. It may also prevent eligible voters from casting a ballot. If the

---

2 Arizona held its first election with new, stricter ID requirements on March 14, 2006. In at least one county (Maricopa) election officials handed a survey to voters that asked if they knew about the voter identification law and if they did, how they found out about it. Edythe Jensen, "New Voter ID Law Goes Smoothly in Chandler," Arizona Republic, March 15, 2006. More surveys of this kind can illuminate the dynamics of voter ID and voting in ways not possible with the current lack of information on this subject.
ID requirement of a ballot protection system blocks ineligible voters from the polls at the cost of preventing eligible voters who lack the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Recommendations for consideration and action by the EAC

The dynamics of Voter ID requirements – how more rigorous Voter ID requirements affect the decision by potential voters to go or stay away from the polls – are not well understood. This lack of understanding should be recognized in the policy process in the states. The debate over voter ID in the states would be improved by additional research sponsored by the EAC.

The EAC should consider the following actions to improve understanding of the relationship between voter ID requirements, broadly defined, and the two important goals of ensuring ballot access and ensuring ballot integrity.

- Encourage or sponsor further research to clarify the connection between Voter ID requirements and the number of potential voters actually able to cast a ballot.
- Recommend as a best practice the publication of a “Voting Impact Statement” by states considering changing their voter ID requirements to protect the integrity of the ballot. The analysis will help ensure that efforts to increase ballot security have a neutral effect on electoral participation by eligible voters. The Voter Impact Statement would estimate the number and demographics of 1) eligible, potential voters that a proposed stricter ID requirement may keep away from the polls or be permitted to cast only a provisional ballot; and 2) assess the number of ineligible voters who will be prevented from voting by the stricter ID requirements.
- Encourage or require the states in the 2006 election and beyond, to collect and report reliable, credible information on the relationship between ballot access and ballot security. EAC should analyze this publish an analysis of this information to provide a sound estimate of the incidence of the kinds of vote fraud that more stringent ID requirements may prevent. The analysis should describe the dynamics of the voter ID process in preserving the security of the ballot. The states should also be encouraged to use this information to increase the effectiveness of programs to ensure that all eligible voters have required ID and are permitted to vote in future elections.
  - Useful information could be supplied by exit polling or surveys of voters by local election officials. It would make clear why those who cast a provisional ballot
were found ineligible to cast a regular ballot. The answers would illuminate the frequency with which ID issues divert voters into the provisional ballot line.

- Polling to ask voters what they know about the voter ID requirements would also provide useful context for evaluating the effect of various voter ID requirements on electoral participation.

- Encourage states to examine the time period allowed for voters who cast a provisional ballot because they lacked required ID to return with their identification. In eleven states, voters who had to cast a provisional ballot because they lacked the ID required for a regular ballot were permitted to return later with their ID. Their provision of this ID is the critical step in evaluating the ballots. The length of the period in which the voter may return with ID is important. In setting the time period for return, which now varies among the states from the same day to about two weeks, states should consider three factors: the convenience of the voter, the total time allowed to evaluate ballots, and the safe harbor provision in presidential elections.

- Recommendations to the states from EAC should reflect current judicial trends. Requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (Common Cause v. Billups), and that court concluded that this requirement is likely unconstitutional.

Background and Approach of the Study

Establishing the eligibility of a person to vote has long been part of the electoral process. Voters may have to identify themselves twice in the electoral process: when registering to vote and then when casting a ballot. The stress on voters to provide required ID documents may be greater at the polls on Election Day than when registering. The pressures arising from the need to check ID, even so simple a check as a signature match, can be greater at the polls on Election Day than at the time of registration. Poll workers may be faced with long lines and limited time.

---

3 Our research on provisional voting reveals that states that provide more than week to evaluate provisional ballots end up counting substantially more of those ballots than states that provide less than a week.
This analysis focuses on ID requirements on Election Day, but with an appreciation that the ID requirements at time of registration and on Election Day are inter-related. The emphasis in this report is on Voter ID requirements on Election Day and afterwards as election judges evaluate provisional ballots. This is the critical period for the electoral system, the time when ballot access and ballot security are in the most sensitive balance.

The report looks broadly at voter ID issues and goes beyond the rather narrow identification requirements in HAVA. Much of the current debate in state legislatures on voter ID goes ranges beyond HAVA to require more rigorous documentation of identity for all would-be voters, not just those who had not registered in person and are casting a ballot for the first time. The controversy in the states over voter ID seems to have been sparked in part by the HAVA requirements, but goes beyond those requirements, and sets the context for the analysis here.

We recognize that the previously technical, rather dull subject of voter ID requirements has become fiercely partisan and divisive in many states. The polarization of the debate has raised the stakes over this issue, making dispassionate analysis both more valuable and more rare. Voter ID is often described as the critical step in protecting the integrity of the ballot, the process to ensure that the potential voter is eligible and, if eligible, is permitted to cast one ballot and one ballot only. Truly protecting the integrity of the ballot, however, requires a perspective that takes in the entire voting process. It demands more than preventing the ineligible from voting, and should also ensure that all those who are eligible and want to vote can cast a ballot that counts. The protection effort must embrace all forms of voting, including absentee ballots, and consider each step in the process from registration through vote counting.

---

4 As the Carter-Baker Commission noted, photo ID requirements for in-person voting do little to address the problem of fraudulent registration by mail, especially in states that do not require third-party organizations that register voters to verify ID. Commission on Federal Election Reform, pp 46-47.

5 Harvard Law Review 119:1127: "Legislators hoping to stiffen their state antifraud laws have taken their cue from identification provisions buried in HAVA."

6 "Of the various electoral procedure laws passed in the fifty states since the 2000 and 2004 presidential elections and those still being debated in state legislatures and local media, few arouse more potent partisan feelings than voter identification laws." Harvard Law Review 119:1144. John Fund's 2004 book, Stealing Elections: How Voter Fraud Threaten Our Democracy, cites (pages 16 – 17) a Rasmussen Research poll that asked respondents if they were more concerned with voting by ineligible participants or with disenfranchisement of eligible voters. Sixty-two percent of Kerry supporters, but only 18 percent of Bush supporters, worried more about disenfranchisement; 58 percent of Bush supporters, but only 19 percent of Kerry supporters were more concerned with voter fraud.
A voting system that requires voters to produce an identity document or documents may prevent the ineligible from voting. It may also prevent the eligible from casting a ballot. If the ID requirements block ineligible voters from the polls at the cost of preventing eligible voters who cannot obtain or have left at home the required forms of identification, the integrity of the ballot may not have been improved; the harm may be as great as the benefit.

Assessing the effectiveness of voter ID as a way to protect the integrity of the ballot should logically include an estimate of the nature and frequency of vote fraud. The EAC has informed us that it has commissioned a separate analysis of the incidence of vote fraud. Consequently, this research does not include consideration of vote fraud nor the possible effectiveness of various voter ID regimes to counter attempts at vote fraud. As a result, our analysis of the effects of voter ID requirements on turnout cannot take into account how many potential voters who did not turn out under comparatively stricter voter ID requirements might have been ineligible or eligible to vote.

In some states, voters lacking required ID, or who have ID that does not reflect their current address, are able to vote only by casting a provisional ballot. Voter ID requirements that require voters to bring a document to the polls—rather than simply sign their names—can divert more voters to the provisional ballot. Requiring poll workers to request and check ID, can put stress on the already demanding environment of the polling place. Scrutiny of ID can create lines at the polling places. Further delays can result when voters cast a provisional ballot and fill out the ballot envelope. Voters who cast a provisional ballot because they lack their ID on Election Day, and who then fail to return with the needed document or documents, will have their ballot rejected. And, of course, the cost of processing provisional ballots is greater than the cost of regular ballots.

Each of these potential consequences of more elaborate voter identification processes can increase the chance of litigation. Long lines will, at best, discourage voters and at worst make voting seem a hassle, an impression that could keep more citizens (even those with ID) from the voting booth.

---

7 For example, the Florida voter ID law adopted after the 2004 election and pre-cleared by the Department of Justice, permits voters who cannot meet the ID requirements to sign an affidavit on the envelope of a provisional ballot, which will be counted if the signature matches that on the voter's registration form.

8 The EAC's Election Day Study found "improper ID," to be the third most common reason for a provisional ballot to be rejected. "Improper ID" was cited by 7 states responding to the survey, compared to 14 mentions for voting in the wrong precinct. *Election Day Study*, Chapter 6, p. 5.
polls. In conducting this analysis, we were sensitive to the observation that the problem with American elections may well be that too many people do not vote rather than that a few people may vote more than once.

An evaluation of the effect of different Voter ID regimes can be more effective if based on clear standards – legal, equitable, practical. The standards suggested here can best be described as the set of questions to be asked about Voter ID requirements. We suggest 7 questions that try to measure the most important dimensions of the problem.

1. Is the Voter ID system designed on the basis of valid and reliable, empirical studies of the incidence of the sorts of vote fraud it is designed to prevent?\(^9\)

2. How effective is the ID requirement in increasing the security of the ballot? How well can it be coordinated with a statewide voter database?\(^10\)

3. How practical is the requirement? Can it be administered smoothly by the staff and budget likely to be made available? How much additional training of polling place workers might be required? Is it simple enough or can it be defined with sufficient clarity that poll workers throughout the state can administer it uniformly and with a minimum of local interpretation made on the fly under the pressure of Election Day?\(^11\)

4. How cost-effective is the system? Does it demonstrably increase the security of the ballot affordably, measured in both monetary and other costs? To improve understanding of the non-monetary component of the costs, conducting a voter impact study might be appropriate. The voter impact study would examine, before the adoption of the regulation, the cost of compliance by the voter (such as the cost in time and money of acquiring a photo ID card), any offsetting benefits to voters, and the possible disparate effects of the regulation on various groups of voters.\(^12\)

---

\(^9\) Often where the battle over voter identification is most heated, real evidence of voter fraud proves scarce: in Georgia, for example, the Secretary of State averred that she had never encountered a single instance of voter impersonation at the polls. State laws might sometimes impose tighter restrictions on in-person voting than on absentee ballots, which yield the greatest incidence of, and provide the easiest avenue for, voter fraud. . . ." Harvard Law Review 127:1144 (2006)

\(^10\) See the final section of this report for a brief overview of possible effects of a statewide voter database on voter identification issues.

\(^11\) In New York, in 2004, disparities in training and voting information were made apparent in a study finding elections officials had wildly varying interpretations of what the state’s voter identification requirement actually was. Tova Wang, "Warning Bell in Ohio," December 5, 2005. Website, the Foundation for National Progress.

\(^12\) "Absent clear empirical evidence demonstrating widespread individual voter fraud, legislatures need to fashion narrowly tailored voter identification provisions with an eye toward the inevitable and well-grounded constitutional challenges that will arise in the courts. Only as states grow more adept at
impact statement that demonstrated the nexus between the identification regime and the integrity of the ballot could provide protection against inevitable legal challenges.

5. If a side effect of the Voter ID regulation is likely to reduce turnout, generally or among particular groups, is it possible to take other steps to ameliorate the adverse consequences?¹³

6. Does it comply with the letter and spirit of Voting Rights Act?

7. The seventh question is the most difficult to answer. Does the Voter ID requirement have a neutral result on the composition of the qualified and eligible electorate? ID requirements should not be designed to, or unintentionally, reduce the turnout of particular groups of voters or supporters of one party or another. Whatever the requirement may be, can all citizens comply with it easily and at no or minimal cost?

Voter ID and Turnout

As of the 2004 election, the states and the District of Columbia could be divided into 5 different Voter ID regimes. These are shown in Table 1, Voter ID Requirements. Nine states required that voters give their names; 14 that they sign their names; 8 match the signature to a sample in the registration book; 15 require some form of ID (ranging from a utility bill to a government-issued photo ID), and 5 states in 2004 required a photo ID, although in all those states voters without that credential could cast a regular ballot after signing an affidavit concerning their identity and eligibility or provide other forms of ID.

This neat assignment in the following table and map of each state to one category no doubt fails to reflect actual practice at many polling places. Like any system run by fallible people, the voter ID process is subject to wide variation in practice. Voters may be confronted with demands for identification different from the directives in state statutes or regulation. Some voters may be waved through the process without a look at any document, no matter what the regulations say. Under the press of long lines and unfamiliar requirements, there is, in short, no sure way to report the wide variety of conditions voters actually encounter.

¹¹ For example, the Carter-Baker Commission coupled its recommendation for a national voter ID card to a call for an affirmative effort by the states to reach out and register the unregistered, that is, to use the new Voter ID regime as a means to enroll more voters. Similarly, Richard Hasen's has suggested combining a national voter ID with universal registration. See his "Beyond the Margin of Litigation: Reforming U.S. Election Administration to Avoid Electoral Meltdown," 62 Washington and Lee Law Review 937 (2005).

*In Florida and Louisiana, states that required a photo ID in 2004, voters without that credential could sign an affidavit concerning their identity and eligibility and cast a regular ballot.

**In these states in 2004, voters lacking a photo ID could vote by providing other ID.

*Arizona voters who lack a photo ID may present 2 forms of ID with no photograph, such as 2 utility bills.

**State only requires ID for first-time voters who register by mail without providing ID. They accept all forms of ID listed in the statute.

***Georgia is currently enjoined from implementing this law, returning them for the time being to their 2004 requirement of provide ID.

****Pennsylvania requires ID of all first-time voters, whether they registered by mail or in-person.

*****Tennessee voters must provide signature and address. In counties without computerized lists, the signature is compared to the registration card. In counties with computerized lists, the signature is compared to a signature on ID presented with registration.

******Texas voters must present a current registration certificate. Those without a certificate can vote provisionally after completing an affidavit.

Figure 1

Voter ID Requirements 2004
Since it is not practical to attempt to capture the wide variety of how voter ID requirements are actually implemented across the nation's tens of thousands of polling places, the analysis of the effect of state requirements on county-level turnout must be viewed with some caution.

**Effect of Voter ID requirements on Turnout**

We categorized each state according to its voter ID requirements in 2004, as shown in Table 1 and analyzed turnout data for each county according to the voter identification requirements of its state. We also assessed self-reported turnout by the sample interviewed in the November 2004 Current Population Survey of the Census Bureau. 14

Voter turnout at the state level in 2004 varied based on voter identification requirements. An average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. Other factors, of course, also influence turnout. Taking those other factors into account in the county-level analysis makes the effect of the voter ID requirement less dramatic. But the analysis still offers some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines. The effect is particularly noticeable in counties with concentrations of Hispanic residents or of people living below the poverty line.

The individual-level analysis, based on the CPS, produced a similar result. Voter identification requirements exert a statistically significant, negative effect on whether survey respondents said they had voted in 2004. The probability that a respondent to the survey voted dropped with each level of voter identification requirement, with a total drop of 2.5 percent across the five types of identification.

Future policy decisions should consider the tradeoffs between the incidence of vote fraud that can be prevented by stricter voter ID requirements and the number of eligible voters who will be kept from the polls by those stricter ID requirements. Continuing research is needed to provide the information to inform this calculation of benefits and costs.

14 See Appendix ___ for the full report on voter ID and turnout.
Methods and Findings

We classified each state as having one of five types of identification requirements in place on Election Day 2004. Upon arrival at polling places, voters had to either: state their names (9 states); sign their names (13 states and the District of Columbia); match their signature to a signature on file with the local election board (8 states); provide a form of identification that did not necessarily include a photo (15 states); or provide a photo identification (5 states). We then tested the assumption that voter identification requirements would prove to be increasingly demanding on the voter, with providing photo ID the most rigorous.

The analysis recognized that election laws in numerous states offer exceptions to these requirements if a prospective voter lacked the ID. Laws in those states set a minimum standard that a voter must meet in order to vote using a regular ballot. We therefore also categorized states based on the minimum requirement for voting with a regular ballot. None of the states required photo identification as a minimum standard for voting with a regular ballot. Four states, however, required voters to swear an affidavit as to their identity (Florida, Indiana, Louisiana, and North Dakota). The five categories for minimum requirements were: state name (12 states), sign name (14 states and the District of Columbia), match one's signature to a signature on file (six states), provide a non-photo identification (14 states), or swear an affidavit (four states). This analysis treats the array of minimum identification requirements also in terms of increasing demand on the voter: state name, sign name, match signature, provide non-photo identification, and, given the potential legal consequences for providing false information, swearing an affidavit is regarded as the most rigorous.

Voter turnout at the state level in 2004 declined as voter identification requirements became more demanding, as shown in Table 2. While the trend is not perfectly linear, there is a general movement toward lower turnout as requirements tend toward requiring greater levels of proof. Using the maximum requirements as the independent variable, an average of 63.1 percent of the voting age population turned out in states that required voters to state their names, compared to 57.3 percent in states that required photo identification. A similar trend emerged when using the minimum requirements as the independent variable. Sixty-one percent of the voting age population turned out in states requiring voters to state their names, compared to 58.7 percent in states that required an affidavit from voters.

Voter identification requirements alone do not determine voter turnout. Other influences – demographic or political – also affect voter participation. Multivariate models that take into account other predictors can place the effects of voter identification in a more accurate context. The multivariate analysis included whether the county was in a presidential battleground state or a state with a competitive race for governor or the U.S. Senate. Demographic variables included the percentage of the voting-age population in each county that was Hispanic or African-American, the percentage of county residents age 65 and older, and the percentage of the county population living below the poverty line. The dependent variable in each model was voter turnout at the county level, with turnout calculated as the percentage of the voting-age population that voted in the 2004 election.

The aggregate analysis for the maximum identification requirements revealed a small and negative effect on turnout in 2004 controlling for electoral context and demographic factors. If the state was a battleground voter turnout increased. As the percentage of senior citizens in the county increased, so did turnout. The percentage of African-Americans in the county had no effect, but the percentage of Hispanic adults reduced voter turnout, as did the percentage of individuals living below the poverty line. In general, analysis of the aggregate data at the county level provides some support for the hypothesis that as the burden of voter identification requirements increases, turnout declines, at least in the case of the maximum requirements. The decline in turnout is particularly noticeable in counties with concentrations of Hispanic residents or individuals who live below the poverty line. Determining if the reduction in turnout is, in fact, among the Hispanic or poor residents of those counties requires further research at the individual level.
Information collected for the Census Bureau Current Population Survey in November 2004 makes it possible to examine the influence of voter ID requirements at the individual level. Self-identified registered voters reported their experience at the polls in the survey. Note that the voter turnout rate for the CPS sample, an average of 89%, is much higher than the turnout rates presented in the aggregate data analysis, which average 58%. The difference is a result of several factors, including different denominators in calculating the turnout rate – self-reported registered voters in the CPS versus the much larger voting-age population for the aggregate data. Also some survey respondents overstate their incidence of voting. Nevertheless, the CPS serves as a widely accepted source of data on voting behavior.

The dependent variable in the individual analyses is whether respondents said they voted in the 2004 election. As in the aggregate analysis the contextual variables consist of whether the state was a battleground state or had competitive state-level races. The analysis also controlled for gender, age, education, household income, race or ethnicity, and employment status, marital status, and residential mobility.

The analysis revealed that voter identification requirements exerted a statistically significant, negative effect on whether survey respondents said they had voted in 2004. Of the other state factors, only the competitiveness of the presidential race had a significant effect on turnout. In terms of demographic influences, consistent with previous research, age, education, income, and marital status all were positive predictors of voting. Women also were more likely to say they voted than men. Those who had moved within six months before the interview were less likely to say they had voted.

Allowing the voter identification requirement to vary while holding constant all other variables in the model showed that the predicted probability of turnout ranged from 91.2 percent if all voters had to state their names to 88.7 percent if all voters had to provide photo identification. (Note that these turnout figures are higher than actual because of the factors involved in the CPS's self-reported survey, but that the difference in effect is reasonably related to the results obtained in the aggregate analysis.) In other words, the probability of voting dropped with each level of the maximum voter identification requirement, with a total drop of 2.5 percent across the five types of identification. When taking into account the minimum requirement for identification, the probability showed a similar decline, with a slightly larger total drop of 3.3 percent.
Both the maximum and minimum identification requirements had negative and statistically significant effects for white voters. Allowing the requirements to vary from stating one's name to providing photo identification or an affidavit showed drops of 2.5 percent and 3.3 percent respectively in the predicted probability of voting. The identification requirements had no effect on the probability of African-Americans voting, but the minimum identification requirements had a comparatively sizable effect on voter turnout among Hispanics. The predicted probability of Hispanics voting ranged from 87 percent if stating one's name would be the required form of identification to 77.3 percent if a voter would have to provide an affidavit in order to vote, a difference of 9.7 percent. Variation also emerged along the lines of income, with the effects of voter identification requirements varying to a greater extent for voters in households below the poverty line compared to those living above the poverty line.

Registered voters who had less than a high school education had a 77.5 percent probability of voting if the maximum requirement would be stating one's name, and a 70.8 percent probability if they would have to provide photo identification under the maximum requirement, a difference of 6.7 percent. The range of effects of voter identification requirements was smaller among those with higher levels of education (and non-existent for one category – voters with some college education).

Discussion and Conclusions of the Analysis
The results give evidence that tougher voter identification requirements are associated with a decline in voter participation. The overall effect for all registered voters was fairly small, but even a slight decline in turnout has the potential to alter the outcome of a close election. The decline is apparent in both the aggregate data and the individual-level data, although not always for both the maximum and minimum sets of requirements.

- Hispanic voters and the poor appear to be less likely to vote if the level of required identification becomes more demanding, according to both the aggregate and the individual-level data. In the individual-level data, for Hispanic voters, the probability of voting dropped by 9.7 percent across the various levels of minimum identification requirements. Survey respondents living in poor households would be 5.3 percent less likely to vote as the requirements vary from stating one's name to attesting to one's identity in an affidavit.
• Self-reported registered voters who had not graduated from high school would be 6.7 percent less likely to vote if the maximum requirement is photo identification as opposed to stating one's name. When considering the minimum requirements, those with less than a high school education would be 7.4 percent less likely to say they voted if the requirement was an affidavit as opposed to stating one's name.

• Age was also a key factor, with voters ages 18 to 24 being 7.7 percent to 8.9 percent less likely to vote as the requirements ranged from stating one's name to providing a photo identification or affidavit.

• Two concerns aired by critics of voter identification requirements were not borne out by the results. African-American voters did not appear to be affected by voter identification requirements, according to both the aggregate data and individual-level data analyses. Also, the self-reports of elderly voters, while indicating that they would be slightly less likely to vote as ID requirements become stricter, do not show a dramatic effect.

The data examined in this analysis could not capture the dynamics of how identification requirements lower turnout. Do know the voter ID and stay away from the polls because they cannot or do not want to meet them? Or, do the requirements result in some voters being turned away when they cannot meet the requirements on Election Day? The CPS data do not include measures that can answer these questions, pointing up the need for collection of additional data. Knowing more about the "on the ground" experiences of voters concerning identification requirements could guide policy-makers at the state and local level in determining whether and at what point in the electoral cycle a concerted public information campaign might be most effective in helping voters to meet identification requirements. Such knowledge also could help in designing training for poll workers to handle questions about, and potential disputes over, voter identification requirements.

It is important to note that the 2004 data do not allow us to draw conclusions about the effect of laws such as those recently passed in Georgia and Indiana, which require government-issued photo ID. No such laws were in place in 2004, and the five states that then required photo ID at the time allowed voters who signed an affidavit or provided another form of identification to cast a regular ballot.
Litigation Over Voter ID Requirements

A handful of cases have challenged identification requirements in court in recent years. In general, requirements that voters provide some identifying documentation have been upheld, where photo ID is not the only acceptable form. Whether laws requiring photo ID will be upheld is more doubtful. To date, only one court has considered a law requiring voters to show photo ID (Common Cause v. Billups), and that court concluded that this requirement is likely unconstitutional. Cases challenging the mandatory disclosure of voters' Social Security numbers on privacy grounds have yielded mixed results.

Non-photo identification. For the most part, courts have looked favorably on requirements that voters present some form of identifying documents if the photo identification is not the only form accepted. In Colorado Common Cause v. Davidson, No. 04CV7709, 2004 WL 2360485, at *1 (Colo. Dist. Ct. Oct. 18, 2004), plaintiffs challenged a law requiring all in-person voters to show identification (not just first-time registrants). The court upheld this requirement against a constitutional challenge. Similarly, in League of Women Voters v. Blackwell, 340 F. Supp. 2d 823 (N.D. Ohio 2004), the court rejected a challenge to an Ohio directive requiring first-time voters who registered by mail to provide one of the HAVA-permitted forms of identification, in order to have their provisional ballots counted. Specifically, the directive provided that their provisional ballots would be counted if the voter (a) orally recited his driver's license number or the last four digits of his social security number or (b) returned to the polling place before it closed with some acceptable identification (including reciting those identification numbers). Id. This was found to be consistent with HAVA.

Photo ID. Since the 2004 election, two states have adopted laws requiring photo identification in order to have one's vote counted, without an affidavit exception: Georgia and Indiana. Both these requirements were enacted in 2005 and both have been challenged in court. The Georgia law required voters attempting to cast a ballot in person present a valid form of photographic identification. O.C.G.A. § 21-2-417. On October 18, 2005, the District Court granted the Plaintiff's motion for a preliminary injunction, enjoining the application of the new identification requirements on constitutional grounds. In granting the injunction, the court held that plaintiffs' claims under both the Fourteenth Amendment (equal protection) and Twenty-Fourth Amendment (poll tax) had a substantial likelihood of succeeding on the merits at trial (Common Cause v. Billups,
Prelim. Inj. 96, 104). In January 2006, Georgia enacted a modified version of its photo ID law, which the court has not yet ruled on. In the other state that has enacted a photo ID requirement without an affidavit exception (Indiana), legal challenges have also been filed. (Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board). Cross-motions for summary judgment are currently pending. Another case of significance, for purposes of photo ID requirements, is American Civil Liberties Union of Minnesota v. Kiffmeyer, No. 04-CV-4653, 2004 WL 2428690, at *1 (D. Minn. Oct. 28, 2004). In that case, the court enjoined a Minnesota law that allowed the use of tribal photo ID cards, only for an Indian who lived on the reservation. 2004 WL 2428690, at *1. The Court found no rational basis for distinguishing based on whether or not the cardholder lives on the reservation. Id. at *1, 3. The court’s decision in this case indicates that courts are likely to look strictly on photo ID requirements.

Privacy. In Greidingerv. Davis, 988 F.2d 1344 (4th Cir. 1993), the court struck down on due process grounds a Virginia law requiring disclosure of voters’ social security numbers for voter registration. The social security numbers recorded in voter registration lists had been disclosed to the public and political parties that had requested the lists. The court found that the requirement to give the social security number effectively conditioned rights on the consent to an invasion of privacy. It concluded that this public disclosure of the social security numbers was not necessary to achieve the government’s interest in preventing fraud. On the other hand, in McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000), the court rejected privacy challenges based on both the Constitution and federal statutes, to a Tennessee law requiring social security numbers for voter registration since 1972. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. The distinction appears to be between the use of Social Security numbers for internal purposes only, which was deemed permissible, and the disclosure of those numbers to the public which was not.

These decisions suggest that the courts will look strictly at requirements that voters produce a photo ID in order to cast a regular ballot. The courts have used a balancing test to weigh the legitimate interest in preventing election fraud against the citizen’s right to privacy (protecting social security numbers from public disclosure, for example) and the reasonableness of requirements for identity documents. To provide both the clarity and certainty in administration of elections needed to forestall destabilizing challenges to outcomes, these early decisions
suggest that best practice may be to limit requirements for voter identification to the minimum needed to prevent duplicate registration and ensure eligibility.

Developments since 2004
Since the passage of HAVA, with its limited requirements for voter identification, and following the 2004 election, debate over voter ID has taken place in state legislatures across the country. That debate has not been characterized by solid information on the consequences of tightening requirements for voters to identify themselves before being permitted to cast a regular, rather than a provisional, ballot.

Better information might improve the quality of the debate. Answers to the following key questions are not available in a form that might satisfy those on both sides of the argument.

• What is the overall incidence of vote fraud?
• How does fraud take place in the various stages of the process: registration, voting at the polls, absentee voting, or ballot counting?
• What contribution can tighter requirements for voter ID make to reducing vote fraud?
• What would be the other consequences of increasingly demanding requirements for voters to identify themselves? This is the question addressed, within the limits of the available data, in the analysis in this report.

Answering these questions would provide the information needed for more informed judgment in the states as they consider the tradeoffs among the competing goals of ballot integrity, ballot access, and administrative efficiency. The Carter-Baker Commission recognized the tradeoffs when it tied recommendation for national ID to an affirmative effort by government to identify unregistered voters and make it easy for them to register.

State Voter Databases and Voter ID
With the implementation of the HAVA Computerized Statewide Voter Registration List, an application for voter registration for an election for Federal office may not be accepted or processed unless the application includes a driver's license number or last four digits of the Social Security number on the voter registration form. This information can be used to verify the identity of the registrant through interfacing with lists maintained by the Motor Vehicle office and Social Security office. If registrants do not have either a driver's license or Social Security number, the State will assign a unique identifier number to that person.
HAVA does not require that the states notify registrants to remedy any failure to provide either of these numbers or to confirm that they have provided a verifiable number. Verification at the time of registration could forestall difficulties at the polling place. HAVA is silent on how the ID might be required at the polling place for new voters whose driving license or Social Security number could not be verified. Errors in recording those numbers are sure to occur.

Some states are wrestling now with these unresolved issues. In New Jersey, for example, pending legislation would require that voters must be able to confirm their registration through a secure access to the SVRL. It also requires voters to present ID at the polls in order to cast a regular ballot if the numbers recorded on the registration have not been verified (or if no verifiable number appears on the registration). It recognizes the HAVA requirement that if the number provided by the voter has not been verified and if the voter does not present ID at the polls, that voter may cast a provisional ballot. The bill does not specify they have to provide ID within 48 hours in order for their vote to count, as is the case with first-time mail-in registrants.

As some states gain experience in this area, the EAC would perform a useful service by making timely recommendations of best practices for all states to consider.

6. Conclusions
The form of Voter ID required of voters affects turnout. Lack of ID can keep voters from the polls. Or, when they go to the polls, it is reasonable to conclude that stricter Voter ID requirements will divert more voters into the line for provisional ballots. (This conclusion is a conjecture because we lack good data on why voters must cast their ballots provisionally.) The result can be longer lines at the polls and confusion, without a clear demonstration that the security of the ballot is correspondingly increased. 15

The dynamics of Voter ID requirements—how the more rigorous Voter ID requirements—affect the decision by potential voters to go or stay away from the polls are not well understood. This lack of understanding should be recognized in the policy process. The debate over voter ID in

15 In this connection, the Brennan Center’s response to the Carter-Baker Commission report observes that, “while it might be true that in a close election “a small amount of fraud could make the margin of difference,” it is equally true that the rejection of a much larger number of eligible voters could make a much bigger difference in the outcome.” Response to the Report of the 2005 Commission on Federal Election Reform, The Brennan Center for Justice at NYU School of Law and Spencer Overton, On Behalf Of The National Network on State Election Reform, September 19, 2005
the states would be improved by additional research sponsored by the EAC. So far as it may be necessary to reduce vote fraud made possible by inadequate voter ID, the research could identify methods to eliminate the need for voters to bring specific identity documents with them to the polls while assuring that each voter who casts a ballot is eligible and votes only once. One way to break the connection between the benefits of photo ID and the need for the voter to bring identification to the polling place, as recommended elsewhere by one of the authors of this report, Edward Foley: keep the information to verify a voter's identity in the records at the polling place. Other approaches could be developed.  

16 "A potential solution to this problem is to break the connection with the photo requirement and the obligation to produce identification at the polls. Eligible citizens could be required to provide a photograph at the time they register to vote, and poll workers would match this photograph with the image of the person standing in front of them. Given the availability of digital photography, the photos of registered voters could be stored in electronic poll books and easily "pulled up" with a click of a computer mouse when voters sign in to vote... Of course, to satisfy the concerns of liberals, a requirement to provide a digital photograph at time of registration would have to address the cost and accessibility issues identified earlier."

APPENDIX – Court Decisions and Literature on Voter Identification and Related Issues

Court Decisions

Summary of Relevant Cases:
Challenges Prevailed:
American Civil Liberties Union of Minnesota v. Kiffmeyer, 2004
- Action for temporary restraining order – granted
- Statute: allowed use of tribal identification cards w/ name, address & photo as a valid identification to register to vote only if the voter lives on the reservation to "complete" a mail-in application (which only affected about 600 voters w/ incomplete applications)
- Claim -14th Amendment EPC: likely to prevail, no rational basis for a distinction between Indians residing on reservations and those not
- Statute: may use certain forms of photo identification lacking address together with a utility bill but not tribal identification cards
- Claim -14th Amendment EPC: likely to prevail

Greidinger v. Davis, 1993
- Statute: mandated disclosure of SS # as a precondition to voter registration (rationale was voter identification, but the numbers were rarely used to verify identity & were disclosed in voter lists to both political parties and the public upon request)
- Claims:
  - 14th Amendment EPC: no classification (applied strict scrutiny)
  - Substantive due process: law invalid; found that the statute conditioned the fundamental right to vote on the consent to an invasion of privacy; this was found to be a substantial burden (applied strict scrutiny)
    - Compelling interests: preventing voter fraud (deemed compelling)
    - Necessary: fails, preventing voter fraud when allowing names for inspection could be achieved by supplying addresses and DOBs or use of voter registration numbers
    - HOWEVER: Court also made it clear that if the registration scheme kept the SS# for internal use only – it would be valid

Challenges Rejected:
- Sec. of State Directive: provisional ballots issued if first-time voter, who registered by mail and did not provide ID, cannot produce proper ID at the polls AND that the provisional ballot will only be counted if the voter returns to the poll before it closes w/ ID or can recite SS# or DL#
- Claims – Supremacy Clause & HAVA: ruled that HAVA did not specify how the first-time voters' identifications should be verified and this method was not unreasonable or too burdensome

Colorado Common Clause v. Davidson, 2004
- Statute: required all voters to show ID (most types permitted) before voting
- Claims:
  - HAVA: ruled that HAVA did not preempt more strict state laws & allowed States to be more strict as long as consistent with the purpose of HAVA (both HAVA & CO provisions' purposes were to prevent voter fraud)
  - Substantive due process and equal protection
    - No improper discrimination
Final Draft

- Preventing voter fraud is a compelling interest since it is irreversible once vote is cast
- Only marginally more intrusive than HAVA, many types of identification permitted – thus, valid

**McKay v. Thompson, 2000**
- Statute: mandated disclosure of SS # as a precondition to voter registration
- Claims:
  - Privacy Act, Section 7: ruled that Tennessee voter system exempt from Privacy Act because it is pre-75
  - NVRA, permitting only min. amt. of info. necessary to prevent duplicate registration and determine eligibility: ruled that NVRA does not specifically forbid the use of SS#s & the Privacy Act specifically permits them pre-75
  - Substantive due process: ruled that internal use of SS# not a burden
  - Free Exercise, based on Bible’s supposed prohibition on use of universal identifiers: ruled that law is generally applicable and thus valid
  - P&I, Article IV: does not protect in-state citizens
  - P&I, 14th Amend.: no protection for privilege where Congress authorized its infringement

**Kemp v. Tucker, 1975**
- Statute: required name, occupation, address, sex, race, height, hair color, eye color, and date of birth be listed on voter registration card for identification purposes
- Claims:
  - VRA: ruled that race was not made a “qualification” for voting
  - 15th Amendment: ruled that it did not abridge right to vote on account of race because rejection of application was due to failure to provide information, not race; race only one factor in identification
  - 14th Amendment EPC: ruled there was no distinction among voters

**Perez v. Rhiddlehoover, 1966**
- Statute: date of birth, place of birth, mother’s first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration for identification
- Claims:
  - VRA: ruled that it was not a “test or device” because it applied equally
  - 15th Amendment: same reasons

**Cases in Which the Plaintiffs Have Prevailed in Challenging the Statute Requiring Voter Identification:**

This was an action just before the November 2004 election for a temporary restraining order, which was granted. The ACLU challenged a Minnesota law allowing the use of tribal identification cards with the name, address, and photograph as a valid identification (equal to a driver’s license) for use in “completing” an incomplete mail-in voter registration only if the Indian lives on the reservation. 2004 WL 2428690, at *1. The Court ruled that this distinction would likely violate the Equal Protection Clause because there was no rational basis for differentiating
between the validity of the identification based on whether or not the cardholder lives on the reservation. *Id.* at *1, 3.

Secondly, the ACLU challenged a second statute which allowed the use of certain photo identification lacking the voter's address to be used together with a utility bill or bank statement as valid identification for registration. *Id.* at *3. The statute did not, however, permit using a tribal identification for this same purpose. *Id.* The Court ruled that this likely violated the equal protection clause as well. *Id.*

**Greidinger v. Davis, 988 F.2d 1344 (4th Cir. 1993).**

This case challenged a Virginia law requiring the social security number for voter registration, which the State subsequently disclosed to the public and political parties upon request in voter registration lists, which included the social security numbers. Failure to provide the social security number resulted in the denial of the registration application. The law was challenged under the Equal Protection Clause and under substantive due process. The Court quickly rejected the equal protection challenge because the law made no classification. *988 F.2d at 1350.*

The law was invalidated under substantive due process. *Id.* at 1355. The Court found that the statutory scheme conditioned the fundamental right to vote on the consent to an invasion of privacy, based on concerns of identity theft. *Id.* at 1353-54. The Court found this to be a substantial burden on the right to vote. *Id.* at 1354. The Court recognized that the government's interest in preventing voter fraud was compelling. *Id.* However, the Court found that disclosure of the information to the public and political parties was not necessary to achieve that interest. *Id.* Disclosure of addresses or dates of birth would be sufficient to aid the public in distinguishing between two voters with the same name. *Id.* at 1355. The Court did state that required disclosure of the social security number for internal use only would be valid. *Id.* at 1354 n.10.

**Cases in Which the Statute or Practice of Voter Identification Has Been Upheld:**

The League of Women Voters challenged the Secretary of State's directive that provisional ballots should be issued to all first-time voters who registered by mail without providing identification who cannot show proper identification at the polls. 340 F. Supp. 2d at 828. The Directive also stated that the provisional ballots would only be counted if the voter orally recited his driver's license number or the last four digits of his social security number or returned to the polling place before it closed with some acceptable identification, including reciting those identification numbers. *Id.* The Court stated that HAVA only requires verification of eligibility of first time voters registering by mail; it does not say how that should be done. *Id.* at 831. The Court found the burden on the right to vote to be slight. *Id.* The Directive was found valid under HAVA and the Supremacy Clause because the number of uncounted votes would be small, the requirement was reasonable, and there was adequate notice of the requirement on the registration forms. *Id.* at 829-30.

In this case, the validity of three Colorado statutory provisions was challenged. The laws (1) required all in-person voters to show identification (not just first-time registrants); (2) provided that votes cast in the wrong precinct would not be counted; and (3) provided that
provisional ballots would not be counted if the voter applied for an absentee ballot. 2004 WL 2360485, at *1. The plaintiffs also challenged the provisions under HAVA. The identification provision allowed nearly all forms of acceptable identification under HAVA. Id. at *6.

The challenge to the identification requirement failed under both challenges. The Court interpreted HAVA as not intended to preempt state laws and as permitting states to be more strict than, but not inconsistent with, HAVA. Id. at *10. The Court felt that the purpose of both laws was the same, to reduce voter fraud, and thus, both laws could coexist. As to the Constitutional claim, both equal protection and substantive due process, the Court felt that preventing voter fraud, which is impossible to remedy once a vote is cast, is a compelling interest, and the Court also felt that a voter identification requirement for all voters, with many types of acceptable identification, was only marginally more intrusive than HAVA. Id. at 12. The Court also found no improper discrimination between voters. Id. Thus, the provision was upheld.

McKay v. Thompson, 226 F.3d 752 (6th Cir. 2000).

The Sixth Circuit ruled that the Privacy Act, the National Voter Registration Act, Substantive Due Process, the Privileges and Immunities Clauses (Fourteenth Amendment & Article IV), and the First Amendment right to free exercise do not prohibit requiring disclosure of social security numbers as a precondition to voter registration.

The Privacy Act, Section 7, mandates that it is unlawful for a government to deny a right or privilege because of a citizen's refusal to disclose his social security number, unless the disclosure was required for a system established prior to 1975. 226 F.3d at 755 (citing Privacy Act of 1974, Pub. L. No. 93-579 (1974)). Since Tennessee required social security numbers for voter registration since 1972, his challenge was rejected. 226 F.3d at 755. Second, the NVRA only permits requiring the minimum amount of information necessary to prevent duplicate voter registration and to determine eligibility. Id. at 755-56 (citing 42 U.S.C. §1973gg-3(c)(2)(B)). The Court rejected this challenge because the NVRA does not specifically forbid the use of social security numbers, and the Privacy Act, a more specific statute, grandfathered their use if prior to 1975. 226 F.3d at 756.

Finally, the plaintiff's constitutional claims were all rejected. His substantive due process claim was rejected because internal receipt and use of social security numbers does not burden the fundamental right to vote. Id. The free exercise challenge, based on the Bible's supposed prohibition of universal identifiers, was rejected because the law was generally applicable and not directed at particular religious practices. Id. The Privileges and Immunities Clause claim was rejected because the Clause does not apply to citizens of the state. Id. The Fourteenth Amendment Privileges and Immunities claim, based on the right to vote as unique to U.S. citizenship, was rejected because the Clause provides no protection where Congress has authorized the infringement. Id.

A statute was upheld, which required name, occupation, address, sex, race, height, hair color, eye color, and date of birth to be recorded on the voter registration card and allowed registration officials to reject an incomplete application. 396 F. Supp. at 738. Claims were alleged under the Fourteenth Amendment's Equal Protection Clause, the Fifteenth Amendment, and the Voting Rights Act.

As to the Fourteenth and Fifteenth Amendment claims, the Court reasoned that preventing voter fraud is a compelling goal, and identification provisions are "an essential means of achieving the goal." Id. at 739. The Court also rejected the equal protection claim because the statutes did not create a distinction at all. Id. at 740 n.3. Since race is just one of
several characteristics required, the Court found that it was intended for preventing voter fraud, not some other motive. *Id.* at 740. As to the VRA, the Court rejected the claim that it added race as a qualification for voting as frivolous. *Id.* As to a Fifteenth Amendment claim that it abridged the right to vote on account of race, the Court also made a distinction between rejecting a voter application because of race and rejecting an application because of failure to answer all relevant questions to assist in preventing voter fraud. *Id.* The statute was upheld.

*Perez v. Rhiddlehoover, 186 So. 2d 686 (La. Ct. App. 1966).*

A voter registration requirement was challenged and upheld. The statute stated that date of birth, place of birth, mother's first or maiden name, color of eyes, sex, race, occupation, and whether owner, tenant or boarder must appear on the registration. 186 So.2d at 690. This information was required for identification of voters, especially when voters had the same name, to prevent duplicate voting. It was challenged under the Voting Rights Act of 1965 Section 4(a) which prohibits denying the right to vote for failure to comply with a "test or device." The Court felt that this requirement was not a test or device for discrimination because it applied equally. *Id.* at 691. The Court also determined that it was not in conflict with the Fifteenth Amendment either. *Id.*

*Friendly House, et al. v. Janet Napolitano et al., CV 04-649 TUC DCB*

On November 30, 2004, the Mexican American Legal Defense and Educational Fund (MALDEF) filed suit seeking to halt the implementation of Proposition 200. Proposition 200 created a number of legal requirements to ensure that public benefits are not available to illegal immigrants. In particular, Proposition 200 requires that a person attempting to register to vote provide one of six specific forms of proof of United States citizenship. Compl. 12-13. Also, any person attempting to vote must present either one form of photo identification or two forms of non-photo identification. *Id.* at 13.

The lawsuit alleges two violations that directly relate to the voting identification restrictions. First, the lawsuit alleges a violation of the Twenty-Fourth and Fourteenth amendments in that a voter must pay a poll tax by spending money to purchase the required identification. *Id.* at 20. Second, the lawsuit alleges violation of the Voting Rights Act. *Id.* at 21. The lawsuit was recently dismissed by the 9th Circuit Court of Appeals for a lack of standing. The Circuit Court found that there was no injury-in-fact, meaning that once an injury occurs the suit will likely be refiled. Additionally, it should be noted that the voter identification issue is only a part of the lawsuit, and much of the focus has been on other aspects of Proposition 200.

**Current Litigation Concerning Voter ID Issues**

Litigation is filled with uncertainty. Litigation stemming from newly passed voter identification requirements will continue into the foreseeable future. Lawsuits are currently pending over voter identification requirements in Georgia and Indiana. Other states, such as Ohio, are considering new identification requirements that could lead to further litigation. The Georgia lawsuit has already succeeded in getting a preliminary injunction against the law in question, which will likely galvanize interested parties in other states to pursue similar litigation. Of course, if the injunction is eventually overturned at the appellate level it could have a similar chilling affect on future litigation.

This summary major litigation pending in Georgia and Indiana includes a brief assessment of the likelihood of success:

---

17 As of January 2, 2006
Georgia (Common Cause/Georgia v. Billups):

On September 19, 2005, Common Cause of Georgia, in conjunction with several other non-profit organizations, filed suit in Federal District Court against the Georgia Secretary of State and other election officials, challenging the constitutionality of Georgia’s new voter identification requirements. The new law requires all voters attempting to cast a ballot in person to present a valid form of photographic identification. O.C.G.A. § 21-2-417. A voter that is unable to provide proper identification is given a provisional ballot. However, that provisional ballot will be counted only if the voter is able to subsequently present valid identification within two days of the election. Id.

The lawsuit alleges five separate violations of state and federal law. First, the complaint alleges that the identification requirements infringe on the right to vote guaranteed in the Georgia constitution (Compl. 32). In addition, the Plaintiffs claim violations of the Federal Civil Rights Act and Voting Rights Act. (Compl. 36,38). Finally, the lawsuit alleges violations of the Fourteenth and Twenty-Fourth amendments to the U.S. Constitution. The complaint claims that the ID requirements constitute an “undue burden” on the right to vote, in violation of the Equal Protection Clause of the Fourteenth Amendment (Compl. 34). The ID requirement does not apply to most absentee voters, and thus the requirement is also over-broad and not narrowly tailored to address the stated purpose of preventing voter fraud (Compl. 34). The complaint further alleges that the cost of obtaining a photo ID constitutes a poll tax, in violation of the Twenty-Fourth Amendment, and that the cost is also a violation of the Fourteenth Amendment because it applies to voters who choose to vote in person, and not to those who vote absentee (Compl. 34,35).

On October 18, 2005, the District Court granted the Plaintiff’s motion for a preliminary injunction, enjoining the application of the new identification requirements. In granting the injunction, the court held that both federal constitutional claims had a substantial likelihood of succeeding on the merits at trial (Prelim. Inj. 96, 104). The court also held that, while the two federal statutory claims were plausible, they both lacked sufficient evidence at the time to have a substantial likelihood of success. (Prelim. Inj. 109,111,116). Finally, the court held that the Georgia constitutional claim would be barred by the Eleventh Amendment to the U.S. Constitution. (Prelim. Inj. 77).

The Defendants appealed the motion for preliminary injunction to the Eleventh Circuit, and oral argument is scheduled for March 1, 2006. In addition, some news reports have claimed that the Georgia legislature is considering re-visiting the ID requirements in light of the ongoing litigation. As for the merits, in granting the preliminary injunction the District Court has already signaled its belief that the federal constitutional claims are likely meritorious. The Eleventh Circuit may have a different view, but for now the case looks to have a reasonable chance of success.

Indiana (Indiana Democratic Party v. Rokita and Crawford v. Marion County Election Board):

The Indiana lawsuit is similar to its Georgia counterpart in content, though not in status. In Indiana separate lawsuits, now joined, were filed by the state Democratic Party and the

---

18 Litigation documents are available at the Election Law @ Moritz website. http://moritzlaw.osu.edu/electionlaw/litigation/index.php
Indiana Civil Liberties Union (ICLU). The Democratic Party's lawsuit is directed against the Indiana Secretary of State, while the ICLU's lawsuit involves the Marion County Board of Elections and the State of Indiana. Like Georgia, Indiana law also requires citizens voting in person to present some form of official photo identification. IC § 3-11-8-25.1. Voters unable to present identification are given a provisional ballot, which is counted if they are able to provide the required identification by Noon on the second Monday following the election. IC § 3-11.7-5-1. Unlike Georgia, Indiana provides state issued identification at no charge. However, there are costs involved in the process, including transportation to the Bureau of Motor Vehicles, and payment for documents such as birth certificates, which are needed to obtain the ID. (Second Am. Compl. 6).

The Democratic Party’s complaint raises Fourteenth Amendment claims similar to those in the Georgia lawsuit, including concerns about substantially burdening the right to vote, the enactment of a de-facto poll tax from the costs indirectly associated with obtaining ID, and the lack of applicability to voters who cast an absentee ballot. (Second Am. Compl. 6-9). In addition, the complaint alleges that the substantial burden placed on the right to vote violates the First Amendment protection of expressive or symbolic speech, as well as the freedom of association as applied to Democratic primary elections. (Second Am. Compl. 9-10). Finally, the complaint alleges violations of the Voting Rights Act, National Voter Registration Act, and the Help America Vote Act (Second Am. Compl. 10-11). The ICLU's complaint alleges many of the same violations, but also includes claims of a violation of Indiana's constitutional guarantee of a free and equal election system. (Compl. 15).

The case is currently in the pre-trial phase, with both sides awaiting decisions on their respective motions for summary judgment. The likelihood of success is bolstered by the fact that the Fourteenth amendment constitutional claims have already been found persuasive by at least one other Federal District Court. However, the Indiana law is notably different than its Georgia counterpart in that it provides free identification. While the plaintiffs make a solid argument that related costs still amount to a poll-tax, it is possible that the court could distinguish on this matter.

Unlike the Georgia case, the Indiana lawsuit also claims a violation of the Help America Vote Act. Although the claim is not completely clear, it seems as though the Plaintiffs are arguing that the Indiana statute requires more stringent identification than what is required by HAVA. 42 U.S.C. § 15483(b)(1)-(2). While this is true, it is unclear how this violates the statute. HAVA merely states that certain voters unable to produce HAVA required identification be given a provisional ballot. Id. Indiana law meets this requirement. IC § 3-11-8-25.1. Although Indiana law requires more stringent identification for counting the provisional ballot, HAVA leaves those decisions to state law. 42 U.S.C. § 15482(a).

According to an AP article, the Plaintiffs filed some type of brief on December 21—however it is not yet up on the Moritz website and I am unsure how to access it otherwise.

October 17, 2006

Ms. Wendy R. Weiser
Deputy Director, Democracy Program
Brennan Center for Justice at NYU School of Law
161 Avenue of the Americas, 12th Floor
New York, NY 10013

Dear Ms. Weiser:

Thank you for your request for information regarding U.S. Election Assistance Commission (EAC) research projects on voter fraud and voter intimidation, provisional ballots and voter identification.

The status report on voter fraud and voter intimidation, prepared by EAC staff, and the draft report on provisional voting, prepared by the Eagleton Institute of Politics and the Moritz College of Law, are enclosed. EAC personnel are in the process of drafting a report about voter identification. The report will be made available upon completion.

Status documents about voter fraud and voter intimidation and provisional voting were presented to the EAC’s Standards Board and Board of Advisors at a public meeting held in May 2006. Neither of these documents were final EAC reports. Per the Help America Vote Act (HAVA), the EAC works with its advisory boards to gather input on activities, including research projects. After discussing the provisional voting research with our advisory boards, they requested further research and clarification and noted that some of information was inaccurate or incomplete. Please see the attached resolutions passed by both entities outlining their concerns. As such, EAC is currently reviewing the draft report on provisional voting to address the concerns of the agency’s advisory boards.

As a small agency of only 23 employees, including four commissioners, it is necessary for EAC to contract with third parties and experts to conduct research. The information provided by third parties is used by staff to develop EAC final policy or reports. No documents, drafts or third party recommendations submitted to EAC constitute official EAC policy or opinion and should not be identified or referred to as such.

Please note that our Standards Board and Advisory Board meetings are open to the public and are publicized on the EAC website at www.eac.gov and posted in the Federal Register.

Thank you for your interest, and let us know if we can be of further assistance.

Sincerely,

Tom Wilkey
Executive Director
Attached is sent to you at the request of Executive Director, Thomas R. Wilkey.

FOIA File
FOIA REQUEST

Dear Mr. John Vergelli:

Pursuant to the federal Freedom of Information Act, 5 U.S.C. § 552, on behalf of the Electronic Privacy Information Center, I request access to and copies of all agency records of complaints and agency responses regarding electronic voting, direct recording electronic (DRE) devices used to count voting ballots, touch screen voting machines, and optical scanners. I also request access to and copies of all agency records of complaints and agency responses regarding voting ballot counting software from September 2000 to the present. Additionally, I request access to and copies of all agency records of communications between the agency and any other party discussing or interpreting Help America Vote Act of 2002, Section 301(a)(2)(B); 42 U.S.C. §15481(a)(2) (B).

Please redact any personal information incidentally submitted in conjunction with any complaint.

For purposes of fee assessments, we request that EPIC be placed in the category of "news media" requester EPIC is a non-profit, educational organization that routinely and systematically disseminates information to the public. This is accomplished through several means. First, EPIC maintains a heavily visited Web site (www.epic.org) that highlights the "latest news" concerning privacy and civil liberties issues. The site also features scanned images of documents EPIC obtains under the FOIA. Second, EPIC publishes a bi-weekly electronic newsletter that is distributed to over 15,000 readers, many of who report on technology issues for major news outlets. The newsletter
reports on relevant policy developments of a timely nature (hence the bi-weekly publication schedule). It has been published continuously since 1996, and an archive of past issues is available at our Web site. Finally, EPIC publishes and distributes printed books that address a broad range of privacy, civil liberties and technology issues. A list of EPIC publications is available at our Web site.

For the foregoing reasons, EPIC clearly fits the definition of “representative of the news media” contained in the FOIA and Department of Commerce regulations. Indeed, the U.S. District Court for the District of Columbia has held that EPIC is a “news media” requester under the FOIA. See Electronic Privacy Information Center v. Department of Defense, 241 F. Supp. 2d 5 (D.D.C. 2003). Based on our status as a “news media” requester, we are entitled to receive the requested records with only duplication fees assessed under 15 C.F.R. § 4.11(c). Further, because disclosure of this information will “contribute significantly to public understanding of the operations or activities of the government,” as described above, any duplication fees should be waived. This information is being sought on behalf of EPIC for dissemination to the general public.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees.

As I am making this request as a news media organization and this information is of timely value, I would appreciate your communicating with me by telephone, rather than by mail, if you have questions regarding this request. Thank you for your assistance.

Very truly yours,

Amanda S. Reid

Memo

To: File
From: JCV
Re: Phone call to EPIC re FOIA request
Date: 08/31/2004

I spoke with Lillie Coney. Amanda Reid, who signed the request, was an intern who has left EPIC. (That explains why my earlier messages to Reid weren't returned.) Coney is now the point of contact.

I clarified with Coney that "complaints," as used in the request, pertains to particular incidents or events, and not generally to the use of DREs, or to policy matters.
1. Complaints and agency responses regarding electronic voting direct recording electronic (DRE) devices used to count voting ballots, touch screen voting machines, and optical scanners.

2. Complaints and agency responses regarding voting ballot counting software from 9/2000 to the present.

3. All agency logs of communications between the agency and any other party discussing and interpreting HAVA § 301(a)(2)(B).

"Audit capacity."
NOTES:

Spoke with John Vergelli on 9-8-04 regarding FOIA request by EPIC. He stated that he had an initial conversation with Lillie Coney regarding the request. Email has gone out to some staff regarding the need to gather any responsive documents.

I will collect any responsive documents and send a response.
The EAC has received a FOIA request from the Electronic Privacy Information Center (EPIC). EPIC seeks three types of records:

1. "[C]omplaints and agency responses regarding electronic voting, direct recording electronic (DRE) devices used to count voting ballots, touch screen voting machines, and optical scanners."

2. "[C]omplaints and agency responses regarding voting ballot counting software from September 2000 to present."

About 1. and 2., I've spoken with a staffer from EPIC. In response to my question, the staffer clarified that by "complaint" they mean a specific assertion or allegation about a particular incident or event. They are not seeking records that are about DREs, etc., generally or as a matter of policy.

The staffer also clarified that the language, "voting ballot counting software," is meant to get at optical scan counting software.

3. "[R]ecords of communications between the agency and any other party discussing or interpreting [HAVA section] 301(a)(2)(B)."

Section 301(a)(2)(B) is entitled "Audit Capacity." In summary, its three clauses require "a permanent paper record with a manual audit capacity," 'provid[ing] the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced," and that the "paper record ... shall be available as an official record for any recount."

This request appears complete: It describes the records sought with reasonable clarity, which is what the law demands of requestors.

It's now the EAC's obligation to make a reasonable search for records, which includes e-mails.

So, please search your files, e-mail folders, etc., for any records that are responsive to the request's three descriptions. Please respond to your new G.C. (as a bureaucrat at heart, I love giving work to other people!) by Friday, 9/10 with a description
of what you have--don't make copies yet.

Once we've identified whatever responsive records we have, we must produce copies, unless we can protect a given document under one of the FOIA exemptions. At the risk of speculating, one exemption that may be relevant covers trade secrets and confidential business information.

PRIVILEGED AND CONFIDENTIAL
Attorney-Client Communication
Attorney Work Product
Shella:

I do not believe I have any such communication in my email but I might. I suspect that if I do, it is something that all 4 commissioners received.

Nonetheless, I will need you to search my email looking for any such communication as is described in Vergelli's email below. I would guess the letter we recently sent to the couple who are poll workers might qualify.

At any rate, Vergelli's email instructs that we identify the possible qualifying communication, make a list but not copies yet.

You can access my email to do this any time I am not here. Thank you.

Subject FOIA request from EPIC to EAC

The EAC has received a FOIA request from the Electronic Privacy Information Center (EPIC). EPIC seeks three types of records:

1. "[C]omplaints and agency responses regarding electronic voting, direct recording electronic (DRE) devices used to count voting ballots, touch screen voting machines, and optical scanners."
2. "[C]omplaints and agency responses regarding voting ballot counting software from September 2000 to present."

About 1. and 2., I've spoken with a staffer from EPIC. In response to my question, the staffer clarified that by "complaint" they mean a specific assertion or allegation about a particular incident or event. They are not seeking records that are about DREs, etc., generally or as a matter of policy.

The staffer also clarified that the language, "voting ballot counting software," is meant to get at optical scan counting software.

3. "[R]ecords of communications between the agency and any other party discussing or interpreting [HAVA section] 301(a)(2)(B)."

Section 301(a)(2)(B) is entitled "Audit Capacity." In summary, its three clauses require "a permanent paper record with a manual audit capacity," "provid[ing] the voter with an opportunity to change the ballot or correct any error before the permanent paper record is produced," and that the "paper record ... shall be available as an official record for any recount."

This request appears complete: It describes the records sought with reasonable clarity, which is what the law demands of requestors.

It's now the EAC's obligation to make a reasonable search for records, which includes e-mails.

So, please search your files, e-mail folders, etc., for any records that are responsive to the request's three descriptions. Please respond to your new G.C. (as a bureaucrat at heart, I love giving work to other people!) by Friday, 9/10 with a description of what you have--don't make copies yet.

Once we've identified whatever responsive records we have, we must produce copies, unless we can protect a given document under one of the FOIA exemptions. At the risk of speculating, one exemption that may be relevant covers trade secrets and confidential business information.

John Vergelli
Attorney Advisor
U.S. Election Assistance Commission
I have discovered that there are two FOIA requests.

The first was sent by The Mercury News to the FEC regarding communications with Ciber, Inc., Wyle labs, Wyle Laboratories, SysTest or American Management Systems. After speaking with John Vergelli this morning, I have learned that this request was forwarded to the FEC for their response. I will follow up with the contact person at the FEC to determine where they are on the response.

The second FOIA request was sent by EPIC on July 20, 2004 and sought information regarding complaints as to electronic voting, DREs, etc. I have included the body of the email from John regarding information that was requested. Please take a look at your records this week to determine whether you have any responsive documents. I have also contacted Diane Savoy regarding the incoming general email boxes and reviewing those for possible responsive materials.

Thank you.

1. "[C]omplaints and agency responses regarding electronic voting, direct recording electronic (DRE) devices used to count voting ballots, touch screen voting machines, and optical scanners." (complaints - meaning a specific assertion or allegation about a particular incident or event)

2. "[C]omplaints and agency responses regarding voting ballot counting software from September 2000 to present." (Vote ballot counting software - to include optical scan equipment and software)

3. "[R]ecords of communications between the agency and any other party discussion or interpreting [HAVA section] 301(a)(2)(B)." (Audit capacity - "permanent paper record with a manual audit capacity")
Mr. Chairman, I've made a first review of the FOIA request you handed me this morning, and a bit of initial legwork.

On its face, the request is complete-- the standard is that it must "reasonably describe" the records sought, and this request does.

I spoke with Peggy about whether we have responsive records--it is likely that we do, in the records brought over from the FEC. It is also very possible that the FEC still has some responsive records--e.g., in e-mails from FEC Commissioners' offices to OEA/Clearinghouse when the 2002 standards were approved, etc.

Given the subject of the request, we may need to consider whether FOIA exemption 4, for trade secrets and confidential commercial or financial information, applies to any of our records that contain information received from the corporations identified in the request. At first glance, I don't think any of the other FOIA exemptions will be relevant, but I'll look at this more closely.

Under FOIA, the agency receiving the request has twenty working days to make a determination on the request; that means, in general terms, to grant or deny the request, but not necessarily to deliver the documents. However, this deadline is quite often missed by agencies. If we count days from the date the request was faxed to the FEC, the 20th working day was 5/11. FOIA has an exception to this 20-working-days requirement that is relevant: An agency may extend the time to respond beyond twenty days in "unusual circumstances," which expressly include the need to consult with another agency. To avail itself of the exception, the agency must tell the requestor in writing why it needs the extension, and when it will make the determination. If the extension is for more than 10 days, the requestor may modify her request.

The FEC obviously wants to punt this one to us. However, while there are going to be tasks that we need to perform from our end, the request is addressed to them, and they may well have records that are responsive, so they are not off the hook.

I doubt that the FEC has made any response to this requestor, so I recommend the following course of action in the short-term. With your approval, I'll contact the FOIA officer at the FEC, explain that he still has obligations under this request, and suggest that he send a response to the requestor indicating that he is extending the time to respond under the exception described above--there are unusual circumstances (the EAC's recent creation and the transfer of OEA/Clearinghouse) and he does have to consult with another agency (i.e., the EAC). Doing this relatively quickly would be good-faith action to mitigate any accusation that either FEC or EAC did not act with the statutory deadlines, while we pull together our response.

Please let me know if this is okay with you.

Thanks,
John Vergelli

FOIA REQUEST

Dear FOI Officer:

Pursuant to the federal Freedom of Information Act, 5 U.S.C. § 552, I request access to and copies of any communications on file with the Federal Election Commission with the following companies: Ciber Inc., Wyle Labs or Wyle Laboratories, SysTest or American Management Systems. I would also like to review any correspondence between the FEC and a member of the ITA Technical Subcommittee of the National Association of State Election Directors (NASED), also known as the ITA subcommittee or the Voting Systems Board. I would like to review any documents that fit this request from 1990 to the present date.

I agree to pay reasonable duplication fees for the processing of this request in an amount not to exceed $40.00. However, please notify me prior to your incurring any expenses in excess of that amount.

As a representative of the news media I am only required to pay for the direct cost of duplication after the first 100 pages. Through this request, I am gathering information on an issue that is of current interest to the public, namely the testing of voting machines and the drafting of voting machine standards.
Please waive any applicable fees. Release of the information is in the public interest because it will contribute significantly to public understanding of government operations and activities.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees.

As I am making this request as a journalist and this information is of timely value, I would appreciate your communicating with me by telephone, rather than by mail, if you have questions regarding this request.

Please provide expedited review of this request which concerns a matter of urgency. As a journalist, I am primarily engaged in disseminating information.

The public has an urgent need for information that deals with the integrity testing of voting systems that will be used in the November election.

I certify that my statements concerning the need for expedited review are true and correct to the best of my knowledge and belief.

I look forward to your reply within 20 business days, as the statute requires.

Thank you for your assistance.

Very truly yours,

Elise Ackerman

Subjec Freedom of Information Act Request re Voting Systems Accreditation Board

Dear Bert,

This email is a follow up to my phone call to you last Friday, December 23. We are requesting the following information under the Freedom of Information Act:

A list of the current members of the Voting Systems Accreditation Board and a resume for each member.

Is Paul Craft still on the Board and will he remain on the board now that he is no longer working for the state of Florida but has his own consulting firm?

You may send the list and the resumes electronically to me at [email]

If you have any questions regarding my request, please email me or call my cell phone at 386-804-3131.

Thank you very much.

Sincerely,

Susan Pynchon
Florida Fair Elections Coalition
Dear Jeannie,

I spoke to Bert Benavides on December 27 and followed up our conversation the same day with an email requesting certain information. Below is our email exchange, in which Ms. Benavides said she would forward our request to you.

It is now January 5, and we would appreciate receiving the information we have requested as soon as possible, specifically:

- A list of the current members of the Voting Systems Accreditation Board and a resume for each member.
- Is Paul Craft still on the Board and will he remain on the board now that he is no longer working for the state of Florida but has his own consulting firm?

You may send the list and the resumes electronically to me at [redacted].

If you have any questions regarding my request, please email me or call my cell phone at 386-804-3131.

Thank you very much.

Sincerely,

Susan Pynchon

FOIA File

F05-005
December 16, 2005

Kathleen Wynne
Communications Director/Investigator
Black Box Voting, Inc.
330 SW 43rd Street
Suite K, Box 547
Renton, WA 98055

Dear Ms. Wynne,

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on November 18, 2005. Your request sought:

2. Any and all correspondence, e-mails, faxes between CompuWare Corporation and the EAC beginning January 2003 through November 2005.
3. A copy of a CompuWare report describing the GEMS' Security Defect.

In reference to requested items in number 2 and 3 above, the EAC has conducted a search of its files and does not have any correspondence with CompuWare Corporation nor does the EAC have a copy of the requested CompuWare report.

In reference to the requested items in number 1 above, the responsive documents are attached.

If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Gavin S. Gilmour
Associate General Counsel
U.S. Election Assistance Commission

Attachments:
1. Your Request Letter and Fax (both dated November 18, 2005)
2. Responsive Documents
Ms. Wynne:

Per your request I am sending this FOIA response electronically.

Gaylin Vogel

Dear Mr. Gilmour:

As discussed this morning, attached is my FOIA request, which you agreed I could send to you via e-mail.

Many thanks for all your help in this matter.

Kathleen Wynne
Communications Director/Investigator
Black Box Voting, Inc.

Dear Mr. Gilmour:

Pursuant to our telephone conversation this morning and your subsequent approval of my sending you directly Black Box Voting’s FOIA request. In that regard, we would like to request the following:

We would appreciate receiving these documents either in electronic or paper form, with electronic being the preferred form.

Please contact me by e-mail at your earliest convenience to inform us as to when we can expect to receive these documents, as well as to inform us of the cost incurred for duplication of these documents. My e-mail address is: Kathleen@blackboxvoting.org.

Thank you for your kind assistance and prompt response to this request.

Sincerely,

Kathleen Wynne
Communications Director/Investigator
Black Box Voting, Inc.
To: Gavin S. Gilmour, Esq.

Fax number: (202) 566-3127

Date: November 18, 2005

Regarding: CompuWare Report describing the GEMS’ Security Defect

2 pages including this cover page.

Comments:

Dear Mr. Gilmour:

I just e-mailed you our FOIA request. In connection with our concerns that the EAC should have received notification from Secretary of State J. Kenneth Blackwell of Ohio alerting the Commission of this “High” risk security vulnerability in Diebold’s GEMS software found by CompuWare Corporation BEFORE the November 2004 election, attached is a page from the August 18, 2004 Report specifically pointing out the security risks that needed to be mitigated.

Has the EAC received any report containing this information? If so, could you please also include that report with our other FOIA request? Thank you.

I look forward to receiving your response regarding this very serious matter.

Sincerely,

Kathleen Wynne
Communications Director/Investigator
Black Box Voting, Inc.

Testimony to the Elections Assistance Commission
Provisional Ballot Hearing
J. Kenneth Blackwell, Ohio Secretary of State
Columbus, Ohio
Wednesday, February 23, 2005

Members of the Commission, welcome to Ohio. It is good to be with you today.

Thank you for the opportunity to testify. We have a good report to make from Ohio, and I'm pleased to be able to share it with you.

Everyone in my office, along with the thousands of election officials and workers throughout Ohio, knew we were going to have especially demanding jobs in 2004. All of the pre-election polling indicated that the presidential election was a dead heat in Ohio. Everyone knew what that meant: a lot of newly registered voters (many of them first time voters), extra attention to the state's election laws, and some confusion about the procedures.

I am an educator by training, and I approached the situation as an educational problem. An effective educator has a command of the facts and can communicate those facts clearly. The results show that all of us, Republicans and Democrats together, carried out our difficult and closely scrutinized jobs with few hitches, which we are now seeking to correct.

One reason that Ohio did not become, as some predicted, the Florida of 2004, was that Ohio has an election system that is transparent, bi-partisan, and fair. It both makes sure that citizens have every chance to make their views heard on elections days and provides checks against possible fraud.

It is also not new to us. The rules concerning provisional balloting have been in place since the mid-1990s. In 1994, my predecessor in this office, now-Governor Bob Taft, issued a directive to the County Boards of Elections describing the rule. It included the provision that voters casting a provisional ballot must do so in the precinct where they live.

HAVA, implemented after the 2000 election, required states that did not have provisional balloting provisions to provide them. It leaves the details rightly up to the states. Ohio retained its existing system. In this, Ohio is with the majority - 28 states require voters to cast provisional ballots in their home precincts.

This provision was the subject of a pre-election lawsuit that argued that Ohio's law was too restrictive and violated HAVA. The plaintiffs lost, and we hoped that the suit did not confuse voters.

We did not leave education to the hope that everyone heard the news. We had clear standards, and we made certain that election officials and workers understood them. We sent memos that spelled out how to implement state law. We followed up the memos with conference calls with members of County Boards of Elections. As the election neared, those calls were a daily event.

We got out the word directly to the voters. I believed that with an electorate that had grown by 22 percent, a massive education campaign could dispel any lingering confusion about where and how to vote. We used radio and television ads. Cards mailed to registered voters reminded them of their precinct and voting location. Using a
sophisticated computer system, we called voters in urban areas twice with a recorded message that was another reminder of their precinct and voting place.

The system worked. After the election, bipartisan boards counted and checked by hand 153,539 provision ballots. Across Ohio, 77 percent of the provisional ballots were counted in the final tally. Most commonly, ballots were rejected because voters weren't registered. A few voters voted twice. A small number were rejected because voters cast their ballots at the wrong precinct.

Ohio's rate of acceptance compares very favorably to those of other states - especially those that allow voters to cast ballots outside of their correct precinct. In Pennsylvania, for example, only 48 percent of the provisional ballots were either fully or partially counted. This is not the result that critics of Ohio's law predicted. Ohio's provisional ballot count also did not produce legal challenges after the election. In North Carolina, the results of a close race for a state office finally turned on the count of the provisional ballots - and the mistaken instructions given by election officials to voters, who were wrongly instructed to cast their provisional ballots anywhere.

Because of our clear standards, communicated plainly and often, voters, election officials, and my office were on the same page, adhering to state law.

Ohio's election system is not perfect, but our provisional balloting system and our educational efforts can stand, I believe, as a model for other states.

Thank you.
March 9, 2005

Honorable J. Kenneth Blackwell
Secretary of State
180 East Broad Street, 16th Floor
Columbus, OH 43215

RE: Participation in February 23, 2005
Public hearing on provisional voting

Dear Secretary Blackwell:

Thank you for participating in the United States Election Assistance Commission's public hearing on provisional voting. Initial responses indicate that the hearing was a great success, providing needed light to an issue that has been a source of confusion for many voters and election administrators alike.

Your testimony regarding the experience of Ohio in implementing provisional voting was insightful and helpful to EAC as it begins its work on provisional voting. We were particularly interested in the effect of litigation on the efforts of the state and local election officials to implement provisional voting.

Again, thank you for your time and assistance in beginning EAC's research and guidance work on provisional voting.

Sincerely,

Gracia Hillman
Chair

RE: Invitation to speak at February 23, 2005
Public Hearing on Provisional Voting

Dear Secretary Blackwell:

On February 23, 2005, the United States Election Assistance Commission (EAC) will be conducting a public hearing regarding provisional voting. The hearing will take place in Columbus, Ohio at the Moritz School of Law on February 23, 2005 from 1:00 to 5:00 p.m. This hearing is an information gathering session that is intended to begin the research process for the EAC's work in developing voluntary guidance on provisional voting. The hearing involves receiving testimony from three panels of speakers. The first panel will include election professionals from the state and local level. The second panel will include representatives of non-government sector organizations that are interested in election reform issues. The third panel will include academicians who have researched the issue of provisional voting.

The Commission would like to invite you to participate on the panel of election professionals. The Commission would ask that you limit your comments to no more than 10 minutes on the experiences in your state regarding the implementation and use of provisional voting during the elections of 2004. If you are able to attend, the Commission would ask that you submit written comments by Wednesday, February 16, 2005. Those comments can be sent via email to testimony@eac.gov.

Thank you for your consideration of this request. We look forward to hearing from you.

Sincerely,

Glacia Hillman
Chair

RE: Invitation to speak at February 23, 2005
Public Hearing on Provisional Voting

Dear Secretary Blackwell:

We appreciate your consideration of speaking at the public hearing on provisional voting to be held on Wednesday, February 23, 2005 in Columbus, Ohio. We must quickly finalize our arrangements and panelists for this hearing. As such, we would appreciate confirmation that you will or will not be able to speak at this event by 10:00 a.m. on Monday, February 14, 2005. If we have not received confirmation at that point, we will have to select another speaker.

Thank you in advance for your consideration and timely response.

Sincerely,

Gracia Hillman
Chair
FOIA File
December 15, 2005

Ms. Lillie Coney  
Associate Director  
Electronic Privacy Information Center (EPIC)  
1718 Connecticut Ave, NW  
Washington, DC 20009

Dear Ms. Coney:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on November 16, 2005. The request sought certain agency records concerning the performance of the agency contract awarded to Kennesaw State University. Specifically, the request sought records pertaining to:

1. Designation and certification of the agency's contracting officer;  
2. The docket manager for the Voluntary Voting System Guidelines (VVSG) comment process;  
3. The docket rules for the VVSG comment period and final standards promulgation;  
4. Contract performance reports, which includes the status of work under contract;  
5. Communications from those who submitted comments on the status of comments and ease of electronic access to the web posted comments to the VVSG;  
6. Review of comments submitted for the VVSG;  
7. A copy of VVSG comments submitted to both the agency and the contractor;  
8. The status of comments submitted, i.e. unread, read, categorized, assessment, and disposition;  
9. Communications between the EAC, TGDC, and contractor over changes to the VVSG based on comments submitted;  
10. Increased cost above the initial award to Kennesaw State University of $175,000; and  
11. Documents on subcontracts or consultancies issues by Kennesaw State University under the EAC contract in question with Brit Williams, TEM Consulting or Stephen Berger.

No Records. After a review of its files the EAC has determined that it has no records pertaining to items 1, 10 and 11 noted above.

Responsive Records. The EAC has found responsive records to the following items requested above:

- **Items 2 and 3.** Please see the EAC's public comment rules as published in the federal register (Volume 70, Number 124, pages 37378 – 37379). Further, enclosed please find testimonies of Merle King and Carol Paquette given before the Commission.
- **Item 4.** Please find responsive documents attached.
- **Item 5.** Please find the responsive documents attached. Some of the communications responsive to this request have been redacted. The removed portions contain personal
information (such as home and e-mail addresses) provided by the commenter. This redaction is required by 5 U.S.C. §522(b)(6).

- **Item 7.** Copies of the public’s comments on the VVSG may be found on EAC’s website (www.eac.gov). The EAC received 5,670 comments. All but approximately 1000 – 1500 of these comments have been posted. The remaining comments will be posted within the next five working days.

- **Item 8.** Please find the responsive records attached. These records have been printed and pulled from our tracking and management system database. The information enclosed relates to the status of the various comments as of December 5, 2005. The EAC has redacted the “recommended resolution” column on this printout because it is privileged (see discussion below). The reference numbers on the tracking and management system printout start at number 259, there are no entries numbered 1 through 258.

**Withheld Records.** Documents responsive to Items 6 and 9 are protected by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §522(b)(5). The documents sought are pre-decisional policy recommendations. Such documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action. It is estimated that approximately 2000 pages have been withheld from the tracking and management system database. Thirty-five pages of interagency e-mails have also been withheld.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

[Signature]

Gavin S. Gilmour
Deputy General Counsel
U.S. Election Assistance Commission

Comments:

FOIA Request
Dear Ms. Thompson,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning the performance of the agency contract awarded under no bid circumstances to Kennesaw State University. The documents sought include, but are not limited to information regarding:

- Designation and certification of the agency's contracting officer;
- The docket manager for the Voluntary Voting System Guidelines (VVSG) comment process;
- The docket rules for the VVSG comment period and final standards promulgation;
- Contract performance reports, which includes the status of work under contract;
- Communications from those who submitted comments on the status of comments and the ease of electronic access to the web posted comments to the VVSG;
- Review of comments submitted for the VVSG;
- A copy of VVSG comments submitted to both the agency and the contractor
- The status of comments submitted, i.e. unread, read, categorized, assessment, and disposition;
- Communications between the EAC, TGDC, and contractor over changes to the VVSG based on comments submitted
- Increased cost above the initial award to Kennesaw State University of $175,000;
- Documents on subcontracts or consultancies issues by Kennesaw State University under the PAC contract in question with Brit Williams, TEM Consulting, or Stephen Berger.

This FOIA request includes notes, statements, memorandum, letters, compact disks, and e-mails regarding meetings and communications on the performance of the contract with Kennesaw State University.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.
Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

Lillie Coney
Associate Director
Kennesaw State University (KSU) has accepted the task of providing technical support to the Election Assistance Commission (EAC) in the management of public comments regarding the Voluntary Voting System Guidelines (VVSG) and the subsequent editing of the VVSG to reflect the incorporation of these comments. In addition, KSU has been asked to assist by making recommendations that relate to improving the readability of the VVSG in regards to format, style, and clarity as well as correction of typographical errors.

In my comments, I will address the following issues as they relate to the comments received: the quantity of comments received by section; challenges in resolving comments; and a proposed procedure for resolving the use of comments in the editing of the VVSG.

Comments are posted directly to the website (www.eac.gov) by the author, or may be submitted to the email address: votingsystemsguidelines@eac.gov. Comment may also be delivered by FAX or regular mail to the Commission. Comments submitted to the email address are posted to website by KSU staff. This requires the KSU staff to analyze the email contents and post the comment to the appropriate section at the website. Hardcopy documents are processed in similar fashion to the email. By placing all comments online, regardless of their form of submission, the public is able to 1) confirm their comment has been received and posted; and 2) review comments about the VVSG as well as comments about other comments.

Each comment, regardless of how it is received and/or posted, is assigned a tracking number within our comment system. This tracking system enables us to account for every comment received and its eventual resolution. In addition to a twice-daily backup of the online system, hardcopies of all comments are made and kept on file within our facility.

After a comment is uploaded to the website, it is reviewed and assigned the status of "Accepted" or "Rejected". As of September 22, 432 comments have been uploaded and posted to the website. Of these, 406 have been "Accepted" for display and 26 have been "Rejected". A breakdown of these comments reveals the following:
Comments Received, Accepted and Rejected, by Category

<table>
<thead>
<tr>
<th>Category</th>

</tr>
</tbody>
</table>

Table 1.

Comments rejected as test-comments are those entered by staff at the EAC and at KSU to test a feature of the system as it was being prototyped. Rather than delete these comments, we elected to retain them so that we would have a complete, end-to-end accounting of all comments entered into the system.

The eleven (11) comments rejected in the General category did not address the voting system guidelines or voting technologies. They tended to be broadly focused statements regarding election outcomes and were not directed toward the VVSG document.

The multiple submissions were those in which the author submitted the same comment twice.

All comments are retained within the database, but only those that are “Accepted” are displayed to an online reviewer.

Of the 432 comments accepted, not all are discrete, single topic submissions, nor are they all posted by their authors in the appropriate category. Occasionally the author will bundle several comments into a single submission. This complex comment may address multiple sections of VVSG. The decomposition of these complex comments results in a total number of comments to be analyzed greater than the total number submitted. To this end, we have 442 discrete, accepted comments to be analyzed and processed. (468 total comments – 26 rejected = 442).
The 442 discrete comments are not uniformly distributed over the contents of the VVSG:

</tbody>
</table>

Table 3.
The section receiving the most comments is Vol. I, Section 6, Security. Of these, 82 are related to Section 6.8 Requirements for Voter Verified Paper Audit Trail (Optional), and many of those are redundant.

The majority of comments related to Vol. I, Appendix A – Glossary, are from two reviewers, one who is on the staff at KSU. EAC has requested KSU to further develop the Glossary by ensuring that all keys terms in the body of the document are included. In addition, we have been asked to identify and document terms whose definitions vary somewhat by jurisdiction, e.g., absentee voting, and to ensure that all definitions are in conformance with HAVA and other authoritative sources. Posting these proposed changes in the form of comments allows the public to review and comment on them.

To support the efficient resolution and disposition of the comments, we have proposed a broad classification scheme that identifies a comment as Non-extensive or Extensive, based on the degree of effort required for resolution. Non-extensive indicates that the comment can be resolved by inspection or with little effort, as opposed to those that require more significant analysis or effort to resolve (Extensive). Of the Accepted Comments posted, 192 are judged to be Non-extensive, with the remaining 250 assessed as Extensive.

Examples of Non-extensive comments include:
- Spelling and typographical errors
- Formatting errors (indentation, numbering, etc.)
- Pagination
- Conforming glossary definitions to authoritative sources (HAVA, NIST, etc.)
- Affirming the currency and correctness of references to other sources

Extensive comments are those that will require more thorough research and may extend into the areas of law and policy. Examples include:
- Change “should” to “shall” or “shall” to “should”
- Alteration of scope of the subject under consideration
- Technical specifications
- Changes in performance of a component of a Voting System

Resolving these comments will require some research and perhaps multiple passes through different reviewers.

To control the process of resolving and incorporating comments into the final version of the VVSG, we have developed an online system to enable designated reviewers access to the comments as well as recommendations for resolution. The EAC will determine who the reviewers will be. Our prototype assumes the reviewers will be: KSU staff, NIST personnel, and the staff of the EAC. Each change to the VVSG that is the result of processing a comment will be tracked and include the appropriate signoffs, with the final signoff being that of the EAC.
In summary, we have implemented a system that tracks every comment from its origin through its resolution. This resolution will be: incorporation into the VVSG as submitted, incorporation into the VVSG after modification, or unused.

We are aware that there are organizations, including vendors, that are still preparing their comments for submission. We do not expect these comments to be posted until right before the closing of the public comment period (September 30). We are prepared to process a last-minute high volume of submissions. It would not be surprising to see the number of comments double in the time remaining before September 30.
For the past six months, Kennesaw State University (KSU) has been engaged in supporting the Election Assistance Commission (EAC) in the management of public comments received regarding the Voluntary Voting System Guidelines (VVSG). In addition, we have supported the subsequent editing of the VVSG to reflect the incorporation of revisions in response to EAC analysis and consideration of these comments. We have also worked with the EAC staff to improve the readability of the VVSG in regards to format, style, and clarity as well as correction of typographical errors.

After the VVSG was posted for public review and comment on July 1, 2005, the public was invited to review the VVSG document and provide comments. These comments were submitted in a variety of ways including direct posting to a website (www.eac.gov), emailed to votingsystemsguidelines@eac.gov or hardcopy submitted by mail, fax, or presented at one of several public hearings held during the comment period.

Each comment, regardless of how it was received and/or posted, was reviewed and assigned a tracking number and posted to the website tracking system. This system enables us to account for every comment received and its eventual resolution. In addition to a twice-daily backup of the online system, hardcopies of all comments are made and kept on file within our facility. At the September 27, 2005 meeting of the EAC, I indicated that we had received 432 comments as of September 22. Between September 23 and September 30, EAC received over 5,000 comments. Although all comments have been reviewed by EAC staff for input to their deliberations, KSU is still classifying and cataloging comments in preparation for our final report.

In the final two days of the comment period approximately 3300 nearly identically worded emails were sent to the EAC in response to an organized campaign to request the Commission to make voter verifiable paper audit
trails mandatory for electronic voting systems. The EAC staff had to individually review these messages and then forward them to KSU for manual entry into the comment website. To keep the data entry of this large volume of identical comments from delaying the processing and consideration of the other comments received, EAC requested us to develop a temporary database for recording these comments. KSU expects to complete this data entry by the end of this week, and the temporary database will then be merged with the comment website.

Public Comment Process

Individuals and organizations that wished to comment on the draft of the VVSG were given 90 days after the posting of the VVSG to do so. Electronic versions of the VVSG were made available on the EAC website and hardcopies were provided upon request.

The EAC held public hearings in New York, Pasadena and Denver during the summer of 2005. In addition to testimony presented by invitees, individuals could present testimony at the conclusion of each hearing. All of the testimony from these hearings, including transcripts of oral testimony, was reviewed as part of the public comment process and entered into the website tracking system.

The EAC also discussed the VVSG with the EAC Standards Board and Board of Advisors. Formal comments submitted by the Standards Board were entered into the website tracking system.

About 2/3 of the comments received were emailed to the EAC. These emails were reviewed by EAC staff and then forwarded to KSU for entry into the website tracking system. About 1/3 of the comments received were entered directly into the website by their author.

Comments can be viewed on the web through a link from the EAC website (www.eac.gov).

Sources of Comments

Comments could be submitted by individuals or by authors representing organizations. Our preliminary assessment of the comments indicates that 40% were submitted by individuals not claiming affiliation with any
organization, with 60% coming from organizations that include advocacy groups as well as voting system vendors. The majority of General and Glossary comments came from individuals while Section comments came primarily from organizations. Section comments outnumber General and Glossary comments 2:1.

Content of Comments

Although we have not prepared our final report of the disposition of comments, our ongoing review of the comments, indicates the following distributions:

Comments dealing with...

- Content of the VVSG: 64.2%
- Testing criteria: 13.4%
- Security and threat analysis: 7.4%
- Formatting of the VVSG: 5.6%
- Grammar: 5.0%
- Testing laboratory supervision: 2.2%
- Concerns about vendors: 2.2%

The majority of the comments relate to Volume I, Sections 2 and 6 (Human Factors and Security).

Website Tracking System

Once a comment was entered at the website by either its author or entered by a KSU staff member from emails or hardcopy submission, the comment was classified as either “Extensive” or “Non-Extensive”. Non-Extensive comments are those that address spelling, section numbering, or trivial formatting errors. Extensive comments are those that address adding, deleting, or modifying the content or intent of the VVSG.

In addition to this classification, KSU reviewed the comment and ensured that it was properly assigned the correct document designation of General, Section or Glossary. Comments related to a specific section had to assigned the appropriate section (and subsection) number. Since both volumes of the VVSG contained duplicate section and appendix identifiers, there was
occasional confusion on the part of the submitter regarding which volume their comments referred to.

After these initial comment posting actions, comments were given a preliminary content review by KSU and assigned a suggested disposition for consideration by the EAC staff. This was done to expedite the review process so the final VVSG could be completed as quickly as possible. Specific disposition categories were developed in conjunction with the EAC:

- Rejected — comments contained observations about the election process in general and did not contain specific comments pertaining to the VVSG content or suggested language to consider
- Rejected, redundant — comments may or may not contain usable suggestions but the comment’s content has already been made by another author
- Accept as written — comments contained both an analysis of a portion of the VVSG draft and suggested language to clarify or amend the document
- Accept modified — comments contained valid analysis, but lacked appropriate language for remedy. Language would be provided by EAC review working groups.
- Carry over — comment contains either valid analysis of VVSG content needing review for next iteration of the VVSG or suggests an expansion of the scope of the VVSG that needs to be reviewed in the next iteration
- Refer to EAC for resolution — comments that require policy review (e.g. shoulds and shalls)
- Other — comments that will be referred to the Election Management Guidelines working group for consideration, or comments that do not fall into one of the preceding categories

Once KSU had reviewed, classified, and recommended disposition of a comment, it was then reviewed by the EAC staff or one of three comment review working groups comprised of EAC and NIST personnel, and in some cases by both. All comments received at least two levels of review and no final recommended disposition assigned (accepted, rejected, carried over, etc.) without explicit approval of EAC staff. Each comment’s disposition is tracked to the document and to the reviewers who signed off on its disposition.
KSU also assisted in formatting, editing, and providing research support for the EAC staff in developing the current draft of the VVSG. Our support was limited to proposing document formats, editing for grammar and syntax, document management, and research on references.

Work remaining on the project includes implementing any final edits required by the EAC and eventually closing down the website tracking system which will include a detailed report of the comments received.
Section 202 of the Help America Vote Act (HAVA) directs the Election Assistance Commission (EAC) to adopt voluntary voting system guidelines and to provide for the testing, certification, decertification, and recertification of voting system hardware and software by accredited test labs - among many other duties. The guidelines specify the functional and performance requirements that voting systems must meet to receive national certification. They also describe the testing procedures that the voting system test labs should follow in conducting system certification testing.

To assist EAC with its guidelines development work, HAVA provides for the establishment of a body of subject matter experts, the Technical Guidelines Development Committee (TGDC). As specified by the statute, the fifteen members of the TGDC are drawn from a variety of organizations, such as NASED, the Access Board, IEEE, and ANSI. The TGDC is chaired by the Director of the National Institute for Standards and Technology (NIST), and NIST is charged with providing technical support to the deliberations of the TGDC. EAC has provided nearly $3 million dollars this fiscal year to fund the work of the TGDC and NIST.

HAVA tasks the TGDC with developing recommendations for guidelines and providing those recommendations to the EAC. The TGDC and NIST completed this challenging task within the nine months specified by HAVA and delivered their initial set of recommendations to the EAC on May 9. This document represents a significant step forward from the 2002 Voting System Standards. We appreciate the solid research and many hours of analysis involved in this effort. The TGDC and NIST have provided an excellent body of work for EAC to consider in preparing its proposed guidelines.

These recommendations augment the 2002 Voting Systems Standards in the areas of accessibility, usability, and security. They include significant new requirements for accessibility, voting system software distribution, system setup validation, and the use of wireless. Since some States have required voter verified paper audit trails, the Guidelines include performance specifications for this system component. These requirements are optional for national certification purposes.

A paper audit trail is only one of several currently available technical approaches to provide a means, in addition to the voting system summary screen, for voters to verify their choices before submitting their ballot. EAC plans to address the development of similar specifications for audio, video, and cryptographic methods in the future. There was not sufficient time for the TGDC and NIST to include these other technical solutions in the initial recommendations.

EAC has conducted a thorough review of these recommendations in carrying out its due diligence as the agency responsible for the implementation and interpretation of HAVA. In particular, the Commission has performed a legal analysis to ensure compliance with the statute, especially focusing on the mandatory Section 301 voting system...
requirements.

This legal review resulted in changes to several of the accessibility recommendations to make the requirements mandatory, rather than permissive. For example, Human Factors requirement 2.2.6 provides that an accessible voting station should provide features to enable voters who are blind to verify their ballot choices, if the normal voting procedure includes a voter verified paper audit trail. A significant caveat was added that, if the State requires the paper record produced by the voter verified paper audit trail feature to be the official ballot, then the accessible voting system must provide features to enable visually impaired voters to review the paper record.

In addition, selected portions of the Guidelines document were revised to reflect the new EAC process for the national certification of voting systems, most notably in Volume I, Section 1, and Volume II, Section 1. Since these Guidelines will be in use for the next several years, we thought it advisable to replace the description of the former NASED process with the EAC process, which will be in place concurrently with the adoption of these Guidelines. In a similar vein, we substituted Election Assistance Commission in place of Federal Election Commission where appropriate.

Materials in Section 6 were reorganized to place the new requirements developed by the TGDC and NIST within the appropriate subsections. This allows the reader to review all the requirements for a particular topic in one place. For example, the new software distribution requirements were moved to the Software Security subsection. Voter verified paper audit trail requirements were placed at the end of the section since they are optional for national certification purposes. The discussion on independent dual verification systems was removed from the main body of the document since the TGDC did not recommend it as a requirement at this time. This material is presented in Appendix D.

Volume I, Section 9 was combined with Volume II, Section 1 to consolidate all requirements regarding the national certification testing process in a single volume. Minor updates were made throughout both volumes of the Guidelines to reflect the role of the EAC and to include new terminology introduced by HAVA. In addition, the Glossary was updated to reflect Department of Justice comments submitted earlier to NIST. Some other wording clarifications were made to the Glossary.

The Federal Register notice was published on June 29 to begin the 90 day public comment period. EAC has also scheduled three public hearings on the Guidelines. The first one is today in New York; the second is on July 28 at the California Institute of Technology in Pasadena, California; and the third in Denver on August 23. Each of these hearings will include several panels of speakers discussing various aspects of the Guidelines. There will also be time provided for comment by members of the public. The EAC Board of Advisors and Standards Board also will be providing input on the Guidelines. The Commission has scheduled several days with the Boards to review and discuss their comments.

The Guidelines are available in a variety of formats. The document can be read or downloaded from the EAC website (www.eac.gov) in either pdf or HTML format. Since
it is more than 250 pages, it can be downloaded in individual sections or the entire
document. The document is also available in hard copy or on CD by contacting the EAC.
Instructions for requests are provided on the website and in the Federal Register notice.

EAC is also providing several alternative methods for submitting comments:

- through an on-line comment form on the webpage (www.eac.gov)
- by e-mail to votingsystemguidelines@eac.gov
- by mail to Voting System Guidelines Comments to the Commission
- by FAX to Voting System Guidelines Comments at (202)566-3127.

All comments from all sources will be stored in a single database and all will be posted
on the EAC webpage. Are there any questions?
The EAC has received approximately 4500 comments on the Voluntary Voting System Guidelines (VVSG). About 70% of these comments were received on the last two days of the comment period: 700 comments to the website and 2500 emails. Most of the emails came from an organized write-in campaign to encourage EAC to mandate voter verified paper audit trails. However, several of the emails came from voting system vendors and included fairly lengthy attachments containing a large number of individual comments (48 Excel spreadsheet pages in one case). A small number of comments were received by FAX and postal mail. As one might expect, security and human factors are the topics with the most comments.

We have created a database to track the comments and assist in managing the review process. Comments submitted to the EAC website were directly entered into this database by the author. All comments received by email require manual entry into the database. This is a time-consuming task that is being performed by Kennesaw State University, which is under contract to assist EAC with this effort.

We have organized the review process into 4 subject areas: Security, Human Factors, Core Requirements, and Glossary. The review groups are comprised of staff from EAC, NIST, and Kennesaw. Work is under way to review the comments and determine their disposition. Many are very general in nature and do not relate to any specific section of the VVSG. There are also many duplicate comments. It is too early in the process to forecast with any great accuracy how long it will take, but we are pressing ahead with the review as quickly as we can.

Voluntary Voting System Guidelines:
Summary of Changes

Carol Paquette
U.S. Election Assistance Commission
Security Comments by Category

- General & Scope
- Access Control
- Physical
- Software
- Telecommunications & Data Transmission
- Public Communications Networks
- Wireless
- VVPAT

Total: 550 Comments
Three Principal Areas of Comments

- Software
- Wireless
- VVPAT
Software

- 2005 VVSG adds significant new requirements to improve the integrity of voting system software pertaining to:
  - Distribution of software to purchasing jurisdictions
  - Generation of reference information to validate software
  - Validation of software on the voting equipment
Software Comments Resolution

- 42 comments received
- 20 comments designated as carry-over
- 9 comments accepted to clarify language
- 16 comments were not utilized
  - No specific comment made
  - Substance of comment redundant
Wireless Comments Resolution

- 70 comments received
- 29 comments designated as carry-over
- 4 comments accepted

*Clarification of discussion and requirements based on NIST and review group recommendations*
Wireless Should to Shall Changes

- If a voting system includes wireless capabilities, then the voting system shall be able to accomplish the same function if wireless capabilities are not available due to an error or no service. (6.7.2.3)

- The indication (of whether the wireless capability is active) shall be visual. (6.7.3.3)
VVPAT

- 227 technical comments received
- 24 comments designated as carry-over
- 96 comments designated as redundant
- Clarification of discussion and requirements based on NIST and review group recommendations.
Summary of VVPAT Changes

- Independent verification overview added to provide context for VVPAT requirements
- VVPAT requirements previously in Human Factors will be consolidated in VVPAT section
- 6.8.4 Approve or Spoil the Paper Record significantly revised
- 6.8.7 Equipment Security and Reliability significantly revised
(New) 6.8.4 Approve or Void Paper Record

- 6.8.4.1 The voting station shall allow the voter to approve or void the paper record.
- 6.8.4.2 The voting station shall, in the presence of the voter, mark the paper record as being approved by the voter if the ballot selections are accepted, or voided, if the voter decides to change one or more selections.
- 6.8.4.3 If the records do not match, the voting station shall mark and preserve the paper record and shall provide a means to preserve the corresponding electronic record so the source of the error or malfunction can be analyzed.
- 6.8.4.4 The voting system shall not record the electronic record until the paper record has been approved by the voter.
- 6.8.4.5 Vendor documentation shall include procedures to enable the poll worker to return a voting station to correct operation after a voter has used it incompletely or incorrectly. This procedure shall not cause discrepancies between the tallies of the electronic and paper records.

**Requirements Deleted** – (using previous numbers) 6.8.4.4, 6.8.4.5 and 6.8.4.6.
6.8.5 Preserve Voter Privacy Changes

- **6.8.5.1.1 deleted:**
  - When the voter is responsible for depositing a paper record in the ballot box, the accessible voting station shall maintain the privacy and anonymity of voters unable to manually handle paper.

- **6.8.5.4 deleted:**
  - The voter shall not be able to leave the voting area with the paper record if the information on the paper record can directly reveal the voter's choices.

**Policy Consideration:** Voter should not be permitted to handle the paper record in order to reduce opportunity for vote fraud.
6.8.6 Electronic & Paper Record Structure Changes

- 6.8.6.2 All cryptographic software in the voting system shall be approved by the U.S. Government's Cryptographic Module Validation Program (CMVP), as applicable.

- 6.8.6.8.1 The paper record shall contain error correcting codes for the purposes of detecting read errors and for preventing other workings on the paper record to be misinterpreted when the machine is reading the paper record.

- 6.8.6.10 If barcode is used, the voting system shall be able to print a barcode with each paper record that contains human readable contents of the paper record.
6.8.7 Equipment Security and Reliability

- Requirements Deleted:
  - 6.8.7.1, 6.8.7.2, 6.8.7.3 - not testable
  - 6.8.7.2.5, 6.8.7.2.6 - not testable, election management procedures

- 6.8.7.2.7 revised: Tamper evident seals or physical security measures shall protect the connection between the printer and the voting station.

- 6.8.7.3.2 revised: The voting station shall detect errors and malfunctions such as paper jams or low supplies of consumables (remainder unchanged).

Appreciate the information, Carol. Let me know if you need some help with data entry ; )

Hi Carol. I hope all is well with you. VV is interested in the number of comments on the proposed guidelines that the EAC received via email etc... Who would I ask? You probably haven't analyzed them yet, but we would like to know the gross number—clearly we can see the 1,000 plus up on the web. In the end, will all of the acceptable comments be posted on the EAC site? Thanks very much, Bobbie

Ms. Paquette,
Thank you very much for your voicemail today.

Could you please email me with instructions as to how to locate on the EAC website the posting the public Comment submitted on behalf of ACCURATE regarding the proposed 2205 VVSG?

Thanks and best regards,
Cecilia Walsh
Law Student Intern
Samuelson Law, Technology & Public Policy Clinic, UC Berkeley
Dear Ms. Paquette,
We submitted a public comment on September 30, 2005 on the proposed 2005 Voluntary Voting System Guidelines (2005 VVSG) on behalf of ACCURATE (A Center for Correct, Usable, Reliable And Transparent Elections), an NSF-funded group conducting research directed toward increasing the trustworthiness of voting systems.

We would like to request an update on the EAC's review of the public comments received and the status of the 2005 VVSG.

Thank you very much for your help!

Best regards,
Cecilia Walsh & Erica Brand
Law Student Interns, Samuelson Law, Technology & Public Policy Clinic, UC Berkeley
Joseph Hall

Carol,
I checked the on-line comments and there were none from him.

Connor

------------- Original message -------------
I did see his email comments but he also asked about his comments submitted on-line. This is what I couldn't find.

Subject: Re: Fw: VVSG comments

Carol,
I found Fernando Morales' email. The subject is "VVSG Non-Compliant with HAVA". It contains a Word document as an attachment containing his comments.

Hope this helps,
Connor

------------- Original message -------------

Connor -

Can you check this out? I reviewed all the comments in the database yesterday and didn't see one there from Morales - and I was specifically looking for messages from him. It's possible I just missed it. I did think it a bit odd that there were no new comments to approve for posting when I hadn't checked it for a week while on vacation. But, in general, the response has been very light compared to what NIST was receiving earlier in the process. Please advise. Thanks!

Ms. Paquette, thanks for your response, good morning:

I wonder if you can tell me why also my July 31, 2005 direct submission was not posted and why one day later the Jeff Donald direct submission was posted on August 1, 2005. Is the direct submission software sensitive to who file it? or blocked because contain key words in the argument?

Please advice,

Fernando Morales

Mr. Morales -

We have received your comments, which you sent by email. We have just recently gotten a contract in place with Kennesaw University for assistance in managing and reviewing the VVSG comments. All the email comments have been forwarded to them to enter into the database that can be viewed from the website. We anticipate having all comments received by other means than direct website submission to be posted within the next week. Thank you for your patience.

Carol,

I found Fernando Morales' email. The subject is "VVSG Non-Compliant with HAVA". It contains a Word document as an attachment containing his comments.

Hope this helps,
Connor

------------- Original message -------------
Connor -

Can you check this out? I reviewed all the comments in the database yesterday and didn't see one there from Morales - and I was specifically looking for messages from him. It's possible I just missed it. I did think it a bit odd that there were no new comments to approve for posting when I hadn't checked it for a week while on vacation. But, in general, the response has been very light compared to what NIST was receiving earlier in the process. Please advise. Thanks!

Carol,

(This is a follow up to my message from last night. We have the Scytl comments - they were posted on 9/9/2005.)

Of the vendor comment documents that you emailed to me:

We already have Hart Intercivic, Populex, Sequoia and Scytl. We have Accupoll in a hard copy format. We do not have ES&S.

Thanks,
Connor

Carol,

There is one earlier comment from Mr. Lee that was entered under the "general comments" classification on 9/19/2005 (reference number 729). However, to this point we have not seen these comments dated 9/29/2005. We will enter these immediately.

Thanks,
Connor

Can you check on status of entering these comments? I spoke with this person on the phone last week and explained to him about the huge number of emails received and that the information from emails had to be hand-posted to the website - a very time consuming task. But he's back again. Thanks!

I have attached the proposed updated message for the web site. The updated text is in bold. I will call in a few minutes to get your feedback.

Thanks,
Connor

>>> <cpaquette@eac.gov> 10/4/2005 1:23:44 PM >>>
Merle, Connor -

The Commissioners decided today that they want you to "turn off" the capability for people to continue sending in comments. Please draft a message to the effect that the comment period ended on September 30 and no comments will be accepted after that date. Also need to say that comments received by that date will be available for public review while the Commission is considering what revisions might be made to the VVSG. For the period while you're working on getting all the email, etc., comments posted, might be useful to mention that due to volume of comments received in the last days of the comment period people might not see their comments posted for a few days. Make sure that the couple of emails after 9/30 that I sent by mistake yesterday are not available for viewing. At that time, you can replace this statement with one that says that all comments are posted. We will still have to capture all the comments received after the deadline, they just won't be approved for public view. I'll hold off forwarding any more of the email comments received after the 30th until you tell me that all the timely comments have been entered. We will also be shutting down the VVSG email address. Would like to review message text before it's posted. Thanks!

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125  cpaquette@eac.gov
Carol - There is a 2000-character limit on inputting text directly into the comments field. What some folks have done is to enter an overview of their comments, then attach a document that contains the entire text.

Our observation has been that people who want to input more than 2000 characters are entering either a) aggregated comments and do not want to invest the time to split them out into individual comments or b) prepared marketing pieces or position papers that wander off topic.

If this person submitted their comments as an attached document, we will place it in the queue for decomposition.

Subject
Comments posting problem

There appears to be a problem with the posting to the database of my comment caused by the fact that my comment is greater than 2000 characters. As you can see, my comment is incomplete * see "GENERAL COMMENTS, Al Kolwicz, three items".

I have attached a folder containing 6 word files, each sized to fit the 2000 character limit.

Will you please correct the recent attempt to record my comment in the database by replacing the three files with the attached six files? As you can see, the sequence of the files is significant.

Thank you for your assistance.

Al Kolwicz

CAMBER
Citizens for Accurate Mail Ballot Election Results

www.users.qwest.net/~alkolwicz
http://coloradovoter.blogspot.com

CAMBER is a dedicated group of volunteers who are working to ensure that every voter gets to vote once, every vote is counted once, and that every ballot is secure and anonymous.
The Voluntary Voting System Guidelines were developed under the Help America Vote Act of 2002 (HAVA) Section 202 mandate that the U.S. Election Assistance Commission (EAC) update the 2002 Voting System Standards to address increasingly complex voting system technology. They were designed for state and local election officials to help ensure that new voting systems function accurately and reliably.

The Guidelines are provided for a 90 day public comment period which officially began June 29, 2005 upon notice in the Federal Register. All comments must be received by EAC on or before 5:00 p.m. EDT on September 30, 2005. All comments will be posted on the EAC website. Comments may also be sent to votingsystemguidelines@eac.gov or by fax to Voting System Guidelines Comments at (202) 566-3127. Comments may also be mailed to Voting System Guidelines Comments, U.S. Election Assistance Commission, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005.

The Guidelines are also available in hard copy format or on CD-ROM. Call EAC at (866) 747-1471 or (202) 566-3100 to request a copy or for more information.

At the conclusion of the public comment period and after the consideration of comments received, EAC commissioners will vote to approve the Voluntary Voting System Guidelines. The final version will be made available to the public at that time.

The public comment period is now closed. No comments will be accepted after September 30, 2005. Comments received by that date will be available for public review while the Election Assistance Commission considers revisions to the Voluntary Voting System Guidelines.

Due to the volume of comments received in the closing days of the public comment period, it may be several days before all comments received can be posted for viewing.
Carol,

Merle wanted me to make you aware of this email comment that we received. It has been posted to our database.

At the bottom of page 2 under the heading "2.2.7.2 Limited English Proficiency," there appears to be some language missing after the sentence, "HAVA Section 301(a)(4) reads in part:"

We respectfully request the EAC make this language available before the September 30, 2005 deadline for submitting comments to the proposed Voluntary Voting System Guidelines.
Hello,

My name is Matt Bishop. I’m a professor in the Department of Computer Science at the University of California, Davis.

My students and I submitted an extensive set of comments on the proposed standards for electronic voting systems. We submitted it on Sept. 28.

As of now, it is not posted on the comments web site. I know your page says it may be some time until comments were posted. I had called in mid-October and was asked to be patient, but that if it was not posted I could get them to you again (just in case they were lost).

So, my question is: have you posted all the comments you received? If so, can you please post ours? I am attaching them (just in case). If not, do you have a date when you expect to finish?

I look forward to hearing from you!

Sincerely,

Matt Bishop

NAPALC-APALC Comments on EAC Voluntary Voting System Guidelines 9.29.05.pdf
Carol - I have just walked through the posting of comments and confirmed with my guys at KSU that they are posting. I did see one potential problem with the directions... At the end of the input screen, it instructs the user to save their comments... but does not warn the user that unless they click on submit in the subsequent page, it will not upload them for posting. Could this be what happened with Morales?

Let me know if you want an additional instruction added to that line. Something like, "After saving all your comments, you must click on Submit on the following page to post your Comment."

- Merle

Subject: talking points to introduce tomorrow's VVSG discussion

Tom -

Here are some remarks for your consideration. There's no pride of authorship or fine wording here - just trying to get a few thoughts down that you might find helpful. Have left a copy of the 4 bar graphs summarizing the numbers of comments by sections of the VVSG on your chair.

1. Total number of comments received: 5670

2. We appreciate all the effort the general public, election officials, advocacy groups, academia, test labs, and vendors put into reviewing the VVSG and providing their comments. We have read and considered every comment received.

3. We were unable to deal with many of the more complex comments which relate to on-going TGDC and NIST activities for the next iteration of the VVSG. These comments will be carried over into that longer term effort.

4. Many comments dealt with procedural and election management concerns and these will be forwarded for consideration by the EAC/LASED Management Guidelines Working Group that recently got underway.

5. EAC established 3 comment review groups comprised of EAC and NIST staff: Core Requirements, Human Factors, and Security. Other NIST personnel and subject matter experts were consulted as needed on specific topics.

6. Comment review groups prepared issue papers and recommendations for consideration and policy guidance from the Commissioners. There have been extensive, in-depth Commission discussions of the VVSG - beginning in early November and continuing through last Friday afternoon. For the past few weeks nearly half of the Commission has been engaged in this effort!

7. There has been a great deal of effort on the part of many dedicated people to reach this milestone - beginning in July 2004 with NIST and the TGDC. They have continued their work for the next iteration of the VVSG, which we envision will be an on-going process to keep up with evolving technology and public expectations.

Yes, we need to add that line so people know exactly what they need to do. We don't want to assume that commenters will be knowledgeable about how to submit comments to a web application. Instructions should be precise, complete and very clear! (hanks!

Subject: Re: Fw: VVSG comments  

Carol - I have just walked through the posting of comments and confirmed with my guys at KSU that they are posting. I did see one potential problem with the directions... At the end of the input screen, it instructs the user to save their comments...but does not warn the user that unless they click on submit in the subsequent page, it will not upload them for posting. Could this be what happened with Morales? Let me know if you want an additional instruction added to that line. Something like," After saving all your comments, you must click on Submit on the following page to post your Comment."

Mr. Morales -

We have received your comments, which you sent by email. We have just recently gotten a contract in place with Kennesaw University for assistance in managing and reviewing the VVSG comments. All the email comments have been forwarded to them to enter into the database that can be viewed from the website. We anticipate having all comments received by other means than direct website submission to be posted within the next week. Thank you for your patience.

preview.jpg sectionform.jpg generalform.jpg glossaryform.jpg
Carol - There is a 2000-character limit on inputting text directly into the comments field. What some folks have done is to enter an overview of their comments, then attach a document that contains the entire text.

Our observation has been that people who want to input more than 2000 characters are entering either a) aggregated comments and do not want to invest the time to split them out into individual comments or b) prepared marketing pieces or position papers that wander off topic.

If this person submitted their comments as an attached document, we will place it in the queue for decomposition.

Comments posting problem

There appears to be a problem with the posting to the database of my comment caused by the fact that my comment is greater than 2000 characters. As you can see, my comment is incomplete * see "GENERAL COMMENTS, Al Kolwicz, three items".

I have attached a folder containing 6 word files, each sized to fit the
2000 character limit.

Will you please correct the recent attempt to record my comment in the database by replacing the three files with the attached six files? As you can see, the sequence of the files is significant.

Thank you for your assistance.

CAMBER is a dedicated group of volunteers who are working to ensure that every voter gets to vote once, every vote is counted once, and that every ballot is secure and anonymous.
Hello,

My name is Matt Bishop. I'm a professor in the Department of Computer Science at the University of California, Davis.

My students and I submitted an extensive set of comments on the proposed standards for electronic voting systems. We submitted it on Sept. 28. As of now, it is not posted on the comments web site. I know your page says it may be some time until comments were posted. I had called in mid-October and was asked to be patient, but that if it was not posted I could get them to you again (just in case they were lost).
So, my question is: have you posted all the comments you received? If so, can you please post ours? I am attaching them (just in case). If not, do you have a date when you expect to finish?

I look forward to hearing from you!

Sincerely,

Matt Bishop

Subject Election Reform
Dear Chair:

Five years after the unprecedented crisis of the 2000 presidential election—and one year after an election that barely escaped the same fate—our election system remains imperiled. Unless urgent reforms are adopted at the state level, the problems in our election infrastructure could very well lead to significant national consequences in the 2006 midterm elections.

Unfortunately, national attention to the issue of election reform has been sorely lacking. Despite the passage of the Help America Vote Act (HAVA) in 2002, public opinion polls show that Americans’ confidence in our election system is at an historic low. Policymakers and the media often focus on the issue only in the days preceding major elections—months after state and county election administrators have made the critical decisions that will determine how the system will perform on Election Day.

A analysis of recent electoral research finds that one year before the 2006 midterm elections, more than 90 million registered voters are exposed to serious electoral deficiencies, including low-quality voter registration databases, inadequate safeguards for purging voters from the rolls, and insufficiently tested voting machines.

I commend to you the following report:

Election Reform: The Time Is Now/The Urgent Need To Improve Our Election Infrastructure

http://www.americanprogress.org/atf/cf/{E9245FE4-9A2B-43C7-A521-5D6FF2E06E03}/ELECTORAL%20REFORM.PDF

I hope you will take the time to review these important findings and give this report the weight it deserves.

Thank you for the opportunity to bring this report to your attention.

Mindful of the enormous responsibilities which stand before you, I am,

Yours sincerely,

Robert E. Rutkowski

Subject FW: EAC Voluntary Voting System Guidelines – NAPALC-APALC Comments 9.29.05

Dear EAC:

On Sept. 29, APALC and NAPALC submitted joint comments on the EAC's proposed voluntary voting system guidelines. I am forwarding the email transmitting these comments. I do not see the comments posted on the EAC's website. Would someone at the EAC be able to check on whether these comments were posted and let me know when the comments have been posted?

Thanks very much,
Eugene Lee
Dear Commissioners:

On behalf of the National Asian Pacific American Legal Consortium (NAPALC) and the Asian Pacific American Legal Center of Southern California (APALC), I submit the joint comments of NAPALC and APALC on the proposed Voluntary Voting System Guidelines. The comments are attached to this email as a PDF file.

Yours truly,
Eugene Lee

FOIA request
November 16, 2005

Fax 202-566-3127

Julie Thompson
FOIA Officer
United States Election Assistance Commission
1225 New York Avenue N.W., Suite - 1100
Washington, DC 20005

RE: Freedom of Information Act Request

Dear Ms. Thompson,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning the performance of the agency contract awarded under no bid circumstances to Kennesaw State University. The documents sought include, but are not limited to information regarding:

- Designation and certification of the agency's contracting officer;
- The docket manager for the Voluntary Voting System Guidelines (VVSG) comment process;
- The docket rules for the VVSG comment period and final standards promulgation;
- Contract performance reports, which includes the status of work under contract;
- Communications from those who submitted comments on the status of comments and the ease of electronic access to the web posted comments to the VVSG;
- Review of comments submitted for the VVSG;
- A copy of VVSG comments submitted to both the agency and the contractor.
- The status of comments submitted, i.e. unread, read, categorized, assessment, and disposition;
- Communications between the EAC, TGDC, and contractor over changes to the VVSG based on comments submitted;
- Increased cost above the initial award to Kennesaw State University of $175,000;
- Documents on subcontracts or consultancies issues by Kennesaw State University under the EAC contract in question with Brit Williams, TEM Consulting, or Stephen Berger.

This FOIA request includes notes, statements, memorandum, letters, compact disks, and e-mails regarding meetings and communications on the performance of the contract with Kennesaw State University.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.
Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

[Signature]

Bobbie -

We received in excess of 3000 comments by email and most of these in the final 2 days of the comment period. You do not see all these emails on the website as yet because they all have to be manually entered into the database. This is a very time consuming process when there are so many to handle. All comments received will be posted to the EAC website no later than mid-December. We have reviewed all these emails for content and they are being factored into the process of finalizing the VVSG for adoption by the Commission.

Hi Carol. I hope all is well with you. VV is interested in the number of comments on the proposed guidelines that the EAC received via email etc... Who would I ask? You probably haven’t analyzed them yet, but we would like to know the gross number—clearly we can see the 1,000 plus up on the web. In the end, will all of the acceptable comments be posted on the EAC site? Thanks very much, Bobbie

Ms. Paquette,
Thank you very much for your voicemail today.

Could you please email me with instructions as to how to locate on the EAC website the posting the public Comment submitted on behalf of ACCURATE regarding the proposed 2205 VVSG?

Thanks and best regards,
Cecilia Walsh
Law Student Intern
Samuelson Law, Technology & Public Policy Clinic, UC Berkeley
Dear Ms. Paquette,

We submitted a public comment on September 30, 2005 on the proposed 2005 Voluntary Voting System Guidelines (2005 VVSG) on behalf of ACCURATE (A Center for Correct, Usable, Reliable And Transparent Elections), an NSF-funded group conducting research directed toward increasing the trustworthiness of voting systems.

We would like to request an update on the EAC's review of the public comments received and the status of the 2005 VVSG.

Thank you very much for your help!

Best regards,
Cecilia Walsh & Erica Brand

Connor -

Can you check this out? I reviewed all the comments in the database yesterday and didn't see one there from Morales - and I was specifically looking for messages from him. It's possible I just missed it. I did think it a bit odd that there were no new comments to approve for posting when I hadn't checked it for a week while on vacation. But, in general, the response has been very light compared to what NIST was receiving earlier in the process. Please advise. Thanks!

Carol,

(This is a follow up to my message from last night. We have the Scytl comments - they were posted on 9/9/2005.)

Of the vendor comment documents that you emailed to me:

We already have Hart Intercivic, Populex, Sequoia and Scytl.
We have Accupoll in a Hard copy format.
We do not have ES&S.

Thanks,
Connor

I have attached the proposed updated message for the web site. The updated text is in bold. I will call in a few minutes to get your feedback.

Thanks,
Connor

>>> <cpaquette@eac.gov> 10/4/2005 1:23:44 PM >>>
Merle, Connor -

The Commissioners decided today that they want you to "turn off" the capability for people to continue sending in comments. Please draft a message to the effect that the comment period ended on September 30 and no comments will be accepted after that date. Also need to say that comments received by that date will be available for public review while the Commission is considering what revisions might be made to the VVSG. For the period while you're working on getting all the email, etc., comments posted, might be useful to mention that due to volume of comments received in the last days of the comment period people might not see their comments posted for a few days. Make sure that the couple of emails after 9/30 that I sent by mistake yesterday are not available for viewing. At that time, you can replace this statement with one that says that all comments are posted. We will still have to capture all the comments received after the deadline, they just won't be approved for public view. I'll hold off forwarding any more of the email comments received after the 30th until you tell me that all the timely comments have been entered. We will also be shutting down the VVSG email address. Would like to review message text before it's posted. Thanks!

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125   cpaquette@eac.gov
Carol - There is a 2000-character limit on inputting text directly into the comments field. What some folks have done is to enter an overview of their comments, then attach a document that contains the entire text.

Our observation has been that people who want to input more than 2000 characters are entering either a) aggregated comments and do not want to invest the time to split them out into individual comments or b) prepared marketing pieces or position papers that wander off topic.

If this person submitted their comments as an attached document, we will place it in the queue for decomposition.

- Merle

Subject
Comments posting problem

There appears to be a problem with the posting to the database of my comment caused by the fact that my comment is greater than 2000 characters. As you can see, my comment is incomplete * see "GENERAL COMMENTS, Al Kolwicz, three items".

I have attached a folder containing 6 word files, each sized to fit the 2000 character limit.

Will you please correct the recent attempt to record my comment in the database by replacing the three files with the attached six files? As you can see, the sequence of the files is significant.

Thank you for your assistance.

Al Kolwicz
CAMBER
Citizens for Accurate Mail Ballot Election Results
2867 Tincup Circle
Boulder, CO 80305

www.users.qwest.net/~alkolwicz
http://coloradovoter.blogspot.com

CAMBER is a dedicated group of volunteers who are working to ensure that every voter gets to vote once, every vote is counted once, and that every ballot is secure and anonymous.
The Voluntary Voting System Guidelines were developed under the Help America Vote Act of 2002 (HAVA) Section 202 mandate that the U.S. Election Assistance Commission (EAC) update the 2002 Voting System Standards to address increasingly complex voting system technology. They were designed for state and local election officials to help ensure that new voting systems function accurately and reliably.

The Guidelines are provided for a 90 day public comment period which officially began June 29, 2005 upon notice in the Federal Register. All comments must be received by EAC on or before 5:00 p.m. EDT on September 30, 2005. All comments will be posted on the EAC website. Comments may also be sent to votingsystemguidelines@eac.gov or by fax to Voting System Guidelines Comments at (202) 566-3127. Comments may also be mailed to Voting System Guidelines Comments, U.S. Election Assistance Commission, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005.

The Guidelines are also available in hard copy format or on CD-ROM. Call EAC at (866) 747-1471 or (202) 566-3100 to request a copy or for more information.

At the conclusion of the public comment period and after the consideration of comments received, EAC commissioners will vote to approve the Voluntary Voting System Guidelines. The final version will be made available to the public at that time.

The public comment period is now closed. No comments will be accepted after September 30, 2005. Comments received by that date will be available for public review while the Election Assistance Commission considers revisions to the Voluntary Voting System Guidelines.

Due to the volume of comments received in the closing days of the public comment period, it may be several days before all comments received can be posted for viewing.
Carol,

Merle wanted me to make you aware of this email comment that we received. It has been posted to our database.

At the bottom of page 2 under the heading "2.2.7.2 Limited English Proficiency," there appears to be some language missing after the sentence, "HAVA Section 301(a)(4) reads in part:"

We respectfully request the EAC make this language available before the September 30, 2005 deadline for submitting comments to the proposed Voluntary Voting System Guidelines.
Hello,

My name is Matt Bishop. I'm a professor in the Department of Computer Science at the University of California, Davis.

My students and I submitted an extensive set of comments on the proposed standards for electronic voting systems. We submitted it on Sept. 28.

As of now, it is not posted on the comments web site. I know your page says it may be some time until comments were posted. I had called in mid-October and was asked to be patient, but that if it was not posted I could get them to you again (just in case they were lost).

So, my question is: have you posted all the comments you received? If so, can you please post ours? I am attaching them (just in case). If not, do you have a date when you expect to finish?

I look forward to hearing from you!

Sincerely,

Matt Bishop

NAPALC•APALC Comments on EAC Voluntary Voting System Guidelines 9.29.05.pdf
Carol - I have just walked through the posting of comments and confirmed with my guys at KSU that they are posting. I did see one potential problem with the directions... At the end of the input screen, it instructs the user to save their comments...but does not warn the user that unless they click on submit in the subsequent page, it will not upload them for posting. Could this be what happened with Morales?

Let me know if you want an additional instruction added to that line. Something like, "After saving all your comments, you must click on Submit on the following page to post your Comment."

- Merle

Carol - I have just walked through the posting of comments and confirmed with my guys at KSU that they are posting. I did see one potential problem with the directions... At the end of the input screen, it instructs the user to save their comments...but does not warn the user that unless they click on submit in the subsequent page, it will not upload them for posting. Could this be what happened with Morales?

Let me know if you want an additional instruction added to that line. Something like," After saving all your comments, you must click on Submit on the following page to post your Comment."

Connor -

Can you check this out? I reviewed all the comments in the database yesterday and didn't see one there from Morales - and I was specifically looking for messages from him. It's possible I just missed it. I did think it a bit odd that there were no new comments to approve for posting when I hadn't checked it for a week while on vacation. But, in general, the response has been very light compared to what NIST was receiving earlier in the process. Please advise. Thanks!

Mr. Morales -

We have received your comments, which you sent by email. We have just recently gotten a contract in place with Kennesaw University for assistance in managing and reviewing the VVSG comments. All the email comments have been forwarded to them to enter into the database that can be viewed from the website. We anticipate having all comments received by other means than direct website submission to be posted within the next week. Thank you for your patience.

Merle, Connor -

We would like to have the following changes made to VVSG webpage, ready to post early afternoon tomorrow - after Commissioners have taken a vote. You can coordinate with Jeannie Layson or Bryan Whitener if there are any questions or clarifications needed. Thanks!

Carol A. Paquette
U.S. Election Assistance Commission

- Overview
- Overview of Volume I
Tom -

Here are some remarks for your consideration. There's no pride of authorship or fine wording here - just trying to get a few thoughts down that you might find helpful. Have left a copy of the 4 bar graphs summarizing the numbers of comments by sections of the VVSG on your chair.

1. Total number of comments received: 5670

2. We appreciate all the effort the general public, election officials, advocacy groups, academia, test labs, and vendors put into reviewing the VVSG and providing their comments. We have read and considered every comment received.

3. We were unable to deal with many of the more complex comments which relate to on-going TGDC and NIST activities for the next iteration of the VVSG. These comments will be carried over into that longer term effort.

4. Many comments dealt with procedural and election management concerns and these will be forwarded for consideration by the EAC/NSED Management Guidelines Working Group that recently got underway.

5. EAC established 3 comment review groups comprised of EAC and NIST staff: Core Requirements, Human Factors, and Security. Other NIST personnel and subject matter experts were consulted as needed on specific topics.

6. Comment review groups prepared issue papers and recommendations for consideration and policy guidance from the Commissioners. There have been extensive, in-depth Commission discussions of the VVSG - beginning in early November and continuing through last Friday afternoon. For the past few weeks nearly half of the Commission has been engaged in this effort!

7. There has been a great deal of effort on the part of many dedicated people to reach this milestone - beginning in July 2004 with NIST and the TGDC. They have continued their work for the next iteration of the VVSG, which we envision will be an ongoing process to keep up with evolving technology and public expectations.

Carol - There is a 2000-character limit on inputting text directly into the comments field. What some folks have done is to enter an overview of their comments, then attach a document that contains the entire text.

Our observation has been that people who want to input more than 2000 characters are entering either a) aggregated comments and do not want to invest the time to split them out into individual comments or b) prepared marketing pieces or position papers that wander off topic.

If this person submitted their comments as an attached document, we will place it in the queue for decomposition.

Subject Our comments not yet posted

Hello,

My name is Matt Bishop. I'm a professor in the Department of Computer Science at the University of California, Davis.

My students and I submitted an extensive set of comments on the proposed standards for electronic voting systems. We submitted it on Sept. 28.

As of now, it is not posted on the comments web site. I know your page says it may be some time until comments were posted. I had called in mid-October and was asked to be patient, but that if it was not posted I could get them to you again (just in case they were lost).
So, my question is: have you posted all the comments you received? If so, can you please post ours? I am attaching them (just in case). If not, do you have a date when you expect to finish?

I look forward to hearing from you!

Sincerely,

Matt Bishop

Dear Chair:

Five years after the unprecedented crisis of the 2000 presidential election—and one year after an election that barely escaped the same fate—our election system remains imperiled. Unless urgent reforms are adopted at the state level, the problems in our election infrastructure could very well lead to significant national consequences in the 2006 midterm elections.

Unfortunately, national attention to the issue of election reform has been sorely lacking. Despite the passage of the Help America Vote Act (HAVA) in 2002, public opinion polls show that Americans' confidence in our election system is at an historic low. Policymakers and the media often focus on the issue only in the days preceding major elections—months after state and county election administrators have made the critical decisions that will determine how the system will perform on Election Day.

A analysis of recent electoral research finds that one year before the 2006 midterm elections, more than 90 million registered voters are exposed to serious electoral deficiencies, including low-quality voter registration databases, inadequate safeguards for purging voters from the rolls, and insufficiently tested voting machines.

I commend to you the following report:

Election Reform: The Time Is Now/The Urgent Need To Improve Our Election Infrastructure

http://www.americanprogress.org/atf/cf/{E9245FE4-9A2B-43C7-A521-5D6FF2E06E03)/ELECTORAL%20REFORM.PDF

I hope you will take the time to review these important findings and give this report the weight it deserves.

Thank you for the opportunity to bring this report to your attention.

Mindful of the enormous responsibilities which stand before you, I am,

Yours sincerely,

Robert E. Rutkowski

NAPALC-APALC Comments on EAC Voluntary Voting System Guidelines 9.29.05.pdf
Had a typo in your address.

Joe -

Apologize for not responding sooner. There has been a lot of travel in the past two months and I've overlooked some emails. The VVSG comment section on the EAC webpage provides information on how to provide comments. We prefer that you use the electronic form on the website, but you can also respond by email or snail mail or FAX. All the information is there. The deadline is 9/30.
Mr. Morales -

We have received your comments, which you sent by email. We have just recently gotten a contract in place with Kennesaw University for assistance in managing and reviewing the VVSG comments. All the email comments have been forwarded to them to enter into the database that can be viewed from the website. Mr. Morales -

There is no filtering or blocking being done on comments. However, I reviewed all the comments we have received yesterday afternoon and there were no comments from you in the on-line database. I am out of office in meetings for the next 3 days but will check to see if there is a problem with that application. Thank you for bringing this to our attention.

Dear Commissioners:

On behalf of the National Asian Pacific American Legal Consortium (NAPALC) and the Asian Pacific American Legal Center of Southern California (APALC), I submit the joint comments of NAPALC and APALC on the proposed Voluntary Voting System Guidelines. The comments are attached to this email as a PDF file.

Yours truly,
Eugene Lee

STATEMENT OF WORK FOR TECHNICAL ASSISTANCE TO THE EAC FOR THE COLLECTION, MANAGEMENT, REVIEW, AND RESPONSE TO THE PUBLIC COMMENTS RECEIVED ON THE VOLUNTARY VOTING SYSTEM GUIDELINES

Background. On May 9, 2005, the EAC received the initial set of recommendations for the HAVA-mandated Voluntary Voting System Guidelines from the Technical Guidelines Development Committee (TGDC). After performing its due diligence review of this document, the EAC made several changes and published the revised document for a 90 day public comment period. This period began on June 29, with publication of a notice in the Federal Register.

The EAC has established several alternative methods for submitting comments:
- On-line electronic comment form at www.eac.gov
- E-mail to voting.systemguidelines@eac.gov
- Postal mail to Voting System Guidelines Comments at EAC
- FAX to Voting System Guidelines Comments at 202.566.3127

The on-line comment form is associated with an application developed to assist with the management, tracking, and review of comments. This application will permit the manual entry of comments received from other sources so that all comments will be stored and managed from a single source. All comments will be posted for public review on the EAC website.

All comments will need to be reviewed and categorized into editorial, substantive, and other general categories useful for management purposes. Substantive comments will be assessed to determine if they indicate a need to modify the Guidelines. This may require some research and analysis, including consultation with NIST and/or the TGDC. At the conclusion of the comment period, EAC will be required to summarize the numbers and types of comments received and their disposition.

Tasks.

1. Host document for public review and post comments received. The Contractor shall host the Voluntary Voting System Guidelines document and commenting application on their website and make them available for public access from the start of the contract until the close of the comment period (September 26, 2005). This access shall be provided by a hot link from the EAC homepage.

The Contractor shall perform initial screening of comments for profanity or other offensive content. Originators of such comments will be informed that such material cannot be posted for public consumption. These comments will be
retained in the database, but not approved for public posting. All other comments will be posted to the website for public review.

The EAC will forward to the Contractor all comments received by other means than the on-line comment form for entry into the comment database for public posting and analysis. The Contractor shall provide appropriate quality control to ensure that all comments are captured correctly. Comments will be entered verbatim as received, with no corrections or excerpting.

Hosting of comments will extend for an estimated 30 days beyond the close of the comment period to allow sufficient time to review and determine their disposition. All comments shall be copied to CDs for transfer and retention by the EAC at the conclusion of the contract.

2. Recommend a comment classification schema and organize comments accordingly. The Contractor shall recommend a classification schema for categorizing comments relative to the degree of analysis required. For example, comments dealing with editorial points, typographical errors, and grammar can be handled very straightforwardly. Comments that are more technical in nature may require considerable analysis and perhaps research in order to make a determination on their disposition. Upon approval of the schema by EAC, the Contractor shall organize comments in this manner and periodically provide reports to the EAC on the number and kinds of comments received, and recommendations for the disposition of substantive comments. Comments shall be mapped to relevant portions of the Guidelines document. Periodic teleconferences will be conducted to review status of work, discuss comments and recommendations, and identify issues that will require consultation with NIST or other sources for resolution.

3. Update standards referenced in Guidelines. There are several places in the Guidelines that refer to standards promulgated by other organizations, e.g., ANSI, IEEE, IEC, MILSTD. The Contractor shall research all standards references to identify the latest version and ensure that this is the version referenced in the Guidelines. All references must include the date and version number, if appropriate. In addition, the Contractor shall research commercial practice and other sources of standards to identify replacements for the MILSTD references no longer maintained by the Department of Defense. The Contractor will edit references to standards in the body of the Guidelines to the title of the standard only and key the entry to the References section. This will facilitate the future issuance of technical addenda to the References as versions of standards evolve without having to create change notices for the body of the document.

4. Develop a comprehensive Glossary of election terms related to voting systems and certification. The Glossary in the 2005 Guidelines has been expanded from the 2002 Voting Systems Standards. However, it needs further work. All key terms in the body of the document should be included in the Glossary. In addition,
some terms are defined somewhat differently by various jurisdictions (e.g., absentee voting). Conversely, some concepts are referred to by different terms in different jurisdictions (e.g., ballot type, ballot style). The Contractor shall make recommendations to EAC for additional terms and additional definitions to be included in the Glossary.

5. **Maintain master copy of Guidelines and make revisions as directed by EAC.** EAC intends to revise the Guidelines throughout the comment period to expedite the process of issuing the final Guidelines at the end of that period. The Contractor shall maintain the master copy of the Guidelines and make revisions as directed by EAC. The Contractor shall maintain strict configuration management and version control of all changes.

6. **Assist EAC in planning and conducting Guidelines discussions with statutory boards.** HAVA mandates that all guidance issued by the EAC must be reviewed and commented on by the Board of Advisors and the Standards Board. The Board of Advisors is scheduled to meet in Portland, Oregon, August 3-5. The Standards Board is scheduled to meet in Denver, Colorado, August 24-25. The Contractor shall assist the EAC by facilitating the discussion of the Guidelines at these meetings. The Contractor shall take notes at these meetings and collect all comments provided by the Board members.

7. **Attend public hearings on Guidelines.** One public hearing was conducted in New York City on June 30. Two additional hearings are planned. One is at Caltech in Pasadena, California, on July 28. The other is scheduled for Denver, Colorado, on August 23. The Contractor shall attend these hearings to maintain awareness of the concerns and issues that members of the election community and the public express regarding the Guidelines.
Madam Chair -

Let me provide some explanation for this cost. The hourly rate that Steve is quoting for this work is $135. This is a reduction from the $165 per hour rate he charges commercial entities. This rate includes not just his personal compensation, but also a pro-rated amount to cover the costs of operating his business (e.g., office space, telephone, computer, supplies, liability insurance, business licenses and taxes, professional licenses, accounting services). In addition, as an independent consultant, his business expenses include paying both the employer and employee contributions to Social Security and Medicare, plus his personal health insurance premiums. The rate Steve is quoting is quite reasonable for an experienced senior professional engineer. I had estimated an hourly rate of $125 for the peer reviewers EAC will be contracting with for reviewing system test plans; this figure was based on industry data and less senior people. Hope this is helpful.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov

I am not willing to agree to a consultant contract that will pay one individual 5,600 dollars per week.

Sent from my BlackBerry Wireless Handheld
Carol A. Paquette

This amount covers six weeks of labor hours, which amounts to $32,400. He will need to make possibly two trips here from his business location in Texas, plus minor incidental expenses such as long distance phone calls, etc. So I rounded the amount to $40,000 to cover these additional costs. $40,000 is a ceiling amount for the contract. We will only be billed for hours worked and actual travel expenses incurred. This would be a Time & Materials contract, not a Fixed Price.
Please explain what would be covered in the 40,000 dollars.

Subject: proposed consulting contract to assist with NASED/EAC transition work

Commissioners et al.

The work on developing the EAC processes, documentation, etc., for transitioning lab accreditation and system certification from NASED to EAC has fallen significantly behind schedule. The project timeline called for completion of this work for Commissioner review by the end of May. We are perhaps 50% complete at this point.

We had requested assistance from NIST to work with Brian Hancock on this effort, but they have not been forthcoming with meaningful help. They provided a point of contact who passed on a lot of reference material for Brian to review, but they haven’t identified anyone to help with defining the processes and preparing the documentation. The point of contact has since been diverted by some family medical problems, and Lynne Rosenthal hasn’t been able to identify another person.

Prior to his departure, Commissioner Soaries encouraged me to find some additional resources to help move this work to completion. The Chair similarly advised me about two weeks ago when I was speaking to her about my concern over the lagging schedule.

In response to this direction to get help, I sent an email to Steve Berger, David Karmol, Paul Craft, Brit Williams, and Michael Shamos, asking if they could identify any individuals or companies we could contract with quickly to get this work done. Steve Berger responded that he could assist. I checked with EAC Counsel’s Office to see if there were any issues regarding EAC contracting with a member of the TGDC. Julie and Gavin informed me that there were no problems with this. Steve is very well-qualified by education and experience to assist us in this effort. Paul Craft and Brit Williams concurred that Steve could more than adequately fill the requirement.

Brian and I have had several conversations with Steve and are convinced that his assistance will enable
us to move ahead quickly to meet our revised target completion date of June 30. He has worked on defining similar quality conformance programs for other organizations and is knowledgeable of all the relevant standards, etc., and which need to be applied.

Consequently, I am recommending that the EAC enter into a consulting contract with Steve Berger for a not to exceed amount of $40,000 and a period of performance from June 1 through July 31. The first milestone is to help Brian complete this work for Commission review by June 30. Steve’s time in the month of July would be utilized to respond to questions and comments from the Commissioners to complete the work for Commission approval and establishment of a transition date.

I am available to discuss this matter and answer any questions you may have. If you are in agreement with this course of action, I will ask DeAnna to prepare appropriate consensus vote.

FOIA File
FOIA File
Ms. Lillie Coney  
Associate Director  
Electronic Privacy Information Center (EPIC)  
1718 Connecticut Ave, NW  
Washington, DC 20009

Dear Ms. Coney:

This letter responds to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on September 14, 2005 (dated September 12, 2005). The request seeks certain contracts and contract related documents.

The EAC is in the process of gathering the documents responsive to your request. Given that you seek the release of contracts which may contain confidential commercial information, the EAC is required to take certain additional steps before a final determination regarding release may be made. Consistent with Executive Order 12600, titled Predisclosure Notification Procedures for Confidential Commercial Information, the EAC will contact the submitter of the information requested. These organizations or individuals will be provided the opportunity to identify information they believe is covered by FOIA's confidential commercial information exception (5 U.S.C. 522(b)(4)). The submitters will be given 10 working days to provide a response. The final decision to release any documents responsive to your request will rest with the EAC. Given the additional coordination required to process your FOIA request, the EAC requires an additional 20 working days to respond. The EAC must take its responsibility to protect confidential commercial information seriously, as the Trade Secrets Act (18 U.S.C.A. § 1905) makes it a criminal offense for a Federal employee to disclose such information.

This letter is not a final response to your FOIA request. If you need further information on the EAC actions, you may reach me at (202) 566-3100 or ggilmour@eac.gov.

Sincerely,

Gavin S. Gilmour  
Associate General Counsel

1. Your Request Letter (dated September 12, 2005)
Ms. Coney,

I received your telephone call this morning. We are working on your FOIA request consistent with our last letter. As required by law, we work on these requests on a first in, first out basis (EAC has no fast track). Your request is presently our FOIA priority. As you know, we are very small agency with limited resource, but work hard to meet the needs of the public. At this point, I expect you will have our response within the additional 20 working days noted in our last letter.

Sincerely,

Gavin S. Gilmour
Associate General Counsel
United States Election Assistance Commission

Ms. Lillie Coney  
Associate Director  
Electronic Privacy Information Center (EPIC)  
1718 Connecticut Ave, NW  
Washington, DC 20009

Dear Ms. Coney:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on September 14, 2005 (dated September 12, 2005). A copy of your request is attached.

Please find documents responsive to the above referenced request, enclosed. As you look through the materials you will find that a few pieces of information have been redacted in black. As required by FOIA exemption 6, the EAC has redacted certain pieces of personal information, including home addresses, telephone numbers, names, bank account information, employer identification numbers, and personal e-mail addresses. The EAC has also redacted confidential commercial information as mandated by FOIA exemption 4. Specifically, the EAC has redacted information that can be used to calculate actual costs regarding Kennesaw State labor rates. Further, the EAC has withheld one document (three pages) and five e-mails (less than a page each) pursuant to the deliberative process privilege and FOIA exemption 5. The EAC has withheld these documents as they are predecisional documents in which EAC decision makers discuss contracting policy options.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Gavin S. Gilmour  
Associate General Counsel

RE: Freedom of Information Act Request

Dear Ms. Thompson,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning agency contracts awarded between July 9, 2004 and the date of the receipt of this letter. The documents sought include, but are not limited to documents regarding contracts, memorandum of understanding, and fee for service agreements in the employment of Stephen Berger and Kennesaw State University by the U.S. Election Assistance Commission (EAC). We also seek documents regarding contracts, memorandum of understanding, fee for service agreements, and employment of other current or former members of EAC’s Technical Guidelines Development Committee (TGDC). Also provide all memorandum, letters and e-mails regarding meetings and communications to enter into contracts, memorandum of understanding, fee for service agreements, and employment of TGDC members or institutions they were affiliated with within one year of the date of the first meeting of the Committee.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F. Supp. 2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public’s understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

Lillie Coney
Associate Director
Mr. Gilmour, I will assume that the 20 day extension is in addition to the 20 days initial requested on EPIC's September 12, 2005 letter, which did not begin until the agency received the letter on September 16, 2005. This would mean that a reply in part or in full is expected on or before November 14, 2005, because November 11, 2005 is Veterans Day.

Thank you for the reply to my request.

018240
PURCHASE ORDER TERMS AND CONDITIONS

52.229-70 FEDERAL, STATE, AND LOCAL TAXES (APR 1984)

The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from taxes. (A) Government's bill of lading number covering the shipment (if any); (B) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered and services performed, less any deductions provided in this contract. Unless otherwise specified in the contract, payment shall be made on partial deliveries accepted by the Government. If (a) the amount due on the deliveries warrants it; or (b) the Contractor requests it and the amount due on the deliveries is at least $1,000 or 50 percent of the total contract amount.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will form a part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

PROMPT PAYMENT

Prompt Payment clause 52.232-26 is incorporated in this contract by reference. The clause contains information on payment due date, invoice requirements, constructive acceptance and interest penalties. Certain portions of the clause regarding payment due date, invoice requirements, and constructive acceptance have been extracted for your convenience. All days referred to in the extracts below are calendar days.

(a)(2) The due date for making invoice payments by the designated payment office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor is warranted.

(a)(4) An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include the items listed in (i) through (vii). If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 7 days after receipt of the invoice at the designated billing office. Untimely notification will be taken into account in the computation of any Interest penalty owed the Contractor.

(i) Name and address of the Contractor.

(ii) Invoice date.

(iii) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).

(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount terms). Bill of lading number and weight of shipment will be shown for shipments on Government bills of lading.

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the contract or in a proper notice of assignment).

(viii) Name (where practicable), title, phone number, and mailing address of person to be notified in event of a defective invoice.

NOTE: Invoices must include the ACT number (block 4) and shall be submitted in an original only, unless otherwise specified by the Government. The "To" address must correspond to the remittance address in block 12.

(a)(6) If for the sole purpose of computing an interest penalty that might be due the Contractor, Government acceptance shall be deemed to have occurred constructively on the 7th day (unless otherwise specified in block 20) after the Government delivered the supplies or performed the services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality or contractor compliance with a contract provision...

52.222-40 SERVICE CONTRACT ACT OF 1986, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wages specified under Section 6 of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-203).

52.222-41 SERVICE CONTRACT ACT, OF 1986, AS AMENDED (MAY 1989)

The GSA Form 2166, Service Contract Act of 1985 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

52.252-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

52.203-1 Officials Not to Benefit (APR 84)

52.203-3 Gratuities (APR 84)

52.203-6 Covenant Against Contingent Fees (APR 84)

52.203-8 Restriction on Subcontractor Sales to the Government (JUL 84)

52.203-7 Anti-Kickback Procedures (OCT 88)

52.211-8 Variation in Quantity (APR 84)

(in the preceding clause, the permissible variations are stated in the schedule)

52.222-3 Convict Labor (APR 84)

52.222-28 Equal Opportunity (APR 84)(Applicable when amount exceeds $10,000).

52.222-39 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84)(Applicable when amount exceeds $10,000)

52.222-39 Affirmative Action for Handicapped Workers (APR 84)(Applicable when amount exceeds $2,000)

52.222-37 Employment Rights on Special Disabled and Vietnam Era Veterans of the Vietnam Era (JAN 88)(Applicable whenever clause 52.222-36 is included).

52.223-6 Drug Free Workplace (JUL 80)(Applicable if contract is awarded to an individual.

52.228-3 Buy American Act - Supplies (JAN 89)

52.229-5, 7 Restrictions on Foreign Purchases (MAY 92)

52.232-26 Prompt Payment (SEP 82)

52.233-1 Disputes (DEC 81)

52.233-3 Protest After Award (AUG 89)

52.246-1 Contractor Inspection Requirements (APR 84)

52.249-8 Default (Fixed-Price Supply and Service) (APR 84)

Applicable to purchase orders for services:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88)(Applicable when amount is between $2,500 and $10,000).

52.222-20 Walsh-Healey Public Contracts Act (APR 84)(Applicable when amount exceeds $10,000).

52.243-1 Changes - Fixed Price (AUG 87)

52.249-1 Termination for Convenience of the Government (Fixed Price) (Short Form) (APR 84)

Applicable to purchase orders for services:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88)(Applicable when amount is between $2,500 and $10,000).

52.224-2 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88)(Applicable when amount exceeds $10,000).

52.243-1 Changes - Fixed Price (AUG 84) - Alt. II

52.249-4 Termination for Convenience of the Government (Services)(Short Form)(APR 84)

018241

GSA FORM 300 BACK (REV. 2-93)
Form **W-9**  
(Rev. December 2000)  
Department of the Treasury  
Internal Revenue Service

**Request for Taxpayer Identification Number and Certification**  
Give form to the requester. Do not send to the IRS.

<table>
<thead>
<tr>
<th>Name (See Specific Instructions on page 2)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Business name, if different from above. (See Specific Instructions on page 2)</td>
</tr>
</tbody>
</table>
| Check appropriate box:

  - Corporation  
  - Partnership  
  - Other |
| Address (number, street, and apt. or suite no.) |
| City, state, and ZIP code |

**Part I  Taxpayer Identification Number (TIN)**

Enter your TIN in the appropriate box. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 2. For other entities, it is your employer identification number (EIN). If you do not have a number, see How to get a TIN on page 2.

Note: If the account is in more than one name, see the chart on page 2 for guidelines on whose number to enter.

**Part II  For U.S. Payees Exempt From Backup Withholding**

(See the Instructions on page 2)

**Part III  Certification**

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. person (including a U.S. resident alien).

Certification Instructions. You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply.

For mortgage interest paid, acquisition or abandonment of secured property, 'cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than Interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. (See the instructions on page 2.)

**Sign Here**

<table>
<thead>
<tr>
<th>Signature of U.S. person</th>
</tr>
</thead>

<tr>
<td>Date</td>
</tr>
</tbody>
</table>

**Purpose of Form**

A person who is required to file an information return with the IRS must get your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

Use Form W-9 only if you are a U.S. person (including a resident alien), to give your correct TIN to the person requesting it (the requester) and, when applicable, to:

- Certify the TIN you are giving is correct (or you are waiting for a number to be issued),
- Certify you are not subject to backup withholding, or
- Claim exemption from backup withholding if you are a U.S. exempt payee.

If you are a foreign person, use the appropriate Form W-8. See Pub. 515, Withholding of Tax on Nonresident Aliens and Foreign Corporations.

Note: If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

What is backup withholding? Persons making certain payments to you must withhold and pay to the IRS 31% of such payments under certain conditions. This is called "backup withholding." Payments that may be subject to backup withholding include interest, dividends, broker and barter exchange transactions, rents, royalties, nonemployee pay, and certain payments from fishing boat operators. Real estate transactions are not subject to backup withholding.

If you give the requester your correct TIN, make the proper certifications, and report all your taxable interest and dividends on your tax return, payments you receive will be subject to backup withholding:

- 1. You do not furnish your TIN to the requester, or
- 2. You do not certify your TIN when required (see the Part III Instructions on page 2 for details), or
- 3. The IRS tells the requester that you furnished an incorrect TIN, or
- 4. The IRS tells you that you are subject to backup withholding because you did not report all your interest and dividends on your tax return (for reportable interest and dividends only), or
- 5. You do not certify to the requester that you are not subject to backup withholding under 4 above (for reportable interest and dividend accounts opened after 1993 only).

Certain payees and payments are exempt from backup withholding. See the Part II instructions and the separate Instructions for the Requester of Form W-9.

**Penalties**

Failure to furnish TIN. If you fail to furnish your correct TIN to a requester, you are subject to a penalty of $50 for each such failure unless your failure is due to reasonable cause and not to willful neglect.

Civil penalty for false information with respect to withholding. If you make a false statement with no reasonable basis that results in no backup withholding, you are subject to a $500 penalty.

Criminal penalty for falsifying certifications or affirmations may subject you to criminal penalties including fines and/or imprisonment.

Misuse of TINs. If the requester discloses or uses TINs in violation of Federal law, the requester may be subject to civil and criminal penalties.
Specific Instructions

Name. If you are an individual, you must generally enter the name shown on your social security card. However, if you have changed your last name, for instance, due to marriage without informing the Social Security Administration of the name change, enter your first name, the last name shown on your social security card, and your new last name.

If the account is in joint names, list first and then circle the name of the person or entity whose number you enter in Part I of the form.

Solo proprietor. Enter your individual name as shown on your social security card on the "Name" line. You may enter your business, trade, or "doing business as [DBA]" name on the "Business name" line.

Limited liability company (LLC). If you are a single-member LLC (including a foreign LLC with a domestic owner) that is disregarded as an entity separate from its owner under Treasury regulations section 301.7701-3, enter the owner's name on the "Names" line. Enter the LLC's name on the "Business name" line.

Caution: A disregarded domestic entity that has a foreign owner must use the appropriate Form W-9.

Other entities. Enter your business name as shown on required Federal tax documents on the "Name" line. This name must match the name shown on the charter or other legal document creating the entity. You may enter any business, trade, or DBA name on the "Business name" line.

Part I—Taxpayer Identification Number (TIN)
Enter your TIN in the appropriate box.

If you are a resident alien and you do not have and are not eligible to get an SSN, your TIN is your IRS Individual taxpayer Identification number (ITIN). Enter it in the social security number box. If you do not have an ITIN, see How to get a TIN below.

If you are a sole proprietor and you have an EIN, you may enter either your SSN or EIN. However, the IRS prefers that you use your SSN. If you are an LLC that is disregarded as an entity separate from its owner (see Limited liability company [LLC] above), and are owned by an individual, enter your SSN (or "pre-LLC" EIN, if desired). If the owner of a disregarded LLC is a corporation, partnership, etc., enter the owner's EIN.

Note: See the chart on this page for further classification of name and TIN combinations.

How to get a TIN. If you do not have a TIN, apply for one immediately. To apply for an SSN, get Form SS-5, Application for a Social Security Card, from your local Social Security Administration office. Get Form W-7, Application for IRS Individual Taxpayer Identification Number, to apply for an EIN. You can get Forms W-7 and SS-4 from the IRS by calling 1-800-TAX-FORM (1-800-829-3676) or from the IRS's Internet Web Site at www.irs.gov.

If you do not have a TIN, write "Applied For" in the space for the TIN, sign and date the form, and give it to the requester. For interest and dividend payments, and certain payments made with respect to readily tradable instruments generally, you will have 60 days to get a TIN and give it to the requester before you are subject to backup withholding on payments. The 60-day rule does not apply to other types of payments. You will be subject to backup withholding on all such payments until you provide your TIN to the requester.

Note: Writing "Applied For" means that you have already applied for a TIN or that you intend to apply for one soon.

Part II—For U.S. Payees Exempt From Backup Withholding

Individuals (including sole proprietors) are not exempt from backup withholding. Corporations are exempt from backup withholding for certain payments, such as interest and dividends. For more information on exempt payees, see the separate instructions for the Requester of Form W-9.

If you are exempt from backup withholding, you should still complete this form to avoid possible erroneous backup withholding. Enter your correct TIN in Part I, write "Exempt" in Part II, and sign and date the form.

If you are a nonresident alien or a foreign entity not subject to backup withholding, give the requester the appropriate completed Form W-8.

Part III—Certification

To establish to the withholding agent that you are a U.S. person, or resident alien, sign Form W-9. You may be requested to sign by the withholding agent even if items 1, 3, and 5 below indicate otherwise.

For a joint account, only the person whose TIN is shown in Part I should sign (when required).

1. Interest, dividend, and barter exchange accounts opened before 1984 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

2. Interest, dividend, broker, and barter exchange accounts opened after 1983 and broker accounts considered active during 1983. You must give your correct TIN, but you do not have to sign the certification.

3. Real estate transactions. You must sign the certification. You may cross out item 2 in the certification before signing the form.

4. Other payments. You must give your correct TIN, but you do not have to sign the certification unless you have previously given an incorrect TIN. "Other payments" include payments made in the course of the requester's trade or business for rents, royalties, goods (other than bills for merchandise), medical and health care services (including payments to corporations), payments to a nonemployee for services, payments to certain fishing boat crew members and fishermen, and gross proceeds paid to attorneys (including payments to corporations).

5. Mortgage interest paid by you, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA or MSA. The IRS uses the numbers for identification purposes and to help verify the accuracy of your tax return. The IRS may also provide this information to the Department of Justice for civil and criminal litigation, and to cities, states, and the District of Columbia to carry out their tax laws.

You must provide your TIN whether or not you are required to file a tax return. Payees must generally withhold 31% of taxable interest, dividend, and certain other payments to a payee who does not give a TIN to a payer. Certain penalties may also apply.

What Name and Number To Give the Requester

For this type of account:

Give name and SSN of:

1. Individual

2. Two or more individuals (joint account)

3. Custodian account of a minor (Uniform Gift to Minors Act)

4. The usual revocable savings trust (trustor is also trustee)

5. Single proprietorship

Give name and EIN of:

6. Sole proprietorship

7. A valid trust, estate, or pension trust

8. Corporate

9. Association, club, religious, charitable, educational, or other tax-exempt organization

10. Partnership

11. A broker or registered nominee

12. Account with the Department of Agriculture in the name of a public entity (such as a state or local government, school district, or prison) that receives agricultural program payments

1*List first and circle the name of the person whose number you furnish. If only one person on a joint account has an SSN, that person's number must be furnished.

2 Circle the minor's name and furnish the minor's SSN.

3 You must show your individual name, but you may also enter your business or "DBA" name. You may use either your SSN or EIN (if you have one).

4 U.S. citizen and circle the name of the legal trust, estate, or pension trust. (Do not furnish the TIN of the personal representative or trustee unless the legal entity itself is not designated in the account title.)

Note: If no name is circled when more than one name is listed, the number will be considered to be that of the first name listed.

Merle -

I'm delighted that you have decided to move ahead with this work. We are really looking forward to working with Kennesaw. We need to make one further adjustment to the Statement of Work, based on feedback from the Commissioners. They have indicated that the Boards have been working out their own processes for reviewing the Guidelines at their meetings, so we will not need facilitation of these discussions by Kennesaw. However, we do still need to have you attend.

We will get the contract prepared and signed as soon as possible. You didn't provide a cost estimate for the document hosting, so I just increased the funding amount to $175,000. We can do a contract modification later if necessary to further adjust the funding. This will be a cost plus expenses type contract, not fixed price, so there will be no issue regarding adjusting the cost.

In addition to the EFT form we also need the Kennesaw tax ID#. Cannot process contract through Finance without this information. Also need to know your cognizant federal contract audit agency, but that information is not needed to get contract signed. Thanks and I look forward to working with you and the rest of the Kennesaw team!

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov

Carol - After some reflection and conversations with the staff here and with Tom on your end, I would like to go forward with the VVSG project.

I have initial edits nearly ready on the glossary. We have the server ready and my guys are looking at the Zone Alarm report to find a workaround.

I lost my PM, [REDACTED]. Her contract ended on July 1. She may be able to come back as a part-time consultant so all is not lost, and I have identified another candidate for PM.

I have the completed EFT here. I can fax it to you tomorrow or send it surface mail or both. We need to convert the SOW into a contract. From our end that would be as simple as adding a budget and signatory lines to the existing document.

I need to talk with you regarding the CalTech and Portland trips.
We have been hard-hit by Dennis. We have had building problems and were without power for 4 hours today. Things are a bit hectic here.

Talk to you tomorrow,

Merle

Merle -

I expect to get your contract signed in the next day or two. However, I still need those couple bits of information - I think it was tax ID number, cognizant federal contract auditing agency and maybe something else - before it can be processed through finance. Will also be forwarding you some email traffic regarding some issues with the way the current website is working so you can avoid these problems.

The Commissioners have a problem with Brit working on the Guidelines comments. Their view is that there is an inherent conflict of interest for Brit to have been on the TGDC that came up with the basic recommendations and then also to be part of the EAC comment review team. So we will not be able to contract with him for this purpose. I know he has suggested he would resign from the TGDC, but that doesn't really fix this problem.

Attached is the final SOW. Let me know if you have any issues or questions with it. Thanks!

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov

I'll forward your message to Tom. His email address is twilkey@eac.gov.

Carol - Any decision yet on the contract with KSU and Brit?

I have attached a word document regarding a training program that we are doing for election observers at the Carter Center. Tom Wilkey, Brit and I were discussing the usefulness of a similar program for NIST scientists - to familiarize them with the life cycle of an election. I do not have Tom's email address at the EAC. Could you forward this proposal to him?

Thanks, and let us know.

- Merle
Commissioners -

Attached is the Statement of Work I have discussed with Merle King at Kennesaw State, specifically the Center for Election Systems. The period of performance for this work would be from the date of award through the end of December 2005. This will allow ample time to complete the Guidelines revisions and archive the comments and other materials from the comment review process. Prior to our making arrangements for them to provide web hosting for the document and collecting the on-line comments, they had given me an estimate of about $150,000 for this effort. I am proposing to increase that amount to $175,000 to cover the use of their secure server and IT support services.

I was asked to ascertain whether the Center for Election Systems or Kennesaw State had publicly taken any positions regarding VVPAT or other high profile election administration issues. Merle King has provided assurances that they have not testified on this matter to the Georgia legislature or expressed an opinion in any other venue. They have presented testimony to NIST, but on the topic of voting system functionality requirements. There was also the question of potential conflict of interest since the Center is funded as a line item in the Georgia Secretary of State's budget. Similar to our contract with the Eagleton Institute, the EAC contract would be with the University, since sub-elements do not have contracting authority. While the contract would draw on the expertise of Center personnel, their work would be managed and accountable independently through the University.

As a retiree of the Georgia higher education system, Brit Williams is prohibited from being a consultant on any university contract. His work with the Center is actually paid for through a contract with the Secretary of State's office. We anticipate potentially contracting with Brit to assist with the management guidelines work we plan to get underway in conjunction with NASED. He will not be involved with the Guidelines comment review work.

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125 cpaequeet@eac.gov
Carol - I am responding to this because I am not at all sure that everyone
does know my position on VVPATs.

My position is this:

I have absolutely no objection to VVPATs, but believe that they are not
technically necessary. We are entirely capable of building and operating
accurate, secure paperless electronic voting systems. Many jurisdictions,
including the State of Georgia, are currently conducting accurate, secure
elections on pure DRE voting systems.

I fully support the concept of allowing voter's to verify their ballots and
have no problem with jurisdictions that wish to use paper for this process.

I look forward to seeing you in New York.

Best regards.

Brit

There is also a separation of responsibility component to the proposal. The work with the EOC will be through my department (Computer Science and Information Systems). It will not be with the Center for Election Systems.

Hope this helps.

Merle -

Discussed transferring the Guidelines document and comment application with the Commissioners and the Executive Director (Tom Wilkey) this morning, along with the other tasks related to reviewing the comments that you had provided a proposal for. Being ever cognizant of how the EAC is perceived, the Commissioners asked me to check to see if the Center or Kennesaw ever provided testimony to the GA legislature or has otherwise taken a public position on the topic of voter verified audit trails? We know Brit's views, but he was always speaking for himself on the topic.

The question is whether the Center itself has taken a position on this high profile issue. Also, my understanding is that the Center is pretty much fully funded by the GA Secretary of State's office. Would that relationship in any way impinge on your ability to be objective and impartial when reviewing and advising on the disposition of comments?

Can you advise? Thanks!

Carol A. Paquette
U.S. Election Assistance Commission

"Merle King" <mking@kennesaw.edu>
Carol - The Center staff has never given testimony to the GA Legislature. I have given testimony once, at a NIST meeting, but it was on the topic of functionality, not VVPAT.

The organization of the full-time staff at the Center is as follows:

Merle King - Executive Director
Ray Cobb - Director
Tara Robie - Sr. Project Coordinator
Anthony Peel - Sr. Project Coordinator
Jessica Bamford - Project Coordinator

Brit is a contractor with the SOS office and although he spends time at the Center, he is not on the Center budget. He does not report to me.

The Center is completely funded by the SOS of Ga., as a line item in their budget.

The Center staff has had private conversations with our vendor regarding VVPAT and I have expressed my opinion to several vendors on the legal and operational issues associated with the concept.

I have discussed the proposed work for the EAC with the SOS Elections Director and we believe there is not a conflict of interest in the proposal. I think we can be impartial and objective in our review of comments. Our position has always been to enforce the law, rules and regs.

There is also a separation of responsibility component to the proposal. The work with the EQC will be through my department (Computer Science and Information Systems). It will not be with the Center for Election Systems.

Hope this helps.

Carol -

I noticed that you got the glynn.com site up and running on Saturday.

We have reserved the following url: http://guidelines.kennesaw.edu/guidelines and put the content there. The firewall is properly configured so that it can be linked when you are ready.

Please advise on how we should proceed.

Thanks,

Merle
Merle -

The proposal looks fine. Based on a conversation with Steve Berger a few days ago, I have another task to add. Sorry for the piecemeal approach; this will be the last "add-on".

The new task is as follows:

There are several places in the Voting System Guidelines (especially in Volume II on testing), that refer to "external" standards: e.g., ANSI, IEC, MILSTD. We need to create a references section in the document where all these materials are referenced in their latest version. It will require some research to determine what the latest version is. As versions change, EAC can issue an addendum to the references without having to dig into the entire document with changes. Then the text reference can be simply the title of the reference. Also, if there are commercial standards that replace the MILSTDs, we'd like to reference those instead, since many of the MILSTDs are no longer maintained by DoD.

The cognizant federal contract audit agency is whatever organization has been named to audit any federal grants or contracts that the University has. Either your budget or grants/contracts people should know who this is.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
Carol - I have taken another cut at the EAC TGDC Guidelines Proposal. Please see attached.

I have made two modifications to the budget. The budget is now at $149,050. Let me know if that creates issues:

1. I forgot to include fringes for full-time employees in the original

2. I have added additional consultant capacity regarding the need to provide maintenance of the guidelines and travel to all board meetings by the KSU team.

I am tracking down a couple of pieces related to Tax ID and the ETF form. I am not sure what "Cognizant Federal Contract Audit Agency" means. Our budget people might, but if you could help clarify that piece it would help.

We are closing out our fiscal year, so things have ground to a halt in terms of support from our business office. Sorry for the delay

EACTGDCGuidelinesContract060505.doc
Merle -

Need to get revised cost estimate from you to include additional activities outlined in my email of 5/26. Specifically, maintaining the master working copy of the Guidelines and organizing the discussion process for the EAC Boards meeting to comment on Guidelines. I'm assuming that the comment about receiving "white papers" for review and assessment will be subsumed under the existing estimate for processing comments, since that's a very indefinite quantity of work at this point. Just as a point of reference, we received more than 300 comments on our recently published 5-6 page draft guidance document on statewide voter registration lists.

Also, need the following information for contract processing purposes:

1) Name, mailing address for contractor organization, plus appropriate points of contact and their contact information - meaning, if there will be a contract manager apart from the project manager, we would like to have information for both. I think you mentioned that the contract would be with Kennesaw State not with the Center.

2) Tax ID number

3) Classification and type of business

4) Remittance address, including information for electronic funds transfer (form attached)

5) Cognizant federal contract audit agency

We are moving ahead with this, so please provide this information as soon as possible.

Thanks!

Subject: Re: Follow-up to Monday's Meeting

Merle -

This is a good summary. A few additional things came to mind as I was reviewing this:

1) I think we would also want you to maintain and revise the master working copy of the Guidelines, under strict version control, so we can be working on updates during the comment period. We want to do everything we reasonably can to minimize the time needed at the end of the period to wrap everything up. I envision the process working as follows. As you note in your paragraph 3, the reviewers will categorize comments and make recommendations to EAC on their disposition. In turn, we would advise you of the Commission's decision on your recommendations and you could make appropriate changes to the document.

2) We expect some comments may come in the form of "white papers," not necessarily related by the author to a specific section of the Guidelines. For example, Ted Selker at MIT offered to provide his specification for audio-verified audit trails for inclusion in the initial set of TGDC recommendations. It was too late in the process for additional material of this scope to be considered, so I told him he should submit it during the comment period. I understand that we may have a similar paper to consider on cognitive disabilities. The point being that comments may arrive in all shapes and sizes and we just have to make sure we have a process for tracking and handling them all. We're doing a walkthrough of the comments web application today and I will find out if data can be entered into the database manually, so we can have a single source for capturing all comments, whether received by web form, email attachment, or snail mail.

3) Speaking of the web application, I'm going to forward you the link and password for the demo version, so you can have a look at it and see if there are modifications we should make.

4) Just a little more detail on your paragraph 5. There will be 2 hearings and one combined Board meeting dealing with the Guidelines. The first hearing is June 30 in New York City. The second is July 26; location still to be determined, but will be west of Mississippi. Board meeting will be sometime in July, again the location hasn't been determined as yet. I anticipate that the Board meeting will be 1.5 - 2 days. Would have your team organize the discussion for this meeting, so we can get through the entire document and cover all their concerns.

Your estimated cost looks fine; I anticipate it will increase somewhat with the additional work outlined above. I will look into what we can do to get a separate contract in place for Brit. Call me if we need to discuss any of this. Thanks!

Carol A. Paquette

Merle -

Thanks for getting back to me so quickly on this. I will review this evening and get back to you tomorrow. Just at a glance this appears to only include the Guidelines review assistance. So can I assume that there will be another paper coming on the Management Guidelines work?

Appreciate you and Brit traveling to DC to have this conversation. I agree that it was very helpful in fleshing out the concept for both of these tasks.

Subject  
Follow-up to Monday's Meeting

Carol - Thank you for giving us your morning on Monday. It was very helpful to hear your explanations of the work products for the Guideline
Review Project.

Here are the planning assumptions I have made:

1. The project would need to commence ASAP and extend into late October, early November, depending upon the publication date in the Federal Register.

2. The Glossary of the Guidelines needs immediate work, including editing and annotation. This work product has a high priority.

3. A system of cataloging comments needs to be developed. This system will collect comments, excise identifying emails or other information that could be used to determine the author of the comments, and forward the comments in electronic (or hardcopy, depending upon form of submission) to us. We will then review the comment and implement the following actions:

   a. Non-useable comments (those that are simply opinions, or not sufficiently well-formed to determine the author's intent) will be identified and held in abeyance;
   b. Grammatical and editing comments will be identified and an immediate recommendation made to the EAC liaison regarding their deposition will be made.
   c. Comments that are substantive will be cataloged and annotated. These comments will be organized into logical groupings that facilitate mapping the comments to the appropriate Guideline section.
   d. The cataloged comments will be stored on a secure server so that all appropriate EAC-designated individuals can review the comments as needed. Summary reports will be provided to the EAC, as needed.

4. A final, comprehensive Glossary, benchmarked to as many jurisdictions as is practical, will be developed for the next iteration of the Guidelines. This Glossary of terms will attempt to provide jurisdiction-specific versions of commonly used terms in elections management.

5. Project personnel will need to travel to several meetings to collect data and observe. Travel to meet with the EAC is also anticipated.

6. We would like to have Brit Williams engaged and compensated for his role on this project. Because Brit is a retiree from the Univ. System of Georgia, we are unable to hire him on this project. We would like the EAC to explore a separate contract with Brit to support this (and perhaps other) work.

7. In the attached budget, I am proposing a total fixed costs of $59,100 with variable costs of $50,450, for a total-not-to-exceed $109,550. We would invoice at an agreed upon interval. If there was a small volume of comments, the cost to the EAC would be approx. $65K. If we needed to add additional consultants, we could invoice the EAC up to $45K. If the volume of comments exceeds the anticipated upper bound,
we would ask that the EAC consider an addendum to this contract to facilitate the completion of the contract.

I hope this reflects a realistic schedule, work product and budget. Please let me know your thoughts.

Kennesaw, GA 30144-5591
voice: 770-423-6354; fax: 770-423-6731
The EAC needs to get a contract in place as soon as possible for the following three support activities. We are looking for an organization that can provide overall project management and the basic technical capabilities from their own staff as well as being able to pull in additional expertise from other institutions and from the election community. The EAC seeks to have broad-based participation in all its activities to ensure the election community and the general public accept the results as having integrity and validity because all points of view have been considered. The unique capabilities and mission of the CEnter for Election Systems suggests to me that your organization is ideally suited to support these EAC requirements. I would like to discuss your interest and ability to support these activities at your earliest opportunity. The EAC's goal is to have as many information products available to assist election officials with the 2006 elections as possible.

Activity 1: Review and recommend disposition of Voluntary Voting System Guidelines comments

On May 9, the EAC received the initial TGDC recommendations for revised voting system guidelines. We are currently reviewing this document to determine if it is acceptable to publish for public comment as proposed guidelines, or if some modifications might be required. We anticipate completing this review and publishing the resulting proposed guidelines by early June. The EAC is severely under-staffed to appropriately handle the workload of reviewing and determining the disposition of the potentially substantial volume of comments that are expected over the 90 day comment period. We also lack the range of appropriate technical expertise required for this task. The Commissioners have requested that we put together an appropriate review team to assist the EAC with this comment review activity. We envision this process working as follows. We anticipate that most comments will be submitted via the EAC website. We are developing a comment tracking and management application to assist in managing the comments. We will also receive comments from other sources, such as email and paper mail. There will also be two public hearings with panel presentations followed by an open mike public comment period. We plan to review comments on a weekly basis. EAC personnel and members of the review support team would convene a weekly meeting or teleconference to do a first pass review, followed by assigning out of comments requiring additional consideration. Review team members would complete their assigned topics and make disposition recommendations in a subsequent meeting of the review group and the EAC lead staffer. NIST resources will be available to do additional research and/or consultation, if required.

Activity 2: Development of quality control procedures for voting system acceptance by election officials

There are a variety of system acceptance procedures that election officials can employ to promote consistent quality in newly delivered voting systems. The CES has developed a model process for voting system acceptance and configuration management. This methodology and the practical experience acquired from applying it over several years can be drawn on to develop a set of scaled quality assurance recommendations to meet the needs of the variety of election jurisdictions that are purchasing voting equipment this year. The concept is to provide a range of elements and approaches so election officials will have some choices for what might best suit their particular circumstances.

Activity 3: Development of Election Management Guidelines or Best Practices

The quality of election management practices has a direct impact on the integrity and overall success of the voting process. There appeared to be only a few instances of significant voting equipment
malfunctions in the 2004 election, but there were many instances of procedural glitches. The need for management guidelines has long been recognized in the election community. The EAC would like to initiate the development of such guidelines or best practices, as a complementary product to the Voluntary Voting System Guidelines. In EAC's view, this work would require participation of a working group of election officials. However, an entity is needed to manage the development process and to provide research, documentation and other capabilities necessary to this work.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125  cpaquette@eac.gov
The work on developing the EAC processes, documentation, etc., for transitioning lab accreditation and system certification from NASED to EAC has fallen significantly behind schedule. The project timeline called for completion of this work for Commissioner review by the end of May. We are perhaps 50% complete at this point.

We had requested assistance from NIST to work with Brian Hancock on this effort, but they have not been forthcoming with meaningful help. They provided a point of contact who passed on a lot of reference material for Brian to review, but they haven't identified anyone to help with defining the processes and preparing the documentation. The point of contact has since been diverted by some family medical problems, and Lynhe Rosenthal hasn't been able to identify another person.

Prior to his departure, Commissioner Soaries encouraged me to find some additional resources to help move this work to completion. The Chair similarly advised me about two weeks ago when I was speaking to her about my concern over the lagging schedule.

In response to this direction to get help, I sent an email to Steve Berger, David Karmol, Paul Craft, Brit Williams, and Michael Shamos, asking if they could identify any individuals or companies we could contract with quickly to get this work done. Steve Berger responded that he could assist. I checked with EAC Counsel's Office to see if there were any issues regarding EAC contracting with a member of the TGDC. Julie and Gavin informed me that there were no problems with this. Steve is very well-qualified by education and experience to assist us in this effort. Paul Craft and Brit Williams concurred that Steve could more than adequately fill the requirement.

Brian and I have had several conversations with Steve and are convinced that his assistance will enable us to move ahead quickly to meet our revised target completion date of June 30. He has worked on defining similar quality conformance programs for other organizations and is knowledgeable of all the relevant standards, etc., and which need to be applied.

Consequently, I am recommending that the EAC enter into a consulting contract with Steve Berger for a not to exceed amount of $40,000 and a period of performance from June 1 through July 31. The first milestone is to help Brian complete this work for Commission review by June 30. Steve's time in the month of July would be utilized to respond to questions and comments from the Commissioners to complete the work for Commission approval and establishment of a transition date.

I am available to discuss this matter and answer any questions you may have. If you are in agreement with this course of action, I will ask DeAnna to prepare appropriate consensus vote.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
Brian,

Let me introduce the 3rd member of our "work crew" Dan Hoolihan. Dan has a lot of relevant experience to what we are doing. He is a NVLAP accreditor, very active on the FCC's Technical Competent Body Counsel and also works in international lab recognition areas. I know you will find Dan a valuable resource to have involved.

In talking to Dan this morning about our project we found ourselves discussing whether ISO Guide 65 type topics would be in view for this project. Guide 65 deals with vendor related topics, like their quality system, to assure that the manufactured product is the same as the tested product. ISO Guide 17025 focuses by contrast on lab accreditation. I asked Dan to write up a short discussion and forward it to you, to help us all get a clear focus on what we are doing first, what might come later and where we might find helpful guidance in preparing our materials.

Best Regards,

Stephen Berger

Subject: EAC Draft Documents

Steve, Don,

Nice talking with you yesterday. Both Carol and I look forward to working with you to move the project towards completion. Attached are three draft documents that will give you an idea of where we see the program headed. The first document is the letter of certification which we plan on sending initially to the current test labs which we would grandfather until the NVLAP portion of the program produces results. The second document is a series of flow charts which outline the basic steps of the certification and testing, and laboratory accreditation program. The third document is a draft policy guide on the testing and certification program. The policy guide has some obvious gaps in several sections which I have not yet had time to complete. We value your assessment of these documents and look forward to meeting with you, Steve, next week, and with Don as soon as possible.

Thanks again.
Carol,

The EIN for TEM Consulting is: [REDACTED]

I am attaching our W9 in case you need that in the future.

TEM Consulting is a small business and it is a corporation.

I filled out the EFT form and signed it, the PDF is attached.

Steve -

Need a little more information about your business to complete processing of contract.

1) What is your tax ID # (or SSN, if no tax ID)

2) What is the classification of your business: small; other than small, small disadvantaged, small woman-owned
   and the type of business: corporation; partnership; sole proprietorship

Also, if you wish to receive payments electronically you will need to complete the attached EFT authorization form. Thanks!

Carol,

Hope you don't have to work all of memorial day? I wanted to get back with you on a couple of things.

I haven't heard back from Don or Dan yet, but let's tentatively plan on a conference call tomorrow at 1 ET. Do you have a conference number or would you like me to send out the one I use?

SATO is the travel agency that NIST uses when I come to the TGDC meetings. They don't seem to have the problem with last minute fare increases that we get booking directly. Otherwise the cost seems roughly comparable. For example, Southwest or American are the best connections from Austin. Right now, with 1 week notice I can to BWI for $109 each way, $218 plus tax roundtrip. Less than a week and it goes to $586 plus tax roundtrip.

I can arrive at BWI by 1:30 out of Austin, and be at your office by 3:30.

So for the week of the 6th, if it gives us enough time I could come in Monday the 6th and coordinate my departure to match your schedule, say leaving late on the 8th?

I am putting around the house and also working today. So feel free to call, it isn't an inconvenience.

To get the lower airfare I should book today.

Best Regards,

Stephen Berger

FAX - (512) 869-8709

Steve -

Don't know what SATO stands for, does it mean invitational travel orders (i.e., the government makes your travel arrangements and provides you a ticket)?

Monday is a government holiday which I will be celebrating by trying to complete my review of the Voluntary Voting System Guidelines.
How about a phone call on Tuesday, the 31st? I'm available at 1 or 4:30 Eastern. Wednesday, June 1, is open all day, if that works better for you and your colleagues. Then we could have in person meeting the week of the 6th as you suggest. I'm on leave the 8th to attend an out-of-town graduation.

Subject: RE: Dates

Please respond to
stephen.berger@ieee.org

Carol,

Assuming I can travel under SATO, as when I come to TGDC meetings, we don't need to worry about last minute flight costs.

I am working on a meeting at the FCC for June 13-14 and could extend to work with you, which would save some travel costs. I think though that you will want a first meeting sooner. Would you like to have an initial conference call, including Don Heirman and Dan Hoolihan, on Monday and an in-person meeting sometime the week of June 6? With your statement that the contract looks acceptable I am comfortable with going ahead and getting started. I could also fly up next week, but wonder if we wouldn't accomplish more by having a couple of conference calls and doing some preparatory work on our side?

My thought is after an initial conference call we should see what models and similar documents we can gather from sources we are aware of and adapt to the needs of the EAC. So at a first meeting the following week we potentially would come with some model documents and procedures to consider.

Best Regards,

Stephen Berger

Thanks, Steve. I agree with you that the consulting contract is the better way to go. I have reviewed the agreement you sent and it looks fine to me in terms of having all the appropriate clauses and safeguards. I have passed it to our General Counsel to see if she agrees that it is an acceptable contract document. If she gives me the okay we can probably have this in place by next Wednesday (June 1). We should be working on a date for you to come in so we can review work accomplished and what further remains to be completed.

To Carol A. Paquette <cpaquette@eac.gov>

Subject: Air Force Contract

Carol,

Attached is my Air Force contract. Besides a lot of boilerplate, the principle different is that this is a firm fixed price contract. You can see that a set of initial deliverables was specified and funded. Options were included that could be exercised at the agencies discretion. We can go that way with your job but I would need a clear set of deliverables to bid on. Of course my bid will be competitive but guarded to be sure that I can provide the deliverables within the bid. I think the work assignment based contract will be both quicker to get in place and provide you a lower final cost. Having a not-to-exceed on the work items should give you the same budget protections that the Air Force is getting with the firm fixed price approach.

Best Regards,
Carol,

I will look forward to talking with you and Brian tomorrow.

Subject Help on establishing equipment certification system

Carol,

After our talk last week I made a few phone calls both to identify resources that are available and also to organize my own thinking around what kinds of help might be of the most help to you.

I started with some of my colleagues who have experience helping other agencies in similar areas. I am working with the assumption that you would like to have both expertise and experience as well as purely the hours to produce the necessary products. In my calls I started on the experience and expertise side.

I am going to make some assumptions about where you are at in these tasks, so feel free to correct me if I am wrong.

I have 3 of us with a lot of experience in setting up and managing laboratories and working on equipment grants at the FCC and FDA. If you look at my website, www.temconsulting.com you will find resumes for myself and Don Heirman (currently president of IEEE Standards Association). Also Dan Hoolihan has some time available, http://www.emcxpert.com/. All of us have other commitments but also have some time available between now and the end of June.

From our conversation I would assume matching a team like this with some contract tech writers may give you the manhours you need with the expertise to direct it efficiently.

If you like I can offer to contract all three of us through my company, TEM Consulting. I often use a work assignment based contract. This establishes a durable set of terms and conditions. Work and therefore payment are approved by work assignments. So the first work assignment can be for current needs with appropriate not-to-exceed limits and delivery dates. If further service is desired then new work assignments can be opened up. I have a standard contract that I use but also am working under a variation of this using an Air Force contract for some assignments I have for them.
If this is going in a direction that interests you I think I would suggest that you and I talk to set things up and then have an introductory call with the team to outline assignments and organize what we would do for you.

As I have thought about what I would do were I in your position I think I would make one of our assignments to go over to the FCC laboratory in Columbia and ask their help, borrowing as much as they may feel comfortable in sharing. I have contract with Rashmi Doshi almost weekly and would assume he would be helpful. The positive is that there may be a lot of workproduct from their system that could be adopted for EAC use. I would also assume that there is a lot of experience that could be gathered in to the benefit of the EAC. I think the principle challenge would be to 'right-size' the system to the EAC and voting equipment vendors. I believe the FCC manages something like 25,000 grants a year and has a system of 500 commercial test labs doing the testing required.

Probably my biggest general worry for the EAC is that it would be easy to create an overly complex system that would not be appropriate for this sector. However, there is a lot of experience out there that could be gathered in.

I will be in meeting from about 2:30 to 6:30 ET, but call me on my mobile before then if you want to talk further. Tomorrow I have an early flight from Tucson but would be available until about 10:30 ET.

Best Regards,

Stephen Berger

FAX - (512) 869-8709
Carol,  
Don Heirman who works with Steve at TEM Consulting, has 30 years with Bell Laboratories in many EMC (Electromagnetic Compatibility) roles including Manager of Lucent Technologies (Bell Labs) Global Product Compliance Laboratory. He is also President of IEEE Standards Association, and has been a group manager for electromagnetics for the U.S. National Committee Technical Management Committee for the IEC (International Electrotechnical Commission). Finally, (in his spare time!) he serves as an adjunct professor/senior research scientist at the University of Oklahoma Center for the Study of Wireless EMC.

Dan Hoolihan was Vice-President of the Minnesota Operations of TÜV Product Service from 1994-1999, Chief Operating Officer and co-founder of AMADOR Corporation from 1984 to 1994 and from 1969 to 1984, he was an EMC engineer and manager for Control Data Corporation in Minnesota. He is also a past President of the IEEE Electromagnetic Compatibility Society, and active with ANSI standards programs in this field.

Brian
Gentlemen:

As you may be aware, the EAC is supposed to take over the lab accreditation and voting system certification processes from NASED this fiscal year. Brian Hancock has been working very diligently to get the procedures defined, the forms, etc., designed, report formats specified, etc. Our legal counsel has been working on legal aspects. However, we just do not have adequate numbers of staff personnel to get this work completed in a timely fashion. Neither Brian nor counsel can devote full time to this effort because of the press of other EAC business and our general lack of staff resources.

We are looking for either individual consultants or companies with experience in doing this type of work. Our original completion date was the end of May, which we are not close to meeting. We are now targeting the end of June to complete documentation of the procedures, criteria, forms, etc., so this transition can happen by August. But this date cannot be met without assistance. Please forward any recommendations you might have as soon as possible. Since we have our own procurement authority we can turn around contracts quickly and we have adequate budgetary resources available to cover this work. We just need to identify some qualified sources who can go to work immediately. Thank you for your assistance.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission

FAX: +1 732-530-5695
Email: d.heirman@ieee.org
Web site: http://www.DonHEIRMAN.com

Donald Heirman is president of Don HEIRMAN Consultants, training, standards, and educational electromagnetic compatibility (EMC) consultation corporation founded in 1997. His work includes consulting with a wide range of private and governmental bodies on EMC matters including implementation of state of the art EMC test facilities and evolving standardization, laboratory competency, and measurement aspects of human exposure to radio frequency energy. He provides workshops and tutorials on many of these topics both in the United States and in Europe.

Previously he was with Bell Laboratories for over 30 years in many EMC roles including Manager of Lucent Technologies (Bell Labs) Global Product Compliance Laboratory, which he founded, and where he was in charge of the corporation's major product safety, telecommunications, and EMC regulatory test facility and its participation in ANSI accredited standards committee and international EMC standardization. The laboratory was one of the first EMC testing labs accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) on a wide range of telecommunication products.

He chairs, or is a principal technical expert contributor to, US and international EMC standards organizations including ANSI ASC C63 (committee vice chairman and chairman of its Subcommittee 1 which is responsible for most of the C63 standards on EMC testing, calibration and instrumentation specifications and techniques) and the International Electrotechnical Commission's (IEC) Special International Committee on Radio Interference (CISPR) where he is a member of the CISPR steering committee and chairman of its Subcommittee A (Radio Interference Measurements and Statistical Techniques). Subcommittee A is responsible for CISPR Publication 16 which is the basic set of standards used worldwide for performing radio interference measurements to meet associated national regulatory requirements. He is a member of the IEC's Advisory Committee on EMC (ACEC) and the Technical Management Committee (TMC) of the US National Committee (USNC) of the IEC. In the TMC, he is Group Manager for electromagnetics which is responsible for ensuring appropriate US participation in the IEC on EMC matters and chairs its Coordinating Committee on EMC which helps formulate US EMC positions among the many USNC technical advisory committees (TAGs) with EMC aspects. He is also an active member of the USNC TAGs for CISPR Subcommittee A and Subcommittee I (EMC of Information Technology Equipment, multimedia equipment and receivers).

Mr. Heirman is past president and now member of the Board of Directors (managing business development) of the National Cooperation for Laboratory Accreditation (NACLA) which recognizes the competency of testing and calibration accreditation bodies in the US via the adherence of these accrediting bodies to ISO guides for competency of accrediting bodies and
Daniel D. Hoolihan is currently President of Hoolihan EMC Consulting, Minnesota.

Hoolihan has been consulting in EMC Engineering since January of 2000. He specializes in EMC-Laboratory evaluations, EMC standards, and EMC Education. He is a consultant to the United States Department of Commerce National Institute of Standards and Technology (NIST) in the area of Telecom Certification Body (TCB) and Conformity Assessment Body (CAB) evaluations. He is also an assessor for the NIST National Voluntary Laboratory Accreditation Program (NVLAP).

Previous to consulting, he worked as Vice-President of Minnesota Operations for TUV Product Service from 1994 to 2000. From 1984 to 1994, he was the Co-Founder and Chief Operating Officer of AMADOR Corporation; a small business specializing in EMC testing of electronic products ranging in size from pacemakers to supercomputers. His first employment out of graduate school (in 1969) was with Control Data Corporation in their internal EMC lab.

Hoolihan has been on the Board of Directors of the EMC Society of the IEEE since 1987. He is the past-president of the EMCS (1998-1999) and has held many positions with the EMCS board in his years of service. He most recently served as the Chair of the 2002 IEEE International Symposium on EMC which was held in Minneapolis in August of 2002. He helped found the EMC chapter of the Twin Cities Section in 1985 and has been active in the local chapter since that time.

He has been actively involved with ANSI-Accredited Standards Committee on EMC since 1985. He is presently on the Steering Committee of C63 as well as chairing Subcommittee 6 (SC-6 - Lab Accreditation) and SC-8 (EMC and Medical Devices).

He is also an active member of the United States Technical Advisory Group on CISPR B; Industrial, Scientific and Medical Equipment.

His formal education includes a Bachelor's Degree in Physics from Saint John's University (Minnesota), a Masters Degree in Physics from Louisiana State University (Baton Rouge), and a Masters in Business Administration from the University of Minnesota (Minneapolis).

July 22, 2005

Mr. Earle Holley
Vice President for Business & Finance
Kennesaw State University
1000 Chastain Road, MS #0102
Kennesaw, Georgia 30144

Dear Mr. Holley:

Enclosed is a signed contract in the amount of $175,000.00 for the provision of technical services to assist the Election Assistance Commission (EAC) with the collection and review of public comments on the draft Voluntary Voting System Guidelines. The work effort also includes updating the referenced external standards (e.g., IEEE, ANSI) in the Guidelines and to expand the Glossary.

The adoption of new voting system guidelines is one of the major EAC responsibilities mandated by the Help American Vote Act. We expect to receive a substantial volume of comments during the course of the 90 day comment period. EAC is a very small organization and does not have sufficient internal staff to manage this workload. The purpose of this contract is to help us keep up with the review and classification of comments for further consideration and to assist EAC staff in updating portions of the Guidelines, such as the referenced standards, to include the most recent editions.

To acknowledge your receipt and acceptance of this contract, please countersign and date below and return one copy to the attention of Carol Paquette, who will be coordinating this work effort for the Commission.

We look forward to working with Kennesaw State University on this very important EAC product.

Sincerely,

Earle Holley
Kennesaw State University
August 25, 2005

Ms. Carol Paquette

1225 New York Avenue, N.W. Suite 1100
Washington, D.C. 20005

Re: EAC-0544, Kennesaw State University

Dear Ms. Paquette,

Please find enclosed one copy acknowledging receipt and acceptance of EAC-0544, Contract for Technical Assistance for the EAC for the Collection, Management, Review, and Response to the Public Comments Received on the Voluntary Voting System Guidelines. As this is a cost reimbursement type (Time and Materials) contract, we have enclosed our budget for this work. We will expect to be reimbursed for the expenses outlined on the attached budget.

Please let me know if you have any questions with any of the foregoing.

Kind regards,

Carolyn Elliott-Farino
Associate Director
MEMORANDUM

TO: Commissioners Hillman, DeGregorio, and Martinez

FROM: Carol A. Paquette

DATE: June 3, 2005

RE: Consulting contract to assist with EAC system certification process development

BACKGROUND:

The work on developing EAC processes, review criteria, and documentation requirements for lab accreditation and voting system certification has fallen significantly behind schedule. The project timeline called for completion of this work for Commissioner review by the end of May. This work is perhaps 50% complete at this point. In addition, as we have more fully researched this topic we have become aware that this effort requires technical expertise and specialized knowledge not available on our staff. The Commission has committed to Congress that EAC will assume laboratory accreditation and system certification responsibility from NASED in FY05. Since public notice and comment will be required before this transition can occur, these materials need to be completed by early July at the latest to meet this commitment.

In early April, we requested assistance from NIST, but they have not been forthcoming with meaningful help. They provided a point of contact who identified and passed along considerable reference material, but is no longer available for further assistance due to a family medical issue. NIST has not been able to identify a replacement.

In an attempt to identify other potential sources of assistance for this highly specialized subject matter, I contacted several nationally recognized authorities on voting system certification and quality conformance processes. As a result of this inquiry, TEM Consulting was identified as uniquely qualified to assist the EAC.

Stephen Berger is the President of this small consulting firm. Mr. Berger has significant experience with IEEE standards development activities and served as the Chair of the IEEE Committee on voting equipment standards. He is the IEEE representative on the Technical Guidelines Development Committee and an ex-officio member of the NASED Voting Systems Standards Board. He also is the Co-chair of the U.S. Access Board’s telecommunications compliance sub-committee. His resume is attached.

Mr. Berger has identified two other consultants who will assist in this effort. Donald Heirman is past president and now a member of the Board of Directors of the National
Cooperation for Laboratory Accreditation, which recognizes the competency of testing accreditation bodies in the U.S. through the application of International Standards Organization guides. He chairs, or is a principal technical expert to, several U.S. and international standards organizations. He is also President of the IEEE Standards Association. His resume is attached.

Daniel Hoolihan specializes in laboratory evaluations and the accreditation of certification bodies. He is a consultant to NIST in the area of Telecommunications Certification Body and Conformity Assessment Body evaluations. (When EAC assumes the responsibility for laboratory accreditation and voting system certification, EAC will become a Certification and Conformity Assessment Body.) He is also an assessor for the NIST National Voluntary Laboratory Accreditation Program. He has been actively involved with ANSI standards committee work for 20 years. He is also an active member of the U.S. Technical Advisory Group on Industrial, Scientific and Medical Equipment. His resume is attached.

**RECOMMENDATION:**

The Commission should approve a consulting contract with TEM Consulting to assist EAC staff in completing the laboratory accreditation and system certification work. The period of performance would be from June 6 through July 15, 2005. The contract value will be $25,000. A brief Statement of Work is attached.
BEFORE THE ELECTION ASSISTANCE COMMISSION

In the Matter of

Award of Contract for Technical Assistance to the EAC for the Collection, Management, Review, and Response to Public Comments Received on the Voluntary Voting Systems Guidelines

CERTIFICATION

I, Gracia M. Hillman, Chair of the Election Assistance Commission, do hereby certify that on July 22, 2004, the Commission decided by a vote of 3 to take the following action(s):

1. Award of Contract for Technical Assistance to the EAC for the Collection, Management, Review and Response to Public Comments Received on the Voluntary Voting Systems Guidelines.

Commissioners DeGregorio, Hillman and Martinez voted affirmatively for the decision.

Attest:

22 July 2005

FROM TOM WILKEY, EXECUTIVE DIRECTOR
MEMORANDUM

July 15, 2005

TO: EAC Commissioners

FROM: Tom Wilkey, Executive Director

SUBJECT: Award of Contract for Technical Assistance to the EAC for the Collection, Management, Review, and Response to Public Comments Received on the Voluntary Voting System Guidelines

On June 29, 2005, EAC formally opened the ninety day public comment period on the Voluntary Voting System Guidelines. In light of our limited staff resources, EAC will require assistance in the review, posting, and analysis of these comments. This work will require personnel who have knowledge and experience with election administration processes and terminology, voting system technology, the testing of voting systems, and the application of standards. It will also require the ability to electronically host the document for public review, as well as the on-line commenting application that has been developed.

Kennesaw State University houses a unique facility, the Center for Election Systems, which possesses all of these capabilities. The Center provides voting system certification and acceptance testing, voting system configuration, election official and poll worker training, ballot generation, election day technical support, and election monitoring for all jurisdictions in the State of Georgia. This is the only institution of its kind in the United States and thus qualifies for FAR Subpart 6.302-1 exception to the requirement for full and open competition. We have been conducting a series of discussions with this institution regarding EAC's requirements in order to arrive at a mutually agreeable statement of work and cost estimate.

The Commissioners have previously reviewed and approved the attached statement of work for this effort. We have reviewed Kennesaw's cost estimate for this effort and find it reasonable for the experience levels and types of personnel needed to perform this work.

RECOMMENDATION:

Approve the award of a contract to Kennesaw State University in the amount of $175,000.

Attachment
1.0 Background. On May 9, 2005, the EAC received the initial set of recommendations for the HAVA-mandated Voluntary Voting System Guidelines from the Technical Guidelines Development Committee (TGDC). After performing its due diligence review of this document, the EAC made several changes and published the revised document for a 90 day public comment period. This period began on June 29, with publication of a notice in the Federal Register.

The EAC has established several alternative methods for submitting comments:
- On-line electronic comment form at www.eac.gov
- E-mail to votingsystemguidelines@eac.gov
- Postal mail to Voting System Guidelines Comments at EAC
- FAX to Voting System Guidelines Comments at 202.566.3127

The on-line comment form is associated with an application developed to assist with the management, tracking, and review of comments. This application will permit the manual entry of comments received from other sources so that all comments will be stored and managed from a single source. All comments will be posted for public review on the EAC website.

All comments will need to be reviewed and categorized into editorial, substantive, and other general categories useful for management purposes. Substantive comments will be assessed to determine if they indicate a need to modify the Guidelines. This may require some research and analysis, including consultation with NIST and/or the TGDC. At the conclusion of the comment period, EAC will be required to summarize the numbers and types of comments received and their disposition.

2.0 Objective. The objective of this contract is for EAC to obtain assistance with the posting and initial analysis and categorization of the comments and to obtain technical assistance in updating the referenced standards and glossary sections.

3.0 Scope. EAC shall provide the contents of the website temporarily hosting the Voluntary Voting System Guidelines, to include the on-line commenting application and database of comments. EAC shall forward all comments received from other sources for timely posting to the comment database by the Contractor. The Contractor shall be responsible for all the research, analysis and support activities necessary to successfully complete the tasks described below.

4.0 Tasks.

1. Host document for public review and post comments received. The Contractor shall host the Voluntary Voting System Guidelines document and commenting
application on their website and make them available for public access from the start of the contract until the close of the comment period (September 26, 2005). This access shall be provided by a hot link from the EAC homepage.

The Contractor shall perform initial screening of comments for profanity or other offensive content. Originators of such comments will be informed that such material cannot be posted for public consumption. These comments will be retained in the database, but not approved for public posting. All other comments will be posted to the website for public review.

The EAC will forward to the Contractor all comments received by other means than the on-line comment form for entry into the comment database for public posting and analysis. The Contractor shall provide appropriate quality control to ensure that all comments are captured correctly. Comments will be entered verbatim as received, with no corrections or excerpting.

Hosting of comments will extend for an estimated 30 days beyond the close of the comment period to allow sufficient time to review and determine their disposition. All comments shall be copied to CDs for transfer and retention by the EAC at the conclusion of the contract.

2. **Recommend a comment classification schema and organize comments accordingly.** The Contractor shall recommend a classification schema for categorizing comments relative to the degree of analysis required. For example, comments dealing with editorial points, typographical errors, and grammar can be handled very straightforwardly. Comments that are more technical in nature may require considerable analysis and perhaps research in order to make a determination on their disposition. Upon approval of the schema by EAC, the Contractor shall organize comments in this manner and periodically provide reports to the EAC on the number and kinds of comments received, and recommendations for the disposition of substantive comments. Comments shall be mapped to relevant portions of the Guidelines document. Periodic teleconferences will be conducted to review status of work, discuss comments and recommendations, and identify issues that will require consultation with NIST or other sources for resolution.

3. **Update standards referenced in Guidelines.** There are several places in the Guidelines that refer to standards promulgated by other organizations, e.g., ANSI, IEEE, IEC, MILSTD. The Contractor shall research all standards references to identify the latest version and ensure that this is the version referenced in the Guidelines. All references must include the date and version number, if appropriate. In addition, the Contractor shall research commercial practice and other sources of standards to identify replacements for the MILSTD references no longer maintained by the Department of Defense. The Contractor will edit references to standards in the body of the Guidelines to the title of the standard only and key the entry to the References section. This will facilitate the future
issuance of technical addenda to the References as versions of standards evolve without having to create change notices for the body of the document.

4. Develop a comprehensive Glossary of election terms related to voting systems and certification. The Glossary in the 2005 Guidelines has been expanded from the 2002 Voting Systems Standards. However, it needs further work. All key terms in the body of the document should be included in the Glossary. In addition, some terms are defined somewhat differently by various jurisdictions (e.g., absentee voting). Conversely, some concepts are referred to by different terms in different jurisdictions (e.g., ballot type, ballot style). The Contractor shall make recommendations to EAC for additional terms and additional definitions to be included in the Glossary.

5. Maintain master copy of Guidelines and make revisions as directed by EAC. EAC intends to revise the Guidelines throughout the comment period to expedite the process of issuing the final Guidelines at the end of that period. The Contractor shall maintain the master copy of the Guidelines and make revisions as directed by EAC. The Contractor shall maintain strict configuration management and version control of all changes.

6. Attend EAC meetings with statutory boards. HAVA mandates that all guidance issued by the EAC must be reviewed and commented on by the Board of Advisors and the Standards Board. The Board of Advisors is scheduled to meet in Portland, Oregon, August 3-5. The Standards Board is scheduled to meet in Denver, Colorado, August 24-25. The Contractor shall attend these meetings to maintain awareness of concerns and issues raised by these EAC advisory groups.

7. Attend public hearings on Guidelines. One public hearing was conducted in New York City on June 30. Two additional hearings are planned. One is at Caltech in Pasadena, California, on July 28. The other is scheduled for Denver, Colorado, on August 23. The Contractor shall attend these hearings to maintain awareness of the concerns and issues that members of the election community and the public express regarding the Guidelines.

5.0 Contract Type. The contract type will be Time and Materials in the amount of $175,000.

6.0 Place of Performance. The principal place of performance will be the Contractor's place of business. Project meetings may occasionally be conducted at EAC offices in Washington, D.C. Some travel will be required to attend EAC public hearings and other meetings related to Guidelines review, which are scheduled for various locations.

7.0 Period of Performance. The period of performance is from date of award until December 30, 2005.
8.0 Schedule of Deliverables.

1. Project plan – 5 days after contract award
2. Progress reports – monthly
3. Comment summaries – weekly
4. Comment classification schema – 15 days after contract award
5. Updated standards references – 45 days after contract award
6. Revised Glossary – 60 days after contract award
7. Briefings – as required

9.0 Inspection and Acceptance Criteria. Final inspection and acceptance of all work performed, reports, and other deliverables will be performed at the offices of the EAC. The Contracting Officer's Representative for this effort will be Brian Hancock.

10.0 Invoicing. Invoices may be submitted monthly using Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal. Invoices shall be mailed to the attention of Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington, D.C. 20005.

11.0 Accounting and Appropriation. Funds in the amount of $175,000.00 are available for this task order.

12.0 General Provisions:

1. Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The EAC reserves the right to inspect and review any products or services that have been tendered for acceptance. The EAC may require correction or re-performance of nonconforming items at no increase in contract price. The EAC must exercise its post-acceptance rights within ten (10) days after the defect was discovered or should have been discovered.

2. Contract Terms. Should there be a conflict between the contract clauses included in this document and the “Purchase Order Terms and Conditions” on the back of GSA Form 300, which is used to record contract financial data, the contract clauses in this document shall take precedence.

3. Changes. Changes in the terms and conditions of this Contract may be made only by written agreement signed by authorized representatives of both parties.

5. **Excusable Delays.** The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the EAC, in writing, as soon as possible after the beginning of an excusable delay. The Contractor shall explain the basis for the excusable delay, and correct the problem as soon as possible. The Contractor shall notify the EAC, in writing, at the end of the delay.

6. **Other Complications.** The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules and regulations applicable to its performance under this contract.

8. **Limitation of Government Liability.** The Contractor is not authorized to make expenditures or incur obligations exceeding the total amount allocated to the contract. The Contractor is required to notify the Contracting Officer's Representative when 75% of funding has been obligated.

9. **Termination for convenience.** The EAC, by written notice, may terminate this contract without fault, in whole or in part, when it is in the best interest of the government. In the event of contract termination for convenience, the Contractor, shall be in accordance with Part 49 of the Federal Acquisition Regulations in effect on the date of this contract.
**ORDER FOR SUPPLIES AND SERVICES**

**NOTE:** MARK ALL PACKAGES WITH ORDER NUMBER/CONTRACT NUMBER

<table>
<thead>
<tr>
<th>1. DATE OF ORDER</th>
<th>2. ORDER NUMBER</th>
<th>3. CONTRACT NUMBER</th>
<th>4. ACT NUMBER</th>
</tr>
</thead>
<tbody>

**GENERAL SERVICES ADMINISTRATION**

**GSA FORM 300 (REV. 2-93) 01829E**
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax for which the Government is exempt and which was not included in the contract price.

52.210-79 PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment of contractor's work and shall include: (1) Name and address of consignor; (2) Government order or contract number; (3) Government bill of lading number covering the shipment (if any); (4) Description of material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information listed above, the packing list or shipping document shall include: (2) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies or services, accepted and found to be proper, less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries if the Government accepts the partial deliveries as being in accordance with the contract. The amount due on a partial delivery will be shown on the bill of lading, and the Contractor will request in writing the amount due on the partial delivery; the amount due on the delivery is at least $1,000 or 60 percent of the total contract price.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will form a part of the award, and will be evaluated if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be calculated from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been received when the check or order upon which it appears has been cashed or the date on which an electronic funds transfer was made.

PROMPT PAYMENT

Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due dates, invoice requirements, constructive acceptance and interest penalties. Certain portions of the clause regarding payment due date, invoice requirements, and constructive acceptance have been eliminated for your convenience. All days referred to in the extracts below are calendar days.

(a)(2) The due date for making invoice payments by the designated payment office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor.

52.232-30 PAYMENT TERMS (OCT 1988)

(a)(4) The Certificate of the Government shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include the items listed in (i) through (vii) below. If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 7 days after receipt of the invoice at the designated billing office. Un timely notification will be taken into account in the computation of any interest penalty owed the Contractor.

(i) Name and address of the Contractor.

(ii) Invoice date.

(iii) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).

(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount terms, bill of lading number and weight of shipment will be shown for shipments on Government bills of lading).

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the contract or in a proper notice of assignment).

(vii) Name (where practicable), title, phone number, and mailing address of person to be notified in event of a defective invoice.

NOTE: Invoices must include the ACT number (block 4) and shall be submitted in an original only, unless otherwise specified in the contract, or in the absence of a remittance address in block 12.

52.222-40 SERVICE CONTRACT ACT OF 1986, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under section 6(g) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 206 and 207).

The GSA Form 2186, Service Contract Act of 1986 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

52.282-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1989)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will mail them full text:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

52.203-1 Official Not to Benefit (APR 84)

52.203-3 Gratuities (APR 84)

52.203-4 Covenant Against Contingent Fees (APR 84)

52.203-8 Restriction on Foreign Subcontract Sales to the Government (JUL 86)

52.203-7 Anti-Kickback Procedures (OCT 88)

52.212-9 Variation In Quantity (APR 84)

In the preceding clause, the permissible variations are stated in the schedule.

52.222-3 Convict Labor (APR 84)

52.222-28 Equal Opportunity (APR 84)(Applies when amount exceeds $10,000)

52.222-35 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84)(Applies when amount exceeds $10,000)

52.222-36 Affirmative Action for Handicapped Workers (APR 84)(Applies when amount exceeds $2,500)

52.222-37 Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era (JAN 88)(Applies whenever clause 52.222-35 is included)

52.223-4 Drug Free Workplace (JUL 90)(Applies if contract is awarded to an individual)

52.223-5 Buy American Act - Supplies (JAN 89)

52.223-11 Representations on Certain Foreign Purchases (MAY 92)

52.223-29 Prompt Payment (SEP 92)

52.224-8 Disputes (DEC 91)

52.224-9 Contract After Award (AUG 89)

52.248-1 Contractor Inspection Requirements (APR 84)

52.249-8 Default (Fixed-Price Supply and Services)(APR 84)

Applicable to purchase orders for supplies:

52.222-24 Contract Work Hours and Safety Standards Act - Overtime Compensation - MAR 86(Appplies when amount is between $2,600 and $10,000)

52.222-20 Walsh-Healey Public Contracts Act (APR 84)(Applies when amount exceeds $10,000)

52.243-1 Changes - Fixed Price (AUG 87)

52.249-1 Termination for Convenience of the Government (Fixed Price)(Short Form)(APR 84)

Applicable to purchase orders for services:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - MAR 86(Appplies when amount exceeds $2,500)

52.243-1 Changes - Fixed Price (APR 84) - Alt. II

52.249-4 Termination for Convenience of the Government(Services)(Short Form)(APR 84)
**ORDER FOR SUPPLIES AND SERVICES - RECEIVING REPORT**

**DATE OF ORDER:** 7/22/05

**ORDER NUMBER:** F4ACINUMBER

**CONTRACT NUMBER:** EAC-0544

**ACT NUMBER:** E4019088

**IMPORTANT:**

- This form must be received in the payment office within 5 workdays of acceptance.
- Acceptance must take place within 7 calendar days of delivery or completion of work unless a different inspection/acceptance period is stated in the contract.
- Invoices received must be time stamped to indicate the date of receipt. See reverse of this form for detailed instructions.

**GENERAL SERVICES ADMINISTRATION**

6. RECEIVING REPORT - PAYING OFFICE

**GSA FORM 300 (REV. 2/93)**
Certifying receipt and processing payments for procurements requiring a written purchase order
(GSA Form 300 or 300-1).

(1) When supplies or services are received, the contracting/ordering office or designated program office will certify receipt and acceptance and indicate the amount approved for payment on copy 6, Receiving Report, of GSA Form 300 or 300-1. When multiple deliveries/payments are required, additional copies of the receiving report (copy 6) may be reproduced or the GSA Form 3025 or 3025A Receiving Report, used to certify receipt and acceptance. Photocopies signatures will not be accepted on the receiving report.

NOTE: It is important that the date of receipt and the date of acceptance entered in the certification on the receiving report be accurate. Those dates are used to calculate the due date for payments and interest on overdue payments. The contracting/ordering officer or a designated representative should certify receipt and authorize payment by signing the certification on the receiving report.

(2) Invoices received by issuing offices or other designated program offices must be time stamped to indicate the date of receipt, checked to verify the arithmetic accuracy of the invoiced amount, and forwarded, within 5 workdays of receipt, to the appropriate Finance Division for payment. Copy 1 of the GSA Form 300/300-1 and a receiving report (Copy 6 of GSA Form 300/300-1 or GSA 3025/3025A, Receiving Report) should be forwarded with the invoice to finance.

(3) When invoices are submitted directly to the Finance Division, contracting/ordering or other designated program offices will certify receipt and acceptance and authorize payment for supplies or services by completing copy 6 of GSA Form 300/300-1 or the GSA Form 3025/3025A, Receiving Report, in accordance with paragraph (c) (1) above and sending it to the appropriate finance division within 5 workdays after supplies or services are received and accepted.
1.0 Background. On May 9, 2005, the EAC received the initial set of recommendations for the HAVA-mandated Voluntary Voting System Guidelines from the Technical Guidelines Development Committee (TGDC). After performing its due diligence review of this document, the EAC made several changes and published the revised document for a 90 day public comment period. This period began on June 29, with publication of a notice in the Federal Register.

The EAC has established several alternative methods for submitting comments:
- On-line electronic comment form at www.eac.gov
- E-mail to votingsystemguidelines@eac.gov
- Postal mail to Voting System Guidelines Comments at EAC
- FAX to Voting System Guidelines Comments at 202.566.3127

The on-line comment form is associated with an application developed to assist with the management, tracking, and review of comments. This application will permit the manual entry of comments received from other sources so that all comments will be stored and managed from a single source. All comments will be posted for public review on the EAC website.

All comments will need to be reviewed and categorized into editorial, substantive, and other general categories useful for management purposes. Substantive comments will be assessed to determine if they indicate a need to modify the Guidelines. This may require some research and analysis, including consultation with NIST and/or the TGDC. At the conclusion of the comment period, EAC will be required to summarize the numbers and types of comments received and their disposition.

2.0 Objective. The objective of this contract is for EAC to obtain assistance with the posting and initial analysis and categorization of the comments and to obtain technical assistance in updating the referenced standards and glossary sections.

3.0 Scope. EAC shall provide the contents of the website temporarily hosting the Voluntary Voting System Guidelines, to include the on-line commenting application and database of comments. EAC shall forward all comments received from other sources for timely posting to the comment database by the Contractor. The Contractor shall be responsible for all the research, analysis and support activities necessary to successfully complete the tasks described below.

4.0 Tasks.

1. **Host document for public review and post comments received.** The Contractor shall host the Voluntary Voting System Guidelines document and commenting
application on their website and make them available for public access from the start of the contract until the close of the comment period (September 26, 2005). This access shall be provided by a hot link from the EAC homepage.

The Contractor shall perform initial screening of comments for profanity or other offensive content. Originators of such comments will be informed that such material cannot be posted for public consumption. These comments will be retained in the database, but not approved for public posting. All other comments will be posted to the website for public review.

The EAC will forward to the Contractor all comments received by other means than the on-line comment form for entry into the comment database for public posting and analysis. The Contractor shall provide appropriate quality control to ensure that all comments are captured correctly. Comments will be entered verbatim as received, with no corrections or excerpting.

Hosting of comments will extend for an estimated 30 days beyond the close of the comment period to allow sufficient time to review and determine their disposition. All comments shall be copied to CDs for transfer and retention by the EAC at the conclusion of the contract.

2. **Recommend a comment classification schema and organize comments accordingly.** The Contractor shall recommend a classification schema for categorizing comments relative to the degree of analysis required. For example, comments dealing with editorial points, typographical errors, and grammar can be handled very straightforwardly. Comments that are more technical in nature may require considerable analysis and perhaps research in order to make a determination on their disposition. Upon approval of the schema by EAC, the Contractor shall organize comments in this manner and periodically provide reports to the EAC on the number and kinds of comments received, and recommendations for the disposition of substantive comments. Comments shall be mapped to relevant portions of the Guidelines document. Periodic teleconferences will be conducted to review status of work, discuss comments and recommendations, and identify issues that will require consultation with NIST or other sources for resolution.

3. **Update standards referenced in Guidelines.** There are several places in the Guidelines that refer to standards promulgated by other organizations, e.g., ANSI, IEEE, IEC, MILSTD. The Contractor shall research all standards references to identify the latest version and ensure that this is the version referenced in the Guidelines. All references must include the date and version number, if appropriate. In addition, the Contractor shall research commercial practice and other sources of standards to identify replacements for the MILSTD references no longer maintained by the Department of Defense. The Contractor will edit references to standards in the body of the Guidelines to the title of the standard only and key the entry to the References section. This will facilitate the future
issuance of technical addenda to the References as versions of standards evolve without having to create change notices for the body of the document.

4. **Develop a comprehensive Glossary of election terms related to voting systems and certification.** The Glossary in the 2005 Guidelines has been expanded from the 2002 Voting Systems Standards. However, it needs further work. All key terms in the body of the document should be included in the Glossary. In addition, some terms are defined somewhat differently by various jurisdictions (e.g., absentee voting). Conversely, some concepts are referred to by different terms in different jurisdictions (e.g., ballot type, ballot style). The Contractor shall make recommendations to EAC for additional terms and additional definitions to be included in the Glossary.

5. **Maintain master copy of Guidelines and make revisions as directed by EAC.** EAC intends to revise the Guidelines throughout the comment period to expedite the process of issuing the final Guidelines at the end of that period. The Contractor shall maintain the master copy of the Guidelines and make revisions as directed by EAC. The Contractor shall maintain strict configuration management and version control of all changes.

6. **Attend EAC meetings with statutory boards.** HAVA mandates that all guidance issued by the EAC must be reviewed and commented on by the Board of Advisors and the Standards Board. The Board of Advisors is scheduled to meet in Portland, Oregon, August 3-5. The Standards Board is scheduled to meet in Denver, Colorado, August 24-25. The Contractor shall attend these meetings to maintain awareness of concerns and issues raised by these EAC advisory groups.

7. **Attend public hearings on Guidelines.** One public hearing was conducted in New York City on June 30. Two additional hearings are planned. One is at Caltech in Pasadena, California, on July 28. The other is scheduled for Denver, Colorado, on August 23. The Contractor shall attend these hearings to maintain awareness of the concerns and issues that members of the election community and the public express regarding the Guidelines.

5.0 **Contract Type.** The contract type will be Time and Materials in the amount of $175,000.

6.0 **Place of Performance.** The principal place of performance will be the Contractor’s place of business. Project meetings may occasionally be conducted at EAC offices in Washington, D.C. Some travel will be required to attend EAC public hearings and other meetings related to Guidelines review, which are scheduled for various locations.

7.0 **Period of Performance.** The period of performance is from date of award until December 30, 2005.
8.0 Schedule of Deliverables.

1. Project plan – 5 days after contract award
2. Progress reports – monthly
3. Comment summaries – weekly
4. Comment classification schema – 15 days after contract award
5. Updated standards references – 45 days after contract award
6. Revised Glossary – 60 days after contract award
7. Briefings – as required

9.0 Inspection and Acceptance Criteria. Final inspection and acceptance of all work performed, reports, and other deliverables will be performed at the offices of the EAC. The Contracting Officer's Representative for this effort will be Brian Hancock.

10.0 Invoicing. Invoices may be submitted monthly using Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal. Invoices shall be mailed to the attention of Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington, D.C. 20005.

11.0 Accounting and Appropriation. Funds in the amount of $175,000.00 are available for this task order.

12.0 General Provisions:

1. Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The EAC reserves the right to inspect and review any products or services that have been tendered for acceptance. The EAC may require correction or re-performance of nonconforming items at no increase in contrast price. The EAC must exercise its post-acceptance rights within ten (10) days after the defect was discovered or should have been discovered.

2. Contract Terms. Should there be a conflict between the contract clauses included in this document and the "Purchase Order Terms and Conditions" on the back of GSA Form 300, which is used to record contract financial data, the contract clauses in this document shall take precedence.

3. Changes. Changes in the terms and conditions of this Contract may be made only by written agreement signed by authorized representatives of both parties.

5. *Excusable Delays.* The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the EAC, in writing, as soon as possible after the beginning of an excusable delay. The Contractor shall explain the basis for the excusable delay, and correct the problem as soon as possible. The Contractor shall notify the EAC, in writing, at the end of the delay.

6. *Other Complications.* The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules and regulations applicable to its performance under this contract.

8. *Limitation of Government Liability.* The Contractor is not authorized to make expenditures or incur obligations exceeding the total amount allocated to the contract. The Contractor is required to notify the Contracting Officer's Representative when 75% of funding has been obligated.

9. *Termination for convenience.* The EAC, by written notice, may terminate this contract without fault, in whole or in part, when it is in the best interest of the government. In the event of contract termination for convenience, the Contractor, shall be in accordance with Part 49 of the Federal Acquisition Regulations in effect on the date of this contract.
ELECTRONIC FUNDS TRANSFER (EFT) ENROLLMENT FORM

Use this form to enroll in Direct Deposit of your federal payment from the General Services Administration.

Privacy Act Statement Collection of this information is authorized by 31 U.S.C. 3332(g), 3325(d) and 7701(c). The information will be used by the Government to make payments by EFT to a vendor. This information may also be used for income reporting and for collecting and reporting on any delinquent amounts arising out of a vendor's relationship with the Government. Disclosure of the information by the vendor is mandatory. Failure to provide the requested information may result in the delay or withholding of payment to the vendor.

Stephen Berger  
TEM Consulting  
140 River Road  
Georgetown, TX 78628  
VIA FACSIMILE 512-869-8709

Dear Mr. Berger:

The U.S. Election Assistance Commission has received a request under the Freedom of Information act (FOIA) for Contract # EAC 05-41 for technical assistance for the definition and documentation of an EAC laboratory accreditation and voting system certification process. Our review of the contract reveals that certain contract data supplied by TEM Consulting may fall within exemption 4 to the FOIA.

Under this exemption the EAC may refuse to disclose trade secrets and commercial or financial information obtained from a source outside the Government and which is privileged or confidential. Commercial or financial information is considered confidential if its disclosure is likely to cause substantial competitive harm to the source of the information.

In order for us to make a determination regarding the release of the contract under consideration the EAC must have a detailed justification of the reasons your firm believes the information requested should not be released under Exemption 4 of the FOIA. We believe that you are in a good position to explain the commercial sensitivity of the information contained in the contract which relates to the confidential information from your proposal.

In this regard please provide the EAC with a specific description concerning how disclosure of confidential information or related information in the contract would cause substantial harm to TEM Consulting's present or future competitive position. Some factors you may wish to describe are: the general custom or usage in your business regarding this type of information, the number and position of persons who have, or have had access to the information, the type and degrees of commercial injury that disclosure would cause and the length of time you feel confidential treatment is warranted. Due to the response time limits imposed on the government in these cases we request that you provide your response by
October 19, 2005. If we have not heard from you by that date we will assume that your firm has no objection to disclosure of the contract in its entirety.

We will carefully consider the justification you provide us and will endeavor to protect your proprietary data to the extent permitted under law. Should the EAC disagree with your position regarding some or all of the information requested, and determine it to be releasable, we will provide you with advance notice of our decision so that you may take whatever steps you consider appropriate to protect your interests.

If you have any questions you may reach me at (202) 566-3116 or gvogel@eac.gov.

Sincerely,

[Signature]
Gaylin Vogel
Law Clerk
U.S. Election Assistance Commission
Dear Gaylin,

This note is to further document the reasons for our request that our hourly labor rate be withheld under the FOIA request you have received.

In any competitive bid situation competitive advantage is gained by the ability to deliver higher quality of service at a lower price. It is therefore the combination of quality of service and price that combines to provide a competitive offering. Having full visibility to the quality and price provides a competitor to bid against a known quantity while withholding one of these items assures that competitive bids remain truly competitive. As the seniority of our staff and their quality level is well known the only item that remains unknown to competitors is the price offered. Therefore we believe that the hourly rate offered should be considered a confidential item and withheld from this request.

Best Regards,

Stephen Berger

Subject: RE: FOIA

Dear Mr. Berger:

On October 12, 2005 you were informed via fax that a third party through the Freedom of Information Act (FOIA) has requested a copy of the contract and corresponding documents with TEM Consulting. The purpose of the letter was to provide you with an opportunity to specify provisions in the responsive documents that you believe are protected from disclosure under FOIA. We required you to identify the specific provisions in the responsive documents and the applicable FOIA exemption. As the EAC did not get such a response, we must assume that you do not have an objection to the disclosure of the contract in its entirety as noted in our initial letter. The EAC is under a tight timeline to respond to FOIA requests. We must respond to this FOIA in the near future. If you believe you have provided specific information, consistent with the above, please let me know immediately.

Thank you,
Gaylin Vogel

GVogel@eac.gov
Mr. King:

The EAC has received your letter stating that KSU wishes to classify certain contract information as confidential or a trade secret. In order for the EAC to review this request we will need you to identify the specific provisions and connect it to the specific Freedom of Information Act (FOIA) exception (most probable is exception 4 relating to Trade Secrets.) You will also need to justify to the EAC why it should withhold the information.

In order to assist you in your review I have attached the documents that the EAC has identified as responsive to the request involving communications with KSU.

If you have any questions please do not hesitate to contact me. In the event that you need to reach me over the week my cell is 202-491-3998.

Ms. Gaylin Vogel
U.S. Election Assistance Commission
1225 New York Ave., NW – Suite 1100
Washington, DC 20005

Dear Ms. Vogel:

Disclosure of the confidential content of the contract between Kennesaw State University (KSU) and the Election Assistance Commission (EAC) would be detrimental to KSU’s current and future competitive position as a contractor. The disclosure of our pricing structure, methods for organizing work, and descriptions of software products designed to support the contract, would place us at a competitive disadvantage in bidding on comparable projects.

We request that information in our contract with the EAC be treated confidentially until such time that the products of our current contract (the public comments database and related documents, including the edited draft of the Voluntary Voting System Guidelines) are no longer in use by the EAC.

Sincerely,

Merle S. King
Chair, CSIS Department
Gaylin,
I believe I gave you all the information I had relating to these contracts.

Brian

Bola, Brian, Carol, and Diana:

I need to get written confirmation from all of you by COB tomorrow (11/2) that you have turned over all the responsive documents to the FOIA request from EPIC dealing with contracts that the EAC has awarded to TGDC members or organizations connected to TGDC members; basically the contracts with TEM Consulting and Kennesaw State University. I sent an e-mail about this on October 11 & 12. If you need me to resend the original message please ask.

Thanks,

Gaylin Vogel

Subject FOIA Request - URGENT

Carol, Brian, Diana/Bola, and Karen:

We have a FOIA request for our records (includes e-mails) dealing with Contracts awarded to TGDC members and groups that the TGDC members are associated with and the EAC. Since the documents may contain confidential commercial information the EAC has to inform the submitter of the information that the records have been FOIAed.

From a review of the TGDC list and groups specifically identified in the FOIA request please check your files for any records dealing with a contract to

Kennesaw State University
OASIS
Usability Professionals Association
MIT
NASED
TEM Consulting
IEEE
Citigroup
We may not have any contracts with all of the groups listed. I do not need any records for contracts that are in negotiation or awaiting signature; but please let me know that you posses such records.

This request is urgent as we are under a deadline. I need the documents by COB tomorrow (Wednesday, October 12). If you can identify the records I am more then willing to make the copies. If you feel inclined to make copies please make them single sided and no staples.

If you do not have any responsive records please send me an e-mail stating that you do not any of the requested records.

From: Gaylin Vogel, Law Clerk

RE: Freedom of Information Act request from the Electronic Privacy Institute on September 12, 2005

The memo covers the approach taken to locate the responsive documents, justification for the redaction of certain information contained in the responsive documents, and justification for withholding certain documents.

Background
The EAC received a Freedom of Information Act (FOIA) request from the Electronic Privacy Information Center (EPIC) on September 14, 2005; the letter is dated September 12, 2005. EPIC requested all agency records concerning agency contracts awarded between July 9, 2004 and September 12, 2005 with Kennesaw State University (KSU); Stephen Berger; or current or former Technical Guidelines Development Committee (TGDC) members and institutions they were affiliated with within one year of the first TGDC meeting.

Approach
In order to locate the responsive documents I sent an e-mail to EAC staffers Karen Lynn-Dyson, Brian Hancock, Bola Olu and Diana Scott; and EAC Contract Employee Carol Paquette. In the e-mail I asked for all documents relating to the formation or modification of any contract or agreement with the entities mentioned above. A list of TGDC members was included in the e-mail. The EAC does not know what groups TGDC members were affiliated within one year of the first TGDC meeting. In order to honor the spirit of the EPIC request I looked at the TGDC membership list which listed current affiliations. The e-mail requesting the responsive documents included a list these affiliated groups.

This process revealed that two contracts that fall within the scope of the request. One was with KSU, the other was with TEM Consulting, Stephen Bergers consulting group.

Bola Olu and Diana Scott turned over copies of the contract and funding documents; Brian Hancock turned over e-mail correspondence; Karen Lynn-Dyson responded that she did not have any records; and Carol Paquette turned over a file on each contract and e-mail correspondence.
On November 1, 2005 via e-mail I confirmed with the Diana Scott, Brian Hancock, Karen Lynn-Dyson, Carol Paquette and Bola Olu that they have searched their files and did not have any additional responsive documents.

Redaction
The following information was redacted from the responsive documents based on FOIA exemption 6, which covers personal privacy interest. For example any information that "applies to a particular individual" meets the threshold requirement for Exemption 6 protections. Based on a balancing test of the public's right to know against an individual's right to privacy, I have determined that disclosure of the information "would constitute a clearly unwarranted invasion of personal privacy." The core purpose of FOIA is to shed light on the agency's performance of its statutory duties. The following information pertains to personal information of contractors and not to the function or practices of the EAC:

- The address for TEM Consulting is Stephen Bergers home office. This address was listed numerous times on different documents. In each instance his address was redacted.
- In Stephen Berger's e-mail tag the home phone number and mobile phone number was listed. In each instance his home and mobile phone number was redacted.
- In an e-mail from Merle King of KSU to Carol Paquette (7/12/05 at 6:34 P.M.) he listed the name of his "PM" that he lost when her contract ended. The individuals name was redacted.
- On the Electronic Funds Transfer (EFT) Enrollment Form, KSU's bank account number and the banks routing transit number was redacted.
- NEAR INPUT TRANSMITTAL sheet other transactions relating to personal travel authorizations and reimbursements and vendor payments was redacted. The information relating to TEM Consulting and KSU was not redacted.
- In e-mail from Stephen Berger to Carol Paquette (6/1/05 at 9:45 A.M) TEM Consulting EIN number was redacted.
- The home address listed on Daniel Hoolihan’s bio was redacted.
- Through out the responsive documents some personal e-mail addresses were listed. The information following the "@" was redacted for personal e-mail addresses.

The following information was redacted from the responsive documents based on FOIA exemption 4, which covers confidential commercial information. Revealing actual cost information is a court recognized competitive injury because the use of the information by competitors can injure the submitter's competitive position.

- On the KSU budget Merle King's percentage of effort is redacted because it could be used to calculate the University's actual cost. By redacting the percentage the actual

---

2 5 U.S.C. §552(b)(6)
3 N.Y. Times Co. v. NASA, 920 F.2d 1002 at 1005 (D.C. Cir 1990)
5 FOIA Book page 332
costs of the time for his labor cannot be deduced. This approach is consistent with prior court approaches to similar situations where the court disaggregated the requested information, ordering release of the wage rates without the manhour information, because release of one without the other would not cause the company competitive harm.6

Not Redacted
I contacted the FOIA help desk at Justice in response to Mr. Berger's request to withhold his discounted hourly rate. I was told it is possible to withhold the information on a discounted rate but if the rate is "loaded" then we must show disclosure is harmful to the competitive process. In the brief conversation the FOIA Counselor stated that this is a high standard and Mr. Berger's ability to negotiate the higher private rate in the private sector was not a competitive process consideration. In a subsequent discussion with Mr. Berger he asked that we redact the rate but understands that the EAC may have to release the rate.

Withheld
The following responsive documents were withheld based on FOIA exemption 5, deliberative process privilege. The privilege is which is designed to “prevent injury to the quality of agency decisions.”7 One of the goals of this exemption is to encourage open, frank discussions on matters of policy between subordinates and superiors.8 In order for a document to be withheld as predecisional it must be “antecedent to the adoption of an agency policy.”9 It must be “a direct part of the deliberative process in that it makes recommendations or expresses opinions on legal or policy matters.”10 If the material listed below is released it will chill discussions between agency staff and the Commissioners (as the decision makers).

- Draft statement of work for the contract eventually awarded to KSU that has comments written by Chair Hillman to Carol Paquette. The final version is in the documents provided.
- E-mail from Chair Hillman to Carol Paquette, Juliet Thompson, Vice Chairman DeGregorio and Commissioner Martinez (6/1/05 at 3:10 P.M.) discussing what would be covered in a contract.
- E-mail from Carol Paquette to Chair Hillman, Juliet Thompson, Vice Chairman DeGregorio and Commissioner Martinez (6/1/05 at 6:34 P.M.) answering Chair Hillman's question posed in the 6/1/05 at 3:10 P.M. e-mail above.
- E-mail from Carol Paquette to Chair Hillman, Juliet Thompson, Vice Chairman DeGregorio, Commissioner Martinez, Tom Wilkey, Sheila Banks, Adam Ambrogi, Gavin Gilmour and Brian Hancock (6/1/05 at 12:20 P.M.) discussing the approach to finding a consultant to work on the NASED/EAC transition.

6 Painters Dist. Council Six v. GSA, No. 85-2971, slip op. at 8 (N.D. Ohio July 23, 1986); see also Lykes, No. 92-2780, slip op. at 15 (D.D.C. Sept. 2, 1993) (submitter failed to show any harm given fact that proposed disclosures would "redact all price terms, financial terms, rates and the like")
8 Russell v. Dep't of the Air Force, 682 F.2d 1045, 1048 (D.C. Cir. 1982)
9 Jordan v. United States Dep't of Justice, 591 F.2d 753, 774 (D.C. Cir. 1978)
10 Vaughn v. Rosen, 523 F.2d 1136, 1143-44 (D.C. Cir. 1975)
• E-mail from Carol Paquette to Chair Hillman, Juliet Thompson, Vice Chairman DeGregorio and Commissioner Martinez (6/2/05 at 9:21 A.M.) discussing the prudence of Mr. Berger's hourly rate.

• E-mail from Chair Hillman to Carol Paquette, Juliet Thompson, Vice Chairman DeGregorio and Commissioner Martinez (6/1/05 at 8:22 P.M.) discussing the approving on Mr. Berger's hourly rate.

**Recommendation**

The responsive documents identified by Diana Scott, Bola Olu, Brian Hancock, and Carol Paquette should be turned over to EPIC with the recommended redactions; with exception for the documents identified under the deliberative process exception discussed above.
ELECTRONIC FUNDS TRANSFER (EFT) ENROLLMENT FORM

Use this form to enroll in Direct Deposit of your federal payment from the General Services Administration.

Privacy Act Statement: Collection of this information is authorized by 31 U.S.C. 3332(g), 3325(d) and 7701(c). The information will be used by the Government to make payments by EFT to a vendor. This information may also be used for income reporting and for collecting and reporting on any delinquent amounts arising out of a vendor's relationship with the Government. Disclosure of the information by the vendor is mandatory. Failure to provide the requested information may result in the delay or withholding of payment to the vendor.

GENERAL SERVICES ADMINISTRATION
Merle -

I'm delighted that you have decided to move ahead with this work. We are really looking forward to working with Kennesaw. We need to make one further adjustment to the Statement of Work, based on feedback from the Commissioners. They have indicated that the Boards have been working out their own processes for reviewing the Guidelines at their meetings, so we will not need facilitation of these discussions by Kennesaw. However, we do still need to have you attend.

We will get the contract prepared and signed as soon as possible. You didn't provide a cost estimate for the document hosting, so I just increased the funding amount to $175,000. We can do a contract modification later if necessary to further adjust the funding. This will be a cost plus expenses type contract, not fixed price, so there will be no issue regarding adjusting the cost.

In addition to the EFT form we also need the Kennesaw tax ID#. Cannot process contract through Finance without this information. Also need to know your cognizant federal contract audit agency, but that information is not needed to get contract signed. Thanks and I look forward to working with you and the rest of the Kennesaw team!

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov

Carol - After some reflection and conversations with the staff here and with Tom on your end, I would like to go forward with the VVSG project.

I have initial edits nearly ready on the glossary. We have the server ready and my guys are looking at the Zone Alarm report to find a work around.

I lost my PM, Carol Julian. Her contract ended on July 1. She may be able to come back as a part-time consultant so all is not lost, and I have identified another candidate for PM.

I have the completed EFT here. I can fax it to you tomorrow or send it surface mail or both. We need to convert the SOW into a contract. From our end that would be as simple as adding a budget and signatory lines to the existing document.

I need to talk with you regarding the CalTech and Portland trips.
Carol - I am responding to this because I am not at all sure that everyone
does know my position on VVPATs.

My position is this:

I have absolutely no objection to VVPATs, but believe that they are not
technically necessary. We are entirely capable of building and operating
accurate, secure paperless electronic voting systems. Many jurisdictions,
including the State of Georgia, are currently conducting accurate, secure
elections on pure DRE voting systems.

I fully support the concept of allowing voter's to verify their ballots and
have no problem with jurisdictions that wish to use paper for this process.

I look forward to seeing you in New York.

Best regards.

Brit

----- Original Message -----

Subject: Re: website

Carol - The Center staff has never given testimony to the GA
Legislature. I have given testimony once, at a NIST meeting, but it was
on the topic of functionality, not VVPAT.

The organization of the full-time staff at the Center is as follows:

Merle King - Executive Director
Ray Cobb - Director
Tara Robie - Sr. Project Coordinator
Anthony Peel - Sr. Project Coordinator
Jessica Bamford - Project Coordinator

Brit is a contractor with the SOS office and although he spends time at
the Center, he is not on the Center budget. He does not report to me.

The Center is completely funded by the SOS of Ga., as a line item in
their budget.

The Center staff has had private conversations with our vendor
regarding VVPAT and I have expressed my opinion to several vendors on
the legal and operational issues associated with the concept.

I have discussed the proposed work for the EAC with the SOS Elections
Director and we believe there is not a conflict of interest in the
d. The cataloged comments will be stored on a secure server so that all appropriate EAC-designated individuals can review the comments as needed. Summary reports will be provided to the EAC, as requested.

5. A final, comprehensive Glossary, benchmarked to as many jurisdictions as is practical, will be developed for the next iteration of the Guidelines. This Glossary of terms will attempt to provide jurisdiction-specific versions of commonly used terms in elections management.

Budget

Given the unknown quantity of work involved in the project, it is projected that there will be fixed costs of $71,100 and variable costs associated with the volume of comments received. The total projected costs are estimated at $149,050. KSU's indirect rate is 50% of personnel costs.

KSU will invoice the EAC quarterly for the duration of the project.

Merle -

Need to get revised cost estimate from you to include additional activities outlined in my email of 5/26. Specifically, maintaining the master working copy of the Guidelines and organizing the discussion process for the EAC Boards meeting to comment on Guidelines. I'm assuming that the comment about receiving "white papers" for review and assessment will be subsumed under the existing estimate for processing comments, since that's a very indefinite quantity of work at this point. Just as a point of reference, we received more than 300 comments on our recently published 5-6 page draft guidance document on statewide voter registration lists.

Also, need the following information for contract processing purposes:

1) Name, mailing address for contractor organization, plus appropriate points of contact and their contact information - meaning, if there will be a contract manager apart from the project manager, we would like to have information for both. I think you mentioned that the contract would be with Kennesaw State not with the Center.

2) Tax ID number

3) Classification and type of business

4) Remittance address, including information for electronic funds transfer (form attached)

5) Cognizant federal contract audit agency

We are moving ahead with this, so please provide this information as soon as possible.

Thanks!

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission

The EAC needs to get a contract in place as soon as possible for the following three support activities. We are looking for an organization that can provide overall project management and the basic technical capabilities from their own staff as well as being able to pull in additional expertise from other institutions and from the election community. The EAC seeks to have broad-based participation in all its activities to ensure the election community and the general public accept the results as having integrity and validity because all points of view have been considered. The unique capabilities and mission of the CEnter for Election Systems suggests to me that your organization is ideally suited to support these EAC requirements. I would like to discuss your interest and ability to support these activities at your earliest opportunity. The EAC's goal is to have as many information products available to assist election officials with the 2006 elections as possible.

Activity 1: Review and recommend disposition of Voluntary Voting System Guidelines comments

On May 9, the EAC received the initial TGDC recommendations for revised voting system guidelines. We are currently reviewing this document to determine if it is acceptable to publish for public comment as proposed guidelines, or if some modifications might be required. We anticipate completing this review and publishing the resulting proposed guidelines by early June. The EAC is severely under-staffed to appropriately handle the workload of reviewing and determining the disposition of the potentially substantial volume of comments that are expected over the 90 day comment period. We also lack the range of appropriate technical expertise required for this task. The Commissioners have requested that we put together an appropriate review team to assist the EAC with this comment review activity. We envision this process working as follows. We anticipate that most comments will be submitted via the EAC website. We are developing a comment tracking and management application to assist in managing the comments. We will also receive comments from other sources, such as email and paper mail. There will also be two public hearings with panel presentations followed by an open mike public comment period. We plan to review comments on a weekly basis. EAC personnel and members of the review support team would convene a weekly meeting or teleconference to do a first pass review, followed by assigning out of comments requiring additional consideration. Review team members would complete their assigned topics and make disposition recommendations in a subsequent meeting of the review group and the EAC lead staffer. NIST resources will be available to do additional research and/or for consultation, if required.

Activity 2: Development of quality control procedures for voting system acceptance by election officials

There are a variety of system acceptance procedures that election officials can employ to promote consistent quality in newly delivered voting systems. The CES has developed a model process for voting system acceptance and configuration management. This methodology and the practical experience acquired from applying it over several years can be drawn on to develop a set of scaled quality assurance recommendations to meet the needs of the variety of election jurisdictions that are purchasing voting equipment this year. The concept is to provide a range of elements and approaches so election officials will have some choices for what might best suit their particular circumstances.

Activity 3: Development of Election Management Guidelines or Best Practices

The quality of election management practices has a direct impact on the integrity and overall success of the voting process. There appeared to be only a few instances of significant voting equipment
CONSORTING AGREEMENT
WORK ASSIGNMENT BASED

This Agreement is made effective as of the date of signing by and between the United States Election Assistance Commission, with offices at 1225 New York Avenue N.W., Suite 1100, Washington, DC 20005, (the "Agency" or "EAC"), and TEM Consulting, LP, with offices at 140 River Road, Georgetown, Texas, 78628 ("Consultant").

The Agency desires to retain Consultant to provide engineering consulting services for the Agency and Consultant is willing to perform such services, on terms set forth more fully below.

In consideration of the mutual covenants and obligations set forth herein, Consultant and the Agency agree as follows:

1. SERVICES TO BE RENDERED

1.1 Consultant's Services. Consultant agrees to provide for the Agency engineering consulting services as requested by the Agency from time to time (the "Services"). Details of the specifications and requirements for the Services to be performed by Consultant shall be set forth in written work assignments in the form set forth in Schedule B ("Work Assignments"). Each such Work Assignment shall be signed by Agency and Consultant. Consultant shall provide the Services described in each such Work Assignment subject to and in accordance with all terms and conditions of this Agreement. Work Assignments may be signed for the Agency by the Authorized Representative of the Agency or other persons acting at the direction of the Authorized Representative of the Agency. For each Work Assignment, the Agency shall identify a contact person who will provide directions to Consultant for each work assignment.

1.2 Work Assignments. Consultant agrees to perform for the Agency the Services described in Schedule C as Work Assignment(s), in accordance with this Agreement.

1.3 Service Levels. Consultant warrants that the Services shall be performed with care, skill and diligence, consistent with, or above applicable professional standards currently recognized in the profession, and that Consultant shall be responsible for the professional quality, technical accuracy, completeness and coordination of all Services furnished under this Agreement. Services provided by Consultant shall meet or exceed the service levels, if any, specified on the Work Assignments.

1.4 Subcontractors. The Consultant may use subcontractors to provide services under this contract. Consultant shall be responsible for any subcontractor put to work to perform any part of this contract and its work assignments, unless the subcontractor is especially requested by the Agency, in which case the Agency assumes responsibility for that particular subcontractor, the quality of that subcontractor's work, any unnecessary expenses that subcontractor may cause and the entire completion of that subcontractor's contract.

2. COMPENSATION

2.1 Fees For Services. The Agency shall pay Consultant the compensation in the amounts and upon the terms set forth in each duly executed Work Assignment entered into between Consultant and the Agency.

2.2 Fees For Work Assignment(s). As consideration for the performance of the Services of Work Assignment(s), the Agency shall pay Consultant the compensation, including fees and other costs, as set forth on Schedule C.

GENERAL SERVICES ADMINISTRATION

GSA FORM 300 (REV. 2-93)
PROFILE

Professional project manager with specialization in:

- Government and Industry Relations,
- Advanced technology business planning,
- Product development and design,
- Standards development and regulatory management.

25 years of product development and technology planning experience:

- President of the National Association of Radio and Telecommunications Engineers (NARTE).
- Former member of the IEEE Standard Board.
- Chair of the IEEE EMC Society Standards Development Committee.
- IEEE representative to US Election Assistance Commission Technical Guidelines Committee and chair of IEEE Standards Coordinating Committee 38, voting equipment standards.

Project management experience in Telecommunications, Information Technology and Instrumentation Industries, with strong record, in the areas of EMC (Electromagnetic Compatibility), RF safety and Disability Issues.

SELECTED ACCOMPLISHMENTS

GOVERNMENT AND INDUSTRY RELATIONS

- President of the National Association of Radio and Telecommunications Engineers (NARTE).
- Founded the IEEE Standards Coordinating Committee for voting equipment standards.
- Representative of the IEEE to both the federal EAC and ex officio member of NASED (National Association of State Election Directors) Voting System Standards Board.
- Member of 2 US Access Board Federal Advisory Committee:
  - Telecommunications Access Advisory Committee (TAAC) and co-chair of the compliance sub-committee (1996-1997)
  - Electronic Information Technology Access Advisory Committee (1998-1999)
- Invited presenter on disability access at EU Ministerial Conference, April 2000 in Lisbon, Portugal

EMC AND ENVIRONMENTAL TESTING AND REGULATORY COMPLIANCE

- Improved test department efficiency by 500%, with no increase in personnel.
- Invented the EHR GTEM, patented, gained FCC approval and implemented its use.

Donald Heirman is president of Don HEIRMAN Consultants, training, standards, and educational electromagnetic compatibility (EMC) consultation corporation founded in 1997. His work includes consulting with a wide range of private and governmental bodies on EMC matters including implementation of state of the art EMC test facilities and evolving standardization, laboratory competency, and measurement aspects of human exposure to radio frequency energy. He provides workshops and tutorials on many of these topics both in the United States and in Europe.

Previously he was with Bell Laboratories for over 30 years in many EMC roles including Manager of Lucent Technologies (Bell Labs) Global Product Compliance Laboratory, which he founded, and where he was in charge of the corporation’s major product safety, telecommunications, and EMC regulatory test facility and its participation in ANSI accredited standards committee and international EMC standardization. The laboratory was one of the first EMC testing labs accredited by the National Voluntary Laboratory Accreditation Program (NVLAP) on a wide range of telecommunication products.

He chairs, or is a principal technical expert contributor to, US and international EMC standards organizations including ANSI ASC C63 (committee vice chairman and chairman of its Subcommittee 1 which is responsible for most of the C63 standards on EMC testing, calibration and instrumentation specifications and techniques) and the International Electrotechnical Commission’s (IEC) Special International Committee on Radio Interference (CISPR) where he is a member of the CISPR steering committee and chairman of its Subcommittee A (Radio Interference Measurements and Statistical Techniques). Subcommittee A is responsible for CISPR Publication 16 which is the basic set of standards used worldwide for performing radio interference measurements to meet associated national regulatory requirements. He is a member of the IEC’s Advisory Committee on EMC (ACEC) and the Technical Management Committee (TMC) of the US National Committee (USNC) of the IEC. In the TMC, he is Group Manager for electromagnetics which is responsible for ensuring appropriate US participation in the IEC on EMC matters and chairs its Coordinating Committee on EMC which helps formulate US EMC positions among the many USNC technical advisory committees (TAGs) with EMC aspects. He is also an active member of the USNC TAGs for CISPR Subcommittee A and Subcommittee I (EMC of Information Technology Equipment, multimedia equipment and receivers).

Mr. Heirman is past president and now member of the Board of Directors (managing business development) of the National Cooperation for Laboratory Accreditation (NACLA) which recognizes the competency of testing and calibration accreditation bodies in the US via the adherence of these accrediting bodies to ISO guides for competency of accrediting bodies and
Daniel D. Hoolihan is currently President of Hoolihan EMC Consulting, Nottingham Court-Box 367, Lindstrou, Minnesota, 55045.

Hoolihan has been consulting in EMC Engineering since January of 2000. He specializes in EMC-Laboratory evaluations, EMC standards, and EMC Education. He is a consultant to the United States Department of Commerce National Institute of Standards and Technology (NIST) in the area of Telecom Certification Body (TCB) and Conformity Assessment Body (CAB) evaluations. He is also an assessor for the NIST National Voluntary Laboratory Accreditation Program (NVLAP).

Previous to consulting, he worked as Vice-President of Minnesota Operations for TUV Product Service from 1994 to 2000. From 1984 to 1994, he was the Co-Founder and Chief Operating Officer of AMADOR Corporation; a small business specializing in EMC testing of electronic products ranging in size from pacemakers to supercomputers. His first employment out of graduate school (in 1969) was with Control Data Corporation in their internal EMC lab.

Hoolihan has been on the Board of Directors of the EMC Society of the IEEE since 1987. He is the past-president of the EMCS (1998-1999) and has held many positions with the EMCS board in his years of service. He most recently served as the Chair of the 2002 IEEE International Symposium on EMC which was held in Minneapolis in August of 2002. He helped found the EMC chapter of the Twin Cities Section in 1985 and has been active in the local chapter since that time.

He has been actively involved with ANSI-Accredited Standards Committee on EMC since 1985. He is presently on the Steering Committee of C63 as well as chairing Subcommittee 6 (SC-6 - Lab Accreditation) and SC-8 (EMC and Medical Devices).

He is also an active member of the United States Technical Advisory Group on CISPR B; Industrial, Scientific and Medical Equipment.

His formal education includes a Bachelors Degree in Physics from Saint John's University (Minnesota), a Masters Degree in Physics from Louisiana State University (Baton Rouge), and a Masters in Business Administration from the University of Minnesota (Minneapolis).

Commissioners et al.-

The work on developing the EAC processes, documentation, etc., for transitioning lab accreditation and system certification from NASED to EAC has fallen significantly behind schedule. The project timeline called for completion of this work for Commissioner review by the end of May. We are perhaps 50% complete at this point.

We had requested assistance from NIST to work with Brian Hancock on this effort, but they have not been forthcoming with meaningful help. They provided a point of contact who passed on a lot of reference material for Brian to review, but they haven't identified anyone to help with defining the processes and preparing the documentation. The point of contact has since been diverted by some family medical problems, and Lynne Rosenthal hasn't been able to identify another person.

Prior to his departure, Commissioner Soaries encouraged me to find some additional resources to help move this work to completion. The Chair similarly advised me about two weeks ago when I was speaking to her about my concern over the lagging schedule.

In response to this direction to get help, I sent an email to Steve Berger, David Karmol, Paul Craft, Brit Williams, and Michael Shamos, asking if they could identify any individuals or companies we could contract with quickly to get this work done. Steve Berger responded that he could assist. I checked with EAC Counsel's Office to see if there were any issues regarding EAC contracting with a member of the TGDC. Julie and Gavin informed me that there were no problems with this: Steve is very well-qualified by education and experience to assist us in this effort. Paul Craft and Brit Williams concurred that Steve could more than adequately fill the requirement.

Brian and I have had several conversations with Steve and are convinced that his assistance will enable us to move ahead quickly to meet our revised target completion date of June 30. He has worked on defining similar quality conformance programs for other organizations and is knowledgeable of all the relevant standards, etc., and which need to be applied.

Consequently, I am recommending that the EAC enter into a consulting contract with Steve Berger for a not to exceed amount of $40,000 and a period of performance from June 1 through July 31. The first milestone is to help Brian complete this work for Commission review by June 30. Steve's time in the month of July would be utilized to respond to questions and comments from the Commissioners to complete the work for Commission approval and establishment of a transition date.

I am available to discuss this matter and answer any questions you may have. If you are in agreement with this course of action, I will ask DeAnna to prepare appropriate consensus vote.

Carol A. Paquettte
Interim Executive Director
U.S. Election Assistance Commission

Brian,

Let me introduce the 3rd member of our "work crew" Dan Hoolihan. Dan has a lot of relevant experience to what we are doing. He is a NVLAP accredditor, very active on the FCC's Technical Competent Body Counsel and also works in international lab recognition areas. I know you will find Dan a valuable resource to have involved.

In talking to Dan this morning about our project we found ourselves discussing whether ISO Guide 65 type topics would be in view for this project. Guide 65 deals with vendor related topics, like their quality system, to assure that the manufactured product is the same as the tested product. ISO Guide 17025 focuses by contrast on lab accreditation. I asked Dan to write up a short discussion and forward it to you, to help us all get a clear focus on what we are doing first, what might come later and where we might find helpful guidance in preparing our materials.

Best Regards,

Stephen Berger

---

Steve, Don,

Nice talking with you yesterday. Both Carol and I look forward to working with you to move the project towards completion.

Attached are three draft documents that will give you an idea of where we see the program headed. The first document is the letter of certification which we plan on sending initially to the current test labs which we would grandfather until the NVLAP portion of the program produces results.

The second document is a series of flow charts which outline the basic steps of the certification and testing, and laboratory accreditation program. The third document is a draft policy guide on the testing and certification program. The policy guide has some obvious gaps in several sections which I have not yet had time to complete. We value your assessment of these documents and look forward to meeting with you, Steve, next week, and with Don as soon as possible.

Thanks again.
Carol,

The EIN for TEM Consulting is: 74-2982561

I am attaching our W9 in case you need that in the future.

TEM Consulting is a small business and it is a corporation.

I filled out the EFT form and signed it, the PDF is attached.

Best Regards,

Stephen Berger

Steve -

Need a little more information about your business to complete processing of contract.

1) What is your tax ID # (or SSN, if no tax ID)

2) What is the classification of your business: small; other than small, small disadvantaged, small woman-owned

   and the type of business: corporation; partnership; sole proprietorship

Also, if you wish to receive payments electronically you will need to complete the attached EFT authorization form. Thanks!

Carol A. Paquette
Carol,

Hope you don't have to work all of memorial day? I wanted to get back with you on a couple of things.

I haven't heard back from Don or Dan yet, but let's tentatively plan on a conference call tomorrow at 1 ET. Do you have a conference number or would you like me to send out the one I use?

SATO is the travel agency that NIST uses when I come to the TGDC meetings. They don't seem to have the problem with last minute fare increases that we get booking directly. Otherwise the cost seems roughly comparable. For example, Southwest or American are the best connections from Austin. Right now, with 1 week notice I can to BWI for $109 each way, $218 plus tax roundtrip. Less than a week and it goes to $586 plus tax roundtrip.

I can arrive at BWI by 1:30 out of Austin, and be at your office by 3:30.

So for the week of the 6th, if it gives us enough time I could come in Monday the 6th and coordinate my departure to match your schedule, say leaving late on the 8th?

I am putzing around the house and also working today. So feel free to call, it isn't an inconvenience (512-864-3365). To get the lower airfare I should book today.

Best Regards,

Stephen Berger

Steve -

Don't know what SATO stands for, does it mean invitational travel orders (i.e., the government makes your travel arrangements and provides you a ticket)?

Monday is a government holiday which I will be celebrating by trying to complete my review of the Voluntary Voting System Guidelines.
How about a phone call on Tuesday, the 31st? I'm available at 1 or 4:30 Eastern. Wednesday, June 1, is open all day, if that works better for you and your colleagues. Then we could have an in-person meeting the week of the 6th as you suggest. I'm on leave the 8th to attend an out-of-town graduation.

05/27/2005 05:00 PM  
Please respond to  
stephen.berger@ieee.org

Carol,

Assuming I can travel under SATO, as when I come to TGDC meetings, we don't need to worry about last minute flight costs.

I am working on a meeting at the FCC for June 13-14 and could extend to work with you, which would save some travel costs. I think that you will want a first meeting sooner. Would you like to have an initial conference call, including Don Heirman and Dan Hoolihan, on Monday and in person meeting sometime the week of June 6? With your statement that the contract looks acceptable I am comfortable with going ahead and getting started. I could also fly up next week, but wonder if we wouldn't accomplish more by having a couple of conference calls and doing some preparatory work on our side?

My thought is after an initial conference call we should see what models and similar documents we can gather from sources we are aware of and adapt to the needs of the EAC. So at a first meeting the following week we potentially would come with some model documents and procedures to consider.

Subject: Re: Air Force Contract

Thanks, Steve. I agree with you that the consulting contract is the better way to go. I have reviewed the agreement you sent and it looks fine to me in terms of having all the appropriate clauses and safeguards. I have passed it to our General Counsel to see if she agrees that it is an acceptable contract document. If she gives me the okay we can probably have this in place by next Wednesday (June 1). We should be working on a date for you to come in so we can review work accomplished and what further remains to be completed.

Subject:Air Force Contract

Carol,

Attached is my Air Force contract. Besides a lot of boilerplate, the principle different is that this is a firm fixed price contract. You can see that a set of initial deliverables was specified and funded. Options were included that could be exercised at the agencies discretion. We can go that way with your job but I would need a clear set of deliverables to bid on. Of course my bid will be competitive but guarded to be sure that I can provide the deliverables within the bid. I think the work assignment based contract will be both quicker to get in place and provide you a lower final cost. Having a not-to-exceed on the work items should give you the same budget protections that the Air Force is getting with the firm fixed price approach.

Best Regards,
Carol,

I will look forward to talking with you and Brian tomorrow.

If this is going in a direction that interests you I think I would suggest that you and I talk to set things up and then have an introductory call with the team to outline assignments and organize what we would do for you.

As I have thought about what I would do were I in your position I think I would make one of our assignments to go over to the FCC laboratory in Columbia and ask their help, borrowing as much as they may feel comfortable in sharing. I have contract with Rashmi Doshi almost weekly and would assume he would be helpful. The positive is that there may be a lot of workproduct from their system that could be adopted for EAC use. I would also assume that there is a lot of experience that could be gathered in to the benefit of the EAC. I think the principle challenge would be to 'right-size' the system to the EAC and voting equipment vendors. I believe the FCC manages something like 25,000 grants a year and has a system of 500 commercial test labs doing the testing required.

Probably my biggest general worry for the EAC is that it would be easy to create an overly complex system that would not be appropriate for this sector. However, there is a lot of experience out there that could be gathered in.

I will be in meeting from about 2:30 to 6:30 ET, but call me on my mobile before then if you want to talk further. Tomorrow I have an early flight from Tucson but would be available until about 10:30 ET.

Gentlemen:

As you may be aware, the EAC is supposed to take over the lab accreditation and voting system certification processes from NASED this fiscal year. Brian Hancock has been working very diligently to get the procedures defined, the forms, etc., designed, report formats specified, etc. Our legal counsel has been working on legal aspects. However, we just do not have adequate numbers of staff personnel to get this work completed in a timely fashion. Neither Brian nor counsel can devote full time to this effort because of the press of other EAC business and our general lack of staff resources.

We are looking for either individual consultants or companies with experience in doing this type of work. Our original completion date was the end of May, which we are not close to meeting. We are now targeting the end of June to complete documentation of the procedures, criteria, forms, etc., so this transition can happen by August. But this date cannot be met without assistance. Please forward any recommendations you might have as soon as possible. Since we have our own procurement authority we can turn around contracts quickly and we have adequate budgetary resources available to cover this work. We just need to identify some qualified sources who can go to work immediately. Thank you for your assistance.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
Ms. Vogel - Attached is a draft of my response. Please advise if I have adequately justified my University's position on nondisclosure.

I am seeking review by our legal staff and will fax you a copy on letterhead by close of business, today.

EAC_Contract_Confidentiality.doc
October 14, 2005

Ms. Gaylin Vogel  
U.S. Election Assistance Commission  
1225 New York Ave., NW – Suite 1100  
Washington, DC 20005

Dear Ms. Vogel:

Disclosure of the confidential content of the contract between Kennesaw State University (KSU) and the Election Assistance Commission (EAC) would be detrimental to KSU’s current and future competitive position as a contractor. The disclosure of our pricing structure, methods for organizing work, and descriptions of software products designed to support the contract, would place us at a competitive disadvantage in bidding on comparable projects.

We request that information in our contract with the EAC be treated confidentially until such time that the products of our current contract (the public comments database and related documents, including the edited draft of the Voluntary Voting System Guidelines) are no longer in use by the EAC.

Sincerely,

Merle S. King  
Chair, CSIS Department
Gaylin - I received the fax and will respond, ASAP.

Thanks,

Merle

Dear Mr. King:

On October 12, 2005 you were informed via fax that a third party through the Freedom of Information Act (FOIA) has requested a copy of the contract and corresponding documents with Kennesaw State University. The purpose of the letter was to provide you with an opportunity to specify provisions in the responsive documents that you believe are protected from disclosure under FOIA. We required you to identify the specific provisions in the responsive documents and the applicable FOIA exemption. As the EAC did not get such a response, we must assume that you do not have an objection to the disclosure of the contract in its entirety as noted in our initial letter. The EAC is under a tight timeline to respond to FOIA requests. We must respond to this FOIA in the near future. If you believe you have provided specific information, consistent with the above, please let me know immediately.

Thank you,

Gaylin Vogel
Law Clerk

http://www.eac.gov
GVogel@eac.gov
Dear Gaylin,

This note is to further document the reasons for our request that our hourly labor rate be withheld under the FOIA request you have received.

In any competitive bid situation competitive advantage is gained by the ability to deliver higher quality of service at a lower price. It is therefore the combination of quality of service and price that combines to provide a competitive offering. Having full visibility to the quality and price provides a competitor to bid against a known quantity while withholding one of these items assures that competitive bids remain truly competitive. As the seniority of our staff and their quality level is well known the only item that remains unknown to competitors is the price offered. Therefore we believe that the hourly rate offered should be considered a confidential item and withheld from this request.

Best Regards,

Stephen Berger

Gaylin,

It was a pleasure to speak with you this afternoon. I appreciate your time in discussing this issue.

I have reviewed the documents requested under FOIA. I would request that the hourly rate cited in these documents be redacted as that rate for the level of service is a primary point of competition in bidding contracts. Beyond that I do not believe we need to request any other material be withheld.

Best Regards,

Stephen Berger

Mr. King:

The EAC has received your letter stating that KSU wishes to classify certain contract information as confidential or a trade secret. In order for the EAC to review this request we will need you to identify the specific provisions and connect it to the specific Freedom of Information Act (FOIA) exception (most probable is exception 4 relating to Trade Secrets.) You will also need to justify to the EAC why it should withhold the information.

In order to assist you in your review I have attached the documents that the EAC has identified as responsive to the request involving communications with KSU.

If you have any questions please do not hesitate to contact me. In the event that you need to reach me over the week my cell is 202-491-3998.

Dear Mr. Holley:

Enclosed is a signed contract in the amount of $175,000.00 for the provision of technical services to assist the Election Assistance Commission (EAC) with the collection and review of public comments on the draft Voluntary Voting System Guidelines. The work effort also includes updating the referenced external standards (e.g., IEEE, ANSI) in the Guidelines and to expand the Glossary.

The adoption of new voting system guidelines is one of the major EAC responsibilities mandated by the Help American Vote Act. We expect to receive a substantial volume of comments during the course of the 90 day comment period. EAC is a very small organization and does not have sufficient internal staff to manage this workload. The purpose of this contract is to help us keep up with the review and classification of comments for further consideration and to assist EAC staff in updating portions of the Guidelines, such as the referenced standards, to include the most recent editions.

To acknowledge your receipt and acceptance of this contract, please countersign and date below and return one copy to the attention of Carol Paquette, who will be coordinating this work effort for the Commission.

We look forward to working with Kennesaw State University on this very important EAC product.

Sincerely,

Earle Holley  
Kennesaw State University

Re: EAC-0544, Kennesaw State University

Dear Ms. Paquette,

Please find enclosed one copy acknowledging receipt and acceptance of EAC-0544, Contract for Technical Assistance for the EAC for the Collection, Management, Review, and Response to the Public Comments Received on the Voluntary Voting System Guidelines. As this is a cost reimbursement type (Time and Materials) contract, we have enclosed our budget for this work. We will expect to be reimbursed for the expenses outlined on the attached budget.

Please let me know if you have any questions with any of the foregoing.

Kind regards,

Carolyn Elliott-Farino
Associate Director

</table>
1.0 Background. On May 9, 2005, the EAC received the initial set of recommendations for the HAVA-mandated Voluntary Voting System Guidelines from the Technical Guidelines Development Committee (TGDC). After performing its due diligence review of this document, the EAC made several changes and published the revised document for a 90 day public comment period. This period began on June 29, with publication of a notice in the Federal Register.

The EAC has established several alternative methods for submitting comments:
- On-line electronic comment form at www.eac.gov
- E-mail to votingsystemguidelines@eac.gov
- Postal mail to Voting System Guidelines Comments at EAC
- FAX to Voting System Guidelines Comments at 202.566.3127

The on-line comment form is associated with an application developed to assist with the management, tracking, and review of comments. This application will permit the manual entry of comments received from other sources so that all comments will be stored and managed from a single source. All comments will be posted for public review on the EAC website.

All comments will need to be reviewed and categorized into editorial, substantive, and other general categories useful for management purposes. Substantive comments will be assessed to determine if they indicate a need to modify the Guidelines. This may require some research and analysis, including consultation with NIST and/or the TGDC. At the conclusion of the comment period, EAC will be required to summarize the numbers and types of comments received and their disposition.

2.0 Objective. The objective of this contract is for EAC to obtain assistance with the posting and initial analysis and categorization of the comments and to obtain technical assistance in updating the referenced standards and glossary sections.

3.0 Scope. EAC shall provide the contents of the website temporarily hosting the Voluntary Voting System Guidelines, to include the on-line commenting application and database of comments. EAC shall forward all comments received from other sources for timely posting to the comment database by the Contractor. The Contractor shall be responsible for all the research, analysis and support activities necessary to successfully complete the tasks described below.

4.0 Tasks.

1. **Host document for public review and post comments received.** The Contractor shall host the Voluntary Voting System Guidelines document and commenting
application on their website and make them available for public access from the start of the contract until the close of the comment period (September 26, 2005). This access shall be provided by a hot link from the EAC homepage.

The Contractor shall perform initial screening of comments for profanity or other offensive content. Originators of such comments will be informed that such material cannot be posted for public consumption. These comments will be retained in the database, but not approved for public posting. All other comments will be posted to the website for public review.

The EAC will forward to the Contractor all comments received by other means than the on-line comment form for entry into the comment database for public posting and analysis. The Contractor shall provide appropriate quality control to ensure that all comments are captured correctly. Comments will be entered verbatim as received, with no corrections or excerpting.

Hosting of comments will extend for an estimated 30 days beyond the close of the comment period to allow sufficient time to review and determine their disposition. All comments shall be copied to CDs for transfer and retention by the EAC at the conclusion of the contract.

2. Recommend a comment classification schema and organize comments accordingly. The Contractor shall recommend a classification schema for categorizing comments relative to the degree of analysis required. For example, comments dealing with editorial points, typographical errors, and grammar can be handled very straightforwardly. Comments that are more technical in nature may require considerable analysis and perhaps research in order to make a determination on their disposition. Upon approval of the schema by EAC, the Contractor shall organize comments in this manner and periodically provide reports to the EAC on the number and kinds of comments received, and recommendations for the disposition of substantive comments. Comments shall be mapped to relevant portions of the Guidelines document. Periodic teleconferences will be conducted to review status of work, discuss comments and recommendations, and identify issues that will require consultation with NIST or other sources for resolution.

3. Update standards referenced in Guidelines. There are several places in the Guidelines that refer to standards promulgated by other organizations, e.g., ANSI, IEEE, IEC, MILSTD. The Contractor shall research all standards references to identify the latest version and ensure that this is the version referenced in the Guidelines. All references must include the date and version number, if appropriate. In addition, the Contractor shall research commercial practice and other sources of standards to identify replacements for the MILSTD references no longer maintained by the Department of Defense. The Contractor will edit references to standards in the body of the Guidelines to the title of the standard only and key the entry to the References section. This will facilitate the future
issuance of technical addenda to the References as versions of standards evolve without having to create change notices for the body of the document.

4. Develop a comprehensive Glossary of election terms related to voting systems and certification. The Glossary in the 2005 Guidelines has been expanded from the 2002 Voting Systems Standards. However, it needs further work. All key terms in the body of the document should be included in the Glossary. In addition, some terms are defined somewhat differently by various jurisdictions (e.g., absentee voting). Conversely, some concepts are referred to by different terms in different jurisdictions (e.g., ballot type, ballot style). The Contractor shall make recommendations to EAC for additional terms and additional definitions to be included in the Glossary.

5. Maintain master copy of Guidelines and make revisions as directed by EAC. EAC intends to revise the Guidelines throughout the comment period to expedite the process of issuing the final Guidelines at the end of that period. The Contractor shall maintain the master copy of the Guidelines and make revisions as directed by EAC. The Contractor shall maintain strict configuration management and version control of all changes.

6. Attend EAC meetings with statutory boards. HAVA mandates that all guidance issued by the EAC must be reviewed and commented on by the Board of Advisors and the Standards Board. The Board of Advisors is scheduled to meet in Portland, Oregon, August 3-5. The Standards Board is scheduled to meet in Denver, Colorado, August 24-25. The Contractor shall attend these meetings to maintain awareness of concerns and issues raised by these EAC advisory groups.

7. Attend public hearings on Guidelines. One public hearing was conducted in New York City on June 30. Two additional hearings are planned. One is at Caltech in Pasadena, California, on July 28. The other is scheduled for Denver, Colorado, on August 23. The Contractor shall attend these hearings to maintain awareness of the concerns and issues that members of the election community and the public express regarding the Guidelines.

5.0 Contract Type. The contract type will be Time and Materials in the amount of $175,000.

6.0 Place of Performance. The principal place of performance will be the Contractor's place of business. Project meetings may occasionally be conducted at EAC offices in Washington, D.C. Some travel will be required to attend EAC public hearings and other meetings related to Guidelines review, which are scheduled for various locations.

7.0 Period of Performance. The period of performance is from date of award until December 30, 2005.
8.0 Schedule of Deliverables.

1. Project plan – 5 days after contract award
2. Progress reports – monthly
3. Comment summaries – weekly
4. Comment classification schema – 15 days after contract award
5. Updated standards references – 45 days after contract award
6. Revised Glossary – 60 days after contract award
7. Briefings – as required

9.0 Inspection and Acceptance Criteria. Final inspection and acceptance of all work performed, reports, and other deliverables will be performed at the offices of the EAC. The Contracting Officer’s Representative for this effort will be Brian Hancock.

10.0 Invoicing. Invoices may be submitted monthly using Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal. Invoices shall be mailed to the attention of Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington, D.C. 20005.

11.0 Accounting and Appropriation. Funds in the amount of $175,000.00 are available for this task order.

12.0 General Provisions:

1. Inspection/Acceptance. The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The EAC reserves the right to inspect and review any products or services that have been tendered for acceptance. The EAC may require correction or re-performance of nonconforming items at no increase in contract price. The EAC must exercise its post-acceptance rights within ten (10) days after the defect was discovered or should have been discovered.

2. Contract Terms. Should there be a conflict between the contract clauses included in this document and the “Purchase Order Terms and Conditions” on the back of GSA Form 300, which is used to record contract financial data, the contract clauses in this document shall take precedence.

3. Changes. Changes in the terms and conditions of this Contract may be made only by written agreement signed by authorized representatives of both parties.

5. **Excusable Delays.** The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the EAC, in writing, as soon as possible after the beginning of an excusable delay. The Contractor shall explain the basis for the excusable delay, and correct the problem as soon as possible. The Contractor shall notify the EAC, in writing, at the end of the delay.

6. **Other Complications.** The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules and regulations applicable to its performance under this contract.

8. **Limitation of Government Liability.** The Contractor is not authorized to make expenditures or incur obligations exceeding the total amount allocated to the contract. The Contractor is required to notify the Contracting Officer’s Representative when 75% of funding has been obligated.

9. **Termination for convenience.** The EAC, by written notice, may terminate this contract without fault, in whole or in part, when it is in the best interest of the government. In the event of contract termination for convenience, the Contractor, shall be in accordance with Part 49 of the Federal Acquisition Regulations in effect on the date of this contract.
MEMORANDUM

July 15, 2005

TO: EAC Commissioners

FROM: Tom Wilkey, Executive Director

SUBJECT: Award of Contract for Technical Assistance to the EAC for the Collection, Management, Review, and Response to Public Comments Received on the Voluntary Voting System Guidelines

On June 29, 2005, EAC formally opened the ninety day public comment period on the Voluntary Voting System Guidelines. In light of our limited staff resources, EAC will require assistance in the review, posting, and analysis of these comments. This work will require personnel who have knowledge and experience with election administration processes and terminology, voting system technology, the testing of voting systems, and the application of standards. It will also require the ability to electronically host the document for public review, as well as the on-line commenting application that has been developed.

Kennesaw State University houses a unique facility, the Center for Election Systems, which possesses all of these capabilities. The Center provides voting system certification and acceptance testing, voting system configuration, election official and poll worker training, ballot generation, election day technical support, and election monitoring for all jurisdictions in the State of Georgia. This is the only institution of its kind in the United States and thus qualifies for FAR Subpart 6.302-1 exception to the requirement for full and open competition. We have been conducting a series of discussions with this institution regarding EAC’s requirements in order to arrive at a mutually agreeable statement of work and cost estimate.

The Commissioners have previously reviewed and approved the attached statement of work for this effort. We have reviewed Kennesaw’s cost estimate for this effort and find it reasonable for the experience levels and types of personnel needed to perform this work.

RECOMMENDATION:

Approve the award of a contract to Kennesaw State University in the amount of $175,000.

Attachment
Carol - I have taken another cut at the EAC TGDC Guidelines Proposal. Please see attached.

I have made two modifications to the budget. The budget is now at $149,050. Let me know if that creates issues:

1. I forgot to include fringes for full-time employees in the original

2. I have added additional consultant capacity regarding the need to provide maintenance of the guidelines and travel to all board meetings by the KSU team.

I am tracking down a couple of pieces related to Tax ID and the ETF form. I am not sure what "Cognizant Federal Contract Audit Agency" means. Our budget people might, but if you could help clarify that piece it would help.

We are closing out our fiscal year, so things have ground to a halt in terms of support from our business office. Sorry for the delay

- Merle

Deliverables

1. KSU will maintain the master working copy of the EAC TGDC Guidelines. This would include constant and frequent communication with the EAC to incorporate their decisions on the disposition of comments submitted in response to the Guidelines. Changes to the document will be made as soon as responses are received from the EAC.

2. KSU will organize the discussion process for the EAC board(s) meetings to comment on Guidelines. Board meeting dates and locations will be announced by the EAC. The KSU teams will attend the board meetings, propose a recommended organization for the review of the Guidelines, and collect and assimilate information from these meetings.

3. The Glossary of the Guidelines needs immediate work, including editing and annotation. This work product has a high priority.

4. A system of cataloging comments needs to be developed. This system will collect comments, excise identifying emails or other information that could be used to determine the author of the comments, and forward the comments in electronic (or hardcopy, depending upon form of submission) to KSU. KSU will then review the comment and implement the following actions:

   a. Non-useable comments (those that are simply opinions, or not sufficiently well-formed to determine the author's intent) will be identified and held in abeyance;

   b. Grammatical and editing comments will be identified and an immediate recommendation made to the EAC liaison regarding their deposition will be made.

   c. Comments that are substantive will be cataloged and annotated. These comments will be organized into logical groupings that facilitate mapping the comments to the appropriate Guideline section.
d. The cataloged comments will be stored on a secure server so that all appropriate EAC-designated individuals can review the comments as needed. Summary reports will be provided to the EAC, as requested.

5. A final, comprehensive Glossary, benchmarked to as many jurisdictions as is practical, will be developed for the next iteration of the Guidelines. This Glossary of terms will attempt to provide jurisdiction-specific versions of commonly used terms in elections management.

**Budget**

Given the unknown quantity of work involved in the project, it is projected that there will be fixed costs of $71,100 and variable costs associated with the volume of comments received. The total projected costs are estimated at $149,050. KSU's indirect rate is 50% of personnel costs.

KSU will invoice the EAC quarterly for the duration of the project.

Merle -

I'm delighted that you have decided to move ahead with this work. We are really looking forward to working with Kennesaw. We need to make one further adjustment to the Statement of Work, based on feedback from the Commissioners. They have indicated that the Boards have been working out their own processes for reviewing the Guidelines at their meetings, so we will not need facilitation of these discussions by Kennesaw. However, we do still need to have you attend.

We will get the contract prepared and signed as soon as possible. You didn't provide a cost estimate for the document hosting, so I just increased the funding amount to $175,000. We can do a contract modification later if necessary to further adjust the funding. This will be a cost plus expenses type contract, not fixed price, so there will be no issue regarding adjusting the cost.

In addition to the EFT form we also need the Kennesaw tax ID#. Cannot process contract through Finance without this information. Also need to know your cognizant federal contract audit agency, but that information is not needed to get contract signed. Thanks and I look forward to working with you and the rest of the Kennesaw team!

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125  cpaquette@eac.gov

Carol - After some reflection and conversations with the staff here and with Tom on your end, I would like to go forward with the VVSG project.

I have initial edits nearly ready on the glossary. We have the server ready and my guys are looking at the Zone Alarm report to find a work around.

I lost my PM, Carol Julian. Her contract ended on July 1. She may be able to come back as a part-time consultant so all is not lost, and I have identified another candidate for PM.

I have the completed EFT here. I can fax it to you tomorrow or send it surface mail or both. We need to convert the SOW into a contract. From our end that would be as simple as adding a budget and signatory lines to the existing document.

I need to talk with you regarding the CalTech and Portland trips.
We have been hard-hit by Dennis. We have had building problems and were without power for 4 hours today. Things are a bit hectic here.

Talk to you tomorrow,

Merle

Merle -

Need to get revised cost estimate from you to include additional activities outlined in my email of 5/26. Specifically, maintaining the master working copy of the Guidelines and organizing the discussion process for the EAC Boards meeting to comment on Guidelines. I'm assuming that the comment about receiving "white papers" for review and assessment will be subsumed under the existing estimate for processing comments, since that's a very indefinite quantity of work at this point. Just as a point of reference, we received more than 300 comments on our recently published 5-6 page draft guidance document on statewide voter registration lists.

Also, need the following information for contract processing purposes:

1) Name, mailing address for contractor organization, plus appropriate points of contact and their contact information - meaning, if there will be a contract manager apart from the project manager, we would like to have information for both. I think you mentioned that the contract would be with Kennesaw State not with the Center.

2) Tax ID number

3) Classification and type of business

4) Remittance address, including information for electronic funds transfer (form attached)

5) Cognizant federal contract audit agency

We are moving ahead with this, so please provide this information as soon as possible.

Thanks!

Carol A. Paquette

Merle -

I expect to get your contract signed in the next day or two. However, I still need those couple bits of information - I think it was tax ID number, cognizant federal contract auditing agency and maybe something else - before it can be processed through finance. Will also be forwarding you some email traffic regarding some issues with the way the current website is working so you can avoid these problems.

The Commissioners have a problem with Brit working on the Guidelines comments. Their view is that there is an inherent conflict of interest for Brit to have been on the TGDC that came up with the basic recommendations and then also to be part of the EAC comment review team. So we will not be able to contract with him for this purpose. I know he has suggested he would resign from the TGDC, but that doesn't really fix this problem.

Attached is the final SOW. Let me know if you have any issues or questions with it. Thanks!

SOW guidelines review.doc

I'll forward your message to Tom. His email address is twilkey@eac.gov.

Carol A. Paquette
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov

Carol - Any decision yet on the contract with KSU and Brit?

I have attached a word document regarding a training program that we are doing for election observers at the Carter Center. Tom Wilkey, Brit and I were discussing the usefulness of a similar program for NIST scientists - to familiarize them with the life cycle of an election. I do not have Tom's email address at the EAC. Could you forward this proposal to him?

Thanks, and let us know.
- Merle
The EAC needs to get a contract in place as soon as possible for the following three support activities. We are looking for an organization that can provide overall project management and the basic technical capabilities from their own staff as well as being able to pull in additional expertise from other institutions and from the election community. The EAC seeks to have broad-based participation in all its activities to ensure the election community and the general public accept the results as having integrity and validity because all points of view have been considered. The unique capabilities and mission of the CEnter for Election Systems suggests to me that your organization is ideally suited to support these EAC requirements. I would like to discuss your interest and ability to support these activities at your earliest opportunity. The EAC's goal is to have as many information products available to assist election officials with the 2006 elections as possible.

Activity 1: Review and recommend disposition of Voluntary Voting System Guidelines comments

On May 9, the EAC received the initial TGDC recommendations for revised voting system guidelines. We are currently reviewing this document to determine if it is acceptable to publish for public comment as proposed guidelines, or if some modifications might be required. We anticipate completing this review and publishing the resulting proposed guidelines by early June. The EAC is severely under-staffed to appropriately handle the workload of reviewing and determining the disposition of the potentially substantial volume of comments that are expected over the 90 day comment period. We also lack the range of appropriate technical expertise required for this task. The Commissioners have requested that we put together an appropriate review team to assist the EAC with this comment review activity. We envision this process working as follows. We anticipate that most comments will be submitted via the EAC website. We are developing a comment tracking and management application to assist in managing the comments. We will also receive comments from other sources, such as email and paper mail. There will also be two public hearings with panel presentations followed by an open mike public comment period. We plan to review comments on a weekly basis. EAC personnel and members of the review support team would convene a weekly meeting or teleconference to do a first pass review, followed by assigning out of comments requiring additional consideration. Review team members would complete their assigned topics and make disposition recommendations in a subsequent meeting of the review group and the EAC lead staffer. NIST resources will be available to do additional research and/or for consultation, if required.

Activity 2: Development of quality control procedures for voting system acceptance by election officials

There are a variety of system acceptance procedures that election officials can employ to promote consistent quality in newly delivered voting systems. The CES has developed a model process for voting system acceptance and configuration management. This methodology and the practical experience acquired from applying it over several years can be drawn on to develop a set of scaled quality assurance recommendations to meet the needs of the variety of election jurisdictions that are purchasing voting equipment this year. The concept is to provide a range of elements and approaches so election officials will have some choices for what might best suit their particular circumstances.

Activity 3: Development of Election Management Guidelines or Best Practices

The quality of election management practices has a direct impact on the integrity and overall success of the voting process. There appeared to be only a few instances of significant voting equipment...
malfucntions in the 2004 election, but there were many instances of procedural glitches. The need for management guidelines has long been recognized in the election community. The EAC would like to initiate the development of such guidelines or best practices, as a complementary product to the Voluntary Voting System Guidelines. In EAC's view, this work would require participation of a working group of election officials. However, an entity is needed to manage the development process and to provide research, documentation and other capabilities necessary to this work.

Carol A. Paquette

Merle -

The proposal looks fine. Based on a conversation with Steve Berger a few days ago, I have another task to add. Sorry for the piecemeal approach; this will be the last "add-on".

The new task is as follows:

There are several places in the Voting System Guidelines (especially in Volume II on testing), that refer to "external" standards: e.g., ANSI, IEC, MILSTD. We need to create a references section in the document where all these materials are referenced in their latest version. It will require some research to determine what the latest version is. As versions change, EAC can issue an addendum to the references without having to dig into the entire document with changes. Then the text reference can be simply the title of the reference. Also, if there are commercial standards that replace the MILSTDs, we'd like to reference those instead, since many of the MILSTDs are no longer maintained by DoD.

The cognizant federal contract audit agency is whatever organization has been named to audit any federal grants or contracts that the University has. Either your budget or grants/contracts people should know who this is.

- Merle
Merle-

This is a good summary. A few additional things came to mind as I was reviewing this:

1) I think we would also want you to maintain and revise the master working copy of the Guidelines, under strict version control, so we can be working on updates during the comment period. We want to do everything we reasonably can to minimize the time needed at the end of the period to wrap everything up. I envision the process working as follows. As you note in your paragraph 3, the reviewers will categorize comments and make recommendations to EAC on their disposition. In turn, we would advise you of the Commission’s decision on your recommendations and you could make appropriate changes to the document.

2) We expect some comments may come in the form of “white papers,” not necessarily related by the author to a specific section of the Guidelines. For example, Ted Selker at MIT offered to provide his specification for audio-verified audit trails for inclusion in the initial set of TGDC recommendations. It was too late in the process for additional material of this scope to be considered, so I told him he should submit it during the comment period. I understand that we may have a similar paper to consider on cognitive disabilities. The point being that comments may arrive in all shapes and sizes and we just have to make sure we have a process for tracking and handling them all. We’re doing a walkthrough of the comments web application today and I will find out if data can be entered into the database manually, so we can have a single source for capturing all comments, whether received by web form, email attachment, or snail mail.

3) Speaking of the web application, I’m going to forward you the link and password for the demo version, so you can have a look at it and see if there are modifications we should make.

4) Just a little more detail on your paragraph 5. There will be 2 hearings and one combined Board meeting dealing with the Guidelines. The first hearing is June 30 in New York City. The second is July 26; location still to be determined, but will be west of Mississippi. Board meeting will be sometime in July, again the location hasn’t been determined as yet. I anticipate that the Board meeting will be 1.5 - 2 days. Would have your team organize the discussion for this meeting, so we can get through the entire document and cover all their concerns.

Your estimated cost looks fine; I anticipate it will increase somewhat with the additional work outlined above. I will look into what we can do to get a separate contract in place for Brit. Call me if we need to discuss any of this. Thanks!

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission

Merle -

Thanks for getting back to me so quickly on this. I will review this evening and get back to you tomorrow. Just at a glance this appears to only include the Guidelines review assistance. So can I assume that there will be another paper coming on the Management Guidelines work?

Appreciate you and Brit traveling to DC to have this conversation. I agree that it was very helpful in fleshing out the concept for both of these tasks.

Subject Follow-up to Monday's Meeting

Carol - Thank you for giving us your morning on Monday. It was very helpful to hear your explanations of the work products for the Guideline
Here are the planning assumptions I have made:

1. The project would need to commence ASAP and extend into late October, early November, depending upon the publication date in the Federal Register.

2. The Glossary of the Guidelines needs immediate work, including editing and annotation. This work product has a high priority.

3. A system of cataloging comments needs to be developed. This system will collect comments, excise identifying emails or other information that could be used to determine the author of the comments, and forward the comments in electronic (or hardcopy, depending upon form of submission) to us. We will then review the comment and implement the following actions:
   a. Non-useable comments (those that are simply opinions, or not sufficiently well-formed to determine the author's intent) will be identified and held in abeyance;
   b. Grammatical and editing comments will be identified and an immediate recommendation made to the EAC liaison regarding their deposition will be made.
   c. Comments that are substantive will be cataloged and annotated. These comments will be organized into logical groupings that facilitate mapping the comments to the appropriate Guideline section.
   d. The cataloged comments will be stored on a secure server so that all appropriate EAC-designated individuals can review the comments as needed. Summary reports will be provided to the EAC, as needed.

4. A final, comprehensive Glossary, benchmarked to as many jurisdictions as is practical, will be developed for the next iteration of the Guidelines. This Glossary of terms will attempt to provide jurisdiction-specific versions of commonly used terms in elections management.

5. Project personnel will need to travel to several meetings to collect data and observe. Travel to meet with the EAC is also anticipated.

6. We would like to have Brit Williams engaged and compensated for his role on this project. Because Brit is a retiree from the Univ. System of Georgia, we are unable to hire him on this project. We would like the EAC to explore a separate contract with Brit to support this (and perhaps other) work.

7. In the attached budget, I am proposing a total fixed costs of $59,100 with variable costs of $50,450, for a total-not-to-exceed $109,550. We would invoice at an agreed upon interval. If there was a small volume of comments, the cost to the EAC would be approx. $65K. If we needed to add additional consultants, we could invoice the EAC up to $45K. If the volume of comments exceeds the anticipated upper bound,
we
would ask that the EAC consider an addendum to this contract to
facilitate the completion of the contract.

I hope this reflects a realistic schedule, work product and budget.
Please let me know your thoughts.

Carol - The Center staff has never given testimony to the GA Legislature. I have given testimony once, at a NIST meeting, but it was on the topic of functionality, not VVPAT.

The organization of the full-time staff at the Center is as follows:

Merle King - Executive Director
Ray Cobb - Director
Tara Robis - Sr. Project Coordinator
Anthony Peel - Sr. Project Coordinator
Jessica Bamford - Project Coordinator

Brit is a contractor with the SOS office and although he spends time at the Center, he is not on the Center budget. He does not report to me.

The Center is completely funded by the SOS of Ga., as a line item in their budget.

The Center staff has had private conversations with our vendor regarding VVPAT and I have expressed my opinion to several vendors on the legal and operational issues associated with the concept.

I have discussed the proposed work for the EAC with the SOS Elections Director and we believe there is not a conflict of interest in the proposal. I think we can be impartial and objective in our review of comments. Our position has always been to enforce the law, rules and regs.

There is also a separation of responsibility component to the proposal. The work with the EOC will be through my department (Computer Science and Information Systems). It will not be with the Center for Election Systems.

Hope this helps.

Merle -
Discussed transferring the Guidelines document and comment application with the Commissioners and the Executive Director (Tom Wilkey) this morning, along with the other tasks related to reviewing the comments that you had provided a proposal for. Being ever cognizant of how the EAC is perceived, the Commissioners asked me to check to see if the Center or Kennesaw ever provided testimony to the GA legislature or has otherwise taken a public position on the topic of voter verified audit trails? We know Brit's views, but he was always speaking for himself on the topic. The question is whether the Center itself has taken a position on this high profile issue. Also, my understanding is that the Center is pretty much fully funded by the GA Secretary of State's office. Would that relationship in any way impinge on your ability to be objective and impartial when reviewing and advising on the disposition of comments? Can you advise? Thanks!

Carol -

I noticed that you got the glynn.com site up and running on Saturday.

We have reserved the following url: http://guidelines.kennesaw.edu/guidelines and put the content there. The firewall is properly configured so that it can be linked when you are ready.

Please advise on how we should proceed.

Thanks,

Merle
Carol - I am responding to this because I am not at all sure that everyone does know my position on VVPATs.

My position is this:

I have absolutely no objection to VVPATs, but believe that they are not technically necessary. We are entirely capable of building and operating accurate, secure paperless electronic voting systems. Many jurisdictions, including the State of Georgia, are currently conducting accurate, secure elections on pure DRE voting systems.

I fully support the concept of allowing voter's to verify their ballots and have no problem with jurisdictions that wish to use paper for this process.

I look forward to seeing you in New York.

Best regards.

Brit

August 30, 2005

Ms. Bobbie Ann Brinegar
Washington, D.C. Director
Miami-Dade Election Reform Coalition
1725 19th Street, NW #B
Washington, DC 20009

Dear Ms. Brinegar:

This letter is in response to the Miami-Dade Election Reform Coalition's (MDERC) Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on August 3, 2005. The August 3rd FOIA request served as a revision to a previous request received by the EAC on July 22, 2005. The revision was made in response to a request for clarification sent by the EAC on July 29, 2005.

The revised request (August 3, 2005) sought "all documents relating to meetings that were not publicly noticed, including all telephonic meetings or conferences, [in] which..., “ Chair Gracia M. Hillman, Vice Chairman Paul S. DeGregorio, Commissioner Ray Martinez or interim Executive Director Carol Pacquette were in attendance. The request notes that this includes “all lists of such meetings, and all notes made at such meetings or telephone calls.” The letter also request copies of all FOIA requests made to the EAC.

With regard to your request for all prior FOIA requests, you will find copies of all responsive documents, attached. You will not be charged for processing and copying costs.

With regard to your request for “all documents relating to meetings that were not publicly noticed,” the EAC must provide a bifurcated response. First, the EAC has not been able to search the personally held files of the Commissioners or previous interim Executive Director. Unfortunately, each of these individuals has been traveling for all but a few days over the last month and a half. As such, they have not had the opportunity to review their files. While the Commissioners will continue to travel in September, it is hoped the travel will be less extensive. In an effort to take all reasonable steps to provide you the documents you seek, the EAC will review the files maintained by the Commissioners and respond to you within 10 working days.

It is important to understand that, generally, the EAC does not maintain or track documents based upon their association with a given meeting (and attendance at that meeting). However, it is possible that individual Commissioners or the Interim Executive Director (or their assistants) may have personally maintained a few document files in a “meeting associated” manner. Because this possibility exists, the EAC will coordinate with the Commissioners in...
order to determine if we can reasonably accommodate your request. However, this effort is a result of the EAC’s desire to take every reasonable step to provide the documents you seek. Generally, without clarification, your FOIA request does not meet the definition of proper request under FOIA.

A proper FOIA request must reasonably describe the records sought (5 U.S.C. §552(a)(3)(A)). Such a request would enable a professional agency employee familiar with the subject area to locate the record with a “reasonable amount of effort.”¹ FOIA does not allow requesters to “conduct fishing expeditions” through agency files² or require agency staff to have “clairvoyant capabilities.”³ Finally, Federal Agencies are not required to conduct “unreasonably burdensome” searches for records.⁴ Your request requires the EAC to identify any document that was created as a result of any type of discussion (including telephonic) between a Commissioner or interim Executive Director and any other person (including EAC staff). Given that such conversations represent the majority of our Commissioner’s time and that the EAC staff generally does not maintain records based upon “meeting connectivity,” your request requires both an “unreasonably burdensome” search and fails to “reasonably describe” the records sought.

As was noted in the EAC letter requesting clarification (July 29, 2005):

[T]he vast majority of documents created or obtained by the EAC were likely created or obtained as a result of or in preparation for a meeting with a Commissioner. Notwithstanding this fact, in many cases it will be almost impossible to determine, with any certainty, which specific documents were “meeting associated,” as such information is not ordinarily maintained on a document. Like most organizations, our documents are identified by subject matter and the individual or organization that created it. In short, your request, as stated, would require EAC personnel to search every document in possession of the Commission and speculate as to whether it was created as a result of or in preparation for a meeting with one of our four Commissioners.

Absent questioning every staff member on every document in the EAC’s possession there is no reasonable way to determine if a particular document was used in a non-publicly noticed meeting. Even if the EAC took this burdensome course of action, the results would be purely speculative. Requester’s should frame requests with sufficient particularity to ensure that searches are not unreasonably burdensome.⁵ The rationale is that FOIA was not intended to reduce

¹ H.Rep.No.93-876 93rd Cong., 2d Sess. 6 (1974); S.Rep.No.813 89th Cong., 1st Sess. 8 (1965); Marks v. United States, 578 F.2d 261, 263 (9th Cir. 1978) (FOIA provision that request reasonably describe records sought relates not only to subject matter but also to place of search).
² Freeman v. United States Dep’t of Justice, No. 90-2754, slip op. at 3 (D.D.C. Oct. 16, 1991) (“The FOIA does not require that the government go fishing in the ocean for fresh water fish.”)
³ Hudgins v. IRS, 620 F.Supp. 19, 21 (D.D.C.1985) (Hogan, J.) (“[A]n agency is not required to have ‘clairvoyant capabilities’ to discover the requester’s need.”)
⁴ Van Strum v. EPA, 1992 WL 197660, (9th Cir. Aug. 17, 1992) (accepting agency justification in denying a request or seeking clarification that a request was burdensome because it would put an inordinate search burden on Agency resources and sought vast amount of materials.
government agencies to full-time investigators on behalf of requesters. Therefore, agencies are not required to perform searches incompatible with their own document retrieval systems.

This letter is not a final response to your FOIA request. You will hear from us within the next 10 working days. I continue to encourage you to further clarify your FOIA request consistent with the conclusions, above. I offer you my assistance in this endeavor. You may reach me at (202) 566-3100 or ggilmore@eac.gov.

Sincerely,

Ms. Bobbie Ann Brinegar  
Miami-Dade Election Reform Coalition  
1725 19th Street, NW #B  
Washington, DC 20009  

Dear Ms. Brinegar:

This letter is in response to the Miami-Dade Election Reform Coalition’s (MDERC) Freedom of Information Act (FOIA) request received by the U. S. Election Assistance Commission (EAC) on August 3, 2005. The August 3rd FOIA request served as a revision to a previous request received by the EAC on July 22, 2005. The revision was made in response to a request for clarification sent by the EAC on July 29, 2005. This letter supplements our previous communication of August 30, 2005.

In our previous letter (August 30th), the EAC (1) provided all documents responsive to your request for the agency’s prior FOIA requests; (2) informed you of our determination that the remainder of your request was not a proper FOIA request, as it failed to reasonably describe the records sought and required an unreasonably burdensome search for records; and (3) informed you that we would, nonetheless, perform a reasonable search for records that involved meetings with third parties. Attached please find a copy of our August 30th letter.

Each of the individuals noted in your request letter (and/or their assistant) searched their files for meeting associated records. As they could not reasonably search all records held by the EAC and speculate as to their potential association with a meeting, they looked for documents filed (including e-mails) as “meetings.” Moreover, because you did not define the broad term “meeting” (which could include any time two individuals communicate) we defined the term consistent with your correspondence. We provided documents, filed as noted above, in which one of the individuals you identified met with a non-federal employee or organization. The result of our records search is enclosed. A few of the documents have had small portions redacted, such as personal phone numbers, as release of this information would constitute an unwarranted invasion of personal privacy (5 U.S.C. §522(b)(6)).

At this time, Commissioner DeGregorio has not completed the search of his records. His efforts were cut short by an official trip to Hungary. He will return from his overseas trip on the 21st of September. This letter is not a final response to your FOIA request. The EAC will provide our final response by September 26, 2005. In the interim, if you have any questions, you may reach me at (202) 566-3100 or ggilmour@eac.gov.

Sincerely,

[Signature]

Gavin S. Gilmour  
Associate General Counsel

Re: Freedom of Information Act Request

This letter constitutes a request under the Freedom of Information Act, 5 U.S.C. § 552, on behalf of the Miami – Dade Election Reform Coalition, 1725 19th St. NW #B Washington, DC 20009 (MDERC).

On behalf of MDERC, I request that you provide the following:

1. All documents relating to publicly noticed and/or private meetings (including telephonic meetings or conferences), at which Gracia M. Hillman was in attendance after being confirmed to serve on the U.S. Election Assistance Commission (EAC) by the U.S. Senate on December 9, 2003 through the present. This includes all documents that were prepared, received, transmitted, collected and/or maintained by the EAC relating to such meetings; all recordings of any portion of such meetings; all notes taken at such meetings or made in connection to such meetings, all correspondence relating to such meetings; and all agendas for or minutes of such meetings.

2. All documents relating to publicly noticed and/or private meetings (including telephonic meetings or conferences), at which Commissioner Paul S. DeGregorio was in attendance from the time of his confirmation to serve on the EAC until the present. This includes all documents that were prepared, received, transmitted, collected and/or maintained by the EAC relating to such meetings; all recordings of any portion of such meetings; all notes taken at such meeting or made in connection to such meetings, all correspondence relating to such meetings; and all agendas for or minutes of such meetings.

3. All documents relating to publicly noticed and/or private meetings (including telephonic meetings or conferences), at which Commissioner Ray Martinez was in attendance from the time of his confirmation to serve on the EAC until the present. This includes all documents that were prepared, received, transmitted, collected and/or maintained by the EAC relating to such meetings; all recordings of any portion of such meetings; all notes taken at such meetings or made in connection to such meetings, all correspondence relating to such meetings; and all agendas for or minutes of such meetings.
made in connection to such meetings, all correspondence relating to such meetings; and all
agendas for or minutes of such meetings.

Please advise us of the cost prior to copying.

If this request is denied in whole or in part, I request that you justify all deletions
by reference to specific exemptions of the FOIA. Please provide all segregable portions of
otherwise exempt material.

Please send all records, as they become available, to this address:

Bobbie Ann Brinegar

Gavin S. Gilmour
Associate General Counsel
United States Election Assistance Commission
1225 New York Ave., NW, Suite 1100
Washington, DC 20005

Dear Mr. Gilmour:

We are in receipt of your letters dated August 30, 2005 and September 15, 2005 and respond as follows.

First, in your August 30, 2005 letter, you correctly point that in your July 29, 2005 letter requesting clarification, you informed us that the EAC's documents "are identified by subject matter and the individual or organization that created it." Based upon that statement, we clarified our request to ask for "all documents relating to meetings that were not publicly noticed." Our clarification was based upon two assumptions: (i) that EAC members were required to maintain logs of who they met with and who they had telephone conversations with and (ii) that one of the EAC's subject matter categories for document indexing would be "meetings not publicly noticed." In your August 30, 2005 letter, you have now further clarified that "generally, the EAC does not maintain or track documents based upon their association with a given meeting (and attendance at that meeting)." However, you do not clarify whether the EAC members are in the practice of maintaining logs.

Under cover of letter dated September 15, 2005, you provided in excess of 150 pages of documents which we are in the process of reviewing. It is also our understanding that you might be providing additional documents from Commissioner DeGregorio upon his return from an official trip. We will be providing you with further comments as soon as we complete our review of the documents you have provided thus far.

Very truly yours,

Lida Rodriguez-Taseff
Chair
Miami-Dade Election Reform Coalition

Julie Thompson, General Counsel
United States Election Assistance Commission
1225 New York Avenue N.W., Suite 1100
Washington, DC 20005

RE: Freedom of Information Act Request

Dear Ms. Thompson:

This letter constitutes a request under the Freedom of Information Act (FOIA), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

On June 30, 2004, the Election Assistance Commission (EAC) submitted a Report to Congress titled “The Impact of the National Voter Registration Act of 1993 on the Administration of Elections for Federal Office.” In order to prepare this report, the EAC sent the 2004 Voter Registration Survey to 55 state election jurisdictions. The Report was based on the response from 48 states, the District of Columbia, and three U.S. territories. EPIC requests copies (including but not limited to electronic records) of each of the surveys returned to the EAC by the state election jurisdictions.

For purposes of fee assessments, we request that EPIC be placed in the category of “news media” requester. EPIC is a non-profit, educational organization that routinely and systematically disseminates information to the public. This is accomplished through several means. First, EPIC maintains a heavily visited web site (www.epic.org) that highlights the “latest news” concerning privacy and civil liberties issues. The site also features scanned images of documents EPIC obtains under the FOIA. Second, EPIC publishes a bi-weekly electronic newsletter that is distributed to over 15,000 readers, many of whom report on technology issues for major news outlets. The newsletter reports on relevant policy developments of a timely nature (hence the bi-weekly publication schedule). It has been published continuously since 1996, and an archive of past issues is available at our Web site. Finally, EPIC publishes and distributes printed

---

2 Id. at 1.
books that address a broad range of privacy, civil liberties and technology issues. A list of EPIC publications is available at our Web site.

For the foregoing reasons, EPIC clearly fits the definition of "representative of the news media" contained in the FOIA. Indeed, the U.S. District Court for the District of Columbia has held that EPIC is a "news media" requester under the FOIA. See Electronic Privacy Information Center v. Dep't of Defense, 241 F. Supp. 2d 5 (D.D.C. 2003). Based on our status as a "news media" requester, we are entitled to receive the requested records with only duplication fees assessed. Further, because disclosure of this information will "contribute significantly to public understanding of the operations or activities of the government," 5 U.S.C. § 552(a)(4)(A)(iii), any duplication fees should be waived.

As the FOIA requires, I will look forward to your response within twenty (20) working days. If you have any questions about handling this request, you may telephone me at (202) 483-1140 ext. 214.

Sincerely,

Kathryn Sheely
Law Clerk, EPIC

cc: Lillie Coney
May 10, 2005

Fax 202-566-3127

The Honorable Paul S. DeGregorio
United States Election Assistance Commission
1225 New York Avenue N.W., Suite - 1100
Washington, DC 20005

RE: Freedom of Information Act Request

Dear Commissioner DeGregorio,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning the Technical Guidelines Development Committee (TGDC) from March 23, 2004 to the present (including but not limited to electronic records) including records regarding appointments to the TGDC, disclosure statements by members of the TGDC, meetings, hearings, and work of the TGDC related to voting technology standards. Please, also provide all printed meeting and hearing transcripts for the TGDC.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coney@epic.org.

Sincerely,

Lillie Coney
Associate Director
Chair, Gracia Hillman  
United States Election Assistance Commission  
1225 New York Avenue N.W., Suite - 1100  
Washington, DC 20005  

Re: Freedom of Information Act Request  

Dear Commissioner Hillman:  

This is a request under the Freedom of Information Act.  

I request that a copy of the following documents [or documents containing the following information] be provided to me: Complete testimony (including appendices) of the Election Assistance Commission to the U.S. House Of Representatives, Committee on House Administration, from 9 February 2005. Specifically, I request the results of the Military and Overseas Absentee Ballot Survey for the 2004 election noted as Appendix 5 in the available testimony.  

In order to help to determine my status for purposes of determining the applicability of any fees, you should know that I am an Assistant Professor at the United States Military Academy, West Point, New York. As such, I am affiliated with an educational institution and this request is made for a scholarly or scientific purpose and not for a commercial use.  

I am willing to pay fees for this request up to a maximum of $25.00. If you estimate that the fees will exceed this limit, please inform me first.  

I do request a waiver of all fees for this request. Disclosure of the requested information to me is in the public interest because it is likely to contribute significantly to public understanding of the operations or activities of the government and is not primarily in my commercial interest. This information will support research for my dissertation and will be publicly available.  

I request that the information I seek be provided in electronic format, and I would like to receive it on a personal computer disk, a CD-ROM, or by email at brian.durant@usma.edu.  

My office telephone number is (845) 938-5096. I can generally be contacted during the hours of 8 a.m. to 5 p.m., as necessary, to discuss any aspect of my request.  

Thank you for your consideration of this request.  

Sincerely,  

Brian D. DuRant  
Lieutenant Colonel, U.S. Army  
Department of Behavioral Sciences and Leadership  
United States Military Academy  
West Point, NY 10996
March 17, 2005

Dear FOIA Officer,

I would like to formally submit a FOIA request for documents related to the Technical Data Packages that have been submitted to the EAC, or its predecessor (FEC) or related agencies, such as the NIST, between April 30, 2002 and the present. In particular, I am seeking:

1. A copy of the first page or cover page of the Technical Data Package (TDP) for each application received after the adoption of the revised Voting System standards, and
2. The portion of each of the above TDPs that respond to Volume 1, Section 2.2.8.2 Voting variations, subsections a. through o. This section includes the sentence, "The TDP accompanying the system shall specifically identify which of the following items can and cannot be supported by the system, as well as how the system can implement the items supported."

I understand that TDPs may contain proprietary information and that each vendor is required to identify which information is and is not proprietary; however, I presume that information about which items in 2.2.8.2 can and cannot be supported by the system is not proprietary. If any of the information is proprietary, I request that you send me those portions that are publicly available under FOIA.

The FairVote – the Center for Voting and Democracy is a public interest group that educates about the electoral process. We request these documents for use in our educational efforts about the capabilities of different types of voting equipment. We therefore request that you waive any fees from compiling, copying and mailing the documents to me.

If you have any questions about this request, please don’t hesitate to call me at 203-781-8406 or email me at ck@fairvote.org.

Please mail document to me at:

Caleb Kleppner
196 Lawrence St
New Haven CT 06511

Sincerely,

Caleb Kleppner

fax (202) 566-3127

FOIA REQUEST

Dear Mr. John Vergelli:

Pursuant to the federal Freedom of Information Act, 5 U.S.C. § 552, on behalf of the Electronic Privacy Information Center, I request access to and copies of all agency records of complaints and agency responses regarding electronic voting, direct recording electronic (DRE) devices used to count voting ballots, touch screen voting machines, and optical scanners. I also request access to and copies of all agency records of complaints and agency responses regarding voting ballot counting software from September 2000 to the present. Additionally, I request access to and copies of all agency records of communications between the agency and any other party discussing or interpreting Help America Vote Act of 2002, Section 301(a)(2)(B); 42 U.S.C. §15481(a)(2) (B).

Please redact any personal information incidentally submitted in conjunction with any complaint.

For purposes of fee assessments, we request that EPIC be placed in the category of “news media” requester EPIC is a non-profit, educational organization that routinely and systematically disseminates information to the public. This is accomplished through several means. First, EPIC maintains a heavily visited Web site (www.epic.org) that highlights the “latest news” concerning privacy and civil liberties issues. The site also features scanned images of documents EPIC obtains under the FOIA. Second, EPIC publishes a bi-weekly electronic newsletter that is distributed to over 15,000 readers, many of who report on technology issues for major news outlets. The newsletter
reports on relevant policy developments of a timely nature (hence the bi-weekly publication schedule). It has been published continuously since 1996, and an archive of past issues is available at our Web site. Finally, EPIC publishes and distributes printed books that address a broad range of privacy, civil liberties and technology issues. A list of EPIC publications is available at our Web site.

For the foregoing reasons, EPIC clearly fits the definition of “representative of the news media” contained in the FOIA and Department of Commerce regulations. Indeed, the U.S. District Court for the District of Columbia has held that EPIC is a “news media” requester under the FOIA. See Electronic Privacy Information Center v. Department of Defense, 241 F. Supp. 2d 5 (D.D.C. 2003). Based on our status as a “news media” requester, we are entitled to receive the requested records with only duplication fees assessed under 15 C.F.R. § 4.11(c). Further, because disclosure of this information will “contribute significantly to public understanding of the operations or activities of the government,” as described above, any duplication fees should be waived. This information is being sought on behalf of EPIC for dissemination to the general public.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees.

As I am making this request as a news media organization and this information is of timely value, I would appreciate your communicating with me by telephone, rather than by mail, if you have questions regarding this request. Thank you for your assistance.

Very truly yours,

FOIA REQUEST

Dear FOIA Officer:

Pursuant to the federal Freedom of Information Act, 5 U.S.C. s. 552, I request access to and copies of any communications on file with the Federal Election Commission with the following companies: Ciber Inc., Wyle Labs or Wyle Laboratories, SysTest or American Management Systems. I would also like to review any correspondence between the FEC and a member of the ITA Technical Subcommittee of the National Association of State Election Directors (NASED), also known as the ITA subcommittee or the Voting Systems Board. I would like to review any documents that fit this request from 1990 to the present date.

I agree to pay reasonable duplication fees for the processing of this request in an amount not to exceed $40.00. However, please notify me prior to your incurring any expenses in excess of that amount.

As a representative of the news media I am only required to pay for the direct cost of duplication after the first 100 pages. Through this request, I am gathering information on an issue that is of current interest to the public, namely the testing of voting machines and the drafting of voting machine standards.
Please waive any applicable fees. Release of the information is in the public interest because it will contribute significantly to public understanding of government operations and activities.

If my request is denied in whole or part, I ask that you justify all deletions by reference to specific exemptions of the act. I will also expect you to release all segregable portions of otherwise exempt material. I, of course, reserve the right to appeal your decision to withhold any information or to deny a waiver of fees.

As I am making this request as a journalist and this information is of timely value, I would appreciate your communicating with me by telephone, rather than by mail, if you have questions regarding this request.

Please provide expedited review of this request which concerns a matter of urgency. As a journalist, I am primarily engaged in disseminating information.

The public has an urgent need for information that deals with the integrity testing of voting systems that will be used in the November election.

I certify that my statements concerning the need for expedited review are true and correct to the best of my knowledge and belief.

I look forward to your reply within 20 business days, as the statute requires.

Thank you for your assistance.

Very truly yours,

Elise Ackerman

Subject RE: NCBCP Follow-up Meeting Requested

Thanks Gracia for meeting with me today. I will send out the EAC Announcement for the executive director position today to our e-mail lists.

I look forward to another opportunity to follow-up with you as we all continue to assess what worked and what didn't work in the 2004 Election as far as the implementation of HAVA and other election systems issues.

I would like to schedule another time in January to share with you the results of our Election Day Poll, what we learned from our hotlines (1-866-OUR-VOTE and our Tom Joyner registration hotline 1-866-316-VOTE) and information on the poll locator website we utilized during the 2004 Election. I would like to bring our hotline vendor, Ken Smukler and NCBCP Board member, Rene Redwood, to join us for that follow-up meeting.

Please let me know when your schedule will allow a follow-up meeting hopefully in January.
Thanks.

Melanie

Attached is the draft letter that will be sent to the executive leadership of various nonprofit organizations inviting them to meet with us on Monday, January 24.

Please feel free to email back to me any comments and edits to the letter. My plan is to begin sending out the letters tomorrow (Tuesday).

Via this email, I am asking Julie to make certain I have extended the appropriate invitation for this closed door meeting.

It is also my plan to have a copy of the invitation list for you at tomorrow (Tuesday) morning's Discussion Session.
January 11, 2005

Dear

The U.S. Election Assistance (EAC) Commissioners request your presence at a meeting to be held on Monday, January 24, 2005. The meeting will begin at 1:30 p.m., is expected to last about 90 minutes, and will be held at our offices at 1225 New York Avenue, NW, Suite 1100, Washington, DC 20005.

As you know, the Help America Vote Act of 2002 (HAVA) established EAC to make certain that the law is fully and effectively implemented. The work of your organization brings value to this process. We also feel it is extremely important to have a direct relationship with the executive leadership of the nonprofit organizations that are committed to ensuring that American voters have confidence in the integrity and fairness of our elections. We did not have the opportunity to have such a meeting in 2004 and want to make certain that we do so early in 2005, before we begin our aggressive schedule of public meetings and hearings.

While we want an opportunity to personally share with you the broad based components of our 2005 work plan, it is our desire to have a broader discussion of how America is fairing under HAVA. You have been invited as the head of your organization because it is important that we hear directly from you. Your perspectives inform and bring value to our work as EAC Commissioners. Recognizing that we all rely heavily on expertise within our organizations, you are welcome to bring a member of your staff with you but we also want to emphasize that it is your input that we seek.

I hope you will join us on January 24 and look forward to seeing you then. Please confirm your attendance with my office at 202-566-3111. We will also need to know the name of any one who will accompany you to the meeting. My assistant, Sheila Banks, will provide any additional information you might need.

Best wishes for a wonderful, peaceful and successful New Year.

Sincerely,

Gracia Hillman
Chair
Commissioners-

At a session today, in which we discussed the upcoming public hearing on state-wide VR databases, set for Boston, on April 26, 2005, it was agreed that we will hold our working group meeting on state-wide VR databases on March 23 and 24, here in Washington.

Subject: Meeting with Ted Selker, MIT/Calech Voting Project 

Hello Ms. Hillman,

Ted Selker will be in DC next week and he was hoping to be able to meet with you.

He will be arriving Wednesday, March 2 and would have time after 4:00 that day or Thursday morning before 10:00.

Please let me know what could work with your schedule.

Thank you.

Subject: Re: Meeting with EAC

Brad,

Just a note to let you know that I have confirmed your meeting with the Chair and the Vice Chair on Thursday, May 5 at 10:00 a.m. Do you think this meeting will last 2 hours?

Sheila
Shella:

Thanks for calling today. We are glad that the Chairman can attend the Board meeting. We are looking for about 30 minutes including questions and answers focusing on what the EAC has accomplished so far -- especially the voting systems guidelines and the work that Jim and JR have contributed. It would be interesting for people to learn more about what comes next as well. Here is a link that describes more about the Board and its members:

Good Afternoon:

For the most part, the details and arrangements for the NASS Executive Board meeting with the EAC Commissioners are complete and I wanted to get this out to you for your information.

The meeting will take place on Tuesday, March 22, 2005 from 2:00pm – 4:00pm. The meeting will be held in the EAC Conference Room. The EAC is located at 1225 New York Avenue, N.W. Suite 1100.

The Executive Board members attending in person will be:
Hon. Rebecca Vigil-Giron, NM, NASS President
Hon. Donetta Davidson, CO, NASS President-elect
Hon. Deb Markowitz, VT, NASS Treasurer
Hon. Mary Kiffmeyer, MN, NASS Immediate Past President
Hon. Pedro Cortes, PA, NASS Eastern Region VP
Hon. Ron Thornburgh, KS, NASS Midwestern Region VP
Hon. Joe Meyer, WY, NASS Western Region VP
Hon. John Gale, NE, NASS Executive Board Member at Large

Meredith Imwalle, NASS Communications Director will be attending the meeting in person

Paddy McGuire, OR Deputy Secretary of State will participate via phone on behalf of the Hon. Bill Bradbury, OR, NASS Executive Board Member at Large
Charlie Krogmeier, IA First Deputy Secretary of State will participate via phone on behalf of the Hon. Chet Culver, IA, NASS Secretary

Leslie Reynolds, NASS Executive Director will participate via phone.

This is a busy time in Washington and hotel rooms were difficult to come by. Government rates were impossible to come by. For those who requested we find them a room, we have made reservations at the Four Points by Sheraton. I have confirmed these rooms with my personal Amex. It would be greatly appreciated if you could transfer the charges to your card when you check in! This hotel is about a block and a half from the EAC. The address is:
1201 K Street, N.W. Washington, DC
202-289-7600
202-349-2215 Fax

Rebecca Vigil-Giron, arrive 3-21-05 and depart 3-23-05, confirmation #107353401
Donetta Davidson, arrive 3-21-05 and depart 3-23-05, confirmation # 707354376
John Gale, arrive 3-21-05 and depart 3-22-05, confirmation # 867353401
Mary Kiffmeyer, arrive 3-21-05 and depart 3-22-05, confirmation # 187353402
Joe Meyer, arrive 3-21-05 and depart 3-23-05, confirmation # 527353401

Secretaries Markowitz, Cortes and Thornburgh will be arriving and departing on March 22, 2005 and therefore did not request a room.

The EAC will hold their monthly public meeting that morning from 10am – 12:00pm. Obviously you are
welcome to attend. I do not know what the public meeting agenda is yet.

Finally, Chair Hillman sent an email to Sec. Vigil-Giron in the middle of February saying that she planned to send her a list of topics that the EAC would like to discuss prior to the meeting. She requested that we do the same. Therefore, if you have any topics you would like addressed, please feel free to send them to me and I will make sure that they are included on the list Sec. Vigil-Giron sends back.

Thanks so much. Sorry I will miss you all when you are in town, but it is spring break for the kids' school and we are off to Florida.

Adam,

I successfully changed my train to one that is supposed to arrive at Union Station at 11:00 am on Monday. I therefore plan to come meet the Commissioner at 11:30 am. If the train is delayed, I will leave you a message.

As for the meeting attendees, they are:

Wendy Welser, Brennan Center for Justice at NYU School of Law
Justin Levitt, Brennan Center for Justice at NYU School of Law
Lloyd Leonard, League of Women Voters
James Dickson, American Association of People with Disabilities
Steven Carbo, Demos
Jonah Goldman, Lawyers Committee for Civil Rights Under Law
Laleh Ipsahani, American Civil Liberties Union
Tanya Clay, People for the American Way
Larry Gonzalez, NALEO (arriving late)

Possible additional attendees include:

Jo-Anne Chasnow, Project Vote
Heather Thompson, Appleseed Foundation
Jeanette Senecal, League of Women Voters

Thank you. I look forward to meeting you in person.

Best,

Wendy

Dear Adam,

I wanted to touch base to finalize the arrangements for our meeting on Monday, May 16 regarding the database guidance. Specifically, we need to clarify the time and location of the meeting. (I believe that you said that you preferred 12:30 pm.) I would also like to confirm that I am responsible for the meeting agenda. Finally, I have consulted with other advocates and have a near-final list of those who would like to attend. Please let me know if you would like a copy of that list in advance. Thanks, and I look forward to meeting you in person.

Best,

Wendy
Gracia/Paul:

Attached is the list of participants for today's meeting with the advocacy community regarding the proposed guidance on statewide voter registration lists.

Thanks.

Commissioners -

We have tentatively scheduled May 26 at 2:30 for a kickoff meeting here with Eagleton Institute. What will happen at this meeting is Eagleton will introduce their key people and make a brief presentation on their approach to performing the provisional voting and voter ID studies. It will be an opportunity to ask questions, raise any concerns, and/or provide guidance as they begin this work. Please advise if you wish to attend this meeting. I expect it will last about an hour.

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission

Hello,

As per our conversation, I would like to set up a meeting with the chairwoman in mid June or as soon as her schedule allows.

I represent two organizations here in D.C., VerifiedVoting.org and the Miami-Dade Election Reform Coalition. At the March EAC meeting one of the panelists mentioned the Miami-Dade Election Reform Coalition as a non-partisan election reform community group that might serve as a model for community involvement on election related matters. I would like to share a little about the Coalition and talk about the possibility of having some leaders from Miami-Dade County present to the EAC.

Thanks very much for your consideration,

Bobbie

Ms. Brinegar,

Sorry for the delay in getting back to you.

Chair Hillman suggested that you meet with our Research Director, Karen Lynn-Dyson, and I understand that you met her at our May 24 public meeting. She has your information and will be in contact very soon.

Regards,

Sheila A. Banks

This will be a 20-30 minute free exchange with the Council's CEO and Vice President for Programs. The Vice Chair should read the proposal that is in the updated notebook which Joe Hardy has prepared for all of the Commissioners.

I'm hoping we can have a video, but will have to see if we can find a VCR around here!!

Also, there will be a follow-on 20 minute presentation by the law clerks, that will focus on an idea they have for an EAC voter information/education outreach project. They will be making a powerpoint presentation.

Let me know if you need other material.

Thanks

K

Sheila
File Folder for Martinez
entitled "Pew Martinez
Meeting 1/12/04"
December 15, 2004

The Honorable Ray Martinez III  
U.S. Election Assistance Commission  
1225 New York Avenue, NW, Suite 1100  
Washington, DC 20005

Dear Mr. Martinez:

I am writing to invite you to join the board of The Pew Charitable Trusts for a discussion on election reform while we are visiting Miami, January 10-14, 2005. Given your leadership on states' implementation of the federal Help America Vote Act of 2002, we would welcome the chance to hear your insights about the process. Our five-day educational trip to Florida is being planned to provide our board with opportunities to learn about a range of critical issues facing the country and to talk with policy makers, experts and a number of the Trusts' grantees. We would be most honored to have the opportunity to meet with you during our stay.

The Pew Charitable Trusts supports initiatives that inform the public on key topics and trends, promote engagement in civic life, and advance policy solutions on important challenges facing the American people. For more than a decade, the Trusts has sought to facilitate the federal policy debate on such issues as environmental protection, public health, and genetics and technology. Recognizing the growing influence of states, the Trusts several years ago began to develop a number of programs directed at state policy change. Most recently, our board approved a plan to launch a "center on the states," which will allow us to work on a broader range of policy issues and improve the effectiveness of our efforts by becoming more active participants in the process.

During the last decade, the Trusts has supported three nonpartisan initiatives aimed at improving the nation's elections. As you know, in the aftermath of the 2000 election, the Trusts established Electionline.org, a project to help monitor, assess and facilitate effective election reform and restore the public's confidence in the right to vote. I was delighted to learn that you use Electionline.org regularly and consider it a comprehensive and credible resource. The Trusts also has played a significant role in reforming the nation's campaign finance system and in encouraging young people between the ages of 18 and 25 to vote.

Given your legal expertise in election issues and your service on the U.S. Election Assistance Commission, our board would benefit greatly from hearing your observations about election reform in Florida and nationally, both in terms of progress that has been made and work that remains to be done. Doug Chapin, director of Electionline.org, also will be joining us for this off-the-record conversation, which will be moderated by Sue Urahn, director of Policy Initiatives and the Education program at the Trusts. This session is scheduled for Wednesday, January 12, from 9 a.m. to 10:30 a.m. in the Marbella Room on the lobby level of the Biltmore Hotel in Coral Gables. We would appreciate it if you would speak to the board for 15 to 20 minutes, leaving ample time for questions and an open dialogue.
By way of background, our board consists of members of the Pew family as well as other business, health and academic professionals. Included among its membership are several physicians, a lawyer, an investment advisor, a rancher, a former banker, a recently retired Fortune 500 CEO and a former university executive. In addition, our board members serve on other corporate, university and charitable boards.

We would be very grateful if you would agree to take part in what promises to be a lively and informative discussion. If you are able to join us, we would, of course, be happy to cover any expenses you might incur, including hotel and travel.

Should you accept our invitation, my colleague Laura Shell will be in touch with your office closer to the event to confirm final logistical arrangements, while Sue will coordinate with you and Mr. Chaplin on the content of the session. In the interim, please do not hesitate to contact Laura at 215-575-4701 with any questions.

Thank you for your thoughtful consideration of our invitation, and I hope to see you in January. In the meantime, you have my warm regards and best wishes for continued success in your important work on the U.S. Election Assistance Commission.

Sincerely,

Rebecca W. Rimmel

BOARD DIRECTOR BIOGRAPHIES

ROBERT H. CAMPBELL (Bob)
Bob Campbell enjoyed a lengthy career at Sun Co., Inc., beginning in 1960 as an engineer. He rose through the company to become president and CEO in 1991, and retired as chairman and CEO in 2000. Currently, he serves on the boards of CIGNA Corporation, Hershey Foods Corp., Hypercar, Inc., Rocky Mountain Institute and Vical, Inc. In addition, Mr. Campbell has been a director on the boards of the Philadelphia National Bank, National Industrial Advisory Council of the Opportunities Industrialization Centers of America and Elwyn Institute. He received his bachelor's degree in chemical engineering from Princeton University, a master's degree in chemical engineering from Carnegie Mellon University and a second master's in management from the Massachusetts Institute of Technology. Mr. Campbell joined the board in 2001.

SUSAN W. CATHERWOOD
Susan Catherwood serves on the University of Pennsylvania board of trustees and is board vice chair of the Christopher Ludwick Foundation and the Executive Service Corps of the Delaware Valley. Ms. Catherwood is also a director on the board of The Glenmede Trust Company and is a board member of the United Way of Southeastern Pennsylvania, the World Affairs Council, the Monell Chemical Senses Center and the Thomas Harrison Skelton Foundation, among others. A graduate of Stanford University with a bachelor's degree in history and political science, she has a particular interest in culture, public policy, health and education. Ms. Catherwood has been a member of the Trusts' board since 1988.

GLORIA TWINE CHISUM
Dr. Chisum earned her bachelor's and master's degrees from Howard University and a PhD from the University of Pennsylvania. At the University, she served in a variety of capacities including trustee, vice chair of the trustees and chair of the Commission on Strengthening the Community. Ms. Chisum is a retired research psychologist who headed the vision laboratories of the U.S. Naval Air Development Station in Warminster, PA. She is a member of the Philadelphia Compact Leadership Group and has previously served on the boards of the Free Library of Philadelphia, the Annenberg Research Institute, the William Penn Foundation, Fischer & Porter Company and the former Meritor Savings Bank. Dr. Chisum joined the board in January 2004.

ALAN J. DAVIS
Alan Davis is a partner at the law firm of Ballard Spahr Andrews & Ingersoll. His practice areas include commercial litigation, securities, criminal and municipal law. Mr. Davis has served as city solicitor of Philadelphia, chief assistant district attorney of Philadelphia, chief labor negotiator for the Southeastern Pennsylvania Transportation Authority (SEPTA), the School District of Philadelphia, and the City of Philadelphia. He is a past chairman and present member of the Executive Committee of the University of Pennsylvania Law School Inn of Court and a fellow of the American College of Trial Lawyers and International Academy of Trial Lawyers. He has been a lecturer at the University of Pennsylvania Law School and is active in various civic and charitable organizations. Mr. Davis is a graduate of the University of Pennsylvania (AB, with honors, 1957), and Harvard University (LLB, magna cum laude, 1960), and was editor of the Harvard Law Review. Mr. Davis joined the board in January 2004.
THOMAS W. LANGFITT, MD (Tom)
Tom Langfitt served as the president of the Trusts until 1994 and as chairman and chief executive officer of The Glenmede Corporation until May 1997. Prior to joining the Trusts, he was the Charles Harrison Frazier Professor and director of the division of neurosurgery at the University of Pennsylvania. During his 25-year tenure at Penn, Dr. Langfitt also served as vice president for health affairs, responsible for the university’s hospital and health profession schools. His research interests include head injury, intracranial pressure, cerebral blood flow and metabolism. He is a graduate of Princeton University and the Johns Hopkins University School of Medicine and is the author of more than 200 publications. Dr. Langfitt is a fellow of the College of Physicians and a member of the American Philosophical Society and the Institute of Medicine. He is a director on the board of The Glenmede Trust Company, the University of Pennsylvania Medical Center, the National Museum of American History and the Greater Philadelphia Urban Affairs Coalition. He also has affiliations with Harvard Medical School and Princeton University. Dr. Langfitt has been a member of the Trusts’ board since 1980.

PAUL F. MILLER, JR.
Paul Miller formerly served on the Trusts’ investment committee and is a retired investment company executive. A founding partner of Miller, Anderson & Sherrerd, he has served as a trustee of the University of Pennsylvania, and on the boards of the Ford Foundation, Colonial Williamsburg, the Science Center of New Hampshire and on the board of overseers of the Wharton School. Mr. Miller is a member of the Financial Analysts of Philadelphia, the World Wildlife Fund, where he also serves as a director, and various other organizations. He earned his bachelor’s degree from the University of Pennsylvania and has received honorary degrees from both Penn and Washington and Lee University. Mr. Miller joined the board in February 2004.

ARTHUR E. PEW III (Art)
Art Pew received a bachelor’s degree in mechanical engineering from Princeton University. He has worked with the Burlington Northern Railroad, Pennsylvania Railroad and Chicago & Northwestern Railway in a number of professional capacities. His fondness for trains has continued through retirement. Mr. Pew is a director on the board of The Glenmede Trust Company and also currently serves on the boards of the Minnesota Transportation Museum, Museum of Transportation and Development, Osceola & St. Croix Valley Railway, Manito Island Association and the Corporation of the Bermuda Biological Station for Research. His other interests include culture and health issues. He is the brother of Andy Pew and half brother of Sandy Pew. Mr. Pew has been a member of the Trusts’ board since 1994.

MARY CATHARINE PEW, MD (Cathy)
Cathy Pew is a staff pediatrician with the Community Health Centers of King County in Washington State. She earned her medical degree at the University of Pennsylvania and holds a bachelor’s degree in molecular biology from Yale University. Throughout her career, she has maintained a strong interest in issues related to child development and behavioral problems as well as children in crisis. Dr. Pew is fluent in Spanish and is a member of the American Academy of Pediatrics and Ambulatory Pediatric Association. She is the daughter of J. N. Pew, 3rd and the sister of Joe Pew IV and Howdy Pew. Dr. Pew joined the Trusts’ board in 2000.

J. HOWARD PEW II (Howdy)
Howdy Pew attended the University of Vermont, holds a bachelor’s degree in liberal arts from The Pennsylvania State University and earned a master’s degree in wildlife biology from the
University of Montana. Howdy is a director on the board of The Glenmede Trust Company. He is an avid outdoorsman and a strong advocate for the environment, and has a particular interest in natural resource issues and public policy. Howdy is the son of J. N. Pew, 3rd and the brother of Joe Pew IV and Cathy Pew. Mr. Pew has been a member of the Trusts' board since 1972.

J.N. PEW IV, MD (Joe)
Joe Pew IV, a graduate of the University of Pennsylvania School of Medicine, is a physician at the Reading (PA) Hospital and Medical Center, and Community General Hospital. Dr. Pew is a director on the board of The Glenmede Trust Company and includes among his memberships the American Medical Association, the American College of Physicians, American Red Cross, French & Pickering Creek Conservation Trust and the Pennsylvania Medical Association. His special interests are in the areas of health, public policy and the environment. He is the son of J. N. Pew, 3rd and brother of Howdy Pew and Cathy Pew. Dr. Pew has been a member of the Trusts' board since 1988.

R. ANDERSON PEW (Andy)
A director of Sun Company, Inc., Andy Pew served as president of the Helios Capital Corporation (a Sun subsidiary) and corporate secretary for Sun Company. He received his bachelor's degree from Temple University and a master of science degree in management from the Massachusetts Institute of Technology. Mr. Pew is currently director and chairman of the board of The Glenmede Corporation and is involved with many local civic organizations including the Children's Hospital of Philadelphia, Bryn Mawr College, the Curtis Institute of Music, the Academy of Music and Jackson Laboratory. He is an active pilot and chairman of the board for the Aircraft Owners and Pilots Association. Mr. Pew is the brother of Art Pew and half brother of Sandy Pew. He has been a member of the Trusts' board since 1967.

SANDY PEW
In addition to owning and operating the North Ridge Ranch in Montana, Sandy Pew leads study trips for individuals and groups in the Northern Rockies. These guided journeys focus on the wildlife in Grand Teton, Yellowstone and Glacier National Parks as well as the national forests of the area. Mr. Pew received a bachelor of science degree in range and animal science from Arizona State University. Sandy is a director on the board of The Glenmede Trust Company and, with interests in religion, the environment and education, he has served on the boards of many conservation and educational organizations, including the Yellowstone Center for Mountain Environments, the Mountain Research Center at Montana State University, the Glacier Fund, the Fountain Valley School in Colorado Springs and Teton Science School in Wyoming. He is the half brother of Andy Pew and Art Pew. Mr. Pew has been a member of the Trusts' board since 1994.

REBECCA W. RIMEL
President & Chief Executive Officer
Rebecca joined the Trusts' staff in 1983 and became executive director in 1989 and president and chief executive officer in 1994. She came to the Trusts from the University of Virginia Medical Center, where she was head nurse in the emergency department and assistant professor of neurosurgery, the first nurse to hold a faculty position in the university's medical school. She has authored or coauthored numerous scientific articles relating to head injury and is active on many boards. Rebecca serves on several boards including Deutsche Banc Scudder Funds and is emeritus trustee of Monticello-The Thomas Jefferson Foundation. She has been appointed to President Bush's Council on Service and Civic Participation and is a member of the Greater
Philadelphia Chamber of Commerce Executive Committee and the American Philosophical Society, as well as a fellow of the College of Physicians of Philadelphia. Rebecca received a BS degree, with distinction, from the University of Virginia and an MBA from James Madison University. Ms. Rimel has been a member of the Trusts’ board since 1994.

ROBERT G. WILLIAMS (Bob)
Bob Williams retired in 1993 from the Markel Corporation, where he was owner and chair. Previously, he had served 24 years at The Girard Bank in a variety of positions ranging from security analyst to vice chairman and director. Currently, Mr. Williams serves as chairman of the board of The Glenmede Trust Company and is a member of several other boards, including the Coriell Institute for Medical Research, Estaus Corporation, Upland Corporation and the Elizabeth Haddon Housing Corporation. He is a graduate of Babson College and Harvard Business School and has interests in health, the arts and the environment. Mr. Williams has been a member of the Trusts’ board since 1996.

EtHEL BENSON WISTER (Peppi)
Peppi Wister is a director of The Glenmede Corporation and Glenmede Trust Company. Ms. Wister has been involved with many cultural organizations and currently serves on the board of Philadelphia Television Network, Inc. and is a committee member of the Academy of Music. She is also the recipient of numerous awards, including the 1997 Arts Award from the Concerto Soloists Orchestra and the 1998 Guest of Honor Award from Scheie Eye Institute. Ms. Wister has been a member of the Trusts’ board since 2003.
ELECTION REFORM: MAKING EVERY VOTE COUNT
WEDNESDAY MORNING, JANUARY 12

Moderator:
Susan Urahn

Guests:
Doug Chapin
Ray Martinez III

Overview

Since the 2000 election, Florida has been the poster child for election reform. George W. Bush's narrow 537-vote victory over Al Gore that year catapulted the state into the international spotlight and subjected its electoral process to withering scrutiny. As the national drama over the outcome of the presidential election continued, Florida and its election officials were the subject of nearly daily reports about the conduct of the vote. And the halting effort to conduct a recount triggered widespread frustration, both with the highly decentralized nature of the American electoral system and the lack of formal or informal national voting standards.

The events in Florida became the catalyst for nationwide changes in election reform. In 2002, Congress enacted the Help America Vote Act (HAVA), which promised $3.86 billion to help states address their election problems and established a new federal agency, the Election Assistance Commission (EAC), to dole out the funds and provide states with information and guidance on election administration. In exchange for the federal grants, states were required to meet certain national mandates, including provisional voting, state-wide computerized voter databases and voting technology upgrades. But while states immediately received about $650 million to begin updating voting equipment, Congress and the White House took more than a year to appoint the EAC, which in turn delayed the distribution of additional HAVA funds to the states.

As both states and the EAC fought to catch up, predictions about the nation's electoral readiness in 2004 became dire. Some states, including Florida, rushed to purchase touch-screen voting machines, only to find themselves mired in lawsuits over voter-verifiable paper trails. States adopted different interpretations of HAVA's voter identification and provisional ballot provisions. Democrats and Republicans exchanged heated accusations about fraud among absentee ballots, and each party deployed thousands of lawyers and activists to monitor the polls.

Much to the country's surprise and relief, no major glitches occurred on November 2. For Florida, the margin of victory in the presidential race, combined with a relatively smooth Election Day and more widely publicized problems in Ohio and elsewhere, took the state off election reform's center stage. But as many experts noted, there were a number of places in the country where, if the vote had been closer, scrutiny of the
election process would have produced the same sort of consternation as did the events of four years ago. And states are far from meeting all of the HAVA mandates—or receiving the full appropriation promised by Congress. More than 40 states, for example, received waivers until 2006 on the requirement that they establish statewide voter registration databases, which will help guarantee that voter lists are accurate.

This session’s speakers—Doug Chapin, director of the Trusts-supported Electionline.org initiative, and Ray Martinez III, a member of the federal EAC—will offer a retrospective look at the states’ progress on election reform since 2000, as well as an analysis of what challenges lie ahead as the nation turns its attention to the 2006 and 2008 elections.

SPEAKERS’ BIOGRAPHIES

Doug Chapin

Doug Chapin is director of Electionline.org, created by the Trusts in March 2001 to monitor, assess and help advance states’ election reform efforts in the aftermath of the 2000 elections. Mr. Chapin has worked on the legal and policy aspects of election issues for more than 15 years. Prior to joining Electionline.org, Mr. Chapin worked at the law firm of Skadden, Arps, Slate, Meagher & Flom, counseling clients on compliance with federal, state and local laws regulating campaign finance, lobbying, gifts to public officials and conflicts of interest. A Dickinson, Shapiro, Morin & Oshinsky, he established the firm’s disclosure program under the Lobbying Disclosure Act and litigated redistricting cases in state and federal court.

Mr. Chapin served for three years as elections counsel to the Democrats on the U.S. Senate Rules Committee, where he worked on campaign finance reform, election administration, disabled voting and other issues. He also spent five years as director of research and statistics at Election Data Services, a political consulting firm, and was a statistician for the Federal Election Commission. Mr. Chapin received a law degree from Georgetown University Law Center, a Master’s degree in public administration from Harvard’s Kennedy School of Government and a Bachelor’s degree in politics from Princeton University.

Ray Martinez III

Ray Martinez is one of four members of the U.S. Election Assistance Commission (EAC). Mr. Martinez was nominated by President Bush and confirmed by unanimous consent of the U.S. Senate in December 2003. Previously, he was an attorney in Austin, Texas, focusing primarily on government affairs and administrative law matters for county governments and other public entities. He also served as executive director and legal counsel of the Every Texan Foundation, a nonpartisan voter registration and education effort aimed at increasing voter participation in Texas.

Before beginning his law practice, Mr. Martinez served as deputy assistant to the President for Intergovernmental Affairs, assisting former President Clinton with policy
issues involving the nation's governors and other state elected officials. He also helped develop long-term strategies to stimulate economic growth along the U.S./Mexico border region and helped established the U.S./Mexico Border Health Commission, now headquartered in El Paso, Texas. He served as regional director for the U.S. Department of Health and Human Services (HHS) in Dallas, where he focused agency resources on public health issues such as full implementation of the Children's Health Insurance Program. He also served as White House liaison to HHS and as special assistant to the President in the White House Office of Political Affairs. Prior to his service in the federal government, Mr. Martinez worked as a legislative liaison for the Texas Attorney General's office, and on staff at the Texas legislature. A native of Texas, he received his law degree from the University of Houston Law Center and his Bachelor's degree from Southwestern University.
The electoral reforms launched after the contested 2000 US election have only been partially implemented, and some voting procedures across the US remain confused, a report on possible election glitches said yesterday.

The study by electionline.org, a non-partisan research group, comes amid growing concern that "overtime" will be required to determine the outcome of this year's presidential contest. High voter turnout, close contests in battleground states and legal challenges could potentially delay results. Democrats, Republicans and activist groups have lined up thousands of lawyers to monitor polling stations on election day. The campaigns have also been raising money for any recounts.

"What happened in (the) 2000 (election) might never be repeated again, but some of the ingredients that produced chaos four years ago still exist," said Doug Chapin, director of electionline.org.

Many states moved to install touch-screen voting machines, but uncertainty about the ability to provide a paper receipt to voters, and to conduct a recount if a contest is close, has stalled adoption of that technology.

A separate area of concern is so-called provisional ballots. The Help America Vote Act, passed after the 2000 debacle, gave voters who show up at a polling stations and believe they are registered — but do not find their names on the voter rolls — the right to cast a ballot. This would be counted only if the voter's eligibility was subsequently confirmed.

But states have set up different procedures for determining voter eligibility, with some 28 mandating that ballots cast in the wrong precinct should not be counted.

"Many people are afraid provisional ballots will become the hanging chads (of Florida) of 2004," Mr Chapin said.

The US Justice department stepped in to a dispute surrounding this issue on Monday, asking a federal judge in Michigan to dismiss a lawsuit brought by Democrats attempting to require the state to count ballots cast in the wrong precinct.

About a dozen other lawsuits are pending across the country that could affect the conduct of the vote.

Mr Chapin also identified three areas in which reform did not keep pace with expectations after 2000: the Pentagon reversed course and did not institute an Internet voting system for military personnel overseas; only 15 states have statewide databases required by the voting law; and the federal government has dispensed only a portion of the money pledged to help states with these reforms.

In Florida, where early voting began Monday, civil rights groups complained that an area with a high concentration of black voters was inadequately served by a single early-voting site. The Republican secretary of state said additional sites would be added.

Cornell Belcher, a Democratic pollster who studies African-American and young voters, said the hot-button issue for black women this year was not the war in Iraq or the economy.

"What's at stake is their belief in our Democratic democratic system," he said.

The single comment he hears most often is: "Is my vote going to be counted?" www.ft.com/uselections IT Review, Separate Section

Problems at polling places; No major meltdowns reported, but minor troubles snarl voting process
By Deborah Hastings
Associated Press

Machines malfunctioned, tempers flared and edgy voters often waited in lines for hours Tuesday to pick a president in a contentious race watched by thousands of monitors who expected the worst.

By midday, several local snarls had been reported but no widespread allegations of voting problems.

"So far, it's no big, but lots of littles," said Doug Chaplin, director of the Election Reform Information Project, a nonpartisan research group. "We know of no major meltdowns anywhere along the lines some people were worried about."

Hyper-vigilance appeared to be the order of the day, which in some states prompted poll closures and unfounded complaints.

In the battleground state of New Jersey, for example, a suspicious substance later determined to be spilled salt prompted the two-hour closure of a Mount Laurel precinct. In Pennsylvania, zealous GOP election monitors complained that some Philadelphia voting machines already had thousands of recorded votes when the polls opened at 7 a.m.

Local election officials quickly explained that voting machines registered every vote ever cast on them -- like mileage on a car odometer -- and that did not constitute evidence of fraud.

"It's absolutely ridiculous," said Deputy City Commissioner Ed Schulgen.

In other states too close to call -- including Iowa and Michigan -- the liberal group MoveOn.org was accused of disrupting local precincts. In Ohio, a woman filed a lawsuit on behalf of voters who didn't receive absentee ballots on time, asking they be allowed to cast provisional ballots. Later in the day, a Toledo federal judge granted her request.

New touch-screen voting machines, which have been criticized by computer scientists and various states as susceptible to hacking and malfunction, were used Tuesday in 29 states and the District of Columbia. Only in Nevada, for this election, did the machines produce the paper records that make recounts reliable.

In Florida, which gave the 2000 election to President Bush on the basis of 537 votes, nearly half the state's voters were using the ATM-like machines.

Chellie Pingree, president of Common Cause and a former international election monitor, said a toll-free voting hot line established by her citizens' lobbying group had logged 20,000 calls by 10 a.m.

Provisional ballots, new this election, also prompted disaster fears because they could delay any recount efforts. Any voter whose name does not appear on precinct rolls is entitled to cast a provisional -- or paper -- ballot. But elections officials must individually certify them as being cast by registered voters before they can be counted.
Georgia's touch-screen voting machines passed a major test Tuesday.

A record 3.2 million voters cast ballots across the state, and no widespread equipment problems were reported. Just 24 minutes after the polls closed, unofficial results began flowing in to state election workers headquartered in Atlanta. In an exit poll of 1,618 Georgians conducted for The Atlanta Journal-Constitution and other media, 90 percent said they believed their votes would be counted accurately.

And on Election Day, Secretary of State Cathy Cox's worries were about long lines and provisional ballots. She wasn't having to defend the performance of the touch-screen machines she purchased in 2002 to replace the state's former patchwork of lever, optical scan and punch-card voting systems.

"They liked the machines," Cox said of Georgia voters. "They're frustrated with how long it takes to go through the check-in process. That's part of what we'd like to attack next."

Only a few minor problems with voting equipment were reported. Election officials had trouble programming voter access cards used to cast ballots, delaying the opening of some polls in Rockdale, Twiggs and Hancock counties.

Touch-screen voting also is used in parts of Florida, California, Nevada and other states. Officials in Maryland, the only other state that votes exclusively on touch-screen machines, also were crowing about their Tuesday success.

Like Cox, Maryland's chief election official hopes that problem-free elections eventually will snuff out criticism from some computer scientists, political activists and others who believe that electronic voting can be manipulated to produce fraudulent results.

"The fact that elections went so well across the country ... It's got to start quieting down a bit," predicted Linda Lamone, Maryland's administrator of elections.

But that's not likely to happen, countered Doug Chapin, director of electionline.org, an election reform project financed by the Pew Charitable Trusts.

"Anyone who had an opinion on electronic voting before Nov. 2 saw nothing on Nov. 2 to change their opinion," Chapin said. "The people who make the machines, bought the machines or like the machines saw nothing that would dissuade them from making, buying or liking them in the future. People who have concerns about the machines saw nothing that would dissuade them from having continued concerns."

Forsyth County computer programmer Roxanne Jekot of countthevote.org said it's "foolish" for anyone to immediately declare electronic voting a rousing success. She said she is withholding judgment for now.

"I really don't have any comment until I can get some numbers and do some evaluation and take a look at what the end result was," Jekot said.

Georgia Tech researchers have devised a survey that seeks voters' opinions on their experiences in casting ballots. The
survey can be accessed at www.ittatc.org/voting.php, or a paper copy can be obtained by calling 1-866-948-8282.

Cox's office will begin meeting soon with an advisory panel of local elected officials to talk about how to streamline the voter check-in process in hopes of ending long waits at the polls. Among the ideas --- one already used in Forsyth County --- is the automation of a statewide voter registration database so that voters' names can be looked up on laptop computers at the polling place rather than manually.

Electonline.org's Chapin said that "on first blush . . . it's a positive sign" that there were no major national problems reported with electronic voting. But he was cautious about drawing any broad conclusions just two days after the election.

"We don't know yet if the absence of reported problems so far means that there weren't any problems," Chapin said. "Or if it's like the old joke about the guy who fell off the tall building --- they knew he was an optimist because halfway down they heard him say, 'So far, so good.' " Photo Touch-screen machine instructions helped voters cast ballots Tuesday at City Hall in Morrow. / JOHNNY CRAWFORD / Staff

VOTING ERRORS TALLIED NATIONWIDE

Brian C. Mooney GLOBE STAFF

More than 4,000 votes vanished without a trace into a computer's overloaded memory in one North Carolina county, and about a hundred paper ballots were thrown out by mistake in another. In Texas, a county needed help from a laboratory in Canada to unlock the memory of a touch-screen machine and unearth five dozen votes.

In other places, machine undercounting or overcounting of votes was a problem. Several thousand votes were mistakenly double-counted in North Carolina, Ohio, Nebraska, and Washington state. Some votes in other areas were at first credited to the wrong candidates, with one Indiana county, by some quirk, misallocating several hundred votes for Democrats to Libertarians. In Florida, some machines temporarily indicated votes intended for challenger John F. Kerry were for President Bush, and vice versa.

In the month since the election, serious instances of voting machine problems or human errors in ballot counts have been documented in at least a dozen states, each involving from scores of ballots to as many as 12,000 votes, as in a North Carolina county. On Election Day, or in later reconciling tallies of ballots and voters, local officials discovered problems and corrected final counts. In some cases, the changes altered the outcomes of local races. But in North Carolina, the problems were so serious that the state may hold a rare second vote, redoing a contest for state agriculture commissioner decided by fewer votes than the number of ballots lost.

After the disputed vote in Florida four years ago, Congress passed the Help America Vote Act of 2002 and authorized $4 billion so states could create computerized voter lists and replace outdated voting systems such as punchcards by 2006. But many states have not completed the overhaul, and this year's election unearthed enough problems both with older technologies and newer electronic touch-screens that two federal agencies plan unprecedented nationwide inquiries. The investigations by the Government Accountability Office and US Election Assistance Commission will begin early next year and be completed by mid-2005, at the earliest.

In addition, minor presidential candidates requested recounts in four states a partial one completed yesterday in New Hampshire, and statewide in Ohio, New Mexico, and Nevada.

None of the recounts or inquiries is expected to affect the results of the presidential election, which Bush won by more than 3.3 million votes.

Those who believe that either or both of the past two presidential elections were manipulated by a vague conspiracy to elect Bush have done statistical analyses of voting patterns in Florida and argued that the voting discrepancies were much larger and systemic, but their studies have not stood up to scrutiny from academics and other analysts. Most of the concerns, which have rocketed through the Internet, center on computerized voting or tabulating machines, including some that do not keep a paper record for audits and recounts. Some computer scientists acknowledge that these systems could be vulnerable to tampering.

"I would hesitate to take seriously the conspiracy theories, but there are certainly gaps and vulnerabilities that have got to be addressed," said DeForest B. Soaries, chairman of the US Election Assistance Commission, which was created by the 2002 law and plans to conduct hearings around the country on the voting.

"We are convinced that while the election went relatively smoothly compared to what many had expected, that does not eliminate the need to study the results and collect data to document machine malfunctions and other administrative matters," Soaries said.

Since 2000, watchdog groups have intensified their monitoring and cataloging of complaints and errors. The nonpartisan Verified Voting Foundation and other groups built a database of more than 30,000 "election incidents" reported across the country this year. Most were routine, but nearly 900 involved significant e-voting problems, including malfunctions that shut down machines, lengthening waits at the polls. There were 42 reports of total breakdowns of machines in New Orleans and 28 in Philadelphia and "15 reports of catastrophic machine failure" in Mercer County, Pa.

The most serious problems occurred in North Carolina, where 4,438 e-votes disappeared in Carteret County. In at least five other counties, major double-counting or undercounting was discovered and corrected by North Carolina officials during their tabulations.

Johnnie McLean, deputy director of the State Board of Elections, attributed many mistakes to "the human element, brought on by fatigue." In Carteret, for example, election workers apparently did not notice the "Voter Log Full" message on the black box as the UniLect touch-screen failed to record the electronic votes, she said.

"If we had problems in the past, they were not magnified like this," McLean said, referring not only to the closeness of the statewide race, but also the extraordinary scrutiny of voting since 2000.

Examples of other major problems that were reported on and after Nov. 2, then later corrected, include:

- Thousands of ballots were mistakenly double-counted in Sandusky County, Ohio; Sarpy County, Neb.; and Grays Harbor County, Wash. Democrats in Washington must decide by Friday whether to seek a second recount in the closest governor's race in state history. One recount has been held, reducing Republican Dino Rossi's 261-vote lead to 42 votes over Democrat Christine Gregoire.

- In Cuyahoga, Ohio, a suburb of Columbus, Bush was temporarily credited with 3,893 more votes than he actually received in a precinct where only 638 votes cast ballots on a Danaher electronic voting machine.

- In Franklin County, Ind., a tabulator credited about 600 straight-ticket Democratic votes to Libertarian Party candidates.

- In Collin County, Texas, the memory card of a Diebold Election Systems touch-screen machine had to be sent to a laboratory in Canada a week after the election to extract information about 63 votes cast before the machine froze and was taken out of service.

- In South Florida's Broward County, "multiple misrecordings" occurred when votes for Kerry on touch-screens made by Election Systems & Software Inc. appeared as Bush votes, and there was at least one account of a Bush vote going to Kerry, the Verified Voting group reported. Broward voters discovered the problem on screens that allowed them to check their selections before entering them electronically.

The long list of documented problems has fueled the suspicions of conspiracy theorists, activists, and the minor presidential candidates who requested the New Hampshire and Ohio recounts.

Ohio decided the 2004 contest, but since the 2000 election, Florida remains the focus of the doubters and the devotees of various scenarios that suggest skulduggery, in part because early exit polls overstated Kerry's strength.

No group has been more aggressive than Seattle-based Black Box Voting, which bills itself as "consumer protection for elections." Led by founder Bev Harris, the organization is seeking election records from around the country for audits of the results. The primary focus is Florida, where internal computer records have been requested in all 67 counties, and the results in glitch-plagued Volusia County, in the east-central part of the state, are being contested.

Four years ago, during vote-counting on election night, a faulty memory card initially deducted 16,022 votes from Democrat Al Gore's vote total in Volusia. Despite spending about $300,000 to upgrade equipment and avert a repeat, there were memory card problems this year in tabulators for six Volusia precincts. The optically-scanned paper ballots were re-fed into other counting machines to reach an accurate tally, a county election official said.

"All day long, I get desperate calls from people who are in so much pain," said Harris, the Black Box founder, who said she is convinced fraud occurred in some places Nov. 2. "They say: Can you fix it? Can you solve it? Can you turn around the presidential election? We're not trying to turn the election around. We're trying to get elections to be more transparent, because with the new machines, it's not transparent."

Deanie Lowe, Volusia's supervisor of elections, said she has complied with Harris's record requests and offered to recount, free of charge, any three of Volusia's 179 precincts selected by Harris.
Harris, however, said records for all precincts were not turned over, and Black Box will seek a 50-precinct recount in the county, which Kerry won but by a smaller margin than Gore did in 2000.

Much of the postelection focus on Florida resulted from a pair of analyses that claimed Bush’s vote totals in the state were inflated by two vote-counting technologies.

The first analysis originated on the Web and cited results in rural, overwhelmingly Democratic counties in Florida’s panhandle, where Bush crushed Kerry. All use optical scanners. What the analysis failed to note is that Bush routed Gore by nearly equal margins four years ago in the same conservative counties that have been tilting Republican for years in national elections. A team of Miami Herald reporters reviewed 17,000 ballots in three of the counties, basically confirming the election results.

Then, a broadly reported second study by a team at the University of California at Berkeley, using an academic statistical method, asserted that “irregularities associated with electronic voting machines may have awarded 130,000 excess votes to President George W. Bush in Florida.” In Broward County alone, the study said, Bush “appears to have received approximately 72,000 excess votes.” Palm Beach and Miami-Dade counties, which also use touch-screens, were also cited as anomalies.

But if Bush had actually received 72,000 fewer votes in heavily Democratic Broward, his total this year would have been less than it was in 2000 even though nearly 132,000 more ballots were cast. Kerry won all three key counties, Broward by more than 209,000 votes.

Bush carried the state by 380,978 votes, or about 5 percent of 7.6 million cast.

If recounts are the skeptics’ best hope to uncover systemic irregularities, they got off to a rocky start in New Hampshire. Completed yesterday at the request of Independent candidate Ralph Nader, the Granite State recount of 50,600 votes in 11 towns and city wards that used optical scanners increased Kerry’s total by 87 votes and Bush’s by 62. Secretary of State William M. Gardner said scanned ballots have worked well in New Hampshire. Indeed, the largest discrepancies found this year were in a legislative race involving hand-counted ballots, he said.

On deck is Ohio, which tipped the Electoral College to Bush. At the earliest, the recount of 88 counties won’t begin until Dec. 13, according to the secretary of state’s office, the same day the Electoral College is scheduled to formalize Bush’s reelection. The recount could take anywhere from a few days to a few weeks.Minor presidential candidates Michael Badnarik and David Cobb of the Libertarian and Green parties, respectively, have said they would formally seek the recount once the state certifies the official results Monday. They will incorporate the review of 155,000 provisional ballots, which were not included in preliminary tallies that showed Bush winning Ohio by 136,483 votes, or about 2.5 percent.

How long the recount takes will depend on whether Badnarik and Cobb ask for a manual inspection of any or all of the 5.5 million ballots, said Carlo LoParo, spokesman for Ohio’s secretary of state, J. Kenneth Blackwell.

Of complaints about long lines that discouraged some from voting and allegations that there was a shortage of machines in some urban Democratic areas, LoParo said such decisions in Ohio are made by county boards of elections with two Republicans and two Democrats.

Long waits in Ohio and elsewhere resulted from the system being overwhelmed by a high turnout, said Doug Chapin, director of the nonpartisan electionsline.org, which monitors reform efforts.

More attention should be paid to providing an adequate number of machines in polling places, he said, as well as “finishing the job” mandated by the Help America Vote Act. Forty states, for example, have yet to comply with a mandate to establish a central, statewide database of registered voters. That will reduce questions about voter eligibility at election time, Chapin said.

Whatever the outcome of the recounts and the official inquiries by federal agencies, the impetus for improve voting systems will not fade, he said.

“This is not a fringe issue, because a sizable group is interested in pursuing this as a policy issue going forward,” Chapin said. “There’s now a critical mass of people involved who want to address the problems that occurred in 2004. This issue is not going to go away.”

SIDEBAR: ELECTION DAY PROBLEMS PLEASE REFER TO MICROFILM FOR CHART DATA.
Lawmakers, Election Officials Push for Change After Vote

By Dan Shuey
electionline.org

State lawmakers and election officials have for the most part put the election behind them, but not the problems that occurred in a number of states and localities.

With a few months to go before most state legislatures open sessions early, top election officials and politicians are beginning to lay out their plans for changing the way elections are administered based on the lessons they learned on November 2.

The plans being floated for deliberations next year range from the practical, the addition of early or no-excuse absentee voting in states that do not allow such options for voters now, to the innovative, which in Florida is a call for an election "season" that lasts two weeks rather than a traditional Election Day.

Problems a month ago at the polls have prompted calls for updated or standardized voting machines in New York and New Mexico. And it appears likely that the debate over the need for voter-verifiable paper audit trails with electronic voting machines will again be rekindled in a number of state legislatures.

A review of press reports from the past few weeks preview the focus of discussions in a number of states.

2 Florida election officials have proposed creating an election season which would do away with a set election day and allow voting through an extended time period, the Miami Herald reported.

2 In Iowa, Secretary of State Chet Culver has said he will ask the state legislature to approve same-day voter registration, and to also consider a mail-in election system, according to the Iowa City Press-Citizen. In Connecticut, the Record-Journal reported that lawmakers there are also considering same-day voter registration.

2 The Albuquerque Journal reported New Mexico Gov. Bill Richardson has proposed several changes he would like to see for the next election, including standardizing voting machines in all counties, requiring voting machines to leave a paper trail and developing new standards concerning the ratio of voting machines per voter in order to prevent long lines.

2 New York City Mayor Michael Bloomberg publicly criticized the voting machines that were used in the November election, saying they were over 40 years old, and based on a patent developed by Thomas Edison which is almost 140 years old, Newsday reported. After noting the current voting machines "belong in the New York Historical Society" rather than polling places, Bloomberg said that the state lawmakers need to enact legislation to free up $200 million in federal
funds to buy new voting machines.

Texas state Rep. Aaron Peña, proposed H.B. 166, which would require voting machines to give voters paper receipts. If passed, the bill would go into effect January 1, 2006. A companion bill has also been submitted in the Texas State Senate, as reported by The Valley Morning Star.

According to the Miami Herald, Florida Gov. Jeb Bush has supported a series of changes that will revise the way in which felons can regain the right to vote. They would include easing restrictions in clemency rules which will allow more felons the right to vote, as well as hiring more staff in order to handle the backlog of felons who have applied to have their rights restored. The changes will be introduced by the clemency board in early December.

Illinois election officials have called for legislation which would create a statewide standard for counting provisional ballots, the State Journal-Register reported. In the 2004 elections, different counties used different standards as to where provisional ballots could be cast and for what races they could be cast for.

According to The Journal Inquirer, Connecticut will be holding legislative hearings on adding no-excuse absentee voting for the next election.

electiononline.org will continue to update the progress of election administration bills filed in state legislatures.

entitled 1/22/05
Planning Session on state Voter Registration Databases
In my survey of the state and Academy technology experts, everyone noted the significance of the January 1, 2006 deadline. Further, there was a broad consensus that many states are in danger of falling short of deploying a HAVA-compliant system by that date. Short-term measures that the EAC and Academies might undertake together fell into two broad categories: technical and administrative.

Prior to January 2006

The following technically-oriented objectives were mentioned as useful activities to undertake prior to January 2006:

- Developing a list of common criteria (perhaps derived from some reasonable amalgamation of current state requirements for their VR systems).

- Providing advice to support conversions of county data to the statewide system to establish a baseline population in the database.

- Describing plausible quick-fix "disposable" approaches that bring states into compliance that do not constrain the eventual architecture of better systems. For example, it might be useful to develop criteria and procedures that would enable counties to feed their individual lists into a state system by whatever means feasible, e.g. upload through the Internet, CDs, etc, and then coalesced into a single database system that assigns the necessary unique ID.

- Planning for election day use of the systems. A real problem is capacity planning for the peak query load that will occur on election day. This could be done through a contract with a service provider to provide server farm capability.

- Developing a set of best practices that will allow states to fail or succeed en masse. (The "en masse" notion is based on the idea that if a large number of states are in the same situation regarding compliance, they may have greater leverage in negotiating with the Justice Department subsequent to January 2006. The availability of a set of "best practices" to which these states adhere could be an important part of demonstrating a good faith attempt to comply with the HAVA requirements.)

One administratively oriented objective was mentioned for consideration prior to January 2006: the formation of a state consortium that would begin to enable states to pool knowledge and exert greater leverage over contractors. Code sharing is already in place through govc, but higher-level knowledge sharing is very much needed. (Higher-level knowledge includes contract terms, RFPs, architectures, problem reporting, data...
The United States Election Assistance Commission engages in research and technical assistance activities to support State-level implementation of the provisions of the Help America Vote Act (HAVA). One such provision is the requirement for all States to provide statewide voter registration bases at all voting locations not later than January 1, 2006. These databases, described in Section 303 of HAVA, are required to host information in a single environment accessible to authorized users but protected from inappropriate use, interface with other State-level systems, assign unique identifiers to legally registered voters, and, generally, serve as the single point of information for all Federal voter registration information in a specific State.

In order to support States' efforts on this important topic, the EAC convened a workshop for chief information technology officers responsible for the development and operations of these databases. This workshop, held in June 2005 at the National Academy of Sciences in Washington, DC, afforded State technology officials an opportunity to share experiences, ideas, challenges and constraints with their peers from around the country. This peer dialogue was supplemented by participation from a cadre of NAS technology experts. These experts brought unique perspectives and valuable technology knowledge to bear on the challenges articulated by the participants. Before the meeting, participants were provided the following topics for consideration:

- Software Development
- Databases
- Networking & Communication
- Security & Privacy
- Training & Human Resources

Over the course of the two days, participants were asked to contribute their perspectives on the key elements and challenges of meeting the requirements for statewide voter registration databases articulated in HAVA. This meeting summary provides an overview of the key observations and challenges articulated by the participants as well as a summary of suggested action items in each of these themes.

**Software Development**

While software development itself (e.g. architecture, testing) did not resonate as a primary challenge for the IT participants, they did articulate challenges around contract management and vendor selection and performance. Specifically, States were concerned about the RFP development process and a sense that vendors were “re-selling” the same product because States were not communicating about what was already available. Additionally, by not sharing information (e.g. request for proposals), States were repeating the same mistakes, rendering them insufficiently prepared to hold vendors accountable and secure the best services.
Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Developing a community of practice with the following features:
  - Online learning community to share, information, documents, code bases, and other resources
  - A place (online) to share success stories and “get the word out” about new requirements.
- Fostering “user groups” where States using the same vendor could gather to share information either in person or electronically

Databases
It was generally agreed that “databases” as a topic focused on the interoperability capacity of the systems as compared to the requirements of HAVA. Participants noted that the language in HAVA requiring database to interact with other databases is not completely clear. Participants struggled with feeling under prepared to assess their own compliance, asking the question “how good is good enough?”

In addition to the question of with which databases the voter registration list is required to interact, participants were also concerned about the effect of time on their databases’ performance and ability to auto-interact. That is, if solutions are developed to challenges identified over time, participants worry that the revised databases might become too cumbersome to work effectively.

Beyond these technical challenges, participants articulated challenges they described as “political.” These challenges included securing county buy-in, fostering collaboration among diverse stakeholders, and balancing Federal and State legal requirements in their work. Participants encouraged their peers to include all stakeholders early in the process, to create buy-in by being inclusive in RFP development and vendor selection, and to always focus on the fact that “at the end of the day, you want the system to work.”

Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- A compliance checklist focused on the technical requirements of the VR databases
- Testing guidance from the Election Assistance Commission
- A joint Federal-State testing plan
- Standards for best practices in design and interoperability
- A reference architecture that would be HAVA compliant
Security & Privacy

Two primary themes emerged as part of the security and privacy conversation: \(^1\) internal and external concerns. Internal concerns deal with ensuring those that have access only have appropriate access to appropriate information, as mandated by HAVA and in accordance with State law. To this end, participants discussed the need for role-based access. This type of access assigns certain permissions to certain users (based on their role and level of need) and thus ensures that only those that “need to know” have access to sensitive information.

External access recognizes that counties have different perceptions of privacy constraints and that they use information differently. For instance, many counties sell their voter registration lists to candidates in various elections. Clearly, there must only be non-private information on that list. This is a requirement for privacy; the database must contain but not provide that information on the sellable list.

Additionally, participants were concerned about the perception of privacy in their home States. Real social problems such as stalking and violence against public officials (e.g. judges) have created fear over inappropriate access to address or even voting district information. This fear has resulted in the cancellation of certain public Web-based applications through which voters can determine where their appropriate polling location.

**Suggested Action Items**
Participants suggested the following types of activities and resources would be helpful to them:

- Guidance around legitimate privacy concerns, including blind ballot voters
- Shared best practices on role-based and privacy (e.g. flags vs. filters) strategies

**Networking & Communication**

Participants considered security to be a component of networking and, as such, articulated challenges they face or are concerned about with respect to threats, role identification, and tradeoffs between privacy and security. Specifically, participants thought threat detection and planning for attacks on their databases was critically important. These threats may be from those actually attempting to steal information or those simply testing their “hacking skills.”

Specifically, participants discussed the need for planning, detection, and recovery from an attack on their system. Additionally, participants are aware that threats are constantly evolving, a situation that requires constant vigilance on their parts.

With respect to appropriate roles, participants discussed the value of moving from a password-based protection system to a potential token system. Under either system, it was agreed, security is still a consideration to be given top priority. States need to make individual decisions based on the type of user being given access.

\(^1\) Participants wanted to discuss security with networking.
Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Additional literature on the value of tokens vs. passwords
- Coordination with postal service to reach additional addresses, as appropriate
- Guidance around requirement interactive partners

Training & Human Resources

The primary challenges associated with human resources and training related to staff shortages and accountability. Specifically, the participants were concerned about the “accountability gap” between those that will actually do most of the work and those that will be held accountable for its quality. Many participants felt that the nature of their work and the requirements they face are not always well understood, leaving them understaffed and overtaxed.

Training issues included challenges around States delivery vendor-developed training, facility constraints, and staff turnover. Also challenging to the participants is knowledge transfer from the vendor over to State personnel and the need to educate management about ongoing support needs. Participants encouraged their peers to ensure they participate in the design plans and not simply hand over control to their vendors.

Suggested Action Items
Participants suggested the following types of activities and resources would be helpful to them:

- Tools for communicating staffing requirements
- Strategies for educating first internal collaborators and then external stakeholders
- A chart comparing the staffing levels of other States
- Comprehensive help files for all programs and products
- Regional trainings, peer methodology or train-the-trainer

This Workshop for Voter Registration Database Technology Officers provided colleagues from around the country to join together with EAC and NAS technology experts for a facilitated discussion around issues, challenges, strategies, and necessary support. Thanks to the active participation of the attendees, the meeting was successful on many fronts. Among the outcomes of the meeting are:

- Fostered peer relationships for ongoing communication
- Provided EAC a clearer sense of the challenges and needs of the field
- Generated a list of possible next steps for both EAC and the IT personnel back home
- Exposed participants to NAS expertise

As EAC moves forward in supporting States in meeting the requirements of HAVA, both those effective in January and beyond, this meeting will inform that process.

For more information, please contact Karen Lynn-Dyson, Research Manager, US Election Assistance Commission at klyndyson@eac.gov.
File Folders for Martinez
entitled Photos
May 17, 2005
Design for Democracy
Good morning Adam:
In Boston I snared Commissioner Martinez for a few minutes and asked if he would be willing to meet with board members from an organization called Design for Democracy, an affiliate organization of the American Institute for Graphic Arts. They have done some wonderful work in Chicago, Oregon and other places redesigning election materials and processes (they redesigned the whole polling place in Chicago) in order to make election day work more smoothly for all.

I asked Commissioner Martinez if he was willing to listen to a briefing from the group to see what they've done and discuss a potential projects with the EAC. One project I discussed with him would be getting Design for Democracy involved in reviewing the design of the national mail-in voter registration form.

This is a long way of getting to my point. But I've been working with the Design for Democracy folks on a possible day that some of them could travel to Washington to meet with Commissioner Martinez. They are available on May 17. Would it be possible for him to meet with them on May 17th? And might Chair Hillman and Commissioner DeGregorio be available as well? Commissioner Martinez mentioned that they might also want to participate in the briefing.

This is a wonderful group. (For disclosure purposes I need to mention here that I am now on their board of directors.) Instead of attacking elections officials they reached out to help. They have convinced me and other elections officials across the country that improving elections doesn't always have to be about buying expensive new equipment. Sometimes, redesigning the process you already have to make it more voter friendly will get the job done.

Anyway, let me know if a May 17 meeting would work. These folks would be flying in from New York and Chicago.

j lindback

John Lindback, Director
Elections Division
Oregon Secretary of State's Office
The examples provided in "Election Design: Models for Improvement" were developed from a carefully conceived system of colors, symbols, images, typefaces, principles of organization, and methods of execution. Some of the recommended formats can be easily implemented by election administrators working in partnership with print or electronic media suppliers. Others will require professionals familiar with information design and the workings of a graphic design system. We are created a pdf of the design system section that is downloadable from this page.

Download "Election Design: Models for Improvement" (pdf).

Professional graphic designers have the specific skills and knowledge needed to extend the basic system into more complex or customized applications. For guidance beyond simple adaptations of the templates, AIGA Design for Democracy can put you together with a designer.

Email: designfordemocracy@aiga.org
Phone: 212.807.1990.

Find a designer in your area.
Election Design

The Voting Experience

Each stage of the election process involves distinct procedures and communication requirements for voters and for election officials. Our design system applies established design principles to all stages of the voting experience.

Examples include voter registration cards that meet HAVA requirements and that adhere to the Design for Democracy standard of making the complex clear.

Information about the election process, candidates, and issues in a given election need to be readily available and easy to understand. Our system includes brochures, information cards, and instruction sheets.

Well designed signs that provide instruction and information in the polling place will instill confidence in a voter's ability know what to do and how to do it.

Samples

- Online election information
- Voter education brochures
- Voter pamphlets inside (1)
- Voter pamphlets inside (2)
- Voter pamphlets cover
- HAVA compliant voter registration card

Find a Designer

Good design makes choice

Additional administrative challenges are to account for provisional votes. Our document management system has been extended to include forms and envelopes necessary for HAV, provisional voting.

Those who serve in the polling place have direct influence on the voter's experience. They also impact the efficiency of election administration. Our book, Election Design: Models for Improvement, provides detailed guidelines for page layout and content management of a pollworker training and reference manual including templates for electronic training support.

The forms, envelopes, and instructions used for election record keeping and vote recording can be very confusing for pollworkers. Design for Democracy has developed a document management system that includes large reference numbers, consistent placement of information, clear instructions, and a color coding system that provides instant, useful information. Listing of sub sections: Pollworker training and support, Document management system, Provisional voting.

Government in a participatory democracy has a responsibility to remove the barriers to participation in civic life. This includes making the tools of participation (ballots, surveys, forms, web sites and informational publications) easy for every citizen to use.

When citizens get confused while filling out tax forms, the problem is not the intelligence of the citizen, it's the design of the form. When a family fails to return a government questionnaire because it looks too complicated and intrusive, the problem is not the family, but the look and feel of the survey. When an election ballot is tossed out because the voter was confused, the problem is not with the voter, but the design of the machine and the layout of the ballot.

"Every citizen" should mean just that — everyone who is a citizen, regardless of age, physical challenge or education, should have an equal opportunity to participate in democracy and communicate easily with his or her government.

Information design

Information design is the art and science of making raw information and instructions easy to read, understand and use. It is practiced by graphic designers, usability experts, and language simplification specialists. In the private sector, the information and service economies employ information design to insure that information products (web sites, manuals and customer services) are effective and easy-to-use. In the competitive new economy, information design makes the difference between product acceptance and failure.

Information design, undertaken by professionals with experience, helps to address the different needs of different audiences, whether they be elderly, young, disabled or challenged by English as a second language.

Information design is just as important in the public sector, yet the practice and application of advanced design to government communications lags significantly behind. At the same time, the general public (with exposure to sophisticated communications products) has increased expectations for the government to perform at the same level as the private sector.

Design in a participatory democracy

Government can benefit from private sector advances in information design. Clear performance expectations are urgently needed to guide the design of the tools of participation. Information gathering tools, such as ballots, surveys, and forms need to be designed to be consistent, clear and easy to use. Information dissemination tools, such as public service instructions and government web sites must encourage use through clarity and usability. They may be designed at the district, local, state or national level by local designers selected by different agencies; yet, they should be designed with a clear appreciation for the performance standards that need to be met by the designed forms, screens or reports.

Participatory democracy relies on the free and equal exchange of information and ideas. Government communications that are difficult to use give preference to those with time,
resources, and education. To be truly democratic, government communications should be accessible to all. The government has an opportunity to improve compliance through ease-of-use and to improve goodwill by demonstrating that taxpayers' money is being well spent.

The public information product development process
Though the design of information products, such as a universal voting machine and ballot, might seem simple at first, this is misleading. There are a number of critical information product design processes that are critical to the success of such undertakings. No major design initiatives would be complete without the following steps.

Research and planning
Investigate and learn from similar projects undertaken in the private sector, in local governments, or other countries. In many cases, information problems have already been solved and tested. A design strategist and researcher can help create design plans that harvest the best ideas around the world and avoid duplication.

Language simplification
Work with writing professionals to shorten text and to craft language that the majority of Americans would understand.

Identity development
Make sure that all communications look and feel like they come from the government and that they have the appropriate look of authority and security. Use professional graphic designers to develop brands or signatures for any communication program.

Graphic design
Work with graphic designers to develop appropriate and contemporary styles and formats for all communications. This includes layout, use of color, typefaces, illustration and formatting.

Industrial design
Work with industrial designers to develop the form, function and feel of any hardware associated with the information product. This includes materials development, product design, ADA issues and finishes.

Experience design and usability testing
Study and explore how the general public interacts with the tools of participation. Usability professionals employ experience, focus groups and careful user testing to avoid mistakes and to be absolutely sure that any new products will be accepted and easy-to-use by the broadest public.

Assessment
Any new information product is not complete until it is evaluated under real conditions for at least one year. The evaluation would explore rates of compliance, security issues, and unexpected problems or benefits.

Where to find help

AIGA, the American Institute of Graphic Arts, is the largest and oldest professional association of designers in the country. It is a nonprofit, nonpartisan association that represents information designers and designers working in print, motion, new media and interactive media. AIGA, through its experience in working with public and private clients, can assist in creating an RFP, a scope of work or design brief, or in helping agencies locate designers with the requisite experience and skills. AIGA has also assembled a special expert team to develop and evaluate options.
Buster:

While in Austin last week, I was invited to meet with David Hart, who is president/CEO of Hart Intercivic (DRE manufacturer). I had a good meeting with David and his senior staff, and toured the company's headquarters there in Austin.

I received a follow-up email from David last night, and he was asking if any of us were planning to be in San Antonio for IACREOT because the Election Technology Council (of which David is chairman) will be meeting at IACREOT as well. The specific request from David is for any, or all, of the four EAC commissioners to meet and address the vendors all in one sitting. I personally think this is a good opportunity to meet with the vendors and, among other things, urge them to comply with your security proposal, which by that time, will presumably be a formal Statement of Policy adopted by the EAC.

Before I run this request by the other commissioners, I thought I would present it to you first. If we can find the time to do so, I think this is a good idea. Your thoughts?

Thanks.

Hi Adam,

Conny and Deborah Wright asked me if I would like to attend your meeting on August 1st. The answer is "yes". It will be my pleasure to attend the meeting. Can you let me know the logistics, such as where the meeting will be held, do I need to bring information to share, how do I book the flight (through our department or your agency's account)? Please advise. Thank you.

Adam,
It just occurred to me that you probably need the OK ed. bd. logistics now since he's going there from TX. I will write a memo for him and fax it to him in TX.

Again, his meeting with the Oklahoman ed. bd. is on Thursday, July 21, at 2 p.m. See details below and let me know if you need anything else.

Jeannie Layson,

Editorial board members: Ed Kelley, editor of The Oklahoman; J.E. McReynolds, chief editorial writer; Owen Canfield, editorial writer.

We're also going to invite a news reporter to sit in but I don't know which one. I can give you that name when I get it.

The Oklahoman is at 9000 N Broadway Extension, at the southeast corner of Broadway Ext. and Britton Rd. In our lobby Commissioner Martinez will check in with the guard (who will be expecting him) and they'll
call me to bring him up to our floor.

Phyllis

Summary of Meeting with Advocates for the Disabled Community

The meeting started with Commissioner Martinez explaining the various funding constraints the EAC has dealt with which caused the TGDC and NIST to rush their VVSG recommendations. The Advocates for the Disabled then mentioned section 2.2.5 of the VVSG as providing a ‘loophole’ for modified optical scan machines such as the ES&S AutoMark, by using the word “should” instead of “shall”. Commissioner Martinez acknowledged this problem and urged the VVSG to be viewed as an ever-changing document. The Advocates replied by saying that once States buy machines based on EAC / VVSG recommendations, they will be in place for a long time. With a January 2006 deadline, there must be a sense of urgency to close these ‘loopholes’. The idea of machines being able to be fit retroactively with devices which would ensure independence and privacy to persons with disabilities was then introduced by Mr. Dickson. He stated that only a limited number of vendors are addressing this issue.

The next major issue addressed in the meeting was VVPAT. The Advocates pointed out that current VVPAT does not insure security. They also stated that VVPAT hinders machines from being fully accessible especially if they use the VVPAT as the official ballot, as some states have deemed they should for recounts (Commissioner Martinez added the point that no state has made VVPAT the official ballot).

Another issue that was brought up was section 2.2.7. A “shall” is used for visually impaired, but a “should” is used for mobility impaired. They viewed this as potentially divisive within their community. Members of the EAC, including Commissioner Martinez, Mr. Wilkey, and Carol Paquette, responded by saying that the
lack of an independent source is a problem, and that there are other technologies out there that are a better substitute to VVPAT.

Commissioner Martinez concluded the meeting by encouraging them to submit their comments to the EAC, and that those comments should be submitted in writing. He followed by saying that he hopes this will be an ongoing dialogue between the EAC and the disabled community.

In short, the Advocates are mainly concerned with maintaining a unified community – one that advocates for all who are disabled, regardless of their disability. They are concerned that these new voting machines, specifically the VVPAT, will grant access, independence, and privacy to only those who are visually or hearing impaired and that those with mobility or dexterity disabilities will not be guaranteed the same right to access, independence and privacy.

The meeting ended on good terms and it seemed that Commissioner Martinez's comments about the VVSG being a changing document and him encouraging this conversation to be ongoing between the EAC and the disabled community put the Advocates a little at ease. They feared that following the 90 day comment period, some changes would be made to the VVSG, and then the document would be put on a shelf to "collect dust". Commissioner Martinez, Mr. Wilkey, Carol Paquette, and Gavin Gilmour encouraged them to believe otherwise.
Adam:

Can you do a little background research on Mr. Becker's company so that I can be informed before I decide to meet with him? He was referred by Conny McCormack, so I will meet with him, but I just want to know what his company specializes in.

Thanks.

Thanks for the email...sorry it's taken me some time to respond. I've been on a short trip with my family to Sesame Street Place as we made our way from Arlington, VA to New York City for our public hearing. I've seen enough Big Bird and Elmo to last me quite a while!

Our public hearing went well today. We received very good testimony from all of our panelists. Needless to say, we have much work to do over the next 90 days, but I look forward to receiving much input.

Thanks for the email introduction to David -- I would welcome a phone call so that we can make arrangements to speak or get together at some time. My direct line is 202-566-3104 (I won't be back in the office until next Tuesday, July 5th).

Stay in touch and as always, please feel free to call me anytime.

Dear Adam,

Here by I respectfully request Commissioner Martinez for a fifteen minutes meeting, before the EAC release the VVSG.

Please let me know when that can be possible.

Fernando Morales
The best time for the Chair is after the June 16 NASS conference call.
Adam,

I just wanted to confirm the meeting we have planned for Tuesday at 2 pm at your offices at 1225 New York Ave NW. There will be three of us and we will be meeting with you, Commissioner Martinez and possibly other commissioners and staff.

Let me know if there have been any changes in plans.

Ric

Richard Grefé

www.aiga.org
Adam,

I wanted to touch base to finalize the arrangements for our meeting on Monday, May 16 regarding the database guidance. Specifically, we need to clarify the time and location of the meeting. (I believe that you said that you preferred 12:30 pm.) I would also like to confirm that I am responsible for the meeting agenda. Finally, I have consulted with other advocates and have a near-final list of those who would like to attend. Please let me know if you would like a copy of that list in advance. Thanks, and I look forward to meeting you in person.

Best,

Wendy

Wendy R. Weiser

(212) 995-4550 (fax)
wendy.weiser@nyu.edu
Adam:

I just wanted to confirm for you the names of the three Design for Democracy board members who will attend next Tuesday’s meeting at your headquarters. They are:

1. Ric Grefe, chair of the Design for Democracy Board, and executive director of the American Institute for Graphic Arts. The AIGA was the organization that started Design for Democracy.

2. Marcia Lausen, director of the School of Design at the University of Illinois at Chicago, and owner of studiolab, a design firm with offices in Chicago and San Francisco. As an instructor in the School of Design she directed the very impressive projects that redesigned processes and materials for Cook County polling place elections and Oregon's vote-by-mail elections.

3. Whitney Quesenbery, who represents the Usability Professionals' Association on the board. She brings an expertise in usability to the organization and you may already know her because she is a member of the TGDC.

I wish I could be there because I believe so strongly in the fine work these folks have done in the past few years. I believe there is a great potential for this group to work with the EAC on very positive projects. But I think if I had to travel all the way to the east coast again this soon my bosses, and my wife, would disown me!

Cheers-
jlindback

John Lindback, Director
Elections Division
Oregon Secretary of State's Office
Commissioners,

The NASS Executive Board would like to continue to have open communication with you and have suggested a conference call meeting for next month. Specifically, they are looking at the afternoon of June 14 or 16.

Adam, please let me know what the Commissioners' schedules look like for either one of those days. The call should not last more than an hour.

Thank you,
Sheila
Dear Adam,

I am writing to follow up on our conversation of yesterday. I would like to know when Commissioner Martinez (and/or the other Commissioners) might be available for a smaller and/or a larger meeting to discuss statewide voter registration databases and the EAC's Guidance. I would be happy to facilitate the participation of other groups as well. Thank you, and I look forward to hearing from you.

Best,

Wendy R. Weiser
Associate Counsel, Democracy Program
Brennan Center for Justice at NYU School of Law

Folks -

It looks like the most viable date for June is the 13th-14th. So let's move ahead with preparation for that date.

Herb, I think we need to talk about the objectives and agenda. Don't think we need to meet in person; a phone call will do. I have a meeting this morning at 10. Could we shoot for maybe 11 or sometime between 2 and 3 this afternoon? Thanks!

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125  cpaquette@eac.gov
Commissioner et al. -

A decision has been made to re-schedule the second VRDB/NAS meeting from May 16-17 to one of the following dates: June 2-3, June 9-10, June 13-14, June 29-30.

NAS needs a decision from EAC in the next day or two so they can reserve the meeting space.

EAC needs to firm up the objectives and agenda for this meeting, as well as to identify potential attendees.

Adam - Can you identify a 15 minute window for the Commissioner, Julie, you and me to discuss this in the next two days? Thanks!

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
I have confirmed this meeting with Secretary McPherson.

Subject: Meeting With California Secretary of State Bruce McPherson

Commissioners,

Secretary Bruce McPherson has requested to meet with you at the May 5 Commissioners Discussion at 10:00 a.m. He wants to deliver the California Certificate of Compliance in person. In addition, he wants to discuss how California can be a positive participant with the EAC as the state continues its implementation of HAVA. Others attending this meeting include Assistant Secretary of State Brad Clark and Los Angeles County Registrar-Recorder Conny McCormack.

Brad will provide more details.

Thanks,
Sheila
Commissioners,

Secretary Bruce McPherson has requested to meet with you at the May 5 Commissioners Discussion at 10:00 a.m. He wants to deliver the California Certificate of Compliance in person. In addition, he wants to discuss how California can be a positive participant with the EAC as the state continues its implementation of HAVA. Others attending this meeting include Assistant Secretary of State Brad Clark and Los Angeles County Registrar-Recorder Conny McCormack.

Brad will provide more details.

Sheila
Commissioners,

I'm trying to coordinate a meeting for you with Dr. Pastor. His availability has changed for next week and his assistant and I are trying complete this task while Commissioner Soaries is in town.

Dr. Pastor is scheduled to testify on the Hill on Wednesday, April 6, at 2:00 p.m. Would you be open to having a lunch meeting with him at a place nearby around 12:00 (noon)? His assistant is also checking with him.

Thanks,
Sheila
Commissioners -

Susan Zevin contacted me several weeks ago to set up a meeting between the Commissioners and Paul Kurtz, the Executive Director of the Cyber Security Industry Alliance (CSIA). CSIA is an industry advocacy group that has been formed to promote improvement of cyber security through public policy, education and technology-focused initiatives. Their membership is comprised of major cyber security software providers such as Symantec, Entrust, McAfee, Check Point (they’ve been getting some unfavorable press lately), and others. They are “interested in assisting the Commission in the evolution of new approaches to voting systems.” Susan was rather vague about what this means. I suggested that it might be useful for this group to review and comment on the TGDC/NIST work on the NIST website. Susan indicated they are interested in “higher level, big picture policy matters.” Whatever these matters are, she indicated that they can only be discussed directly with the Commissioners, not with some intermediary.

Checked out this group with some colleagues in the security business. The feedback I received was that they’re relatively new on the scene, only one of several similar industry advocacy groups, and that they’re looking for an issue to make their mark on. (There might have been some professional rivalry seeping through in these comments.) Mr. Kurtz has pretty impressive credentials, having been National Security Council senior director of the Office of Cyberspace Security and a member of the President’s Critical Infrastructure Protection Board (prior to 2003).

Is there interest in a meeting by all or some of you?

Carol A. Paquette

Adam,

Like Dan, I would be delighted to meet with Commissioner Martinez and am pleased that he has found our website helpful.

Would it be possible to meet on Monday at 5:30, perhaps at the Hotel George on Capitol Hill? I will be heading to the airport at 6:15pm to catch a flight back to Columbus, but that would give us a little time for the kind of informal meeting you describe, at which we can start a conversation that can be pursued subsequently. I believe Dan might be able to join us at this time as well.

Thanks very much,

Ned Foley

Thanks for writing. I'm very pleased to hear that Commissioner Martinez has found our website useful. I will in indeed be in DC early next week. While it looks like the conference will take up most of the day and I've made plans for the evening, I'm not going to be returning to Columbus until Tuesday afternoon -- I'd originally planned on attending another event in DC that day, but it's been cancelled. Would Commissioner Martinez have any time to meet on Tuesday morning or early afternoon? (I'm just speaking for myself and am not sure what Ned's schedule looks like.)

I think we will be scrambling tomorrow morning to get things ready for the meeting, so I don't think 9:00AM is a good time. This organization is a credible and important group, and one that I hope we can get involved in this program. Rather than meeting tomorrow before the meeting, why don't I call her today and explain where we are with the program, and to further explain that all we are doing tomorrow is adopting a framework within which whoever directs this program will be able to operate. We are not disbursing grant money to any entity tomorrow and in fact, we are very interested in proposals for funding right now. If she comes to the meeting, perhaps we can meet with her afterwards.

Is this approach acceptable to everyone?

I received a call from Sarah Ball Johnson, from Kentucky. Their Secretary of State, Trey Grayson will be in DC next week on the 15th and 16th— and is available to meet with Commissioners on the 15th from 10-11:30, and on the 16th from 330-6 PM. He would just like a 'meet and greet' and a tour of our offices.

Please let me know if any or all of these times are better for the Commissioners to meet with Sec. Grayson, and I will make the appointment with his office.

Thanks,
Adam

Commissioners:

As a follow-up to my email of last week, I have been in touch with Tracy Warren, who had asked to speak with both of you regarding the efforts that she and Jennifer Collins-Foley are proposing through the "Pollworker Institute." In addition to the prospectus for the P.I. provided you both, they have also indicated their interest in discussing the future of the College Pollworker Program, in light of their schedule for this year's Pollworker Institute initiatives. Tracy (and Jennifer, if she's back from Albania) are available to meet on Monday, June 6th at 2 PM. Please let me know whether that time is available for you, and whether you desire any additional staff present at this meeting. I will work out the remaining details.

Thanks,
Adam

Ann called and apologized for not calling you back two weeks ago... She then confirmed the times that we would be in town on Monday. She checked the SOS's schedule, and there some time for you to meet with him at Monday at 3:30 PM. I told her that it sounded good, but told her I'd call to finalize. Let me know if you see any problems with that time frame.
Lloyd Leonard and his staffer Jeanette Senecal will meet with us (or you, depending on your preference) at 2 PM on Monday, at the EAC. I've reserved the small conference room for us. He says he intends to set up meetings with each of the four commissioners separately, (but, he added in a unique tone) he's coming to you first.

Commissioners:

I just spoke with Melinda Glazer at NASED. They would like to invite you to address their membership at their annual winter meeting in DC (a formal letter of invitation has been mailed to each of you). Please check on your availability for Friday, February 4, 2005. The timeslot they have available runs from 1:30-3:45 PM. They wanted to give you the opportunity to speak on a weekday, but Saturday (Feb. 5) would also work if Friday will not.

The following is a list of topics that NASED would like for you to address, in addition to any additional EAC-related topics:

* ITA issues—when EAC will take over, how, etc.
* Provisional ballots—what our study will entail, timeframe for conducting the study, etc.
* Full funding for HAVA requirements payments—a suggested strategy for working with the state offices to get full funding
* Guidance to address changes to state plans—what constitutes a "material change" and other legal issues

The staff will work with you to prepare an agenda, etc. For now, please let me know ASAP if the Feb. 4 date and timeframe works for you.

In addition, I just received a fax invite to the NASS winter conference. I will distribute a copy to each of you. It will contain more details, but please mark your calendars for our EAC presentation on Monday, Feb. 7, from 9:00 AM-12:00 PM. You are also invited to stay for a lunch that follows immediately afterwards.

Best,
Kay
3 PM tomorrow. EAC office.
She sounded interested. She also said "I just got back from vacation and received a phone message from Vice-Chair Hillman... I wonder if it is regarding the same issue?" I told her that I did not know.
Sure. Tomorrow afternoon either at 1 or 1:30PM will work, but I have to be at DOJ for a meeting by 2:45PM. Let me know if something in that timeframe works for you guys. Can we do the meeting here in my office (address below)?

Thanks.

Jennifer:

I'm sure we can work something out...things are pretty fluid for next week, but hopefully Tuesday would work. I'm not sure about the other commissioners, but I can sit down with Jim sometime that Tuesday, though it would probably work best to do something here at the office, since I'm swamped right now trying to get ready for the hearing, the roll-out of our requirements payments to states (beginning May 10th) and our budget hearing in front of our appropriating sub-committee (which happens on May 12). Needless to say, the first two weeks of May will be a very trying time for the new EAC!

Anyway, I'll definitely make time for your client, and I'll mention it to the other commissioners when I see them later today. Also, I tried calling you back several times yesterday, but could not get through on the number that was given to me (422-6422). Perhaps we got the number down incorrectly...sorry about that.

I'll let you know when on Tuesday works best for me....I'll be back in touch later this afternoon.

Thanks.

Ray-
I saw that someone called my phone but did not leave a message for me, so I used the call log to call back (because it was a San Antonio number). It was Mr. Cisneros' organization, and I spoke with Sylvia there, who wanted to see if she could move your meeting back from 330 to either 130 or 230 tomorrow. (Mr. Cisneros wants to try to see his son fly- he's taking flying lessons tomorrow afternoon). Please let me know, or call back Sylvia at [redacted]. I introduced myself to her, and mentioned that it was good to have Jacob up here, and that he spoke kindly of them-- FYI.

Professor Edward Foley
Mortiz College of Law
Ohio State University
Columbus, OH,

Dear Professor Foley:

It was good to meet you yesterday at the Law and Democracy Symposium sponsored by the George Washington University School of Law. I commend you for your efforts to provide information and analysis on election law issues, and enjoyed our discussion regarding the state of election law. I will certainly keep your advice in mind.

While the election of 2004 has passed, I firmly believe that the Election Assistance Commission has its most challenging work ahead. The development of voting system standards, as well as voluntary guidelines for the states on HAVA compliance present a particular opportunity to improve the way election administration is handled. In these months ahead, I would welcome your thoughts on these issues, as we continue the reforms focused on the people, process and technology of election reform.

Please feel free to contact me at any time; my office number is 202-566-3105.

Regards,

Ray Martinez
Commissioner
Good Morning to all!

I am attaching a Logistics Fact Sheet for your reference regarding the August 1, 2005, Hispanic Working Group meeting. If you have any questions, please, do not hesitate to contact me at your earliest convenience at the information listed below. I look forward to meeting all of you in person. Have a great week!

Hispanic Working Group

Logistics Fact Sheet

Date: Monday, August 1, 2005
Time: 1:00PM – 4:00PM
Location: U.S. Election Assistance Commission –1201 Conference Room
1201 New York Ave, NW, 1st Floor
Washington, DC 20005
(202) 566-3100

Transportation: via Metro – take blue, orange, or red line to Metro Center; walk up to New York Ave (2 blocks from Metro – corner of New York Ave and 12th St.)

Bus service at Metro Center:
11Y (on 14th St.)
42 (on 11th St.)
52, 53, 54 (on 14th St.; also 54 on F St. between 11th & 14th)
66, 68 (on 11th St.)
80 (on H St.)
D1, D3, D6 (on 13th St.)
G8 (on 11th St. north of H, on H St. west of 11th)
P17, P19 (inbound on 11th St.; outbound on 13th St.)
P6 (on 11th St.)
S2, S4 (on 11th St.)
W13 (inbound on 11th St.; outbound on 13th St.)
X2 (on H St.)

From Reagan National Airport:
- take blue line Metro towards Largo Town Center; exit at Metro Center station
- taxi services available (fare will be approximately $15-$20)

Parking:
Parking garage available behind building on I Street, NW.

Contact: For travel arrangements or information, contact Laiza N. Otero at (202) 566-3126 or via e-mail at lotero@eac.gov.
Subject: EAC Hispanic Working Group Meeting — August 1, 2005

I would like to take this opportunity to thank you for agreeing to participate in the Hispanic Working Group meeting on August 1, 2005 being organized by the U.S. Election Assistance Commission (EAC). The overall purpose of this meeting is to strengthen the EAC’s understanding of the needs of the Hispanic community with regard to implementation of the Help America Vote Act of 2002, as well as the EAC’s role in administering the National Voter Registration Act of 1993. We hope to provide an open dialogue for all meeting participants to candidly assess and recommend to the EAC various steps needed to ensure registration and voting accessibility for Hispanic voters.

Attached to this email, you will find several documents that will be discussed at the meeting, including the NVRA mail-in voter registration form (in English and Spanish) and a recently-updated glossary of election terminology. Specifically, we would like to solicit your feedback on the usability and readability of these documents. (Please note that the Spanish translation of the NVRA form was done in 2003 and the EAC is in the process of revising this document to reflect the updated English version that will soon be available.) In addition to these documents, we have also attached a copy of the proposed agenda and a link to a recently-issued report on the National Voter Registration Act commissioned by the EAC. Both the Help America Vote Act and the National Voter Registration Act can be viewed and downloaded via the EAC website as www.eac.gov. We encourage you to take a look at our website, as we may also want to discuss during our meeting how the EAC can best utilize the Internet to reach and better serve the Hispanic community.

Once again, thanks in advance for your commitment to this important effort, and for your willingness to participate. I believe that this meeting is a critical step in ensuring that the EAC is responsive to all constituencies as we strive to continually improve the way we conduct elections for Federal office. I look forward to seeing you all on August 1st. If you have any questions or need additional information prior to the meeting, please feel free to call me or Laiza Otero here at the EAC. We can be reached at (202) 566-3100.

Best regards,

Ray Martinez III
Commissioner

Dear Commissioner Martinez:

The dates for the May "technology" meeting are confirmed for May 16-17, 2005. We will start at 9:00 with a continental breakfast and go until 8:00 PM on day one, with a "networking dinner." On day two we are planning to start at 9:00 AM and will end at 2:00 PM. Dr. Lin has identified 8-12 technology experts to work with the group. The agenda is still under development, but it is suggested that we focus on five major topic areas:

* Databases
* Security/Privacy Issues
* Networking and Communication Systems between state and localities
* Software Development/IT Contracting
* Training Issues

We have been working with Karen and Dr. Lin at NAS to think through the agenda for the May "technology" meeting, but feel that it is critical that EAC send out the "invites" to attendees by week's end. The major question is "whom to invite."

* Of course, we what the technology chiefs in the state election systems, but what states to invite is of issue. There has been some discussion that the "Working Group" be invited with their chief technology person.

* However, it might be worth considering inviting different states based on the status of their statewide voter registration database system, i.e. those that have statewide data bases, those that have already selected a vendor, and those with pending systems contracts.

Deciding on the best "invited" states to the table is of critical importance and must be resolved so that we can get notice out to the participants.

To resolve this issue, Karen, Herb and I were hoping to get a few moments on your calendar for a phone call on Friday morning.

I am also attaching a draft invite letter for your consideration and review. Thank you.

Memorandum

TO: 
FROM: COMMISSIONER RAY MARTINEZ
SUBJECT: CREATION OF STATEWIDE VOTER REGISTRATION LIST TECHNOLOGY WORKING GROUP
DATE: APRIL 22, 2005

The Help America Vote Act of 2002 ("HAVA") requires that each State implement a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained and administered at the State level. Moreover, the EAC is required by HAVA to adopt voluntary guidance to assist States in meeting this important requirement.

Accordingly, to assist the EAC in developing voluntary guidance, the EAC has established a Voter Registration List Implementation Working Group, which is comprised exclusively of state and local election officials drawn primarily from the current membership of the EAC's Board of Advisors and Standards Board, in addition to representation from the Department of Justice. Our first meeting took place on March 30-31, 2005 in Washington, D.C. Based on this initial meeting EAC staff produced draft voluntary guidance which, after an appropriate public comment and hearing process, will be considered for final adoption by the EAC.

EAC is now ready to launch the second step of this effort. The EAC, in conjunction with the National Academy of Sciences ("NAS"), is bringing together state election officials, their chief technology officers in charge of election databases, and national technology database experts in order to discuss key technology issues related to the implementation and on-going use of statewide voter registration lists. You are most welcome to attend this session, but it is critical that your chief technology officer attend. All travel and per diem expenses will be covered by EAC. This meeting is scheduled for May 16-17, 2005 in Washington, D.C. at the National Academy of Sciences. Please forward the names and contact information of your representative no later than Friday, May 6, 2005 to Karen Lynn-Dyson. Ms. Dyson can be reached via email at klynndyson@eac.gov and telephone at (202) 566-3100.

Thank you.

1 Help America Vote Act, Pub.L. 107-252, Title 11, § 303(a), 116 Stat. 1708 (codified at 42 U.S.C. § 15483 et seq.). An informal survey conducted by EAC staff last month found that States are in various stages of meeting this HAVA requirement.

3 EAC will implement a process for adoption of any final guidance which is in accordance with the public notice, comment and hearing provisions contained in HAVA, as well as a review period for the EAC's Board of Advisors and Standards Board.

"Summary of Meeting with Advocates for the Disabled..."

previously provided
Attached is the draft letter that will be sent to the executive leadership of various nonprofit organizations inviting them to meet with us on Monday, January 24.

Please feel free to email back to me any comments and edits to the letter. My plan is to begin sending out the letters tomorrow (Tuesday).

Via this email, I am asking Julie to make certain I have extended the appropriate invitation for this closed door meeting.

It is also my plan to have a copy of the invitation list for you at tomorrow (Tuesday) morning’s Discussion Session.
January 11, 2005

Dear

The U.S. Election Assistance (EAC) Commissioners request your presence at a meeting to be held on Monday, January 24, 2005. The meeting will begin at 1:30 p.m., is expected to last about 90 minutes, and will be held at our offices at 1225 New York Avenue, NW, Suite 1100, Washington, DC 20005.

As you know, the Help America Vote Act of 2002 (HAVA) established EAC to make certain that the law is fully and effectively implemented. The work of your organization brings value to this process. We also feel it is extremely important to have a direct relationship with the executive leadership of the nonprofit organizations that are committed to ensuring that American voters have confidence in the integrity and fairness of our elections. We did not have the opportunity to have such a meeting in 2004 and want to make certain that we do so early in 2005, before we begin our aggressive schedule of public meetings and hearings.

While we want an opportunity to personally share with you the broad based components of our 2005 work plan, it is our desire to have a broader discussion of how America is faring under HAVA. You have been invited as the head of your organization because it is important that we hear directly from you. Your perspectives inform and bring value to our work as EAC Commissioners. Recognizing that we all rely heavily on expertise within our organizations, you are welcome to bring a member of your staff with you but we also want to emphasize that it is your input that we seek.

I hope you will join us on January 24 and look forward to seeing you then. Please confirm your attendance with my office at 202-566-3111. We will also need to know the name of any one who will accompany you to the meeting. My assistant, Sheila Banks, will provide any additional information you might need.

Best wishes for a wonderful, peaceful and successful New Year.

Sincerely,

Gracia Hillman
Chair
Hi Adam: Attached is the draft agenda for Seattle. Will Commissioner Martinez need a hotel room for either the night of the 16th or 17th or both? Let me know so we can reserve one for him. My assistant Trina Caudle will make sure he has a badge for the meeting, and of course, he is welcome to attend any of our functions while he is with us in Seattle. Here is a link to the general meeting page:

http://www.ncsl.org/annualmeeting/

Please don’t hesitate to contact me or Trina (202) 624-8695 if you have any questions. Thanks.

Susan

Seattle draft agenda v1.doc
2004-2005 COMMITTEE OFFICERS

Co-Chair: Representative Tommy Reynolds, Mississippi
Co-Chair: Representative Dennis Ross, Florida
Vice-Chair: Senator Jeanmarie Devolites, Virginia
Vice-Chair: Representative Thad McClammy, Alabama
Staff Co-Chair: Mary Galligan, Kansas
Staff Co-Chair: Steve Miller, Wisconsin
Staff Vice-Chair: Karl Aro, Maryland
Staff Vice-Chair: John Bjornson, North Dakota

PRELIMINARY AGENDA

TUESDAY, AUGUST 16, 2005

8:30 am – 5:00 pm  Registration Open

5:00 pm - 10:00 pm  Welcome Reception: Seattle Sports Scene!

Qwest Field and Event Center and Mariners' Game at Safeco Field

Seattle boasts two of the finest new stadiums, Qwest Field and Safeco Field. Qwest Field -- home of the Seahawks -- is set against a backdrop of Puget Sound and snowy mountains. While you're waiting for the Mariners to take on the Kansas City Royals at Safeco Field (across the street from Qwest Field) you can enjoy interactive football games, larger-than-life football inflatables and the best slide burgers, foot-long hotdogs and fries in Seattle. Then, there's reserved seating for NCSL delegates and guests at the Mariners' game! Truly an evening to remember!
Wednesday, August 17, 2005

8:30 am – 5:00 pm  Registration Open

7:30 am - 9:00 am  Continental Breakfast for All Delegates

8:30 am - 10:00 am  Opening Plenary Session

Presiding: Delegate John Hurson, Maryland, President, NCSL

Keynote Speaker: Bill Gates

Bill Gates is Chairman and Chief Software Architect, Microsoft Corporation, Seattle. Gates started the world's leading software company in 1975. His vision and leadership have changed the way the world uses computers. The Bill and Melinda Gates Foundation, with an endowment of $27 billion, is dedicated to global health and learning.

10:15 am – noon  Efforts to Regulate Campaign Activity by “527s”

In the 2004 election season, several so-called 527 organizations played prominent roles in both state and federal campaigns. Will federal efforts to reign in 527s impact state elections? Will legislative candidates and caucus campaign committees be covered by any federal reforms?

12:00 pm - 1:00 pm  Lunch for All Meeting Participants

Enjoy lunch and visit the exhibit hall! It features hundreds of exhibitors: businesses; public interest groups and associations; federal, state and local government agencies; trade associations; political groups; and consulting firms. Information and entertainment for all!

1:15 pm – 3:00 pm  Innovative Approaches to Running Elections

For nearly five years, states have worked diligently to reform the elections process. What are the most substantial changes and what top innovations should states look to replicate to improve the elections process?

Ray Martinez, Commissioner, Election Assistance Commission

Tova Wang, Century Foundation

Rebecca Vigil-Giron, Secretary of State, New Mexico

Miles Rappaport, Demos, New York

3:00 pm – 4:15 pm  The Expanding Field of Election Law
Elections have become increasingly litigious. What can states do to be prepared for court challenges in future elections? Will a judge decide your next race?

Dan Lowenstein, UCLA, California

Bill Gilkeson, North Carolina

Doug Chapin, electionline.org

4:15 pm – 5:00pm Business Meeting

The Committee will consider important issue positions for NCSL’s full membership to adopt as official policy. We will also discuss any potential Committee topics for the December meeting in Chicago, Illinois.

Presiding:
Committee Officers

THURSDAY, AUGUST 18, 2005

7:30 am - 8:30 am Coffee Service for All Delegates

8:00 am – 5:00 pm Registration Open

8:00 am – 9:00 am The 2010 Census – What States should be doing Now to Prepare

The Census Bureau is updating the geo-spatial files for your state and linking it to their Master Address File, the list of addresses used during the Census. This may have a profound effect on the redistricting data files. And a report on data products planned for 2006 for state legislative districts that will give you extensive new information about what your district look like demographically.

Cathy McCully, Chief, Census Redistricting Data Office, U.S. Census Bureau, Washington, D.C.

Linda Franz, Geographer, U.S. Census Bureau, Washington, D.C.

Bob LaMacchia, Chief, Geography Division, U.S. Census Bureau, Washington, D.C.

Deirdre Bishop, Census Redistricting Data Office, U.S. Census Bureau, Washington, D.C.

9:00 am – 10:15 am The Voting Rights Act and Redistricting
The Voting Rights Act, perhaps more than any other federal law, plays a major role in redistricting. Will the Act be changed or amended in the next couple of years? How much difference did it make in this round of redistricting compared to the 1990s?

10:30 am – 11:45 am

Redistricting by Commission – Pros and Cons

Voters in several states may soon be considering redistricting reform measures designed to strip the power of redistricting from legislatures. Do commissions produce more competitive district plans? Are they truly independent?

11:45 am - 1:15 pm

Legislators' Luncheon

Presiding: Senator Leticia Van de Putte, Texas, Vice President, NCSL

Biomedical Research and Economic Development

World-renowned researcher Leroy Hood and Nobel Laureate Lee Hartwell will share the latest trends in biomedical research and the impact this cutting-edge field can have on economic development.

Speakers:

Lee Hartwell, President, Fred Hutchinson Cancer Research Center, University of Washington, Seattle, Washington

Leroy Hood, M.D., President, Institute for Systems Biology, Seattle, Washington

1:30 pm - 3:15 pm

Changing Demographics: What Lies in Store for States?

Demographic forecasting is essential for making informed decisions on issues ranging from school enrollments to public employees' retiree benefits. Hear current thinking on the trends and their meaning for state policy. What do demographic trends tell us about 2011 redistricting?

Speaker:

William Frey, Research Professor, University of Michigan

3:30 pm - 5:00 pm

Concurrent Sessions

- **LEGISLATOR TRAINING TRACK**– The Art of Public Debate
- Achieving Access to Prescription Drugs: Changing Roles for the States
- Cameras in the Capitol: The Legislative Perspective on Live TV Coverage
- Can Governments Break Their Addiction to Discriminatory Taxes?
6:30 pm - 9:30 pm  A Taste of Washington Extravaganza

Seattle Center: Pacific Science Center, Experience Music Project and the Space Needle

Discover the diversity of our magical city as we bring our most famous sites to you. At the Pacific Science Center you can delight in a tropical stroll with hundreds of butterflies, re-ignite your imagination with interactive exhibits or simply sit back, relax and dine with the dinosaurs. Experience the power and joy of music, in all its forms, at EMP, a one-of-a-kind museum. You can explore the amazing collection of popular music artifacts, create your own music, or get a taste of rock stardom. And, we have reserved the Space Needle's Observation Level just for you. Enjoy sweeping views of Puget Sound, Mount Rainer, the Cascade and Olympic mountain ranges, Lake Washington and, of course, Seattle.* You will enjoy the smooth sounds of Seattle's famous jazz, mingle with the entertaining street performers, and stroll the famous Pike Place Market vendor stalls. Come, bring your family, and enjoy some of the best delicacies the Northwest has to offer.

*A Access to the Space Needle Observation Deck is limited to the first 2,000 people.

Friday, August 19, 2005

8:00 am - 9:00 am  Coffee Service for All Delegates

8:30 am - 10:00 am  Plenary Session

Speaker: Uwe Reinhardt, James Madison Professor of Political Economy, Princeton University, Princeton, New Jersey

10:15 am - noon  NCSL Annual Business Meeting
History is filled with examples of elections decided by a handful of votes, sometimes by one vote. In 2004, several races, including the Washington governor’s race, were decided by a fraction of a percentage point. How can states be sure statutes are adequate when the lightning bolt of a one-vote race strikes?

Saturday, August 20, 2005

8:00 am - 9:00 am  Coffee Service for All Delegates
8:30 am - 10:00 am  Plenary Session
10:15 am - 12:00 pm  Nashville is Only Twelve Months Away!

Greetings,

I just wanted to remind you that this Monday, August 1, 2005, we will be the Hispanic Working Group meeting from 1pm to 4pm, here at the EAC. If you plan on attending, please, let me know so I can have a count in terms of seating. If you have any questions or would like more information, please, feel free to contact me at your earliest convenience. I am attaching the agenda for the meeting and below I have listed the groups that will be represented at the meeting. Thank you!

Participants:

- California - L.A. County
- Congressional Hispanic Caucus Institute
- Congressional Hispanic Leadership Institute
- Institute for Puerto Rican Policy
- Rep. Charles Gonzalez's Office
- IFES
- LULAC
- Sen. Mel Martinez's Office
- MALDEF
- National Association of Latino Elected Officials
- NCLR
- U.S. Hispanic Leadership Institute
- VotoLatino
- William C. Velazquez Institute

Hispanic Working Group Agenda.doc

Laiza N. Otero
U.S. Election Assistance Commission
1225 New York Avenue, Suite 1100
Washington, DC 20005
(202)566-3126
This half-day meeting will provide guidance to the EAC as it potentially focuses on research under Section 311 and 312 of HAVA, as well as research under Section 241 and NVRA responsibilities under Section 802. The working group will review two works currently in progress, the readability and usability of the National Mail-In Registration form and the review of the updated List of Translated Election Terms. The working group will assist the EAC in the identification of "Best Practices" relating to methods of effective administration of Federal elections impacting the Hispanic and Spanish-speaking communities.

Monday, August 1, 2005 (Conference Room)

1:00PM – Welcome –Vice-Chair Paul DeGregorio, and Tom Wilkey, Executive Director
1:15PM – EAC background information – Julie Thompson, General Counsel
1:30PM – EAC research activities and meeting objectives – Laiza N. Otero, Research Associate
1:45PM – Introductions by working group members
2:00PM – Discussion – led by Commissioner Ray Martinez
   • Discussion of election administration issues that affect Hispanic and Spanish-speaking voters; recommendations for studies and activities
   • Identification of Best Practices relating to methods of effective administration of Federal elections impacting Hispanic and Spanish-speaking voters
   • Readability and usability of the National Mail-In Registration form
   • Review of the List of Translated Election Terms
4:00PM – Adjourn meeting
Working Group – Topics for Discussion

I. HAVA Section 241 – Studies and other activities to promote effective administration of Federal elections
   • This section allows the Commission to carry out studies and other activities with the goal of promoting effective administration of Federal elections. Effective administration methods are to be the most convenient, accessible, and easy to use for voters, including voters with limited proficiency in the English language [§241(a)(1)]. Two of the election administration issues described for study in §241(b), directly refer to voters with limited proficiency in the English language [§241(b)(5) and (b)(14). The former describes “methods of ensuring the accessibility of voting, registration, polling places, and voting equipment to all voters” including voters with limited proficiency in the English language. The second issue described is the “technical feasibility of providing voting materials in eight or more languages for voters who speak those languages and who have limited English proficiency.”
   • Question 1: What methods do you consider effective in ensuring the accessibility of voting, registration, polling places, and voting equipment to Hispanic and Spanish-speaking voters? Discuss accessibility for minority language speakers for each component.
   • Question 2: What resources are there currently to assist Hispanic and Spanish-speaking voters? How do you rate their level of accessibility?
   • Question 3: What materials have proven to be the most effective in your communities in assisting Hispanic and Spanish-speaking voters? Discuss what would constitute “Best Practices” in each of the areas mentioned before.
   • Question 4: What recommendations do you have for research purposes relating to these topics in §241?

II. HAVA Section 302(a) – Provisional voting
   • If the name of an individual does not appear on the official list of eligible voters at the polling place where he declares to be a registered voter or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot. The section further describes the process by which a voter may cast a provisional ballot.
   • Question 1: What particular concerns do Hispanic and Spanish-speaking voters have in regards to provisional ballots? Some areas to discuss may be provisional voting process, ballot counting, and accessibility of information regarding how the vote was counted.
   • Question 2: What type of assistance would be most effective in providing guidance for these voters regarding provisional voting? Identify “Best Practices.”
   • Question 3: What recommendations do you have for research purposes relating to provisional voting?

III. HAVA Section 302(b) – Voting information requirements
   • Per this section, the following voting information has to be publicly posted at each polling place on the day of each election for Federal office: a sample version of the ballot that will be used for that election; information regarding the date of the election and the hours during which polling places will be open; instructions on how to vote, including how to cast a vote and how to cast a provisional ballot; instructions for mail-in registrants and first-time voters under section 303(b); general information on voting rights under applicable Federal and State laws, including information on the right of a person to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and general information on Federal and State laws regarding prohibitions on act of fraud and misrepresentation.
   • Question 1: How many States and/or jurisdictions voluntarily provide all or some of the above voting requirements in Spanish? How accessible are they to Spanish-speaking voters?
   • Question 2: For jurisdictions covered under section 203 and/or section 4 of the VRA, how effectively are the required voting information materials translated and how available are they to voters? What resources do these jurisdictions utilize to ensure the cultural and linguistic appropriateness of the translated materials?
   • Question 3: What materials have proven to be the most effective in your communities? Identify “Best Practices.”

2
Question 4: What recommendations do you have for research purposes relating to voting information requirements per §302(b)?

IV. HAVA Section 303(b) – Requirements for voters who register by mail

- If an individual registers to vote by mail and has not previously voted in an election for Federal office, or the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of §303(a) the voter will have to submit a copy of an accepted form of identification along with their registration or present the identification in person at the polls on the day of elections. If the person does not have an accepted form of identification when he or she goes to vote at the polls, the individual may cast a provisional ballot. If the person is voting by mail and did not submit identification upon registration the ballot shall be counted as a provisional ballot in accordance with §302(a). Section 303(b) lists the following as forms of identification: current and valid photo identification, current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. However, the requirements shall not apply if a voter submits with their registration either a driver's license number or at least the last 4 digits of their social security number and the local election official matches the information with an existing State identification record bearing the same number, name and date of birth as provided in such registration.

- Question 1: How have States expanded the above requirements to require voter identification of all voters when they go to cast a vote in person?
- Question 2: How have voter identification requirements impacted Hispanic and Spanish-speaking voters?
- Question 3: What type of assistance would be most effective in providing guidance for these voters regarding voter identification requirements? – Identify “Best Practices.”
- Question 4: What recommendations do you have for research purposes relating to voter identification requirements?

V. The National Voter Registration Act (NVRA) was passed by Congress in 1993. It was intended to provide more opportunities for all qualified Americans to register to vote in a manner and method convenient to them. Specifically, NVRA creates a single mail-in form that all states must accept; it places requirements for how state deal with registrations for elections; and it calls on designated state agencies, such as motor vehicle agencies, social welfare and handicapped outreach agencies, as well as military recruitment offices to register qualified individuals to vote.

- Translation of Federal Mail-in Form. The Federal Form created by NVRA needs to be provided in English and Spanish. The Federal Elections Commission, as well as the EAC hired translators to adapt the approved English form to Spanish. Complaints have emerged that a literal translation of the English form is not appropriate for readability and usability purposes. In addition to the form itself, the individual state instructions need to be vetted for the same concerns, usability, understanding of election terms in Spanish, and clarity of instructions.

- Question 1: What constitutes a “good translation” or a “legal translation”—word-for-word, or whether the meaning of the requirement expressed is clearly stated?
- Question 2: Have groups encountered “best practices” in translating their materials for Spanish-language audiences?
- Question 3: Are there any rules on adapting English-approved language to Spanish-translation that is translated for usability, not word-for-word?
- Question 4: Do the state offices that receive the mail-in form appropriately contact voters with errors on the Spanish mail-form? (Dedicated Spanish-speaking employees; letters or calls to registrant by Spanish-speaking professional.)
- Question 5: What recommendations do you have for research purposes relating to this registration form?

VI. Section 301(a)(4); Alternative Language Accessibility. This provision of HAVA specifies that the voting systems used in federal elections shall provide the alternative language accessibilities specified in section 203 of the Voting Rights Act. This requires that the covered jurisdiction—hundreds of counties, and three entire states—have access to the Spanish-language capabilities on the voting system.
Question 1: How are states able to translate the ballot measures on the voting systems? How would a direct translation of the form interact with a readable Spanish-version of the ballot measure—or election instructions on the DRE or optical scan system?

Question 2: How do localities provide for non-printed language accessibility at the polling place to help them use the voting system (Poll workers, dedicated phone lines with Spanish-language accessibility)?

Question 3: What resources do local election officials utilize to ensure the language on the voting systems is translated appropriately? – Identify “Best Practices.”

VII. The combination of 301(a)(3) [requiring the voting system—DRE or otherwise—to be at least one-per polling place in 2006] and 301(a)(4) [requiring that at each voting system provides alternative language accessibility] means that at least one machine per polling place has accessibility for minority language individuals.

Question 1: This means that even in the jurisdictions not covered by Sec. 203 of the Voting Rights Act, there is the capability for a minority language provision on those voting systems. While not required by law, have groups considered working with local election officials to have a Spanish language option included in growing Spanish-language populations?

Question 2: Have groups done studies to see, aside from the Sec. 203 of the VRA covered territories, the counties where there is an emerging Spanish-speaking population, but no Spanish-translated election materials?
Happy New Year, Adam.

I sent the following e-mail in mid-December regarding the STEM of Democracy meeting that we have planned in Chicago for February 10th. We would very much like to have you and/or Ray attend this meeting. I understand that between the Washington election and the holidays, things may have been pretty hectic for you both.

Can you please check your schedules and let me know if you will be available to attend this meeting? If you would like, I’d be happy to send another e-mail to Ray as a reminder.

I hope you had a great holiday season and I look forward to hearing from you soon. I am hopeful that we will see you and Ray in Chicago.

All the best,

Patti

Subject: STEM of Democracy Meeting in Chicago

Dear Commissioner Martinez,

David Burns asked me to extend an invitation to you and Adam to attend a meeting that we are convening in Chicago on February 10, 2005 for the STEM of Democracy project.
This meeting will gather academic leaders and faculty members who are interested in developing the STEM of Democracy idea, testing it out, and developing materials that will assist faculty who want to teach "through" some of the contested issues and continuing challenges in our democratic system "to" learning in STEM fields.

At this meeting, we plan to:

- Explore the STEM of Democracy idea more intensively,
- Discuss the possibility of a special session at our SENCER Summer Institute 2005,
- Identify existing courses that feature issues that are related to the STEM of Democracy idea, and
- Consider what resources faculty members would need to develop a STEM of Democracy project or course at their institution.

We have already heard from a number of interested parties, including those who were involved in our EAC proposal. We expect this meeting to be a small and informal gathering that will generate thoughtful conversation and robust planning.

I have attached an article from our October e-newsletter that David wrote about this project. I think you'll both enjoy it.

David asked me to convey to you how much we would appreciate your participation in this meeting. He also asked me to send you his warm holiday wishes to you and your families.

Please let me know if you are able to attend the meeting or if you have any questions. I look forward to hearing from you and I wish you happy holidays!

Patti Simon

The National Center Needs Your Help in the Development of a New Project:
The STEM of Democracy

Wm. David Burns

As I write this, it's just two weeks from November 2, our next national election day. Voting has already begun and serious controversies about voting began even before the voting did.

Our edition of this morning's New York Times offers testimony to this: It carries an article about a legal challenge to New Jersey's electronic (touch-screen) voting machines (the lawsuit questions their accuracy and reliability and calls for verification or receipts, you could say). A second report details problems with Florida's early voting system. The front page features a photo of President Bush's parents and lots of other people waiting in line to cast their votes in Texas—fully 15 days before November 2.

For me, this image of "early voting" morphed the traditional meaning of "election day" into "election deadline." It stimulated other thoughts about intended and unintended consequences: The goal of increasing voter turnout and participation rates by being attentive to the complexities of modern life and our many competing schedules and commitments argues for these "convenience-enhancing" reforms (and the growing use of "absentee" ballots). But do these reforms have the effect of "privatizing" or atomizing what in the past, at least, was largely a public event? Does this deprive us of one of the few civic events common to people from all walks of life? Will we soon be changing what was private act carried out in public into a private act carried out privately? And if so, does this matter? What role does technology play in all this? How do people's views of technology affect their appraisal of the legitimacy of processes in which the most advanced technologies are employed? How does our view of science and the advances that science has made possible affect our confidence in the quality of "scientific" results?

It makes sense that we'd be thinking about elections and voting as we begin the first national election since 2000. There are many sources for this heightened attention: Public discourse has lately tended to equate widespread voter participation and the capacity to conduct fair elections with democracy, itself. The suggestion is that voting is in some profound way an essential—and to listen to some commentators, nearly a sufficient—indicator that a state has a democratic form of government. Think of the importance being attached to the inauguration of free and direct presidential elections in Afghanistan and the promise of a national legislative election in Iraq in January as markers of the emergence of these states as modern democracies.

We know that having elections is a necessary, but by itself an insufficient, specific indicator of a democratic regime (the former Soviet Union had any number of elections and, to the best of my recollection, none of them were cliffhangers and nobody questioned the ballot designs!)

It is inconceivable to Americans, however, that we could have a democracy without our constitution, our democratic institutions, and elections that genuinely assessed and represented with considerable accuracy the will of the people who participate in them. Elections really do matter in a democratic state; they are not exercises in civic somnambulism.

Suppose that, on November 3rd and in the days that follow, we lack a clear winner in our presidential election and are faced with serious challenges regarding the process and the technologies employed in the complex "system" of voting, as well as serious doubts about the accuracy and legitimacy of the results. Suppose we have a result that, for many, calls into question the tradition of non-direct election of our national leaders. In that event, the need for serious academic attention to these issues will be manifestly evident. We won't need to make a case for curricular attention. Rather, I expect we'll be faced with a demand for such attention.

Suppose that none of the above happens, or at least, none of it happens to an extent that keeps the results in serious doubt. Assume the election goes off without a hitch, most of us are satisfied with its legitimacy, and, for some of us at least, we're even happy with the results. In that eventuality, we'll need other stimuli and other vehicles to encourage students to learn about this dimension of our civic life. One source of encouragement might come from the possibility that the study of democracy and its institutions (including voting) could lead to some real learning in the STEM disciplines.

(Continued on next page.)
The STEM of Democracy (cont.)

SENCER offers an attractive platform in either eventuality. What terrific candidates elections and other mechanisms of democratic participation are as complex, contested, capacious civic issues that can be illuminated by what those who know mathematics, statistics, systems engineering and design, computer sciences, and the social sciences can teach! Regardless of what happens in November, it is more than fair to say that elections have become terrific examples of what June Osborn once called, "multidisciplinary trouble."

We know this to be true because last Summer at Santa Clara a group of about 30 participants in SSI-2004 met to discuss what science, mathematics and public policy could be taught "through" a focus on voting, elections, proportional representation, districting, the conduct of the decennial census, and a host of other elements of our Republic's institutions and forms of governance. The list generated by the group was extensive, wide-ranging and impressive. (We'll be publishing a summary gleaned from the discussions by Richard Keeling in a future e-newsletter.) In that meeting, thanks to Ed Lorenz of Alma College, our group even got to inspect a ballot from Canada—something that led many of us to reflect that we'd never seen a ballot other than the ones we'd used ourselves (and, of course, many of us have voted without a ballot at all, in the traditional sense)! This offered subtle testimony to our parochialism ("doesn't everybody vote they way I do?") and to how lightly and occasionally most of us give any serious thought to these issues.

The conversations in Santa Clara ranged widely, from controversies about source codes and verification, to systems theory, to ideas about "fairness" that emerge from advanced algebra. They touched on a set of semiotic and philosophical questions about what we think voting really means or signifies and why or whether it ought to matter at all.

With this in mind and the encouragement of the participants in that August 8th meeting, we at the SENCER national center are now developing ideas and soliciting interest in what we are calling the "STEM of Democracy Project." What's in a name? In this case, we are saying STEM for at least two reasons: The first, of course, is that, in many important respects as suggested above, the act of voting is the basic "stem"—as in the main trunk of a plant—of democracy. Voting is one of the elemental, functional expressions of one's personal participation in the governance of a state, especially a democratic state. Voting is a stem in the sense that so much else flows from, or grows from, the act of casting a ballot.

In spite of this, up until just recently, voting has failed to get the attention it should in many college programs to encourage "civic engagement" and service learning, often, it seems, because voting is denigrated as purely instrumental ("high school civics") and doesn't qualify as, to use Benjamin Barber's phrase, "strong democracy." This is unfortunate because the downplaying of voting may have itself resulted in decreased voter participation. If it were up to college students with their current <30% participation rates in national elections to "water the stem of democracy," the results would be an even more wilting plant, indeed.

It will be interesting to see what the participation rates will be among college students this year—rates that will reflect, to be sure, both the heightened interest in this year's race, but also a concerted effort to rectify the old denigration of voting, itself. One of many such efforts to increase student participation in the process is the college initiative of the United States Election Assistance Commission, which has awarded modest grants to some 15 institutions to engage college students as poll workers in local election districts. We look forward to having the reports of these efforts.

That's the "stem." The capital S-T-E-M in the STEM of Democracy, as SENCER e-newsletter readers will surely know, refers to a second meaning. In this case STEM refers to the fields of science, technology, engineering and mathematics—all areas of concern for higher education, in general, and the specific areas of focus of the National Science Foundation's work in improving undergraduate education, in particular. We want to highlight the idea of elections as the stem of the democratic process, just as we claim that an academic focus on elections will help organize and improve learning in the STEM fields.

This is, of course, the fundamental SENCER ideal and goal.

We think the right place or locus for this project is where the other SENCER courses and projects are: the classroom and, to the extent that it is feasible, the surrounding community as sites and beneficiaries of community based research.

"Voting is one of the elemental, functional expressions of one's personal participation in the governance of a state, especially a democratic state."

(Continued on next page.)
The STEM of Democracy (cont.)

We need your help to develop this idea, gather people interested in testing it out, and create materials that will assist faculty who want to teach "through" some of the contested issues and continuing challenges in our democratic system "to" learning in STEM fields. Here's what we need from you:

First, we need to hear from you if you are currently teaching a course or even part of a course that features issues that we are loosely gathering under the heading STEM of Democracy. Could you contact us, share your syllabus and assessment results, consider nominating your project/course as a model, or at least let us know what you are doing?

Second, we need to know if this idea interests you and if you'd be interested in exploring it more intensively with other scholars via e-mail or, if we can arrange it, at a meeting or two, or in a special session at our SENCER Summer Institute 2005 or other regional meetings or disciplinary gatherings.

Third, we'd like to know what resources you think you would need to consider developing a stem of democracy project or course on your campus. Would a backgrounder that identifies what might be taught and how that teaching would improve learning in mathematics, statistics, engineering and the social sciences be useful to you and your colleagues? Do you have any authors to recommend, resources to call attention to, other suggestions?

Fourth, while we can easily think about how the knowledge residing and being developed in mathematics, statistics, computer science, social science and engineering have great relevance to the issues in democracy (and while Barbara Tewksbury's course model on geology and its relationship to development is suggestive of still other dimensions of this issue), it isn't clear how the canonical elements in biology, chemistry, and physics, to pick three big domains, can be illuminated or taught through the issues raised by elections, voting technology, proportional representation and other issues. But let me be quick to say that I suspect this condition has a lot to do with the failure of my imagination and the limits of my knowledge. So, if you have any suggestions, hunches, or evidence, by all means, please share them with us and we'll share them with others, as well.

Please forward this request to others on your campus and elsewhere who may have an interest and contact me by e-mail (david.burns@sencer.net), telephone (732) 873-1539 or letter (National Center for Science and Civic Engagement, 215 Market St, 4th Floor, Harrisburg, PA 17101.)

We've often said that SENCER seeks to deal with two great trends that appear to be colliding with one another: (1) the alarming decline in the study in the STEM disciplines by American college students, almost none of whom take any more than the most basic required courses (this is true for science and math majors, as well), a condition that is aggravated by the poor retention of science and mathematical knowledge and skills by those who are only minimally exposed to science learning, and (2) the growing number of highly complex and often hotly contested matters of civic concern that are either in some way created by advances in science, engineering, mathematics and technology and/or that require some advanced knowledge in one or more STEM field in order to craft and implement the best possible policies, laws or regulations. Elections and modern possibilities for voting have now become perfect exemplars of the issues covered in the second trend. We in the SENCER National Office and the Center look forward to hearing your thoughts and suggestions on these matters and to working with you to develop the STEM of Democracy Project in the coming year.

Oh, and don't forget to vote on November 2nd, unless you've done so already!
Dear Commissioner Martinez,

David Burns asked me to extend an invitation to you and Adam to attend a meeting that we are convening in Chicago on February 10, 2005 for the STEM of Democracy project.

This meeting will gather academic leaders and faculty members who are interested in developing the STEM of Democracy idea, testing it out, and developing materials that will assist faculty who want to teach "through" some of the contested issues and continuing challenges in our democratic system "to" learning in STEM fields.

At this meeting, we plan to:

- Explore the STEM of Democracy idea more intensively,
- Discuss the possibility of a special session at our SENCER Summer Institute 2005,
- Identify existing courses that feature issues that are related to the STEM of Democracy idea,
- Consider what resources faculty members would need to develop a STEM of Democracy project or course at their institution.

We have already heard from a number of interested parties, including those who were involved in our EAC proposal. We expect this meeting to be a small and informal gathering that will generate thoughtful conversation and robust planning.

I have attached an article from our October e-newsletter that David wrote about this project. I think you'll both enjoy it.

David asked me to convey to you how much we would appreciate your participation in this meeting. He also asked me to send you his warm holiday wishes to you and your families.

Please let me know if you are able to attend the meeting or if you have any questions. I look forward to hearing from you and I wish you happy holidays!

Patti Simon
Deputy Director
National Center for Science and Civic Engagement

Washington, DC 20009
patti_simon@sencer.net
(Phone) 202-483-4600
Hi Adam! Hope all is well with you.

FYI, here is a letter we sent to The Pollworker Institute board last week. You'll see a mention of possible work with the EAC. (I have not followed up with Karen LD but it's on my "To Do" list!)

Also attached is a letter to Commissioners DeGregorio and Martinez with a request for a meeting regarding a project that the PI is doing for the Pew Charitable Trust. (We'll be sending a hard copy to each Commissioner and to Tom Wilkey but wanted you to see that it is on its way. I'll also be sending an email to Tom re this project.) Pew has contracted Tracy and me to conduct a feasibility study to assess whether initiatives targeting the implementation of statewide voter registration systems could significantly and measurably enhance voter enfranchisement and reduce the registration problems that have plagued U.S. elections. We are interviewing policy makers, election officials, vendors, the advocacy community, etc.

We hope that at least Commissioners Martinez and DeGregorio and Tom Wilkey can find time to meet with us. I know there is little time to spare in between Hearings!

Best Regards, Jennifer
July 28, 2005

"Dear Pollworker Institute Board of Directors and Board of Advisors,

- UPDATE ON THE POLLWORKER INSTITUTE -

1) New Friends and Old Friends. First, the new friends......We are fortunate to be adding Richard Soudriette, Warren Furutani and Connie Schmidt to our Advisory Board.

Richard Soudriette has served as the President of the International Foundation for Election Systems (IFES) since 1987. IFES is an internationally respected nonpartisan, nonprofit organization that has developed and implemented comprehensive, collaborative democracy solutions in more than 100 countries. One of IFES’s many strengths is its extensive experience in the capacity building and professional development of election officials around the world.

Warren Furutani is President of the Los Angeles Community College system and is a long time advocate of community colleges, voter-friendly polling places and, in particular, college pollworker programs. He has been instrumental in the growth of L.A. County’s College Pollworker Program partnership with the community college system.

Connie Schmidt recently retired as Registrar of Voters in Johnson County Kansas where she developed nationally respected voter service programs and voting system integrity standards. She has a particular commitment to and enthusiasm for innovative pollworker recruiting and training. Connie has already spoken with Johnson County’s new Registrar and is confident we can count on them to be a pilot program.

And old friends......We are proud to announce that one of
our founding Board members, Tom Wilkey, has been selected to serve as the first Executive Director of the U.S. Election Assistance Commission. While we are THRILLED for Tom, we understand his decision to resign from the Board of the Pollworker Institute. We wish him all the best in his new venture!!

2) We've landed our first project! The Pollworker Institute's Jennifer and Tracy are currently conducting a feasibility study for the Pew Charitable Trusts. The purpose of the study is to assess whether initiatives targeting the implementation of statewide voter registration systems could significantly and measurably enhance voter enfranchisement and reduce the registration problems that have plagued U.S. elections. The result will be an internal Pew document so sorry we won't be able to share it with you all ....but what a great experience for us!

3) New Collaboration. We formalized a Memorandum of Understanding with the International Foundation for Election Systems (IFES) this week. IFES will provide in-kind contributions such as office space, phones, copy machine, website design, etc. We are grateful to be affiliated with such a terrific organization. Being on-site means we will also be able to easily brainstorm and collaborate on possible U.S. election administration projects with IFES' Director of Programs, Scott Lansell, staff and consultants. Our new address is: The Pollworker Institute, 1101 15th Street, Suite 115, Washington, DC 20005. Phone will be: (202) 350-6700, (Tracy x 6671 and Jennifer x6672).

4) New partners. We have a new partner in Iowa. Professor David Redlawsk from the University of Iowa is very excited about the possibility of working with us. Professor Redlawsk is a political psychologist whose primary line of research focuses on how citizens process political information in order to make a voting decision. He has been offering students academic credit for substantive community service so is an experienced resource for us. He has offered to approach the Johnson County Auditor, Tom Slockett, to encourage him to join the program. We'll keep you posted.

5) Funding and Update on Pilot Projects. Fiorello Consulting has been representing us as fundraising consultants since May. Cliff Hash and Patti Fiorello are optimistic about the possibility for funding in the near future. However, since we have not received funding to date, we are going to re-adjust our hope to conduct pilot programs this Fall. But stay tuned....we still hope to implement 5 or 6 terrific pilot programs in the Spring of 2006! And in the meantime, we have been granted our 501(c)(3) status by the IRS so we're ready for whenever the funds come rolling in.
6) **Possible project with US Election Assistance Commission.** Tracy and I met in May with the EAC regarding a possible College Pollworker Project which would involve developing a "How To" manual for organizing a College Pollworker Program. It would include calendars, check lists, models - for large and small jurisdictions. The project may include delivering such a manual at regional conferences which would involve brainstorming among election officials and reps from academic institutions and some possible training the trainers. We anticipate an RFP hitting the streets any day now. Again, we'll keep you posted!

7) **A new twist on the Concept.** We are discussing collaboration with the American Association of University Professors. General Secretary Roger Bowen has received a small Carnegie grant to explore the possibility of a program to recruit college professors to serve as pollworkers. The best of all worlds would be to merge their idea with ours.....the professors would invited students to "do like I do" and serve along with them as part of the academic course.

8) **Possible International Work.** In an unexpected turn of events, an international for-profit democracy building firm called "Democracy International" was intrigued by our concept and requested permission to list the Pollworker Institute as a partner/resource for a 5 year USAID "IQC" (Indefinite Quantity Contract) for international democracy building programs. We always thought that we would someday like to get in to pollworker issues at international levels but did not know it would happen this soon. We'll keep you posted. It may be some time before Democracy International knows if it has been selected as an IQC holder.

Please call us if you have any questions or suggestions!

Best Regards,

Jennifer Collins-Foley, President, (540) 379-9974
Tracy Warren, Executive Director, (202) 462-2735

C: Tom Wilkey, U.S. Election Assistance Commission
David Redlowsk, University of Iowa
Roger Bowen, AAUP
James Walters, Montgomery County
August 2, 2005

Commissioner Paul DeGregorio
U.S. Election Assistance Commission
1225 New York Avenue, NW
Suite 1100
Washington, DC 20005

Dear Commissioner DeGregorio:

As the deadline for implementing significant changes in voter registration looms, state and local election officials, as well as the voting rights community, have turned their attention to this critical component of the Help America Vote Act. Changing voter registration means opportunities both to expand the electorate and remedy problems that have plagued our registration system. The Pew Charitable Trusts has hired The Pollworker Institute to conduct a feasibility study to explore possible initiatives that would take advantage of these opportunities. I am writing to request a meeting to discuss this project and the U.S. Election Assistance Commission's plans in this area.

I am enclosing a summary of our project for your review. We have been meeting with state and local election officials, with technology experts, with voting rights organizations and with policy experts to examine the ways that the Pew Charitable Trusts might be helpful. Of course, in addition to learning the Commission's plans, we would welcome your feedback on what kinds of initiatives can help guarantee that HAVA fulfills the law's intended purpose: to ensure that every eligible voter is able to cast a vote and have that vote count.

We would be grateful if you could take the time to meet with us. I will follow up with your office to determine your availability.

Best regards,

Tracy Warren

ENCL
August 2, 2005

Commissioner Ray Martinez
U.S. Election Assistance Commission
1225 New York Avenue, NW
Suite 1100
Washington, DC 20005

Best regards,

Tracy Warren

ENCL
Carol,

Per our SOS, this type of item or recommendation should be referred to one commissioner for review and then that commissioner will make a recommendation to the other commissioners. Let's not deviate from that.

By way of this memo, I am asking Comm Soaries to review this information and make a recommendation.

Subject: Cyber Security Industry Alliance - Susan Zevin - Request for meeting

Commissioners -

Susan Zevin contacted me several weeks ago to set up a meeting between the Commissioners and Paul Kurtz, the Executive Director of the Cyber Security Industry Alliance (CSIA). CSIA is an industry advocacy group that has been formed to promote improvement of cyber security through public policy, education and technology-focused initiatives. Their membership is comprised of major cyber security software providers such as Symantec, Entrust, McAfee, Check Point (they've been getting some unfavorable press lately), and others. They are "interested in assisting the Commission in the evolution of new approaches to voting systems." Susan was rather vague about what this means. I suggested that it might be useful for this group to review and comment on the TGDC/NIST work on the NIST website. Susan indicated they are interested in "higher level, big picture policy matters." Whatever these matters are, she indicated that they can only be discussed directly with the Commissioners, not with some intermediary.

Checked out this group with some colleagues in the security business. The feedback I received was that they're relatively new on the scene, only one of several similar industry advocacy groups, and that they're looking for an issue to make their mark on. (There might have been some professional rivalry seeping through in these comments.) Mr. Kurtz has pretty impressive credentials, having been National Security Council senior director of the Office of Cyberspace Security and a member of the President's Critical Infrastructure Protection Board (prior to 2003).

Is there interest in a meeting by all or some of you?

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125  cpaquette@eac.gov

Whatever these matters are, she indicated that they can only be discussed directly with the Commissioners, not with some intermediary.

Checked out this group with some colleagues in the security business. The feedback I received was that they're relatively new on the scene, only one of several similar industry advocacy groups, and that they're looking for an issue to make their mark on. (There might have been some professional rivalry seeping through in these comments.) Mr. Kurtz has pretty impressive credentials, having been National Security Council senior director of the Office of Cyberspace Security and a member of the President's Critical Infrastructure Protection Board (prior to 2003).

Is there interest in a meeting by all or some of you?

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission
(202)566-3125 cpaquette@eac.gov
Commissioner DeGregorio,
I wanted to extend a late invitation to you and/or your fellow Commissioners to speak with our vendor trade association, the Election Technology Council (ETC) of the Information Technology Association of America (ITAA). I spoke with Commissioner Martinez last week and learned that all of the Commissioners would be in San Antonio for IACREOT, so I thought I would try to impose on your schedules to make this effort to speak with us. I've made the same request of Commissioner Martinez.

The ETC members include AVS, Diebold, ES&S, Hart InterCivic, Sequoia, Unilect, and VoteHere, as well as some other ITAA members who are integrators and have been working in this industry (Accenture, Maximus, etc). We've got a regular business meeting from 12:30 to 2:00 pm on Monday at the Chula Vista Room in the Hyatt hotel. Any time you could come by would be very much appreciated. I'm sure we would like some instruction on how we can best work within the EAC framework, and your thoughts would be very helpful.

My cell phone number is if you would like more information about the meeting.

I continue to be most impressed with the level of effort - and production - coming out of your offices. You're doing a great job from my perspective, and if there is anything we can do to support the effort, please do not hesitate to call us.

Regards,
David

Mr. DeGregorio

The meeting with the representatives of overseas voters will be held at our building, 177 North Kent Street, on Thursday May 6th from 10:00-11:00 am. If this time is not convenient, we can be somewhat flexible with the timing.

Here is a sampling of the groups that will be represented at the meeting:

Democrats Abroad
Republicans Abroad
Federation of American Women's Clubs Overseas (FAWCO)
Association of Americans Residing Abroad
American Business Council of the Gulf Countries

One of the confirmed attendees will be Lucy Laderich, who works on Legislative Issues for FAWCO.

Thanks, and look forward to seeing you May 6th.

Paul:

That sounds like a good plan. My office is in 356 Marillac Hall. (Just take the elevator up to the 3rd floor--turn left and I'm down the hall.) We can chat for a few minutes and then I will walk you over to Charley's office.

See you on the 21st! Have a great weekend. My best to Kerry.

Sandy

Paul:

I just wanted to let you know that Chancellor Tom George can meet with
you on Tuesday, December 21, 2004 from 9:00 a.m. to 10:00 a.m. Charley Schmitz, Dean of the College of Education, would like to meet with you briefly BEFORE your meeting with the Chancellor and then escort you to the Chancellor's office. Would you be able to come to the South Campus around 8:40 a.m. that morning to meet with Charley? He will then drive you over to Woods Hall.

Let me know if all of this will work for you.

Take care.

Sandy,

Sorry it took me so long to get back to you with a date. Right now, the 20th or 21st works for me; if I have a preference it would be early on the 21st (9AM). Early afternoon on the 20th would be my second preference. Assume I should allocate 2 hours to this (including time spent with the Chancellor, you, Charlie and whomever).

It was certainly great to see you in DC. Dinner was fun; hope we can do it again. Thanks for your kind words. Paul Matteucci's address is:

Let me know what works.

All the best,

Paul

Meeting with Chancellor???
Paul:

It was so nice to see you during my recent trip to D.C. I know you're in San Francisco, but if you get a moment, I'm still waiting to hear from you regarding a date/time to meet with the Chancellor while you're in St. Louis.

Also, you could send me a mailing or email address for Paul Matusi (spelling)? I would like to send him a note thanking him for the lovely dinner.

As a follow-up to our dinner discussions and brain storming, I called John Hancock this morning. He's out of town working on the Inauguration but said he would meet with me in January after that was over.

Possibly, when you're in St. Louis (if not before), you and I can talk again about the future of Kids Voting Missouri and the University's interest in maintaining this program. Current plans in the College of Education are to create a Center for Character Development and Civic Education and I'm not sure where Kids Voting fits, if at all. Maybe I could take you and Kerry to breakfast or lunch to brainstorm/strategize about the University and support for Kids Voting. Let me know...at this moment, I'm pretty open that week before and after Christmas.

Hello Brian,

I spoke to you today briefly about a Department of State International Visitor in the European Parliament. Mr. Klaus Welle is the Director General of the Directorate General for Internal Policies at the European Parliament. For his current position, Mr. Welle is interested in learning about the electoral process in the U.S, especially during this election year.

Please read the attached letter and request for a meeting the week of May 24. Feel free to contact me about this request.

Thank you.

Thea

Website: www.grad.usda.gov
Dear Brian:

Hello! On behalf of the U.S. Department of State, the Graduate School, USDA is administering the International Visitor program for a German participant, Mr. Klaus WELLE. He is the Director General of the Directorate General for Internal Policies at the European Parliament. The international visitor program is designed to build mutual understanding between the United States and other nations through carefully designed professional visits to the U.S. for current and emerging foreign leaders. I would like to schedule a meeting the week of May 24. At this early date his schedule is open for meetings Tuesday afternoon (May 25) through Friday (May 28).

Mr. WELLE will spend two weeks in the United States and one week in Washington, DC. The program will look at the U.S. political system, Congress, transatlantic relations and the media. Mr. WELLE seeks to observe the political system and to meet various actors involved in and impacting the decision-making process. In the area of elections, he would like to learn about general election policies.

Please review the attached documents with detailed information about the program, the visitor and his objectives. If you need additional information, please contact me at (202) 314-3509 or thea.richard@grad.usda.gov. Thank you. I look forward to working with you to promote international understanding.

Sincerely,

Thea Richard
Mr. Klaus WELLE, An Individual Project

This visitor is invited to the United States under the auspices of the State Department International Visitor Program.

State Department Program Officer: Ms. Diane E. Crow
Graduate School, USDA International Institute Program Officer: Mr. Thea L. Richard

May 24 - June 4, 2004

Germany

Name: Mr. Klaus WELLE

Present Position: Director General, Directorate General for Internal Policies, European Parliament

1991-1994: Head of the German Christian Democrat Union (CDU) Department of Foreign and European Policy, Bonn

Education/Training: Studies in Economics at Witten/Herdecke University, Specialization in "Institutional Economics and Ethics"
Scholarships, Konrad Adenauer Foundation and "Studienstiftung des Deutschen Volkes"
Apprenticeship at WestLB - Munster (Germany's third largest banking group in Germany)

Memberships: Member, German Christian Democratic Union
Member CDU National Advisory Committee on European Affairs (since 1994)

Publications: Thesis: "Rethinking or Changing: Economic versus Sociopsychological Attempts for the Explanation of Human Behavior"
Mr. Welle is the head of the Directorate General for Internal Policy at the European Parliament (EP). He is in charge of 400 staffers and coordinates the work of the EP committees with the exception of foreign affairs and trade committees.

Previously, Mr. Welle served as the Secretary-General for the EPP-ED group and organized all of its work, which covers the entire range of European Parliament activity. As the top staff member of the group and a German CDU (Christian Democratic Union) member, Mr. Welle also serves as a key advisor to Mr. Gert-Poettering, Chairman of the EPP-ED Group, the largest political group in the European Parliament.

Program Objectives are to learn about:

- Congress and the decision-making process;
- The role of think tanks and academics in public policy;
- Transatlantic relations, especially in the area of terrorism and security (data privacy), environment and transportation;
- U.S. foreign policy, especially in the area of international agreements and multilateral issues;
- The lobbying process; and,
- Media influence on foreign policy decision-making.
Program Sponsor: U.S. Department of State, Bureau of Educational and Cultural Affairs

The U.S. Department of State helps to shape a freer, more secure and more prosperous world through formulating, representing and implementing the President's foreign policy. The Secretary of State is the President's principal adviser on foreign policy and the person chiefly responsible for U.S. representation abroad.

The Bureau of Educational and Cultural Affairs (ECA) fosters mutual understanding between the United States and other countries through international educational, professional and cultural exchanges. The Bureau promotes personal, professional, and institutional ties between private citizens and organizations in the United States and abroad, and presents U.S. history, society, art and culture in all of its diversity to overseas audiences.

The Office of International Visitors manages and funds the International Visitor Program (IVP). Launched in 1940, the IVP seeks to build mutual understanding between the United States and other nations through carefully designed professional visits to the U.S. for current and emerging foreign leaders. These visits reflect the visitors' professional interests and support the foreign policy goals of the U.S. government. Each year over 4,500 IVP participants from all over the world are selected by U.S. embassies to travel to the U.S. to meet and confer with their professional counterparts. Through these encounters, they gain a greater understanding of the cultural and political influences in U.S. society and enjoy a firsthand experience of the U.S., its people and its culture. Visitors represent government, politics, the media, education, non-governmental organizations, the arts, public health, international security, business and trade, and other fields. Over 180 current and former heads of government and state and many other distinguished world leaders in the public and private sectors have participated in the International Visitor Program.

Program Administrator: International Institute, Graduate School, USDA

The International Institute was established within the Graduate School, USDA in order to provide professional training and educational services to government agencies, U.S. government employees with international responsibilities, international organizations and non-governmental organizations throughout the world. International Institute programs facilitate the exchange of knowledge and skills through a wide range of observational study and learning support services, including the administration of regional training projects in Africa, Asia, South America and Europe. The Institute administers a broad array of well-known exchange and visitor programs. These include the Fulbright Teacher and Administrator Exchange and International Visitors Programs on behalf of the Department of State, as well as programs for Russian and Ukrainian leaders on behalf of the Open World Leadership Center at the Library of Congress. The Institute has provided services to more than 40,000 participants from over 120 countries since its inception in 1961, successfully working to promote professional development, cooperation, and understanding in the global classroom.
Commissioner DeGregorio,
Since Kwab is out the rest of the week, I'm passing along the briefing request from Meridian International described below for members of the Jordanian Parliament. The two times they suggest are July 14th at 9:00am or July 16th at 4:00pm.
Thanks.
Brian

FW: To Brian Hancock: Meeting Request for 12 Parliamentarians and 2 Staffers from the Jordanian Parliament: "The Role of Legislators in the Democratic Process"

Dear Brian,

Thank you for your prompt response to my voice message. Please find below the original request sent June 23”. The reason I sent this request to the HAVAinfo email address, because for some reason, I saw some message with this instruction. Anyway, I hope some one from EAC would be available to meet with the delegation either 9:00 am Wednesday, July 14 or 4 pm Friday, July 16. BTW, do you still have the same phone number? Thanks, Brian. Amal

Subject: To Brian Hancock: Meeting Request for 12 Parliamentarians and 2 Staffers from the Jordanian Parliament: "The Role of Legislators in the Democratic Process"

I am forwarding some background information on the upcoming visit by 12
parliamentarians and 2 staffers from the Jordanian Parliament who will soon travel to the United States under the auspices of the U.S. Department of State, Bureau of Educational and Cultural Affairs to undertake a two-week program to look at the structure and process of the U.S. government, with special emphasis on the federal system and the separation of powers.

The participants will be in Washington, D.C. from Monday, July 12th to Friday, July 15th, 2004 for meetings with members of congress, administrative staff and committee staff, appropriate representatives from government agencies, think tanks, and NGOs to discuss their areas of interest, further details of which appear on the attached program summary and biographic information. A participant list is also attached.

While they are in Washington, the delegation would appreciate the opportunity to meet with Mr. Brian Hancock to discuss how political election campaigns work, and the mechanism where government is involved.

Thank you for considering this request and I look forward to hearing from you at your earliest convenience. If you have any questions, please do not hesitate to contact me at (202) 939-5585.

Mr. Abdel Rahim Maher AL WAKED
Secretary to the Speaker of the Jordanian House of Representatives
PROGRAM SUMMARY

This two-week International Visitor project on “The Role of Legislators in the Democratic Process” is designed for eleven members of the Jordanian Parliament and two staffers. The project will provide these officials with an understanding of the U.S. government and its supporting democratic ideals and values, and the structure and processes of American government at the federal, state and local levels, with emphasis on the federalist system and the separation of powers. The program will include discussions with members of Congress and their staffs, as well as appropriate representatives from government agencies, think tanks, academia and NGOs.

The following themes will be explored:

Legislative structure and function:
- The structure of the U.S. government at the federal, state and local levels;
- Responsibilities and duties of Congress to the general public;
- The importance of government accountability and accessibility to citizens, and the development of codes of ethics for elected officials;
- How constituent pressures can influence legislation;
- The preparation of legislation, including committees and hearings;
- Development of a professional legislative staff.

Additional topics:
- Formulation and implementation of U.S. foreign policy;
- International finance and trade policies;
- Public and private sector efforts to strengthen and expand democratic values in the United States;
- Election campaign strategies;
- Domestic economic development;
- Labor laws and labor unions and the degree to which they influence policy;
- Policies on mineral wealth and agriculture, and energy projects;
- Public health and health services.
Commissioner Gregorio:

The Chairman asked me to ask you if you would be interested in meeting a delegation from Mexico on October 19th @ 11:30 AM? As you can see from the email below, the visitors specifically requested a meeting with you.

Subject Int'I visitor meeting request

Dear Joan,

Thank you for taking my call this morning regarding a 4-person delegation from Mexico's Federal Electoral Institute. These visitors are coming to the US as participants in the US State Department's International Visitor Program. I work for MCID, a private agency that partners with State in administering the Program. As we discussed, I am enclosing their complete biographical information but here are their names and titles for ease of reference:

Mr. Pablo Sergio Aispuro Cardenas
Member of Governing Body, Electoral Organization, Baja California State Federal Electoral Institute

Mr. Arturo Sanchez Gutierrez
Electoral Counselor, Federal Electoral Institute (IFE)
President, Electoral Organization and the Information Committees

Mr. Rodrigo Alfonso Morales Manzanares
Electoral Counselor, Federal Electoral Institute

Mr. Virgilio Andrade Martinez
Electoral Counselor, Federal Electoral Institute

Accompanied by Ms. Irene Rachet – Spanish-language Interpreter

The visitors specifically requested Paul De Gregorio. Mr. De Gregorio showed interest in meeting these IFE officials, when he met with IFE Official Manuel Carrillo Poblano in Russia. In addition this contact, the visitors are also keen to discuss (1) certification and standardization of voting systems, (2) your Best Practices Tool Kit (3) policies supporting a user-centered voting system and (4) all aspects of absentee voting.
The group will be in Washington for three days, beginning Monday, October 18. In the happy event that a meeting is possible on your end, may I suggest Tuesday, October 19 at 11:30 am? Please don’t let this suggestion be a deal breaker. I would be glad to arrange the groups’ schedule to accommodate any day or time that works for your staff.

Sincerely, Wanda

This 10-day program is designed for election counselors with Mexico’s Federal Electoral Institute (IFE), an independent election authority that works to strengthen citizen participation in Mexico’s elections through nonpartisan election monitoring. This program is designed as a forum the exchange of ideas about election reform that will build on the expertise and achievements of this delegation and their U.S. counterparts.

In addition to traditional sit-down meetings and briefings, the visitors will have opportunities for primary-source, in-the-field observation of the structural framework and policy underpinnings of the U.S. election system.

Program goals:

Participants will leave the US with an increased understanding of the US election system and new professional contacts for continued forward progress in safeguarding and improving election integrity and citizen participation -- in both Mexico and the United States. Specifically, these topics will be amplified:

- Advantages and challenges of new voting machine technology
- Absentee voting system
- Participation of women and other historically disenfranchised groups
- Mexican-American perspective on political participation
- Development a user-centered voting system
Attached is the draft letter that will be sent to the executive leadership of various nonprofit organizations inviting them to meet with us on Monday, January 24.

Please feel free to email back to me any comments and edits to the letter. My plan is to begin sending out the letters tomorrow (Tuesday).

Via this email, I am asking Julie to make certain I have extended the appropriate invitation for this closed door meeting.

It is also my plan to have a copy of the invitation list for you at tomorrow (Tuesday) morning's Discussion Session.
January 11, 2005

**DRAFT**

Dear

The U.S. Election Assistance (EAC) Commissioners request your presence at a meeting to be held on Monday, January 24, 2005. The meeting will begin at 1:30 p.m., is expected to last about 90 minutes, and will be held at our offices at 1225 New York Avenue, NW, Suite 1100, Washington, DC 20005.

As you know, the Help America Vote Act of 2002 (HAVA) established EAC to make certain that the law is fully and effectively implemented. The work of your organization brings value to this process. We also feel it is extremely important to have a direct relationship with the executive leadership of the nonprofit organizations that are committed to ensuring that American voters have confidence in the integrity and fairness of our elections. We did not have the opportunity to have such a meeting in 2004 and want to make certain that we do so early in 2005, before we begin our aggressive schedule of public meetings and hearings.

While we want an opportunity to personally share with you the broad based components of our 2005 work plan, it is our desire to have a broader discussion of how America is fairing under HAVA. You have been invited as the head of your organization because it is important that we hear directly from you. Your perspectives inform and bring value to our work as EAC Commissioners. Recognizing that we all rely heavily on expertise within our organizations, you are welcome to bring a member of your staff with you but we also want to emphasize that it is your input that we seek.

I hope you will join us on January 24 and look forward to seeing you then. Please confirm your attendance with my office at 202-566-3111. We will also need to know the name of any one who will accompany you to the meeting. My assistant, Sheila Banks, will provide any additional information you might need.

Best wishes for a wonderful, peaceful and successful New Year.

Sincerely,

Gracia Hillman
Chair

Amie,

Thanks. We do not have a list of participants but we do expect all the major voting systems vendors to be in attendance, and representatives from probably 12-15 companies represented in total, either in person or by teleconference. The agenda is simply modified versions of our presentation to the Commissioners last week for vendor review and comment.

We welcome the Vice Chair whenever he has the opportunity to drop in on us.

Brian

----- Forwarded by Grant T. Gelner/CONTRACTOR/EAC/GOV on 07/18/2005 10:22 AM -----
I would like to take this opportunity to thank you for agreeing to participate in the Hispanic Working Group meeting on August 1, 2005 being organized by the U.S. Election Assistance Commission (EAC). The overall purpose of this meeting is to strengthen the EAC's understanding of the needs of the Hispanic community with regard to implementation of the Help America Vote Act of 2002, as well as the EAC's role in administering the National Voter Registration Act of 1993. We hope to provide an open dialogue for all meeting participants to candidly assess and recommend to the EAC various steps needed to ensure registration and voting accessibility for Hispanic voters.

Attached to this email, you will find several documents that will be discussed at the meeting, including the NVRA mail-in voter registration form (in English and Spanish) and a recently-updated glossary of election terminology. Specifically, we would like to solicit your feedback on the usability and readability of these documents. (Please note that the Spanish translation of the NVRA form was done in 2003 and the EAC is in the process of revising this document to reflect the updated English version that will soon be available.) In addition to these documents, we have also attached a copy of the proposed agenda and a link to a recently-issued report on the National Voter Registration Act commissioned by the EAC. Both the Help America Vote Act and the National Voter Registration Act can be viewed and downloaded via the EAC website as www.eac.gov. We encourage you to take a look at our website, as we may also want to discuss during our meeting how the EAC can best utilize the Internet to reach and better serve the Hispanic community.

Once again, thanks in advance for your commitment to this important effort, and for your willingness to participate. I believe that this meeting is a critical step in ensuring that the EAC is responsive to all constituencies as we strive to continually improve the way we conduct elections for Federal office. I look forward to seeing you all on August 1st. If you have any questions or need additional information prior to the meeting, please feel free to call me or Laiza Otero here at the EAC. We can be reached at (202) 566-3100.

Best regards,

Ray Martinez III
Commissioner

This half-day meeting will provide guidance to the EAC as it potentially focuses on research under Section 311 and 312 of HAVA, as well as research under Section 241 and NVRA responsibilities under Section 802. The working group will review two works currently in progress, the readability and usability of the National Mail-In Registration form and the review of the updated List of Translated Election Terms. The working group will assist the EAC in the identification of “Best Practices” relating to methods of effective administration of Federal elections impacting the Hispanic and Spanish-speaking communities.

Monday, August 1, 2005 (Conference Room)

1:00PM – Welcome – Vice-Chair Paul DeGregorio, and Tom Wilkey, Executive Director
1:15PM – EAC background information – Julie Thompson, General Counsel
1:30PM – EAC research activities and meeting objectives – Laiza N. Otero, Research Associate
1:45PM – Introductions by working group members
2:00PM – Discussion – led by Commissioner Ray Martinez
   • Discussion of election administration issues that affect Hispanic and Spanish-speaking voters; recommendations for studies and activities
   • Identification of Best Practices relating to methods of effective administration of Federal elections impacting Hispanic and Spanish-speaking voters
   • Readability and usability of the National Mail-In Registration form
   • Review of the List of Translated Election Terms
4:00PM – Adjourn meeting
Working Group – Topics for Discussion

I. HAVA Section 241 – Studies and other activities to promote effective administration of Federal elections

- This section allows the Commission to carry out studies and other activities with the goal of promoting effective administration of Federal elections. Effective administration methods are to be the most convenient, accessible, and easy to use for voters, including voters with limited proficiency in the English language [§241(a)(1)]. Two of the election administration issues described for study in §241(b), directly refer to voters with limited proficiency in the English language [§241(b)(5) and (b)(14). The former describes “methods of ensuring the accessibility of voting, registration, polling places, and voting equipment to all voters” including voters with limited proficiency in the English language. The second issue described is the “technical feasibility of providing voting materials in eight or more languages for voters who speak those languages and who have limited English proficiency.”

- Question 1: What methods do you consider effective in ensuring the accessibility of voting, registration, polling places, and voting equipment to Hispanic and Spanish-speaking voters? – Discuss accessibility for minority language speakers for each component.

- Question 2: What resources are there currently to assist Hispanic and Spanish-speaking voters? How do you rate their level of accessibility?

- Question 3: What materials have proven to be the most effective in your communities in assisting Hispanic and Spanish-speaking voters? - Discuss what would constitute “Best Practices” in each of the areas mentioned before.

- Question 4: What recommendations do you have for research purposes relating to these topics in §241?

II. HAVA Section 302(a) – Provisional voting

- If the name of an individual does not appear on the official list of eligible voters at the polling place where he declares to be a registered voter or an election official asserts that the individual is not eligible to vote, such individual shall be permitted to cast a provisional ballot. The section further describes the process by which a voter may cast a provisional ballot.

- Question 1: What particular concerns do Hispanic and Spanish-speaking voters have in regards to provisional ballots? – Some areas to discuss may be provisional voting process, ballot counting, and accessibility of information regarding how the vote was counted.

- Question 2: What type of assistance would be most effective in providing guidance for these voters regarding provisional voting? – Identify “Best Practices.”

- Question 3: What recommendations do you have for research purposes relating to provisional voting?

III. HAVA Section 302(b) – Voting information requirements

- Per this section, the following voting information has to be publicly posted at each polling place on the day of each election for Federal office: a sample version of the ballot that will be used for that election; information regarding the date of the election and the hours during which polling places will be open; instructions on how to vote, including how to cast a vote and how to cast a provisional ballot; instructions for mail-in registrants and first-time voters under section 303(b); general information on voting rights under applicable Federal and State laws, including information on the right of a person to cast a provisional ballot and instructions on how to contact the appropriate officials if these rights are alleged to have been violated; and general information on Federal and State laws regarding prohibitions on act of fraud and misrepresentation.

- Question 1: How many States and/or jurisdictions voluntarily provide all or some of the above voting requirements in Spanish? How accessible are they to Spanish-speaking voters?

- Question 2: For jurisdictions covered under section 203 and/or section 4 of the VRA, how effectively are the required voting information materials translated and how available are they to voters? What resources do these jurisdictions utilize to ensure the cultural and linguistic appropriateness of the translated materials?

- Question 3: What materials have proven to be the most effective in your communities? - Identify “Best Practices.”
IV. HAVA Section 303(b) – Requirements for voters who register by mail

If an individual registers to vote by mail and has not previously voted in an election for Federal office, or the individual has not previously voted in such an election in the jurisdiction and the jurisdiction is located in a State that does not have a computerized list that complies with the requirements of §303(a) the voter will have to submit a copy of an accepted form of identification along with their registration or present the identification in person at the polls on the day of elections. If the person does not have an accepted form of identification when he or she goes to vote at the polls, the individual may cast a provisional ballot. If the person is voting by mail and did not submit identification upon registration the ballot shall be counted as a provisional ballot in accordance with §302(a). Section 303(b) lists the following as forms of identification: current and valid photo identification, current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. However, the requirements shall not apply if a voter submits with their registration either a driver’s license number or at least the last 4 digits of their social security number and the local election official matches the information with an existing State identification record bearing the same number, name and date of birth as provided in such registration.

Question 1: How have States expanded the above requirements to require voter identification of all voters when they go to cast a vote in person?

Question 2: How have voter identification requirements impacted Hispanic and Spanish-speaking voters?

Question 3: What type of assistance would be most effective in providing guidance for these voters regarding voter identification requirements? – Identify “Best Practices.”

Question 4: What recommendations do you have for research purposes relating to voter identification requirements?

V. The National Voter Registration Act (NVRA) was passed by Congress in 1993. It was intended to provide more opportunities for all qualified Americans to register to vote in a manner and method convenient to them. Specifically, NVRA creates a single mail-in form that all states must accept; it places requirements for how state deal with registrations for elections; and it calls on designated state agencies, such as motor vehicle agencies, social welfare and handicapped outreach agencies, as well as military recruitment offices to register qualified individuals to vote.

Translation of Federal Mail-in Form. The Federal Form created by NVRA needs to be provided in English and Spanish. The Federal Elections Commission, as well as the EAC hired translators to adapt the approved English form to Spanish. Complaints have emerged that a literal translation of the English form is not appropriate for readability and usability purposes. In addition to the form itself, the individual state instructions need to be vetted for the same concerns, usability, understanding of election terms in Spanish, and clarity of instructions.

Question 1: What constitutes a “good translation” or a “legal translation”—word-for-word, or whether the meaning of the requirement expressed is clearly stated?

Question 2: Have groups encountered “best practices” in translating their materials for Spanish-language audiences?

Question 3: Are there any rules on adapting English-approved language to Spanish-translation that is translated for usability, not word-for-word?

Question 4: Do the state offices that receive the mail-in form appropriately contact voters with errors on the Spanish mail-form? (Dedicated Spanish-speaking employees; letters or calls to registrant by Spanish-speaking professional.)

Question 5: What recommendations do you have for research purposes relating to this registration form?

VI. Section 301(a)(4); Alternative Language Accessibility. This provision of HAVA specifies that the voting systems used in federal elections shall provide the alternative language accessibilities specified in section 203 of the Voting Rights Act. This requires that the covered jurisdiction—hundreds of counties, and three entire states—have access to the Spanish-language capabilities on the voting system.
• **Question 1:** How are states able to translate the ballot measures on the voting systems? How would a direct translation of the form interact with a readable Spanish-version of the ballot measure—or election instructions on the DRE or optical scan system?

• **Question 2:** How do localities provide for non-printed language accessibility at the polling place to help them use the voting system (Poll workers, dedicated phone lines with Spanish-language accessibility)?

• **Question 3:** What resources do local election officials utilize to ensure the language on the voting systems is translated appropriately? — Identify “Best Practices.”

VII. The combination of 301(a)(3) [requiring the voting system—DRE or otherwise—to be at least one-per polling place in 2006] and 301(a)(4) [requiring that at each voting system provides alternative language accessibility] means that at least one machine per polling place has accessibility for minority language individuals.

• **Question 1:** This means that even in the jurisdictions not covered by Sec. 203 of the Voting Rights Act, there is the capability for a minority language provision on those voting systems. While not required by law, have groups considered working with local election officials to have a Spanish language option included in growing Spanish-language populations?

• **Question 2:** Have groups done studies to see, aside from the Sec. 203 of the VRA covered territories, the counties where there is an emerging Spanish-speaking population, but no Spanish-translated election materials?
August 1 is right in between the EAC meeting and hearing that will be held July 28 in California and the Board of Advisors meeting that will be held Aug 3-5 in Portland.

I will likely still be in Calif on Aug 1.

GHillman
Vice-Chair,

Thank you for responding. The event would take place from 1pm to 4pm. I will keep you posted as to the final decision.

Dear Commissioners and Mr. Wilkey,

I would like your approval for changing the date of the Hispanic Working Group meeting from July 18th to August 1st. Our initial date overlaps with the NCLR's annual conference in Philadelphia, and quite a few of our invitees will be participating of that event. The last week of July is a very busy one and doing it prior to the 18th would be too soon for us to coordinate properly. Therefore, I propose August 1, 2005, as the new date. I would like your thoughts on the date, including if you will be able to attend. If you have any questions, please, do not hesitate to contact me. Thank you.

Sincerely,

Laiza N. Otero
U.S. Election Assistance Commission

Summary of Meeting with Advocates for the Disabled Community.doc
Summary of Meeting with Advocates for the Disabled Community

The meeting started with Commissioner Martinez explaining the various funding constraints the EAC has dealt with which caused the TGDC and NIST to rush their VVSG recommendations. The Advocates for the Disabled then mentioned section 2.2.5 of the VVSG as providing a 'loophole' for modified optical scan machines such as the ES&S AutoMark, by using the word “should” instead of “shall”. Commissioner Martinez acknowledged this problem and urged the VVSG to be viewed as an ever-changing document. The Advocates replied by saying that once States buy machines based on EAC / VVSG recommendations, they will be in place for a long time. With a January 2006 deadline, there must be a sense of urgency to close these 'loopholes'. The idea of machines being able to be fit retroactively with devices which would ensure independence and privacy to persons with disabilities was then introduced by Mr. Dickson. He stated that only a limited number of vendors are addressing this issue.

The next major issue addressed in the meeting was VVPAT. The Advocates pointed out that current VVPAT does not insure security. They also stated that VVPAT hinders machines from being fully accessible especially if they use the VVPAT as the official ballot, as some states have deemed they should for recounts (Commissioner Martinez added the point that no state has made VVPAT the official ballot).

Another issue that was brought up was section 2.2.7. A “shall” is used for visually impaired, but a “should” is used for mobility impaired. They viewed this as potentially divisive within their community. Members of the EAC, including Commissioner Martinez, Mr. Wilkey, and Carol Paquette, responded by saying that the
lack of an independent source is a problem, and that there are other technologies out there that are a better substitute to VVPAT.

Commissioner Martinez concluded the meeting by encouraging them to submit their comments to the EAC, and that those comments should be submitted in writing. He followed by saying that he hopes this will be an ongoing dialogue between the EAC and the disabled community.

In short, the Advocates are mainly concerned with maintaining a unified community — one that advocates for all who are disabled, regardless of their disability. They are concerned that these new voting machines, specifically the VVPAT, will grant access, independence, and privacy to only those who are visually or hearing impaired and that those with mobility or dexterity disabilities will not be guaranteed the same right to access, independence and privacy.

The meeting ended on good terms and it seemed that Commissioner Martinez’s comments about the VVSG being a changing document and him encouraging this conversation to be ongoing between the EAC and the disabled community put the Advocates a little at ease. They feared that following the 90 day comment period, some changes would be made to the VVSG, and then the document would be put on a shelf to “collect dust”. Commissioner Martinez, Mr. Wilkey, Carol Paquette, and Gavin Gilmour encouraged them to believe otherwise.
So folks-

Is it looking like July 26 at ???? AM?

Let me know.

Thanks

K

Dear Special Assistants-

I've mulled over the newly proposed date for this meeting and have had second thoughts, since it doesn't work for everyone-

I think it is critical for each of the Commissioners to be available for this meeting with the Council for Excellence in Government and for the follow-on presentation by the law clerks.

Can you all give me dates and times between now and August 1, that we can be certain all of them are available?

I'd like to try and solve this problem by COB, today, if at all possible, so I can get back to the senior management at the Council with a precise date and time.

Thanks

K
Greetings (again)

EAC Chair Gracia Hillman, has a schedule conflict and has requested that another date for this meeting be chosen.

I am proposing Thursday, July 21 from 9:00-10:15 am. This meeting will immediately proceed the regularly scheduled EAC Commissioner's meeting.

Please let me know if you have an unavoidable conflict with this date and time.

Thanks

Karen Lynn-Dyson

Greetings-

On Tuesday, July 19 at 9:00 AM, the Senior Vice President for Programs and the Director of Communications from the Council for Excellence in Government will join us for a 45 minute discussion around possible projects the EAC might undertake to reach out to voters and to connect voters with local election officials.

Immediately following this discussion, the EAC law clerks will present to the Commissioners, a voter information project concept they have been developing over the summer. This will be a 30 minute discussion.

At the end of this dialogue I hope to have given the Commissioners a sense of the range and scope of projects the EAC might undertake in order to address voters' information and education needs.

Thanks for marking your calendars!

I added a meeting with the Council for Excellence in Gov't to your calendar. It is now on July 26, the time is to be determined, but will probably be immediately before the Commissioner's discussion. This meeting was originally scheduled for July 19, then rescheduled for the 21. Each time there was a conflict that arose. As soon as I have a time, I'll let you know. The meeting is with the Senior Vice President for Programs and the Director of Communications from the Council and is to last approximately 45 minutes. The discussion is about possible projects the EAC might undertake to reach out to voters and to connect voters with local election officials.

Everyone,
We will meet in the lobby of the New York Times building between 11:15 and 11:20 tomorrow morning. Our meeting is at 11:30 a.m. It is about six blocks from the Marriott (within walking distance).

The address is 229 West 43rd. St. (b/w 7th and 8th sts.). POC: Marian Green at 202-556-1876 or Adam Cohen at 202-556-3626.

I will bring background material about EAC and the guidelines.

Mr. Vice Chairman,
At today's meeting, I will discuss the particulars of the NYT ed. bd. meeting. Following is the memo I will distribute. I will have a hard copy for you when you arrive at the office.

TO: Chair Hillman, Vice Chairman DeGregorio and Commissioner Martinez
FR: Jeannie Layson
DATE: June 27, 2005
RE: New York Times Editorial Board Meeting

As you know, you are meeting with Adam Cohen of the New York Times editorial board on Friday, July 1, at 11:30 a.m. The purpose of the meeting is to provide the editors with an update of EAC activities, specifically the Voluntary Voting System Guidelines.

However, I am sure that you will be pressed to explain what they perceive as conflicts of interest regarding vendors, specifically surrounding the paper trail issue.

Regardless of what the editors want to discuss, this is your meeting, and you should seize the opportunity to talk about what's important to EAC and to its stakeholders. This is also an opportunity to clearly define the role of EAC, because it's clear to me that these editors have some misperceptions about your role and responsibilities. We cannot allow this meeting to be dominated by talk of paper trails when there are so many other issues important to voters.

Meeting Objective
Clearly define the role of EAC, and emphasize the progress already made in a short amount of time. Establish EAC as a resource for everyone; states, voters, reporters and anyone who has an interest in making sure every vote is accurately and fairly counted.

Overall Message
Voters expect and deserve to know that their vote is counted accurately and fairly, and that is our mission at EAC. Our role is to help states enact the mandates of HAVA, and to continue identifying ways to improve election administration. We will continue to conduct our activities in a transparent, inclusive manner.

The Opinions of the New York Times
The NYT has weighed in many times on election reform. The most recurring theme is the
unreliability of electronic voting and the need for a verified paper trail. In addition, here are some the paper’s other opinions regarding elections:

1. There must be a reliable mechanism for a recount. Voting machines that do not produce paper records make recounts impossible. (Editorial, 1-18-05)
2. All software used in elections should be made public. (Editorial, 11-14-04)
3. Voting machine companies have been given a large say in the process to update voting system standards. Advocates have been relegated to the sidelines. (Editorial, 12-27-04)
4. TGDC does not include anyone who champions paper trails or anyone who thinks electronic voting is unreliable. (Editorial, 12-27-04)
5. Evidence continues to mount indicating that electronic voting machines are vulnerable to tampering. (Editorial, 9-18-04)
6. New York’s inability to apply for its HAVA funds has put the 2006 elections at risk. (Editorial, 12-8-04)
7. Provisional voting was one of the few valuable reforms of HAVA. (Editorial, 11-21-04)
8. There need to be uniform national standards regarding provisional voting. (Editorial, 11-21-04)
9. A study of voting times should be conducted. (Editorial, 10-27-04)

Talking Points

- We have always conducted our activities in a transparent manner, involving a diverse group of stakeholders.
- We are bipartisan – an example of people putting aside party affiliation and working toward one common goal.
- We are the Election ASSISTANCE Commission – our job is to provide resources and guidance to states. States make decisions about how to run elections.
- Making sure every vote is counted fairly and accurately is our top priority.

EAC Accomplishments

- More than $2.8 billion has been distributed to states to help them meet HAVA requirements.
- Every state, territory and the District of Columbia has received HAVA funding.
- Voting Systems – EAC has issued proposed VVSG, and there is a 90-day public comment period. The public can view the document as soon as it’s posted at www.eac.gov and make and view comments.
- Statewide Voter Registration Lists – EAC has already issued draft guidance, working to have it finalized this summer.
- Provisional Voting – In Nov. 2004 election, more than 1.5 million provisional votes cast, and more than 1.2 million counted.

Looking Ahead

- In 2005, EAC will:
  o Study provisional voting
  o Study voter ID requirements
- In 2006, voters will:
Vote using updated voting technology
See helpful information posted prominently at polling places
• Sample ballot
• Voters' rights
• Have more accessible polling places
• Be able to cast provisional ballots

VVSG Overview
• VVSG were developed in conjunction with Sec. 202 that mandates EAC to adopt voluntary voting system guidelines.
• VVSG updates voting system standards to address increasingly complex voting system technology and the critical areas of accessibility, usability and computer security.
• VVSG were designed for state and local election officials to help ensure that new voting systems function accurately and reliably.
• These guidelines are voluntary. States may adopt the VVSG in whole, in part or not at all. States may also choose to enact stricter performance requirements for their voting systems. Currently, at least 36 states require voting systems be nationally certified.
• Contains an overview of the national certification testing process, which will be transferred to EAC this year, as mandated by HAVA.

Issues Addressed by VVSG
• Formulated to address advances in voting technology, legislative changes and the proliferation of electronic voting systems.
• Addresses the following topics:
  • Human factors that focus on voter interaction such as language barriers, accessibility and usability
  • Security issues including voter verified paper audit trail
  • Wireless technology
  • Software distribution and setup validation requirements
  • Updated glossary

VVSG Process
• HAVA mandated that the Technical Guidelines Development Committee work with the National Institute for Standards and Technology to develop the guidelines.
• TGDC delivered guidelines to EAC in May.
• EAC conducted an initial review before releasing the guidelines because:
  • TGDC requested that EAC ensure that guidelines were consistent with Sec. 301 of HAVA.
  • Responsibility to conduct due diligence.
  • Sections needed revision to reflect EAC certification process.
  • Terminology needed to be updated to reflect HAVA.

VVSG Public Comment and Input
• EAC wants as much input as possible about the VVSG from election officials, advocacy
groups and the general public.
- People can view the VVSG on our website at www.eac.gov.
- We will accept comments for 90 days.
- Comments can be posted and viewed on the website.
- Readers can download the VVSG from our website. It will also be available in hard copy format or on a CD. Call the EAC at 1-866-747-1471 to request a copy or for more information.
- After the 90-day public comment period, EAC will consider all comments and adopt a final version of the VVSG.

**New York Facts**
- New York has received $221,422,932 in HAVA funds.
- New York received $153,414,430 in 2003 and 2004 requirements payments earlier this month. (Hurdles remaining were completion of administrative complaint procedure and 5 percent match for both years.)
- Two bills pending in the New York legislature would give counties until 2007 to replace lever machines. NY received $49,603,917 in Sec. 102 funds for that purpose. According to HAVA, if NY doesn’t replace those machines by the first federal election of 2006, it will have to refund some of the funding based on the number of precincts that do not comply.

**Conclusion**
Regardless of where the board members want to discuss, stay disciplined and talk about the role of EAC as defined by HAVA. That is the safest course, and it will also help to clear up misperceptions the ed. bd. has about the role of EAC.

Dear Commissioners and Mr. Wilkey,

I would like your approval for changing the date of the Hispanic Working Group meeting from July 18th to August 1st. Our initial date overlaps with the NCLR's annual conference in Philadelphia, and quite a few of our invitees will be participating of that event. The last week of July is a very busy one and doing it prior to the 18th would be too soon for us to coordinate properly. Therefore, I propose August 1, 2005, as the new date. I would like your thoughts on the date, including if you will be able to attend. If you have any questions, please, do not hesitate to contact me. Thank you.

Paul,

In light of your timely meeting today, I like you to be aware that I also submitted a complete rewrite of the FPCA form and accompanying instructions this week to Polli and Scott. To date, I have received no reply.

Given the substantive need for major revisions, I believe that I am providing valuable input, and importantly these changes are fundamental to improving voter enfranchisement.

If you would like to see these change documents, I can forward them. I'd also be interested in the outcome of your meeting and communication with the other commissioners.

Sincerely,

Susan

At 02:38 PM 6/23/2005, you wrote:

Susan,

Thanks for your note. Sorry I didn't respond to the first one. Regarding this particular form design, I would suggest that you take this up directly with Charlie Abell, as Polli doesn't seem that open to good ideas and suggestions. The Commission is meeting with Polli today and I will bring up your design suggestion directly with her.

I shared the portfolio you gave me with my fellow commissioners and top staff so they can become familiar with your work.

Thanks for your continuing advice and work in this important area.

Mr. Eads,

This is the information as I understand it so far:

The Secretary of State is requesting Mr. DeGregorio to attend a lunch briefing with the Secretary on the steps Mississippi has taken and is taking to meet the HAVA requirements. The Secretary and the Vice Chairman maybe joined by US Senators Cochran and Lott and Congressmen Wicker, Pickering, Thompson, and Taylor. Or their staff members, we intend to invite them once we think Mr. DeGregorio can attend.

Also included in the request is an opportunity for Mr. DeGregorio to meet with and present an update to local Circuit Clerks lasting approximately one hour. Forty-five minutes or whatever he needs.

A few questions the Vice Chairman may have are:

who, specifically, will be in attendance (he will want to know what Senators / Congressmen will attend the lunch and how many Circuit Clerks will attend the presentation)? The lunch meeting would be only Secretary of State, Staff and Congressional members/staff.

during the presentation, will he be allowed to use a PowerPoint presentation, Yes, and will the equipment be provided? I will find out.

will the Vice Chairman be the only speaker, or one of several, or on a panel? One speaker.

following his presentation for the Circuit Clerks, will there be a Q&A session? if so, how long will that last? Up to him.

If you could answer these questions, as I stated on the telephone earlier this morning, I will bring this to his attention once again. Thank you for your invitation.

Commissioners:

As a follow-up to my email of last week, I have been in touch with Tracy Warren, who had asked to speak with both of you regarding the efforts that she and Jennifer Collins-Foley are proposing through the "Pollworker Institute." In addition to the prospectus for the P.I. provided you both, they have also indicated their interest in discussing the future of the College Pollworker Program, in light of their schedule for this year's Pollworker Institute initiatives. Tracy (and Jennifer, if she's back from Albania) are available to meet on Monday, June 6th at 2 PM. Please let me know whether that time is available for you, and whether you desire any additional staff present at this meeting. I will work out the remaining details.

Thanks,
Adam

Adam,

I successfully changed my train to one that is supposed to arrive at Union Station at 11:00 am on Monday. I therefore plan to come meet the Commissioner at 11:30 am. If the train is delayed, I will leave you a message.

As for the meeting attendees, they are:

Wendy Weiser, Brennan Center for Justice at NYU School of Law
Justin Levitt, Brennan Center for Justice at NYU School of Law
Lloyd Leonard, League of Women Voters
James Dickson, American Association of People with Disabilities
Steven Carbo, Demos
Jonah Goldman, Lawyers Committee for Civil Rights Under Law
Laleh Ipsahani, American Civil Liberties Union
Tanya Clay, People for the American Way
Larry Gonzalez, NALEO (arriving late)

Possible additional attendees include:

Jo-Anne Chasnow, Project Vote
Heather Thompson, Appleseed Foundation
Jeanette Senecal, League of Women Voters

Thank you. I look forward to meeting you in person.

Best,

Wendy

Adam,

I wanted to touch base to finalize the arrangements for our meeting on Monday, May 16 regarding the database guidance. Specifically, we need to clarify the time and location of the meeting. (I believe that you said that you preferred 12:30 pm.) I would also like to confirm that I am responsible for the meeting agenda. Finally, I have consulted with other advocates and have a near-final list of those who would like to attend. Please let me know if you would like a copy of that list in advance. Thanks, and I look forward to meeting you in person.

Best,

Wendy

> Thanks,
Paul:

I sent an email around early last week regarding a meeting that Adam has set up with about 10-15 representatives from the advocacy community who will be in the office today to discuss the EAC proposed guidance on statewide voter lists. Wendy Weiser (Brennan Center) who testified at our Boston hearing requested the meeting as a follow-up to her testimony. The meeting is taking place today, in the large conference room, from 1 - 2:45PM.

Anyway, I was simply reminding you about the meeting and to also let you know that it is my understanding that in addition to myself, Gracia plans to attend this meeting as well. If you are available, please feel free to attend. It is mostly a listening session on our end, and Julie is taking the lead on the meeting.

Let me know if you have any questions. Thanks, Paul.

To:
Subject: Reschedule our meeting

Paul: I heard from your EA about two weeks ago, and she asked me to come by at 4:30 today, 10 May, to meet with you. I was there--maybe she failed to record the appointment properly in your book. Anyway, I am available at your convenience--but late afternoon is best for me. Sam Wright
Vice Chairman-

Apparently our wires got crossed concerning the meeting with Sam Wright. I misunderstood and thought Adam was working to re-schedule the meeting with Mr. Wright. I did call Mr. Wright at 2:00 this afternoon to indicate that the meeting had to be re-scheduled. He must not have gotten the message I left; he came to the office at 4:30 this afternoon and asked for you.

Perhaps he did not know I would be participating in the meeting as he only asked for you when he arrived. I was in the office at that time but he did not ask to meet with me, upon learning you weren’t here.

I’ve called Mr. Wright a second time and apologized for the miscommunication and asked if we could re-schedule at his and your earliest convenience.

Karen

Karen Lynn-Dyson
U.S. Election Assistance Commission

Washington, DC 20005
tel:202-566-3123
Commissioner:

This email is just to you, but I want to make it clear that when Karen stopped by my office this morning, she asked when the meeting was with Wright. I responded that I believed that your email asked her to re-schedule the event. I then pulled up your email with Karen present, and showed it to her. She then said she would contact Wright. This occurred mid-day. So any confusion as to the rescheduling of this meeting did not come from my end. I was in the Commissioner's office for much of the afternoon, and was not contacted by anyone at the front desk about a meeting with Wright, aside from a note left on my chair by wither Bola or Joyce that he stopped by for a meeting.

I'd like to not get into any more hot water with staff around here than I have to, but I just wanted to let you know the process of these events. Karen just got back yesterday, and it's likely she was swarmed with emails. Let me know what you want done on this situation.

Thanks so much for all your support over the last week.

Commissioners,

The NASS Executive Board would like to continue to have open communication with you and have suggested a conference call meeting for next month. Specifically, they are looking at the afternoon of June 14 or 16.

Adam, please let me know what the Commissioners' schedules look like for either one of those days. The call should not last more than an hour.

Thank you,
Sheila
Those of you who are able to stay in Boston through Thursday afternoon have an appointment with Boston Globe Ed. Bd. members Bob Turner and Rene Loth and reporter Brian Mooney at 2 p.m. on Thursday. Tomorrow I will give you a memo outlining the particulars, including the topics that will be covered during the interview.

Subject: Meeting MO-SOS Kathy Palazzolo - St. Louis Hill

Dear Mr. DeGregorio:
We met last August at the Missouri 2004 County Clerks Annual Conference at the Lake of the Ozarks. To jog your memory you might remember my husband's name Matt Palazzolo. I believe your family knew my husband's father, Gus Palazzolo.

Last August, we were attending the County Clerks Conference introducing our program for the HAVA Act 2002 Election Reform. Last week we meet with Leslye Winslow of the Secretary of State's Office, to discuss further integration of our program throughout the State of Missouri.

We have developed a "retail landscape" methodology using proven models used by national retailers and other consumer-oriented venues like airports, stadiums, etc. This technology is designed to help predict traffic patterns, hardware/fixture techniques and other variables to enable retailers to guide consumer traffic flow and achieve optimal visibility when communicating to consumers.

We have developed a long term strategy to build upon the HAVA criteria. With our current programs like managing election poll logistics, recruitment, training and a turn key model for companies of all sizes to "Adopt a Poll" whereas corporations can volunteer their employees to work polls on Election Day, we firmly believe we can help translate the HAVA Act into a national brand whereas consumers will identify the HAVA election reform as a branded franchise.

Some of our materials were implemented in certain counties during last year's Presidential primary election (as a test) and have been widely accepted by the state's County Deputies. We are receiving great feedback about our product from local, statewide and other state officials and feel it is the right time to take this program to the next level.

We would like to meet with you and share our program mission and strategy and bring you up to date with our progress since last August. Your opinion and guidance on our initiative would be very valuable and appreciated. As I mentioned, we are located on The Hill in St. Louis on the corner of Marconi and Shaw. We would be happy to meet you in St. Louis or travel to Washington D.C.

I will contact your office next week to schedule a meeting, otherwise, should you have any immediate questions, please feel free to contact me at 314-664-0100 ext 2.

Sincerely,
Kathy Kessinger Palazzolo

Paul,

It was great to hear from you again. I'm really excited for you, and just a little bit concerned. If you should take them up on their offer, be careful. I think that it would be a fantastic opportunity and I certainly would not pass it up. I forwarded you photo, and I hope you don't mind, to Leader Armey, and he and his assistant were quite impressed with the meeting and we all wish you the very best.

I hope that you've had an opportunity to catch your breath following our November election and from following the Iraqi elections. Don't forget that you're always welcome in Dallas.

Sincerely,

Terry Pennington

Subject: Iraqi Election Commission meeting

I just wanted to let you know of the great opportunity I had yesterday to meet with the members of the Iraq Electoral Commission at our EAC offices in Washington for about 90 minutes. This was the group that conducted the successful January 30 elections that brought democracy to the Iraqi people for the first time (with tremendous US military assistance and sacrifice, of course). The meeting was a great experience for everyone. We wanted to know what they learned from their election and they wanted to know what we learned from the November 2, 2004 US election. They spoke of the great guidance and assistance that my former employer, IFES, gave to them.

The group was very appreciative of US intervention and assistance in Iraq. They said it was not only a new start for Iraq but for the whole region. The Commission spoke of the outside forces that want to thwart democracy and freedom in Iraq country. They had confidence that they could overcome this and said that free and fair elections are the best way to fight those who want to take away the freedoms that the Americans have given them. The Commissioners invited me to observe their constitutional referendum and parliamentary elections expected later this year. I just might take them up on their offer.
Attached is a photo of Commissioner Ray Martinez and I with the delegation.

Paul -- Ken Meyer forwarded to me the message about your meeting with the members of the Iraqi Election Commission which I found very inspirational. Here in the USA, I think we tend at times to take our right to vote for granted, whereas others around the world have to fight and at times risk their lives to exercise the same right. I am particularly reminded about that now, because we only had an 18% turnout on March 8 for the Municipal Primary Election and will likely have an even smaller turnout next Tuesday for the Municipal General Election.

I had lunch the other day with my predecessor, Kevin Coan, and he mentioned to me that he had applied for a research position with the EAC. I don't know if you have seen his application, but I thought I would mention that to you. Given Kevin's many years of experience here at the City Election Board and his legal background, he might be a good "fit" for a position with your organization and would undoubtedly appreciate an opportunity to discuss it further with you.

Hope all is well with you and your family and that you had a joyous Easter. If your travels bring you this way and your schedule permits, I would be pleased to meet you for breakfast or lunch and talk "shop" a bit.

Best regards.

Gary

This was the group that conducted the successful January 30 elections that brought democracy to the Iraqi people for the first time (with tremendous US military assistance and sacrifice, of course). The meeting was a great experience for everyone. We wanted to know what they learned from their election and they wanted to know what we learned from the November 2, 2004 US election. They spoke of the great guidance and assistance that my former employer, IFES, gave to them.

The group was very appreciative of US intervention and assistance in Iraq. They said it was not only a new start for Iraq but for the whole region. The Commission spoke of the outside forces that want to thwart democracy and freedom in Iraq country. They had confidence that they could overcome this and said that free and fair elections are the best way to fight those who want to take away the freedoms that the Americans have given them. The Commissioners invited me to observe their constitutional referendum and parliamentary elections expected later this year. I just might take them up on their offer.

Attached is a photo of Commissioner Ray Martinez and I with the delegation.

Mr. DeGregorio,

I hope you had a great time with your family in Italy.

I was impressed with the results of the election in Iraq. Personally I am against the war, but probably the war is necessary to change a strong totalitarian system.

In Albania we had good and helpful neighbors like Italy and Greece, but beginning of the democratic system was very difficult and the fight with the people associated with the communist totalitarian regime was difficult because they preferred to believe what was convenient for them.

In Iraq, neighbors like Iran and Syria complicate the situation but I believe the new generation is realizing the western democratic progress and they will be useful in the democratic process, the election was a very strong parameter of the progress in Iraq. I am confident they will overcome the transition period and hopefully the western help will continue in Iraq.

Albania elections probably will be this July, hopefully is not going to be painful this time.

Best Regards,

Artan Profiri

Hi Paul,

What a great experience - wish I could have been there. Do you have any contact information for these gentlemen - I would like to invite them to our conference?

Thank you for your hospitality this week - I feel privileged to have one-on-one time with you when I visit your office.

A Safe and Happy Easter to You and Your Family,

Your friend always,

Tony

Good picture. Heck of an opportunity, going to Iraq, if it comes off. Go for it. I spent 3 hrs. in a phone bank last night for Bill Alter. John Weir was there. Hadn't seen him in a coon's age. Also Miriam Stonebraker. Lookin' good in that district. Think we'll take it on the 5th.

All the best,
Paul:

What a great meeting it must have been. Our country can be so proud for what we have done there, and the great election management is icing on the cake.

Progress is going well on the final 2 weeks of hard-core drafting at NIST. Feel free to call me directly if you and the Commission are not getting what you want. The word on Tony is that he is adding much value.

Have a great Easter.

Regards,
Craig
No doubt it was serious work. Yvonne
What a great opportunity! I don't think the average Joe (Democrat) realizes exactly what took place over there and what an impact it has to civilization.

Things here are the same. We are anxiously awaiting our destiny. I hope it happens soon.

Bona Pasquale !!!!

Charlene

Paul, you are truly making history. We have come a very long way in the election process, and you have been right there in the forefront. IFES had had a tremendous impact — with your assistance and guidance.
I remember when Kerry was so concerned with your safety and you were out there making inroads into Russia and numerous other places. We were always praying for your safety.
Keep up the amazing work.
I know you are keeping a journal. I hope you are beginning your book— it would be so beneficial to those countries where elections are finally becoming a possibility and reality. I am requesting my own personal signed copy — please note and keep in a most important place.
God bless - Be safe.
Barbara Cooper
Paul:

Your email brought smiles to my face and tears of joy to my eyes. What a wonderful 90 minutes this must have been for you, the Iraqi people, IFES and others involved. I know how proud you must have felt listening to the Iraqi people and a bit nostalgic wishing you had been there in January to see this first hand. I hope things work out for you to go to Iraq later this year. I know how much this would mean to you personally and professionally. In any event, congratulations--this is the best news for anyone, especially for those us os who love free elections and democracy.

Wow. Pretty cool photo – even cooler work.

All well here ... again, Paul, sorry I got crossways with your ideas for the County board ... I will call you earlier in my efforts.

Things are progressing with the City ... we have three solid Commissioners set – with one D left to find.

One question: I think that part of being Chair – my preference at least – is for me to be the public voice of the Board. Is that appropriate? I mean, I think Patrick will be good, but I really want – for me and for control – to be the one out front. Can you comment on this?

Thanks again for all of your encouragement.

All the best.

Ed

Dear Mr. DeGregorio:

It was a pleasure to meet you at the Carter Center Meeting. As mentioned to you in Atlanta, the Electoral Institutions of Colombia, the National Civil Registry and the National Electoral Council, in collaboration with the Organization of American States (OAS) are organizing the Third Inter-American Meeting on Electoral Technology in Bogotá, Colombia on April 6 and 7, 2005. The meeting will bring together electoral authorities, as well as experts in information technology, from throughout the hemisphere to discuss the state of electoral administration and the role of technology in the electoral process. Each Electoral institution will have the opportunity to present their approaches to the use of technology in the electoral process.

We are cordially inviting you or a representative of the U.S Election Assistance Commission to participate in this event. At this meeting, an exchange of information, best practices, experiences and technology will be examined throughout the hemisphere, focusing on the consolidation and modernization of electoral processes as a means to promote democracy. This computerization provides the necessary framework for free and fair elections and allows election administrators to better utilize their resources. The expenses of your participation will be covered by the OAS.

Please take a moment to look at the enclosed information on the meeting. It provides general information, including background, content and methodology to be used at the meeting. Due to the difference in the electoral system between Latin America and the United States, we would appreciate if your presentation could provide a brief description of the electoral system in the U.S. as well as information on electoral technologies that are in use. We have prepared a draft document that may be useful to guide this presentation. Please let us know if equipment will be required for your presentation.

Please confirm your participation to Alexandra Osorio at mosorio@oas.org or via fax at (202) 458-6299, to Juan Carlos Yepes Alzate at jcyepes@registraduria.gov.co or via fax at (571) 222-2798 and to Guillermo Francisco Reyes Gonzalez at gf_reyes@yahoo.com or fax (571) 222-7039.

We take this opportunity to renew to you the assurances of our highest consideration.

ELECTORAL ORGANIZATION OF COLOMBIA
ORGANIZATION OF AMERICAN STATES

Invite to the
Third Inter-American Meeting on Electoral Technology
Bogota, Colombia
April 6 and 7, 2005

Informative Document

BACKGROUND

Interest in the use of new technology in electoral processes is becoming increasingly evident in our Hemisphere. From voter identification mechanisms to electronic voting machines, more and more innovations have been appearing on the electoral scene of various countries of the American hemisphere.

It is important to emphasize that currently in our democracies electoral processes rely heavily on the confidence of the electorate and the acknowledgement of the international community regarding the success of the steps taken by the electoral authorities to strengthen and modernize their institutions, specifically in the organization and administration of elections. It is for this reason that the Organization of American States (OAS) through the electoral area of the Department of Democratic and Political Affairs (DADP) has, since 2002, initiated in the framework of its Inter-American Electoral Technology Program (In Spanish, Programa Interamericano de Tecnología Electoral (PITE)), the Inter-American Meeting on Electoral Technology, which allows for the acknowledgement of technological advancement made in the Inter-American hemisphere, which contributes to the celebration of elections, each time more modern, transparent and efficient in all countries of our region. The Meeting addresses areas, such as, attention to voters, the automatization of the processes applied to elections, and the incorporation of the use of information technology.

To date, the OAS has successfully held two Inter-American Meetings on Electoral Technology. Each opened the door to the exchange of practices and experiences in terms of the incorporation of technological innovations in the field of elections, as well as the fostering of horizontal cooperation among the different electoral authorities of our continent.

In addition, Member States have considered the gathering as suitable for the generation of ideas and the development of areas of common interest, in order to promote the integration of information in electoral processes.

It is worth noting that in the First Meeting the challenges that come with the introduction of new electoral technology were analyzed. It also provided the opportunity
to learn and share the experiences of the different electoral bodies in incorporating electoral technology innovations, especially those related to procedures in the organization of elections. The benefits of horizontal cooperation in this area were also examined.

On that occasion, the OAS presented the Inter-American Electoral Map, a useful tool for consultation and information on electoral issues. This virtual tool has turned into a forum for all interested in developing forecasts or comparative analysis of the situation of electoral bodies of the hemisphere in matters of legislation, organization and electoral technology.

The Second Meeting sought to introduce an academic and "outside" perspective on the different voting mechanisms and allowed for fruitful discussions on the challenges that electoral technology poses in terms of efficiency as well as the care that should be taken in its implementation.

In this way, the electoral authorities explored the mechanisms to coordinate the implementation of technology with electoral administrations, the electorate, political organizations and the legislative branch. This is how the conclusion was reached that technology is not an end in itself, but rather a useful tool to attain a certain end: the modernization of electoral procedures through voting procedures which will become more efficient and reliable than they are now. It is as much a short-term as a long term goal. The strengthening of democracies in the region should at all times favor citizen participation with the application of basic rights such as, equality, security, transparency, confidence and confidentiality.

In both Meetings, the OAS, in order to provide the electoral authorities of the its Member States exposure to the existing products, services, and applications in the market aimed at the improvement and automatization of the electoral processes invited numerous suppliers that presented and demonstrated the innovations and their functions, in suitable exhibition halls, that permitted participants to acquaint themselves with the advancements in the science of electoral technology.

**OBJECTIVE**

In this the third Meeting on Electoral Technology, the OAS with the support of the Electoral Organization of Colombia proposes to continue its clear efforts to support and strengthen the exchange of knowledge, best practices, and experiences of the different electoral authorities in areas of technology, in the interest of promoting cooperation among the electoral institutions of the hemisphere and the multilateral framework proclaimed by the Organization.

In the scope of this general objective, we are seeking to:

- Present the achievements accomplished by the OAS in this field during the past year.
• Reinforce the basic idea that at this particular socio-political juncture in the hemisphere, the electoral bodies are indisputably the agents of change that influence not only the electoral regimes but also the consolidation of democracy in their countries and their institutions, obligating all the political, social, and academic actors to become involved in the study and analysis of the challenges they need to tackle to ensure that political and electoral processes are more responsive, modern, efficient and transparent.

• Recognize verbally, all the electoral authorities gather at the Meeting, the reach of the new technologies they have acquired or developed, their successful achievements as well as the lessons learned. This will rely on the most accurate and adequate "inventory of technological products and services in use and/or in development for inter-American electoral needs."

METHODOLOGY

The Organization of American States (OAS) and the Electoral Organization of Colombia, comprising the National Civil Registry and the National Electoral Council are the organizers of the Third Inter-American Meeting on Electoral Technology, an event which will take place from April 6 and 7, 2005 in Bogotá, Colombia.

The methodology to be used at the Meeting will be the following:

1. Inauguration

2. Presentations by the Electoral Authorities. These presentations will be the responsibility of the leaders of the participating electoral bodies, accompanied by their expert in technology and computer science. Each country will be allowed a maximum of fifteen (15) minutes to present its experiences in the use and development of new technology in electoral matters. The presentations must focus on the products and services in the field of electoral technology that are available or in development in each country as well as any challenges that the Institutions might have in these areas. Likewise, to help document the event, we request that each delegation submit a written document, which will in this way, too, give countries the opportunity to detail the most important aspects of the utilization and implementation of these technologies.

3. Presentation by Special Guest. A presentation will be made by an expert outlining an Inter-American perspective of the initiatives of "e-government," which with the support of the OAS will be developed in many of the countries.

4. Presentations by Suppliers. This Meeting will offer the opportunity for each one of the suppliers to participate in the Exhibition Hall, mount an exposition of no more than 10 minutes so that they can present to the electoral authorities the products and/or services they offer. This segment will allow those present and, in particular, the experts in information technology the chance to interact with the
different electoral technologies offered in the market so that they can get a better idea of what is out there.

5. **Plenary Session.** At the end of the event, a plenary session will provide a forum for the exchange of questions and concerns arising from the Meeting and a matrix that will gather the conclusions from the presentations and other elements that might have been brought up during the Third Inter-American Meeting on Electoral Technology.

6. **Show Room.** While the Meeting is taking place, there will be an exhibition hall for the Suppliers of Services and Products of Electoral Technology that can be viewed by the electoral authorities and other participants during the event.

**OUTCOME**

During the Third Inter-American Meeting on Electoral Technology it is our hope to attain the following results:

- Prepare an account of the current situation in the area of electoral technology from all the participating electoral bodies at the Meeting
- Create a matrix of the strengths and opportunities which the institution can rely on in terms of legislation, technology and electoral organization that allow for the promotion of concrete actions and the support of horizontal cooperation with the aim of creating projects of exchange of practices, technologies, and personnel among the participating countries and/or businesses that offer electoral technology products and services.
- Create the foundations for the formulation of a comparative study on the situation of the Member States in the area of electoral technology that will allow the OAS to lend more support to their programs of electoral technology assistance.
- Establish a preparatory plan of concrete activities according to the Inter-American electoral calendar for the next five years.
- Establish and/or strengthen links among the electoral bodies and their advances in the incorporation of electoral technology.
- Promote the efforts of horizontal cooperation among the electoral bodies of Member States.

**INVITATION**

The participation of the representative of the electoral authority and the information technology manager in the electoral organization of each participating country will be financed by the OAS. (This financing includes the costs of transport, room and board, and meals.)
For the coordination of logistical matters, we ask that the electoral authorities and IT managers interested to participate in the meeting to send, upon receipt of this letter, confirmation of their attendance and the name of the IT manager to Juan Carlos Yepes Alzate at jcyepes@registraduria.gov.co or via fax at (571) 222-2798 and to Alexandra Osorio at mosorio@oas.org or via fax at (202) 458-6299, and to Guillermo Francisco Reyes González at gf_reyes@yahoo.com or fax (571) 222-7039.

Reunión Interamericana de Tecnología Electoral
Abril 6 y 7 de 2005 - Bogotá, Colombia

Agenda Tentativa

MIÉRCOLES 6 DE ABRIL

8:00 a.m. Sesión de inauguración - Intervenciones por confirmar según el nivel:
- Presidente de la República, ó un Delegado por él.
- Secretario General Interino OEA, ó
- Director de Departamento de Asuntos Democráticos y Políticos (OEA), ó
- Directora Oficina para la Promoción y la Democracia (OEA)
- Presidenta Consejo Nacional Electoral
- Registradora Nacional del Estado Civil de Colombia

10:30 a.m. Pausa - Café

11:00 a.m. Presentación Autoridades Electorales de Norte América (Estados Unidos, Canadá, México (2))
Moderador: Dr. Guillermo Reyes, Magistrado del CNE

12:00 m. Receso - Almuerzo

2:00 p.m. Presentación Autoridades Electorales de Centro América (El Salvador, Honduras, Nicaragua, Guatemala)
Moderador: Dr. Marco Emilio Hincapié Ramírez, Magistrado del CNE

3:00 p.m. Pausa - Café

3:15 p.m. Continuación de la presentación de las Autoridades Electorales de Centro América (Costa Rica, Panamá, República Dominicana)
Moderador: Sr. Santiago Murray, Asesor de la OEA

4:00 p.m. Presentación Autoridades Electorales de la Región Andina (Bolivia, Ecuador, Venezuela, Perú (2))
Moderador: Sr. Orlando Abello

5:15 p.m. Pausa – Café

5:30 p.m. Continuación de la presentación de las Autoridades Electorales de la Región Andina (Colombia (2 autoridades))
Moderador: Sr. Moisés Benamor, Coordinador del Área Electoral de la OEA
6:00 p.m.  Cierre del día
8:30 p.m.  Cóctel de Bienvenida por la Organización Electoral Colombiana

**JUEVES 7 DE ABRIL**

8:30 a.m.  Presentación Autoridades Electorales del MERCOSUR (Argentina (2), Uruguay, Paraguay, Chile (2) y Brasil)
**Moderador:**  Dr. Antonio José Lizarazo, Magistrado del CNE

10:15 a.m.  Pausa - Café

10:45 a.m.  Presentaciones por parte de la OEA
**Moderador:**  Dr. Roberto Bornacelli, Magistrado del CNE
- Presentación sobre E-Government. Sr. Miguel Porrúa, Especialista en Gobierno Electrónico de la OEA
- Presentación del Programa Interamericano de Tecnología Electoral. Sr. Moisés Benamor, Coordinador Área Electoral del Departamento de Asuntos Democráticos y Políticos de la OEA

11:15 a.m.  Sesión de Preguntas
**Moderadores:**  Doctores Luis Eduardo Botero y Guillermo Mejía Mejía, Magistrados del CNE

12:00 m.  Receso - Almuerzo

2:00 p.m.  Presentación de las Compañías Proveedoras de Servicios Tecnológicos
**Moderador:**  Sr. Moisés Benamor, Coordinador del Área Electoral del Departamento de Asuntos Democráticos y Políticos de la OEA

5:00 p.m.  Sesión Plenaria.
**Presidente:**  Presidenta Consejo Nacional Electoral
Registradora Nacional del Estado Civil de Colombia
Representante de la OEA
Los Moderadores

6:00 p.m.  Clausura del Evento por:
- Presidenta Consejo Nacional Electoral
- Registradora Nacional del Estado Civil de Colombia
- Representante de la OEA

8:30 p.m.  Cóctel de Despedida por la OEA

018750
Following today's discussions with NASS, I am wondering if we should invite a NASS representative(s) to our April 11 discussions with the Disability Groups so they (the NASS reps) can hear for themselves what the disability groups are concerned about?

It sounds like some states are considering purchasing an accessible voting system that some of the disability groups have threatened to file suit over.

Your thoughts on this?
Hi Paul!

Hope that all is going well for you and your family.

The Platte County Board of Elections is hosting this year's MO Urban Board conference from May 11-13 at Tan-Tar-A.

Would you be available to give us an update on the EAC's activities on Friday, May 13th? We start at 9:00 a.m. and end at 11:00 a.m. on this day. We would accommodate your schedule if you are able to make it.

I know that you are on a busy and tight schedule but would appreciate your consideration!

Take care!

Wendy Flanigan
Director

Hello Mr. DeGregorio,

Ted Selker will be in DC next week and he was hoping to be able to meet with you.

He will be arriving Wednesday, March 2 around noon and would have time after 3:00 that day or Thursday morning before 10:00.

Please let me know what could work with your schedule.

Thank you.

sarah

p.s. I will be out of the office Monday so I will be able to confirm any suggested meeting time on Tuesday.
Back on November 6, I sent an email inviting each of you to participate in the Joint Election Officials Liaison Committee meeting in DC at the Westin Embassy Row (21st and Mass) on Thursday and Friday, January 6 & 7.

Congressional staffers Kennie Gill, Tom Hicks, Paul Vinovich and Brian Lewis will be doing a panel at 10:00 to 11:30 a.m. on Thursday. Our meeting begins at 9 a.m. and concludes each day at 4:30 p.m.

I would love for you to be able to be introduced and speak to this group if you so choose. We will have about 120 attendees this year. You can speak either on Thursday afternoon or Friday.

You can reach me on my mobile number or at the hotel beginning Sunday, Jan 2.

I hope each of you will be able to participate.

Sam, how about Tuesday evening, November 16 at 6:30 PM? You can pick the place.
Will that work?
Happy Veteran's Day!
Paul
We had hoped to have a pre-election day meeting with Civil Rights Organizations. My efforts to get Wade Henderson to assist with this never materialized.

I think we should have a post-election day meeting with civil rights organizations to discuss their concerns about November 2. We may also want to invite representatives of DOJ as some of their concerns will involve voting rights and political pranks. I think a private meeting of this type can begin a process of ongoing dialogue with these groups that can even include state and local election officials in the future.

Paul and Dan:
We hope this email finds you both well on this Election Day.

Since last meeting with each of you (Paul at the CACEO conference and Dan at the Election Conference), we have spent a considerable amount of time assisting California Counties with process improvements and election security. It has been very enjoyable work with a great group of individuals. Because of our experiences we have a very high confidence level in those counties we’ve been fortunate enough to work with and trust, despite the media and activist criticisms, that each one will have an accurate, secure election.

We are in the process of scheduling our next trip back to Washington, DC and have tentatively planned to be there the week after Thanksgiving, November 29th thru December 3rd. Ideally we would like to spend an hour and a half or so with you to update you on our work at the local level and share with you our view on developing voting system standard and the related testing. We believe we are uniquely suited to give you a perspective due to our familiarity with NIST's accreditation process and requirements and our work in the elections arena over the last few years. We would like to assist you in developing a solution.

Given this advance notice and flexibility with our east coast customers, we will work our other meetings around your schedule. Please let us know if you are interested in meeting, and if so, which days/times work best into your schedules.

Sincerely,
John

Dear Monna,

It was really good to meet with you last week, we know how busy you are and appreciate your taking the time to spend with us while we were in Harrisburg.

I tried calling this afternoon, but since it was after 5 PM, there was no answer. We are helping to facilitate meetings between the observers from the Organization for Security and Cooperation in Europe (OSCE) and they asked us for assistance in setting up a meeting with you. If you are available and could spare some time to meet with them we would appreciate it. I know it is short notice, but they are hoping to travel to Harrisburg tomorrow afternoon (October 26) or sometime on Wednesday (October 27). The individual coordinating the meeting is Andy Bruce. His telephone number is: 202-361-3087 and his email is andyb@osceusa.org. You can contact him directly to coordinate a time if you're able to meet with them.

Of course, I am happy to answer any questions or provide clarification. Please feel free to call or shoot me an email if you need to.

We hope that you will be able to meet with this group, the Commissioner fully supports their efforts and he has worked with them several times in the past.

We also wish you the very best for the rest of this long week! Hang in there, we're in the home stretch!!!

Take care,
Dan

Paul,

Svetlik just emailed me. He said that it would be much easier for them to do 2:30 on Thursday 4 November rather than 2:00. Please be sure to note that change when discussing this with your colleagues.

Also, don't forget the OSCE-PA group meeting on Friday the 29th (2:30 at the Rayburn Building).

Paul -

Tom, as usual, has his hands in a number of different pies leading up to the election, but I suspect he is most heavily invested in Matt's race. As for my role in this madness, the Secretary General for the OSCE Parliamentary Assembly, Spencer Oliver, is an old friend and so by virute of this I got suckered into putting together all the states the various teams will visit.

It now appears observers will be headed to Florida, NC, Ohio, Minnesota, Arizona, and New Mexico, as well as staying here in the DC to look at both MD and VA. Missouri was on the list but it now looks like they will not receive a visit.

I am currently officing out of the FEC - in part as a result of my relationship with Danny McDonald. Starts to make you wonder what kind of company I keep...

Anyway, I can be reached at and I will have someone follow-up with Dan. Many thanks in advance and I appreciate your willingness to sit down with these folks.

Mark

pdegregorio@eac.gov wrote:

Mark,

Thanks for your note. I would be happy to meet with the OSCE observers, should my schedule permit. The 29th is open. I am not sure I can do the 28th, but if you contact my Special Assistant, Dan Murphy, he can work with my schedule to make this happen. You can reach Dan at 202-566-3100.

We have already met with the OSCE/ODHIR pre-election teams over the past month. Dan has been working with them to suggest locations they want to visit in the USA. What is your role with the group? How can we reach you?

Haven't heard from Tom Carter for quite a while. Do you know what he is up to?

Paul -

I wanted to put a request in to you and perhaps some of the other commissioners to meet with a
group I am currently assisting. As you know, the OSCE is sending a group of 60 observers to
take a look at our elections. They will be in DC for briefings on the 28th and 29th and I would
very much like for them to receive the benefit of your insight, preferably on the 28th.

You may remember me as the former Executive Director of ACYPL, and don't hold the
following against me, but ever since Tom Carter and I traveled together to Australia and New
Zealand in 1989 I have considered him a good friend. I hope all is well with you and look
forward to hearing back.

Mark N. Poole
Thanks, for forwarding, Joan.

It's now scheduled for 4 PM.

Commissioner DeGregorio,

I sent the following to Dan, however he is on vacation. Please read the information below and let me know if your schedule will allow you to do and/or participate in the briefing.

Thanks,
Nancy

Nancy Jackson/EAC/GOV

All,

Attached is a request for one of the commissioners to brief a group of 21 political specialists from around the world. The available times are listed below. Check your respective commissioners' calendar and let me know. You may forward your information to me and I will contact Joanne.

Thanks,
Nancy

----- Forwarded by Nancy Jackson/EAC/GOV on 08/31/2004 05:25 PM -----

Hi Nancy,

Thanks again for offering to try to help. I have attached the participant list for 21 political specialists from around the world coming to DC next Tuesday for a State Dept. program on the U.S. election process. I have had several conversations with Joan Wooley and as I mentioned to you, she indicated that my request would have to wait until the new interim Executive Director and/or General Counsel started at EAC.
I only have a few time slots left in my Washington program, and it will be very disappointing if the EAC isn't included in this program. The times are: Friday, Sept. 10 at 3:30 or 4:00, or Tuesday, Sept. 14 at 9:30 or at 11:00.

I am hoping that something can be arranged with a staff person who can brief the group on what the mission and activities of the EAC.

Warm regards, Joanne

P.S. Dan, you had way too much cake for lunch.

Daniel Murphy/EAC/GOV

Joan,

Sorry, I spoke too soon. We are not staying for the entire meeting and should be back by noon.

Thanks,

Dan

Joan A. Wooley/EAC/GOV

I have scheduled a meeting with Leslie Reynolds and the Commissioners on August 17th @ 12 Noon.
Paul:
We met briefly at the CACEO conference a few weeks ago after you swore in Connie McCormack as President. It was quite a night and California is very lucky to have her during this time of uncertainty for Election officials. She is an inspiring leader and very well respected among her peers.

I am writing because we have been providing election services to California Counties for over a year. Our services have been offered at the local level because, quite honestly, they needed the most help and since funding for the EAC and the NIST accreditation program were slow coming. We were very encouraged to hear of your background and appreciate the progress you and the rest of the EAC commissioners have made in a very short period of time.

We are headed back to NIST for the Laboratory Accreditation Meeting on August 17th and would appreciate it if we could schedule a short meeting (1hr) with you to discuss EAC status and priorities either during the evening of August 16th or the morning of August 18th. We would also like to share with you our election system assessment experiences (hardware, policies and procedures) and our ideas around improving the process. In no way will our time be a "sales pitch". We want to improve the process and feel we have valuable input given our role in California as a trusted provider of security services.

We respectfully appreciate your consideration and look forward to hearing from you soon.

Sincerely,
John

BEST PRACTICES IN VOTING SYSTEM
ADMINISTRATION/SECURITY
AND PROVISIONAL VOTING

WORKING GROUP SESSIONS
June 9-10, 2004

DAY ONE: Wednesday, June 9
9-9:20AM Commissioners DeGregorio and Martinez welcome participants and describe the project

Facilitator: Tom Wilkey
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups, Technical Advisors

11-11:20AM Break

11:20-Noon Discussion of Punch Card Challenges, Solutions and Best Practices
Facilitator: Tracy Warren
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups, Technical Advisors

Noon-1PM Discussion of Lever Challenges, Solutions and Best Practices
Facilitator: Tom Wilkey
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups, Technical Advisors

1-2PM Lunch at EAC

2-3PM Discussion of Optical Scan Challenges, Solutions and Best Practices
Facilitator: Tracy Warren
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups, Technical Advisors

3-5PM Discussion of DRE Challenges, Solutions and Best Practices
Facilitator: Tracy Warren
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups, Technical Advisors
DAY TWO: Thursday, June 10
9am-9:15AM Commissioners DeGregorio and Martinez Open Working
Sessions/Summarize Progress from Day One
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups,
Technical Advisors

9:15-11AM
- Punch Card/Optical Scan Breakout Session
  Facilitator: Jennifer
  Punch Card and Optical Scan Working Groups, Craig Burkhardt
- DRE/Lever Breakout Session
  Facilitator: Tracy and Tom
  DRE and Lever Working Groups, Allan Eustis

11-11:15AM Break

11:15-12:30PM Breakout Sessions Report Back
Facilitator: Tom and Group Leaders
Participants: Commissioners, EAC Staff, Contractors, all Voting Systems Working Groups,
Technical Advisors

12:30-1:30PM Working Lunch at EAC

1:30-3PM Provisional Voting Working Group
Facilitator: Tracy Warren
Participants: Commissioners, EAC Staff, Contractors, Provisionals Working Group

Voting Systems Working Groups: Lever, Punch Card, Optical Scan, DREs

Lever Working Group: Tom Wilkey, Brian Hancock, George Gonzalez, Peter Quinn, Betty Weimer

Punch Card Working Group: Jennifer Collins-Foley, Tony Reissig, Richard Bauer

Optical Scan Working Group: Jennifer Collins-Foley, Wendy Noren, Dawn Williams, Lance Ward

DRE Working Group: Tracy Warren, Tom Wilkey, Brian Hancock, Connie Schmidt, Kathleen McGregor

Provisionals Working Group: Tracy Warren, Jennifer Collins-Foley, Tom Wilkey, Peggy Sims, Charlotte Cleary, Sara Harris, Hans von Spakovsky, Brian Smith (EAC), Adam Ambrogi (EAC)

NIST Technical Advisors: Allan Eustis, Craig Burkhardt

(JCF:ConsGl: EAC: RecAgenda:June 8: 7pm)

   A. Top 10 Pre-Election Management Tools
   B. Are You Introducing a New Voting System This Year?
   C. Vendor Issues
      1.) Timing
      2.) Communications
   D. Tried and True Ideas for Pollworker Recruiting and Retention
   E. Key Points on Pollworker Training
   F. 5 Tips on Preventing Voter Error
   G. 5 Things Election Officials Can Do to Make Any Voting System Accessible for Voters with Disabilities
   H. 5 Things Election Officials Can Do to Make Any Voting System Accessible for Voters with Limited-English Proficiency (Multilingual Voters)
   I. Pre-Election Common Issues and Solutions
   J. Election Day / Election Night Common Issues and Solutions
   K. Post-Election Common Issues and Solutions

II. Lever Voting Systems

III. Punch Card Voting Systems

IV. Optical Scan Voting Systems

V. Direct Recording

VI. Provisional Voting: Issues and Solutions

VII. Checklist for HAVA Implementation
I. All Voting Systems: Issues and Best Practices in Administration/Management and Security

A. TOP 10 PRE-ELECTION MANAGEMENT TOOLS:

(1) Develop an Election Checklist Calendar and Stick to it! Best Practice: LA County’s Checklist?

(2) Conduct a pre-election Strategy Session with staff (or vendor) and conduct weekly status meetings. Conduct post-election critique with staff.

(3) Conduct a pre-election Strategy Session with Candidates and Community Organizations. Conduct a post-election critique with Candidates and Community Organizations and other Stakeholders.

(4)

(5)

(6)

(7)

(8)

(9)

(10)

B. ARE YOU ARE INTRODUCING A NEW VOTING SYSTEM THIS YEAR? Conventional wisdom advises never to launch a new voting system in a Presidential Election year. Too many inexperienced voters, too much potential for problems with untested system, untested pollworkers, etc. But it can be done.

5 most important things for introducing a new voting system this year:

(1)

(2)

(3)
C. VENDOR ISSUES.

1) Timing. Vendors should prepare to provide training materials to election officials at an early enough stage so that election officials can adequately train internal staff and prepared pollworker training materials.

5 THINGS YOU CAN DO TO ENSURE TIMELY RECEIPT OF MATERIALS:

(1) Establish timelines.
(2)
(3)
(4)
(5)

2) Communication and Security Checks. If your vendor does the bulk of your election planning, here are some questions to ask:

(1)
(2)
(3)

D.) Tried and True Ideas for Pollworker Recruiting and Retention
Problem: Aging pollworker work force, fewer people volunteering, long hours, low pay, etc.

Solutions:
(1) Student Pollworker Program (para to describe)
(2) College Pollworker Program (para to describe)
(3) County Pollworker Program (para to describe)
(4) Corporate Pollworker Program (para to describe)
E. KEY POINTS ON POLLWORKER TRAINING

Remember: It's not about YOU; it's about THEM. Training presentations should focus on what the pollworkers need to know to do the best job possible.

Training should not occur more than 6 weeks out.

Need to provide training based on adult learning.

Hands-on training is key to a successful polling place on Election Day.

Videos not only provide a break in the lecture-style format of training classes, they also ensure consistency of presentation for key points.

Provide special training on HAVA requirements

Provide a person with whom pollworkers can follow up after class. Los Angeles County, CA, recently began an “Ask Wanda” program. Trainers distributed business cards after training classes for pollworkers to call staffmember Wanda Hamilton on questions they thought of after class ended. The program has been enormously popular (and valuable for tracking those areas that needed to be strengthened in training.)

Coordinate with your local universities in developing your training needs (i.e., credential program, training videos, etc.)

F. 5 TIPS ON PREVENTING VOTER ERROR:

Provide a demo unit for every voting site and encourage every voter to try it.

Voting instructions should have well-developed graphics.
Get feedback on voting instructions through focus groups. (Focus groups need not be sophisticated. They can be college classes, family members, members of the public or community organizations, etc.)
G. 5 THINGS ELECTION OFFICIALS CAN DO TO MAKE ANY VOTING SYSTEM ACCESSIBLE TO VOTERS WITH DISABILITIES:

1) 
2) 
3) 
4) 
5) 

H. 5 THINGS ELECTION OFFICIALS CAN DO TO MAKE ANY VOTING SYSTEM ACCESSIBLE TO VOTERS WITH LIMITED ENGLISH PROFICIENCY:

1) Provide Bilingual Pollworkers and Interpreters. Bilingual Pollworkers and Interpreters can wear identification badges and can assist voters with limited-English proficiency to feel more comfortable in a polling place. They can demonstrate the voting system and translate election verbiage such as “provisional ballot” or “roster”.

Best Practice: Chicago, Illinois translated its pollworker training materials into X languages and most importantly, translated key election verbiage for use at polling places.

2) 
3) 
4) 
5)

Making DRE Voting Systems Accessible
VI. Provisional Voting.

One para re why HAVA mandated provisional ballots – what was intent.

Every jurisdiction should have transparent and uniform standards and procedures for issuing, processing, researching and counting. Provisional ballots.

* **Transparency:** Jurisdictions are already mandated by HAVA to provide feedback to individual voters on the status of their provisional ballot. Counties and states should also report summaries of how many provisional ballots were issued, how many provisional ballots were counted and the reasons for not counting.

  **Best Practice:** South Dakota posted on its' website the number of provisionals per County that were issued in its' June 2004 Special Election.

* **Pollworker Training.** If pollworker error contributed to some provisionals not being counted, the jurisdictions should make recommendations to prevent such pollworker error in future. (Need Best Practice - maybe from Sara?)

* **Voter Comfort Level.** Should not be an intimidating process. **Best Practice:** maybe LA's “Count Me In!” sign?

**ISSUING PROVISIONALS**

("paper or plastic" option issue)

**PROCESSING PROVISIONALS**

**COUNTING PROVISIONALS**
Checklist for HAVA IMPLEMENTATION:

____ Registration
   First-time voter ID requirements
   New forms include DL# or SS#

____ Provisional ballots
   _ Develop envelopes
   _ Develop procedures for issuing
   _ Develop procedures for counting

____ HAVA / Voter Rights Sign

____ Develop Complaint Procedures (coordinate with SOS)
Hi Paul,
I got your message and will be there on Wed. Also, I was going to send you the League's best practices on protecting valid votes and eligible voters, but the powers that be don't want it going to the Commission until a few more changes have been made. I hope to have the final changes done by the end of this week at the latest. Lastly, as you may have seen, DC got its self-certification letter to the Commission on Friday. I delivered the letter and a copy of the regs. describing the District's administrative complaint procedure to Peggy.

I hope to bring a draft of the EAC hearing report -- intro., background, technical experts section and election officials section -- on Wed.

See you Wednesday -- Tracy
Commissioner DeGregorio,

I know you have a lot on your plate right now, but have you made a decision on the attached international visitors? Jennifer called me again a short while ago to check our availability. Thank you.

Brian

Subject Fw: Proposed meeting with State Department-sponsored International Visitors

Commissioner DeGregorio,

Please see the attached request from the Phelps Stokes Fund on behalf of the State Department. They are requesting a briefing for representatives from 19 emerging democracies. The briefing for a group this size will, of course, need to be accommodated elsewhere. (At least until we have the large meeting room furnished). By the way, she does know that we are EAC and not FEC as stated in the email.

Brian

Subject Proposed meeting with State Department-sponsored International Visitors

Mr. Hancock:
Attached please find a project summary and participant list for a group of twenty-one community activists, government officials, journalists, and business professionals from around the world who will be visiting the United States under the auspices of the Department of State’s International Visitor Leadership Program. DoS has asked the Phelps Stokes Fund, a small non-profit organization located here in Washington, to design and administer a three week program which will introduce these distinguished individuals to ways in which US citizens participate in our governance and society.

The group begins their program here in Washington from May 27 – June 2. They will be introduced to how we define civic participation and civil society, and how our federal system and our society both help and hinder participation within the system.

It would be beneficial for this group to understand how various entities support and encourage citizen participation, particularly before they observe the June 8 primaries. I am putting together a panel discussion which will address the role of the media, the role of advocacy groups, and the role of the federal government in informing the public and encouraging active participation. I would very much like to have you, or another representative from the FEC, on this panel to discuss the voter registration process and issues related to access. In particular, the participants may want to hear about the Help America Vote Act, and how that legislation has provided guidance and guidelines to states, where the process is administered.

I have tentatively scheduled this discussion for Tuesday morning, June 1. I welcome the opportunity to discuss your participation in this exciting project. Should you have any questions or concerns, please do not hesitate to contact me via return email or at the number listed below.

I understand that you are out of the office until Monday, May 17. I hope to talk to you shortly after your return. Thank you for your consideration.

Sincerely,

Jennifer Strauss
LIST OF PARTICIPANTS – Citizen Participation Multi-Regional Project

Albania

Mr. Fatbardh KADILLI
Executive Director, Anti-Corruption Albanian Coalition

Belarus

Mr. Maksim HRUZDZEU
Project Coordinator/Interpreter, Public Association Doverie

Bulgaria

Zimbabwe

Mr. Joel GABBUZA
Member of Parliament

These visitors will be accompanied by three English Language Officers:

Ms. Anne EL YIN
Mr. J Barry LEWIS
Mr. Norman SKOUGSTAD
Nearly two centuries ago, Alexis de Tocqueville outlined the character traits that encourage Americans to participate in their self-governance in such large numbers — the strength of the individual, the spirit of volunteerism, and the suspicion of Government. Today, those traits are still evident and our nation’s laws, government, and social landscape reflect the impact of grassroots involvement. The Civil Rights Act of 1965, the Consumer Product Safety Act, the soon-to-be dedicated World War II Memorial on the National Mall, and the current debate on the definition of marriage, all began with action at the local level.

Our decentralized system of government facilitates citizen participation by providing many venues of access — from participating in the parent-teacher association at our neighborhood school, to taking part in citizen advisory committees, to working on local and state issues and elections, as well as at the national level. When the voice of the individual isn’t loud enough, Americans band together to make their voices louder. If politicians turn a deaf ear, citizens can use other peaceful means — referenda and ballot initiatives, lawsuits, or the next election — to effect change.

The U.S. Department of State has asked the Phelps Stokes Fund to develop a three-week program focused on grassroots democracy for elected and appointed officials, civic and community leaders, business representatives, and journalists from around the world. While here, these international visitors will learn that while we enjoy many rights as individuals, we also take an active role to preserve those rights, by becoming involved and making our voices heard. By working separately as well as together, the people of this country ensure that American democracy continues to be a government “of the people, by the people and for the people.”

A schematic outline of the national itinerary and themes is on the next page.

Paul,

FVAP called---Polly who has been travelling overseas is back in the office and would like to confirm the May 6th meeting with you sometime in the morning. They expect about 10 reps from the organizations listed in the attached email. Do you still have a time slot?

Penelope

Here is a sampling of the groups that will be represented at the overseas voting meeting:

Democrats Abroad
Republicans Abroad
Federation of American Women's Clubs Overseas (FAWCO)
Association of Americans Residing Abroad
American Business Council of the Gulf Countries

One of the confirmed attendees will be Lucy Laderich, who works on Legislative Issues for FAWCO.

Thanks
Brian

WPI-Procurement Room 6628
Telephone No. (202) 260-8840
Fax No. (202) 401-3213
Paul,
Thanks so much for your time last week on the telephone. I appreciate your willingness to share such a scarce commodity with me!

We will be pleased to participate in the May 5 discussion in Washington. Our chief technology officer and the principle architect of our eSlate voting system is Neil McClure. He will be attending the meeting and he will make a statement on behalf of Hart InterCivic, and will be available to answer questions. In fact, following the EAC meeting he will be going to an IEEE meeting to discuss voting system standards, so this all works well together.

In addition, Michelle Shafer from Hart InterCivic will attend the meeting. She is responsible for our public affairs and policy coordination, so she will certainly want to be there to listen in on the proceedings. I regret I'll be out of the country, but I'll catch up when I get back.

Thanks also for the reference at IFES. I will check with Mr. Soudriette on his return to the U.S.

Finally, I appreciate your consideration of vendor input into the Technical Guidelines Development Committee that NIST is chairing. I've sent a note to Dr. Bement advising him that we have discussed the issue, so you may hear from him on the subject.

Good luck with your conference on the 5th - I truly appreciate the EAC taking this subject on. I'm hoping there will be more light than heat generated at the end of the day!

David

David E. Hart
Chairman

Subject: VEBA Annual Meeting March 5-7

Brian, per our conversation, I have opened up a place on the Sunday morning program for Paul to speak - 9:45 to 10:30. I want to list him on the agenda as soon as you confirm that he will be available to give us that time. Our meeting starts Saturday morning at 9 a.m. and Sunday @ 8:30 a.m. and we plan in introduce him on several occasions before Sunday morning but I really hope that he will be able to have a place on the program as well. Also, look forward to having him at the head table for the Saturday night banquet. Remind him to pick up his registration packet at the VEBA table so he will have an agenda and the tickets for the events. Again, thanks for all the assistance you have give in making these arrangements.

Ron

Commissioner DeGregorio,

Attached is more information for your upcoming trip to Virginia.

Brian

Paul DeGregorio

Brian, Thanks for your help in making the arrangements for Paul to attend. Please let him know that a guest packet will be waiting for him at the VEBA registration table in the Garden Room on Friday, March 5th. It will have a final agenda and a ticket each for the Saturday luncheon and Banquet. Also, I hope he can attend the reception Friday night at 6:00pm in the Crystal/Empire room - no ticket is necessary for this event. At this moment, I am not sure exactly when he will speak, but hopefully it will be noted on the final agenda. He will definitely be presented to the group several times and perhaps sit at the Head Table on Saturday night.

We are looking forward to seeing him at the Homestead. Thanks Ron.

Dear Participants:

Attached please find a welcome letter from David Carroll, the draft agenda for The Carter Center's meeting on automated voting and a participant list.

I will send the selected readings on electronic voting in separate emails, as some of the attachments are rather large. You will also find links to the documents below.

Please let me know if you have difficulty accessing the documents.

Best Wishes,

Avery

DRAFT AGENDA

AUTOMATED VOTING AND ELECTION OBSERVATION
THE CARTER CENTER, ATLANTA, GA
MARCH 17-18, 2004

We hope to have a rich and lively discussion during this meeting and we are aware that it will be tempting to combine discussion of voting technology, country examples and challenges to international election observation. We have broken down each of these elements to structure a more thorough and systematic discussion. To this end, we have designed the agenda as follows:

- Session 1 (morning of March 17) will provide an overview of the field of automated, or electronic, voting, as well as a technical comparison of the main systems in use.
- Sessions 2 (morning of March 17) will examine the political impact of automated voting technology.
- Sessions 3-4 (afternoon of March 17) will discuss automated voting issues in several cases studies.
- Session 5 (morning or March 18) will examine the methodological challenges of observing automated voting.

After the heading for each section we have listed a brief number of questions or topics to help guide our discussion.

Thursday, March 17, 2005

8:30 – 9:00
Participants arrive at The Carter Center – coffee and breakfast snacks (transportation provided from hotel)

08:45 – 09:30: Introductions and Overview of Agenda
Chairs: David Carroll and Jennifer McCoy
- What is automated voting and who uses it?
- Opportunities, risks and challenges
- Security risks and opposition to automated voting
- Challenges for election observation

09:30 – 11:00: Session One: Technical Comparison of Automated Voting Systems
Chair: Keith Jennings
Presenter: Helena Alves and Avi Rubin
Discussion topics:
- Brief introduction to automated voting in the global context
- Touchscreen vs. Optical scanning systems
- Networked vs. non-networked systems
- Voter-Verifiable Audit trail (VVAT) vs. non-verifiable systems
• Internet voting/phone voting, other methods of automated voting.
• Issues raised by smartcards, personal identification numbers, etc.

11:00 – 11:15:  Coffee Break

11:15 – 12:30:  Session Two: The political impacts of automated voting technology
Chair: Catherine Weiss
Presenters: Eric Rudenshiold
Discussion Topics:
• Advantages and disadvantages of electronic voting technology
• Costs and benefits for electoral authorities
• Automated voting and voter confidence
• Private sector service provision to public electoral management bodies
• Intellectual property rights and principle of transparency in election administration
  ▪ What are the criteria that electoral authorities use when choosing automated technology? Who advocates for automated voting and why?
  ▪ What are the effects of electronic voting on disadvantaged or minority groups?

12:30 – 2:30 pm  Lunch at Carter Center – Vendor demonstrations of electronic voting machines. (Vendor tables, with demonstration equipment, will be set up outside of the meeting space for participants to visit)

2:30 – 3:00 pm  Introduction to election observation challenges
Chairs: David Carroll and Jennifer McCoy
Discussion Topics:
• Brief outline of the goals of the case study discussions and challenges of observing automated voting

3:00 – 4:30  Session Three: Automated voting issues in The Netherlands, Kazakhstan, and Brazil
Chair: Katelina Montana
Presenters: Herman Ruddijs, Gerald Mitchell and Paulo Camarao, Carlos Vellos and Tarquato Jardim
• Debates and issues related to automated voting in each country
• Challenges faced by election observers as applicable

4:30 – 5:00  Coffee Break
5:00 – 6:30  
Session Four: Automated voting issues in USA and Venezuela  
Chair: Gerald Mitchell  
Presenters: Merle King, Ted Selker, David Dill, and Rachel Fowler  
Discussion Topics:  
• Debates and issues related to automated voting in each country  
• Challenges faced by election observers as applicable

19:00 – 21:30  
Dinner  
Remarks on US election reform and electronic voting from Paul DeGregorio

Friday, March 18, 2005

08:45 – 09:00  
Participants arrive at The Carter Center –coffee and breakfast snacks (transportation provided from hotel)

09:00 - 09:15  
Review of previous day’s discussion

09:15 – 10:30  
Session Five: Operational and technical challenges of observing automated voting  
Chairs: Jennifer McCoy and David Carroll  
Discussion Topics:  
• What is the impact of automated voting on election observation methodology?  
  o Are different methods required for different systems, and/or different stages of the automated process?  
  o When should observation of automated systems begin?  
  o What expertise/training is needed to observe automated voting systems?

10:30-10:45  
Coffee Break

10:45-12:15  
Session Five continued  
• What is the potential impact of automated voting on parallel vote tabulation methodology?  
• How can election observers increase public confidence in automated voting?

12:15 – 12:45  
Concluding remarks  
Participants depart for airport or hotel (transportation provided)

March 10, 2005

Dear Participant:

On behalf of The Carter Center, I want to thank you for agreeing to participate in the March 17-18 meeting on Automated Voting: Challenges and Lessons for Election Observation. The purpose of the meeting is for monitoring organizations and technical electoral experts to share ideas and expand our common knowledge of automated voting systems and the challenges they pose for election observation and assessment missions.

In order to encourage a frank and open discussion of these issues, all of the sessions will be private and off-the-record. After the meeting, we will circulate a rapporteur’s report to the participants summarizing key points of the discussion, but without attribution.

Along with this letter, please find a background packet with the final agenda, a list of participants and selected readings on electronic voting. Please take a few moments to look at these documents prior to the March 17-18 meeting in Atlanta. We also invite you to bring to the conference any documents on observing automated voting that you would like to share with other participants.

If you have any questions, please do not hesitate to contact Ms. Avery Davis-Roberts by phone on 404. 420.3807, or by email at aodavis@emory.edu. We look forward to working with you.

Sincerely,

[Signature]

David Carroll
Interim Director
Carol,

Per our SOS, this type of item or recommendation should be referred to one commissioner for review and then that commissioner will make a recommendation to the other commissioners. Let's not deviate from that.

By way of this memo, I am asking Comm Soaries to review this information and make a recommendation.

Subject: Cyber Security Industry Alliance - Susan Zevin - Request for meeting

Commissioners -

Susan Zevin contacted me several weeks ago to set up a meeting between the Commissioners and Paul Kurtz, the Executive Director of the Cyber Security Industry Alliance (CSIA). CSIA is an industry advocacy group that has been formed to promote improvement of cyber security through public policy, education and technology-focused initiatives. Their membership is comprised of major cyber security software providers such as Symantec, Entrust, McAfee, Check Point (they've been getting some unfavorable press lately), and others. They are "interested in assisting the Commission in the evolution of new approaches to voting systems." Susan was rather vague about what this means. I suggested that it might be useful for this group to review and comment on the TGDC/NIST work on the NIST website. Susan indicated they are interested in "higher level, big picture policy matters." Whatever these matters are, she indicated that they can only be discussed directly with the Commissioners, not with some intermediary.

Checked out this group with some colleagues in the security business. The feedback I received was that they're relatively new on the scene, only one of several similar industry advocacy groups, and that they're looking for an issue to make their mark on. (There might have been some professional rivalry seeping through in these comments.) Mr. Kurtz has pretty impressive credentials, having been National Security Council senior director of the Office of Cyberspace Security and a member of the President's Critical Infrastructure Protection Board (prior to 2003).

Is there interest in a meeting by all or some of you?

Carol A. Paquette
Interim Executive Director
U.S. Election Assistance Commission

RE: FOIA Request

Dear Ms. Coney:

Per our telephone discussion this afternoon, this letter serves to memorialize the clarifications made by EPIC regarding its Freedom of Information Act request. At a teleconference meeting between the EAC and EPIC, you were kind enough to clarify your May 10, 2005 FOIA request. Specifically, you noted that the request is limited to the following documents:

- Any and all transcripts, meeting minutes or similar documents memorializing the Technical Guidelines Development Committee (TGDC) meetings or hearings which are in the possession of the EAC and not publicly available on the NIST web site.
- Any and all EAC documents or communications regarding the selection or appointment of members of the TGDC.
- All Public Financial Disclosure Forms (OGE Form 278) filed by members of the TGDC.
- The recommended Voluntary Voting Systems Guidelines presented to the EAC by the TGDC.

I believe the above accurately reflects our conversation this morning. If you believe I have missed some element of the conversation, please let me know. I can reached at (202)566-1392.

Thank you for your assistance in this matter. You will hear from us regarding this request soon.

Sincerely,

Gavin S. Gilmour
Associate General Counsel
Ms. Lillie Coney
Associate Director
Electronic Privacy Information Center (EPIC)
1718 Connecticut Ave, NW
Washington, DC 20009

Dear Ms. Coney:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U. S. Election Assistance Commission (EAC) on May 10, 2005. The request was clarified in a May 20, 2005 phone conversation as memorialized in a letter sent to you on that same day. Your clarified request sought certain records from “March 23, 2004 to the present,” including:

- Any and all transcripts, meeting minutes or similar documents memorializing the Technical Guidelines Development Committee (TGDC) meetings or hearings which are in the possession of the EAC and not publicly available on the NIST web site.
- Any and all EAC documents or communications regarding the selection or appointment of members of the TGDC.
- All Public Financial Disclosure Forms (OGE Form 278) filed by members of the TGDC.
- The recommended Voluntary Voting Systems Guidelines presented to the EAC by the TGDC.

With regard to your request for transcripts, minutes and similar documents not found on the NIST web site, the EAC has no records responsive to the request. All available minutes, transcripts and digital recordings of TGDC meetings and hearings are maintained by NIST on the web at www.vote.nist.gov.

In response to your request for documents or communications regarding the selection or appointment of TGDC members, all responsive documents have been attached (Attach. 3). A few of these documents contain redactions required by FOIA Exemption 6 (5 U.S.C. §552(b)(6)), to protect personal information and avoid unwarranted invasions of personal privacy. Generally, the redacted information included personal identifiers and contact information (i.e. home addresses and phone numbers).
As for your request for Public Financial Disclosure Forms (SF 278) filed by members of the TGDC, this information may be released under Section 105 of the Ethics in Government Act of 1978 (and 5 C.F.R. §2634.603). The law requires that prior to the release of Public Financial Disclosure Forms the requestor affirm his or her understanding of the limited use of the forms. I have attached OGE Form 201 (Attach. 4). You may use this form to meet the above requirements. The form should be sent to NIST, as the only member of the TGDC presently required to file a SF 278 is a NIST employee, Dr. Hratch Semerjian. As such, NIST is the custodian of this record.

Finally, in response to your request for the Voluntary Voting Systems Guidelines presented to the EAC by the TGDC, a copy of this document is attached (computer disk). (Attach. 5).

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

[Signature]

The Honorable Paul S. DeGregorio
United States Election Assistance Commission
1225 New York Avenue N.W., Suite - 1100
Washington, DC 20005

RE: Freedom of Information Act Request

Dear Commissioner DeGregorio,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning the Technical Guidelines Development Committee (TGDC) from March 23, 2004 to the present (including but not limited to electronic records) including records regarding appointments to the TGDC, disclosure statements by members of the TGDC, meetings, hearings, and work of the TGDC related to voting technology standards. Please, also provide all printed meeting and hearing transcripts for the TGDC.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at coneypic.org.

Sincerely,

Lillie Coney
Associate Director

RE: Freedom of Information Act Request

Dear Commissioner DeGregorio,

This letter constitutes a request under the Freedom of Information Act ("FOIA"), 5 U.S.C. § 552, and is submitted on behalf of the Electronic Privacy Information Center (EPIC).

We are seeking all agency records concerning the Technical Guidelines Development Committee (TGDC) from March 23, 2004 to the present (including but not limited to electronic records) including records regarding appointments to the TGDC, disclosure statements by members of the TGDC, meetings, hearings, and work of the TGDC related to voting technology standards. Please, also provide all printed meeting and hearing transcripts for the TGDC.

For purposes of FOIA fee assessments, we request that EPIC be placed in the category of "news media" requester. The U.S. District Court for the District of Columbia has determined that EPIC qualifies for "news media," fee status, EPIC v. Department of Defense, 241 F.Supp.2d 5 (D.D.C. 2003). We also request a waiver of all processing fees, as release of this information will contribute significantly to the public's understanding of the activities and operation of the government.

Thank you for your consideration of this FOIA request. As the FOIA regulations provide, I look forward to your response within 20 working days. Should you require additional information, please contact me at 202-483-1140 x 111 or by e-mail at cone@epic.org.

Sincerely,

Lillie Coney
Associate Director

RE: FOIA Request

Via Facsimile Transmission
(202) 483-1248

Dear Ms. Coney:

Per our telephone discussion this afternoon, this letter serves to memorialize the clarifications made by EPIC regarding its Freedom of Information Act request. At a teleconference meeting between the EAC and EPIC, you were kind enough to clarify your May 10, 2005 FOIA request. Specifically, you noted that the request is limited to the following documents:

- Any and all transcripts, meeting minutes or similar documents memorializing the Technical Guidelines Development Committee (TGDC) meetings or hearings which are in the possession of the EAC and not publicly available on the NIST web site.
- Any and all EAC documents or communications regarding the selection or appointment of members of the TGDC.
- All Public Financial Disclosure Forms (OGE Form 278) filed by members of the TGDC.
- The recommended Voluntary Voting Systems Guidelines presented to the EAC by the TGDC.

I believe the above accurately reflects our conversation this morning. If you believe I have missed some element of the conversation, please let me know. I can reached at (202) 566-1392. Thank you for your assistance in this matter. You will hear from us regarding this request soon.

Sincerely,

Gavin S. Chilour
Associate General Counsel
Craig,

As I may have discussed with you, the EAC would like to announce at its March 23rd first public meeting the formation of the Technical Guidelines Development Committee (TGDC) and, possibly, when their first meeting will be held. The formation of this committee will put into motion a timetable to develop and approve the voluntary standards outlined in HAVA. We would like to discuss with NIST what HAVA requires the TGDC to do--and what we can do realistically what the funds we may or may not have. We can also work on a strategy whereby we put the things we cannot do in FY04 into our (or your) FY05 budget request.

There has been some confusion in recent days over what monies NIST does or does not have available for this purpose. Today, Penelope Bonsall of my staff was told by Dr. Zevin that there was only $350,000 to work with for FY04--and that very little progress with standards could be made with it. In addition, Dr. Zevin's presentation at NASS and NASED has confused some people because they didn't quite understand that when Susan included 7 pages of "what could be done in the next six months" in her presentation, some folks thought that is what NIST will do in 2004. I understood it to be the NIST wish list and was not sure what portion will come under the TGDC umbrella.

In addition to all of this, we have been reviewing the Human Factors report developed by NIST and have some questions. We would like to release this report at our March 23 meeting. We would like for representatives of NIST to be at our public meeting to discuss the TGDC and Human Factors report.

Therefore, I would like to propose that the following folks meet ASAP (Monday or Tuesday of next week; March 8 or 9) to talk about these issues.

Paul DeGregorio, EAC
Penelope Bonsall, EAC
Craig Burkhardt, DOC
Dr. Zevin, NIST
Allan Eustis, NIST

I think it might be best if the NIST folks heard from you to set this meeting up. Can you (or your designee) call Penelope Bonsall at 202-694-1097 with a time and place (we are flexible) for a meeting on Monday or Tuesday?

The agenda could be as follows:
1) TGDC: expectations on who will be appointed; what is it they must/can do in FY04 and FY05. What is the TGDC timetable?
2) Human Factors report
3) Dr. Zevin's "what could be done in the next 6 months";
4) Funding issues for all of this. Can we get money from DOD?

I am on travel on Friday, March 5 but can be reached on my federal cell phone which is [redacted]

Thanks for your help and attention to this important matter.

Paul DeGregorio
Paul-

Along with the NIST voting team, I reviewed the names and biographies submitted by Congressman Holt's Office for nomination to the four "open" positions on the Technical Guidelines Development Committee. Avi Rubin, Barbara Simons and Michael Alvarez are all extremely qualified for the TGDC. In fact, during our deliberations, the NIST voting team considered each of these individuals for inclusion on our final list. However, there were important reasons for choosing the individuals we did. Rather than criticize these fine nominees, any of whom would bring expertise to the TGDC, I will list the criteria for NIST's final selection of nominees:

1. Technical Competence in Standards Development Processes,
2. Open Minded and Unbiased Viewpoints. No pre-set agendas,
3. Global view of security and usability issues related to voting systems and voting equipment
4. Unique "lifetime/career" experiences and expertise not available from other appointed TGDC members

I would also note that like Michael Alvarez, NIST nominee Ron Rivest was also a co-author of the Cal tech/MIT report. We at NIST stand by our nominees as the strongest candidates to meet our strict criteria for inclusion on the TGDC.

I hope this description of our TGDC nominee evaluation process will assist the EAC in the selection of the four "open" positions. We will shortly provide you with a "final four" list from the original list of six individuals. We have broadened our selection to include women who were on our original list.

I will send you some talking points for the March 23rd EAC meeting tomorrow morning. I am a bit swamped today having just returned from leave.

Susan-

I have forwarded your e-mail on to the Election Assistance Commission. IEEE will still likely receive a formal letter requesting a nominee, but your response is quite helpful and will speed the process of spinning up the TGDC.

thanks

At 05:22 PM 3/18/2004 -0500, you wrote:

Dear Allan:

Judy Gorman referred me your email query about a formal nomination of the IEEE representative to the Technical Guidelines Development (TGD) Committee of the Election Assistance Commission (EAC).

I spoke with Donald Heirman, IEEE Standards Association President Elect and IEEE-SA Board of Governors (IEEE-SA BoG) Liaison to Standards Coordinating Committee 38 (SCC38), which is the group within IEEE working on voting standards. Don asked that I write to let you know that last year, the IEEE-SA BoG named Stephen H. Berger as its choice to represent IEEE on the TGD Committee. Stephen is a member of the IEEE-SA Standards Board and Chair of SCC 38.

I hope that this email answers your questions. I would be glad to provide further information or assistance, if needed.

Sincerely,

Susan

Anne Caldas has held the position of Director of Procedures and Standards Administration at the American National Standards Institute (ANSI) for more than eight years. In this capacity, she is the primary staff support for the work of three of the primary committees that implement the American National Standards process: the ANSI Executive Standards Council (ExSC), the ANSI Board of Standards Review (BSR) and the ANSI Appeals Board. The related program areas for which she is responsible include the accreditation and audit of standards developers (of which there are about 200), the accreditation of US Technical Advisory Groups (TAGs) to International Standards Organization (ISO), the approval of standards as American National Standards (ANS) (approximately 10,000 ANS exist) and the implementation of a multi-level appeals process. Prior to her current position, she worked for twelve years at the Human Resources Administration of the City of New York, serving in a final capacity as Director of Procedures and Analysis for the Office of Employment Services. She holds a Masters Degree in public policy.

Commissioner DeForest B. Soaries, Jr.
Chairman, Election Assistance Commission
1225 New York Avenue, N.W.
Washington, D.C. 20005

Dear Commissioner Soaries:

I am pleased to notify the Commission that the following four individuals have agreed to serve on the Technical Guidelines Development Committee (TGDC) pending financial disclosure clearance and final approval by the Election Assistance Commission (EAC):

- Dr. Ronald L. Rivest
- Ms. Whitney Quesenbery
- Dr. Daniel Schutzer
- Mr. Patrick J. Gannon

I am confident that each of these individuals will bring unique technical competence in standards development to the challenging tasks that await the TGDC. In my conversations with the nominees, they each expressed an appreciation of the importance of the guidance that they will offer the EAC as we implement the Help America Vote Act of 2002. I have enclosed their résumés and am most willing to answer your questions concerning their qualifications.

Sincerely,

Arden L. Bement, Jr.

Professor Rivest is the Viterbi Professor of Computer Science in MIT's Department of Electrical Engineering and Computer Science. He is a member of MIT's Laboratory for Computer Science, a member of the lab's Theory of Computation Group and is a leader of its Cryptography and Information Security Group. He is also a founder of RSA Data Security. (RSA was bought by Security Dynamics; the combined company has been renamed to RSA Security.)

Professor Rivest has research interests in cryptography, computer and network security, and algorithms.

Professor Rivest is a Fellow of the Association for Computing Machinery and of the American Academy of Arts and Sciences, and is also a member of the National Academy of Engineering. Together with Adi Shamir and Len Adleman, he has been awarded the 2000 IEEE Koji Kobayashi Computers and Communications Award and the Secure Computing Lifetime Achievement Award. He has also received, together with Shamir and Adleman, the 2002 ACM Turing Award. Professor Rivest has received an honorary degree (the "laurea honoris causa") from the University of Rome. He is a Fellow of the World Technology Network and a Finalist for the 2002 World Technology Award for Communications Technology.

Professor Rivest is an inventor of the RSA public-key cryptosystem. He has extensive experience in cryptographic design and cryptanalysis, and has published numerous papers in these areas. He has served as a Director of the International Association for Cryptologic Research, the organizing body for the Eurocrypt and Crypto conferences, and as a Director of the Financial Cryptography Association.

He received a B.A. in Mathematics from Yale University in 1969, and a Ph.D. in Computer Science from Stanford University in 1974.

He has also worked extensively in the areas of computer algorithms, machine learning, and VLSI design.

Biography

Whitney Quesenbery is the director of the UPA Voting and Usability Project, a role she took on when she joined the board just days after the 2000 US Presidential election. This project has focused on the human side of the voting experience, and has worked to raise awareness of the need for usability and user-centered design in voting systems as with all technology. Whitney was on the advisory council for the FEC project on human factors in voting systems. A discussion group brings together usability advocates and researchers from around the world. Information is available on the UPA web site – www.usabilityprofessionals.org

In her 'civilian' life, Whitney Quesenbery is a user interface designer, design process consultant, and highly regarded speaker. She is an expert in developing new concepts that achieve the goal of meeting business, user, and technology needs. She has extensive user interface design experience and has produced award winning multimedia products, user interfaces, web sites, and software applications.

She is the owner and principal consultant for Whitney Interactive Design, LLC (www.WQusability.com) where she continues the work begun during her dozen years at Cognetics Corporation. Whitney’s projects ranged from online financial news retrieval to hospital management software, web applications, and corporate information tools for companies such as the TriZetto Group, FDA, Open University, Armstrong, Novartis, Deloitte Consulting, Dow Jones, McGraw-Hill, Siemens, Hewlett-Packard, and Eli Lilly.

Whitney is active in the user experience community as a member of the Board of Directors for the Usability Professionals’ Association (UPA) and the past-manager of the Society for Technical Communication (STC) Special Interest Group on Usability.

Experience

2002 - Present: Whitney Interactive Design, LLC
Consultancy in user-centered design, interface design and usability
Clients include:
- Trizetto
- ITG - Interpersonal Technology Group
- IRS
- Blackbaud

1990 - 2002: Cognetics Corporation
Principal and Senior Vice President for Design
Key accomplishments
- One of the primary developers for LUCID, a user-centered approach to user experience design
- Product management and documentation for Hyperties 3.0 and 4.0, released in 1992 and 1995
• Usability training and process implementation for Cognetics and clients
• Developed professional skills evaluation process for staff designers
• Principal or lead designer for design and consulting projects:
  • Web-based applications for healthcare, pharmaceutical, financial services

President and CEO of the Organization for the Advancement of Structured Information Standards (OASIS). In addition to serving on the OASIS Board of Directors, Mr. Gannon has served since 2000 with the United Nations Economic Commission for Europe (UNECE), as Chairman of the Team of Specialists for Internet Enterprise Development, which advises governments in transitional economies on best practices for electronic business. He also serves on the ebXML (electronic business using extensible Markup Language) Joint Coordinating Committee together with management from UN/CEFACT. He has worked for BEA Systems, where he served as Senior Vice President in the E-Commerce Integration Division. Prior to BEA, Mr. Gannon served as Vice President of Marketing and Industry Programs at Netfish Technologies and as Vice President of Strategic Programs for the CommerceNet Consortium, directing research and development efforts in new Internet commerce standards such as XML. While at CommerceNet, he served as the first Project Leader for RosettaNet and as Executive Director for the Open Buying on the Internet (OBI) initiative. Mr. Gannon is co-author of the book: "Building Database-Driven Web Catalogs," and is an international speaker on electronic business. Mr. Gannon has also provided guidance to governmental leaders (ministers and heads of state) on adoption of electronic business (Information & Communication Technology) strategies to facilitate economic growth; which has included Lee Teng-hui, President of the Republic of China, and Askar Akayev, President of the Kyrgyz Republic.
Arden L. Bement, Jr.
Acting Director
National Science Foundation (NSF)

Dr. Bement joined NSF from the National Institute of Standards and Technology, where he has been director since Dec. 7, 2001. As head of NIST, he oversees an agency with an onsite research and administrative staff of about 3,000, complemented by a NIST-sponsored network of 2,000 locally managed manufacturing and business specialists serving smaller manufacturers across the United States.

Prior to his appointment as NIST director, Bement served as the David A. Ross Distinguished Professor of Nuclear Engineering and head of the School of Nuclear Engineering at Purdue University. He has held appointments at Purdue University in the schools of Nuclear Engineering, Materials Engineering, and Electrical and Computer Engineering.

Bement came to the position as NIST director having previously served as head of that agency's Visiting Committee on Advanced Technology, the agency's primary private-sector policy adviser and as head of the advisory committee for NIST's Advanced Technology Program. Along with his NIST advisory roles, Bement served as a member of the NSF's National Science Board from 1989 to 1995.

Bement joined the Purdue faculty in 1992 after a 39-year career in industry, government, and academia.

He holds an engineer of metallurgy degree from the Colorado School of Mines, a master's degree in metallurgical engineering from the University of Idaho and a Ph.D. in metallurgical engineering from the University of Michigan. He is a member of the U.S. National Academy of Engineering.
Arden L. Bement, Jr., became Acting Director of the National Science Foundation on February 22, 2004.

He joins NSF from the National Institute of Standards and Technology, where he has been director since Dec. 7, 2001. As head of NIST, he oversees an agency with an annual budget of about $773 million and an onsite research and administrative staff of about 3,000, complemented by a NIST-sponsored network of 2,000 locally managed manufacturing and business specialists serving smaller manufacturers across the United States. Prior to his appointment as NIST director, Bement served as the David A. Ross Distinguished Professor of Nuclear Engineering and head of the School of Nuclear Engineering at Purdue University. He has held appointments at Purdue University in the schools of Nuclear Engineering, Materials Engineering, and Electrical and Computer Engineering, as well as a courtesy appointment in the Krannert School of Management. He was director of the Midwest Superconductivity Consortium and the Consortium for the Intelligent Management of the Electrical Power Grid.

Bement came to the position as NIST director having previously served as head of that agency’s Visiting Committee on Advanced Technology, the agency’s primary private-sector policy adviser; as head of the advisory committee for NIST’s Advanced Technology Program; and on the Board of Overseers for the Malcolm Baldrige National Quality Award.

Along with his NIST advisory roles, Bement served as a member of the U.S. National Science Board from 1989 to 1995. The board guides NSF activities and also serves as a policy advisory body to the President and Congress. He also chaired the Commission for Engineering and Technical Studies and the National Materials Advisory Board of the National Research Council; was a member of the Space Station Utilization Advisory Subcommittee and the Commercialization and Technology Advisory Committee for NASA; and consulted for the Department of Energy’s Argonne National Laboratory and the Idaho National Engineering and Environmental Laboratory.

He has been a director of Kelthley Instruments Inc. and the Lord Corp. and was a member of the Science and Technology Advisory Committee for the Howmet Corp. (a division of ALCOA).

Bement holds an engineer of metallurgy degree from the Colorado School of Mines, a master’s degree in metallurgical engineering from the University of Idaho, a doctorate degree in metallurgical engineering from the University of Michigan, an honorary doctorate degree in engineering from Cleveland State University, and an honorary doctorate degree in science from Case Western Reserve University. He is a member of the U.S. National Academy of Engineering.
Paul W. Craft

Biographical Sketch

Mr. Craft is a true Florida native, born in Tallahassee, Florida.

He graduated from Florida State University in 1976 with a B.S. in Business and Hotel Restaurant Administration. After 6 years in restaurant management he returned to Florida State for additional work in accounting and became a Certified Public Accountant in 1986 and a Certified Information Systems Auditor in 1992.

From 1982 to 1991, he was employed as an auditor by the Florida Department of Revenue. He began as a tax compliance auditor was promoted to an audit manager. In 1987 he was picked to head a task force investigating embezzlements within the tax refund section. Using a combination of statistical sampling, internal control analysis and computer modeling the investigation concluded with successful prosecutions.

In 1991 he was hired by the Florida Department of State as a Computer Audit Analyst in the Voting Systems Certification Section. In 1994 he began managing the section. In 2001, the Florida Legislature put significant resources into elections reform including expanding the section into a bureau with Mr. Craft as Chief.

Since the early 1980's Mr. Craft has been active in the NASED ITA Board and its technical subcommittee. His Bureau of Voting Systems Certification has been instrumental in implementing Florida's 2001 election reforms, the 2002 election accessibility act, and is now implementing the provisions of HAVA.

Mr. Craft lives in Tallahassee with his

018860
Paul W. Craft
Certified Information Systems Auditor

Current Employment

Bureau Chief, Bureau of Voting Systems Certification, Division of Elections, Florida Department of State.

The Bureau consists of four sections:

The Voting System Section:
- establishes standards for computer based election systems, as well as testing and evaluating system compliance with existing state and federal election standards.
- provides oversight for the use of election systems by county election offices.
- provides technical assistance, expert witness, educational and management advisory services to county election offices.

The National Voter Registration Administration Section:
- provides oversight and training under the requirements of the Florida Voter Registration Act and the National Voter Registration Act.
- provides coordination for training programs and workshops conducted by the Division of Elections.
- coordinates publications for the Division of Elections.

The Data Processing Section
- designs, develops, maintains and supports users of the Divisions Of Elections' custom computer applications.
- manages the Divisions Of Elections' web presence. (See http://election.dos.state.fl.us)
- maintains and operates the Florida Statewide Voter Registration Database.
The Florida Voter Registration System Section

- design and development of the new Florida Voter Registration System for deployment in January 2006, under the Help America Vote Act.

Education

Florida State University – B.S. Hotel and Restaurant Administration. Additional work in Accounting to meet Certified Public Accountant requirements. Continuing Professional Education to maintain CPA and CISA certifications.

H. STEPHEN BERGER
President of the General Partner
stephen.berger@ieee.org

PROFILE

Professional project manager with specialization in:

- Government and Industry Relations,
- Advanced technology business planning,
- Standards development and regulatory management.

20 years of product development and technology planning experience.
Member of the IEEE Standard Board and chair of the IEEE EMC Society Standards Development Committee. Currently chairs IEEE Project 1583, standard for voting equipment. Project management experience in Telecommunications, Information Technology and Instrumentation Industries, with strong record, in the areas of EMC (Electromagnetic Compatibility), RF safety and Disability Issues.

SELECTED ACCOMPLISHMENTS

IEEE Standards Board and New Standards Committee
1st Vice-President, NARTE (National Association of Radio and Telecommunications Engineers)
Chair, IEEE EMC Society Standards Development Committee
Invented the EHR GTEM, patented, gained FCC approval and implemented its use, improving test efficiency by >80%. Awarded Siemens’ highest award for technical contribution to the business.
Established EMCO’s electromagnetic field sensing products line base upon technology transfer with NIST in Boulder, Co. This product line grew to 15% of total revenues in 3 years.
Current President and co-founder of the Association of Access Engineering Specialists (AAES)
Member of 2 US Access Board Federal Advisory Committee:

Telecommunications Access Advisory Committee (TAAC) (1996-1997) and
Electronic Information Technology Access Advisory Committee (1998-1999)

Invited presenter on disability access at EU Ministerial Conference, April 2000 in Lisbon, Portugal
EMC AND ENVIRONMENTAL TESTING

REGULATORY COMPLIANCE

Improved test department throughput by 5 times, with no increase in personnel. This was accomplished by extensive automation, the invention of new, patented test technology.
Increased total revenues by 15% at EMCO because of antenna and instrumentation designs
Member of key standards committees for EMC, RF Health, Accessibility and related areas.

PROFESSIONAL AWARDS

Certificate of Appreciation for RESNA for contributions to the field of rehabilitation engineering, 1997.
SHHH (Self Help for Hard of Hearing People) Friend of People with Hearing Loss 2001 award.

PATENTS

6,744,750: Replicating and Recombinant Networking Systems and Methods for Wireless Networks
6,684,063: Integrated Hearing Aid for Telecommunications Devices
6,380,896: Circular polarization antenna for wireless communication system
6,225,917: Electromagnetic Field Probe Having a Non-Electrical Transmission Modality
5,754,054: Apparatus and Method for Determining the Source and Strength of Electro-magnetic Emissions
5,589,773: System and Method for Making Electromagnetic Measurements Using a Tiltable Transverse Electromagnetic Cell and a Fixed Tilt Sample Holder
EP00805562A3: Radio-Frequency Hearing Aid Protector for Wireless Communications Products

PROFESSIONAL BACKGROUND

Biographical Sketch

Donetta Davidson, Colorado Secretary of State

“For me, growing up in a rural area really exemplified the community family, it is what inspired me to run for office. Getting involved in the Colorado Community has been one of the most rewarding experiences of my life. I highly recommend it!”

Donetta Davidson was born into a military family in Liberal, Kansas in 1943. She became a Coloradoan shortly thereafter when her family moved first to Two Buttes then to Las Animas where they settled. When ever possible Donetta spends time with her family.

Official Positions:

- Bent County Clerk and Recorder, Las Animas, Colorado
  Elected in November 1978 and served until January 1986
- Director of Elections, Colorado Department of State
  Appointed in January 1986 and served until December 1994
- Arapahoe County Clerk and Recorder, Littleton, Colorado
  Elected in November 1994, re-elected in November 1998, and served until July 21, 1999
- Colorado Secretary of State
  Appointed by Governor Bill Owens on July 22, 1999
  Elected in November 2000
- Treasurer, National Association of Secretaries of State, Elected in July 2003
- Member of the Elections Committee for the National Association of Secretaries of State
- Will serve as the President of the National Association of Secretaries of State in 2006

Experience:

- Elections Officer, Colorado Department of State, supervising the county clerks in all election matters pertaining to the Primary/General elections, including mail ballot; assisting with recall issues; municipal, special district, and school district elections
- Legislative liaison for the Secretary of State
- Legislative Liaison for the County Clerk Association
- Speaker at six Postal Training Seminars held in various cities, 1998
- Chairman of committee that developed the only logo ever used by election officials for mailings and a User’s Guide for election officials and post offices to facilitate lower mailing costs, as well as, ensuring delivery of official election mail to electors
• Speaker, National Postal Forum, 1998
• Participant, US Postal Service National Training broadcast, 1998
• Expert speaker on the election process
• Participation on state and federal levels concerning legislative changes

Accomplishments:

• Recipient, Las Animas High School Business Department, Employer of the Year, 1984
• President, Colorado State Association of County Clerk and Recorders, 1983 to 1984
• Executive Board Member, National Association of County Clerk and Recorders, 1995 to 1999
• President, National Association of State Election Directors (NASED), 1994
• Recipient, Henry Toll Fellowship of Council of State Governments, 1993
• Member, International Association of Clerks, Recorders, Election Officials, and Treasurers (IACREOT), 1995 to 1999
• Appointment to Federal Election Commission Advisory Panel, 1995 to present
• Chairman, Legislative Committee for Colorado State Association of County Clerk and Recorders, 1996 to 1999
• Chairman, Joint Elections Officials Liaison Committee (JEOLC) Postal Service Task Force, 1997 to present
• Appointment to the Election Center Board of Directors, 1998 to present
• Appointment to the National Association of State Election Directors Voting Systems/Independent Test Authority Accreditation Board, 1998 to 2003
ALICE P. MILLER

Alice P. Miller was appointed Executive Director by the Board of Elections and Ethics in July 1996, while serving as the General Counsel for the agency. Uniquely, she served in the dual capacity and was able to sustain the major operations of the Board during two major elections: the City Council Primary and Presidential election cycles. This required maintaining and promoting the Board's mission from both a legal and administrative perspective. Since her appointment as the permanent Executive Director in 1997, progress at the agency to date has included:

- modifying the training component of the pollworker unit to include professionally produced training videos that are used to supplement the in-house hands on training, and testing of election day workers; the video ultimately minimizes the costs for outside trainers, and ensures that all assigned election day workers receive uniform information about election day processes and procedures;

- reorganization of agency operations, including combining the data processing unit to function in conjunction with the registration processing component of the agency, thereby resulting in direct supervision and minimizing functions of the systems management branch;

- upgrading and enhancement of the 20 year old voter registration and ballot tabulation system to an optical scanning operation that will add ease to the voting process, reduce election day support requirements, and centralized daily in-house operations;

- implementing for the first time ever a major comparison of the local voter roll with contiguous jurisdictions and instituting procedures for making referrals of obvious violators to the Office of the United States Attorney for investigation and possible convictions;

- maintenance of the voter roll by implementing a data exchange program with other District government agencies to track individuals that may have failed to notify the Board of a change of address or residency; checking voter registration information by utilizing the National Change of Address Program (NCOA) and the National Social Security Death List;

- improvement of customer service through the development of the Board's website; the continued development of the website has evolved from an initial posting of twenty-five pages in 1997 to a current posting of 1100 pages, providing information, documents and features required in any first class "Election Website"; and the website maintains a design that allows for easy navigation and is accessible to all Internet users, regardless of their expertise or the sophistication of their equipment;
• developing thorough, comprehensive, and goal-oriented annual performance plans for fiscal year operations prior to budget approval;

• installation of signa-scan or “digital signatures” as a technology upgrade to in-house operations; the module of signa-scan, a signature verification and retrieval system, is designed to decrease the time required for verifying signatures on petitions and absentee ballots, while increasing the overall accuracy of the process.

Since Ms. Miller’s tenure, the agency has made significant advancements with management and administrative control through the effective use of technology, orderly planning and procedures, development of comprehensive agency annual performance plans, and continued trouble-free elections. Public confidence in the District’s election system has continued to rise and increases in voter participation in the overall process has been noted.

Professional Appointments:

Vice President, National Association of State Election Directors (NASED): (2001-present), Treasurer (1999-200), Northeast Regional Representative (1998-1999); Committee on Legislative Affairs (2001-present)

Board Member, The Election Center Professional Education Program (1999-present); Co-Chair, The Committee on Ethics and Professional Responsibility, (2001-present)

Member, Metropolitan Council of Government Election Officials Technical Committee

Member, International Foundation for Election Systems (IFES), Steering Committee for Collection of Election Resources in the United States (CERUS) Project

Bar Admissions:

United States Supreme Court, United States Court of Appeals for the District of Columbia, United States District Court for the District of Columbia, and District of Columbia Court of Appeals.

Other Professional Activities:

Testimony before Congressional Black Caucus on election reform. Presenter for the League of Women Voters, District of Columbia Commission on Aging, International Foundation for Election Systems International Visitors Program,
Previous Employment

From 1988 to 1997, Ms. Miller served as the senior staff attorney and later the General Counsel for the D.C. Board of Election and Ethics. As the chief legal officer for the Board of Elections and Ethics, she was responsible for representing the Board in all court proceedings on matters related to the elections process and challenges thereto. In addition, she drafted and prepared for final adoption all regulations governing the election process in the District of Columbia.

Significantly, for a period of approximately eighteen months, Ms. Miller performed both the duties associated with the offices of the General Counsel and that of the Executive Director of the Board of Elections. Most importantly, the timing of this appointment of dual responsibilities came at the onset on the Council Primary and Presidential elections. Both major elections were successful and the total operations of the agency commenced without incident. The Presidential Election was eventful in that some residents of the local Georgetown area challenged the right of student voters. That challenge resulted in ongoing contentious litigation which resulted in the Board's position of allowing students access to the franchise being continuously upheld.

Ms. Miller also worked for a brief period with the Council of the District of Columbia. She has also worked as a law clerk and later associate attorney for the law firm of Jack H. Olender and Associates, P.C..

EDUCATION

Ms. Miller received her law degree from Northeastern University. She received her B.A. degree from Boston College, graduating cum laude from the College of Arts and Sciences Honors Program.

Personal:

Ms. Miller was born in [redacted], Maryland, raised in Washington, DC, [redacted]. The Millers have resided as a family in Washington, DC since 1987.
Anne Caldas
Director, Procedures and Standards Administration
American National Standards Institute
25 West 43 Street, 4th Floor
New York, New York 10036

Anne Caldas has held the position of Director of Procedures and Standards Administration at the American National Standards Institute (ANSI) for more than eight years. In this capacity, she is the lead staff support for the work of three of the primary committees that implement the American National Standards process: the ANSI Executive Standards Council (ExSC), which accredits developers of American National Standards; the ANSI Board of Standards Review (BSR), which approves standards as American National Standards; and the ANSI Appeals Board, which is the final level of appeal at ANSI. The related program areas for which she is responsible include the accreditation and audit of standards developers (of which there are about 200), the accreditation of US Technical Advisory Groups (TAGs) to International Standards Organization (ISO), the approval of standards as American National Standards (ANS) (approximately 10,000 ANS exist) and the implementation of a multi-level appeals process. Prior to her current position, she worked for twelve years at the Human Resources Administration of the City of New York, serving in a final capacity as Director of Procedures and Analysis for the Office of Employment Services. She holds a Masters Degree in public policy.
BRITAIN J. WILLIAMS

Dr. Williams is a Professor Emeritus of Computer Science and Information Systems at Kennesaw State University, Kennesaw, Georgia. Kennesaw State is a senior university in the University System of Georgia.

From 1986 to the present he has served as a consultant to the FEC Clearinghouse for Election Administration. In this capacity, he was involved in the development of the original Voting Systems Standards published in 1990 and the revision of the Voting Systems Standards that is currently underway.

From 1986 until 1988 and from 1993 until the present, Dr. Williams has served the Elections Division of the Office of the Georgia Secretary of State as a technical advisor to assure that voting systems proposed for use in the State are in compliance with the FEC Standards, the Rules of the Secretary of State, and the Georgia Election Code. He is also a consultant on matters related to voting system certification for several other states.

From 1994 until the present, Dr. Williams has served as Chairman of the NASED Voting Systems Board Technical Advisory Committee. This committee provides technical advice to the NASED Voting Systems Board on matters related to the interpretation of the FEC Voting System Standards. The NASED Voting Systems Board is responsible for the implementation of the FEC Voting System Standards.
Currently responsible for directing and coordinating Citigroup's advanced technology efforts and Citigroup's senior representation at external organizations and standards bodies. This includes ensuring research and standards activities are properly focused and aligned with business goals and priorities; formulating and executing business-driven technology directions and strategies; providing overall management, assessment, and prioritization of research and standards activities; and keeping the Citibank highly innovative. Areas of focus include electronic banking, payments and electronic commerce, bill presentment and payment, portfolio and risk management, financial engineering and new product design, customer behavioral modeling, mathematical marketing analyses and simulations, fraud detection and control, security over computer networks. Advanced technologies under investigation include agent technology, XML, machine learning, multimedia, biometrics, image and voice processing, smart cards and secure tokens.

Previous positions include Technical Director Naval Intelligence, Technical Director Navy Command, Control and Communications, and Program Manager Sperry Rand. Also worked for Bell Labs, Syracuse University and IBM.

Currently serving as Research Professor of Information Technology at Rutgers Center of Management, Integration and Connectivity (CIMIC), and teaching part time at Iona College in New Rochelle, New York, and George Washington University in Washington D.C.

EDUCATIONAL BACKGROUND: BSEE, College of City of New York, MSEE and Ph.D. Syracuse University

James Elekes of Plainfield, New Jersey is an adjunct professor at Essex County College in West Caldwell, New Jersey, where he has taught political science and sociology for the past 12 years. He is also an adjunct professor at the County College of Morris. Previously, he was employed by NJ TRANSIT, the state’s public transit agency, where he developed and conducted training programs for bus and rail operating and support personnel on service to passengers with disabilities. Elekes has been active in providing guidance on accessibility and disability issues to various community and civic organizations. Elekes became blind 23 years ago due to complications from juvenile diabetes. He was appointed to the Board by President Bush in 2003.

J. R. Harding, Ed.D. of Tallahassee, Florida was appointed to the Access Board in the spring of 2002 by President Bush. Active in state and local advocacy for persons with disabilities, Dr. Harding is employed by the Department of Education, Division of Vocational Rehabilitation as a Partnership Specialist for the Office of the Director. He currently represents the state of Florida and Tallahassee on a number of boards and commissions, including the Governor's ADA Working Group, the Florida Building Commission Waver Council, the Commission for Transportation Disadvantaged, the Citizens' Advisory Council of Leon County, and he is also an active member of the Chamber of Commerce. He is a graduate of Leadership Tallahassee, class of 19 and has been living with quadriplegia for over 20 years.

Helen Purcell

Maricopa County Recorder
111 S. 3rd Ave
Phoenix, AZ 85003

Office: 602-506-3629
Cell: 602-390-2516
Fax: 602-506-4050
e-mail: hpurcell@risc.maricopa.gov

Helen Purcell was elected to the office of Maricopa County Recorder in November, 1988; and re-elected in November, 1992, November, 1996, and November, 2000 – the second woman to hold this position since 1871. Born in Topeka, Kansas, she has been a Phoenix resident since 1964. Mrs. Purcell began her career with T. J. Bettes Mortgage Company in Texas, subsequently becoming a Real Estate Trust Officer with Stewart Title & Trust of Phoenix. She has been a member of the Board of Directors of the National Association of Counties (NACo) since December, 1997, a member of the Board of Directors of the Kids Voting-Arizona, a member of the National Association of County Recorders and Clerks, and the International Association of Clerks, Recorders, Elections Officials and Treasurers. In May, 1998, Mrs. Purcell received the National Kids Voting Excellence Award. She is Past President of the Arizona Association of Counties and a former President of the Arizona Association of County Recorders. She is a member of The Property Records Industry’s Joint Task Force, a Subcommittee of the National Association of County Recorders, Election Officials and Clerks (NACRC), and the Co-Chairperson of the Technology Committee. She is a member of the State of Arizona’s Election Law Sub-Committee. In November of 2000, Mrs. Purcell was asked to serve on the National Commission on Election Standards and Reform, a twenty-member panel created by the National Association of Counties (NACo) and NACRC to review the American election process and make recommendations to improve it. Mrs. Purcell has two grown children.

Mrs. Purcell's statutory duties and responsibilities include recording and maintaining, for permanent public record, 8,000 to 10,000 documents per day, and maintaining voter registration rolls for over 1,300,000 registered voters. In addition, she is responsible for administering the Elections Department that conducts all national, state and countywide elections, and provides elections support for cities, towns, schools, and other jurisdictions.

On April 3, 2000, the Maricopa County Elections Department's Vote-By-Mail technology became part of the 2000 Computerworld Smithsonian Collection at the Smithsonian's National Museum of American History in Washington, D.C. Nominated by Michael Dell, Chairman and Chief Executive Officer of Dell Computer Corporation, Mrs. Purcell and her Department encourage voters of America's 5th largest county to request mail-in ballots by phone, mail, Internet, or walk-in, increasing overall voter participation as mail-in ballots grow to account for a third of the total ballots.
Professor of Computer Science at Northwestern University and co-founder of the Nielsen Norman Group, an executive consulting firm that helps companies produce human-centered products and services. Norman serves as advisor and board member to numerous companies in high technology and consumer products and to non-profit organizations in the area of policy and education.

Norman has served as Vice President of the Advanced Technology Group at Apple Computer and as an executive at Hewlett Packard and UNext, a distance education company. He is Professor Emeritus at the University of California, San Diego where he was founding chair of the Department of Cognitive Science and chair of the Department of Psychology. He is a trustee of the Institute of Design in Chicago, IL.

Norman received a B.S. degree from MIT and an MS degree from the University of Pennsylvania, both in Electrical Engineering. His doctorate, from the University of Pennsylvania, is in Psychology. In 1995, he received an honorary degree from the University of Padua (Italy).

He was one of the founders of the Cognitive Science Society and has been chair of the society and editor of its journal, Cognitive Science. He is a fellow of the Human Factors & Ergonomics Society, the American Psychological Society, and the American Academy of Arts and Sciences, the Association for Computing Machinery (ACM). In 2002 he received the “Lifetime Achievement Award” from SIGCHI, the professional organization for Computer-Human Interaction. He has been a Fellow at the Center for Advanced Studies in the Behavioral Sciences (Stanford).

Dr. Norman has published extensively in journals and books, and is the author or co-author of thirteen books, with translations into twelve languages, including "The Design of Everyday Things," and "Things That Make Us Smart." His latest book is "The Invisible Computer: Why good products can fail, the PC is so complex, and information appliances are the answer." Business Week has called this "the bible of the 'post PC' thinking." (No ties to voting. Considered a guru in the field of human-computer interactions)
Ms. Buie serves as co-director of elections for the Kansas City Board of Election Commissioners, administering policies, directives and decisions of the Board while insuring the proper conduct of all public elections in the city of Kansas City, Missouri, within the boundaries of Jackson County.

Along with her co-director, Ms. Buie is responsible for servicing over 220,000 registered voters with 26 full time, up to 50 part time, and approximately 1,600 temporary employees on election days. Typically, four to six elections are held annually.

During her tenure, she has received the industry's highest designation of CERA, Certified Elections/Registration Administrator and she has been appointed to several Boards and Commissions:

- EAC Board of Advisors
- EAC Technical Guidelines Development Committee
- The Blunt Commission by Secretary of State Blunt
- The Blunt Commission on Election Reform
- Chair of the Missouri State Help America Vote Act Education/Training Committee
- The International Foundation for Election Systems Miami/Dade Monitoring Project
- The International Foundation for Election Systems Washington D.C. State Plan Project
- The International Association of Clerks, Recorders, Election Officials and Treasurers representative on The Election Assistance Commission Advisory Board for the Help America Vote Act

Ms. Buie also holds memberships in several organizations: The Election Assistance Commission, which is a newly established organization commissioned by the President of the United States; The Blunt Commission, which was established by Missouri Secretary of State Blunt to improve the election process, the International Association of Clerks, Recorders, Election Officials and Treasurers, The Election Center, the Missouri Association of County Clerks & Election Authorities, the National Association of County Recorders, Election Officials and Clerks, the NAACP, League of Women Voters and Citadel Gardens, Inc., a residential housing center for senior adults.
We will need to vote to appoint the TGDC. Since four of the members are our appointees with NIST, it is incumbent upon us to properly consider and appoint them.

Sent from my BlackBerry Wireless Handheld
Fellow Commissioners,

Attached is the list and the bios of the 15 people that I will propose that we ratify as the members of the Technical Guidelines Development Committee. In addition to the electronic copies, I am also going to give you a paper version of same.

Unless I hear from you otherwise, on Thursday, June 10, I will submit a tally vote for ratification of these appointees.

Please note that those appointees with an (EAC) after their name are the appointees of which we have real discretion. Secretary Davidson (R) and Ms. Miller (D) come from the Standards board; Ms. Turner-Buie (D) and Ms. Purcell (R) come from the Advisory Board (as required by HAVA).

Please let me know if you have any questions. Thanks.

Paul DeGregorio

BEFORE THE U.S. ELECTION ASSISTANCE COMMISSION

In the Matter of

Approval of Recommended Joint Appointments to Technical Guidelines Development Committee; Letter Re Same to Director, NIST

CERTIFICATION

I, DeForest B. Soaries, Jr., Chairman of the U.S. Election Assistance Commission do hereby certify that on June 10, 2004, the Commission decided by a vote of 4-0 to approve the following:

1. Approval of Recommended Joint Appointments to Technical Guidelines Development Committee; Letter Re Same to Director, NIST.

Commissioners Soaries, Hillman, Martinez and DeGregorio voted affirmatively for the decision.

DeForest B. Soaries, Jr.
Chairman

Date 6/10/04
TALLY VOTE MATTER

DATE & TIME OF TRANSMITTAL: June 9, 2004, 10:00 AM

BALLOT DEADLINE: June 11, 2004, 10:00 AM

COMMISSIONERS: DeGREGORIO, HILLMAN, MARTINEZ, SOARIES

SUBJECT: APPROVAL OF RECOMMENDED JOINT APPOINTMENTS TO TECHNICAL GUIDELINES DEVELOPMENT COMMITTEE; LETTER RE SAME TO DIRECTOR, NIST.

I approve the recommendation. — as edited

I disapprove the recommendation.

I object to the recommendation.

I am recused from voting.

COMMENTS: See edits to spelling of Ms. Turner-Swift's name and to the letter.

DATE: 6/9/04 SIGNATURE: [Signature]

A definite vote is required. All ballots must be signed and dated. Please return ONLY THE BALLOT to the Consulting Chief of Staff. Please return the ballot no later than date and time shown above.

FROM COMMISSIONER DeGREGORIO
MEMORANDUM

TO: EAC Commissioners
FROM: Paul DeGregorio Commissioner
SUBJ: Submission for Tally Vote—Recommended Joint Appointments to the Technical Guidelines Development Committee; Letter to Acting Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointment

I respectfully recommend that the Commission take the following actions:

1. Recommended Joint Appointments to the Technical Guidelines Development Committee.

That the Commission recommends the joint appointment, with the Director of the National Institute of Standards and Technology (HAVA sec. 221(c)), of the following individuals to be members of the Technical Guidelines Development Committee:

a. Donetta Davidson
   Colorado Secretary of State
   (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

b. Alice Miller
   Director of Elections-District of Columbia
   (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

   Sharon Turner Buie
   Director of Elections-Kansas City
   (HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
Recommended Joint Appointments to TGDC
June 9, 2004

d. Helen Purcell
Maricopa County Recorder
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

e. James (Jim) R. Harding
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

f. James Elekes
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

g. Ann Caldas
Director, Procedures and Standards Administration
American National Standards Institute
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

h. H. Stephen Berger
TEM Consulting, LP
Chair, IEEE SEC 38 (Voting Syst. Stds.), Institute of Electrical and Electronics Engineers
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

i. Dr. Brittain Williams
Retired professor- Kennesaw State- University of Georgia
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

j. Paul Craft
Florida Department of State, Voting Systems Division
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

k. Dr. Ronald Rivest
Professor, MIT-Department of Electrical Engineering and Computer Science
(HAVA sec. 221(c)(1)(E))

l. Dr. Daniel Schutzer
Vice President & Director of External Standards and Advanced Technology, e-Citi, CitiGroup
(HAVA sec. 221(c)(1)(E))

m. Patrick Gannon
President and CEO, OASIS
(HAVA sec. 221(c)(1)(E))
Recommended Joint Appointments to TGDC
June 9, 2004

n. Whitney Quesenbery
   Director-Usability Professionals' Association
   (HAVA sec. 221(c)(1)(E))

2. Letter to Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointments.

That the Commission approves the attached letter to the Director, National Institute of Standards and Technology, requesting that the Director concur in the recommended joint appointments to the Technical Guidelines Development Committee, and also that the Commission authorize the Chairman to sign and transmit the letter on its behalf.

Attached please find a ballot on which you may mark your vote on this matter, and instructions and a deadline for returning your vote to the Chairman.

CC: Consulting Chief of Staff
June 2004

Dr. Arden Bement, Jr.
Acting Director, National Science Foundation
Director, National Institute of Standards and Technology
100 Bureau Drive, Stop 1000
Gaithersburg, MD 20899-1000

Dear Dr. Bement:

On June __, 2004, the Election Assistance Commission (EAC) voted to recommend that the following individuals be jointly appointed, under 15 U.S.C. 15361, by the EAC and the Director of the National Institute of Standards Technology (NIST) to the Technical Guidelines Development Committee (TGDC):

Donetta Davidson
Colorado Secretary of State
(HAVA sec. 221(c)(1)(A)(i) (Standards Board))

Alice Miller
Director of Elections-District of Columbia
(HAVA sec. 221(c)(1)(A)(i) (Standards Board))

Sharen Turner Buie
Director of Elections-Kansas City
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

Helen Purcell
Maricopa County Recorder
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
Dr. Arden Bement, Jr.
June __

James (Jim) R. Harding
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

James Elekes
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

Ann Caldas
Director, Procedures and Standards Administration
American National Standards Institute
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

H. Stephen Berger
TEM Consulting, LP
Chair, IEEE SEC 38 (Voting Syst. Stdts.), Institute of Electrical and Electronics Engineers
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

Dr. Brittain Williams
Retired professor - Kennesaw State - University of Georgia
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

Paul Craft
Florida Department of State, Voting Systems Division
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

Dr. Ronald Rivest
Professor, MIT-Department of Electrical Engineering and Computer Science
(HAVA sec. 221(c)(1)(E))

Dr. Daniel Schutzer
Vice President & Director of External Standards and Advanced Technology, e-Citi, CitiGroup
(HAVA sec. 221(c)(1)(E))

Patrick Gannon
President and CEO, OASIS
(HAVA sec. 221(c)(1)(E))

Whitney Quesenbery
Director-Usability Professionals' Association
(HAVA sec. 221(c)(1)(E))
Dr. Arden Bement, Jr.
June __

The [Commission] has authorized me to request that you, as Director of NIST, concur in the joint appointment of these individuals.

On behalf of the [Commission], I express my deep appreciation for the assistance rendered to the EAC by NIST. We are proud of our continuing relationship with NIST, and of the important work with which our two organizations have been jointly tasked.

If you require any assistance from EAC you may contact me or my Special Assistant, Ms. Joan Wooley, at (202) 566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.

Dr. Arden Bement, Jr.
June __

The Commission has authorized me to request that you, as Director of NIST, concur in the
joint appointment of these individuals.

On behalf of the Commission, I express my deep appreciation for the assistance rendered to
the EAC by NIST. We are proud of our continuing relationship with NIST, and of the
important work with which our two organizations have been jointly tasked.

If you require any assistance from EAC you may contact me or my Special Assistant,
Ms. Joan Wooley, at (202) 566-3100.

Sincerely yours,

DeForest B. Scaries, Jr.
Chairman
Thanks for the clarification. We'll fix the bio section and resend.

Paul-

My apologies for the mis-statement. Patrick Gannon is indeed one of the approved TGDC at large members. In my attached e-mail, I meant to print Don Norman for exclusion from the TGDC bios file and for some reason typed Patrick Gannon.

Don Norman is not one of the TGDC members, Patrick Gannon is. (Norman was one of the original seven approved and vetted "at large" candidates bios originally transmitted to the EAC. We narrowed the selection to four and included Whitney Quesenbery.)

Bottom line, the TGDC voted on the correct at-large members listed in the EAC_TGDC file dated June 8, 2004. Norman's name appears only in the EAC_BIOS file.

Again, my apologies.

Allan,

I am really confused now. Are you saying that Patrick Gannon is NOT Dr. Bement's pick for the TGDC? His name and the bio we are using was with Bement's letter of April 27, 2004 which transmitted his 4 recommendations to the TGDC.

Please advise ASAP as the commission voted today to approve all members of the TGDC.
Thanks.

Paul DeGregorio

Subject: TGDC Members- Incorrect Addresses

Paul-

Per my voice mail, I am listing the corrected addresses for Whitney Quesenbery and Patrick Gannon below. The file you sent with their addresses contained erroneous title lines. Also, the bio file contains a bio for Patrick Gannon who I am fairly sure is not one of the TGDC members on whom you will be voting. You will want to delete his bio.

Regards

Patrick Gannon

Dr. DeForest B. Soaries, Jr.
Chairman
U. S. Election Assistance Commission
1225 New York Avenue
Suite 1100
Washington, DC 20005

Dear Dr. Soaries:

Thank you for the June 10, 2004 letter indicating the Election Assistance Commission's affirmative vote for the fourteen members of the Technical Guidelines Development Committee.

I concur with the individuals selected to the committee by the Commission and look forward to the upcoming July meeting of the Committee.

Sincerely,

Arden L. Bement, Jr.
Director
The EAC will announce the members of the TGDC on Thursday, June 17.

I want to remind everyone that with the first meeting set for July 9, we need to do the following:

1) Get out a "save the date" e-mail to the members ASAP so they can hold their calendars for the July 9 meeting (and arrive in DC the night before). Diane Savoy is to do this by COB on June 16.
2) No later than Friday, June 18, we need to mail and fax a formal letter out from the Chairman to the members of the TGDC of their appointment and with meeting details, including information on how to make plane/hotel reservations and file any reports they are required to. John Vergelli is doing the draft, with input from Eustis, Burkhardt, and Greene.
3) We need to file the Charter of the TGDC with the proper committees by next Monday. John Vergelli is working on this.
4) Federal Register notice must be published no later than June 24 (and the FR has to be notified that it is coming). Allan Eustis is responsible for this.
5) The agenda for July 9 has been drafted. I am circulating it with my fellow commissioners to make sure they are OK with it.

I am assuming that once the TGDC is up and running that NIST will handle all of the administrative functions, and coordinate with the EAC as to meeting dates and the agenda.

What am I missing?

Greetings all:

Attached is the latest draft of the letter that is to be sent to the members of the TGDC ASAP. Please review and get your comments to Diane Savoy, who will facilitate getting these letters out. Perhaps Adam can assemble the attachments. I've attached a list of the members (taken from our shared drive).

John--do we need a separate version for those appointees who will not have to file the same disclosure documents as the 6 you identified (the four scientist plus the ANSI and IEEE representatives)? Please note that I asked them to submit the forms to you.

Craig--since Alan Eustis is out until Monday, you'll need to sign off on this letter (he gave us Mary Floyd's contact information; I assume she knows this).

Adam- Please go to the following file on the shared drive to find the list of members in excel and word. Please note that the word file lists two phone numbers for each person, but does not indicate which one is the fax (you can go to the excel file to confirm which one is). Please note which number is the fax number on the word file, which is the document you should send as an attachment: \CLEARINGHOUSE\Help America Vote Act\Boards and Committees\TGDC

Thanks for your help.

TGDC appointment meeting announce letter6-17-04.doc
June 18, 2004

<Name>
>Title
<Organization>
<Address1>
<City> <State> <Zip>

Dear <Name> 

On behalf of my colleagues on the Election Assistance Commission (EAC) and of the Director of the National Institute of Standards and Technology (NIST), let me take this opportunity to welcome you and thank you for agreeing to become a member of the Technical Guidelines Development Committee (TGDC). This letter contains important information about your service on the TGDC and plans for the first meeting.

The EAC looks forward to working with you to meet the requirements of the Help America Vote Act (HAVA) by assisting in the development of voluntary voting system guidelines. Your appointment as a member of the TGDC will begin as of the date of this letter. We have included with this letter a list of all members of the TGDC so that you can become familiar with your colleagues on this crucial committee. Also attached is a copy of the portion of HAVA that governs the work of the Committee.

Before you begin your important work with the TGDC, please be aware that the Federal Advisory Committee Act (FACA) Pub. L. 92-463, 5 U.S.C. App.1, and Federal ethics laws require that you complete the attached SF-450 financial disclosure document. This document is mandated for individuals appointed to the TGDC as general experts or otherwise unofficial representatives of the appointing authority. Please complete this form by July 2, 2004 and return it to John Vergelli at the address listed at the top of this page. This form can also be accessed on-line by going to the U.S. General Services Administration web site (www.gsa.gov) and typing “SF450” in the search box at the top right-hand side of the page. Timely submission of this form will ensure that you are able to fully participate in all actions of the TGDC. Please be assured that your information will be kept in the strictest confidence according to Federal statute.
The inaugural meeting of the TGDC will be held on July 9, 2004, in Washington, D.C. at the offices of the EAC, 1225 New York Ave, NW, Suite 1100. Under HAVA, the National Institute for Standards and Technology will serve as the Secretariat for the TGDC. Accordingly, NIST will pay roundtrip airfare, hotel, per diem and local transportation expenses for you as prescribed in the Federal Government Travel Regulations. We ask that you make your travel arrangements by calling Mary Floyd at NIST at 301-975-4612. A block of rooms has been reserved at the Washington Marriott Metro Center, which is located less than two blocks from the EAC. Ms. Floyd will handle your reservations once you confirm your attendance.

The July 9th meeting will begin at 9:00 am and will continue until approximately 3:00 pm. We are planning a very tight agenda as there is a lot that we must accomplish at this first meeting. Your participation for the entire time is very important to us. We will mail and fax the meeting agenda and other materials to you the week of June 28, 2004.

Should you have any questions, please contact Mr. Allan Eustis, Project Leader, NIST Voting Systems Standards, at 301-975-5099. We look forward to seeing you on July 9th.

Sincerely,

DeForest B. Soaries, Jr.
Chairman

Paul,

I have made a few changes to the letter. The revision is attached below. If anyone else has any additional changes, please send them to me so that we can get the letter prepared in final. Thank you in advance.

Good morning,

For the recipients of the letter who are not financial disclosure filers, the third full paragraph (beginning "Before you begin ") should be deleted.

Having the filers send the forms to me is fine.

All:

The letter looks good to me.

Regards,
Craig Burkhardt
Joan,

Attached is a draft of the letter that is to go to the TGDC members notifying them of the first meeting on July 9. Please show it to the Chairman so that he can see it before we send him 15 letters to sign, in case he has changes to make. Please note that there will be two versions: 6 of the 15 members will receive a letter with the 3rd paragraph shown in the attached version (financial disclosure requirement). When you have a final version, please send it to Joyce, with a cc to me, Diane, Adam and John. Joyce will facilitate merging the letters and getting them out the door.

We need to get this done ASAP. Thanks.

We have included with this letter a list of all members of the TGDC so that you can become familiar with your colleagues on this crucial Committee. Also attached is a copy of the portion of HAVA that governs the work of the Committee.

Before you begin your important work with the TGDC, please be aware that the Federal Advisory Committee Act (FACA) Pub. L. 92-463, 5 U.S.C. App.1, and Federal ethics laws require that you complete the attached OGE-450 financial disclosure document. This document is mandated for individuals appointed to the TGDC as general experts or otherwise unofficial representatives of the appointing authority. Please complete this form by July 2, 2004 and return it to John Vergelli at the letterhead address at the top of this page. This form can also be accessed on-line by going to the U.S. General Services Administration web site (www.gsa.gov) and typing “OGE450” in the search box at the top right-hand side of the page. Timely submission of this form will ensure that you are able to fully participate in all actions of the TGDC. Please be assured that your information will be kept in the strictest confidence according to Federal statute.

The inaugural meeting of the TGDC will be held on July 9, 2004, in Washington, D.C. at the offices of the EAC, 1225 New York Ave, NW, Suite 1100. Under HAVA, the National Institute for Standards and Technology (NIST) will serve as the Secretariat for the TGDC. Accordingly, NIST will pay roundtrip airfare, hotel, per diem and local transportation expenses for you as prescribed in the Federal Government Travel Regulations. We ask that you make your travel arrangements by calling Mary Floyd at
NIST on 301-975-4612. A block of rooms has been reserved at the Washington Marriott Metro Center hotel, which is located less than two blocks from the EAC. Ms. Floyd will handle your reservations once you confirm your attendance.

The July 9th meeting will begin at 9:00 a.m. and will continue until approximately 3:00 p.m. We are planning a very tight agenda as there is a lot that we must accomplish at this first meeting, therefore we will start promptly. Your participation for the entire time is very important to us. We will mail and fax the meeting agenda and other materials to you the week of June 28, 2004.

Should you have any questions, please contact Mr. Allan Eustis, Project Leader, NIST Voting Systems Standards, at 301-975-5099. We look forward to seeing and working with you on July 9, 2004.

Sincerely,

Gracia Hillman
Vice-Chair

Diane-

Here is a final draft of the letter that went to TGDC members yesterday. You will receive a hard copy of the package as well most likely today. I am sending the letter and contents of the package to Mr. Elekes via e-mail as he is blind and the Access Board has requested we transmit all documents to him in .doc format. I will cc you on this e-mail as well with a copy to David Capozzi at the Access Board.

Dear Mr. Berger:

On behalf of Dr. Arden L. Bement, Jr., and the Information Technology Laboratory at the National Institute of Standards and Technology (NIST), I welcome the opportunity to work with you as a member of the Technical Guidelines Development Committee (TGDC). The Help America Vote Act (HAVA) of 2002 sets out an ambitious nine-month task for us to meet. I will serve as the Committee’s Secretariat. Please feel free to contact me with any issues at any time.

I am including some information on our work at NIST in this package. Early next week, I will send you an agenda for our upcoming July 9, 2004 meeting as well as a straw man procedural roadmap for the TGDC. My assistant, Mary Floyd, is making final arrangements for your travel and hotel accommodations at the Marriott Metro Center Hotel, approximately two blocks from the Election Assistance Commission (EAC) Headquarters, 1225 New York Avenue, where the TGDC will meet on July 9, 2004. The Hotel, located at 775 12th Street NW, is a twenty-minute taxi ride from National Airport. We are planning a get acquainted dinner at the Metro Grille in the hotel at 7 pm on July 8, 2004. I hope you will arrive in time to attend and meet Dr. Bement, Director of NIST and chair of the TGDC.

We will begin our committee work on July 9th at 9 a.m. and end at 3 p.m. I look forward to working with you on accomplishing the tasks outlined for us in HAVA.

Sincerely,

Allan C. Eustis  
Project Leader  
NIST Voting Systems Standards

Enclosure

cc: Diane Savoy (EAC)
Craig,

I have taken a look at the statute and charter for some guidance on this issue. It appears that ANSI (whoever is the proper person to make the appointment) should notify TGDC through Dr. Semerjian and EAC that they wish to replace Ms. Caldas with Mr. Karmol including the effective date of the appointment. Not having the historical knowledge that you do, I am not sure that Ms. Caldas is the right person to be communicating on behalf of ANSI. Is she the appointing authority for ANSI? If so, then we can accept a letter or communication from her as the tool to make the change. If not, we need a communication from the appropriate person.

Juliet E. Thompson  
General Counsel  
United States Election Assistance Commission

Washington, DC 20005  
(202) 566-3100  
CSBurkhardt@DOC.GOV

Juliet: Looks like we should go ahead and make the switch. As GC for the EAC, I think it is in your court, but let me know if you wish me to do anything. At the least, I suggest I have my people do the basic background vetting, which takes 3 days. Perhaps we should have Caldas send a formal message of resignation to Hratch to trigger the event. Doing so will not negatively impact TGDC operations, as Ms. Caldas was abstaining on all votes anyway. How do you think we should proceed? Regards, Craig

Subject  
ANSI Representative on the TGDC
Dear Craig and Allan -

In follow-up to my E-mail below and in light of Craig's confirmation at the last TGDC meeting that David Karmol may replace me as ANSI's representative on the TGDC, I wondered if official confirmation is forthcoming or needed? In addition, as David will serve as the ANSI representative going forward, his name should replace mine for E-mail and hard copy distributions.

I appreciate your efforts and thank you both for your professionalism and hard work in connection with this project.

If I can ever be of assistance to you in the future, please do not hesitate to contact me.

Regards,

Anne

-----Original Message-----
Dear Mr. Burkhardt:

The purpose of this E-mail is to request that the official representative of ANSI on the TGDC be changed to:

David L. Karmol

Vice President, Public Policy and Government Affairs
dkarmol@ansi.org
202-331-3610

Please advise me of any steps that ANSI must take to effect this change. At this time, I intend to represent ANSI at the March 9th TGDC meeting at NIST.

Thank you for your assistance.

Sincerely,

Anne

Subject: Need ANSI replacement next week
This morning, moments before the TGDC meeting was to begin, I was approached by David Karmol, who indicated that he was the replacement for Anne Caldas, who resigned as the American National Standards Institute (ANSI) representative on the TGDC about two months ago. Mr. Karmol said that the letter from ANSI to the EAC/NIST appointing him as the replacement for Ms. Caldas was sent concurrently with Ms. Caldas resignation. I do recall seeing a copy of the resignation and replacement letters.

Needless to say Mr. Karmol was very upset that his paperwork was not processed in a timely manner so that he could participate in this very important meeting of the TGDC. He pressed me on the status of his paperwork and I could not give him an answer because I had no idea. It was an embarrassing incident. As the Federal Officer for the TGDC I should have been kept in the loop and should have had an adequate answer for Mr. Karmol.

Mr. Karmol's paperwork should have been processed in an expedited manner so that he could have participated in this meeting. The fact that it was not shows that there is a serious communications and process breakdown somewhere that must be fixed. I should have been kept better informed by staff on this important manner and will insist that they do so in the future.

Paul DeGregorio
Vice Chairman
Dear Julie and Gavin:

I started today downtown and retrieved the appointment and resignation documents. They were refaxed to Gavin at his request just a few moments ago. My records show that Juliet and I telephoned and e-mailed about this in March before her vacation, during which I agreed to get the resignation/appointment letters, and perform a "basic" ethics vetting. I faxed the letters on March 29, and the vetting was completed on April 5. I communicated successful passage of the vetting and Semerjian's assent to the appointment during phone conversations with Juliet, Carol and Gavin later that week, and early the week of April 11. I also spoke with Carol about the Turner-Bouie matter, and she related the EAC would not seek to replace her at this time.

On April 12, I spoke very briefly with with Caldas and Karmol, and informed them to contact Carol if there were any questions regarding when the EAC would act to issue an appointment letter. When EAC is ready to act, all it needs to do is issue the same appointment letter used during the original round of appointments. I don't have copies of those letters, but I recall they were very summary in nature.

Gavin mentioned wanting to see a resume on Karmol in his voice mail to me this morning. Consistent with our agreement that EAC recommends and reviews the organization-specific members and NIST recommends and reviews the at-large members, NIST neither requested nor reviewed any such documents on Karmol. The basic ethics vetting only picks up ethical difficulties from our database and personnel review.

Let me know if you have any questions. I am going back out to the hearing now, so call my cell if you have a priority question. Otherwise, I'll be in the office tomorrow.

Finest Regards,
Craig
I'll ask him today (the ANSI guy) to send me a resume. Thanks!

Subject: Fw: ANSI TGDC appointment

Carol,

Regarding the e-mail below.

I have some questions regarding his recollection. I obviously can't speak to anything that occurred regarding this matter before last week, However, I do know that neither Julie nor myself were involved in a group call on the 11th.

Such issues aside...

I have only spoken to the man once (alone), on or about the 12-13th of April. Per my notes, I wanted four things from him. (1) a Resume or other info on qualifications, (2) Letter from ANSI, (3) Letter from Nist (which he noted may be in a casual form like an e-mail) and (4) an Example appointment letter (if he could find one).

I have not received the above information as of yesterday.

As for the information he faxed today, it contains only two NIST letters (1 resignation letter and 1 appointment letter). In my opinion it is missing the most important part, a letter from NIST approving the candidates. HAVA requires that the candidates be approved by both NIST and EAC. We cannot issue the candidate a final appointment letter unless we have documentation that he is NIST approved. Perhaps we may hold that the various conversations and the e-mails below constitute such confirmation. I leave that matter to you. Finally, I would note that if NIST will provide no background info on the applicant, how are we to send this matter to a tally vote (and how did they approve the person)? We would be asking the Commissioners to approve an individual for the board based solely on a three sentence ANSI representation letter.

Subject TGDC Replacement

Dear Juliet:

This is to reconfirm that Dr. Semerjian has agreed to the appointment of Mr. Karmol to represent ANSI on the TGDC. The Department of Commerce previously determined that there are no pending or significant matters between the Department and Mr. Karmol, and ethics personnel have determined that there is no reason why Mr. Karmol should not be considered for the position.

Sincerely,
Craig Burkhardt
Chief Counsel for Technology
U.S. Department of Commerce
Dear Mr. Gilmour:

Attached is my bio. Beyond what is listed in the bio, I have been a candidate for public office in five elections, three of which I won. I was an elected member of the Ohio General Assembly for two terms, and was a candidate in Virginia for Commonwealths Attorney for Fairfax County in 1995.

As this request for my appointment was submitted almost a month ago, it is indeed unfortunate that this request for my resume was not made to me at that time. I was told by Mr. Burkhart at NIST that no NIST approval was required, so it may be a good idea for you to speak to him, to determine what the requirements are. I recognize the position is relatively new, but I would appreciate this request being expedited at this time.

As I do not seem to have Mr. Burkhart's e-mail, I am copying Mr. Eustis, who I trust will share this note with Craig.

If there is anything else that is needed, please let me know, with a copy to my assistant, Diane Zielinski, who is copied on this e-mail.

1919 L Street, NW, 11th Floor
Washington, DC 20036

Dear Mr. Karmazin:

On behalf of my colleagues at the U.S. Election Assistance Commission (EAC), I would like to welcome you as a member of the Technical Guidelines Development Committee (TGDC), representing the American National Standards Institute. Your participation in this Committee has been approved by both the Director of the National Institute of Standards and the EAC.

The EAC looks forward to working with you as we labor to meet the requirements of the Help America Vote Act of 2002 (HAVA). As you know, HAVA tasks the TGDC with the job of assisting the Commission in the development of voluntary voting system guidelines. This is an important effort and we welcome your participation in the process.

I have enclosed a copy of the TGDC's membership list for your perusal. Please refer to our website [www.eac.gov](http://www.eac.gov) for additional information. If you have any questions concerning your appointment, please feel free to contact me at Vice Chair, Paul DeGregorio, EAC's Designated Federal Officer to the TGDC, at (202) 566-3100.

MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio, Vice Chairman
U.S. Election Assistance Commission

SUBJECT: Appointment of David Karmel to the Technical Guidelines Development Committee (TGDC), representing ANSI

As you may know, on March 29, 2006 Mr. Anne Caldas, American National Standards Institute (ANSI), resigned as a member of the TGDC (Attach 1). That same day, ANSI proposed a replacement representative, Mr. David Karmel (Attach 2). The purpose of this memorandum is to provide information to the Commissioners about Mr. Karmel, such that he may be approved as a member of the TGDC.

The Help America Vote Act of 2002 (HAVA) provides for both the composition of the TGDC and the Committee's appointment process. Specifically, HAVA Section 211(b) (42 USC §305(b)(c)) specifies that the Committee will have in its membership one representative from ANSI. Further, HAVA states that all members of the Board are to be appointed jointly by NIST and the EAC. (See HAVA Section 211(c)(1)).

Recently, the EAC received notice that NIST (Dr. Hritsch Senewey) has agreed to the appointment of Mr. Karmel (Attach 3). As such, upon the Commission's approval, Mr. Karmel may become a member of the Standards Board. To this end, I have enclosed Mr. Karmel's biography for your review (Attach 4). Finally, I have also attached a proposed appointment letter for Mr. Karmel's signature (Attach 5).
RECOMMENDATION:

Review each of the attachments and approve Mr. Karmol as ANSI's representative to the TGDC per HAVA Section 221(c).

Attachments:
1. ANSI Resignation Letter.
2. ANSI Replacement Letter.
3. E-mail noting NIST's Approval.
4. Mr. Karmol's Bio.
5. Proposed Appointment Letter.
MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio, Vice Chairman
U.S. Election Assistance Commission

DATE: April 27, 2005

SUBJECT: Appointment of David Karmol to the Technical Guidelines Development Committee (TGDC), representing ANSI

As you may know, on March 29, 2005 Ms. Anne Caldas, American National Standards Institute (ANSI), resigned as a member of the TGDC. (Attach. 1). That same day, ANSI proposed a replacement representative, Mr. David Karmol. (Attach. 2). The purpose of this memorandum is to provide information to the Commissioners about Mr. Karmol, such that he may be approved as a member of the TGDC.

The Help America Vote Act of 2002 (HAVA) provides for both the composition of the TGDC and the Committee's appointment process. Specifically, HAVA Section 221(c) (42 USC §15361(c)) specifies that the Committee will have in its membership one representative from ANSI. Further, HAVA states that all members of the Board are to be appointed jointly by NIST and the EAC. (See HAVA Section 221(c)(1)).

Recently, the EAC received notice that NIST has agreed to the appointment of Mr. Karmol (Attach. 3). As such, upon the Commission's approval, Mr Karmol will become a member of the Technical Guidelines Development Committee. To this end, I have enclosed Mr. Karmol's biography for your review. (Attach. 4)

Upon approval of this recommendation, a letter of appointment signed jointly by the Director of NIST and the Chair of EAC will be sent to Mr. Karmol to formalize and finalize his appointment.

RECOMMENDATION:
Approve Mr. Karmol as ANSI's representative to the TGDC per HAVA Section 221(c).
March 29, 2005

Dr. Bratch Semerjian
TGDC Chair
Acting Director
National Institute of Standards and Technology (NIST)

Subject: TGDC Replacement

Dear Juliet:

This is to reconfirm that Dr. Semerjian has agreed to the appointment of Mr. Karmol to represent ANSI on the TGDC. The Department of Commerce previously determined that there are no pending or significant matters between the Department and Mr. Karmol, and ethics personnel have determined that there is no reason why Mr. Karmol should not be considered for the position.

Sincerely,
Craig Burkhardt
Chief Counsel for Technology
U.S. Department of Commerce
David Karmol currently serves as Vice President for Public Policy and Government Affairs at the American National Standards Institute (ANSI). In this position he is responsible for advocacy and outreach programs designed to better educate federal, state and local government officials on the value of the voluntary consensus standardization system and its importance to advancing the competitiveness of U.S. businesses and enhancing the health and safety of the world’s citizens.

Karmol joined ANSI in July 2001 with a thorough knowledge of the issues important to the standards and conformity assessment community and a track record of success working on policies, strategies and programs in close liaison with federal, state and local governments. Prior to joining ANSI, he spent ten years as general counsel and director of public affairs at the National Spa and Pool Institute (NSPI), an ANSI member and accredited standards developer. Karmol also served as press secretary and special assistant to the director of the United States Mint; general counsel for the Can Manufacturers Institute; associate counsel to the U.S. House of Representatives Judiciary Committee; member of the Ohio House of Representatives, and assistant prosecuting attorney in Franklin County, Ohio.

Mr. Karmol received his B.A. from Miami University of Ohio, and his J.D. from the Ohio State University College of Law and is admitted to practice law in Virginia, the District of Columbia and Ohio.

ANSI’s mission is to enhance U.S. global competitiveness and the American quality of life by promoting, facilitating, and safeguarding the integrity of the voluntary standardization system. ANSI is the official U.S. representative to the International Accreditation Forum (IAF), the International Organization for Standardization (ISO) and, via the U.S. National Committee, the International Electrotechnical Commission (IEC). ANSI currently has offices in New York City and Washington, DC.

   - other private organization
   - government

5. □ Copy of the most recent (or other, specify) Public Financial Disclosure Report Form SF 278 requested for the following named individual(s):
   - a.
   - b.
   - c.
   - d.
   - e.
   - f.

Certain other types of records ("covered records") can also be requested using this form (See Part III below); if you are requesting another covered record, check this box □ and specify which type of record(s):

6. Indicate how you wish to receive this request:
   - □ Pick up at OGE
   - □ By mail (at the address listed above)

7. Applicant's signature: Date:

II. Notice of Action

□ Copies of the report(s) or other covered record(s) you requested are enclosed. See the Important Notice below.

□ Picked up by (signature): Date:

□ Your request does not comply with the requirements of the statute. Please complete Part I of this form and return so we may comply with your request.

□ Fees. If applicable, amount: (when fees are required, make out a check payable to the U.S. Treasury and send it to the executive branch agency processing this request form).

A. Important Notice

The law and implementing OGE regulations require that a report or other covered record not be available to any person except upon written application by such person stating his or her name, occupation and address, and that the person be aware of the prohibitions on improper use, set forth below.

Section 105(c) of the Ethics in Government Act of 1978, as amended and 5 C.F.R. § 2634.603(f) of the implementing OGE regulations provide that it is unlawful for any person to obtain or use a report:

(1) for any unlawful purpose;
(2) for any commercial purpose, other than by news and communications media for dissemination to the general public;
(3) for determining or establishing the credit rating of any individual; or
(4) for use, directly or indirectly, in the solicitation of money for any political, charitable, or other purpose.

The Attorney General may bring a civil action against any person who obtains or uses a report for any such prohibited purpose as set forth above. The court may assess against such a person a penalty in any amount not to exceed $11,000. Such remedy shall be in addition to any other remedy available under statutory or common law.

(form continued on reverse side)
B. Privacy Act Statement

Section 105 of the Ethics in Government Act of 1978, as amended (5 U.S.C. App.), and 5 C.F.R. § 2634.603 authorize the solicitation of the information requested in this form. The primary use of the information on this form is to permit officials of the recipient agency to consider and process your request for inspection or receipt of a copy(ies) of the SF 278 Executive Branch Personnel Public Financial Disclosure Report form(s) or other covered record(s) to which you seek access. Failure to furnish the information will result in this agency’s inability to allow access to, or to provide copies of, the financial disclosure report form(s) or other record(s) requested. Otherwise, furnishing the requested information is voluntary. The information on this form itself may be publicly disclosed pursuant to proper request under section 105(b) of the Ethics Act or as otherwise authorized by law.

Additional disclosures of the information on this form may be made:

(1) to a Federal, State or local law enforcement agency if the disclosing agency becomes aware of a violation or potential violation of law or regulation;
(2) to a court or party in a court or Federal administrative proceeding if the Government is a party or in order to comply with a judge-issued subpoena;
(3) to a source when necessary to obtain information relevant to a conflict of interest investigation or decision;
(4) to the National Archives and Records Administration or the General Services Administration in records management inspections;
(5) to the Office of Management and Budget during legislative coordination on private relief legislation; and
(6) in response to a request for discovery or for the appearance of a witness in a pending judicial or administrative proceeding, if the information is relevant to the subject matter;
(7) to reviewing officials in a new office, department or agency when an employee transfers from one covered position to another;
(8) to a Member of Congress or a congressional office in response to an inquiry made on behalf of an individual who is the subject of the record; and
(9) to contractors and other non-Government employees working for the Federal Government to accomplish a function related to an OGE Governmentwide system of records.

See also the OGE/GOVT-1 executive branchwide Privacy Act system of records.

C. Public Burden Information

Public burden reporting for this collection of information is estimated to take approximately ten minutes per response, including time for reviewing instructions, gathering and maintaining the data needed, and completing and reviewing the collection of information. Send comments regarding the burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden, to the Deputy Director for Administration and Information Management, U.S. Office of Government Ethics, Suite 500, 1201 New York Avenue, NW., Washington DC 20005-3917. Do not file this form with this official; rather, file it with the appropriate office of the executive branch department or agency from which you are seeking access to a financial disclosure report or other covered records.

Pursuant to the Paperwork Reduction Act, as amended, an agency may not conduct or sponsor, and no person is required to respond to, a collection of information unless it displays a currently valid OMB control number (that number, 3209-0002, is displayed here and in the lower right-hand corner of the front page of this OGE Form 201).

III. Other Covered Records

In addition to requests for access to public SF 278 reports, this form can also be used to request access to certain other agency records which are covered under the access procedures of section 105 of the Ethics Act and the implementing OGE regulations ("covered records"). Such other covered records are: (1) certificates of divestiture; (2) Ethics Act qualified blind trust and qualified diversified trust instruments (other than those provisions which relate to the testamentary disposition of the trust assets), the list of assets transferred to such trusts and of assets sold in the case of a qualified blind trust), as well as, in the case of trust dissolution, the report thereon and the list of trust assets at that time, and the certificates of independence and compliance with respect to qualified trusts; (3) 18 U.S.C. § 208(b)(1) & (b)(3) waivers granted by the recipient agency (after deletion of any material withholdable pursuant to the Freedom of Information Act, 5 U.S.C. § 552 (see 18 U.S.C. § 208(d)(1)); (4) other OGE Form 201s; (5) cover letters for approved gifts reporting waiver requests; and (6) cover letters for approved public reporting waiver requests for certain less than 130-day special Government employees. If you seek access to any such additional record(s), check the second box in Part 1.5 on the front page and specify the record(s) sought.

Voluntary Voting System Guidelines Overview

The United States Congress passed the Help America Vote Act of 2002 (HAVA) to modernize the administration of federal elections, marking the first time in our nation’s history that the federal government has funded an election reform effort. HAVA provides federal funding to help the States meet the law’s uniform and non-discretionary administrative requirements, which include the following new programs and procedures: 1) provisional voting, 2) voting information, 3) statewide voter registration lists and identification requirements for first-time registrants, 4) administrative complaint procedures, and 5) updated and upgraded voting equipment.

HAVA also established the U.S. Election Assistance Commission (EAC) to administer the federal funding and to provide guidance to the States in their efforts to comply with the HAVA administrative requirements. Section 202 directs the EAC to adopt voluntary voting system guidelines, and to provide for the testing, certification, decertification, and recertification of voting system hardware and software. The purpose of the guidelines is to provide a set of specifications and requirements against which voting systems can be tested to determine if they provide all the basic functionality, accessibility, and security capabilities required of voting systems.

This document, the Voluntary Voting System Guidelines (referred to herein as the Guidelines or VVSG), is the third iteration of national level voting system standards that has been developed. The Federal Election Commission published the Performance and Test Standards for Punchcard, Marksense and Direct Recording Electronic Voting Systems in 1990. This was followed by the Voting Systems Standards in 2002.

As required by HAVA, the EAC formed the Technical Guidelines Development Committee (TGDC) to develop an initial set of recommendations for the Guidelines. This committee of 15 experts began their work in July 2004 and submitted their recommendations to the EAC in the 9-month timeline prescribed by HAVA. The TGDC was provided with technical support by the National Institute for Standards and Technology (NIST), who was given nearly $3 million dollars by the EAC to complete this work. These latest guidelines update and augment the 2002 Voting Systems Standards to address increasingly complex voting system technology. Specifically, the 2005 Guidelines address the critical topics of accessibility, usability, and security.

These guidelines are voluntary. States may adopt them in whole, in part, or not at all. States may also choose to enact stricter performance requirements for certifying their voting systems.
Effective Date

The 2005 VVSG shall become effective 24 months after their final adoption by the EAC. At that time, every component of every system submitted for national certification testing shall be tested for conformance with the VVSG. Adoption of these guidelines is voluntary, so during this 24-month period, States may adopt them in whole or in part at any time, and thereby require their systems to meet these guidelines. However, the effective date provision does not apply to the HAVA Section 301(a) mandatory requirements, which all States must comply with by January 1, 2006.

Summary of Changes

Volume I of the Guidelines, entitled Voting System Performance Guidelines, includes new requirements for usability, accessibility, voting system software distribution, system setup validation, and the use of wireless communications. This volume also includes a set of optional requirements for a Voter Verifiable Paper Audit Trail (VVPAT) component for Direct-Recording Electronic (DRE) voting systems. In addition, this volume includes an updated glossary and a conformance clause.

Volume II of the Guidelines, entitled National Certification Testing Guidelines, has been revised to reflect the new EAC process for national certification of voting systems. This process will go into effect in 2005 and will replace the voting system qualification process that has been conducted by the National Association of State Election Directors (NASED) since 1994. Volume II also includes an updated appendix on procedures for testing system error rates. Terminology in both volumes has been revised to reflect new terminology introduced by HAVA.

Volume I – Voting System Performance Guidelines Summary

Volume I, the Voting System Performance Guidelines, describes the requirements for the electronic components of voting systems. It is intended for use by the broadest audience, including voting system developers, manufacturers and suppliers; voting system testing labs; state organizations that certify systems prior to procurement; state and local election officials who procure and deploy voting systems; and public interest organizations that have an interest in voting systems and voting system standards. It contains the following sections:

Section 1 describes the purpose and scope of the guidelines.

Section 2 describes the basic functional capabilities required of voting systems.

Section 3 describes standards to make voting systems more usable and accessible to as many eligible citizens as possible, whatever their physical abilities, language skills, or experience with technology.

Sections 4 through 7 describe specific performance standards for election system hardware, software, telecommunications, and security.
Sections 8 and 9 describe requirements for vendor quality assurance and configuration management practices and the documentation about these practices required to be submitted for the EAC certification process.

Appendix A contains a glossary of terms.

Appendix B provides a list of related standards documents incorporated into the Guidelines by reference, as well as documents used in the preparation of the Guidelines, and legislation that is referenced.

Appendix C presents an informational discussion of independent verification systems as a potential concept for future voting system security design.

Appendix D contains technical guidelines on color, contrast and text size adjustment for individuals with low vision or color blindness.

Volume II – National Certification Testing Guidelines Summary

Volume II, the National Certification Testing Guidelines, is a complementary document to Volume I. Volume II provides an overview and specific detail of the national certification testing process, which is performed by independent voting system test labs accredited by the EAC. It is intended principally for use by vendors, test labs, and election officials who certify, procure, and accept voting systems. This volume contains the following sections:

Section 1 describes the purpose of the National Certification Testing Guidelines.

Section 2 provides a description of the Technical Data Package that vendors are required to submit with their system for certification testing.

Section 3 describes the basic functionality testing requirements.

Sections 4 through 6 define the requirements for hardware, software, and system integration testing.

Section 7 describes the required examination of vendor quality assurance and configuration management practices.

Appendix A provides the requirements for the National Certification Test Plan that is prepared by the voting system test lab and provided to the EAC for review.

Appendix B describes the scope and content of the National Certification Test Report which is prepared by the test lab and delivered to the EAC along with a recommendation for certification.

Appendix C describes the guiding principles used to design the voting system certification testing process. It also contains a section on testing system error rates.
1 Introduction

- State and local election officials who are evaluating voting systems for potential use in their jurisdictions
- Voting system designers and manufacturers who need to ensure that their products fulfill all these requirements so they can be certified

1.3 Evolution of Voting System Standards

1.3.1 Federal Election Commission

The first voting system standards were issued in January 1990, by the Federal Election Commission (FEC). This document included performance standards and testing procedures for Punchcard, Marksense, and Direct Recording Electronic (DRE) voting systems. These standards did not cover paper ballot and mechanical lever systems because paper ballots are sufficiently self-explanatory not to require technical standards and mechanical lever systems are no longer manufactured or sold in the United States. The FEC also did not incorporate requirements for mainframe computer hardware because it was reasonable to assume that sufficient engineering and performance criteria already governed the operation of mainframe computers. However, vote tally software installed on mainframes was covered.

A national testing effort was initiated by NASED in 1994. As the system qualification process matured and qualified systems were used in the field, the NASED Voting Systems Board, in consultation with the testing labs, identified certain testing issues that needed to be resolved. Moreover, rapid advancements in information and personal computer technologies introduced new voting system development and implementation scenarios not contemplated by the 1990 Standards.

In 1997, NASED briefed the FEC on the importance of keeping the Standards up-to-date. Following a Requirements Analysis completed in 1999, the FEC initiated an effort to revise the 1990 Standards to reflect the evolving needs of the elections community. This resulted in the 2002 Voting System Standards.

Voters and election officials who use voting systems represent a broad spectrum of the population, and include individuals with disabilities who may have difficulty using traditional voting systems. In developing accessibility provisions for the 2002 Voting System Standards, the FEC requested assistance from the Access Board, the federal agency in the forefront of promulgating accessibility provisions. The Access Board submitted technical standards to meet the diverse needs of voters with a broad range of disabilities. The FEC adopted the entirety of the Access Board’s recommendations and incorporated them into the 2002 Voting Systems Standards.
1.3.2 Election Assistance Commission

In 2002, Congress passed the Help America Vote Act, which established the U.S. Election Assistance Commission (EAC). EAC was mandated to develop and adopt new voluntary voting system guidelines and to provide for the testing, certification, and decertification of voting systems. HAVA also established the Technical Guidelines Development Committee (TGDC) with the duty of assisting the EAC in the development of the new guidelines. The Director of NIST chairs the TGDC, and NIST was tasked to provide technical support to their work. The TGDC delivered their initial set of recommendations to the EAC in May, 2005.

The TGDC built on the foundation of the 2002 Voting Systems Standards and the accessibility provisions of HAVA to expand requirements for voting system usability and accessibility. HAVA mandates that voting systems shall be accessible for individuals with disabilities in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters. To facilitate the ability of jurisdictions to meet these requirements, HAVA allows for the use of at least one direct recording electronic or other voting system equipped for individuals with disabilities at each polling place. Implementing this provision, however, will not entirely eliminate the necessity of accommodating the needs of some disabled voters by human assistance, given the limitations of current technology.

The 2005 VVSG is the culmination of sixteen months of effort by the TGDC, NIST and the EAC. There is still much to be done to further develop the technical guidelines for voting system performance, accessibility and usability features, and security. Further work is also needed for the specification of comprehensive standard test suites for certification testing, to include testing for usability and accessibility features and expanded security testing.

1.4 Overview of National, State and Local Voting System Testing

1.4.1 The National Certification Program for Voting Systems

The purpose of the national certification program is to validate and document, through an independent testing process, that voting systems meet the requirements set forth in VVSG Volume 1 - Voting System Performance Guidelines, and perform according to the vendor's specifications for the system. Volume 1 specifies the minimum functional requirements, performance characteristics, documentation requirements, and test evaluation criteria that voting systems must meet in order to receive national certification. More than forty [need to get final version of this number] States require that a voting system must have national certification before it can be considered for purchase within that State.
National certification testing can only be performed by testing labs that have been accredited for demonstrated technical competence to test voting systems using these Guidelines. Volume 2 of the VVSG - National Certification Testing Guidelines - provides guidance on the testing process and describes the associated documentation requirements. These tests encompass the examination of software; the inspection and evaluation of system documentation; tests of hardware under conditions simulating the intended storage, operation, transportation, and maintenance environments; operational tests to validate system performance and function under normal and abnormal conditions; and examination of the vendor’s system development, testing, quality assurance, and configuration management practices. Certification tests address individual system components or elements, as well as the integrated system as a whole.

Since 1994, testing of voting systems has been performed by Independent Test Authorities (ITAs) certified by the National Association of State Election Directors (NASED). Upon the successful completion of testing, the ITA issued a Qualification Test Report to the vendor and NASED. The Technical Committee of the NASED Voting Systems Board would review the test report and, if satisfactory, issue a Qualification Number. The Qualification Number remains valid for as long as the voting system remains unchanged.

HAVA mandates that the certification testing process be transferred from NASED to EAC. National certification testing complements and evaluates the vendor’s developmental testing and beta testing. The test lab is expected to evaluate the completeness of the vendor’s developmental test program, including the sufficiency of vendor tests conducted to demonstrate compliance with the Guidelines as well as the system’s performance specifications. The test lab undertakes sample testing of the vendor’s test modules and also designs independent system-level tests to supplement and check those designed by the vendor. Although some of the certification tests are based on those prescribed in the Military Standards, in most cases the test conditions are less stringent, reflecting commercial, rather than military, practice.

Upon review of test reports and a determination that satisfactory results were achieved that address the full scope of testing, EAC will issue a Certification Number that indicates the system has successfully completed testing by an accredited test lab for compliance with the Guidelines. The Certification Number applies to the system as a whole and does not apply to individual system components or untested configurations.

After a system has completed initial certification testing, further examination of the system is required if modifications are made to hardware, software, or telecommunications, including the installation of software on different hardware. Vendors request review of modifications by the test lab based on the nature and scope of changes made. The test lab will assess whether the modified system should be resubmitted for certification testing and the extent of testing to be conducted and will provide an appropriate recommendation to the EAC and the vendor.

Generally, a voting system remains certified under the standards against which it was tested, as long as no modifications requiring recertification have been made to the system. However, if a new threat to a particular voting system is discovered, it is the prerogative of EAC to
determine which certified voting systems are vulnerable, whether those systems need to be retested, and the specific tests to be conducted. In addition, when new requirements supersede the requirements under which the system was certified, it is the prerogative of EAC to determine when systems that were certified under the earlier requirements will need to be re-tested to meet the current guidelines.

1.4.2 State Certification Testing

State certification tests are performed by individual states, with or without the assistance of outside consultants, to:

- Confirm that the voting system presented is the same as the one certified under the Guidelines
- Test for the proper implementation of state-specific requirements
- Establish a baseline for future evaluations or tests of the system, such as acceptance testing or state review after modifications have been made
- Define acceptance tests

State certification test scripts are not included in the Guidelines, as they must be defined by the state, with its laws, election practices, and needs in mind. However, it is recommended that they not duplicate the national certification tests, but instead focus on functional tests and qualitative assessment to ensure that the system operates in a manner that is acceptable under state law. If a voting system is modified after state certification is completed, it is recommended that states reevaluate the system to determine if further certification testing is warranted.

Certification tests performed by individual states typically rely on information contained in documentation provided by the vendor for system design, installation, operations, required facilities and supplies, personnel support and other aspects of the voting system. States and jurisdictions may define information and documentation requirements additional to those defined in the Guidelines. By design, the Guidelines do not address these additional requirements. However, national certification testing will address all the capabilities of a voting system stated by the vendor in the system documentation submitted with the testing application to the EAC, including additional capabilities required by the States.

1.4.3 Acceptance Testing

Acceptance tests are performed at the state or local jurisdiction level upon system delivery by the vendor to:

- Confirm that the system delivered is the specific system certified by EAC and, when applicable, certified by the state
• Evaluate the degree to which delivered units conform to both the system characteristics specified in the procurement documentation, and those demonstrated in the national and state certification tests
• Establish a baseline for any future required audits of the system
Some of the operational tests conducted during certification may be repeated during acceptance testing.

1.5 Definitions, References, and Types of Voting Systems

1.5.1 Definitions and References
The Guidelines contain terms describing function, design, documentation, and testing attributes of voting system hardware, software and telecommunications. Unless otherwise specified, the intended sense of technical terms is that which is commonly used by the information technology industry. In some cases terminology is specific to elections or voting systems. A glossary of terms is contained in Appendix A. Non-technical terms not listed in Appendix A shall be interpreted according to their standard dictionary definitions.

There are a number of technical standards that are incorporated in the Guidelines by reference. These are referred to by title in the body of the document. The full citations for these publications are provided in Appendix B. In addition, this appendix includes other references that may be useful for understanding and interpretation.

1.5.2 Types of Voting Systems
HAVA Section 301 defines a voting system as the total combination of mechanical, electromechanical, or electronic equipment (including the software, firmware, and documentation required to program, control, and support the equipment), that is used to define ballots; to cast and count votes; to report or display election results; and to maintain and produce any audit trail information. In addition, a voting system includes the practices and associated documentation used to identify system components and versions of such components; to test the system during its development and maintenance; to maintain records of system errors and defects; to determine specific system changes made after initial certification; and to make available any materials to the voter (such as notices, instructions, forms, or paper ballots).

Traditionally, a voting system has been defined by the mechanism the system uses to cast votes and further categorized by the location where the system tabulates ballots. In addition to defining a common set of requirements that apply to all voting systems, the VVSG states
requirements specific to a particular type of voting system, where appropriate. However, the Guidelines recognize that as the industry develops new solutions and the technology continues to evolve, the distinctions between voting system types may become blurred. The fact that the VVSG refers to specific system types is not intended to stifle innovations that may be based on a more fluid understanding of system types. However, appropriate procedures must be in place to ensure new developments provide the necessary integrity and can be properly evaluated in the certification process.

Consequently, vendors that submit a system that integrates components from more than one traditional system type or a system that includes components or technology not addressed in the Guidelines shall submit the results of all beta tests of the new system when applying for national certification. Vendors shall also submit a proposed test plan to the EAC for use in national certification testing. The Guidelines permit vendors to produce or utilize interoperable components of a voting system that are tested within the full voting system configuration.

The listing below summarizes the functional requirements that HAVA Section 301 mandates to assist voters. While these requirements may be implemented in a different manner for different types of voting systems, all types of voting systems must provide these capabilities:

- permit the voter to verify (in a private and independent manner) the vote selected by the voter on the ballot before the ballot is cast and counted
- provide the voter with the opportunity (in a private and independent manner) to change the ballot or correct any error before the ballot is cast and counted
- notify the voter if he or she has selected more than one candidate for a single office, inform the voter of the effect of casting multiple votes for a single office, and provide the voter an opportunity to correct the ballot before it is cast and counted
- be accessible for individuals with disabilities in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters
- provide alternative language accessibility pursuant to Section 203 of the Voting Rights Act

1.5.2.1 Paper-Based Voting System

A Paper-Based Voting System records votes, counts votes, and produces a tabulation of the vote count from votes cast on paper cards or sheets. A marksense (also known as optical scan) voting system allows a voter to record votes by making marks directly on the ballot, usually in voting response locations. Additionally, a paper-based system may allow for the voter’s selections to be indicated by marks made on a paper ballot by an electronic input device, as long as such an input device does not independently record, store, or tabulate the voter selections.
1.5.2.2 Direct Recording Electronic Voting System

A Direct Recording Electronic (DRE) Voting System records votes by means of a ballot display provided with mechanical or electro-optical components that can be activated by the voter; that processes data by means of a computer program; and that records voting data and ballot images in memory components. It produces a tabulation of the voting data stored in a removable memory component and as printed copy. The system may also provide a means for transmitting individual ballots or vote totals to a central location for consolidating and reporting results from precincts at the central location.

1.5.2.3 Public Network Direct Recording Electronic Voting System

A Public Network Direct Recording Electronic (DRE) Voting System is an election system that uses electronic ballots and transmits vote data from the polling place to another location over a public network. Vote data may be transmitted as individual ballots as they are cast, periodically as batches of ballots throughout the election day, or as one batch at the close of voting. For purposes of the Guidelines, Public Network DRE Voting Systems are considered a form of DRE Voting System and are subject to the standards applicable to DRE Voting Systems. However, because transmitting vote data over public networks relies on equipment beyond the control of the election authority, the system is subject to additional threats to system integrity and availability. Therefore, additional requirements are applied to provide appropriate security for data transmission.

The use of public networks for transmitting vote data must provide the same level of integrity as other forms of voting systems, and must be accomplished in a manner that precludes three risks to the election process: automated casting of fraudulent votes, automated manipulation of vote counts, and disruption of the voting process such that the system is unavailable to voters during the time period authorized for system use.

1.5.2.4 Precinct Count Voting System

A Precinct Count Voting System is a voting system that tabulates ballots at the polling place. These systems typically tabulate ballots as they are cast and print the results after the close of polling. For DREs, and for some paper-based systems, these systems provide electronic storage of the vote count and may transmit results to a central location over public telecommunication networks.
1.5.2.5 Central Count Voting System

A Central Count Voting System is a voting system that tabulates ballots from multiple precincts at a central location. Voted ballots are typically placed into secure storage at the polling place. Stored ballots are transported or transmitted to a central counting place. The systems produce a printed report of the vote count, and may produce a report stored on electronic media.

1.6 Conformance Clause

1.6.1 Scope and Applicability

The Voluntary Voting System Guidelines define requirements for conformance of voting systems that voting system vendors shall meet. The Guidelines also provide the framework, procedures, and requirements that testing labs responsible for the testing of voting certification systems shall follow. The requirements and procedures in the Guidelines may also be used by States to certify voting systems. To ensure that correct voting system software has been distributed without modification, the Guidelines include requirements for certified voting system software to be deposited in a national software repository. This provides an independent means for election officials to verify the software they purchase.

The Guidelines define the minimum requirements for voting systems and the process of testing voting systems. The guidelines are intended for use by:

- Designers and manufacturers of voting systems
- Test labs performing the analysis and testing of voting systems in support of the EAC national certification process
- National software repositories, either maintained by the National Institute of Standards and Technology (NIST) or by another EAC designated repository
- Election officials, including ballot designers and officials responsible for the installation, operation, and maintenance of voting machines
- Test labs and consultants performing the state certification of voting systems
Minimum requirements specified in these guidelines include:

- Functional capabilities
- Performance characteristics, including security
- Documentation
- Test evaluation criteria

1.6.2 Conformance Framework

This section provides the framework in which conformance is defined. It identifies the entities to which these guidelines apply, the relationships among the various entities, the structure of the requirements, and the terminology used to indicate conformance.

1.6.2.1 Applicable Entities

The requirements, prohibitions, options, and guidance specified in these guidelines apply to voting systems, voting system vendors, test labs, and software repositories.

In general, requirements for voting systems in these guidelines apply to all types of voting systems, unless prefaced with explanatory narrative applicability identifying limited to a specific typed system. Other terms in these guidelines shall be construed as synonymous with "voting systems." They are: "systems", "the system", "the voting system", and "each voting system".

The term "voting system vendor" imposes system documentation or testing requirements for the manufacturer or vendor. Other terms in these guidelines shall be construed as synonymous with "voting system vendor." They are: "vendors", "the vendor", "manufacturer or vendor", "voting system designers", and "implementer".

The terms used to designate requirements and procedural guidelines for national certification testing laboratories are indicated by referring to "testing authorities", "test labs", and "accredited test labs". The term "repository" will be used to designate requirements levied on the National Software Reference Library repository maintained at NIST or any other designated repository.

1.6.2.2 Relationships Among Entities

It is the voting system vendor that needs to implement these requirements and provide the necessary documentation for the system. In order to claim conformance to the Guidelines, the voting system vendor shall satisfy the specified requirements, including implementation of functionality, prescribed software coding and assurance practices, and preparation of the
Technical Data Package. The voting system vendor shall successfully complete the
prescribed test campaign with an EAC accredited voting system test lab.

The accredited test lab shall satisfy the requirements for conducting certification testing. The
test lab may use an operational environment emulating that used by election officials as part
of their testing to ensure that the voting system can be configured and operated in a secure
and reliable manner according to the vendor's documentation and as specified by the
Guidelines. The test lab shall coordinate and deliver the requisite documentation and final
test report to the EAC for review. Upon issuance of a certification number by the EAC, the
test lab shall deposit a copy of the certified voting system software with the National
Software Reference Library.

The EAC shall review the test results and associated documentation and make a
determination that all requirements have been appropriately tested and the test results are
acceptable. The EAC will issue a national certification number that indicates conformance of
the specified system with these Guidelines.

The National Software Reference Library (NSRL) shall create a digital signature of the
voting system software provided by the test lab. This information will be posted to a website
so election officials can compare the digital signature of the software provided to them by the
voting system vendor with this certified reference. The NSRL shall maintain this reference
information until notified by the EAC that it can be archived.

1.6.3 Structure of Requirements

Each voting system requirement in Volume I is identified according to a hierarchical scheme
in which higher-level requirements (such as "provide accessibility for visually impaired
voters") are supported by lower-level requirements (e.g., "provide an audio-tactile
interface"). Thus, requirements are nested. When the nesting hierarchy has reached four
levels (i.e. 1.1.1.1), further nested requirements are designated with lowercase letters, then
roman numerals, then numbers. Therefore, all requirements are traceable by distinct
reference insignia.

Some requirements are directly testable and some are not. The latter tend to be higher-level
and are included because 1) they are testable indirectly insofar as their lower-level
requirements are testable, and 2) they often provide the structure and rationale for the lower-
level requirements. Satisfying the lower-level requirements will result in satisfying the
higher-level requirement.

1.6.3.1 Conformance Language

The following keywords are used to convey conformance requirements:
Volume I: Voting System Performance Guidelines
1 Introduction

- **Shall** – indicates a mandatory requirement in order to conform. Synonymous with “is required to.”
- **Is prohibited** – indicates a mandatory requirement that indicates something that is not permitted, in order to conform. Synonymous with “shall not.”
- **Should, is encouraged** - indicates an optional recommended action, one that is particularly suitable, without mentioning or excluding others. Synonymous with “is permitted and recommended.”
- **May** - indicates an optional, permissible action. Synonymous with “is permitted.”

This text is directly applicable to achieving conformance to this document. Informative parts of this document include examples, extended explanations, and other matter that contain information necessary for proper understanding of the Guidelines and conformance to it.

1.6.3.2 Categorizing Requirements

The Guidelines define a common set of requirements that apply to all types of electronic voting systems for the purpose of acquiring national certification. For example, the requirements implementing the alternative language accessibility mandated by HAVA 301(a) (4) must be met by all voting systems that will be used in instructions subject to Section 203 in USC 1705 of the Voting Rights Act. Conversely, the requirements implementing the other HAVA Section 301(a) mandates, except for disability accessibility must be met by all voting systems.

In addition, the Guidelines categorize some requirements into related groups of functionality to address equipment type, ballot tabulation location, and voting system component (e.g., election management system, voting station). Hence, all of the requirements contained in the Guidelines do not apply to all elements of all voting systems. For example, requirements categorized as applying to DRE systems are not applicable to paper-based voting. The requirements implementing the disability accessibility mandated by HAVA 301(a) (3) (A) are not required of all voting systems, only by those systems the vendor designates as accessible voting systems.

Among the categories defined in the VVSG are two types of voting systems with respect to mechanisms to cast votes – Paper-Based Voting Systems and Direct Recording Electronic (DRE) Voting Systems. Additionally, voting systems are further categorized by the locations where ballots are tabulated – Precinct Count Voting Systems, which tabulate ballots at the polling place, and Central Count Voting Systems, which tabulate ballots from multiple precincts at a central location. The Guidelines define specific requirements for systems that fall within these four categories as well as various combinations of these categories.
1.6.3.3 Extensions

Extensions are additional functions, features, and/or capabilities included in a voting system that are not required by the Guidelines. To accommodate the needs of states that may impose additional requirements and to accommodate changes in technology, these guidelines allow extensions. For example, the requirements for a voter verifiable paper audit trail feature will only be applied to those systems designated by the vendor as providing this feature. The use of extensions shall not contradict nor cause the nonconformance of functionality required by the Guidelines.

1.6.4 Implementation Statement

The voting system implementation statement describes the voting system and documents the VVSG Volume 1 requirements that have been implemented by the voting system. It can also identify optional features and capabilities supported by the voting system, as well as any extensions (i.e., additional functionality beyond what is required in the guidelines). The implementation statement will include a checklist identifying all the requirements for which a claim of conformance is made.

The implementation statement must be submitted with the vendor’s application to the EAC for national certification testing. It must provide a concise summary and narrative description of the voting system’s capabilities. It shall include identifying information about the voting system, including the hardware and software components, version number and date.

1.7 Effective Date

The Voluntary Voting System Guidelines (VVSG) shall become effective for national certification testing 24 months after their final adoption by EAC. At that time, all new systems submitted for national certification shall be tested for conformance with these Guidelines. In addition, if a modification to a system certified or qualified to a previous standard is submitted for national certification after this date, every component of the modified system shall be tested using these Guidelines. All previous versions of national voting system standards will become obsolete upon this effective date.

These Guidelines are voluntary in that each of the states can decide whether to require the voting systems used in their state to have a national certification. States may decide to adopt these Guidelines in whole or in part at any time, irrespective of the effective date. In addition, States may specify additional requirements that voting systems in their jurisdiction must meet. The national certification program does not in any way pre-empt the ability of the States to have their own system certification process.
This VVSG effective date provision has no effect on the mandatory voting system requirements prescribed in Section 301(a) of the Help America Vote Act (HAVA), which States must comply with on or before January 1, 2006. The EAC issued Advisory 2005-004 to assist States in determining if a voting system is compliant with Section 301(a). This advisory is available on the EAC website at www.eac.gov.

1 Introduction

1.1 Purpose and Scope of the Voluntary Voting System Guidelines

The purpose of the Voluntary Voting System Guidelines (hereinafter referred to as VVSG or the Guidelines) is to provide a set of specifications and requirements against which voting systems can be tested to determine if they provide all the basic functionality, accessibility, and security capabilities required of voting systems. The VVSG specifies the functional requirements, performance characteristics, documentation requirements, and test evaluation criteria for the national certification of voting systems. To the extent possible, these requirements and specifications are described so they can be assessed by a series of defined, objective tests. The VVSG is composed of two volumes: Volume 1, Voting System Performance Guidelines, and Volume 2, National Certification Testing Guidelines.

The VVSG is one of several inter-related EAC promulgated guidelines and programs concerned with maintaining the reliability and security of voting systems and the integrity of the overall election process. National certification testing of voting systems is restricted to testing labs that have been formally accredited to be technically competent to evaluate systems for conformance to the Voting System Performance Guidelines. The National Association of State Election Directors (NASED) initiated the independent testing authority accreditation program for voting system test labs in 1994, applying the standards and procedures in NASED Program Handbook 9201 (Revision A). With the passage of the Help America Vote Act (HAVA), this responsibility transitioned to the Election Assistance Commission (EAC) with support from the National Voluntary Laboratory Accreditation Program (NVLAP). This program is operated by the National Institute of Standards and Technology (NIST), applying the standards and procedures in NIST Handbook 150-22, NVLAP Voting System Testing.

The VVSG and the test lab accreditation process are essential components of the EAC National Certification Program for voting systems. This program applies the standards and procedures documented in the EAC voting system certification manual. HAVA Section 231 charges EAC with providing for the certification, decertification and recertification of voting systems. Under this program national certification is just the first step of the life cycle process of maintaining the reliability and security of the voting systems used in the nation's elections. To carry out this mandate, the EAC program will include monitoring of voting system performance through incident reporting by election officials and others. The certification program will maintain information on the quality assurance practices associated with the development and manufacturing of voting systems. When a system has successfully completed the certification process, the EAC program requires a copy of the certified voting
1 Introduction

1.1 Purpose and Scope of the Voluntary Voting System Guidelines

The purpose of the Voluntary Voting System Guidelines (hereinafter referred to as VVSG or the Guidelines) is to provide a set of specifications and requirements against which voting systems can be tested to determine if they provide all the basic functionality, accessibility, and security capabilities required of voting systems. The VVSG specifies the functional requirements, performance characteristics, documentation requirements, and test evaluation criteria for the national certification of voting systems. To the extent possible, these requirements and specifications are described so they can be assessed by a series of defined, objective tests. The VVSG is composed of two volumes: Volume 1, Voting System Performance Guidelines, and Volume 2, National Certification Testing Guidelines.

The VVSG is one of several inter-related EAC promulgated guidelines and programs concerned with maintaining the reliability and security of voting systems and the integrity of the overall election process. National certification testing of voting systems is restricted to testing labs that have been formally accredited to be technically competent to evaluate systems for conformance to the Voting System Performance Guidelines. The National Association of State Election Directors (NASED) initiated the independent testing authority accreditation program for voting system test labs in 1994, applying the standards and procedures in NASED Program Handbook 9201 (Revision A). With the passage of the Help America Vote Act (HAVA), this responsibility transitioned to the Election Assistance Commission (EAC) with support from the National Voluntary Laboratory Accreditation Program (NVLAP). This program is operated by the National Institute of Standards and Technology (NIST), applying the standards and procedures in NIST Handbook 150-22, NVLAP Voting System Testing.

The VVSG and the test lab accreditation process are essential components of the EAC National Certification Program for voting systems. This program applies the standards and procedures documented in the EAC voting system certification manual. HAVA Section 231 charges EAC with providing for the certification, decertification and recertification of voting systems. Under this program national certification is just the first step of the life cycle process of maintaining the reliability and security of the voting systems used in the nation’s elections. To carry out this mandate, the EAC program will include monitoring of voting system performance through incident reporting by election officials and others. The certification program will maintain information on the quality assurance practices associated with the development and manufacturing of voting systems. When a system has successfully completed the certification process, the EAC program requires a copy of the certified voting system.
system software to be provided to the National Software Reference Library operated by
NIST. This will enable election officials to validate that the software received by their
jurisdictions is the same as the certified version.

The VVSG notes the need for appropriate procedures to complement and supplement the
technical requirements for voting system performance. It is well known that deficiencies in
election management and administration procedures can have just as much impact on the
enfranchisement of voters and the outcome of elections as the functioning of the voting
machines. The overall integrity of the election process depends on both of these elements
working together. EAC and NASED have instituted a multi-year effort to develop a
comprehensive set of election management guidelines that will complement the technical
system guidelines, as well as cover other elements of the election process.

Except as noted below, VVSG Volume I, Voting System Performance Guidelines, applies to
all system hardware, software, telecommunications, and documentation intended for use to:
- Prepare the voting system for use in an election
- Produce the appropriate ballot formats
- Test that the voting system and ballot materials have been properly prepared and are
  ready for use
- Record and count votes
- Consolidate and report election results
- Display results on-site or remotely
- Produce and maintain comprehensive audit trail data

Some voting systems use one or more commercial off-the-shelf (COTS) devices (such as card
readers, printers, and personal computers) or software products (such as operating systems,
programming language compilers, and database management systems). These devices and
products are exempt from certain portions of system certification testing, as long as they are
not modified for use in the voting system.

VVSG Volume 2, National Certification Testing Guidelines, describes the testing process
that is designed to provide a documented independent verification by an accredited testing
laboratory that a voting system has been demonstrated to conform to the Volume I
requirements and therefore should receive national certification. It provides specific detail
about the testing process and documentation requirements required to support the national
certification program.

1.2 Use of the Voluntary Voting System Guidelines

The Guidelines are intended for use by multiple audiences to support their respective roles in
the development, testing, and acquisition of voting systems:
- The accredited testing laboratories who use this information to develop test plans and
  procedures for the analysis and testing of systems in support of the national
certification testing process
The teleconference meeting to discuss EPIC's FOIA request to the EAC regarding the development of voting technology standards will take place at 11:00 AM, Friday, May 20th.

EPIC's conference bridge can be accessed by dialing 512-225-3050 access code 65889#

Thank you

Electronic Privacy Information Center (EPIC)  
1718 Connecticut Ave, NW  
Washington, DC 20009

RE: FOIA Request

Dear Ms. Coney:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U. S. Election Assistance Commission (EAC) on May 10, 2005. The request was clarified in a May 20, 2005 phone conversation as memorialized in a letter sent to you on that same day. Your clarified request sought certain records from "March 23, 2004 to the present," including:

1. Any and all transcripts, meeting minutes or similar documents memorializing the Technical Guidelines Development Committee (TGDC) meetings or hearings which are in the possession of the EAC and not publicly available on the NIST web site.
2. Any and all EAC documents or communications regarding the selection or appointment of members of the TGDC.
3. All Public Financial Disclosure Forms (OGE Form 278) filed by members of the TGDC.
4. The recommended Voluntary Voting Systems Guidelines (VVSG) presented to the EAC by the TGDC.

In response to item 1, the EAC does not have any records other than what is posted on the NIST website; www.vote.nist.gov. If you visit the website you will find minutes for the July, 9, 2004; January 18-19, 2005; and March 9, 2005 meetings. You can also view either transcripts or listen to webcasts from these meetings and the September 20-22, 2005 meeting. The minutes and/or transcript from the April 20-21, 2005 meeting should be published to the website shortly. The EAC contacted NIST and was told that it does not have any additional documents besides what is posted on the website.
In response to item 2, we have enclosed all written records located after a reasonable search dealing with the selection or appointment of members to the TGDC. Pursuant to the FIOA disclosure exemption 6, 5 U.S.C. §552(b)(6), we have redacted personal information such as home addresses, telephone numbers and e-mail addresses; and all cell phone numbers.

In response to item 3, the only individual who has to file a public financial disclosure form is Dr. Hratch Semerjian, the Acting Director of NIST. In order to obtain a copy of his OGE form 278 you will need to complete the enclosed OGE form 201 and submit it to NIST, as it is the custodian of this record.

In response to item 4, we have enclosed a disk with a complete copy of the VVSG version 1 as it was delivered to the EAC from the TGDC.

The EAC will waive the processing fees for this specific FOIA request, per your request.

If you interpret any portion of this response as an adverse action, you may appeal it to the EAC. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Gavin S. Gilmour
Associate General Counsel
U.S. Election Assistance Commission

Subject: meeting ASAP

Craig,

As I may have discussed with you, the EAC would like to announce at its March 23rd first public meeting the formation of the Technical Guidelines Development Committee (TGDC) and, possibly, when their first meeting will be held. The formation of this committee will put into motion a timetable to develop and approve the voluntary standards outlined in HAVA. We would like to discuss with NIST what HAVA requires the TGDC to do—and what we can do realistically what the funds we may or may not have. We can also work on a strategy whereby we put the things we cannot do in FY04 into our (or your) FY05 budget request.

There has been some confusion in recent days over what monies NIST does or does not have available for this purpose. Today, Penelope Bonsall of my staff was told by Dr. Zevin that there was only $350,000 to work with for FY04—and that very little progress with standards could be made with it. In addition, Dr. Zevin's presentation at NASS and NASED has confused some people because they didn't quite understand that when Susan included 7 pages of "what could be done in the next six months" in her presentation, some folks thought that is what NIST will do in 2004. I understood it to be the NIST wish list and was not sure what portion will come under the TGDC umbrella.

In addition to all of this, we have been reviewing the Human Factors report developed by NIST and have some questions. We would like to release this report at our March 23 meeting. We would like for representatives of NIST to be at our public meeting to discuss the TGDC and Human Factors report.

Therefore, I would like to propose that the following folks meet ASAP (Monday or Tuesday of next week; March 8 or 9) to talk about these issues.

Paul DeGregorio, EAC
Penelope Bonsall, EAC
Craig Burkhardt, DOC
Dr. Zevin, NIST
Allan Eustis, NIST

I think it might be best if the NIST folks heard from you to set this meeting up. Can you (or your designee) call Penelope Bonsall at 202-694-1097 with a time and place (we are flexible) for a meeting on Monday or Tuesday?

The agenda could be as follows:
1) TGDC: expectations on who will be appointed; what is it they must/can do in FY04 and FY05. What is the TGDC timetable?
2) Human Factors report
3) Dr. Zevin's "what could be done in the next 6 months";
4) Funding issues for all of this. Can we get money from DOD?

I am on travel on Friday, March 5 but can be reached on my federal cell phone which is 202-360-2146.

Thanks for your help and attention to this important matter.

Paul DeGregorio
Paul-

Along with the NIST voting team, I reviewed the names and biographies submitted by Congressman Holt's Office for nomination to the four "open" positions on the Technical Guidelines Development Committee. Avi Rubin, Barbara Simons and Michael Alvarez are all extremely qualified for the TGDC. In fact, during our deliberations, the NIST voting team considered each of these individuals for inclusion on our final list. However, there were important reasons for choosing the individuals we did. Rather than criticize these fine nominees, any of whom would bring expertise to the TGDC, I will list the criteria for NIST's final selection of nominees:

1. Technical Competence in Standards Development Processes,
2. Open Minded and Unbiased Viewpoints. No pre-set agendas,
3. Global view of security and usability issues related to voting systems and voting equipment
4. Unique "lifetime/career" experiences and expertise not available from other appointed TGDC members

I would also note that like Michael Alvarez, NIST nominee Ron Rivest was also a co-author of the Cal tech/MIT report. We at NIST stand by our nominees as the strongest candidates to meet our strict criteria for inclusion on the TGDC.

I hope this description of our TGDC nominee evaluation process will assist the EAC in the selection of the four "open" positions. We will shortly provide you with a "final four" list from the original list of six individuals. We have broadened our selection to include women who were on our original list.

I will send you some talking points for the March 23rd EAC meeting tomorrow morning. I am a bit swamped today having just returned from leave.

Susan-

I have forwarded your e-mail on to the Election Assistance Commission. IEEE will still likely receive a formal letter requesting a nominee, but your response is quite helpful and will speed the process of spinning up the TGDC.

thanks

At 05:22 PM 3/18/2004 -0500, you wrote:
Dear Allan:

Judy Gorman referred me your email query about a formal nomination of the IEEE representative to the Technical Guidelines Development (TGD) Committee of the Election Assistance Commission (EAC).

I spoke with Donald Heirman, IEEE Standards Association President Elect and IEEE-SA Board of Governors (IEEE-SA BoG) Liaison to Standards Coordinating Committee 38 (SCC38), which is the group within IEEE working on voting standards. Don asked that I write to let you know that last year, the IEEE-SA BoG named Stephen H. Berger as its choice to represent IEEE on the TGD Committee. Stephen is a member of the IEEE-SA Standards Board and Chair of SCC 38.

I hope that this email answers your questions. I would be glad to provide further information or assistance, if needed.

Sincerely,

Susan

212-642-4914

Anne Caldas has held the position of Director of Procedures and Standards Administration at the American National Standards Institute (ANSI) for more than eight years. In this capacity, she is the primary staff support for the work of three of the primary committees that implement the American National Standards process: the ANSI Executive Standards Council (ExSC), the ANSI Board of Standards Review (BSR) and the ANSI Appeals Board. The related program areas for which she is responsible include the accreditation and audit of standards developers (of which there are about 200), the accreditation of US Technical Advisory Groups (TAGs) to International Standards Organization (ISO), the approval of standards as American National Standards (ANS) (approximately 10,000 ANS exist) and the implementation of a multi-level appeals process. Prior to her current position, she worked for twelve years at the Human Resources Administration of the City of New York, serving in a final capacity as Director of Procedures and Analysis for the Office of Employment Services. She holds a Masters Degree in public policy.

Washington, D.C. 20005

Dear Commissioner Soaries:

I am pleased to notify the Commission that the following four individuals have agreed to serve on the Technical Guidelines Development Committee (TGDC) pending financial disclosure clearance and final approval by the Election Assistance Commission (EAC):

- Dr. Ronald L. Rivest
- Ms. Whitney Quesenbery
- Dr. Daniel Schutzer
- Mr. Patrick J. Gannon

I am confident that each of these individuals will bring unique technical competence in standards development to the challenging tasks that await the TGDC. In my conversations with the nominees, they each expressed an appreciation of the importance of the guidance that they will offer the EAC as we implement the Help America Vote Act of 2002. I have enclosed their resumés and am most willing to answer your questions concerning their qualifications.

Sincerely,

Ronald L. Rivest, Ph.D.

Professor, MIT
545 Technology Square
Room 324
Cambridge, MA 02139
Telephone: 617-253-5880
Fax: 617-258-9738
Email: rivest@mit.edu
Web Site: http://theory.lcs.mit.edu/~rivest/

Professor Rivest is the Viterbi Professor of Computer Science in MIT's Department of Electrical Engineering and Computer Science. He is a member of MIT's Laboratory for Computer Science, a member of the lab's Theory of Computation Group and is a leader of its Cryptography and Information Security Group. He is also a founder of RSA Data Security. (RSA was bought by Security Dynamics; the combined company has been renamed to RSA Security.)

Professor Rivest has research interests in cryptography, computer and network security, and algorithms.

Professor Rivest is a Fellow of the Association for Computing Machinery and of the American Academy of Arts and Sciences, and is also a member of the National Academy of Engineering. Together with Adi Shamir and Len Adleman, he has been awarded the 2000 IEEE Koji Kobayashi Computers and Communications Award and the Secure Computing Lifetime Achievement Award. He has also received, together with Shamir and Adleman, the 2002 ACM Turing Award. Professor Rivest has received an honorary degree (the "laurea honoris causa") from the University of Rome. He is a Fellow of the World Technology Network and a Finalist for the 2002 World Technology Award for Communications Technology.

Professor Rivest is an inventor of the RSA public-key cryptosystem. He has extensive experience in cryptographic design and cryptanalysis, and has published numerous papers in these areas. He has served as a Director of the International Association for Cryptologic Research, the organizing body for the Eurocrypt and Crypto conferences, and as a Director of the Financial Cryptography Association.

He received a B.A. in Mathematics from Yale University in 1969, and a Ph.D. in Computer Science from Stanford University in 1974.

He has also worked extensively in the areas of computer algorithms, machine learning, and VLSI design.

Whitney Quesenbery
Usability Professionals' Association
78 Washington Avenue
High Bridge, NJ 08829
908-638-5467
whitneyq@wqusability.com

Biography

Whitney Quesenbery is the director of the UPA Voting and Usability Project, a role she took on when she joined the board just days after the 2000 US Presidential election. This project has focused on the human side of the voting experience, and has worked to raise awareness of the need for usability and user-centered design in voting systems as with all technology. Whitney was on the advisory council for the FEC project on human factors in voting systems. A discussion group brings together usability advocates and researchers from around the world. Information is available on the UPA web site - www.usabilityprofessionals.org

In her 'civilian' life, Whitney Quesenbery is a user interface designer, design process consultant, and highly regarded speaker. She is an expert in developing new concepts that achieve the goal of meeting business, user, and technology needs. She has extensive user interface design experience and has produced award winning multimedia products, user interfaces, web sites, and software applications.

She is the owner and principal consultant for Whitney Interactive Design, LLC (www.WQusability.com) where she continues the work begun during her dozen years at Cognetics Corporation. Whitney's projects ranged from online financial news retrieval to hospital management software, web applications, and corporate information tools for companies such as the TriZetto Group, FDA, Open University, Armstrong, Novartis, Deloitte Consulting, Dow Jones, McGraw-Hill, Siemens, Hewlett-Packard, and Eli Lilly.

Whitney is active in the user experience community as a member of the Board of Directors for the Usability Professionals' Association (UPA) and the past-manager of the Society for Technical Communication (STC) Special Interest Group on Usability.

Experience

2002 - Present: Whitney Interactive Design, LLC
Consultancy in user-centered design, interface design and usability
Clients include:
- Trizetto
- ITG - Interpersonal Technology Group
- IRS
- Blackbaud

1990 - 2002: Cognetics Corporation
Principal and Senior Vice President for Design
Key accomplishments
- One of the primary developers for LUCID, a user-centered approach to user experience design
- Product management and documentation for Hyperties 3.0 and 4.0, released in 1992 and 1995
• Usability training and process implementation for Cognetics and clients
• Developed professional skills evaluation process for staff designers
• Principal or lead designer for design and consulting projects:
  • Web-based applications for healthcare, pharmaceutical, financial services
    o Siemens Health Systems Soarian
    o The McGraw-Hill Companies
    o ADP
    o StreamNet
    o CynoCom iAsyst
    o Con Edison
  • Intranet design and information architecture
    o McNeil
    o Novartis Consumer Health InfoWeb
    o Deloitte Consulting
    o Sanofi
  • Web site design and usability
    o Eli Lilly
    o International Center of Photography
    o NSI
    o Congressional Information Systems
    o Cognetics Corporation
  • Online books and reference
    o Hewlett Packard Laser Jet 4 Travel Guide
    o The Productivity Shoppe Get Smart
    o Gale Research
    o Primary Source Media American Journey
    o Research Publications Broadcast News
    o Union Carbide Safety Manual
    o Lederle Pharmaceuticals
  • Multimedia and Interactive television
    o Dow Jones Investor Network
    o Ameritech Interactive TV Prototypes
    o AT&T/Lucent PDD - Capabilities Demo
• 1977 - 1990: Theatrical Lighting Designer
  New York and regional theatre, dance and opera
  o Arden Theatre Company
  o Movement Theatre International
  o Lenox Arts Center
  o Hyde Park Festival Theatre
  o American Music Theatre Festival
  o Berkshire Ballet Company
  o Center for Contemporary Opera
  o LaMama E.T.C.
  o Laurie Anderson's United States I - IV
  o Popple Nongena

Publications

Balancing the 5Es
Functional requirements answer the question, "What does this program
have to do?" Usability requirements answer different questions: How do users approach this work? How
do they think about the tasks? How do they judge a successful experience?
Cutter IT Journal - February 2004, pp 4-11
"Starting from People: Designing Usable Voting Systems"
An article based on my presentation at the NIST Symposium on Building Trust and Confidence in Voting
Systems, December 10-11, 2003
"Designing a Search People Can Really Use"
Intercom, December 2003, p 18-21
Lessons on how to help people succeed with search, from usability research with consumers using online
health information.
Reprinted with permission from Intercom, the magazine of the Society for Technical Communication.
"Dimensions of Usability: Opening the Conversation, Driving the Process"
A look at using the 5Es as an advocacy and communications tool.

"Who is in Control? The Logic Underlying the Intelligent Technologies Used in Performance Support"
An exploration of technologies such as intelligent agents, information visualization, search engines and collaborative filtering and how they relate to performance support.

"Building Blocks to a Body of Knowledge for User-Centered Design: To Certify or Not to Certify"
Usability Interface, STC Usability SIG, April 2002
A report on activities investigating certification for usability professionals.

"When the show must go on, it's time to collaborate or die."
Boxes and Arrows, March 2002
What I learned about UI design while working in the theatre.

"What We Don't Know About Internet Voting and Usability"
Georgia Tech Research Institute workshop on Internet Voting, November 13-14, 2001
"Voting and Usability: Lessons Learned from the 2000 Presidential Election"
STC-PMC News & Views, November 2001
A look at some of the usability issues in the 2000 Presidential election ballot crisis.

"Building A Better Style Guide"
Proceedings of Usability Professionals' Association, 2001
A report on ways of using style guides to build consensus within a design team.

"What's in a Name?"
Design Matters, STC Information Design SIG, May 2001
A short article looking at the various titles and how they relate to the different skills needed for usability.

"Using a Style Guide to Build Consensus"
Usability Interface, STC Usability SIG, April 2001
A short introduction to the social aspects of style guides.

"Applying a UCD Process to Implementing a UCD Process"
A look at how user-centered design can be applied to implementing usability and a better design process.

"What Does Usability Mean: Looking Beyond 'Ease of Use"
This paper accompanied a panel with Caroline Jarrett, Judy Ramey and Ginny Redish and introduces the 5Es concept of dimensions of usability.

"Storytelling: Using Narrative to Communicate Design Ideas"
Presentation at the 48th Annual Conference Society for Technical Communication, 2001
Storytelling is a powerful way to explain complex concepts, and present a vision for a design.

"On Beyond Help – User Assistance and the User Interface"
Winner 2001 Frank R. Smith Outstanding Journal Article
How to make a user interface helpful, by designing for different user approaches to information.

"Voters Learn the Importance of Usability"
Usability Interface, STC Usability SIG, January 2001
A few lessons from the November 2000 election and how they apply to usability.

Daniel Schutzer, Ph.D.

Vice President & Director of External Standards and Advanced Technology, e-Citi, CitiGroup
Financial Services Technology Consortium, Board Chairman
Chairman ISO Subcommittee 2
Fellow and Advisory Board National Academy of Sciences
Citibank, 750 Washington Blvd. 7th Floor, Stamford, CT 06901
Tel.: (203) 975-6812

Advisory Committee on Online Access and Security -- Nomination, P004807.

Currently responsible for directing and coordinating Citigroup's advanced technology efforts and Citigroup's senior representation at external organizations and standards bodies. This includes ensuring research and standards activities are properly focused and aligned with business goals and priorities; formulating and executing business-driven technology directions and strategies; providing overall management, assessment, and prioritization of research and standards activities; and keeping the Citibank highly innovative. Areas of focus include electronic banking, payments and electronic commerce, bill presentment and payment, portfolio and risk management, financial engineering and new product design, customer behavioral modeling, mathematical marketing analyses and simulations, fraud detection and control, security over computer networks. Advanced technologies under investigation include agent technology, XML, machine learning, multimedia, biometrics, image and voice processing, smart cards and secure tokens.

Previous positions include Technical Director Naval Intelligence, Technical Director Navy Command, Control and Communications, and Program Manager Sperry Rand. Also worked for Bell Labs, Syracuse University and IBM.

Currently serving as Research Professor of Information Technology at Rutgers Center of Management, Integration and Connectivity (CIMIC), and teaching part time at Iona College in New Rochelle, New York, and George Washington University in Washington D.C.

EDUCATIONAL BACKGROUND: BSEE, College of City of New York, MSEEE and Ph.D. Syracuse University

Patrick J. Gannon

President and CEO, OASIS
patrick.gannon@oasis-open.org
Web site: http://www.oasis-open.org/who/
630 Boston Road
Billerica, MA 01821
USA
978 667 5115 Voice
978 667 5114 Fax

President and CEO of the Organization for the Advancement of Structured Information Standards (OASIS). In addition to serving on the OASIS Board of Directors, Mr. Gannon has served since 2000 with the United Nations Economic Commission for Europe (UNECE), as Chairman of the Team of Specialists for Internet Enterprise Development, which advises governments in transitional economies on best practices for electronic business. He also serves on the ebXML (electronic business using eXtensible Markup Language) Joint Coordinating Committee together with management from UN/CEFACT. He has worked for BEA Systems, where he served as Senior Vice President in the E-Commerce Integration Division. Prior to BEA, Mr. Gannon served as Vice President of Marketing and Industry Programs at Netfish Technologies and as Vice President of Strategic Programs for the CommerceNet Consortium, directing research and development efforts in new Internet commerce standards such as XML. While at CommerceNet, he served as the first Project Leader for RosettaNet and as Executive Director for the Open Buying on the Internet (OBI) initiative. Mr. Gannon is co-author of the book: "Building Database-Driven Web Catalogs," and is an international speaker on electronic business. Mr. Gannon has also provided guidance to governmental leaders (ministers and heads of state) on adoption of electronic business (Information & Communication Technology) strategies to facilitate economic growth; which has included Lee Teng-hui, President of the Republic of China, and Askar Akayev, President of the Kyrgyz Republic.
Dr. Bement joined NSF from the National Institute of Standards and Technology, where he has been director since Dec. 7, 2001. As head of NIST, he oversees an agency with an onsite research and administrative staff of about 3,000, complemented by a NIST-sponsored network of 2,000 locally managed manufacturing and business specialists serving smaller manufacturers across the United States.

Prior to his appointment as NIST director, Bement served as the David A. Ross Distinguished Professor of Nuclear Engineering and head of the School of Nuclear Engineering at Purdue University. He has held appointments at Purdue University in the schools of Nuclear Engineering, Materials Engineering, and Electrical and Computer Engineering.

Bement came to the position as NIST director having previously served as head of that agency’s Visiting Committee on Advanced Technology, the agency’s primary private-sector policy adviser and as head of the advisory committee for NIST’s Advanced Technology Program. Along with his NIST advisory roles, Bement served as a member of the NSF’s National Science Board from 1989 to 1995.

Bement joined the Purdue faculty in 1992 after a 39-year career in industry, government, and academia.

He holds an engineer of metallurgy degree from the Colorado School of Mines, a master’s degree in metallurgical engineering from the University of Idaho and a Ph.D. in metallurgical engineering from the University of Michigan. He is a member of the U.S. National Academy of Engineering.
Arden L. Bement, Jr., became Acting Director of the National Science Foundation on February 22, 2004.

He joins NSF from the National Institute of Standards and Technology, where he has been director since Dec. 7, 2001. As head of NIST, he oversees an agency with an annual budget of about $773 million and an onsite research and administrative staff of about 3,000, complemented by a NIST-sponsored network of 2,000 locally managed manufacturing and business specialists serving smaller manufacturers across the United States. Prior to his appointment as NIST director, Bement served as the David A. Ross Distinguished Professor of Nuclear Engineering and head of the School of Nuclear Engineering at Purdue University. He has held appointments at Purdue University in the schools of Nuclear Engineering, Materials Engineering, and Electrical and Computer Engineering, as well as a courtesy appointment in the Krannert School of Management. He was director of the Midwest Superconductivity Consortium and the Consortium for the Intelligent Management of the Electrical Power Grid.

Bement came to the position as NIST director having previously served as head of that agency's Visiting Committee on Advanced Technology, the agency's primary private-sector policy adviser; as head of the advisory committee for NIST's Advanced Technology Program; and on the Board of Overseers for the Malcolm Baldrige National Quality Award.

Along with his NIST advisory roles, Bement served as a member of the U.S. National Science Board from 1989 to 1995. The board guides NSF activities and also serves as a policy advisory body to the President and Congress. He also chaired the Commission for Engineering and Technical Studies and the National Materials Advisory Board of the National Research Council; was a member of the Space Station Utilization Advisory Subcommittee and the Commercialization and Technology Advisory Committee for NASA; and consulted for the Department of Energy's Argonne National Laboratory and the Idaho National Engineering and Environmental Laboratory.

He has been a director of Keithley Instruments Inc. and the Lord Corp. and was a member of the Science and Technology Advisory Committee for the Howmet Corp. (a division of ALCOA).

Bement holds an engineer of metallurgy degree from the Colorado School of Mines, a master's degree in metallurgical engineering from the University of Idaho, a doctorate degree in metallurgical engineering from the University of Michigan, an honorary doctorate degree in engineering from Cleveland State University, and an honorary doctorate degree in science from Case Western Reserve University. He is a member of the U.S. National Academy of Engineering.
Paul W. Craft

Biographical Sketch

Mr. Craft is a true Florida native, born in Tallahassee, Florida.

He graduated from Florida State University in 1976 with a B.S. in Business and Hotel Restaurant Administration. After 6 years in restaurant management he returned to Florida State for additional work in accounting and became a Certified Public Accountant in 1986 and a Certified Information Systems Auditor in 1992.

From 1982 to 1991, he was employed as an auditor by the Florida Department of Revenue. He began as a tax compliance auditor was promoted to an audit manager. In 1987 he was picked to head a task force investigating embezzlements within the tax refund section. Using a combination of statistical sampling, internal control analysis and computer modeling the investigation concluded with successful prosecutions.

In 1991 he was hired by the Florida Department of State as a Computer Audit Analyst in the Voting Systems Certification Section. In 1994 he began managing the section. In 2001, the Florida Legislature put significant resources into elections reform including expanding the section into a bureau with Mr. Craft as Chief.

Since the early 1980's Mr. Craft has been active in the NASED ITA Board and its technical subcommittee. His Bureau of Voting Systems Certification has been instrumental in implementing Florida's 2001 election reforms, the 2002 election accessibility act, and is now implementing the provisions of HAVA.

Mr. Craft lives in Tallahassee with his wife, Debra Ann Corkhill, one bird and two cats.
Paul W. Craft  
Certified Information Systems Auditor  

Current Employment

Bureau Chief, Bureau of Voting Systems Certification, Division of Elections, Florida Department of State.

The Bureau consists of four sections:

The Voting System Section:

- establishes standards for computer based election systems, as well as testing and evaluating system compliance with existing state and federal election standards.
- provides oversight for the use of election systems by county election offices.
- provides technical assistance, expert witness, educational and management advisory services to county election offices.

The National Voter Registration Administration Section:

- provides oversight and training under the requirements of the Florida Voter Registration Act and the National Voter Registration Act.
- provides coordination for training programs and workshops conducted by the Division of Elections.
- coordinates publications for the Division of Elections.

The Data Processing Section

- designs, develops, maintains and supports users of the Division Of Elections' custom computer applications.
- manages the Division Of Elections' web presence. (See http://election.dos.state.fl.us)
- maintains and operates the Florida Statewide Voter Registration Database.
The Florida Voter Registration System Section

- design and development of the new Florida Voter Registration System for deployment in January 2006, under the Help America Vote Act.

Education

Florida State University – B.S. Hotel and Restaurant Administration. Additional work in Accounting to meet Certified Public Accountant requirements. Continuing Professional Education to maintain CPA and CISA certifications.

H. STEPHEN BERGER
President of the General Partner
stephen.berger@ieee.org

PROFILE

Professional project manager with specialization in:

- Government and Industry Relations,
- Advanced technology business planning,
- Standards development and regulatory management.

20 years of product development and technology planning experience. Member of the IEEE Standard Board and chair of the IEEE EMC Society Standards Development Committee. Currently chairs IEEE Project 1583, standard for voting equipment. Project management experience in Telecommunications, Information Technology and Instrumentation Industries; with strong record, in the areas of EMC (Electromagnetic Compatibility), RF safety and Disability Issues.

SELECTED ACCOMPLISHMENTS

IEEE Standards Board and New Standards Committee
1st Vice-President, NARTE (National Association of Radio and Telecommunications Engineers)
Chair, IEEE EMC Society Standards Development Committee
Invented the EHR GTEM, patented, gained FCC approval and implemented its use, improving test efficiency by >80%. Awarded Siemens’ highest award for technical contribution to the business.
Established EMCO’s electromagnetic field sensing products line base upon technology transfer with NIST in Boulder, Co. This product line grew to 15% of total revenues in 3 years.
Current President and co-founder of the Association of Access Engineering Specialists (AAES)
Member of 2 US Access Board Federal Advisory Committee:

Telecommunications Access Advisory Committee (TAAC) (1996-1997)
and
Electronic Information Technology Access Advisory Committee (1998-1999)

Invited presenter on disability access at EU Ministerial Conference, April 2000 in Lisbon, Portugal
EMC AND ENVIRONMENTAL TESTING

REGULATORY COMPLIANCE

Improved test department throughput by 5 times, with no increase in personnel. This was accomplished by extensive automation, the invention of new, patented test technology. Increased total revenues by 15% at EMCO because of antenna and instrumentation designs. Member of key standards committees for EMC, RF Health, Accessibility and related areas.

PROFESSIONAL AWARDS

Certificate of Appreciation for RESNA for contributions to the field of rehabilitation engineering, 1997.
SHHH (Self Help for Hard of Hearing People) Friend of People with Hearing Loss 2001 award.

PATENTS

6,744,750: Replicating and Recombinant Networking Systems and Methods for Wireless Networks
6,684,063: Integrated Hearing Aid for Telecommunications Devices
6,380,896: Circular polarization antenna for wireless communication system
6,225,917: Electromagnetic Field Probe Having a Non-Electrical Transmission Modality
5,754,054: Apparatus and Method for Determining the Source and Strength of Electro-magnetic Emissions
5,589,773: System and Method for Making Electromagnetic Measurements Using a Tilttable Transverse Electromagnetic Cell and a Fixed Tilt Sample Holder
EP00805562A3: Radio-Frequency Hearing Aid Protector for Wireless Communications Products

PROFESSIONAL BACKGROUND
TEM CONSULTING, LP

Biographical Sketch

Donetta Davidson, Colorado Secretary of State

“For me, growing up in a rural area really exemplified the community family, it is what inspired me to run for office. Getting involved in the Colorado Community has been one of the most rewarding experiences of my life. I highly recommend it!”

Donetta Davidson was born into a military family in Liberal, Kansas in 1943. She became a Coloradoan shortly thereafter when her family moved first to Two Buttes then to Las Animas where they settled. When ever possible Donetta spends time with her family, son Todd; daughter and son-in-law Trudie and Todd Berich and granddaughters Brittany and Nicole.

Official Positions:

- Bent County Clerk and Recorder, Las Animas, Colorado
  Elected in November 1978 and served until January 1986
- Director of Elections, Colorado Department of State
  Appointed in January 1986 and served until December 1994
- Arapahoe County Clerk and Recorder, Littleton, Colorado
  Elected in November 1994, re-elected in November 1998, and served until July 21, 1999
- Colorado Secretary of State
  Appointed by Governor Bill Owens on July 22, 1999
    Elected in November 2000
- Treasurer, National Association of Secretaries of State, Elected in July 2003
- Member of the Elections Committee for the National Association of Secretaries of State
- Will serve as the President of the National Association of Secretaries of State in 2006

Experience:

- Elections Officer, Colorado Department of State, supervising the county clerks in all election matters pertaining to the Primary/General elections, including mail ballot; assisting with recall issues; municipal, special district, and school district elections
- Legislative liaison for the Secretary of State
- Legislative Liaison for the County Clerk Association
- Speaker at six Postal Training Seminars held in various cities, 1998
- Chairman of committee that developed the only logo ever used by election officials for mailings and a User’s Guide for election officials and post offices to facilitate lower mailing costs, as well as, ensuring delivery of official election mail to electors
• Speaker, National Postal Forum, 1998
• Participant, US Postal Service National Training broadcast, 1998
• Expert speaker on the election process
• Participation on state and federal levels concerning legislative changes

Accomplishments:

• Recipient, Las Animas High School Business Department, Employer of the Year, 1984
• President, Colorado State Association of County Clerk and Recorders, 1983 to 1984
• Executive Board Member, National Association of County Clerk and Recorders, 1995 to 1999
• President, National Association of State Election Directors (NASED), 1994
• Recipient, Henry Toll Fellowship of Council of State Governments, 1993
• Member, International Association of Clerks, Recorders, Election Officials, and Treasurers (IACREOT), 1995 to 1999
• Appointment to Federal Election Commission Advisory Panel, 1995 to present
• Chairman, Legislative Committee for Colorado State Association of County Clerk and Recorders, 1996 to 1999
• Chairman, Joint Elections Officials Liaison Committee (JEOLC) Postal Service Task Force, 1997 to present
• Appointment to the Election Center Board of Directors, 1998 to present
• Appointment to the National Association of State Election Directors Voting Systems/Independent Test Authority Accreditation Board, 1998 to 2003
ALICE P. MILLER

Alice P. Miller was appointed Executive Director by the Board of Elections and Ethics in July 1996, while serving as the General Counsel for the agency. Uniquely, she served in the dual capacity and was able to sustain the major operations of the Board during two major elections: the City Council Primary and Presidential election cycles. This required maintaining and promoting the Board's mission from both a legal and administrative perspective. Since her appointment as the permanent Executive Director in 1997, progress at the agency to date has included:

- modifying the training component of the pollworker unit to include professionally produced training videos that are used to supplement the in-house hands on training, and testing of election day workers; the video ultimately minimizes the costs for outside trainers, and ensures that all assigned election day workers receive uniform information about election day processes and procedures;

- reorganization of agency operations, including combining the data processing unit to function in conjunction with the registration processing component of the agency, thereby resulting in direct supervision and minimizing functions of the systems management branch;

- upgrading and enhancement of the 20 year old voter registration and ballot tabulation system to an optical scanning operation that will add ease to the voting process, reduce election day support requirements, and centralized daily in-house operations;

- implementing for the first time ever a major comparison of the local voter roll with contiguous jurisdictions and instituting procedures for making referrals of obvious violators to the Office of the United States Attorney for investigation and possible convictions;

- maintenance of the voter roll by implementing a data exchange program with other District government agencies to track individuals that may have failed to notify the Board of a change of address or residency; checking voter registration information by utilizing the National Change of Address Program (NCOA) and the National Social Security Death List;

- improvement of customer service through the development of the Board's website; the continued development of the website has evolved from an initial posting of twenty-five pages in 1997 to a current posting of 1100 pages, providing information, documents and features required in any first class "Election Website"; and the website maintains a design that allows for easy navigation and is accessible to all Internet users, regardless of their expertise or the sophistication of their equipment;
• developing thorough, comprehensive, and goal-oriented annual performance plans for fiscal year operations prior to budget approval;

• installation of signa-scan or "digital signatures" as a technology upgrade to in-house operations; the module of signa-scan, a signature verification and retrieval system, is designed to decrease the time required for verifying signatures on petitions and absentee ballots, while increasing the overall accuracy of the process.

Since Ms. Miller's tenure, the agency has made significant advancements with management and administrative control through the effective use of technology, orderly planning and procedures, development of comprehensive agency annual performance plans, and continued trouble-free elections. Public confidence in the District's election system has continued to rise and increases in voter participation in the overall process has been noted.

Professional Appointments:

Vice President, National Association of State Election Directors (NASED): (2001-present), Treasurer (1999-200), Northeast Regional Representative (1998-1999); Committee on Legislative Affairs (2001-present)

Board Member, The Election Center Professional Education Program (1999-present); Co-Chair, The Committee on Ethics and Professional Responsibility, (2001-present)

Member, Metropolitan Council of Government Election Officials Technical Committee

Member, International Foundation for Election Systems (IFES), Steering Committee for Collection of Election Resources in the United States (CERUS) Project

Bar Admissions:

United States Supreme Court, United States Court of Appeals for the District of Columbia, United States District Court for the District of Columbia, and District of Columbia Court of Appeals.

Other Professional Activities:

Testimony before Congressional Black Caucus on election reform. Presenter for the League of Women Voters, District of Columbia Commission on Aging, International Foundation for Election Systems International Visitors Program,
Institute of International Education Foreign Visitors Program and The National Association of State Election Directors

Previous Employment

From 1988 to 1997, Ms. Miller served as the senior staff attorney and later the General Counsel for the D.C. Board of Election and Ethics. As the chief legal officer for the Board of Elections and Ethics, she was responsible for representing the Board in all court proceedings on matters related to the elections process and challenges thereto. In addition, she drafted and prepared for final adoption all regulations governing the election process in the District of Columbia.

Significantly, for a period of approximately eighteen months, Ms. Miller performed both the duties associated with the offices of the General Counsel and that of the Executive Director of the Board of Elections. Most importantly, the timing of this appointment of dual responsibilities came at the onset on the Council Primary and Presidential elections. Both major elections were successful and the total operations of the agency commenced without incident. The Presidential Election was eventful in that some residents of the local Georgetown area challenged the right of student voters. That challenge resulted in ongoing contentious litigation which resulted in the Board’s position of allowing students access to the franchise being continuously upheld.

Ms. Miller also worked for a brief period with the Council of the District of Columbia. She has also worked as a law clerk and later associate attorney for the law firm of Jack H. Olender and Associates, P.C..

EDUCATION

Ms. Miller received her law degree from Northeastern University. She received her B.A. degree from Boston College, graduating cum laude from the College of Arts and Sciences Honors Program.

Personal:

Ms. Miller was born in 1956 in Bethesda, Maryland, raised in Washington, DC, married in 1983, and has two children. The Millers have resided as a family in Washington, DC since 1987.
Anne Caldas
Director, Procedures and Standards Administration
American National Standards Institute
25 West 43 Street, 4th Floor
New York, New York 10036

Anne Caldas has held the position of Director of Procedures and Standards Administration at the American National Standards Institute (ANSI) for more than eight years. In this capacity, she is the lead staff support for the work of three of the primary committees that implement the American National Standards process: the ANSI Executive Standards Council (ExSC), which accredits developers of American National Standards; the ANSI Board of Standards Review (BSR), which approves standards as American National Standards; and the ANSI Appeals Board, which is the final level of appeal at ANSI. The related program areas for which she is responsible include the accreditation and audit of standards developers (of which there are about 200), the accreditation of US Technical Advisory Groups (TAGs) to International Standards Organization (ISO), the approval of standards as American National Standards (ANS) (approximately 10,000 ANS exist) and the implementation of a multi-level appeals process. Prior to her current position, she worked for twelve years at the Human Resources Administration of the City of New York, serving in a final capacity as Director of Procedures and Analysis for the Office of Employment Services. She holds a Masters Degree in public policy.
BRITAIN J. WILLIAMS

Dr. Williams is a Professor Emeritus of Computer Science and Information Systems at Kennesaw State University, Kennesaw, Georgia. Kennesaw State is a senior university in the University System of Georgia.

From 1986 to the present he has served as a consultant to the FEC Clearinghouse for Election Administration. In this capacity, he was involved in the development of the original Voting Systems Standards published in 1990 and the revision of the Voting Systems Standards that is currently underway.

From 1986 until 1988 and from 1993 until the present, Dr. Williams has served the Elections Division of the Office of the Georgia Secretary of State as a technical advisor to assure that voting systems proposed for use in the State are in compliance with the FEC Standards, the Rules of the Secretary of State, and the Georgia Election Code. He is also a consultant on matters related to voting system certification for several other states.

From 1994 until the present, Dr. Williams has served as Chairman of the NASED Voting Systems Board Technical Advisory Committee. This committee provides technical advice to the NASED Voting Systems Board on matters related to the interpretation of the FEC Voting System Standards. The NASED Voting Systems Board is responsible for the implementation of the FEC Voting System Standards.
Daniel Schutzer, Ph.D.

Vice President & Director of External Standards and Advanced Technology, e-Citi, Citigroup
Financial Services Technology Consortium, Board Chairman
Chairman ISO Subcommittee 2
Fellow and Advisory Board National Academy of Sciences
Citibank, 909 Third Avenue, 32nd floor, New York, N.Y. 10022
(212) 559 1876, Fax (212) 832 7497

Advisory Committee on Online Access and Security -- Nomination, P004807.

Currently responsible for directing and coordinating Citigroup's advanced technology efforts and Citigroup's senior representation at external organizations and standards bodies. This includes ensuring research and standards activities are properly focused and aligned with business goals and priorities; formulating and executing business-driven technology directions and strategies; providing overall management, assessment, and prioritization of research and standards activities; and keeping the Citibank highly innovative. Areas of focus include electronic banking, payments and electronic commerce, bill presentment and payment, portfolio and risk management, financial engineering and new product design, customer behavioral modeling, mathematical marketing analyses and simulations, fraud detection and control, security over computer networks. Advanced technologies under investigation include agent technology, XML, machine learning, multimedia, biometrics, image and voice processing, smart cards and secure tokens.

Previous positions include Technical Director Naval Intelligence, Technical Director Navy Command, Control and Communications, and Program Manager Sperry Rand. Also worked for Bell Labs, Syracuse University and IBM.

Currently serving as Research Professor of Information Technology at Rutgers Center of Management, Integration and Connectivity (CIMIC), and teaching part time at Iona College in New Rochelle, New York, and George Washington University in Washington D.C.

EDUCATIONAL BACKGROUND: BSEE, College of City of New York, MSEE and Ph.D. Syracuse University

James Elekes of Plainfield, New Jersey is an adjunct professor at Essex County College in West Caldwell, New Jersey, where he has taught political science and sociology for the past 12 years. He is also an adjunct professor at the County College of Morris. Previously, he was employed by NJ TRANSIT, the state’s public transit agency, where he developed and conducted training programs for bus and rail operating and support personnel on service to passengers with disabilities. Elekes has been active in providing guidance on accessibility and disability issues to various community and civic organizations. Elekes became blind 23 years ago due to complications from juvenile diabetes. He was appointed to the Board by President Bush in 2003.

J. R. Harding, Ed.D. of Tallahassee, Florida was appointed to the Access Board in the spring of 2002 by President Bush. Active in state and local advocacy for persons with disabilities, Dr. Harding is employed by the Department of Education, Division of Vocational Rehabilitation as a Partnership Specialist for the Office of the Director. He currently represents the state of Florida and Tallahassee on a number of boards and commissions, including the Governor’s ADA Working Group, the Florida Building Commission Waver Council, the Commission for Transportation Disadvantaged, the Citizens’ Advisory Council of Leon County, and he is also an active member of the Chamber of Commerce. He is a graduate of Leadership Tallahassee, class of 19 and has been living with quadriplegia for over 20 years.
President and CEO of the Organization for the Advancement of Structured Information Standards (OASIS). In addition to serving on the OASIS Board of Directors, Mr. Gannon has served since 2000 with the United Nations Economic Commission for Europe (UNECE), as Chairman of the Team of Specialists for Internet Enterprise Development, which advises governments in transitional economies on best practices for electronic business. He also serves on the ebXML (electronic business using eXtensible Markup Language) Joint Coordinating Committee together with management from UN/CEFACT. He has worked for BEA Systems, where he served as Senior Vice President in the E-Commerce Integration Division. Prior to BEA, Mr. Gannon served as Vice President of Marketing and Industry Programs at Netfish Technologies and as Vice President of Strategic Programs for the CommerceNet Consortium, directing research and development efforts in new Internet commerce standards such as XML. While at CommerceNet, he served as the first Project Leader for RosettaNet and as Executive Director for the Open Buying on the Internet (OBI) initiative. Mr. Gannon is co-author of the book: "Building Database-Driven Web Catalogs," and is an international speaker on electronic business. Mr. Gannon has also provided guidance to governmental leaders (ministers and heads of state) on adoption of electronic business (Information & Communication Technology) strategies to facilitate economic growth; which has included Lee Teng-hui, President of the Republic of China, and Askar Akayev, President of the Kyrgyz Republic.
Helen Purcell

Maricopa County Recorder
111 S. 3rd Ave
Phoenix, AZ 85003

Office: 602-506-3629
Cell: 602-390-2516
Fax: 602-506-4050
e-mail: hpurcell@risc.maricopa.gov

Helen Purcell was elected to the office of Maricopa County Recorder in November, 1988; and re-elected in November, 1992, November, 1996, and November, 2000 – the second woman to hold this position since 1871. Born in Topeka, Kansas, she has been a Phoenix resident since 1964. Mrs. Purcell began her career with T. J. Bettis Mortgage Company in Texas, subsequently becoming a Real Estate Trust Officer with Stewart Title & Trust of Phoenix. She has been a member of the Board of Directors of the National Association of Counties (NACo) since December, 1997, a member of the Board of Directors of the Kids Voting-Arizona, a member of the National Association of County Recorders and Clerks, and the International Association of Clerks, Recorders, Elections Officials and Treasurers. In May, 1998, Mrs. Purcell received the National Kids Voting Excellence Award. She is Past President of the Arizona Association of Counties and a former President of the Arizona Association of County Recorders. She is a member of The Property Records Industry’s Joint Task Force, a Subcommittee of the National Association of County Recorders, Election Officials and Clerks (NACRC), and the Co-Chairperson of the Technology Committee. She is a member of the State of Arizona’s Election Law Sub-Committee. In November of 2000, Mrs. Purcell was asked to serve on the National Commission on Election Standards and Reform, a twenty-member panel created by the National Association of Counties (NACo) and NACRC to review the American election process and make recommendations to improve it. Mrs. Purcell has two grown sons, Mark and Todd, and four grandsons.

Mrs. Purcell’s statutory duties and responsibilities include recording and maintaining, for permanent public record, 8,000 to 10,000 documents per day, and maintaining voter registration rolls for over 1,300,000 registered voters. In addition, she is responsible for administering the Elections Department that conducts all national, state and countywide elections, and provides elections support for cities, towns, schools, and other jurisdictions.

On April 3, 2000, the Maricopa County Elections Department’s Vote-By-Mail technology became part of the 2000 Computerworld Smithsonian Collection at the Smithsonian’s National Museum of American History in Washington, D. C. Nominated by Michael Dell, Chairman and Chief Executive Officer of Dell Computer Corporation, Mrs. Purcell and her Department encourage voters of America’s 5th largest county to request mail-in ballots by phone, mail, Internet, or walk-in, increasing overall voter participation as mail-in ballots grow to account for a third of the total ballots.
Donald A. Norman, Ph.D.

Nielsen Norman Group
48921 Warm Springs Boulevard
Fremont, California 94539-7767
Tel. (408) 720-8808
Web Site: http://www.nngroup.com/about/

Professor of Computer Science at Northwestern University and co-founder of the Nielsen Norman Group, an executive consulting firm that helps companies produce human-centered products and services. Norman serves as advisor and board member to numerous companies in high technology and consumer products and to non-profit organizations in the area of policy and education.

Norman has served as Vice President of the Advanced Technology Group at Apple Computer and as an executive at Hewlett Packard and UNext, a distance education company. He is Professor Emeritus at the University of California, San Diego where he was founding chair of the Department of Cognitive Science and chair of the Department of Psychology. He is a trustee of the Institute of Design in Chicago, IL.

Norman received a B.S. degree from MIT and an MS degree from the University of Pennsylvania, both in Electrical Engineering. His doctorate, from the University of Pennsylvania, is in Psychology. In 1995, he received an honorary degree from the University of Padua (Italy).

He was one of the founders of the Cognitive Science Society and has been chair of the society and editor of its journal, Cognitive Science. He is a fellow of the Human Factors & Ergonomics Society, the American Psychological Society, and the American Academy of Arts and Sciences, the Association for Computing Machinery (ACM). In 2002 he received the “Lifetime Achievement Award” from SIGCHI, the professional organization for Computer-Human Interaction. He has been a Fellow at the Center for Advanced Studies in the Behavioral Sciences (Stanford).

Dr. Norman has published extensively in journals and books, and is the author or co-author of thirteen books, with translations into twelve languages, including "The Design of Everyday Things," and "Things That Make Us Smart." His latest book is "The Invisible Computer: Why good products can fail, the PC is so complex, and information appliances are the answer." Business Week has called this "the bible of the 'post PC' thinking." (No ties to voting. Considered a guru in the field of human-computer interactions)
SHARON TURNER BUIE
Director of Elections
Kansas City Board of Election Commissioners

Ms. Buie serves as co-director of elections for the Kansas City Board of Election Commissioners, administering policies, directives and decisions of the Board while insuring the proper conduct of all public elections in the city of Kansas City, Missouri, within the boundaries of Jackson County.

Along with her co-director, Ms. Buie is responsible for servicing over 220,000 registered voters with 26 full time, up to 50 part time, and approximately 1,600 temporary employees on election days. Typically, four to six elections are held annually.

During her tenure, she has received the industry's highest designation of CERA, Certified Elections/Registration Administrator and she has been appointed to several Boards and Commissions:

- EAC Board of Advisors
- EAC Technical Guidelines Development Committee
- The Blunt Commission by Secretary of State Blunt
- The Blunt Commission on Election Reform
- Chair of the Missouri State Help America Vote Act Education/Training Committee
- The International Foundation for Election Systems Miami/Dade Monitoring Project
- The International Foundation for Election Systems Washington D.C. State Plan Project
- The International Association of Clerks, Recorders, Election Officials and Treasurers representative on The Election Assistance Commission Advisory Board for the Help America Vote Act

Ms. Buie also holds memberships in several organizations: The Election Assistance Commission, which is a newly established organization commissioned by the President of the United States; The Blunt Commission, which was established by Missouri Secretary of State Blunt to improve the election process, the International Association of Clerks, Recorders, Election Officials and Treasurers, The Election Center, the Missouri Association of County Clerks & Election Authorities, the National Association of County Recorders, Election Officials and Clerks, the NAACP, League of Women Voters and Citadel Gardens, Inc., a residential housing center for senior adults.
We will need to vote to appoint the TGDC. Since four of the members are our appointees with NIST, it is incumbent upon us to properly consider and appoint them.

Sent from my BlackBerry Wireless Handheld
Fellow Commissioners,

Attached is the list and the bios of the 15 people that I will propose that we ratify as the members of the Technical Guidelines Development Committee. In addition to the electronic copies, I am also going to give you a paper version of same.

Unless I hear from you otherwise, on Thursday, June 10, I will submit a tally vote for ratification of these appointees.

Please note that those appointees with an (EAC) after their name are the appointees of which we have real discretion. Secretary Davidson (R) and Ms. Miller (D) come from the Standards board; Ms. Turner-Buie (D) and Ms. Purcell (R) come from the Advisory Board (as required by HAVA).

Please let me know if you have any questions. Thanks.

BEFORE THE U.S. ELECTION ASSISTANCE COMMISSION

In the Matter of

Approval of Recommended Joint Appointments to Technical Guidelines Development Committee; Letter Re Same to Director, NIST

CERTIFICATION

I, DeForest B. Soaries, Jr., Chairman of the U.S. Election Assistance Commission do hereby certify that on June 10, 2004, the Commission decided by a vote of 4-0 to approve the following:

1. Approval of Recommended Joint Appointments to Technical Guidelines Development Committee; Letter Re Same to Director, NIST.

Commissioners Soaries, Hillman, Martinez and DeGregorio voted affirmatively for the decision.

Date 6/10/04

DeForest B. Soaries, Jr.
Chairman
DATE & TIME OF TRANSMITTAL: June 9, 2004, 10:00 AM

BALLOT DEADLINE: June 11, 2004, 10:00 AM

COMMISSIONERS: DeGREGORIO, HILLMAN, MARTINEZ, SOARIES

SUBJECT: APPROVAL OF RECOMMENDED JOINT APPOINTMENTS TO TECHNICAL GUIDELINES DEVELOPMENT COMMITTEE: LETTER RE SAME TO DIRECTOR, NIST.

I approve the recommendation. — as edited

I disapprove the recommendation.

I object to the recommendation.

I am recused from voting.

COMMENTS: See edits to spelling of Ms. Turner Bridi's name and to the letter.

DATE: 6/9/04 SIGNATURE:  

A definite vote is required. All ballots must be signed and dated. Please return ONLY THE BALLOT to the Consulting Chief of Staff. Please return the ballot no later than date and time shown above.

FROM COMMISSIONER DeGREGORIO
MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio Commissioner

SUBJ: Submission for Tally Vote—Recommended Joint Appointments to the Technical Guidelines Development Committee; Letter to Acting Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointment

I respectfully recommend that the Commission take the following actions:

1. **Recommended Joint Appointments to the Technical Guidelines Development Committee.**

That the Commission recommends the joint appointment, with the Director of the National Institute of Standards and Technology (HAVA sec. 221(c)), of the following individuals to be members of the Technical Guidelines Development Committee:

a. Donetta Davidson
   Colorado Secretary of State
   (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

b. Alice Miller
   Director of Elections-District of Columbia
   (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

c. Sharon Turner Buie
   Director of Elections-Kansas City
   (HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
d. Helen Purcell  
Maricopa County Recorder  
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

e. James (Jim) R. Harding  
Member, Architectural and Transportation Barrier Compliance Board  
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

f. James Elekes  
Member, Architectural and Transportation Barrier Compliance Board  
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

g. Ann Caldas  
Director, Procedures and Standards Administration  
American National Standards Institute  
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

h. H. Stephen Berger  
TEM Consulting, LP  
Chair, IEEE SEC 38 (Voting Syst. Stdts.), Institute of Electrical and Electronics Engineers  
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

i. Dr. Brittain Williams  
Retired professor- Kennesaw State- University of Georgia  
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

j. Paul Craft  
Florida Department of State, Voting Systems Division  
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

k. Dr. Ronald Rivest  
Professor, MIT-Department of Electrical Engineering and Computer Science  
(HAVA sec. 221(c)(1)(E))

l. Dr. Daniel Schutzer  
Vice President & Director of External Standards and Advanced Technology, e-Citi, CitiGroup  
(HAVA sec. 221(c)(1)(E))

m. Patrick Gannon  
President and CEO, OASIS  
(HAVA sec. 221(c)(1)(E))
n. Whitney Quesenbery  
Director-Usability Professionals' Association  
(HAVA sec. 221(c)(1)(E))

2. Letter to Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointments.

That the Commission approves the attached letter to the Director, National Institute of Standards and Technology, requesting that the Director concur in the recommended joint appointments to the Technical Guidelines Development Committee, and also that the Commission authorize the Chairman to sign and transmit the letter on its behalf.

Attached please find a ballot on which you may mark your vote on this matter, and instructions and a deadline for returning your vote to the Chairman.

Attachment

CC: Consulting Chief of Staff
June 2, 2004

Dr. Arden Bement, Jr.
Acting Director, National Science Foundation
Director, National Institute of Standards and Technology
100 Bureau Drive, Stop 1000
Gaithersburg, MD 20899-1000

Dear Dr. Bement:

On June 2, 2004, the Election Assistance Commission (EAC) voted to recommend that the following individuals be jointly appointed, under 15 U.S.C. 15361, by the EAC and the Director of the National Institute of Standards Technology (NIST) to the Technical Guidelines Development Committee (TGDC):

Donetta Davidson
Colorado Secretary of State
(HAVA sec. 221(c)(1)(A)(i) (Standards Board))

Alice Miller
Director of Elections-District of Columbia
(HAVA sec. 221(c)(1)(A)(i) (Standards Board))

Sharon Turner/Buie
Director of Elections-Kansas City
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

Helen Purcell
Maricopa County Recorder
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
Dr. Arden Bement, Jr.
June

James (Jim) R. Harding
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

James Elekes
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier Compliance Board))

Ann Caldas
Director, Procedures and Standards Administration
American National Standards Institute
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

H. Stephen Berger
TEM Consulting, LP
Chair, IEEE SEC 38 (Voting Syst. Stds.), Institute of Electrical and Electronics Engineers
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

Dr. Brittain Williams
Retired professor- Kennesaw State- University of Georgia
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

Paul Craft
Florida Department of State, Voting Systems Division
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

Dr. Ronald Rivest
Professor, MIT-Department of Electrical Engineering and Computer Science
(HAVA sec. 221(c)(1)(E))

Dr. Daniel Schutzer
Vice President & Director of External Standards and Advanced Technology, e-Citi, CitiGroup
(HAVA sec. 221(c)(1)(E))

Patrick Gannon
President and CEO, OASIS
(HAVA sec. 221(c)(1)(E))

Whitney Quesenbery
Director-Usability Professionals' Association
(HAVA sec. 221(c)(1)(E))
Dr. Arden Bement, Jr.
June __

The Commission has authorized me to request that you, as Director of NIST, concur in the joint appointment of these individuals.

On behalf of the Commission, I express my deep appreciation for the assistance rendered to the EAC by NIST. We are proud of our continuing relationship with NIST, and of the important work with which our two organizations have been jointly tasked.

If you require any assistance from EAC you may contact me or my Special Assistant, Ms. Joan Wooley, at (202) 566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

FROM COMMISSIONER DeGREGORIO
MEMORANDUM

TO: EAC Commissioners
FROM: Paul DeGregorio
SUBJ: Submission for Tally Vote—Recommended Joint Appointments to the Technical Guidelines Development Committee; Letter to Acting Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointment

I respectfully recommend that the Commission take the following actions:

1. Recommended Joint Appointments to the Technical Guidelines Development Committee.

That the Commission recommends the joint appointment, with the Director of the National Institute of Standards and Technology (HAVA sec. 221(c)), of the following individuals to be members of the Technical Guidelines Development Committee:

   a. Donetta Davidson
      Colorado Secretary of State
      (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

   b. Alice Miller
      Director of Elections-District of Columbia
      (HAVA sec. 221(c)(1)(A)(i) (Standards Board))

   c. Sharen Turner-Buie
      Director of Elections-Kansas City
      (HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))
Recommended Joint Appointments to TGDC
June 9, 2004

d. Helen Purcell
Maricopa County Recorder
(HAVA sec. 221(c)(1)(A)(ii) (Board of Advisors))

e. James (Jim) R. Harding
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier
Compliance Board))

f. James Elekes
Member, Architectural and Transportation Barrier Compliance Board
(HAVA sec. 221(c)(1)(A)(iii) (Architectural and Transportation Barrier
Compliance Board))

g. Ann Caldas
Director, Procedures and Standards Administration
American National Standards Institute
(HAVA sec. 221(c)(1)(B) (American National Standards Institute))

h. H. Stephen Berger
TEM Consulting, LP
Chair, IEEE SEC 38 (Voting Syst. Stds.), Institute of Electrical and Electronics
Engineers
(HAVA sec. 221(c)(1)(C) (Institute of Electrical and Electronics Engineers))

i. Dr. Brittain Williams
Retired professor- Kennesaw State- University of Georgia
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

j. Paul Craft
Florida Department of State, Voting Systems Division
(HAVA sec. 221(c)(1)(D) (National Association of State Election Directors))

k. Dr. Ronald Rivest
Professor, MIT-Department of Electrical Engineering and Computer Science
(HAVA sec. 221(c)(1)(E))

l. Dr. Daniel Schutzer
Vice President & Director of External Standards and Advanced Technology,
e-Citi, Citigroup
(HAVA sec. 221(c)(1)(E))

m. Patrick Gannon
President and CEO, OASIS
(HAVA sec. 221(c)(1)(E))
n. Whitney Quesenbery  
Director-Usability Professionals' Association  
(HAVA sec. 221(c)(1)(E))

2. Letter to Director, National Institute of Standards and Technology, Requesting Concurrence in Joint Appointments.

That the Commission approves the attached letter to the Director, National Institute of Standards and Technology, requesting that the Director concur in the recommended joint appointments to the Technical Guidelines Development Committee, and also that the Commission authorize the Chairman to sign and transmit the letter on its behalf.

Attached please find a ballot on which you may mark your vote on this matter, and instructions and a deadline for returning your vote to the Chairman.

The Commission has authorized me to request that you, as Director of NIST, concur in the joint appointment of these individuals.

On behalf of the Commission, I express my deep appreciation for the assistance rendered to the EAC by NIST. We are proud of our continuing relationship with NIST, and of the important work with which our two organizations have been jointly tasked.

If you require any assistance from EAC you may contact me or my Special Assistant, Ms. Joan Wooley, at (202) 566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman
Thanks for the clarification. We'll fix the bio section and resend.

"Allan Eustis" <allan.eustis@nist.gov>

Paul-

My apologies for the mis-statement. Patrick Gannon is indeed one of the approved TGDC at large members. In my attached e-mail, I meant to print Don Norman for exclusion from the TGDC bios file and for some reason typed Patrick Gannon.

Don Norman is not one of the TGDC members, Patrick Gannon is. (Norman was one of the original seven approved and vetted "at large" candidates bios originally transmitted to the EAC. We narrowed the selection to four and included Whitney Quesenbery.)

Bottom line, the TGDC voted on the correct at-large members listed in the EAC_TGDC file dated June 8, 2004. Norman's name appears only in the EAC_BIOS file.

Again, my apologies.

Allan,

I am really confused now. Are you saying that Patrick Gannon is NOT Dr. Bement's pick for the TGDC? His name and the bio we are using was with Bement's letter of April 27, 2004 which transmitted his 4 recommendations to the TGDC.

Please advise ASAP as the commission voted today to approve all members of the TGDC.
Thanks.

Subject: TGDC Members- Incorrect Addresses

Paul-

Per my voice mail, I am listing the corrected addresses for Whitney Quesenbery and Patrick Gannon below. The file you sent with their addresses contained erroneous title lines. Also, the bio file contains a bio for Patrick Gannon who I am fairly sure is not one of the TGDC members on whom you will be voting. You will want to delete his bio.

Washington, DC 20005

Dear Dr. Soaries:

Thank you for the June 10, 2004 letter indicating the Election Assistance Commission’s affirmative vote for the fourteen members of the Technical Guidelines Development Committee.

I concur with the individuals selected to the committee by the Commission and look forward to the upcoming July meeting of the Committee.

Sincerely,

Arden L. Bement, Jr.
Director
The EAC will announce the members of the TGDC on Thursday, June 17.

I want to remind everyone that with the first meeting set for July 9, we need to do the following:

1) Get out a "save the date" e-mail to the members ASAP so they can hold their calendars for the July 9 meeting (and arrive in DC the night before). Diane Savoy is to do this by COB on June 16.
2) No later than Friday, June 18, we need to mail and fax a formal letter out from the Chairman to the members of the TGDC of their appointment and with meeting details, including information on how to make plane/hotel reservations and file any reports they are required to. John Vergelli is doing the draft, with input from Eustis, Burkhardt and Greene.
3) We need to file the Charter of the TGDC with the proper committees by next Monday. John Vergelli is working on this.
4) Federal Register notice must be published no later than June 24 (and the FR has to be notified that it is coming). Allan Eustis is responsible for this.
5) The agenda for July 9 has been drafted. I am circulating it with my fellow commissioners to make sure they are OK with it.

I am assuming that once the TGDC is up and running that NIST will handle all of the administrative functions, and coordinate with the EAC as to meeting dates and the agenda.

What am I missing?

Greetings all:

Attached is the latest draft of the letter that is to be sent to the members of the TGDC ASAP. Please review and get your comments to Diane Savoy, who will facilitate getting these letters out. Perhaps Adam can assemble the attachments. I've attached a list of the members (taken from our shared drive).

John--do we need a separate version for those appointees who will not have to file the same disclosure documents as the 6 you identified (the four scientist plus the ANSI and IEEE representatives)? Please note that I asked them to submit the forms to you.

Craig--since Alan Eustis is out until Monday, you'll need to sign off on this letter (he gave us Mary Floyd's contact information; I assume she knows this).

Adam- Please go to the following file on the shared drive to find the list of members in excel and word. Please note that the word file lists two phone numbers for each person, but does not indicate which one is the fax (you can go to the excel file to confirm which one is). Please note which number is the fax number on the word file, which is the document you should send as an attachment: \CLEARINGHOUSE\Help America Vote Act\Boards and Committees\TGDC

Thanks for your help.

TGDC appointment meeting announce letter6-17-04.doc
Good morning,

For the recipients of the letter who are not financial disclosure filers, the third full paragraph (beginning "Before you begin ...") should be deleted.

Having the filers send the forms to me is fine.

JCV.

All:

The letter looks good to me.

Regards,
Craig Burkhardt
Joan,

Attached is a draft of the letter that is to go to the TGDC members notifying them of the first meeting on July 9. Please show it to the Chairman so that he can see it before we send him 15 letters to sign, in case he has changes to make. Please note that there will be two versions: 6 of the 15 members will receive a letter with the 3rd paragraph shown in the attached version (financial disclosure requirement). When you have a final version, please send it to Joyce, with a cc to me, Diane, Adam and John. Joyce will facilitate merging the letters and getting them out the door.

We need to get this done ASAP. Thanks.

Dear <Name>,

On behalf of my colleagues on the Election Assistance Commission (EAC) and of the Director of the National Institute of Standards and Technology (NIST), let me take this opportunity to welcome you and thank you for agreeing to become a member of the Technical Guidelines Development Committee (TGDC). This letter contains important information about your service on the TGDC and plans for the first meeting.

The EAC looks forward to working with you to meet the requirements of the Help America Vote Act (HAVA) by assisting in the development of voluntary voting system guidelines. Your appointment as a member of the TGDC will begin as of the date of this letter. We have included with this letter a list of all members of the TGDC so that you can become familiar with your colleagues on this crucial committee. Also attached is a copy of the portion of HAVA that governs the work of the Committee.

Before you begin your important work with the TGDC, please be aware that the Federal Advisory Committee Act (FACA) Pub. L. 92-463, 5 U.S.C. App.1, and Federal ethics laws require that you complete the attached SF-450 financial disclosure document. This document is mandated for individuals appointed to the TGDC as general experts or otherwise unofficial representatives of the appointing authority. Please complete this form by July 2, 2004 and return it to John Vergelli at the address listed at the top of this page. This form can also be accessed on-line by going to the U.S. General Services Administration web site (www.gsa.gov) and typing “SF450” in the search box at the top right-hand side of the page. Timely submission of this form will ensure that you are able to fully participate in all actions of the TGDC. Please be assured that your information will be kept in the strictest confidence according to Federal statute.
The inaugural meeting of the TGDC will be held on July 9, 2004, in Washington, D.C. at the offices of the EAC, 1225 New York Ave, NW, Suite 1100. Under HAVA, the National Institute for Standards and Technology will serve as the Secretariat for the TGDC. Accordingly, NIST will pay roundtrip airfare, hotel, per diem and local transportation expenses for you as prescribed in the Federal Government Travel Regulations. We ask that you make your travel arrangements by calling Mary Floyd at NIST at 301-975-4612. A block of rooms has been reserved at the Washington Marriott Metro Center, which is located less than two blocks from the EAC. Ms. Floyd will handle your reservations once you confirm your attendance.

The July 9th meeting will begin at 9:00 am and will continue until approximately 3:00 pm. We are planning a very tight agenda as there is a lot that we must accomplish at this first meeting. Your participation for the entire time is very important to us. We will mail and fax the meeting agenda and other materials to you the week of June 28, 2004.

Should you have any questions, please contact Mr. Allan Eustis, Project Leader, NIST Voting Systems Standards, at 301-975-5099. We look forward to seeing you on July 9th.

Sincerely,

DeForest B. Soaries, Jr.
Chairman

Dear Ms. Davidson:

On behalf of my colleagues on the U.S. Election Assistance Commission (EAC) and the Director of the National Institute of Standards and Technology (NIST), let me take this opportunity to welcome you and thank you for agreeing to become a member of the Technical Guidelines Development Committee (TGDC). This letter contains important information about your service on the TGDC and plans for the first meeting.

The EAC looks forward to working with you to meet the requirements of the Help America Vote Act (HAVA) by assisting in the development of voluntary voting system guidelines. Your appointment as a member of the TGDC will begin as of the date of this letter. We have included with this letter a list of all members of the TGDC so that you can become familiar with your colleagues on this crucial Committee. Also attached is a copy of the portion of HAVA that governs the work of the Committee.

Before you begin your important work with the TGDC, please be aware that the Federal Advisory Committee Act (FACA) Pub. L. 92-463, 5 U.S.C. App.1, and Federal ethics laws require that you complete the attached OGE-450 financial disclosure document. This document is mandated for individuals appointed to the TGDC as general experts or otherwise unofficial representatives of the appointing authority. Please complete this form by July 2, 2004 and return it to John Vergelli at the letterhead address at the top of this page. This form can also be accessed on-line by going to the U.S. General Services Administration web site (www.gsa.gov) and typing “OGE450” in the search box at the top right-hand side of the page. Timely submission of this form will ensure that you are able to fully participate in all actions of the TGDC. Please be assured that your information will be kept in the strictest confidence according to Federal statute.

The inaugural meeting of the TGDC will be held on July 9, 2004, in Washington, D.C. at the offices of the EAC, 1225 New York Ave, NW, Suite 1100. Under HAVA, the National Institute for Standards and Technology (NIST) will serve as the Secretariat for the TGDC. Accordingly, NIST will pay roundtrip airfare, hotel, per diem and local transportation expenses for you as prescribed in the Federal Government Travel Regulations. We ask that you make your travel arrangements by calling Mary Floyd at NIST on 301-975-4612. A block of rooms has been reserved at the Washington Marriott.
Metro Center hotel, which is located less than two blocks from the EAC. Ms. Floyd will handle your reservations once you confirm your attendance.

The July 9th meeting will begin at 9:00 a.m. and will continue until approximately 3:00 p.m. We are planning a very tight agenda as there is a lot that we must accomplish at this first meeting, therefore we will start promptly. Your participation for the entire time is very important to us. We will mail and fax the meeting agenda and other materials to you the week of June 28, 2004.

Should you have any questions, please contact Mr. Allan Eustis, Project Leader, NIST Voting Systems Standards, at 301-975-5099. We look forward to seeing and working with you on July 9, 2004.

Sincerely,

Gracia Hillman
Vice-Chair

Diane-

Here is a final draft of the letter that went to TGDC members yesterday. You will receive a hard copy of the package as well most likely today. I am sending the letter and contents of the package to Mr. Elekes via e-mail as he is blind and the Access Board has requested we transmit all documents to him in .doc format. I will cc you on this e-mail as well with a copy to David Capozzi at the Access Board.

regards

Mr. H. Stephen Berger  
TEM Consulting, LP-Chair  
And IEEE SEC 38  
Institute of Electrical and  
Electronics Engineers  
140 River Road  
Georgetown, TX 78628

Dear Mr. Berger:

On behalf of Dr. Arden L. Bement, Jr., and the Information Technology Laboratory at the National Institute of Standards and Technology (NIST), I welcome the opportunity to work with you as a member of the Technical Guidelines Development Committee (TGDC). The Help America Vote Act (HAVA) of 2002 sets out an ambitious nine-month task for us to meet. I will serve as the Committee’s Secretariat. Please feel free to contact me with any issues at any time.

I am including some information on our work at NIST in this package. Early next week, I will send you an agenda for our upcoming July 9, 2004 meeting as well as a straw man procedural roadmap for the TGDC. My assistant, Mary Floyd, is making final arrangements for your travel and hotel accommodations at the Marriott Metro Center Hotel, approximately two blocks from the Election Assistance Commission (EAC) Headquarters, 1225 New York Avenue, where the TGDC will meet on July 9, 2004. The Hotel, located at 775 12th Street NW, is a twenty-minute taxi ride from National Airport. We are planning a get acquainted dinner at the Metro Grille in the hotel at 7 pm on July 8, 2004. I hope you will arrive in time to attend and meet Dr. Bement, Director of NIST and chair of the TGDC.

We will begin our committee work on July 9th at 9 a.m. and end at 3 p.m. I look forward to working with you on accomplishing the tasks outlined for us in HAVA.

Sincerely,

Allan C. Eustis

NIST Voting Systems Standards

Enclosure

cc: Diane Savoy (EAC)
Craig,

I have taken a look at the statute and charter for some guidance on this issue. It appears that ANSI (whoever is the proper person to make the appointment) should notify TGDC through Dr. Semerjian and EAC that they wish to replace Ms. Caldas with Mr. Karmol including the effective date of the appointment. Not having the historical knowledge that you do, I am not sure that Ms. Caldas is the right person to be communicating on behalf of ANSI. Is she the appointing authority for ANSI? If so, then we can accept a letter or communication from her as the tool to make the change. If not, we need a communication from the appropriate person.

Subject Fw: ANSI Representative on the TGDC

Juliet: Looks like we should go ahead and make the switch. As GC for the EAC, I think it is in your court, but let me know if you wish me to do anything. At the least, I suggest I have my people do the basic background vetting, which takes 3 days. Perhaps we should have Caldas send a formal message of resignation to Hratch to trigger the event. Doing so will not negatively impact TGDC operations, as Ms. Caldas was abstaining on all votes anyway. How do you think we should proceed? Regards, Craig

Subject ANSI Representative on the TGDC
Dear Craig and Allan -

In follow-up to my E-mail below and in light of Craig's confirmation at the last TGDC meeting that David Karmol may replace me as ANSI's representative on the TGDC, I wondered if official confirmation is forthcoming or needed? In addition, as David will serve as the ANSI representative going forward, his name should replace mine for E-mail and hard copy distributions.

I appreciate your efforts and thank you both for your professionalism and hard work in connection with this project.

If I can ever be of assistance to you in the future, please do not hesitate to contact me.

Regards,

Anne

Subject: ANSI Representative on the TGDC

Dear Mr. Burkhardt:

The purpose of this E-mail is to request that the official representative of ANSI on the TGDC be changed to:

David L. Karmol

Vice President, Public Policy and Government Affairs

dkarmol@ansi.org

202-331-3610

Please advise me of any steps that ANSI must take to effect this change. At this time, I intend to represent ANSI at the March 9th TGDC meeting at NIST.

Thank you for your assistance.

Sincerely,

Anne

Subject Will have ANSI replacement vetted by Tuesday

Juliet:

We will have the vetting done on David Karmol (the ANSI replacement) on Tuesday next week. I can arrange for Semerjian to agree to the appointment immediately thereafter, and then it is just a matter for you to get assent from the EAC and issue the invitation. We can also have Hratch make the invitation, if the EAC prefers.

I know you are busy, but the EAC needs to determine if it wants to replace Ms. Turner-Bouie in advance of the April meeting. She is ill with cancer, and has asked for a "leave". Unfortunately, there is no flexibility for someone to vote or meaningfully participate in her place during the meeting, so I suggest that we replace her with the understanding that the replacement will resign and she will be reappointed when she wants to return. This is one of the slots the EAC picked from its advisory board, so NIST will agree to your replacement. We can vet this person very quickly, if you wish.

Subject Replacement of TGDC member

This morning, moments before the TGDC meeting was to begin, I was approached by David Karmol, who indicated that he was the replacement for Anne Caldas, who resigned as the American National Standards Institute (ANSI) representative on the TGDC about two months ago. Mr. Karmol said that the letter from ANSI to the EAC/NIST appointing him as the replacement for Ms. Caldas was sent concurrently with Ms. Caldas resignation. I do recall seeing a copy of the resignation and replacement letters.

Needless to say Mr. Karmol was very upset that his paperwork was not processed in a timely manner so that he could participate in this very important meeting of the TGDC. He pressed me on the status of his paperwork and I could not give him an answer because I had no idea. It was an embarrassing incident. As the Federal Officer for the TGDC I should have been kept in the loop and should have had an adequate answer for Mr. Karmol.

Mr. Karmol's paperwork should have been processed in an expedited manner so that he could have participated in this meeting. The fact that it was not shows that there is a serious communications and process breakdown somewhere that must be fixed. I should have been kept better informed by staff on this important manner and will insist that they do so in the future.

Paul DeGregorio
Vice Chairman

Sent from my BlackBerry Wireless Handheld
Dear Julie and Gavin:

I started today downtown and retrieved the appointment and resignation documents. They were refaxed to Gavin at his request just a few moments ago. My records show that Juliet and I telephoned and e-mailed about this in March before her vacation, during which I agreed to get the resignation/appointment letters, and perform a "basic" ethics vetting. I faxed the letters on March 29, and the vetting was completed on April 5. I communicated successful passage of the vetting and Semerjian's assent to the appointment during phone conversations with Juliet, Carol and Gavin later that week, and early the week of April 11. I also spoke with Carol about the Turner-Bouie matter, and she related the EAC would not seek to replace her at this time.

On April 12, I spoke very briefly with with Caldas and Karmol, and informed them to contact Carol if there were any questions regarding when the EAC would act to issue an appointment letter. When EAC is ready to act, all it needs to do is issue the same appointment letter used during the original round of appointments. I don't have copies of those letters, but I recall they were very summary in nature.

Gavin mentioned wanting to see a resume on Karmol in his voice mail to me this morning. Consistent with our agreement that EAC recommends and reviews the organization-specific members and NIST recommends and reviews the at-large members, NIST neither requested nor reviewed any such documents on Karmol. The basic ethics vetting only picks up ethical difficulties from our database and personnel review.

Let me know if you have any questions. I am going back out to the hearing now, so call my cell if you have a priority question. Otherwise, I'll be in the office tomorrow.

Finest Regards,
Craig
Carol,  

Regarding the e-mail below.  

I have some questions regarding his recollection. I obviously can't speak to anything that occurred regarding this matter before last week, However, I do know that neither Julie nor myself were involved in a group call on the 11th.  

Such issues aside...  

I have only spoken to the man once (alone), on or about the 12-13th of April. Per my notes, I wanted four things from him. (1) a Resume or other info on qualifications, (2) Letter from ANSI, (3) Letter from Nist (which he noted may be in a casual form like an e-mail) and (4) an Example appointment letter (if he could find one).  

I have not received the above information as of yesterday.  

As for the information he faxed today, it contains only two NIST letters (1 resignation letter and 1 appointment letter). In my opinion it is missing the most important part, a letter from NIST approving the candidates. HAVA requires that the candidates be approved by both NIST and EAC. We cannot issue the candidate a final appointment letter unless we have documentation that he is NIST approved. Perhaps we may hold that the various conversations and the e-mails below constitute such confirmation. I leave that matter to you. Finally, I would note that if NIST will provide no background info on the applicant, how are we to send this matter to a tally vote (and how did they approve the person)? We would be asking the Commissioners to approve an individual for the board based solely on a three sentence ANSI representation letter.

I suppose that I will have to summarize the vetting process. Good thing I took notes.

Dear Juliet:

This is to reconfirm that Dr. Semerjian has agreed to the appointment of Mr. Karmol to represent ANSI on the TGDC. The Department of Commerce previously determined that there are no pending or significant matters between the Department and Mr. Karmol, and ethics personnel have determined that there is no reason why Mr. Karmol should not be considered for the position.

Sincerely,
Craig Burkhard
Chief Counsel for Technology
U.S. Department of Commerce
Dear Mr. Gilmour:

Attached is my bio. Beyond what is listed in the bio, I have been a candidate for public office in five elections, three of which I won. I was an elected member of the Ohio General Assembly for two terms, and was a candidate in Virginia for Commonwealths Attorney for Fairfax County in 1995.

As this request for my appointment was submitted almost a month ago, it is indeed unfortunate that this request for my resume was not made to me at that time. I was told by Mr. Burkhart at NIST that no NIST approval was required, so it may be a good idea for you to speak to him, to determine what the requirements are. I recognize the position is relatively new, but I would appreciate this request being expedited at this time.

As I do not seem to have Mr. Burkhart's e-mail, I am copying Mr. Eustis, who I trust will share this note with Craig.

If there is anything else that is needed, please let me know, with a copy to my assistant, Diane Zielinski, who is copied on this e-mail.

Dear Mr. Karmol:

On behalf of my colleagues on the U.S. Election Assistance Commission (EAC), I would like to welcome you as a member of the Technical Guidelines Development Committee (TGDC), representing the American National Standards Institute. Your participation in this Committee has been approved by both the Director of the National Institute of Standards and the EAC.

The EAC looks forward to working with you as we labor to meet the requirements of the Help America Vote Act of 2002 (HAVA). As you know, HAVA tasks the TGDC with the job of assisting the Commission in the development of voluntary voting system guidelines. This is an important effort and we welcome your participation in the process.

I have enclosed a copy of the TGDC’s membership list for your perusal. Please refer to our website (www.eac.gov) for additional information. If you have any questions concerning your appointment, please feel free to contact me or Vice Chair Paul DeGregorio, EAC’s Designated Federal Officer to the TGDC, at (202)566-3100.

April 26, 2005

MEMORANDUM

TO: EAC Commissioners

FROM: Paul DeGregorio, Vice Chairman
U.S. Election Assistance Commission

SUBJECT: Appointment of David Karmol to the Technical Guidelines Development Committee (TGDC), representing ANSI

As you may know, on March 29, 2005 Ms. Anne Caldas, American National Standards Institute (ANSI), resigned as a member of the TGDC. (Attach. 1). That same day, ANSI proposed a replacement representative, Mr. David Karmol. (Attach. 2). The purpose of this memorandum is to provide information to the Commissioners about Mr. Karmol, such that he may be approved as a member of the TGDC.

The Help America Vote Act of 2002 (HAVA) provides for both the composition of the TGDC and the Committee's appointment process. Specifically, HAVA Section 221(c) (42 USC §15361(c)) specifies that the Committee will have in its membership one representative from ANSI. Further, HAVA states that all members of the Board are to be appointed jointly by NIST and the EAC. (See HAVA Section 221(c)(1)).

Recently, the EAC received notice that NIST (Dr. Hratch Semerjian) has agreed to the appointment of Mr. Karmol (Attach. 3). As such, upon the Commission's approval, Mr Karmol may become a member of the Standards Board. To this end, I have enclosed Mr. Karmol's biography for your review. (Attach. 4). Finally, I have also attached a proposed appointment letter for the Chair's signature. (Attach. 5).
RECOMMENDATION:

Review each of the attachments and approve Mr. Karmol as ANSI's representative to the TGDC per HAVA Section 221(c).

Attachments:
1. ANSI Resignation Letter.
2. ANSI Replacement Letter.
3. E-mail noting NIST's Approval.
4. Mr. Karmol's Bio.
5. Proposed Appointment Letter.
MEMORANDUM

TO: EAC Commissioners
FROM: Paul DeGregorio, Vice Chairman
      U.S. Election Assistance Commission
DATE: April 27, 2005
SUBJECT: Appointment of David Karmol to the Technical Guidelines Development Committee (TGDC), representing ANSI

As you may know, on March 29, 2005 Ms. Anne Caldas, American National Standards Institute (ANSI), resigned as a member of the TGDC. (Attach. 1). That same day, ANSI proposed a replacement representative, Mr. David Karmol. (Attach. 2). The purpose of this memorandum is to provide information to the Commissioners about Mr. Karmol, such that he may be approved as a member of the TGDC.

The Help America Vote Act of 2002 (HAVA) provides for both the composition of the TGDC and the Committee's appointment process. Specifically, HAVA Section 221(c) (42 USC §15361(c)) specifies that the Committee will have in its membership one representative from ANSI. Further, HAVA states that all members of the Board are to be appointed jointly by NIST and the EAC. (See HAVA Section 221(c)(1)).

Recently, the EAC received notice that NIST has agreed to the appointment of Mr. Karmol (Attach. 3). As such, upon the Commission's approval, Mr. Karmol will become a member of the Technical Guidelines Development Committee. To this end, I have enclosed Mr. Karmol's biography for your review. (Attach. 4)

Upon approval of this recommendation, a letter of appointment signed jointly by the Director of NIST and the Chair of EAC will be sent to Mr. Karmol to formalize and finalize his appointment.

RECOMMENDATION:
Approve Mr. Karmol as ANSI's representative to the TGDC per HAVA Section 221(c).
March 29, 2005

Dr. Hratch Semerjian  
TGDC Chair  
Acting Director

Re: ANSI Representation on the Technical Guidelines Development Committee

Dear Dr. Semerjian:

I am requesting that ANSI’s current representative on the TGDC, Anne Caldas, be replaced by David Karmol, ANSI’s Vice President of Public Policy and Government Affairs. David’s contact information follows:

David L. Karmol
Vice President, Public Policy and Government Affairs
1819 L Street, NW, 6th Floor
Washington, DC 20036
E-mail: dkarmol@ansi.org
Phone: 202-331-3610

If further information is required, please advise.

Thank you for your continuing leadership with respect to this important initiative.

Sincerely,

Mark W. Hurwitz, CAE
Dear Juliet:

This is to reconfirm that Dr. Semerjian has agreed to the appointment of Mr. Karmol to represent ANSI on the TGDC. The Department of Commerce previously determined that there are no pending or significant matters between the Department and Mr. Karmol, and ethics personnel have determined that there is no reason why Mr. Karmol should not be considered for the position.

Sincerely,
Craig Burkhardt
Chief Counsel for Technology
U.S. Department of Commerce
David Karmol
Vice President, Public Policy and Government Affairs
American National Standards Institute (ANSI)

David Karmol currently serves as Vice President for Public Policy and Government Affairs at the American National Standards Institute (ANSI). In this position he is responsible for advocacy and outreach programs designed to better educate federal, state and local government officials on the value of the voluntary consensus standardization system and its importance to advancing the competitiveness of U.S. businesses and enhancing the health and safety of the world's citizens.

Karmol joined ANSI in July 2001 with a thorough knowledge of the issues important to the standards and conformity assessment community and a track record of success working on policies, strategies and programs in close liaison with federal, state and local governments. Prior to joining ANSI, he spent ten years as general counsel and director of public affairs at the National Spa and Pool Institute (NSPI), an ANSI member and accredited standards developer. Karmol also served as press secretary and special assistant to the director of the United States Mint; general counsel for the Can Manufacturers Institute; associate counsel to the U.S. House of Representatives Judiciary Committee; member of the Ohio House of Representatives, and assistant prosecuting attorney in Franklin County, Ohio.

Mr. Karmol received his B.A. from Miami University of Ohio, and his J.D. from the Ohio State University College of Law and is admitted to practice law in Virginia, the District of Columbia and Ohio.

ANSI's mission is to enhance U.S. global competitiveness and the American quality of life by promoting, facilitating, and safeguarding the integrity of the voluntary standardization system. ANSI is the official U.S. representative to the International Accreditation Forum (IAF), the International Organization for Standardization (ISO) and, via the U.S. National Committee, the International Electrotechnical Commission (IEC). ANSI currently has offices in New York City and Washington, DC.
May 4, 2005

Mr. David L. Karmol
American National Standards Institute
Vice President, Public Policy and Government Affairs
1819 L Street, NW, 6th Floor
Washington, DC 20036

Dear Mr. Karmol:

On behalf of the U.S. Election Assistance Commission (EAC) and the National Institute for Standards and Technology (NIST), we would like to welcome you as a member of the Technical Guidelines Development Committee (TGDC), representing the American National Standards Institute. Your appointment is effective May 3, 2005.

The EAC looks forward to working with you as we labor to meet the requirements of the Help America Vote Act of 2002 (HAVA). As you know, HAVA tasks the TGDC with the job of assisting the Commission in the development of voluntary voting system guidelines. This is an important effort and we welcome your participation in the process.

I have enclosed a copy of the TGDC’s membership list and charter for your perusal. Please refer to our website (www.eac.gov) for additional information. If you have any questions concerning your appointment, please feel free to contact Gracia Hillman, Chair, or Vice Chairman Paul DeGregorio, EAC’s Designated Federal Officer to the TGDC, at (202)566-3100.

Sincerely,

Gracia M. Hillman
Chair
U.S. Election Assistance Commission

Enclosures
FOIA File
Ms. Wendy R. Weiser  
Deputy Director, Democracy Program  
Brennan Center for Justice  
161 Avenue of the Americas, 12th Floor  
New York, NY 10013

December 12, 2006

Dear Ms. Weiser:

This letter is in response to your Freedom of Information Act (FOIA) request received by the U.S. Election Assistance Commission (EAC) on November 13, 2006. The request sought certain agency records concerning two agency draft reports, The Voter Fraud and Intimidation Report and The Voter Identification Report. Specifically, the request sought: (1) “the report on voter identification prepared by the Eagleton Institute of Politics and the Moritz College of Law,” (2) “the report on voter fraud and voter intimidation prepared by Tova Wang and Job Serebrov,” (3) The voter identification and voting fraud report requests for proposals and contracts, and (4) communications relating to the above reports between the EAC and Eagleton Institute of Politics, the Moritz College of Law, Ms. Tova Wang, Mr. Job Serebrov, or other third parties.

This letter is a partial response to your request and deals only with your request for documents consistent with items (1) – (3), above. With regard to item (4), we continue to search our files, e-mails and computers for all relevant communications. We expect to have all relevant, releasable documents collected, reviewed and sent to you within five working days. If you have any questions regarding this process, please contact the undersigned.

With regard to items (1) – (3) above, please find copies of all responsive contracts and request for proposals enclosed. Upon review of the records, you will find a few places where small portions of information have been redacted (in black). As required by FOIA exemption 6, the EAC has redacted certain pieces of personal information, including home addresses, telephone numbers, and personal e-mail addresses. The EAC has also redacted confidential commercial information as mandated by FOIA exemption 4. Specifically, the EAC has redacted information that can be used to calculate unit costs regarding a contractor’s labor rates. With regard to your requests for “the report on voter identification prepared by the Eagleton Institute of Politics and the Moritz College of Law,” and “the report on voter fraud and voter intimidation prepared by Tova Wang and Job Serebrov,” these draft documents are predecisional drafts protected by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §522(b)(5).

As you may know, the Deliberative Process Privilege protects intra-agency documents that are (1) predecisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter or governmental decision before that matter is finally decided. It is a well settled matter of law that the work of contract employees and...
contractors ("consultants") constitute intra-agency documents.\(^1\) This is true even where the consultants are deemed to be independent contractors and are not subject to the degree of control that agency employment entails.\(^2\) The courts have made this determination after recognizing that agencies have a special need for the opinions and recommendations of temporary consultants.\(^3\) Ultimately, deliberative documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors, (2) to protect against premature disclosure of proposed policies and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.\(^4\)

In both cases, the reports you have requested are drafts, representing one phase of the deliberative process—before the document was vetted by staff, approved by the executive director and reviewed and approved by the Commissioners (the relevant policy makers). Ultimately, the draft documents were created by experts to aid the EAC's Commissioners in their decisions. The consultants had no personal interest in their submissions and had no agency decision-making authority. Each was tasked with simply providing pre-decisional research and information to the EAC. Their efforts were limited to creating truthful and comprehensive draft reports. Finally, both reports when finalized would constitute an EAC decision or a policy determination.

These conclusions are born out in the facts surrounding the projects at issue, including the attached contract documents. First, the voter fraud and intimidation study you have requested is a draft of a final document that has already been released after being vetted by staff and approved by the EAC Commissioners. It is available in its final form on EAC's website (www.eac.gov). The draft document at issue was created by two contract employees hired pursuant to 5 U.S.C. §3109 (see 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees were supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. As stated by their contract, these consultants were hired so that the EAC could "...obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation."\(^5\) Moreover, the contracts clearly forbid the consultants from releasing the draft they created consistent with the privilege the EAC is asserting. The contract states:

All research, information, documents, and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.\(^6\)

3. Hoover, 611 F.2d at 1138.
5. See the consultant contracts for Job Serebrov and Tova Wang, enclosed.
6. See Id.
Finally, the purpose or subject of the draft report at issue was to make an EAC determination on how voter fraud should be studied by the agency. This was to be done by (1) accessing the nature and quality of the information that presently exists on the subject matter, (2) defining the terms and scope of EAC study as proposed by HAVA, (3) determining what is to be studied and (4) determining how it is to be studied. EAC's interpretation of HAVA and its determination of what it will study and how it will use its resources to study it are matters of agency policy and decision.

With regard to the Voter Identification draft, it was created by Rutgers University in conjunction with the Moritz College of Law (Ohio State University) to "...provide research assistance to the EAC for the development of voluntary guidance on provisional voting and voting identification procedures." The stated objective of the contract was to:

...obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics... The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

As with the voter fraud and intimidation study mentioned above, the contractors were provided guidance, information, and were directed by EAC personnel. The final product they delivered (draft report sought) was identified as "a guidance document for EAC adoption." Clearly, as noted by the contract, the issuance of Federal guidance to states is a matter of government policy and limited to official EAC action.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you will have an opportunity to appeal it to the Election Assistance Commission. However, as this letter is only partially responsive to your request, please hold any appeal until your request has been fully addressed. At that time, your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of EAC's final response letter. Please include your reasons for reconsideration and attach a copy of this and subsequent EAC responses.

Sincerely,

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

TOTAL COST OF CONTRACT: $560,002.00
552.210-79 PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate:

1. Name and address of consignor;
2. Name and address of consignee;
3. Government bill of lading number (if any);
4. Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list shall include:

1. Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the dollars stipulated in this contract for supplies delivered and accepted or services rendered and accepted, less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries accepted by the Government.

(a) The amount due on the delivery is at least $1,000 or 60 percent of the total contract price.

(b) The Contractor requests it and the amount due on the deliveries is at least $1,000 or 60 percent of the total contract price.

52.232-2 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount period, if the offeror is awarded contracts may include any payment discount offered at the time of individual invoices.

52.232-8 PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

52.232-9 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of the discount earned.

52.232-20 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)

The GSA Form 2166, Service Contract Act of 1965 and Statement of Equivalent Rates for Federal hires is attached hereto and made a part thereof.

$560,002.00

**GENERAL SERVICES ADMINISTRATION**
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

52.232-109 PACKING LIST (DEC 1981)
(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignor; (2) Name and address of consignee; (3) Government order or regulation number; (4) Government bill of lading number (if any); and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)
The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered or services rendered, rendered and accepted, less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on the dates following the dates of shipment accepted by the Government; (a) The amount due on the delivery warrants it; or (b) The Contractor requests it and the amount due on the deliveries is at least $1,000 or 50 percent of the total contract price.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)
(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will form a part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount date, the invoice must be considered as if it follows the date on which an electronic funds transfer was made.

PROMPT PAYMENT
Prompt payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due date, invoice requirements, constructive acceptance and interest penalties. Certain portions of this clause are modified, and discount requirements, and constructive acceptance have been extracted for your convenience. All days referred to in the extracts below are calendar days.

(a)(2) The due date for making invoice payments by the designated payment office shall be the later of the following two events:
(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.
(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor.

(a)(4) An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include the items listed in... (ii) through... (viii) If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 30 days of the invoice at the designated billing office. Unim timely notification will be taken into account in the computation of any interest penalty owed the Contractor.

(i) Name and address of the Contractor.

(ii) Invoice date.

(iii) Contract number or other authorization for supplies delivered or services performed including order number and contract line item number.

(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount terms), Bill of lading number and weight of shipment will be honored on Government bills of lading.

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the contract or in a proper notice of assignment).

(vii) Name (where practicable), title, phone number, and mailing address of person to be notified in event of a defective invoice.
May 24, 2005

Mr. Keith Osterhage, Director
Office of Research and Sponsored Programs
Rutgers, The State University of New Jersey
3 Rutgers Plaza
New Brunswick, New Jersey 08901

Dear Mr. Osterhage:

Enclosed is a signed contract in the amount of $560,002.00 for the provision of research assistance to the U.S. Election Assistance Commission (EAC) for the development of voluntary guidance on provisional voting and voter identification procedures. The EAC has accepted the basic proposal submitted by the Eagleton Institute of Politics and has also elected to include the optional survey of local election officials. This proposal was evaluated as providing the best value to the government through a competitive source selection process. The proposal is incorporated by reference into the contract.

The U.S. Election Assistance Commission (EAC) was created by the Help America Vote Act of 2002 (HAVA) and is charged with assisting the States in meeting the election reform requirements mandated by this legislation. One of the EAC’s principal tasks is to provide guidance to the States on the interpretation of HAVA and its requirements. The provisional voting and voter identification effort that will be supported by this contract is a major element of EAC’s Fiscal Year 2005 research agenda. The objective of this work is to develop guidance on these topics that States can utilize in the 2006 election cycle.

To acknowledge your receipt and acceptance of this contract, please countersign and date below and return one copy of this letter to the attention of Carol A. Paquette, Interim Executive Director.

We look forward to working with Rutgers University and the Eagleton Institute on this very important research effort.

Sincerely,

Gracia Hillman, Chair

Keith Osterhage
Rutgers, The State University of New Jersey
May 24, 2005

CONTRACT TO PROVIDE RESEARCH ASSISTANCE TO THE EAC FOR THE DEVELOPMENT OF VOLUNTARY GUIDANCE ON PROVISIONAL VOTING AND VOTER IDENTIFICATION PROCEDURES

0.0 Background: Sec. 302(a) of HAVA requires that all States allow the casting of provisional ballots in instances where a voter declares their eligibility to vote but their name does not appear on the official list of eligible voters, or an election official asserts that a voter is not eligible to vote. This section describes several requirements for implementation of provisional voting, but the States have considerable latitude in specifying how to carry out these requirements. The EAC seeks to examine how provisional voting was implemented in the 2004 general election and to prepare guidance for the States on this topic for the 2006 Federal elections.

HAVA Sec. 303(b) mandates that first time voters who register by mail are required to show proof of identity before being allowed to cast a ballot. The law prescribes certain requirements concerning this section, but also leaves considerable discretion to the States for its implementation. The EAC seeks to examine how these voter identification requirements were implemented in the 2004 elections and to prepare guidance on this topic for the 2006 elections.

One of the remedies for a voter not having an acceptable proof of identity is to allow the voter to cast a provisional ballot, either at the polling place or by mail. This linkage between these two HAVA sections provides a rationale for conducting research on these topics in parallel. However, it is anticipated that two separate guidance documents will result.

1.0 Objective: The objective of this contract is for EAC to obtain assistance with the collection, analysis and interpretation of information regarding HAVA provisional voting and voter identification requirements for the purpose of drafting guidance on these topics in time for implementation for the 2006 Federal elections. The anticipated outcome of this activity is the generation of concrete policy recommendations to be issued as voluntary guidance for States.

2.0 Scope: In general the Contractor shall be responsible for all research and analysis activities, including the conduct of public hearings for fact finding and public comment purposes. However, in light of the need to get started on this work, the EAC conducted a public hearing on provisional voting on February 23, 2005.

An initial framework for provisional voting policy has been set by the court decisions rendered on the election procedures utilized in the 2004 election. The 6th Circuit decision, in particular, has drawn some boundaries which must be given
due regard in the course of considering future policy alternatives for provisional voting.

Notice of public meetings and hearings is required to be published in the Federal Register. The Contractor shall be responsible for preparing the notice documents, and the EAC will submit the notices and cover the cost of publication. In addition, draft guidance documents must be published in the Federal Register to obtain public comment prior to their adoption. Again, the Contractor will work with the EAC to prepare the draft documents for publication, which the EAC will submit and pay for the cost of publication. Comments received will be provided to the Contractor for analysis and incorporation into the final guidance documents, as appropriate.

3.0 Specific Tasks

For ease of reference, following task 3.3 the remaining tasks are listed separately under the headings of Provisional Voting and Voter Identification Requirements. It is anticipated that the work on these two topics will be conducted essentially concurrently.

3.1 Update the project work plan, as required. The Contractor shall update and deliver the Project Plan not later than 10 days after contract award. This plan shall describe how the Contractor will accomplish each of the project tasks, including a timeline indicating major milestones. A single document will be prepared to include both provisional voting and voter identification tasks. The updated Project Plan shall be formally briefed to the EAC Project Manager and lead Commissioner.

3.2 Submit monthly progress reports. The Contractor shall submit a monthly progress report within 2 weeks of the end of each month. This report shall provide a brief summary of activities performed and indicate progress against the timeline provided in the Project Plan. Any issues that could adversely affect schedule should be identified for resolution. Budget status shall also be provided.

3.3 Conduct periodic briefings for the EAC. The Contractor shall periodically meet with the EAC Project Manager and the lead Commissioner for this work to discuss research findings and progress. The Project Plan should make allowance for this activity. The number and frequency of briefings will be determined by the Contractor Project Manager and the EAC Project Manager as the work progresses. The Contractor may also be required to periodically brief the full Commission on their work.
Provisional Voting

3.4 Collect and analyze State legislation, administrative procedures, and court cases. An understanding of the disparities and similarities of how provisional voting was implemented around the country will provide a baseline for the consideration of future approaches. Seventeen States never had provisional voting before HAVA was enacted, while many other States did. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

Topics of particular interest include the following:
- How did States prepare for the onset of the HAVA provisional ballot requirement?
- How did this vary between States that had previously had some form of provisional ballots and those that did not?
- How did litigation affect the implementation?
- How effective was provisional voting in enfranchising qualified voters?
- Did State and local processes provide for consistent counting of provisional ballots?
- Did local election officials have a clear understanding of how to implement provisional voting?

3.5 Recommend alternative approaches for future implementation of provisional voting. The Contractor shall conduct a literature review to identify other research results and data available on this topic. The EAC Election Day Survey, for example, contained several questions on provisional voting. The EAC will make these survey data available to the Contractor. Based on their analysis of available research and the results of Task 4.5, the Contractor shall diagnose the problems and challenges of provisional voting implementation and hypothesize alternative approaches.

The Contractor shall assess the efficacy of these alternatives in relation to the following inter-related policy objectives: (1) enabling the maximum number of eligible voters to cast ballots that will be counted; (2) providing procedural simplicity for voters, poll workers, and election officials; (3) minimizing opportunity for voter fraud; and (4) maintaining a reasonable workload for election officials and poll workers. Additional policy considerations may be identified in the course of this research effort. The Contractor shall document and brief these alternatives to the Commission.

3.6 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors and Standards Board. EAC will convene a meeting or teleconference of the Boards for the discussion of this document. The Contractor shall provide the document in advance and participate in the meeting to answer questions and
3.7 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC, the Board of Advisors and the Standards Board and prepare the draft guidance for publication in the Federal Register by the EAC.

3.8 Arrange one public hearing for receiving public comment on draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. EAC will handle publicity for the meeting.

3.9 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.

Voter Identification Requirements

3.10 Collect and analyze State legislation, administrative procedures, and court cases. It is assumed that the collection of information for analysis of voter identification requirements will be performed concurrently with the research for Task 4.5. An understanding of the disparities and similarities of how voter identification requirements were implemented around the country will provide a baseline for the consideration of future approaches. A State-by-State compendium of the legislation, procedures, and litigation reviewed shall be delivered along with the analysis results.

3.11 Convene a half day public hearing on the topic of voter identification requirements. This hearing should occur early in the research process as an informational hearing where all points of view on this topic can be aired. The Contractor shall be responsible for all aspects of planning and conducting this hearing in consultation with the EAC. The Contractor shall identify three panels of three to four speakers each. The Contractor shall arrange for speaker attendance to include travel and per diem expenses. The EAC will provide publicity for the hearing. The Contractor shall prepare a document summarizing the proceedings and containing all testimony provided.

3.12 Recommend alternative approaches for future implementation of HAVA voter identification requirements. The Contractor shall conduct a literature review to identify other research results and data available on this topic. Based on their analysis of available research and the results of Task 4.11, the Contractor shall diagnose the problems and challenges of voter identification and hypothesize alternative approaches. The Contractor shall
coordinate with the EAC to identify appropriate policy objectives by which to assess these alternatives. The Contractor shall document and brief these alternatives to the Commission.

3.13 Prepare preliminary draft guidance document. Based on the feedback received from the Commission, the Contractor shall prepare a draft guidance document for review and comment by the EAC Board of Advisors and Standards Board. EAC will convene a meeting or teleconference of the Boards for the discussion of this document. The Contractor shall provide the document in advance and participate in the Board meeting to answer questions and record comments.

3.14 Revise draft guidance for publication in the Federal Register. The Contractor shall revise the guidance document as appropriate to reflect the comments of the EAC, the Board of Advisors and the Standards Board and prepare the draft guidance for publication in the Federal Register by the EAC.

3.15 Arrange a second public hearing for receiving public comment on the draft guidance. This hearing should be scheduled 30 days after the initial publication date. The Contractor shall select the location in consultation with the EAC. EAC will handle publicity for the hearing.

3.16 Prepare final guidance document for EAC adoption. Review all comments received in response to Federal Register publication and at public hearing and revise guidance document as appropriate. Provide final version to EAC for adoption.

4.0 **Contract Type.** The contract type will be Time and Materials in the amount of $560,002.00.

5.0 **Place of performance.** The principal place of performance will be the Contractor’s place of business. Meetings and occasional work efforts may be performed at the EAC offices. Some travel will be required.

6.0 **Period of Performance.** The period of performance is from date of award until December 30, 2005.

7.0 **Schedule of Deliverables:**

1. Updated project plan – 10 days after contract award
2. Progress reports – monthly
3. Briefings – as required
4. Analysis report on provisional voting, including compendium of legislation, procedures and litigation - TBD
5. Alternatives report on provisional voting – TBD
8.0 **Inspection and Acceptance Criteria.** Final inspection and acceptance of all work performed, reports, and other deliverables will be performed at the offices of the EAC. The Contracting Officer's Representative for this effort will be Karen Lynn-Dyson. She will review and approve all work on behalf of the Commission.

9.0 **Invoicing.** Invoices may be submitted monthly using Standard Form 1034, Public Voucher for Purchases and Services Other Than Personal. Invoices shall be mailed to the attention of Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington D.C. 20005.

10.0 **Accounting and Appropriation Data:** Funds in the amount of $560,002.00 are available for this task order.

11.0 **General Provisions:**

11.1 **Proposal Incorporated.** The Contractor's proposal is incorporated by reference into the statement of work.

11.2 **Inspection/Acceptance.** The Contractor shall only tender for acceptance those items that conform to the requirements of this contract. The EAC reserves the right to inspect and review any products or services that have been tendered for acceptance. The EAC may require correction or re-performance of nonconforming items at no increase in contract price. The EAC must exercise its post-acceptance rights within ten (10) days after the defect was discovered or should have been discovered.

11.3 **Contract Terms.** Should there be a conflict between the contract clauses included in this document and the "Purchase Order Terms and Conditions" on the back of GSA Form 300, which is used to record contract financial
data, the contract clauses in this document shall take precedence.

11.4 Changes. Changes in the terms and conditions of this Contract may be made only by written agreement signed by authorized representatives of both parties.

11.5 Disputes. This Contract is subject to the Contract Disputes Act of 1978, as amended (41 U.S.C. 601-613). The Contractor shall proceed diligently with performance of this Contract, pending final resolution of any dispute arising under the Contract.

11.6 Excusable Delays. The Contractor shall be liable for default unless nonperformance is caused by an occurrence beyond the reasonable control of the Contractor and without its fault or negligence such as, acts of God or the public enemy, acts of the Government in either its sovereign or contractual capacity, fires, floods, epidemics, quarantine restrictions, strikes, unusually severe weather, and delays of common carriers. The Contractor shall notify the EAC, in writing, as soon as possible after the beginning of an excusable delay. The Contractor shall explain the basis for the excusable delay, and correct the problem as soon as possible. The Contractor shall notify the EAC, in writing, at the end of the delay.

11.7 Other compliances. The Contractor shall comply with all applicable Federal, State and local laws, executive orders, rules and regulations applicable to its performance under this contract.

11.9 Limitation of Government Liability. The Contractor is not authorized to make expenditures or incur obligations exceeding the total amount allocated to the contract. The Contractor is required to notify the Contracting Officer’s Representative when 75% of funding has been obligated.

11.10 Termination for convenience. The EAC, by written notice, may terminate this contract without fault, in whole or in part, when it is in the best interest of the government. In the event of contract termination for convenience, the rights, duties, and obligations of the parties, including compensation to the Contractor, shall be in accordance with Part 49 of the Federal Acquisition Regulations in effect on the date of this contract.

GSA FORM 300 (REV. 2-93)
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

52.210-79 PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignor; (2) Government order or requisition number; (4) Government bill of lading number (if any); and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information as (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the amounts stipulated in this contract for less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries. No discount shall be allowed for prompt payment if the payment is made more than 15 days after the Government (a) the invoice due date; (b) the amount due on the invoices or vouchers; (c) the discount rate that will be applied; and (d) the date on which the electronic transfer occurred.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offer discount will form a part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to the payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(2) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of this section, days will be calculated as calendar days.

(c) The due date for making invoice payments by the designated billing office shall be the later of the following two events: (i) The 30th day after the designated billing office has received a proper invoice from the Contractor. (ii) The 30th day after Government acceptance of supplies delivered services performed by the Contractor.

NOTE: Invoices must include the ACT number (block 4) and shall be submitted on an original only, unless otherwise specified, to the billing office designated in block 5 to receive invoices. The "REM" to address must correspond with the remittance address in block 12.

(a)(i) For the sole purpose of computing an interest penalty that might be due the Contractor, Government acceptance shall be deemed to occur constructively on the 7th day unless otherwise specified in this contract. If the Contractor delivered the supplies or performed the services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality or contractor compliance with a contract provision...

52.222-40 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the prevailing rate of wages specified under Section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-208). Regulations and interpretations of the Service Contract Act of 1965 are contained in 29 CFR Part 4.

52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED (MAY 1989)

52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRE (MAY 1988)

(52.222-41 and 62.222-42 apply to service contracts when the amount exceeds $2,500).

The GSA Form 2166, Service Contract Act of 1965 and Statement of Equivalent Rates for Federal Hire is attached hereto and made a part hereto.

52.252-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for services or supplies:

52.203-1 Officials Not to Benefit (APR 84)

52.203-3 Gratuities (APR 84)

52.203-5 Covenants Against Contingent Fees (APR 84)

52.203-6 Restriction on Subcontractor Sales to the Government (JUL 88)

52.203-7 Anti-Kickback Procedures (JUL 88)

52.212-9 Variation in Quantity (APR 94)

52.222-3 Convict Labor (APR 84)

52.222-26 Equal Opportunity (APR 84) (Applies when amount exceeds $10,000)

52.222-35 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84) (Applies when amount exceeds $10,000)

52.222-36 Affirmative Action for Handicapped Workers (APR 84) (Applies when amount exceeds $2,500)

52.222-37 Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era (JAN 88) (Applies whenever clause 52.222-36 is included).

52.223-6 Drug Free Workplace (JUL 90) (Applies if contract is awarded to an individual)

52.223-1 Buy American Act - Supplies (JAN 89)

52.226-11 Restrictions on Certain Foreign Purchases (MAY 92)

52.226-26 Prompt Payment (SEP 92)

52.233-1 Disputes (DEC 91)

52.233-3 Protest After Award (AUG 89)

52.248-4 Contractor Inspection Requirements (APR 84)

52.248-6 Default (Fixed-Price Supply and Service) (APR 84)

Applicable to purchase orders for supplies:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88) (Applies when amount is between $2,500 and $10,000)

52.222-20 Walsh-Healey Public Contracts Act (APR 84) (Applies when amount exceeds $10,000)

52.243-1 Changes - Fixed Price (AUG 87)

52.248-1 Termination for Convenience of the Government (Fixed Price)(Short Form)(APR 84)

Applicable to purchase orders for services:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88) (Applies when amount is between $2,500 and $10,000)

52.243-1 Changes - Fixed Price (APR 84) - Alt. II

52.248-4 Termination for Convenience of the Government (Services)(Short Form)(APR 84)

0191E9

GSA FORM 300 BACK (REV. 2-93)
Under the authority of Public Law 107-252, dated October 29, 2002, establishing the U.S. Election Assistance Commission (EAC), Eagleton Institute of Politics proposal to provide research assistance to support development of guidelines on topics of provisional voting and voter identification procedures. See attached for description of this no-cost extension amendment.

RECEIVING OFFICE (Name, symbol and telephone no.)

1. Election Assistance Commission (202) 566-3100

MAIL INVOICE TO: (Include zip code) Rail Services Administration (FUND)

23. GROSS SHIP WT. TOTAL FROM 300-A(e) ▲ 560,002.00

GSA FORM 300 (REV. 2-93)
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

52.210-79 PACKING LIST (DEC 1989)
(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignee; (2) Name and address of consignor; (3) Government order or contract number; (4) Government bill of lading number, covering the shipment (if any); and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

52.232-1 PAYMENTS (APR 1984)
The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered and services performed, less any disbursements provided in this contract. Unless otherwise specified in this contract, payment shall be made on or before the 30th day after receipt of the invoice, unless this period is extended by agreement of the parties. The due date for making invoice payments by the designated billing office shall be the later of the following two events:

prompt Payment clause 62.232-25 is incorporated in this contract by reference. The clause contains information on payment due dates, invoices, and interest penalties. Certain portions of the clause regarding payment due dates, invoices, and interest penalties are contained in 29 CFR Part 4.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)
(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will form part of the award, and will be applied if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

ROMPT PAYMENT
Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due dates, invoices, and interest penalties. Certain portions of the clause regarding payment due dates, invoices, and interest penalties are contained in 29 CFR Part 4.

(ii) . . . The due date for making invoice payments by the designated billing office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.
(ii) The 30th day after Government acceptance of supplies delivered and services performed by the Contractor . . .

4. . . An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include all items listed in (i) through (iv) below.

(a) If the invoice does not reflect a defect within 7 days after receipt of the invoice at the designated billing office . . . Unprompted notification will be taken into account in the computation of any interest penalty owed the Contractor . . .

(i) Name and address of the Contractor.
(ii) Invoice date.
(iii) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).
(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.
(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount terms), Bill of lading number, and the statement that supplies will be shipped on Government bills of lading.
(vi) Name and address of Contractor official to whom payment is sent (must be the same as in the contract or in a proper notice assignment).

*NOTE:* Invoices must include the ACT number (block 4) and shall be submitted on an original only, unless otherwise specified, to the billing office designated in block 24 to receive invoices. The "remit to" address must correspond to the remittance address in block 12.

(a)(6)(ii) For the sole purpose of computing an interest penalty that might be due the Contractor, Government acceptance shall be deemed to have occurred constructively on the 7th day (unless otherwise specified in block 20) after the Contractor delivered the supplies or performed the work, unless there is a disagreement over quantity, quality, or contractor compliance with a contract provision . . .

52.222-10 SERVICE CONTRACT ACT OF 1985, AS AMENDED - CONTRACTS OF $2,600 OR LESS (MAY 1989)
Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,600, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under Section 6a) (1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-206). Regulations and interpretations of the Service Contract Act of 1985 are contained in 29 CFR Part 4.

52.222-41 SERVICE CONTRACT ACT OF 1985, AS AMENDED (MAY 1989)
52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRE (MAY 1989)
52.222-41 and 52.222-42 apply to service contracts when the amount exceeds $2,600.

52.222-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)
This contract incorporates the following clauses by reference with the same scope and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES
Applicable to purchase orders for supplies or services:

52.203-1 Officials Not to Benefit (APR 84)
52.203-3 Gratuities (APR 84)
52.203-4 Right to Set Aside, Partially (APR 84)
52.203-6 Restriction on Subcontractor Sales to the Government (JUL 86)
52.207-17 Anti-Kickback Procedures (OCT 88)
52.212-9 Variation in Quantity (APR 84)

(In the preceding clause, the permissible variations are stated in the schedule.)
52.222-3 Convict Labor (APR 84)
52.222-28 Equal Opportunity (APR 84) (Applies when amount exceeds $10,000)
52.222-36 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84) (Applies when amount exceeds $10,000)
52.222-38 Affirmative Action for Handicapped Workers (APR 84) (Applies when amount exceeds $2,600)
52.222-37 Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era (MAY 88) (Applies whenever clause 52.222-36 is included)

52.222-38 Drug-Free Workplace (JUL 90) (Applies if contract is awarded to an individual)
52.222-3 Buy American Act Supplies (JAN 89)
52.222-11 Restrictions on Certain Foreign Purchases (MAY 92)
52.222-26 Prompt Payment (SEP 92)
52.223-1 Disputes (DEC 91)
52.223-3 Procurement (AUG 89)
52.224-1 Contractor Inspection Requirements (APR 84)
52.249-8 Default (Fixed-Price Supply and Service) (APR 84)

Applicable to purchase orders for supplies:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88) (Applies when amount is between $2,600 and $10,000)
52.222-20 Walsh-Healey Public Contracts Act (APR 84) (Applies when amount exceeds $10,000)
52.243-1 Changes - Fixed Price (AUG 87)
52.249-1 Termination for Convenience of the Government (Fixed Price) (Short Form) (APR 84)

Applicable to purchase orders for services:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAY 89) (Applies when amount exceeds $2,600)
52.243-1 Changes - Fixed Price (APR 84) - Alt. II
52.249-1 Termination for Convenience of the Government (Services) (Short Form) (APR 84)

019171

GSA FORM 300 BACK (REV. 2-93)
MEMORANDUM FOR THE RECORD

Background

On May 24, 2005 the U.S. Election Assistance Commission awarded an eight month contract (December 30, 2005) in the amount of $560,002.00 to the Eagleton Institute of Politics (Rutgers, The State University of New Jersey) to provide research assistance to support development of guidelines on the topics of provisional voting and voter identification procedures.

Contractor’s Request for a No-Cost Extension

On November 15, 2005, John Weingart, Associate Director of the Eagleton Institute of Politics, requested via e-mail, a no-cost extension on this contract (E4014127). Mr. Weingart had requested an extension to complete the work of this contract to February 28, 2006.

In response to EAC’s requests for additional information related to the no-cost extension, in a January 13, 2006 e-mail, Mr. Weingart revised the request for the extension to March 31, 2006. Mr. Weingart did note that he would still like to conclude the project’s work by the end of February.

In various correspondences, Mr. Weingart notes the following reasons for the request:

"The original work schedule called for EAC to publish in mid-October, voluntary guidance and/or recommended best practices for provisional voting, based on Eagleton’s research. In making that time estimate, we did not provide sufficient time for the EAC to review and consider the draft reports that would form the basis for that publication... The additional time required to complete the work on provisional voting has delayed the completion of our analysis of Voter Identification issues. The draft report of that topic will be submitted to the EAC in mid-January”.

"Our request for a no-cost, reallocation of resources is based on (a) the fact that our personnel costs have already been higher than we anticipated and (b) the reality that keeping the project operating for at least nine months, instead of the seven as planned,
will require the participants to devote more time than anticipated. While we are not producing more product than originally promised, the time involved in our work continues to increase... We anticipate this research monitoring and revising to continue for the months added to the project, necessitating significantly more hours by all members of the project team than anticipated”.

The contractor anticipates reallocating funds primarily from the public hearings line item ($81,120) and spending approximately $33,750 more than originally budgeted on personnel, $23,171 more on the subcontract with Ohio State and $20,250 more on consultants. The EAC elected to not hold public hearings on the topics of provisional voting and voter identification.

**Specifıcs of the Extension**

The contractor has provided the following breakdown and explanation of the personnel and consultant costs, associated with this extension.

1. *Eagleton Institute of Politics personnel*:
   - Original budgeted project personnel costs-$110,695 (May-December)
   - Revised project personnel costs- $144,444 (May-February)

2. *Consultant Services*:
   - Original budgeted costs: $79,500 (May-December)
   - Revised costs -$99,750 (May-February)

3. *Moritz School of Law personnel and overhead*:
   - Original budgeted costs: $84,744 (May-December)
   - Revised costs- $107,915 (May-February)

**Total project budget:**

- Original budgeted costs: $560,002 (May- December)
- Revised project cost: $549,831 (May-February)

**EAC Staff Recommendation**

Karen Lynn-Dyson, the EAC’s Contracting Officer Representative assigned to this contract has reviewed this request, the rationale and authority for it (FAR 43.103(a)(3)) and finds it to be appropriate. To date the Eagleton Institute has consistently met its deadlines for major project deliverables and stayed within the project’s overall budget.
Based upon the work products provided to the EAC, thus far, the additional personnel expenses which the contractor has incurred appear to be reasonable. To grant the Eagleton Institute a three-month extension on this contract in order to obtain the necessary feedback on major documents it has produced will be within the best interests of the Election Assistance Commission, and therefore, the federal government.

EAC's Contracting Officer Representative finds that to grant the Eagleton Institute a no-cost extension for the modification of its contract with the EAC is within the scope of the original agreement and is recommending that this modification to the contract be made.

Signed

Karen Lynn-Dyson

<td>Pursuant to the terms of the above-referenced contract, the contractor was to present the EAC with draft reports that would form the basis for recommended best practices for provisional voting. The documents were to be published in mid-October after EAC review. The contractor did not receive EAC comments on the draft documents until October, 2008. As a result, additional time is required to complete the work on provisional voting and analysis of Voter identification issues. The extension will entail additional personnel time, but no additional funds to complete the work. The contractor anticipates that it will be able to complete its work during the week of March 31, 2008.</td>

Instructions for items other than those that are self-explanatory, are as follows:

(a) Item 1 (Contract ID Code). Insert the contract type identification code that appears in the title block of the contract being modified.

(b) Item 3 (Effective date).

(1) For a solicitation amendment, change order, or administrative change, the effective date shall be the issue date of the amendment, change order, or administrative change.

(2) For a supplemental agreement, the effective date shall be the date agreed to by the contracting parties.

(3) For a modification issued as an initial or confirming notice of termination for the convenience of the Government, the effective date and the modification number of the confirming notice shall be the same as the effective date and modification number of the initial notice.

(4) For a modification converting a termination for default to a termination for the convenience of the Government, the effective date shall be the same as the effective date of the termination for default.

(5) For a modification confirming the contracting officer’s determination of the amount due in settlement of a contract termination, the effective date shall be the same as the effective date of the initial decision.

(c) Item 6 (Issued By). Insert the name and address of the issuing office. If applicable, insert the appropriate issuing office code in the code block.

(d) Item 8 (Name and Address of Contractor). For modifications to a contract or order, enter the contractor’s name, address, and code as shown in the original contract or order, unless changed by this or a previous modification.

(e) Item 9, (Amendment of Solicitation No. - Dated), and 10, (Modification of Contract Order No. - Dated). Check the appropriate box and in the corresponding blanks insert the number and date of the original solicitation, contract, or order.

Item 12 (Accounting and Appropriation Data). When appropriate, indicate the impact of the modification on each affected accounting classification by inserting one of the following entries.

(1) Accounting classification
   Net increase
   $ 019176

   NOTE: If there are changes to multiple accounting classifications that cannot be placed in block 12, insert an asterisk and the words "See continuation sheet".

(g) Item 13. Check the appropriate box to indicate the type of modification. Insert in the corresponding blank the authority under which the modification is issued. Check whether or not contractor must sign this document. (See FAR 43.103.)

(h) Item 14 (Description of Amendment/Modification).

(1) Organize amendments or modifications under the appropriate Uniform Contract Format (UCF) section headings from the applicable solicitation or contract. The UCF table of contents, however, shall not be set forth in this document.

(2) Indicate the impact of the modification on the overall total contract price by inserting one of the following entries:

   (i) Total contract price increased by $——
   (ii) Total contract price decreased by $——
   (iii) Total contract price unchanged.

(3) State reason for modification.

(4) When removing, reinstating, or adding funds, identify the contract items and accounting classifications.

(5) When the SF 30 is used to reflect a determination by the contracting officer of the amount due in settlement of a contract terminated for the convenience of the Government, the entry in Item 14 of the modification may be limited to——

   (i) A reference to the letter determination; and
   (ii) A statement of the net amount determined to be due in settlement of the contract.

(6) Include subject matter or short title of solicitation/contract where feasible.

(i) Item 16B. The contracting officer’s signature is not required on solicitation amendments. The contracting officer’s signature is normally affixed last on supplemental agreements.

PURCHASE ORDER TERMS AND CONDITIONS

552.229-70 FEDERAL, STATE, AND LOCAL TAXES (APR 1984)

The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

552.210-79 PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignor; (2) Name and address of consignee; (3) Government order or regulation number or other identifying number covering the shipment (if any); and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term “Credit Card”.

32.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered and accepted or services rendered and accepted, less any deductions provided for in the contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries by the Government if: (a) The amount due on the deliveries warrants it; or (b) The amount due on the deliveries is at least $1,000 or 50 percent of the total contract price.

32.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the valuation of offers. However, any offered discount will form part of the offer. The due date for making invoice payments by the designated payment office shall be the later of the following two events:

(1) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(2) The 15th day after Government acceptance of the supplies delivered or services performed.

(b) When the amount exceeds $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under Section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-206). Regulations and interpretations of the Service Contract Act of 1958 are contained in 29 CFR Part 4.

52.222-41 SERVICE CONTRACT ACT OF 1958, AS AMENDED (MAY 1988)

(c) Except to the extent that an exception, variation, or tolerance shall apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under Section 6(a)(1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-206). Regulations and interpretations of the Service Contract Act of 1958 are contained in 29 CFR Part 4.

52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1988)

52.222-41 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

The GSA Form 2166, Service Contract Act of 1958 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

52.282-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

52.203-1 Officials Not to Benefit (APR 84)

52.203-3 (Gratuities (APR 84)

52.203-6 Covenant Against Contingent Fees (APR 84)

52.203-7 Restriction on Subcontractor Sales to the Government (JUN 86)

52.212-9 Variation in Quantity (APR 84)

52.213-3 Contrivt Labor (APR 84)

52.222-3 Voluntary Opportunity (APR 84)(Applies when amount exceeds $10,000.)

52.222-36 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84)(Applies when amount exceeds $10,000.)

52.222-38 Affirmative Action for Handicapped Workers (APR 84)(Applies when amount exceeds $2,500)

52.222-37 Employment Reports on Special Disabled Veterans and Vietnam Veterans of the Vietnam Era (JAN 88)(Applies whenever the amount exceeds $2,500 is included)

52.223-6 Drug Free Workplace (JUL 90)(Applies if contract is awarded to an individual).

52.222-9 Buy American Act - Supplies (JAN 89)

52.226-11 Restrictions on Certain Foreign Purchases (MAY 92)

52.232-26 Prompt Payment (SEP 92)

52.232-33 Disputes (DEC 91)

52.233-3 Protest After Award (AUG 89)

52.254-1 Inspector Certification Requirements (APR 84)

52.254-9 Default (Fixed-Price Supply and Service)(APR 84)

Applicable to purchase orders for supplies:

52.243-1 Changes - Fixed Price (AUG 87)

52.249-1 Termination for Convenience of the Government (Fixed Price)(Short Form)(APR 84)

Applicable to purchase orders for services:

52.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 86)(Applies when amount exceeds $500)

52.249-1 Changes - Fixed Price (APR 84) - Alt. II

52.249-4 Termination for Convenience of the Government (Services)(Short Form)(APR 84)
To: File
From: Tamar Nedzar, Law Clerk
Date: April 21, 2006
Re: No-Cost Extension to contract number E4014127 with the Eagleton Institute of Politics at Rutgers University

Background:
Contract E4014127 with the Eagleton Institute of Politics at Rutgers University ("contractor") was originally scheduled to be concluded on March 31, 2006. The contract’s final products include a report on Voter Identification and a report on Provisional Voting. The contractor has vetted the reports with a Peer Review Group, pursuant to the terms of the contract.

Justification for No-Cost Extension:
The EAC wishes to supplement the contractor’s Peer Review of the reports by adding another review process with some of the EAC’s key stakeholders. The EAC proposes to assemble a panel of researchers during the week of May 8th to conduct the second review.

Following the second review, the contractor will revise its draft reports based on the comments it receives. The contractor will present its draft reports on Provisional Voting and Voter Identification to the EAC Advisory Board at its May 25th meeting in Washington, DC. The contractor will revise both draft reports, taking into account the EAC’s Advisory Board’s comments and submit the final reports to the EAC toward the end of June.

Recommendation:
The EAC recommends that contract E4014127 be modified at no cost to allow the contractor to complete their work by June 30, 2006.
3. Election Assistance Commission

5 New York Avenue, NW

to 1100

Washington, DC 20005

NAME AND ADDRESS OF CONTRACTOR (No., street, county, State and ZIP Code):

Utgers Plaza

1 Brunswick, NJ 08901

11. THIS ITEM ONLY APPLIES TO AMENDMENTS OF SOLICITATIONS

The above numbered solicitation is amended as set forth in Item 14. The hour and date specified for receipt of offers, if extended, is not extended. Contractor must acknowledge receipt of this amendment prior to the hour and date specified in the solicitation or as amended, by one of the following methods:

(a) By completing Items 8 and 15, and returning copies of the amendment;
(b) By acknowledging receipt of this amendment on each copy of the offer submitted;
(c) By separate letter or telegram which includes a reference to the solicitation and amendment numbers. Failure of your acknowledgment to be received at the CE Designated for the Receipt of Offers Prior to the Hour and Date Specified May Result in Rejection of Your Offer. If by virtue of this amendment desires to change an offer already submitted, such change may be made by telegram or letter, provided each telegram or letter makes reference to the solicitation and this amendment, and is received prior to the opening hour and date specified.

ACCOUNTING AND APPROPRIATION DATA (if required):

13. THIS ITEM ONLY APPLIES TO MODIFICATION OF CONTRACTS/ORDERS.

IT MODIFIES THE CONTRACT/ORDER NO. AS DESCRIBED IN ITEM 14.

A. THIS CHANGE ORDER IS ISSUED PURSUANT TO FAR 43.103(a)(3) (Specify authority). THE CHANGES SET FORTH IN ITEM 14 ARE MADE IN THE CONTRACT ORDER NO. IN ITEM 10A.

B. THE ABOVE NUMBERED CONTRACT/ORDER IS MODIFIED TO REFLECT THE ADMINISTRATIVE CHANGES (such as changes in paying officer, appropriation data, etc.) SET FORTH IN ITEM 14. PURSUANT TO THE AUTHORITY OF FAR 43.103(b).

C. THIS SUPPLEMENTAL AGREEMENT IS ENTERED INTO PURSUANT TO AUTHORITY OF:

D. OTHER (Specify type of modification and authority)

IMPORTANT: Contractor is not required to sign this document and return copies to the issuing office.

DESCRIPTION OF AMENDMENT/MODIFICATION (organized by UOF section headings, including solicitation/contract subject matter where feasible): No-cost contract modification is intended to move the contractor’s concluding date from March 31, 2006 to June 30, 2006. Pursuant to the terms of the referenced contract, the contractor was to have finished its work by March 31, 2006. However, the EAC wishes to conduct a supplemental review of the report on Voter Identification during the week of May 15, 2006. After the supplemental review, the contractor will revise the draft report and present two drafts (Provisional Voting and Voter Identification) to the EAC Advisory Board at its May 24, 2006 meeting. Anticipating that the EAC Advisory Board will comments on the two reports, the contractor will need an additional month to complete final edits and prepare presentations. The contractor thus stands completing its work by June 30, 2006.

As provided herein, all terms and conditions of the document referenced in Item 9A or 10A, as heretofore changed, remain unchanged and in full force and effect.

ORDER FOR SUPPLIES AND SERVICES

Under the authority of Public Law 107-252, dated October 29, 2002, establishing the U.S. Election Assistance Commission (EAC), request to provide consulting services to the EAC to assist in the development of a Voting Fraud and Voter Intimidation Project. See the attached statement work for a description of the specifics.

- LABOR COST: $50,000.00
- TRAVEL COST: $5,000.00
- TOTAL COST OF CONTRACT: $55,000.00

MAIL INVOICE TO: Election Assistance Commission
25 New York Ave., NW Suite 1100
Washington, DC 20005
PURCHASE ORDER TERMS AND CONDITIONS

The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignor; (2) Name and address of consignee; (3) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number and (4) Government bill of lading number covering the shipment (if any); and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices, except that the Government will not pay any amount for the labor of any person who is not paid by the Contractor in accordance with the labor standards specified in the contract. All payments shall be computed on the basis of the actual cost of the materials and services delivered or performed, less any deductions properly allowed in the contract. If the Government is not paid in full, the Contractor shall refund the excess to the Government. No material or services shall be furnished by the Contractor until any dispute over the contract has been resolved.

DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers, However, any offered discount will form a part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount, any payment made in accordance with the offeror's payment terms may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the wire on which an electronic funds transfer was made.

Discounts for prompt payment shall be computed as follows: (a) The 30th day after Government acceptance of supplies delivered or performed by the Contractor.

(c) The 30th day after the designated billing office has received a proper invoice, unless there is a disagreement over quantity, quality, or contractor compliance with a contract provision.

STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRERS (MAY 1989)

The GSA Form 2166, Service Contract Act of 1965 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

223-1 Changes - Fixed Price (AUG 87)
224-1 Termination for Convenience of the Government (Fixed Price)(Short Form) (APR 84)
ACT NUMBER E4019698; EAC CONTRACT NUMBER 05-67

Consulting Services to Assist EAC in the Development of a Voting Fraud and Voter Intimidation Project

Background

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b)(6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this consultant to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. If so, the consultant would also be tasked to define the scope of the project and prepare a Statement of Work for the EAC to use for a subsequent competitive procurement. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two consultants, who will work jointly to perform the work described below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). As a result of this unique relationship, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information, travel and conduct. All research, information, documents and any other intellectual property, (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express permission of the EAC.

Supervision and Management.

The EAC Project Manager for this effort is Margaret Sims, EAC Research Specialist. Ms. Sims will provide taskings, and supervise, review and approve all work and performance.
Period of Appointment, Compensation and Travel.

The period of appointment under this contract is estimated at six months. The appointment shall constitute intermittent appointment (without a regularly scheduled tour of duty) per 5 C.F.R. §340.401(b). The consultant shall not incur overtime. The consultants shall not receive automatic adjustments of pay based upon 5 U.S.C. 5303. The consultants are not eligible for sick and annual leave, nor compensation for work performed on federal holidays. The Consultant is expected to work 450 hours during the estimated six month appointment period. These hours must be distributed evenly over the period so that the Consultant is working approximately, but no more than 20 hours per week. The consultant shall be paid at a rate of $111 per hour. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. The project at issue is sought to be completed within the sixth month period. The period of appointment shall continue until the project, outlined below, is completed.

Consultant’s duty station shall be his/her home or place of business. The consultant has access to and shall supply common office equipment to include telecommunications, internet, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word and Excel). Other resources will be provided by the EAC as needed and at its discretion.

The Consultant is required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC per Federal Travel Regulations and EAC policy. The Consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel.

Areas of Responsibility

2. Using the description developed above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

3. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of Tasks 1 and 2 as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.
4. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future research resulting from this effort.

5. Should the EAC decide to pursue one or more of the recommendations made in the report noted above, the consultant will be responsible for defining the appropriate project scope(s) and preparing Statement(s) of Work sufficient for use in a competitive procurement.

Compensation Procedures

Compensation shall be made for work done by submitting invoices. Invoices shall be submitted on a monthly basis. These invoices shall state the number of labor hours that have been expended. Invoices shall be delivered to Ms. Margaret Sims for review and Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005. Compensation for travel shall be submitted by travel voucher consistent with federal travel regulation and EAC requirements.

Termination

This consultant contract can be terminated without cause in advance of the current end date by two weeks' notice in writing by either of the parties.

**GSA FORM 300 (REV. 2-93)**
the Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract. The Contractor requests it and the amount due on deliveries is at least $1,000 or 50 percent of the total contract price.

2.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

j) Discounts for prompt payment will not be considered in the valuation of offers. However, any offered discount will form part of the award, and will be taken if payment is made within the discount period indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in conjunction with the offer, the Government may require that all payments be accompanied by a remittance advice containing the information required to compute the discount earned, and that payment be made within the required period.

2.232-9 PAYMENTS (APR 1984)

The Government shall pay the Contractor, by the end of the month in which the receipt is made, for supplies delivered or services rendered, all invoices which have been accepted, provided that the invoices are prepared and submitted to the billing office within 30 days after the receipt of the supplies or services. A bonded or bank guarantee or letter of credit may be required by the Government as a condition of payment. Unless otherwise specified in this contract, payment shall be made on the date of acceptance by the Government. Invoices shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice shall be prepared and submitted to the billing office designated in block 24 to receive invoices. The permit to address must correspond to the remittance address in block 12.

a)(6) The sole purpose of computing an interest penalty that might be due the Contractor, Government acceptance shall be deemed to have occurred constructively on the 7th day (unless otherwise specified in block 20) after the Contractor delivered the supplies or performed the services in accordance with the terms and conditions of the contract, unless there is a disagreement over quantity, quality, or contractor compliance with a contract provision.

2.224-40 SERVICE CONTRACT ACT OF 1965, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wages specified under Section 8 (1) (1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-206). Regulations and interpretations of the Service Contract Act of 1965 are contained in 29 CFR Part 4.

2.224-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED (MAY 1989)

2.224-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (SEP 86)

2.224-41 and 2.224-42 apply to service contracts when the amount exceeds $2,500.

The GSA Form 2166, Service Contract Act of 1965 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

2.282-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

2.203-1 Officials Not to Benefit (APR 84)

2.203-3 (Gratuities (APR 84)

2.203-5 Covenant Against Contingent Fees (APR 84)

2.203-7 Anti-Kickback Procedures (OCT 88)

2.212-9 Variation in Quantity (APR 84)

In the preceding clause, the permissible variations are stated in the schedule.

2.222-3 Convict Labor (APR 84)

2.222-26 Equal Opportunity (APR 84) (Applies when amount exceeds $10,000)

2.222-36 Affirmative Action for Special Disabled and Vietnam Era Veterans (APR 84) (Applies when amount exceeds $100,000)

2.222-37 Employment Reports on Special Disabled Veterans and Veterans of the Vietnam Era (JAN 88) (Applies whenever clause 2.222-36 is included)

2.222-3 Drug Free Workplace (JUL 90) (Applies if contract is awarded to an individual)

2.222-3 Boy American Act - Supplies (JAN 89)

2.226-11 Restrictions on Certain Foreign Purchases (MAY 92)

2.232-26 Prompt Payment (SEP 92)

2.233-1 (Disputes (DEC 91)

2.233-3 Protest After Award (AUG 89)

2.235-1 Contractor Inspection Requirements (APR 84)

2.249-8 Default (Fixed-Price Supply and Service) (APR 84)

Applicable to purchase orders for supplies:

2.222-4 Contract Work Hours and Safety Standards Act - Overtime Compensation - (MAR 88) (Applies when amount is between $2,500 and $10,000)

2.222-20 Walsh-Healey Public Contracts Act (APR 84) (Applies when amount exceeds $10,000)

GSA FORM 300 (REV. 2-93)
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered or services performed and accepted as any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries accepted by the Government; (a) The amount due on the deliveries is at least $1,000 or 60 percent of the total contract price; (b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

2.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered or services performed and accepted as any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries accepted by the Government; (a) The amount due on the deliveries is at least $1,000 or 60 percent of the total contract price; (b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

2.232-2 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

Discounts for prompt payment will not be considered in the valuation of offers. However, any offered discount will form a part of the award, and will be taken into account in the discount offered indicated in the offer by the offeror. As an alternative to offering a prompt payment discount in connection with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

2.232-2 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due date, invoice requirements, and constructive acceptance have been extracted for our convenience. All days referred to in the extracts below are calendar days.

(a)(2) ... The due date for making invoice payments by the designated payment office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor ...

(a)(4) ... An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include: (i) items listed in ... (viii) ... If the invoice does not comply with these requirements, then the Contractor will be notified of the defect within 7 days after receipt of the invoice at the designated billing office ... Untimely notification will be taken into account in the computation of any interest penalty owed the Contractor ...

(i) Name and address of the Contractor.

(ii) Invoice date.

(iii) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).

(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount terms), Bill of lading number and weight of shipment shall be shown for shipments on Government bills of lading.

(vi) Name and address of Contractor official to whom payment is to be sent (must be the same as that in the contract or in a proper notice of assignment).

(vii) Name (where practicable), title, phone number, and mailing address of person to be notified in event of a defective invoice.

NOTE: Invoices must include the ACT number (block 4) and shall be submitted in an original only, unless otherwise specified, to the billing office designated in block 24 to receive invoices. The term to address must correspond to the remittance address in block 12.

52.224-40 SERVICE CONTRACT ACT OF 1985, AS AMENDED - CONTRACTS OF $2,500 OR LESS (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were In excess of $2,500, the Contractor and any subcontractors shall pay all employees working on the contract not less than the minimum wage specified under Section 6. a) (1) of the Fair Labor Standards Act of 1938, as amended (29 U.S.C. 201-206).

52.224-41 SERVICE CONTRACT ACT OF 1985, AS AMENDED (MAY 1989)

52.224-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRER (MAY 1989)

52.224-41 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

The GSA Form 2166, Service Contract Act of 1985 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

52.252-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

52.203-1 Officials Not to Benefit (APR 84)

52.203-3 Gratuities (APR 84)

52.203-6 Covenant Against Contingent Fees (APR 84)

52.203-6 Restriction on Subcontractor Sales to the Government (JUL 86)

52.203-7 Anti-Kickback Procedures (OCT 88)

52.212-9 Variation in Quantity (APR 84)

52.212-9 Variation in Quantity (APR 84)

(52.222-41 and 52.222-42 apply to service contracts when the amount exceeds $2,500).
Background

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b)(6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this expert to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two experts, who will work jointly to perform the work described below. This contract is a follow-on agreement to EAC Contract Number 05-67. That agreement for non-severable services expires February 25, 2006, without completion of the project. The originally estimated labor hours for the project were insufficient. As such, the EAC seeks to continue the work started in the previous contract but has changed the scope (or duties) of the contractor to limit project costs. This change is reflected in the scope of work section, below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such, this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). The initial appointment under this agreement shall be for the intermittent employment of an expert as defined by 5 C.F.R. §304.102(d) and (e). The expert (hereinafter "contractor") shall work as required by the EAC, without a regularly scheduled tour of duty. Under no circumstances may contractor work more than 225 hours during the term of this agreement (5 C.F.R. §304.103(c)(2)(i)).

Supervision and Management.

The EAC Manager and Contracting Officer's Representative (COR) for this effort is Peggy Sims. Ms. Sims will provide taskings, and authorize, supervise, review and approve all work and performance. She will also approve all labor hours on invoices and travel vouchers submitted for compensation under this agreement.
Period of Appointment.

The appointment under this contract is temporary and shall be for a period of up to four months. The contract period shall begin February 26, 2006. The contract may be extended and contractor reappointed for an additional period (not exceed one year) upon agreement of both parties. (See 5 C.F.R. §304.103(c)).

Compensation

The consultant shall be paid at a rate of $111 per hour. Contractor shall perform the services prescribed by this agreement as directed by the COR on an intermittent basis. However, in any event, the contractor shall not work more that 41 hours in either of the two week periods that make up each four week pay period. Further, as aforementioned, the contractor may not work more than 225 hours during the term of this agreement. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. COR shall provide contractor notice and authorization when performance under this agreement is required.

The consultant shall not incur overtime and is not eligible for premium pay under subchapter V of chapter 55 of title 5, United States Code. (5 C.F.R. §304.106(b)). The contractor, as an intermittent appointee, is also not entitled to sick or annual leave. Contractor will not receive compensation for Federal holidays when no work is performed. (5 C.F.R. §304.106(b)). The contractor shall not receive automatic adjustments of pay based upon 5 U.S.C. §5303. Contractor's pay rate may be increased at the sole discretion of the Contracting Officer, consistent with Federal regulations. Contractor may be reimbursed for other costs, such as local travel, consistent with this agreement if approved by the COR and submitted in writing via invoice.

Travel

The contractor may be required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC COR. The contractor will be reimbursed for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel. Compensation for travel shall be made in accordance with the rates set forth in the Federal Travel Regulation. The amount reimbursed for travel shall not exceed $3,500 in Federal Fiscal Year 2006.

Release of Information

As a result of the limited employment relationship created by this agreement, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information. All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All
such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Compensation Procedures

Compensation shall be made for work done (labor hours) by submitting invoices. Invoices shall be submitted every four weeks from the date of award. A week shall be from Sunday to Saturday. The first pay period shall begin February 26, 2006. Invoices must be submitted every 4 weeks when compensable work under this contract has been performed. The COR will provide the contractor with an invoice schedule, identifying each of the invoice periods, and model invoice forms. Invoices shall be delivered to the COR for review and approval. Each invoice shall:

1. Identify each day (by date) that work was performed and the number of labor hours performed that day. Briefly describe the nature of the work perform for that day;
2. State the total number of labor hours that have been expended under the agreement for the invoice period;
3. State the total number of hours worked for each of the two week periods that make up the total invoice time;
4. Provide a cumulative total of hours worked during the entire contract performance period (one year);
5. Submit, as a separate line item, all reimbursable travel costs for approval. The submission must provide dates of travel, receipts and other information as required by the Federal Travel Regulation.
6. Include the contractor’s signature, affirming that information contained in the invoice is accurate.

Duty Location

Contractor’s duty station shall be his/her home or place of business. The contractor has access to and shall supply common office equipment to include telecommunications, internet access, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word, Project and Excel). All other resources will be provided by the EAC as needed and at its discretion.

Notices

Any notice, given by any of the parties hereunder, shall be sufficient only if in writing and delivered in person or sent by telegraph, telegram, registered, or regular mail as follows:

To EAC: 1225 New York Avenue, Suite 1100, Washington, DC 20005,
Attention: Contracting Officer Representative, Peggy Sims.
To Contractor: At EAC and at the Contractor's address shown on the Cover Page of this contract or to such other address as either of such parties shall designate by notice given as herein required. Notices hereunder shall be effective in accordance with this clause or on the effective date of the notice whichever is later.

Areas of Responsibility (Statement of Work)

1. Submit a revised work plan reflecting revised due dates for deliverables.

3. Using the description developed for 2 above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

4. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of the consultant's research (discussed in 2 and 3, above) as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.

5. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.

Terms and Conditions

The following additional terms and conditions shall apply to this personal services contract:

a. Federal Acquisition Regulation Clauses Incorporated by Reference:

   This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. These clauses may be obtained on the internet at http://farsite.hill.af.mil/.

- 52.203-7 Anti-Kickback Procedures (JUL 1995)
- 52.203-12 Limitation on Payments to Influence Certain Federal Transactions (Sept 2005)
b. Federal Acquisition Regulation Clauses in Full Text:

**Contract Termination (FAR 52.249-12)**

The Government may terminate this contract at any time upon at least 15 days’ written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days’ written notice to the Contracting Officer. (End of Clause)

**Site Visit (FAR 52.237-1)**

Offerors or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award. (End of Clause)

**Protection of Government Buildings, Equipment, and Vegetation (FAR 52.237-2)**

The Contractor shall use reasonable care to avoid damaging existing buildings, equipment, and vegetation on the Government installation. If the Contractor’s failure to use reasonable care causes damage to any of this property, the Contractor shall replace or repair the damage at no expense to the Government as the Contracting Officer directs. If the Contractor fails or refuses to make such repair or replacement, the Contractor shall be liable for the cost, which may be deducted from the contract price. (End of Clause)

**Covenant Against Contingent Fees (FAR 52.203-5)**

(a) The Contractor warrants that no person or agency has been employed or retained to solicit or obtain this contract upon an agreement or understanding for a contingent fee, except a bona fide employee or agency. For breach or violation of this warranty,
the Government shall have the right to annul this contract without liability or, in its
discretion, to deduct from the contract price or consideration, or otherwise recover,
the full amount of the contingent fee.

(b) "Bona fide agency," as used in this clause, means an established commercial or
selling agency, maintained by a contractor for the purpose of securing business, that
neither exerts nor proposes to exert improper influence to solicit or obtain
Government contracts nor holds itself out as being able to obtain any Government
contract or contracts through improper influence.

"Bona fide employee," as used in this clause, means a person, employed by a
contractor and subject to the contractor's supervision and control as to time, place,
and manner of performance, who neither exerts nor proposes to exert improper
influence to solicit or obtain Government contracts nor holds itself out as being able
to obtain any Government contract or contracts through improper influence.

"Contingent Fee," as used in this clause, means any commission, percentage,
brokerage, or other fee that is contingent upon the success that a person or concern
has in securing a Government contract.

"Improper influence," as used in this clause, means any influence that induces or
tends to induce a Government employee or officer to give consideration or to act
regarding a Government contract on any basis other than the merits of the matter.

(End of Clause)

Disputes (FAR 52.233-1), Alternate I

(a) This contract is subject to the Contract Disputes Act of 1978, as amended (41

(b) Except as provided in the Act, all disputes arising under or relating to this contract
shall be resolved under this clause.

(c) "Claim," as used in this clause, means a written demand or written assertion by
one of the contracting parties seeking, as a matter of right, the payment of money in a
sum certain, the adjustment or interpretation of contract terms, or other relief arising
under or relating to this contract. However, a written demand or written assertion by
the Contractor seeking the payment of money exceeding $100,000 is not a claim
under the Act until certified. A voucher, invoice, or other routine request for payment
that is not in dispute when submitted is not a claim under the Act. The submission
may be converted to a claim under the Act, by complying with the submission and
certification requirements of this clause, if it is disputed either as to liability or
amount or is not acted upon in a reasonable time.

(d) (1) A claim by the Contractor shall be made in writing and, unless otherwise
stated in this contract, submitted within 6 years after accrual of the claim to the
Contracting Officer for a written decision. A claim by the Government against the
Contractor shall be subject to a written decision by the Contracting Officer.
(i) The contractor shall provide the certification specified in paragraph (d)(2)(iii) of this clause when submitting any claim exceeding $100,000.

(ii) The certification requirement does not apply to issues in controversy that have not been submitted as all or part of a claim.

(iii) The certification shall state as follows: "I certify that the claim is made in good faith; that the supporting data are accurate and complete to the best of my knowledge and belief; that the amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable; and that I am duly authorized to certify the claim on behalf of the Contractor."

(3) The certification may be executed by any person duly authorized to bind the Contractor with respect to the claim.

(e) For Contractor claims of $100,000 or less, the Contracting Officer must, if requested in writing by the Contractor, render a decision within 60 days of the request. For Contractor-certified claims over $100,000, the Contracting Officer must, within 60 days, decide the claim or notify the Contractor of the date by which the decision will be made.

(f) The Contracting Officer’s decision shall be final unless the Contractor appeals or files a suit as provided in the Act.

(g) If the claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent, may agree to use alternative dispute resolution (ADR). If the Contractor refuses an offer for ADR, the Contractor shall inform the Contracting Officer, in writing, of the Contractor’s specific reasons for rejecting the offer.

(h) The Government shall pay interest on the amount found due and unpaid from

(1) the date that the Contracting Officer receives the claim (certified, if required); or

(2) the date that payment otherwise would be due, if that date is later, until the date of payment.

With regard to claims having defective certifications, as defined in FAR 33.201, interest shall be paid from the date that the Contracting Officer initially receives the claim. Simple interest on claims shall be paid at the rate, fixed by the Secretary of the Treasury as provided in the Act, which is applicable to the period during which the Contracting Officer receives the claim and then at the rate applicable for each 6-month period as fixed by the Treasury Secretary during the pendency of the claim.
(i) The Contractor shall proceed diligently with performance of this contract, pending final resolution of any request for relief, claim, appeal, or action arising under or relating to the contract, and comply with any decision of the Contracting Officer. (End of Clause)

By signing below, contractor agrees to furnish the personal services set forth or otherwise identified, above, consistent with the conditions noted above and for the consideration stated herein.

GSA FORM 300 (REV. 2-93)
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish an exemption from any tax from which the Government is exempt and which was not included in the contract price.

52.220-70 PACKING LIST (DEC 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall indicate (1) Name and address of consignee; (2) Name and address of consignor; (3) Government order or regulation number; (4) Government order or regulation number; (4) Government order or (5) Number of packing list or shipping document; (6) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

(b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping document shall include: (1) Cardholder name and telephone number; and (2) the term "Credit Card".

12.232-1 PAYMENTS (APR 1984)

The Government shall pay the Contractor, upon the submission of proper Invoices or vouchers, the prices stipulated in this contract. Invoices shall be submitted within thirty days from the date of delivery.

2.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the valuation of offers or unless otherwise specified, any discount offered will form part of the price paid and, if accepted, shall be applied to the entire contract price. A discount may be applied to the contract price if it is mutually agreed upon by the Government and the Contractor.

(b) Unless otherwise specified, discounts shall be applied to the contract price if they are offered in connection with the order. Discounts on the contract price shall be at least 5,000 or 60 percent of the total contract price.

NOTE: Invoices must include the ACT number (block 4) and shall be submitted in an original only, unless otherwise specified, to the billing office designated in block 24 to receive invoices. The remittance address must correspond to the remittance address in block 24.

12.222-40 SERVICE CONTRACT ACT OF 1965, AS AMENDED (MAY 1989)

Except to the extent that an exception, variation, or tolerance would apply if this contract were in excess of $2,500, the Contractor and any subcontractor shall pay all employees working on the contract not less than the minimum wage specified under Section 6, unless there is a disagreement over quantity, quality, or contractor compliance with a contract provision.

52.222-41 SERVICE CONTRACT ACT OF 1965, AS AMENDED (MAY 1989)

52.222-42 STATEMENT OF EQUIVALENT RATES FOR FEDERAL HIRES (MAY 1989)

(b) 222-41 and 52.222-42 apply to service contracts when the amount exceeds $2,500.

The GSA Form 2166, Service Contract Act of 1965 and Statement of Equivalent Rates for Federal Hires is attached hereto and made a part hereof.

52.252-2 CLAUSES INCORPORATED BY REFERENCE (JUN 1988)

This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request the Contracting Officer will make their full text available:

FEDERAL ACQUISITION REGULATION (48 CFR CHAPTER 1) CLAUSES

Applicable to purchase orders for supplies or services:

52.203-1 Officials Not to Benefit (APR 84)
52.203-3 Gratuities (APR 84)
52.203-6 Government or Contingent Fees (APR 84)
52.203-8 Restriction on Subcontractor Sales to the Government (JUL 86)
52.207-7 Anti-Kickback Procedures (OCT 88)

2. CONTRACTOR'S ORIGINAL

GSA FORM 300 (REV. 2-93)
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover taxes which may subsequently be imposed on this transaction or changes in the rates of currently applicable taxes. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

Packaging List (Dec 1989)

(a) A packing list or other suitable shipping document shall accompany each shipment and shall state the name and address of consignor; (2) Name and address of consignee; (3) Government order or requisition number; (4) Government bill of lading number covering the shipment (if any); and (5) Description of the material shipped, including item number, quantity, number of containers, and package number (if any).

b) When payment will be made by Government commercial credit card, in addition to the information in (a) above, the packing list or shipping documents shall include: (1) Cardholder name and telephone number and (2) the term "Credit Card".

Payments (APR 1984)

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for supplies delivered and accepted or services rendered and accepted, as any deduction made in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries accepted by the Government if: (a) The amount due on the deliveries warrants it; (b) The invoice is received on the due date; and (c) The invoice is at least $1,000 or 50 percent of the total contract price.

Discounts for Prompt Payment (APR 1984)

a) Discounts for prompt payment will not be considered in the valuation of offers. However, any offered discount will form a part of the award, and any discount is made within the discount period indicated in the offer by the offerer. As an alternative to offering a prompt payment discount in conjunction with the offer, offerors awarding contracts may include prompt payment discounts on individual invoices.

b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the date on which an electronic funds transfer was made.

ROMPT PAYMENT

Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due date, invoice requirements, constructive acceptance and interest penalties. Certain portions of the clause regarding payment due dates, invoice requirements, and constructive acceptance have been extracted for our convenience. All days referred to in the extracts below are calendar days.

1. (a) The due date for making invoice payments by the designated billing office shall be the later of the following two events:

(i) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(ii) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor.

2. (a) An invoice shall be prepared and submitted to the designated billing office specified in the contract. A proper invoice must include the items listed in (i) through (viii) ... If the invoice does not comply with these requirements, then the Contractor will be notified of its defect within 7 days after receipt of the invoice at the designated billing office. Un timely notification will be taken into account in the imputation of any interest penalty owed the Contractor.

(i) Name and address of the Contractor.

(ii) Invoice date.

(iii) Contract number or other authorization for supplies delivered or services performed (including order number and contract line item number).

(iv) Description, quantity, unit of measure, unit price, and extended price of supplies delivered or services performed.

(v) Shipping and payment terms (e.g., shipment number and date of shipment, prompt payment discount terms). Bill of lading number and date of shipment will be shown for shipments on Government bills of lading.

(vi) Name and address of the Contractor to whom payment is to be sent (must be the same as that in the contract or in a proper notice assignment).

(vii) Name (where practicable), title, phone number, and mailing address of person to be notified in event of a defective invoice.
ACT NUMBER E4019904; EAC CONTRACT NUMBER 06-04
Personal Services Contract for Interim Expert Services

Background

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b) (6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this expert to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two experts, who will work jointly to perform the work described below. This contract is a follow-on agreement to EAC Contract Number 05-66. That agreement for non-severable services expires February 15, 2006, without completion of the project. The originally estimated labor hours for the project were insufficient. As such, the EAC seeks to continue the work started in the previous contract but has changed the scope (or duties) of the contractor to limit project costs. This change is reflected in the scope of work section, below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such, this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). The initial appointment under this agreement shall be for the intermittent employment of an expert as defined by 5 C.F.R. §304.102(d) and (e). The expert (hereinafter "contractor") shall work as required by the EAC, without a regularly scheduled tour of duty. Under no circumstances may contractor work more than 225 hours during the term of this agreement (5 C.F.R. §304.103(c)(2)(i)).

Supervision and Management.

The EAC Manager and Contracting Officer's Representative (COR) for this effort is Peggy Sims. Ms Sims will provide taskings, and authorize, supervise, review and approve all work and performance. She will also approve all labor hours on invoices and travel vouchers submitted for compensation under this agreement.
Period of Appointment.

The appointment under this contract is temporary and shall be for a period of up to four months. The contract period shall begin February 26, 2006. The contract may be extended and contractor reappointed for an additional period (not exceed one year) upon agreement of both parties. (See 5 C.F.R. §304.103(c)).

Compensation

The consultant shall be paid at a rate of $111 per hour. Contractor shall perform the services prescribed by this agreement as directed by the COR on an intermittent basis. However, in any event, the contractor shall not work more than 41 hours in either of the 2 two week periods that make up each four week pay period. Further, as aforementioned, the contractor may not work more than 225 hours during the term of this agreement. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. COR shall provide contractor notice and authorization when performance under this agreement is required.

The consultant shall not incur overtime and is not eligible for premium pay under subchapter V of chapter 55 of title 5, United States Code. (5 C.F.R. §304.106(b)). The contractor, as an intermittent appointee, is also not entitled to sick or annual leave. Contractor will not receive compensation for Federal holidays when no work is performed. (5 C.F.R. §304.106(b)). The contractor shall not receive automatic adjustments of pay based upon 5 U.S.C. §5303. Contractor’s pay rate may be increased at the sole discretion of the Contracting Officer, consistent with Federal regulations.

Contractor may be reimbursed for other costs, such as local travel, consistent with this agreement if approved by the COR and submitted in writing via invoice.

Travel

The contractor may be required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC COR. The contractor will be reimbursed for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel. Compensation for travel shall be made in accordance with the rates set forth in the Federal Travel Regulation. The amount reimbursed for travel shall not exceed $6,500 in Federal Fiscal Year 2006.

Release of Information

As a result of the limited employment relationship created by this agreement, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information. All research, information, documents and any other intellectual property (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All
such work produced shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express written permission of the EAC.

Compensation Procedures

Compensation shall be made for work done (labor hours) by submitting invoices. Invoices shall be submitted every four weeks from the date of award. A week shall be from Sunday to Saturday. The first pay period shall begin February 26, 2006. Invoices must be submitted every 4 weeks when compensable work under this contract has been performed. The COR will provide the contractor with an invoice schedule, identifying each of the invoice periods, and model invoice forms. Invoices shall be delivered to the COR for review and approval. Each invoice shall:

1. Identify each day (by date) that work was performed and the number of labor hours performed that day. Briefly describe the nature of the work performed for that day;
2. State the total number of labor hours that have been expended under the agreement for the invoice period;
3. State the total number of hours worked for each of the two week periods that make up the total invoice time;
4. Provide a cumulative total of hours worked during the entire contract performance period (one year);
5. Submit, as a separate line item, all reimbursable travel costs for approval. The submission must provide dates of travel, receipts and other information as required by the Federal Travel Regulation.
6. Include the contractor’s signature, affirming that the information contained in the invoice is accurate.

Duty Location

Contractor’s duty station shall be his/her home or place of business. The contractor has access to and shall supply common office equipment to include telecommunications, internet access, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word, Project and Excel). All other resources will be provided by the EAC as needed and at its discretion.

Notices

Any notice, given by any of the parties hereunder, shall be sufficient only if in writing and delivered in person or sent by telegraph, telegram, registered, or regular mail as follows:

To EAC: 1225 New York Avenue, Suite 1100, Washington, DC 20005, Attention: Contracting Officer Representative, Peggy Sims.
To Contractor: At EAC and at the Contractor's address shown on the Cover Page of this contract or to such other address as either of such parties shall designate by notice given as herein required. Notices hereunder shall be effective in accordance with this clause or on the effective date of the notice whichever is later.

Areas of Responsibility (Statement of Work)

1. Submit a revised work plan reflecting revised due dates for deliverables.

3. Using the description developed for 2 above, perform background research, including both Federal and State administrative and case law reviews, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

4. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of the consultant's research (discussed in 2 and 3, above) as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.

5. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future EAC research resulting from this effort.

Terms and Conditions

The following additional terms and conditions shall apply to this personal services contract:

a. Federal Acquisition Regulation Clauses Incorporated by Reference:

   This contract incorporates the following clauses by reference with the same force and effect as if they were given in full text. Upon request, the Contracting Officer will make their full text available. These clauses may be obtained on the internet at http://farcite.jhrs.af.mil/.

**b. Federal Acquisition Regulation Clauses in Full Text:**

**Contract Termination (FAR 52.249-12):**

The Government may terminate this contract at any time upon at least 15 days' written notice by the Contracting Officer to the Contractor. The Contractor, with the written consent of the Contracting Officer, may terminate this contract upon at least 15 days' written notice to the Contracting Officer. (End of Clause)

**Site Visit (FAR 52.237-1):**

Offerors or quoters are urged and expected to inspect the site where services are to be performed and to satisfy themselves regarding all general and local conditions that may affect the cost of contract performance, to the extent that the information is reasonably obtainable. In no event shall failure to inspect the site constitute grounds for a claim after contract award. (End of Clause)

**Protection of Government Buildings, Equipment, and Vegetation (FAR 52.237-2):**

The Contractor shall use reasonable care to avoid damaging existing buildings, equipment, and vegetation on the Government installation. If the Contractor's failure to use reasonable care causes damage to any of this property, the Contractor shall replace or repair the damage at no expense to the Government as the Contracting Officer directs. If the Contractor fails or refuses to make such repair or replacement, the Contractor shall be liable for the costs which may be deducted from the contract price. (End of Clause)

**Covenant Against Contingent Fees (FAR 52.203-5):**

(a) The Contractor warrants that no person or agency has been employed or retained to solicit or obtain this contract upon an agreement or understanding for a contingent fee, except a bona fide employee or agency. For breach or violation of this warranty,
the Government shall have the right to annul this contract without liability or, in its
discretion, to deduct from the contract price or consideration, or otherwise recover,
the full amount of the contingent fee.

(b) "Bona fide agency," as used in this clause, means an established commercial or
selling agency, maintained by a contractor for the purpose of securing business, that
neither exerts nor proposes to exert improper influence to solicit or obtain
Government contracts nor holds itself out as being able to obtain any Government
contract or contracts through improper influence.

"Bona fide employee," as used in this clause, means a person, employed by a
contractor and subject to the contractor's supervision and control as to time, place,
and manner of performance, who neither exerts nor proposes to exert improper
influence to solicit or obtain Government contracts nor holds itself out as being able
to obtain any Government contract or contracts through improper influence.

"Contingent Fee," as used in this clause, means any commission, percentage,
brokerage, or other fee that is contingent upon the success that a person or concern
has in securing a Government contract.

"Improper influence," as used in this clause, means any influence that induces or
tends to induce a Government employee or officer to give consideration or to act
regarding a Government contract on any basis other than the merits of the matter.

(End of Clause)

**Disputes (FAR 52.233-1), Alternate I**

(a) This contract is subject to the Contract Disputes Act of 1973, as amended (41

(b) Except as provided in the Act, all disputes arising under or relating to this contract
shall be resolved under this clause.

(c) "Claim," as used in this clause, means a written demand or written assertion by
one of the contracting parties seeking, as a matter of right, the payment of money in a
sum certain, the adjustment or interpretation of contract terms, or other relief arising
under or relating to this contract. However, a written demand or written assertion by
the Contractor seeking the payment of money exceeding $100,000 is not a claim
under the Act until certified. A voucher, invoice, or other summons request for payment
that is not in dispute when submitted is not a claim under the Act. The submission
may be converted to a claim under the Act, by complying with the submission and
-certification requirements of this clause, if it is disputed either as to liability or
amount or is not acted upon in a reasonable time.

(d) (1) A claim by the Contractor shall be made in writing and, unless otherwise
stated in this contract, submitted within 6 years after accrual of the claim to the
Contracting Officer for a written decision. A claim by the Government against the
Contractor shall be subject to a written decision by the Contracting Officer.
The contractor shall provide the certification specified in paragraph (d)(2)(iii) of this clause when submitting any claim exceeding $100,000.

The certification requirement does not apply to issues in controversy that have not been submitted as all or part of a claim.

The certification shall state as follows: "I certify that the claim is made in good faith; that the supporting data are accurate and complete to the best of my knowledge and belief; that the amount requested accurately reflects the contract adjustment for which the Contractor believes the Government is liable; and that I am duly authorized to certify the claim on behalf of the Contractor."

The certification may be executed by any person duly authorized to bind the Contractor with respect to the claim.

For Contractor claims of $100,000 or less, the Contracting Officer must, if requested in writing by the Contractor, render a decision within 60 days of the request. For Contractor-certified claims over $100,000, the Contracting Officer must, within 60 days, decide the claim or notify the Contractor of the date by which the decision will be made.

The Contracting Officer's decision shall be final unless the Contractor appeals or files a suit as provided in the Act.

If the claim by the Contractor is submitted to the Contracting Officer or a claim by the Government is presented to the Contractor, the parties, by mutual consent, may agree to use alternative dispute resolution (ADR). If the Contractor refuses an offer for ADR, the Contractor shall inform the Contracting Officer, in writing, of the Contractor's specific reasons for rejecting the offer.

The Government shall pay interest on the amount found due and unpaid from

1. the date that the Contracting Officer receives the claim (certified, if required); or
2. the date that payment otherwise would be due, if that date is later, until the date of payment.

With regard to claims having defective certifications, as defined in FAR 33.201, interest shall be paid from the date that the Contracting Officer initially receives the claim. Simple interest on claims shall be paid at the rate, fixed by the Secretary of the Treasury as provided in the Act, which is applicable to the period during which the Contracting Officer receives the claim and then at the rate applicable for each 6-month period as fixed by the Treasury Secretary during the pendency of the claim.
(i) The Contractor shall proceed diligently with performance of this contract, pending final resolution of any request for relief, claim, appeal, or action arising under or relating to the contract, and comply with any decision of the Contracting Officer.

(End of Clause)

By signing below, contractor agrees to furnish the personal services set forth or otherwise identified, above, consistent with the conditions noted above and for the consideration stated herein.

**26F. SIGNATURE**

**26G. SIGNATURE**

**26H. SIGNATURE**

**27. PAYING OFFICE**

**GSA FORM 300 (REV. 2-93)**
The contract price includes all applicable Federal, State, and local taxes. No adjustment will be made to cover any taxes which may subsequently be imposed on this transaction or changes in the tax rates. However, the Government will, upon the request of the Contractor, furnish evidence appropriate to establish exemption from any tax from which the Government is exempt and which was not included in the contract price.

ROMPT PAYMENT

(1) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(i) The 30th day after Government acceptance of supplies delivered or services performed by the Contractor.

(a) The 30th day after the designated billing office has received a proper invoice from the Contractor.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be made on partial deliveries accepted by the Contractor.

The Government shall pay the Contractor, upon the submission of proper invoices or vouchers, the prices stipulated in this contract for less any deductions provided in this contract. Unless otherwise specified in this contract, payment shall be made on partial deliveries warrants to; or the Contractor receives it and the amount due on the deliveries is at least $1,000 or 60 percent of the total contract price.

52.232-8 DISCOUNTS FOR PROMPT PAYMENT (APR 1989)

(a) Discounts for prompt payment will not be considered in the evaluation of offers. However, any offered discount will form a part of the award, and will be taken if payment is made in full to the discount period indicated in the offer by the offeror. An alternative to offering a prompt payment discount in conjunction with the offer, offerors awarded contracts may include prompt payment discounts on individual invoices.

(b) In connection with any discount offered for prompt payment, time shall be computed from the date of the invoice. For the purpose of computing the discount earned, payment shall be considered to have been made on the date which appears on the payment check or the 7th day after the designated billing office receives it.

ROMPT PAYMENT

Prompt Payment clause 52.232-25 is incorporated in this contract by reference. The clause contains information on payment due dates, invoice requirements, constructive acceptance and interest penalties, permissible variations, constructive acceptance and the contract price includes all applicable Federal, State, and local taxes.
Consulting Services to Assist EAC in the Development of a Voting Fraud and Voter Intimidation Project

Background

Section 241 of HAVA lists a number of election administration topics on which the U.S. Election Assistance Commission may elect to do research. In particular, Section 241(b) (6) and (7) state the two topics of nationwide statistics and methods of identifying, deterring and investigating voting fraud in elections for Federal offices; and identifying, deterring and investigating methods of voter intimidation. The EAC Board of Advisors has recommended that the EAC make research on these topics a high priority.

The EAC seeks to obtain consulting services from an individual who can provide advice drawn from broad professional and technical experience in the area of voter fraud and intimidation. The EAC needs this consultant to conduct a preliminary examination of these topics to determine if a larger research project might be warranted. If so, the consultant would also be tasked to define the scope of the project and prepare a Statement of Work for the EAC to use for a subsequent competitive procurement. To promote a balanced and non-partisan approach to this effort, EAC is contracting with two consultants, who will work jointly to perform the work described below.

Nature of the Appointment

The EAC enters into this contract pursuant to its authority to contract for consultants under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). As such this contract is for personal services and creates a limited employment relationship. (See 5 C.F.R. §304). As a result of this unique relationship, and pursuant to this agreement, you are required to follow all Federal laws and regulations as they relate to the release of agency documents and information, travel and conduct. All research, information, documents and any other intellectual property, (including but not limited to policies, procedures, manuals, and other work created at the request or otherwise while laboring for the EAC) shall be owned exclusively by the EAC, including copyright. All such work product shall be turned over to the EAC upon completion of your appointment term or as directed by the EAC. The EAC shall have exclusive rights over this material. You may not release government information or documents without the express permission of the EAC.

Supervision and Management.

The EAC Project Manager for this effort is Margaret Sims, EAC Research Specialist. Ms. Sims will provide taskings, and supervise, review and approve all work and performance.
Period of Appointment, Compensation and Travel.

The period of appointment under this contract is estimated at six months. The appointment shall constitute intermittent appointment (without a regularly scheduled tour of duty) per 5 C.F.R. §340.401(b). The consultant shall not incur overtime. The consultants shall not receive automatic adjustments of pay based upon 5 U.S.C. 5303. The consultants are not eligible for sick and annual leave, nor compensation for work performed on federal holidays. The Consultant is expected to work 450 hours during the estimated six month appointment period. These hours must be distributed evenly over the period so that the Consultant is working approximately, but no more than 20 hours per week. The consultant shall be paid at a rate of $111 per hour. The dates of performance are flexible but shall be based upon the needs of the project and the EAC. The project at issue is sought to be completed within the sixth month period. The period of appointment shall continue until the project, outlined below, is completed.

Consultant's duty station shall be his/her home or place of business. The consultant has access to and shall supply common office equipment to include telecommunications, internet, a computer, office supplies, facsimile machine and common workplace software (including Microsoft Word and Excel). Other resources will be provided by the EAC as needed and at its discretion.

The Consultant is required to travel on a periodic, as needed basis, throughout the duration of their appointment. All travel must be pre-approved by the EAC per Federal Travel Regulations and EAC policy. The Consultant will be reimbursed, at the Federal government rates, for hotel and ground transportation costs, proper incidental expenses, and per diem while on official, pre-approved EAC travel.

Areas of Responsibility

2. Using the description developed above, perform background research, including both Federal and State administrative and case law review, and a summation of current activities of key government agencies, civic and advocacy organizations regarding these topics. Deliver a written summary of this research and all source documentation.

3. Work in consultation with other EAC staff and the Commissioners to identify a working group of key individuals and representatives of organizations knowledgeable about the topics of voting fraud and voter intimidation. The Working Group will be provided with the results of Tasks 1 and 2 as background information. The consultant will be responsible for developing a discussion agenda and convene the Working Group with the objective of identifying promising avenues for future research by EAC.
4. The consultant shall be responsible for creating a report summarizing the findings of this preliminary research effort and Working Group deliberations. This report should include any recommendations for future research resulting from this effort.

5. Should the EAC decide to pursue one or more of the recommendations made in the report noted above, the consultant will be responsible for defining the appropriate project scope(s) and preparing Statement(s) of Work sufficient for use in a competitive procurement.

Compensation Procedures

Compensation shall be made for work done by submitting invoices. Invoices shall be submitted on a monthly basis. These invoices shall state the number of labor hours that have been expended. Invoices shall be delivered to Ms. Margaret Sims for review and Ms. Diana Scott, Administrative Officer, U.S. Election Assistance Commission, 1225 New York Avenue, N.W., Suite 1100, Washington DC 20005. Compensation for travel shall be submitted by travel voucher consistent with federal travel regulation and EAC requirements.

Termination

This consultant contract can be terminated without cause in advance of the current end date by two weeks' notice in writing by either of the parties.

PROPOSAL TO THE U.S. ELECTION ASSISTANCE COMMISSION

Eagleton Institute of Politics, Rutgers, The State University of New Jersey
With the Moritz College of Law, The Ohio State University

Providing Research Assistance to the Election Assistance Commission for the development of voluntary guidance on Provisional Voting and Voter Identification Procedures

March 22, 2005

CONTACT
Ruth B. Mandel, Director
Principal Investigator
Eagleton Institute of Politics

CONTENTS OF THE PROPOSAL PACKAGE

Technical Proposal, Including Project Workplan
Attachment 1 -- Preliminary Gantt Chart
Attachment 2 -- Matrix of Personnel
Attachment 3 -- Qualifications of the Principal Investigator
Attachment 4 -- Comparable Projects of Eagleton Institute
Attachment 5 -- Risks for Successful Completion of Provisional Voting
Attachment 6 -- Risks for Successful Completion of Voter ID
Attachment 7 -- Reasons the Project Team is the Best Qualified
Attachment 8 -- Resumes of Project Team
Separate File -- Cost Proposal
The Eagleton Institute of Politics at Rutgers, The State University of New Jersey, together with the Moritz College of Law and the Department of Political Science at The Ohio State University have formed a consortium to respond to the U.S. Election Assistance Commission's Request for Proposals to support the development of voluntary guidance on Provisional Voting and Voter Identification Procedures. These institutions have a record of accomplishment in this and closely related fields and are pleased to have this opportunity to contribute to the nationally significant research agenda proposed by the Commission. The consortium offers an independent, objective team of scholars and researchers whose experience and previous contributions to the field will facilitate the completion of the ambitious research agenda in the compressed time established in the RFP.

The research described follows the Commission's Resolution of October 12, 2004 that made the following points:

- Provisional Voting should ensure that all voters who are—or believe they are—registered can cast a ballot in federal elections with the knowledge that a fair process will be followed to determine if the provisional ballot should be counted;
- Election officials have a duty to make certain that provisional balloting is administered fairly and effectively;
- Just before the election, the public was unclear about Provisional Voting procedures;

The Consortium

THE EAGLETON INSTITUTE

The Eagleton Institute explores state and national politics through research, education, and public service, linking the study of politics with its day-to-day practice. It focuses attention on how contemporary political systems work, how they change, and how they might work better. Eagleton offers a range of education programs, including an undergraduate certificate, graduate fellowships, research internships, and opportunities to interact with political practitioners. Eagleton's unusual experience in combining scholarly work with the practice of politics means that the Commission will receive information, analysis and recommendations that are credible, practical, and effective.

The Institute regularly undertakes projects to enhance political understanding and involvement, often in collaboration with government agencies, the media, non-profit groups, and other academic institutions. Its faculty, centers and programs specialize in fields that are directly relevant to the Commission's needs, including the study of: state legislatures; minority and immigrant political behavior; campaigns, elections and political parties; and civic education. The Institute is well known for its Eagleton Poll, a survey research center, which may contribute to this project if the EAC elects to include the optional surveys of young voters (who face particular hurdles as first-time registrants and voters) and of local election officials across the country. These surveys are described in this proposal as possible supplements to the research outlined specifically in the Commission's RFP.
THE MORITZ COLLEGE OF LAW

The College of Law has served the citizens of Ohio and the nation since its establishment in 1891. It has played a leading role in the legal profession through countless contributions made by graduates and faculty. It offers a broad and deep curriculum of approximately 145 courses, covering nearly every area of the law. Its contributions to election law have become well known through its Election Law @ Moritz website. Election Law @ Moritz illuminates public understanding of election law and its role in our nation's democracy. Moritz's role in the research may be enhanced by the inclusion of the OSU Department of Political Science, which is prepared to undertake an in-depth survey of provisional voting and voter identification requirements in one to three states if EAC elects to include that optional research in its contract.

Design and Management of the Project

The Consortium's work will be directed by a Project Team. Dr. Ruth B. Mandel, Director of the Eagleton Institute of Politics and Board of Governors Professor of Politics at Rutgers, chairs the Project Team, and will be the Principal Investigator. Project Team members are:

Edward B. Foley, Robert M. Duncan/Jones Day Designated Professor of Law at the Moritz College of Law and Director of Election Law @ Moritz

Ingrid Reed, Director of the New Jersey Project at the Eagleton Institute of Politics. Reed's work has focused on campaigns and elections from the point of view of the citizen.

Daniel P. Tokaji, Assistant Professor of Law at the Moritz College of Law. His areas of expertise include voting rights, civil rights, freedom of speech, disability rights, and civil procedure.

John Weingart, Associate Director of the Eagleton Institute of Politics, whose publications focus on government process and citizen involvement.

To manage the project, Eagleton has retained Thomas O'Neill. He has long experience in leading and managing complex research and analysis projects. For the past 20 years, O'Neill served as President of The Partnership for New Jersey and led its Leadership New Jersey, diversity management and education improvement programs. Previously he was Executive Director of The Center for Analysis of Public Issues in Princeton, which, among other research, analyzed campaigns and elections. He served for several years as election night analyst for New Jersey Network Television and for WNET-Channel 13 in New York. The team he leads will include a research administrator and support staff necessary for the timely completion of all tasks specified in the RFP. The work will benefit from review by an advisory group of senior scholars and a bi-partisan group of practitioners to provide peer review of draft reports. The peer review group will broaden the viewpoints reflected in the work and lend depth to the Project Team.
The Peer Review Group is now in formation. Both Eagleton and Moritz are connected to a wide, national network of academics, authorities, and activists involved in elections and election law. Upon award of the contract, we will activate that network to recruit 8 to 10 outstanding men and women to constitute the Peer Review Group. Those listed below have not been approached yet, but they represent the range and caliber we intend to recruit for the Peer Review Group.

- Kim Alexander, California Voter Foundation, a nonpartisan organization she founded in 1994 to advance new technologies to improve elections.
- William Baroni, an attorney, Republican member of the New Jersey General Assembly, who specializes in election law.
- Mickey Edwards, former Oklahoma Congressman and faculty member at Harvard's Kennedy School who taught courses on Congress, political leadership, issue advocacy, election strategies, conservative political theory, and the constitutional separation of
The Peer Review Group will bring a wide range of thinking and informed opinion to the project. Its members will broaden and deepen the Project Team’s consideration of how provisional voting and the voter identification regime affect access to the ballot while preserving the integrity of the election process. The Peer Review Group will comment on an early draft of the analysis called for in Tasks 3.4 and 3.10 and in the development of alternative approaches called for in Tasks 3.5 and 3.12.

**Approach to the Research and Analysis**

The Commission’s resolution of October 12 (Resolution 2004-02) provided guidance for election administrators in the states on how to achieve the goals of the Help America Vote Act. The research proposed here should determine the degree to which that guidance was followed in the case of Provisional Voting and in the intertwined topic of Voter Identification Requirements. Through research, interviews, survey analysis and hearings, we will develop information on key questions about the 2004 election, including:

- Did the States have in place clear and uniform written procedures, guidelines and/or instructions to govern the casting and counting of provisional ballots?
- Did local procedures reflect the state’s uniform procedures?
- Did all States and election jurisdictions make these procedures available to the public, political parties and candidates before the election?
- To what extent were poll workers appropriately trained on how to administer provisional ballots, including establishing the identity of the potential voter seeking a provisional ballot?
- How were Federal funds under the Help America Vote Act used to educate voters about their rights to cast a provisional ballot, as well as where such provisional ballots must be cast in order to be counted?
- In States where a provisional ballot had to be cast at the voter’s assigned polling place or precinct, was information available to poll workers to allow them to determine the voter’s assigned precinct and polling place?
- Do states have mechanisms in place to inform voters casting provisional ballots whether or not their vote was counted, and whether or not they are now registered for subsequent elections?
The answers to these questions will reveal the nationwide response to HAVA and to the Commission's guidance in its Resolution 2004-02. They will also help the Project Team develop recommendations to improve the Commission's ability to tailor its guidance document to the needs of voters and election officials. The Commission will gain the knowledge needed to provide a clear basis for practical action by those responsible for administering elections, and thereby move closer to the goals of the Help America Vote Act. It will determine the degree to which Provisional Voting provides a "fail-safe" ballot for those who would otherwise be disenfranchised by confusion or administrative error. This work is important.

Figure 2
Objectives for Provisional Voting and Voter Identification Requirements

A critical area of inquiry throughout this study will be the balance between ballot access and ballot integrity. Striking that balance requires well-trained election administrators who can make fine distinctions under pressure. Figure 2 shows the interplay among the three goals of voter access, ballot security, and administrative clarity, illustrating that tradeoffs must be made in pursuing these important goals. The balance among these goals was one issue at stake in *Spencer v. Blackwell*, which raised the central issue of discrimination against African-American voters by poll challengers in Ohio. Just before the 2004 election, the U.S. Court Of Appeals for the Sixth Circuit in *Summit County Democratic Central and Executive Committee v. Blackwell* described the tension
between the conflicting goals of ballot access and ballot integrity, concerns that apply to assessing the effects of provisional voting:

There is a strong public interest in allowing every registered voter to vote freely. There is also a strong public interest in permitting legitimate statutory processes to operate to preclude voting by those who are not entitled to vote. Finally, there is a strong public interest in smooth and effective administration of the voting laws that militates against changing the rules in the hours immediately preceding the election.

We will pay particular attention to these tensions. The study will weigh questions of open access, administrative practicality, equitable treatment of all voters, the role of technology in extending the boundaries of the possible, and the realities of reliance on state and local entities to devise and administer election law in compliance with constitutional protections within a framework of federalism.

We will reach out to organizations, such as those listed below, with an interest in HAVA and in issues surrounding Provisional Voting and Voter Identification to gather information and invite their comments, suggestions, and recommendations:

- American Enterprise Institute [www.aei.org]
- Brennan Center for Justice at NYU School of Law [www.brennancenter.org]
- Center for Digital Government
- The Century Foundation [www.tcf.org]
- The Constitution Project
- DEMOS-USA [www.demos-usa.org]
- The Election Center [www.votewatch.us]
- Election Reform Information Project [www.electionline.org]
- Leadership Conference on Civil Rights [www.civilrights.org]
- League of Women Voters [www.lwv.org]
- National Association of State Election Directors [www.nased.org]
- People for the American Way [www.pfaw.org]
- Secretaries of State Association [www.nass.org]

The information and perspectives held by these organizations will provide leads for further research and analysis. For example, DEMOS-USA, a New York-based NGO, undertook a 50-state survey of plans for provisional ballots. Published as “Placebo Ballots—Will Fail Safe Voting Fail”, its findings suggest areas for further inquiry:

- Officials were asked the circumstances under which provisional ballots would be offered, which races the ballots would include, and how they would be determined valid and subsequently counted. The responses differed widely among states. At times, different elections officials within the same state offered different answers.
- Idaho and Minnesota do not offer provisional ballots to first-time, newly registered voters who cannot show identification.
- Ten other states do not allow these individuals a chance to substantiate their identity after Election Day or verify their eligibility through other means. Instead, they will automatically invalidate provisional ballots cast by these “voters.”
• At least fifteen other states require provisional voters to return to the election clerk's office after Election Day to present identification. Poll worker error is likely to have a particularly strong effect on provisional voters. Many voters will likely leave the polling place without understanding that they must return with identification sometime later for their provisional ballot to count.

• Twenty-three states provide provisional ballots and verify voters' eligibility without requiring them to present identification subsequent to Election Day.

WORK PLAN
Figure 4, attached, is a preliminary Gantt chart of the project. Please refer to it in conjunction with the following narrative. The chart projects a start date of April 4, 2005, with completion by the end of October 2005, for a duration of 7 months,

PROVISIONAL VOTING

Task 3.1 (By April 14)
We will submit an updated work plan and more detailed Gantt chart. The updated work plan will contain additional detail on the approach and methods we will apply to each task and will provide a more precise estimate of the time required for completion of those tasks. The Project Director and selected members of the Project Team will brief the EAC Project Manager and lead Commissioner as required. Before April 14 we expect to know from the Project Manager if the EAC wishes us to undertake the optional surveys described in this proposal as supplements to the research.

Task 3.2 (By middle of each month, May – October)
The Project Director will submit progress reports that summarize activities, indicate progress, report preliminary results and conclusions, identify problems to be resolved, and track the budget.

Task 3.3 (Periodically, May – October)
The Project Team will brief the EAC as desired. The work plan provides for as many as 6 briefings at appropriate milestones (see Gantt chart). Some of these would be by conference call, others would take place at the EAC's offices.

Task 3.4 Collect and Analyze (April – May)
The analysis of variation in the administration of Provisional Voting across the country is the keystone of this phase of the research. With the research team and advisory group in place, we will begin immediately to collect and analyze state legislation, administrative procedures, and court cases to understand variations in implementation across the country. The compendium of statutes, case law and procedural guidance collected will provide a valuable continuing resource for the EAC. The analysis of that material—and, we hope, of the optional surveys described below—will provide the basis for possible alternative approaches to Provisional Voting called for is Task 3.5 that we and the EAC will consider in drafting the preliminary guidance document called for in Task 3.6.
In 2004, according to Electionline, more than 1.6 million provisional ballots were cast, with nearly 1.1 million (68 percent) counted. In Florida and Ohio alone, this meant nearly 200,000 voters who would have been turned away from polling places if their names could not be found in 2000 had a chance to cast a ballot in 2004. ElectionLine's work points to the critical importance of different procedures state-by-state across the country in the implementation of Provisional Voting. It found that: "Provisional vote-counting varied widely among states, from a national high of 97 percent counted in Alaska to a low of 6 percent counted in Delaware. The report found a national average of 68 percent counted. While lacking any concrete data of the reasons for accepting or declining the votes, anecdotal reports from state and local election officials indicate some people were confused into thinking that provisional ballots could be used in lieu of registration. Those ballots were not counted." "State rules had an impact on the percentage of provisional ballots counted. States that allowed voters to cast ballots outside of their correct precinct but inside of their jurisdiction counted an average of 70 percent of provisional ballots. States that disqualified any provisional ballots counted outside of a voter's correct precinct counted 60 percent of the ballots."

"The national mandate for provisional voting did not mean national uniformity. In fact, we found that whether a voter had his or her provisional ballot counted relied nearly as much on where they cast it as their actual registration status. Had the election been closer, this would have been a flashpoint for controversy... The debate over provisional ballots is far from over."

Our goal in this project is to provide the EAC with the information and analysis needed to move that debate closer to resolution.

The Project Director and staff at Eagleton, working with one or more graduate assistants, will undertake a comprehensive survey of the literature on Provisional Voting and of news and government reports in the experience with Provisional Voting in the November 2004 election.

If the Commission elects to fund the optional survey of local election officials, the work will also include producing reliable and valid data on how these officials conducted themselves and how they evaluate the clarity of the instructions and guidance they received. The sampling of the view of these officials, whose responsibilities are critical to the effective implementation of Provisional Voting, will provide information more reliable and thorough than the anecdotal reports available through a literature search.

The Commission may also elect to fund the optional survey of provisional voters in 1 – 3 states that is described below. It will enrich the study by providing valid and reliable, non-anecdotal information on the experience of those who cast a provisional ballot.

---

1 ElectionLine.Org, Solution or Problem? Provisional Ballots in 2004, March 2005
Optional Survey of Provisional Voters

A survey of provisional voters would provide rare, reliable information about the process of casting a provisional ballot as reported by the voters themselves. The OSU Department of Political Science will design a survey instrument and commission a survey of a sample of those casting provisional ballots in one to three states (including at least one of the 17 states where Provisional Voting was new in 2004).

The survey would reveal the voters' understanding about why they had to cast a provisional ballot. Was this due to their changing residences before the election, faulty voter identification, or other reasons? It would gauge their reactions to the provisional ballot process. The results of this survey would enrich the research and provide a new dimension of the EAC's understanding of the provisional voting process.

Learning how the process worked for provisional voters is important. We lack systematic information about how citizens view casting a provisional ballot. Is the experience positive or negative for them? Did they expect their vote would be counted, or did they believe that being asked to cast a provisional ballot implied that their vote would be discarded? The survey will summarize voters' reports about whether they were informed that their ballot was or was not counted. Demographic questions will ascertain the correlates of provisional voting: if it was more common among racial and ethnic minorities in some areas, among young voters, etc.

The OSU team will begin the survey by constructing a sample of 3,000 provisional voters with names and addresses. It will obtain the list of provisional voters, write the survey questions, verify the programming of the questionnaire, analyze the data, and write up the data. In writing the survey, the OSU political scientists will reflect the results of the EAC's Election Day Survey.

OSU plans to subcontract the actual administration of the survey instrument to Knowledge Networks (www.knowledgenetworks.com), which has conducted Internet surveys funded by several federal agencies, including the NSF and the EPA. Knowledge Networks will send letters to the provisional voters in the sample to notify them of the study. Of the 3,000 provisional voters, 2,400 will receive directions to complete the interview on a website. Knowledge Networks will conduct 10-minute phone interviews with 200 of those who do not complete the web interview. It will also conduct telephone interviews with 200 of the 600 people not assigned to the web interviews.

The interview process, including the mailing and programming, pretest, revisions, field period, and file construction, will require 56 days. Consequently the survey of provisional voters should begin at the very start of the project so that its results can be considered in drafting the guidance document on Provisional Voting.

Optional Survey of Young Voters

Eagleton's Center for Public Interest Polling (the Eagleton Poll) has won a grant from the Carnegie Foundation to survey the experience of young voters as a result of their participation in the 2004 election. Young voters are one of the groups most likely to encounter difficulties in registration, identifying themselves, finding the proper polling place, and other topics relevant to this research. This proposal offers the Commission the option of funding the addition of questions to this survey to highlight issues faced by
young, often first-time voters. The additional questions could determine, with measurable reliability, the frequency with which young voters cast provisional ballots, their impressions of the process by which they voted provisionally, and their experience with identifying themselves at the polls. Answers to these question would deepen the analysis of these issues and provide results more reliable than those produced by the collection of anecdotal evidence.

At the same time, the researchers at Moritz will undertake a thorough collection and analysis of legislation and litigation to reveal how each of the 50 states approached HAVA’s mandates. They will analyze the effect of litigation on that implementation and of the continuing influence of case law on the interpretation of HAVA. We will merge the legal analysis with the political and procedural analysis to illuminate the key questions posed by the RFP.

The merged analysis will increase understanding of the range of approaches to implementing Provisional Voting across the country. It will permit us to categorize the states by the nature of their Provisional Voting regimes, which will produce insights into the strengths and weaknesses of different approaches to implementing HAVA. The goal of the new guidance document, of course, is to build on the strengths and correct the weaknesses.

Our analysis will consider the variation in experience between those states that previously provided for provisional voting and the 17 where provisional voting was new in 2004.

Developing answers to three key questions poses a challenge.

1. Ideally, gauging the effectiveness of provisional voting in enfranchising qualified voters requires an examination that goes beyond calculating the percentage of provisional ballots cast counted. That number alone does not reveal the subjective experience of those who voted by provisional ballot. Did they feel enfranchised, or did they harbor doubts that their votes would count? The optional survey described above would assess that dimension of the question, which is important to understand the credibility of the provisional ballot, particularly in a closely contested election.

2. Measuring the consistency of counting of provisional ballots also poses significant challenges. The literature search will reveal anecdotal reports from various jurisdictions, but the optional survey of local election officials could provide results that are more revealing from the observations of those in the best position to answer this question.

3. Assessing how well local election officials understood how to implement provisional voting will be difficult. The option survey by the Eagleton Poll would tap the opinions of a national sample of local election official to assess their self-reports about their level of understanding and their evaluation of the training and explanatory materials provided to them.
Deliverables

1. Indexed database of major articles on Provisional Voting and related topics
2. Summary of case law on Provisional Voting
3. Compendium of states’ legislation, procedures, and litigation.
5. Analysis of disparities and similarities of how provisional voting was implemented around the country, which will be critiqued by the Peer Review Group.
6. [Optional] Survey results of local election officials’ experience in interpreting guidance from the EAC and state election officials by the Eagleton Poll.
7. [Optional] Survey report on the experience of provisional voters in 1 – 3 selected states by the OSU Department of Political Science.

Task 3.5 Analysis and Alternative Approaches (June)

We see this task as the heart of the project: to assess the potential, problems, and challenges of provisional voting and develop alternative means to achieve the goals of provisional voting.

The first step in this task is to undertake a thorough analysis of the information developed in the first phase of the project (Task 3.4). The Project Team and its staff will merge the legal analysis, review of case law, study of procedures, and, if the optional surveys are included in the project, the information gleaned from the reports of provisional voters and local election officials. Our work will take the following approach:

1. Review the facts and opinions revealed in the Columbus hearing, in the Commission’s Election Day Study, the literature review, and the optional surveys (if undertaken) to prepare a written summary of the experience with Provisional Voting.
2. Clarify the additional policy considerations involved in improving the processes of Provisional Voting, such as the relationship between the Provisional Voting regime and the approach to voter registration and voter identification.
3. Summarize the views of the groups with a stake in Provisional Voting and related issues,
4. Analyze the tensions among the triangle of competing forces that connect the three major objectives for Provisional Voting: enabling maximum number of eligible voters to cast ballots that will be counted; establishing procedural simplicity for voters with a reasonable workload for election officials; minimizing the opportunity for voter fraud.
5. Describe and evaluate alternative ways to achieve the goals of HAVA through Provisional Voting.
6. Tap the views of the members of the Peer Review in preparation for briefing for
the Commission on our preliminary conclusions and recommendations.
7. Also during this period, the Project Director, in consultation with EAC staff, will
select a location and make preliminary arrangements for a public hearing on the
Provisional Voting Guidance Document to take place in September.

Deliverables
1. Written analysis of the experience of Provisional Voting across the country in
2004 based on all available sources and original research.
2. Report of alternatives to existing practices and procedures for Provisional Voting
and voter identification and assess which objectives or values each alternative
favors.
3. Recommendations for best practices
4. Briefing documents for Peer Review Group.
5. Briefing for the Commission

Task 3.6 Preliminary Guidance Document (July — early August)

In this phase of the project, we will develop policy recommendations based on the
research and analysis performed in the previous task. Successful completion of this
task will require the closest coordination on a continuing basis with EAC staff.

Based on the Commission's reaction to the briefing at the conclusion of Task 3.4 the
Project Team will draft a preliminary guidance document for review by the EAC Board of
Advisors and the Standards Board at a meeting to be convened by the Commission.
The meeting will take place in early August.

The Project Team will:

1. Outline major findings, flesh out preferred alternative approaches, and review
with EAC staff.
2. Develop draft Preliminary Guidance Document (PGD)
3. Submit the PGD to the Peer Review Group and revise based on its comments.
4. Prepare final draft of PGD for review by Commission staff; revise
5. Distribute document to EAC Board of Advisors and Standards Board 5 – 7 days
before the meeting or teleconference.
6. Project Director and selected members of the Project Team will brief and
respond to questions and comments during the meeting or teleconference.
7. Prepare summary of issues raised by members of the EAC Board of Advisors
and Standards Board at the meeting or teleconference.

Deliverables
1. Draft Preliminary Guidance Document
2. Briefing for EAC Board and Advisors and Standards Board
3. Summary of comments from Board of Advisors and Standards Board
Task 3.7 Revise Guidance Document for Publication (August)

Based on the comments from the EAC, the Board of Advisors and the Standards Board, the Project Team will revise the PGD to prepare it for publication in the Federal Register. The target for publication will be the week of August 22.

**Deliverable**
Revised PGD suitable for publication in Federal Register

Task 3.8 Arrange Public Hearing (August)

The target date for the hearing is the third week of September, 30 days after publication of the draft Guidance Document in the Federal Register during the week of August 22.

The Project Director will have made preliminary arrangements for the public hearing – selection of city and reserving a venue, for example – earlier in consultation with EAC staff. Arrangements will be finalized in June and July, with retention of a transcription service and provision of day staff to register those testifying. The Project Team will begin to review and summarize written comments as they arrive.

**Deliverables**
- Contract for use of venue for public hearing
- Contract with transcription service for coverage of hearing
- Contract with office temp agency for admin support of hearing

Task 3.9 Final Guidance Document for Adoption (late September)

In the week following the hearing, the Project Team will review the comments and testimony received, summarize that material for discussion with the EAC staff, and revise the Guidance Document as appropriate. The EAC will receive the final Guidance Document in time to adopt it before the end of September.

**Deliverable**
Final Guidance Document

VOTER IDENTIFICATION REQUIREMENTS

Voter identification requirements are intertwined with provisional voting issues. Understanding the connections between the two parts of this research will be critical in achieving the goals of the project.

Ferment is bubbling in the states over voter identification issues. The sharp debate over voter identification makes this work more immediately relevant. Legislatures are now wrestling with the very issues to be analyzed in these tasks. The current edition of
Democracy Dispatches\(^2\), for example, highlights recent developments and contentious debates that the Guidance Document on this subject may help resolve.

- In Indiana the Republican-controlled House Elections Committee reported out a bill by a 7-5 margin that would require most people to show government-issued ID before voting. Opponents argue that the legislation will discourage people from voting. "It is very clear who is being disenfranchised," said a poll worker quoted in the newsletter. "It's people of color, it's the poor, it's the elderly."

- African American lawmakers in the Georgia State Legislature led a walkout by Democrats after the passage of a bill in both Houses that would require Georgia voters to show photographic identification. "What's happening today is just an updated form of Jim Crow," said one senator from Atlanta. "You may be more polite about it... but we know who's going to be disenfranchised."

- In New Mexico, House Republicans attacked Democrats for not including more stringent voter ID requirements in their election reform bills. After several House Republicans left an elections committee meeting on March 13, one representative accused them of planning a walkout to prevent his bill's passage.

- In Texas, new bills would require voters to show proof of citizenship before registering to vote for the first time. A spokesman for People For the American Way is quoted as saying that "this type of legislation will be just as burdensome for U.S.-born voters who move from state to state, or from county for county, as for naturalized citizens."

Authoritative research on the effect of different voter ID regimes on electoral participation, including registering and turnout, particularly turnout by minority voters, promises to raise the level of the debate across the nation.

Advocates on voter ID issues are divided into two, polarized camps. Some seek to minimize identification requirements in order to maximize the number of potential voters who register and cast a ballot. Advocates of this position fear that minority and immigrant voters, young voters, and elderly voters will lack convenient access to the required ID documents, or that they will be more fearful of submitting their ID documents to official scrutiny. On the other side of this debate are people and groups that seek to maximize the security of the franchise, prevent multiple voting or voting by those who are not citizens, and ensure that only those legally entitled to vote do so, and do so once only for each election. Each position pursues legitimate and important goals, but the tradeoffs between them have not been clarified.

The debate between these two positions is rich in assertion, but poor in evidence. We propose to test the hypothesis that more stringent voter ID requirements depress voter participation in general or for the poor, minorities and older voters in particular. We will also search for evidence of a change in the frequency of voter fraud under different requirements for Voter Identification. This research appears practical because the 50 states can be classified into 4 broad, different Voter ID regimes --from requiring ID at every election to merely signing in without verification. We plan to include in our

\(^2\) Demos Democracy Dispatches
research a statistical analysis of voter turnout in the jurisdictions, with special attention to participation by minority voters, using the variety of Voter ID requirements that existed before HAVA as a controlling variable.

A study by The Constitution Project, published by Electionline.org in 2002\(^3\) found "a wide variety of practices around the country – from procedures requiring nothing more than voters stating their names to rules ordering voters to produce picture identification before casting ballots." In the pre-HAVA era it found the following distribution of practices, which provides a potentially rich mine of data to compare voter participation in states with different Voter ID regimes:

- 11 states required in-person voters to present documentary information; local jurisdictions and/or poll workers in 4 more states can choose to require identification.
- 18 states required only that voters sign in at the polls.
- 9 states required the signatures to be matched against other signed documents.
- 9 states only required voters to announce their names at the polls.

Performing this analysis will strengthen the factual basis on which the commission proposes new guidance on Voter Identification Requirements.

**Task 3.10 Collect and Analyze (April – May)**

We will perform this task in conjunction with Task 3.4. The material we gather on Voter ID legislation, administrative procedures and case law will be included in the compendium to be delivered at the end of June. While the Project Team and staff collect and begin the analysis of the material, the Project Director will plan the public hearing on Voter ID issues that will take place in early June.

Our research staff will begin the statistical study of voter participation under various Voter ID regimes, with the aim of completing that work in time for its results to be considered in drafting the Preliminary Guidance Document to be delivered to the EAC in mid July.

**Deliverables**

1. Indexed database of major articles on Voter ID Requirements and related topics
2. Summary of case law on Voter ID Issues
3. Compendium of states' legislation, procedures, and litigation.
4. Analysis of voter participation and vote fraud under various Voter ID regimes to be reviewed by the the Peer Review Group.

**Task 3.11 Conduct Public Hearing (June)**

The Project Director will consult closely with EAC staff on planning for the half-day, informational public hearing, including on questions of site selection, development of

topics to be covered by panels, and the recruitment of panelists with contrasting views and information on those topics. The target for invitations to panelists will be no later than early May. The information and perspectives gleaned at the hearing will be included in the analysis of Voter ID issues that shapes the drafting of the Preliminary Guidance Document.

**Deliverables**
1. Outline of topics for 3 panels
2. List of 9 – 12 panelists
3. Invitations to panelists
4. Hearing announcement
5. Hearing transcript
6. Hearing summary

**Task 3.12 Alternative Approaches (late June)**

Following the hearing, the Project Team will review its compilation of materials from the states, the results of its research on voter participation and vote fraud under different Voter ID regimes, its literature search, and the information from the public hearing to assess the problems and challenges of Voter Identification procedures and devise a range of alternative policy measures to respond to those problems and challenges. The Project Director will work closely with the EAC and its staff to identify policy objectives with which to assess the alternatives, using the triangle of contending forces as an organizing principle to categorize objectives.

The Peer Review Group will be kept informed of the progress of this work and its comments will be sought on an early draft of the Analysis and Alternative Approaches paper. The comments of the Peer Review Group will help shape our briefing for the Commission on this critical task. The Project Director and members of the Project Team will conduct that briefing in late June, just as the Commission receives the Draft Report and Compendium of materials on Provisional Voting (Task 3.4).

During this time period, the Project Director, in consultation with the EAC, will select a site and make preliminary arrangements for the public hearing on the draft guidance document, which will be held in early October.

**Deliverables**
Draft analysis and alternatives for Peer Review Group
Briefing on analysis and alternatives for EAC

**Task 3.12 Preliminary Guidance Document (July – August)**

Based on comments by the EAC on the briefing, particularly the discussion of alternatives, as well as the evidence, and criteria for evaluation, the Project Team will draft the Preliminary Guidance Document. The draft will be distributed to the EAC Board of Advisors and the Standards Board for a meeting in mid August (just as the draft
Guidance Document on Provisional Voting is delivered to the EAC for publication in the Federal Register. The Project Director and selected members of the Project Team will participate in the Board meeting to present the document for discussion and respond to questions and comments. It will record comments for review in revising the document.

Deliverables
1. Draft Guidance Document
2. Briefing for EAC Board of Advisors and Standards Board
3. Summary of comments from Boards

Task 3.14 Revise Guidance Document for Publication (Late August)

The Project Team will review the comments by the Peer Review Group, EAC, the Board of Advisors, and the Standards Board and reflect their views in the Guidance Document. The target is to deliver it to the EAC for publication before the end of August.

Deliverable
Draft Guidance Document for publication

Task 3.15 Public Hearing (October)

The Project Director will have completed arrangements for the hearing (city, venue, transcription service, etc.) by late July. The hearing will take place in the first two weeks of October, 30 days after publication of the draft in the Federal Register.

Deliverables
1. Public hearing
2. Transcript
3. Summary of comments

Task 3.16 Final Guidance Document (Late October)

In the week following the hearing, the Project Team will review the comments and testimony received, summarize that material for discussion with the EAC staff, and revise the Guidance Document as appropriate. The EAC will receive the final Guidance Document in time to adopt it before the end of October.

4 The Steering Committee for the project is responsible for the completion of all tasks. Chaired by Dr. Ruth Mandel, Director of the Eagleton Institute of Politics of Rutgers, its members of the Committee are Professor Edward Foley of the Moritz College of Law, Ohio State University, Ingrid W. Reed, Director of the New Jersey Project of the Eagleton Institute of Politics, Professor Dan Tokaji of the Moritz College of Law, Ohio State University, and John Weingart, Associate Director of The Eagleton Institute of Politics. Thomas O'Neill, a consultant to the Eagleton Institute of Politics, directs the staff overseen by the Committee.

5 The preliminary guidance documents for both the Provisional Voting and for Voter Identification Requirements will be reviewed by a Peer Review Group appointed by the Steering Committee and may be revised as a result of that review before being submitted to the EAC. Members of the Peer Review Group are listed in a separate appendix to this proposal.

6 The surveys would provide additional and valid and reliable data on which to base the conclusions reflected in the draft preliminary guidance document.

Attachment 3: Principal Investigator

The principal investigator, Dr. Ruth B. Mandel, is director of the Eagleton Institute of Politics and Board of Governors Professor of Politics. As Institute director, she is responsible for general direction and oversight of all programs and projects at Eagleton. Under Mandel's leadership, the Institute has been successfully completed dozens of projects under federal, state and foundation grants and contracts, many of which address topics related to voters and voting, civic engagement and political participation, and representative democracy.

Three projects in which she has played a significant and direct substantive role are described below: the New Jersey Initiative: Building Management Capacity in New Jersey Municipalities; the Young Elected Leaders Project; and the New Jersey Civic Education Consortium.

a) The New Jersey Initiative: Building Management Capacity in New Jersey Municipalities
   Sponsoring Organizations: The Pew Charitable Trusts and the NJ Department of Community Affairs
   Project Managers: Dale Jones, Syracuse University, Mark Pfeiffer, NJ Department of Community Affairs
   Period of Performance: 5/01 to 11/02
   Value of Award: $90,000 to Eagleton Institute of Politics

Mandel oversaw the implementation of the New Jersey Initiative, which was conducted as a partnership between the Alan K. Campbell Public Affairs Institute of the Maxwell School of Citizenship and Public Affairs at Syracuse University and the Eagleton Institute of Politics. Mandel guided the formation of the collaboration, the identification of the tasks, including issues related to selecting the case studies, and dissemination of the recommendations and results.

The overall goal of the New Jersey Initiative was to provide opportunities for municipalities and other levels of government, educational institutions, non-profit organizations and individuals to learn about public management systems, how they might be improved, and how they can better meet the needs of those in leadership positions and the needs of citizens. Recommendations for state policy and municipal administration were included.

Seven New Jersey municipal governments volunteered to participate in the Initiative – Brick Township, Elizabeth City, Franklin Township, Irvington Township, Old Bridge Township, Paterson City, and Trenton City. Through their involvement, the project examined the five core management system areas that comprise management capacity – financial management, capital management, human resources management, information technology management, and managing for results. Much was learned about management capacity at the municipal level in New Jersey and the role of the state government in municipal management.
The project resulted in two published monographs: *The New Jersey Initiative: Building Management Capacity in New Jersey Municipalities* and *Summary of The New Jersey Initiative: Building Management Capacity in New Jersey Municipalities*.

**b) Young Elected Leaders Project**  
Sponsoring Organization: The Pew Charitable Trusts  
Project Managers:  
Tobi Walker, Program Officer, Civic Life Initiatives;  
Period of Performance: January, 2002 - June, 2004  
Value of Award: $211,000

Mandel led the project team that conducted a pioneering national study of young officeholders. Under her direction, Eagleton identified and surveyed elected officials age 35 and under in three categories: federal (members of Congress); state (statewide elected officials and state legislators); and local (mayors and municipal council members from cities with populations of 30,000 or more). In May 2003, Eagleton convened *Political Generation Next: America's Young Elected Leaders*, the first national conference for young elected leaders, an occasion to explore issues raised in the research and discuss the challenges of public leadership facing the next generation.

Mandel was centrally involved in every phase of the project, providing the vision that resulted in the successful proposal to Pew, contributing both to the ideas guiding the project and the actual day-to-day management. She played a key role in the design of the survey administered to young elected leaders, in the selection of conference participants, and in the planning of the conference agenda and presenters, as well as at the conference itself. She co-authored the final report provided to the funder and issued to the general public, also titled *Political Generation Next: America's Young Elected Leaders*, and she led dissemination efforts, speaking at public programs and to the media about the findings from the research and conference.

**c) New Jersey Civic Education Consortium**  
Sponsoring Organization: The Geraldine R. Dodge Foundation  
Project Manager: David Grant.  
Period of Performance: March, 2000 - May, 2001  
Value of Award:  

The New Jersey Civic Education Consortium was created by the Eagleton Institute of Politics as a statewide partnership of educators, schools, nonprofit organizations, corporations, and political leaders committed to expanding and strengthening civic education and political participation in New Jersey. Sponsored and hosted by Eagleton, the Consortium seeks to promote partnerships among schools, community organizations, and public servants to educate and encourage a citizenry informed about and engaged in the practice of a democratic society. More than 100 organizations,
agencies and school districts signed on as Consortium partners, and more than 125 individuals in the education, non-profit, and political communities served on Consortium work groups. The Consortium came into existence to strengthen the state's infrastructure to educate and encourage a citizenry informed about and engaged in the practice of a democratic society. It seeks to leverage limited resources through partnerships and information-sharing and by increasing public awareness.

With support from the Dodge Foundation, the Consortium hosted a statewide conference to highlight best practices, exchange ideas, and explore how to use the 2001 gubernatorial election as an educational opportunity. Approximately 90 people gathered at the New Jersey Law Center in New Brunswick to share ideas, make connections, and find new ways of improving civic education in New Jersey. The conference included: a poster session highlighting some of the best practices in civic education from across the state; panels of educators, government, academia, the media, and the non-profit community; and a keynote speaker, Professor Alan Rosenthal, discussing democracy and youth civic engagement.

The Consortium also awarded mini-grants for exemplary programs and engaged the public sector in civic education through a pilot project to bring public officials into the classroom. Some of the grantees presented their work at the Consortium's conference. Under a related grant from the Schumann Fund for New Jersey, the Consortium developed a toolkit with educational resources and suggested activities to assist public officials in working with students.

Mandel worked on the original plan for Eagleton to convene the Consortium and directed Institute staff in shaping the mission and direction of the Consortium. She has been actively involved in development of the Consortium's activities and materials.

Dr. Mandel's current resume is provided in Attachment 8 — Resumes of the Project Team.
Attachment 4: Comparable Projects Performed by the Eagleton Institute of Politics

a) Seminar Series: The Challenge of Implementing the Help America Vote Act
   Sponsoring Organization: The Fund for New Jersey
   Project Manager: Mark Murphy, Executive Director
   Grant: $5,000 for direct expenses of speakers.

This project demonstrates Eagleton's continuing interest in the implementation of HAVA and knowledge of implementation issues. It shows the Institute's knowledge of implementation issues and its ability to achieve productive results by identifying competencies in other states and making contact with key leaders, summarizing information in useful formats and engaging individuals with diverse perspectives on election administration.

In the fall of 2003, the Eagleton Institute of Politics presented a series of three seminars, organized by Ingrid W. Reed, Director of the Institute's New Jersey Project, designed to give New Jersey an opportunity to gain perspectives from six states – New Mexico, Maryland, Michigan, Pennsylvania, Georgia and California – on election reform and implementation of the then-new federal Help America Vote Act. The seminars were held at Eagleton on the Rutgers University campus in New Brunswick, New Jersey.

Each seminar featured speakers from two states where election administration initiatives are underway and addressed one of three areas – state administration, statewide voter registration lists, and communication and education. The programs also included extensive discussion periods with individuals from New Jersey's state and county governments, academic institutions and non-profit organizations interested in election reform, as well as members of the New Jersey HAVA planning committee. The seminars were supported in part by a grant from the Fund for New Jersey.

The first seminar, on September 25, 2003 focused on state administration of elections and plans for implementing HAVA. Presentations were made by Rebecca Vigil-Giron, New Mexico Secretary of State and president-elect of the Association of Secretaries of State, and Linda Lamone, the State Administrator of the Maryland State Board of Elections. They focused on how states are working with counties to provide state-coordinated management practices.

The second seminar on October 28, 2003 focused on HAVA requirements to create a statewide voter registration list. Presentations were made by Christopher Thomas, Director of the Bureau of Elections in the Michigan Department of State who headed his state's efforts to create a statewide voter data base that began in the mid-1990's before HAVA, and Ted Koval, project manager for the Statewide Uniform Registry of Electors (SURE) in the Pennsylvania Department of State who leads the development of his state's registration list in the post-HAVA period. Thomas and Koval discussed state initiatives for addressing a key provision of HAVA which involves application of information technology and new approaches to inter-governmental relations.
The third seminar, on November 20, 2003 focused on the HAVA requirement to provide voter information and education. Presentations were made by Alison Bracewell McCullick, Statewide Voter Education Coordinator for the Georgia Department of State where she oversees 12 voter education coordinators around the state, and Conny G. McCormack, County Clerk for Los Angeles County who has responsibility for conducting elections with over 4 million voters and 5,000 voting places. Bracewell McCullick and McCormack presented examples of communications approaches reaching different audiences through diverse media.

As a follow-up to the seminars, a summary of specific key points from the presentations of each of the speakers was prepared and mailed and e-mailed to staff members in the to New Jersey partisan and non-partisan legislative staff offices to help inform new legislation New Jersey would need to implement the requirements of HAVA. The summary was also provided to the election administration staffs in each of New Jersey's 21 counties and to the leadership of the municipal clerks organization in order to give them a sense of what other states have done in working with county and local leadership to implement HAVA. As a direct result of Eagleton's work, New Jersey election officials subsequently visited the State of Michigan election office and are now modeling New Jersey effort to create a statewide voter list on Michigan's. In addition, the summary has been useful to organizations who have advocated for changes in the election system and who are acting as watch dogs of New Jersey's progress on implementation. The summary is posted on the Eagleton Institute web site.

b) Second HAVA Seminar Series

Subsequent to the HAVA seminar series focusing on other states, the Eagleton Institute of Politics supported the subsequent seminars as part of the Institute's public service mission. This series was directed by Ingrid Reed of Eagleton and included the following:

July 24, 2004 - The Chairman of the U.S. Election Assistance Commission, Dr. DeForest B. Soaries, Jr., spoke about "Implementing HAVA: Perspectives from the Federal Level." The program also included Attorney General Peter C. Harvey, New Jersey's Chief Election Official.

October 8, 2004 – The topic was "Implementing HAVA: Can We Alleviate Risk and Improve Public Confidence When Using New DRE Voting Systems?" Eric Lazarus, lead developer of the report "Recommendations for Improving Reliability of Direct Recording Electronic Voting Systems" issued by the Brennan Center for Justice at NYU Law School and the Leadership Conference on Civil Rights, discussed how and why these recommendations were made for the 2004 election and how election officials were asked to respond to them. New Jersey election officials then discussed how these recommendations were being addressed, which measures should be considered for the future and which measures appeared irrelevant for New Jersey.
January 5, 2004 - The topic was "Next Steps for HAVA Implementation in 2006 Based on 2004 - and what it means for the New Jersey Election In 2005." The session used the Election Official Report Card 2004 developed by the Brennan Center as a starting point for a discussion to set an agenda for evaluating the next elections. Bonnie Blader of NJ Appleseed reported on her Inspections and discussions about security matters in several counties. Deborah Goldberg, Program Director of the Democracy Project of Brennan Center for Justice at NYU Law School discussed the use of the Election 2004 Report Card and Eric Lazarus presented plans for assessing what information is needed to make decisions about voting systems.

   Sponsoring Organization: The Century Foundation
   Project Manager: Tova Wang
   Period of Performance: 2001-2002
   Value of Award: $6,000

This project illustrates the Eagleton Institute’s early interest in issues related to HAVA and its ability to conduct applied research, analyze data and information, work with election officials, craft recommendations and contribute to state-by-state comparison of election issues.

The Century Foundation requested Ingrid Reed, director of the Eagleton New Jersey Project, to prepare one of four studies of 2001 elections designed to assess the extent to which problems evident in Florida and elsewhere in 2000 persisted in the absence of fundamental reform throughout most of the country. Reed provided a study with recommendation of the New Jersey gubernatorial election. The other three were the governor’s race in Virginia, and mayoral races in New York City and Los Angeles.

The Century Foundation reports were released and discussed at the National Press Club, Washington D.C. on October 15, at a program, "Does the Federal Election Bill Fix The Problem?" moderated by Juan Williams; senior correspondent for National Public Radio’s Morning Edition.

Overall, the reports show that election problems were much less pervasive in Virginia and Los Angeles -- which have long-standing voting laws and practices that parallel the reforms that Congress enacted -- than in New Jersey and New York City, where there have been more scattershot approaches to election reform. The reports can be found on www.reformelections.com.

The Overview of the Century Foundation Report (p. xxxiv) notes that in New Jersey, "structural flaws in the system reduce responsibility for carrying out elections effectively and leave local and county administration unaccountable." The report notes that in the 2001 election, the number of uncounted votes rose – usually New Jersey hovers around the national average -- despite the fact that the state replaced its punch card ballot machines. It also notes that New Jersey uses a wide variety of voting machines, and
despite official reports, election observers and voting advocates report polling sites and systems remain inaccessible for the disabled.

The report on the 2001 New Jersey Election points out that New Jersey's decentralized, county-based election system is very similar to Florida's and lacks transparency and accountability.

The first part of the New Jersey report gives a the context for the 2001 elections and describes initiatives taken in 2000 such as eliminating punch card machines and increasing poll worker pay. It discusses how the process worked by looking at four places where specific election problems arose -- Atlantic City, Cumberland County, Passaic County, and Mercer County. It also presents results of an informal survey conducted by Eagleton with the assistance of two research fellows of election administrators about the 2001 election that showed that the increase in poll worker pay successfully addressed the need for workers. It also makes recommendations for improving future elections (p.39): They include:

- define a state leadership role in managing elections
- set county standards for streamlined administration
- address the needs of citizens with disabilities
- examine role of absentee ballots
- improve services for bilingual voters
- upgrade and standardize voting equipment
- consider practices in other states for such initiatives as statewide voter lists, mail ballots, shorter registration deadlines
- use modern communications to promote elections
- recognize outstanding achievements in election administration at the county and local level

Reed concludes the report noting that "the challenge is to find a way to address the systemic issues about election administration in order to assure that the more specific issues are implemented fairly and efficiently and not simply added on to an already complex, overburdened structure.... Leadership from the governor and the legislature will be required to define the expectations for reform and to engage, not ignore, the many individuals and entities already involved in the election process to craft a new system."

Reed added that the new federal election reform act will be catalyst for addressing many of the problems with New Jersey's system and provides funds to make improvements in voting equipment.
d) RU Voting

Sponsoring Organization: Rutgers University
Project Manager: Greg Blimling, Vice President
Period of Performance: Fall 2004
Value of Award: $20,000

The Eagleton Institute initiated and managed a project to register and educate Rutgers University students and get them out to vote. Helping to form and mobilize a non-partisan association of staff, faculty, and student groups, Eagleton assistant research professor Susan Sherr served as faculty advisor for a project led by a recent Rutgers graduate. The coalition collected approximately 11,000 registration forms for students registering for the first time, seeking absentee ballots or filing address changes. The group also sponsored a website providing information for student voters.

The election-day experience of this project is particularly relevant to this proposal to the EAC. While thousands of Rutgers students headed to the polls, apparently because of the huge influx of new voter registrations, many found their names had not been added to the rolls. While they were able to vote by provisional ballot, many found this frustrating and disappointing, and contacted Eagleton. Several Eagleton faculty and staff members spent much of election day in contact with area local election officials, reporters and students trying to determine exactly what the problem was and what solutions could be found quickly. The difficulty of making these determinations along with the wild rumors the problems generated were sobering and instructive for considering how to improve the use of provisional ballots in particular.

e) Public Interest Polling

Sponsoring Organization: NJ Motor Vehicles Commission
Project Manager: Sharon Harrington, Director
Period of Performance: 2003-2005
Value of Awards: $160,000

The fifth comparable project is the survey research work performed by the Eagleton Institute’s Center for Public Interest Polling, also known as the Eagleton Poll. Whether or not the EAC chooses to fund the optional polls described in this proposal, the work done by the Eagleton Poll is relevant both for helping the project team understand the value and limits of polling as a gauge of public opinion and because the prominence of the Poll has contributed to public knowledge and respect for the Institute as a whole.

The Eagleton Poll, established in 1971, was one of the first, and most respected academic-based state survey research organizations in the country. The Center engages with approximately 25 government or non-profit agencies each year to conduct polls and focus groups. One client has been the New Jersey Motor Vehicles Commission which has hired Eagleton twice over the last three years to conduct
customer satisfaction surveys. The current contract also calls for convening of focus
groups to probe issues more deeply and an assessment of Motor Vehicles employee
attitudes and impressions.

In addition, Eagleton collaborates with New Jersey's largest newspaper, The Star-
Ledger, to conduct the Star-Ledger/Eagleton-Rutgers Poll. Conducted five to six times a
year, this is the most prominent and oldest survey of public opinion in the states.
Attachment 5 – Risks re Provisional Voting

The research proposed to develop the guidance document for Provisional Voting involves a contentious political and policy debate, requires the use of a large mass of information to varying reliability, and requires aiming at a moving target because considerable action is underway across the country based on the experiences with the 2004 election. Each of these factors could undermine the credibility and utility of the work, but reasonable precautions can moderate that risk.

Polarized Political and Policy Debate
The debate over Provisional Voting has resulted in a clash over policy with a distinct partisan tinge. Republicans and Democrats are at odds over the proper role for Provisional Voting in the electoral system, election officials are exposed to a more stringent scrutiny that had been the norm, and the federal role in what had previously been a state and local responsibility is controversial in some quarters. All of these conditions make Provisional Voting a controversial topic and will put the analysis and recommendations of this project not just under a microscope but one illuminated by a harsh light.

The most effective way to moderate the risk that controversy could undermine credibility of the project is to turn to independent institutions with a strong reputation and the credentials that inspire confidence. We believe that the Eagleton Institute of Rutgers, The State University of New Jersey and the Moritz College of Law of the Ohio State University have that reputation and that their scholarly, policy-relevant work has created a reputation that inspires confidence.

Data Analysis
The volume and types of information related to Provisional Voting nationwide is staggering. Relying on narratives in the press or from the organizations that have sprung up in the last several years to monitor election reform is appropriate for much of the work proposed. But judging the validity and reliability of that information can frequently be problematic. Unreliable data will produce unreliable conclusions, which, in the present contentious political atmosphere, will quickly undermine the project.

This proposal addresses that problem by supplementing the available sources of data with survey research, the reliability and validity of which is measurable. The proposed survey of provisional voters would go beyond the anecdotal to provide statistically significant measures of their subjective experiences. The survey of local election officials would tap systematically their assessment of the clarity of the guidance they received in 2004 more reliable than the anecdotal reports frequently found in the existing literature.

The Moving Target
The states are not sitting back waiting for instructions on how to proceed in improving the process of Provisional Voting. This project to provide them guidance, which they may or not accept, is aimed at a moving target.
The best way to ensure the relevance of the guidance when published is to conduct the project in a way that provides information too good to ignore. The thorough nationwide search for best practices, clear-eyed analysis, independent review of the experience in 2004, and clear objectives will make the guidance document useful to all jurisdictions.
Attachment 6 – Risks re Voter Identification

The research proposed to develop the guidance document for Voter Identification Requirements and Procedures comes at a time of particularly sharp debate. That debate reveals a racial dimension as well as a partisan dimension, and it is taking place in state houses across the country. The vocabulary of the controversy is richer in invective and allegation than it is in information and analysis. As with the project on Provisional Voting, we are aiming at a moving target as the states grapple with how to modify their requirements for Voter Identification at a pace that may be faster than the schedule for publication of the Commission’s guidance on this topic.

Polarized Debate
The debate over Provisional Voting has resulted in a clash over policy with a distinct partisan tinge. Republicans tend to favor more demanding Voter Identification procedures to increase the security of the ballot. Democrats advocate for a more open system, fearing that stringent requirements would reduce the electoral participation of the poor, the elderly, African-Americans and immigrants, and other groups. Stepping into the middle of this conflict is inherently risky because motives and intentions will be called into question.

The most effective way to moderate the risk that controversy could undermine credibility of the project is to provide information that is not now found in the debate. The analysis of the effects of different Voter Identification regimes on voter participation will bring new information to the debate. If our intentions are realized—and they should be—the analysis will yield a clearer understanding of what tradeoffs may exist between various Voter Identification regimes. This kind of good data will not end the debate, but it should raise it to a higher level, and that would be no small achievement in this case. A higher level of debate will likely make the Commission’s guidance more influential.

Quality of the data
Raising the quality of the debate by providing information both sides can find useful carries its own risk. The time available for this work is limited. To fail to produce the information as needed in the workplan is real because the work is demanding. But we believe that careful management and the resources of the two institutions will make it possible to develop the analysis in time to be useful in shaping the guidance document.

The Moving Target
The states are moving ahead to change their Voter Identification Procedures. This project to provide them guidance, which they may or not accept, is aimed at a moving target.

As with the Provisional Voting Project, The best way to ensure the relevance of the guidance when published is to conduct the project in a way that provides information too good to ignore. The thorough nationwide search for best practices, clear-eyed analysis of the tradeoffs between Voter ID procedures, and clear objectives will make the guidance document useful across the country.
Attachment 7 – Five Top Reasons Eagleton/Moritz Is the best qualified candidate

1. This project involves subjects in sharp debate. The Eagleton Institute of Politics of Rutgers, the State University of New Jersey, and the Moritz College of Law of the Ohio State University are well-respected, independent academic institutions whose work will lend credibility to the research and the resulting Guidance Documents.

2. Eagleton and Moritz have an active and admirable record of involvement in election analysis, inter-governmental relations, election law and related topics. This experience not only enhances their reputations, it provides them with a rare, if not unique, perspective on the issues that will be apparent in the quality of the work produced.

3. The partnership in this project between an Institute of Politics and a College of Law will enrich the analysis. The synergies derived from focusing two different perspectives and ways of thinking on the issues will strengthen the conclusions. The guidance documents that result will rest on a platform both broad and strong.

4. The Peer Review Group created for this project in the proposal will enlarge even further the perspectives and experience focused on improving the process of Provisional Voting and assessing Voter Identification Requirements. The Peer Review Group's comments will strengthen the analysis so that it can survive the scrutiny it is sure to receive in the current, contentious climate.

5. Both Eagleton and Moritz have strong record of obtaining and analyzing information from governments and interest groups and involving them in the interpretation of the data. They are truly independent: neither is a vendor or contractor involved in elections. Their work will be—and will be seen to be—objective and thorough.
QUALIFICATIONS

Jeffrey Levine - Director of Eagleton's Center for Public Interest Polling

Levine has written extensively on political behavior. He is author or co-author of chapters in three forthcoming books: The Social Logic of Politics: Family, Friends, Neighbors, and Workmates as Contexts for Political Behavior (Alan Zuckerman, editor), The Behavioral Study of Political Ideology and Policy Formulation (Carl Grafton and Anne Permaloff, editors), and The Persistence of Political Disagreement among Citizens: How Disagreement Survives within Communication Networks (Robert Huckfeldt, Paul Johnson, and John Sprague, authors). Levine's research has also been published in a variety of academic journals, including Public Opinion Quarterly, American Political Science Review, and American Journal of Political Science. Currently, he is engaged in an ongoing research project that examines the incidence and nature of informal political debate and deliberation in the American electorate.

Before his appointment as Director of the Center for Public Interest Polling in 2004, Levine was Managing Director of a commercial research firm, where he directed hundreds of quantitative and qualitative research studies for a range of corporate, non-profit, and political clients. He has also provided public opinion analysis on MSNBC and the FOX News Channel.

Levine earned his B.A. in Political Science from University of Rochester and his M.A. and Ph.D. in Political Science from Indiana University.

DON LINKY - Director, Electronic Government Project

Linky is focusing on how electronic technology is affecting government, politics and public affairs. He also continues as president of the Public Affairs Research Institute of New Jersey, a corporate-supported nonprofit founded in 1930 that monitors New Jersey economic, demographic and fiscal trends, and as president of Joshua Communications, a for-profit publishing and information consulting firm.

During the administration of New Jersey Governor Brendan T. Byrne, Linky served as chief counsel to the governor and director of the Governor's office of policy and planning. He had key roles in the development of such programs as the Pinelands Protection Act, the Spill Compensation and Protection Act, the Community Development Bond Act, the Enterprise Zone program, and the creation of New Jersey Transit.

He is the editor or co-editor of the reference books The New Jersey Directory: The Insider Guide to New Jersey Leaders; The New Jersey Almanac; and The New Jersey Municipal Almanac, and serves on the editorial board of The New Jersey Encyclopedia. A native of Asbury Park, he now resides in Princeton.
Linky received a BA from Dartmouth College in 1968 and a JD from Harvard Law School in 1972. He also attended the London School of Economics and Political Science.

RUTH B. MANDEL - Director, Eagleton Institute of Politics, Rutgers University and Board of Governors Professor of Politics, Eagleton Institute of Politics, Rutgers University

From 1971 through 1994, Ruth B. Mandel directed Eagleton's Center for American Women and Politics (CAWP), where she remains affiliated as a Senior Scholar. Mandel teaches and writes about women and leadership, with emphasis on U.S. women's political history, women as political candidates and officeholders, women's political networks, and the "gender gap." She is the author of numerous publications about women's changing political roles. Recently, she headed an Eagleton team in developing the Young Elected Leaders Project, a new area of study focused on elected officials age thirty-five and under.

Mandel's public service includes a presidential appointment on the governing board of the U.S. Holocaust Memorial Museum in Washington, D.C. She has served as Vice Chairperson of the board since being named by President Bill Clinton in 1993 and reappointed by President George Bush in 2002. Mandel is a member of the Museum's Executive Committee, its Academic Committee, and chairs its Education Committee. She chaired the task group charged with proposing a governing structure for the new Museum. In the 1990's, she led the process to create the Museum's Committee on Conscience, which was established in 1996 with Mandel as its founding chair.

Professor Mandel is a member of the board of the Charles H. Revson Foundation. Her service has also included membership on the board of the National Council for Research on Women; the National Commission for the Renewal of American Democracy; Princeton University's Center for Jewish Life; the Mercer County Commission on the Status of Women; and various editorial boards for scholarly journals and academic publishers.

Awards include: Woodrow Wilson Public Service Award given in the Governor's Pride of New Jersey Awards (1992); Gloria Steinhem Women of Vision Award presented by the Ms. Foundation (1996); Twenty-First Century Leadership Award, presented by the President of the National Women's Hall of Fame; Breaking the Glass Ceiling Award from Women Executives in State Government (1998); honorary Doctor of Public Service degree from Chatham College (1998); Award for Distinguished Policy Leadership and Advancement of Women in Public Life from the Women Legislators and College Presidents of Maryland (2002); Salute to the Policy Makers award from Executive Women of New Jersey (2004).
As an observer and analyst of American politics and emerging trends in leadership, she lectures and speaks frequently to a wide range of community, civic and academic audiences.

Ruth B. Mandel holds a B.A. in English from Brooklyn College and an M.A. and Ph.D. in American Literature from the University of Connecticut.

THOMAS M. O'NEILL – Project Director

For the past 20 years, O'Neill served as President of The Partnership for New Jersey and led its Leadership New Jersey, diversity management and education improvement programs. Previously he was Executive Director of The Center for Analysis of Public Issues in Princeton, which, among other research, analyzed campaigns and elections. He served for several years as election night analyst for New Jersey Network Television and for WNET-Channel 13 in New York.

INGRID W. REED - Director, New Jersey Project, Eagleton Institute of Politics, Rutgers University

Ingrid W. Reed directs the Eagleton New Jersey Project, an initiative designed to reinforce and expand the contributions of Rutgers' Eagleton Institute of Politics to the governance and politics of its home state. Among its initiatives are programs on campaign and election activity, women and politics, welfare reform, and governance issues.

Recently Reed's work has focused on campaigns and elections from the point of view of the citizen. She is the co-author with Professor Gerald Pomper of a report with recommendations about the 1998 New Jersey Congressional Campaigns, Not Bad But Not Enough. She has conducted similar studies for the 2000 congressional campaigns, for the 2001 and 2003 for the New Jersey gubernatorial and legislative races, and 2002 U.S. Senate and House races. She is the author of The 2001 New Jersey Election, one of four reports prepared for The Century Foundation assessing the extent to which problems in the 2000 Florida election persisted in 2001. In March 2004, she presented a paper at Rutgers's Center for Government Services Policy Seminar Series on "Issues in Voter Participation: Do We Know What They Are? If We Know, What Can We Do About Them?" In partnership with Eagleton's Center for American Women and Politics, she organizes the Bi-Partisan Coalition for Women's Appointments. In 2001-2002, Reed was associate director for a pilot project funded by The Pew Charitable Trusts and the NJ Department of Community Affairs, conducted collaboratively with Syracuse University's Maxwell School for Citizenship and Public Administration, that resulted in a report, The New Jersey Initiative: Building Management Capacity in New Jersey Municipalities.

Before joining the Eagleton Institute, Reed served as assistant dean of Princeton University's Woodrow Wilson School of Public and International Affairs where she also
directed the Rockefeller Public Service Awards Program, and as vice president for public affairs and corporate secretary of The Rockefeller University in New York City.

Reed has written op-ed columns on politics for the Home News and Tribune (central New Jersey), The Times of Trenton, New Jersey Law Journal, the Philadelphia Inquirer and The Record; as well as authored pieces on public administration, urban redevelopment, welfare reform and municipal management. She is frequently interviewed for analyses of New Jersey politics by state, national and international media.

In her public service activities, Reed has a wide range of experiences in state politics and planning, governance and community affairs. She has chaired the Capital City (Trenton) Redevelopment Corporation, a state agency, since it began in 1988. She is a founder and board member of New Jersey Future, the organization advocating the implementation of the State Development and Redevelopment Act, and she was on the board of the New Jersey Conservation Foundation and is currently on the Regional Plan Association, New Jersey Committee. She was elected to the board of the Community Foundation of New Jersey in April 2000.

Reed is a member of the board of the Institute of Public Administration (NYC). In 1993, she was elected a fellow of the National Academy of Public Administration and served on its special panel on Civic Trust and Citizen Responsibility. From 1983 to 1986, she held a Kellogg Foundation National Leadership Fellowship.

She is a Phi Beta Kappa graduate of the University of Pennsylvania.

JOHN WEINGART - Associate Director, Eagleton Institute of Politics, Rutgers University

John Weingart is the associate director of the Eagleton Institute of Politics at Rutgers University. He also chairs two state commissions: the Highlands Water Protection and Planning Council and the Delaware and Raritan Canal Commission.

John’s publications include the Eagleton Institute study, “Another Government Success Story: Citizen Volunteers on New Jersey State Boards and Commissions” (2004); Waste Is A Terrible Thing To Mind: Risk, Radiation, and Distrust of Government (described at www.WastelsATerribleThingToMind.com), and Reform of Undergraduate Education (written with Arthur E. Levine) which was named “Book Of The Year” by the American Council on Education.

Before coming to Eagleton, John served in New Jersey state government for 23 years during the administrations of two Democratic and two Republican governors. He worked at the New Jersey Department of Environmental Protection from 1975 to 1994 where his posts included director of the Division of Coastal Resources and Assistant
Commissioner for Environmental Regulation. He then spent four years as Executive Director of the state's Low-Level Radioactive Waste Disposal Facility Siting Board.

John holds a B.A. in Sociology from Brandeis University and a Master's in Public Affairs from Princeton University's Woodrow Wilson School.
EDUCATION
B.A. 1960, Brooklyn College, English; Ph.D. 1969, M.A. 1962, University of Connecticut, English/American Literature

PROFESSIONAL EXPERIENCE
Board of Governors Professor of Politics, Rutgers University, since 1994
Professor, Eagleton Institute of Politics, Rutgers University, 1985-94; Associate Professor, 1978-85; Assistant Professor, 1971-78
Director, Eagleton Institute of Politics, Rutgers University, since January 1995

Established in 1956, the Eagleton Institute of Politics at Rutgers University explores state and national politics through research, education, and public service activities, linking the study of politics with its day-to-day practice. Eagleton offers graduate fellowship programs and an undergraduate certificate program for Rutgers students. The Institute's faculty and programs specialize in the study of: state legislatures; public opinion polling and survey research; women's participation in politics; minority and immigrant political participation; campaigns, elections and political parties; civic education and engagement; electronic democracy; and New Jersey politics.

Director, Center for American Women and Politics (CAWP), a unit of the Eagleton Institute of Politics, 1971-95

Built a research, education, and public service program to promote greater understanding of women's relationship to politics and government and to develop a body of knowledge about women's public leadership. Co-Director of CAWP, 1971-73; Educational Coordinator, 1971. CAWP was established in 1971.

Senior Scholar, CAWP, since 1995
Affiliated Faculty, Department of American Studies, since 2002
Affiliated Faculty, Department of Women's and Gender Studies, since 2001
Fellow, Douglass College, Rutgers University, since 1982
Member, Faculty of Arts and Sciences, Rutgers University, since 1981
Visiting Assistant Professor, Department of English, Rider College, 1970-71
Lecturer, Department of English, University of Pittsburgh, 1968-70
Part-time Instructor, Department of English, University of Connecticut, 1960-66

Teaching at Rutgers
Department of Political Science: Women and Political Leadership (graduate); Bagleton Seminar in American Politics (graduate); Women and American Politics (undergraduate); Becoming A Public Citizen (undergraduate)
Department of Women’s and Gender Studies: Leadership Scholar's Seminar (undergraduate)
Department of English: Autobiographies of American Women; Women and Contemporary Problems; Women in Modern America and England; Politics and Fiction

*Voices, Views, Votes: The Impact of Women in the 103rd Congress*, with D. Dodson, S.J. Carroll, K.E. Kleeman, R. Schreiber and D. Liebowitz, monograph report from a research project (New Brunswick, NJ: Rutgers University, Eagleton Institute of Politics, 1995).

Magazines and Other Writing

"Old Myths Are Finally Getting Buried this Year," Guest Column, USA Today, September 22, 1986.

SELECTED PROFESSIONAL ACTIVITIES
Grants (since 2000)
Principal Investigator with Debbie Walsh and Susan Sherr, The Pew Charitable Trusts (2001-2004), Young Elected Leaders Project ($211,000).

Co-Principal Investigator with Mary S. Hartman and Marianne Gaunt, SROA grant (2000-2001), Women in Leadership Multimedia Oral History Project ($25,000).

Co-Principal Investigator with Tobi Walker, The Dodge Foundation (2000), New Jersey Civic Education Consortium ($75,000).

The Center for American Women and Politics was established in 1971 with $50,000 from the Ford Foundation. Since that time, CAWP has raised funds from foundations, corporations and government. Selected grants during (or resulting from) my tenure as CAWP's director include:

Charles H. Revson Foundation (1993-1995) for study of the impact of women in Congress; an assessment of research about women in office; and expansion of a database about elected women ($458,000)

Charles H. Revson Foundation (1987-1991) for study of the impact of women in public office ($450,000)

Charles H. Revson Foundation (1980-1985) for study of the routes women take to elective and appointive offices ($220,000)

W.K. Kellogg Foundation (1990-1994) public leadership education for college-age women ($962,000)

Ford Foundation (1997) for Good Housekeeping Award for Women in Government ($326,000)

Ford Foundation (1996) for a study of women in the 104th Congress ($75,000)

Ford Foundation (1993-94) for a conference to develop a research agenda for the study of women and American politics into the 21st century ($75,000)

Ford Foundation (1991) for assessing the feasibility of developing a women officials' policy network ($55,000)

Ford Foundation (1989) for research about the abortion issue's impact on elections ($35,000)
Ford Foundation (1989) for meeting of representatives of national organizations of women officials ($39,000)

Ford Foundation (1971-80) for general support and for two research grants programs: to study women's voluntary activities; and to study women and local government

Carnegie Corporation of New York (1981-88) for program for women state legislators ($447,000)

Carnegie Corporation of New York (1978-84) for developing a public leadership education network of women's colleges ($72,000)

Carnegie Corporation of New York (1975) for study of women's campaigns ($38,000)

Carnegie Corporation of New York (1972) for a conference and study of women state legislators ($86,000)

American Express Foundation (1983-1993) for program for women state legislators ($139,408)

Robert Wood Johnson Foundation (1991) for program for women state legislators ($19,800)

Rockefeller Foundation (1989) for research about the abortion issue's impact on elections ($35,000)

Robert Sterling Clark Foundation (1989, 1992) for research about the abortion issue's impact on elections ($75,000)

The Huber Foundation (1989, 1990, 1992) for research about the abortion issue's impact on elections ($70,000)

John Merck Fund (1989-92) for research about the abortion issue's impact on elections ($125,990)

South Branch Foundation (1989) for research about the abortion issue's impact on elections ($20,000)

777 Women Fund/Tides Foundation (1992) for research about the abortion issue's impact on elections ($20,000)

Helena Rubinstein Foundation (1981-84) for data bank on women in public office
Mobil Foundation, Inc. (1971, 1975, 1976, 1978) for general support

Prudential Foundation (1972-1993) for general support and research

Mary Reynolds Babcock Foundation, Inc. (1973) for research grants program

US Department of Housing and Urban Development, Office of Policy Development and Research (1978-81) for research on women in public service ($440,000)

US Office of Personnel Management (1979) for evaluation research ($15,000)

National Institute of Education (1977) for research about school boards ($44,948)

Chase Manhattan Bank (1973) for developing a model education program

Research

2001-2004: a national study of young elected officials (age 35 and under) serving at federal, state, county and municipal levels, which includes developing a national data base, conducting an on-line and mail survey of officeholders, and convening a conference to extend and deepen survey findings. The study has resulted in a report and analysis summarizing demographic characteristics, backgrounds, attitudes, ideology and ambitions of the population of young elected leaders holding office at the beginning of the new century.

Since 2000: a multi-year study of U.S. women's leadership in collaboration with Professor Mary Hartman. The project currently involves a series of videotaped interviews with women who contributed in significant ways, primarily on the national level, during the last quarter of the 20th century to the social change movement that reshaped women's roles, status, aspirations and opportunities in the United States.

1996-97: study comparing the impact of women serving in the 104th Congress with that of women in the 103rd Congress

1993-95: study of the impact of women serving in the 103rd Congress

1993-95: assessment of the findings of two decades of research about women in public office, and development of an agenda to guide future research on women and politics

1989, 90, 92: studies of the politics of the abortion issue in campaigns for state and national offices

1987-91: first national study of the impact of women in public office based on nationally representative samples of women and men elected to state legislatures

1987-91: designed grants program and awarded stipends for eleven small-scale studies examining the impact of women serving in different types and levels of public office

1981-83: national survey comparing women and men in elected office, focusing on the factors which facilitate and impede women's entry into public office

1981-83: first study of women appointed to high-level positions in a presidential administration

1981-83: first nationwide study of women appointed to high-level positions in state cabinets
1978-80: study of women in municipal management

1978-80: study of the development of organizations of women public officials

1977-79: study of women on school boards

1977-78: second national survey of women officeholders, collecting and analyzing data about women's social backgrounds, political experiences, organizational ties, perceptions and policy attitudes

1976: study of proportions of women serving on state boards and commissions in 39 states

1976: study of the campaign experiences of female candidates for elective office

1976: designed grants program and awarded stipends to six scholars for studies of women and local government

1975-76: first ever national survey of women serving in elective office at local, county, state and federal levels

1974: developed grants program and awarded stipends to six scholars for study of the nature and political impact of women's voluntary activities

Data Bank on Candidates and Officeholders
Since 1975 CAWP has developed a computerized database on women in elective office at municipal, county, state legislative, statewide and federal levels. The Center also regularly collects pre- and post-election data on female candidates in congressional, statewide and state legislative races. The data bank serves a variety of constituencies (from students and scholars to activists and journalists) as a national resource for current and historical information about women in politics.

Program for Women State Legislators
1995, 1991, 1987, 1983: Planned and organized the National Forum for Women State Legislators, the largest meetings of elected women ever convened. Held in San Diego, California, each Forum has attracted close to 1000 participants, including hundreds of legislators, as well as scholars, issues experts, organization leaders, political party officials, and journalists. The agenda has focused on several themes emerging from CAWP's studies of women legislators and from various related research and education programs:

(1) the impact of elected women on public policy, and the ways in which female officials may respond differently from men to policy issues;
(2) the barriers and opportunities for increasing the numbers and influence of women in public office, particularly in state legislatures;
(3) the movement of women into positions of legislative leadership.

1990: Co-convened a midwest regional seminar for women state legislators with the Institute for Policy Leadership at the University of Missouri — St. Louis.

1989: Convened a national educational forum for newly elected women state legislators, with veteran women lawmakers serving as core faculty.

1985: Convened a national Conference for Women in Legislative Leadership to explore ways in which women in leadership affect the legislative institution and the public policy agenda.

1982: Convened the Conference for Women State Legislators to examine and assess the prospects for women as elected lawmakers and the progress which had been made since CAWP's first Conference for Women State Legislators held ten years earlier (Pocono conference, May 1972).

National Education for Women's Leadership (NEW Leadership)
Conceived and developed a national program of summer institutes to teach college women leadership theory and skills as well as women's political history. Initially funded by the W.K. Kellogg Foundation, the program became a model for subsequent regional CAWP programs in New Jersey, the South, the Midwest, and later throughout the country at colleges and universities that became part of CAWP's NEW Leadership Development Network.

Public Leadership Education Network (PLEN)
A founder of the Public Leadership Education Network (1978). PLEN is a consortium of eighteen women's colleges working to educate their students about women in policymaking and
public leadership. PLEN maintains a national office in Washington, DC. CAWP has been a consulting organization to PLEN.

Documentary Film
Executive Producer of a one-hour documentary film examining the progress made by women and the obstacles they encountered during more than a decade of increasing involvement in political life. Entitled Not One of the Boys, the film aired nationally on Frontline (PBS), October 1984.

Editing
Oversaw the publication of books, monographs, and reports resulting from studies and related projects conducted by the Center for American Women and Politics (CAWP) and issued by commercial publishers or through the Eagleton Institute of Politics at Rutgers University. These include publications about: the backgrounds, issue orientations, political experience, ambitions and impact of women and men in public office; the networks and organizations of political women which have developed across the country since the mid-1970s; women in public management positions in urban government; women in state legislatures; studies of the barriers facing male and female office seekers and the routes they have taken to elected and appointed positions; studies of the impact of women in public office.

General Editor (with Professor Rita Mae Kelly), Praeger series of scholarly books by political scientists in the field of women and politics (1982-1987).
Manuscript Reviewer/Advisor for Have You Considered Government and Politics? (Career Options Series for Undergraduate Women) and Government and Politics (Career Opportunities Series for Post-College Women). New York: Catalyst, 1976.

Media
Interviewed and quoted regularly in major newspapers, wire service stories, popular magazines and news magazines. Press conferences and scores of interview and call-in programs for national and local television and radio. Selected television appearances include: Washington Journal, C-Span; Lehrer News Hour, PBS; Nightline, ABC-TV; Charlie Rose, PBS; CBS Evening News; Nightly Business Report, PBS; Sonya Live, CNN; Good Morning America, ABC-TV; Today, NBC-TV; Not for Women Only, WNBC-TV; In Your Corner, New Jersey Network; Take Two, Cable News Network; Straight Talk, WOR-TV; Caucus New Jersey, WNET, New York public television; Word and Out, Philadelphia TV; Today in New York, WNBC-TV; New Jersey Nightly News; Bloomberg Television; Rutgers Forum; News 12 New Jersey. National radio interviews and commentary include: NPR’s Talk of the Nation, All Things Considered, Morning Edition, and Radio Times.

Speaker, National Order of Women Legislators, Annual Meeting, Mackinac Island, Michigan, August 1991.

Speaker, "It's Better to be Present: Women in Leadership," Conference on A New Decade of Leadership: Women State Legislators, CAWP and Institute for Policy Leadership, University of Missouri-St. Louis, November 1990.

Keynote Speaker, Minnesota Women's Political Assembly, Minneapolis, MN, January 1987.

Experience

2005
Thomas O'Neill Consultant
Pennington, New Jersey

Consultant
Founded new consulting practice in public policy, organizational and leadership development. Initial clients include Rutgers University and Volunteers of America/Delaware Valley

1984–2005
The Partnership for New Jersey
New Brunswick, New Jersey

President
- Founded and led association of corporate and non-profit CEOs dedicated to making New Jersey a better place to live and work. Responsible for raising annual budget of $500,000 – $750,000 and funds for restricted programs
- Developed and led leadership development programs (Leadership New Jersey, Leadership Newark, Leadership Trenton) that has created a statewide network of civic leaders of more than 1,000 outstanding men and women.
- Created and led educational improvement initiatives including the Invest in Children Coalition that expanded preschool programs, NetDay that wired 10,000 classrooms across the state for Internet connections, Institute for School Innovation that developed and advocated measures to improve the efficiency of public schools.
- Organized and led diversity initiatives that doubled the number of corporations with formal diversity programs. Managed The Governor's Leadership Summit on Diversity to demonstrate the value of the state's increasing diversity and recommend programs to increase that value. Designed and managed first statewide survey of public attitudes on race and inter-group relations.

1977–1984
Center for Analysis of Public Issues
Princeton, New Jersey

President
- Led major studies on campaign finance, lobbying disclosure, foster care, government integrity, and related topics. Wrote or edited reports on these studies.
- Founded and edited award-winning magazine analyzing public policy and politics, New Jersey Reporter. Created and published annual New Jersey Political Almanac.
- Commentator and election analyst for NJ Public Television and hosted weekly public affairs program on WNET-Channel 13.
1975–1977  
Center for Environmental Studies  
Princeton University  

Research Staff and Lecturer
- Member of research team on energy policy, environmental management and land use controls.
- Developed and taught upper level course, "Environmental Policy Making," Engineering 303.

1970–1975  
Department of Environmental Protection  
Trenton, New Jersey  

Chief of Staff
- Member of the Commissioner’s staff responsible for the organization of this new department of state government, for legislative initiatives, program review and assessment, and direction of review of major proposed projects.
- Director of the Division of Marine Resources, first administrator of new coastal land use controls and responsible for the NJ Marine Police, wetlands regulation, and control of ocean dumping.
- Director, Governor’s Task Force on Energy. Led emergency task force to respond to the 1973 oil embargo and craft a plan to improve the state’s capacity to conserve energy and regulate supply.
- Executive Director, Governor’s Advisory Council on the Future of New Jersey. Formed and led panel to assess trends shaping New Jersey’s economy and environment and develop a strategy for shaping land use controls to assure a high quality of life.

Education
- Wesleyan University, BA with Honors in Government, 1968
- Princeton University, Woodrow Wilson School of Public and International Affairs, Masters program in Public Affairs, 1968–1970

Military Service
U. S. Army Intelligence Corps, Berlin Station, 1962–1965

Civic Activities
Director, Merrill Lynch Bank & Trust, 1993–present
- Trustee, Citizens for the Public Good 2001–present
- Founding Trustee, New Jersey Future, 1984–present
- American Littoral Society, Trustee, 2003–present
- Trustee, Thomas Edison State College, 1998–2004
- Founding Chair, NJ Institute for School Innovation, 1999–2001
- Founding Chair, Early Childhood Facilities Fund, 1996–1999
- Trustee, Regional Planning Partnership, 1976–2001
- Chair and Trustee, Center for Analysis of Public Issues, 1984–2001
- Member, Pennington Borough Council, 1976–1979
CURRENT EMPLOYMENT:

Associate Director
EAGLETON INSTITUTE OF POLITICS
RUTGERS UNIVERSITY
New Brunswick, NJ (February 2000 to present)

CURRENT ACTIVITIES:

Chairman
NEW JERSEY HIGHLANDS WATER PROTECTION AND PLANNING
Appointed by Governor and confirmed by State Senate to 5-year term

Chairman
DELAWARE AND RARITAN CANAL COMMISSION
Appointed by Governor and confirmed by State Senate to second 5-year term

Producer and Host
Music You Can't Hear On The Radio
Weekly radio program of folk music and bluegrass on WPRB-FM and WPRB.com, Princeton, NJ

PAST EMPLOYMENT:

Senior Fellow
CENTER FOR ANALYSIS OF PUBLIC ISSUES
Princeton, NJ (September 1998 to February 2000)

Wrote a book analyzing New Jersey's attempt to encourage municipalities to volunteer to host a disposal facility for low-level radioactive waste, viewing this program as a lens through which to examine risk communication, community involvement in decision-making and state government. Secured funding from the U.S. Department of Energy. Published in 2001.

Executive Director
NJ LOW-LEVEL RADIOACTIVE WASTE DISPOSAL FACILITY SITING BOARD
Trenton, NJ (September 1994-July 1998)

Directed an innovative effort to encourage New Jersey municipalities to consider volunteering to host a disposal facility for low-level radioactive waste. Included communicating about risk and science, confronting public distrust of government, and fostering effective community processes for decision-making. Managed a staff of seven with an annual budget of $1 million, and reported to an 11-member board.
Assistant Commissioner for Environmental Regulation  
NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION  

Directed most of the Department's planning and permitting programs for both land use and industrial facilities. Managed a staff of 650 with an annual budget of $11 million in federal and state funds. Worked with the Legislature, local governments, permit applicants and citizen groups, with the goal of developing mechanisms to improve planning and regulatory programs and link them together for more comprehensive environmental protection and greater common sense and efficiency.

Director, Division of Coastal Resources  
NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION  

Administered a State agency with a staff of 300 and budget of $5 million responsible for land use planning and regulation along New Jersey's ocean shore and urban waterfronts, and in flood plains and wetlands. Had lead responsibility for federal Coastal Zone Management grant. Also, responsible for capital projects for shore protection, dredging and flood control.

Various staff positions  
NEW JERSEY DEPARTMENT OF ENVIRONMENTAL PROTECTION  
Trenton, NJ (1975-1982)

Joined DEP in 1975 as Public Participation Coordinator for the Office of Coastal Zone Management; then served as Assistant Chief of the Office, Chief of the Bureau of Coastal Planning and Development, and Deputy Director, all within the Division of Coastal Resources.

Also, served as Staff Director for the Governor's Hudson Waterfront Study, Planning and Development Commission from 1979 to 1981. Initiated and fostered the planning and development of the Hudson River Walkway to increase public access and urban revitalization.

Project Co-Director  
UNDERGRADUATE CURRICULUM EVALUATION  
Waltham, MA (1970-1973)

Co-designed and directed a study evaluating the implementation of curricular reforms at 26 colleges. Received funding from private foundations and the U.S. Office of Education. Study resulted in the two books listed below.
OTHER ACTIVITIES:

Board Member, Delaware River Mill Society, 1996 to present.
(Vice-President from 1999 to 2002).

Board Member, Hudson Waterfront Conservancy, 1999-present.

Visiting Associate, Eagleton Institute, Rutgers University, 1999-2000.

Board Member, Regional Planning Partnership, 1999-2004.

Member, NJ Alzheimer's Association Public Policy Committee, 1999-2000.

Elected Member, Delaware Township School Board, 1996-1999.

EDUCATION:

Graduate of Leadership New Jersey Program;

Masters in Public Affairs, Woodrow Wilson School of Public and
International Affairs, Princeton University, Princeton, NJ (1975).

Bachelor of Arts, Brandeis University; Waltham, MA (1970);
major in sociology; President of the Student Body.

Donald Linky  
Director, Electronic Government Project  
Eagleton Institute of Politics, Rutgers, the State University of New Jersey

Don Linky is director of the Electronic Government Project at the Eagleton Institute of Politics at Rutgers, the State University of New Jersey. He also coordinates the Rutgers Ethics Initiative, a joint project of the Eagleton Institute and the Prudential Business Ethics Center at the Rutgers Business School.

He also continues as president of Joshua Communications, Inc., a publishing and information services firm in Princeton, and edits reference books published by Joshua, including The New Jersey Directory: The Insider Guide to New Jersey Leaders; The New Jersey Almanac; and New Jersey Fast Facts. He is a former president of the Public Affairs Research Institute of New Jersey, a corporate-supported nonprofit founded in 1930 that monitored New Jersey economic, demographic and fiscal trends.

During the Administration of New Jersey Governor Brendan T. Byrne, Don served as chief counsel to the governor and director of the governor’s office of policy and planning. He had key roles in the development of such programs as the Spill Compensation and Protection Act, which served as the model for the federal Superfund program, the Pinelands Protection Act, the Community Development Bond Act, the Urban Enterprise Zone program, the creation of New Jersey Transit and school finance reform.

He has been the editor of The New Jersey Municipal Almanac, and served on the editorial board of The New Jersey Encyclopedia. He also has been a monthly columnist for the magazines New Jersey Reporter, New Jersey Business and the Business Journal of New Jersey. He has served as a member of the governing boards of New Jersey Future, the Council of State Planning Agencies, Directory Publishers Forum North America and other organizations.

Don is a graduate of Harvard Law School and Dartmouth College, and attended the London School of Economics and Political Science. A native of Asbury Park, he now resides in Princeton.

Mr. Ralph Neas
President
People for the American Way
2000 M Street, NW
Suite 400
Washington, DC 20036

Dear Mr. Neas:

Thank you for your Freedom of Information Act (FOIA) request regarding the U.S. Election Assistance Commission’s research on voter fraud and intimidation. The document you requested on voter fraud and intimidation is protected from release under FOIA. Specifically, the responsive information is protected by the Deliberative Process Privilege and exempted from release under 5 U.S.C. §552(b)(5). As you may know, the Deliberative Process Privilege protects intra-agency documents that are (1) predecisional in nature and (2) part of the deliberative process. In other words, the documents must be part of a process that recommends or presents opinions on a policy matter before that matter is adopted. Such documents are exempt from release (1) to encourage open and frank discussions on policy matters between agency subordinates and superiors; (2) to protect against premature disclosure of proposed policies; and (3) to protect against public confusion that might result from disclosure of rationales that were not in fact the ultimate basis for agency action.

The report you have requested is an intra-agency document that is not yet complete and has not been reviewed and approved by the Commissioners (the relevant policy makers). An initial draft of the document was created by two contract employees with the support of EAC staff. The contract employees were hired pursuant EAC’s authority to hire consultants and experts under 5 U.S.C. §3109 (See 42 U.S.C. §15324(b)). Individuals hired under this authority enter into an employment relationship with the EAC. The contract employees at issue were closely supervised by an EAC program director who participated directly in the project. For example, the supervisor approved, facilitated, scheduled and participated in interviews conducted for the project. Further, the contract employees were provided research materials and other support from EAC law clerks and staff. Communications with contract employees are intra-agency communications for the purposes of FOIA.¹ Work continues to proceed on the draft.

Similarly, the document you have requested constitutes a recommendation on a policy matter. The purpose or subject of the draft report at issue is to make an EAC determination on how voter fraud should be studied by the Agency. This is to be done by (1) assessing the nature and quality of information that presently exists on the subject matter; (2) defining the terms and scope of EAC study as proposed under HAVA; (3) determining what is to be studied; and (4) determining how it is to be studied. Clearly, EAC’s interpretation of HAVA and its determination of what it will study and how it will use its resources are matters of Agency policy. This policy can only be made by the EAC’s duly appointed Commissioners. This has not yet been done. Thus, any draft created by staff is a proposal or recommendation on a policy matter and clearly both predecisional and deliberative.

For these reasons, the draft document you have requested is exempt from release. We expect the report to be made final and approved by the Commission in December. It will be made public at that time. Upon its release you may obtain a copy of it at www.eac.gov.

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Jeannie Layson
Director of Communications
U.S. Election Assistance Commission

Re: FOIA Request

Dear Ms. Layson:

In accordance with the Freedom of Information Act, 5 U.S.C. § 552, I am writing on behalf of People For the American Way to request a copy of a study concerning voter fraud conducted by Tova Wang and Job Serebrov and presented to the EAC in report form sometime subsequent to May 2006.

As you may know, I wrote to the EAC on October 18, 2006 on behalf of People For the American Way Foundation, asking for a copy of the report of this study. On October 19, I received a letter from Paul S. DeGregorio, Chair of the EAC, denying the request. (A copy of Mr. DeGregorio’s letter is attached.) According to Mr. DeGregorio, the report was a “draft” and would not be released. However, as even Mr. DeGregorio’s letter underscores, the report we are seeking is not a “draft” but rather the authors’ report of their study of voter fraud. That the Commission may, in the words of Mr. DeGregorio, “release a final report from this study” does not make the study itself a draft. In any event, the Commission should not, and in our view cannot, withhold from public disclosure this important study, which was funded by federal taxpayers.

In accordance with FOIA, I would appreciate your furnishing the requested report to us at your earliest convenience, and no later than 20 working days from today. If you deny this request in whole or in part, please cite the specific exemption(s) that you maintain allows the Commission to withhold the release of this report in whole or in part, and, as also required by law, please release any segregable portion of the report that remains after the exempted material has been deleted. We are willing to pay the statutory fee for the copying of this report.
Please do not hesitate to call our Deputy Legal Director, Judith E. Schaeffer, if you have any questions about this request. Thank you in advance for your assistance and cooperation.

Sincerely,

Ralph G. Neas
President

RE: October 18, 2006 Letter

Dear Mr. Neas:

Your letter of October 18, 2006 requests the release of EAC’s Voter Fraud and Intimidation Report. I would like to take this opportunity to clarify the purpose and status of this study.

In late 2005, EAC hired two consultants for the purpose of assisting EAC with two things: 1) developing a uniform definition of the phrase voter fraud, and 2) making recommendations on how to further study the existence, prosecution, and means of deterring such voter fraud. In May 2006, a status report on this study was given to the EAC Standards Board and EAC Board of Advisors during their public meetings. During the same week, a working group convened to react to and provide comment on the progress and potential conclusions that could be reached from the work of the two consultants.

The conversation at the working group meeting was lively on the very points that we were trying to accomplish as a part of this study, namely what is voter fraud and how do we pursue studying it. Many of the proposed conclusions that were suggested by the consultants were challenged by the working group members. As such, the consultants were tasked with reviewing the concerns expressed at the working group meeting, conducting additional research as necessary, and providing a draft report to EAC that took into account the working group’s concerns and issues.

That draft report is currently being vetted by EAC staff. EAC will release a final report from this study after it has conducted a review of the draft provided by the consultants. However, it is important to remember the purpose of this study — finding a uniform definition of voter fraud and making recommendations on how to study the existence, prosecution and deterrence of voter fraud — as it will serve as the basis of the EAC report on this study.

Thank you for your letter. You can be assured that as soon as a final report on the fraud and intimidation study is available, a copy will be made available to the public.

Sincerely,
Paul S. DeGregorio
Chairman
