Legislation passed during the 2003 and 2004 sessions also required all 67 county supervisors of elections to file “a detailed description of the voter-education programs” in order to receive state funds in FY 2003-2004 and FY 2004-2005. The legislation spells out four broad categories of voter education for which these funds may be used: mailing or publishing sample ballots; conducting activities described in the Standards for Nonpartisan Voter Education provided in Rule 1S-2.0333, F.A.C.; for print, radio, or television advertising to voters; and for other innovative voter education programs, as approved by the Department of State. An analysis of the FY 2003-2004 county plans shows that most are using their funds for a variety of activities:

- Sample Ballots: 91%
- Nonpartisan Voter Education: 82%

020828
County voter education plans filed with the Division of Elections in the Secretary of State’s office are filled with creative approaches. These outreach mechanisms are designed by the elections supervisors to:

(1) Better inform their county’s residents about registration and voting; and,
(2) Reduce the levels of voter error and confusion that existed during the 2000 election cycle.

The approaches used by the 67 individual counties vary considerably, reflecting differences in their demographic and socioeconomic composition (e.g., population size, land area, rural-urban location, age, race/ethnicity, education), county funding levels, and media availability.

For example, small counties (under 100,000) are more likely than larger ones to use their FY 2003-2004 voter education funds for the basics—printing and mailing sample ballots, mailing voter guides, and notifying voters of changes in precinct locations. Larger counties (100,000+) are more likely than smaller ones to spend their funds on radio and television advertising, supervisor participation in media programs and events, targeting college students, voter registration workshops, demonstrating voting equipment, and innovative programs.

Significant changes to Florida’s election laws and the advent of new voting equipment have made poll worker education a high priority—as recognized in the Florida Election Reform Act of 2001. Florida’s counties have restructured their poll worker training programs. State law now requires supervisors of elections to cast their poll worker recruitment nets wider, as the number of poll workers needed escalates in a fast-growing state.

**Section 254(a)(3). How will the State of Florida provide for programs for voter education which will assist the State in meeting the requirements of Title III?**

**Joint Responsibilities of Department of State and County Supervisors of Elections**

Voter education in Florida is a joint responsibility of the Department of State and the 67 county supervisors of elections. Both levels of government play a role in designing, implementing, and evaluating voter education activities. Both must constantly react to election-related legislation passed by the Florida Legislature.
Section 98.255(1), *Florida Statutes*, directed the Department of State to “adopt rules prescribing minimum standards for nonpartisan voter education” by March 1, 2002. The standards were to address (but were not limited to):

(1) voter education;
(2) balloting procedures for absentee and polling place;
(3) voter rights and responsibilities;
(4) distribution of sample ballots; and,
(5) public service announcements.

In developing the rules, the Department was instructed to “review current voter education programs within each county of the state.” The Department of State adopted Rule 1S-2.033, *F.A.C.*, Standards for Nonpartisan Voter Education on May 30, 2002.

Section 98.255(2), *Florida Statutes*, requires each supervisor of elections to “implement the minimum voter education standards” and “to conduct additional nonpartisan education efforts as necessary to ensure that voters have a working knowledge of the voting process.”

**Minimum Nonpartisan Voter Education Standards**
The Department of State’s “Standards for Nonpartisan Voter Education,” Rule 1S-2.033, *F.A.C.*, requires the following voter education practices by county supervisors of elections:

**Comprehensive Voter Guide: Contents**
Department of State Rule 1S-2.033, *F.A.C.*, Standards for Nonpartisan Voter Education, requires supervisors of elections to create a Voter Guide which shall include: how to register to vote; where voter registration applications are available; how to register by mail; dates for upcoming elections; registration deadlines for the next primary and general election; how voters should update their voter registration information such as changes in name, address or party affiliation; information on how to obtain, vote and return an absentee ballot; voters’ rights and responsibilities pursuant to Section 101.031, *Florida Statutes*; polling information including what times the polls are open, what to bring to the polls, list of acceptable IDs, what to expect at the polls; instructions on the county’s particular voting system; supervisor contact information; and any other information the supervisor deems important.

**Voter Guide: Extensive Distribution**
Department of State Rule 1S-2.033(1)(b), *F.A.C.*, requires supervisors of elections to “provide the Voter Guide at as many places as possible within the county including: agencies designated as voter registration sites pursuant to the National Voter Registration Act; the supervisor’s office; public libraries; community centers; post offices; centers for independent living; county governmental offices; and at all registration drives conducted by the supervisor of elections.”

020830
Voter Guide, Sample Ballot, & Website Consistency Required
Department of State Rule 1S-2.033(2), F.A.C., states that: “If a supervisor has a website, it must take into account all of the information that is required to be included in the Voter Guide. In addition, when a sample ballot is available, the website must provide either information on how to obtain a sample ballot or a direct hyperlink to a sample ballot.”

Targeted Voter Education: High School Students
Florida’s Department of State Rule 1S-2.033(3), F.A.C., instructs the supervisors of elections to work with county school boards to develop voter education and registration programs for high school students. Specifically, the rule requires that “At least once a year in each public high school in the county, the supervisor shall conduct a high school voter registration/education program. The program must be developed in cooperation with the local school board and be designed for maximum effectiveness in reaching and educating high school students.”

Targeted Voter Education: College Students
Florida’s Department of State Rule 1S-2.033(4), F.A.C., dictates that “At least once a year on each college campus in the county, the supervisor shall provide a college registration/education program. This program must be designed for maximum effectiveness in reaching and educating college students.”

Targeted Voter Education: Senior Citizens and Minority Groups
Department of State Rule 1S-2.033(7), F.A.C., requires supervisors of elections to “conduct demonstrations of the county’s voting equipment in community centers, senior citizen residences, and to various community groups, including minority groups.” Rule 1S-2.033(8), F.A.C., specifically instructs the supervisors to use minority media outlets to provide more information to voters.

Targeted Voter Education: Individuals and Groups Sponsoring Voter Registration Drives
Department of State Rule 1S-2.033(6), F.A.C., specifically instructs supervisors of elections to “provide, upon reasonable request and notice, voter registration workshops for individuals and organizations sponsoring voter registration drives.” Section 98.015(9), Florida Statutes, states that “each supervisor must make training in the proper implementation of voter registration procedures available to any individual, group, center for independent living, or public library in the supervisor’s county.”

Posting of Educational Materials on Voter Rights and Responsibilities
Department of State Rule 1S-2.033(5), F.A.C., requires supervisors of elections to “post the listing of the voters’ rights and responsibilities pursuant to Section 101.031, Florida Statutes, at the supervisor’s office.” Section 101.031(2), Florida Statutes, spells out the specific format of the Voter’s Bill of Rights and Responsibilities to be posted by the supervisor of elections at each polling place. The Department of State, or in the case of municipal elections, the governing body of the municipality, is required “to print, in large type on cards, instructions for electors to use in voting,” including the list of rights and responsibilities and other information about how to
vote deemed necessary by the Department of State—Section 101.031(1), *Florida Statutes*. At least two cards shall be provided to each precinct.

Educating Voters About Polling Place and Precinct Changes, Revised Voter Identification Cards

Department of State Rule 1S-2.033, *F.A.C.*, mandates that supervisors of elections “shall provide notice of changes of polling places and precincts to all affected registered voters. This notice shall include publication in a newspaper of general circulation as well as posting the changes in at least ten conspicuous places in the county. If the supervisor has a website, the supervisor shall post the changes on the website. The supervisors shall also widely distribute a notice that if a voter does not receive a revised voter identification card within 20 days of the election the voter should contact a specific number at the supervisor’s office to obtain polling place information.”

Voter Education Through the Media

Department of State Rule 1S-2.033(8), *F.A.C.*, requires supervisors of elections to interface with the media to better inform the electorate. Supervisors are to “participate in available radio, television and print programs and interviews, in both general and minority media outlets, to provide voting information.”

Voter Education Includes But is Not Limited to Nonpartisan Voter Education

Beginning in 2003, the State Legislature has expanded its definition of voter education activities for which counties may receive state funds. There are now four broad categories of voter education for which counties may use state funds: mailing or publishing sample ballots; conducting activities described in the Standards for Nonpartisan Voter Education provided in Rule 1S-2.0333, *F.A.C.*; for print, radio, or television advertising to voters; and for other innovative voter education programs, as approved by the Department of State.

County supervisors of elections must constantly update information disseminated to the public, poll workers, and their own staff to conform to state legislative mandates and HAVA requirements. A number of counties have used their FY 2003-2004 state voter education funds to update materials available at the polling place as well as information (brochures, posters, signs, videos, PSAs) distributed throughout the county.

In line with HB 29B (Chapter 2003-415), educational materials must be updated to provide absentee voters with better instructions on how to mark a ballot and how to correct their ballots and how to request a replacement ballot if the voter is unable to change the original ballot. (This was necessary to meet Section 301(a)(1)(B) HAVA requirements.)

HB 29B (Chapter 2003-415) requires the Department of State and the county supervisors of elections to provide more information regarding voter registration procedures and absentee ballot procedures to absent uniformed services voters and overseas voters.
HB 29B (Chapter 2003-415) requires county supervisors of elections to inform persons registering to vote by mail that if they are registering for the first time, they will be required to provide identification prior to voting the first time.

HB 29B (Chapter 2003-415) requires county supervisors of elections to give written instructions regarding the free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why. This is consistent with Section 302(a)(5)(A)&(B) HAVA requirements.

HB 29B (Chapter 2003-415) makes county supervisors of elections responsible for providing up-to-date information to conform to HAVA voting information requirements—Section 302(b)(2)(A through F): sample ballots at polls; the election date; identification instructions for mail registrants who are first time voters; and information on who to contact if general voting rights under State and federal laws are violated.

Passage of Committee Substitute for Senate Bill No. 2566 (Chapter 2004-232) requires county supervisors of elections to revise the Voter’s Certificate and instructions to those voting via an absentee ballot. Under the law, a person casting an absentee ballot is no longer required to have his/her signature witnessed.

Passage of Committee Substitute for Senate Bill Nos. 2346 and 516 (Chapter 2004-252) requires county supervisors of elections to revise Early Voting Voter Certificate information. Under the law, a person casting an Early Vote is no longer required to have his/her signature witnessed.

State Role: Disseminating Information to Voters and Election Officials

Voter Education through the Internet
The Division of Elections’ website (http://election.dos.state.fl.us/) offers extensive information regarding registration, elections (dates, district maps, results, Division reports, forms, publications, press releases, voter turnout, supervisor of elections’ contact information), voter fraud, voting systems, laws/opinions/rules, candidates and committees, the initiative petition process, and other helpful government links. Prominently displayed on the Web Site home page is information on: the Voter Assistance Hotline Toll Free Number—for the general public and for people using Text Telephone (TTY); Direct Recording Equipment Voting Systems; the 2004 National Voter Registration Workshops to be held across the state to better inform public officials and the public about the National Voter Registration Act of 1993; a direct link to the Help America Vote Act and the HAVA Planning Committee’s activities and recommendations; and the results of an Election Night Voter Report Card (Survey) on the Conduct of Election 2002.
Voter Education About Fraud
Section 97.012(12), Florida Statutes, requires the Secretary of State to “...provide election fraud education to the public.”

Voter Education Media Campaign: Get Out The Vote Foundation
In FY 2003-2004, the Division of Elections entered into a contract with the Get Out The Vote Foundation, Inc., in the amount of $247,500. This is a non-profit organization of the Florida State Association of Supervisors of Elections (FSASE). The Foundation has hired two well-known communications firms (Ron Sachs Communications and CoreMessage, Inc.) to produce voter education materials for statewide distribution. The two firms will jointly produce a half-hour television news magazine-type program called “Before You Vote” designed to inform voters about new voting rules and procedures and new electronic voting machines. The program will be distributed to all TV stations and cable companies in Florida for broadcast at two time periods—before both the August primary election and the November general election. Prevention of errors on election day is the primary goal of the program. The bipartisan team will also produce eight 30-second TV public service announcements—four each in English and Spanish. These spots—“Make Freedom Count”—are designed to encourage voters to vote early or by absentee ballot. An additional contract in the amount of $24,750 was issued to the Get Out The Vote Foundation to create media kits full of facts and figures for all 67 county supervisors of elections to use as they interface with the media.

Procedures for Constant Analysis of Voter Education Effectiveness
Section 98.255(3)(a), Florida Statutes, requires supervisors of elections to file a report by December 15 of each general election year with the Department of State. This report is “a detailed description of the voter education programs implemented and any other information that may be useful in evaluating the effectiveness of voter education efforts.”

Section 98.255(3)(b), Florida Statutes, requires the Department of State to review the information submitted by the supervisors of elections and “prepare a public report on the effectiveness of voter education programs” and to “submit the report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 31 of each year following a general election.”

Further, Section 98.255(3)(c), Florida Statutes, instructs the Department of State to use “the findings in the report as a basis for adopting modified [voter education] rules that incorporate successful voter education programs and techniques as necessary.”

This procedure was first used in the 2002 election cycle. The Division of Elections requested each supervisor of elections to list in detail the voter education programs conducted during the 2002 election cycle and the approximate cost of each program. The supervisors were asked to rank the effectiveness of each program on a scale of 1 to 5, with 5 being the highest possible rank. On January 31, 2003, the Florida Department of State, Division of Elections, submitted its “Report on Voter Education Programs During the 2002 Election Cycle Pursuant to Section
98.255(3), *Florida Statutes.*” (The Report is posted on the Division of Elections Web Site.) The report concluded that “most supervisors ranked the county voter education programs as 4 or 5 in effectiveness in reaching the target community.” (There were ten broad categories of voter education programs: sample ballots; elementary/middle school/high school/university and community college outreach; websites; miscellaneous promotional materials; public appearances/television and movie theatre advertisements; banners and billboards, radio and public transport advertisements; newspapers and mailers; voting system demonstrations; outreach to minority, disabled and senior communities; and voter registration drives.) The Department of State made three recommendations in its post-election 2002 report:

(1) The Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts; the State Legislature did this in its FY 2003-2004 and FY 2004-2005 appropriations bills.

(2) The Legislature should require sample ballots to be mailed to households or voters prior to each Primary and General Election. (It is now an alternative to publishing a sample ballot in a general circulation newspaper.)

(3) The Division of Elections should provide a list of cost-effective voter education programs used by counties so that all counties can benefit from these ideas. (Pursuant to Section 98.255(3), *Florida Statutes,* the Division has posted its Report on Voter Education Programs during the 2002 Election Cycle on its web site. The Report lists the effectiveness ratings for individual voter education activities as calculated by individual county supervisors of elections.)

(The 2002 Governor’s Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002 also recommended improving “voter education by requiring all supervisors of elections to mail generic sample ballots to each household with registered voters.”)

Under Section 101.20, *Florida Statutes,* county supervisors of elections may now mail a sample ballot to each registered elector or to each household in which there is a registered voter if done at least seven days prior to any election, rather than publish a sample ballot in a newspaper of general circulation. A high percentage of county supervisors have chosen to use their FY2003-2004 state voter education funds and local matching funds to publish and mail out sample ballots to registered voters. The same law requires two sample ballots be placed at each polling place, along with reduced-size sample ballots to give to any voter desiring one. Some supervisors of elections are using FY 2003-2004 voter education monies to pay for sample ballots to be made available at each precinct.

Section 101.595, *Florida Statutes,* also requires supervisors of elections to submit a report to the Department of State no later than December 15 of each general election year detailing “[t]he total number of overvotes and undervotes in the first race appearing on the ballot pursuant to Section 101.151(2), *Florida Statutes,* along with the likely reasons for such overvotes and undervotes and other information as may be useful in evaluating the performance of the voting
system and identifying problems with ballot design and instructions which may have contributed to voter confusion.” The Department of State must prepare a report analyzing that information and submit it to the Governor, the President of the Senate, and the Speaker of the House by January 31 of the year following a general election. The report is to include recommendations for correcting any problems with ballot design or instructions to voters.

This procedure was first used in the 2002 election cycle. “Analysis and Report of Overvotes and Undervotes for the 2002 General Election Pursuant to Section 101.595, Florida Statutes” found a substantial reduction in the level of overvotes and undervotes in 2002 (compared to 2000) and concluded that new technology and the counties’ voter education efforts were major factors contributing to the reduction in voter error. (The report is posted on the Division of Election’s Web Site.) The report’s recommendations were:

(1) The Division of Elections must continue to monitor the overvotes and undervotes from each general election. (Required under Florida Statutes.)

(2) The Florida Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts. The Legislature did this in its FY 2003-2004 and FY 2004-2005 appropriations bills.

(3) The Division of Elections should review the recommendations for ballot instructions for incorporation into the uniform ballot rule. During the 2003 session, the Legislature passed a law delineating the content of separate printed instructions to accompany each absentee ballot (section 101.65, Florida Statutes). Rule 1S-2.030 F.A.C. standardizes the basic form of instructions to be sent to all overseas voters.

(4) All voting system vendors should continue to improve the design of their voting systems in order to better meet the needs of Florida voters.

A number of supervisors of elections have implemented their own feedback systems through comment cards distributed at registration sites, workshops, and polling places. Some also allow citizens to make suggestions and complaints via their websites. Several counties have used some of their state voter education funds to solicit voter feedback and suggestions.

Florida’s system for constant evaluation of the effectiveness of voter education by both the county supervisors of elections and the Department of State is in place and operating.

Section 254(a)(3). How will the State of Florida provide for programs for election official education and training which will assist the State in meeting the requirements of Title III?

The State has assigned responsibility for education and training of election officials to the Secretary of State. The Division of Elections prepares and distributes educational materials for, and conducts the training of, supervisors of elections and their staffs.
The Secretary of State is the State’s chief election officer whose responsibilities are spelled out in Section 97.012, *Florida Statutes*. Among those responsibilities are explicit requirements to: “provide technical assistance to the supervisors of elections on voter education and election personnel training services;” “provide technical assistance to the supervisors of elections on voting systems;” “provide training to all affected state agencies on the necessary procedures for proper implementation of [Chapter 97 of the *Florida Statutes*];” and “coordinate with the United States Department of Defense so that armed forces recruitment offices administer voter education in a manner consistent with the procedures set forth in [Florida election] code for voter registration agencies.”

The Division of Elections conducts voter education and election personnel training, issues advisory opinions that provide statewide coordination and direction for interpreting and enforcing election law provisions, provides technical advice on voting systems and equipment and State and federal election laws, certifies voting equipment, and provides written election information to candidates (Office of Policy Analysis and Government Responsibility, *Justification Review*, Report No. 02-55, October 2002).

The Division of Elections oversees and approves training courses for continuing education for supervisors of elections. It coordinates, on an annual basis, two statewide workshops for the supervisors of elections by reviewing and providing updates on the election laws to ensure uniformity statewide in the interpretation of election laws. These are generally held in conjunction with the Florida State Association of Supervisors of Elections’ Conferences held in January and June. The division oversees certification for supervisors of elections through which supervisors obtain credits to maintain job proficiency. The Division may also conduct regional workshops for supervisors and staff, universities, community colleges and State agencies. When Select Task Forces are created by the Governor, Secretary of State, or other State officials, the Division provides administrative and technical assistance. (Florida Department of State, Division of Elections, 2001 Annual Report).

All Division of Elections’ forms, rules, handbooks, opinions, etc. are available on the Internet via the Division’s website—an award-winning site (http://election.dos.state.fl.us/). Section 97.026, *Florida Statutes*, states “It is the intent of the Legislature that all forms required to be used in chapters 97-106 [the election code], shall be made available upon request, in alternative formats” including the Internet (with the exception of absentee ballots).

The HAVA Planning Committee recommended that the Division of Elections also conduct training courses for the continuing education of county election officials in conjunction with meetings of the Florida Association of City Clerks. The Division of Elections routinely invites city clerks and supervisors of elections to attend its statewide training meetings held in conjunction with FSASE meetings.

The Florida State Association of Supervisors of Elections, through activities of its Get Out The Vote Foundation, will play a major role in educating and training election officials in 2004. On
May 25, 2004, the Foundation launched its voter education plan. Through it, all 67 county supervisors of elections will have access to professionally prepared public media advertising materials. The Foundation has its own web site (www.getoutthevoteflorida.com) which allows election officials—elected and staff—to access easily comprehended materials on a wide range of timely topics, including Absentee Voting, Early Voting, Registering to Vote, Election Reform in Florida, Voter Identification, Restoration of Felon’s Voting Rights, and Information on Direct Recording Equipment Voting Systems, along with posters, ads, and public service announcements.

Section 254(a)(3). How will the State of Florida provide for programs for poll worker training which will assist the State in meeting the requirements of Title III?

Florida has adopted extensive poll worker recruitment and training requirements and funded county poll worker training (as part of the $6 million voter education appropriation in 2001). The State has: adopted minimum-hours-of-training requirements; spelled out training content requirements; prepared a uniform polling place procedures manual; and mandated a statewide and uniform program for training poll workers on issues of etiquette and sensitivity with respect to disabled voters. Rule 1S-2.034 F.A.C. requires the Department of State, Division of Elections to establish a polling place procedures manual, Form DS-DE 11 (January 25, 2004).

State law permits inspectors, clerks, and deputy sheriffs attending poll worker training to receive compensation and travel expenses—Section 102.021(2), Florida Statutes.

The HAVA Planning Committee recommended state funding for poll worker training and recruitment but the Florida Legislature in 2004 did not appropriate funds for either activity.

Joint Responsibility of Department of State and County Supervisors of Elections

Section 102.014, Florida Statutes, assigns responsibility for poll worker training to county supervisors of elections and the Department of State.

Section 102.014(1), Florida Statutes, requires supervisors of elections to conduct training for inspectors, clerks, and deputy sheriffs prior to each primary, general, and special election “for the purpose of instructing such persons in their duties and responsibilities as election officials.” Training is mandatory to work at the polls.

Section 102.014(5), Florida Statutes, directs the Department of State to “create a uniform polling place procedures manual and adopt the manual by rule” and to revise it “as necessary to address new procedures in law or problems encountered by voters and poll workers at the precincts.” Rule 1S-2.034, F.A.C., Polling Place Procedures Manual (Form DS-DE 11; Eff. Jan. 04), was recently updated for HAVA compliance. It was pre-cleared on June 3, 2004 by the Department of Justice. The manual, to be available in either hard copy or electronic form at every precinct on Election Day, must be “indexed by subject, and written in plain, clear, unambiguous language.”
Under Section 102.014(7), Florida Statutes, the Department is assigned the responsibility for developing “a mandatory, statewide, and uniform program for training poll workers on issues of etiquette and sensitivity with respect to voters having a disability.” But county supervisors of elections are responsible for conducting such training. They are required to “contract with a recognized disability-related organization, such as a center for independent living, family network on disabilities, deaf service bureau, or other such organization, to develop and assist with training the trainers in disability sensitivity programs.”

Poll Worker Training Content
The content of poll worker training is detailed in State statutes.

Clerks must demonstrate “a working knowledge of the laws and procedures relating to voter registration, voting system operation, balloting and polling place procedures, and problem-solving and conflict-resolution skills”—Section 102.014(1), Florida Statutes.

The Uniform Polling Place Procedures Manual must include: regulations governing solicitation by individuals and groups at the polling place; procedures to be followed with respect to voters whose names are not on the precinct register; proper operation of the voting system; ballot handling procedures; procedures governing spoiled ballots; procedures to be followed after the polls close; rights of voters at the polls; procedures for handling emergency situations; procedures for dealing with irate voters; the handling and processing of provisional ballots; and security procedures—Section 102.014(5)(a-k), Florida Statutes. The manual “shall provide specific examples of common problems encountered at the polls on election day, and detail specific procedures for resolving those problems.”

Poll worker training on issues of etiquette and sensitivity for disabled voters “must include actual demonstrations of obstacles confronted by disabled persons during the voting process, including obtaining access to the polling place, traveling through the polling area, and using the voting system”—Section 102.014(7), Florida Statutes.

Poll Worker Minimum Hours of Training
Section 102.014(4), Florida Statutes, specifies that clerks must have had a minimum of three hours of training prior to each election to be eligible to work at the polls. For inspectors, there is a minimum of two hours of training. Section 102.014(7), Florida Statutes, requires one hour involving training related to etiquette and sensitivity with regard to voters with disabilities.

Poll Worker Recruitment
Supervisors of elections are required to “work with the business and local community to develop public-private programs to ensure the recruitment of skilled inspectors and clerks”—Section 102.014(6), Florida Statutes.
There is no established procedure for evaluating the effectiveness of poll worker training or recruitment as there is for voter education. The 2002 Governor's Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002, recommended "establishing minimum standards for poll worker performance" and "improving poll worker recruitment and training by launching a statewide "Be a Poll Worker" campaign.

The HAVA Planning Committee has recommended that the Division of Elections establish a procedure to evaluate the effectiveness of poll worker recruitment and training in all 67 counties. In an effort to increase poll worker recruitment, the Department has initiated a "Be a Poll Worker" campaign which includes airing public service announcements and distributing "Be a Poll Worker" handouts at Department presentations. Some counties are using FY 2003-2004 voter education funds to recruit high school and college students as poll workers as well as the public at-large through publication and dissemination of new brochures and videos.
Element 4. Voting System Guidelines and Process

How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

Introduction

There are several governmental bodies and agencies that participate in the adoption of voting systems in Florida. The Florida Legislature has great authority to set voting system requirements and does so in Chapter 101, Florida Statutes. The Legislature also delegates rule making and certification authority to the Bureau of Voting Systems Certification in the Division of Elections under the Secretary of State.

After voting systems are independently tested and certified for use in Florida, Section 101.5604, Florida Statutes, provides that the Board of County Commissioners “at any regular or special meeting called for the purpose, may, upon consultation with the supervisor of elections, adopt, purchase or otherwise procure, and provide for the use of any electronic or electromechanical voting system approved by the Department of State in all or a portion of the election precincts of that county.”

To keep Florida’s voting systems standards up-to-date, Section 101.015, Florida Statutes, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”

Section 254(a)(4) How will the State of Florida adopt voting system requirements and processes which are consistent with the requirements of Section 301?

Florida’s laws and regulations for adopting voting systems that are consistent with the requirements of Section 301 are clearly outlined in Florida Statutes and the Florida Voting Systems Standards.

Section 101.015, Florida Statutes, authorizes the Department of State to adopt rules which establish minimum standards for hardware and software for electronic and electromechanical voting systems.

Section 101.017, Florida Statutes, creates the Bureau of Voting Systems Certification which provides technical support to the supervisors of elections and is responsible for voting system standards and certification.

Section 101.5605, Florida Statutes, authorizes the Department of State to examine and approve voting systems through a public process to ensure that the voting systems meet the standards
outlined in Section 101.5606, *Florida Statutes*, and similar standards outlined in the Help America Vote Act of 2002 (HAVA) requirements outlined in Section 301 of Title III.

Section 101.5604, *Florida Statutes*, authorizes the Board of County Commissioners to adopt voting systems.

Sections 101.293-101.295, *Florida Statutes*, outline the public bidding process that counties should follow in purchasing voting systems.

Section 101.56062, *Florida Statutes*, exceeds the accessibility standards of HAVA Section 301 “Accessibility for Individuals With Disabilities.” The HAVA Planning Committee has recommended that the Florida Legislature take advantage of federal funding and bring Florida into compliance and make Section 101.56062, *Florida Statutes*, effective by January 1, 2006 or one year after general appropriations are made, whichever is earlier.

Section 101.015, *Florida Statutes*, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”
Element 5. Florida's Help America Vote Act of 2002 (HAVA) Election Fund

How the State will establish a fund described in subsection (b) for purposes of administering the State's activities under this part, including information on fund management.

To clarify, Section 254(b) states that a fund described in this subsection with respect to a State is a fund which is established in the treasury of the State government, which is used in accordance with paragraph (2), and which consists of the following amounts:

- (A) Amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made to the State under this part.
- (B) The requirements payment made to the State under this part.
- (C) Such other amounts as may be appropriated under law.
- (D) Interest earned on deposits of the fund.

Section 254(a)(5) How will the State of Florida establish a fund for the purpose of administering the State's activities under this part?

All HAVA funds are maintained in a trust fund that has already been established by the Department of State. Within this trust fund, monies received for HAVA Sections 101, 102 and Title II are set up into four accounts: 101-Election Administration, 102-Replace Punch Card and Lever Voting Systems, 251-Requirements Payment, and 261-Access for Individuals with Disabilities.

Section 254(a)(5) How will the State of Florida manage this fund?

Any HAVA funds received by the State are used exclusively for activities authorized by HAVA. The Division of Elections is responsible for tracking and monitoring the use of funds in accordance with established State procedures.

The Director of the Division of Elections has final signing authority for HAVA expenditures. Any interest earned on this trust fund is returned to the principal amount of the trust.

Standard auditing procedures for monitoring the use of federal funds are used for the receipt and the distribution of HAVA funds. These standard procedures include random program audits by the Department of State Inspector General as well as an annual audit by the Florida Auditor General.
The Governor and Secretary of State are responsible under HAVA for ensuring compliance with these requirements. The HAVA Planning Committee recommends that the Governor and the Secretary of State maintain contact with the Senate President and the Speaker of the House of Representatives to ensure they remain aware of the strict requirements set in law for the use of HAVA monies placed in this trust fund.

No audit has been conducted to-date, however, based on recent calls from the Florida Auditor General, it is anticipated that an audit will be conducted during FY 2004-2005.
Element 6 – Florida’s Budget for Implementing the Help America Vote Act of 2002 (HAVA)

The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on –

(A) the costs of the activities required to be carried out to meet the requirements of Title III;
(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) the portion of the requirements payment which will be used to carry out other activities.

Introduction
The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. This budget reflects the HAVA Planning Committee’s best efforts to divide the funds that may be available during the three years identified in HAVA. If Florida receives more funds than are included in this budget, the HAVA Planning Committee will revise the budget to reflect this change.

Reimbursement for replacement of punch card and lever machines.
Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 federal funds in the amount of $11,581,377 were returned to the State of Florida as reimbursement.

Statewide Voter Registration System.
The Florida Legislature directed the Department of State to begin development of a statewide voter registration system that meets the requirements of HAVA. Accordingly, the 2003 Legislature provided $1.6 million to begin implementation of the system. Federal funds include $1 million for the Needs Assessment Phase along with nine positions to support design, development and implementation of the HAVA requirements. Of the nine positions, five reside in the Department of State and two each in the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement.

Phase 2, “Prototyping & Validation of Design,” began in March 2004 and includes the following:
  * Installation of prototyping equipment and environment
- Prototype the core system configuration and architecture
- Data conversion/migration testing (data & images)
- Prototype remote access to the core system

An estimate of costs for development and operation of the Florida Voter Registration System is provided in the table below.

The Division of Election also anticipates adding 20 full time equivalent positions (FTEs) in FY 2004-2005. The salaries and benefits, expenses and operating capital outlay associated with these 20 positions is expected to be $1,203,650.

**Section 301 Accessible Voting Systems**

The HAVA Planning Committee recommended the purchase of Direct Recording Equipment (DRE) accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The estimated cost is $11.6 million during the 2004-2005 fiscal year. The Florida Legislature authorized the following:

From the funds in Specific Appropriation 2871I, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place.
In addition, the HAVA Planning Committee in 2003 recommended reimbursing counties that have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement was $17 million.

**Voter Education**

The HAVA Planning Committee recommended using HAVA funds for the development and implementation of a comprehensive statewide voter education program. The estimated expenditure is a total of $9 million distributed to the counties and spread over the 2003-2004, 2004-2005 and 2005-2006 fiscal years.

The Florida Legislature authorized the following:

For FY 2003-2004, $2,976,755 was appropriated and available to Florida counties for voter education programs. From funds in Specific Appropriation 2871I for FY 2004-2005, $3,000,000 shall be distributed to county supervisors of elections for the following purposes relating to voter education: mailing or publishing sample ballots; conducting activities pursuant to the Standards for Nonpartisan Voter Education as provided in Rule 1S-2.033, F.A.C.; print, radio, or television advertising to voters; and other innovative voter education programs, as approved by the Department of State. No supervisor of elections shall receive any funds until the county supervisor of elections provides to the Department of State a detailed description of the voter-education programs, such as those described above, to be implemented.

**Poll Worker Training**

The HAVA Planning Committee recommended using HAVA federal funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds were intended to supplement each county's existing poll worker training budget.

The 2004 Legislature did not appropriate federal funds for conducting a poll worker recruitment campaign.

The HAVA Planning Committee recommends using HAVA federal funds in the amount of $500,000, beginning with FY 2005-2006, for poll worker training and recruitment, with a 15% match required of each county.
Statewide Poll worker Recruitment Campaign
The HAVA Planning Committee recommended that HAVA federal funds be used to implement, through the Division of Elections, a statewide campaign to help recruit qualified poll workers. The increase in the complexity of voting systems and procedures has resulted in a need for more computer literate individuals to staff the polling places and help ensure error-free elections.

The 2004 Legislature did not appropriate federal funds for conducting a statewide poll worker recruitment campaign.

HAVA Oversight and Reporting
The HAVA Planning Committee recommended that the Department of State create three full time positions to manage HAVA implementation.
- HAVA administrator
- Grants specialist
- Administrative assistant

The Florida Legislature authorized three positions within the Division of Elections for HAVA Oversight and Reporting. For FY 2003-2004 $206,079 was appropriated for salaries and benefits, expenses and operating capital outlay. The three position titles are
- Senior Management Analyst Supervisor
- Operations and Management Consultant II
- Administrative Assistant II

State Management (HAVA Planning Committee)
The HAVA Planning Committee recommended that the Secretary of State require it to meet twice each year in 2003-2004 and in 2004-2005 to make recommendations and to resubmit the HAVA State Plan to ensure that Florida is meeting the requirements of the Help America Vote Act. The HAVA Planning Committee convened twice in the 2003-2004 fiscal year at an estimated cost of $30,000. The HAVA Planning Committee further recommends that it meet twice in the 2004-2005 fiscal year at an estimated cost of $30,000 and twice in the 2005-2006 fiscal year at an estimated cost of $30,000.

Performance Goals and Measures Adoptions
The HAVA Planning Committee recommended the Secretary of State utilize the HAVA Planning Committee to determine performance goals and measures. The estimated cost is $160,000 to be expended in the 2003-2004 and 2004-2005 fiscal years.
The HAVA Planning Committee determined HAVA performance goals and measures during the meetings that were held to update the HAVA State Plan. Two meetings were held on May 24, 2004 and June 4, 2004 at an estimated cost of $30,000.

**Election Administration**

The HAVA Planning Committee recommends HAVA funds be used for the design and production of new voter registration forms and publications, and translations for all election administration forms and publications. The estimated cost is $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006.

**Complaint Procedures**

Section 402(a) of HAVA requires each state to establish state-based administrative complaint procedures for any person who believes that there is or will be a violation of any of HAVA’s Title III requirements. The HAVA Planning Committee recommends using HAVA funds in the amount of $50,000 per year for the 2004-2005 and 2005-2006 fiscal years for the administration of the complaint procedures process.

The HAVA Planning Committee recommends that the remaining HAVA funds be reserved for future expenses related to the following items:
1. the continued development and implementation of the Florida Voter Registration System
2. future improvements in voting technology
3. continued funds to local counties for voter education programs
4. accessibility for polling places
5. poll worker recruitment and training

**Requirement 6**

(A) Based on the state’s best estimates, what are the costs of the activities required to carry out to meet the requirements of Title III?

(B) What portion of the requirements payment will be used to carry out activities to meet such requirements?

(C) What portion of the requirements payment will be used to carry out other activities?

This information is displayed in charts on pages 61 and 62.

Element 7. Maintenance of Effort

**How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.**

**Introduction**

The funding provided under the Help America Vote Act of 2002 (HAVA) is intended to pay for new or enhanced election efforts and is not intended to supplant existing funding at the State or county level. The projected HAVA budget is based on the assumption that the State of Florida and counties will maintain the foundation of election operating expenditures for the fiscal year ending prior to November 2000.

The Florida Division of Elections provides statewide coordination and direction for the interpretation and enforcement of election laws. The Division's budget supports year-round staff that provides election-related assistance to Florida’s 67 county supervisors of elections and their staff, municipalities, special districts, county and city attorneys, candidates, political committees, committees of continuous existence, elected officials, media, the public and other election officials throughout the United States.

### Section 254(a)(7) How will the State of Florida maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000?

In determining Florida’s maintenance of effort expenditures, the Division of Elections calculated 1999-2000 fiscal year expenditures which included salaries and benefits, operating capital outlay and voter fraud programs for the Division of Elections Director’s office and the portion of Bureau of Election Records’ expenditures pertaining to election administration. Florida’s expenditures for these activities for 1999-2000 fiscal year totaled $3,082,224.

In order to comply with Section 254(a)(7) of HAVA, the Florida Department of State will maintain expenditures on similar activities at a level equal to the 1999-2000 fiscal year budget.

For FY 2003-2004 and FY 2004-2005, the State of Florida exceeded the $3,082,224 required to meet the Maintenance of Effort requirements.

The HAVA Planning Committee recommended that the Secretary of State communicate to the Senate President and the Speaker of the House of Representatives the importance of maintaining this maintenance of effort figure, as a minimum level of expenditures, to ensure the required level of spending is appropriated by the Florida Legislature.
During the 2003 and 2004 Legislative sessions, the Department of State’s budget staff and legislative affairs staff maintained and continues to maintain close contact with House and Senate staff to convey the importance of continuing the Maintenance of Effort figure as a minimum level of funding.
Element 8. Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Introduction
Florida has a very decentralized election governance and administrative system. The Secretary of State is appointed by the Governor and is the legal Chief Election Official in Florida. However, the Secretary of State does not supervise the day-to-day operations of the 67 local supervisors of elections and only provides guidance through technical assistance, rules, advisory opinions, voting system certification, and producing standardized election forms.

In Florida, it is the local supervisor of elections that has constitutional authority to conduct elections through State law and rule. The supervisors are elected to 4-year terms by the registered voters of their respective counties (except for Miami-Dade's appointed supervisor) and have broad authority to conduct the day-to-day election operations by appointing local election officials, administering voter registration, preparing ballots, administering absentee voting, conducting poll worker training, and developing voter education programs.

The Help America Vote Act of 2002 (HAVA) requires the State and not the local supervisors of elections to adopt performance goals and measures for determining statewide and local election reform success. The following performance measures have been adopted by the HAVA Planning Committee for these key elements of the plan:

1. Voting Systems
2. Voting systems guidelines
3. Absentee instructions
4. Voting systems for voters with disabilities
5. Provisional voting
6. Voter registration system
7. Voter education
8. Administrative complaint process
Section 254(a)(12) How will Florida adopt performance goals and measures that will be used by the State to determine its success and the success of local government in carrying out the plan, including—

- Timetables for meeting the elements of the plan
- Descriptions of the criteria the State will use to measure performance
- The process used to develop such criteria
- A description of which official is to be held responsible for ensuring that each performance goal is met?

Element 9. State-Based Administrative Complaint Procedures to Remedy Grievances

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Introduction
To receive any requirements payment pursuant to the Help America Vote Act of 2002 (HAVA), the State of Florida must establish and maintain State-based administrative complaint procedures which meet HAVA’s requirements to:

(1) be uniform and nondiscriminatory;
(2) provide that any person who believes that there is or will be a violation of any of HAVA’s Title III requirements may file a complaint;
(3) require the complaint to be in writing, sworn and notarized;
(4) permit complaints to be consolidated;
(5) hold a hearing on the record at the request of the complainant;
(6) provide an appropriate remedy if the State determines that there is a violation of any Title III provision;
(7) if the State determines there is no violation, dismiss the complaint and publish the results of procedures;
(8) make a final determination on a complaint within 90 days after filing unless the complainant consents to a longer period; and,
(9) use alternative dispute resolution procedures to resolve the complaint if the State fails to resolve it within 90 days.

Section 402(a): Has Florida complied with the requirements of HAVA Section 402(a) to establish State-based administrative complaint procedures to remedy grievances?

Yes, and no further actions are required.
Appropriate administrative complaint procedures were included in Chapter 2003-415, Laws of Florida. Language in the legislation tracked HAVA’s language closely. These procedures are similar to administrative procedures in Section 97.023, Florida Statutes, for resolving complaints generated by alleged violations of the National Voter Registration Act of 1993 or a voter registration or removal procedure under the Florida Election Code.

Florida’s legislation established a new Section 97.0535, Florida Statutes, that in addition to tracking HAVA’s minimum requirements, included the following additional requirements not specified by HAVA:

(1) the Department of State would have sole jurisdiction for these purposes and the procedures would be the sole avenue of redress for alleged Title III violations;
(2) a complaint would have to state the alleged violation and the person or entity responsible for the violation;
(3) the Department of State would be required to inform a complainant in writing if a complaint was legally insufficient;
(4) proceedings would be exempt from Chapter 120, *Florida Statutes*, (Administrative Procedures Act);
(5) a hearing would be held by a hearing officer whether or not a complainant requested a hearing and specific procedures for a hearing were included in the legislation;
(6) the hearing officer would direct an appropriate remedy that then would be enforced by the Department of State;
(7) mediation would be the alternative dispute resolution method used if a final determination on a complaint was not made within 90 days of filing.
Element 10. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Introduction
Title I of the Help America Vote Act of 2002 (HAVA) is an “early out” money program for use in two areas—improving election administration and the replacement of punch card and lever voting systems. Florida received $26,028,957 under this “early out” program. The HAVA Planning Committee recommended using Section 101 federal HAVA funds for 2003-2004 activities and a combination of Section 101 and Section 252 HAVA federal funds for activities beginning in the 2004-2005 fiscal year and beyond.

Under Title I, Section 101 funds are to be used to improve election administration. Approved use of funds under this section includes:

(A) Complying with the requirements under Title III.
(B) Improving the administration of elections for Federal office.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.
(D) Training election officials, poll workers, and election volunteers.
(E) Developing the HAVA State Plan for requirements payments.
(F) Improving, acquiring, leasing, modifying, or replacing voting systems.
(G) Improving polling place accessibility for voters with disabilities or with limited English.
(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Under Title I, Section 102 federal funds are to be used to replace punch card and lever voting systems.

Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 funds in the amount of $11,581,377 were returned to the state as reimbursement.

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. The following recommendations are based on the HAVA Planning Committee meetings held to develop the HAVA State Plan.

**Section 101. How will Title I payments to Florida be used for activities to improve administration of elections?**
The State of Florida is using Title I funds for election reform activities necessary to ensure Florida complies with all HAVA requirements. The following list describes the major areas in which funds are used.

(A) Complying with the requirements under Title III

The Division of Elections will implement a statewide voter registration system to comply with HAVA Title III. The Division of Elections used $1 million appropriated from Section 101 federal funds for Phase One development of the new Statewide Voter Registration system. Expenditures for Phase One included:

- Consulting fees for conducting a detailed analysis of connectivity infrastructure available in the 67 supervisor of elections' offices and within all affected offices of the departments of State, Law Enforcement and Highway Safety and Motor Vehicles; working with the counties, the three agencies and the advisory board to create minimum and optimum sets of system requirements; assessing infrastructure needs of all stakeholders to serve the system requirements; conducting "gap" analysis; outlining the physical design of the system; estimating costs and implementation plans for each version for the system to be presented to the 2004 Legislature; and developing and publishing the January 2004 report and recommendations for the 2004 Legislature.
- The purchase of hardware and software for project management and system development.
- Expenses incurred by Division of Elections' staff.
- Travel expenses for visits to every supervisor of elections' office and local driver license office.

In addition, Section 101 HAVA funds were used to create nine full time positions necessary for the design, development and implementation of the Statewide Voter Registration system.

(B) Improving the administration of elections for Federal office.

Upon receipt of Title I monies, the HAVA Planning Committee recommended that the Division of Elections use $250,000 in fiscal year 2003-2004 from Section 101 funds for expenses that include the design and publication of voter registration forms and other election information, translations for all election administration forms and publications, statewide voter education programs and training workshops.

A State-based complaint procedure has been established for anyone who believes that a violation of Title III of the Help America Vote Act has occurred, is occurring or is about to occur. Funds may need to be expended depending on the number and type of complaints filed.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.

The Florida Division of Elections will use approximately $9 million over a three year period for voter education programs. In FY 2003-2004, $2,976,755 was appropriated and distributed to county supervisors of elections for voter education programs. Distribution was based on a funding level per individual voter multiplied by the number of registered voters in each county for the 2002 General Election. To determine the funding level per individual voter, the Division of Elections divided the total amount of funds appropriated in FY 2003-2004 by the total number of registered voters in the State of Florida for the 2002 General Election.

For FY 2004-2005, the Appropriations bill includes $3,000,000 to be distributed to county supervisors of elections for purposes relating to voter education. No supervisor of elections shall receive any funds until the county supervisor of elections provides to the Department of State a detailed description of the voter-education programs, such as those described above, to be implemented.

FY 2004-2005 funds will be distributed to each eligible county supervisor of elections based on a funding level per voter multiplied by the number of registered voters in the county for the 2004 Presidential Preference Primary. To determine the funding level per individual voter, the Division of Elections will divide the total amount of funds appropriated in FY 2004-2005 by the total number of registered voters in the State of Florida for the 2004 Presidential Preference Primary.

(D) Training election officials, poll workers, and election volunteers.

In the original HAVA plan, the HAVA Planning Committee recommended using HAVA funds in the amount of $250,000 for poll worker training in each fiscal year 2003-2004, 2004-2005 and 2005-2006. The Florida Legislature, however, did not appropriate HAVA funds for this use in FY 2003-2004 or FY 2004-2005.

The HAVA Planning Committee would like to reinstate its recommendation to use HAVA funds in the amount of $500,000, beginning with FY 2005-2006, for poll worker training and recruitment, with a 15% match required of each county.
(E) Developing the HAVA State Plan for requirements payments to be submitted under part 1 of subtitle D of Title II.

Title I funds were used to revise the HAVA State Plan in FY 2003-2004. As the State of Florida modifies its plans in future years, HAVA funds may be used.

(F) Improving, acquiring, leasing, modifying, or replacing voting systems.

Florida has already replaced its punch card and lever voting systems. Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 funds in the amount of $11,581,377 were returned to the state as reimbursement.

The HAVA Planning Committee recommended that the State of Florida utilize some HAVA funds to help counties meet the accessibility requirements under Title III by the January 1, 2006 deadline. The FY 2004-2005 Appropriations Bill states that $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place.

In addition, the HAVA Planning Committee recommends reimbursing counties who have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million and it is anticipated that Section 252 HAVA funds will be used.

(G) Improving polling place accessibility for voters with disabilities or with limited English.

Under Section 261, HAVA states the Secretary of Health and Human Services shall make a payment to eligible States to be used for making polling places accessible to individuals with disabilities and providing information on this accessibility. The HAVA Planning Committee recommends that these funds be distributed to each county to ensure that individuals with disabilities are provided the same opportunity for access and participation as for other voters.
During FY 2003-2004, the State of Florida applied for and received a grant from Health & Human Services (HHS) in the amount of $687,278. Since the Division of Elections did not have budget authority in FY 2003-2004 to spend these dollars, none of the funds have been requested from HHS as of this date. The Division has distributed a survey to all supervisors of elections requesting information regarding the number of polling places that were utilized in the 2004 Presidential Preference Primary. This information will be used to determine the formula for distributing the grant funds to the counties.

The funds will be used as described in the grant application which follows the recommendations in the plan.

The Division of Elections has also been awarded a second grant from Health & Human Services to improve polling place accessibility in the amount of $492,941.

(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Currently, there are no plans to use HAVA funds for establishing a free voting information hotline. If this type of voting information system is desired, it will be the responsibility of each county and monitored by the Division of Elections.

The Division of Elections has already established a voter fraud hotline for individuals who believe they may have witnessed election fraud. In addition, the Division has established a hotline for voters to request voting information.

Section 102. How will payments to Florida be used for the replacement of punch card or lever voting machines?

Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 federal funds in the amount of $11,581,377 were returned to the state as reimbursement.

How the State will conduct ongoing management of the plan, except the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Introduction
This element of the HAVA State Plan requires Florida to explain how the State of Florida will manage the implementation of the HAVA State Plan and whether it will utilize the same public notice process if any “material change” is made to the administration of the HAVA State Plan.

Section 251(a)(11) How will Florida conduct ongoing management of the HAVA State Plan?

As explained in previous sections of this Plan, the administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. The Secretary of State as the Chief Election Officer is responsible for the coordination of the State’s responsibilities under HAVA Section 253. The Director of the Division of Elections reports to the Secretary of State and will be responsible for the day-to-day monitoring and managing of Florida’s HAVA State Plan. The Director has three new positions dedicated to HAVA program management. The scope of responsibilities will range from federal reporting and grant compliance to assistance with voter education, election official training and updating the HAVA State Plan.

Also at the State level, the Secretary of State directs the HAVA Planning Committee to update the HAVA State Plan as required in Section 255. Under Florida’s HAVA State Plan, the HAVA Planning Committee is responsible for conducting its business in an open, public forum and for suggesting revisions and updates to the HAVA State Plan.

At the local level, Florida’s 67 supervisors of elections will be encouraged to play an active role in the successful implementation of the HAVA State Plan. The Division of Elections will continue to work on a regular basis with local supervisors of elections to develop performance...
goals and measures, new voter registration improvements, new voting systems certification upgrades, statewide voter education programs, election official training, and other activities outlined in Florida’s HAVA State Plan.

Section 254(a)(11) If Florida makes any material change in the administration of the HAVA State Plan, will the change—

(A) be developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

(B) be subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

(C) take effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A)?

The State of Florida understands and agrees to comply with the HAVA requirements related to ongoing management of the HAVA State Plan. No material changes in the administration of the plan will be made unless:

- the material change is developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

- the material change is subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

- the material change takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).
Element 12. Changes to State Plan for Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Introduction
The HAVA State Plan was updated at public meetings held in Orlando, Florida on May 24, 2004 and in Hollywood, Florida on June 4, 2004. The Secretary of State utilized the previous HAVA Planning Committee to make changes. The Collins Center for Public Policy, Inc. was selected in a public competitive process to staff the update process.

The HAVA Planning Committee focused on three types of changes:

1. Substantive changes made by the State of Florida that bring the State into further compliance with HAVA
2. Minor updates that will not affect the State’s compliance with HAVA
3. Issues that have arisen that might affect the State’s future compliance with HAVA

The HAVA Planning Committee received copies of the original plan. All updates and changes to the original plan from the previous fiscal year were noted as follows:

1. Sections of the plan that were deleted were first shown in a strike-through font
2. Sections of the plan that were new were shown in an underlined font.
3. After the HAVA Planning Committee reviewed and approved the updates, the underline and strike-through fonts were removed.

Section 254(a)(12) When Florida has a HAVA State Plan for the previous fiscal year, will the State of Florida provide a description of how the plan reflects changes from the HAVA State Plan for the previous fiscal year and how the State succeeded in carrying out the HAVA State Plan for such previous fiscal year?

Florida has updated its original HAVA State Plan to bring it into further compliance through legislative action, rule change and updated information. The following chart is a summary on how the HAVA State Plan changed and how the State succeeded in carrying out the HAVA State Plan for the previous fiscal year.
HAVA State Plan Update from Previous Fiscal Year

Element 1- Voting Systems
Florida currently meets all HAVA voting system requirements except with regard to voting systems for voters with disabilities.

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voting systems for voters with disabilities: The Legislature appropriated $11.6 million to help Florida’s counties provide one certified accessible voting system for voters with disabilities including blind and visually impaired voters by January 1, 2006.</td>
<td>The Department of State is going beyond HAVA by contracting with a disability relations group to act as a consultant to help implement disability access with the supervisors of elections across the state.</td>
</tr>
</tbody>
</table>

Element 1- Provisional Voting and Voting Information
Florida made six (6) changes to the provisional voting process in order to comply with HAVA by January 1, 2004.

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Free Access System: Updated state law to require each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his/her provisional ballot was counted and, if not, why.</td>
<td>Systems were established by January 1, 2004 and individuals who voted provisional ballots were given notice of whether their ballot was counted.</td>
</tr>
</tbody>
</table>

The HAVA Planning Committee concludes that the provisional ballot set forth in HAVA reinforces protections that the NVRA affords voters who move within the registrar's jurisdiction without updating their registration information, the ability to vote. The HAVA Planning Committee would like to offer Florida voters this same certainty and recommends to the Florida Legislature that the meaning of the term "jurisdiction" in Florida Statutes be changed from "precinct" to "county."

Voting instructions including how to cast a provisional ballot: The Division of Elections updated and

Proper instructions for voting and casting a provisional ballot were displayed in polling places.

Proper instructions for mail-in registrants and first-time voters were displayed in polling places.

Proper contact information for any voter alleging their rights were violated was displayed in polling places.

The State was in compliance by the required deadline.
reprinted posters that are displayed in each polling place on election day to include these instructions.

Posting of instructions for mail-in registrants and first-time voters:
The Division of Elections updated and reprinted posters that are displayed in each polling place on election day to include these instructions.

Posting of contact information for voters who allege their rights have been violated:
The Division of Elections updated and reprinted posters that are displayed in each polling place on election day to include these instructions.

Effective date for complying with Provisional Voting and Voting Information Requirements:
Requirements were completed by HAVA deadline of January 1, 2004.

**Element 1- Voter Registration System**

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Florida Legislature has directed the Department of State to begin the development of the new Florida Voter Registration System (FVRS) that meets the requirements of HAVA. The Division of Elections has been tasked to develop the specifications for the design and implementation. A project team has been established consisting of supervisors of elections, technical experts and other agency representatives and has approved a five (5) phase project plan to be completed by the HAVA deadline.</td>
<td>The State of Florida received an extension for the development and implementation of the computerized statewide voter registration list from January 1, 2004 to January 1, 2006. The Florida Legislature appropriated $1.6 million to begin the project design and implementation of the new Florida Voter Registration System and to fund nine positions.</td>
</tr>

<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The State of Florida reimbursed itself with $11.58 million in Section 102 HAVA funds for replacing outdated voting machines after the 2000 General Election.</td>
<td>The Florida Legislature appropriated $11.6 million in HAVA funds to assist counties in the purchase of accessible voting systems for each polling place.</td>
</tr>
<tr>
<td></td>
<td>The Florida Legislature appropriated nearly $3 million to counties for nonpartisan Voter Education programs.</td>
</tr>
</tbody>
</table>

Element 3- Voter Education

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>An analysis of FY 2003-2004 voter education programs throughout the state indicate a variety of innovative programs are being used.</td>
<td>The Florida Legislature appropriated $3 million for voter education programs for FY 2004-2005.</td>
</tr>
<tr>
<td></td>
<td>Division of Elections contracted with the Get Out the Vote Foundation, Inc., in the amount of $247,500 from FY 2003-2004 appropriations.</td>
</tr>
<tr>
<td>Beginning in 2003, the Florida Legislature expanded its definition of voter education activities for which counties may receive state funds.</td>
<td>The Florida State Association of Supervisors of Election, through activities of its Get Out the Vote Foundation, will play a major role in educating and training election officials in 2004.</td>
</tr>
<tr>
<td>HB 29B (Chapter 2003-415) requires:</td>
<td>To increase poll worker recruitment, the Department has initiated a &quot;Be a Poll Worker&quot; campaign which includes airing public service announcements and distributing &quot;Be a Poll Worker&quot; handouts at Department presentations.</td>
</tr>
<tr>
<td>• Education materials to be updated to provide absentee voters with better instructions;</td>
<td></td>
</tr>
<tr>
<td>• The Department of State and county supervisors of elections to provide more information to absent uniform services voters and overseas voters;</td>
<td></td>
</tr>
<tr>
<td>• Persons registering to vote be notified of the requirement to provide identification prior to voting the first time;</td>
<td></td>
</tr>
<tr>
<td>• Written instructions be given regarding the free access system that allows each person who casts a provisional ballot to determine whether their vote counted and, if not, why not;</td>
<td></td>
</tr>
<tr>
<td>• Supervisors of elections to provide up-to-date information to conform to HAVA</td>
<td></td>
</tr>
</tbody>
</table>
voting information requirements;

Senate Bill No. 2566 (Chapter 2004-232) required county supervisors of elections to revise the Voter’s Certificate and instruction to those voting via an absentee ballot indicating an absentee ballot is no longer required to have his/her signature witnessed.

Senate Bill No. 2346 (Chapter 2004-252) required county supervisors of elections to revise the Early Voting Certificate information indicating a person casting an Early Vote is no longer required to have his/her signature witnessed.

The Division of Election’s website enhances voter education through the internet by:
- Voter assistance hotline toll free number
- 2004 national voter registration workshops to be held across the state
- Direct link to Help America Vote Act and HAVA Planning Committee activities
- The results of an election night voter report card (survey)

Under F.S. 101.20, supervisors of elections may mail a sample ballot to each registered elector or each household if done at least 7 days prior to any election, rather than publishing a sample ballot in a newspaper of general circulation.

The HAVA Planning Committee recommended state funding for poll worker training and recruitment but the Florida Legislature in 2004 did not appropriate any funds for either activity.
Element 4- Voting System Guidelines and Processes

<table>
<thead>
<tr>

<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The HAVA Planning Committee approved the projected cost of the Florida Voter Registration System and recommended that the Florida Legislature continue funding the development of this project for a estimated total of $20.6 million through 2008.</td>
<td>The State of Florida reimbursed itself with $11.58 million in Section 102 HAVA funds for replacing outdated voting machines after the 2000 General Election.</td>
</tr>
<tr>
<td>The HAVA Planning Committee continued to recommend that the State of Florida reimburse counties that have already purchased voting systems that meet the HAVA accessibility requirements for voters with disabilities.</td>
<td>The Florida Legislature appropriated $1.6 million in FY 2003-2004 to begin the development of the Florida Voter Registration System which will meet HAVA requirements.</td>
</tr>
</tbody>
</table>
The HAVA Planning Committee recommended using $500,000 for FY 2005-2006 in a matching grant program for counties to conduct election official and poll worker training.

The HAVA Planning Committee did not recommend renewing its recommendation to develop a statewide poll worker recruitment campaign.

The HAVA Planning Committee recommended continued funding of the three positions providing administrative oversight for HAVA.

The HAVA Planning Committee recommended funding future HAVA Planning Committee meetings at $30,000 for each fiscal year through FY 2005-2006.

The HAVA Planning Committee recommended funding the following future activities:
1. continued development and expansion of the Florida Voter Registration System  
2. future improvement to voting technology  
3. continued funds for county voter education programs  
4. accessibility for polling places  
5. poll worker recruitment and training.

The Florida Legislature funded three positions to provide administrative oversight for HAVA in FY 2003-2004.

</table>
education programs over a two year period.

The Florida Legislature did not appropriate HAVA funds for use in training election officials and poll workers as recommended by the HAVA Planning Committee.

The Florida Legislature appropriated $11.6 million for distribution to supervisors of elections for the purchase of equipment which is accessible to persons with disabilities.

Funds will be distributed to supervisors of elections to purchase equipment which is accessible to persons with disabilities.

The State of Florida applied for and has been awarded two grants from Health & Human Services in the amount of $687,278 and $492,941 to be used for making polling places accessible to individuals with disabilities.

The Division of Elections has distributed a survey to all supervisors of elections requesting information regarding the number of polling places that were utilized in the 2004 Presidential Preference Primary in order to determine the formula for distributing grant funds to counties.

Element 13. State Plan Development and HAVA Planning Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Introduction
To comply with the requirements of the Help America Vote Act of 2002 (HAVA), the HAVA State Plan must be developed by the chief State election official through a committee of appropriate individuals. After a preliminary plan is developed, it must be published for public inspection and comment. State officials must take public comments into account in preparing the HAVA State Plan submitted to the Federal Elections Commission.

Section 255: Has Florida complied with the requirements of section 255(a) to have the chief State election official develop the HAVA State Plan through a committee of appropriate individuals?

Yes, and no further actions are required.
Florida’s Chief State Election Official, Secretary of State Glenda Hood, has the responsibility under HAVA to develop the HAVA State Plan with the assistance of the statewide HAVA Planning Committee. Section 255(a) of HAVA requires that “The chief State election official shall develop the HAVA State Plan under this subtitle through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions within the State, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens, appointed for such purpose by the chief State election official.”

Members of the HAVA Planning Committee for the State of Florida, appointed by Secretary of State Hood, are as follows:

Chairman:
Jim Smith of Leon County, former Secretary of State and former Attorney General

Chief Election Officials of the Two Most Populous Jurisdictions within the State:
Brenda Snipes, Supervisor of Elections for Broward County
Constance Kaplan, Supervisor of Elections for Miami-Dade County

Other Local Election Officials:
Kurt Browning, Supervisor of Elections for Pasco County
Susan Gill, Supervisor of Elections for Citrus County
Shirley Green Knight, Supervisor of Elections for Gadsden County
To: General Services Administration

Standard Form 269A (REV 4-88)  
Prescribed by OMB Circulars A-102 and A-110
February 28, 2006

The Honorable Paul S. DeGregorio, Chairman
U.S. Election Assistance Commission
State HAVA Funding Reports
1225 New York Avenue, NW – Suite 1100
Washington, D.C. 20005

Dear Mr. DeGregorio:

Enclosed are Florida’s narrative reports regarding HAVA, Title I, Section 101 and 102 funds for the period from January 1, 2005 through December 31, 2005. A separate SF 269 form is included for Section 101 and Section 102 funds.

Also enclosed is a an updated SF 269 covering Title I, Section 101 funds for the period from January 1, 2004 through December 31, 2004. The entry on Line “o - Total Federal funds authorized for this funding period” has been adjusted to include Florida’s portion of Section 101 funds plus Interest accrued on those funds during 2003 and 2004.

If you have any questions or would like additional information, please let us know.

Sincerely,

Dawn K. Roberts, Esq.
Director, Division of Elections

As requested by the U. S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State during calendar year 2004 utilizing HAVA Title I funds.

**COMPLYING WITH REQUIREMENTS OF TITLE III - $1,623,298**

One of the requirements of Title III includes development and implementation of a single statewide voter registration list. In order to begin the development of a system in Florida that meets the criteria outlined in HAVA, the 2003 Florida Legislature appropriated $1 million for Phase One Development of the Florida Voter Registration System (FVRS). Funds were provided to conduct the research and planning required in order to design and develop the system.

The Legislature also authorized establishment of nine full-time positions to assist with developing and implementing the FVRS. Five of the positions are assigned to the Department of State and two each are in the Florida Department of Highway Safety and Motor Vehicles (HSMV) and the Florida Department of Law Enforcement (FDLE).

One of the five positions in the Department of State has been designated as Project Manager. The remaining four positions have been utilized to conduct research and planning for the project that was required prior to initiating the development phase of the system. Positions at HSMV and FDLE are working with the Department of State to determine ways to coordinate databases maintained by those agencies with the Florida Voter Registration System.

The Department of State contracted with a consulting firm to provide project management and quality assurance services for the project. A separate firm was retained to assist with application design and engineering services.

As the project has developed, funds have been expended to purchase software licenses for software programs that will be used to operate the system. Other funds were used to provide training for employees who will be using the software programs.

Other expenditures related to development of the FVRS include travel expenses for project team members who held numerous meetings with Florida's supervisors of elections and their staff as well as vendors of voter registration systems that conduct business in Florida. Project team members also conducted site visits with election officials in other states that utilize centralized voter registration systems.

Development of the statewide voter registration system (FVRS) is described extensively in the HAVA State Plan on pages 26 through 33, page 38 and page 56.

**ELECTIONS ADMINISTRATION - $394,436**

The Department of State established three positions to provide administrative oversight and coordination for HAVA-related activities. Employees in these positions are responsible for monitoring HAVA expenditures to assure compliance with federal requirements regarding their use. These positions administer several contract programs that provide funds to supervisors of elections for HAVA-related activities including voter education as well as funds utilized to purchase voting systems equipment.

Recommendations regarding establishment of positions associated with HAVA Oversight and Reporting can be found on page 59 in the HAVA State Plan.
Other Title I expenditures include costs associated with printing documents that were provided to supervisors of elections to meet the requirements of HAVA including “Instructions to Voters” posters and “Stamp Out Voter Fraud” posters. Additional publications that were printed and distributed to supervisors of elections include revised “Florida Voter Registration Application” forms, “Florida Registration and Voting Guide” and “A Compilation of Florida Election Laws.”

Reference to posters/publications required by HAVA can be found in the State Plan on pages 20 through 24 and on page 60.

The Department of State used Title I funds to contract with an organization to develop two programs that were used by supervisors of elections to assist with providing elections-related information to Florida’s citizens. One of the programs included development and distribution of materials that could be used in all counties throughout the state to encourage voter participation in the 2004 elections. The program included instructions and ideas for utilizing the materials. The other program involved developing and conducting a voter awareness and education program regarding the use of Direct Recording Equipment (DRE’s).

These programs are included in Florida’s HAVA State Plan on page 45.

**VOTER EDUCATION - $2,333,346**

During 2004, Florida distributed $2,333,346 to Florida’s 67 county supervisors of elections to assist counties with conducting voter education programs. In order to receive voter education funding, counties were required to submit a detailed voter education plan to the Department of State along with a certified statement from the Board of County Commissioners providing matching county funds in the amount of fifteen percent (15%) to be used exclusively for voter education.

The Department of State recently conducted a survey regarding voter education programs being conducted in each county and prepared a report regarding the various types of voter education activities being utilized throughout the state. Responses to the survey indicated that counties are using voter education funds to disseminate information regarding the elections process through a variety of mediums in order to target as many diverse populations throughout the state as possible. Examples of voter education programs include the following:

- Printing and mailing sample ballots to registered voters
- Publishing sample ballots in local newspapers including those that target specific populations such as minority and college-age voters
- Conducting voting systems demonstrations at various types of locations including malls, businesses, community events, assisted living facilities and schools. Demonstrations included instructions on completing a ballot as well as using the voting systems equipment
- Printing a variety of publications with elections-related information including posters regarding voters rights and responsibilities to display at each polling place
- Conducting voter registration drives in a variety of locations such as malls, schools and businesses

A number of other voter education programs have been successfully implemented in the counties with excellent response from local citizens. It is apparent that counties are being innovative and
resourceful in utilizing voter education funds in order to inform and educate citizens about the elections process.

Florida's voter education program is discussed in detail in the HAVA State Plan on pages 37 through 47 as well as on page 58.

**TRAINING ELECTION OFFICIALS, POLL WORKERS AND ELECTION VOLUNTEERS - $23,331**

The Department of State contracted with a communications consulting firm to develop and prepare a video titled "Conflict Management Skills for Poll Workers." It was used to help poll workers understand how to handle potentially difficult situations at polling places. The video was distributed to each of the 67 county supervisors of elections to use as part of their poll worker training.

Development of this video was not specifically addressed in the HAVA State Plan, however, it is consistent with the direction outlined in the State Plan for training poll workers found on pages 49 and 50.

**DEVELOPING STATE PLAN - $33,468**

The Department of State contracted with a consulting firm to facilitate revisions and updates to the HAVA State Plan. The firm worked with Department staff to draft proposed revisions to the original plan and to develop goals and performance measures to present to the HAVA State Planning Committee for review, discussion and inclusion in the revised document.

In addition to consultant firm fees, expenditures related to this activity included travel expenses for HAVA State Planning Committee members and Department of State staff who attended the State Planning Committee meetings. The meetings were held in two different geographical locations in Florida in order to provide accessibility to all citizens who were interested in attending and/or participating in the meetings.

Management of the State Plan and State Planning Committee is addressed on page 59 in the HAVA State Plan.

**INTEREST ACCRUED**

During 2004 the Department of State invested Title I, Section 101 funds and accrued $347,160.87 in interest.

Signature of Authorized Certification Official
Sarah Jane Bradshaw, Director, Division of Elections

Date Report Submitted
February 28, 2006
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State during calendar year 2005 utilizing Help America Vote Act (HAVA) Title I, Section 101 funds.

VOTER EDUCATION - $3,829,808

During calendar year 2005 Florida distributed $3,829,808 to the 67 county supervisors of elections to be utilized for voter education purposes. In order to receive the funds each supervisor of elections was required to submit a detailed plan outlining the anticipated uses of the funds. In addition to the plan, each Board of County Commissioners was required to provide fifteen percent matching funds to be used exclusively for voter education purposes.

County supervisors of elections are required to submit a report to the Department of State on an annual basis regarding voter education programs conducted in the counties until the funds distributed by the state are depleted. Based on the latest reports from supervisors of elections, counties continue to employ numerous voter education activities in an effort to involve citizens in the elections process.

These activities include printing and mailing sample ballots to registered voters, conducting voter registration drives at various locations and events throughout the county, disseminating information regarding election dates and related deadlines through a variety of media sources, and conducting demonstrations on the use of voting systems equipment.

Florida's voter education program is discussed in the HAVA State Plan on pages 37 through 47 and on page 58.

ELECTION ADMINISTRATION - $303,394

Florida established three positions in the Department of State to provide administrative oversight and coordination for HAVA-related activities. Employees in these positions are responsible for monitoring HAVA expenditures to ensure compliance with federal requirements. The positions administer several contract programs that provide funds to county supervisors of elections for HAVA-related activities including voter education and voting systems assistance programs. In addition, the positions are responsible for administering grant funds awarded by the U. S. Department of Health and Human Services under the Voting Access for Individuals with Disability (VOTE) grant program.

Recommendations regarding establishment of positions associated with HAVA Oversight and Reporting can be found on page 59 in the HAVA State Plan.

Additional Title I funds were utilized to print several documents that were distributed to county supervisors of elections including a revised voter registration application form. Reference to publications required by HAVA can be found in the HAVA State Plan on pages 20 through 24 and on page 60.

The state contracted with an organization to assist county supervisors of elections with developing and implementing plans to make polling places and voting systems equipment accessible to individuals with disabilities. Reference to polling place accessibility is included in the HAVA State Plan on page 80 and 81.
COMPLYING WITH REQUIREMENTS OF TITLE III - $87,544

One of the requirements of Title III includes development and implementation of a statewide voter registration system. The 2003 Florida Legislature appropriated funds to begin development of a system that would meet the criteria outlined HAVA. The Legislature included authority to establish five positions in the Department of State to assist with developing and implementing the voter registration system. Title I, Section 101 funds were used to fund these positions during the first few months of 2005. The positions were funded with Title II funds during the remainder of 2005.

Reference to these positions can be found in the HAVA State Plan on page 56 and 61.

INTEREST ACCRUED - $250,596.63

During 2005 the Department of State invested Title I, Section 101 funds and accrued $250,596.63 in Interest.
February 28, 2006

The Honorable Paul S. DeGregorio, Chairman
U.S. Election Assistance Commission
State HAVA Funding Reports
1225 New York Avenue, NW – Suite 1100
Washington, D.C. 20005

Dear Mr. DeGregorio:

Enclosed are Florida’s narrative reports regarding HAVA, Title I, Section 101 and 102 funds for the period from January 1, 2005 through December 31, 2005. A separate SF 269 form is included for Section 101 and Section 102 funds.

Also enclosed is an updated SF 269 covering Title I, Section 101 funds for the period from January 1, 2004 through December 31, 2004. The entry on Line “o - Total Federal funds authorized for this funding period” has been adjusted to include Florida’s portion of Section 101 funds plus Interest accrued on those funds during 2003 and 2004.

If you have any questions or would like additional information, please let us know.

Sincerely,

Dawn K. Roberts, Esq.
Director, Division of Elections

COMPLAINT
For Alleged Violation of the
Help America Vote Act of 2002
(42 U.S.C. §15512)

Florida Department of State, Division of Elections
Room 316, R.A. Gray Building, 500 South Bronough Street, Tallahassee, Florida 32399-0250
Telephone (850) 245-6200

Pursuant to section 97.028, Florida Statutes, the Department of State has sole jurisdiction to adjudicate alleged violations of Title III of the Help America Vote Act of 2002 (HAVA). Any person who believes that a violation of Title III of HAVA has occurred, is occurring or is about to occur may file a complaint. In order to initiate the complaint process, a sworn, written complaint must be filed with the Department of State. The complaint must specifically state the alleged violation and the person or entity responsible for the violation. A violation of Title III of HAVA is the failure to perform an act required by or the performance of an act prohibited by Title III of HAVA in a federal election.

COMPLAINT

For Alleged Violation of the
National Voter Registration Act of 1993
(42 U.S.C. 1973gg-1 et seq.)

Department of State for the State of Florida, Division of Elections
The Collins Building, Room 100, 107 West Gaines Street, Tallahassee, Florida 32399-0250
Telephone (850) 245-6200

Pursuant to section 97.023, Florida Statutes, the Department of State, Division of Elections has primary
jurisdiction to mediate alleged violations of the National Voter Registration Act of 1993, and of voter
registration and removal procedures. In order for a violation to exist, the Department of State, a voter
registration agency, a county supervisor of elections, the Department of Highway Safety and Motor
Vehicles or an Armed Forces Recruitment Center must have committed the violation.

Ms. Penelope Bonsall, Director
Office of Election Administration
Federal Elections Commission
999 E. Street NW
Washington, D.C. 20463

RE: State of Florida request for waiver pursuant to Section 303(d) of the Help America Vote Act of 2002

Dear Ms. Bonsall:

Section 303(a) of the Help America Vote Act of 2002 requires each state to implement a computerized statewide voter registration list by the January 1, 2004, date specified in Section 303(d)(1)(A) of the same statute. Section 303(d)(1)(B) provides for states to request an extension of the aforementioned deadline until January 1, 2006. The purpose of this correspondence is to certify that, for good cause as outlined below, the State of Florida is unable to meet the January 1, 2004, implementation date called for in Section 303(d)(1)(A), and respectfully requests an extension of the deadline as permitted by law until January 1, 2006.

Florida has a tradition of administering voter registration at the county level jurisdiction. Each of Florida's sixty-seven counties has a constitutionally elected officer known as the supervisor of elections who is responsible for maintaining voter registration lists in their respective county. Each supervisor of elections is also responsible for determining the type of information technology appropriate for supporting voter registration activities in their jurisdiction and the manner in which registration records are maintained. The steps required to: (1) assess county-administered voter registration systems; (2) develop methods for consolidating a variety of voter registration lists with individual nuances into a single computerized statewide system; and (3) provide for future coordination of county voter registration activities with the statewide list will require more time than provided by the January 1, 2004, implementation date.

The Florida Department of State is working diligently to implement a statewide voter registration system that will meet all the requirements of Title III. Some of the steps already taken by the State of Florida in order to develop and implement a statewide voter registration system include: hiring a project director; executing agreements with our state Departments of Highway Safety
Motor Vehicles and Law Enforcement that outline data exchange procedures; and creating task
groups comprised of county election officials and Department of State personnel in order to
address technical and procedural issues relating to the creation of the centralized registration
system. Given the steps already taken by the Florida Department of State and the other
departments involved, and the scope of the work remaining to be done, I am confident that the
State of Florida will be successful in having a statewide computerized voter registration system
operational by the January 1, 2006, extended deadline requested herein.

Sincerely,

Glenda E. Hood
Secretary of State

RE: State of Florida Request for waiver pursuant to Section 303(d) of the Help America Vote Act of 2002

Dear Ms. Bonsall:

Enclosed is a copy of the November 10, 2003 letter that was submitted by the State of Florida in order to request an extension of the January 1, 2004 deadline for implementing a computerized statewide voter registration list. The letter was sent to the Federal Elections Commission pending appointment of the Elections Assistance Commission.

Although members of the Elections Assistance Commission have been appointed and confirmed, they still don’t have an address. We are resubmitting a copy of the State of Florida’s original request to the new Elections Assistance Commission in care of your office in order to meet the January 1, 2004 deadline for requesting a waiver and extension for implementing the statewide voter registration list.

Sincerely,

Edward C. Kast  
Director, Division of Elections

EK/BL/aj

Enclosure

Ms. Deborah Schilling
Director of Budget
United States General Services Administration
1800 F Street, NW
Washington, D.C. 20405-0002

Dear Ms. Schilling:

Enclosed are Financial Status Reports regarding HAVA expenditures for the period ending December 31, 2003. A separate form has been prepared for Section 101 and Section 102 funds as requested. These documents were also faxed to your office on January 21, 2004.

If you have any questions or need additional information, please let us know.

Sincerely,

Edward C. Kast
Director, Division of Elections

EK/BL/aj

Stakeholders/Representatives of Groups of Individuals with Disabilities:
Dave Evans, State Board Member of the National Federation of the Blind
Jim Kracht, Assistant County Attorney for Miami-Dade County and member of the American Blind Lawyers Association, American Council of the Blind and the Florida Council of the Blind
Richard LaBelle, Secretary of the Florida Coalition on Disability Rights

Other Stakeholders and Citizens:
Joe Celestin, Mayor of the City of North Miami
Anna Cowin, State Senator from District 20
Jane Gross, President of the Florida League of Women Voters
Jennifer Carroll, State Representative from District 13
Arthur Hernandez, Vice Chairman of the Jacksonville Mayor’s Hispanic American Advisory Board
Percy Luney, Dean and Professor of Law at Florida A&M University
Reggie McGill, Human Relations Director for the City of Orlando
Isis Segarra, private citizen from Hillsborough County
Lori Stelzer, Former President of the Florida Association of City Clerks and City Clerk for the City of Venice
Raiza Tamayo, Regional Director of the United States Hispanic Chamber of Commerce

This HAVA Planning Committee convened two times in public meetings to update the State Plan—Orlando, Florida on May 24, 2004 and Hollywood, Florida on June 4, 2004. All meetings were noticed in the Florida Administrative Weekly. Members of the public and press were welcomed at the meetings. The HAVA Planning Committee heard public comment at each meeting. It was assisted by a non-profit, non-partisan organization, the Collins Center for Public Policy, Inc., that was selected in a public bidding process to serve as staff for the HAVA Planning Committee in updating the HAVA State Plan, and by the Division of Elections of the Florida Department of State.

The HAVA Planning Committee operated in an open process with public deliberations, systematic procedures in accordance with Robert’s Rules of Order, and majority vote of members who were present when votes were taken. A majority quorum of HAVA Planning Committee members was present for the Orlando meeting. At the Hollywood meeting, the HAVA Planning Committee was one member short of meeting a majority quorum. As a result, members present at the Hollywood meeting conducted a workshop on the proposed changes. At the end of the meeting, the nine HAVA Planning Committee members in attendance moved to approve the changes they had discussed. The Collins Center then obtained approval from the members not present at the Hollywood meeting to incorporate the changes into the working draft. The HAVA Planning Committee received two drafts of the final plan before voting to approve the updates and sending the plan to the Division of Elections.
The Collins Center, as staff, prepared written materials for the meetings, made presentations to focus the HAVA Planning Committee on decisions that needed to be made, and took notes of all meetings. A formal transcript of each meeting also was made. All agendas and other published materials for meetings of the HAVA Planning Committee were made available at the meetings. The website of the State Division of Elections also included much of this material.

All meetings were held in accessible facilities and were compliant with the Americans with Disabilities Act. Closed captioning service was available at all meetings. Agendas were printed in Braille as well as Spanish and Creole.

**Section 256: Will Florida comply with the requirement of Section 256 to have the HAVA State Plan meet the public notice and comment requirements of HAVA?**

Yes, and no further actions are required.

Section 256 of HAVA requires that the HAVA State Plan meet the following public notice and comment requirements:

1. not later than 30 days prior to the submission of the plan, the State shall make a preliminary version of the plan available for public inspection and comment;
2. the State shall publish notice that the preliminary version of the plan is so available; and
3. the State shall take the public comments made regarding the preliminary version of the plan into account in preparing the plan which will be filed with the Election Assistance Commission.

After the final updated HAVA State Plan is submitted to the Election Assistance Commission, that Commission shall cause the HAVA State Plan to be published in the Federal Register in accordance with Section 255(b).

These tasks were performed by the Division of Elections and not by the HAVA Planning Committee or its consultants. The work of the HAVA Planning Committee and its consultants was completed when a preliminary version of the HAVA State Plan was prepared, approved by the HAVA Planning Committee, and submitted to the Secretary of State.

After notice is given in the *Florida Administrative Weekly*, the preliminary version of the HAVA State Plan will be posted on the Department of State’s and the Governor’s websites. A link is available on the Department’s website so that public comment can be made electronically. Public comments also will be received by U. S. mail. Public comments will be considered in preparing the final plan.

Appendix A

INSTRUCTIONS TO VOTERS

1. Polls open at 7 a.m. and close at 7 p.m.

2. Sample ballots will be posted in the polling room for your information.

3. When you enter the polling room and before being permitted to vote, you are required to present a photo ID with signature. If you do not have the proper ID, you will be allowed to sign an affidavit and vote.

4. If you are a first-time voter who registered by mail and have not already provided identification to the supervisor of elections, you must provide a photo ID with signature. If you do not have the proper ID, you are allowed to vote a provisional ballot.

5. If you need instructions on how to use the voting equipment, ask a poll worker to assist you. After you have been given instructions, the officer assisting you will leave so that you can cast your vote in secret.

6. You are required to occupy the voting booth alone, unless you requested assistance at the time of registration or when you signed in at the polls.

7. When you are finished marking your ballot, take your ballot and put it into the precinct tabulator.

8. After you cast your vote, you are required to leave the polling room and you will not be allowed to re-enter.

9. If your eligibility is questioned or you are a first-time voter who registered by mail and do not have a photo ID, you will be allowed to vote a provisional ballot. Once you have voted your provisional ballot, place it in the envelope provided to you and fill out the Voter’s Certificate on the back of the envelope. Do not put your ballot through the precinct tabulator. Your ballot will be presented to the County Canvassing Board for a determination as to whether your ballot will be counted.

10. The poll workers possess full authority to maintain order in the polling area.

INSTRUCCIONES PARA LOS VOTANTES

Instrucciones para los votantes

1. Las urnas abren a las 7:00 a.m. y cierran a las 7:00 p.m.

2. Para su información, las boletas de muestra estarán desplegadas en el salón de votaciones.

3. Cuando usted entre al salón de votación y antes de que se le permita votar, a usted se le requerirá presentar una identificación con foto y firma. Si usted no tiene la identificación adecuada, a usted se le permitirá firmar una declaración jurada y votar.

4. Si usted es un votante que vota por primera vez y que se ha registrado por correo y aún no ha provisto ya la identificación al supervisor de elecciones, usted deberá proveer una identificación con foto y firma. Si usted no tiene la identificación adecuada, a usted se le permitirá votar una boleta provisional.

5. Si usted necesita instrucciones sobre cómo usar el equipo de votación, pidale a un trabajador de las urnas que le ayude. Luego que a usted se le hayan dado instrucciones, el oficial que le ayuda se alejará, para que usted pueda echar su voto en secreto.

6. A usted se le requiere ocupar la caseta de votación solo(a), a menos que usted haya pedido ayuda al momento del registro o cuando usted firmó al llegar a las urnas.

7. Cuando usted termine de marcar su boleta, lleve su boleta y póngala en el tabulador del precinto.

8. Luego que usted eche su voto, a usted se le requerirá abandonar el salón de votación y no se le permitirá volver a entrar.

9. Si su elegibilidad es cuestionada o si usted es un votante que vota por primera vez que se registró por correo y no tiene una identificación con foto, a usted se le permitirá votar con una boleta provisional. Una vez usted haya votado con su boleta provisional, colóquela en el sobre que se le proveyó y llene el Voter's Certificate (Certificado del Votante) al dorso del sobre. No coloque su boleta a través del tabulador del precinto. Su boleta será presentada al County Canvassing Board (Junta Examinadora del Condado) para una determinación en cuanto a contar su boleta o no.

10. Los trabajadores en las urnas poseen plena autoridad para mantener el orden en el área de votación.

Appendix E

VOTER’S BILL OF RIGHTS

Each registered voter in this state has the right to:

1. Vote and have his or her vote accurately counted.

2. Cast a vote if he or she is in line at the official closing of the polls in that county.

3. Ask for and receive assistance in voting.

4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.

5. An explanation if his or her registration is in question.

6. If his or her registration is in question, cast a provisional ballot.

7. Prove his or her identity by signing an affidavit if election officials doubt the voter’s identity.

8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.

9. Vote free from coercion or intimidation by elections officers or any other person.

10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

You may have other voting rights under state and federal laws. If you believe your voting rights have been violated, please contact Florida Department of State, Division of Elections, 1-877-868-3737.
LA CARTA DE LOS DERECHOS DEL ELECTOR

Todo elector inscrito en este estado tiene el derecho:

1. de votar y de que se cuente con precisión su voto.
2. de que se le permita votar si está en cola para votar cuando estén cerrando oficialmente las urnas en ese condado.
3. de pedir y recibir asistencia para votar.
4. de recibir hasta dos boletas de reemplazo si se equivoca antes de emitir su voto definitivamente.
5. si su inscripción está en duda, de que se le explique el motivo del problema.
6. si su inscripción está en duda, de votar con una boleta provisional.
7. de firmar una declaración jurada para probar su identidad si los funcionarios electorales tienen alguna duda acerca de la identidad del elector.
8. de tener por escrito instrucciones sobre el método de votación para usarlas al votar y, si las pide, de recibir instrucciones verbales por parte de los funcionarios electorales sobre dicho método.
9. de votar sin que lo coaccionen o intimiden los funcionarios electorales ni ninguna otra persona.
10. de votar empleando un sistema que, además de funcionar correctamente, haga posible emitir con precisión los votos.

Usted puede tener otros derechos de la votación bajo el estado y las leyes federales. Si usted cree que sus derechos de la votación se han violado, por favor avise la Sección de Estado de la Florida, la División de Elecciones, 1-877-868-3737.
Appendix G

STATE OF FLORIDA
DEPARTMENT OF STATE

November 10, 2003

Ms. Penelope Bonsall, Director
Office of Election Administration
Federal Elections Commission
999 E Street NW
Washington, D.C. 20463

RE: State of Florida request for waiver pursuant to Section 303(d) of the Help
America Vote Act of 2002

Dear Ms. Bonsall:

Section 303(a) of the Help America Vote Act of 2002 requires each state to implement a
computerized statewide voter registration list by the January 1, 2004, date specified in Section
303(d)(1)(A) of the same statute. Section 303(d)(1)(B) provides for states to request an extension
of the aforementioned deadline until January 1, 2006. The purpose of this correspondence is to
clarify that, for good cause as outlined below, the State of Florida is unable to meet the January
1, 2004, implementation date called for in Section 303(d)(1)(A), and respectfully requests an
extension of the deadline as permitted by law until January 1, 2006.

Florida has a tradition of administering voter registration at the county level jurisdiction. Each of
Florida's sixty-seven counties has a constitutionally elected officer known as the supervisor of
elections who is responsible for maintaining voter registration lists in their respective county.
Each supervisor of elections is also responsible for determining the type of information
technology appropriate for supporting voter registration activities in their jurisdiction and the
manner in which registration records are maintained. The steps required to: (1) assess county-
administrated voter registration systems; (2) develop methods for consolidating a variety of voter
registration lists with individual counties into a single computerized statewide system; and (3)
provide for future coordination of county voter registration activities with the statewide list will
require more time than provided by the January 1, 2004, implementation date.

The Florida Department of State is working diligently to implement a statewide voter registration
system that will meet all the requirements of Title III. Some of the steps already taken by the
State of Florida in order to develop and implement a statewide voter registration system include:
hiring a project director; executing agreements with our state Department of Highway Safety
Ms. Penelope Beazell, Director
November 10, 2005
Page 2

Motor Vehicles and Law Enforcement that outline data exchange procedures; and creating task
groups comprised of county election officials and Department of State personnel in order to
address technical and procedural issues relating to the creation of the centralized registration
system. Given the steps already taken by the Florida Department of State and the other
departments involved, and the scope of the work remaining to be done, I am confident that the
State of Florida will be successful in having a statewide computerized voter registration system
operational by the January 1, 2006, extended deadline requested herein.

Sincerely,

[Signature]

Glenda E. Hood
Secretary of State

Washington, D.C. 20463

Dear Mr. Hancock:

Attached is the final version of the State of Florida HAVA Plan as required by the Help America Vote Act. The plan is now ready to be published in the Federal Register. Please include the following URL in the introduction to the state plan: http://election.dos.state.fl.us/hava/index.shtml.

If you need further information, please let me know.

Sincerely,

Edward C. Kast  
Director, Division of Elections
State of Florida
HAVA Plan

As required by the
HELP AMERICA VOTE ACT
OF 2002 (HAVA)
# TABLE OF CONTENTS

Letter from Secretary Glenda E. Hood

State of Florida HAVA State Plan Chart ................................................................................ 71
Dear Election Assistance Commission:

As Chief Election Officer of the State, I am pleased to present the State of Florida HAVA Plan developed pursuant to the Help America Vote Act of 2002. This plan represents Florida's long-range plan for implementing the federal Act, which requires all states to significantly reform the way they conduct elections. As the plan indicates, Florida has already met many of the requirements of HAVA.

Florida's plan was developed through the Help America Vote Act Planning Committee, a group of dedicated individuals representing various constituency groups throughout the State. The plan sets forth the goals of achieving compliance with HAVA and for continuing to improve the elections process in the State of Florida. I commend the Committee for its hard work and diligence in producing the Plan.

As part of the Plan, the Committee was tasked with developing a budget based on the projected federal funds that the State would receive. The Committee considered only those funds projected to be received for the 2003 federal fiscal year. I, along with other election officials throughout the State, encourage Congress to continue the necessary funding to fully implement the requirements of HAVA. Both the State and counties have already spent significant funds to replace outdated voting systems. HAVA allows certain reimbursements for these expenditures and I fully support reimbursement to the State and counties where permissible under the Act. We will continue to examine the possibility of further reimbursement to the state as permitted by HAVA.

This plan recognizes that additional resources are required in order for our Supervisors of Elections to provide continuing voter education to the citizens of the State, to recruit qualified poll workers, and to provide the necessary training for those workers. As Chief Election Officer, I am committed to working closely with and supporting our Supervisors as we continue to ensure Florida voters have every confidence that their vote counts.

Florida will revise and update the plan as necessary to reflect the progress made in implementing HAVA and to chart the future goals and plans for elections. We look forward to continuing our election reform efforts to make this state the model for elections reform throughout the nation.

Glenda E. Hood
Secretary of State
Introduction

Since the aftermath of the General Election of 2000, Florida has led the nation in its election reform efforts to ensure that every registered voter should have the opportunity to vote and to ensure that every vote counts.

The goal is perfection. Reaching that goal in an ever changing democracy and within a diverse population is an ongoing task that requires constant experimentation and learning. The people and the leadership of Florida have dedicated themselves to this course of action.

The struggle for improving our election process reveals itself in many ways. Citizens have increased their involvement by serving on local and State election task forces, researching new voting technologies, debating new standards for poll worker training, increasing voter education opportunities, and registering new voters. The people of Florida continue to make election reform a top priority.

The leadership of Florida has also acted decisively. Florida has enacted legislative and local reforms during the last two years that lead the nation. These reforms include cutting-edge voting system standards, millions of dollars for new voting technology, expanded voter education efforts, and thousands of newly trained poll workers. A statewide poll taken the day of the 2002 General Election found that Floridians gave high marks to the election reform changes including a 91% “excellent-good” rating for poll workers and an 88% confidence rating from voters that their votes will count. These results are not “perfect,” but Florida is moving in a positive direction to make all facets of the election process better each time an election is held.

With the passage and signing of the Help America Vote Act of 2002 (HAVA) on October 29, 2002, election reform will spread throughout the nation. The new federal law asks States to develop election reform plans that will improve election administration in many areas. Florida embraces the new federal law and hopes that other States will use it as an opportunity to share new election reform ideas and practices with one another.

The people of Florida have learned many things about election reform. Yet, there are enduring principles which are reflected within many recommendations and changes of Florida’s election reform efforts. These principles were developed by Florida’s first task force in the aftermath of the 2000 General Election:

Enduring Principles of Elections

- Elections are first and foremost acts of millions of individual people: citizens who register and vote; candidates who offer themselves and their platforms for public
judgment; poll workers who put in long days at precincts; and election officials who supervise the process. Honest, responsible, intelligent people will make most technology systems work well.

- Voting should be a simple, convenient and friendly process that encourages each citizen to express his or her choices.
- Voting systems should be designed to determine voter intent, to the extent that is humanly possible.
- Voting methods for statewide and national elections should meet uniform standards and national standards for fairness, reliability and equal protection of voting opportunity.
- Elections must meet two competing objectives: certainty (making every vote count accurately) and finality (ending elections so that governing can begin).
- While voting should be individual and private, procedures for counting and challenging votes should be open, transparent, and easily documented to ensure public confidence in the results.

Fulfilling the promises of these enduring principles will require continued vigilance and action. With this HAVA Plan, Florida continues its journey to mount an increasingly open and fair system of determining the will of the people.

The Help America Vote Act of 2002 requires all States to develop and implement a statewide plan. Listed below are the thirteen primary elements that must be addressed in the plan.

Help America Vote Act of 2002 (HAVA)
Public Law 107-252 – October 29, 2002

SEC. 254. STATE PLAN.
(a) IN GENERAL.—The State plan shall contain a description of each of the following:

Element 1.
How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Element 2.
How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—
A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Element 3.
How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Element 4.
How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Element 5.
How the State will establish a fund described in subsection (b) for purposes of administering the State’s activities under this part, including information on fund management.

Element 6.
The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

A) The costs of the activities required to be carried out to meet the requirements of Title III;

B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and

C) The portion of the requirements payment which will be used to carry out other activities.

Element 7.
How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Element 8.
How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria,
and a description of which official is to be held responsible for ensuring that each performance goal is met.

Element 9.
A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Element 10.
If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Element 11.
How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change —

A) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
B) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and
C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Element 12.
In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Element 13.
A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.
Element 1. Use Of Title III Requirements Payments:

A. Voting Systems

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

Following the 2000 General Election, the people of Florida made a concerted effort to improve all facets of its election procedures, standards and voting systems. The first major changes were the recommendations advanced by the 2001 Governor’s Select Task Force on Election Procedures, Standards and Technology followed by the passage of the Florida Election Reform Act of 2001. A central component of Florida’s new election law mandated the replacement of punch card voting systems, lever machines, paper ballots and central count optical scanning systems with precinct tabulated Marksense voting systems or the Direct Recording Electronic voting systems. The new voting systems were put into service to reduce voter error, to improve tabulation accuracy, and to restore voter confidence in Florida’s elections.

Florida has adopted voting system standards which meet and exceed standards established by the Federal Election Commission. Florida’s voting system standards are reviewed every two years to determine whether they are adequate and effective in carrying out fair and impartial elections. The Bureau of Voting Systems Certification within the Department of State has statutory authority to adopt rules which establish minimum standards for voting systems purchased and used in Florida. Florida’s 67 counties have authority to purchase and to maintain the appropriate certified voting system for their registered voters. During the last two years, the State of Florida has provided $24 million to assist counties in purchasing new certified voting systems.

Only two types of voting systems are certified for use in Florida’s 67 counties— Direct Recording Electronic (DRE or “touchscreen”) voting systems and Marksense with precinct-based tabulation.

There are three manufacturers who have certified voting systems for use in Florida: Diebold; Elections Systems and Software, Inc. (ES&S); and Sequoia Voting Systems, Inc. (SP). Members of the HAVA Planning Committee noted that the certified Diebold voting system currently does not allow visually impaired voters to independently or to privately vote and this is addressed later under Section 301(a)(3)(A) and Section 301(a)(3)(B). The following chart details the types of voting systems used in Florida, the respective manufacturer, and the number of counties using the voting systems.

The Help America Vote Act of 2002 (HAVA) establishes new minimum requirements for administering federal elections. These new voting system requirements are found in Title III of the federal law. The new requirements shape the performance and the administration of voting systems. Florida is in compliance with many of these new federal directives and these are addressed in the HAVA State Plan.

Section 301(a) of HAVA requires that Florida’s voting systems meet the following requirements by January 1, 2006. Florida will be in compliance with all of these requirements by the federal deadline of January 1, 2006.
Section 301(a) Voting System Standards and Requirements

Section 301(a)(1)(A)(i): Do Florida’s voting systems permit the voter to verify in a private and independent manner the votes selected by the voter before the ballot is cast and counted?

Yes, and no further actions are required.
Section 101.5606(1), Florida Statutes, states that no voting system in Florida shall be approved by the Department of State unless it “permits and requires voting in secrecy.”

Florida Voting System Standards (April 2002) state that “the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection.” (p. 21)

Florida Voting System Standards (April 2002) state that the voting function standards applicable to all Electronic Voter Interfaces must provide “after the initial instructions, which the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.” (p. 20)

Section 301(a)(1)(A)(ii): Do Florida’s voting systems provide the voter with the opportunity in a private and independent manner to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct the error)?

Yes, and no further actions are required.
Florida Voting System Standards (April 2002) state that “the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection.” (p. 21)

Section 101.5606(12), Florida Statutes, requires that electronic voting systems should “permit each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed.”

Section 101.5608(2)(b), Florida Statutes, requires that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, the ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide
instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in the envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Yes, and no further actions are required.

Section 101.5606(3), Florida Statutes, requires voting systems to immediately reject “a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.”

Section 101.5606(4), Florida Statutes, requires that systems using paper ballots accept a rejected ballot if the voter chooses to cast the ballot after it has been rejected, but the ballot will record no vote for any office that has been overvoted or undervoted.

Section 101.5608(2)(b), Florida Statutes, provides that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, a ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in an envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Florida Voting System Standards (April 2002) state that “the system must prevent the voter from over voting any race.” In addition, “there must be a clear, identifiable action, which the voter
takes to ‘cast’ the ballot. The system must make clear to the voter how to take this action, such that the voter has minimal risk of taking the action accidentally, but when the voter intends to cast the ballot, the action can be easily performed.” (p. 21)

Florida Voting System Standards (April 2002) state that “Marksense systems shall reject blank ballots and ballots with overvoted races. Electronic voter interfaces shall prevent a voter from overvoting a race, and shall provide a means of indicating, to the voter, any races that may have been undervoted before the last step necessary to cast the ballot.” (p. 22)

Section 301(a)(1)(B): Does Florida’s mail-in absentee and mail-in ballot process meet the requirements of subparagraph (A)(iii) by: (i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple ballots for an office; and (ii) providing the voter instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)?

Partially meets, and further actions are required.

The Florida Legislature has amended Section 101.65, Florida Statutes, to require the instructions for absentee voters to include the following language:

Mark only the number of candidates or issue choices for a race as indicated on the ballot. If you are allowed to “Vote for One” candidate and you vote for more than one candidate, your vote in that race will not be counted.

Planned action before January 1, 2006:
In addition, the Division of Elections will update Rule 1S-2.032, Florida Administrative Code (F.A.C.), (Uniform and General Election Ballot Design) which will make it clear to absentee voters how to correct their ballots and how to request a replacement ballot if the voter is unable to change or correct the original ballot.

The HAVA Planning Committee also suggested that absentee voters should be given clear notification that the deadline for submitting absentee ballots is by 7:00 p.m. of election night and that mailing the ballot may not ensure that it will arrive in time to be counted.
Section 301(a)(1)(C): Does Florida’s absentee and mail-in ballot process preserve the privacy of the voter and the confidentiality of the ballot?

Yes, and no further actions are required.

Section 101.65, Florida Statutes, requires supervisors of elections to enclose with each absentee ballot a separate printed instruction form, a secrecy envelope, a Voter’s Certificate and a mailing envelope. The instructions provide the following guidelines:

- Mark your ballot in secret as instructed on the ballot. You must mark your own ballot unless you are unable to do so because of blindness, disability, or inability to read or write.
- Place your ballot in the enclosed secrecy envelope.
- Insert your secrecy envelope into the enclosed mailing envelope which is addressed to the supervisor.

Section 101.68(2)(d), Florida Statutes, contains a detailed policy and procedure instructing the local canvassing boards in the manner of handling absentee ballots to ensure that the confidentiality of the ballot is maintained.

Section 301(a)(2)(A): Do Florida voting systems produce a record for audits?
Section 301(a)(2)(B): Do the voting systems produce a permanent paper record with a manual audit capacity?
Section 301(a)(2)(C): Is the paper record produced in subparagraph (A) available as an official record for any recount conducted with respect to any election in which the system is used?

Yes, and no further actions are required.

The HAVA Planning Committee determined through research conducted by staff, through testimony offered by Congressional staff, and through testimony given by staff from the Division of Elections that Florida complies with the HAVA audit requirement. Florida voting system standards require DRE machines to maintain a random sorted file of ballot images for every vote cast, and they also have to maintain detailed logs for each election from the time they are first programmed for an election until the results are copied to archival media. Certified voting systems in Florida are required to print out a paper tape of summary totals in each precinct. The paper record is produced to reconcile the consolidated totals for the county in the event of a recount.

Staff from the Division of Elections testified before the HAVA Planning Committee that Florida’s State and local security measures make it highly unlikely any tampering could take place with the voting systems. In addition, staff also testified that Florida’s certified voting
systems are tested in public forums for logic and accuracy before the election. There are also thorough procedural and security controls in place at the local level to safeguard against someone tampering with the voting systems. The Division of Elections’ staff cited Rule 1S-2.015(5)(m)3.a., F. A. C., relating to minimum election security procedures which requires the “printing of precinct results and results from individual tabulating devices” for every election. In addition, the Florida Legislature has authorized the Department of State to promulgate rules which would require supervisors to check those paper totals against electronic totals during machine recounts. The following statutes and rules lay the groundwork for Florida’s ability to comply with the audit requirements of HAVA:

Section 101.015(5)(a), Florida Statutes, requires the Department of State to adopt rules which establish standards for voting systems, including audit capabilities.

Section 101.5606(11 & 13), Florida Statutes, requires the Department of State to approve only voting systems that are capable of automatically producing precinct totals in printed, marked, or punched form or a combination thereof. The voting systems must be capable of providing records from which the operating system of the voting system may be audited.

Florida Voting System Standards (April 2002) provide general functional requirements of voting systems which “shall include the capability to produce records, generated by the system components, or in some cases, by the system operators from which all operations may be audited. Except for the storage of vote images, which shall be maintained in a random sequence, the records shall be created and maintained in the sequence in which the operations were performed.” (pp. 16-17)

Florida Voting System Standards (April 2002) require precinct count systems to provide a means for obtaining a printed report of the votes counted on each voting device, and to provide a means for extracting this information to a transportable memory device or data storage medium. (p. 23)

Florida Voting System Standards (April 2002) require the generation of reports by the system to be performed in a manner which does not erase or destroy any ballot image, parameter, tabulation or audit log data. The system shall provide a means for assuring the maintenance of data integrity and security for a period of at least 22 months after the closing of the polls. (p. 24)

Section 102.166(5)(d), Florida Statutes, requires the Department of State to adopt detailed rules prescribing additional manual recount procedures for each certified voting system which shall be uniform to the extent practicable. The rules shall address, at a minimum, the following areas:

- Security of ballots during the recount process
- Time and place of recounts
- Public observance of recounts
• Objections to ballot determinations
• Record of recount proceedings
• Procedures relating to candidate and petitioner representatives

Section 301(a)(3)(A): Does Florida have certified voting systems for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters?

Section 301(a)(3)(B): Does Florida meet the requirement in subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place?

Partially meets, and further actions are required.
In 2001, the Secretary of State appointed a task force to conduct a comprehensive review of Florida’s election laws and procedures. The task force recommended legislation to insure that Florida’s voters with disabilities could fully exercise their right to a secret ballot, as guaranteed by Florida’s Constitution. Many of the recommendations of the task force were passed by the Legislature and signed into law by Governor Bush in 2002 and are found in Chapter 2002-281, Laws of Florida. Several sections of the law, including sections setting forth specific standards that voting systems must meet, did not become effective immediately, however. They were made contingent on further appropriations by the Legislature, in expectation of the receipt of federal funding as now provided in HAVA.

Most of Florida’s largest populated counties have voluntarily purchased voting systems that comply with the accessibility requirements of HAVA. However, Florida’s uniform standards regarding voting system requirements (Section 101.56062, Florida Statutes), including one accessible machine per precinct, will be effective only when the Florida Legislature adopts a mechanism for funding this law. As a result, the current practice leaves it up to each county to determine how and where such accessible systems are deployed. This does not comply with the requirements of HAVA. Further, there is no statutory or regulatory requirement, beyond the constitutional mandate referred to above, that requires the other counties to comply with the accessibility standards.

HAVA requires that all voting systems be accessible to persons with disabilities, but does not specifically define what is required to accomplish this. HAVA’s definition of what constitutes a voting system, however, found in Section 301(b), is comprehensive. Florida has already done the difficult and time consuming work of defining what makes a Florida voting system accessible for persons with disabilities and these standards are found in Chapter 2002-281, Laws of Florida. However, as noted above, many sections are not currently in effect. Some slight additional changes to Florida law will need to be made to include provisional ballots, which HAVA
requires to be accessible, within Florida’s accessibility requirements.

Not only has Florida already enacted much of the required accessibility reforms required by HAVA, but the intent of the Legislature to comply fully with Federal requirements is clearly set out in statute. Section 101.56063, Florida Statutes, provides that:

It is the intent of the Legislature that this state be eligible for any funds that are available from the Federal Government to assist states in providing or improving accessibility of voting systems and polling places for persons having a disability. Accordingly, all state laws, rules, standards, and codes governing voting systems and polling place accessibility must be maintained to ensure the state's eligibility to receive federal funds. It is the intent of the Legislature that all state requirements meet or exceed the minimum federal requirements for voting systems and polling place accessibility.

What is left to do in order to comply with HAVA is to make all sections of Chapter 2002-281, Laws of Florida, effective. Without making these sections effective, and thus making Florida’s voting systems accessible to people with disabilities, Florida will not comply with this requirement of HAVA and will not be able to certify its compliance in order to draw down all available HAVA funds. Making these sections effective requires legislative action. Failure by the Legislature to take action will result in Florida not being able to qualify for all available HAVA funds.

In addition to the above, Florida must take steps now in the certification and system procurement processes to insure that it is able to meet the HAVA requirements in time. HAVA requires that voting systems themselves, not just Florida law, must meet the accessibility requirements by January 1, 2006. The HAVA Planning Committee heard testimony from Division of Elections’ staff who cautioned that Florida cannot compel any voting systems vendor to bring equipment to the State for certification. Staff testimony further noted that the lack of available certifiable equipment has been a significant problem in the past that continues to the present. With the proper incentives for vendors and tools for counties to require compliance with accessibility standards, Florida will be able to comply with HAVA requirements by January 1, 2006.

Accordingly, the HAVA Planning Committee recommends that the Division, beginning July 1, 2003, require that all new certified voting systems comply with the requirements of Section 101.56062, Florida Statutes. Further, any purchase of a voting system by a governmental entity after July 1, 2003 should be required to include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes. Finally, all voting systems in use as of January 1, 2006, should be required to be both certified to meet, and be deployed in a configuration that meets, the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.
For Florida to comply with HAVA and to be eligible for federal funds pursuant to HAVA, action by the Legislature should include the following specific recommendations of the HAVA Planning Committee:

1. Trigger the disability accessibility standards found in Chapter 2002-281 by either:
   
   A. Enacting specific language in the budget that meets the requirements of Section 22, Chapter 2002-281 and appropriates funds to the Department of State for distribution to the counties for the specific purpose of funding Chapter 2002-281; or
   
   B. Enacting a HAVA Implementation Bill that provides that Sections 4, 5, 6, 8, 9, 10, 11, 14, and 19 Chapter 2002-281, be effective no later than January 1, 2006, and that Section 12 of Chapter 2002-281 is effective on January 1, 2006.

2. Mandating that provisional ballots for voters with disabilities shall be provided to them by a system that meets the requirements of section 101.56062, Florida Statutes, by January 1, 2006.

3. Enact a HAVA Implementation Bill requiring:
   
   A. All electronic and electromechanical voting systems certified by the State after July 1, 2003, must meet the requirements of Section 101.56062, Florida Statutes, (except subsection (1)(d), which is exempted in the statute);
   
   B. Any purchase of a voting system by any county, municipality or by the State after July 1, 2003 must include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes; and
   
   C. All electronic and electromechanical voting systems in use on or after January 1, 2006 must be certified to meet and be deployed in a configuration which meets the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.

The recommended budget proposed under Element 6 of this plan recommends using a portion of the requirements payments to become compliant with the disability voting system requirements.

Section 301(a)(3)(C): Will Florida purchase voting systems with funds made available under Title II on or after January 1, 2007, that meet the voting system standards for disability access (as outlined in this paragraph)?

Yes, and no further actions are required.
Section 301(a)(4): Does Florida have certified voting systems that provide alternative language accessibility pursuant to the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a)?

Yes, and no further actions are required.
In order to be certified for use in Florida, DRE voting systems must provide alternative language accessibility for all interfaces in order to meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a). Florida Voting System Standards (April 2002) require that all configurations must support all voter interface functions in at least the following languages: English, Spanish, and Haitian Creole. (p. 22)

Counties using Marksense voting systems must meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a) by printing ballots in the required languages.

Section 301(a)(5): Does Florida have certified voting systems that comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Elections Commission which are in effect on the date of the enactment of this Act?

Yes, and no further actions are required.
Florida Voting System Standards (April 2002) contain voting system accuracy standards which exceed the error standards established by the Federal Elections Commission. (pp. 35-36)

Section 301(a)(6): Has Florida adopted uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting systems used in the State?

Yes, and no further actions are required.
Section 102.166(5)(a), Florida Statutes, states that “a vote for a candidate or ballot measure be counted if there is a clear indication on the ballot that the voter has made a definite choice.”

Section 102.166(5)(b), Florida Statutes, requires the Department of State to “adopt specific rules for each certified voting system prescribing what constitutes a ‘clear indication on the ballot that the voter has made a definite choice.’” The rules may not:
1. Exclusively provide that the voter must properly mark or designate his or her choice on the ballot; or
2. Contain a catch-all provision that fails to identify specific standards, such as ‘any other mark or indication clearly indicating that the voter has made a definite choice.’”
Rule 1S-2.027, F. A. C., entitled “Clear Indication of Voters Choice on a Ballot” provides specific standards for determining votes on optical scan ballots.
Element 1. Use of Title III Requirements Payments:
   B. Provisional Voting and Voting Information

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Section 302(a) Provisional Voting Requirements
The Help America Vote Act of 2002 (HAVA) requirements for provisional voting state that if an individual declares that he or she is a registered voter in the jurisdiction in which they are attempting to vote but their name does not appear on the official list of eligible voters, they are to be permitted to cast a provisional ballot.

Yes, and no further actions are required.
Section 101.031(2), Florida Statutes, states that the supervisor of elections in each county shall have posted at each polling place in the county the Voter’s Bill of Rights and Responsibilities. Included in the Voter’s Bill of Rights is the right of each registered voter to cast a provisional ballot, if his or her registration is in question.

The Division of Elections’ Polling Place Procedures Manual instructs pollworkers to read informational signs that appear in print on the walls of the polling place and to offer magnifying sheets for visually impaired voters.

In addition, modifications to Section 101.043(3), Florida Statutes, were included in Chapter 2003-415, Laws of Florida, which is effective January 1, 2004. This change provided that certain first-time voters would be allowed to vote a provisional ballot.

Yes, and no further actions are required.
Section 101.048(1), Florida Statutes, states that any voter claiming to be properly registered and eligible to vote, but whose eligibility cannot be determined, will be given a provisional ballot. A Provisional Ballot Voter’s Certificate and Affirmation must be completed by the individual
casting a provisional ballot indicating that they are registered to vote and are a qualified voter of the county in which they are attempting to vote, and that they have not previously voted in the election.

Section 302(a)(3) Do Florida’s election laws require a completed provisional ballot be given to an appropriate State or local election official to determine whether the individual is eligible under State law to vote?

Yes, and no further actions are required.
Section 101.048(1), Florida Statutes, states that all provisional ballots are placed in a secrecy envelope and then sealed in a provisional ballot envelope. All provisional ballots shall remain sealed in their envelopes for return to the supervisor of elections.

Section 101.048(2)(a), Florida Statutes, states the county canvassing board shall examine each provisional ballot envelope to determine if the person voting that ballot was entitled to vote at the precinct where the person cast a vote in the election and that the person had not already cast a ballot in the election.

Section 302(a)(4) Is the provisional ballot counted if the appropriate State or local election official determines the individual is eligible under State law to vote?

Yes, and no further actions are required.
Section 101.048(2)(b)1., Florida Statutes, states that if it is determined that the person was registered and entitled to vote at the precinct where the person cast a ballot, the canvassing board will compare the signature on the provisional ballot envelope with the signature on the voter’s registration record and, if it matches, will count the ballot.

Section 302(a)(5)(A) Are the individuals who cast a provisional ballot given written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if not, the reason that the vote was not counted?

Yes, and no further actions are required.
Chapter 2003-415, Laws of Florida, amends Section 101.048 to provide that each person casting a provisional ballot shall be given written instructions regarding the free access system. The instructions shall contain information on how to access the system along with the information the voter will need to provide in order to obtain information on his or her particular ballot.
Section 302(a)(5)(B) Has the appropriate State or local election official established a free access system to provide this information to individuals casting provisional ballots?

No, and further actions are required.

Planned action before January 1, 2004:
Chapter 2003-415, Laws of Florida, requires each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why.

It is recommended that each county, as a minimum, provide to voters who cast provisional ballots written notification by mail informing them of whether their ballot was counted and, if not, why it was not counted. Supervisors of elections are also strongly encouraged to develop a toll-free number or access to this information via the Internet.

Each supervisor of elections will establish the free access system for their county by January 1, 2004.

Section 302(a)(5)(B) Has the appropriate State or local official established procedures to protect the security, confidentiality and integrity of the personal information collected and stored by the free access system, restricting access to the individual who cast the ballot?

Yes, and no further actions are required.

Chapter 2003-415, Laws of Florida, requires the free access system established by the supervisors of elections to restrict access to information regarding an individual ballot to the person who cast the ballot.
Section 302(b) Voting Information Requirements

HAVA requirements for voting information state that the appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.

Section 302(b)(2)(A) Is a sample version of the ballot that will be used for that election posted?

Yes, and no further actions are required.

Section 101.20, Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. The sample ballots shall be in the form of the official ballot as it will appear at the polling place on election day. Sample ballots shall be open to inspection by all electors in any election.

Section 302(b)(2)(B) Is information regarding the date of the election and the hours during which polling places will be open posted on election day?

Yes, and no further actions are required.

Information such as the hours of operation of polling places and the date of the election are provided on instructional cards and sample ballots. Section 101.031, Florida Statutes, requires the Department of State, or in case of municipal elections the governing body of the municipality, to print, in large type on cards, instructions for the electors to use in voting. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

Currently, all cards that are posted in polling places include the hours the polls will be opened.

Section 101.20(1), Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. Sample ballots shall be open to inspection by all electors in any election, and a sufficient number of reduced-size ballots may be furnished to election officials so that one may be given to any elector desiring same.

Currently, all sample ballots posted in polling places include the date of the election.

Section 302(b)(2)(C) Are instructions on how to vote, including how to cast a vote and how to cast a provisional ballot posted on election day?
No, and further actions are required.
Section 101.031, *Florida Statutes*, states the Department of State, or in case of municipal elections the governing body of the municipality, shall print, in large type on cards, instructions for the electors to use in voting. It shall provide not less than two cards for each voting precinct for each election and furnish such cards to each supervisor upon requisition. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

In addition, Section 101.5611, *Florida Statutes*, states the supervisor of elections shall provide instruction at each polling place regarding the manner of voting with the system. The supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction.

Many counties have voting instructions in the voting booth and some provide verbal instruction. However, these instructions do not include how to cast a provisional ballot and Florida will have to revise its instructions to meet this requirement.

During the 2002 legislative session, Senate Bill 1350 was passed amending Section 97.026, *Florida Statutes*, and stated that all forms required to be used in chapters 97 through 106 shall be made available upon request, in alternative formats. However, this statute is not in effect during the development of this Plan.

**Planned action before January 1, 2004:**
The Department of State will revise the instructions to electors, which are posted at the polls on election day, to include information regarding how to cast a vote and how to cast a provisional ballot.

Section 302(b)(2)(D) Are instructions for mail-in registrants and first-time voters under section 303(b) posted on election day?

No, and further actions are required.

**Planned action before January 1, 2004:**
Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.
The cards provided at each polling place, which are posted on election day for inspection by voters, will be modified by the Department of State to include instructions for mail-in registrants and first-time voters.

**Section 302(b)(2)(E) Is general information on voting rights, including information on the right of an individual to cast a provisional ballot posted on election day?**

Yes, and no further actions are required.

Section 101.031(2), *Florida Statutes*, requires the supervisor of elections in each county to have posted at each polling place the Voter’s Bill of Rights and Responsibilities. The Voter’s Bill of Rights states that each registered voter in this State has the right to:

1. Vote and have his or her vote accurately counted.
2. Cast a vote if he or she is in line at the official closing of the polls in that county.
3. Ask for and receive assistance in voting.
4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.
5. An explanation if his or her registration is in question.
6. If his or her registration is in question, cast a provisional ballot.
7. Prove his or her identity by signing an affidavit if election officials doubt the voter’s identity.
8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.
9. Vote free from coercion or intimidation by elections officers or any other person.
10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

**Section 302(b)(2)(E) Is contact information posted for voters who allege their rights have been violated?**

No, and further actions are required.

**Planned action before January 1, 2004:**

Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.

The cards provided at each polling place, which are posted on election day as information for electors, will be modified by the Department of State to include contact information for voters who believe their voting rights have been violated.
Section 302(b)(2)(F) Is information on laws regarding prohibitions on acts of fraud and misrepresentation posted?  

Yes, and no further actions are required.  
Section 101.5611(2), Florida Statutes, requires the supervisor of elections to have posted at each polling place a notice that reads: “A person who commits or attempts to commit any fraud in connection with voting, votes a fraudulent ballot, or votes more than once in an election can be convicted of a felony of the third degree and fined up to $5,000 and/or imprisoned for up to 5 years.”

Section 302(c) Are individuals who vote in an election as a result of a court order or any other order extending the time established for closing the polls by a State law required to cast a provisional ballot? This provisional ballot must be separated and held apart from other provisional ballots cast by those not affected by the order.  

Yes, and no further actions are required.  
Chapter 2003-415, Laws of Florida, created s. 101.049, Florida Statutes, to require any person voting in an election after the regular poll-closing time pursuant to a court or other order extending the statutory polling hours to vote a provisional ballot. Once voted, the provisional ballot shall be placed in a secrecy envelope and sealed in a provisional ballot envelope. All such provisional ballots will remain sealed and transmitted to the supervisor of elections separate and apart from all other ballots. The supervisor shall ensure that late-voted provisional ballots are not commingled with other ballots.

Section 302(d) The effective date for complying with the Provisional Voting and Voting Information requirements is on and after January 1, 2004.

For each requirement in which Florida does not currently comply, planned action for meeting the requirements will take place by January 1, 2004.
Element 1. Use of Title III Requirements Payments:

C. Voter Registration

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

The Help America Vote Act of 2002 (HAVA) establishes minimum requirements for a single, centralized, computerized statewide voter registration list and for mail registration as a part of establishing and maintaining such a list.

The effective and efficient administration of elections depends in a major way on the completeness and accuracy of voter registration lists that can be checked quickly and reliably by election workers. Section 303(a) of HAVA establishes minimum requirements for a “single, uniform, official, centralized, interactive, computerized, statewide voter registration list which shall be the single system for storing and managing the list of registered voters throughout the state for the conduct of all federal elections.”

Because many voters register by mail instead of in person, the procedures used for mail registration are an important component of establishing and maintaining a complete and accurate statewide voter registration list. Section 303(b) of HAVA requires that a state’s mail voter registration system be administered in a “uniform and nondiscriminatory manner” and establishes minimum requirements for such a system.

Until recently, Florida’s voters have relied primarily on voter registration lists established and maintained by independent supervisors of elections in each of Florida’s 67 counties. These lists are governed by Florida law that specifies qualifications to register or vote, a registration oath, a uniform statewide voter registration application form, acceptance of applications by supervisors of elections, closing of registration books, late registration, declinations to register, special registration for electors requiring assistance, registration identification card, disposition of applications and procedures for cancellation, notices of changes of address, and operation of registration offices. See Sections 97.032 through 97.055, 97.0585 through 97.105, 98.015 through 98.095, and 98.101 through 98.491, Florida Statutes.

Additional requirements for establishing and maintaining voter registration lists were enacted in the Federal Voting Rights Act of 1965 and the National Voter Registration Act of 1993 (“Motor

---

1 A permanent single voter registration system for each Florida county, used for all public elections in that county, improved on practices in early Florida history of requiring separate registrations for municipal elections and new registrations for each new election. See Section 97.105, Florida Statutes.
Voter Law”). Sections 97.057 through 97.0583, Florida Statutes, and other provisions of Florida law implemented those Federal laws in the State by providing for registration of voters by the Department of Highway Safety and Motor Vehicles, voter registration agencies, and qualifying educational institutions.

In 1997, the Florida Legislature established a “central voter file” in the Division of Elections that contained voter registration information from all counties. Section 98.097, Florida Statutes.

Following the 2000 General Election, the Florida Legislature enacted the Florida Election Reform Act of 2001 that took additional steps to require complete and accurate voter registration lists in the counties and to establish a statewide voter registration database. Sections 98.0977 through 98.0979, Florida Statutes, authorized the Department of State to “…analyze, design, develop, operate, and maintain a statewide, on-line voter registration database and associated website, to be fully operational statewide by June 1, 2002. The database shall contain voter registration information from each of the 67 supervisors of elections in this state and shall be accessible through an Internet website. The system shall provide functionality for ensuring that the database is updated on a daily basis to determine if a registered voter is ineligible to vote for any of the following reasons, including, but not limited to:

(a) The voter is deceased;

(b) The voter has been convicted of a felony and has not had his or her civil rights restored; or

(c) The voter has been adjudicated mentally incompetent and his or her mental capacity with respect to voting has not been restored.

The database shall also allow for duplicate voter registrations to be identified.”

This statewide database was established in time for use in the 2002 General Elections. Requirements for pre-clearance by the U.S. Department of Justice (DOJ) and negotiations for settlement of a lawsuit by the NAACP delayed use of parts of the database concerning eligibility of voters identified as potentially ineligible because of a felony conviction or adjudication of mental incapacity. With the receipt of DOJ clearance and settlement of the lawsuit now accomplished, the Division of Elections will begin running matches when all issues related to the settlement agreement have been resolved.

---

2 A “voter registration agency” is defined by Section 97.012(37), Florida Statutes as “…any office that provides public assistance, any office that serves persons with disabilities, any center for independent living, or any public library.”
Section 303(a) Computerized Statewide Voter Registration List Requirements

Section 303(a)(1)(A)(i)-(vii) and 303(a)(2): Does Florida’s existing statewide database meet requirements for implementing and maintaining a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State and includes information specified in HAVA?

No, and further actions are required.
Florida has made great strides in recent years in establishing a centralized, computerized statewide voter registration database but that database does not meet the requirements of HAVA Section 303(a)(1)(A) for a single statewide voter registration list “...defined, maintained, and administered at the State level...[with] a unique identifier [assigned] to each legally registered voter in the State...” which serves, under HAVA Section 303(a)(1)(A)(vii), as “...the official voter registration list for the conduct of all elections for Federal office in the State.” HAVA Section 303(a)(1)(A)(i) further defines this requirement by specifying that “The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.” HAVA Section 303(a)(1)(A) also specifies that the chief State election official (in Florida the Secretary of State) shall implement and maintain the single statewide voter registration list.

Florida currently has 67 official voter registration lists, one established and maintained in each county, that are compiled into the statewide voter registration database required by the Florida Election Reform Act of 2001. The 67 county-based lists, not the statewide database, are the official voter registration lists for voters in Florida. The statewide database is intended primarily to assist supervisors of elections to determine if voters are ineligible to vote (deceased, convicted felons who have not had civil rights restored, or adjudicated as mentally incompetent). It also is intended to identify those voters who are listed more than once. It is not intended to serve as “...the single system for storing and managing the official list of registered voters throughout the State...” as required by HAVA. Information in the statewide database is made available to county supervisors of elections who are responsible for making final determinations of a voter’s eligibility and for updating voter registration records.

HAVA’s requirement for a single computerized statewide voter registration list cannot be fulfilled quickly. In addition to designing and implementing such a single system that is interactive and assigns unique identifiers to each voter, HAVA requires the system to have adequate technological security measures [HAVA Section 303(a)(3)], meet minimum standards of accuracy and currency [HAVA Section 303(a)(4)], provide for verification with other information such as driver’s license numbers and Social Security numbers [HAVA Section 303(a)(5)], and meet other standards. Meeting these requirements and standards will take time, expertise and money.
The Legislature has appropriated $1 million and nine staff positions to create a master design, including a business plan and budget, for a single statewide voter registration system by January 2004. This design would permit the 2004 Legislature to take action to authorize the implementation of a new single computerized statewide voter registration list in time for the 2006 elections. This timing assumes that the State of Florida will be granted a waiver under HAVA to have a single statewide voter registration system in place by January 1, 2006, instead of by the existing deadline of January 1, 2004. (The requirement for a waiver is discussed subsequently.)

Chapter 2003-415, Laws of Florida, authorizes the State to request the Federal Election Assistance Commission to grant a waiver from the January 1, 2004, HAVA deadline. The 2003 Appropriations bill authorizes the funding and staffing positions requested by the Division of Elections.

In the meantime, the Division of Elections has been meeting with representatives of the Florida State Association of Supervisors of Elections, the Department of Highway Safety and Motor Vehicles, the Department of Law Enforcement, the Board of Executive Clemency, the State Technology Office and health officials to begin to find ways to coordinate databases maintained by those agencies as part of the single centralized statewide voter registration list. Because HAVA Sections 303(a)(5)(A)(i)(I) and (II) require an applicant for voter registration to provide either a current and valid driver's license number or supply the last four digits of the applicant's Social Security number, HAVA Sections 303(a)(5)(B)(i)-(ii) require that the State enter into agreements to share such information with the Department of Highway Safety and Motor Vehicles and with the Social Security Administration.

HAVA’s requirements are minimum requirements. Florida may establish technology and administrative requirements that are stricter than the Federal requirements as long as they are not inconsistent with HAVA’s requirements and other laws, such as the Motor Voter Act, or in conflict with the privacy provisions of the Florida Constitution. See HAVA Section 304.

Section 303(d) Deadlines for Computerized Statewide Voter Registration List

Section 303(d)(1)(A): Can Florida meet HAVA’s requirement to have operational a computerized statewide voter registration list, as defined by HAVA, by January 1, 2004?

No, and further actions are required.

The State practically cannot meet the January 1, 2004, deadline. Substantial professional and technical work must be done to design and establish a computerized statewide voter registration list that meets HAVA’s standards. Although design of such a system can be ready by January 2004, implementation of the system will take a year or more beyond that date. Chapter 2003-415, Laws of Florida, authorizes the State to seek a waiver from the Federal Election Assistance Commission permitted under HAVA Section 303(d)(1)(B) from January 1, 2004, to January 1,
2006, if the State "...will not meet the deadline...for good cause and includes in the certification the reasons for the failure to meet such deadline...."

Section 303(b) Requirements for Voters Who Register By Mail

Section 303(b)(1) through (4): Does Florida meet HAVA's identification requirements for a voter who registers by mail and has not previously voted in an election for Federal office in the State or registers by mail, has not previously voted in the jurisdiction and is in a State that does not have a computerized statewide voter list that meets HAVA's requirements?

Yes, and no further actions are required.

HAVA requires persons who register by mail and have not voted in an election for federal office to provide identification prior to voting. If the State is able to match the voter's driver's license number or Social Security number against an existing State record bearing the same number, name and date of birth, further identification by the voter is not required.

HAVA Sections 303(b)(2)(i) through (ii) require that a first-time voter who votes in person may be identified by a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. A voter who votes by mail may include with the ballot a copy of a current and valid photo identification or a copy of the other documents listed for the voter who appears in person. An exception is made in HAVA Section 303(b)(3) for mail registrants who provide a copy of required identification at the time of registering, mail registrants whose driver's license number or last 4 digits of the Social Security number are matched with an existing State record, and for those who vote under the Uniformed and Overseas Citizens Absentee Voting Act, the Voting Accessibility for the Elderly and Handicapped Act, or under some other provision of Federal law (in which case the specific standards of those acts must be met).

Chapter 2003-415, Laws of Florida, amends the following sections of Florida law to conform to HAVA’s mail registration and other voter registration requirements:

Section 97.052(3)(g), Florida Statutes, to require a statement with the uniform statewide voter registration form that informs the applicant that if the form is submitted by mail and the applicant is registering for the first time, the applicant will be required to provide identification prior to voting for the first time.

Section 97.053(5)(a), Florida Statutes, that permits the use of a valid Florida driver's license number or the identification number from a Florida identification card issued under Section 322.051, Florida Statutes, for purposes of voter registration.

Section 97.0535, Florida Statutes, that specifies at length the requirements for identification that a first-time voter can use and that complies with other HAVA requirements outlined previously.
Section 101.043, *Florida Statutes*, (a transfer and renumbering of Section 98.471, *Florida Statutes*) to permit a voter to submit to a poll worker at the time of voting a current and valid picture identification with a signature.

**Section 303(b)(4): Does Florida meet HAVA’s requirement for language in the mail voter registration form under Section 6 of the National Voter Registration Act of 1993?**

Yes, and no further actions are required.

HAVA requires that mail voter registration forms under Section 6 the National Voter Registration Act shall include the following:

"(i) The question ‘Are you a citizen of the United States of America?’ and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.

(ii) The question ‘Will you be 18 years of age on or before election day?’ and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.

(iii) The statement ‘If you checked ‘no’ in response to either of these questions, do not complete this form.’

(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.”

Section 97.052(2)(b) and (r), *Florida Statutes*, requires that the uniform statewide voter registration form must be designed to elicit information from the applicant about the applicant’s date of birth and whether the applicant is a citizen of the United States. The form itself, available on the Division of Elections’ website at http://election.dos.state.fl.us, asks for date of birth and asks “Are you a U.S. citizen?” It does not use the specific language required by HAVA.

Chapter 2003-415, *Laws of Florida*, amends Section 97.052, *Florida Statutes*, by adding subsection (g) that requires language about the need for appropriate identification for first time mail applications. It does not require the specific HAVA language about age and citizenship.

The Division of Elections has reviewed this matter orally with Federal legislative and executive representatives and has concluded that the requirement applies only to Federal applications under Section 6 of the National Voter Registration Act. It believes that putting such language on State application forms will confuse voters and discourage first-time registrants. The age question, for instance, does not specify the exact election day to which it is referring and assumes that young
voters may be applying to register for a specific election rather than pre-registering as 17 year-olds in order to vote in all elections after they reach the age of 18. The Division notes that the forms used by Florida already elicit the information required by asking for date of birth and citizenship. The forms do not discourage voters by telling them to stop with the application if they must answer "No" to either question. The Division is complying with the substance of HAVA if not with the exact form of the question.
Element 2. Local Government Payments and Activities

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Introduction
The Florida Legislature has broad constitutional authority for appropriating federal and State funds annually through the appropriations bill which is eventually signed by the Governor into law. During the annual appropriations process, the Florida Legislature assesses the needs of the State and makes policy and budget decisions which impact every level of government including local government.

The funding of elections in Florida is primarily a local government responsibility since the constitutional authority for running elections rests with the local supervisor of elections. Funding authority for elections resides with the Boards of County Commissioners. Each of Florida’s 67 Boards of County Commissioners receives a budget request from the supervisor of elections and then the Board makes policy and budget decisions based upon county priorities.

There has been one major exception to this election funding scenario. Following the controversial 2000 General Election, the Governor and the citizens of Florida asked the Legislature to enact broad election reforms which included providing State financial assistance to local governments. Over a two-year period, the Legislature provided over $32 million in State funds to supplement local election budgets and to quicken the pace of election reform in Florida. Most of the State funds were appropriated to the Boards of County Commissioners using two different formulas for accomplishing distinct policy goals—to replace voting systems designated to be decertified and to enact comprehensive voter education programs in every county.

The funding formula used to upgrade voting systems had two important policy goals—to provide a minimum voting system standard of precinct-based optical scanning systems throughout Florida and to provide funding assistance to small counties with very small tax bases. The resulting formula achieved that policy goal and was as follows:
• Small Counties (population 75,000 or below) received $7,500/precinct
• Large Counties (population 75,001 and above) received $3,750/precinct

The Legislature used a different formula to provide State funds for voter education and poll worker recruitment and training. This formula was based upon taking available State funds and distributing them on a per registered voter basis per county. The resulting formula was determined by taking approximately $6,000,000 in available State funds and dividing it by the number of registered voters during the 2000 General Election and appropriating that money on a pro-rata basis to each county. The resulting appropriation provided $5,949,375 to counties to fund comprehensive voter education programs and poll worker recruitment and training programs. The combined State and local efforts led to greater voter satisfaction during the 2002 General Election.

Pursuant to the appropriation, the Florida Legislature required each county supervisor of elections to submit a detailed description of the plans to be implemented and also a detailed report on the success of the voter education effort. These reports were sent to the Division of Elections and subsequently compiled by the Division into a report sent to the Governor and Florida Legislature.

While the State funds were widely valued, the counties still provided a majority of funding for election reform efforts. According to the 2002 Governor’s Select Task Force on Election Procedures, Standards and Technology, a survey of 33 county governments revealed they spent nearly $110 million toward new voting systems before the 2002 primary and general elections.

If the Florida Legislature determines that it will provide funding for units of local governments and other entities, then how will the requirements payments be distributed and monitored, including—

A. A description of the criteria used to determine the eligibility of such units and entities for receiving payment.

B. A description of the methods to be used by Florida to monitor the performance of the units of entities to whom the payments is distributed, consistent with the performance goals and measures adopted under paragraph (8).

The Help America Vote Act of 2002 (HAVA) Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. During HAVA Planning Committee discussions, members proposed several recommendations that would provide funding for units of local government. The recommended payments to local government are listed below:
Replacement and Reimbursement For Punch Card And Lever Machines
The HAVA Planning Committee recommends that the estimated $11.74 million received pursuant to Section 102 of HAVA be distributed to the State and to the counties on a pro-rated basis for their respective contributions to replace punch cards and lever machines during the 2001-2002 and 2002-2003 fiscal years.3

Accessible Voting Systems for Voters With Disabilities
The HAVA Planning Committee recommends that HAVA funds should be distributed to counties during the 2004-2005 fiscal year to help them meet Section 301 Title III accessibility requirements by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of machines accessible for persons with disabilities needed for each county to have one per polling place. The Division of Elections would have the responsibility for determining eligibility of counties receiving HAVA funds.

Secondly, if HAVA funds are available, the HAVA Planning Committee recommends that HAVA funds be distributed as a reimbursement on a pro-rated basis to local governments that purchased accessible voting systems and components during the 2001 and 2002 fiscal years.

Statewide Voter Education Program
For the 2003-2004, 2004-2005, and 2005-2006 fiscal years, the HAVA Planning Committee recommends that local governments receive a total of $9 million dollars ($3 million each fiscal year) for comprehensive voter education efforts. HAVA funds for voter education should be distributed using a similar formula as used in 2001. The Division of Elections should be responsible for determining eligibility of any county for the receipt of State or federal funds used in HAVA election reform activities.

The Division of Elections should be responsible for monitoring the use of funds in accordance with established State procedures. Prior to receiving any funds from the Division, each of Florida’s 67 supervisors of elections must enter into a contractual agreement with the State. The contract must affirm what the funds are to be used for and it must provide proof that the counties have matching dollars, if required.

The Division of Elections will monitor the performance of the contract agreements entered into between the State and each county. Each county must meet the contractual requirements before payment is approved.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures may include random program

3 The 2003 General Appropriations Act passed by the Legislature required the Department of State to transfer all amounts eligible for reimbursement under Section 102 of HAVA to the State’s Working Capital Fund.
audits by the Department of State's Inspector General as well as an annual audit by the Florida Auditor General's office to ensure funds are being expended for the authorized purposes.

To monitor the use of the voter education funds at the local level, the HAVA Planning Committee recommends that the Florida Legislature require each county to establish a fund to be used to deposit funds received from the federal or State governments for election reform activities. If a county match is required, it will also be deposited into this account. The funds will not be commingled with other funds which may be appropriated to the supervisor of elections by the county. Funds in this account will be used for the activities for which the funds were received and, unless otherwise specified in the appropriation, there is no requirement for the funds to be used during a certain time.

Also during the 2003-2004, 2004-2005, and 2005-2006 fiscal years, the Division of Elections recommends that the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement receive HAVA funding to assist in the development of the new statewide voter registration system. The Division of Elections will enter into a contractual agreement with these other state-level departments and monitor the contracts in accordance with standard auditing procedures for monitoring the use of federal funds.
Element 3. Voter Education, Election Official Education & Training, Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Introduction
A wide array of national and State task force reports have highlighted the need for a more informed electorate. To achieve this goal, voters, election officials, and poll workers must receive better information and training. Florida assigns the primary responsibility for these daunting tasks to the Department of State and the county supervisors of elections. Following election 2000, the Legislature has more clearly delineated the role of each in improving the education of voters, election officials, and poll workers.

The Florida Election Reform Act of 2001 set deadlines, included a wide array of topics to be addressed by State and county election officials, granted rule making authority to the Department of State, and established a procedure for measuring the effectiveness of the programs and making recommendations to the Governor and the State Legislature. Various acts passed during the 2002 legislative session broaden the scope of voter education responsibilities, more definitively spell out voter rights, and ensure that Florida’s electoral system conforms to the Americans with Disabilities Act of 1990. Each of these changes has been communicated to election officials at all levels and to the public at-large.

The Election Reform Act of 2001 required all 67 county supervisors of elections to file voter education plans with the Division of Elections in the Department of State in order to qualify for State funds. (The Act appropriated nearly $6 million for voter education in fiscal year 2001-2002 in addition to $24 million for purchase of new voting equipment, fiscal years 2001-2003.) The Department of State, as directed by the Legislature, established minimum standards for nonpartisan voter education to be met by each county.

Voter education plans filed with the Division of Elections in the Secretary of State’s office are filled with creative approaches. These outreach mechanisms are designed by the elections supervisors:

(1) to better inform their county’s residents about registration and voting; and,
(2) to reduce the levels of voter error and confusion that existed during the 2000 election cycle.

The approaches used by the 67 individual counties vary considerably, reflecting differences in their demographic and socioeconomic composition (e.g., land area, rural-urban location, age, race/ethnicity, education), county funding levels, and media availability.
Significant changes to Florida’s election laws and the advent of new voting equipment have made poll worker education a high priority—as recognized in the Florida Election Reform Act of 2001. Florida’s counties have restructured their poll worker training programs. State law now requires supervisors of elections to cast their poll worker recruitment nets wider, as the number of poll workers needed escalates in a fast-growing state.

Section 254(a)(3). How will the State of Florida provide for programs for voter education which will assist the State in meeting the requirements of Title III?

Florida has adopted extensive voter education requirements and funded county voter education programs ($6 million in 2001). The Help America Vote Act of 2002 (HAVA) Planning Committee recommends an additional $3 million in each of the next three fiscal years for local voter education programs.

Joint Responsibility of Department of State and County Supervisors of Elections

Section 98.255(1), Florida Statutes, directed the Department of State to “adopt rules prescribing minimum standards for nonpartisan voter education” by March 1, 2002. The standards were to address (but were not limited to):

(1) voter education;
(2) balloting procedures for absentee and polling place;
(3) voter rights and responsibilities;
(4) distribution of sample ballots; and,
(5) public service announcements.

In developing the rules, the Department was instructed to “review current voter education programs within each county of the state.” The Department of State adopted Rule 1S-2.033, F. A. C., Standards for Nonpartisan Voter Education on May 30, 2002.

Section 98.255(2), Florida Statutes, requires each supervisor of elections to “implement the minimum voter education standards” and “to conduct additional nonpartisan education efforts as necessary to ensure that voters have a working knowledge of the voting process.”

Minimum Nonpartisan Voter Education Standards

The Department of State’s “Standards for Nonpartisan Voter Education,” Rule 1S-2.033, F. A. C., requires the following voter education practices:

Comprehensive Voter Guide: Contents

Department of State Rule 1S-2.033, F. A. C., Standards for Nonpartisan Voter Education, requires supervisors of elections to create a Voter Guide which shall include: how to register to
vote; where voter registration applications are available; how to register by mail; dates for upcoming elections; registration deadlines for the next primary and general election; how voters should update their voter registration information such as changes in name, address or party affiliation; information on how to obtain, vote and return an absentee ballot; voters' rights and responsibilities pursuant to Section 101.031, Florida Statutes; polling information including what times the polls are open, what to bring to the polls, list of acceptable IDs, what to expect at the polls; instructions on the county's particular voting system; supervisor contact information; and any other information the supervisor deems important.

**Voter Guide: Extensive Distribution**

Department of State Rule 1S-2.033(1)(b), F.A.C., requires supervisors of elections to “provide the Voter Guide at as many places as possible within the county including: agencies designated as voter registration sites pursuant to the National Voter Registration Act; the supervisor’s office; public libraries; community centers; post offices; centers for independent living; county governmental offices; and at all registration drives conducted by the supervisor of elections.”

**Voter Guide, Sample Ballot, & Website Consistency Required**

Department of State Rule 1S-2.033(2), F.A.C., states that: “If a supervisor has a website, it must take into account all of the information that is required to be included in the Voter Guide. In addition, when a sample ballot is available, the website must provide either information on how to obtain a sample ballot or a direct hyperlink to a sample ballot.”

**Targeted Voter Education: High School Students**

Florida’s Department of State Rule 1S-2.033(3), F.A.C., instructs the supervisors of elections to work with county school boards to develop voter education and registration programs for high school students. Specifically, the rule requires that “At least once a year in each public high school in the county, the supervisor shall conduct a high school voter registration/education program. The program must be developed in cooperation with the local school board and be designed for maximum effectiveness in reaching and educating high school students.”

**Targeted Voter Education: College Students**

Florida’s Department of State Rule 1S-2.033(4), F.A.C., dictates that “At least once a year on each college campus in the county, the supervisor shall provide a college registration/education program. This program must be designed for maximum effectiveness in reaching and educating college students.”

**Targeted Voter Education: Senior Citizens and Minority Groups**

Department of State Rule 1S-2.033(7), F.A.C., requires supervisors of elections to “conduct demonstrations of the county’s voting equipment in community centers, senior citizen residences, and to various community groups, including minority groups.” Rule 1S-2.033(8), F.A.C., specifically instructs the supervisors to use minority media outlets to provide more information to voters.
Targeted Voter Education: Individuals and Groups Sponsoring Voter Registration Drives

Department of State Rule 1S-2.033(6), F.A.C., specifically instructs supervisors of elections to "provide, upon reasonable request and notice, voter registration workshops for individuals and organizations sponsoring voter registration drives." Section 98.015(9), Florida Statutes, states that "each supervisor must make training in the proper implementation of voter registration procedures available to any individual, group, center for independent living, or public library in the supervisor's county."

Posting of Educational Materials on Voter Rights and Responsibilities

Department of State Rule 1S-2.033(5), F.A.C., requires supervisors of elections to "post the listing of the voters' rights and responsibilities pursuant to Section 101.031, Florida Statutes, at the supervisor's office." Section 101.031(2), Florida Statutes, spells out the specific format of the Voter's Bill of Rights and Responsibilities to be posted by the supervisor of elections at each polling place. The Department of State, or in case of municipal elections the governing body of the municipality, is required "to print, in large type on cards, instructions for electors to use in voting," including the list of rights and responsibilities and other information about how to vote deemed necessary by the Department of State—Section 101.031(1), Florida Statutes. At least two cards shall be provided to each precinct.

Educating Voters About Polling Place and Precinct Changes, Revised Voter Identification Cards

Department of State Rule 1S-2.033, F.A.C., mandates that supervisors of elections "shall provide notice of changes of polling places and precincts to all affected registered voters." "This notice shall include publication in a newspaper of general circulation as well as posting the changes in at least ten conspicuous places in the county. If the supervisor has a website, the supervisor shall post the changes on the website. The supervisors shall also widely distribute a notice that if a voter does not receive a revised voter identification card within 20 days of the election the voter should contact a specific number at the supervisor's office to obtain polling place information."

Voter Education Through the Media

Department of State Rule 1S-2.033(8), F.A.C., requires supervisors of elections to interface with the media to better inform the electorate. Supervisors are to "participate in available radio, television and print programs and interviews, in both general and minority media outlets, to provide voting information."

Voter Education Through the Internet

The Division of Elections' website (http://election.dos.state.fl.us/) offers extensive information regarding registration, elections (dates, district maps, results, Division reports, forms, publications, voter turnout, supervisor of elections' contact information), voter fraud, voting systems, laws/opinions/rules, candidates and committees, the initiative petition process, and other helpful government links.
Voter Education About Fraud
Section 97.012(12), Florida Statutes, requires the Secretary of State to “...provide election fraud education to the public.”

Procedures for Constant Analysis of Voter Education Effectiveness
Section 98.255(3)(a), Florida Statutes, requires supervisors of elections to file a report by December 15 of each general election year with the Department of State. This report is “a detailed description of the voter education programs implemented and any other information that may be useful in evaluating the effectiveness of voter education efforts.”

Section 98.255(3)(b), Florida Statutes, requires the Department of State to review the information submitted by the supervisors and “prepare a public report on the effectiveness of voter education programs” and to “submit the report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 31 of each year following a general election.”

Further, Section 98.255(3)(c), Florida Statutes, instructs the Department of State to use “the findings in the report as a basis for adopting modified [voter education] rules that incorporate successful voter education programs and techniques as necessary.”

This procedure was first used in the 2002 election cycle. The Division of Elections requested each supervisor of elections to list in detail the voter education programs conducted during the 2002 election cycle and the approximate cost of each program. The supervisors were asked to rank the effectiveness of each program on a scale of 1 to 5, with 5 being the highest possible rank. On January 31, 2003, the Florida Department of State, Division of Elections, submitted its “Report on Voter Education Programs During the 2002 Election Cycle Pursuant to Section 98.255(3), Florida Statutes.” The report concluded that “most supervisors ranked the county voter education programs as 4 or 5 in effectiveness in reaching the target community.” (There were ten broad categories of voter education programs: sample ballots; elementary/middle school/high school/university and community college outreach; websites; miscellaneous promotional materials; public appearances/television and movie theatre advertisements; banners and billboards, radio and public transport advertisements; newspapers and mailers; voting system demonstrations; outreach to minority, disabled and senior communities; and voter registration drives.) The Department of State made three recommendations in its post-election 2002 report:

(1) The Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts;
(2) The Legislature should require sample ballots to be mailed to households or voters prior to each Primary and General Election.
(3) The Division of Elections should provide a list of cost-effective voter education programs used by counties so that all counties can benefit from these ideas.
(The 2002 Governor’s Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002 also recommended improving “voter education by requiring all supervisors of elections to mail generic sample ballots to each household with registered voters.”)

Section 101.595, Florida Statutes, also requires supervisors of elections to submit a report to the Department of State no later than December 15 of each general election year detailing “[t]he total number of overvotes and undervotes in the first race appearing on the ballot pursuant to Section 101.151(2), along with the likely reasons for such overvotes and undervotes and other information as may be useful in evaluating the performance of the voting system and identifying problems with ballot design and instructions which may have contributed to voter confusion.” The Department of State must prepare a report analyzing that information and submit it to the Governor, the President of the Senate, and the Speaker of the House by January 31 of the year following a general election. The report is to include recommendations for correcting any problems with ballot design or instructions to voters.

This procedure was first used in the 2002 election cycle. “Analysis and Report of Overvotes and Undervotes for the 2002 General Election Pursuant to Section 101.595, Florida Statutes” found a substantial reduction in the level of overvotes and undervotes in 2002 (compared to 2000) and concluded that new technology and the counties’ voter education efforts were major factors contributing to the reduction in voter error. The report’s recommendations were:

1. The Division of Elections should continue to monitor the overvotes and undervotes from each general election.
2. The Florida Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts.
3. The Division of Elections should review the recommendations for ballot instructions for incorporation into the uniform ballot rule.
4. All voting system vendors should continue to improve the design of their voting systems in order to better meet the needs of Florida’s voters.

Florida’s system for constant evaluation of the effectiveness of voter education by both the county supervisors of elections and the Department of State is in place and operating.

What needs to be done? Educational materials must be updated to provide absentee voters with better instructions on how to mark a ballot and how to correct their ballots and how to request a replacement ballot if the voter is unable to change the original ballot. (This is necessary to meet Section 301(a)(1)(B) HAVA requirements.) This will be done once the amendment to Section 101.65, Florida Statutes, becomes law and Department of State rule changes have been adopted. Both are expected to be in effect by January 1, 2004—before the HAVA deadline of January 2006.
Educational materials must be updated giving a voter written notice at the time of casting a provisional ballot that he or she can find out if the ballot was counted, or if not, why, through a free access system, restricted to the individual voter—Section 302(a)(5)(A)&(B) HAVA requirements.

Educational materials available to voters at the polling place must be updated to conform to HAVA voting information requirements—Section 302(b)(2)(A through F) to post: sample ballots at polls; the election date; identification instructions for mail registrants who are first time voters; and information on who to contact if general voting rights under State and federal laws are violated.

Educational materials should be updated as needed to include information on law and rule changes. The procedures for informing Florida voters, election officials, and poll workers of these changes are in place in statutes and rule making authority.

Section 254(a)(3). How will the State of Florida provide for programs for election official education and training which will assist the State in meeting the requirements of Title III?

The State has assigned responsibility for education and training of election officials to the Secretary of State. The Division of Elections prepares and distributes educational materials for, and conducts the training of, supervisors of elections and their staffs.

The Secretary of State is the State’s chief election officer whose responsibilities are spelled out in Section 97.012, Florida Statutes. Among those responsibilities are explicit requirements to: “provide technical assistance to the supervisors of elections on voter education and election personnel training services;” “provide technical assistance to the supervisors of elections on voting systems;” “provide training to all affected state agencies on the necessary procedures for proper implementation of [Chapter 97 of the Florida Statutes];” and “coordinate with the United States Department of Defense so that armed forces recruitment offices administer voter education in a manner consistent with the procedures set forth in [Florida election] code for voter registration agencies.”

The Division of Elections conducts voter education and election personnel training, issues advisory opinions that provide statewide coordination and direction for interpreting and enforcing election law provisions, provides technical advice on voting systems and equipment and State and federal election laws, certifies voting equipment, and provides written election information to candidates (Office of Policy Analysis and Government Responsibility, Justification Review, Report No. 02-55, October 2002).

The Division of Elections oversees and approves training courses for continuing education for supervisors of elections. It coordinates, on an annual basis, two statewide workshops for the
supervisors of elections by reviewing and providing updates on the election laws to ensure uniformity statewide in the interpretation of election laws. These are generally held in conjunction with the Florida State Association of Supervisors of Elections' Conferences held in January and June. The division oversees certification for supervisors of elections through which supervisors obtain credits to maintain job proficiency. The Division may also conduct regional workshops for supervisors and staff, universities, and community colleges, and State agencies. When Select Task Forces are created by the Governor, Secretary of State, or other State officials, the Division provides administrative and technical assistance. (Florida Department of State, Division of Elections, 2001 Annual Report).

All Division of Elections' forms, rules, handbooks, opinions, etc. are available on the Internet via the Division’s website—an award-winning site (http://election.dos.state.fl.us/). Section 97.026, Florida Statutes, states “It is the intent of the Legislature that all forms required to be used in chapters 97-106 [the election code], shall be made available upon request, in alternative formats” including the Internet (with the exception of absentee ballots).

The HAVA Planning Committee recommends that the Division of Elections also conduct training courses for the continuing education of city election officials in conjunction with meetings of the Florida Association of City Clerks.

<table>
<thead>
<tr>
<th>Section 254(a)(3). How will the State of Florida provide for programs for poll worker training which will assist the State in meeting the requirements of Title III?</th>
</tr>
</thead>
</table>

Florida has adopted extensive poll worker recruitment and training requirements and funded county poll worker training (as part of the $6 million voter education appropriation in 2001). The State has: adopted minimum-hours-of-training requirements; spelled out training content requirements; prepared a uniform polling place procedures manual; and mandated a statewide and uniform program for training poll workers on issues of etiquette and sensitivity with respect to disabled voters.

State law permits inspectors, clerks, and deputy sheriffs attending poll worker training to receive compensation and travel expenses—Section 102.021(2), Florida Statutes.

Joint Responsibility of Department of State and County Supervisors of Elections
Section 102.014, Florida Statutes, assigns responsibility for poll worker training to county supervisors of elections and the Department of State.

Section 102.014(1), Florida Statutes, requires supervisors of elections to conduct training for inspectors, clerks, and deputy sheriffs prior to each primary, general, and special election “for the purpose of instructing such persons in their duties and responsibilities as election officials.” Training is mandatory to work at the polls.
Section 102.014(5), *Florida Statutes*, directs the Department of State to “create a uniform polling place procedures manual and adopt the manual by rule” and to revise it “as necessary to address new procedures in law or problems encountered by voters and poll workers at the precincts.” Rule IS-2.034, *F.A.C.*, Polling Place Procedures Manual (Form DS-DE 11; 4/02), was adopted on July 4, 2002. The manual, to be available in either hard copy or electronic form at every precinct on Election Day, must be “indexed by subject, and written in plain, clear, unambiguous language.”

Under Section 102.014(7), *Florida Statutes*, the Department is assigned the responsibility for developing “a mandatory, statewide, and uniform program for training poll workers on issues of etiquette and sensitivity with respect to voters having a disability.” But county supervisors of elections are responsible for conducting such training. They are required to “contract with a recognized disability-related organization, such as a center for independent living, family network on disabilities, deaf service bureau, or other such organization, to develop and assist with training the trainers in disability sensitivity programs.”

**Poll Worker Training Content**

The content of poll worker training is detailed in State statutes.

Clerks must demonstrate “a working knowledge of the laws and procedures relating to voter registration, voting system operation, balloting and polling place procedures, and problem-solving and conflict-resolution skills”—Section 102.014(1), *Florida Statutes*.

The Uniform Polling Place Procedures Manual must include: regulations governing solicitation by individuals and groups at the polling place; procedures to be followed with respect to voters whose names are not on the precinct register; proper operation of the voting system; ballot handling procedures; procedures governing spoiled ballots; procedures to be followed after the polls close; rights of voters at the polls; procedures for handling emergency situations; procedures for dealing with irate voters; the handling and processing of provisional ballots; and security procedures—Section 102.014(5)(a-k), *Florida Statutes*. The manual “shall provide specific examples of common problems encountered at the polls on election day, and detail specific procedures for resolving those problems.”

Poll worker training on issues of etiquette and sensitivity for disabled voters “must include actual demonstrations of obstacles confronted by disabled persons during the voting process, including obtaining access to the polling place, traveling through the polling area, and using the voting system”—Section 102.014(7), *Florida Statutes*.

**Poll Worker Minimum Hours of Training**

Section 102.014(4), *Florida Statutes*, specifies that clerks must have had a minimum of three hours of training prior to each election to be eligible to work at the polls. For inspectors, there is
a minimum of two hours of training. Section 102.014(7), Florida Statutes, requires one hour involving training related to etiquette and sensitivity with regard to voters with disabilities.

Poll Worker Recruitment
Supervisors of elections are required to “work with the business and local community to develop public-private programs to ensure the recruitment of skilled inspectors and clerks”—Section 102.014(6), Florida Statutes.

What needs to be done? There is no established procedure for evaluating the effectiveness of poll worker training or recruitment as there is for voter education. The 2002 Governor’s Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002, recommended “establishing minimum standards for poll worker performance” and “improving poll worker recruitment and training by launching a statewide “Be a Poll Worker” campaign.

The HAVA Planning Committee recommends that the Division of Elections establish a procedure to evaluate the effectiveness of poll worker recruitment and training in all 67 counties.
Element 4. Voting System Guidelines and Process

How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

Introduction
There are several governmental bodies and agencies that participate in the adoption of voting systems in Florida. The Florida Legislature has great authority to set voting system requirements and does so in Chapter 101, Florida Statutes. The legislature also delegates rule making and certification authority to the Bureau of Voting Systems Certification in the Division of Elections under the Secretary of State.

After voting systems are independently tested and certified for use in Florida, Section 101.5604, Florida Statutes, provides that the Board of County Commissioners “at any regular or special meeting called for the purpose, may, upon consultation with the supervisor of elections, adopt, purchase or otherwise procure, and provide for the use of any electronic or electromechanical voting system approved by the Department of State in all or a portion of the election precincts of that county.”

To keep Florida’s voting systems standards up-to-date, Section 101.015, Florida Statutes, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”

Section 254(a)(4) How will the State of Florida adopt voting system requirements and processes which are consistent with the requirements of Section 301?

Florida’s laws and regulations for adopting voting systems that are consistent with the requirements of Section 301 are clearly outlined in Florida Statutes and the Florida Voting Systems Standards.

Section 101.015, Florida Statutes, authorizes the Department of State to adopt rules which establish minimum standards for hardware and software for electronic and electromechanical voting systems.

Section 101.017, Florida Statutes, creates the Bureau of Voting Systems Certification which provides technical support to the supervisors of elections and is responsible for voting system standards and certification.

Section 101.5605, Florida Statutes, authorizes the Department of State to examine and approve voting systems through a public process to ensure that the voting systems meet the standards.
outlined in Section 101.5606, *Florida Statutes*, and similar standards outlined in the Help America Vote Act of 2002 (HAVA) requirements outlined in Section 301 of Title III.

Section 101.5604, *Florida Statutes*, authorizes the Board of County Commissioners to adopt voting systems.

Sections 101.293-101.295, *Florida Statutes*, outline the public bidding process that counties should follow in purchasing voting systems.

Section 101.56062, *Florida Statutes*, exceeds the accessibility standards of HAVA Section 301 "Accessibility for Individuals With Disabilities." The HAVA Planning Committee has recommended that the Florida Legislature take advantage of federal funding and bring Florida into compliance and make Section 101.56062, *Florida Statutes*, effective by January 1, 2006 or one year after general appropriations are made, whichever is earlier.

Section 101.015, *Florida Statutes*, requires the Department of State to review "the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial."
Element 5. Florida’s Help America Vote Act of 2002 (HAVA) Election Fund

How the State will establish a fund described in subsection (b) for purposes of administering the State’s activities under this part, including information on fund management.

To clarify, Section 254(b) states that a fund described in this subsection with respect to a State is a fund which is established in the treasury of the State government, which is used in accordance with paragraph (2), and which consists of the following amounts:

(A) Amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made to the State under this part.
(B) The requirements payment made to the State under this part.
(C) Such other amounts as may be appropriated under law.
(D) Interest earned on deposits of the fund.

Section 254(a)(5) How will the State of Florida establish a fund for the purpose of administering the State’s activities under this part?

All HAVA funds will be maintained in a trust fund that has already been established by the Department of State. Within this trust fund, monies received for HAVA Sections 101, 102 and Title II will be set up into four accounts: 101-Election Administration, 102-Replace Punch Card and Lever Voting Systems, 251-Requirements Payment, and 261-Access for Individuals with Disabilities.

Section 254(a)(5) How will the State of Florida manage this fund?

Any HAVA funds received by the State will be used exclusively for activities authorized by HAVA. The Division of Elections is responsible for tracking and monitoring the use of funds in accordance with established State procedures.

The Director of the Division of Elections will have final signing authority for HAVA expenditures. Any interest earned on this trust fund will be returned to the principal amount of the trust.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures include random program audits by the Department of State Inspector General as well as an annual audit by the Florida Auditor General.
The Governor and Secretary of State will be responsible under HAVA for ensuring compliance with these requirements. The HAVA Planning Committee recommends that the Governor and the Secretary of State maintain contact with the Senate President and the Speaker of the House of Representatives to ensure they remain aware of the strict requirements set in law for the use of HAVA monies placed in this trust fund.
Element 6 – Florida’s Budget for Implementing the Help America Vote Act of 2002 (HAVA)

The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on –

(A) the costs of the activities required to be carried out to meet the requirements of Title III;
(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) the portion of the requirements payment which will be used to carry out other activities.

Introduction

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. This budget reflects the HAVA Planning Committee’s best efforts to divide the funds that may be available during the three years identified in HAVA. If Florida receives more funds than are included in this budget, the HAVA Planning Committee will revise the budget to reflect this change.

During the HAVA Planning Committee discussions, members determined the following to be priorities for using HAVA funds in Florida:

Reimbursement for replacement of punch card and lever machines.
Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. Under Section 102 of HAVA, the State of Florida is eligible to receive as a reimbursement approximately $11.7 million. The HAVA Planning Committee recommends that HAVA funds be distributed to the State and to each county that replaced outdated punch card and lever voting machines following the 2000 General Election on a pro rata basis.

Statewide Voter Registration System.
The HAVA Planning Committee recommends $1 million in HAVA funds be used for Phase One development of the statewide voter registration system required under Title III. These funds will be used for a variety of consulting fees, purchases of hardware and software for system development, expenses incurred by staff in the Division of Elections and travel expenses for advisory board members who assist with design of the project.
For the development and operation of the new statewide voter registration system required under HAVA, the HAVA Planning Committee recommends that the State of Florida create nine new positions.

- Two positions under the Department of Highway Safety and Motor Vehicles
- Two positions under the Department of Law Enforcement
- Five positions under the Department of State

It is anticipated that a significant portion of HAVA funds will be used for the design and implementation of the statewide voter registration database. Research conducted during Phase One of the system development will provide the State of Florida with an estimate of the cost of the new voter registration system. A preliminary estimate of $18.5 million has been included in this budget. However, a more precise figure will be determined during Phase One of the system development process and the HAVA Planning Committee will include this new figure in the next update of the HAVA State Plan, if available.

Section 301 Accessible Voting Systems
The HAVA Planning Committee recommends, in order to meet HAVA accessibility for voters with disabilities requirements, the purchase of Direct Recording Equipment (DRE) accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The estimated cost is $11.6 million during the 2004-2005 fiscal year.

In addition, the HAVA Planning Committee recommends reimbursing counties that have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million.

Voter Education
The HAVA Planning Committee recommends using HAVA funds for the development and implementation of a comprehensive statewide voter education program. The estimated expenditure is a total of $9 million distributed to the counties and spread over the 2003-2004, 2004-2005 and 2005-2006 fiscal years.

Poll Worker Training
The HAVA Planning Committee recommends using HAVA funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds are intended to supplement each county’s existing poll worker training budget.
Statewide Pollworker Recruitment Campaign
The HAVA Planning Committee recommends that HAVA funds be used to implement, through the Division of Elections, a statewide campaign to help recruit qualified pollworkers. The increase in the complexity of voting systems and procedures has resulted in a need for more computer literate individuals to staff the polling places and help ensure error-free elections. It is estimated that $500,000 in HAVA funds should be expended by the Department of State in the 2003-2004 fiscal year.

HAVA Oversight and Reporting
The HAVA Planning Committee recommends that the Department of State create three full time positions to manage HAVA implementation. The estimated cost for HAVA oversight and reporting is $206,079 for the 2003-2004 fiscal year, $196,485 for the 2004-2005 fiscal year and $200,719 for the 2005-2006 fiscal year.

- HAVA administrator
- Grants specialist
- Administrative assistant

State Management (HAVA Planning Committee)
The HAVA Planning Committee recommends that the Secretary of State require it to meet twice each year in 2003-2004 and in 2004-2005 to make recommendations and to resubmit the HAVA State Plan to ensure that Florida is meeting the requirements of the Help America Vote Act. This participatory process will convene once in the 2003-2004 fiscal year at an estimated cost of $30,000, twice in the 2004-2005 fiscal year at an estimated cost of $60,000 and once in the 2005-2006 fiscal year at an estimated cost of $30,000.

Performance Goals and Measures Adoptions
The HAVA Planning Committee recommends the Secretary of State utilize the HAVA Planning Committee to determine performance goals and measures. The estimated cost is $160,000 to be expended in the 2003-2004 and 2004-2005 fiscal years.

Election Administration
The HAVA Planning Committee recommends HAVA funds be used for the design and production of new voter registration forms and publications, and translations for all election administration forms and publications. The estimated cost is $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006.
Complaint Procedures
Section 402(a) of HAVA requires each State to establish State-based administrative complaint procedures for any person who believes that there is or will be a violation of any of HAVA’s Title III requirements. The HAVA Planning Committee recommends that HAVA funds in the amount of $50,000 per year for the 2004-2005 and 2005-2006 fiscal years be budgeted for the administration of the complaint procedures process.

Requirement 6
(A) Based on the State’s best estimates, what are the costs of the activities required to carry out to meet the requirements of Title III?
(B) What portion of the requirements payment will be used to carry out activities to meet such requirements?
(C) What portion of the requirements payment will be used to carry out other activities?

This information is displayed in charts on pages 53 and 54.

Element 7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Introduction
The funding provided under the Help America Vote Act of 2002 (HAVA) is intended to pay for new or enhanced election efforts and is not intended to supplant existing funding at the State or county level. The projected HAVA budget is based on the assumption that the State of Florida and counties will maintain the foundation of election operating expenditures for the fiscal year ending prior to November 2000.

The Florida Division of Elections provides statewide coordination and direction for the interpretation and enforcement of election laws. The Division’s budget supports year-round staff that provides election-related assistance to Florida’s 67 county supervisors of elections and their staff, municipalities, special districts, county and city attorneys, candidates, political committees, committees of continuous existence, elected officials, media, the public and other election officials throughout the United States.

Section 254(a)(7) How will the State of Florida maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000?

In determining Florida’s maintenance of effort expenditures, the Division of Elections calculated 1999-2000 fiscal year expenditures which included salaries and benefits, operating capital outlay and voter fraud programs for the Division of Elections Director’s office and the portion of Bureau of Election Records’ expenditures pertaining to election administration. Florida’s expenditures for these activities for 1999-2000 fiscal year totaled $3,082,224.

In order to comply with Section 254(a)(7) of HAVA, the Florida Department of State will maintain expenditures on similar activities at a level equal to the 1999-2000 fiscal year budget.

The HAVA Planning Committee recommends that the Secretary of State communicate to the Senate President and the Speaker of the House of Representatives the importance of maintaining this maintenance of effort figure, as a minimum level of expenditures, to ensure the required level of spending is appropriated by the Florida Legislature.
Element 8. Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Introduction

Florida has a very decentralized election governance and administrative system. The Secretary of State is appointed by the Governor and is the legal Chief Election Official in Florida. However, the Secretary of State does not supervise the day-to-day operations of the 67 local supervisors of elections and only provides guidance through technical assistance, rules, advisory opinions, voting system certification, and producing standardized election forms.

In Florida, it is the local supervisor of elections that has constitutional authority to conduct elections through State law and rule. The supervisors are elected to 4-year terms by the registered voters of their respective counties (except for Miami-Dade’s appointed supervisor) and have broad authority to conduct the day-to-day election operations by appointing local election officials, administering voter registration, preparing ballots, administering absentee voting, conducting poll worker training, and developing voter education programs.

Yet, the new Help America Vote Act of 2002 (HAVA) requires the State and not the local supervisors to adopt performance goals and measures for determining statewide and local election reform success.

It should be noted that Florida already requires certain reports on the performance of voting systems and voter education. By December 15 of each general election year, the Florida Legislature requires local supervisors of elections to report on performance measures such as overvotes and undervotes, ballot designs, and voting instructions (Section 101.595, Florida Statutes). Similarly, the Florida Legislature requires local supervisors of elections by December 15 of each year following a general election to prepare a public report on the effectiveness of voter education programs (Section 98.255(3)(a), Florida Statutes).

However, neither of these statutes follows the specific format that is required under HAVA. Nor do the statutes or rules outline performance measures for the remaining elements of the HAVA State Plan.

Florida must comply with this HAVA requirement. The most effective and egalitarian way for Florida to define election reform success of HAVA is to carry out a collaborative process similar
to the HAVA Planning Committee. The participatory process will ensure that Florida will clearly define the goals, the success measures, the timetables, and accountable officials through a public forum consisting of State election officials, local election officials, and interested citizens.

Section 254(a)(12) How will Florida adopt performance goals and measures that will be used by the State to determine its success and the success of local government in carrying out the plan, including—

- Timetables for meeting the elements of the plan
- Descriptions of the criteria the State will use to measure performance
- The process used to develop such criteria
- A description of which official is to be held responsible for ensuring that each performance goal is met?

In the spirit of HAVA and in participatory election reform, the HAVA Planning Committee recommends that the Secretary of State utilize the HAVA Planning Committee for determining its performance measures and goals for successfully carrying out the HAVA State Plan. The composition of the HAVA Planning Committee consists of State and local election officials, along with interested citizens. The overall goals of the HAVA Planning Committee are:

1. To recommend specific success factors, outline timetables, and assign accountability toward meeting the goals of the HAVA State Plan.

2. To continue building public participation and confidence in Florida’s election reform process.

The HAVA Planning Committee should begin work as soon as possible and finish its work no later than the end of 2003. It should conduct its business in the same manner as the HAVA State Plan was developed utilizing locations around the State to encourage public participation. The HAVA Planning Committee suggests that the Secretary of State use a qualified facilitator to assist in this process. The funding to develop the performance goals and measures should come from HAVA Section 101 federal funds.

The HAVA Planning Committee should take each element of the HAVA State Plan and provide specific State and local criteria which are measurable and within HAVA deadlines. The HAVA Planning Committee should define the HAVA State Plan elements and prepare specific goals and measurements to determine success. The HAVA Planning Committee should address the following 13 planning elements:

1. Voting Systems—Absentee ballot issues, Accessibility issues (Not in compliance)
2. Provisional Voting and Information (Not in compliance)
3. Voter Registration System (Not in compliance)
4. Voter Education Programs, Election Official Training, and Poll Worker Training (In compliance)
5. Voting System Guidelines and Process (In compliance)
6. State Trust Fund (In compliance)
7. State Budget (In compliance)
8. Maintenance of Effort (In compliance)
9. Administrative Complaint Process (In compliance)
10. Title One Payments and Activities (In compliance)
11. State HAVA Management (In compliance)
12. Changes to HAVA State Plan (In compliance)
13. HAVA Planning Committee and Procedures (In compliance)

The measurable criteria should provide State and local election officials clear information about what stage, how and who is implementing the HAVA State Plan. Listed below is a sample of how the HAVA Planning Committee might outline and define performance goals and measures. Included in this process would be a description of the major elements, the mandated deadline, goals of the planning element, measurable criteria, and the accountable official.

Element 9. State-Based Administrative Complaint Procedures to Remedy Grievances

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Introduction
To receive any requirements payment pursuant to the Help America Vote Act of 2002 (HAVA), the State of Florida must establish and maintain State-based administrative complaint procedures which meet HAVA's requirements to:

1. be uniform and nondiscriminatory;
2. provide that any person who believes that there is or will be a violation of any of HAVA's Title III requirements may file a complaint;
3. require the complaint to be in writing, sworn and notarized;
4. permit complaints to be consolidated;
5. hold a hearing on the record at the request of the complainant;
6. provide an appropriate remedy if the State determines that there is a violation of any Title III provision;
7. if the State determines there is no violation, dismiss the complaint and publish the results of procedures;
8. make a final determination on a complaint within 90 days after filing unless the complainant consents to a longer period; and,
9. use alternative dispute resolution procedures to resolve the complaint if the State fails to resolve it within 90 days.

Section 402(a): Has Florida complied with the requirements of HAVA Section 402(a) to establish State-based administrative complaint procedures to remedy grievances?

Yes, and no further actions are required.
Appropriate administrative complaint procedures were included in Chapter 2003-415, Laws of Florida. Language in the legislation tracked HAVA's language closely. These procedures are similar to administrative procedures in Section 97.023, Florida Statutes, for resolving complaints generated by alleged violations of the National Voter Registration Act of 1993 or a voter registration or removal procedure under the Florida Election Code.

Florida's legislation established a new Section 97.0535, Florida Statutes, that, in addition to tracking HAVA's minimum requirements, included the following additional requirements not specified by HAVA:
(1) the Department of State would have sole jurisdiction for these purposes and the procedures would be the sole avenue of redress for alleged Title III violations;
(2) a complaint would have to state the alleged violation and the person or entity responsible for the violation;
(3) the Department of State would be required to inform a complainant in writing if a complaint was legally insufficient;
(4) proceedings would be exempt from Chapter 120, Florida Statutes, (Administrative Procedures Act);
(5) a hearing would be held by a hearing officer whether or not a complainant requested a hearing and specific procedures for a hearing were included in the legislation;
(6) the hearing officer would direct an appropriate remedy that then would be enforced by the Department of State;
(7) mediation would be the alternative dispute resolution method used if a final determination on a complaint was not made within 90 days of filing.
Element 10. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Introduction
Title I of the Help America Vote Act of 2002 (HAVA) is an “early out” money program for use in two areas—improving election administration and the replacement of punch card and lever voting systems. Each State is guaranteed to receive a minimum of $5 million under this program. The HAVA Planning Committee recommends using Section 101 HAVA funds for 2003-2004 activities and a combination of Section 101 and Section 252 HAVA funds for activities beginning in the 2004-2005 fiscal year and beyond.

Under Title I, Section 101 funds are to be used to improve election administration. Approved use of funds under this section includes:

(A) Complying with the requirements under Title III.
(B) Improving the administration of elections for Federal office.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.
(D) Training election officials, poll workers, and election volunteers.
(E) Developing the HAVA State Plan for requirements payments.
(F) Improving, acquiring, leasing, modifying, or replacing voting systems.
(G) Improving polling place accessibility for voters with disabilities or with limited English.
(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Under Title I, Section 102 funds are to be used to replace punch card and lever voting systems.

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. The following recommendations are based on the HAVA Planning Committee meetings held to develop the HAVA State Plan.

Section 101. How will Title I payments to Florida be used for activities to improve administration of elections?

The State of Florida will use Title I funds for election reform activities necessary to ensure Florida complies with all HAVA requirements. The following list describes the major areas in which funds may be used.
(A) Complying with the requirements under Title III

The Division of Elections will implement a statewide voter registration system to comply with HAVA Title III. The Division of Elections anticipates using $1 million appropriated from Section 101 funds for Phase One development of the new Statewide Voter Registration system. Expenditures for Phase One will include:

- Consulting fees which will be required for conducting a detailed analysis of connectivity infrastructure available in the 67 supervisor of elections' offices and within all affected offices of the departments of State, Law Enforcement and Highway Safety and Motor Vehicles; working with the counties, the three agencies and the advisory board to create minimum and optimum sets of system requirements; assessing infrastructure needs of all stakeholders to serve the system requirements; conducting “gap” analysis; outlining the physical design of the system; estimating costs and implementation plans for each version for the system to be presented to the 2004 Legislature; and developing and publishing the January 2004 report and recommendations for the 2004 Legislature.
- Purchase hardware and software for project management and system development.
- Expenses incurred by Division of Elections' staff.
- Travel expenses which will involve visiting every supervisor of elections' office and local driver license office.

In addition, Section 101 HAVA funds will be used to create nine full time positions necessary for the design, development and implementation of the Statewide Voter Registration system.

(B) Improving the administration of elections for Federal office.

Upon receipt of Title I monies, it is recommended that the Division of Elections use $250,000 in fiscal year 2003-2004 from Section 101 funds for expenses that include the design and publication of voter registration forms and other election information, translations for all election administration forms and publications, statewide voter education programs and training workshops.

In addition, funds will be required to establish a State-based complaint procedure for anyone who believes that a violation of Title III of the Help America Vote Act has occurred, is occurring or is about to occur. It is estimated that this process will be established at an estimated cost of $100,000. If no Title I funds are remaining, this activity will be funded from Section 252 HAVA funds.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.

Upon receipt of Title I monies, it is recommended that the Florida Division of Elections use approximately $9 million over a three year period for voter education programs.

These funds will be divided among Florida's 67 counties. To determine the amount each county will receive, the Division of Elections shall divide the total amount of funds appropriated by the total number of registered voters in the State of Florida for the 2002 General Election to establish a funding level per individual voter. Each county shall receive an amount equal to the funding level per individual voter multiplied by the number of registered voters in the county, as certified by the Department of State for the 2002 General Election.

(D) Training election officials, poll workers, and election volunteers.

The HAVA Planning Committee recommends using HAVA funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds are intended to supplement each county's existing poll worker training budget.

(E) Developing the HAVA State Plan for requirements payments to be submitted under part 1 of subtitle D of Title II.

There are no plans to use Title I funds for the development of Florida's HAVA State Plan for 2003-2004 fiscal year. As the State of Florida modifies its plans in future years, HAVA funds may be used.

(F) Improving, acquiring, leasing, modifying, or replacing voting systems.

Florida has already replaced its punch card and lever voting systems. It is recommended that Section 102 funds be used to reimburse the State and each eligible county, on a pro rata basis, for punch card and lever machines purchased in 2001-2002 and 2002-2003 fiscal years.

The HAVA Planning Committee also recommends that the State of Florida utilize some HAVA funds to help counties meet the accessibility requirements under Title III by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of accessible DREs for each county to have one audio ballot per polling
place. The HAVA Planning Committee estimates that these units will be purchased in the 2004-2005 fiscal year and that Section 252 HAVA funds will be used.

In addition, the HAVA Planning Committee recommends reimbursing counties who have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million and it is anticipated that Section 252 HAVA funds will be used.

(G) Improving polling place accessibility for voters with disabilities or with limited English.

Under Section 261, HAVA states the Secretary of Health and Human Services shall make a payment to eligible States to be used for making polling places accessible to individuals with disabilities and providing information on this accessibility. The State of Florida has applied for available funds under this grant program. It is recommended that these funds be distributed to each county to ensure that individuals with disabilities are provided the same opportunity for access and participation as for other voters.

(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Currently, there are no plans to use HAVA funds for establishing a free voting information hotline. If this type of voting information system is desired, it will be the responsibility of each county and monitored by the Division of Elections.

The Division of Elections has already established and plans to expand a voter fraud hotline for individuals who believe they may have witnessed election fraud.

**Section 102. How will payments to Florida be used for the replacement of punch card or lever voting machines?**

Under Section 102, the State of Florida is eligible for approximately $11.7 million which it will use as reimbursement to the State and eligible counties for funds previously spent to replace punch card and lever voting systems. Currently, 14 counties have replaced punch card and lever machines with machines that are fully compliant with HAVA.
Element 11. Help America Vote Act of 2002 (HAVA) State Plan

Management

How the State will conduct ongoing management of the plan, except the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Introduction

This element of the HAVA State Plan requires Florida to explain how the State of Florida will manage the implementation of the HAVA State Plan and whether it will utilize the same public notice process if any “material change” is made to the administration of the HAVA State Plan.

Section 251(a)(11) How will Florida conduct ongoing management of the HAVA State Plan?

As explained in previous sections of this Plan, the administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. The Secretary of State as the Chief Election Officer is responsible for the coordination of the State’s responsibilities under HAVA Section 253. The Director of the Division of Elections reports to the Secretary of State and will be responsible for the day-to-day monitoring and managing of Florida’s HAVA State Plan. Through the approval and implementation of this HAVA State Plan, it is expected that the Director will have three new positions dedicated to HAVA program management. The scope of responsibilities will range from federal reporting and grant compliance to assistance with voter education, election official training and updating the HAVA State Plan.

Also at the State level, the Secretary of State will direct the HAVA Planning Committee to update the HAVA State Plan as required in Section 255. Under Florida’s HAVA State Plan, the HAVA Planning Committee will be responsible for conducting its business in an open, public forum and for suggesting revisions and updates to the HAVA State Plan.
At the local level, Florida’s 67 supervisors of elections will be encouraged to play an active role in the successful implementation of the HAVA State Plan. The Division of Elections will continue to work on a regular basis with local supervisors of elections to develop performance goals and measures, new voter registration improvements, new voting systems certification upgrades, statewide voter education programs, election official training, and other activities outlined in Florida’s HAVA State Plan.

Section 254(a)(11) If Florida makes any material change in the administration of the HAVA State Plan, will the change—

(A) be developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

(B) be subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

(C) take effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A)?

The State of Florida understands and agrees to comply with the HAVA requirements related to ongoing management of the HAVA State Plan. No material changes in the administration of the plan will be made unless:

- the material change is developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

- the material change is subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

- the material change takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).
Element 12. Changes to State Plan for Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Introduction
This is the State of Florida’s first Help America Vote Act of 2002 (HAVA) State Plan. There are no previous plans to describe changes or successes under the HAVA. The HAVA State Plan will be updated in the next fiscal year and the Secretary of State will utilize the HAVA Planning Committee to fulfill this element of the plan.

Section 254(a)(12) When Florida has a HAVA State Plan for the previous fiscal year, will the State of Florida provide a description of how the plan reflects changes from the HAVA State Plan for the previous fiscal year and how the State succeeded in carrying out the HAVA State Plan for such previous fiscal year?

Yes, and no further actions are required.
Element 13. State Plan Development and HAVA Planning Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Introduction
To comply with the requirements of the Help America Vote Act of 2002 (HAVA), the HAVA State Plan must be developed by the chief State election official through a committee of appropriate individuals. After a preliminary plan is developed, it must be published for public inspection and comment. State officials must take public comments into account in preparing the HAVA State Plan submitted to the Federal Elections Commission.

Section 255: Has Florida complied with the requirements of section 255(a) to have the chief State election official develop the HAVA State Plan through a committee of appropriate individuals?

Yes, and no further actions are required.
Florida's Chief State Election Official, Secretary of State Glenda Hood, has the responsibility under HAVA to develop the HAVA State Plan with the assistance of the statewide HAVA Planning Committee. Section 255(a) of HAVA requires that “The chief State election official shall develop the HAVA State Plan under this subtitle through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions within the State, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens, appointed for such purpose by the chief State election official.”

Members of the HAVA Planning Committee for the State of Florida, appointed by Secretary of State Hood, are as follows:

Chairman:
Jim Smith of Leon County, former Secretary of State and former Attorney General

Chief Election Officials of the Two Most Populous Jurisdictions Within the State:
Miriam Oliphant, Supervisor of Elections for Broward County
David Leahy, Supervisor of Elections for Miami-Dade County
Other Local Election Officials:
Kurt Browning, Supervisor of Elections for Pasco County
Susan Gill, Supervisor of Elections for Citrus County
Shirley Green Knight, Supervisor of Elections for Gadsden County

Stakeholders/Representatives of Groups of Individuals with Disabilities:
Dave Evans, State Board Member of the National Federation of the Blind
Jim Kracht, Assistant County Attorney for Miami-Dade County and member of the American Blind Lawyers Association, American Council of the Blind and the Florida Council of the Blind
Richard LaBelle, Secretary of the Florida Coalition on Disability Rights

Other Stakeholders and Citizens:
Joe Celestin, Mayor of the City of North Miami
Anna Cowin, State Senator from District 20
Jane Gross, President of the Florida League of Women Voters
Lindsay Harrington, State Representative from District 72
Arthur Hernandez, Vice Chairman of the Jacksonville Mayor’s Hispanic American Advisory Board
Percy Luney, Dean and Professor of Law at Florida A&M University
Reggie McGill, Human Relations Director for the City of Orlando
Isis Segarra, private citizen from Hillsborough County
Lori Stelzer, President of the Florida Association of City Clerks and City Clerk for the City of Venice
Raiza Tamayo, Regional Director of the United States Hispanic Chamber of Commerce

This HAVA Planning Committee convened four times in public meetings to accomplish its work – Tallahassee on April 25, West Palm Beach on May 6, Ft. Myers on May 12 and Orlando on May 15. Press releases were sent to members of the press before each meeting and copies of the press releases were available for the audience at each meeting. In addition, all meetings were noticed in the Florida Administrative Weekly. Members of the public and press were welcomed at the meetings. The HAVA Planning Committee heard public comment at each meeting. It was assisted by a non-profit, non-partisan organization, the Collins Center for Public Policy, Inc., that was selected in a public bidding process to serve as staff for the HAVA Planning Committee in developing the HAVA State Plan, and by the Division of Elections of the Florida Department of State.

The HAVA Planning Committee operated in an open process with public deliberations, systematic procedures in accordance with Robert’s Rules of Order, and majority vote of members who were present when votes were taken. Majority quorums were present at all meetings of the HAVA Planning Committee. The Collins Center, as staff, prepared written materials for the meetings, made presentations to focus the HAVA Planning Committee on
decisions that needed to be made, took notes of all meetings and reported them publicly on its website at www.collinscenter.org. A formal transcript of each meeting also was made and published on the website along with all agendas and other published materials for meetings of the HAVA Planning Committee. The website of the State Division of Elections also included much of this material.

All meetings were held in accessible facilities and were compliant with the Americans with Disabilities Act. Closed captioning service and signers were available at all meetings. Agendas were printed in Braille as well as Spanish and Creole.

Section 256: Will Florida comply with the requirement of Section 256 to have the HAVA State Plan meet the public notice and comment requirements of HAVA?

Yes, and no further actions are required.

Section 256 of HAVA requires that the HAVA State Plan meet the following public notice and comment requirements:

1. not later than 30 days prior to the submission of the plan, the State shall make a preliminary version of the plan available for public inspection and comment;
2. the State shall publish notice that the preliminary version of the plan is so available; and
3. the State shall take the public comments made regarding the preliminary version of the plan into account in preparing the plan which will be filed with the Federal Elections Commission.

After the final HAVA State Plan is submitted to the Federal Elections Commission, that Commission shall cause the HAVA State Plan to be published in the Federal Register in accordance with Section 255(b).

These tasks were performed the Division of Elections and not by the HAVA Planning Committee or its consultants. The work of the HAVA Planning Committee and its consultants was completed when a preliminary version of the HAVA State Plan was prepared, approved by the HAVA Planning Committee, and submitted to the Secretary of State.

After notice was given in the Florida Administrative Weekly, the preliminary version of the HAVA State Plan was posted on the Department of State’s and the Governor’s websites. A link was available on the Department’s website so that public comment could be made electronically. Public comments were also received by U. S. mail. Public comments were received from June 13 through July 13 and those public comments were considered in preparing the final plan.

Date Report Submitted
- February 28, 2006
This serves as an amended report regarding Florida's use of Title I, Section 102 funds through December 31, 2005. Florida received Section 102 funds in the amount of $11,581,377. The funds were used to reimburse the state for funding provided to Florida's 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Florida invested Section 102 funds pending transfer of the funds to Florida's Working Capital Fund. Interest has continued to accrue on the initial investment of funds for a total of $34,445.37 through December 31, 2005.

An amended SF269 form is attached to reflect the balance of Section 102 funds.

Date Report Submitted
February 28, 2006
This serves as an amended report regarding Florida's use of Title I, Section 102 funds through December 31, 2005. Florida received Section 102 funds in the amount of $11,581,377. The funds were used to reimburse the state for funding provided to Florida's 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Florida invested Section 102 funds pending transfer of the funds to Florida's Working Capital Fund. Interest has continued to accrue on the initial investment of funds for a total of $34,445.37 through December 31, 2005.

An amended SF269 form is attached to reflect the balance of Section 102 funds.

Standard Form 269 (Rev. 7-97) Prescribed by OMB Circulars A-102 and A-110
This serves as an amended report regarding Florida's use of Title I, Section 102 funds through December 31, 2005. Florida received Section 102 funds in the amount of $11,581,377. The funds were used to reimburse the state for funding provided to Florida’s 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Florida invested Section 102 funds pending transfer of the funds to Florida’s Working Capital Fund. Interest has continued to accrue on the initial investment of funds for a total of $34,445.37 through December 31, 2005.

An amended SF269 form is attached to reflect the balance of Section 102 funds.
The Honorable Glenda Hood  
The Secretary of State of Florida  
Tallahassee, FL 32399  

Dear Ms. Secretary:  

Thank you for your letter, dated January 21, 2004, certifying that your State would not meet the deadline of replacing all punch card and/or lever voting systems by the November 2004 general election, and asking for a waiver of the November 2004 deadline under Section 102(a)(3)(B) of the Help America Vote Act. Your request for a waiver of the deadline is approved, and the State shall ensure that all of the punch card and/or lever voting systems in the qualifying precincts within the State shall be replaced in time for the first election for Federal office held after January 1, 2006.

Your State will still be responsible for reporting to the General Services Administration in the manner outlined in our letter of July 28, 2003. The only change will be the extension of the deadline for replacement of the punch card and/or lever voting systems. If you have any questions or comments, please feel free to contact Stephen J. Kulenguski at (202) 501-4496.

Sincerely,

Deborah J. Schilling  
Director of Budget

cc:  
The Honorable Jeb Bush  
Governor of Florida  
Tallahassee, FL 32399
The Honorable Glenda Hood  
The Secretary of State of Florida  
Tallahassee, FL  32399

Dear Ms. Secretary:

This is to inform you that we have inadvertently sent out an approved waiver request letter, dated February 25, 2004, to your office in reference to the replacement of all punch card/or lever voting systems, under Section 102(a)(3)(B) of the Help America Vote Act. Please disregard that letter. We apologize for any confusion and inconvenience this may have caused you.

If you have any questions, please feel free to contact Stephen J. Kulenguski at (202) 501-4496.

Sincerely,

Deborah J. Schilling  
Director of Budget

Date Report Submitted March 22, 2005
The first report regarding expenditures made with Section 251, Title II HAVA funds covers the period from the date the funds were received in Florida through September 30, 2004. Florida received FY 2003 Section 251, Title II HAVA funds on June 23, 2004.

None of the Title II funds were expended during the current reporting period. While the Florida Legislature authorized the use of HAVA Section 251 funds for state Fiscal Year 2004-05, Florida did not begin disbursing the funds until after September 30, 2004.

12. Remarks: Attach any explanations deemed necessary or information required by Federal sponsoring agency in compliance with governing legislation.

State Matching expenditures are shown on line "h." Interest in the amount of $3,696,730.21 accrued during the current reporting period is included on line "a" with total Federal funds authorized for this funding period.

13. Certification: I certify to the best of my knowledge and belief that this report is correct and complete and that all outlays and unliquidated obligations are for the purposes set forth in the award documents.

Type or PRINT Name and Title
Dawn Roberts, Director, Division of Elections, Florida Department of State

Telephone (Area code, number and extension) 850-245-6200

Signature of Authorized Certifying Official
March 29, 2006
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State utilizing Help America Vote Act (HAVA) Title II, Section 251 funds during the period from October 1, 2004 through September 30, 2005.

**VOTING SYSTEMS ASSISTANCE - $11.6 Million**

During the current reporting period, Florida distributed $11.6 million to county supervisors of elections to purchase voting equipment that is accessible to individuals with disabilities. Funds were appropriated by the Florida Legislature in order to ensure that all counties had at least one accessible voting system at each polling place by January 1, 2006. Prior to distribution of the funds, counties were required to provide certified statements to the Department of State indicating the number of polling places in use and the number of accessible voting systems owned by the county. There were fifty-one (51) counties that required accessible voting systems in order to have one per polling place by January 1, 2006.

The HAVA State Plan includes references to acquiring accessible voting equipment for individuals with disabilities on pages 13 through 15 and on page 61.

**STATEWIDE VOTER REGISTRATION LIST - $11,171,771**

Title II funds were utilized to continue development of a statewide voter registration system pursuant to requirements in Title III, Section 303 of the Help America Vote Act. The Florida Voter Registration System (FVRS) is a real-time system that contains the name and voter registration information of all voters in the state. The system allows counties to continue to use their existing systems with modifications to interface with the FVRS.

During the current reporting period, the Department of State issued bids to procure the services of two contractors to assist with implementing the FVRS. One vendor was selected to serve as the Prime Contractor and provide systems integration and software development for the FVRS. A second vendor was selected to provide project management and quality assurance to oversee the development and implementation phases of the FVRS.

In addition to the two primary contractors, the Department began the process of acquiring the necessary hardware and software required to implement the FVRS including back-up systems. Items purchased included servers, switching modules and various software systems needed to operate the system. An uninterruptible power supply (generator) was purchased to provide back-up operation during electrical outages and/or disasters. Other expenses included training provided to Department of State employees to give them the necessary skills to utilize the software being used to operate the system.

Other costs associated with the FVRS during the current reporting period include salaries for eleven positions in the Department of State, two positions at the Florida Department of Highway Safety and Motor Vehicles and two positions at the Florida Department of Law Enforcement.

These positions provide support for the various hardware and software systems being utilized to operate the system, legal expertise, and administration of a new bureau established to provide voter registration services for all of Florida's 67 counties.

Reference to the statewide voter registration system can be found in the HAVA State Plan on pages 26-31, 56-57 and 61.
INTEREST ACCRUED - $3,696,730

During the current reporting period the Department of State invested Title II, Section 251 funds and accrued Interest in the amount of $3,696,730.

STATE MATCHING FUNDS - $385,000

During the current reporting period, Florida spent $385,000 in State Matching funds.
March 29, 2006

The Honorable Paul S. DeGregorio, Chairman
U.S. Election Assistance Commission
State HAVA Funding Reports
1225 New York Avenue, NW – Suite 1100
Washington, D.C. 20005

Dear Mr. DeGregorio:

Enclosed is Florida's narrative report regarding HAVA, Title II, Section 251 funds for the period from October 1, 2004 through September 30, 2005. Form SF 269 regarding Title II, Section 251 funds is also included.

Also enclosed is an updated Form SF 269 for Title II, Section 251 funds covering the period from the initial receipt of funds in June 2004 through September 30, 2004. The entry on Line "o - Total Federal funds authorized for this funding period" has been adjusted to include Interest accrued on those funds during that time period.

If you have any questions or would like additional information, please let us know.

Sincerely,

Dawn K. Roberts, Esq.
Director, Division of Elections

MESSAGE

ORIGINAL TO FOLLOW BY MAIL.
December 14, 2004

The Honorable Jeb Bush
Governor
Office of the Governor
The Capitol
400 South Monroe Street
Tallahassee Florida 32399-0001

Dear Governor Bush:

The U. S. Election Assistance Commission (EAC) is pleased to inform you that the Help America Vote Act of 2002 (HAVA) allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year's requirements payment. EAC received a certification statement from your State on December 7, 2004 declaring your State's eligibility for the requirements payment appropriated in fiscal year 2004.

Accordingly, EAC has notified the U.S. General Services Administration (GSA) that approximately $85,085,258 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use this payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, not withstanding the Act's maintenance of effort requirements; and

- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).

- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (“Common Rule”, Administrative Requirements, 53 FR 8087, March 11, 1988)

- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:
http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
• is developed and published in the Federal Register in accordance with Section 255 in the same manner as the State plan;

• is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

• takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with EAC. The amended State plan filed with EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

Reporting

Also note that HAVA Section 258 requires your State to submit a report to EAC on the activities conducted with the funds provided during the Federal fiscal year, which runs from October 1 through September 30 of each year. This report must include:

• a list of expenditures made with respect to each category of activities described for the use of funds;

• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  o the activities funded to meet HAVA requirements; and
  o how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:
http://www.whitehouse.gov/omb/grants/grants_forms.html

Recordkeeping and Audits

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes EAC to audit or examine books, documents, papers and records of any
recipient that is deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.

HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the EAC. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the EAC an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

The Honorable Glenda Hood
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Dear Secretary Hood:

The U. S. Election Assistance Commission (EAC) is pleased to inform you that the Help America Vote Act of 2002 (HAVA) allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year’s requirements payment. EAC received a certification statement from your State on December 7, 2004 declaring your State’s eligibility for the requirements payment appropriated in fiscal year 2004.

Accordingly, EAC has notified the U.S. General Services Administration (GSA) that approximately $85,085,258 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use this payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, notwithstanding the Act’s maintenance of effort requirements; and

- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

**Conforming to Applicable Federal Guidelines**

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).

- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments ("Common Rule", Administrative Requirements, 53 FR 8087, March 11, 1988)

- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:

**Material Changes to State Plans**

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

---

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
• is developed and published in the *Federal Register* in accordance with Section 255 in the same manner as the State plan;

• is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

• takes effect only after the expiration of the 30-day period which begins on the date the change is published in the *Federal Register*.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with EAC. The amended State plan filed with EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

**Reporting**

Also note that HAVA Section 258 requires your State to submit a report to EAC on the activities conducted with the funds provided during the Federal fiscal year, which runs from October 1 through September 30 of each year. This report must include:

• a list of expenditures made with respect to each category of activities described for the use of funds;

• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  
  - the activities funded to meet HAVA requirements; and
  - how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

**Recordkeeping and Audits**

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes EAC to audit or examine books, documents, papers and records of any
recipient that is deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.

HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the EAC. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the EAC an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman
November 17, 2004

The Honorable DeForest B. Soaries, Jr., Chairman
Election Assistance Commission
1225 New York Ave. NW
Suite 1100
Washington, DC 20005

Dear Chairman Soaries:

The State of Florida's HAVA Plan was updated in June 2004 and has been published in the Federal Register by the Election Assistance Commission. The Plan meets all of the requirements listed in the Help America Vote Act (HAVA) regarding the conditions that must be met before a state is eligible to receive Title II requirements payments. This includes implementation of uniform, non-discriminatory administrative complaint procedures. In addition, Chapter 2003-415, Laws of Florida, implementing HAVA in Florida was pre-cleared by the Department of Justice on October 16, 2003. Therefore, Florida is requesting the requirements payment for Fiscal Year 2004. In making this request, Florida certifies the following:

"The State of Florida hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

[Signatures]

Jeb Bush
Governor

Glenda E. Hood
Secretary of State
Peggy,

The Florida Legislature has appropriated the required matching funds as indicated:

<table>
<thead>
<tr>
<th>Fiscal Year</th>

Subject: 2004 HAVA Requirements Payment

Hi, Barbara:

This is to confirm that, yesterday, EAC received Florida's certification for its 2004 requirements payment. Tomorrow afternoon, I am scheduled to present my recommendation to the EAC subcommittee set up to review requirements payments submissions. After that, a recommendation will be considered by all four EAC Commissioners on a 48-hour tally vote. I'll keep you posted on our progress, once that part of the process is finished.

I noticed that Florida's certification affirms that the State meets all the requirements in Section 253(b). I assume that includes the requirement in 253(b)(5) that the State has appropriated the 5% match. I saw that the 2004 State plan budgets for this match, but it is not clear if the amount has been appropriated. Because many States had to appropriate additional funds for the match when their share of the 2004 funds became larger than expected, this issue is often something on which the subcommittee members focus. If you could confirm that the State has already appropriated the match, in response to this email, it will help me answer questions that arise in tomorrow's subcommittee meeting. Thanks.

The Honorable Charlie Crist
Attorney General
State of Florida
The Capitol, PL-01
Tallahassee, Florida 32399-1050

Dear Mr. Attorney General:

This refers to Rule No. 1S-2037 (2003), which prescribes the form of the statewide provisional ballot envelope; and Rule No. 1S-2.038 (2003), which prescribes the complaint form to be used for alleged violations of the Help America Vote Act of 2002, 42 U.S.C. 15301-15545, for the State of Florida, submitted to the Attorney General pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. We received your submissions on February 23, 2004.

The Attorney General does not interpose any objection to the specified changes. However, we note that Section 5 expressly provides that the failure of the Attorney General to object does not bar subsequent litigation to enjoin the enforcement of the changes. In addition, as authorized by Section 5, we reserve the right to reexamine these submissions if additional information that would otherwise require an objection comes to our attention during the remainder of the sixty-day review period. See Procedures for the Administration of Section 5 of the Voting Rights Act (28 C.F.R. 51.41 and 51.43).

Sincerely,

Joseph D. Rich
Chief, Voting Section
The Honorable Chris Nelson
Secretary of State
State of South Dakota
500 East Capitol Avenue, Suite 204
Pierre, South Dakota 57501-5070

Dear Mr. Secretary:

This refers to certain acts of the South Dakota Legislature and the administrative regulations promulgated by the South Dakota Board of Elections, submitted on behalf of Shannon and Todd Counties pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. Your submissions include the following:

1. Chapter 118, Section 3 (1974) that amends SDCL 12-4-1, which pertains to persons entitled to register;

2. Chapter 71, Section 2 (1999) that amends SDCL 12-4-1.1, which pertains to release documents for convicted felons;

3. Chapter 118, Section 4 (1974); Chapter 105, Section 1 (1976); Chapter 106, Section 1 (1985); Chapter 107, Section 1 (1994); Chapter 166, Section 3 (1997); and Chapter 83, Section 10 (2003) that amend SDCL 12-4-2, which pertains to the county auditor being in charge of voter registration records;

4. The 1994 promulgation of and the 1997 and 2003 amendments to ARSD 5:02:03:12, which pertains to agency voter registration instructions;

5. The 1994 promulgation of and the 1997 and 2003 amendments to ARSD 5:02:03:13, which pertains to voter registration instructions;

6. Chapter 28, Section 4 (1982) that repeals SDCL 12-4-2.1, which pertains to deputy auditors in unorganized counties;
7. Chapter 28, Section 41 (1982) that repeals SDCL 12-4-2.2, which pertains to compensation for deputy auditors in unorganized counties;

8. Chapter 118, Section 5 (1974); Chapter 105, Section 2 (1976); Chapter 94, Section 3 (1978); and Chapter 107 (1983) that amend SDCL 12-4-3, which pertains to office hours for registration;

9. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-4, which pertains to personal applications for voter registration;

10. Chapter 83, Section 13 (2003) that enacts 12-4-4.10, which pertains to the provision of voter registration procedures to overseas voters;

11. Chapter 118, Section 7 (1974); Chapter 94, Section 1 (1978); Chapter 120, Section 1 (1981); Chapter 106, Section 2 (1985); Chapter 107, Section 1 (1985); Chapter 110, Section 1C (1985); Chapter 107, Section 6 (1994); Section 95, Section 4 (1996); and Chapter 40, Section 5 (2002) that amend SDCL 12-4-5, which pertains to the entry of names in the master registration file;

12. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-5.1, which pertains to the time for registration other than by the county auditor or the deputy;

13. Chapter 119, Section 1 (1974) that enacts SDCL 12-4-5.2, which pertains to the notice of registration procedures;

15. Chapter 107, Section 7 (1994) and Chapter 95, Section 5 (1996) that enact and amend SDCL 12-4-5.3, which pertains to the review of a voter registration application by the auditor;

16. The 1994 promulgation of and the 1996 and 2002 amendments to ARSD 5:02:03:14, which pertains to the acknowledgment notice for invalid or incomplete voter registration applications;

17. The 1994 promulgation of and the 1996 and 2002 amendments to ARSD 5:02:03:15, which pertains to the acknowledgment notice for valid voter registration applications;
18. Chapter 83, Section 12 (2003) that enacts SDCL 12-4-5.5, which pertains to the verification of a driver's license or social security information;

19. Chapter 118, Section 8 (1974); Chapter 119, Section 13 (1975); and Chapter 107, Section 2 (1985) that amend SDCL 12-4-6, which pertains to filling out the registration card and receipt;

20. Chapter 78, Section 1 (1997) that enacts SDCL 12-4-6.1, which pertains to the effective date for voter registration;

21. Chapter 70, Section 1 (1973); Chapter 119, Section 15 (1975); Chapter 105, Section 4 (1976); Chapter 120, Section 2 (1981) that amend and repeal SDCL 12-4-7, which pertains to the filing, verification, and return of voter registration cards and receipts;

22. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-7.1, which pertains to duplicate registration;

23. Chapter 119, Section 14 (1975); Chapter 105, Section 5 (1976); Chapter 94, Section 2 (1978); Chapter 107, Section 3 (1985); Chapter 127 (1989); and Chapter 110, Section 2 (1993) that enact and amend SDCL 12-4-7.2, which pertains to the duties of voter registrars;

24. Chapter 118, Section 11 (1974); Chapter 107, Section 14 (1994); and Chapter 40, Section 6 (2002) that enact and amend SDCL 12-4-8.2, which pertains to the true copy to replace a duplicate acknowledgment notice;

25. Chapter 118, Section 12 (1974) and Chapter 105, Section 6 (1976) that amend SDCL 12-4-9, which pertains to the master registration list;

26. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-9.1, which pertains to the presidential voter list;

27. Chapter 118, Section 13 (1974); Chapter 120, Section 5 (1975); Chapter 105, Section 7 (1976); Chapter 107, Section 2 (1992); and Chapter 40, Section 2 (2002) that amend SDCL 12-4-10, which pertains to the precinct registration list;

28. Chapter 81 (1973) that enacts SDCL 12-4-10.1, which pertains to the registration lists furnished to the federal court for jury selection;
October 16, 2003

The Honorable Charlie Crist
Attorney General
State of Florida
The Capitol, PL-01
Tallahassee, Florida 32399-1050

Dear Attorney General Crist:

This refers to Chapter 2003-415, which revises the Florida Election Code to implement provisions of the Help America Vote Act (HAVA), 42 U.S.C. 15301-15544, and eliminates the second primary election for 2004, submitted to the Attorney General pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. We received your submission on August 18, 2003.

The Attorney General does not interpose any objection to the specified changes. However, we note that Section 5 expressly provides that the failure of the Attorney General to object does not bar subsequent litigation to enjoin the enforcement of the changes. See the Procedures for the Administration of Section 5 (28 C.F.R. 51.41).

Chapter 2003-415 includes provisions that are enabling in nature. Therefore, the State, and other local jurisdictions are not relieved of their responsibility to seek Section 5 preclearance of any changes affecting voting proposed to be implemented pursuant to this legislation (e.g., the requirement that the Department of State prescribe the form for complaints alleging violation of Title III of HAVA, prescribe the form of the provisional ballot envelope, and adopt detailed rules prescribing additional recount procedures for each certified voting system; the requirement that the Division of Elections promulgate rules regarding automatic machine recounts; and the
requirement that each supervisor of elections create a free
access system that allows each person casting a provisional vote
to learn if the ballot was counted and, if not, why it was not

Sincerely,

Joseph D. Rich
Chief, Voting Section

June 17, 2004

The Honorable Glenda Hood
Secretary of State
R. A. Gray Building
500 S. Bronough
Tallahassee, Florida 32399-0250

Dear Secretary Hood:

The U. S. Elections Assistance Commission is pleased to inform you that the Help America Vote Act of 2002 (“HAVA”) allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the U.S. Election Assistance Commission (“EAC”) a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year’s requirements payment. The EAC received a certification statement from your State on June 10, 2004 declaring your State’s eligibility for the requirements payment(s) appropriated in fiscal year(s) 2003.

Accordingly, the EAC has notified the U.S. General Services Administration (“GSA”) that approximately $47,416,833 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use these payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to the EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, notwithstanding the Act's maintenance of effort requirements; and
- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).
- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments ("Common Rule", Administrative Requirements, 53 FR 8087, March 11, 1988)
- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:

http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

---

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
is developed and published in the *Federal Register* in accordance with Section 255 in the same manner as the State plan;

is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

takes effect only after the expiration of the 30-day period which begins on the date the change is published in the *Federal Register*.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with the EAC. The amended State plan filed with the EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

**Reporting**

Also note that HAVA Section 258 requires your State to submit a report to the EAC on the activities conducted with the funds provided during the federal fiscal year, which runs from October 1 through September 30. This report must include:

- a list of expenditures made with respect to each category of activities described for the use of funds;
- the number and type of articles of voting equipment obtained with the funds; and
- an analysis and description of:
  - the activities funded to meet HAVA requirements; and
  - how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with the EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

**Recordkeeping and Audits**

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes the EAC to audit or examine books, documents, papers and records of any recipient that are deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.
HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the grant-making office. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the grant-making office an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

June 17, 2004

The Honorable Jeb Bush
Governor
Office of the Governor
The Capitol
400 South Monroe Street
Tallahassee, Florida 32399-0001

Dear Governor Bush:

The U. S. Elections Assistance Commission is pleased to inform you that the Help America Vote Act of 2002 ("HAVA") allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the U.S. Election Assistance Commission ("EAC") a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year's requirements payment. The EAC received a certification statement from your State on June 10, 2004 declaring your State's eligibility for the requirements payment(s) appropriated in fiscal year(s) 2003.

Accordingly, the EAC has notified the U.S. General Services Administration ("GSA") that approximately $47,416,833 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use these payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to the EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, notwithstanding the Act’s maintenance of effort requirements1; and
- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).
- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (“Common Rule”, Administrative Requirements, 53 FR 8087, March 11, 1988)
- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:

http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

---

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
is developed and published in the *Federal Register* in accordance with Section 255 in the same manner as the State plan;

• is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

• takes effect only after the expiration of the 30-day period which begins on the date the change is published in the *Federal Register*.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with the EAC. The amended State plan filed with the EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

**Reporting**

Also note that HAVA Section 258 requires your State to submit a report to the EAC on the activities conducted with the funds provided during the federal fiscal year, which runs from October 1 through September 30. This report must include:

• a list of expenditures made with respect to each category of activities described for the use of funds;

• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  • the activities funded to meet HAVA requirements; and
  • how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with the EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

**Recordkeeping and Audits**

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes the EAC to audit or examine books, documents, papers and records of any recipient that are deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.
HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the grant-making office. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the grant-making office an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman
June 3, 2004

The Honorable DeForest B. Soaries, Jr., Chairman
Election Assistance Commission
1225 New York Ave. NW
Suite 1100
Washington, DC 20005

Dear Chairman Soaries:

The State of Florida has reviewed the requirements listed in the Help America Vote Act (HAVA) regarding the conditions that must be met before a state is eligible to receive Title II requirements payments. All of the conditions have been met by the State of Florida. This includes implementation of uniform, non-discriminatory administrative complaint procedures. These procedures are referenced in Florida's State Plan on page 59. In addition, Chapter 2003-415, Laws of Florida, implementing HAVA in Florida was pre-cleared by the Department of Justice on October 16, 2003. Therefore, Florida is requesting the requirements payment for fiscal year 2003. In making this request, Florida certifies the following:

"The State of Florida hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

Jeb Bush
Governor

Glenda E. Hood

The Honorable Glenda Hood  
Secretary of State  
The Capitol  
Plaza Level, Room 2  
Tallahassee, Florida 32399-0250

Dear Ms. Hood:

Enclosed, please find a copy of a letter sent by the U.S. Election Assistance Commission (EAC) to the chief executive officer of your State. This letter summarizes provisions for filing statements of certification to receive requirements payments in accordance with the Help America Vote Act of 2002 (HAVA).

As you may know, to receive funds for a fiscal year, HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the EAC a statement certifying that the State is in compliance with the conditions set forth in HAVA Section 253(b). I hope that the enclosed letter helps you in this process.

Should you have any questions or need further clarification as to the contents of the attached letter, please do not hesitate to contact Peggy Sims at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

Enclosure

021046
May 6, 2004

The Honorable Jeb Bush
Governor
The Capitol
400 South Monroe Street
Tallahassee, FL 32399-0001

Dear Governor Bush:

The Help America Vote Act (hereafter “HAVA” or the “Act”) authorizes payments to States, U.S. Territories and the District of Columbia (hereafter “States”) to assist in meeting the “Uniform and Nondiscriminatory Election Technology and Administration Requirements” in Title III of the Act. In order to be eligible for receipt of a requirements payment, a State must file with the U.S. Election Assistance Commission (hereafter “EAC” or “Commission”) a certification statement for the fiscal year, which declares that such State is in compliance with the required conditions set forth in section 253(b) of the Act. Title II requirements payments for Fiscal Years 2003 and 2004 are available at this time.

Timing for Filing a Statement of Certification (Section 253(a) and (d))

To receive funds for a fiscal year, HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b). This statement may not be filed until after the expiration of a 45-day period that began on March 24, 2004 – which was the day that all 55 State plans were published in the Federal Register by the Commission. The 45-day period expires on May 8, 2004.

Language for Statement of Certification (Section 253(a))

Recommended language for the certification statement is contained in Section 253(a) of the Act. Thus, the certification statement for a fiscal year may state the following:

"________________________ hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

For the purpose of the requirements payments, the chief State election official is the individual designated by the State under section 10 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-8) to be responsible for coordination of the States responsibilities under such Act.
Condition for Receipt of Funds (Section 253(b))

The conditions for receipt of a requirements payment contained in section 253(b) require that a state certify to the Commission that, for the fiscal year(s) in which funds are requested, it:

- has filed a State plan with the EAC covering the fiscal year and which the State certifies:
  - contains each of the elements required to be in the State plan, according to section 254, including how the State will establish a State Election Fund in accordance with section 254(b);\(^{32}\)
  - is developed in accordance with section 255, which describes the process of using a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions, other local election officials, stake holders (including representatives of groups of individuals with disabilities), and other citizens to develop the plan; and
  - meets the 30-day public notice and comment requirements of section 256.

- has filed with the EAC a plan for the implementation of the uniform, non-discriminatory administrative complaint procedures required under section 402 (or has included such a plan in the State plan), and has such procedures in place. If the State does not include such an implementation plan in the State plan, the Federal Register publication and the committee development requirements of sections 255(b) and 256 apply to the implementation of the administrative complaint procedure in the same manner as they apply to the State plan.

- is in compliance with each of the following federal laws as they apply to the Act:
  - The Voting Rights Act of 1965;
  - The Voting Accessibility for the Elderly and Handicapped Act;
  - The Uniformed and Overseas Citizens Absentee Voting Act;
  - The National Voter Registration Act of 1993;
  - The Americans with Disabilities Act of 1990; and

- has provided that, to the extent that any portion of the Title II requirements payment is used for activities other than meeting the requirements of Title III:
  - the State’s proposed uses of the requirements payment are not inconsistent with the requirements of Title III; and

---

\(^{32}\) Section 254(b)(1) and (2) of the Act describes the State Election Fund as a fund that is established in the treasury of the State government, which must be used by the State exclusively to carry out the activities for which the requirements payment (title II, Subtitle D, Part 1) is made to the State, and which consists of:

- amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made;
- the requirements payment to the State;
- such other amounts as may be appropriated under law; and
- interest earned on deposits of the fund.

HAVA section 254(b)(3) provides that, in the case of a State that requires State legislation to establish a State Election Fund, the EAC is required to defer disbursement of the requirements payment to such State until such time as legislation establishing the fund is enacted.
that the use of the funds under this paragraph is consistent with the requirements of section 251(b); and

- has appropriated funds for carrying out the activities for which the requirements payment is made in an amount equal to 5 percent of the total amount to be spent for such activities (taking into account the requirements payment and the amount spent by the State) and, in the case of a State that uses a requirements payment as a reimbursement for voting equipment under 251(c)(2), an additional amount equal to the amount of such reimbursement.3

Accordingly, prior to submission of a certification statement for a fiscal year(s) to the EAC, the Commission strongly encourages all States to verify compliance with the required conditions set forth in section 253(b). Should the Commission have any concerns that a particular State – which has submitted a certification statement to the EAC – has not met one of the required conditions, the EAC will immediately contact that particular State and/or communicate its concern in writing.

General Services Administration (GSA) Procedures for Payments

GSA, which will disburse the Title II requirements payments to States under the direction of the EAC, requests that the following procedures be used for disbursement and receipt of these payments:

- **Step One – Registration.** State representatives should contact Sharon Pugh (Sharon.Pugh@GSA.gov) or Brad Farris (Brad.Farris@GSA.gov) on (816) 823-3108, as soon as possible, with information on State contact points, including name, address and email address. These contacts may very well be the same personnel that GSA worked with in distributing HAVA Title I funding. GSA will verify this information.

- **Step Two – EFT Setup.** GSA will contact the State representatives to obtain banking information required for an Electronic Funds Transfer (EFT). Again, this may be the same information submitted for HAVA Title I funding. Payments should be made into the Election Fund described in HAVA Section 254(b)(1). All funds will be disbursed via EFT.

- **Step Three – State Certification Statement to EAC** – States will submit required certification information to the EAC, as outlined above, after the completion of the 45-day period for publication of the State plan in the Federal Register.

- **Step Four – Notification to GSA by EAC** – Based upon the certification statement, the EAC will notify GSA that a State is due receipt of its Title II payment for a particular fiscal year (i.e., either FY 2003 funds, FY 2004 funds, or both).

- **Step Five – Disbursement of Title II Funds** – GSA will disburse the Title II funds for a particular fiscal year to the accounts specified by the States, and will notify the States and the EAC of the disbursement in writing.

3 For purposes of declaring sufficient funds are available for the State to carry out activities to meet Title III requirements, if the requirements payment is to be used as a reimbursement for voting equipment obtained on and after January 1, 2004 through multi-year contracts, the activity is not treated as an activity to meet Title III requirements.
Finally, the Commission has received numerous inquiries regarding the concern that the Title II requirements funds will no longer be available for disbursement to the States after the end of the current fiscal year (i.e., September 30, 2004). However, the Commission points to section 257(b) of the Act, which states in part:

“(b) AVAILABILITY- Any amounts appropriated pursuant to the authority of subsection (a) shall remain available without fiscal year limitation until expended.” (Emphasis added.)

Based upon the above statutory language, the Commission believes Congress’ intent was clear in that the Title II funds remain available to the States until fully disbursed by the EAC.

The Commission looks forward to working closely with all States as we enter into this next phase of HAVA implementation. Should you have any questions or need further clarification as to the contents of this letter, please do not hesitate to contact Peggy Sims at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

January 26, 2005

The Honorable Glenda Hood
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Dear Secretary Hood:

This letter is in response to numerous State inquiries about future reporting responsibilities for funds provided under Title I, Sections 101 and 102, of the Help America Vote Act (HAVA).

In a July 2003 letter, the General Services Administration (GSA) notified your State that separate reports for Section 101 and 102 funds, covering financial activity from the date of GSA’s disbursement of the funds to your State through December 31, 2003, were to be filed with GSA by January 21, 2004. GSA noted that States should report using Standard Form 269, with a separate form to be filed for Section 101 and, if applicable, 102 funds received by the State. GSA required each funding recipient to submit verification of actual purchases and expenditures.

The GSA letter also noted that the agency would provide information from these reports to Election Assistance Commission (EAC), once it was up and running, and that reporting dates would be subject to change by EAC. EAC has assumed the responsibility for receiving reports regarding these funds, in accordance with the agency’s assumption of its audit responsibilities under HAVA, Title IX, Section 902.

EAC therefore requests that your State file your next report(s) no later than February 28, 2005 regarding all HAVA Title I funds provided to your State that had not been disbursed as of December 31, 2003 (the closing date of the report to GSA). Separate reports must be filed for the Section 101 and, if applicable, 102 funds that were received by your State; should cover financial activity during the period beginning January 1, 2004 and ending December 31, 2004; and must include the following information:

- a detailed list of expenditures by program, function, or task (including dollar amount) made with respect to each category of activities described for the permissible use of funds in HAVA sections 101(b) and 102(a)(2);
• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  o the activities funded to meet HAVA requirements; and
  o how such activities conform to the submitted State plan.

States should submit Standard Form 269 as part of each report. This form may be found at the http://www.whitehouse.gov/omb/grants/sf269.pdf.

Subsequent reports providing the same information on HAVA Title I expenditures will be due annually on February 28, covering the financial activity for the previous calendar year, until the State has filed final reports indicating that no such funds remain to be disbursed.

All reports on the HAVA Title I funds must be submitted to the following address:

State HAVA Funding Reports
U.S. Election Assistance Commission
1225 New York Avenue, NW – Suite 1100
Washington, DC 20005

[Signature]
Gracia M. Hillman
Chair
July 28, 2003

The Honorable Jeb Bush
Governor of Florida
Tallahassee, FL 32399

Dear Governor Bush:

This letter describes the final distribution of funds by the General Services Administration (GSA), in carrying out our responsibilities under Title 1 of Public Law (P.L.) 107-252, the Help America Vote Act (HAVA, “the Act”). The Act tasks GSA with responsibility for disbursing funds to the States, the District of Columbia and the Territories to implement various improvements to the Federal election process, including the replacement of voting equipment. Please see the enclosed letter (Enclosure 1) for background information on the program, original plans for applying for funds, timeline, et cetera.

Payments

Florida applied and certified timely to Sections 101 and 102 of HAVA, Title I. GSA, as described in Enclosure 1, processed an initial payment of $5,000,000.00, which was transferred electronically on 4/23/2003 to the account specified by Edward Kast, Director, Division of Elections. Once all of the State applications were received and verified, GSA determined the final distribution of funds to the States, according to HAVA instructions, and processed the final payments. An additional payment of $21,028,957.00 was made to the same account specified, again by Electronic Funds Transfer (EFT), and GSA verified receipt of the funds to that account on Monday, June 16, 2003. Thus, Florida received a total of $26,028,957.00, consisting of a Section 101 payment of $14,447,580.00, and a Section 102 payment of $11,581,377.00. We will assume that your Chief Election Official and designee for payment of funds is Glenda Hood, Secretary of State, unless you notify us differently.

The Section 101 payment is for one or more of the following purposes, as indicated by Florida’s certification of Section 101:

- Complying with the requirements of Title III of the Act;
- Improving the administration of elections for Federal office;
- Educating voters concerning voting procedures, voting rights, and voting technology;
• Training election officials, poll workers, and election volunteers;
• Developing the State plan for requirements payments to be submitted under Part 1 of Subtitle D of Title II (Sections 251-257) of the Act;
• Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for the casting and counting of votes;
• Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language; and/or
• Establishing a toll-free telephone hotline that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specified polling place locations, and other relevant information.

The Section 102 payment is for the following purpose as indicated by Florida’s certification of Section 102, for 3,628 total qualifying precincts, consisting of 3,588 punch card precincts and 40 lever voter system precincts:

• A State is obligated to use the funding (either directly or as a reimbursement for costs incurred on or after January 1, 2001) to replace punch card voting systems or lever voting systems in precincts within that State that used such systems in the November 2000 election ("qualifying precincts").
• A State that receives funding for this program must ensure that all of the punch card voting systems or lever systems in the qualifying precincts within that State will be replaced in time for the regularly scheduled general election for Federal office to be held in November 2004 (unless a waiver is obtained under Section 102(a)(3)(B)).
• Section 102(a)(3)(B) says that States may request a waiver by certifying to the Administrator of General Services not later than January 1, 2004, that the State will not meet the deadline specified above, for good cause and including in the certification the reasons for the failure to meet such deadline, the State shall ensure that all of the punch card voting systems or lever voting systems in the qualifying precincts within the State will be replaced in time for the first election for Federal office held after January 1, 2006.
• Section 102(d) deals with repayment of funds for failure to meet the deadline, and says that if a State receiving Section 102 funds fails to meet the deadlines stated above, the State shall pay to the Administrator an amount equal to the noncompliant precinct percentage of the amount of the funds provided to the State under the program. This amount will be $3,192.22 per noncompliant precinct.
• The State will continue to comply with current voting laws stated in Section 906; and,
• The replacement voting systems will meet the requirements of Title III, Section 301.
Method of Calculations

The following describes the method of calculations for distribution of the HAVA Title I funds, which was reviewed and cleared with both House and Senate staff, our General Counsel's office, and our Inspector General's office.

Total Availability. The total amount available for distribution is $649,500,000, calculated by taking the total $650,000,000 appropriated for this purpose in Public Law 108-7, and subtracting the $500,000 allowed for GSA administrative costs. For initial calculations, this amount is divided evenly between Sections 101 and 102 at $324,750,000 per section.

Section 101. Step one of two gives one-half of one percent of $324,750,000 to each State and the District of Columbia ($1,623,750) and one tenth of one percent of the total ($324,750) to Guam, Puerto Rico, the U.S. Virgin Islands and America Samoa. The total distributed under step one is $84,110,250.

The second step allocates funds from the $324,750,000 not allocated in the first step (totaling $240,639,750) based on each State and Territory's proportionate share of the voting age population as reported in the 2000 Census (total 212,050,630, including Territories). The sum of the funds allocated in the first step and the second step equals $324,750,000.

Section 102. First, $4000 was allocated to each State for each precinct that used punch card or lever voting machines in the 2000 election, as certified by the State, totaling $376,312,000. The State totals were then reduced on a pro rata basis to 86.29807 percent of the original total, so that the nationwide total of funds allocated did not exceed $324,750,000.

Section 103. Section 103 of the Act guarantees that each State will receive a minimum payment of $5,000,000 and each territory will receive a minimum payment of $1,000,000. If a State were to receive less than $5,000,000 (or a Territory less than $1,000,000) for both programs, based on the calculations described above for Sections 101 and 102, that State's or Territory's payment was increased to the minimum. The remaining States' payments under Sections 101 and 102 were reduced on a pro rata basis, per Section 103(b), so that the total did not exceed the $649,500,000 total availability. The amount of the reduction to the remaining States' payments was $44,460,348. This required a pro rata reduction of 7.52341 percent to the remaining State's Sections 101 and 102 payments. After all reductions, the net amount per qualifying precinct for voting machine replacement is $3,192.22.

1 GSA's administrative costs will be substantially less than $500,000, and the amount not used by GSA will be transferred to the Election Assistance Commission when it becomes operational.
Reporting and Conformance

By January 21, 2004, States will provide reports to GSA on actual expenditures as of December 31, 2003. Each funding recipient will be required to submit verification of actual purchases and expenditures. States should report using Standard Form 269 for Sections 101 and 102 categories. A separate form should be used for each section. Information regarding actual funds expended will be reconciled against funding provided. GSA will provide this information to the Election Assistance Commission once it becomes operational, and reporting dates are subject to change by the Commission.

State recipients of these funds are required to conform to the following Office of Management and Budget (OMB) grant guidelines found at http://www.whitehouse.gov/omb/circulars/index.html:

- OMB Circular A-87, Cost Principles for State, Local and Indian Tribal Governments (Cost Principles)
- OMB Circular A-102, Grants and Cooperative Agreements With State and Local Governments (Administrative Requirements)
- OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).
- In addition, Title I funds are subject to the Cash Management Improvement Act (CMIA) that is generally applicable to all Federal grants. State Treasurers/Chief Financial Officers are very familiar with CMIA and should be able to offer guidance on requirements.

The Catalog of Federal Domestic Assistance number assigned to this project is 39.011, Election Reform Payments. Please see the following reference for further information:

Audits

Title IX, Section 902 of Public Law 107-252, states that with respect to any grant or payment made in accordance with this Act by GSA, the Election Assistance Commission must be regarded as the office making the grant or payment, for the purposes of audits.
Assistance

If you have any questions or comments, please feel free to contact me at 202.501.0719, or Stephen Kulenguski at 202.501.4496. Questions about transfers of funds may be addressed to Sharon Pugh or Brad Farris at 816.823.3108 in our regional Finance Center. The GSA Regional Administrator for Florida is Edwin E Fielder, Jr., telephone 404.331.3200. Thank you.

Sincerely,

Re: CERTIFICATION: USE OF HAVA SECTION 102 FUNDS AND REPLACEMENT OF PUNCH CARD AND LEVER MACHINES
CERTIFICATION: USE OF HAVA SECTION 102 FUNDS AND REPLACEMENT OF PUNCH CARD AND LEVER MACHINES

I, the undersigned, having investigated or caused to be investigated each matter, below; certify, affirm and acknowledge that each of the following numbered statements, and any attachments to this certification document, are true and accurately reflect the status, condition and operations of Florida (hereinafter "state") as they related to the use and status of Help America Vote Act (HAVA) Section 102 Funds and the replacement of punch card or lever machines.

I understand that by certifying the information below, I am making a statement or representation to the U.S. Election Assistance Commission, an independent Federal Agency, necessary for the agency to determine Florida's required compliance with HAVA Section 102. (42 U.S.C. §15302). Compliance with HAVA Section 102 is required by the state as a result of its accepting Federal funds under that provision. As a condition of receiving 102 funds, the state certified that it would "use the payment... to replace punch card voting systems or lever voting systems (as the case may be) in the qualifying precincts within the state by the deadline prescribed... [regularly scheduled general election for Federal office to be held in November 2004]." (42 U.S.C. §15302(b)).

I further understand that to the extent any of the below (or attached) representations or certifications are found to be materially false, the Federal funds received by the state will be subject to audit and possible recoupment. Further, such false statements may subject the undersigned to criminal prosecution under 18 U.S.C. §1001 or other Federal Statutes.

I. BACKGROUND. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the following statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled "Attachment A, Background."

   Initials: [Signature]

2. Triggering Election. The regularly scheduled general election for Federal Office in November 2004 (triggering the deadline noted in 42 U.S.C. 15302 (a)(3)(A)) for the state was held on November 2, 2004.

   Initials: [Signature]

3. Funds Received. The State received $11,581,377.00 in Federal Funds pursuant to HAVA section 102.

   Initials: [Signature]
II. PUNCH CARD OR LEVER MACHINE REPLACEMENT. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the below statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment B, Punch Card or Lever Machine Replacement.”

1. **Qualified Precincts.** The State had 3,628 total qualified precincts (precincts which used punch card or lever machines to administer the regularly scheduled general election for Federal office held in November of 2000).

   *Initials: [Signature]*

2. **Qualified Precincts: No Punch Card or Lever Machine Used.** None of the qualifying precincts, noted in statement 1 above, used a lever or punch card machine in an election for Federal office on or after November 2, 2004.

   *Initials: [Signature]*

3. **No Punch Card or Lever Machine Used in State.** No precinct in the state used a punch card or lever machine for an election for Federal office on or after November 2, 2004.

   *Initials: [Signature]*

4. **Replacement Machines.** All machines purchased, leased or otherwise procured to replace punch card or lever machines in qualifying precincts meet the requirements of HAVA section 301 (42 U.S.C. §15481) and comply with all other relevant Federal statutory requirements (noted in 42 U.S.C. §15545). This includes the requirement that each polling place have at least one voting system equipped for individuals with disabilities. Please provide (below) a complete list of all voting systems procured, leased or otherwise obtained to replace the state’s punch card or lever machines.

III. HAVA § 102 FUNDS. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify to either response “a” or “b” in statement 1 or statement 2, below, you must line through the statement and attach a signed document explaining why you could not make a certification. The explanation (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment C, HAVA §102 Funds.”

1. Status of HAVA §102 Funds. Please check the statement below that applies to your state. (Check only one statement).

   (a) The state had none of the $11,581,377 it received pursuant to HAVA §102 remaining in its election fund after November 2, 2004. This means that as of this date, all 102 funds were expended. Funds are expended when finally transferred to another party (manufacturer or vendor) for consideration (voting system).

   (b) The state had only obligated funds remaining in its election fund after November 2, 2004. This means that as of this date, all funds were either expended or obligated. Funds are expended when finally transferred to another party (manufacturer or vendor) for consideration (voting system). Funds are properly obligated when the state has incurred a legally enforceable liability (such as a grant agreement, contract or lease) to another party (such as a local government or contractor) for a specific portion of the 102 funds. If the state had only obligated funds in its election funds after the above date, attach a statement explaining the obligation(s). This statement must clearly explain and state the value of the obligated funds remaining and the nature of the obligation. Documentation regarding the obligation should also be attached and explained (e.g. documents from vendor contracts or agreements with local governments). This explanation and supporting documentation shall be labeled “Attachment D, Obligated Funds.”

   Initials: [Signature]

2. Use of HAVA §102 Funds. All HAVA §102 funds expended or obligated by the state were used to replace punch card or lever machines in qualifying precincts per 42 U.S.C. §15302(a)(2).

   Initials: [Signature]

I, by signing my name below, certify, affirm and acknowledge, under penalty of Federal law, that each of the above numbered paragraphs initialed above accurately represent the operations, conditions and practices of Florida as they related to the use and status of HAVA Section 102 Funds and the replacement of punch card or lever machines.

Sue Cobb
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

RE: Certification—HAVA 102 Funding

Dear Secretary Cobb,

The purpose of this letter is to obtain a certification from you, as Florida’s Chief State Election Official, regarding the state’s use of funds provided under section 102 of the Help America Vote Act (HAVA). These funds were granted to the state for the replacement of punch card or lever voting machines (42 U.S.C. §15302). The U.S. Election Assistance Commission (EAC or Commission) is the Federal agency responsible for administering HAVA §102 funds. The regularly scheduled general election for Federal office in November 2004 was held on November 2, 2004. The date of this election represents the deadline for the state’s use of the Federal funds it received pursuant to HAVA section 102. (42 USC §15302(a)(3)) Now that this deadline has passed, the state must demonstrate that the funds it received were used for the purpose and by the deadlines set forth in HAVA (42 U.S.C. §15302 (a) & (b)). A certification document has been enclosed for this purpose. If Florida cannot certify the proper and timely use of the 102 funds, HAVA requires that they are returned to the EAC to be dispersed as requirements payments. (42 U.S.C. §§ 15304 & 15401).

Replacement of Voting Systems. In order to avoid repayment of funds, Florida will be required to certify the total number of qualified precincts\(^5\) which replaced all punch card or lever machines in time for the regularly scheduled general election for Federal office in November 2004 that took place on November 2, 2004. This means that no punch card or lever voting systems were used in the qualified precinct.\(^6\) The replacement systems must (1) not use punch cards or levers, (2) meet the requirements of HAVA section 301 (42 U.S.C. §15481) and (3) comply with all other relevant Federal statutory requirements (noted in 42 U.S.C. §15545). Failure to demonstrate compliance will require repayment. The repayment provisions of HAVA require repayment of funds on a prorated basis. The rate is established by taking the total

---

\(^5\) Those precincts which used punch card or lever machines to administer the regularly scheduled general election for Federal office held in November of 2000.

\(^6\) Replaced punch card or lever voting systems may not be transferred for use in a different precinct.
number of qualifying precincts which have fully met the requirements of HAVA, as a function of the total number of qualifying precincts within the State. (See 42 USC §15302(d)).

Timely Expenditure of Funds. To avoid repayment, Florida must also show that all HAVA 102 funds received were used for their designated purpose prior to the November 2, 2004 HAVA deadline. This means that all 102 funds were either expended (finally transferred to another party for consideration) and/or obligated in such a way that the state incurred a legally enforceable liability to another party (such as a local government or contractor) for the full value of its 102 funding. Florida must be able to document and certify the status of the 102 funding it received. In the event Florida possesses unobligated 102 funds after the deadline, the state will be required to return either an amount equal to the noncompliant precinct percentage, as discussed above, or the total amount of unobligated 102 funds, whichever is greater.

Certification. As Chief State Election Official, we ask that you carefully review the enclosed certification and its instructions. The document shall be filled out by initialing each statement that is true and accurate. If a statement may not be certified as true and accurate it must be lined through and a written and signed explanation attached (see instructions in italics). The certification must be completed and received by the Commission no later than January 15, 2007. Failure to timely file the enclosed certification will result in the Commission’s forwarding of this matter to the EAC’s Office of the Inspector General for action.

Thank you for your attention to this matter. All questions or correspondence should be directed to Edgardo Cortes, Election Assistance Commission, 102 Funds Certification, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005 [(202) 566-3100].

Sincerely,

Thomas R. Wilkey
Executive Director

Enclosure
CERTIFICATION: USE OF HAVA SECTION 102 FUNDS AND REPLACEMENT OF PUNCH CARD AND LEVER MACHINES

I, the undersigned, having investigated or caused to be investigated each matter, below; certify, affirm and acknowledge that each of the following numbered statements, and any attachments to this certification document, are true and accurately reflect the status, condition and operations of Florida (hereinafter "state") as they related to the use and status of Help America Vote Act (HAVA) Section 102 Funds and the replacement of punch card or lever machines.

I understand that by certifying the information below, I am making a statement or representation to the U.S. Election Assistance Commission, an independent Federal Agency, necessary for the agency to determine Florida’s required compliance with HAVA Section 102. (42 U.S.C. §15302). Compliance with HAVA Section 102 is required by the state as a result of its accepting Federal funds under that provision. As a condition of receiving 102 funds, the state certified that it would “use the payment... to replace punch card voting systems or lever voting systems (as the case may be) in the qualifying precincts within the state by the deadline prescribed... [regularly scheduled general election for Federal office to be held in November 2004].” (42 U.S.C. §15302(b)).

I further understand that to the extent any of the below (or attached) representations or certifications are found to be materially false, the Federal funds received by the state will be subject to audit and possible recoupment. Further, such false statements may subject the undersigned to criminal prosecution under 18 U.S.C. §1001 or other Federal Statutes.

I. BACKGROUND. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the following statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment A, Background.”

   Initials:_____

2. Triggering Election. The regularly scheduled general election for Federal Office in November 2004 (triggering the deadline noted in 42 U.S.C. 15302 (a)(3)(A)) for the state was held on November 2, 2004.

   Initials:_____

3. Funds Received. The State received $11,581,377.00 in Federal Funds pursuant to HAVA section 102.

   Initials:_____

021069
II. PUNCH CARD OR LEVER MACHINE REPLACEMENT. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the below statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled "Attachment B, Punch Card or Lever Machine Replacement."

1. Qualified Precincts. The State had 3,628 total qualified precincts (precincts which used punch card or lever machines to administer the regularly scheduled general election for Federal office held in November of 2000).

   Initials:____

2. Qualified Precincts: No Punch Card or Lever Machine Used. None of the qualifying precincts, noted in statement 1 above, used a lever or punch card machine in an election for Federal office on or after November 2, 2004.

   Initials:____

3. No Punch Card or Lever Machine Used in State. No precinct in the state used a punch card or lever machine for an election for Federal office on or after November 2, 2004.

   Initials:____

4. Replacement Machines. All machines purchased, leased or otherwise procured to replace punch card or lever machines in qualifying precincts meet the requirements of HAVA section 301 (42 U.S.C. §15481) and comply with all other relevant Federal statutory requirements (noted in 42 U.S.C. §15545). This includes the requirement that each polling place have at least one voting system equipped for individuals with disabilities. Please provide (below) a complete list of all voting systems procured, leased or otherwise obtained to replace the state's punch card or lever machines.

   If you need additional space, please continue this table on a separate, signed attachment.

   Initials:____

5. Voting Systems in Place. All voting systems procured to replace punch card or lever machines were in place and used in the state's November 2, 2004 Federal election.

   Initials:____
III. HAVA § 102 FUNDS. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify to either response "a" or "b" in statement 1 or statement 2, below, you must line through the statement and attach a signed document explaining why you could not make a certification. The explanation (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment C, HAVA §102 Funds.”

1. Status of HAVA §102 Funds. Please check the statement below that applies to your state. (Check only one statement).

   (a) The state had none of the $11,581,377 it received pursuant to HAVA §102 remaining in its election fund after November 2, 2004. This means that as of this date, all 102 funds were expended. Funds are expended when finally transferred to another party (manufacturer or vendor) for consideration (voting system).

   (b) The state had only obligated funds remaining in its election fund after November 2, 2004. This means that as of this date, all funds were either expended or obligated. Funds are expended when finally transferred to another party (manufacturer or vendor) for consideration (voting system). Funds are properly obligated when the state has incurred a legally enforceable liability (such as a grant agreement, contract or lease) to another party (such as a local government or contractor) for a specific portion of the 102 funds. *If the state had only obligated funds in its election funds after the above date, attach a statement explaining the obligation(s). This statement must clearly explain and state the value of the obligated funds remaining and the nature of the obligation. Documentation regarding the obligation should also be attached and explained (e.g. documents from vendor contracts or agreements with local governments). This explanation and supporting documentation shall be labeled “Attachment D, Obligated Funds.”

Initials:_____

2. Use of HAVA §102 Funds. All HAVA §102 funds expended or obligated by the state were used to replace punch card or lever machines in qualifying precincts per 42 U.S.C. §15302(a)(2).

Initials:_____

I, by signing my name below, certify, affirm and acknowledge, under penalty of Federal law, that each of the above numbered paragraphs initialed above accurately represent the operations, conditions and practices of Florida as they related to the use and status of HAVA Section 102 Funds and the replacement of punch card or lever machines.

Thomas R. Wilkey
Executive Director
U.S. Election Assistance Commission
1225 New York Avenue N.W., Suite - 1100
Washington, DC 20005

Dear Mr. Wilkey:

On behalf of Secretary of State, Sue M. Cobb, the chief elections official for the State of Florida, we hereby submit this certification to the U.S. Elections Assistance Commission that the State of Florida has fully implemented the requirements of Title III of the Help America Vote Act of 2002. Pursuant to section 251(b)(2) of the Title II of the Help America Vote Act of 2002 (HAVA), such certification permits the State to use HAVA requirements funds for other activities to improve the administration of elections for Federal office.

If you have any comments or questions regarding this certification, please do not hesitate to contact us at 850-245-6500.

Sincerely,

Dawn K. Roberts, Director, Division of Elections

Thomas R. Wilkey
Executive Director
U.S. Election Assistance Commission
1225 New York Avenue N.W., Suite -1100
Washington, DC 20005

Dear Mr. Wilkey:

On behalf of Secretary of State, Sue M. Cobb, the chief elections official for the State of Florida, we hereby submit this certification to the U.S. Elections Assistance Commission regarding our state's intended use of the requirements payments to carry out other activities to improve election administration for Federal office.

Pursuant to section 251(b)(2) of the Title II of the Help America Vote Act of 2002 (HAVA), the State of Florida certifies that it intends to use $4,000,000.00 of the requirements payment for improving election administration. More specifically, these funds will be used to complete major poll worker recruitment and training efforts statewide that primarily begin in June 2006 and end by August 2006, before the primary election scheduled for September 5, 2006. Three million dollars will be distributed to the counties for their recruitment and training activities. The county must provide a 15% match. The remaining one million dollars will be used by the Department of State to develop a statewide poll worker curriculum to be used by all counties to assure uniform poll worker training.

We also certify that the $4,000,000.00 is an amount that does not exceed the amount equal to the total minimum requirements payment amount applicable to Florida under section 252(c) if Title II of HAVA which has been determined to be $11,596,803.00.

If you have any comments or questions regarding this certification, please do not hesitate to contact us at 850-245-6500.

Sincerely,

[Signature]

MEMORANDUM

TO: State HAVA Coordinators

FROM: Edgardo Cortés, Election Research Specialist

SUBJECT: Request for Amended Reports on Help America Vote Act Expenditures from Chief State Election Officials, due January 26, 2007

This is to inform you that the U.S. Election Assistance Commission (EAC) has requested that your Chief State Election Official provide amended (corrected) reports on the use of funds provided to your State under the Help America Vote Act of 2002 (HAVA) Title I and Title II, Section 251. Copies of all letters sent regarding this request are enclosed with this Memorandum. Each letter details the corrections and clarifications required for the Standard Form (SF) 269s and accompanying narratives now on file with the EAC. As your State’s designated HAVA coordinator, we ask your help to ensure that the amended reports are filed by the deadline.

Enclosed in this packet is a color-coded illustration of the SF 269 form to assist you in filling out the form correctly. Two sample narratives are also enclosed that show different, acceptable styles of documenting HAVA activities and expenditures during the reporting period. Please review these models carefully as they are designed to help you meet your State’s reporting obligations. A PDF copy of SF 269 may be found at http://www.whitehouse.gov/omb/grants/sf269.pdf.

All amended reports and narratives are due by January 26, 2007. If your state will not be able to meet this deadline, you need to request an extension in writing and provide a reason for the delay and the expected completion date. The necessary reports or requests for extensions should be mailed to my attention at the address above. Please let me know if you have any questions about this process. You can reach me at ecortes@eac.gov, (202) 566-3126, or (866) 747-1471.
January 10, 2007

Secretary Kurt Browning
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Reference: Amended HAVA Reports Title I, Section 102 for Calendar Years 2004 and 2005

Response Due Date:
January 26, 2007

Dear Secretary Browning:

The purpose of this letter is to obtain corrected (amended) reports for your state’s use of funds under Title I, Section 102 of the Help America Vote Act of 2002 (HAVA) for the Calendar Years (CY) 2004 and 2005. The amended SF 269 reports are essential as the U.S. Election Assistance Commission (EAC) prepares its Annual Report to Congress which will summarize HAVA funds expenditures, as reported by Florida.

Below is an itemization of the information required in your Amended SF 269 report(s) for Title I, Section 102:

- The State’s report dated 1/20/04 for the period beginning 6/16/03 to 12/31/03 indicates that it is a FINAL report. However, a seceding report dated 2/28/06 for the period 6/16/03 to 12/31/05 is Amended to show interest on those funds for three years. Please submit Amended reports indicating whether or not the fund has been fully expended or the correct interest on the remainder.

Please review the guidance provided in the color-coded Model SF 269 Long Form and the Model Narratives enclosed for more information about how to prepare the Amended Title I, Section 102 report(s). A blank copy of the auto-fill form can be found at www.whitehouse.gov/omb/grants/sf269.pdf.

There is also a list of Frequently Asked Questions and other information under the Funding for States section on the EAC website at http://www.eac.gov/. Contact Edgardo Cortes by e-mail at ecortes@eac.gov, by phone at 1-866-747-1471 (toll free) or 202-566-3116 (direct) should you have additional questions.
The requested Amended report(s) for Title I, Section 102 must be completed and received by the Commission no later than January 26, 2007. If you fail to respond by that time, EAC will have no choice but to forward this matter to the EAC’s Office of the Inspector General for review and investigation.

Amended reports should be mailed to the Election Assistance Commission, Amended 102 Reports, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005.

Thank you for your attention to this matter.

Sincerely yours,

Thomas R. Wilkey
Executive Director

Line 12, Remarks:

The instructions for completing SF 269 Form, Section 12 include a request for states to report the total Maintenance of Effort appropriated for the next state fiscal year.

Florida does not appropriate funds based on Maintenance of Effort. Although the required Maintenance of Effort is considered during the appropriation process, funds are appropriated at a higher aggregate level. Florida fully anticipates meeting its required Maintenance of Effort level although actual expenditures will not be available until the end of the state's fiscal year.
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State utilizing Help America Vote Act (HAVA) Title II, Section 251 funds during the period from October 1, 2005 through September 30, 2006.

**VOTING SYSTEMS ASSISTANCE – $12,576,798**

During the current reporting period, Florida provided funds to sixteen county supervisors of elections to reimburse them for disability-accessible voting systems that had been purchased prior to July 1, 2004. Distribution of funds was based on the same formula used to distribute funds in FY 2004-05 to fifty-one counties that were required to purchase accessible voting systems in order to have one accessible voting system for each polling place by January 1, 2006. In addition to the sixteen counties, an additional eight counties received reimbursement for existing DRE’s for which funding was not previously provided.

In addition to the Section 251 funds used for this purpose, Florida used state matching funds for a portion of the expenditures made to supervisors of elections to assist with accessible voting systems. Please see the section “State Matching Funds” at the end of this report.

The HAVA State Plan includes references to acquiring accessible voting equipment for individuals with disabilities on pages 13 through 15 and on page 61.

**STATEWIDE VOTER REGISTRATION LIST - $11,960,615**

During the current reporting period, Florida completed development of the statewide voter registration system and moved into the operational phase of the project. The Florida Voter Registration System (FVRS) is a real-time system that contains the name and voter registration information of all voters in the state. The system allows counties to continue to use their existing systems with modifications to interface with the FVRS.

Expenditures for this activity included payments to the vendor that served as Prime Contractor in developing the system as well as the vendor that provided quality assurance and oversight during the developmental phase of the project. Other costs incurred included servers, software and related license fees, network fees to establish the statewide frame relay network for the FVRS, a risk assessment study for the FVRS, training for Department of State employees related to software systems being utilized to operate the FVRS, and costs associated with establishing and operating a bureau to handle voter registration services at the state level for Florida’s 67 counties. The bureau is responsible for processing voter registration applications as well as reviewing and verifying potential matches in the FVRS for felons, persons declared mentally incompetent and deceased persons.

Other expenditures included salaries and related expenses for thirty-three positions associated with operating and maintaining voter registration services provided through the FVRS. These include thirty-one positions in the Department of State and two positions at the Florida Department of Highway Safety and Motor Vehicles. These positions provide support for the various hardware and software systems being utilized to operate the system, legal expertise, and voter registration services for Florida’s counties.
Reference to the statewide voter registration system can be found in the HAVA State Plan on pages 26-31, 56-57 and 61.

**POLL WORKER RECRUITMENT AND TRAINING - $3,000,000**

In March 2006 Florida submitted a certification to the Election Assistance Commission regarding Florida's intention to use a portion of the requirements payment to assist with poll worker recruitment and training efforts. Funds were distributed to Florida's 67 supervisors of elections in order to provide funds statewide to assist with recruiting and training poll workers. Prior to receiving the funds, supervisors of elections were required to submit a plan to the Department of State describing the intended use of the funds. In addition, each county was required to provide 15% matching funds to be used exclusively for activities associated with recruiting and training poll workers.

Reference to poll worker recruitment and training is included in the HAVA State Plan on pages 49-51 and page 61.

**INTEREST ACCRUED - $3,758,921.01**

During the current reporting period the Department of State invested Title II, Section 251 funds and accrued Interest in the amount of $3,758,921.01.

**STATE MATCHING FUNDS - $1,484,094**

During the current reporting period, Florida spent $1,484,094.35 in State Matching funds.
February 23, 2007

Mr. Thomas R. Wilkey  
Executive Director  
U. S. Election Assistance Commission  
1225 New York Avenue, NW – Suite 1100  
Washington, DC 20005

Dear Mr. Wilkey:

Enclosed are Florida’s narrative reports regarding HAVA, Title I, Section 101 and 102 funds for the period from January 1, 2006 through December 31, 2006. A separate SF 269 form is included for Section 101 and 102 funds.

If you have any questions or would like additional information, please let us know.

Sincerely,

Amy R. Tuck  
Director, Division of Elections

Date Report Submitted
February 20, 2007
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State during calendar year 2006 utilizing Help America Vote Act (HAVA) Title I, Section 101 funds.

**VOTER EDUCATION - $1,073,923**

During calendar year 2006, Florida distributed $1,073,923 to the 67 county supervisors of elections to be utilized for voter education purposes. In order to receive the funds each supervisor of elections was required to submit a detailed plan outlining the anticipated uses of the funds. In addition to the plan, each local Board of County Commissioners was required to provide fifteen percent in matching funds to be used exclusively for voter education purposes.

County supervisors of elections are required to submit a report to the Department of State on an annual basis regarding voter education programs conducted in the counties until the funds distributed by the state are depleted. Based on the latest reports from supervisors of elections, counties continue to employ numerous voter education activities in an effort to involve citizens in the elections process.

These activities include printing and mailing sample ballots to registered voters, conducting voter registration drives at various locations and events throughout the county, disseminating information regarding election dates and related deadlines through a variety of media sources, and conducting demonstrations on the use of voting systems equipment.

Florida’s voter education program is discussed in the HAVA State Plan on pages 37 through 47 and on page 58.

**ELECTION ADMINISTRATION - $193,434**

Florida established three positions in the Department of State to provide administrative oversight and coordination for HAVA-related activities. Employees in these positions are responsible for monitoring HAVA expenditures to ensure compliance with federal requirements. The positions administer several contract programs that provide funds to county supervisors of elections for HAVA-related activities including voter education, voting systems assistance as well as poll worker recruitment and training programs. In addition, the positions are responsible for administering grant funds awarded by the U.S. Department of Health and Human Services under the Voting Access for Individuals with Disability (VOTE) grant program.

Recommendations regarding establishment of positions associated with HAVA Oversight and Reporting can be found on page 59 in the HAVA State Plan.

**STATE PLAN - $2,991**

The HAVA State Planning Committee held two meetings in order to update the HAVA State Plan. The meetings were held in Pensacola and Miami in an effort to provide an opportunity for participation by citizens in various locations throughout the state. Expenditures included travel expenses for HAVA State Planning Committee members as well as Department of State staff who participated in the meetings.

Reference to managing the State Plan is included on pages 82-83 in the HAVA State Plan.
The Florida Division of Elections contracted with a video production company to produce two videos that could be used in conducting training for poll workers. The videos were distributed to Florida's 67 county supervisors of elections to use in poll worker training sessions. One of the videos covered sensitivity issues when dealing with individuals with disabilities and the other video provided conflict management training skills for poll workers.

The Florida Department of State contracted with one of Florida's universities to develop a statewide poll worker curriculum to be used by Florida's 67 county supervisors of elections. The curriculum is intended to provide uniformity in poll worker training efforts throughout the state.

Florida's efforts to assist supervisors of elections in conducting training for poll workers can be found in the HAVA State Plan on pages 49 through 51, pages 58 through 61.

**INTEREST ACCRUED - $185,577.58**

During 2006, the Department of State invested Title I, Section 101 funds and accrued interest in the amount of $185,577.58.

Date Report Submitted
February 20, 2007
Florida received $11,581,377 from Title I, Section 102 funds. The funds were invested pending transfer to Florida's Working Capital Fund to reimburse the state for funding provided to Florida's 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Interest on the initial investment has continued to accrue with earnings in the amount of $1,583.19 reported for calendar year 2006.

Secretary Kurt Browning
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Reference: Amended HAVA Reports Title I, Section 102 for Calendar Years 2004 and 2005

Response Due Date: January 26, 2007

Dear Secretary Browning:

The purpose of this letter is to obtain corrected (amended) reports for your state's use of funds under Title I, Section 102 of the Help America Vote Act of 2002 (HAVA) for the Calendar Years (CY) 2004 and 2005. The amended SF 269 reports are essential as the U.S. Election Assistance Commission (EAC) prepares its Annual Report to Congress which will summarize HAVA funds expenditures, as reported by Florida.

Below is an itemization of the information required in your Amended SF 269 report(s) for Title I, Section 102:

- The State’s report dated 1/20/04 for the period beginning 6/16/03 to 12/31/03 indicates that it is a FINAL report. However, a seceding report dated 2/28/06 for the period 6/16/03 to 12/31/05 is Amended to show interest on those funds for three years. Please submit Amended reports indicating whether or not the fund has been fully expended or the correct interest on the remainder.

Please review the guidance provided in the color-coded Model SF 269 Long Form and the Model Narratives enclosed for more information about how to prepare the Amended Title I, Section 102 report(s). A blank copy of the auto-fill form can be found at www.whitehouse.gov/omb/grants/sf269.pdf.

There is also a list of Frequently Asked Questions and other information under the Funding for States section on the EAC website at http://www.eac.gov/. Contact Edgardo Cortes by e-mail at ecortes@eac.gov, by phone at 1-866-747-1471 (toll free) or 202-566-3116 (direct) should you have additional questions.
The requested Amended report(s) for Title I, Section 102 must be completed and received by the Commission no later than January 26, 2007. If you fail to respond by that time, EAC will have no choice but to forward this matter to the EAC's Office of the Inspector General for review and investigation.

Amended reports should be mailed to the Election Assistance Commission, Amended 102 Reports, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005.

Thank you for your attention to this matter.

Sincerely yours,

Thomas R. Wilkey
Executive Director

Hi Edgardo,

Would you please give me a call. We have a question regarding the use of HAVA Section 101 funds.

Thanks,
Barbara Leonard
Florida Division of Elections
850-245-6201

This response is provided for reference only and does not constitute legal advice or representation. As applied to a particular set of facts or circumstances, interested parties should refer to the Florida Statutes and applicable case law, and/or consult a private attorney before drawing any legal conclusions or relying upon the information provided.

Please note: Florida has a very broad public records law. Written communications to or from state officials regarding state business constitute public records and are available to the public and media upon request unless the information is subject to a specific statutory exemption. Therefore, your e-mail message may be subject to public disclosure.
Edgardo,

The legislative budget issue requesting additional funds for state match was inadvertently scanned twice. It is only one page.

Thanks,
Barbara.

Barbara,
Both pages in the PDF that shows the legislative budget request appear to be the same. Are the pages different or was the same page copied twice?

Edgardo,

Attached are the following documents providing updated information regarding the findings included in the Florida Auditor General’s Operational Audit Report # 2006-194:

- Department of State Inspector General’s Follow-up Review to Auditor General Report Number 2006-194
- Letter dated December 13, 2006 from Inspector General to Secretary of State Cobb
- Budget issue included in the FY 2007-08 Legislative Budget Request regarding additional funds for State Match
- Florida Voting Systems Certification Checklist & Test Record

If you have any questions, please let us know.

Thanks,
Barbara

Amy and Barbara,
Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Subject: Re: FW: Guidance Regarding Use of HAVA Funds

Barbara,
Sorry for the delay but I was at the NASS and NASED conference over the weekend and then we had some bad weather that kept me from coming in. In regards to question #2, this is a purchase that is solely related to the statewide voter registration and therefore does not require pre-approval from the EAC. Just make sure to keep the proper records for audit purposes. Hope this helps. Thanks.

Edgardo,

The Florida Department of State is requesting guidance regarding the use of HAVA funds for several items:

1. The computer equipment used to operate Florida's statewide voter registration system is currently housed in a state-owned facility that is in the process of being sold. As a result, the Department is moving its computer operations to a private facility.

Following our conversation this morning, the Department has determined that State funds will be used to pay for the expenses associated with moving all of the equipment (including the statewide voter registration system equipment) to the new location.

However, after the Department has completed its relocation of the computer room to another facility, it will be necessary to make rental payments to the owner of the building. Is it possible for the Department to use HAVA funds to pay a portion of the rent for the space occupied by computer equipment used to support the statewide voter registration system?

2. The Department needs to purchase additional memory in order to provide an identical back-up computer for the statewide voter registration system in case of a disaster. We have received quotes from three contractors on the State Purchasing Contract with the lowest quote being from
Hewlett Packard at $81,760. We are requesting EAC approval to use HAVA Section 251 funds for this purchase.

3. During the summer of 2006 the Department requested guidance from the EAC regarding the use of HAVA funds for annual and/or sick leave payments to employees filling HAVA-funded positions who terminated employment with the State. Could you check on the status of a response regarding this issue. If you need additional information, please let us know and we'll forward the original questions.

If you need any additional information regarding these items, please let us know. Thank you very much for your assistance.

Thanks,
Barbara Leonard

Barbara,

This was great information. This is the same issue I am working on in relation to the single audit. Just so you know, this means you will get the answer from me, but then it will also be addressed in an audit resolution report. That resolution report will cover this issue and the other issues identified during the single audit. Since EAC oversees HAVA funds, we are responsible for resolving issues identified during audits conducted by our Inspector General and also single audits conducted by each state. I’ll keep you posted as we move forward in that process. Let me know if you have any questions. Thanks.

Subject:Guidance Regarding Use of HAVA Funds
Edgardo,

The Florida Department of State is requesting guidance regarding the use of HAVA funds for several items:

1. The computer equipment used to operate Florida's statewide voter registration system is currently housed in a state-owned facility that is in the process of being sold. As a result, the Department is moving its computer operations to a private facility.

   Following our conversation this morning, the Department has determined that State funds will be used to pay for the expenses associated with moving all of the equipment (including the statewide voter registration system equipment) to the new location.

   However, after the Department has completed its relocation of the computer room to another facility, it will be necessary to make rental payments to the owner of the building. Is it possible for the Department to use HAVA funds to pay a portion of the rent for the space occupied by computer equipment used to support the statewide voter registration system?

2. The Department needs to purchase additional memory in order to provide an identical back-up computer for the statewide voter registration system in case of a disaster. We have received quotes from three contractors on the State Purchasing Contract with the lowest quote being from Hewlett Packard at $81,760. We are requesting EAC approval to use HAVA Section 251 funds for this purchase.

3. During the summer of 2006 the Department requested guidance from the EAC regarding the use of HAVA funds for annual and/or sick leave payments to employees filling HAVA-funded positions who terminated employment with the State. Could you check on the status of a response regarding this issue. If you need additional information, please let us know and we'll forward the original questions.

   If you need any additional information regarding these items, please let us know. Thank you very much for your assistance.

Thanks,
Barbara Leonard
Edgardo,

This is the initial request regarding leave payments to terminating employees.

Thanks,
Barbara

Subject: Leave Payments to Terminating Employees

Peggy,

The Florida Department of State is requesting guidance from the EAC regarding leave payments to employees who have resigned from the Department of State and terminated employment in state government. Upon termination from the Department, these individuals have/will be paid for annual leave hours that were accrued during their tenure as state employees. During their employment with the Department of State, each employee was assigned to a position that worked exclusively on HAVA-related activities and was funded with HAVA dollars.

One individual was employed by the Department of State for eight months. However, he had been in state government for several years and transferred to the Department of State from another state agency. During that time he accrued 386 hours of annual leave. He accrued an additional 83 hours while employed at the Department of State. Upon termination from the Department, he was paid for 470 annual leave hours.

The other employee has been employed by the Department of State since mid-September 2003 and has worked exclusively in a HAVA-funded position during this period. He will be eligible for annual leave payments upon termination from state government at the end of June 2006. All of the annual leave hours were earned while he was working on HAVA activities.

In reviewing the language in federal OMB Circular A-87, it appears that it will be necessary for the Department of State to use state funds rather than HAVA funds for the leave payments to each of these individuals. However, since one individual was employed exclusively in a HAVA-funded position and earned the leave during this time, is it possible to use HAVA funds to pay for the accrued annual leave that will be paid to the individual upon termination from state government?

The situations referenced above relate to accrued annual leave. However, the same questions will apply when an employee filling a HAVA-funded position terminates from state government and is eligible to receive payment for sick leave.

We appreciate your assistance in determining the appropriate funding source when processing leave payments to individuals who worked in a HAVA-funded position at the time of termination from state government.
government.

Thanks,
Barbara Leonard
Florida Division of Elections

Edgardo,

I believe that question #3 is related to the state single audit findings. It was included in the Operational Audit conducted by the Florida Auditor General’s Office. I will forward you the original request for guidance that we sent to Peggy Sims last summer in case you don’t have access to it.

Thanks,
Barbara

Barbara,

Just a quick question about #3. Is this question related to the state single audit findings? I am working on some audit resolutions and wanted to make sure its the same issue.

Edgardo,

It is the same question that I posed before regarding moving to optical scan systems and voter verifiable paper audit records. This also includes using ballot on demand and Automark. Jennifer Kennedy (Deputy Secretary of State) spoke with Tom Wilkey on Tuesday and I spoke with him on Tuesday as well. From what I understand, the decision that you previously gave me stands. However, we need something more formal in writing. As you know, we are in legislative session and this is a request not only from us, but from both of our legislative houses. I would really appreciate getting it as soon as possible.

Thank you again for all your help on this. I know you guys are busy. Please let me know if there is anything I can do to help.

Hi Edgardo,

Would you please give me a call. We have a question regarding the use of HAVA Section 101 funds.

Thanks,
Barbara Leonard
Florida Division of Elections
850-245-6201

This response is provided for reference only and does not constitute legal advice or representation. As applied to a particular set of facts or circumstances, interested parties should refer to the Florida Statutes and applicable case law, and/or consult a private attorney before drawing any legal conclusions or relying upon the information provided.

Please note: Florida has a very broad public records law. Written communications to or from state officials regarding state business constitute public records and are available to the public and media upon request unless the information is subject to a specific statutory exemption. Therefore, your e-mail message may be subject to public disclosure.
Edgardo,

Again, thanks for your quick response on all of this. One more question... If counties used a ballot on demand system, which is basically just a ballot "printing" service at the early voting sites, could HAVA funding be used? Let me know if you need me to call or explain further.

Thank you,

Amy

Subject: RE: HAVA Funding

Amy,

Sorry for the longer response on this email. Its been a pretty busy day.
With question 1, I forgot that Florida did file a certification under HAVA section 251(b)(2)(A). This means you are correct, Florida can use any remaining requirements payments for the improvement of administration of elections for federal office. No additional certification is needed. VVPAR would fall under this category. Section 101 funds can be used for this purpose without any certification.
With #2, you are correct. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds. Our initial take on the automark system is that it would fall into this category because you would be replacing the current DREs with a new system.
Again, this is our general take on this without having reviewed any detailed information about Florida's particular situation. Let me know if you need any more info. Thanks.

Subject: HAVA Funding
Importance: High

Edgardo,

I wanted to summarize our earlier conversation to make sure I am clear on how to proceed on this issue.

1. VVPAR (Voter verifiable paper audit record)

These can be paid for from HAVA funding under certain circumstances although this is not a requirement in HAVA and does not meet Title 3 requirements.

Section 251 funding can be used for Title 3 activities or for improving the administration of elections for federal office. Under this guideline, Florida can do the following:
   a. Certify that we have met the requirements of Title 3 and use the remaining 251 funds for improving federal elections.
   b. Or if we have not met the requirements for Title 3, we can certify that we will not use more than the minimum payment (est. 11.6m) for "non-Title 3" activities.

As a state, we did certify in August, 2006 that we have met the requirements for Title 3, so we would be in position a. (above). I would assume that we could then use the Section 251 funds to provide voter verifiable paper audit record devices for touchscreens under the argument that it is to improve federal elections.
Section 101 funding can be used to improve administration of elections for federal office. If Florida decided to use this funding, we would not have to certify to the EAC.

2. Optical Scan

If the touchscreens that are being replaced were purchased with HAVA funding, then further HAVA funding may not be used for this purpose. If the touchscreens were purchased from state funding, then HAVA funding could be used for this purpose. I would assume we would follow the same guidelines in #1 concerning both the 251 and 101 funding.

And, of course, we are free to use state funding (or funding from the purchase of the systems) to upgrade as long as we remain in compliance with federal and state guidelines.

Thank you (and Julie) for taking the time to speak with me today. I appreciate the time and quick response. I look forward to hearing back from you.

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.
Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services
Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.
Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems."

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously
purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.
The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating
administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. Mr. West,
You requested information this morning via telephone on whether Florida
could use its remaining HAVA §251 funds to replace DREs previously
purchased with HAVA funds with optical scan voting systems. Since you have
requested an answer by this afternoon to assist in your legislative session
and a specific answer to your question would require us to collect
additional information and would take additional time, I am including a
response sent to Washington State regarding a similar question. Please
review this and see if it is sufficient for what you need. I have also
included an explanation of acceptable uses of HAVA funds as well as other
federal rules and regulations that are applicable to the use of HAVA funds.
I have highlighted the sections most closely related to your request.
Please let me know if you have any additional questions or if you need
further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to
improve the administration of federal elections and to meet the
requirements of Title III of HAVA (specifically to implement provisional
voting, to improve voting technology, to develop and implement a statewide
voter registration database, to provide information to voters, and to
verify and identify voters according to the procedures set forth in HAVA).
Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part I of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable.

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable.
allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. ecortes@eac.gov
Mr. Cortes,

Florida is requesting guidance on whether HAVA Section 251 funds can be used to purchase optical scan voting systems to replace existing touchscreen voting systems that are compliant with HAVA Section 301(a).

Prior to passage of the Help America Vote Act, during the 2001 Legislative Session, the Florida Legislature passed the Florida Election Reform Act of 2001, Chapter 2001-40, Laws of Florida. The legislation included an appropriation of funds to be distributed to counties for voting systems assistance.

The funds were distributed to counties in equal installments over a two year period to assist with purchasing voting systems to replace lever and punch cards machines as well as paper ballot voting systems. Florida distributed $24,093,750 to assist counties with purchasing new voting systems.

At the time that counties were replacing voting systems to comply with changes to Florida law, fifteen counties opted to purchase touchscreen voting systems and the remaining counties either purchased or already had precinct-based optical scan voting systems.

We are currently in the 2007 Legislative Session. The Governor has some proposed legislation that would provide the following:

1. A precinct-based optical scan in all precincts.
2. One touchscreen with voter verifiable paper audit record in each precinct (ADA)
3. Allow for counties to either use an optical scan or touchscreen (retrofitted) for use for early voting.

In reviewing this legislation, the question has been asked as to what HAVA funds, if any, we can use to pay for these changes. Although I know we’ve been working off the FAQ and advice you’ve given other states, I thought it was important to ask based on our circumstances as to what we can and cannot fund with HAVA funds.

I realize this is late notice, but we do need an answer sooner rather than later. If you need to call to discuss further, please feel free to do so. My direct line is 850.245.6285 and my cell is 850.294.5298. I apologize for the urgency but as we move through session, it has become an issue that we need to be able to answer definitively. I look forward to hearing from you.

Thank you.

Amy K. Tuck
Director
Division of Elections
Florida Department of State
Edgardo,

What are the restrictions on the use of the interest from the HAVA money and were do I find those rules. Can we use the interest to replace Florida DRE's with optical scan?

Thanks

Bob West - Legislative Analyst
Florida House of Representatives
Ethics and Elections
402 HOB
Tallahassee, FL 32399-1300
Office 850-488-9204
Direct 850-922-9457

Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

**Sources and Uses of HAVA Funds**

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter
registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state’s plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were
made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State’s threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset
in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

“The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems.”

Peggy:

Yes, it is fine with us. We're glad that our reports include what you are looking for.

Sarah Jane

Dear Barbara and Sarah Jane:

EAC would like to use portions of the good supporting narrative provided with your state's annual HAVA reports as an example for states that are having difficulty providing the supporting information sought by EAC and required by HAVA. Would this be OK with you?

Bob,

I apologize for the delayed response but I have been out of the office for a few days. We have also received an almost identical question from your Secretary of State's office and are preparing a formal response in coordination with our General Counsel's office. We realize you are in currently in legislative session and need these answers as soon as possible. Please let me know if there are additional questions you would like us to include in this response. Thanks.

Edgardo,

What are the restrictions on the use of the interest from the HAVA money and were do I find those rules. Can we use the interest to replace Florida DRE's with optical scan?

Thanks

To: West, Bob
Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

**Sources and Uses of HAVA Funds**

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting
systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state’s plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

**Allowable Costs**

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

**Allocable Costs**

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section
251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

**Sources and Uses of HAVA Funds**

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election
information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other
departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

**Indirect Costs**

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, *Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government*, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

**Reasonable Costs**

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

**Excerpt from response to Washington State, sent August 10, 2006:**

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory
For more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems.”

Thank you. I guess we are all a little confused. We had originally thought we could use some funding for the optical scan part of the legislation but not for the vvpats. Based on this response it would seem that we could not use any of the funding for this legislation.

Subject: Response: Using HAVA funds to replace voting equipment 

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need
Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable
In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here
to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems."

Subject: Response: Using HAVA funds to replace voting equipment

Mr. West,
You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted
under part I of subtitle D of title II.

F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.

G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.

H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state’s plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

**Costs must be Allowable, Allocable and Reasonable**

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

**Allowable Costs**
A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, *Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government*, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State’s threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by
determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

“The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems.”

Amy and Barbara,

Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Amy,

Sorry for the longer response on this email. It's been a pretty busy day.

With question 1, I forgot that Florida did file a certification under HAVA section 251(b)(2)(A). This means you are correct, Florida can use any remaining requirements payments for the improvement of administration of elections for federal office. No additional certification is needed. VVPAR would fall under this category. Section 101 funds can be used for this purpose without any certification.

With #2, you are correct. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds. Our initial take on the automark system is that it would fall into this category because you would be replacing the current DREs with a new system.

Again, this is our general take on this without having reviewed any detailed information about Florida's particular situation. Let me know if you need any more info. Thanks.

---

Sorry – one more issue. There is some consideration of using an "AutoMARK" system instead of the VVPAR. I would assume this would follow along the same lines as the considerations for the VVPAR. Let me know if you need more information on that before responding.

Thanks again.

Subject: HAVA Funding
Importance: High
I wanted to summarize our earlier conversation to make sure I am clear on how to proceed on this issue.

1. **VVPAR (Voter verifiable paper audit record)**

   These can be paid for from HAVA funding under certain circumstances although this is not a requirement in HAVA and does not meet Title 3 requirements.

   Section 251 funding can be used for Title 3 activities or for improving the administration of elections for federal office. Under this guideline, Florida can do the following:
   
   a. Certify that we have met the requirements of Title 3 and use the remaining 251 funds for improving federal elections.
   
   b. Or if we have not met the requirements for Title 3, we can certify that we will not use more than the minimum payment (est. 11.6m) for "non-Title 3" activities.

   As a state, we did certify in August, 2006 that we have met the requirements for Title 3, so we would be in position a. (above). I would assume that we could then use the Section 251 funds to provide voter verifiable paper audit record devices for touchscreens under the argument that it is to improve federal elections.

   Section 101 funding can be used to improve administration of elections for federal office. If Florida decided to use this funding, we would not have to certify to the EAC.

2. **Optical Scan**

   If the touchscreens that are being replaced were purchased with HAVA funding, then further HAVA funding may not be used for this purpose. If the touchscreens were purchased from state funding, then HAVA funding could be used for this purpose. I would assume we would follow the same guidelines in #1 concerning both the 251 and 101 funding.

   And, of course, we are free to use state funding (or funding from the purchase of the systems) to upgrade as long as we remain in compliance with federal and state guidelines.

   Thank you (and Julie) for taking the time to speak with me today. I appreciate the time and quick response. I look forward to hearing back from you.

Sincerely,

Amy,
I am on my way to work but am delayed due to traffic. However, I am forwarding you this response I sent to Bob West from the FL legislature who asked this question on Monday. Please read this over and let me know if it helps. Thanks.

----- Original Message -----
Mr. West,

You requested information this morning via telephone on whether Florida could use its remaining HAVA §251 funds to replace DREs previously purchased with HAVA funds with optical scan voting systems. Since you have requested an answer by this afternoon to assist in your legislative session and a specific answer to your question would require us to collect additional information and would take additional time, I am including a response sent to Washington State regarding a similar question. Please review this and see if it is sufficient for what you need. I have also included an explanation of acceptable uses of HAVA funds as well as other federal rules and regulations that are applicable to the use of HAVA funds. I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part 1 of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.
H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing
provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit
an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State’s threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be reimbursed to the state Election Fund. While Snohomish County did take initiative to purchase equipment early, it turns out that this equipment is not usable. If this is the case, then HAVA funds can be used for the purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with Section 301(a) and are simply replacing the system because they are not happy with it or feel they could get something better, then this cannot be paid for using HAVA funds. Replacement of newly purchased equipment that is HAVA compliant and in good working order does not appear to meet the test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must determine which of the above scenarios Snohomish County falls into in order to decide which system HAVA funds will be used for. The other system should be paid for with non-HAVA funds. In either scenario, HAVA funds cannot be used to purchase both voting systems."

I have highlighted the sections most closely related to your request. Please let me know if you have any additional questions or if you need further clarification. Thank you.

Sources and Uses of HAVA Funds

There are three sources of funding provided by HAVA for use to improve the administration of federal elections and to meet the requirements of Title III of HAVA (specifically to implement provisional voting, to improve voting technology, to develop and implement a statewide voter registration database, to provide information to voters, and to verify and identify voters according to the procedures set forth in HAVA). Those sources are Section 101, Section 102 and Section 251 funds.

The funds received by a state under Section 101 can be used for the following purposes:

A. Complying with the requirements under title III.
B. Improving the administration of elections for Federal office.
C. Educating voters concerning voting procedures, voting rights, and voting technology.
D. Training election officials, poll workers, and election volunteers.
E. Developing the State plan for requirements payments to be submitted under part I of subtitle D of title II.
F. Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for casting and counting votes.
G. Improving the accessibility and quantity of polling places,
including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language.

H. Establishing toll-free telephone hotlines that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specific polling place locations, and other relevant information.

Section 102 funds can be used ONLY for the purposes of replacing punch card and lever voting systems with voting systems that comply with Section 301(a) of HAVA.

Section 251 funds can be used to implement any of the Title III requirements, including purchasing compliant voting systems, implementing provisional voting, providing information to voters in the polling place, developing and implementing a statewide voter registration list, and identifying voters. In addition, states and local governments can use HAVA funds to improve the administration of elections for Federal office when one of two conditions is met: (1) the state has met the requirements of Title III; or (2) the state notifies EAC of its intention to use an amount not to exceed the amount of the minimum payment that the state either did or could have received under the Section 252 formula for that purpose.

The uses of Section 251 funds (and Section 101 funds, when used to meet the requirements of Title III) must be accounted for in the state's plan as originally submitted or later amended. Any material change in the use of 251 funds (and Section 101 funds as specified above) from the approved state plan will require the state to revise its plan and submit the revisions to the EAC for publication and approval.

Costs must be Allowable, Allocable and Reasonable

In addition to the restrictions on the uses of funds imposed by HAVA, when these funds were distributed by either the General Services Administration (GSA) or the EAC, those funds were made subject to several circulars developed by the Office of Management and Budget, specifically OMB Circulars A-87 (governs the use of federal funds to purchase goods for state and local governments), A-102 (governs the management of federal funds for state and local governments), A-122 (governs the use of federal funds to purchase goods for non-profits) and A-133 (dealing with audits). These circulars further restrict the appropriate uses of Federal funds requiring generally that costs paid for by HAVA funds are allowable, allocable (directly or through an indirect cost rate), and reasonable.

Allowable Costs

A cost is allowable if it is necessary for the proper and efficient performance and administration of the federally sponsored program. Costs that fall within the specifically identified uses of HAVA funds in either Sections 101, 102 or Title III are allowable.

Allocable Costs

A state can allocate an expense by charging only a portion equal to the percentage of use for HAVA related purposes to the HAVA grant. This can be accomplished by either using only that percentage of HAVA fund per unit cost or by seeking reimbursement from the other departments within the state for their portion of the usage. The question of allocability arises
generally in one of two circumstances. First, is the cost allocable to the program to which it is billed? Just because a cost is allowable under one or more funding programs of HAVA do not mean that it is allocable to each and every program. For example, if an expense is not directly related to meeting any of the Title III requirements, it is allocable only to Section 101 funds and Section 251 funds pursuant to the provisions of Section 251(b) that allow for the use of Title II funds for the improvement of the administration of elections for federal office only up to the minimum payment amount. Second, is the cost allocable to benefit a Federal election? Most of the uses identified in HAVA require the funds to be used to benefit a Federal election. Thus, costs that strictly benefit a state or local election are not allocable to the HAVA funding programs.

Indirect Costs

In some circumstances, the expense may be an indirect one that can be covered by an indirect cost rate. In that instance, the state may submit an indirect cost rate proposal in which it identifies and supplies information regarding direct and indirect costs of operation. Circular A-87 and ASMB C-10, Cost Principles and Procedures for Developing Cost Allocation Plans and Indirect Cost Allocation Plans and Indirect Cost Rates for Agreements with the Federal Government, provide guidance on negotiating indirect costs rates.

An indirect cost rate provides a state with the basis for allocating administrative costs that are inextricably linked to other services provided by the Secretary of State such that they cannot easily be segregated into those costs that directly benefit the HAVA funding program and those that do not. For example, the cost of printers and copy machines that are used for both Federal and State election activities and that are below the State's threshold for capitalized equipment may be expensed and included in the indirect cost pool. On the other hand, if you include an asset in the fixed capital assets section of your balance sheet and depreciate the asset, you should consider the asset as a capital expenditure and include only depreciation expense in the pool. Click here to see a power point presentation on indirect costs presented by KPMG on behalf of the EAC.

Reasonable Costs

A state must do some assessment as to whether the costs are reasonable. This is done by determining that the cost is justified based upon factors such as the frequency of use, leasing versus purchasing, and actual cost for the good or service.

Excerpt from response to Washington State, sent August 10, 2006:

"The question of the Snohomish County audio units brings up several issues. The issue as I understand it is that Snohomish County bought some accessible voting systems with HAVA funds that do not meet the 2002 requirements. Although it is possible, it is also unlikely that a voting system could be compliant with HAVA Section 301(a) and not meet the 2002 FEC Voting System Standards (particularly in regards to the tested error rate). Please see EAC Advisory 2005-004 for more information on helping to determine whether a particular system meets the standards of Section 301(a).

If the county purchased equipment which was not compliant with HAVA section 301(a), then HAVA funds could not be used to purchase these systems. Any use of HAVA funds for the purpose of purchasing voting equipment that is not compliant with 301(a) is a misuse of HAVA funds and should be
reimbursed to the state Election Fund. While Snohomish County did take
initiative to purchase equipment early, it turns out that this equipment is
not usable. If this is the case, then HAVA funds can be used for the
purchase of replacement voting systems.

If the county has already purchased a voting system which is compliant with
Section 301(a) and are simply replacing the system because they are not
happy with it or feel they could get something better, then this cannot be
paid for using HAVA funds. Replacement of newly purchased equipment that
is HAVA compliant and in good working order does not appear to meet the
test of reasonableness for using federal funds.

Purchasing voting systems is an acceptable use of HAVA funds. You must
determine which of the above scenarios Snohomish County falls into in order
to decide which system HAVA funds will be used for. The other system
should be paid for with non-HAVA funds. In either scenario, HAVA funds
cannot be used to purchase both voting systems.*

Amy and Barbara,

Attached is a PDF of the audit resolution for the Florida single audit. The original is being mailed out to Secretary Browning today and this will be posted on our website Monday afternoon. As always, our communications director Jeannie Layson is available to assist with any media inquiries regarding our audit resolutions. Please let me know if you have any questions. Thanks.

Amy and Barbara,
Do you have any additional documentation for the issues identified during your state single audit. I have a copy of your response letter to the state auditor dated June 15, 2006 but many of the items are planned actions. Do you have supporting documentation to show you've completed those things? I am trying to write our audit resolution report and would prefer it show as much completed as possible rather than using the report to ask for this info. Let me know. Thanks.

Barbara,
Sorry for the delay but I was at the NASS and NASED conference over the weekend and then we had some bad weather that kept me from coming in. In regards to question #2, this is a purchase that is solely related to the statewide voter registration and therefore does not require pre-approval from the EAC. Just make sure to keep the proper records for audit purposes. Hope this helps. Thanks.

Subject: Guidance Regarding Use of HAVA Funds

Edgardo,
The Florida Department of State is requesting guidance regarding the use of HAVA funds for several items:

1. The computer equipment used to operate Florida’s statewide voter registration system is currently housed in a state-owned facility that is in the process of being sold. As a result, the Department is moving its computer operations to a private facility.

Following our conversation this morning, the Department has determined that State funds will be
used to pay for the expenses associated with moving all of the equipment (including the statewide voter registration system equipment) to the new location.

However, after the Department has completed its relocation of the computer room to another facility, it will be necessary to make rental payments to the owner of the building. Is it possible for the Department to use HAVA funds to pay a portion of the rent for the space occupied by computer equipment used to support the statewide voter registration system?

2. The Department needs to purchase additional memory in order to provide an identical back-up computer for the statewide voter registration system in case of a disaster. We have received quotes from three contractors on the State Purchasing Contract with the lowest quote being from Hewlett Packard at $81,760. We are requesting EAC approval to use HAVA Section 251 funds for this purchase.

3. During the summer of 2006 the Department requested guidance from the EAC regarding the use of HAVA funds for annual and/or sick leave payments to employees filling HAVA-funded positions who terminated employment with the State. Could you check on the status of a response regarding this issue. If you need additional information, please let us know and we’ll forward the original questions.

If you need any additional information regarding these items, please let us know. Thank you very much for your assistance.

Thanks,
Barbara Leonard
Florida Division of Elections

Barbara,
This was great information. This is the same issue I am working on in relation to the single audit. Just so you know, this means you will get the answer from me, but then it will also be addressed in an audit resolution report. That resolution report will cover this issue and the other issues identified during the single audit. Since EAC oversees HAVA funds, we are responsible for resolving issues identified during audits conducted by our Inspector General and also single audits conducted by each state. I'll keep you posted as we move forward in that process. Let me know if you have any questions. Thanks.

Dear Barbara,
You have asked whether your state was sent a request for amended financial reports of HAVA funds. The EAC mailed a notice to your chief state election official on January 10, 2007. Attached are electronic copies of the letters that were sent regarding your state and copies of the attachments. Please let me know if you have any additional questions about this request. Thank you.

March 30, 2007

Kurt Browning
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Dear Secretary Browning:

Attached is the final audit resolution report of the U.S. Election Assistance Commission (EAC) regarding the single audit of Help America Vote Act (HAVA) funds expended by the Florida Secretary of State’s Office. The resolution is based upon the information provided by the audit conducted by the Auditor General of the State of Florida.

After careful consideration of all the facts presented, EAC has determined that the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state. The state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the Federal Register. The state must submit a copy of the new department policy indicating the requirement to sign salary certification statements.

If the state believes that anything in this final management decision is an adverse action and the state does not agree, the state shall have 30 days to appeal EAC’s management decision. The appeal must be made in writing to the Chairman of the EAC. Within 30 days of receiving the appeal, the Commission may hold a hearing to consider the appeal, take evidence or testimony related to the appeal, and render a decision on the appeal, if appropriate at that time. The Commission will render a final and binding decision on the appeal no later than 60 days following the receipt of the appeal or the receipt of any requested additional information. If the state does not file an appeal, this decision will become final and binding at the expiration of the appeal period.

We appreciate your cooperation in this matter as we work together to ensure that HAVA funds are used in accordance with the law.

Sincerely,

[Signature]

Thomas R. Wilkey

Florida Single Audit – Assignment No. E-SA-FL-11-06
Issued March 30, 2007

Summary of Decision
The U.S. Election Assistance Commission (EAC or Commission) has determined that the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state. The state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the Federal Register. The state must submit a copy of the new department policy indicating the requirement to sign salary certification statements.

Background
The EAC is an independent, bipartisan agency created by Help of America Vote Act of 2002 (HAVA). It assists and guides state and local election administrators in improving the administration of elections for federal office. EAC provides assistance by dispersing federal funds to states to implement HAVA requirements, adopting the voluntary voting system guidelines, and serving as a national clearinghouse and resource of information regarding election administration. EAC is also responsible for the accreditation of testing laboratories and the certification, decertification, and recertification of voting systems.

In addition to EAC’s role in distributing HAVA funds, the agency is responsible for monitoring the fiscally responsible use of HAVA funding by the states. The EAC seeks to ensure funds distributed under HAVA are being utilized for the purposes mandated by HAVA to ultimately improve the administration of federal elections. To fulfill this responsibility, the EAC conducts periodic fiscal audits of state HAVA fund expenditures and determines the any corrective actions necessary to resolve issues identified during audits. EAC is also responsible for resolving issues identified during state single audits conducted under the Single Audit Act. The EAC Office of Inspector General (OIG) has established a regular audit program in order to review the use of HAVA funds by states. The OIG’s audit plan and audit findings can be found at www.eac.gov.

The Audit Follow-up Policy approved by the Commission authorizes the EAC Executive Director to issue the management decision for external audits and single audits. The Executive Director has delegated the evaluation of final audit reports provided by the OIG and single audit reports issued by the states to the EAC Programs and Services Division. The Division provides a recommended course of action to the Executive Director for resolving questioned costs, administrative deficiencies, and other issues identified during an audit. The EAC Executive
Director issues a Final Audit Resolution (management decision) that addresses the findings of the audit and details corrective measures to be taken by the state.

When an audit identifies questioned costs, the EAC considers not only whether the state followed proper procurement procedures, but also whether the expenditures actually served to further the goals of HAVA. EAC has identified three methods of resolution regarding questioned costs: 1) Expenditures that were identified as permissible under HAVA and federal cost principles, but did not follow appropriate procedures do not have to be repaid; 2) Expenditures that may have been permissible under HAVA but lacked adequate documentation must be repaid to the state election fund, which was created in accordance with HAVA section 254(b)(1); and 3) Expenditures that were clearly not permissible under HAVA or federal cost principles must be repaid to the U.S. Treasury. In addition to repayment of funds, the EAC may require future reporting by a state to ensure that proper internal controls and procedures have been established to prevent future problems.

States may appeal the EAC management decision. The EAC Commissioners serve as the appeal authority. A state has 30 days to appeal EAC's management decision. All appeals must be made in writing to the Chair of the Commission. The Commission will render a decision on the appeal no later than 60 days following receipt of the appeal or, in the case where additional information is needed and requested, 60 days from the date that the information is received from the state. The appeal decision is final and binding.

Audit History

The Auditor General of the State of Florida conducted an audit under the Single Audit Act that covered the use of HAVA funds provided to Florida. The single audit report (Assignment No. E-SA-FL-11-06) for the State of Florida identified six issues that require EAC resolution.

Audit Resolution

The following categories explain the results of the audit outlined in the final audit report and how the EAC reached its final audit resolution regarding the issues identified by the OIG.

State did not maintain a current list of certified voting systems used by counties

EAC agrees with the finding that the state did not maintain a current listing of voting systems certified and in use by the counties. The state is creating new procedures to update the state list of voting systems on a regular basis, updated the list of voting systems certified and in use by Florida counties, and made the list available on its website at http://election.dos.state.fl.us. Within 30 calendar days, the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state.

State incorrectly calculated Maintenance of Effort

EAC agrees with the findings that the state did not properly calculate the required maintenance of effort and did not maintain this level of expenditure for the 2004-2005 fiscal year. The state must update its HAVA state plan to account for the maintenance of effort. The state has indicated it has begun the process of updating the state plan.
updated state plan must include how the state will spend the $7,630 shortfall in maintenance of effort spending during the 2004-2005 fiscal year in the future. Within 30 calendar days, the state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the *Federal Register*.

**Salaries were not properly supported**

We agree with the findings that the state did not maintain appropriate records to document employee time spent on HAVA activities. EAC has requested that the OIG conduct a more in-depth review of these salary expenses to determine if costs allocated to salaries should be questioned in addition to the finding on lack of supporting documentation. In response to the findings on supporting documentation for salary costs, Florida has implemented new policies and procedures to appropriately track employee time spent on HAVA related activities. Within 30 calendar days, the state must submit a copy of the new department policy indicating the requirement to sign salary certification statements.

**Payments for unused leave to terminated employees was charged as a direct cost**

The state has repaid the state election fund for all unused leave payments made to terminated employees and charged as a direct cost to HAVA funds. The state has also requested the EAC to issue guidance on this issue to assist states in appropriately paying out unused leave to terminated employees working on HAVA programs. EAC will issue guidance on this matter during the 2007 federal fiscal year. No further action is required by the state on this matter at this time.

**Proper supporting documentation for expenditures was not always maintained**

EAC agrees with the finding that the state did not always properly support expenditures made with HAVA programs. The amount of expenditures that were not properly supported was not quantified during the single audit and no expenditures made with HAVA funded contracts were questioned. EAC will not make any determinations on potential repayment of unsupported costs until the OIG conducts a full audit of Florida’s usage of HAVA funds through the regular OIG audit program. The state has detailed the new procedures it has put in place to ensure that all future payments made with HAVA funds have all the necessary supporting documentation prior to payment by the state. No further action is required by the state on this matter at this time.

**State did not follow federal requirements for interagency agreements**

EAC agrees with the finding that the state did not follow federal requirements for interagency agreements financed with HAVA funds. The state has detailed the new procedures it has put in place to ensure that all future interagency agreements made with HAVA funds meet all the necessary federal requirements and that appropriate monitoring is conducted by the state. No further action is required by the state on this matter at this time.
Final Management Decision

EAC has determined that the state must submit documentation that details the new state procedures to maintain an accurate and current list of voting systems in the state. The state must submit a timeline to the EAC indicating when the revised state plan will be submitted to EAC for publication in the Federal Register. The state must submit a copy of the new department policy indicating the requirement to sign salary certification statements. All additional information requested from the state must be submitted to the EAC within 30 calendar days.

Florida shall have 30 days to appeal EAC’s management decision. The appeal must be made in writing to the Chairman of the EAC. Within 30 days of receiving the appeal, the Commission may hold a hearing to consider the appeal, take evidence or testimony related to the appeal, and render a decision on the appeal, if appropriate at that time. The Commission will render a final and binding decision on the appeal no later than 60 days following the receipt of the appeal or the receipt of any requested additional information. If the state does not file an appeal, this decision will become final and binding at the expiration of the appeal period.
Final Audit Resolution Report

Florida Single Audit – Assignment No. E-SA-FL-11-06

Attachment 1
Memorandum

To: Thomas Wilkey  
   Executive Director

From: Curtis W. Crider  
   Inspector General

Subject: Findings in the State of Florida Auditor General Audit of the Department of State Help America Vote Act and the Florida Registration System (Assignment No. E-SA-FL-11-06)

The subject report (Attachment 1) contains several findings related to the Florida Department of State's (Department) administration of Help America Vote Act (HAVA) funds. The audit was performed by the Auditor General of the State of Florida, who is responsible for the report's findings.

The findings and recommendations are summarized below and presented in further detail in the attachment.

**Finding 3:** The Department did not maintain a current listing of voting systems certified and in use by the counties.

**Recommendation:** The Department should develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law, and periodically confirm the accuracy of its listing with the Supervisor of Elections. Such confirmations should be made in connection with the Department's periodic reconciliation of its control listing to the voter systems information provided and on file at the Department.

**Proposed Corrective Actions:** The Department agreed that updated information was essential to determining whether the voting systems used by the counties met the requirements of the law. The Department indicated that it would institute a process to periodically confirm with the Supervisor of Elections that the information they have filed with the Department is accurate and that all information required by law is on file with the Department.
**Finding 4:** The Department incorrectly calculated the required Maintenance of Effort (MOE) and did not maintain the required level of expenditures for the 2004-2005 fiscal year.

**Recommendation:** The Department should update the HAVA Plan to reflect the revised MOE amount. The Department should ensure that the required MOE level is met each fiscal year.

**Proposed Corrective Actions:** The Department agreed to update the State of Florida HAVA plan to reflect the revised required MOE amounts. In addition, the Department indicated that it will continue to review state expenditures in future years to ensure that the MOE threshold is exceeded. The Department indicated that in future years, the level of state effort should exceed the required threshold, compensating for the $7,630 MOE shortfall for the 2004-2005 fiscal year.

**Finding 5:** Salary certifications required for employees who worked solely on HAVA were not maintained. Activity reports were not always maintained to support personnel costs charged to the HAVA program.

**Recommendation:** The Department’s procedures should ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity report) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

**Proposed Corrective Actions:** The Department indicated that it has instituted a procedure for obtaining time certifications from employees in HAVA funded positions. The certifications will be obtained on a semi-annual basis. If the Department becomes aware that any employee has worked on activities not related to the HAVA program, the costs associated with those other activities will be reimbursed to the HAVA program.

**Finding 6:** Contrary to Federal cost principles, payments for unused leave to terminated employees was charged as a direct cost instead of being allocated as a general administrative expense to all activities of the governmental unit.

**Recommendation:** The Department, in compliance with Federal cost principles; allocate as a general administrative expense unused leave payments. In addition, any costs improperly charged to the HAVA Program should be corrected.

**Proposed Corrective Actions:** The Department indicated that it would seek guidance from the Elections Assistance Commission on the proper disposition of unused leave payments.

**Finding 8:** HAVA program, expenditures were not always properly supported.

**Recommendation:** The Department should ensure that required contractual terms are met and services are received prior to payment. In addition, the Department should only pay contractors in amounts agreed upon by specific contract or purchase order.
**Proposed Corrective Actions:** The Department indicated that the contract manager would review and certify that the requests for payment were properly supported and that contract requirements, milestones, and deliverables have been met prior to submitting the requests to Budget and Financial Services.

**Finding 9:** The Department did not always follow Federal requirements with regards to awards to other State agencies.

**Recommendation:** The Department should take steps to ensure that interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

**Proposed Corrective Actions:** The Department indicated that it will ensure that interagency agreements with state agencies Utilizing HAVA funds include all of the information required by Federal standards. In addition, the Department would obtain the appropriate documentation to evidence expenditure of HAVA funds by the other State agencies.

Based on the findings, we recommend that the EAC ensure that the department completes its planned corrective actions. Please provide us with documentation of the action(s) taken to implement this recommendation by November 1, 2006. If you have any questions about this matter, please call me at (202) 566-3125.

cc: Chairman, U.S. Election Assistance Commission

Attachment
This operational audit focused on the Department of State's administration of the Federal Help America Vote Act of 2002 (HAVA) during the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006. In addition, we evaluated the effectiveness of selected controls related to the Florida Voter Registration System, implemented to satisfy specific requirements of the Act for a computerized Statewide voter registration list. Through June 30, 2005, the Department has been awarded $160 million in HAVA funding on behalf of Florida.

HELP AMERICA VOTE ACT

Finding No. 1: The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

Finding No. 2: The Department's established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

Finding No. 3: The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

Finding No. 4: The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Finding No. 5: Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Finding No. 6: Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Finding No. 7: Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

Finding No. 8: HAVA Program expenditures were not always properly supported.

Finding No. 9: The Department did not always follow Federal requirements with regards to awards to other State agencies.

FLORIDA VOTER REGISTRATION SYSTEM (FVRS)

Finding No. 10: Improvements were needed in the Department's Information Technology (IT) risk management practices.

Finding No. 11: The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and
Finding No. 12: Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

BACKGROUND

With the passage and signing of the Help America Vote Act (HAVA) on October 29, 2002, election reform began throughout our nation. HAVA contains numerous requirements that every state must meet to improve election administration in many areas. The requirements, most of which were to take effect between January 1, 2004, and January 1, 2006, include replacing punch card and lever-operated voting machines, allowing voters to verify their votes before casting their ballots, providing voters with provisional ballots, providing access for voters with disabilities, and creating a Statewide voter registration list.

HAVA created the Election Assistance Commission (EAC) as an independent commission to administer the provisions of the Act. Specifically, HAVA charges the EAC with administering payments to states and developing guidance to meet HAVA requirements, implementing election administration improvements, adopting voluntary voting system guidelines, and developing a national certification program for voting systems. The EAC also serves as a national clearinghouse and resource of information regarding election administration.

Funding comes from four different HAVA programs. As shown on Appendix A, through June 30, 2005, the Department had been awarded $160,207,602 in HAVA funding on behalf of Florida relating to Titles I and II. For each of the four programs, HAVA limits the use of funds to particular purposes as follows:

- Title I, Section 101 funding is available to improve the overall administration of elections, including the training of voters and election officials.
- Title I, Section 102 funding (fully expended as of July 2005) provides funding for the replacement of punch card and lever-operated voting machines.
- Title II, Section 251 funding allows states to meet uniform minimum voting system standards; provide a provisional voting mechanism, as well as minimal voter information requirements; and maintain a single computerized statewide voter registration list. However, states, once meeting these requirements, can use the funds to improve the administration of Federal elections.
- Title II, Section 261 funding supports efforts undertaken to make polling locations accessible for individuals with disabilities.

Appendix B shows for each of the four programs the funds received, amounts spent or obligated, and the available balances.

In response to audit inquiry, the Department provided us with a document titled Funds Revenue and Usage Life of HAVA Grant that projects HAVA funds being fully depleted sometime during the 2019-20 fiscal year. For the majority of the awarded funds, there is no deadline by which the Department must expend the funds received. However, included in the award total is $1.676 million in Title II, Section 261 funds that are available for drawdown from the Federal Government as expended. These funds must be expended within five years of the original award year.

HAVA requires all states to develop and implement a Statewide plan that includes 13 primary elements. The State of Florida HAVA Plan incorporated these 13 primary elements, and Appendix C contains a listing of the elements. Florida enacted legislative and local reforms to ensure that the elements are consistent with and clearly outlined in Florida Statutes, Florida System Voting Standards (Standards), rules, and regulations.

The administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. As Chief Election Officer, the Secretary of State is responsible for the coordination of the State's responsibilities under HAVA.

1 Section 97.012, Florida Statutes.
FINDINGS AND RECOMMENDATIONS

Help America Vote Act (HAVA)

Finding No. 1: Voting System Certification Checklist

In accordance with Florida law, the Department is to examine all makes of electronic or electromechanical voting systems submitted to it by any person owning (such as vendors) or interested in an electronic or electromechanical voting system (such as boards of county commissioners of any county seeking approval of a given system) and determine whether such systems comply with the voting systems requirements provided in Section 101.5606, Florida Statutes. Additionally, the Department has developed Standards that provide information and guidance on the State's requirements and evaluation methods for voting system certification. Upon determining that the voting system complies with such requirements, the Department issues a certificate.

Our audit disclosed that the Department had implemented voter system certification procedures that incorporated the requirements included in Section 101.5606, Florida Statutes. However, we noted that a procedure was not in place to evidence for the public record that the voting systems being certified had met the requirements of Florida law. Therefore, a determination could not be made by us as to whether the requirements of Florida law had been met with regard to voter system certifications.

Department personnel indicated during our field work that a document titled Florida Voting Systems Certification Checklist & Test Record (Checklist) had been drafted that would provide a mechanism to document the Department's processes performed relating to Section 101.5606, Florida Statutes. However, this Checklist was not in use during the audit period and no other document was available for such purposes.

Finding No. 2: Pecuniary Interests

Florida law states that neither the Secretary of State nor any examiner shall have any pecuniary (financial) interest in the examination and approval of voting equipment.

In response to audit inquiry as to Department procedures to ensure compliance with the above-noted Florida law, Department staff referred us to the section of the Department of State Employee Handbook (Handbook) titled “Relationships with Regulated Entities.” This section of the Handbook requires employees to disclose in writing to the Secretary of State or his/her designee of a financial interest in a regulated entity. While the Handbook provision may provide some assurance of the disclosure of pecuniary interests should they exist, a procedure requiring an affirmation as to the absence of pecuniary interests may be more effective and responsive to the significant loss of credibility that would result should the existence of a conflict of interest go undisclosed.

Recommendation: We recommend that the Department establish procedures requiring the periodic affirmation of the absence of pecuniary and other conflicts of interests.

Finding No. 3: Certified Voting Systems

Florida election laws require the Department, among other duties, to:

- Examine and approve voting systems through a public process to ensure that the voting systems meet the standards outlined in Section 101.5606, Florida Statutes, and similar standards outlined in HAVA requirements under Section 301 of Title III. (Section 101.5605, Florida Statutes.)

Recommendation: We recommend that the Department finalize the Checklist and utilize it to document for the public record that its voting system certification procedures meet the requirements of Florida law.
Maintain voting system information including copies of the program codes, user and operator manuals, software, and any other information, specifications, or documentation relating to an approved electronic or electromechanical voting system and its equipment. (Section 101.5607, Florida Statutes.)

The Department is also responsible for demonstrating compliance with Federal laws, regulations, and contracts governing the use of HAVA funds.

To allow for a ready demonstration of record that all voting systems meet the requirements of State laws and HAVA requirements, the Department should have in place a current inventory of the voting systems in place in each county. To ensure the accuracy and completeness of voting system records and files, this inventory should then be compared periodically to the voting system information maintained on file pursuant to State law. Our audit tests disclosed that such procedures were not in place. Specifically:

The Department did not maintain a current, reliable control listing of specific certified voting systems and system configurations implemented in each county. In response to our request for an official control listing of voting systems currently in use by all 67 counties, the Bureau Chief of Voting Systems Certification referred us to a Web site maintained by the Department that provides a link to information about specific certified voting systems and the system configurations being implemented by each county and stated, "The web site is updated as we receive 'system acquisition' reports from the counties. There may be a lag between the time a county acquires its system and the time we receive such a report. In some cases, a county may forget to notify us. In addition, I don't think there is any such 'official' listing." Our review of the Web site and other listings provided by the Department disclosed several instances in which the voting systems shown were not HAVA compliant.

Absent a current, reliable control listing of specific certified voting systems and system configurations implemented in each county, the Department cannot be assured and demonstrate that voting systems in use by the counties meet the standards outlined in Section 101.5606, Florida Statutes, and similar standards outlined in HAVA requirements.

The Department did not have a procedure in place to ensure that copies of program codes, user and operator manuals, software, and any other information, specifications, or documentation related to an approved electronic or electromechanical voting system and its equipment were on file with the Bureau of Voting Systems Certification. Section 101.5607(1)(a), Florida Statutes, requires that this information be filed with the Department by the Supervisor of Elections at the time of purchase or implementation. An appropriate procedure would include a periodic comparison of the control listing referenced in the preceding bullet to the voting system information on file at the Department.

During the audit period, funds were provided to counties for the purpose of purchasing accessible voting systems as required by Title III, Section 301, HAVA. We selected disbursements made to four counties and requested documentation from the Department demonstrating compliance with Section 101.5607(1)(a), Florida Statutes. Specifically, we examined Department records to determine if such information for the counties was on file. Our examination disclosed that voting system information was not available for one county; incomplete voting system information was available for another county; and, although some voting system information was on file for a third county, the information on file did not appear to reflect the purchase of the accessible voting system.

In response to audit inquiry, we were informed that the Department requests this information from the counties when the Department becomes aware that a county has purchased new equipment and that the Department currently has no procedures in place for routinely requesting such information periodically from each of the counties.

State law requires the Department to maintain voting system information and provides that any such information or materials that are not on file with and approved by the Department, including any updated or modified materials, may not be used in an election. This is especially important because voting systems are upgraded, modified, and changed both before and after delivery to the counties, and the Department has a responsibility to maintain current and accurate voting system information for each county.

Section 101.5607, Florida Statutes.

Section 101.5607(1)(a), Florida Statutes.
Details of the exceptions noted in the bullets above were provided by us to the Department for immediate resolution.

Recommendation: We recommend that the Department develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law, and periodically confirm the accuracy of its listing with the Supervisors of Elections. Such confirmations should be made in connection with the Department's periodic reconciliation of its control listing to the voting systems information provided and on file at the Department.

Finding No. 4: Maintenance of Effort

For activities funded by HAVA, the Department is to maintain the expenditures of the State at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ended June 30, 2000. The State of Florida HAVA Plan stated that, in determining Florida's maintenance of effort (MOE) expenditures, the Division of Elections' calculation included 1999-00 fiscal year expenditures for salaries and benefits, operating capital outlay, and voter fraud programs for the Division of Elections' Director's Office and the portion of the Bureau of Election Records' expenditures pertaining to election administration. The amount calculated and reported in the State of Florida HAVA Plan for the 1999-00 MOE totaled $3,082,224.

Our tests of the data supporting the Department's MOE calculation disclosed that the Department failed to use the final expenditure data reported in the State's accounting system (Florida Accounting Information Resource Subsystem). The amounts used were those recorded as of June 28, 2000. Our tests also disclosed that the Department's calculation included, in some instances, budgeted rather than actual salary expenditures.

The final expenditure data as of June 30, 2000, as shown by the State's accounting system totaled $3,570,408 (or $488,184 more than the MOE. In addition, our tests disclosed that the Department MOE for the 2004-05 fiscal year totaled $3,562,778, resulting in the Department failing to meet the required MOE of $3,570,408 by $7,630.

Recommendation: The Department should update the State of Florida HAVA Plan to reflect the revised required MOE amount and ensure that the required MOE level is met each fiscal year in accordance with HAVA requirements.

Finding No. 5: Salary Certifications and Activity Reports

Federal cost principles require that charges for salaries for employees who are expected to work solely on a single Federal award or cost objective be supported by periodic certifications that indicate that the employee worked solely on that program for the period covered by the certification. These certifications are to be prepared at least semiannually and signed by the employee or supervisory official having first-hand knowledge of the work performed by the employee. These principles also require that charges for salaries of employees who work on multiple activities or cost objectives should be distributed and supported by personnel activity reports or equivalent documentation.

In response to audit inquiry, the Department provided us with a listing of employees who worked solely on the HAVA Program during the period July 1, 2004, through February 28, 2006. We then requested certifications for each of the employees identified by the Department. We also selected nine employees who the Department represented to us had worked solely on the HAVA Program to verify that they had not worked on any other activity. These audit procedures disclosed the following deficiencies:

Certifications were not always prepared in compliance with Federal cost principles. Specifically, certifications were not prepared for 12 employees who worked solely on the HAVA Program during the period July 1, 2004, through June 30, 2005. The salaries and benefits for these...
12 employees totaled $524,787.63. Additionally, for 25 of the 27 employees who worked solely on the HAVA Program during the period July 1, 2005, through December 31, 2005, certifications were not obtained until April 2006. For 2 of the 27 employees, no certifications were on file. In response to audit inquiry, Department staff provided one certification that was signed on May 12, 2006, by an employee’s supervisor attesting that the employee had worked solely on the HAVA Program. The employee had resigned on October 31, 2005. For the other instance, the Department stated that the employee worked on non-HAVA related activities and, since there are no time reports documenting the employee’s work activities, the Department estimated that approximately 10 percent of the employee’s time during the July 2005 through January 2006 period was related to non-HAVA related activities and that the Department was currently preparing correcting entries to reimburse the HAVA Program for the improper costs.

For another employee working on multiple activities, charges were not supported by personnel activity reports, contrary to Federal cost principles. The employee, even though he had completed a certification that he worked solely on the HAVA Program, indicated to us that only approximately 75 percent of the time worked was related to the HAVA Program. However, the employee’s personnel activity report did not identify the specific program areas worked on and, as a result, salary and benefits totaling approximately $3,600 monthly were charged to the HAVA Program.

Without adequate procedures and supporting documentation, the Department cannot ensure that Federal funds have been expended only for authorized purposes.

In response to audit inquiry, Department staff stated, “After the Department of State became aware of the requirement for individuals filling HAVA-funded positions to complete certifications regarding work performed, a form was developed that could be customized for each employee. The certifications will be prepared on a semi-annual basis to coincide with the first and last six months of the state fiscal year. The first work certification forms cover the period from July 2005 through December 2005.” The Department further indicated that it was in the process of developing written procedures to address the certification requirements.

Recommendation: We recommend that the Department’s procedures ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity reports) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Finding No. 6: Unused Leave Payments

Federal cost principles provide that payments to terminating employees for unused leave are allowable in the year of payment provided the payments are allocated as a general administrative expense to all activities of the governmental unit or component.

Our tests of salary expenditures disclosed that the Department did not allocate as a general administrative expense an unused leave payment, contrary to Federal cost principles. An employee terminated employment on October 31, 2005, and was paid $22,274 for 470 hours of unused annual leave. The entire amount was paid from HAVA funds.

In response to audit inquiry, Department staff indicated that this payment was made in compliance with Department of Management Services Rule 60L-34.0041(6)(b), Florida Administrative Code. The Rule provides that a senior management service or selected exempt service employee who separates from State government shall be paid for unused annual leave up to a maximum of 480 hours. Department staff further indicated that Federal cost principles supported this unused leave payment. We disagree, as discussed above, because Federal cost principles require that such payments be allocated as a general administrative expense to all activities of the governmental unit or component.

Recommendation: We recommend that the Department, in compliance with Federal cost principles, allocate as a general administrative expense unused leave payments. We also recommend that, for any costs improperly charged to the HAVA Program, appropriate corrections be made.

Finding No. 7: Voter Education

To receive Federal funds under HAVA, the Department is required to describe how the State will provide for voter education. Under Florida law, the Legislature appropriated $3,000,000 from HAVA funds in each of the 2004-05 and 2005-06 fiscal years to the Department to be distributed to county Supervisors of Elections for voter education. To receive funds from these appropriations, Supervisors of Elections were required to submit to the Department a detailed description of the voter education program (Plan). Additionally, counties were required to certify to the Department that the county would provide matching funds for voter education in the amount equal to 15 percent of the amount received from the State.

We examined payments made to three counties from funds provided under Florida law. We noted that each of the counties had entered into a Memorandum of Agreement for Receipt and Use of Voter Education Funds (Agreement). This Agreement required Supervisors of Elections to annually submit a report to the Department detailing the actual expenditures made under the Plan.

Our audit disclosed:

- The Plan for one county failed to include four of the five voter education elements contained in the Standards for Nonpartisan Voter Education (Department rule). The Plan failed to address a high school voter registration/education program; a college voter registration/education program; voter registration workshops; and the conduct of demonstrations of county voting equipment. Voter education funds received by the county totaled $27,127. Absent the voting education activities described above, the Department has no assurance that State law and HAVA requirements will be met.

- The activities, as reported in the expenditure report for another county, included $109,021 for banner and billboard advertisements. This type of activity was not included in the county's Plan submitted to the Department. However, if included in the Plan, these expenditures would have been allowable. Subsequent to audit inquiry, Department staff stated that it appears that some counties had utilized voter education funds for activities that were not included in their Plans and that changes would be made to Department procedures to compare county-planned activities with actual voter education activities.

- The expenditure report for one county failed to delineate, as required by the standard reporting form, the State and county funds expended. Therefore, the Department could not determine from a review of the report if appropriate matching funds for voter education had been expended by the county. The county received State funds totaling $180,910 and certified matching funds totaling $27,136. Subsequent to audit inquiry, Department staff stated they will include language in the Agreements requiring a separate accounting for expenditures made with State and county funds.

In the instances noted above, the Department failed to ensure that the required Plans and expenditure reports submitted by the Supervisors of Elections were in compliance with Department rules and Agreements. This failure by the Department could result in noncompliance with Florida law and rules and HAVA requirements. (See Appendix C, Element 3.)

Recommendation: We recommend that the Department ensure that all Plans are in compliance with Department rules and Agreements and that voter education expenditures correspond with detailed descriptions in the Plans. In addition, we recommend the Department ensure that the matching expenditures are reported separately on the expenditure report.

---

9 Section 254a3, HAVA.
12 Department of State Rule 15-2.033, Florida Administrative Code.
Finding No. 8: Program Expenditures

Federal cost principles require appropriate documentation of expenditures. Absent such documentation, expenditures are not allowable for payment by Federal award. The Division of Elections is responsible for tracking and monitoring the use of HAVA funds in accordance with established State procedures, and the Director of the Division of Elections has final signature authority for HAVA expenditures. Our audit included examining Department records related to 19 HAVA expenditures totaling approximately $8.9 million, excluding salary expenditures. We noted:

A $3,333.33 monthly payment was not supported by evidence showing that the required work had been completed. This payment was made pursuant to a contract for consulting services related to assisting the 67 counties in developing and implementing plans mandated by HAVA for the accessibility of polling places and voting equipment for persons with disabilities. The agreement, providing for payments totaling $50,000, specified that a progress report was to be provided with the invoice. Subsequent to audit inquiry, Department staff stated that, rather than progress reports, the vendor was submitting weekly activity reports to the Assistant Secretary of State and the Director of the Division of Elections. Our review of the activity reports subsequently provided by the Department disclosed one activity report had been requested, after audit inquiry, on May 16, 2006, and another one was received after the invoice was paid. In addition, there was no evidence that the Department had reviewed the activity reports prior to making the payment. Also, the listed activity (traveling to Washington, D.C., to meet with congressional representatives) for one weekly activity report (week beginning November 2, 2004) did not appear to relate to the activities set out in the contract.

The process of receiving weekly activity reports from the contractor did not comply with the contact terms and did not allow for a proper preaudit as such documentation apparently was not forwarded to appropriate staff responsible for processing payments to the contractor.

Recommendation: We recommend that the Department ensure that required contractual terms are met and services are received prior to payment. In addition, we recommend that the Department only pay contractors in amounts agreed upon by specific contract or purchase order.

Finding No. 9: Interagency Agreements

According to HAVA, each state is to implement a computerized statewide voter registration list containing the name and registration of every legally registered voter in the state. The Department was awarded Federal funds on behalf of the State of Florida to meet the HAVA requirements.

Chapter 2003-397, Laws of Florida, appropriated the Department a lump sum totaling $2,114,814 to implement HAVA and also provided that both the Florida Department of Law Enforcement (FDLE) and the Florida Department of Highway Safety and Motor Vehicles (DHSMV) each would receive two full-time equivalent positions and $145,830 to assist in the development of the Statewide voter registration list.
The Department was required to enter into interagency agreements with both of these agencies prior to the release of the funds.

As the Department is using HAVA funds to develop the Statewide voter registration system, the Department should ensure that the interagency agreement includes all the specific Federal information associated with the HAVA program. Our review of one of the interagency agreements (FDLE) disclosed that the agreement did not provide all of the specific information related to the HAVA program. Specifically, we noted that the agreement did not include the:

- CFDA title and number.
- Name of the Federal agency.
- Requirements of Federal laws and regulations.
- Requirement of access to records by the Department and its auditors.

In addition, our examination of the $145,830 interagency payment to FDLE disclosed that the Department failed to obtain evidence that the agency used the $145,830 for only HAVA activities. Such evidence should include applicable salary records evidencing payroll amounts and salary certifications or activity reports.

Subsequent to audit inquiry, the Department requested and received salary certifications from FDLE evidencing that the employees assigned to the positions worked solely on the HAVA activities. However, no documentation was provided to evidence that the $145,830 was actually expended for salary and benefit costs.

When the Department fails to monitor and include in interagency agreements specific Federal information associated with the HAVA program, assurance is reduced that Federal funds will be expended for allowable activities and accounted for in accordance with Federal cost principles and, if applicable, subject to audit in compliance with the applicable Federal requirements.

Recommendation: We recommend that the Department take the necessary steps to ensure that the interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

**FLORIDA VOTER REGISTRATION SYSTEM (FVRS)**

The Department began developing FVRS in 2003 to comply with HAVA requirements. The State received a waiver from the EAC, permitted under HAVA provisions, and was granted an extension from January 1, 2004, until January 1, 2006, to implement FVRS. Pivotal to the design of FVRS was the retention of county voter registration systems. Each of the 67 counties was to remediate its registration systems to accommodate the FVRS interface and operating specifications. FVRS communicated with county voter registration systems using a service-oriented architecture that supported establishing communication and information exchange by providing a platform for receiving requests and generating response messages that were processed by county voter registration systems.

In accordance with Florida law, each Supervisor of Elections maintained responsibility for updating voter registration information, entering new voter registrations into the Statewide voter registration system, and acting as the official custodian of documents received by the Supervisor of Elections related to the registration and changes in voter registration status of electors of the Supervisor of Elections county. While the Department was responsible for the overall security and integrity of FVRS, each Supervisor of Elections was responsible for ensuring that all voter registration and list maintenance procedures conducted were in compliance with any applicable requirements prescribed by rules of the Department through the Statewide voter registration system or prescribed by the Voting Rights Act of 1965, the National Voter Registration Act of 1993, or HAVA.

15 Section 98.015, Florida Statutes.
Finding No. 10: Information Technology Risk Management

An effective risk management process is an important component of a successful information technology (IT) security program. Risk management is the process of identifying vulnerabilities and threats to IT resources used by an organization in achieving business objectives and deciding what measures, if any, to take in reducing risk to an acceptable level. Risk assessment is a tool that can provide information for the design and implementation of internal controls and in the monitoring and evaluation of those controls. Risk analysis forms the basis for developing effective security practices that include periodic reviews of user access rights and comparison of resources with recorded accountability to reduce the risk of errors, misuse, or unauthorized alteration.

During the audit, we noted certain deficiencies in the Department's IT risk management practices as follows:

- The Department had not completed a formal risk assessment for FVRS. In October 2005, the Department contracted with Integrated Computer Systems, Inc. (ICS), to perform an information security assessment on its network infrastructure and major applications in place at the time of the assessment. This assessment was completed before FVRS was fully implemented. In February 2006, the Department contracted with ICS to perform a complete assessment of FVRS. This assessment commenced in April 2006 and is scheduled for completion in June 2006.

- Authorizations for access to Department resources had not been properly documented for all FVRS users and access capabilities were not timely revoked or modified as necessary for individuals who had terminated employment. In addition, the Department did not have a formal process in place for the periodic monitoring of actual access capabilities through comparison to the authorizations. Good access controls include instituting policies and procedures for authorizing access to information resources, documenting such authorizations, and then periodically monitoring actual access capabilities through comparison to the authorizations. Department policy\(^\text{16}\) required that, immediately upon initial employment, reassignment, or termination, the designated division manager inform the Service Request Desk at the Central Computing Facility (CCF) via the Control Access form. Of 21 authorizations tested, we noted 19 instances where proper access documentation was not maintained. In addition, we noted two users with improper access capabilities to Department network resources. One user was added in error and the other had not had access capabilities properly revoked upon the completion of a contracted engagement. In response to audit inquiry, the Department indicated that access capabilities for these individuals had since been revoked.

When access capabilities are not limited to what is authorized and approved by management, the risk is increased of inappropriate use of information resources. In addition, without formal procedures for the periodic monitoring of actual access capabilities against what is authorized, the risk is increased that unauthorized access will not be identified and corrected in a timely manner.

Recommendation: Upon completion of the FVRS risk assessment, the Department should implement policies and procedures to mitigate identified risks, including ensuring that all access to Department systems is documented in a uniform manner according to policy, maintained in a central location, and periodically reviewed.

Finding No. 12: IT Governance Model

An IT governance model contributes to the reliability and integrity of an application system and data processed therein and includes developing and maintaining procedures to ensure the proper use of the application and technological solutions put in place and proper data management. A consistent managed approach to securing all system environment components increases assurance that due diligence is exercised by all individuals involved in the management, use, maintenance, and operation of information systems.

\(^{16}\) Information Technology Operating Procedure Number IT001, Logical Access Control.
According to HAVA, adequate technological security measures shall be provided to prevent unauthorized access to the computerized voter registration list. Florida law further directs the system to provide secured access for authorized voter registration officials and states that the Department may adopt rules governing the access, use, and operation of the Statewide voter registration system to ensure security, uniformity, and integrity of the system.

According to FVRS design, counties are to retain the greatest level of autonomy over county registration assets while still meeting the overall security objectives of FVRS, and the Department is responsible for the overall security and integrity of FVRS. Multiple entities are, therefore, working towards the common business purpose FVRS is to serve. Our audit focused on the important requirement of ensuring FVRS has adequate security structures and solutions in place for conducting business. We noted certain control deficiencies as follows:

- Aligning systems security with a business strategy requires centralized direction. A security program establishes a common framework and principles for assessing risk, developing and implementing consistent security procedures, and monitoring the effectiveness of those procedures. The Department, in conjunction with the county Supervisors of Elections' offices, had not developed a formal security program for FVRS. Prior to the implementation of FVRS, the Department prepared a FVRS Security Approach Plan which was intended to later serve as a roadmap for developing a comprehensive FVRS System Security Plan (SSP) that would include all applicable system security policies and procedures. In response to audit inquiry, Department staff indicated that the SSP continued to be in development.

The Guide to FVRS (Guide) was developed by the Department and distributed to the Supervisors of Elections as a precursor to the implementation of FVRS. The Guide states that the counties are responsible for security, including securing the physical location of equipment hosting the application or communications devices related to the local county system and securing network systems providing access to the local voter registration system. However, the Department had not developed formal written directives or guidance to ensure a consistent approach and enforcement across all environments in such matters as configuration management, virus protection, system software maintenance and updates, and patch management.

- Consistent user security mandates also require aligning system security with the business objective. Each county was responsible for designating a System Security Administrator (SSA) to assign and manage user access to the local county voter registration system along with network resources, as well as to FVRS. Guidelines to promote consistent, effective policies and procedures related to information resource classification and control, access authorization and review, distribution of user roles, logical access controls, and user security awareness training had not been developed by the Department. Additionally, while the Guide stated that training in user/identity management will be required of State and county SSAs, the Department had not yet conducted a formal training program.

- The Department was in the process of, but had not completed, the integration of FVRS system planning into its overall IT disaster recovery plan. In addition, although the Department indicated that disaster recovery plans had been requested from each county, there was no formal, written process in place for receiving and evaluating those plans to ensure their adequacy in recovering timely from a disruption to operations. As HAVA requires all voter registration information obtained by any local election official in the State to be electronically entered into the computerized voter registration list on an expedited basis at the time the information is provided to the local official, absent or inadequate procedures to resume operations in a timely manner may cause delays in updating FVRS, thereby jeopardizing the accuracy and completeness of registration data.
Proper security administration ensures that violation and security activity is logged, reported, reviewed, and appropriately escalated on a regular basis to identify and resolve incidents involving unauthorized activity. The design of FVRS included the capability to log unauthorized attempts to penetrate the system and unauthorized procedures by authorized users. As of the completion of our audit field work, the Department had not devised a formal process for review and retention of these logs. However, in response to audit inquiries, Department staff indicated their intent to establish a process for monitoring the logs in near real time.

The Department had not designated any individual positions in connection with FVRS or the Division of Elections as positions of special trust. Florida law states that agencies shall designate positions that, because of the special trust or responsibility or sensitive location of those positions, require that persons occupying those positions be subject to a security background check, including fingerprinting, as a condition of employment. Further, it requires that persons of such positions undergo background investigations using level two screening standards, which include fingerprinting used for checks against statewide criminal and juvenile records through the Florida Department of Law Enforcement (FDLE) as well as checks for Federal criminal records through the Federal Bureau of Investigation. In fulfillment of their assigned responsibilities related to verification of voter registration records and determination of reliability and credibility of matching information, Bureau of Voter Registration Services' (BVRS) employees who have signed the Department-required Standards of Conduct Statements, had access to statutorily designated confidential and publicly exempted information, records, and data including social security numbers, driver's license numbers, Florida identification (ID) numbers, and voter signatures. In addition, the BVRS Bureau Chief and backup delegate had access to records of individuals registered to vote as protected persons, whose personal information including home address and telephone number were exempt from disclosure by Florida law. The Department had not designated BVRS employees as being in positions of special trust. Therefore, level two screenings had not been performed. The Department did conduct level one background screenings, that include employment history checks as well as Statewide criminal correspondence checks through FDLE on all new employees. Without adequate background checks, including fingerprinting, the risk is increased that a person could inappropriately be employed in a position of special trust.

Security controls and procedures that vary in placement and degree among the Department and the counties may not provide for the achievement of a sustainable capability for proactive mitigation of security risks or incidents. Without a common foundation for applying management and security procedures for IT resources and data, security controls necessary to adequately protect information systems that support the operations, mission, and legal responsibility of FVRS may fail to be identified and consistently applied.

Recommendation: The Department should, in coordination with the county Supervisors of Elections, adopt a governance model that includes security measures in support of, and for the protection of, the FVRS business purpose and the confidentiality, availability, and integrity of data contained therein. Specifically, written procedures should be established to address those areas noted above with consistent application to ensure the system's security, uniformity, and integrity.

Finding No. 12: FVRS Data Integrity

The Department's HAVA Plan specifies that the effective and efficient administration of elections depends on the completeness and accuracy of voter registration lists. Florida law provides that the Department shall protect the integrity of the electoral process by ensuring the maintenance of accurate and current voter registration records. In the pursuit of this goal, the Department is directed by law to identify voters who are deceased, registered more than once, convicted of a felony and whose voting rights have not been restored, or adjudicated mentally incompetent and whose voting rights have not been

---

20 Section 110.1127, Florida Statutes.
21 Sections 97.0585 (1)(c) and 97.0585 (2), Florida Statutes.
22 Section 119.071(4)(2)(d), Florida Statutes.
restored. For those voters who have been identified as potentially ineligible due to felony conviction or adjudication of mental incompetence, the Department is directed to determine if such information is credible and reliable. Upon determination of the reliability and credibility of the information, the Department is required to forward such information to the appropriate Supervisor of Elections for final determination of voter ineligibility and removal from the voter system.

During the audit, we noted the following deficiencies in this process:

> Some circumstances were noted that may increase the possibility of duplicate registrations in FVRS. During the implementation of FVRS, the voter records used to populate the FVRS database were provided by individual county Supervisor of Elections offices from their voter registration systems. Counties were responsible for managing their duplicate records using FVRS transactions after migration was completed. The Department indicated that there were approximately 30,000 duplicate records identified prior to implementation. However, the Department had not determined whether these 30,000 records had been resolved by the counties. The Department had not yet implemented a systematic process to periodically scan for and identify duplicate registrations. Instead, manual checks were made by the Supervisors of Elections or the Department, for new or updated registrations received, at the time of initial entry into FVRS to help ensure that no new duplicate records were created. Department staff, on May 24, 2006, subsequent to our audit field work, indicated that a systematic matching process had been put into place. In addition, prior to the implementation of statutory changes in 1999, the uniform voter registration application did not require applicants to supply the last four digits of their social security number and either a Florida driver's license number or Florida ID card number. Therefore, records for applicable voters in FVRS whose voter registration pre-dated these added requirements did not have any of these unique identification numbers associated with their record which would otherwise allow for more accurate matching of duplicate registrations and comparison of data in determination of indulgibility. The Department indicated that it initiated a process for populating the blank fields with unique identifiers (i.e., Florida driver's license numbers or Florida ID card numbers) when available for applicable registered voters, from records provided by the Department of Highway Safety and Motor Vehicles (DHSMV).

> Although the Department had a systematic process in place for identifying potential felon matches within FVRS, it had not completed a comprehensive check of all felony convictions against all voters. As noted in the previous bullet, the FVRS database was populated from data in the individual county voter registration databases. FVRS, implemented in January 2006, is the successor to the Central Voter Database (CVDB) that was established in 2001. CVDB was designed as a tool to assist the Supervisors of Elections with their responsibility to perform final voter eligibility determinations. CVDB was to perform initial voter eligibility determinations to identify duplicate registrations, as well as voters who were deceased, convicted of a felony and had not had their voting rights restored, or adjudicated mentally incompetent and had not had their voting rights restored. The activation of the felon-matching component of CVDB was delayed until May 7, 2004, and was deactivated on July 10, 2004, upon the discovery of its inability to match felons to registered voters of Hispanic origin. FVRS was similar to CVDB in that it was also populated with voter data received from each of the 67 county voter registration databases. However, unlike CVDB, FVRS was designated by Florida law as the official list of registered voters in the State. Additionally, the identification of potential felon-registered voter matches under FVRS was distinct from the automated process implemented under CVDB. Initial potential matches from FVRS underwent comprehensive staff review and evaluation.

The Department's systematic process to identify potential felons consisted of preliminary assessments conducted by FDLE of voters who may have been convicted of a felony based on voter registration records provided to FDLE by the Department. Each new voter registration application and any updates to existing registration records which occurred after January 1, 2006, were submitted to FDLE for evaluation. The Department also provided FDLE with all active and inactive voter registrations maintained by FVRS on a monthly basis. These records were compared to felony convictions reported in the
Verification and validation of voter information relies on information received from the external agencies, including the Florida Department of Health (Office of Vital Statistics), Clerks of the Circuit Court, United States Attorney's Office, FDLE, Board of Executive Clemency, Florida Department of Corrections, and DHSMV. Following input of a completed voter registration application into FVRS by an election official and verification of an applicant's Florida driver's license number, Florida ID card number, or the last four digits of the social security number through DHSMV and the Social Security Administration, the applicant was registered and eligible to vote. After this registration process takes place, automated matches of potential ineligibility based on death, adjudication of mental incapacity, or felony conviction were generated by daily comparisons of data from the external agency databases and voter registration information in FVRS. BVRS was responsible for manually evaluating those automated matches of potential ineligibility for credibility and reliability. Following match resolution by BVRS, only those matches determined to be credible and reliable were sent in the form of case files to the Supervisors of Elections for review.

The Department indicated that there had been instances where data supplied by other agencies was not accurate or timely. For example, the Department indicated that records which were supplied by the Office of Vital Statistics for the purposes of matching for deceased voters have, at times, contained inaccurate social security numbers. In response, the Department had put in place manual procedures to help mitigate this known data problem. Additionally, the Department indicated that data received from the Office of Vital Statistics, though received regularly, may lag as much as two to three months.

Pursuant to Florida law, the Department maintains oversight of registration records maintenance activities conducted by the Supervisors of Elections through certification. Each Supervisor of Elections is required to certify, no later than July 31 and January 31 of each year, to the Department activities conducted, during the first and second six months of the year, respectively, regarding procedures for removal of voters determined as ineligible. Should the Department determine that a Supervisor of Elections has not satisfied these requirements, it will be necessary for the Department to satisfy the requirements. Although the first certification is not due from the counties until July 2006, the Department had not formalized a process by which to determine whether Supervisors of Elections have satisfactorily met these statutory requirements.

The issues noted above may increase the risk that ineligible and duplicate voter registrations exist in FVRS, putting at risk the integrity and accuracy of the voter registration list.

Recommendation: The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.

Section 98.075(6), Florida Statutes.
OBJECTIVES, SCOPE, AND METHODOLOGY

This operational audit focused on the Department's administration of the Federal Help America Vote Act of 2002. In addition, we evaluated selected controls related to the Florida Voter Registration System. Our objectives were to:

> Evaluate the effectiveness of related controls.
> Evaluate the extent to which the Department has complied with selected controlling laws, administrative rules, and other guidelines.

In conducting our audit, we interviewed Department personnel, observed selected operations, tested selected Department records, and completed various analyses and other procedures. Our audit included examinations of various documents (as well as events and conditions) applicable to the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006.

AUTHORITY

Pursuant to the provisions of Section 11.45, Florida Statutes, I have directed that this report be prepared to present the results of our operational audit.

William O. Monroe, CPA
Auditor General

MANAGEMENT RESPONSE

In a response letter dated June 15, 2006, the Secretary of State generally concurred with our audit findings and recommendations. The Secretary's response is included in its entirety at the end of this report as Appendix D.
Appendix A

Title II
Section 251
Requirements Payments
$132,502,091

Title I
Section 102
Replacement of Punch Card or Lever-Operated Voting Machines
$11,581,377

Title I
Section 101
Improvement of Administration of Elections
$14,447,580

Title II
Section 261
Assurance of Access for Individuals with Disabilities
$1,676,554

Note 1: Includes Title III activities (e.g., Sections 301-Voting System Standards, 302-Provisional Voting and Voting Information Requirements, 303-Statewide Voter Registration List, etc.).

</thead>
<tbody>
<tr>
<td>1</td>
<td>How the State will use the requirements payment to meet the requirements of Title III and, if applicable under Section 251(a)(2), HAVA, to carry out other activities to improve the administration of elections.</td>
</tr>
</tbody>
</table>
| 2       | How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in Element 1, including a description of:  
  A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and  
  B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted in Element 8. |
| 3       | How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III, HAVA. |
| 4       | How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301, HAVA. |
| 5       | How the State will establish a fund described in Section 254(b), HAVA, for purposes of administering the State's activities under this part, including information on fund management. |
| 6       | The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available, including specific information on:  
  A) The costs of the activities required to be carried out to meet the requirements of Title III, HAVA;  
  B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and  
  C) The portion of the requirements payment which will be used to carry out other activities. |
| 7       | How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000. |
| 8       | How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met. |
| 9       | A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under Section 402, HAVA. |
| 10      | If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities. |
| 11      | How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change:  
  A) Is developed and published in the Federal Register in accordance with Section 256, HAVA, in the same manner as the State plan;  
  B) Is subject to public notice and comment in accordance with Section 256, HAVA, in the same manner as the State plan; and  
  C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A). |
| 12      | In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year. |
| 13      | A description of the committee which participated in the development of the State plan in accordance with Section 255, HAVA, and the procedures followed by the committee under such Section and Section 259, HAVA. |

Management Response

STATE OF FLORIDA

DEPARTMENT OF STATE

JEB BUSH
Governor

June 15, 2006

Mr. William O. Monroe, CPA
Auditor General
G74 Claude Pepper Building
111 West Madison Street
Tallahassee, Florida 32399-1450

Dear Mr. Monroe:

Please find enclosed the Department of State’s response to the Auditor General’s May 30, 2006, Preliminary and Tentative Audit Findings on the Help America Vote Act (HAVA) and the Florida Voter Registration System (FVRS).

First I would like to thank you and your staff for the extraordinary effort that you have made to accommodate our request for this review of Florida’s compliance with HAVA and the new FVRS. Despite a short timeframe and a very busy schedule, your team headed by Dorothy Gilbert, was courteous and thorough in their approach and handling of this assignment.

Over the course of the last two years the Department has been focused on meeting the January 2006 deadline imposed on all 50 states by HAVA. This effort has allowed little opportunity for the Department’s staff to become familiar with all the nuances of a large Federal grant program. Your staff’s expertise has afforded us the advantage of addressing these salient issues early in the life of this program and has allowed us to make the necessary adjustments to ensure our compliance with HAVA.

Please contact me at 245-6500 if you need further information or have additional questions.

Sincerely,

Sue M. Cobb
Secretary of State

Enclosure

Cc: David E. Mann, Assistant Secretary of State
Heidi Hughes, Chief of Staff/General Counsel
Kirby J. Mole, Inspector General
Dawn K. Roberts, Director, Division of Elections

HELP AMERICA VOTE ACT

Finding No. 1: The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

Response: The Department agrees that the draft checklist should be completed and incorporated into the certification process to provide a visual aid to indicate compliance to the statutory elements. The checklist will be finalized and will be used in future certification tests.

Finding No. 2: The Department’s established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

Response: The Department will implement procedures to require that the Secretary of State and all persons employed by the Department who examine voting systems for compliance with the requirements of Section 101.5605, Florida Statutes, periodically certify in writing that they have no pecuniary interest in any voting equipment.

Finding No. 3: The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

Response: The Division of Elections website containing the list of certified voting systems by county is updated based upon receipt of objective evidence (i.e., acquisition report) provided by the county Supervisor of Elections. The Division has attempted during the last two years to bring this list up to date. In the first attempt, the poor response from the counties forced the Division to contact the vendors in order to update this list. The second attempt during the past nine months has also not produced up to date information, despite an attempt by the Division to create a simple checklist to facilitate the filing of the acquisition reports.

The Department agrees that updated information from the counties is essential in determining whether the voting systems used by the counties meet the requirements of law. The Department will institute a process by which to periodically confirm with the Supervisor of Elections that the information they have filed with the Department is accurate and to confirm that all information required by law is on file with the Department.

Finding No. 4: The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Response: The Department will update the State of Florida HAVA plan to reflect the revised required Maintenance of Effort (MOE) amounts. In addition, the Department will continue to review state expenditures in future years to ensure that the MOE threshold is exceeded. In future years, the level of state effort should exceed the required threshold, compensating for the $7,630 MOE shortfall for the 2004-05 fiscal year.
Florida Department of State  
Response to Preliminary and Tentative Audit Findings  
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)  
June 15, 2006  

Finding No. 5: Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Response: As indicated in the audit findings, the Department has begun a procedure for obtaining time certifications from employees in HAVA-funded positions. These certifications will be obtained on a semi-annual basis. If the Department becomes aware that any employee has worked on activities not related to the HAVA program, the costs associated with those other activities will be reimbursed to the HAVA program.

Finding No. 6: Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Response: The Department will seek further guidance from the cognizant Federal agency (the Elections Assistance Commission) on the proper disposition of unused leave payments. It should be noted that the proper disposition of unused leave payments may be impractical across agency lines, and sufficient resources may not be available in the Department’s budgeted general administrative expense of the governmental unit. The Department will make every effort to distribute the salary expenditure appropriately, however availability of general revenue funds may require that the Department use specific program funds to comply with Federal cost principles.

Finding No. 7: Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

Response: It is the Department’s understanding that HAVA funds paid to counties under the voter education program are not required to be expended for all elements shown in the Department’s rule applicable to minimum standards for voter education. For many counties, especially the smaller rural counties, the amount of HAVA funds received for voter education programs is insufficient to cover the full costs of all elements in the rule. In these instances, counties must provide the additional funds needed to implement all voter education activities listed in the rule. Therefore, the Department has not required counties to include each element in the rule in their voter education plans. They have been required to include only the voter education activities that will be paid for with HAVA funds. However, the Department does recognize that counties are required to implement all of the elements of the rule and will monitor each county’s activities as shown in their voter education reports following each general election to make sure that the required elements are completed.

In the future, the Department will closely monitor the counties’ annual expenditure reports to ensure that the counties expend HAVA funds in accordance with approved plans and will require reimbursement for all expenditures not approved. Also, the Department will ensure that counties report the expenditures made with HAVA funds separately from expenditures made with county funds. Finally, the Department will make changes to its Memorandum of Agreement with the counties to implement these requirements.

Finding No. 8: HAVA Program expenditures were not always properly supported.
Appendix D

Management Response

Florida Department of State
Response to Preliminary and Tentative Audit Findings
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)
June 15, 2006

Response: The designated contract manager will review and certify that the request for payment is properly supported and contract requirements, milestones, and deliverables have been met prior to submitting the request to Budget and Financial Services. The accounts payable supervisor in Budget and Financial Services will verify the contract manager has certified that the request for payment is properly supported and the required milestones or deliverables have been met prior to issuing the payment.

Finding No. 9: The Department did not always follow Federal requirements with regards to awards to other State agencies.

Response: The Department will ensure that interagency agreements with state agencies utilizing HAVA funds include all of the information required by Federal standards. In addition, the Department will obtain the appropriate documentation to evidence the expenditures of HAVA funds by the other State agencies.

FLORIDA VOTER REGISTRATION SYSTEM (FVRS)

Finding No. 10: Improvements were needed in the Department's Information Technology (IT) risk management practices.

Response: Upon completion of the FVRS Risk Assessment the Department plans to implement policies and procedures to mitigate identified risks. Access to Department systems will be documented according to policy and maintained in a central location at the Central Computing Facility (CCF). Periodic reviews will be performed.

Finding No. 11: The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and responsibility to ensure the system's security, uniformity, and integrity.

Response: The Department plans to continue to work with the Supervisors of Elections in the development of a governance model. The Department Information Security Manager plans to continue to develop the System Security Plan (SSP) and formal training program. System log retention and review will be included in the SSP. Written system configuration and management guidelines will be developed and provided to the counties. The Department will continue to incorporate the FVRS into the Information Technology Disaster Response Plan and develop a statewide regional response COOP plan.

The Department will designate all employees within the Bureau of Voter Registration Services as positions of special trust and will take the necessary steps to insure that this issue is addressed appropriately.

Finding No. 12: Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

Response: On May 1, 2006, the Department implemented a duplicate matching process to identify names of voters who appear more than one time on the FVRS. The first matching process identified all existing voters who appeared to be duplicates. This match produced 80,151 potential duplicates which were sent to the counties for evaluation. The duplicate matching process is now ongoing on a continual basis and
Appendix D

Response to Preliminary and Tentative Audit Findings
Help America Vote Act (HAVA) and Florida Voter Registration System (FVRS)
June 15, 2006

each time a new applicant is entered into the FVRS, a search is made to the existing voters to determine if the new applicant appears to be a duplicate.

The Department plans to expand the systematic felon matching of all existing registrations against all felony records as time and resources allow. The Department continues to coordinate with other agencies who are providing data for matching and verification purposes to increase the reliability and timeliness of the information. The Department also plans to develop a formal process to determine whether Supervisors of Elections have met record maintenance activities. The first certification is due to the Department by the Supervisors of Elections on July 31, 2006.
Final Audit Resolution Report

Florida Single Audit – Assignment No. E-SA-FL-11-06

Attachment 2
December 13, 2006

Sue M. Cobb, Secretary of State
Florida Department of State
R.A. Gray Building
500 South Bronough Street
Tallahassee, FL 32399-0250

Re: Follow-Up Review Applicable to Auditor General Report #2006-194, Help America Vote Act (HAVA) and the Florida Voter Registration System (FVRS) – Operational.

Dear Secretary Cobb:

Pursuant to Section 20.055(5)(g), Florida Statutes, the Office of Inspector General (OIG) conducted a follow-up review applicable to the Auditor General’s Report as referenced above. We have attached a copy of our report for your review.

As required by law, we have published our report on the status of the corrective actions taken by the Department and filed a copy of such response with the Legislative Auditing Committee.

If you require additional information on this matter please contact me.

Sincerely,

Kirby J. Mole, CIA
Inspector General

Att.

cc. Mr. Terry L. Shoffstall, Director, Legislative Auditing Committee
Thomas Wilkey, Executive Director, U.S. Election Assistance Commission
Derry Harper, Chief Inspector General, Executive Office of the Governor
David E. Mann, Assistant Secretary of State
Heidi Hughes, Chief of Staff/General Counsel
Dawn Roberts, Director, Division of Elections
Sarah Smith, Chief Information Officer

R. A. Gray Building • 500 South Bronough Street • Tallahassee, Florida 32399-0250
Telephone: (850) 245-6500 • Facsimile: (850) 245-6125 • http://www.dos.state.fl.us
The purpose of this follow up review is to report on the current status of corrective actions taken by the Department of State (Department) in response to the recommendations made by the Auditor General. The Auditor General’s operational audit focused on the Department’s administration of the Federal Help America Vote Act of 2002 during the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006. Also, the audit included an evaluation of the effectiveness of selected controls related to the Florida Voter Registration System.

Auditor General’s Finding No. 1 The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

Auditor General’s Recommendation We recommend that the Department finalize the Checklist and utilize it to document for the public record that its voting system certification procedures meet the requirements of Florida law.

Department’s Statement of Corrective Action(s) Implemented The Bureau of Voting Systems Certification has finalized a test record checklist that includes an indication of compliance to the voting system’s relevant statutory requirements. The final version of the test record checklist will be used for future certification efforts until the effective date of the 2007 revision to the Florida Voting System Standards. At that time, this checklist will be integrated into a larger certification test record that will track all the requirements of the 2007 Florida Voting System Standards.

Status of Corrective Actions The Department’s Bureau of Voting Systems Certification has finalized the Florida Voting Systems Certification Checklist & Test Record and is utilizing it to evidence that voting systems certified by the Bureau met Florida Law.

Auditor General’s Finding No. 2 The Department’s established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

Auditor General’s Recommendation We recommend that the Department establish procedures requiring the periodic affirmation of the absence of pecuniary and other conflicts of interests.

Department’s Statement of Corrective Action(s) Implemented The Department has included a section in the Employee Handbook regarding ‘Special Disclosure Requirements for Certain Employees in the Division of Elections, Bureau of Voting Systems Certification’ concerning this
issue. Pursuant to the section, employees in the Bureau of Voting Systems Certification are required to certify in writing that they do not have a pecuniary interest in any voting equipment.

The Department has developed a certification statement that employees who are involved in examining voting systems equipment for certification are required to sign. The certification statements are maintained in the Division of Elections.

**Status of Corrective Actions** The Department added a section to its Employee Handbook that prohibits the Secretary of State or any person who examines voting equipment for compliance with Section 101.5606, Florida Statutes, from having a pecuniary interest in such equipment. Also, certified statements applicable to pecuniary interests from the Secretary of State and employees of the Bureau of Voting Systems Certification were reviewed and are on file in the Division of Elections.

**Auditor General's Finding No. 3** The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

**Auditor General's Recommendation** We recommend that the Department develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law [Section 101.5607(a), Florida Statutes]; and periodically confirm the accuracy of its listing with the Supervisors of Elections. Such confirmations should be made in connection with the Department's periodic reconciliation of its control listing to the voting systems information provided and on file at the Department.

**Department's Statement of Corrective Action(s) Implemented** The Bureau of Voting Systems Certification examined the voting system acquisition records for all 67 Florida counties. The Bureau identified the county records that were incomplete and/or obsolete.

In addition, the Bureau initiated an effort to actively pursue obtaining each county's current system acquisition information on a periodic basis. As each county's record became complete relative to the requirements of Section 101.5607(1)(a), Florida Statutes, the Bureau updated the voting system database to reflect this information. The information contained in this database is correct for all 67 counties and is available for public examination on the Division of Elections' website.

During this process, the Bureau created a work instruction to serve as guidance for ascertaining each county's current acquisition status, maintaining this information, and updating the relevant database. The work instruction is still under development.

**Status of Corrective Actions** The Bureau of Voting Systems Certification updated its information and created a control list of voting systems for all 67 counties. Also, the Bureau is drafting working instructions to specific procedures necessary to maintain an accurate and current voting system control list to be completed in the first quarter of 2007.
Auditor General's Finding No. 4  The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Auditor General's Recommendation  The Department should update the State of Florida HAVA Plan to reflect the revised required MOE amount and ensure that the required MOE level is met each fiscal year in accordance with HAVA requirements.

Department's Statement of Corrective Action(s) Implemented  The HAVA State Planning Committee held two meetings on September 21, 2006 and October 12, 2006 in order to revise the HAVA State Plan. The updated plan includes the revised maintenance of effort level that the state must maintain as required by HAVA. In addition, the Department conducted a review of FY 2005-06 expenditures and initial calculations indicate that expenditures exceeded the MOE threshold.

Status of Corrective Actions  The Department has drafted an update to the State of Florida HAVA Plan which includes a section on maintenance of effort. The Department stated that the plan is required to be posted in the Federal Register for 30 days for public comments and anticipates completion in approximately two months.

Auditor General's Finding No. 5  Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Auditor General's Recommendation  We recommend that the Department's procedures ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity reports) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Department's Statement of Corrective Action(s) Implemented  Salary Certification statements are obtained every six months from all employees filling a HAVA-funded position. The certifications are maintained in the Division of Elections.

Status of Corrective Actions  The Division of Elections implemented a control procedure to ensure that all HAVA-funded employees signed salary certification forms.

Auditor General's Finding No. 6  Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Auditor General's Recommendation  We recommend that the Department, in compliance with Federal cost principles, allocate as a general administrative expense unused leave payments. We also recommend that, for any costs improperly charged to the HAVA Program, appropriate corrections be made.

Department's Statement of Corrective Action(s) Implemented  The Department submitted a request for guidance to the U. S. Election Assistance Commission (EAC) regarding leave...
payments to terminating employees. Pending receipt of a response from the EAC, all payments for unused leave to employees who have terminated from state government have been transferred from the Grants and Donations Trust Fund to General Revenue.

**Status of Corrective Actions** The Department has requested but not received guidance from the U.S. Election Assistance Commission. All payments made by the Department for leave due terminated employees were transferred to the General Revenue Fund.

**Auditor General’s Finding No. 7** Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

**Auditor General’s Recommendation** We recommend that the Department ensure that all Plans are in compliance with Department rules and Agreements and that voter education expenditures correspond with detailed descriptions in the Plans. In addition, we recommend the Department ensure that the matching expenditures are reported separately on the expenditure report.

**Department’s Statement of Corrective Action(s) Implemented** The Department is preparing a survey regarding voter education activities that will be sent to all Supervisors of Elections following the 2006 general election. Information from the survey will be used to determine each county’s compliance with elements listed in the Department’s rule on minimum standards for voter education. The survey is organized so that counties will report voter education expenditures made with HAVA/state funds separately from expenditures made with county funds. As required by Section 98.255, Florida Statutes, the Department will prepare a report that will be available by January 31, 2007, regarding the voter education programs and activities conducted by Supervisors of Elections during the 2006 general election period.

The Department has revised the language in its memorandum of agreement with Supervisors of Elections in order to implement changes regarding voter education plans and reporting requirements.

**Status of Corrective Actions** The Department prepared a survey to obtain information from Supervisors of Elections applicable to voter educational activities and compliance with specific laws, rules, and agreements. The Department intends to compare the survey’s information with the Supervisor’s approved voter educational plans as part of its compliance monitoring procedures. Also, the Department will use the surveys to obtain the amount of expenditures made from county match and HAVA funds. On November 14, 2006, the Department sent the Supervisors of Elections a new memorandum of agreement that included these new survey procedures. On November 21, 2006, the Department sent the survey to the Supervisors of Elections.

**Auditor General’s Finding No. 8** HAVA Program expenditures were not always properly supported.

**Auditor General’s Recommendation** We recommend that the Department ensure that required contractual terms are met and services are received prior to payment. In addition, we recommend that the Department only pay contractors in amounts agreed upon by specific contract or purchase order.
Department's Statement of Corrective Action(s) Implemented Employees in the Office of Support Services will, upon receipt of a payment request or invoice, contact the contract manager if required documentation has not been received. Invoices will not be processed for payment until the contract manager certifies to Support Services that the deliverables have been met.

Working with the Office of Support Services, the accounts payable supervisor in the Budget and Financial Services Program checks for a certification that the required milestones and deliverables have been met. A payment will not be vouchered if the required certification is not included.

Status of Corrective Actions The Department has implemented the process as stated above to ensure receipt of deliverables and payment authorization.

Auditor General's Finding No. 9 The Department did not always follow Federal requirements with regards to awards to other State agencies.

Auditor General's Recommendation We recommend that the Department take the necessary steps to ensure that the interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

Department’s Statement of Corrective Action(s) Implemented All interagency agreements entered into or renewed after July 1, 2006, between the Department of State and governmental agencies such as the Florida Department of Highway Safety and Motor Vehicles or the Florida Department of Law Enforcement as they pertain to HAVA funds for election administration and/or voting purposes shall:

- Include standard provisions relating to federal and state audit, monitoring and reporting requirements.
- Identify, for audit purposes, the title and number of the appropriate type of federal assistance program (known as the Catalog of Federal Domestic Assistance) from which the funds are being made available.
- Condition the receipt and use of HAVA funds on the submission, review, and approval of specified written certifications and plans for use of these funds or the inclusion of comprehensive written specifications or terms in return for receipt and use of the funds, whichever is applicable.
- Require the recipient of HAVA funds to report to the Department of State any change or deviation from any plan originally submitted for review and approval for receipt and use of such funds, or to require the mutual written agreement to modify any material change to written specifications or terms in the agreement.
- Require any governmental official or entity to receive federal HAVA funds to complete federal ED Form GCS-009, 6/88, “Certification Regarding Debarment, Suspension,
Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions” (created pursuant to Executive Order 12549 (46CFR 1183.35). Such form must be completed and submitted prior to the Department entering into or renewing any agreement.

Existing interagency agreements with Florida Department of Law Enforcement and Florida Department of Highway Safety and Motor Vehicles are currently under review and will be revised to include the above-referenced provisions since the Department’s and these agencies’ focus on Florida Voter Registration System has now evolved from development and implementation to operation and maintenance of the system.

**Status of Corrective Actions** As of this report date, the Department has not entered into any new agreements with the Florida Department of Law Enforcement or the Department of Highway Safety and Motor Vehicles. The Department is in the process of reviewing current agreements for appropriate revisions.

**Auditor General’s Finding No. 10** Improvements were needed in the Department’s Information Technology (IT) risk management practices.

**Auditor General’s Recommendation** Upon completion of the FVRS risk assessment, the Department should implement policies and procedures to mitigate identified risks, including ensuring that all access to Department systems is documented in a uniform manner according to policy, maintained in a central location, and periodically reviewed.

**Department’s Statement of Corrective Action(s) Implemented** A baseline Risk Assessment was completed on the FVRS in June 2006. A corrective action plan has been established and is in the execution phase. Additionally, a Department employee has been reassigned to the position of Information Security Administrator and Network Administrator. IT Security Policies have been updated at the department level and authorization procedures have been updated.

**Status of Corrective Actions** On July 5, 2006, the Department received its final risk assessment report prepared by an independent contractor. Based upon this risk assessment the Department and the State Information Security Office prepared a corrective action plan. As of this date, the Department completed and continues to implement corrective actions identified in the plan. Also, the Department reassigned an employee to the position of Information Security Administrator and Network Administrator in order to enhance improvements needed in the Department’s information risk management practices as identified by the Auditor General. Finally, the Department prepared the FVRS Information Security Plan which is pending final approval from the Department’s senior management.

**Auditor General’s Finding No. 11** The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and responsibility to ensure the system’s security, uniformity, and integrity.
**Auditor General's Recommendation** The Department should, in coordination with the county Supervisors of Elections, adopt a governance model that includes security measures in support of, and for the protection of, the FVRS business purpose and the confidentiality, availability, and integrity of data contained therein. Specifically, written procedures should be established to address those areas noted above with consistent application to ensure the system’s security, uniformity, and integrity.

**Department’s Statement of Corrective Action(s) Implemented** The Department has created a System Security Plan (SSP). In addition, a memorandum of understanding regarding information security issues has been executed with each Supervisor of Elections.

The Division of Elections Continuity of Operations Plan is in the final stages of development and includes a regional response plan involving all Supervisors of Elections.

User audit capabilities have been improved and development in this area continues.

Each employee with access to FVRS or access to data of confidentiality has signed a strict standard of conduct regarding the protection and security of that data. The Department is reviewing the duties of positions with access to FVRS to determine which of these positions should be classified as positions of special trust.

**Status of Corrective Actions** The Department created a System Security Plan and executed, with each Supervisor of Elections, a Memorandum of Agreement For Minimum Security Standards For The Florida Voter Registration System. The Department is finalizing the Division of Elections Continuity of Operations (COOP) Plan, including a Regional Response Plan for all Supervisors of Elections. Also, each Department employee with access to FVRS or confidential data executed an acknowledgment statement titled, Standards of Conduct Governing Access To The Florida Voter Registration System and Other Agency Records.

**Auditor General's Finding No. 12** Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

**Auditor General's Recommendation** The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.

**Department’s Statement of Corrective Action(s) Implemented** FVRS continues to perform a duplicate matching process on a continual basis which to date has identified 86,008 potential duplicates which have been sent to the counties for evaluation. The Division continues to work with the Supervisors of Elections’ vendors of local election administration systems to streamline the duplicate matching process recognizing there will be programming adjustments necessary.
The Department developed a form for Supervisors of Elections to report list maintenance activities. Certifications regarding list maintenance activities have been received from all Supervisors of Elections covering activities between January 1, 2006 and June 30, 2006.

**Status of Corrective Actions** The Department implemented the FVRS matching functionality for systematic identification of possible duplicate voters and continues to work with the Supervisor of Elections to improve the matching process. However, as of this date, the Department has not expanded its current felon matching process to include registered voters prior to January 1, 2006, except for voters that incurred a change in their voter registration after January 1, 2006. The Department has stated its intent to expand its felon matching search based upon resources available. Also, the Department has developed a process to determine and document certification of voter registration activities by the Supervisors of Elections.

3.3.2 Voting Functions

3.3.2.1 Polling Place Verification
Provides a means for verifying:
- Equipment is installed at the correct polling place
- Equipment is in its initialized state
- Equipment is ready for casting of ballots
- Proper execution is verified by means of an equipment-generated record, retained as part of the audit record

3.3.2.2 Party Selection
- Allows casting for the party of choice in a primary election and for all non-partisan candidates and measures, while preventing voting for a candidate of another party
- Provides a means in a general election to select any candidate and to select any measure on the ballot

3.3.2.3 Ballot Sub-setting
- Provides a means of disabling that portion of a ballot for which the voter is not entitled to vote

3.3.2.4 Enabling the Ballot
- Provides a means for enabling the recording of votes

3.3.2.5 Candidate and Measure Selection
- Method of voting complies with the following sections of 101.5606, F.S.
  - (1) Permits and requires voting in secrecy.
  - (2) Permits each elector to vote at any election for all persons and offices for whom and for which the elector is lawfully entitled to vote, and no others; to vote for as many persons for an office as the elector is entitled to vote for; and to vote for or against any question upon which the elector is entitled to vote.
  - (3) Rejects a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.
  - (4) Accepts a rejected ballot pursuant to subsection (3) for a marksense ballot, if a voter chooses to cast the ballot, but records no vote for any office that has been overvoted or undervoted.
  - (5) Capable of correctly counting votes.
Permits each voter at a primary election to vote only for the candidates seeking nomination by the political party in which such voter is registered, for any candidate for nonpartisan office, and for any question upon which the voter is entitled to vote.

Permits each elector by one operation, to vote for all presidential electors of a party or for all presidential electors of candidates for President and Vice President with no party affiliation.

Provides a method for write-in voting.

Capable of accumulating a count of the specific number of ballots tallied for a precinct, accumulating total votes by candidate for each office, and accumulating total votes for and against each question and issue of the ballots tallied for a precinct.

Capable of tallying votes from ballots of different political parties from the same precinct, in the case of a primary election.

Capable of automatically producing precinct totals in printed, marked, or punched form, or a combination thereof.

Permits each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed, if it is of a type which registers votes electronically.

Capable of providing records from which the operation of the voting system may be audited.

Uses a precinct-count tabulation system.

Does not use an apparatus or device for the piercing of ballots by the voter.

3.3.2.6 Standards for Equally Accessible Electronic Voter Interfaces

Method of voting complies with the following sections of 101.56062, F.S.

Has the capability to install accessible voter interface devices in the system configuration which allow the system to meet the following requirements:

(a) Provides a tactile input or audio input device, or both.

(b) Provides a method by which voters can confirm any tactile or audio input by having the capability of audio output using synthetic or recorded human speech that is reasonable phonetically accurate.

(c) Any operable controls on the input device which are needed for voters who are visually impaired must be discernible tactiley without actuating the keys.

(d) Audio and visual access approaches must be able to work both separately and simultaneously.

(e) If a non-audio access approach is provided, the system may not require color perception. The system must use black text or graphics, or both, on white background or white text or graphics, or both, on black background, unless the office of the Secretary of State approves other high-contrast color combinations that do not require color perception.

(f) Any voting system that requires any visual perception must offer the election official who programs the system, prior to its being sent to the polling place, the capability to set the font size, as it appears to the voter, from a minimum of 14 points to a maximum of 24 points.

(g) The voting system must provide audio information, including any audio output using synthetic or recorded human speech or any auditory feedback tones that are important for the use of the audio approach, through at least one mode, handset or headset, in enhanced auditory fashion (increased amplification) and must provide incremental volume control with output amplification up to a level of at least 97 dB SPL.

(h) For transmitted voice signals to the voter, the voting system must provide a gain adjustable up to a minimum of 20 dB with at least one intermediate step of 12 dB of gain.

(i) For the safety of others, if the voting system has the possibility of exceeding 120 dB SPL, then a mechanism must be included to reset the volume automatically to the voting system's default volume level after every use, for example when the handset is
replaced, but not before. Also, universal precautions in the use and sharing of the headsets should be followed.

- (j) If sound cues and audible information such as "beeps" are used, there must be simultaneous corresponding visual cues and information.
- (k) Controls and operable mechanisms must be operable with one hand, including operability with a closed fist, and operable without tight grasping, pinching, or twisting of the wrist.
- (l) The force required to operate or activate the controls must be no greater than 5 pounds of force.
- (m) Voting booths must have voting controls at a minimum height of 36 inches above the finished floor with a minimum knee clearance of 27 inches high, 30 inches wide, and 19 inches deep, or the accessible voter interface devices must be designed so as to allow their use on top of a table to meet these requirements. Tabletop installations must include adequate privacy.

3.3.2.7 Audio Ballots

Note: The functionalities required for the audio ballot may be satisfied by either the voting device or by the entire voting system.

- Complies with standards for electronic voter interfaces
- Controls are discernable tactically without actuating the controls
- Provide a voter operated volume control
- Method of voting complies with the following subsections of 101.56062(1)(n), F.S.
- (1) After the initial instructions that the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.
- (2) The voter must be able to determine the races that he or she is allowed to vote in and to determine which candidates are available in each race.
- (3) The voter must be able to determine how many candidates may be selected in each race.
- (4) The voter must be able to have confidence that the physical or vocal inputs given to the system have selected the candidates that he or she intended to select.
- (5) The voter must be able to review the candidate selections that he or she has made.
- (6) Prior to the act of casting the ballot, the voter must be able to change any selections previously made and confirm a new selection.
- (7) The system must communicate to the voter the fact that the voter has failed to vote in a race or has failed to vote the number of allowable candidates in any race and require the voter to confirm his or her intent to undervote before casting the ballot.
- (8) The system must prevent the voter from overvoting any race.
- (9) The voter must be able to input a candidate's name in each race that allows a write-in candidate.
- (10) The voter must be able to review his or her write-in input to the interface, edit that input, and confirm that the edits meet the voter's intent.
- (11) There must be a clear, identifiable action that the voter takes to "cast" the ballot. The system must make clear to the voter how to take this action so that the voter has minimal risk of taking the action accidentally but, when the voter intends to cast the ballot, the action can be easily performed.
- (12) Once the ballot is cast, the system must confirm to the voter that the action has occurred and that the voter's process of voting is complete.
- (13) Once the ballot is cast, the system must preclude the voter from modifying the ballot cast or voting or casting another ballot.
The purpose of this follow up review is to report on the current status of corrective actions taken by the Department of State (Department) in response to the recommendations made by the Auditor General. The Auditor General’s operational audit focused on the Department’s administration of the Federal Help America Vote Act of 2002 during the period July 1, 2004, through February 28, 2006, and selected actions taken through May 23, 2006. Also, the audit included an evaluation of the effectiveness of selected controls related to the Florida Voter Registration System.

**Auditor General’s Finding No. 1** The Department did not have a procedure in place to evidence for the public record that voting systems being certified had met the requirements of Florida law.

**Auditor General’s Recommendation** We recommend that the Department finalize the Checklist and utilize it to document for the public record that its voting system certification procedures meet the requirements of Florida law.

**Department’s Statement of Corrective Action(s) Implemented** The Bureau of Voting Systems Certification has finalized a test record checklist that includes an indication of compliance to the voting system’s relevant statutory requirements. The final version of the test record checklist will be used for future certification efforts until the effective date of the 2007 revision to the Florida Voting System Standards. At that time, this checklist will be integrated into a larger certification test record that will track all the requirements of the 2007 Florida Voting System Standards.

**Status of Corrective Actions** The Department’s Bureau of Voting Systems Certification has finalized the *Florida Voting Systems Certification Checklist & Test Record* and is utilizing it to evidence that voting systems certified by the Bureau met Florida Law.

**Auditor General’s Finding No. 2** The Department’s established procedures did not prohibit the Secretary of State and any examiners from having a pecuniary (financial) interest in the examination of and approval of voting equipment.

**Auditor General’s Recommendation** We recommend that the Department establish procedures requiring the periodic affirmation of the absence of pecuniary and other conflicts of interests.

**Department’s Statement of Corrective Action(s) Implemented** The Department has included a section in the Employee Handbook regarding ‘Special Disclosure Requirements for Certain Employees in the Division of Elections, Bureau of Voting Systems Certification’ concerning this...
issue. Pursuant to the section, employees in the Bureau of Voting Systems Certification are required to certify in writing that they do not have a pecuniary interest in any voting equipment.

The Department has developed a certification statement that employees who are involved in examining voting systems equipment for certification are required to sign. The certification statements are maintained in the Division of Elections.

**Status of Corrective Actions** The Department added a section to its Employee Handbook that prohibits the Secretary of State or any person who examines voting equipment for compliance with Section 101.5606, Florida Statutes, from having a pecuniary interest in such equipment. Also, certified statements applicable to pecuniary interests from the Secretary of State and employees of the Bureau of Voting Systems Certification were reviewed and are on file in the Division of Elections.

**Auditor General's Finding No. 3** The Department did not maintain a current, reliable control listing of voting systems certified and in use by the counties. In addition, the Department did not have a procedure in place to ensure that voting system information was on file with the Department.

**Auditor General's Recommendation** We recommend that the Department develop a current, reliable control listing; establish procedures to ensure that Supervisors of Elections submit all voting system information required by State law [Section 101.5607(1)(a), Florida Statutes]; and periodically confirm the accuracy of its listing with the Supervisors of Elections. Such confirmations should be made in connection with the Department’s periodic reconciliation of its control listing to the voting systems information provided and on file at the Department.

**Department’s Statement of Corrective Action(s) Implemented** The Bureau of Voting Systems Certification examined the voting system acquisition records for all 67 Florida counties. The Bureau identified the county records that were incomplete and/or obsolete.

In addition, the Bureau initiated an effort to actively pursue obtaining each county’s current system acquisition information on a periodic basis. As each county’s record became complete relative to the requirements of Section 101.5607(1)(a), Florida Statutes, the Bureau updated the voting system database to reflect this information. The information contained in this database is correct for all 67 counties and is available for public examination on the Division of Elections’ website.

During this process, the Bureau created a work instruction to serve as guidance for ascertaining each county’s current acquisition status, maintaining this information, and updating the relevant database. The work instruction is still under development.

**Status of Corrective Actions** The Bureau of Voting Systems Certification updated its information and created a control list of voting systems for all 67 counties. Also, the Bureau is drafting working instructions to specific procedures necessary to maintain an accurate and current voting system control list to be completed in the first quarter of 2007.
Auditor General’s Finding No. 4  The Department incorrectly calculated the required maintenance of effort that was included in the State of Florida HAVA Plan and also did not maintain the required level of expenditures for the 2004-05 fiscal year.

Auditor General’s Recommendation  The Department should update the State of Florida HAVA Plan to reflect the revised required MOE amount and ensure that the required MOE level is met each fiscal year in accordance with HAVA requirements.

Department’s Statement of Corrective Action(s) Implemented  The HAVA State Planning Committee held two meetings on September 21, 2006 and October 12, 2006 in order to revise the HAVA State Plan. The updated plan includes the revised maintenance of effort level that the state must maintain as required by HAVA. In addition, the Department conducted a review of FY 2005-06 expenditures and initial calculations indicate that expenditures exceeded the MOE threshold.

Status of Corrective Actions  The Department has drafted an update to the State of Florida HAVA Plan which includes a section on maintenance of effort. The Department stated that the plan is required to be posted in the Federal Register for 30 days for public comments and anticipates completion in approximately two months.

Auditor General’s Finding No. 5  Salary certifications required for employees who worked solely on the HAVA Program were not maintained. Also, personnel activity reports were not always maintained to support personnel costs charged to the HAVA Program.

Auditor General’s Recommendation  We recommend that the Department’s procedures ensure that required documentation supporting charges to the HAVA Program (including certifications and personnel activity reports) is properly and timely prepared and maintained. For any costs improperly charged to the HAVA Program, appropriate corrections should be made.

Department’s Statement of Corrective Action(s) Implemented  Salary Certification statements are obtained every six months from all employees filling a HAVA-funded position. The certifications are maintained in the Division of Elections.

Status of Corrective Actions  The Division of Elections implemented a control procedure to ensure that all HAVA-funded employees signed salary certification forms.

Auditor General’s Finding No. 6  Contrary to Federal cost principles, payment for unused leave to a terminating employee was charged as a direct cost to the Program instead of being allocated as a general administrative expense to all activities of the governmental unit.

Auditor General’s Recommendation  We recommend that the Department, in compliance with Federal cost principles, allocate as a general administrative expense unused leave payments. We also recommend that, for any costs improperly charged to the HAVA Program, appropriate corrections be made.

Department’s Statement of Corrective Action(s) Implemented  The Department submitted a request for guidance to the U. S. Election Assistance Commission (EAC) regarding leave
payments to terminating employees. Pending receipt of a response from the EAC, all payments for unused leave to employees who have terminated from state government have been transferred from the Grants and Donations Trust Fund to General Revenue.

**Status of Corrective Actions** The Department has requested but not received guidance from the U.S. Election Assistance Commission. All payments made by the Department for leave due to terminated employees were transferred to the General Revenue Fund.

**Auditor General’s Finding No. 7** Controls to ensure that voter education programs were in compliance with Florida law and Department rule were insufficient.

**Auditor General’s Recommendation** We recommend that the Department ensure that all Plans are in compliance with Department rules and Agreements and that voter education expenditures correspond with detailed descriptions in the Plans. In addition, we recommend the Department ensure that the matching expenditures are reported separately on the expenditure report.

**Department’s Statement of Corrective Action(s) Implemented** The Department is preparing a survey regarding voter education activities that will be sent to all Supervisors of Elections following the 2006 general election. Information from the survey will be used to determine each county’s compliance with elements listed in the Department’s rule on minimum standards for voter education. The survey is organized so that counties will report voter education expenditures made with HAVA/state funds separately from expenditures made with county funds. As required by Section 98.255, Florida Statutes, the Department will prepare a report that will be available by January 31, 2007, regarding the voter education programs and activities conducted by Supervisors of Elections during the 2006 general election period.

The Department has revised the language in its memorandum of agreement with Supervisors of Elections in order to implement changes regarding voter education plans and reporting requirements.

**Status of Corrective Actions** The Department prepared a survey to obtain information from Supervisors of Elections applicable to voter educational activities and compliance with specific laws, rules, and agreements. The Department intends to compare the survey’s information with the Supervisor’s approved voter educational plans as part of its compliance monitoring procedures. Also, the Department will use the surveys to obtain the amount of expenditures made from county match and HAVA funds. On November 14, 2006, the Department sent the Supervisors of Elections a new memorandum of agreement that included these new survey procedures. On November 21, 2006, the Department sent the survey to the Supervisors of Elections.

**Auditor General’s Finding No. 8** HAVA Program expenditures were not always properly supported.

**Auditor General’s Recommendation** We recommend that the Department ensure that required contractual terms are met and services are received prior to payment. In addition, we recommend that the Department only pay contractors in amounts agreed upon by specific contract or purchase order.
**Department’s Statement of Corrective Action(s) Implemented** Employees in the Office of Support Services will, upon receipt of a payment request or invoice, contact the contract manager if required documentation has not been received. Invoices will not be processed for payment until the contract manager certifies to Support Services that the deliverables have been met.

Working with the Office of Support Services, the accounts payable supervisor in the Budget and Financial Services Program checks for a certification that the required milestones and deliverables have been met. A payment will not be vouchered if the required certification is not included.

**Status of Corrective Actions** The Department has implemented the process as stated above to ensure receipt of deliverables and payment authorization.

**Auditor General’s Finding No. 9** The Department did not always follow Federal requirements with regards to awards to other State agencies.

**Auditor General’s Recommendation** We recommend that the Department take the necessary steps to ensure that the interagency agreements include all applicable Federal information and requirements and that appropriate monitoring is performed.

**Department’s Statement of Corrective Action(s) Implemented** All interagency agreements entered into or renewed after July 1, 2006, between the Department of State and governmental agencies such as the Florida Department of Highway Safety and Motor Vehicles or the Florida Department of Law Enforcement as they pertain to HAVA funds for election administration and/or voting purposes shall:

- Include standard provisions relating to federal and state audit, monitoring and reporting requirements.

- Identify, for audit purposes, the title and number of the appropriate type of federal assistance program (known as the Catalog of Federal Domestic Assistance) from which the funds are being made available.

- Condition the receipt and use of HAVA funds on the submission, review, and approval of specified written certifications and plans for use of these funds or the inclusion of comprehensive written specifications or terms in return for receipt and use of the funds, whichever is applicable.

- Require the recipient of HAVA funds to report to the Department of State any change or deviation from any plan originally submitted for review and approval for receipt and use of such funds, or to require the mutual written agreement to modify any material change to written specifications or terms in the agreement.

- Require any governmental official or entity to receive federal HAVA funds to complete federal ED Form GCS-009, 6/88, “Certification Regarding Debarment, Suspension,
Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions” (created pursuant to Executive Order 12549 (46CFR 1183.35). Such form must be completed and submitted prior to the Department entering into or renewing any agreement.

Existing interagency agreements with Florida Department of Law Enforcement and Florida Department of Highway Safety and Motor Vehicles are currently under review and will be revised to include the above-referenced provisions since the Department’s and these agencies’ focus on Florida Voter Registration System has now evolved from development and implementation to operation and maintenance of the system.

Status of Corrective Actions  As of this report date, the Department has not entered into any new agreements with the Florida Department of Law Enforcement or the Department of Highway Safety and Motor Vehicles. The Department is in the process of reviewing current agreements for appropriate revisions.

Auditor General’s Finding No. 10 Improvements were needed in the Department’s Information Technology (IT) risk management practices.

Auditor General’s Recommendation Upon completion of the FVRS risk assessment, the Department should implement policies and procedures to mitigate identified risks, including ensuring that all access to Department systems is documented in a uniform manner according to policy, maintained in a central location, and periodically reviewed.

Department’s Statement of Corrective Action(s) Implemented A baseline Risk Assessment was completed on the FVRS in June 2006. A corrective action plan has been established and is in the execution phase. Additionally, a Department employee has been reassigned to the position of Information Security Administrator and Network Administrator.

IT Security Policies have been updated at the department level and authorization procedures have been updated.

Status of Corrective Actions On July 5, 2006, the Department received its final risk assessment report prepared by an independent contractor. Based upon this risk assessment the Department and the State Information Security Office prepared a corrective action plan. As of this date, the Department completed and continues to implement corrective actions identified in the plan. Also, the Department reassigned an employee to the position of Information Security Administrator and Network Administrator in order to enhance improvements needed in the Department’s information risk management practices as identified by the Auditor General. Finally, the Department prepared the FVRS Information Security Plan which is pending final approval from the Department’s senior management.

Auditor General’s Finding No. 11 The Department had not adopted a governance model addressing the management, use, and operation of FVRS commensurate with its authority and responsibility to ensure the system’s security, uniformity, and integrity.
Auditor General's Recommendation The Department should, in coordination with the county Supervisors of Elections, adopt a governance model that includes security measures in support of, and for the protection of, the FVRS business purpose and the confidentiality, availability, and integrity of data contained therein. Specifically, written procedures should be established to address those areas noted above with consistent application to ensure the system's security, uniformity, and integrity.

Department's Statement of Corrective Action(s) Implemented The Department has created a System Security Plan (SSP). In addition, a memorandum of understanding regarding information security issues has been executed with each Supervisor of Elections.

The Division of Elections Continuity of Operations Plan is in the final stages of development and includes a regional response plan involving all Supervisors of Elections.

User audit capabilities have been improved and development in this area continues.

Each employee with access to FVRS or access to data of confidentiality has signed a strict standard of conduct regarding the protection and security of that data. The Department is reviewing the duties of positions with access to FVRS to determine which of these positions should be classified as positions of special trust.

Status of Corrective Actions The Department created a System Security Plan and executed, with each Supervisor of Elections, a Memorandum of Agreement For Minimum Security Standards For The Florida Voter Registration System. The Department is finalizing the Division of Elections Continuity of Operations (COOP) Plan, including a Regional Response Plan for all Supervisors of Elections. Also, each Department employee with access to FVRS or confidential data executed an acknowledgment statement titled, Standards of Conduct Governing Access To The Florida Voter Registration System and Other Agency Records.

Auditor General's Finding No. 12 Although the Department had put measures in place to help ensure the integrity of data in FVRS, improvements were needed in the processes for identifying duplicate registrations and ineligible voters.

Auditor General's Recommendation The Department should implement FVRS matching functionality, as planned, to allow for systematic identification of possible duplicate voters. In addition, the Department should expand, as planned, current systematic felon matching to include matching of all existing registrations against all felony records. The Department should also implement a formalized process to determine if Supervisors of Elections have satisfactorily met certification requirements prescribed by Florida Statutes. Further, the Department should continue to work with agencies that supply the Department with data for matching and verification purposes to increase data reliability, integrity, and timeliness.

Department's Statement of Corrective Action(s) Implemented FVRS continues to perform a duplicate matching process on a continual basis which to date has identified 86,008 potential duplicates which have been sent to the counties for evaluation. The Division continues to work with the Supervisors of Elections' vendors of local election administration systems to streamline the duplicate matching process recognizing there will be programming adjustments necessary.
The Department developed a form for Supervisors of Elections to report list maintenance activities. Certifications regarding list maintenance activities have been received from all Supervisors of Elections covering activities between January 1, 2006 and June 30, 2006.

**Status of Corrective Actions** The Department implemented the FVRS matching functionality for systematic identification of possible duplicate voters and continues to work with the Supervisor of Elections to improve the matching process. However, as of this date, the Department has not expanded its current felon matching process to include registered voters prior to January 1, 2006, except for voters that incurred a change in their voter registration after January 1, 2006. The Department has stated its intent to expand its felon matching search based upon resources available. Also, the Department has developed a process to determine and document certification of voter registration activities by the Supervisors of Elections.
Sue M. Cobb, Secretary of State

Re: Follow-Up Review Applicable to Auditor General Report #2006-194, Help America Vote Act (HAVA) and the Florida Voter Registration System (FVRS) – Operational.

Dear Secretary Cobb:

Pursuant to Section 20.055(5)(g), Florida Statutes, the Office of Inspector General (OIG) conducted a follow-up review applicable to the Auditor General’s Report as referenced above. We have attached a copy of our report for your review.

As required by law, we have published our report on the status of the corrective actions taken by the Department and filed a copy of such response with the Legislative Auditing Committee.

If you require additional information on this matter please contact me.

Sincerely,

Kirby J. Mole, CIA  
Inspector General

Att.

cc. Mr. Terry L. Shoffstall, Director, Legislative Auditing Committee  
Thomas Wilkey, Executive Director, U.S. Election Assistance Commission  
Derry Harper, Chief Inspector General, Executive Office of the Governor  
David E. Mann, Assistant Secretary of State  
Heidi Hughes, Chief of Staff/General Counsel  
Dawn Roberts, Director, Division of Elections  
Sarah Smith, Chief Information Officer

3.3.2 Voting Functions

3.3.2.1 Polling Place Verification
Provides a means for verifying:
- Equipment is installed at the correct polling place
- Equipment is in its initialized state
- Equipment is ready for casting of ballots
- Proper execution is verified by means of an equipment-generated record, retained as part of the audit record

3.3.2.2 Party Selection
- Allows casting for the party of choice in a primary election and for all non-partisan candidates and measures, while preventing voting for a candidate of another party
- Provides a means in a general election to select any candidate and to select any measure on the ballot

3.3.2.3 Ballot Sub-setting
- Provides a means of disabling that portion of a ballot for which the voter is not entitled to vote

3.3.2.4 Enabling the Ballot
- Provides a means for enabling the recording of votes

3.3.2.5 Candidate and Measure Selection
- Method of voting complies with the following sections of 101.5606, F.S.
  - (1) Permits and requires voting in secrecy.
  - (2) Permits each elector to vote at any election for all persons and offices for whom and for which the elector is lawfully entitled to vote, and no others; to vote for as many persons for an office as the elector is entitled to vote for; and to vote for or against any question upon which the elector is entitled to vote.
  - (3) Rejects a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.
  - (4) Accepts a rejected ballot pursuant to subsection (3) for a marksense ballot, if a voter chooses to cast the ballot, but records no vote for any office that has been overvoted or undervoted.
  - (5) Capable of correctly counting votes.
Permits each voter at a primary election to vote only for the candidates seeking nomination by the political party in which such voter is registered, for any candidate for nonpartisan office, and for any question upon which the voter is entitled to vote.

Permits each elector by one operation, to vote for all presidential electors of a party or for all presidential electors of candidates for President and Vice President with no party affiliation.

Provides a method for write-in voting.

Capable of accumulating a count of the specific number of ballots tallied for a precinct, accumulating total votes by candidate for each office, and accumulating total votes for and against each question and issue of the ballots tallied for a precinct.

Capable of tallying votes from ballots of different political parties from the same precinct, in the case of a primary election.

Capable of automatically producing precinct totals in printed, marked, or punched form, or a combination thereof.

Permits each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed, if it is of a type which registers votes electronically.

Capable of providing records from which the operation of the voting system may be audited.

Uses a precinct-count tabulation system.

Does not use an apparatus or device for the piercing of ballots by the voter.

3.3.2.6 Standards for Equally Accessible Electronic Voter Interfaces

Method of voting complies with the following sections of 101.56062, F.S.

1. Has the capability to install accessible voter interface devices in the system configuration which allow the system to meet the following requirements:

   a. Provides a tactile input or audio input device, or both.

   b. Provides a method by which voters can confirm any tactile or audio input by having the capability of audio output using synthetic or recorded human speech that is reasonable phonetically accurate.

   c. Any operable controls on the input device which are needed for voters who are visually impaired must be discernible tactiley without actuating the keys.

   d. Audio and visual access approaches must be able to work both separately and simultaneously.

   e. If a non-audio access approach is provided, the system may not require color perception. The system must use black text or graphics, or both, on white background or white text or graphics, or both, on black background, unless the office of the Secretary of State approves other high-contrast color combinations that do not require color perception.

   f. Any voting system that requires any visual perception must offer the election official who programs the system, prior to its being sent to the polling place, the capability to set the font size, as it appears to the voter, from a minimum of 14 points to a maximum of 24 points.

   g. The voting system must provide audio information, including any audio output using synthetic or recorded human speech or any auditory feedback tones that are important for the use of the audio approach, through at least one mode, handset or headset, in enhanced auditory fashion (increased amplification) and must provide incremental volume control with output amplification up to a level of at least 97 dB SPL.

   h. For transmitted voice signals to the voter, the voting system must provide a gain adjustable up to a minimum of 20 dB with at least one intermediate step of 12 dB of gain.

   i. For the safety of others, if the voting system has the possibility of exceeding 120 dB SPL, then a mechanism must be included to reset the volume automatically to the voting system's default volume level after every use, for example when the handset is
replaced, but not before. Also, universal precautions in the use and sharing of the headsets should be followed.

- (j) If sound cues and audible information such as "beeps" are used, there must be simultaneous corresponding visual cues and information.
- (k) Controls and operable mechanisms must be operable with one hand, including operability with a closed fist, and operable without tight grasping, pinching, or twisting of the wrist.
- (l) The force required to operate or activate the controls must be no greater than 5 pounds of force.
- (m) Voting booths must have voting controls at a minimum height of 36 inches above the finished floor with a minimum knee clearance of 27 inches high, 30 inches wide, and 19 inches deep, or the accessible voter interface devices must be designed so as to allow their use on top of a table to meet these requirements. Tabletop installations must include adequate privacy.

3.3.2.7 Audio Ballots

Note: The functionalities required for the audio ballot may be satisfied by either the voting device or by the entire voting system.

- Complies with standards for electronic voter interfaces
- Controls are discernable tactically without actuating the controls
- Provide a voter operated volume control
- Method of voting complies with the following subsections of 101.56062(1)(m), F.S.
  - (1) After the initial instructions that the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.
  - (2) The voter must be able to determine the races that he or she is allowed to vote in and to determine which candidates are available in each race.
  - (3) The voter must be able to determine how many candidates may be selected in each race.
  - (4) The voter must be able to have confidence that the physical or vocal inputs given to the system have selected the candidates that he or she intended to select.
  - (5) The voter must be able to review the candidate selections that he or she has made.
  - (6) Prior to the act of casting the ballot, the voter must be able to change any selections previously made and confirm a new selection.
  - (7) The system must communicate to the voter the fact that the voter has failed to vote in a race or has failed to vote the number of allowable candidates in any race and require the voter to confirm his or her intent to undervote before casting the ballot.
  - (8) The system must prevent the voter from overvoting any race.
  - (9) The voter must be able to input a candidate's name in each race that allows a write-in candidate.
  - (10) The voter must be able to review his or her write-in input to the interface, edit that input, and confirm that the edits meet the voter's intent.
  - (11) There must be a clear, identifiable action that the voter takes to "cast" the ballot. The system must make clear to the voter how to take this action so that the voter has minimal risk of taking the action accidentally but, when the voter intends to cast the ballot, the action can be easily performed.
  - (12) Once the ballot is cast, the system must confirm to the voter that the action has occurred and that the voter's process of voting is complete.
  - (13) Once the ballot is cast, the system must preclude the voter from modifying the ballot cast or voting or casting another ballot.
"Amended 2007-08 Narrative after February 2, 2007"

A routine audit by the Auditor General of the State of Florida has determined that the State is short of the required Help America Vote Act (HAVA) state match by the above amount. The State referred to a U.S. Election Assistance Commission Office of the Inspector General Report on the Administration of HAVA payments by the Illinois State Board of Elections. The calculation methodology was different than that used by the State of Florida and included in the NAVA Planning Committee report, leaving the State short of the required match.

Florida calculated match based on multiplying the total of HAVA requirements by 5% and matching that amount. Below is a table detailing the correct calculation and showing the shortage.

DeForest B. Soaries, Jr., Chairman
Election Assistance Commission
1225 New York Avenue, N.W., Suite 1100
Washington, D.C. 20005

Dear Mr. Soaries:

As Chief Election Officer of the State, I am pleased to present the State of Florida’s HAVA Plan which has been revised for FY 2004. As indicated in the initial Plan submitted in 2003, Florida has already succeeded in meeting many of the requirements in HAVA. During Florida’s Fiscal Year 2003-04, a number of additional requirements were met including the development of performance goals and measures. These are reflected in the revised Plan.

Florida’s revised plan was developed through the Help America Vote Act Planning Committee, a group of dedicated individuals representing various constituency groups throughout the State. This Committee developed Florida’s original HAVA Plan and agreed to serve again in 2004. Although the Florida Department of State does not necessarily agree with all of the Committee’s recommendations and conclusions, I commend the Committee for its continuing hard work and diligence in developing revisions to the Plan.

The revised Plan recognizes that additional resources are required in order for our Supervisors of Elections to provide continuing voter education to the citizens of the State, to recruit qualified poll workers, and to provide the necessary training for those workers. As chief Election Officer, I am committed to working closely with and supporting our Supervisors as we continue to ensure Florida voters have every confidence that their vote counts.

We have accepted the Committee’s work without revision, however, we will revise and update the Plan as necessary to reflect the progress made in implementing HAVA and to chart the future goals and plans for elections. We look forward to continuing our election reform efforts to make this state the model for elections reform throughout the nation.

Sincerely,

Glenda E. Hood

Office of the Secretary

Introduction

Since the aftermath of the General Election of 2000, Florida has led the nation in its election reform efforts to ensure that every registered voter should have the opportunity to vote and to ensure that every vote counts.

The goal is perfection. Reaching that goal in an ever changing democracy and within a diverse population is an ongoing task that requires constant experimentation and learning. The people and the leadership of Florida have dedicated themselves to this course of action.

The struggle for improving our election process reveals itself in many ways. Citizens have increased their involvement by serving on local and State election task forces, researching new voting technologies, debating new standards for poll worker training, increasing voter education opportunities, and registering new voters. The people of Florida continue to make election reform a top priority.

The leadership of Florida has also acted decisively. Florida has enacted legislative and local reforms during the last two years that lead the nation. These reforms include cutting-edge voting system standards, millions of dollars for new voting technology, expanded voter education efforts, and thousands of newly trained poll workers. A statewide poll taken the day of the 2002 General Election found that Floridians gave high marks to the election reform changes including a 91% “excellent-good” rating for poll workers and an 88% confidence rating from voters that their votes will count. These results are not “perfect,” but Florida is moving in a positive direction to make all facets of the election process better each time an election is held.

With the passage and signing of the Help America Vote Act of 2002 (HAVA) on October 29, 2002, election reform will spread throughout the nation. The new federal law asks States to develop election reform plans that will improve election administration in many areas. Florida embraces the new federal law and hopes that other States will use it as an opportunity to share new election reform ideas and practices with one another.

The people of Florida have learned many things about election reform. Yet, there are enduring principles which are reflected within many recommendations and changes of Florida’s election reform efforts. These principles were developed by Florida’s first task force in the aftermath of the 2000 General Election:

Enduring Principles of Elections

- Elections are first and foremost acts of millions of individual people: citizens who register and vote; candidates who offer themselves and their platforms for public judgment; poll workers who put in long days at precincts; and election officials who
supervise the process. Honest, responsible, intelligent people will make most technology systems work well.

- Voting should be a simple, convenient and friendly process that encourages each citizen to express his or her choices.
- Voting systems should be designed to determine voter intent, to the extent that is humanly possible.
- Voting methods for statewide and national elections should meet uniform standards and national standards for fairness, reliability and equal protection of voting opportunity.
- Elections must meet two competing objectives: certainty (making every vote count accurately) and finality (ending elections so that governing can begin).
- While voting should be individual and private, procedures for counting and challenging votes should be open, transparent, and easily documented to ensure public confidence in the results.

Fulfilling the promises of these enduring principles will require continued vigilance and action. With this HAVA Plan, Florida continues its journey to mount an increasingly open and fair system of determining the will of the people.

The Help America Vote Act of 2002 requires all States to develop and implement a statewide plan. Listed below are the thirteen primary elements that must be addressed in the plan.

**Help America Vote Act of 2002 (HAVA)**

Public Law 107-252 – October 29, 2002

SEC. 254. STATE PLAN.

(a) IN GENERAL.—The State plan shall contain a description of each of the following:

**Element 1.**

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

**Element 2.**

How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Element 3.
How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Element 4.
How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

Element 5.
How the State will establish a fund described in subsection (b) for purposes of administering the State’s activities under this part, including information on fund management.

Element 6.
The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on —

A) The costs of the activities required to be carried out to meet the requirements of Title III;
B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
C) The portion of the requirements payment which will be used to carry out other activities.

Element 7.
How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Element 8.
How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.
Element 9.
A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Element 10.
If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Element 11.
How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change —
   A) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;
   B) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and
   C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Element 12.
In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Element 13.
A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.
Element 1. Use of Title III Requirements Payments:
   A. Voting Systems

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction
Following the 2000 General Election, the people of Florida made a concerted effort to improve all facets of its election procedures, standards and voting systems. The first major changes were the recommendations advanced by the 2001 Governor’s Select Task Force on Election Procedures, Standards and Technology followed by the passage of the Florida Election Reform Act of 2001. A central component of Florida’s new election law mandated the replacement of punch card voting systems, lever machines, paper ballots and central count optical scanning systems with precinct tabulated Marksense voting systems or the Direct Recording Electronic voting systems. The new voting systems were put into service to reduce voter error, to improve tabulation accuracy, and to restore voter confidence in Florida’s elections.

Florida has adopted voting system standards which meet and exceed standards established by the Federal Election Commission. Florida’s voting system standards are reviewed every two years to determine whether they are adequate and effective in carrying out fair and impartial elections. The Bureau of Voting Systems Certification within the Department of State has statutory authority to adopt rules which establish minimum standards for voting systems purchased and used in Florida. Florida’s 67 counties have authority to purchase and to maintain the appropriate certified voting system for their registered voters. Since 2001, the State of Florida has provided $24 million to assist counties in purchasing new certified voting systems.

Only two types of voting systems are certified for use in Florida’s 67 counties— Direct Recording Electronic (DRE or “touchscreen”) voting systems and Marksense with precinct-based tabulation.

There are three manufacturers who have certified voting systems for use in Florida: Diebold; Elections Systems and Software, Inc. (ES&S); and Sequoia Voting Systems, Inc. (SP). The Diebold system that has been certified by the State of Florida consists of a Global Election Management System Software (GEMS) Voting System consisting of GEMS, Release 1-18-19; one or more AccuVote TS R6 Touch Screen Ballot Station Version 4.3.15D (Windows CE 3.0) devices; one or more AccuVote-OS Optical Scan Tabulators with Firmware Version 1.94w and VLR firmware 13.9; Key Card Tool Version 1.0.1; Voter Card Encoder Version 1.3.2; and optionally one or more AccuFeed units, Revision D or E OS (optical scan) Firmware 1.94w.

The following chart details the types of voting systems used in Florida, the respective manufacturer, and the number of counties using the voting systems.

The Help America Vote Act of 2002 (HAVA) establishes new minimum requirements for administering federal elections. These new voting system requirements are found in Title III of the federal law. The new requirements shape the performance and the administration of voting systems. Florida is in compliance with many of these new federal directives and these are addressed in the HAVA State Plan.

Section 301(a) of HAVA requires that Florida’s voting systems meet the following requirements by January 1, 2006. Florida will be in compliance with all of these requirements by the federal deadline of January 1, 2006.
Section 301(a) Voting System Standards and Requirements

Section 301(a)(1)(A)(i): Do Florida’s voting systems permit the voter to verify in a private and independent manner the votes selected by the voter before the ballot is cast and counted?

Yes, and no further actions are required.
Section 101.5606(1), Florida Statutes, states that no voting system in Florida shall be approved by the Department of State unless it “permits and requires voting in secrecy.”

Florida Voting System Standards (April 2002) state that “the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection.” (p. 21)

Florida Voting System Standards (April 2002) state that the voting function standards applicable to all Electronic Voter Interfaces must provide “after the initial instructions, which the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.” (p. 20)

Section 301(a)(1)(A)(ii): Do Florida’s voting systems provide the voter with the opportunity in a private and independent manner to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct the error)?

Yes, and no further actions are required.
Section 101.5606(12), Florida Statutes, requires that electronic voting systems should “permit each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed.”

Section 101.5608(2)(b), Florida Statutes, requires that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, the ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide
instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in the envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Section 301(a)(1)(A)(iii): If the voter selects votes for more than one candidate for a single office, do Florida’s voting systems: (1) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (2) notify the voter before the ballot is cast and counted of the effect of casting the multiple votes for the office; and (3) provide the voter with the opportunity to correct the ballot before the ballot is cast?

Yes, and no further actions are required.

Section 101.5606(3), Florida Statutes, requires voting systems to immediately reject “a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.”

Section 101.5606(4), Florida Statutes, requires that systems using paper ballots accept a rejected ballot if the voter chooses to cast the ballot after it has been rejected, but the ballot will record no vote for any office that has been overvoted or undervoted.

Section 101.5608(2)(b), Florida Statutes, provides that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, a ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in an envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Florida Voting System Standards (April 2002) state that “the system must prevent the voter from over voting any race.” In addition, “there must be a clear, identifiable action, which the voter takes to ‘cast’ the ballot. The system must make clear to the voter how to take this action, such
that the voter has minimal risk of taking the action accidentally, but when the voter intends to
cast the ballot, the action can be easily performed.” (p. 21)

Florida Voting System Standards (April 2002) state that “Marksense systems shall reject blank
ballots and ballots with overvoted races. Electronic voter interfaces shall prevent a voter from
overvoting a race, and shall provide a means of indicating, to the voter, any races that may have
been undervoted before the last step necessary to cast the ballot.” (p. 22)

Section 301(a)(1)(B): Does Florida’s mail-in absentee and mail-in ballot process meet the
requirements of subparagraph (A)(iii) by: (i) establishing a voter education program
specific to that voting system that notifies each voter of the effect of casting multiple ballots
for an office; and (ii) providing the voter instructions on how to correct the ballot before it
is cast and counted (including instructions on how to correct the error through the issuance
of a replacement ballot if the voter was otherwise unable to change the ballot or correct any
error)?

Yes, and no further actions are required.

The Florida Legislature has amended Section 101.65, Florida Statutes, to require the instructions
for absentee voters to include the following language:

*Mark only the number of candidates or issue choices for a race as indicated on the ballot. If you
are allowed to “Vote for One” candidate and you vote for more than one candidate, your vote in
that race will not be counted.*

In addition, Rule 1S-2.032, Florida Administrative Code (F.A.C.), (Uniform and General
Election Ballot Design) instructs all voters on how to correct their ballots and how to request a
replacement ballot if the voter is unable to change or correct the original ballot.

Instructions on how to correct the error through issuance of a replacement ballot are:
*If you make a mistake, don’t hesitate to ask for a new ballot. If you erase or make other marks,
your vote may not count.*

The HAVA Planning Committee also suggested that absentee voters should be given clear
notification that the deadline for submitting absentee ballots is by 7:00 p.m. of election night and
that mailing the ballot may not ensure that it will arrive in time to be counted.
Section 301(a)(1)(C): Does Florida’s absentee and mail-in ballot process preserve the privacy of the voter and the confidentiality of the ballot?

Yes, and no further actions are required.
Section 101.65, Florida Statutes, requires supervisors of elections to enclose with each absentee ballot a separate printed instruction form, a secrecy envelope, a Voter’s Certificate and a mailing envelope. The instructions provide the following guidelines:

- Mark your ballot in secret as instructed on the ballot. You must mark your own ballot unless you are unable to do so because of blindness, disability, or inability to read or write.
- Place your ballot in the enclosed secrecy envelope.
- Insert your secrecy envelope into the enclosed mailing envelope which is addressed to the supervisor.

Section 101.68(2)(d), Florida Statutes, contains a detailed policy and procedure instructing the local canvassing boards in the manner of handling absentee ballots to ensure that the confidentiality of the ballot is maintained.

Section 301(a)(2)(A): Do Florida voting systems produce a record for audits?
Section 301(a)(2)(B): Do the voting systems produce a permanent paper record with a manual audit capacity?
Section 301(a)(2)(C): Is the paper record produced in subparagraph (A) available as an official record for any recount conducted with respect to any election in which the system is used?

Yes, and no further actions are required.
The HAVA Planning Committee determined through research conducted by staff, through testimony offered by Congressional staff, and through testimony given by staff from the Division of Elections that Florida complies with the HAVA audit requirement. Florida voting system standards require DRE machines to maintain a random sorted file of ballot images for every vote cast, and they also have to maintain detailed logs for each election from the time they are first programmed for an election until the results are copied to archival media. Certified voting systems in Florida are required to print out a paper tape of summary totals in each precinct. The paper record is produced to reconcile the consolidated totals for the county in the event of a recount.

Staff from the Division of Elections testified before the HAVA Planning Committee that Florida’s State and local security measures make it highly unlikely any tampering could take place with the voting systems. In addition, staff also testified that Florida’s certified voting...
systems are tested in public forums for logic and accuracy before the election. There are also thorough procedural and security controls in place at the local level to safeguard against someone tampering with the voting systems. The Division of Elections’ staff cited Rule 1S-2.015(5)(m)3.a., F. A. C., relating to minimum election security procedures which requires the “printing of precinct results and results from individual tabulating devices” for every election. In addition, the Florida Legislature has authorized the Department of State to promulgate rules which would require supervisors to check those paper totals against electronic totals during machine recounts. The following statutes and rules lay the groundwork for Florida’s ability to comply with the audit requirements of HAVA:

Section 101.015(5)(a), Florida Statutes, requires the Department of State to adopt rules which establish standards for voting systems, including audit capabilities.

Section 101.5606(11 & 13), Florida Statutes, requires the Department of State to approve only voting systems that are capable of automatically producing precinct totals in printed, marked, or punched form or a combination thereof. The voting systems must be capable of providing records from which the operating system of the voting system may be audited.

Florida Voting System Standards (April 2002) provide general functional requirements of voting systems which “shall include the capability to produce records, generated by the system components, or in some cases, by the system operators from which all operations may be audited. Except for the storage of vote images, which shall be maintained in a random sequence, the records shall be created and maintained in the sequence in which the operations were performed.” (pp. 16-17)

Florida Voting System Standards (April 2002) require precinct count systems to provide a means for obtaining a printed report of the votes counted on each voting device, and to provide a means for extracting this information to a transportable memory device or data storage medium. (p. 23)

Florida Voting System Standards (April 2002) require the generation of reports by the system to be performed in a manner which does not erase or destroy any ballot image, parameter, tabulation or audit log data. The system shall provide a means for assuring the maintenance of data integrity and security for a period of at least 22 months after the closing of the polls. (p. 24)

Section 102.166(5)(d), Florida Statutes, requires the Department of State to adopt detailed rules prescribing additional manual recount procedures for each certified voting system which shall be uniform to the extent practicable. The rules shall address, at a minimum, the following areas:

- Security of ballots during the recount process
- Time and place of recounts
- Public observance of recounts
• Objections to ballot determinations
• Record of recount proceedings
• Procedures relating to candidate and petitioner representatives

Section 301(a)(3)(A): Does Florida have certified voting systems for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters?

Section 301(a)(3)(B): Does Florida meet the requirement in subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place?

Partially meets, and further actions are required.
In 2001, the Secretary of State appointed a task force to conduct a comprehensive review of Florida’s election laws and procedures. The task force recommended legislation to insure that Florida’s voters with disabilities could fully exercise their right to a secret ballot, as guaranteed by Florida’s Constitution. Many of the recommendations of the task force were passed by the Legislature and signed into law by Governor Bush in 2002 and are found in Chapter 2002-281, Laws of Florida. Several sections of the law, including sections setting forth specific standards that voting systems must meet, did not become effective immediately, however. They were made contingent on further appropriations by the Legislature, in expectation of the receipt of federal funding as now provided in HAVA.

HAVA requires that all voting systems be accessible to persons with disabilities by January 1, 2006, but does not specifically define what is required to accomplish this. HAVA’s definition of what constitutes a voting system, however, found in Section 301(b), is comprehensive. Florida has already done the difficult and time consuming work of defining what makes a Florida voting system accessible for persons with disabilities and these standards are found in Chapter 2002-281, Laws of Florida. However, as noted above, many sections are not currently in effect. Some slight additional changes to Florida law will need to be made to include provisional ballots, which HAVA requires to be accessible, within Florida’s accessibility requirements.

Not only has Florida already enacted much of the required accessibility reforms required by HAVA, but the intent of the Legislature to comply fully with Federal requirements is clearly set out in statute. Section 101.56063, Florida Statutes, provides that:

It is the intent of the Legislature that this state be eligible for any funds that are available from the Federal Government to assist states in providing or improving accessibility of voting systems and polling places for persons having a disability. Accordingly, all state laws, rules, standards, and codes governing voting systems and polling place accessibility must be maintained to ensure the state's eligibility to receive federal funds. It is the intent
of the Legislature that all state requirements meet or exceed the minimum federal requirements for voting systems and polling place accessibility.

In addition to the above, Florida must take steps now in the certification and system procurement processes to insure that it is able to meet the HAVA requirements in time. HAVA requires that voting systems themselves, not just Florida law, must meet the accessibility requirements by January 1, 2006. The HAVA Planning Committee heard testimony from Division of Elections’ staff who cautioned that Florida cannot compel any voting systems vendor to bring equipment to the State for certification. Staff testimony further noted that the lack of available certifiable equipment has been a significant problem in the past that continues to the present. With the proper incentives for vendors and tools for counties to require compliance with accessibility standards, Florida will be able to comply with HAVA requirements by January 1, 2006.

Accordingly, the HAVA Planning Committee recommends that the Division, beginning immediately, require that all new certified voting systems comply with the requirements of Section 101.56062, Florida Statutes. Further, any purchase of a voting system by a governmental entity after July 1, 2004 should be required to include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes. Finally, all voting systems in use as of January 1, 2006, should be required to be both certified to meet, and be deployed in a configuration that meets, the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.

The Florida Legislature during the 2004 Session triggered the accessibility standards found in Chapter 2002-281 by making HAVA funds available to counties through the Department of State. The language is as follows:

From the funds in Specific Appropriation 2871I, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place.

The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place. No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State: 1) the number of precincts in the county; 2) the number of polling places in the county; 3) the number of voting machines the county has that meet the disability requirement; 4) the county’s plan for purchasing the DRE’s; and 5) the date that the county anticipates being in compliance. The Department of State will determine the number of DRE’s needed in each county based on the certifications provided by the supervisors of elections. Any county that receives funds from Specific Appropriation 2871I that is not in compliance with the accessibility requirements in Section 301(a)(3) Title III of the Help America Vote Act by January 1, 2006, shall be required to return those funds to the State.
The HAVA Planning Committee encourages the Legislature to continue to support accessible voting for persons with disabilities by mandating that provisional ballots for voters with disabilities shall be provided to them by a system that meets the requirements of Section 101.56062, *Florida Statutes*, by January 1, 2006.

The HAVA Planning Committee encourages the Legislature to continue to support accessible voting for persons with disabilities by enacting a HAVA Implementation Bill which immediately requires:

A. All electronic and electromechanical voting systems certified by the State must meet the requirements of Section 101.56062, *Florida Statutes*, (except subsection (1)(d), which is exempted in the statute);

B. Any purchase of a voting system by any county, municipality or by the State must include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, *Florida Statutes*; and

C. All electronic and electromechanical voting systems in use on or after January 1, 2006 must be certified to meet and be deployed in a configuration which meets the requirements of Section 101.56062 and Section 101.5606, *Florida Statutes*.

The HAVA Planning Committee also discussed polling place accessibility even though this topic is not required to be addressed in the HAVA plan. It was noted that the State of Florida has taken the initiative to contract with the Disability Relations Group to help it comply with HAVA. In addition, the Division of Elections has applied for polling place accessibility funding with the U.S. Department of Health and Human Services. The Division of Elections has been awarded two grants in the amount of $687,278 and of $492,941.

Several members of the HAVA Planning Committee also noted there is a sense of urgency to bring polling places into compliance. One Committee member referred to a recent United States Supreme Court decision that requires government to comply with the Americans With Disabilities Act. The HAVA Planning Committee recommended that the State of Florida address the polling place issue quickly by asking the Governor to provide emergency funding to bring polling places into ADA compliance.

**Section 301(a)(3)(C):** Will Florida purchase voting systems with funds made available under Title II on or after January 1, 2007, that meet the voting system standards for disability access (as outlined in this paragraph)?

Yes, and no further actions are required.
Element 1. Use of Title III Requirements Payments:
   B. Provisional Voting and Voting Information

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Section 302(a) Provisional Voting Requirements
The Help America Vote Act of 2002 (HAVA) requirements for provisional voting state that if an individual declares that he or she is a registered voter in the jurisdiction in which they are attempting to vote but their name does not appear on the official list of eligible voters, they are to be permitted to cast a provisional ballot.

Section 302(a)(1) Do Florida’s election laws require election officials at the polling place to notify individuals that they may cast a provisional ballot?

Yes, and no further actions are required.
Section 101.031(2), Florida Statutes, states that the supervisor of elections in each county shall have posted at each polling place in the county the Voter’s Bill of Rights and Responsibilities. Included in the Voter’s Bill of Rights is the right of each registered voter to cast a provisional ballot, if his or her registration is in question.

The Division of Elections’ Polling Place Procedures Manual instructs poll workers to read informational signs that appear in print on the walls of the polling place and to offer magnifying sheets for visually impaired voters.

In addition, modifications to Section 101.043(3), Florida Statutes, were included in Chapter 2003-415, Laws of Florida, which was effective January 1, 2004. This change provided that certain first-time voters would be allowed to vote a provisional ballot.

Section 302(a)(2) Do Florida’s election laws state that any person attempting to vote whose name does not appear on the official list of eligible voters be permitted to cast a provisional ballot at the polling place upon the execution of a written affirmation by the individual that they are: (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.

Yes, and no further actions are required.
Section 101.048(1), Florida Statutes, states that any voter claiming to be properly registered and eligible to vote, but whose eligibility cannot be determined, will be given a provisional ballot. A Provisional Ballot Voter’s Certificate and Affirmation must be completed by the individual casting a provisional ballot indicating that they are registered to vote and are a qualified voter of
the county in which they are attempting to vote, and that they have not previously voted in the
election.

In addition, according to Section 101.048(2), *Florida Statute*, if it is determined that the person
voting the provisional ballot was not registered or entitled to vote at the precinct where the
person cast a vote in the election, the provisional ballot shall not be counted and the ballot shall
remain in the envelope containing the Provisional Ballot Voter's Certificate and Affirmation and
the envelope shall be marked "Rejected as Illegal."

Currently, in Florida, in order for provisional ballots to count they must be cast in the precinct in
which the voter is registered. This means that votes for President, U.S. Senate or other statewide
officials such as Governor and Attorney General, would not be counted if a voter cast a
provisional ballot at a wrong precinct.

Under HAVA, Section 302 requires: If an individual states that [s/he] is a registered voter in the
jurisdiction in which the individual desires to vote and that the individual is eligible to vote in an
election for Federal office, but the name of the individual does not appear on the official list of
eligible voters for the polling place...such individual shall be permitted to cast a provisional
ballot...

(2) The individual shall be permitted to cast a provisional ballot at that polling place upon
the execution of a written affirmation ...stating that the individual is—

(A) a registered voter in the jurisdiction in which the individual desired to vote;

and

(B) eligible to vote in that election.

HAVA does not define jurisdiction, but the National Voter Rights Act (NVRA) defines
jurisdiction for federal purposes as the largest geographic area governed by a unit of government
(municipality or larger) that performs all the functions of a voting registrar. The HAVA
Planning Committee concludes that the provisional ballot set forth in HAVA reinforces
protections that the NVRA affords voters who move within the registrar's jurisdiction without
updating their registration information, the ability to vote. The HAVA Planning Committee
would like to offer Florida voters this same certainty and recommends to the Florida Legislature
that the meaning of the term "jurisdiction" in Florida Statutes be changed from "precinct" to
"county."

**Section 302(a)(3) Do Florida's election laws require a completed provisional ballot be
given to an appropriate State or local election official to determine whether the individual
is eligible under State law to vote?**

Yes, and no further actions are required.
Section 101.048(1), *Florida Statutes*, states that all provisional ballots are placed in a secrecy envelope and then sealed in a provisional ballot envelope. All provisional ballots shall remain sealed in their envelopes for return to the supervisor of elections.

Section 101.048(2)(a), *Florida Statutes*, states the county canvassing board shall examine each provisional ballot envelope to determine if the person voting that ballot was entitled to vote at the precinct where the person cast a vote in the election and that the person had not already cast a ballot in the election.

**Section 302(a)(4) Is the provisional ballot counted if the appropriate State or local election official determines the individual is eligible under State law to vote?**

Yes, and no further actions are required.

Section 101.048(2)(b)1, *Florida Statutes*, states that if it is determined that the person was registered and entitled to vote at the precinct where the person cast a ballot, the canvassing board will compare the signature on the provisional ballot envelope with the signature on the voter’s registration record and, if it matches, will count the ballot.

**Section 302(a)(5)(A) Are the individuals who cast a provisional ballot given written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if not, the reason that the vote was not counted?**

Yes, and no further actions are required.

Section 101.048(5)(6), *Florida Statutes*, provides that each person casting a provisional ballot shall be given written instructions and information on how to determine whether their vote was counted.

**Section 302(a)(5)(B) Has the appropriate State or local election official established a free access system to provide this information to individuals casting provisional ballots?**

Yes, and no further actions are required.

Section 101.048(5)(6), *Florida Statutes*, requires each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why.

Section 101.048, *Florida Statutes*, states:
(5) Each person casting a provisional ballot shall be given written instructions regarding the free access system established pursuant to subsection (6). The instructions shall contain information
on how to access the system and the information the voter will need to provide to obtain information on his or her particular ballot. The instructions shall also include the following statement: "If this is a primary election, you should contact the supervisor of elections’ office immediately to confirm that you are registered and can vote in the general election."

(6) Each supervisor of elections shall establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why. Information regarding provisional ballots shall be available no later than 30 days following the election. The system established must restrict information regarding an individual ballot to the person who cast the ballot.

It is recommended that each county, as a minimum, provide to voters who cast provisional ballots written notification by mail informing them of whether their ballot was counted and, if not, why it was not counted. Supervisors of elections are also strongly encouraged to develop a toll-free number or access to this information via the Internet.

Each supervisor of elections has established the free access system for their county.

Section 302(a)(5)(B) Has the appropriate State or local official established procedures to protect the security, confidentiality and integrity of the personal information collected and stored by the free access system, restricting access to the individual who cast the ballot?

Yes, and no further actions are required.

Section 101.048, Florida Statutes, requires the free access system established by the supervisors of elections to restrict access to information regarding an individual ballot to the person who cast the ballot.

Section 302(b) Voting Information Requirements
HAVA requirements for voting information state that the appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.

Section 302(b)(2)(A) Is a sample version of the ballot that will be used for that election posted?

Yes, and no further actions are required.

Section 101.20, Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. The sample ballots shall be in the form of the official ballot as it will appear at the polling place on election day. Sample ballots shall be open to inspection by all electors in any election.
Section 302(b)(2)(B) Is information regarding the date of the election and the hours during which polling places will be open posted on election day?

Yes, and no further actions are required.

Information such as the hours of operation of polling places and the date of the election are provided on instructional cards and sample ballots. Section 101.031, Florida Statutes, requires the Department of State, or in case of municipal elections the governing body of the municipality, to print, in large type on cards, instructions for the electors to use in voting. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

Currently, all cards that are posted in polling places include the hours the polls will be opened.

Section 101.20(1), Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. Sample ballots shall be open to inspection by all electors in any election, and a sufficient number of reduced-size ballots may be furnished to election officials so that one may be given to any elector desiring same.

Currently, all sample ballots posted in polling places include the date of the election.

Section 302(b)(2)(C) Are instructions on how to vote, including how to cast a vote and how to cast a provisional ballot posted on election day?

Yes, and no further actions are required.

Section 101.031, Florida Statutes, states the Department of State, or in case of municipal elections the governing body of the municipality, shall print, in large type on cards, instructions for the electors to use in voting. It shall provide not less than two cards for each voting precinct for each election and furnish such cards to each supervisor upon requisition. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

In addition, Section 101.5611, Florida Statutes, states the supervisor of elections shall provide instruction at each polling place regarding the manner of voting with the system. The supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction.
During the 2002 legislative session, Senate Bill 1350 was passed amending Section 97.026, Florida Statutes, and stated that all forms required to be used in chapters 97 through 106 shall be made available upon request, in alternative formats. Although this statute is not in effect during the development of this Plan, the Department produces forms in alternative formats upon request.

The Division of Elections has updated and reprinted the posters that provide instructions to voters which will be displayed at each polling place on election day. These posters have been distributed to all 67 counties. The posters have been updated to inform voters when they would need to vote a provisional ballot as well as providing instructions on how to cast a provisional ballot. A copy of each version of the poster (touch screen and optical scan) in English and Spanish is included in Appendices A-D. In Miami-Dade and Broward counties, the posters are printed in English, Spanish and Creole.

Included in the new instructions: If you need instructions on how to use the voting equipment ask a poll worker to assist you. After you have been given instructions, the officer assisting you will leave so that you can cast your vote in secret.

For touch screen systems: When you are finished voting your ballot, be sure to press the VOTE or CAST BALLOT button to cast your vote.

For optical scan systems: When you are finished marking you ballot, take your ballot and put it into the precinct tabulator.

If your eligibility is questioned or you are a first-time voter who registered by mail and do not have a photo ID, you will be allowed to vote a provisional ballot. Once you have marked this paper ballot, place it in the envelope provided to you and fill out the Voter’s Certificate on the back of the envelope. Your ballot will be presented to the County Canvassing Board for a determination as to whether your ballot will be counted.

Section 302(b)(2)(D) Are instructions for mail-in registrants and first-time voters under section 303(b) posted on election day?

Yes, and no further actions are required.

Under Section 101.031(1), Florida Statutes, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.
The Division of Elections has updated and reprinted the posters that provide instructions to voters and are displayed at each polling place on election day. These posters have been distributed to all 67 counties. The posters have been updated to include instructions for mail-in registrants and first-time voters. A copy of each version of the poster (touch screen and optical scan) in English and Spanish is included as Appendices A-D. In Miami-Dade and Broward counties, the posters are printed in English, Spanish and Creole.

The new instructions state: If you are a first-time voter who registered by mail and have not already provided identification to the supervisor of elections, you must provide a photo ID with signature. If you do not have the proper ID, you are allowed to vote a provisional ballot.

Section 302(b)(2)(E) Is general information on voting rights, including information on the right of an individual to cast a provisional ballot posted on election day?

Yes, and no further actions are required.

Section 101.031(2), Florida Statutes, requires the supervisor of elections in each county to have posted at each polling place the Voter’s Bill of Rights and Responsibilities. The Voter’s Bill of Rights states that each registered voter in this State has the right to:

1. Vote and have his or her vote accurately counted.
2. Cast a vote if he or she is in line at the official closing of the polls in that county.
3. Ask for and receive assistance in voting.
4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.
5. An explanation if his or her registration is in question.
6. If his or her registration is in question, cast a provisional ballot.
7. Prove his or her identity by signing an affidavit if election officials doubt the voter’s identity.
8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.
9. Vote free from coercion or intimidation by elections officers or any other person.
10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

Section 302(b)(2)(E) Is contact information posted for voters who allege their rights have been violated?

Yes, and no further actions are required.

Under Section 101.031(1), Florida Statutes, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information
about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.

The Division of Elections has updated and reprinted the Voter's Bill of Rights posters that provide voters with a list of their rights as registered voters. These posters are displayed at each polling place on election day and have been distributed to all 67 counties. The posters have been updated to provide voters with contact information if they believe their voting rights have been violated. A copy of the poster in English and Spanish is included as Appendices E and F. In Miami-Dade and Broward counties, the posters are printed in English, Spanish and Creole.

The specific instruction states: You may have other voting rights under state and federal laws. If you believe your voting rights have been violated, please contact Florida Department of State, Division of Elections, 1-877-868-3737.

In the next reprint of these posters, the Division of Elections will modify the instructions to indicate that the number to call (1-877-868-3737) is a toll-free number.

<table>
<thead>
<tr>
<th>Section 302(b)(2)(F) Is information on laws regarding prohibitions on acts of fraud and misrepresentation posted?</th>
</tr>
</thead>
</table>

Yes, and no further actions are required.

Section 101.5611(2), Florida Statutes, requires the supervisor of elections to have posted at each polling place a notice that reads: “A person who commits or attempts to commit any fraud in connection with voting, votes a fraudulent ballot, or votes more than once in an election can be convicted of a felony of the third degree and fined up to $5,000 and/or imprisoned for up to 5 years.”

<table>
<thead>
<tr>
<th>Section 302(c) Are individuals who vote in an election as a result of a court order or any other order extending the time established for closing the polls by a State law required to cast a provisional ballot? This provisional ballot must be separated and held apart from other provisional ballots cast by those not affected by the order.</th>
</tr>
</thead>
</table>

Yes, and no further actions are required.

Section 101.049, Florida Statutes, permits, under special circumstances, any person voting in an election after the regular poll-closing time pursuant to a court or other order extending the statutory polling hours to vote a provisional ballot. Once voted, the provisional ballot shall be placed in a secrecy envelope and sealed in a provisional ballot envelope. All such provisional ballots will remain sealed and transmitted to the supervisor of elections separate and apart from all other ballots. The supervisor shall ensure that late-voted provisional ballots are not commingled with other ballots.
Section 302(d) The effective date for complying with the Provisional Voting and Voting Information requirements is on and after January 1, 2004.

The Provisional Voting and Voting Information Requirements was completed as required by HAVA on January 1, 2004.
Element 1. Use of Title III Requirements Payments:

C. Voter Registration

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction
The Help America Vote Act of 2002 (HAVA) establishes minimum requirements for a single, centralized, computerized statewide voter registration list and for mail registration as a part of establishing and maintaining such a list.

The effective and efficient administration of elections depends in a major way on the completeness and accuracy of voter registration lists that can be checked quickly and reliably by election workers. Section 303(a) of HAVA establishes minimum requirements for a “single, uniform, official, centralized, interactive, computerized, statewide voter registration list which shall be the single system for storing and managing the list of registered voters throughout the state for the conduct of all federal elections.”

Because many voters register by mail instead of in person, the procedures used for mail registration are an important component of establishing and maintaining a complete and accurate statewide voter registration list. Section 303(b) of HAVA requires that a state’s mail voter registration system be administered in a “uniform and nondiscriminatory manner” and establishes minimum requirements for such a system.

Until recently, Florida’s voters have relied primarily on voter registration lists established and maintained by independent supervisors of elections in each of Florida’s 67 counties. These lists are governed by Florida law that specifies qualifications to register or vote, a registration oath, a uniform statewide registration application form, acceptance of applications by supervisors of elections, closing of registration books, late registration, declinations to register, special registration for electors requiring assistance, registration identification card, disposition of applications and procedures for cancellation, notices of changes of address, and operation of registration offices. See Sections 97.032 through 97.055, 97.0585 through 97.105, 98.015 through 98.095, and 98.101 through 98.491, Florida Statutes.

Additional requirements for establishing and maintaining voter registration lists were enacted in the Federal Voting Rights Act of 1965 and the National Voter Registration Act of 1993 (“Motor Voter Law”). Sections 97.057 through 97.0583, Florida Statutes, and other provisions of Florida

1 A permanent single voter registration system for each Florida county, used for all public elections in that county, improved on practices in early Florida history of requiring separate registrations for municipal elections and new registrations for each new election. See Section 97.105, Florida Statutes.
law implemented those Federal laws in the State by providing for registration of voters by the Department of Highway Safety and Motor Vehicles, voter registration agencies, and qualifying educational institutions.

In 1997, the Florida Legislature established a “central voter file” in the Division of Elections that contained voter registration information from all counties. Section 98.097, Florida Statutes.

Following the 2000 General Election, the Florida Legislature enacted the Florida Election Reform Act of 2001 that took additional steps to require complete and accurate voter registration lists in the counties and to establish a statewide voter registration database. Sections 98.0977 through 98.0979, Florida Statutes, authorized the Department of State to “…analyze, design, develop, operate, and maintain a statewide, on-line voter registration database and associated website, to be fully operational statewide by June 1, 2002. The database shall contain voter registration information from each of the 67 supervisors of elections in this state and shall be accessible through an Internet website. The system shall provide functionality for ensuring that the database is updated on a daily basis to determine if a registered voter is ineligible to vote for any of the following reasons, including, but not limited to:

(a) The voter is deceased;

(b) The voter has been convicted of a felony and has not had his or her civil rights restored; or

(c) The voter has been adjudicated mentally incompetent and his or her mental capacity with respect to voting has not been restored.

The database shall also allow for duplicate voter registrations to be identified.”

This statewide database was established in time for use in the 2002 General Elections. Requirements for pre-clearance by the U.S. Department of Justice (DOJ) and negotiations for settlement of a lawsuit by the NAACP delayed use of parts of the database concerning eligibility of voters identified as potentially ineligible because of a felony conviction or adjudication of mental incapacity. With the receipt of DOJ clearance and settlement of the lawsuit now accomplished, the Division of Elections has begun running matches.

---

2 A “voter registration agency” is defined by Section 97.012(37), Florida Statutes, as “…any office that provides public assistance, any office that serves persons with disabilities, any center for independent living, or any public library.”
Section 303(a) Computerized Statewide Voter Registration List Requirements

Section 303(a)(1)(A)(i)-(vii) and 303(a)(2): Does Florida’s existing statewide database meet requirements for implementing and maintaining a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State and includes information specified in HAVA?

No, and further actions are required.

Florida has made great strides in recent years in establishing a centralized, computerized statewide voter registration database but that database does not meet the requirements of HAVA Section 303(a)(1)(A) for a single statewide voter registration list “...defined, maintained, and administered at the State level...[with] a unique identifier [assigned] to each legally registered voter in the State...” which serves, under HAVA Section 303(a)(1)(A)(vii), as “…the official voter registration list for the conduct of all elections for Federal office in the State.” HAVA Section 303(a)(1)(A)(i) further defines this requirement by specifying that “The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.” HAVA Section 303(a)(1)(A) also specifies that the chief State election official (in Florida the Secretary of State) shall implement and maintain the single statewide voter registration list.

Florida currently has 67 official voter registration lists, one established and maintained in each county, that are compiled into the statewide voter registration database required by the Florida Election Reform Act of 2001. The 67 county-based lists, not the statewide database, are the official voter registration lists for voters in Florida. The statewide database is intended primarily to assist supervisors of elections to determine if voters are ineligible to vote (deceased, convicted felons who have not had civil rights restored, or adjudicated as mentally incompetent). It also is intended to identify those voters who are listed more than once. It is not intended to serve as “…the single system for storing and managing the official list of registered voters throughout the State...” as required by HAVA. Information in the statewide database is made available to county supervisors of elections who are responsible for making final determinations of a voter’s eligibility and for updating voter registration records.

HAVA’s requirement for a single computerized statewide voter registration list cannot be fulfilled quickly. In addition to designing and implementing such a single system that is interactive and assigns unique identifiers to each voter, HAVA requires the system to have adequate technological security measures [HAVA Section 303(a)(3)], meet minimum standards of accuracy and currency [HAVA Section 303(a)(4)], provide for verification with other information such as driver’s license numbers and Social Security numbers [HAVA Section 303(a)(5)], and meet other standards. Meeting these requirements and standards will take time, expertise and money.
The Legislature appropriated $1.6 million and nine staff positions to create a master design, including a business plan and budget, for a single statewide voter registration system by January 2004. This design permitted the 2004 Legislature to take action to authorize the implementation of a new single computerized statewide voter registration list in time for the 2006 elections. The State of Florida was granted a waiver under HAVA to have a single statewide voter registration system in place by January 1, 2006, instead of the existing deadline of January 1, 2004. (The requirement for a waiver is discussed subsequently.)

Chapter 2003-415, Laws of Florida, authorizes the State to request the Federal Election Assistance Commission to grant a waiver from the January 1, 2004, HAVA deadline. The 2003 Appropriations bill authorizes the funding and staffing positions requested by the Division of Elections.

The Division of Elections has been meeting with representatives of the Florida State Association of Supervisors of Elections, the Department of Highway Safety and Motor Vehicles, the Department of Law Enforcement, the Board of Executive Clemency, the State Technology Office and health officials to begin to find ways to coordinate databases maintained by those agencies as part of the single centralized statewide voter registration list. Because HAVA Sections 303(a)(5)(A)(i)(I) and (II) require an applicant for voter registration to provide either a current and valid driver’s license number or supply the last four digits of the applicant’s Social Security number, HAVA Sections 303(a)(5)(B)(i)-(ii) require that the State enter into agreements to share such information with the Department of Highway Safety and Motor Vehicles and with the Social Security Administration.

HAVA’s requirements are minimum requirements. Florida may establish technology and administrative requirements that are stricter than the Federal requirements as long as they are not inconsistent with HAVA’s requirements and other laws, such as the Motor Voter Act, or in conflict with the privacy provisions of the Florida Constitution. See HAVA Section 304.

Florida Voter Registration System - Proposed System Design and Requirements

Strategy to Develop and Implement
The Florida Legislature has directed the Department of State to begin development of a statewide voter registration system that meets the requirements of HAVA. Accordingly, the 2003 Legislature provided $1.6 million to begin implementation of the system. Funds include $1 million for the Needs Assessment Phase along with nine positions to support design, development and implementation of the HAVA requirements. Of the nine positions, five reside in the Department of State and two each in the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement.

The Division of Elections has been tasked with the responsibility to develop specifications for design and implementation of the Florida Voter Registration System (FVRS). The Division of
Elections has allocated one of the five HAVA-funded positions for a project manager tasked with the responsibility to direct and coordinate development of a comprehensive set of functional requirements, design specifications and preparation of progress reports. The Business Owner of the FVRS is the Director of the Division of Elections and the Project Sponsor is the Florida Secretary of State. The Project Director, Project Executive and Project Administrator are all Division of Elections staff.

The project team has taken every effort to identify alternative approaches to development of the FVRS and assess the relative merits of each approach. Visits to, and interviews with, other states with centralized voter registration have provided insight into the technical, administrative and political systems necessary for successful implementation. Interviews with election officials in other states that are in more advanced stages of meeting HAVA requirements have contributed much to identify the best practices approach.

The project team has also relied heavily on input from the supervisors of elections, their staff and vendors of voter registration systems currently in use throughout the State. A committee drawn from the 67 supervisors of elections was appointed to work with the project team. Additionally, a series of technical workgroups was established to identify issues and assess alternatives in a number of specific areas including:
• maintenance of address systems;
• interfacing of local voter registration systems;
• document and contract management;
• petitions;
• polling place activities;
• security; and
• statutory and legal issues.

The table below provides a proposed project schedule.

Section 303(d) Deadlines for Computerized Statewide Voter Registration List

Section 303(d)(1)(A): Can Florida meet HAVA’s requirement to have operational a computerized statewide voter registration list, as defined by HAVA, by January 1, 2004?

No, and further actions are required.
The State practically could not meet the January 1, 2004 deadline. Substantial professional and technical work must be done to design and establish a computerized statewide voter registration list that meets HAVA’s standards. Chapter 2003-415, Laws of Florida, authorizes the State to seek a waiver from the Federal Election Assistance Commission permitted under HAVA Section 303(d)(1)(B) from January 1, 2004, to January 1, 2006, if the State “…will not meet the deadline…for good cause and includes in the certification the reasons for the failure to meet such deadline.”

The Florida Division of Elections has filed with the Federal Election Assistance Commission the appropriate waiver seeking an extension for the development and implementation of the Computerized Statewide Voter Registration list from January 1, 2004 to January 1, 2006. A copy of this letter is included as Appendix G.

Section 303(b) Requirements for Voters Who Register By Mail

Section 303(b)(1) through (4): Does Florida meet HAVA’s identification requirements for a voter who registers by mail and has not previously voted in an election for Federal office in the State or registers by mail, has not previously voted in the jurisdiction and is in a State that does not have a computerized statewide voter list that meets HAVA’s requirements?

Yes, and no further actions are required.
HAVA requires persons who register by mail and have not voted in an election for federal office to provide identification prior to voting. If the State is able to match the voter’s driver’s license number or Social Security number against an existing State record bearing the same number, name and date of birth, further identification by the voter is not required.

HAVA Sections 303(b)(2)(i) through (ii) require that a first-time voter who votes in person may be identified by a current and valid photo identification or a copy of a current utility bill, bank statement, government check, paycheck, or other government document that shows the name and address of the voter. A voter who votes by mail may include with the ballot a copy of a current and valid photo identification or a copy of the other documents listed for the voter who appears in person. An exception is made in HAVA Section 303(b)(3) for mail registrants who provide a copy of required identification at the time of registering, mail registrants whose driver’s license number or last 4 digits of the Social Security number are matched with an existing State record, and for those who vote under the Uniformed and Overseas Citizens Absentee Voting Act, the
Voting Accessibility for the Elderly and Handicapped Act, or under some other provision of Federal law (in which case the specific standards of those acts must be met).

Chapter 2003-415, Laws of Florida, amends the following sections of Florida law to conform to HAVA’s mail registration and other voter registration requirements:

Section 97.052(3)(g), Florida Statutes, to require a statement with the uniform statewide voter registration form that informs the applicant that if the form is submitted by mail and the applicant is registering for the first time, the applicant will be required to provide identification prior to voting for the first time.

Section 97.053(5)(a), Florida Statutes, that permits the use of a valid Florida driver’s license number or the identification number from a Florida identification card issued under Section 322.051, Florida Statutes, for purposes of voter registration.

Section 97.0535, Florida Statutes, that specifies at length the requirements for identification that a first-time voter can use and that complies with other HAVA requirements outlined previously.

Section 101.043, Florida Statutes, (a transfer and renumbering of Section 98.471, Florida Statutes) to permit a voter to submit to a poll worker at the time of voting a current and valid picture identification with a signature.

Section 303(b)(4): Does Florida meet HAVA’s requirement for language in the mail voter registration form under Section 6 of the National Voter Registration Act of 1993?

Yes, and no further actions are required.

HAVA requires that mail voter registration forms under Section 6 the National Voter Registration Act shall include the following:

“(i) The question ‘Are you a citizen of the United States of America?’ and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.

(ii) The question ‘Will you be 18 years of age on or before election day?’ and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.

(iii) The statement ‘If you checked ‘no’ in response to either of these questions, do not complete this form.’

(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.”
Section 97.052(2)(b) and (r), Florida Statutes, requires that the uniform statewide voter registration form must be designed to elicit information from the applicant about the applicant’s date of birth and whether the applicant is a citizen of the United States. The form itself, available on the Division of Elections’ website at http://election.dos.state.fl.us, asks for date of birth and asks “Are you a U.S. citizen?” It does not use the specific language required by HAVA.

Chapter 2003-415, Laws of Florida, amends Section 97.052, Florida Statutes, by adding subsection (g) that requires language about the need for appropriate identification for first time mail applications. It does not require the specific HAVA language about age and citizenship.

The Division of Elections has reviewed this matter orally with Federal legislative and executive representatives and has concluded that the requirement applies only to Federal applications under Section 6 of the National Voter Registration Act. It believes that putting such language on State application forms will confuse voters and discourage first-time registrants. The age question, for instance, does not specify the exact election day to which it is referring and assumes that young voters may be applying to register for a specific election rather than pre-registering as 17 year-olds in order to vote in all elections after they reach the age of 18. The Division notes that the forms used by Florida already elicit the information required by asking for date of birth and citizenship. The forms do not discourage voters by telling them to stop with the application if they must answer “No” to either question. The Division is complying with the substance of HAVA if not with the exact form of the question.
Element 2. Local Government Payments and Activities

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Introduction

The Florida Legislature has broad constitutional authority for appropriating federal and State funds annually through the appropriations bill which is eventually signed by the Governor into law. During the annual appropriations process, the Florida Legislature assesses the needs of the State and makes policy and budget decisions which impact every level of government including local government.

The funding of elections in Florida is primarily a local government responsibility since the constitutional authority for running elections rests with the local supervisor of elections. Funding authority for elections resides with the Boards of County Commissioners. Each of Florida’s 67 Boards of County Commissioners receives a budget request from the supervisor of elections and then the Board makes policy and budget decisions based upon county priorities.

There has been one major exception to this election funding scenario. Following the controversial 2000 General Election, the Governor and the citizens of Florida asked the Legislature to enact broad election reforms which included providing State financial assistance to local governments. Over a two-year period, the Legislature provided over $32 million in State funds to supplement local election budgets and to quicken the pace of election reform in Florida. Most of the State funds were appropriated to the Boards of County Commissioners using two different formulas for accomplishing distinct policy goals—to replace voting systems designated to be decertified and to enact comprehensive voter education programs in every county.

The funding formula used to upgrade voting systems had two important policy goals—to provide a minimum voting system standard of precinct-based optical scanning systems throughout Florida and to provide funding assistance to small counties with very small tax bases. The resulting formula achieved that policy goal and was as follows:
- Small Counties (population 75,000 or below) received $7,500/precinct
- Large Counties (population 75,001 and above) received $3,750/precinct

The Legislature used a different formula to provide State funds for voter education and poll worker recruitment and training. This formula was based upon taking available State funds and distributing them on a per registered voter basis per county. The resulting formula was determined by taking approximately $6,000,000 in available State funds and dividing it by the number of registered voters during the 2000 General Election and appropriating that money on a pro-rata basis to each county. The resulting appropriation provided $5,949,375 to counties to fund comprehensive voter education programs and poll worker recruitment and training programs. The combined State and local efforts led to greater voter satisfaction during the 2002 General Election.

Pursuant to the appropriation, the Florida Legislature required each county supervisor of elections to submit a detailed description of the plans to be implemented and also a detailed report on the success of the voter education effort. These reports were sent to the Division of Elections and subsequently compiled by the Division into a report sent to the Governor and Florida Legislature.

While the State funds were widely valued, the counties still provided a majority of funding for election reform efforts. According to the 2002 Governor's Select Task Force on Election Procedures, Standards and Technology, a survey of 33 county governments revealed they spent nearly $110 million toward new voting systems before the 2002 primary and general elections.

If the Florida Legislature determines that it will provide funding for units of local governments and other entities, then how will the requirements payments be distributed and monitored, including—

A. A description of the criteria used to determine the eligibility of such units and entities for receiving payment.

B. A description of the methods to be used by Florida to monitor the performance of the units of entities to whom the payments is distributed, consistent with the performance goals and measures adopted under paragraph (8).

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. During HAVA Planning Committee discussions, members proposed several recommendations that would provide funding for units of local government. The recommended payments to local government are listed below:
Replacement and Reimbursement for Punch Card And Lever Machines
The HAVA Planning Committee recommended that the estimated $11.74 million received pursuant to Section 102 of HAVA be distributed by the Florida Legislature to the State and to the counties on a pro-rated basis for their respective contributions to replace punch cards and lever machines during the 2001-2002 and 2002-2003 fiscal years.3

The Florida Legislature acted in 2003 to distribute Section 102 federal funds in the amount of $11,581,377 to the State of Florida and not the counties. The $11,581,377 reimbursement is almost one-half the amount the State of Florida invested to replace outdated voting machines between 2001 and 2003.

Accessible Voting Systems for Voters with Disabilities
The HAVA Planning Committee recommended that HAVA funds should be distributed to counties during the 2004-2005 fiscal year to help them meet Section 301 Title III accessibility requirements by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of machines accessible for persons with disabilities needed for each county to have one per polling place. The Division of Elections would have the responsibility for determining eligibility of counties receiving HAVA funds.

Secondly, if HAVA funds are available, the HAVA Planning Committee recommends that HAVA funds be distributed as a reimbursement on a pro-rated basis to local governments that purchased accessible voting systems and components during the 2001 and 2002 fiscal years.

The 2004 Legislature provided the following in the 2004 General Appropriations Act:
From the funds in Specific Appropriation 2871I, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place.

No supervisor of elections shall receive any funds until the county supervisor of elections certifies to the Department of State:
1) the number of precincts in the county;
2) the number of polling places in the county;
3) the number of voting machines the county has that meet the disability requirement;
4) the county’s plan for purchasing the DRE’s; and
5) the date that the county anticipates being in compliance.

3 The 2003 General Appropriations Act passed by the Legislature required the Department of State to transfer all amounts eligible for reimbursement under Section 102 of HAVA to the State’s Working Capital Fund.
Statewide Voter Education Program
For FY 2003-2004, $2,976,755 was appropriated and available to each county for voter education programs. From funds in Specific Appropriation 2871I for FY 2004-2005, $3,000,000 shall be distributed to county supervisors of elections for the following purposes relating to voter education: mailing or publishing sample ballots; conducting activities pursuant to the Standards for Nonpartisan Voter Education as provided in Rule 1S-2.033, F.A.C.; print, radio, or television advertising to voters; and other innovative voter education programs, as approved by the Department of State. No supervisor of elections shall receive any funds until the county supervisor of elections provides to the Department of State a detailed description of the voter-education programs, such as those described above, to be implemented. The HAVA Planning Committee also recommends that local governments receive $3,000,000 for comprehensive voter education efforts in FY 2005-2006.

In FY 2003-2004, distribution was based on a funding level per individual voter multiplied by the number of registered voters in each county for the 2002 General Election. To determine the funding level per individual voter, the Division of Elections divided the total amount of funds appropriated in FY 2003-2004 by the total number of registered voters in the State of Florida for the 2002 General Election.

In FY 2004-2005, the Department shall distribute an amount to each eligible supervisor of elections equal to the funding level per voter multiplied by the number of registered voters in the county for the 2004 Presidential Preference Primary. The Department shall determine the funding level per voters in the state for the 2004 Presidential Preference Primary.

In order for a county supervisor of elections to be eligible to receive state funding for voter education, the county must certify to the Division of Elections that the county will provide matching funds for voter education in the amount equal to fifteen percent of the amount to be received from the state. Additionally, to be eligible, a county must segregate state voter education distributions and required county matching dollars in a separate account established to hold only such funds. Funds in this account must be used only for the activities for which the funds were received. Any funds remaining in the fund at the end of the fiscal year shall remain in the account to be used for the same purposes for subsequent years or until such funds are expended.

Through the 2005-2006 fiscal years, the HAVA Planning Committee recommends that local governments receive a total of $9 million dollars ($3 million each fiscal year) for comprehensive voter education efforts. HAVA funds for voter education should be distributed using a similar formula as used in 2003-2004. The Division of Elections should be responsible for determining eligibility of any county for the receipt of State or federal funds used in HAVA election reform activities.
The Division of Elections will monitor the performance of the contract agreements entered into between the State and each county, in accordance with State procedures. Each county must meet the contractual requirements before payment is approved.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures may include random program audits by the Department of State’s Inspector General as well as an annual audit by the Florida Auditor General’s office to ensure funds are being expended for the authorized purposes.

Payments to Other State Entities
Through the 2005-2006 fiscal years, the Division of Elections recommends that the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement receive HAVA funding to assist in the development of the new statewide voter registration system. The Division of Elections will enter into a contractual agreement with these other state-level departments and monitor the contracts in accordance with standard auditing procedures for monitoring the use of federal funds.
Element 3. Voter Education, Election Official Education & Training, Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Introduction

A wide array of national and State task force reports have highlighted the need for a more informed electorate. To achieve this goal, voters, election officials, and poll workers must receive better information and training. Florida assigns the primary responsibility for these daunting tasks to the Department of State and the county supervisors of elections. Following election 2000, the Legislature has more clearly delineated the role of each in improving the education of voters, election officials, and poll workers.

The Florida Election Reform Act of 2001 set deadlines, included a wide array of topics to be addressed by State and county election officials, granted rule making authority to the Department of State, and established a procedure for measuring the effectiveness of the programs and making recommendations to the Governor and the State Legislature. Various acts passed during the 2002 legislative session broaden the scope of voter education responsibilities, more definitively spell out voter rights, and ensure that Florida’s electoral system conforms to the Americans with Disabilities Act of 1990. Each of these changes has been communicated to election officials at all levels and to the public at-large.

The Election Reform Act of 2001 required all 67 county supervisors of elections to file voter education plans with the Division of Elections in the Department of State in order to qualify for State funds. (The Act appropriated nearly $6 million for voter education in fiscal year 2001-2002 in addition to $24 million for purchase of new voting equipment, fiscal years 2001-2003.) The Department of State, as directed by the Legislature, established minimum standards for nonpartisan voter education to be met by each county.

Legislation passed during the 2003 and 2004 sessions also required all 67 county supervisors of elections to file “a detailed description of the voter-education programs” in order to receive state funds in FY 2003-2004 and FY 2004-2005. The legislation spells out four broad categories of voter education for which these funds may be used: mailing or publishing sample ballots; conducting activities described in the Standards for Nonpartisan Voter Education provided in Rule 1S-2.0333, F.A.C.; for print, radio, or television advertising to voters; and for other innovative voter education programs, as approved by the Department of State. An analysis of the FY 2003-2004 county plans shows that most are using their funds for a variety of activities:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Percentage</th>
</tr>
</thead>
<tbody>
<tr>
<td>Sample Ballots</td>
<td>91%</td>
</tr>
<tr>
<td>Nonpartisan Voter Education</td>
<td>82%</td>
</tr>
</tbody>
</table>
County voter education plans filed with the Division of Elections in the Secretary of State’s office are filled with creative approaches. These outreach mechanisms are designed by the elections supervisors to:

1. Better inform their county’s residents about registration and voting; and,
2. Reduce the levels of voter error and confusion that existed during the 2000 election cycle.

The approaches used by the 67 individual counties vary considerably, reflecting differences in their demographic and socioeconomic composition (e.g., population size, land area, rural-urban location, age, race/ethnicity, education), county funding levels, and media availability.

For example, small counties (under 100,000) are more likely than larger ones to use their FY 2003-2004 voter education funds for the basics—printing and mailing sample ballots, mailing voter guides, and notifying voters of changes in precinct locations. Larger counties (100,000+) are more likely than smaller ones to spend their funds on radio and television advertising, supervisor participation in media programs and events, targeting college students, voter registration workshops, demonstrating voting equipment, and innovative programs.

Significant changes to Florida’s election laws and the advent of new voting equipment have made poll worker education a high priority—as recognized in the Florida Election Reform Act of 2001. Florida’s counties have restructured their poll worker training programs. State law now requires supervisors of elections to cast their poll worker recruitment nets wider, as the number of poll workers needed escalates in a fast-growing state.

Section 254(a)(3). How will the State of Florida provide for programs for voter education which will assist the State in meeting the requirements of Title III?

Joint Responsibilities of Department of State and County Supervisors of Elections
Voter education in Florida is a joint responsibility of the Department of State and the 67 county supervisors of elections. Both levels of government play a role in designing, implementing, and evaluating voter education activities. Both must constantly react to election-related legislation passed by the Florida Legislature.
Section 98.255(1), Florida Statutes, directed the Department of State to “adopt rules prescribing minimum standards for nonpartisan voter education” by March 1, 2002. The standards were to address (but were not limited to):

(1) voter education;
(2) balloting procedures for absentee and polling place;
(3) voter rights and responsibilities;
(4) distribution of sample ballots; and,
(5) public service announcements.

In developing the rules, the Department was instructed to “review current voter education programs within each county of the state.” The Department of State adopted Rule 1S-2.033, F.A.C., Standards for Nonpartisan Voter Education on May 30, 2002.

Section 98.255(2), Florida Statutes, requires each supervisor of elections to “implement the minimum voter education standards” and “to conduct additional nonpartisan education efforts as necessary to ensure that voters have a working knowledge of the voting process.”

**Minimum Nonpartisan Voter Education Standards**

The Department of State’s “Standards for Nonpartisan Voter Education,” Rule 1S-2.033, F.A.C., requires the following voter education practices by county supervisors of elections:

**Comprehensive Voter Guide: Contents**

Department of State Rule 1S-2.033, F.A.C., Standards for Nonpartisan Voter Education, requires supervisors of elections to create a Voter Guide which shall include: how to register to vote; where voter registration applications are available; how to register by mail; dates for upcoming elections; registration deadlines for the next primary and general election; how voters should update their voter registration information such as changes in name, address or party affiliation; information on how to obtain, vote and return an absentee ballot; voters’ rights and responsibilities pursuant to Section 101.031, Florida Statutes; polling information including what times the polls are open, what to bring to the polls, list of acceptable IDs, what to expect at the polls; instructions on the county’s particular voting system; supervisor contact information; and any other information the supervisor deems important.

**Voter Guide: Extensive Distribution**

Department of State Rule 1S-2.033(1)(b), F.A.C., requires supervisors of elections to “provide the Voter Guide at as many places as possible within the county including: agencies designated as voter registration sites pursuant to the National Voter Registration Act; the supervisor’s office; public libraries; community centers; post offices; centers for independent living; county governmental offices; and at all registration drives conducted by the supervisor of elections.”
Voter Guide, Sample Ballot, & Website Consistency Required
Department of State Rule 1S-2.033(2), F.A.C., states that: “If a supervisor has a website, it must take into account all of the information that is required to be included in the Voter Guide. In addition, when a sample ballot is available, the website must provide either information on how to obtain a sample ballot or a direct hyperlink to a sample ballot.”

Targeted Voter Education: High School Students
Florida’s Department of State Rule 1S-2.033(3), F.A.C., instructs the supervisors of elections to work with county school boards to develop voter education and registration programs for high school students. Specifically, the rule requires that “At least once a year in each public high school in the county, the supervisor shall conduct a high school voter registration/education program. The program must be developed in cooperation with the local school board and be designed for maximum effectiveness in reaching and educating high school students.”

Targeted Voter Education: College Students
Florida’s Department of State Rule 1S-2.033(4), F.A.C., dictates that “At least once a year on each college campus in the county, the supervisor shall provide a college registration/education program. This program must be designed for maximum effectiveness in reaching and educating college students.”

Targeted Voter Education: Senior Citizens and Minority Groups
Department of State Rule 1S-2.033(7), F.A.C., requires supervisors of elections to “conduct demonstrations of the county’s voting equipment in community centers, senior citizen residences, and to various community groups, including minority groups.” Rule 1S-2.033(8), F.A.C., specifically instructs the supervisors to use minority media outlets to provide more information to voters.

Targeted Voter Education: Individuals and Groups Sponsoring Voter Registration Drives
Department of State Rule 1S-2.033(6), F.A.C., specifically instructs supervisors of elections to “provide, upon reasonable request and notice, voter registration workshops for individuals and organizations sponsoring voter registration drives.” Section 98.015(9), Florida Statutes, states that “each supervisor must make training in the proper implementation of voter registration procedures available to any individual, group, center for independent living, or public library in the supervisor’s county.”

Posting of Educational Materials on Voter Rights and Responsibilities
Department of State Rule 1S-2.033(5), F.A.C., requires supervisors of elections to “post the listing of the voters’ rights and responsibilities pursuant to Section 101.031, Florida Statutes, at the supervisor’s office.” Section 101.031(2), Florida Statutes, spells out the specific format of the Voter’s Bill of Rights and Responsibilities to be posted by the supervisor of elections at each polling place. The Department of State, or in the case of municipal elections, the governing body of the municipality, is required “to print, in large type on cards, instructions for electors to use in voting,” including the list of rights and responsibilities and other information about how to
vote deemed necessary by the Department of State—Section 101.031(1), Florida Statutes. At least two cards shall be provided to each precinct.

**Educating Voters About Polling Place and Precinct Changes, Revised Voter Identification Cards**

Department of State Rule 1S-2.033, F.A.C., mandates that supervisors of elections “shall provide notice of changes of polling places and precincts to all affected registered voters. This notice shall include publication in a newspaper of general circulation as well as posting the changes in at least ten conspicuous places in the county. If the supervisor has a website, the supervisor shall post the changes on the website. The supervisors shall also widely distribute a notice that if a voter does not receive a revised voter identification card within 20 days of the election the voter should contact a specific number at the supervisor's office to obtain polling place information.”

**Voter Education Through the Media**

Department of State Rule 1S-2.033(8), F.A.C., requires supervisors of elections to interface with the media to better inform the electorate. Supervisors are to “participate in available radio, television and print programs and interviews, in both general and minority media outlets, to provide voting information.”

**Voter Education Includes But is Not Limited to Nonpartisan Voter Education**

Beginning in 2003, the State Legislature has expanded its definition of voter education activities for which counties may receive state funds. There are now four broad categories of voter education for which counties may use state funds: mailing or publishing sample ballots; conducting activities described in the Standards for Nonpartisan Voter Education provided in Rule 1S-2.0333, F.A.C.; for print, radio, or television advertising to voters; and for other innovative voter education programs, as approved by the Department of State.

County supervisors of elections must constantly update information disseminated to the public, poll workers, and their own staff to conform to state legislative mandates and HAVA requirements. A number of counties have used their FY 2003-2004 state voter education funds to update materials available at the polling place as well as information (brochures, posters, signs, videos, PSAs) distributed throughout the county.

In line with HB 29B (Chapter 2003-415), educational materials must be updated to provide absentee voters with better instructions on how to mark a ballot and how to correct their ballots and how to request a replacement ballot if the voter is unable to change the original ballot. (This was necessary to meet Section 301(a)(1)(B) HAVA requirements.)

HB 29B (Chapter 2003-415) requires the Department of State and the county supervisors of elections to provide more information regarding voter registration procedures and absentee ballot procedures to absent uniformed services voters and overseas voters.
HB 29B (Chapter 2003-415) requires county supervisors of elections to inform persons registering to vote by mail that if they are registering for the first time, they will be required to provide identification prior to voting the first time.

HB 29B (Chapter 2003-415) requires county supervisors of elections to give written instructions regarding the free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why. This is consistent with Section 302(a)(5)(A)&(B) HAVA requirements.

HB 29B (Chapter 2003-415) makes county supervisors of elections responsible for providing up-to-date information to conform to HAVA voting information requirements—Section 302(b)(2)(A through F): sample ballots at polls; the election date; identification instructions for mail registrants who are first time voters; and information on who to contact if general voting rights under State and federal laws are violated.

Passage of Committee Substitute for Senate Bill No. 2566 (Chapter 2004-232) requires county supervisors of elections to revise the Voter’s Certificate and instructions to those voting via an absentee ballot. Under the law, a person casting an absentee ballot is no longer required to have his/her signature witnessed.

Passage of Committee Substitute for Senate Bill Nos. 2346 and 516 (Chapter 2004-252) requires county supervisors of elections to revise Early Voting Voter Certificate information. Under the law, a person casting an Early Vote is no longer required to have his/her signature witnessed.

State Role: Disseminating Information to Voters and Election Officials

Voter Education through the Internet
The Division of Elections’ website (http://election.dos.state.fl.us/) offers extensive information regarding registration, elections (dates, district maps, results, Division reports, forms, publications, press releases, voter turnout, supervisor of elections’ contact information), voter fraud, voting systems, laws/opinions/rules, candidates and committees, the initiative petition process, and other helpful government links. Prominently displayed on the Web Site home page is information on: the Voter Assistance Hotline Toll Free Number—for the general public and for people using Text Telephone (TTY); Direct Recording Equipment Voting Systems; the 2004 National Voter Registration Workshops to be held across the state to better inform public officials and the public about the National Voter Registration Act of 1993; a direct link to the Help America Vote Act and the HAVA Planning Committee’s activities and recommendations; and the results of an Election Night Voter Report Card (Survey) on the Conduct of Election 2002.
Voter Education About Fraud
Section 97.012(12), Florida Statutes, requires the Secretary of State to “...provide election fraud education to the public.”

Voter Education Media Campaign: Get Out The Vote Foundation
In FY 2003-2004, the Division of Elections entered into a contract with the Get Out The Vote Foundation, Inc., in the amount of $247,500. This is a non-profit organization of the Florida State Association of Supervisors of Elections (FSASE). The Foundation has hired two well-known communications firms (Ron Sachs Communications and CoreMessage, Inc.) to produce voter education materials for statewide distribution. The two firms will jointly produce a half-hour television news magazine-type program called “Before You Vote” designed to inform voters about new voting rules and procedures and new electronic voting machines. The program will be distributed to all TV stations and cable companies in Florida for broadcast at two time periods—before both the August primary election and the November general election. Prevention of errors on election day is the primary goal of the program. The bipartisan team will also produce eight 30-second TV public service announcements—four each in English and Spanish. These spots—“Make Freedom Count”—are designed to encourage voters to vote early or by absentee ballot. An additional contract in the amount of $24,750 was issued to the Get Out The Vote Foundation to create media kits full of facts and figures for all 67 county supervisors of elections to use as they interface with the media.

Procedures for Constant Analysis of Voter Education Effectiveness
Section 98.255(3)(a), Florida Statutes, requires supervisors of elections to file a report by December 15 of each general election year with the Department of State. This report is “a detailed description of the voter education programs implemented and any other information that may be useful in evaluating the effectiveness of voter education efforts.”

Section 98.255(3)(b), Florida Statutes, requires the Department of State to review the information submitted by the supervisors of elections and “prepare a public report on the effectiveness of voter education programs” and to “submit the report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 31 of each year following a general election.”

Further, Section 98.255(3)(c), Florida Statutes, instructs the Department of State to use “the findings in the report as a basis for adopting modified [voter education] rules that incorporate successful voter education programs and techniques as necessary.”

This procedure was first used in the 2002 election cycle. The Division of Elections requested each supervisor of elections to list in detail the voter education programs conducted during the 2002 election cycle and the approximate cost of each program. The supervisors were asked to rank the effectiveness of each program on a scale of 1 to 5, with 5 being the highest possible rank. On January 31, 2003, the Florida Department of State, Division of Elections, submitted its “Report on Voter Education Programs During the 2002 Election Cycle Pursuant to Section
98.255(3), *Florida Statutes.*” (The Report is posted on the Division of Elections Web Site.) The report concluded that “most supervisors ranked the county voter education programs as 4 or 5 in effectiveness in reaching the target community.” (There were ten broad categories of voter education programs: sample ballots; elementary/middle school/high school/university and community college outreach; websites; miscellaneous promotional materials; public appearances/television and movie theatre advertisements; banners and billboards, radio and public transport advertisements; newspapers and mailers; voting system demonstrations; outreach to minority, disabled and senior communities; and voter registration drives.) The Department of State made three recommendations in its post-election 2002 report:

1. The Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts; the State Legislature did this in its FY 2003-2004 and FY 2004-2005 appropriations bills.
2. The Legislature should require sample ballots to be mailed to households or voters prior to each Primary and General Election. (It is now an alternative to publishing a sample ballot in a general circulation newspaper.)
3. The Division of Elections should provide a list of cost-effective voter education programs used by counties so that all counties can benefit from these ideas. (Pursuant to Section 98.255(3), *Florida Statutes*, the Division has posted its Report on Voter Education Programs during the 2002 Election Cycle on its web site. The Report lists the effectiveness ratings for individual voter education activities as calculated by individual county supervisors of elections.)

(The 2002 Governor’s Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002 also recommended improving “voter education by requiring all supervisors of elections to mail generic sample ballots to each household with registered voters.”)

Under Section 101.20, *Florida Statutes*, county supervisors of elections may now mail a sample ballot to each registered elector or to each household in which there is a registered voter if done at least seven days prior to any election, rather than publish a sample ballot in a newspaper of general circulation. A high percentage of county supervisors have chosen to use their FY2003-2004 state voter education funds and local matching funds to publish and mail out sample ballots to registered voters. The same law requires two sample ballots be placed at each polling place, along with reduced-size sample ballots to give to any voter desiring one. Some supervisors of elections are using FY 2003-2004 voter education monies to pay for sample ballots to be made available at each precinct.

Section 101.595, *Florida Statutes*, also requires supervisors of elections to submit a report to the Department of State no later than December 15 of each general election year detailing “[t]he total number of overvotes and undervotes in the first race appearing on the ballot pursuant to Section 101.151(2), *Florida Statutes*, along with the likely reasons for such overvotes and undervotes and other information as may be useful in evaluating the performance of the voting
system and identifying problems with ballot design and instructions which may have contributed to voter confusion.” The Department of State must prepare a report analyzing that information and submit it to the Governor, the President of the Senate, and the Speaker of the House by January 31 of the year following a general election. The report is to include recommendations for correcting any problems with ballot design or instructions to voters.

This procedure was first used in the 2002 election cycle. “Analysis and Report of Overvotes and Undervotes for the 2002 General Election Pursuant to Section 101.595, Florida Statutes” found a substantial reduction in the level of overvotes and undervotes in 2002 (compared to 2000) and concluded that new technology and the counties’ voter education efforts were major factors contributing to the reduction in voter error. (The report is posted on the Division of Election’s Web Site.) The report’s recommendations were:

1. The Division of Elections must continue to monitor the overvotes and undervotes from each general election. (Required under Florida Statutes.)
2. The Florida Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts. The Legislature did this in its FY 2003-2004 and FY 2004-2005 appropriations bills.
3. The Division of Elections should review the recommendations for ballot instructions for incorporation into the uniform ballot rule. During the 2003 session, the Legislature passed a law delineating the content of separate printed instructions to accompany each absentee ballot (section 101.65, Florida Statutes). Rule 1S-2.030 F.A.C. standardizes the basic form of instructions to be sent to all overseas voters.
4. All voting system vendors should continue to improve the design of their voting systems in order to better meet the needs of Florida voters.

A number of supervisors of elections have implemented their own feedback systems through comment cards distributed at registration sites, workshops, and polling places. Some also allow citizens to make suggestions and complaints via their websites. Several counties have used some of their state voter education funds to solicit voter feedback and suggestions.

Florida’s system for constant evaluation of the effectiveness of voter education by both the county supervisors of elections and the Department of State is in place and operating.

Section 254(a)(3). How will the State of Florida provide for programs for election official education and training which will assist the State in meeting the requirements of Title III?

The State has assigned responsibility for education and training of election officials to the Secretary of State. The Division of Elections prepares and distributes educational materials for, and conducts the training of, supervisors of elections and their staffs.
The Secretary of State is the State’s chief election officer whose responsibilities are spelled out in Section 97.012, Florida Statutes. Among those responsibilities are explicit requirements to: “provide technical assistance to the supervisors of elections on voter education and election personnel training services;” “provide technical assistance to the supervisors of elections on voting systems;” “provide training to all affected state agencies on the necessary procedures for proper implementation of [Chapter 97 of the Florida Statutes];” and “coordinate with the United States Department of Defense so that armed forces recruitment offices administer voter education in a manner consistent with the procedures set forth in [Florida election] code for voter registration agencies.”

The Division of Elections conducts voter education and election personnel training, issues advisory opinions that provide statewide coordination and direction for interpreting and enforcing election law provisions, provides technical advice on voting systems and equipment and State and federal election laws, certifies voting equipment, and provides written election information to candidates (Office of Policy Analysis and Government Responsibility, Justification Review, Report No. 02-55, October 2002).

The Division of Elections oversees and approves training courses for continuing education for supervisors of elections. It coordinates, on an annual basis, two statewide workshops for the supervisors of elections by reviewing and providing updates on the election laws to ensure uniformity statewide in the interpretation of election laws. These are generally held in conjunction with the Florida State Association of Supervisors of Elections’ Conferences held in January and June. The division oversees certification for supervisors of elections through which supervisors obtain credits to maintain job proficiency. The Division may also conduct regional workshops for supervisors and staff, universities, community colleges and State agencies. When Select Task Forces are created by the Governor, Secretary of State, or other State officials, the Division provides administrative and technical assistance. (Florida Department of State, Division of Elections, 2001 Annual Report).

All Division of Elections’ forms, rules, handbooks, opinions, etc. are available on the Internet via the Division’s website—an award-winning site (http://election.dos.state.fl.us/). Section 97.026, Florida Statutes, states “It is the intent of the Legislature that all forms required to be used in chapters 97-106 [the election code], shall be made available upon request, in alternative formats” including the Internet (with the exception of absentee ballots).

The HAVA Planning Committee recommended that the Division of Elections also conduct training courses for the continuing education of county election officials in conjunction with meetings of the Florida Association of City Clerks. The Division of Elections routinely invites city clerks and supervisors of elections to attend its statewide training meetings held in conjunction with FSASE meetings.

The Florida State Association of Supervisors of Elections, through activities of its Get Out The Vote Foundation, will play a major role in educating and training election officials in 2004. On
May 25, 2004, the Foundation launched its voter education plan. Through it, all 67 county supervisors of elections will have access to professionally prepared public media advertising materials. The Foundation has its own web site (www.getoutthevoteflorida.com) which allows election officials—elected and staff—to access easily comprehended materials on a wide range of timely topics, including Absentee Voting, Early Voting, Registering to Vote, Election Reform in Florida, Voter Identification, Restoration of Felon’s Voting Rights, and Information on Direct Recording Equipment Voting Systems, along with posters, ads, and public service announcements.

Section 254(a)(3). How will the State of Florida provide for programs for poll worker training which will assist the State in meeting the requirements of Title III?

Florida has adopted extensive poll worker recruitment and training requirements and funded county poll worker training (as part of the $6 million voter education appropriation in 2001). The State has: adopted minimum-hours-of-training requirements; spelled out training content requirements; prepared a uniform polling place procedures manual; and mandated a statewide and uniform program for training poll workers on issues of etiquette and sensitivity with respect to disabled voters. Rule 1S-2.034 F.A.C. requires the Department of State, Division of Elections to establish a polling place procedures manual, Form DS-DE 11 (January 25, 2004).

State law permits inspectors, clerks, and deputy sheriffs attending poll worker training to receive compensation and travel expenses—Section 102.021(2), Florida Statutes.

The HAVA Planning Committee recommended state funding for poll worker training and recruitment but the Florida Legislature in 2004 did not appropriate funds for either activity.

Joint Responsibility of Department of State and County Supervisors of Elections

Section 102.014, Florida Statutes, assigns responsibility for poll worker training to county supervisors of elections and the Department of State.

Section 102.014(1), Florida Statutes, requires supervisors of elections to conduct training for inspectors, clerks, and deputy sheriffs prior to each primary, general, and special election “for the purpose of instructing such persons in their duties and responsibilities as election officials.” Training is mandatory to work at the polls.

Section 102.014(5), Florida Statutes, directs the Department of State to “create a uniform polling place procedures manual and adopt the manual by rule” and to revise it “as necessary to address new procedures in law or problems encountered by voters and poll workers at the precincts.” Rule 1S-2.034, F.A.C., Polling Place Procedures Manual (Form DS-DE 11; Eff. Jan. 04), was recently updated for HAVA compliance. It was pre-cleared on June 3, 2004 by the Department of Justice. The manual, to be available in either hard copy or electronic form at every precinct on Election Day, must be “indexed by subject, and written in plain, clear, unambiguous language.”
Under Section 102.014(7), *Florida Statutes*, the Department is assigned the responsibility for developing "a mandatory, statewide, and uniform program for training poll workers on issues of etiquette and sensitivity with respect to voters having a disability." But county supervisors of elections are responsible for conducting such training. They are required to "contract with a recognized disability-related organization, such as a center for independent living, family network on disabilities, deaf service bureau, or other such organization, to develop and assist with training the trainers in disability sensitivity programs."

**Poll Worker Training Content**

The content of poll worker training is detailed in State statutes.

Clerks must demonstrate "a working knowledge of the laws and procedures relating to voter registration, voting system operation, balloting and polling place procedures, and problemsolving and conflict-resolution skills"—Section 102.014(1), *Florida Statutes*.

The Uniform Polling Place Procedures Manual must include: regulations governing solicitation by individuals and groups at the polling place; procedures to be followed with respect to voters whose names are not on the precinct register; proper operation of the voting system; ballot handling procedures; procedures governing spoiled ballots; procedures to be followed after the polls close; rights of voters at the polls; procedures for handling emergency situations; procedures for dealing with irate voters; the handling and processing of provisional ballots; and security procedures—Section 102.014(5)(a-k), *Florida Statutes*. The manual "shall provide specific examples of common problems encountered at the polls on election day, and detail specific procedures for resolving those problems."

Poll worker training on issues of etiquette and sensitivity for disabled voters "must include actual demonstrations of obstacles confronted by disabled persons during the voting process, including obtaining access to the polling place, traveling through the polling area, and using the voting system"—Section 102.014(7), *Florida Statutes*.

**Poll Worker Minimum Hours of Training**

Section 102.014(4), *Florida Statutes*, specifies that clerks must have had a minimum of three hours of training prior to each election to be eligible to work at the polls. For inspectors, there is a minimum of two hours of training. Section 102.014(7), *Florida Statutes*, requires one hour involving training related to etiquette and sensitivity with regard to voters with disabilities.

**Poll Worker Recruitment**

Supervisors of elections are required to "work with the business and local community to develop public-private programs to ensure the recruitment of skilled inspectors and clerks"—Section 102.014(6), *Florida Statutes*. 
There is no established procedure for evaluating the effectiveness of poll worker training or recruitment as there is for voter education. The 2002 Governor's Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002, recommended "establishing minimum standards for poll worker performance" and "improving poll worker recruitment and training by launching a statewide "Be a Poll Worker" campaign.

The HAVA Planning Committee has recommended that the Division of Elections establish a procedure to evaluate the effectiveness of poll worker recruitment and training in all 67 counties. In an effort to increase poll worker recruitment, the Department has initiated a "Be a Poll Worker" campaign which includes airing public service announcements and distributing "Be a Poll Worker" handouts at Department presentations. Some counties are using FY 2003-2004 voter education funds to recruit high school and college students as poll workers as well as the public at-large through publication and dissemination of new brochures and videos.
Element 4. Voting System Guidelines and Process

How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

Introduction
There are several governmental bodies and agencies that participate in the adoption of voting systems in Florida. The Florida Legislature has great authority to set voting system requirements and does so in Chapter 101, Florida Statutes. The Legislature also delegates rule making and certification authority to the Bureau of Voting Systems Certification in the Division of Elections under the Secretary of State.

After voting systems are independently tested and certified for use in Florida, Section 101.5604, Florida Statutes, provides that the Board of County Commissioners “at any regular or special meeting called for the purpose, may, upon consultation with the supervisor of elections, adopt, purchase or otherwise procure, and provide for the use of any electronic or electromechanical voting system approved by the Department of State in all or a portion of the election precincts of that county.”

To keep Florida’s voting systems standards up-to-date, Section 101.015, Florida Statutes, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”

Section 254(a)(4) How will the State of Florida adopt voting system requirements and processes which are consistent with the requirements of Section 301?

Florida’s laws and regulations for adopting voting systems that are consistent with the requirements of Section 301 are clearly outlined in Florida Statutes and the Florida Voting Systems Standards.

Section 101.015, Florida Statutes, authorizes the Department of State to adopt rules which establish minimum standards for hardware and software for electronic and electromechanical voting systems.

Section 101.017, Florida Statutes, creates the Bureau of Voting Systems Certification which provides technical support to the supervisors of elections and is responsible for voting system standards and certification.

Section 101.5605, Florida Statutes, authorizes the Department of State to examine and approve voting systems through a public process to ensure that the voting systems meet the standards.
outlined in Section 101.5606, Florida Statutes, and similar standards outlined in the Help America Vote Act of 2002 (HAVA) requirements outlined in Section 301 of Title III.

Section 101.5604, Florida Statutes, authorizes the Board of County Commissioners to adopt voting systems.

Sections 101.293-101.295, Florida Statutes, outline the public bidding process that counties should follow in purchasing voting systems.

Section 101.56062, Florida Statutes, exceeds the accessibility standards of HAVA Section 301 “Accessibility for Individuals With Disabilities.” The HAVA Planning Committee has recommended that the Florida Legislature take advantage of federal funding and bring Florida into compliance and make Section 101.56062, Florida Statutes, effective by January 1, 2006 or one year after general appropriations are made, whichever is earlier.

Section 101.015, Florida Statutes, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”
Element 5. Florida’s Help America Vote Act of 2002 (HAVA) Election Fund

How the State will establish a fund described in subsection (b) for purposes of administering the State’s activities under this part, including information on fund management.

To clarify, Section 254(b) states that a fund described in this subsection with respect to a State is a fund which is established in the treasury of the State government, which is used in accordance with paragraph (2), and which consists of the following amounts:

(A) Amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made to the State under this part.
(B) The requirements payment made to the State under this part.
(C) Such other amounts as may be appropriated under law.
(D) Interest earned on deposits of the fund.

Section 254(a)(5) How will the State of Florida establish a fund for the purpose of administering the State’s activities under this part?

All HAVA funds are maintained in a trust fund that has already been established by the Department of State. Within this trust fund, monies received for HAVA Sections 101, 102 and Title II are set up into four accounts: 101-Election Administration, 102-Replace Punch Card and Lever Voting Systems, 251-Requirements Payment, and 261-Access for Individuals with Disabilities.

Section 254(a)(5) How will the State of Florida manage this fund?

Any HAVA funds received by the State are used exclusively for activities authorized by HAVA. The Division of Elections is responsible for tracking and monitoring the use of funds in accordance with established State procedures.

The Director of the Division of Elections has final signing authority for HAVA expenditures. Any interest earned on this trust fund is returned to the principal amount of the trust.

Standard auditing procedures for monitoring the use of federal funds are used for the receipt and the distribution of HAVA funds. These standard procedures include random program audits by the Department of State Inspector General as well as an annual audit by the Florida Auditor General.
The Governor and Secretary of State are responsible under HAVA for ensuring compliance with these requirements. The HAVA Planning Committee recommends that the Governor and the Secretary of State maintain contact with the Senate President and the Speaker of the House of Representatives to ensure they remain aware of the strict requirements set in law for the use of HAVA monies placed in this trust fund.

No audit has been conducted to-date, however, based on recent calls from the Florida Auditor General, it is anticipated that an audit will be conducted during FY 2004-2005.
Element 6 – Florida’s Budget for Implementing the Help America Vote Act of 2002 (HAVA)

The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on –

(A) the costs of the activities required to be carried out to meet the requirements of Title III;
(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) the portion of the requirements payment which will be used to carry out other activities.

Introduction
The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. This budget reflects the HAVA Planning Committee’s best efforts to divide the funds that may be available during the three years identified in HAVA. If Florida receives more funds than are included in this budget, the HAVA Planning Committee will revise the budget to reflect this change.

Reimbursement for replacement of punch card and lever machines.
Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 federal funds in the amount of $11,581,377 were returned to the State of Florida as reimbursement.

Statewide Voter Registration System.
The Florida Legislature directed the Department of State to begin development of a statewide voter registration system that meets the requirements of HAVA. Accordingly, the 2003 Legislature provided $1.6 million to begin implementation of the system. Federal funds include $1 million for the Needs Assessment Phase along with nine positions to support design, development and implementation of the HAVA requirements. Of the nine positions, five reside in the Department of State and two each in the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement.

Phase 2, “Prototyping & Validation of Design,” began in March 2004 and includes the following:

* Installation of prototyping equipment and environment
Prototype the core system configuration and architecture
- Data conversion/migration testing (data & images)
- Prototype remote access to the core system

An estimate of costs for development and operation of the Florida Voter Registration System is provided in the table below.

The Division of Election also anticipates adding 20 full time equivalent positions (FTEs) in FY 2004-2005. The salaries and benefits, expenses and operating capital outlay associated with these 20 positions is expected to be $1,203,650.

Section 301 Accessible Voting Systems
The HAVA Planning Committee recommended the purchase of Direct Recording Equipment (DRE) accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The estimated cost is $11.6 million during the 2004-2005 fiscal year. The Florida Legislature authorized the following:

From the funds in Specific Appropriation 2871I, $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The funds are to be distributed according to the number of machines that are accessible for persons with disabilities that are needed in order for each county to have one per polling place.
In addition, the HAVA Planning Committee in 2003 recommended reimbursing counties that have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement was $17 million.

**Voter Education**

The HAVA Planning Committee recommended using HAVA funds for the development and implementation of a comprehensive statewide voter education program. The estimated expenditure is a total of $9 million distributed to the counties and spread over the 2003-2004, 2004-2005 and 2005-2006 fiscal years.

The Florida Legislature authorized the following:

For FY 2003-2004, $2,976,755 was appropriated and available to Florida counties for voter education programs. From funds in Specific Appropriation 2871I for FY 2004-2005, $3,000,000 shall be distributed to county supervisors of elections for the following purposes relating to voter education: mailing or publishing sample ballots; conducting activities pursuant to the Standards for Nonpartisan Voter Education as provided in Rule 1S-2.033, F.A.C.; print, radio, or television advertising to voters; and other innovative voter education programs, as approved by the Department of State. No supervisor of elections shall receive any funds until the county supervisor of elections provides to the Department of State a detailed description of the voter-education programs, such as those described above, to be implemented.

**Poll Worker Training**

The HAVA Planning Committee recommended using HAVA federal funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds were intended to supplement each county's existing poll worker training budget.

The 2004 Legislature did not appropriate federal funds for conducting a poll worker recruitment campaign.

The HAVA Planning Committee recommends using HAVA federal funds in the amount of $500,000, beginning with FY 2005-2006, for poll worker training and recruitment, with a 15% match required of each county.
Statewide Poll Worker Recruitment Campaign
The HAVA Planning Committee recommended that HAVA federal funds be used to implement, through the Division of Elections, a statewide campaign to help recruit qualified poll workers. The increase in the complexity of voting systems and procedures has resulted in a need for more computer literate individuals to staff the polling places and help ensure error-free elections.

The 2004 Legislature did not appropriate federal funds for conducting a statewide poll worker recruitment campaign.

HAVA Oversight and Reporting
The HAVA Planning Committee recommended that the Department of State create three full time positions to manage HAVA implementation.
- HAVA administrator
- Grants specialist
- Administrative assistant

The Florida Legislature authorized three positions within the Division of Elections for HAVA Oversight and Reporting. For FY 2003-2004 $206,079 was appropriated for salaries and benefits, expenses and operating capital outlay. The three position titles are
- Senior Management Analyst Supervisor
- Operations and Management Consultant II
- Administrative Assistant II

State Management (HAVA Planning Committee)
The HAVA Planning Committee recommended that the Secretary of State require it to meet twice each year in 2003-2004 and in 2004-2005 to make recommendations and to resubmit the HAVA State Plan to ensure that Florida is meeting the requirements of the Help America Vote Act. The HAVA Planning Committee convened twice in the 2003-2004 fiscal year at an estimated cost of $30,000. The HAVA Planning Committee further recommends that it meet twice in the 2004-2005 fiscal year at an estimated cost of $30,000 and twice in the 2005-2006 fiscal year at an estimated cost of $30,000.

Performance Goals and Measures Adoptions
The HAVA Planning Committee recommended the Secretary of State utilize the HAVA Planning Committee to determine performance goals and measures. The estimated cost is $160,000 to be expended in the 2003-2004 and 2004-2005 fiscal years.
The HAVA Planning Committee determined HAVA performance goals and measures during the meetings that were held to update the HAVA State Plan. Two meetings were held on May 24, 2004 and June 4, 2004 at an estimated cost of $30,000.

Election Administration
The HAVA Planning Committee recommends HAVA funds be used for the design and production of new voter registration forms and publications, and translations for all election administration forms and publications. The estimated cost is $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006.

Complaint Procedures
Section 402(a) of HAVA requires each state to establish state-based administrative complaint procedures for any person who believes that there is or will be a violation of any of HAVA’s Title III requirements. The HAVA Planning Committee recommends using HAVA funds in the amount of $50,000 per year for the 2004-2005 and 2005-2006 fiscal years for the administration of the complaint procedures process.

The HAVA Planning Committee recommends that the remaining HAVA funds be reserved for future expenses related to the following items:
1. the continued development and implementation of the Florida Voter Registration System
2. future improvements in voting technology
3. continued funds to local counties for voter education programs
4. accessibility for polling places
5. poll worker recruitment and training

Requirement 6
(A) Based on the state’s best estimates, what are the costs of the activities required to carry out to meet the requirements of Title III?
(B) What portion of the requirements payment will be used to carry out activities to meet such requirements?
(C) What portion of the requirements payment will be used to carry out other activities?

This information is displayed in charts on pages 61 and 62.
### Title II Requirements

Reimbursement for replacement of punch card and lever machines.

### Title III Requirements

#### Section 303: Statewide Voter Registration System

- **Phase One Development** - research, planning & design
  (Section 101 HAVA Funds)
  - 5 full time DOS positions - salaries
  - 5 full time DOS positions - expenses
  - DOS Operating capital outlay
  - 2 full time DHSMV positions - salaries
  - 2 full time DHSMV positions - expenses
  - DHSMV operating capital outlay
  - 2 full time FDLE positions - salaries
  - 2 full time FDLE positions - expenses
  - DHSMV operating capital outlay

- **Phase Two** - Dev. & impl. statewide voter reg. system
  (Section 252 Requirements Payment)
  - 20 full time positions - salaries
  - 20 full time positions - expenses
  - 20 full time positions - operating capital outlay

#### Section 301: Voting System/Standards

- Accessibility for voters with disabilities (compliance)
- Accessibility for voters with disabilities (reimbursement to counties)

### Other Election Reform Activities

- **Voter Education Programs**
- **Poll worker recruitment and training**
- **Poll worker Training**
- **HAVA Oversight and Reporting**
  - 3 full time positions - salaries
  - 3 full time positions - expenses
  - Operating capital outlay
- **State Management (HAVA Planning Committee)**
  - HAVA Plan. Comm. convenes twice/year $30k/mtg
  - HAVA Performance Goals & Measures Adoption HAVA Planning Committee hearings - 4 at $40k/mtg
- **Election Administration** - design and production of new voter registration forms and publications, translations for all election administration forms and publications.
- **Complaint Procedure** §402

Element 7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Introduction
The funding provided under the Help America Vote Act of 2002 (HAVA) is intended to pay for new or enhanced election efforts and is not intended to supplant existing funding at the State or county level. The projected HAVA budget is based on the assumption that the State of Florida and counties will maintain the foundation of election operating expenditures for the fiscal year ending prior to November 2000.

The Florida Division of Elections provides statewide coordination and direction for the interpretation and enforcement of election laws. The Division’s budget supports year-round staff that provides election-related assistance to Florida’s 67 county supervisors of elections and their staff, municipalities, special districts, county and city attorneys, candidates, political committees, committees of continuous existence, elected officials, media, the public and other election officials throughout the United States.

Section 254(a)(7) How will the State of Florida maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000?

In determining Florida’s maintenance of effort expenditures, the Division of Elections calculated 1999-2000 fiscal year expenditures which included salaries and benefits, operating capital outlay and voter fraud programs for the Division of Elections Director’s office and the portion of Bureau of Election Records’ expenditures pertaining to election administration. Florida’s expenditures for these activities for 1999-2000 fiscal year totaled $3,082,224.

In order to comply with Section 254(a)(7) of HAVA, the Florida Department of State will maintain expenditures on similar activities at a level equal to the 1999-2000 fiscal year budget.

For FY 2003-2004 and FY 2004-2005, the State of Florida exceeded the $3,082,224 required to meet the Maintenance of Effort requirements.

The HAVA Planning Committee recommended that the Secretary of State communicate to the Senate President and the Speaker of the House of Representatives the importance of maintaining this maintenance of effort figure, as a minimum level of expenditures, to ensure the required level of spending is appropriated by the Florida Legislature.
During the 2003 and 2004 Legislative sessions, the Department of State’s budget staff and legislative affairs staff maintained and continues to maintain close contact with House and Senate staff to convey the importance of continuing the Maintenance of Effort figure as a minimum level of funding.
Element 8. Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Introduction
Florida has a very decentralized election governance and administrative system. The Secretary of State is appointed by the Governor and is the legal Chief Election Official in Florida. However, the Secretary of State does not supervise the day-to-day operations of the 67 local supervisors of elections and only provides guidance through technical assistance, rules, advisory opinions, voting system certification, and producing standardized election forms.

In Florida, it is the local supervisor of elections that has constitutional authority to conduct elections through State law and rule. The supervisors are elected to 4-year terms by the registered voters of their respective counties (except for Miami-Dade’s appointed supervisor) and have broad authority to conduct the day-to-day election operations by appointing local election officials, administering voter registration, preparing ballots, administering absentee voting, conducting poll worker training, and developing voter education programs.

The Help America Vote Act of 2002 (HAVA) requires the State and not the local supervisors of elections to adopt performance goals and measures for determining statewide and local election reform success. The following performance measures have been adopted by the HAVA Planning Committee for these key elements of the plan:

1. Voting Systems
2. Voting systems guidelines
3. Absentee instructions
4. Voting systems for voters with disabilities
5. Provisional voting
6. Voter registration system
7. Voter education
8. Administrative complaint process
Section 254(a)(12) How will Florida adopt performance goals and measures that will be used by the State to determine its success and the success of local government in carrying out the plan, including—
- Timetables for meeting the elements of the plan
- Descriptions of the criteria the State will use to measure performance
- The process used to develop such criteria
- A description of which official is to be held responsible for ensuring that each performance goal is met?

| Planning Element: | Element #1, Section 301 – Voting Systems  
|                  | Element #4, Section 254(a)(4) – Voting System Guidelines |
| HAVA Deadline:   | January 1, 2006 |
| Goal:           | Document the performance of Florida’s voting systems to continually improve the voting experience for Florida voters. |
| Performance Measures: | • Record and report to the Florida Legislature the number of overvotes and undervotes appearing in the first race for each General Election  
|                  | • List the likely reasons for such overvotes and undervotes by counties, by voting systems, and by appropriate election races  
|                  | • Suggest improvements to the voting process addressing such issues as voting system performance, ballot design, ballot instructions, election official training, poll worker training, voter education, and policy changes  
|                  | • Review rules and governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial |

Element 9. State-Based Administrative Complaint Procedures to Remedy Grievances

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Introduction
To receive any requirements payment pursuant to the Help America Vote Act of 2002 (HAVA), the State of Florida must establish and maintain State-based administrative complaint procedures which meet HAVA's requirements to:

(1) be uniform and nondiscriminatory;
(2) provide that any person who believes that there is or will be a violation of any of HAVA's Title III requirements may file a complaint;
(3) require the complaint to be in writing, sworn and notarized;
(4) permit complaints to be consolidated;
(5) hold a hearing on the record at the request of the complainant;
(6) provide an appropriate remedy if the State determines that there is a violation of any Title III provision;
(7) if the State determines there is no violation, dismiss the complaint and publish the results of procedures;
(8) make a final determination on a complaint within 90 days after filing unless the complainant consents to a longer period; and,
(9) use alternative dispute resolution procedures to resolve the complaint if the State fails to resolve it within 90 days.

Section 402(a): Has Florida complied with the requirements of HAVA Section 402(a) to establish State-based administrative complaint procedures to remedy grievances?

Yes, and no further actions are required.
Appropriate administrative complaint procedures were included in Chapter 2003-415, Laws of Florida. Language in the legislation tracked HAVA's language closely. These procedures are similar to administrative procedures in Section 97.023, Florida Statutes, for resolving complaints generated by alleged violations of the National Voter Registration Act of 1993 or a voter registration or removal procedure under the Florida Election Code.

Florida's legislation established a new Section 97.0535, Florida Statutes, that in addition to tracking HAVA's minimum requirements, included the following additional requirements not specified by HAVA:

(1) the Department of State would have sole jurisdiction for these purposes and the procedures would be the sole avenue of redress for alleged Title III violations;
(2) a complaint would have to state the alleged violation and the person or entity responsible for the violation;
(3) the Department of State would be required to inform a complainant in writing if a complaint was legally insufficient;
(4) proceedings would be exempt from Chapter 120, Florida Statutes, (Administrative Procedures Act);
(5) a hearing would be held by a hearing officer whether or not a complainant requested a hearing and specific procedures for a hearing were included in the legislation;
(6) the hearing officer would direct an appropriate remedy that then would be enforced by the Department of State;
(7) mediation would be the alternative dispute resolution method used if a final determination on a complaint was not made within 90 days of filing.
Element 10. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Introduction
Title I of the Help America Vote Act of 2002 (HAVA) is an “early out” money program for use in two areas—improving election administration and the replacement of punch card and lever voting systems. Florida received $26,028,957 under this “early out” program. The HAVA Planning Committee recommended using Section 101 federal HAVA funds for 2003-2004 activities and a combination of Section 101 and Section 252 HAVA federal funds for activities beginning in the 2004-2005 fiscal year and beyond.

Under Title I, Section 101 funds are to be used to improve election administration. Approved use of funds under this section includes:
(A) Complying with the requirements under Title III.
(B) Improving the administration of elections for Federal office.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.
(D) Training election officials, poll workers, and election volunteers.
(E) Developing the HAVA State Plan for requirements payments.
(F) Improving, acquiring, leasing, modifying, or replacing voting systems.
(G) Improving polling place accessibility for voters with disabilities or with limited English.
(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Under Title I, Section 102 federal funds are to be used to replace punch card and lever voting systems.

Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 funds in the amount of $11,581,377 were returned to the state as reimbursement.

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. The following recommendations are based on the HAVA Planning Committee meetings held to develop the HAVA State Plan.

Section 101. How will Title I payments to Florida be used for activities to improve administration of elections?
The State of Florida is using Title I funds for election reform activities necessary to ensure Florida complies with all HAVA requirements. The following list describes the major areas in which funds are used.

(A) Complying with the requirements under Title III

The Division of Elections will implement a statewide voter registration system to comply with HAVA Title III. The Division of Elections used $1 million appropriated from Section 101 federal funds for Phase One development of the new Statewide Voter Registration system. Expenditures for Phase One included:

- Consulting fees for conducting a detailed analysis of connectivity infrastructure available in the 67 supervisor of elections' offices and within all affected offices of the departments of State, Law Enforcement and Highway Safety and Motor Vehicles; working with the counties, the three agencies and the advisory board to create minimum and optimum sets of system requirements; assessing infrastructure needs of all stakeholders to serve the system requirements; conducting "gap" analysis; outlining the physical design of the system; estimating costs and implementation plans for each version for the system to be presented to the 2004 Legislature; and developing and publishing the January 2004 report and recommendations for the 2004 Legislature.

- The purchase of hardware and software for project management and system development.

- Expenses incurred by Division of Elections' staff.

- Travel expenses for visits to every supervisor of elections' office and local driver license office.

In addition, Section 101 HAVA funds were used to create nine full time positions necessary for the design, development and implementation of the Statewide Voter Registration system.

(B) Improving the administration of elections for Federal office.

Upon receipt of Title I monies, the HAVA Planning Committee recommended that the Division of Elections use $250,000 in fiscal year 2003-2004 from Section 101 funds for expenses that include the design and publication of voter registration forms and other election information, translations for all election administration forms and publications, statewide voter education programs and training workshops.

A State-based complaint procedure has been established for anyone who believes that a violation of Title III of the Help America Vote Act has occurred, is occurring or is about to occur. Funds may need to be expended depending on the number and type of complaints filed.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.

The Florida Division of Elections will use approximately $9 million over a three year period for voter education programs. In FY 2003-2004, $2,976,755 was appropriated and distributed to county supervisors of elections for voter education programs. Distribution was based on a funding level per individual voter multiplied by the number of registered voters in each county for the 2002 General Election. To determine the funding level per individual voter, the Division of Elections divided the total amount of funds appropriated in FY 2003-2004 by the total number of registered voters in the State of Florida for the 2002 General Election.

For FY 2004-2005, the Appropriations bill includes $3,000,000 to be distributed to county supervisors of elections for purposes relating to voter education. No supervisor of elections shall receive any funds until the county supervisor of elections provides to the Department of State a detailed description of the voter-education programs, such as those described above, to be implemented.

FY 2004-2005 funds will be distributed to each eligible county supervisor of elections based on a funding level per voter multiplied by the number of registered voters in the county for the 2004 Presidential Preference Primary. To determine the funding level per individual voter, the Division of Elections will divide the total amount of funds appropriated in FY 2004-2005 by the total number of registered voters in the State of Florida for the 2004 Presidential Preference Primary.

(D) Training election officials, poll workers, and election volunteers.

In the original HAVA plan, the HAVA Planning Committee recommended using HAVA funds in the amount of $250,000 for poll worker training in each fiscal year 2003-2004, 2004-2005 and 2005-2006. The Florida Legislature, however, did not appropriate HAVA funds for this use in FY 2003-2004 or FY 2004-2005.

The HAVA Planning Committee would like to reinstate its recommendation to use HAVA funds in the amount of $500,000, beginning with FY 2005-2006, for poll worker training and recruitment, with a 15% match required of each county.
(E) Developing the HAVA State Plan for requirements payments to be submitted under part 1 of subtitle D of Title II.

Title I funds were used to revise the HAVA State Plan in FY 2003-2004. As the State of Florida modifies its plans in future years, HAVA funds may be used.

(F) Improving, acquiring, leasing, modifying, or replacing voting systems.

Florida has already replaced its punch card and lever voting systems. Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 funds in the amount of $11,581,377 were returned to the state as reimbursement.

The HAVA Planning Committee recommended that the State of Florida utilize some HAVA funds to help counties meet the accessibility requirements under Title III by the January 1, 2006 deadline. The FY 2004-2005 Appropriations Bill states that $11,600,000 shall be distributed by the Department of State to county supervisors of elections for the purchase of Direct Recording Equipment (DRE) or other state approved equipment that meets the standards for disability requirements which is accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place.

In addition, the HAVA Planning Committee recommends reimbursing counties who have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million and it is anticipated that Section 252 HAVA funds will be used.

(G) Improving polling place accessibility for voters with disabilities or with limited English.

Under Section 261, HAVA states the Secretary of Health and Human Services shall make a payment to eligible States to be used for making polling places accessible to individuals with disabilities and providing information on this accessibility. The HAVA Planning Committee recommends that these funds be distributed to each county to ensure that individuals with disabilities are provided the same opportunity for access and participation as for other voters.
During FY 2003-2004, the State of Florida applied for and received a grant from Health & Human Services (HHS) in the amount of $687,278. Since the Division of Elections did not have budget authority in FY 2003-2004 to spend these dollars, none of the funds have been requested from HHS as of this date. The Division has distributed a survey to all supervisors of elections requesting information regarding the number of polling places that were utilized in the 2004 Presidential Preference Primary. This information will be used to determine the formula for distributing the grant funds to the counties.

The funds will be used as described in the grant application which follows the recommendations in the plan.

The Division of Elections has also been awarded a second grant from Health & Human Services to improve polling place accessibility in the amount of $492,941.

(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Currently, there are no plans to use HAVA funds for establishing a free voting information hotline. If this type of voting information system is desired, it will be the responsibility of each county and monitored by the Division of Elections.

The Division of Elections has already established a voter fraud hotline for individuals who believe they may have witnessed election fraud. In addition, the Division has established a hotline for voters to request voting information.

Section 102. How will payments to Florida be used for the replacement of punch card or lever voting machines?

Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. In order to recoup some of this expense, Section 102 federal funds in the amount of $11,581,377 were returned to the state as reimbursement.

How the State will conduct ongoing management of the plan, except the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Introduction
This element of the HAVA State Plan requires Florida to explain how the State of Florida will manage the implementation of the HAVA State Plan and whether it will utilize the same public notice process if any “material change” is made to the administration of the HAVA State Plan.

Section 251(a)(11) How will Florida conduct ongoing management of the HAVA State Plan?

As explained in previous sections of this Plan, the administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. The Secretary of State as the Chief Election Officer is responsible for the coordination of the State’s responsibilities under HAVA Section 253. The Director of the Division of Elections reports to the Secretary of State and will be responsible for the day-to-day monitoring and managing of Florida’s HAVA State Plan. The Director has three new positions dedicated to HAVA program management. The scope of responsibilities will range from federal reporting and grant compliance to assistance with voter education, election official training and updating the HAVA State Plan.

Also at the State level, the Secretary of State directs the HAVA Planning Committee to update the HAVA State Plan as required in Section 255. Under Florida’s HAVA State Plan, the HAVA Planning Committee is responsible for conducting its business in an open, public forum and for suggesting revisions and updates to the HAVA State Plan.

At the local level, Florida’s 67 supervisors of elections will be encouraged to play an active role in the successful implementation of the HAVA State Plan. The Division of Elections will continue to work on a regular basis with local supervisors of elections to develop performance
goals and measures, new voter registration improvements, new voting systems certification upgrades, statewide voter education programs, election official training, and other activities outlined in Florida's HAVA State Plan.

Section 254(a)(11) If Florida makes any material change in the administration of the HAVA State Plan, will the change—

(A) be developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

(B) be subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

(C) take effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A)?

The State of Florida understands and agrees to comply with the HAVA requirements related to ongoing management of the HAVA State Plan. No material changes in the administration of the plan will be made unless:

- the material change is developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

- the material change is subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

- the material change takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).
Element 12. Changes to State Plan for Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Introduction

The HAVA State Plan was updated at public meetings held in Orlando, Florida on May 24, 2004 and in Hollywood, Florida on June 4, 2004. The Secretary of State utilized the previous HAVA Planning Committee to make changes. The Collins Center for Public Policy, Inc. was selected in a public competitive process to staff the update process.

The HAVA Planning Committee focused on three types of changes:

1. Substantive changes made by the State of Florida that bring the State into further compliance with HAVA
2. Minor updates that will not affect the State’s compliance with HAVA
3. Issues that have arisen that might affect the State’s future compliance with HAVA

The HAVA Planning Committee received copies of the original plan. All updates and changes to the original plan from the previous fiscal year were noted as follows:

1. Sections of the plan that were deleted were first shown in a strike-through font
2. Sections of the plan that were new were shown in an underlined font.
3. After the HAVA Planning Committee reviewed and approved the updates, the underline and strike-through fonts were removed.

Section 254(a)(12) When Florida has a HAVA State Plan for the previous fiscal year, will the State of Florida provide a description of how the plan reflects changes from the HAVA State Plan for the previous fiscal year and how the State succeeded in carrying out the HAVA State Plan for such previous fiscal year?

Florida has updated its original HAVA State Plan to bring it into further compliance through legislative action, rule change and updated information. The following chart is a summary on how the HAVA State Plan changed and how the State succeeded in carrying out the HAVA State Plan for the previous fiscal year.
Element 1- Voting Systems
Florida currently meets all HAVA voting system requirements except with regard to voting systems for voters with disabilities.

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voting systems for voters with disabilities: The Legislature appropriated $11.6 million to help Florida’s counties provide one certified accessible voting system for voters with disabilities including blind and visually impaired voters by January 1, 2006.</td>
<td>The Department of State is going beyond HAVA by contracting with a disability relations group to act as a consultant to help implement disability access with the supervisors of elections across the state.</td>
</tr>
</tbody>
</table>

Element 1- Provisional Voting and Voting Information
Florida made six (6) changes to the provisional voting process in order to comply with HAVA by January 1, 2004.

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Free Access System: Updated state law to require each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his/her provisional ballot was counted and, if not, why.</td>
<td>Systems were established by January 1, 2004 and individuals who voted provisional ballots were given notice of whether their ballot was counted.</td>
</tr>
</tbody>
</table>

The HAVA Planning Committee concludes that the provisional ballot set forth in HAVA reinforces protections that the NVRA affords voters who move within the registrar's jurisdiction without updating their registration information, the ability to vote. The HAVA Planning Committee would like to offer Florida voters this same certainty and recommends to the Florida Legislature that the meaning of the term "jurisdiction" in Florida Statutes be changed from "precinct" to "county."

Voting instructions including how to cast a provisional ballot:
The Division of Elections updated and reinforced protections that the NVRA affords voters who move within the registrar's jurisdiction without updating their registration information, the ability to vote. The HAVA Planning Committee would like to offer Florida voters this same certainty and recommends to the Florida Legislature that the meaning of the term "jurisdiction" in Florida Statutes be changed from "precinct" to "county."

Proper instructions for voting and casting a provisional ballot were displayed in polling places.

Proper instructions for mail-in registrants and first-time voters were displayed in polling places.

Proper contact information for any voter alleging their rights were violated was displayed in polling places.

The State was in compliance by the required deadline.

The Division of Elections updated and reinforced protections that the NVRA affords voters who move within the registrar's jurisdiction without updating their registration information, the ability to vote. The Division of Elections updated and reprinted posters that are displayed in each polling place on election day to include these instructions.

Posting of contact information for voters who allege their rights have been violated:
The Division of Elections updated and reprinted posters that are displayed in each polling place on election day to include these instructions.

Effective date for complying with Provisional Voting and Voting Information Requirements:
Requirements were completed by HAVA deadline of January 1, 2004.

### Element 1- Voter Registration System

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The Florida Legislature has directed the Department of State to begin the development of the new Florida Voter Registration System (FVRS) that meets the requirements of HAVA. The Division of Elections has been tasked to develop the specifications for the design and implementation. A project team has been established consisting of supervisors of elections, technical experts and other agency representatives and has approved a five (5) phase project plan to be completed by the HAVA deadline.</td>
<td>The State of Florida received an extension for the development and implementation of the computerized statewide voter registration list from January 1, 2004 to January 1, 2006. The Florida Legislature appropriated $1.6 million to begin the project design and implementation of the new Florida Voter Registration System and to fund nine positions.</td>
</tr>
</tbody>
</table>
### Element 2- Local Government Payments and Activities

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The State of Florida reimbursed itself with $11.58 million in Section 102 HAVA funds for replacing outdated voting machines after the 2000 General Election.</td>
<td>The Florida Legislature appropriated $11.6 million in HAVA funds to assist counties in the purchase of accessible voting systems for each polling place.</td>
</tr>
<tr>
<td></td>
<td>The Florida Legislature appropriated nearly $3 million to counties for nonpartisan Voter Education programs.</td>
</tr>
</tbody>
</table>

### Element 3- Voter Education

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>An analysis of FY 2003-2004 voter education programs throughout the state indicate a variety of innovative programs are being used.</td>
<td>The Florida Legislature appropriated $3 million for voter education programs for FY 2004-2005.</td>
</tr>
<tr>
<td>Beginning in 2003, the Florida Legislature expanded its definition of voter education activities for which counties may receive state funds.</td>
<td>Division of Elections contracted with the Get Out the Vote Foundation, Inc., in the amount of $247,500 from FY 2003-2004 appropriations.</td>
</tr>
<tr>
<td>HB 29B (Chapter 2003-415) requires:</td>
<td>The Florida State Association of Supervisors of Election, through activities of its Get Out the Vote Foundation, will play a major role in educating and training election officials in 2004.</td>
</tr>
<tr>
<td>- Education materials to be updated to provide absentee voters with better instructions;</td>
<td>To increase poll worker recruitment, the Department has initiated a &quot;Be a Poll Worker&quot; campaign which includes airing public service announcements and distributing &quot;Be a Poll Worker&quot; handouts at Department presentations.</td>
</tr>
<tr>
<td>- The Department of State and county supervisors of elections to provide more information to absent uniform services voters and overseas voters;</td>
<td></td>
</tr>
<tr>
<td>- Persons registering to vote be notified of the requirement to provide identification prior to voting the first time;</td>
<td></td>
</tr>
<tr>
<td>- Written instructions be given regarding the free access system that allows each person who casts a provisional ballot to determine whether their vote counted and, if not, why not;</td>
<td></td>
</tr>
<tr>
<td>- Supervisors of elections to provide up-to-date information to conform to HAVA</td>
<td></td>
</tr>
</tbody>
</table>
voting information requirements;

Senate Bill No. 2566 (Chapter 2004-232) required county supervisors of elections to revise the Voter's Certificate and instruction to those voting via an absentee ballot indicating an absentee ballot is no longer required to have his/her signature witnessed.

Senate Bill No. 2346 (Chapter 2004-252) required county supervisors of elections to revise the Early Voting Certificate information indicating a person casting an Early Vote is no longer required to have his/her signature witnessed.

The Division of Election's website enhances voter education through the internet by:
- Voter assistance hotline toll free number
- 2004 national voter registration workshops to be held across the state
- Direct link to Help America Vote Act and HAVA Planning Committee activities
- The results of an election night voter report card (survey)

Under F.S. 101.20, supervisors of elections may mail a sample ballot to each registered elector or each household if done at least 7 days prior to any election, rather than publishing a sample ballot in a newspaper of general circulation.

The HAVA Planning Committee recommended state funding for poll worker training and recruitment but the Florida Legislature in 2004 did not appropriate any funds for either activity.
### Element 4- Voting System Guidelines and Processes

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>There were no changes in this element of the HAVA State Plan.</td>
<td></td>
</tr>
</tbody>

### Element 5- HAVA Election Fund

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The HAVA fund has not undergone any structural changes in the way the trust fund was set up.</td>
<td>The Florida Legislature has appropriated funds received for election-related activities as required by HAVA.</td>
</tr>
<tr>
<td>Recent calls from the Florida Auditor General indicate a possible audit during FY 2004-2005.</td>
<td></td>
</tr>
</tbody>
</table>

### Element 6- HAVA Budget

<table>
<thead>
<tr>
<th>Changes</th>
<th>Successes</th>
</tr>
</thead>
<tbody>
<tr>
<td>The HAVA Planning Committee approved the projected cost of the Florida Voter Registration System and recommended that the Florida Legislature continue funding the development of this project for a estimated total of $20.6 million through 2008.</td>
<td>The State of Florida reimbursed itself with $11.58 million in Section 102 HAVA funds for replacing outdated voting machines after the 2000 General Election.</td>
</tr>
<tr>
<td>The HAVA Planning Committee continued to recommend that the State of Florida reimburse counties that have already purchased voting systems that meet the HAVA accessibility requirements for voters with disabilities.</td>
<td>The Florida Legislature appropriated $1.6 million in FY 2003-2004 to begin the development of the Florida Voter Registration System which will meet HAVA requirements.</td>
</tr>
</tbody>
</table>
The HAVA Planning Committee recommended using $500,000 for FY 2005-2006 in a matching grant program for counties to conduct election official and poll worker training.

The HAVA Planning Committee did not recommend renewing its recommendation to develop a statewide poll worker recruitment campaign.

The HAVA Planning Committee recommended continued funding of the three positions providing administrative oversight for HAVA.

The HAVA Planning Committee recommended funding future HAVA Planning Committee meetings at $30,000 for each fiscal year through FY 2005-2006.

The HAVA Planning Committee recommended funding the following future activities:
1. continued development and expansion of the Florida Voter Registration System
2. future improvement to voting technology
3. continued funds for county voter education programs
4. accessibility for polling places
5. poll worker recruitment and training.

The Florida Legislature funded three positions to provide administrative oversight for HAVA in FY 2003-2004.

Element 7- Maintenance of Effort

Element 13. State Plan Development and HAVA Planning Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Introduction
To comply with the requirements of the Help America Vote Act of 2002 (HAVA), the HAVA State Plan must be developed by the chief State election official through a committee of appropriate individuals. After a preliminary plan is developed, it must be published for public inspection and comment. State officials must take public comments into account in preparing the HAVA State Plan submitted to the Federal Elections Commission.

Section 255: Has Florida complied with the requirements of section 255(a) to have the chief State election official develop the HAVA State Plan through a committee of appropriate individuals?

Yes, and no further actions are required.
Florida's Chief State Election Official, Secretary of State Glenda Hood, has the responsibility under HAVA to develop the HAVA State Plan with the assistance of the statewide HAVA Planning Committee. Section 255(a) of HAVA requires that “The chief State election official shall develop the HAVA State Plan under this subtitle through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions within the State, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens, appointed for such purpose by the chief State election official.”

Members of the HAVA Planning Committee for the State of Florida, appointed by Secretary of State Hood, are as follows:

Chairman:
Jim Smith of Leon County, former Secretary of State and former Attorney General

Chief Election Officials of the Two Most Populous Jurisdictions within the State:
Brenda Snipes, Supervisor of Elections for Broward County
Constance Kaplan, Supervisor of Elections for Miami-Dade County

Other Local Election Officials:
Kurt Browning, Supervisor of Elections for Pasco County
Susan Gill, Supervisor of Elections for Citrus County
Shirley Green Knight, Supervisor of Elections for Gadsden County
Stakeholders/Representatives of Groups of Individuals with Disabilities:
Dave Evans, State Board Member of the National Federation of the Blind
Jim Kracht, Assistant County Attorney for Miami-Dade County and member of the American Blind Lawyers Association, American Council of the Blind and the Florida Council of the Blind
Richard LaBelle, Secretary of the Florida Coalition on Disability Rights

Other Stakeholders and Citizens:
Joe Celestin, Mayor of the City of North Miami
Anna Cowin, State Senator from District 20
Jane Gross, President of the Florida League of Women Voters
Jennifer Carroll, State Representative from District 13
Arthur Hernandez, Vice Chairman of the Jacksonville Mayor’s Hispanic American Advisory Board
Percy Luney, Dean and Professor of Law at Florida A&M University
Reggie McGill, Human Relations Director for the City of Orlando
Isis Segarra, private citizen from Hillsborough County
Lori Stelzer, Former President of the Florida Association of City Clerks and City Clerk for the City of Venice
Raiza Tamayo, Regional Director of the United States Hispanic Chamber of Commerce

This HAVA Planning Committee convened two times in public meetings to update the State Plan—Orlando, Florida on May 24, 2004 and Hollywood, Florida on June 4, 2004. All meetings were noticed in the Florida Administrative Weekly. Members of the public and press were welcomed at the meetings. The HAVA Planning Committee heard public comment at each meeting. It was assisted by a non-profit, non-partisan organization, the Collins Center for Public Policy, Inc., that was selected in a public bidding process to serve as staff for the HAVA Planning Committee in updating the HAVA State Plan, and by the Division of Elections of the Florida Department of State.

The HAVA Planning Committee operated in an open process with public deliberations, systematic procedures in accordance with Robert’s Rules of Order, and majority vote of members who were present when votes were taken. A majority quorum of HAVA Planning Committee members was present for the Orlando meeting. At the Hollywood meeting, the HAVA Planning Committee was one member short of meeting a majority quorum. As a result, members present at the Hollywood meeting conducted a workshop on the proposed changes. At the end of the meeting, the nine HAVA Planning Committee members in attendance moved to approve the changes they had discussed. The Collins Center then obtained approval from the members not present at the Hollywood meeting to incorporate the changes into the working draft. The HAVA Planning Committee received two drafts of the final plan before voting to approve the updates and sending the plan to the Division of Elections.
The Collins Center, as staff, prepared written materials for the meetings, made presentations to focus the HAVA Planning Committee on decisions that needed to be made, and took notes of all meetings. A formal transcript of each meeting also was made. All agendas and other published materials for meetings of the HAVA Planning Committee were made available at the meetings. The website of the State Division of Elections also included much of this material.

All meetings were held in accessible facilities and were compliant with the Americans with Disabilities Act. Closed captioning service was available at all meetings. Agendas were printed in Braille as well as Spanish and Creole.

Section 256: Will Florida comply with the requirement of Section 256 to have the HAVA State Plan meet the public notice and comment requirements of HAVA?

Yes, and no further actions are required.

Section 256 of HAVA requires that the HAVA State Plan meet the following public notice and comment requirements:

1. not later than 30 days prior to the submission of the plan, the State shall make a preliminary version of the plan available for public inspection and comment;
2. the State shall publish notice that the preliminary version of the plan is so available; and
3. the State shall take the public comments made regarding the preliminary version of the plan into account in preparing the plan which will be filed with the Election Assistance Commission.

After the final updated HAVA State Plan is submitted to the Election Assistance Commission, that Commission shall cause the HAVA State Plan to be published in the Federal Register in accordance with Section 255(b).

These tasks were performed by the Division of Elections and not by the HAVA Planning Committee or its consultants. The work of the HAVA Planning Committee and its consultants was completed when a preliminary version of the HAVA State Plan was prepared, approved by the HAVA Planning Committee, and submitted to the Secretary of State.

After notice is given in the Florida Administrative Weekly, the preliminary version of the HAVA State Plan will be posted on the Department of State’s and the Governor’s websites. A link is available on the Department’s website so that public comment can be made electronically. Public comments also will be received by U. S. mail. Public comments will be considered in preparing the final plan.

</table>
INSTRUCTIONS TO VOTERS

1. Polls open at 7 a.m. and close at 7 p.m.

2. Sample ballots will be posted in the polling room for your information.

3. When you enter the polling room and before being permitted to vote, you are required to present a photo ID with signature. If you do not have the proper ID, you will be allowed to sign an affidavit and vote.

4. If you are a first-time voter who registered by mail and have not already provided identification to the supervisor of elections, you must provide a photo ID with signature. If you do not have the proper ID, you are allowed to vote a provisional ballot.

5. If you need instructions on how to use the voting equipment, ask a poll worker to assist you. After you have been given instructions, the officer assisting you will leave so that you can cast your vote in secret.

6. You are required to occupy the voting booth alone, unless you requested assistance at the time of registration or when you signed in at the polls.

7. When you are finished marking your ballot, take your ballot and put it into the precinct tabulator.

8. After you cast your vote, you are required to leave the polling room and you will not be allowed to re-enter.

9. If your eligibility is questioned or you are a first-time voter who registered by mail and do not have a photo ID, you will be allowed to vote a provisional ballot. Once you have voted your provisional ballot, place it in the envelope provided to you and fill out the Voter's Certificate on the back of the envelope. Do not put your ballot through the precinct tabulator. Your ballot will be presented to the County Canvassing Board for a determination as to whether your ballot will be counted.

10. The poll workers possess full authority to maintain order in the polling area.

INSTRUCCIONES PARA LOS VOTANTES

Instrucciones para los votantes

1. Las urnas abren a las 7:00 a.m. y cierran a las 7:00 p.m.

2. Para su información, las boletas de muestra estarán desplegadas en el salón de votaciones.

3. Cuando usted entre al salón de votación y antes de que se le permita votar, a usted se le requerirá presentar una identificación con foto y firma. Si usted no tiene la identificación adecuada, a usted se le permitirá firmar una declaración jurada y votar.

4. Si usted es un votante que vota por primera vez y que se ha registrado por correo y aún no ha provisto ya la identificación al supervisor de elecciones, usted deberá proveer una identificación con foto y firma. Si usted no tiene la identificación adecuada, a usted se le permite votar una boleta provisional.

5. Si usted necesita instrucciones sobre cómo usar el equipo de votación, pidale a un trabajador de las urnas que le ayude. Luego que a usted se le hayan dado instrucciones, el oficial que le ayuda se alejará, para que usted pueda echar su voto en secreto.

6. A usted se le requiere ocupar la caseta de votación solo(a), a menos que usted haya pedido ayuda al momento del registro o cuando usted firmó al llegar a las urnas.

7. Cuando usted termine de marcar su boleta, lleve su boleta y póngala en el tabulador del precinto.

8. Luego que usted eche su voto, a usted se le requerirá abandonar el salón de votación y no se le permitirá volver a entrar.

9. Si su elegibilidad es cuestionada o si usted es un votante que vota por primera vez que se registró por correo y no tiene una identificación con foto, a usted se le permitirá votar con una boleta provisional. Una vez usted haya votado con su boleta provisional, coláquela en el sobre que se le proveyó y llene el Voter’s Certificate (Certificado del Votante) al dorso del sobre. No coloque su boleta a través del tabulador del precinto. Su boleta será presentada al County Canvassing Board (Junta Examinadora del Condado) para una determinación en cuanto a contar su boleta o no.

10. Los trabajadores en las urnas poseen plena autoridad para mantener el orden en el área de votación.

**VOTER’S BILL OF RIGHTS**

Each registered voter in this state has the right to:

1. Vote and have his or her vote accurately counted.

2. Cast a vote if he or she is in line at the official closing of the polls in that county.

3. Ask for and receive assistance in voting.

4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.

5. An explanation if his or her registration is in question.

6. If his or her registration is in question, cast a provisional ballot.

7. Prove his or her identity by signing an affidavit if election officials doubt the voter’s identity.

8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.

9. Vote free from coercion or intimidation by elections officers or any other person.

10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

You may have other voting rights under state and federal laws. If you believe your voting rights have been violated, please contact Florida Department of State, Division of Elections, 1-877-868-3737
LA CARTA DE LOS DERECHOS DEL ELECTOR

Todo elector inscrito en este estado tiene el derecho:

1. de votar y de que se cuente con precisión su voto.
2. de que se le permita votar si está en cola para votar cuando estén cerrando oficialmente las urnas en ese condado.
3. de pedir y recibir asistencia para votar.
4. de recibir hasta dos boletas de reemplazo si se equivoca antes de emitir su voto definitivamente.
5. si su inscripción está en duda, de que se le explique el motivo del problema.
6. si su inscripción está en duda, de votar con una boleta provisional.
7. de firmar una declaración jurada para probar su identidad si los funcionarios electorales tienen alguna duda acerca de la identidad del elector.
8. de tener por escrito instrucciones sobre el método de votación para usarlas al votar y, si las pide, de recibir instrucciones verbales por parte de los funcionarios electorales sobre dicho método.
9. de votar sin que lo coaccionen o intimiden los funcionarios electorales ni ninguna otra persona.
10. de votar empleando un sistema que, además de funcionar correctamente, haga posible emitir con precisión los votos.

Usted puede tener otros derechos de la votación bajo el estado y las leyes federales. Si usted cree que sus derechos de la votación se han violado, por favor avise La Sección de Estado de la Florida, la División de Elecciones, 1-877-868-3737.

STATE OF FLORIDA
DEPARTMENT OF STATE

November 10, 2003

Ms. Freslope Bonsall, Director
Office of Election Administration
Federal Elections Commission
999 E Street NW
Washington, D.C. 20463

RE: State of Florida request for waiver pursuant to Section 303(d) of the Help America Vote Act of 2002

Dear Ms. Bonsall:

Section 303(a) of the Help America Vote Act of 2002 requires each state to implement a computerized statewide voter registration list by the January 1, 2004, date specified in Section 303(d)(1)(A) of the same statute. Section 303(d)(1)(B) provides for states to request an extension of the aforementioned deadline until January 1, 2006. The purpose of this correspondence is to certify that, for good cause as outlined below, the State of Florida is unable to meet the January 1, 2004, implementation date called for in Section 303(d)(1)(A), and respectfully requests an extension of the deadline as permitted by law until January 1, 2006.

Florida has a tradition of administering voter registration at the county level jurisdiction. Each of Florida's sixty-seven counties has a constitutionally elected officer known as the supervisor of elections, who is responsible for maintaining voter registration lists in their respective county. Each supervisor of elections is also responsible for determining the type of information technology appropriate for supporting voter registration activities in their jurisdiction and the manner in which registration records are maintained. The steps required to: (1) assess county administered voter registration systems; (2) develop methods for consolidating a variety of voter registration lists with individual nuances into a single computerized statewide system; and (3) provide for future coordination of county voter registration activities with the statewide list will require more time than provided by the January 1, 2004, implementation date.

The Florida Department of State is working diligently to implement a statewide voter registration system that will meet all the requirements of Title III. Some of the steps already taken by the State of Florida in order to develop and implement a statewide voter registration system include: hiring a project director; executing agreements with our state Departments of Highway Safety and Administration; developing a model for a single computerized voter registration list; and developing a coordinated effort, in conjunction with the Secretary of State, to meet the January 1, 2006, deadline established under Section 303(d)(1)(A).

The Florida Department of State, therefore, respectfully requests the following extension of the timeframe outlined in Section 303(d)(1)(A):

In accordance with Section 303(d)(1)(B) of the Help America Vote Act of 2002, the Florida Department of State requests that the United States Election Commission extend Florida's implementation date for development of a computerized statewide voter registration list to February 1, 2004. This extension is necessary to ensure that Florida's implementation of a computerized statewide voter registration list will meet all the requirements of Title III.

Yours sincerely,

Glenda E. Hood
Secretary of State
Motor Vehicles and Law Enforcement that outline data exchange procedures; and creating task groups comprised of county election officials and Department of State personnel in order to address technical and procedural issues relating to the creation of the centralized registration system. Given the steps already taken by the Florida Department of State and the other departments involved, and the scope of the work remaining to be done, I am confident that the State of Florida will be successful in having a statewide computerized voter registration system operational by the January 1, 2006, extended deadline requested herein.

Sincerely,

Glenda E. Hood
Secretary of State
Mr. Brian Hancock  
Office of Election Administration  
Federal Election Commission  
999 E Street, NW  
Washington, D.C. 20463  

Dear Mr. Hancock:  

Attached is the final version of the State of Florida HAVA Plan as required by the Help America Vote Act. The plan is now ready to be published in the Federal Register. Please include the following URL in the introduction to the state plan:  

If you need further information, please let me know.  

Sincerely,  

Edward C. Kast  
Director, Division of Elections
State of Florida
HAVA Plan

State of Florida HAVA State Plan Chart ......................... 71
Dear Election Assistance Commission:

As Chief Election Officer of the State, I am pleased to present the State of Florida HAVA Plan developed pursuant to the Help America Vote Act of 2002. This plan represents Florida's long-range plan for implementing the federal Act, which requires all states to significantly reform the way they conduct elections. As the plan indicates, Florida has already met many of the requirements of HAVA.

Florida's plan was developed through the Help America Vote Act Planning Committee, a group of dedicated individuals representing various constituency groups throughout the State. The plan sets forth the goals of achieving compliance with HAVA and for continuing to improve the elections process in the State of Florida. I commend the Committee for its hard work and diligence in producing the Plan.

As part of the Plan, the Committee was tasked with developing a budget based on the projected federal funds that the State would receive. The Committee considered only those funds projected to be received for the 2003 federal fiscal year. I, along with other election officials throughout the State, encourage Congress to continue the necessary funding to fully implement the requirements of HAVA. Both the State and counties have already spent significant funds to replace outdated voting systems. HAVA allows certain reimbursements for these expenditures and I fully support reimbursement to the State and counties where permissible under the Act. We will continue to examine the possibility of further reimbursement to the state as permitted by HAVA.

This plan recognizes that additional resources are required in order for our Supervisors of Elections to provide continuing voter education to the citizens of the State, to recruit qualified poll workers, and to provide the necessary training for those workers. As Chief Election Officer, I am committed to working closely with and supporting our Supervisors as we continue to ensure Florida voters have every confidence that their vote counts.

Florida will revise and update the plan as necessary to reflect the progress made in implementing HAVA and to chart the future goals and plans for elections. We look forward to continuing our election reform efforts to make this state the model for elections reform throughout the nation.

Glenda E. Hood
Secretary of State
Introduction

Since the aftermath of the General Election of 2000, Florida has led the nation in its election reform efforts to ensure that every registered voter should have the opportunity to vote and to ensure that every vote counts.

The goal is perfection. Reaching that goal in an ever changing democracy and within a diverse population is an ongoing task that requires constant experimentation and learning. The people and the leadership of Florida have dedicated themselves to this course of action.

The struggle for improving our election process reveals itself in many ways. Citizens have increased their involvement by serving on local and State election task forces, researching new voting technologies, debating new standards for poll worker training, increasing voter education opportunities, and registering new voters. The people of Florida continue to make election reform a top priority.

The leadership of Florida has also acted decisively. Florida has enacted legislative and local reforms during the last two years that lead the nation. These reforms include cutting-edge voting system standards, millions of dollars for new voting technology, expanded voter education efforts, and thousands of newly trained poll workers. A statewide poll taken the day of the 2002 General Election found that Floridians gave high marks to the election reform changes including a 91% “excellent-good” rating for poll workers and an 88% confidence rating from voters that their votes will count. These results are not “perfect,” but Florida is moving in a positive direction to make all facets of the election process better each time an election is held.

With the passage and signing of the Help America Vote Act of 2002 (HAVA) on October 29, 2002, election reform will spread throughout the nation. The new federal law asks States to develop election reform plans that will improve election administration in many areas. Florida embraces the new federal law and hopes that other States will use it as an opportunity to share new election reform ideas and practices with one another.

The people of Florida have learned many things about election reform. Yet, there are enduring principles which are reflected within many recommendations and changes of Florida’s election reform efforts. These principles were developed by Florida’s first task force in the aftermath of the 2000 General Election:

**Enduring Principles of Elections**

- Elections are first and foremost acts of millions of individual people: citizens who register and vote; candidates who offer themselves and their platforms for public
judgment; poll workers who put in long days at precincts; and election officials who supervise the process. Honest, responsible, intelligent people will make most technology systems work well.

- Voting should be a simple, convenient and friendly process that encourages each citizen to express his or her choices.
- Voting systems should be designed to determine voter intent, to the extent that is humanly possible.
- Voting methods for statewide and national elections should meet uniform standards and national standards for fairness, reliability and equal protection of voting opportunity.
- Elections must meet two competing objectives: certainty (making every vote count accurately) and finality (ending elections so that governing can begin).
- While voting should be individual and private, procedures for counting and challenging votes should be open, transparent, and easily documented to ensure public confidence in the results.

Fulfilling the promises of these enduring principles will require continued vigilance and action. With this HAVA Plan, Florida continues its journey to mount an increasingly open and fair system of determining the will of the people.

The Help America Vote Act of 2002 requires all States to develop and implement a statewide plan. Listed below are the thirteen primary elements that must be addressed in the plan.

Help America Vote Act of 2002 (HAVA)
Public Law 107-252 – October 29, 2002

SEC. 254. STATE PLAN.
(a) IN GENERAL.—The State plan shall contain a description of each of the following:

Element 1.
How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Element 2.
How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—
A) The criteria to be used to determine the eligibility of such units or entities for receiving the payment; and
B) The methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

**Element 3.**
How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

**Element 4.**
How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

**Element 5.**
How the State will establish a fund described in subsection (b) for purposes of administering the State’s activities under this part, including information on fund management.

**Element 6.**
The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on —
A) The costs of the activities required to be carried out to meet the requirements of Title III;
B) The portion of the requirements payment which will be used to carry out activities to meet such requirements; and
C) The portion of the requirements payment which will be used to carry out other activities.

**Element 7.**
How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

**Element 8.**
How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria,
and a description of which official is to be held responsible for ensuring that each performance goal is met.

**Element 9.**
A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

**Element 10.**
If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

**Element 11.**
How the State will conduct ongoing management of the plan, except that the State may not make any material change in the administration of the plan unless the change —

A) Is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

B) Is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

C) Takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

**Element 12.**
In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

**Element 13.**
A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.
Element 1. Use Of Title III Requirements Payments:

A. Voting Systems

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

Following the 2000 General Election, the people of Florida made a concerted effort to improve all facets of its election procedures, standards and voting systems. The first major changes were the recommendations advanced by the 2001 Governor’s Select Task Force on Election Procedures, Standards and Technology followed by the passage of the Florida Election Reform Act of 2001. A central component of Florida’s new election law mandated the replacement of punch card voting systems, lever machines, paper ballots and central count optical scanning systems with precinct tabulated Marksense voting systems or the Direct Recording Electronic voting systems. The new voting systems were put into service to reduce voter error, to improve tabulation accuracy, and to restore voter confidence in Florida’s elections.

Florida has adopted voting system standards which meet and exceed standards established by the Federal Election Commission. Florida’s voting system standards are reviewed every two years to determine whether they are adequate and effective in carrying out fair and impartial elections. The Bureau of Voting Systems Certification within the Department of State has statutory authority to adopt rules which establish minimum standards for voting systems purchased and used in Florida. Florida’s 67 counties have authority to purchase and to maintain the appropriate certified voting system for their registered voters. During the last two years, the State of Florida has provided $24 million to assist counties in purchasing new certified voting systems.

Only two types of voting systems are certified for use in Florida’s 67 counties—Direct Recording Electronic (DRE or “touchscreen”) voting systems and Marksense with precinct-based tabulation.

There are three manufacturers who have certified voting systems for use in Florida: Diebold; Elections Systems and Software, Inc. (ES&S); and Sequoia Voting Systems, Inc. (SP). Members of the HAVA Planning Committee noted that the certified Diebold voting system currently does not allow visually impaired voters to independently or to privately vote and this is addressed later under Section 301(a)(3)(A) and Section 301(a)(3)(B). The following chart details the types of voting systems used in Florida, the respective manufacturer, and the number of counties using the voting systems.

The Help America Vote Act of 2002 (HAVA) establishes new minimum requirements for administering federal elections. These new voting system requirements are found in Title III of the federal law. The new requirements shape the performance and the administration of voting systems. Florida is in compliance with many of these new federal directives and these are addressed in the HAVA State Plan.

Section 301(a) of HAVA requires that Florida’s voting systems meet the following requirements by January 1, 2006. Florida will be in compliance with all of these requirements by the federal deadline of January 1, 2006.
Section 301(a) Voting System Standards and Requirements

Section 301(a)(1)(A)(i): Do Florida’s voting systems permit the voter to verify in a private and independent manner the votes selected by the voter before the ballot is cast and counted?

Yes, and no further actions are required.
Section 101.5606(1), Florida Statutes, states that no voting system in Florida shall be approved by the Department of State unless it “permits and requires voting in secrecy.”

Florida Voting System Standards (April 2002) state that “the voter must be able to review the candidate selections, which he or she has made. Prior to the act of casting a ballot, the voter must be able to change any selection previously made and confirm the new selection.” (p. 21)

Florida Voting System Standards (April 2002) state that the voting function standards applicable to all Electronic Voter Interfaces must provide “after the initial instructions, which the system requires election officials to provide to each voter, the voter should be able to independently operate the voter interface through the final step of casting a ballot without assistance.” (p. 20)

Section 301(a)(1)(A)(ii): Do Florida’s voting systems provide the voter with the opportunity in a private and independent manner to change the ballot or correct any error before the ballot is cast and counted (including the opportunity to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct the error)?

Yes, and no further actions are required.
Section 101.5606(12), Florida Statutes, requires that electronic voting systems should “permit each voter to change his or her vote for any candidate or upon any question appearing on the official ballot up to the time that the voter takes the final step to register his or her vote and to have the vote computed.”

Section 101.5608(2)(b), Florida Statutes, requires that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, the ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide
instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in the envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Section 301(a)(1)(A)(iii): If the voter selects votes for more than one candidate for a single office, do Florida’s voting systems: (1) notify the voter that the voter has selected more than one candidate for a single office on the ballot; (2) notify the voter before the ballot is cast and counted of the effect of casting the multiple votes for the office; and (3) provide the voter with the opportunity to correct the ballot before the ballot is cast?

Yes, and no further actions are required.

Section 101.5606(3), Florida Statutes, requires voting systems to immediately reject “a ballot where the number of votes for an office or measure exceeds the number which the voter is entitled to cast or where the tabulating equipment reads the ballot as a ballot with no votes cast.”

Section 101.5606(4), Florida Statutes, requires that systems using paper ballots accept a rejected ballot if the voter chooses to cast the ballot after it has been rejected, but the ballot will record no vote for any office that has been overvoted or undervoted.

Section 101.5608(2)(b), Florida Statutes, provides that “Any voter who spoils his or her ballot or makes an error may return the ballot to the election official and secure another ballot, except that in no case shall a voter be furnished more than three ballots. If the vote tabulation device has rejected the ballot, a ballot shall be considered spoiled and a new ballot shall be provided to the voter unless the voter chooses to cast the rejected ballot. The election official, without examining the original ballot, shall state the possible reasons for the rejection and shall provide instruction to the voter pursuant to s. 101.5611. A spoiled ballot shall be preserved, without examination, in an envelope provided for that purpose. The stub shall be removed from the ballot and placed in an envelope.”

Section 101.5611(1), Florida Statutes, requires that the “supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction. Such instruction shall be provided at a place which voters must pass to reach the official voting booth.”

Florida Voting System Standards (April 2002) state that “the system must prevent the voter from over voting any race.” In addition, “there must be a clear, identifiable action, which the voter
takes to ‘cast’ the ballot. The system must make clear to the voter how to take this action, such that the voter has minimal risk of taking the action accidentally, but when the voter intends to cast the ballot, the action can be easily performed.” (p. 21)

Florida Voting System Standards (April 2002) state that “Marksense systems shall reject blank ballots and ballots with overvoted races. Electronic voter interfaces shall prevent a voter from overvoting a race, and shall provide a means of indicating, to the voter, any races that may have been undervoted before the last step necessary to cast the ballot.” (p. 22)

Section 301(a)(1)(B): Does Florida’s mail-in absentee and mail-in ballot process meet the requirements of subparagraph (A)(iii) by: (i) establishing a voter education program specific to that voting system that notifies each voter of the effect of casting multiple ballots for an office; and (ii) providing the voter instructions on how to correct the ballot before it is cast and counted (including instructions on how to correct the error through the issuance of a replacement ballot if the voter was otherwise unable to change the ballot or correct any error)?

Partially meets, and further actions are required.

The Florida Legislature has amended Section 101.65, Florida Statutes, to require the instructions for absentee voters to include the following language:

Mark only the number of candidates or issue choices for a race as indicated on the ballot. If you are allowed to “Vote for One” candidate and you vote for more than one candidate, your vote in that race will not be counted.

Planned action before January 1, 2006:

In addition, the Division of Elections will update Rule 1S-2.032, Florida Administrative Code (F.A.C.), (Uniform and General Election Ballot Design) which will make it clear to absentee voters how to correct their ballots and how to request a replacement ballot if the voter is unable to change or correct the original ballot.

The HAVA Planning Committee also suggested that absentee voters should be given clear notification that the deadline for submitting absentee ballots is by 7:00 p.m. of election night and that mailing the ballot may not ensure that it will arrive in time to be counted.
Section 301(a)(1)(C): Does Florida’s absentee and mail-in ballot process preserve the privacy of the voter and the confidentiality of the ballot?

Yes, and no further actions are required.
Section 101.65, Florida Statutes, requires supervisors of elections to enclose with each absentee ballot a separate printed instruction form, a secrecy envelope, a Voter’s Certificate and a mailing envelope. The instructions provide the following guidelines:

- Mark your ballot in secret as instructed on the ballot. You must mark your own ballot unless you are unable to do so because of blindness, disability, or inability to read or write.
- Place your ballot in the enclosed secrecy envelope.
- Insert your secrecy envelope into the enclosed mailing envelope which is addressed to the supervisor.

Section 101.68(2)(d), Florida Statutes, contains a detailed policy and procedure instructing the local canvassing boards in the manner of handling absentee ballots to ensure that the confidentiality of the ballot is maintained.

Section 301(a)(2)(A): Do Florida voting systems produce a record for audits?
Section 301(a)(2)(B): Do the voting systems produce a permanent paper record with a manual audit capacity?
Section 301(a)(2)(C): Is the paper record produced in subparagraph (A) available as an official record for any recount conducted with respect to any election in which the system is used?

Yes, and no further actions are required.
The HAVA Planning Committee determined through research conducted by staff, through testimony offered by Congressional staff, and through testimony given by staff from the Division of Elections that Florida complies with the HAVA audit requirement. Florida voting system standards require DRE machines to maintain a random sorted file of ballot images for every vote cast, and they also have to maintain detailed logs for each election from the time they are first programmed for an election until the results are copied to archival media. Certified voting systems in Florida are required to print out a paper tape of summary totals in each precinct. The paper record is produced to reconcile the consolidated totals for the county in the event of a recount.

Staff from the Division of Elections testified before the HAVA Planning Committee that Florida’s State and local security measures make it highly unlikely any tampering could take place with the voting systems. In addition, staff also testified that Florida’s certified voting
systems are tested in public forums for logic and accuracy before the election. There are also thorough procedural and security controls in place at the local level to safeguard against someone tampering with the voting systems. The Division of Elections' staff cited Rule 1S-2.015(5)(m)3.a., F. A. C., relating to minimum election security procedures which requires the "printing of precinct results and results from individual tabulating devices" for every election. In addition, the Florida Legislature has authorized the Department of State to promulgate rules which would require supervisors to check those paper totals against electronic totals during machine recounts. The following statutes and rules lay the groundwork for Florida’s ability to comply with the audit requirements of HAVA:

Section 101.015(5)(a), Florida Statutes, requires the Department of State to adopt rules which establish standards for voting systems, including audit capabilities.

Section 101.5606(11 & 13), Florida Statutes, requires the Department of State to approve only voting systems that are capable of automatically producing precinct totals in printed, marked, or punched form or a combination thereof. The voting systems must be capable of providing records from which the operating system of the voting system may be audited.

Florida Voting System Standards (April 2002) provide general functional requirements of voting systems which “shall include the capability to produce records, generated by the system components, or in some cases, by the system operators from which all operations may be audited. Except for the storage of vote images, which shall be maintained in a random sequence, the records shall be created and maintained in the sequence in which the operations were performed.” (pp. 16-17)

Florida Voting System Standards (April 2002) require precinct count systems to provide a means for obtaining a printed report of the votes counted on each voting device, and to provide a means for extracting this information to a transportable memory device or data storage medium. (p. 23)

Florida Voting System Standards (April 2002) require the generation of reports by the system to be performed in a manner which does not erase or destroy any ballot image, parameter, tabulation or audit log data. The system shall provide a means for assuring the maintenance of data integrity and security for a period of at least 22 months after the closing of the polls. (p. 24)

Section 102.166(5)(d), Florida Statutes, requires the Department of State to adopt detailed rules prescribing additional manual recount procedures for each certified voting system which shall be uniform to the extent practicable. The rules shall address, at a minimum, the following areas:

- Security of ballots during the recount process
- Time and place of recounts
- Public observance of recounts
• Objections to ballot determinations
• Record of recount proceedings
• Procedures relating to candidate and petitioner representatives

Section 301(a)(3)(A): Does Florida have certified voting systems for individuals with disabilities, including non-visual accessibility for the blind and visually impaired, in a manner that provides the same opportunity for access and participation (including privacy and independence) as for other voters?

Section 301(a)(3)(B): Does Florida meet the requirement in subparagraph (A) through the use of at least one direct recording electronic voting system or other voting system equipped for individuals with disabilities at each polling place?

Partially meets, and further actions are required.
In 2001, the Secretary of State appointed a task force to conduct a comprehensive review of Florida’s election laws and procedures. The task force recommended legislation to insure that Florida’s voters with disabilities could fully exercise their right to a secret ballot, as guaranteed by Florida’s Constitution. Many of the recommendations of the task force were passed by the Legislature and signed into law by Governor Bush in 2002 and are found in Chapter 2002-281, 

`Laws of Florida`.

Several sections of the law, including sections setting forth specific standards that voting systems must meet, did not become effective immediately, however. They were made contingent on further appropriations by the Legislature, in expectation of the receipt of federal funding as now provided in HAVA.

Most of Florida’s largest populated counties have voluntarily purchased voting systems that comply with the accessibility requirements of HAVA. However, Florida’s uniform standards regarding voting system requirements (Section 101.56062, `Florida Statutes`), including one accessible machine per precinct, will be effective only when the Florida Legislature adopts a mechanism for funding this law. As a result, the current practice leaves it up to each county to determine how and where such accessible systems are deployed. This does not comply with the requirements of HAVA. Further, there is no statutory or regulatory requirement, beyond the constitutional mandate referred to above, that requires the other counties to comply with the accessibility standards.

HAVA requires that all voting systems be accessible to persons with disabilities, but does not specifically define what is required to accomplish this. HAVA’s definition of what constitutes a voting system, however, found in Section 301(b), is comprehensive. Florida has already done the difficult and time consuming work of defining what makes a Florida voting system accessible for persons with disabilities and these standards are found in Chapter 2002-281, `Laws of Florida`. However, as noted above, many sections are not currently in effect. Some slight additional changes to Florida law will need to be made to include provisional ballots, which HAVA
requires to be accessible, within Florida’s accessibility requirements.

Not only has Florida already enacted much of the required accessibility reforms required by HAVA, but the intent of the Legislature to comply fully with Federal requirements is clearly set out in statute. Section 101.56063, Florida Statutes, provides that:

It is the intent of the Legislature that this state be eligible for any funds that are available from the Federal Government to assist states in providing or improving accessibility of voting systems and polling places for persons having a disability. Accordingly, all state laws, rules, standards, and codes governing voting systems and polling place accessibility must be maintained to ensure the state’s eligibility to receive federal funds. It is the intent of the Legislature that all state requirements meet or exceed the minimum federal requirements for voting systems and polling place accessibility.

What is left to do in order to comply with HAVA is to make all sections of Chapter 2002-281, Laws of Florida, effective. Without making these sections effective, and thus making Florida’s voting systems accessible to people with disabilities, Florida will not comply with this requirement of HAVA and will not be able to certify its compliance in order to draw down all available HAVA funds. Making these sections effective requires legislative action. Failure by the Legislature to take action will result in Florida not being able to qualify for all available HAVA funds.

In addition to the above, Florida must take steps now in the certification and system procurement processes to insure that it is able to meet the HAVA requirements in time. HAVA requires that voting systems themselves, not just Florida law, must meet the accessibility requirements by January 1, 2006. The HAVA Planning Committee heard testimony from Division of Elections’ staff who cautioned that Florida cannot compel any voting systems vendor to bring equipment to the State for certification. Staff testimony further noted that the lack of available certifiable equipment has been a significant problem in the past that continues to the present. With the proper incentives for vendors and tools for counties to require compliance with accessibility standards, Florida will be able to comply with HAVA requirements by January 1, 2006.

Accordingly, the HAVA Planning Committee recommends that the Division, beginning July 1, 2003, require that all new certified voting systems comply with the requirements of Section 101.56062, Florida Statutes. Further, any purchase of a voting system by a governmental entity after July 1, 2003 should be required to include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes. Finally, all voting systems in use as of January 1, 2006, should be required to be both certified to meet, and be deployed in a configuration that meets, the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.
For Florida to comply with HAVA and to be eligible for federal funds pursuant to HAVA, action by the Legislature should include the following specific recommendations of the HAVA Planning Committee:

1. Trigger the disability accessibility standards found in Chapter 2002-281 by either:

   A. Enacting specific language in the budget that meets the requirements of Section 22, Chapter 2002-281 and appropriates funds to the Department of State for distribution to the counties for the specific purpose of funding Chapter 2002-281; or

   B. Enacting a HAVA Implementation Bill that provides that Sections 4, 5, 6, 8, 9, 10, 11, 14, and 19 Chapter 2002-281, be effective no later than January 1, 2006, and that Section 12 of Chapter 2002-281 is effective on January 1, 2006.

2. Mandating that provisional ballots for voters with disabilities shall be provided to them by a system that meets the requirements of section 101.56062, Florida Statutes, by January 1, 2006.

3. Enact a HAVA Implementation Bill requiring:

   A. All electronic and electromechanical voting systems certified by the State after July 1, 2003, must meet the requirements of Section 101.56062, Florida Statutes, (except subsection (1)(d), which is exempted in the statute);

   B. Any purchase of a voting system by any county, municipality or by the State after July 1, 2003 must include a contract for future upgrades and sufficient equipment to meet the requirements of Section 101.56062 and Section 101.5606, Florida Statutes; and

   C. All electronic and electromechanical voting systems in use on or after January 1, 2006 must be certified to meet and be deployed in a configuration which meets the requirements of Section 101.56062 and Section 101.5606, Florida Statutes.

The recommended budget proposed under Element 6 of this plan recommends using a portion of the requirements payments to become compliant with the disability voting system requirements.

Section 301(a)(3)(C): Will Florida purchase voting systems with funds made available under Title II on or after January 1, 2007, that meet the voting system standards for disability access (as outlined in this paragraph)?

Yes, and no further actions are required.
Section 301(a)(4): Does Florida have certified voting systems that provide alternative language accessibility pursuant to the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa-1a)?

Yes, and no further actions are required.
In order to be certified for use in Florida, DRE voting systems must provide alternative language accessibility for all interfaces in order to meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a). Florida Voting System Standards (April 2002) require that all configurations must support all voter interface functions in at least the following languages: English, Spanish, and Haitian Creole. (p. 22)

Counties using Marksense voting systems must meet the requirements of Section 203 of the Voting Rights Act of 1965 (42 U.S.C. 1973aa through 1a) by printing ballots in the required languages.

Section 301(a)(5): Does Florida have certified voting systems that comply with the error rate standards established under section 3.2.1 of the voting systems standards issued by the Federal Elections Commission which are in effect on the date of the enactment of this Act?

Yes, and no further actions are required.
Florida Voting System Standards (April 2002) contain voting system accuracy standards which exceed the error standards established by the Federal Elections Commission. (pp. 35-36)

Section 301(a)(6): Has Florida adopted uniform and nondiscriminatory standards that define what constitutes a vote and what will be counted as a vote for each category of voting systems used in the State?

Yes, and no further actions are required.
Section 102.166(5)(a), Florida Statutes, states that “a vote for a candidate or ballot measure be counted if there is a clear indication on the ballot that the voter has made a definite choice.”

Section 102.166(5)(b), Florida Statutes, requires the Department of State to “adopt specific rules for each certified voting system prescribing what constitutes a ‘clear indication on the ballot that the voter has made a definite choice.’ The rules may not:
1. Exclusively provide that the voter must properly mark or designate his or her choice on the ballot; or
2. Contain a catch-all provision that fails to identify specific standards, such as ‘any other mark or indication clearly indicating that the voter has made a definite choice.”
Rule 1S-2.027, F. A. C., entitled "Clear Indication of Voters Choice on a Ballot" provides specific standards for determining votes on optical scan ballots.
Element 1. Use of Title III Requirements Payments:
   B. Provisional Voting and Voting Information

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Section 302(a) Provisional Voting Requirements
The Help America Vote Act of 2002 (HAVA) requirements for provisional voting state that if an individual declares that he or she is a registered voter in the jurisdiction in which they are attempting to vote but their name does not appear on the official list of eligible voters, they are to be permitted to cast a provisional ballot.

Section 302(a)(1) Do Florida’s election laws require election officials at the polling place to notify individuals that they may cast a provisional ballot?

Yes, and no further actions are required.
Section 101.031(2), Florida Statutes, states that the supervisor of elections in each county shall have posted at each polling place in the county the Voter’s Bill of Rights and Responsibilities. Included in the Voter’s Bill of Rights is the right of each registered voter to cast a provisional ballot, if his or her registration is in question.

The Division of Elections' Polling Place Procedures Manual instructs pollworkers to read informational signs that appear in print on the walls of the polling place and to offer magnifying sheets for visually impaired voters.

In addition, modifications to Section 101.043(3), Florida Statutes, were included in Chapter 2003-415, Laws of Florida, which is effective January 1, 2004. This change provided that certain first-time voters would be allowed to vote a provisional ballot.

Section 302(a)(2) Do Florida’s election laws state that any person attempting to vote whose name does not appear on the official list of eligible voters be permitted to cast a provisional ballot at the polling place upon the execution of a written affirmation by the individual that they are: (A) a registered voter in the jurisdiction in which the individual desires to vote; and (B) eligible to vote in that election.

Yes, and no further actions are required.
Section 101.048(1), Florida Statutes, states that any voter claiming to be properly registered and eligible to vote, but whose eligibility cannot be determined, will be given a provisional ballot. A Provisional Ballot Voter’s Certificate and Affirmation must be completed by the individual...
casting a provisional ballot indicating that they are registered to vote and are a qualified voter of the county in which they are attempting to vote, and that they have not previously voted in the election.

**Section 302(a)(3) Do Florida’s election laws require a completed provisional ballot be given to an appropriate State or local election official to determine whether the individual is eligible under State law to vote?**

Yes, and no further actions are required. Section 101.048(1), *Florida Statutes*, states that all provisional ballots are placed in a secrecy envelope and then sealed in a provisional ballot envelope. All provisional ballots shall remain sealed in their envelopes for return to the supervisor of elections.

Section 101.048(2)(a), *Florida Statutes*, states the county canvassing board shall examine each provisional ballot envelope to determine if the person voting that ballot was entitled to vote at the precinct where the person cast a vote in the election and that the person had not already cast a ballot in the election.

**Section 302(a)(4) Is the provisional ballot counted if the appropriate State or local election official determines the individual is eligible under State law to vote?**

Yes, and no further actions are required. Section 101.048(2)(b)1., *Florida Statutes*, states that if it is determined that the person was registered and entitled to vote at the precinct where the person cast a ballot, the canvassing board will compare the signature on the provisional ballot envelope with the signature on the voter’s registration record and, if it matches, will count the ballot.

**Section 302(a)(5)(A) Are the individuals who cast a provisional ballot given written information that states that any individual who casts a provisional ballot will be able to ascertain whether the vote was counted and, if not, the reason that the vote was not counted?**

Yes, and no further actions are required.

Chapter 2003-415, *Laws of Florida*, amends Section 101.048 to provide that each person casting a provisional ballot shall be given written instructions regarding the free access system. The instructions shall contain information on how to access the system along with the information the voter will need to provide in order to obtain information on his or her particular ballot.
Section 302(a)(5)(B) Has the appropriate State or local election official established a free access system to provide this information to individuals casting provisional ballots?

No, and further actions are required.

Planned action before January 1, 2004:
Chapter 2003-415, *Laws of Florida*, requires each supervisor of elections to establish a free access system that allows each person who casts a provisional ballot to determine whether his or her provisional ballot was counted in the final canvass of votes and, if not, the reasons why.

It is recommended that each county, as a minimum, provide to voters who cast provisional ballots written notification by mail informing them of whether their ballot was counted and, if not, why it was not counted. Supervisors of elections are also strongly encouraged to develop a toll-free number or access to this information via the Internet.

Each supervisor of elections will establish the free access system for their county by January 1, 2004.

Section 302(a)(5)(B) Has the appropriate State or local official established procedures to protect the security, confidentiality and integrity of the personal information collected and stored by the free access system, restricting access to the individual who cast the ballot?

Yes, and no further actions are required.

Chapter 2003-415, *Laws of Florida*, requires the free access system established by the supervisors of elections to restrict access to information regarding an individual ballot to the person who cast the ballot.
Section 302(b) Voting Information Requirements
HAVA requirements for voting information state that the appropriate State or local election official shall cause voting information to be publicly posted at each polling place on the day of each election for Federal office.

Section 302(b)(2)(A) Is a sample version of the ballot that will be used for that election posted?

Yes, and no further actions are required.
Section 101.20, Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. The sample ballots shall be in the form of the official ballot as it will appear at the polling place on election day. Sample ballots shall be open to inspection by all electors in any election.

Section 302(b)(2)(B) Is information regarding the date of the election and the hours during which polling places will be open posted on election day?

Yes, and no further actions are required.
Information such as the hours of operation of polling places and the date of the election are provided on instructional cards and sample ballots. Section 101.031, Florida Statutes, requires the Department of State, or in case of municipal elections the governing body of the municipality, to print, in large type on cards, instructions for the electors to use in voting. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

Currently, all cards that are posted in polling places include the hours the polls will be opened.

Section 101.20(1), Florida Statutes, states that two sample ballots shall be furnished to each polling place by the officer whose duty it is to provide official ballots. Sample ballots shall be open to inspection by all electors in any election, and a sufficient number of reduced-size ballots may be furnished to election officials so that one may be given to any elector desiring same.

Currently, all sample ballots posted in polling places include the date of the election.

Section 302(b)(2)(C) Are instructions on how to vote, including how to cast a vote and how to cast a provisional ballot posted on election day?
No, and further actions are required.
Section 101.031, *Florida Statutes*, states the Department of State, or in case of municipal elections the governing body of the municipality, shall print, in large type on cards, instructions for the electors to use in voting. It shall provide not less than two cards for each voting precinct for each election and furnish such cards to each supervisor upon requisition. Each supervisor of elections shall send a sufficient number of these cards to the precincts prior to an election. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary.

In addition, Section 101.5611, *Florida Statutes*, states the supervisor of elections shall provide instruction at each polling place regarding the manner of voting with the system. The supervisor of elections shall provide instruction on the proper method of casting a ballot for the specific voting system utilized in that jurisdiction.

Many counties have voting instructions in the voting booth and some provide verbal instruction. However, these instructions do not include how to cast a provisional ballot and Florida will have to revise its instructions to meet this requirement.

During the 2002 legislative session, Senate Bill 1350 was passed amending Section 97.026, *Florida Statutes*, and stated that all forms required to be used in chapters 97 through 106 shall be made available upon request, in alternative formats. However, this statute is not in effect during the development of this Plan.

**Planned action before January 1, 2004:**
The Department of State will revise the instructions to electors, which are posted at the polls on election day, to include information regarding how to cast a vote and how to cast a provisional ballot.

Section 302(b)(2)(D) Are instructions for mail-in registrants and first-time voters under section 303(b) posted on election day?

No, and further actions are required.

**Planned action before January 1, 2004:**
Under Section 101.031(1), *Florida Statutes*, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.
The cards provided at each polling place, which are posted on election day for inspection by voters, will be modified by the Department of State to include instructions for mail-in registrants and first-time voters.

Section 302(b)(2)(E) Is general information on voting rights, including information on the right of an individual to cast a provisional ballot posted on election day?

Yes, and no further actions are required.

Section 101.031(2), Florida Statutes, requires the supervisor of elections in each county to have posted at each polling place the Voter's Bill of Rights and Responsibilities. The Voter's Bill of Rights states that each registered voter in this State has the right to:

1. Vote and have his or her vote accurately counted.
2. Cast a vote if he or she is in line at the official closing of the polls in that county.
3. Ask for and receive assistance in voting.
4. Receive up to two replacement ballots if he or she makes a mistake prior to the ballot being cast.
5. An explanation if his or her registration is in question.
6. If his or her registration is in question, cast a provisional ballot.
7. Prove his or her identity by signing an affidavit if election officials doubt the voter's identity.
8. Written instructions to use when voting, and, upon request, oral instructions in voting from elections officers.
9. Vote free from coercion or intimidation by elections officers or any other person.
10. Vote on a voting system that is in working condition and that will allow votes to be accurately cast.

Section 302(b)(2)(E) Is contact information posted for voters who allege their rights have been violated?

No, and further actions are required.

Planned action before January 1, 2004:
Under Section 101.031(1), Florida Statutes, the Department of State is required to print, in large type on cards, instructions for the electors to use in voting. The election inspectors shall display the cards in the polling places as information for electors. The cards shall contain information about how to vote and such other information as the Department of State may deem necessary. The cards must also include the list of rights and responsibilities afforded to Florida voters.

The cards provided at each polling place, which are posted on election day as information for electors, will be modified by the Department of State to include contact information for voters who believe their voting rights have been violated.
Section 302(b)(2)(F) Is information on laws regarding prohibitions on acts of fraud and misrepresentation posted?

Yes, and no further actions are required.
Section 101.5611(2), Florida Statutes, requires the supervisor of elections to have posted at each polling place a notice that reads: "A person who commits or attempts to commit any fraud in connection with voting, votes a fraudulent ballot, or votes more than once in an election can be convicted of a felony of the third degree and fined up to $5,000 and/or imprisoned for up to 5 years."

Section 302(c) Are individuals who vote in an election as a result of a court order or any other order extending the time established for closing the polls by a State law required to cast a provisional ballot? This provisional ballot must be separated and held apart from other provisional ballots cast by those not affected by the order.

Yes, and no further actions are required.

Chapter 2003-415, Laws of Florida, created s. 101.049, Florida Statutes, to require any person voting in an election after the regular poll-closing time pursuant to a court or other order extending the statutory polling hours to vote a provisional ballot. Once voted, the provisional ballot shall be placed in a secrecy envelope and sealed in a provisional ballot envelope. All such provisional ballots will remain sealed and transmitted to the supervisor of elections separate and apart from all other ballots. The supervisor shall ensure that late-voted provisional ballots are not commingled with other ballots.

Section 302(d) The effective date for complying with the Provisional Voting and Voting Information requirements is on and after January 1, 2004.

For each requirement in which Florida does not currently comply, planned action for meeting the requirements will take place by January 1, 2004.
Element 1. Use of Title III Requirements Payments:

C. Voter Registration

How the State will use the requirements payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Introduction

The Help America Vote Act of 2002 (HAVA) establishes minimum requirements for a single, centralized, computerized statewide voter registration list and for mail registration as a part of establishing and maintaining such a list.

The effective and efficient administration of elections depends in a major way on the completeness and accuracy of voter registration lists that can be checked quickly and reliably by election workers. Section 303(a) of HAVA establishes minimum requirements for a “single, uniform, official, centralized, interactive, computerized, statewide voter registration list which shall be the single system for storing and managing the list of registered voters throughout the state for the conduct of all federal elections.”

Because many voters register by mail instead of in person, the procedures used for mail registration are an important component of establishing and maintaining a complete and accurate statewide voter registration list. Section 303(b) of HAVA requires that a state’s mail voter registration system be administered in a “uniform and nondiscriminatory manner” and establishes minimum requirements for such a system.

Until recently, Florida’s voters have relied primarily on voter registration lists established and maintained by independent supervisors of elections in each of Florida’s 67 counties. These lists are governed by Florida law that specifies qualifications to register or vote, a registration oath, a uniform statewide voter registration application form, acceptance of applications by supervisors of elections, closing of registration books, late registration, declinations to register, special registration for electors requiring assistance, registration identification card, disposition of applications and procedures for cancellation, notices of changes of address, and operation of registration offices. See Sections 97.032 through 97.055, 97.0585 through 97.105, 98.015 through 98.095, and 98.101 through 98.491, Florida Statutes.

Additional requirements for establishing and maintaining voter registration lists were enacted in the Federal Voting Rights Act of 1965 and the National Voter Registration Act of 1993 ("Motor

---

1 A permanent single voter registration system for each Florida county, used for all public elections in that county, improved on practices in early Florida history of requiring separate registrations for municipal elections and new registrations for each new election. See Section 97.105, Florida Statutes.
Voter Law"). Sections 97.057 through 97.0583, Florida Statutes, and other provisions of Florida law implemented those Federal laws in the State by providing for registration of voters by the Department of Highway Safety and Motor Vehicles, voter registration agencies, and qualifying educational institutions.

In 1997, the Florida Legislature established a “central voter file” in the Division of Elections that contained voter registration information from all counties. Section 98.097, Florida Statutes.

Following the 2000 General Election, the Florida Legislature enacted the Florida Election Reform Act of 2001 that took additional steps to require complete and accurate voter registration lists in the counties and to establish a statewide voter registration database. Sections 98.0977 through 98.0979, Florida Statutes, authorized the Department of State to “…analyze, design, develop, operate, and maintain a statewide, on-line voter registration database and associated website, to be fully operational statewide by June 1, 2002. The database shall contain voter registration information from each of the 67 supervisors of elections in this state and shall be accessible through an Internet website. The system shall provide functionality for ensuring that the database is updated on a daily basis to determine if a registered voter is ineligible to vote for any of the following reasons, including, but not limited to:

(a) The voter is deceased;

(b) The voter has been convicted of a felony and has not had his or her civil rights restored; or

(c) The voter has been adjudicated mentally incompetent and his or her mental capacity with respect to voting has not been restored.

The database shall also allow for duplicate voter registrations to be identified.”

This statewide database was established in time for use in the 2002 General Elections. Requirements for pre-clearance by the U.S. Department of Justice (DOJ) and negotiations for settlement of a lawsuit by the NAACP delayed use of parts of the database concerning eligibility of voters identified as potentially ineligible because of a felony conviction or adjudication of mental incapacity. With the receipt of DOJ clearance and settlement of the lawsuit now accomplished, the Division of Elections will begin running matches when all issues related to the settlement agreement have been resolved.

---

2 A “voter registration agency” is defined by Section 97.012(37), Florida Statutes as “…any office that provides public assistance, any office that serves persons with disabilities, any center for independent living, or any public library.”
Section 303(a) Computerized Statewide Voter Registration List Requirements

Section 303(a)(1)(A)(i)-(vii) and 303(a)(2): Does Florida’s existing statewide database meet requirements for implementing and maintaining a single, uniform, official, centralized, interactive computerized statewide voter registration list defined, maintained, and administered at the State level that contains the name and registration information of every legally registered voter in the State and assigns a unique identifier to each legally registered voter in the State and includes information specified in HAVA?

No, and further actions are required.
Florida has made great strides in recent years in establishing a centralized, computerized statewide voter registration database but that database does not meet the requirements of HAVA Section 303(a)(1)(A) for a single statewide voter registration list “...defined, maintained, and administered at the State level...[with] a unique identifier [assigned] to each legally registered voter in the State...” which serves, under HAVA Section 303(a)(1)(A)(vii), as “…the official voter registration list for the conduct of all elections for Federal office in the State.” HAVA Section 303(a)(1)(A)(i) further defines this requirement by specifying that “The computerized list shall serve as the single system for storing and managing the official list of registered voters throughout the State.” HAVA Section 303(a)(1)(A) also specifies that the chief State election official (in Florida the Secretary of State) shall implement and maintain the single statewide voter registration list.

Florida currently has 67 official voter registration lists, one established and maintained in each county, that are compiled into the statewide voter registration database required by the Florida Election Reform Act of 2001. The 67 county-based lists, not the statewide database, are the official voter registration lists for voters in Florida. The statewide database is intended primarily to assist supervisors of elections to determine if voters are ineligible to vote (deceased, convicted felons who have not had civil rights restored, or adjudicated as mentally incompetent). It also is intended to identify those voters who are listed more than once. It is not intended to serve as “...the single system for storing and managing the official list of registered voters throughout the State...” as required by HAVA. Information in the statewide database is made available to county supervisors of elections who are responsible for making final determinations of a voter’s eligibility and for updating voter registration records.

HAVA’s requirement for a single computerized statewide voter registration list cannot be fulfilled quickly. In addition to designing and implementing such a single system that is interactive and assigns unique identifiers to each voter, HAVA requires the system to have adequate technological security measures [HAVA Section 303(a)(3)], meet minimum standards of accuracy and currency [HAVA Section 303(a)(4)], provide for verification with other information such as driver’s license numbers and Social Security numbers [HAVA Section 303(a)(5)], and meet other standards. Meeting these requirements and standards will take time, expertise and money.
The Legislature has appropriated $1 million and nine staff positions to create a master design, including a business plan and budget, for a single statewide voter registration system by January 2004. This design would permit the 2004 Legislature to take action to authorize the implementation of a new single computerized statewide voter registration list in time for the 2006 elections. This timing assumes that the State of Florida will be granted a waiver under HAVA to have a single statewide voter registration system in place by January 1, 2006, instead of by the existing deadline of January 1, 2004. (The requirement for a waiver is discussed subsequently.)

In the meantime, the Division of Elections has been meeting with representatives of the Florida State Association of Supervisors of Elections, the Department of Highway Safety and Motor Vehicles, the Department of Law Enforcement, the Board of Executive Clemency, the State Technology Office and health officials to begin to find ways to coordinate databases maintained by those agencies as part of the single centralized statewide voter registration list. Because HAVA Sections 303(a)(5)(A)(i)(I) and (II) require an applicant for voter registration to provide either a current and valid driver's license number or supply the last four digits of the applicant's Social Security number, HAVA Sections 303(a)(5)(B)(i)-(ii) require that the State enter into agreements to share such information with the Department of Highway Safety and Motor Vehicles and with the Social Security Administration.

HAVA's requirements are minimum requirements. Florida may establish technology and administrative requirements that are stricter than the Federal requirements as long as they are not inconsistent with HAVA's requirements and other laws, such as the Motor Voter Act, or in conflict with the privacy provisions of the Florida Constitution. See HAVA Section 304.

### Section 303(d) Deadlines for Computerized Statewide Voter Registration List

**Section 303(d)(1)(A): Can Florida meet HAVA's requirement to have operational a computerized statewide voter registration list, as defined by HAVA, by January 1, 2004?**

No, and further actions are required.

The State practically cannot meet the January 1, 2004, deadline. Substantial professional and technical work must be done to design and establish a computerized statewide voter registration list that meets HAVA's standards. Although design of such a system can be ready by January 2004, implementation of the system will take a year or more beyond that date. Chapter 2003-415, *Laws of Florida*, authorizes the State to seek a waiver from the Federal Election Assistance Commission permitted under HAVA Section 303(d)(1)(B) from January 1, 2004, to January 1,
2006, if the State “...will not meet the deadline...for good cause and includes in the certification
the reasons for the failure to meet such deadline....”

Section 303(b) Requirements for Voters Who Register By Mail

Section 303(b)(1) through (4): Does Florida meet HAVA’s identification requirements for a
voter who registers by mail and has not previously voted in an election for Federal office in
the State or registers by mail, has not previously voted in the jurisdiction and is in a State
that does not have a computerized statewide voter list that meets HAVA’s requirements?

Yes, and no further actions are required.
HAVA requires persons who register by mail and have not voted in an election for federal office
to provide identification prior to voting. If the State is able to match the voter’s driver’s license
number or Social Security number against an existing State record bearing the same number,
name and date of birth, further identification by the voter is not required.

HAVA Sections 303(b)(2)(i) through (ii) require that a first-time voter who votes in person may
be identified by a current and valid photo identification or a copy of a current utility bill, bank
statement, government check, paycheck, or other government document that shows the name and
address of the voter. A voter who votes by mail may include with the ballot a copy of a current
and valid photo identification or a copy of the other documents listed for the voter who appears
in person. An exception is made in HAVA Section 303(b)(3) for mail registrants who provide a
copy of required identification at the time of registering, mail registrants whose driver’s license
number or last 4 digits of the Social Security number are matched with an existing State record,
and for those who vote under the Uniformed and Overseas Citizens Absentee Voting Act, the
Voting Accessibility for the Elderly and Handicapped Act, or under some other provision of
Federal law (in which case the specific standards of those acts must be met).

Chapter 2003-415, Laws of Florida, amends the following sections of Florida law to conform to
HAVA’s mail registration and other voter registration requirements:

Section 97.052(3)(g), Florida Statutes, to require a statement with the uniform statewide voter
registration form that informs the applicant that if the form is submitted by mail and the applicant
is registering for the first time, the applicant will be required to provide identification prior to
voting for the first time.

Section 97.053(5)(a), Florida Statutes, that permits the use of a valid Florida driver’s license
number or the identification number from a Florida identification card issued under Section
322.051, Florida Statutes, for purposes of voter registration.

Section 97.0535, Florida Statutes, that specifies at length the requirements for identification that
a first-time voter can use and that complies with other HAVA requirements outlined previously.
Section 101.043, *Florida Statutes*, (a transfer and renumbering of Section 98.471, *Florida Statutes*) to permit a voter to submit to a poll worker at the time of voting a current and valid picture identification with a signature.

**Section 303(b)(4): Does Florida meet HAVA’s requirement for language in the mail voter registration form under Section 6 of the National Voter Registration Act of 1993?**

Yes, and no further actions are required.

HAVA requires that mail voter registration forms under Section 6 the National Voter Registration Act shall include the following:

(i) The question ‘Are you a citizen of the United States of America?’ and boxes for the applicant to check to indicate whether the applicant is or is not a citizen of the United States.

(ii) The question ‘Will you be 18 years of age on or before election day?’ and boxes for the applicant to check to indicate whether or not the applicant will be 18 years of age or older on election day.

(iii) The statement ‘If you checked ‘no’ in response to either of these questions, do not complete this form.’

(iv) A statement informing the individual that if the form is submitted by mail and the individual is registering for the first time, the appropriate information required under this section must be submitted with the mail-in registration form in order to avoid the additional identification requirements upon voting for the first time.”

Section 97.052(2)(b) and (r), *Florida Statutes*, requires that the uniform statewide voter registration form must be designed to elicit information from the applicant about the applicant’s date of birth and whether the applicant is a citizen of the United States. The form itself, available on the Division of Elections’ website at [http://election.dos.state.fl.us](http://election.dos.state.fl.us), asks for date of birth and asks “Are you a U.S. citizen?” It does not use the specific language required by HAVA.

Chapter 2003-415, *Laws of Florida*, amends Section 97.052, *Florida Statutes*, by adding subsection (g) that requires language about the need for appropriate identification for first time mail applications. It does not require the specific HAVA language about age and citizenship.

The Division of Elections has reviewed this matter orally with Federal legislative and executive representatives and has concluded that the requirement applies only to Federal applications under Section 6 of the National Voter Registration Act. It believes that putting such language on State application forms will confuse voters and discourage first-time registrants. The age question, for instance, does not specify the exact election day to which it is referring and assumes that young
voters may be applying to register for a specific election rather than pre-registering as 17 year-olds in order to vote in all elections after they reach the age of 18. The Division notes that the forms used by Florida already elicit the information required by asking for date of birth and citizenship. The forms do not discourage voters by telling them to stop with the application if they must answer "No" to either question. The Division is complying with the substance of HAVA if not with the exact form of the question.
Element 2. Local Government Payments and Activities

How the State will distribute and monitor the distribution of the requirements payments to units of local government or other entities in the State for carrying out the activities described in paragraph (1), including a description of—

(A) the criteria to be used to determine the eligibility of such units or entities for receiving the payment; and

(B) the methods to be used by the State to monitor the performance of the units or entities to whom the payment is distributed, consistent with the performance goals and measures adopted under paragraph (8).

Introduction

The Florida Legislature has broad constitutional authority for appropriating federal and State funds annually through the appropriations bill which is eventually signed by the Governor into law. During the annual appropriations process, the Florida Legislature assesses the needs of the State and makes policy and budget decisions which impact every level of government including local government.

The funding of elections in Florida is primarily a local government responsibility since the constitutional authority for running elections rests with the local supervisor of elections. Funding authority for elections resides with the Boards of County Commissioners. Each of Florida’s 67 Boards of County Commissioners receives a budget request from the supervisor of elections and then the Board makes policy and budget decisions based upon county priorities.

There has been one major exception to this election funding scenario. Following the controversial 2000 General Election, the Governor and the citizens of Florida asked the Legislature to enact broad election reforms which included providing State financial assistance to local governments. Over a two-year period, the Legislature provided over $32 million in State funds to supplement local election budgets and to quicken the pace of election reform in Florida. Most of the State funds were appropriated to the Boards of County Commissioners using two different formulas for accomplishing distinct policy goals—to replace voting systems designated to be decertified and to enact comprehensive voter education programs in every county.

The funding formula used to upgrade voting systems had two important policy goals—to provide a minimum voting system standard of precinct-based optical scanning systems throughout Florida and to provide funding assistance to small counties with very small tax bases. The resulting formula achieved that policy goal and was as follows:
• Small Counties (population 75,000 or below) received $7,500/precinct
• Large Counties (population 75,001 and above) received $3,750/precinct

The Legislature used a different formula to provide State funds for voter education and poll worker recruitment and training. This formula was based upon taking available State funds and distributing them on a per registered voter basis per county. The resulting formula was determined by taking approximately $6,000,000 in available State funds and dividing it by the number of registered voters during the 2000 General Election and appropriating that money on a pro-rata basis to each county. The resulting appropriation provided $5,949,375 to counties to fund comprehensive voter education programs and poll worker recruitment and training programs. The combined State and local efforts led to greater voter satisfaction during the 2002 General Election.

Pursuant to the appropriation, the Florida Legislature required each county supervisor of elections to submit a detailed description of the plans to be implemented and also a detailed report on the success of the voter education effort. These reports were sent to the Division of Elections and subsequently compiled by the Division into a report sent to the Governor and Florida Legislature.

While the State funds were widely valued, the counties still provided a majority of funding for election reform efforts. According to the 2002 Governor's Select Task Force on Election Procedures, Standards and Technology, a survey of 33 county governments revealed they spent nearly $110 million toward new voting systems before the 2002 primary and general elections.

If the Florida Legislature determines that it will provide funding for units of local governments and other entities, then how will the requirements payments be distributed and monitored, including—

A. A description of the criteria used to determine the eligibility of such units and entities for receiving payment.

B. A description of the methods to be used by Florida to monitor the performance of the units of entities to whom the payments is distributed, consistent with the performance goals and measures adopted under paragraph (8).

The Help America Vote Act of 2002 (HAVA) Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. During HAVA Planning Committee discussions, members proposed several recommendations that would provide funding for units of local government. The recommended payments to local government are listed below:
Replacement and Reimbursement For Punch Card And Lever Machines
The HAVA Planning Committee recommends that the estimated $11.74 million received pursuant to Section 102 of HAVA be distributed to the State and to the counties on a pro-rated basis for their respective contributions to replace punch cards and lever machines during the 2001-2002 and 2002-2003 fiscal years.

Accessible Voting Systems for Voters With Disabilities
The HAVA Planning Committee recommends that HAVA funds should be distributed to counties during the 2004-2005 fiscal year to help them meet Section 301 Title III accessibility requirements by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of machines accessible for persons with disabilities needed for each county to have one per polling place. The Division of Elections would have the responsibility for determining eligibility of counties receiving HAVA funds.

Secondly, if HAVA funds are available, the HAVA Planning Committee recommends that HAVA funds be distributed as a reimbursement on a pro-rated basis to local governments that purchased accessible voting systems and components during the 2001 and 2002 fiscal years.

Statewide Voter Education Program
For the 2003-2004, 2004-2005, and 2005-2006 fiscal years, the HAVA Planning Committee recommends that local governments receive a total of $9 million dollars ($3 million each fiscal year) for comprehensive voter education efforts. HAVA funds for voter education should be distributed using a similar formula as used in 2001. The Division of Elections should be responsible for determining eligibility of any county for the receipt of State or federal funds used in HAVA election reform activities.

The Division of Elections should be responsible for monitoring the use of funds in accordance with established State procedures. Prior to receiving any funds from the Division, each of Florida’s 67 supervisors of elections must enter into a contractual agreement with the State. The contract must affirm what the funds are to be used for and it must provide proof that the counties have matching dollars, if required.

The Division of Elections will monitor the performance of the contract agreements entered into between the State and each county. Each county must meet the contractual requirements before payment is approved.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures may include random program

---

3 The 2003 General Appropriations Act passed by the Legislature required the Department of State to transfer all amounts eligible for reimbursement under Section 102 of HAVA to the State's Working Capital Fund.
audits by the Department of State’s Inspector General as well as an annual audit by the Florida Auditor General’s office to ensure funds are being expended for the authorized purposes.

To monitor the use of the voter education funds at the local level, the HAVA Planning Committee recommends that the Florida Legislature require each county to establish a fund to be used to deposit funds received from the federal or State governments for election reform activities. If a county match is required, it will also be deposited into this account. The funds will not be commingled with other funds which may be appropriated to the supervisor of elections by the county. Funds in this account will be used for the activities for which the funds were received and, unless otherwise specified in the appropriation, there is no requirement for the funds to be used during a certain time.

Also during the 2003-2004, 2004-2005, and 2005-2006 fiscal years, the Division of Elections recommends that the Department of Highway Safety and Motor Vehicles and the Florida Department of Law Enforcement receive HAVA funding to assist in the development of the new statewide voter registration system. The Division of Elections will enter into a contractual agreement with these other state-level departments and monitor the contracts in accordance with standard auditing procedures for monitoring the use of federal funds.
Element 3. Voter Education, Election Official Education & Training, Poll Worker Training

How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of Title III.

Introduction

A wide array of national and State task force reports have highlighted the need for a more informed electorate. To achieve this goal, voters, election officials, and poll workers must receive better information and training. Florida assigns the primary responsibility for these daunting tasks to the Department of State and the county supervisors of elections. Following election 2000, the Legislature has more clearly delineated the role of each in improving the education of voters, election officials, and poll workers.

The Florida Election Reform Act of 2001 set deadlines, included a wide array of topics to be addressed by State and county election officials, granted rule making authority to the Department of State, and established a procedure for measuring the effectiveness of the programs and making recommendations to the Governor and the State Legislature. Various acts passed during the 2002 legislative session broaden the scope of voter education responsibilities, more definitively spell out voter rights, and ensure that Florida’s electoral system conforms to the Americans with Disabilities Act of 1990. Each of these changes has been communicated to election officials at all levels and to the public at-large.

The Election Reform Act of 2001 required all 67 county supervisors of elections to file voter education plans with the Division of Elections in the Department of State in order to qualify for State funds. (The Act appropriated nearly $6 million for voter education in fiscal year 2001-2002 in addition to $24 million for purchase of new voting equipment, fiscal years 2001-2003.) The Department of State, as directed by the Legislature, established minimum standards for nonpartisan voter education to be met by each county.

Voter education plans filed with the Division of Elections in the Secretary of State’s office are filled with creative approaches. These outreach mechanisms are designed by the elections supervisors:

(1) to better inform their county’s residents about registration and voting; and,
(2) to reduce the levels of voter error and confusion that existed during the 2000 election cycle.

The approaches used by the 67 individual counties vary considerably, reflecting differences in their demographic and socioeconomic composition (e.g., land area, rural-urban location, age, race/ethnicity, education), county funding levels, and media availability.
Significant changes to Florida’s election laws and the advent of new voting equipment have made poll worker education a high priority—as recognized in the Florida Election Reform Act of 2001. Florida’s counties have restructured their poll worker training programs. State law now requires supervisors of elections to cast their poll worker recruitment nets wider, as the number of poll workers needed escalates in a fast-growing state.

Section 254(a)(3). How will the State of Florida provide for programs for voter education which will assist the State in meeting the requirements of Title III?

Florida has adopted extensive voter education requirements and funded county voter education programs ($6 million in 2001). The Help America Vote Act of 2002 (HAVA) Planning Committee recommends an additional $3 million in each of the next three fiscal years for local voter education programs.

Joint Responsibility of Department of State and County Supervisors of Elections
Section 98.255(1), Florida Statutes, directed the Department of State to “adopt rules prescribing minimum standards for nonpartisan voter education” by March 1, 2002. The standards were to address (but were not limited to):

(1) voter education;
(2) balloting procedures for absentee and polling place;
(3) voter rights and responsibilities;
(4) distribution of sample ballots; and,
(5) public service announcements.

In developing the rules, the Department was instructed to “review current voter education programs within each county of the state.” The Department of State adopted Rule 1S-2.033, F. A. C., Standards for Nonpartisan Voter Education on May 30, 2002.

Section 98.255(2), Florida Statutes, requires each supervisor of elections to “implement the minimum voter education standards” and “to conduct additional nonpartisan education efforts as necessary to ensure that voters have a working knowledge of the voting process.”

Minimum Nonpartisan Voter Education Standards
The Department of State’s “Standards for Nonpartisan Voter Education,” Rule 1S-2.033, F. A. C., requires the following voter education practices:

Comprehensive Voter Guide: Contents
Department of State Rule 1S-2.033, F. A. C., Standards for Nonpartisan Voter Education, requires supervisors of elections to create a Voter Guide which shall include: how to register to
vote; where voter registration applications are available; how to register by mail; dates for
upcoming elections; registration deadlines for the next primary and general election; how voters
should update their voter registration information such as changes in name, address or party
affiliation; information on how to obtain, vote and return an absentee ballot; voters' rights and
responsibilities pursuant to Section 101.031, Florida Statutes; polling information including
what times the polls are open, what to bring to the polls, list of acceptable IDs, what to expect at
the polls; instructions on the county's particular voting system; supervisor contact information;
and any other information the supervisor deems important.

Voter Guide: Extensive Distribution
Department of State Rule 1S-2.033(1)(b), F.A.C., requires supervisors of elections to “provide
the Voter Guide at as many places as possible within the county including: agencies designated
as voter registration sites pursuant to the National Voter Registration Act; the supervisor's office;
public libraries; community centers; post offices; centers for independent living; county
governmental offices; and at all registration drives conducted by the supervisor of elections.”

Voter Guide, Sample Ballot, & Website Consistency Required
Department of State Rule 1S-2.033(2), F.A.C., states that: “If a supervisor has a website, it must
take into account all of the information that is required to be included in the Voter Guide. In
addition, when a sample ballot is available, the website must provide either information on how
to obtain a sample ballot or a direct hyperlink to a sample ballot.”

Targeted Voter Education: High School Students
Florida's Department of State Rule 1S-2.033(3), F.A.C., instructs the supervisors of elections to
work with county school boards to develop voter education and registration programs for high
school students. Specifically, the rule requires that “At least once a year in each public high
school in the county, the supervisor shall conduct a high school voter registration/education
program. The program must be developed in cooperation with the local school board and be
designed for maximum effectiveness in reaching and educating high school students.”

Targeted Voter Education: College Students
Florida's Department of State Rule 1S-2.033(4), F.A.C., dictates that “At least once a year on
each college campus in the county, the supervisor shall provide a college registration/education
program. This program must be designed for maximum effectiveness in reaching and educating
college students.”

Targeted Voter Education: Senior Citizens and Minority Groups
Department of State Rule 1S-2.033(7), F.A.C., requires supervisors of elections to “conduct
demonstrations of the county's voting equipment in community centers, senior citizen
residences, and to various community groups, including minority groups.” Rule 1S-2.033(8),
F.A.C., specifically instructs the supervisors to use minority media outlets to provide more
information to voters.
Targeted Voter Education: Individuals and Groups Sponsoring Voter Registration Drives
Department of State Rule 1S-2.033(6), F.A.C., specifically instructs supervisors of elections to "provide, upon reasonable request and notice, voter registration workshops for individuals and organizations sponsoring voter registration drives." Section 98.015(9), Florida Statutes, states that "each supervisor must make training in the proper implementation of voter registration procedures available to any individual, group, center for independent living, or public library in the supervisor's county."

Posting of Educational Materials on Voter Rights and Responsibilities
Department of State Rule 1S-2.033(5), F.A.C., requires supervisors of elections to "post the listing of the voters’ rights and responsibilities pursuant to Section 101.031, Florida Statutes, at the supervisor’s office." Section 101.031(2), Florida Statutes, spells out the specific format of the Voter’s Bill of Rights and Responsibilities to be posted by the supervisor of elections at each polling place. The Department of State, or in case of municipal elections the governing body of the municipality, is required "to print, in large type on cards, instructions for electors to use in voting," including the list of rights and responsibilities and other information about how to vote deemed necessary by the Department of State—Section 101.031(1), Florida Statutes. At least two cards shall be provided to each precinct.

Educating Voters About Polling Place and Precinct Changes, Revised Voter Identification Cards
Department of State Rule 1S-2.033, F.A.C., mandates that supervisors of elections “shall provide notice of changes of polling places and precincts to all affected registered voters.” “This notice shall include publication in a newspaper of general circulation as well as posting the changes in at least ten conspicuous places in the county. If the supervisor has a website, the supervisor shall post the changes on the website. The supervisors shall also widely distribute a notice that if a voter does not receive a revised voter identification card within 20 days of the election the voter should contact a specific number at the supervisor’s office to obtain polling place information.”

Voter Education Through the Media
Department of State Rule 1S-2.033(8), F.A.C., requires supervisors of elections to interface with the media to better inform the electorate. Supervisors are to “participate in available radio, television and print programs and interviews, in both general and minority media outlets, to provide voting information.”

Voter Education Through the Internet
The Division of Elections’ website (http://election.dos.state.fl.us/) offers extensive information regarding registration, elections (dates, district maps, results, Division reports, forms, publications, voter turnout, supervisor of elections’ contact information), voter fraud, voting systems, laws/opinions/rules, candidates and committees, the initiative petition process, and other helpful government links.
Voter Education About Fraud
Section 97.012(12), Florida Statutes, requires the Secretary of State to “…provide election fraud education to the public.”

Procedures for Constant Analysis of Voter Education Effectiveness
Section 98.255(3)(a), Florida Statutes, requires supervisors of elections to file a report by December 15 of each general election year with the Department of State. This report is “a detailed description of the voter education programs implemented and any other information that may be useful in evaluating the effectiveness of voter education efforts.”

Section 98.255(3)(b), Florida Statutes, requires the Department of State to review the information submitted by the supervisors and “prepare a public report on the effectiveness of voter education programs” and to “submit the report to the Governor, the President of the Senate, and the Speaker of the House of Representatives by January 31 of each year following a general election.”

Further, Section 98.255(3)(c), Florida Statutes, instructs the Department of State to use “the findings in the report as a basis for adopting modified [voter education] rules that incorporate successful voter education programs and techniques as necessary.”

This procedure was first used in the 2002 election cycle. The Division of Elections requested each supervisor of elections to list in detail the voter education programs conducted during the 2002 election cycle and the approximate cost of each program. The supervisors were asked to rank the effectiveness of each program on a scale of 1 to 5, with 5 being the highest possible rank. On January 31, 2003, the Florida Department of State, Division of Elections, submitted its “Report on Voter Education Programs During the 2002 Election Cycle Pursuant to Section 98.255(3), Florida Statutes.” The report concluded that “most supervisors ranked the county voter education programs as 4 or 5 in effectiveness in reaching the target community.” (There were ten broad categories of voter education programs: sample ballots; elementary/middle school/high school/university and community college outreach; websites; miscellaneous promotional materials; public appearances/television and movie theatre advertisements; banners and billboards, radio and public transport advertisements; newspapers and mailers; voting system demonstrations; outreach to minority, disabled and senior communities; and voter registration drives.) The Department of State made three recommendations in its post-election 2002 report:

(1) The Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts;
(2) The Legislature should require sample ballots to be mailed to households or voters prior to each Primary and General Election.
(3) The Division of Elections should provide a list of cost-effective voter education programs used by counties so that all counties can benefit from these ideas.
(The 2002 Governor’s Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002 also recommended improving “voter education by requiring all supervisors of elections to mail generic sample ballots to each household with registered voters.”)

Section 101.595, Florida Statutes, also requires supervisors of elections to submit a report to the Department of State no later than December 15 of each general election year detailing “[t]he total number of overvotes and undervotes in the first race appearing on the ballot pursuant to Section 101.151(2), along with the likely reasons for such overvotes and undervotes and other information as may be useful in evaluating the performance of the voting system and identifying problems with ballot design and instructions which may have contributed to voter confusion.” The Department of State must prepare a report analyzing that information and submit it to the Governor, the President of the Senate, and the Speaker of the House by January 31 of the year following a general election. The report is to include recommendations for correcting any problems with ballot design or instructions to voters.

This procedure was first used in the 2002 election cycle. “Analysis and Report of Overvotes and Undervotes for the 2002 General Election Pursuant to Section 101.595, Florida Statutes” found a substantial reduction in the level of overvotes and undervotes in 2002 (compared to 2000) and concluded that new technology and the counties’ voter education efforts were major factors contributing to the reduction in voter error. The report’s recommendations were:

1. The Division of Elections should continue to monitor the overvotes and undervotes from each general election.
2. The Florida Legislature should provide funding, contingent upon appropriations from Congress through the Help America Vote Act, to the counties for voter education efforts.
3. The Division of Elections should review the recommendations for ballot instructions for incorporation into the uniform ballot rule.
4. All voting system vendors should continue to improve the design of their voting systems in order to better meet the needs of Florida’s voters.

Florida’s system for constant evaluation of the effectiveness of voter education by both the county supervisors of elections and the Department of State is in place and operating.

What needs to be done? Educational materials must be updated to provide absentee voters with better instructions on how to mark a ballot and how to correct their ballots and how to request a replacement ballot if the voter is unable to change the original ballot. (This is necessary to meet Section 301(a)(1)(B) HAVA requirements.) This will be done once the amendment to Section 101.65, Florida Statutes, becomes law and Department of State rule changes have been adopted. Both are expected to be in effect by January 1, 2004—before the HAVA deadline of January 2006.
Educational materials must be updated giving a voter written notice at the time of casting a provisional ballot that he or she can find out if the ballot was counted, or if not, why, through a free access system, restricted to the individual voter—Section 302(a)(5)(A)&(B) HAVA requirements.

Educational materials available to voters at the polling place must be updated to conform to HAVA voting information requirements—Section 302(b)(2)(A through F) to post: sample ballots at polls; the election date; identification instructions for mail registrants who are first time voters; and information on who to contact if general voting rights under State and federal laws are violated.

Educational materials should be updated as needed to include information on law and rule changes. The procedures for informing Florida voters, election officials, and poll workers of these changes are in place in statutes and rule making authority.

Section 254(a)(3). How will the State of Florida provide for programs for election official education and training which will assist the State in meeting the requirements of Title III?

The State has assigned responsibility for education and training of election officials to the Secretary of State. The Division of Elections prepares and distributes educational materials for, and conducts the training of, supervisors of elections and their staffs.

The Secretary of State is the State’s chief election officer whose responsibilities are spelled out in Section 97.012, Florida Statutes. Among those responsibilities are explicit requirements to: “provide technical assistance to the supervisors of elections on voter education and election personnel training services;” “provide technical assistance to the supervisors of elections on voting systems;” “provide training to all affected state agencies on the necessary procedures for proper implementation of [Chapter 97 of the Florida Statutes];” and “coordinate with the United States Department of Defense so that armed forces recruitment offices administer voter education in a manner consistent with the procedures set forth in [Florida election] code for voter registration agencies.”

The Division of Elections conducts voter education and election personnel training, issues advisory opinions that provide statewide coordination and direction for interpreting and enforcing election law provisions, provides technical advice on voting systems and equipment and State and federal election laws, certifies voting equipment, and provides written election information to candidates (Office of Policy Analysis and Government Responsibility, Justification Review, Report No. 02-55, October 2002).

The Division of Elections oversees and approves training courses for continuing education for supervisors of elections. It coordinates, on an annual basis, two statewide workshops for the
supervisors of elections by reviewing and providing updates on the election laws to ensure uniformity statewide in the interpretation of election laws. These are generally held in conjunction with the Florida State Association of Supervisors of Elections' Conferences held in January and June. The division oversees certification for supervisors of elections through which supervisors obtain credits to maintain job proficiency. The Division may also conduct regional workshops for supervisors and staff, universities, and community colleges, and State agencies. When Select Task Forces are created by the Governor, Secretary of State, or other State officials, the Division provides administrative and technical assistance. (Florida Department of State, Division of Elections, 2001 Annual Report).

All Division of Elections' forms, rules, handbooks, opinions, etc. are available on the Internet via the Division’s website—an award-winning site (http://election.dos.state.fl.us/). Section 97.026, Florida Statutes, states “It is the intent of the Legislature that all forms required to be used in chapters 97-106 [the election code], shall be made available upon request, in alternative formats” including the Internet (with the exception of absentee ballots).

The HAVA Planning Committee recommends that the Division of Elections also conduct training courses for the continuing education of city election officials in conjunction with meetings of the Florida Association of City Clerks.

**Section 254(a)(3). How will the State of Florida provide for programs for poll worker training which will assist the State in meeting the requirements of Title III?**

Florida has adopted extensive poll worker recruitment and training requirements and funded county poll worker training (as part of the $6 million voter education appropriation in 2001). The State has: adopted minimum-hours-of-training requirements; spelled out training content requirements; prepared a uniform polling place procedures manual; and mandated a statewide and uniform program for training poll workers on issues of etiquette and sensitivity with respect to disabled voters.

State law permits inspectors, clerks, and deputy sheriffs attending poll worker training to receive compensation and travel expenses—Section 102.021(2), Florida Statutes.

**Joint Responsibility of Department of State and County Supervisors of Elections**

Section 102.014, Florida Statutes, assigns responsibility for poll worker training to county supervisors of elections and the Department of State.

Section 102.014(1), Florida Statutes, requires supervisors of elections to conduct training for inspectors, clerks, and deputy sheriffs prior to each primary, general, and special election “for the purpose of instructing such persons in their duties and responsibilities as election officials.” Training is mandatory to work at the polls.
Section 102.014(5), *Florida Statutes*, directs the Department of State to “create a uniform polling place procedures manual and adopt the manual by rule” and to revise it “as necessary to address new procedures in law or problems encountered by voters and poll workers at the precincts.” Rule 18-2.034, *F.A.C.*, Polling Place Procedures Manual (Form DS-DE 11; 4/02), was adopted on July 4, 2002. The manual, to be available in either hard copy or electronic form at every precinct on Election Day, must be “indexed by subject, and written in plain, clear, unambiguous language.”

Under Section 102.014(7), *Florida Statutes*, the Department is assigned the responsibility for developing “a mandatory, statewide, and uniform program for training poll workers on issues of etiquette and sensitivity with respect to voters having a disability.” But county supervisors of elections are responsible for conducting such training. They are required to “contract with a recognized disability-related organization, such as a center for independent living, family network on disabilities, deaf service bureau, or other such organization, to develop and assist with training the trainers in disability sensitivity programs.”

**Poll Worker Training Content**

The content of poll worker training is detailed in State statutes.

Clerks must demonstrate “a working knowledge of the laws and procedures relating to voter registration, voting system operation, balloting and polling place procedures, and problem-solving and conflict-resolution skills”—Section 102.014(1), *Florida Statutes*.

The Uniform Polling Place Procedures Manual must include: regulations governing solicitation by individuals and groups at the polling place; procedures to be followed with respect to voters whose names are not on the precinct register; proper operation of the voting system; ballot handling procedures; procedures governing spoiled ballots; procedures to be followed after the polls close; rights of voters at the polls; procedures for handling emergency situations; procedures for dealing with irate voters; the handling and processing of provisional ballots; and security procedures—Section 102.014(5)(a-k), *Florida Statutes*. The manual “shall provide specific examples of common problems encountered at the polls on election day, and detail specific procedures for resolving those problems.”

Poll worker training on issues of etiquette and sensitivity for disabled voters “must include actual demonstrations of obstacles confronted by disabled persons during the voting process, including obtaining access to the polling place, traveling through the polling area, and using the voting system”—Section 102.014(7), *Florida Statutes*.

**Poll Worker Minimum Hours of Training**

Section 102.014(4), *Florida Statutes*, specifies that clerks must have had a minimum of three hours of training prior to each election to be eligible to work at the polls. For inspectors, there is
a minimum of two hours of training. Section 102.014(7), Florida Statutes, requires one hour involving training related to etiquette and sensitivity with regard to voters with disabilities.

Poll Worker Recruitment
Supervisors of elections are required to “work with the business and local community to develop public-private programs to ensure the recruitment of skilled inspectors and clerks”—Section 102.014(6), Florida Statutes.

What needs to be done? There is no established procedure for evaluating the effectiveness of poll worker training or recruitment as there is for voter education. The 2002 Governor’s Select Task Force on Election Procedures, Standards, and Technology report of December 30, 2002, recommended “establishing minimum standards for poll worker performance” and “improving poll worker recruitment and training by launching a statewide “Be a Poll Worker” campaign.

The HAVA Planning Committee recommends that the Division of Elections establish a procedure to evaluate the effectiveness of poll worker recruitment and training in all 67 counties.
Element 4. Voting System Guidelines and Process

How the State will adopt voting system guidelines and processes which are consistent with the requirements of Section 301.

Introduction
There are several governmental bodies and agencies that participate in the adoption of voting systems in Florida. The Florida Legislature has great authority to set voting system requirements and does so in Chapter 101, Florida Statutes. The legislature also delegates rule making and certification authority to the Bureau of Voting Systems Certification in the Division of Elections under the Secretary of State.

After voting systems are independently tested and certified for use in Florida, Section 101.5604, Florida Statutes, provides that the Board of County Commissioners “at any regular or special meeting called for the purpose, may, upon consultation with the supervisor of elections, adopt, purchase or otherwise procure, and provide for the use of any electronic or electromechanical voting system approved by the Department of State in all or a portion of the election precincts of that county.”

To keep Florida’s voting systems standards up-to-date, Section 101.015, Florida Statutes, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”

Section 254(a)(4) How will the State of Florida adopt voting system requirements and processes which are consistent with the requirements of Section 301?

Florida’s laws and regulations for adopting voting systems that are consistent with the requirements of Section 301 are clearly outlined in Florida Statutes and the Florida Voting Systems Standards.

Section 101.015, Florida Statutes, authorizes the Department of State to adopt rules which establish minimum standards for hardware and software for electronic and electromechanical voting systems.

Section 101.017, Florida Statutes, creates the Bureau of Voting Systems Certification which provides technical support to the supervisors of elections and is responsible for voting system standards and certification.

Section 101.5605, Florida Statutes, authorizes the Department of State to examine and approve voting systems through a public process to ensure that the voting systems meet the standards...
outlined in Section 101.5606, *Florida Statutes*, and similar standards outlined in the Help America Vote Act of 2002 (HAVA) requirements outlined in Section 301 of Title III.

Section 101.5604, *Florida Statutes*, authorizes the Board of County Commissioners to adopt voting systems.

Sections 101.293-101.295, *Florida Statutes*, outline the public bidding process that counties should follow in purchasing voting systems.

Section 101.56062, *Florida Statutes*, exceeds the accessibility standards of HAVA Section 301 “Accessibility for Individuals With Disabilities.” The HAVA Planning Committee has recommended that the Florida Legislature take advantage of federal funding and bring Florida into compliance and make Section 101.56062, *Florida Statutes*, effective by January 1, 2006 or one year after general appropriations are made, whichever is earlier.

Section 101.015, *Florida Statutes*, requires the Department of State to review “the rules governing standards and certification of voting systems to determine the adequacy and effectiveness of such rules in assuring that elections are fair and impartial.”
Element 5. Florida’s Help America Vote Act of 2002 (HAVA) Election Fund

How the State will establish a fund described in subsection (b) for purposes of administering the State’s activities under this part, including information on fund management.

To clarify, Section 254(b) states that a fund described in this subsection with respect to a State is a fund which is established in the treasury of the State government, which is used in accordance with paragraph (2), and which consists of the following amounts:

(A) Amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made to the State under this part.
(B) The requirements payment made to the State under this part.
(C) Such other amounts as may be appropriated under law.
(D) Interest earned on deposits of the fund.

Section 254(a)(5) How will the State of Florida establish a fund for the purpose of administering the State’s activities under this part?

All HAVA funds will be maintained in a trust fund that has already been established by the Department of State. Within this trust fund, monies received for HAVA Sections 101, 102 and Title II will be set up into four accounts: 101-Election Administration, 102-Replace Punch Card and Lever Voting Systems, 251-Requirements Payment, and 261-Access for Individuals with Disabilities.

Section 254(a)(5) How will the State of Florida manage this fund?

Any HAVA funds received by the State will be used exclusively for activities authorized by HAVA. The Division of Elections is responsible for tracking and monitoring the use of funds in accordance with established State procedures.

The Director of the Division of Elections will have final signing authority for HAVA expenditures. Any interest earned on this trust fund will be returned to the principal amount of the trust.

Standard auditing procedures for monitoring the use of federal funds will be used for the receipt and the distribution of HAVA funds. These standard procedures include random program audits by the Department of State Inspector General as well as an annual audit by the Florida Auditor General.
The Governor and Secretary of State will be responsible under HAVA for ensuring compliance with these requirements. The HAVA Planning Committee recommends that the Governor and the Secretary of State maintain contact with the Senate President and the Speaker of the House of Representatives to ensure they remain aware of the strict requirements set in law for the use of HAVA monies placed in this trust fund.
Element 6 – Florida’s Budget for Implementing the Help America Vote Act of 2002 (HAVA)

The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available, including specific information on—

(A) the costs of the activities required to be carried out to meet the requirements of Title III;
(B) the portion of the requirements payment which will be used to carry out activities to meet such requirements; and
(C) the portion of the requirements payment which will be used to carry out other activities.

Introduction
The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. This budget reflects the HAVA Planning Committee’s best efforts to divide the funds that may be available during the three years identified in HAVA. If Florida receives more funds than are included in this budget, the HAVA Planning Committee will revise the budget to reflect this change.

During the HAVA Planning Committee discussions, members determined the following to be priorities for using HAVA funds in Florida:

Reimbursement for replacement of punch card and lever machines.
Following the 2000 General Election, the State of Florida assisted counties by investing approximately $24 million to replace outdated voting machines. Under Section 102 of HAVA, the State of Florida is eligible to receive as a reimbursement approximately $11.7 million. The HAVA Planning Committee recommends that HAVA funds be distributed to the State and to each county that replaced outdated punch card and lever voting machines following the 2000 General Election on a pro rata basis.

Statewide Voter Registration System.
The HAVA Planning Committee recommends $1 million in HAVA funds be used for Phase One development of the statewide voter registration system required under Title III. These funds will be used for a variety of consulting fees, purchases of hardware and software for system development, expenses incurred by staff in the Division of Elections and travel expenses for advisory board members who assist with design of the project.
For the development and operation of the new statewide voter registration system required under HAVA, the HAVA Planning Committee recommends that the State of Florida create nine new positions.

- Two positions under the Department of Highway Safety and Motor Vehicles
- Two positions under the Department of Law Enforcement
- Five positions under the Department of State

It is anticipated that a significant portion of HAVA funds will be used for the design and implementation of the statewide voter registration database. Research conducted during Phase One of the system development will provide the State of Florida with an estimate of the cost of the new voter registration system. A preliminary estimate of $18.5 million has been included in this budget. However, a more precise figure will be determined during Phase One of the system development process and the HAVA Planning Committee will include this new figure in the next update of the HAVA State Plan, if available.

**Section 301 Accessible Voting Systems**
The HAVA Planning Committee recommends, in order to meet HAVA accessibility for voters with disabilities requirements, the purchase of Direct Recording Equipment (DRE) accessible to persons with disabilities to ensure that each county has one accessible voting system for each polling place. The estimated cost is $11.6 million during the 2004-2005 fiscal year.

In addition, the HAVA Planning Committee recommends reimbursing counties that have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million.

**Voter Education**
The HAVA Planning Committee recommends using HAVA funds for the development and implementation of a comprehensive statewide voter education program. The estimated expenditure is a total of $9 million distributed to the counties and spread over the 2003-2004, 2004-2005 and 2005-2006 fiscal years.

**Poll Worker Training**
The HAVA Planning Committee recommends using HAVA funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds are intended to supplement each county’s existing poll worker training budget.
Statewide Pollworker Recruitment Campaign
The HAVA Planning Committee recommends that HAVA funds be used to implement, through the Division of Elections, a statewide campaign to help recruit qualified pollworkers. The increase in the complexity of voting systems and procedures has resulted in a need for more computer literate individuals to staff the polling places and help ensure error-free elections. It is estimated that $500,000 in HAVA funds should be expended by the Department of State in the 2003-2004 fiscal year.

HAVA Oversight and Reporting
The HAVA Planning Committee recommends that the Department of State create three full time positions to manage HAVA implementation. The estimated cost for HAVA oversight and reporting is $206,079 for the 2003-2004 fiscal year, $196,485 for the 2004-2005 fiscal year and $200,719 for the 2005-2006 fiscal year.
- HAVA administrator
- Grants specialist
- Administrative assistant

State Management (HAVA Planning Committee)
The HAVA Planning Committee recommends that the Secretary of State require it to meet twice each year in 2003-2004 and in 2004-2005 to make recommendations and to resubmit the HAVA State Plan to ensure that Florida is meeting the requirements of the Help America Vote Act. This participatory process will convene once in the 2003-2004 fiscal year at an estimated cost of $30,000, twice in the 2004-2005 fiscal year at an estimated cost of $60,000 and once in the 2005-2006 fiscal year at an estimated cost of $30,000.

Performance Goals and Measures Adoptions
The HAVA Planning Committee recommends the Secretary of State utilize the HAVA Planning Committee to determine performance goals and measures. The estimated cost is $160,000 to be expended in the 2003-2004 and 2004-2005 fiscal years.

Election Administration
The HAVA Planning Committee recommends HAVA funds be used for the design and production of new voter registration forms and publications, and translations for all election administration forms and publications. The estimated cost is $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006.
Complaint Procedures
Section 402(a) of HAVA requires each State to establish State-based administrative complaint procedures for any person who believes that there is or will be a violation of any of HAVA’s Title III requirements. The HAVA Planning Committee recommends that HAVA funds in the amount of $50,000 per year for the 2004-2005 and 2005-2006 fiscal years be budgeted for the administration of the complaint procedures process.

Requirement 6
(A) Based on the State’s best estimates, what are the costs of the activities required to carry out to meet the requirements of Title III?
(B) What portion of the requirements payment will be used to carry out activities to meet such requirements?
(C) What portion of the requirements payment will be used to carry out other activities?

This information is displayed in charts on pages 53 and 54.

Element 7. Maintenance of Effort

How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

Introduction
The funding provided under the Help America Vote Act of 2002 (HAVA) is intended to pay for new or enhanced election efforts and is not intended to supplant existing funding at the State or county level. The projected HAVA budget is based on the assumption that the State of Florida and counties will maintain the foundation of election operating expenditures for the fiscal year ending prior to November 2000.

The Florida Division of Elections provides statewide coordination and direction for the interpretation and enforcement of election laws. The Division’s budget supports year-round staff that provides election-related assistance to Florida’s 67 county supervisors of elections and their staff, municipalities, special districts, county and city attorneys, candidates, political committees, committees of continuous existence, elected officials, media, the public and other election officials throughout the United States.

Section 254(a)(7) How will the State of Florida maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000?

In determining Florida’s maintenance of effort expenditures, the Division of Elections calculated 1999-2000 fiscal year expenditures which included salaries and benefits, operating capital outlay and voter fraud programs for the Division of Elections Director’s office and the portion of Bureau of Election Records’ expenditures pertaining to election administration. Florida’s expenditures for these activities for 1999-2000 fiscal year totaled $3,082,224.

In order to comply with Section 254(a)(7) of HAVA, the Florida Department of State will maintain expenditures on similar activities at a level equal to the 1999-2000 fiscal year budget.

The HAVA Planning Committee recommends that the Secretary of State communicate to the Senate President and the Speaker of the House of Representatives the importance of maintaining this maintenance of effort figure, as a minimum level of expenditures, to ensure the required level of spending is appropriated by the Florida Legislature.
Element 8. Performance Goals and Measures

How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of the criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

Introduction
Florida has a very decentralized election governance and administrative system. The Secretary of State is appointed by the Governor and is the legal Chief Election Official in Florida. However, the Secretary of State does not supervise the day-to-day operations of the 67 local supervisors of elections and only provides guidance through technical assistance, rules, advisory opinions, voting system certification, and producing standardized election forms.

In Florida, it is the local supervisor of elections that has constitutional authority to conduct elections through State law and rule. The supervisors are elected to 4-year terms by the registered voters of their respective counties (except for Miami-Dade’s appointed supervisor) and have broad authority to conduct the day-to-day election operations by appointing local election officials, administering voter registration, preparing ballots, administering absentee voting, conducting poll worker training, and developing voter education programs.

Yet, the new Help America Vote Act of 2002 (HAVA) requires the State and not the local supervisors to adopt performance goals and measures for determining statewide and local election reform success.

It should be noted that Florida already requires certain reports on the performance of voting systems and voter education. By December 15 of each general election year, the Florida Legislature requires local supervisors of elections to report on performance measures such as overvotes and undervotes, ballot designs, and voting instructions (Section 101.595, Florida Statutes). Similarly, the Florida Legislature requires local supervisors of elections by December 15 of each year following a general election to prepare a public report on the effectiveness of voter education programs (Section 98.255(3)(a), Florida Statutes).

However, neither of these statutes follows the specific format that is required under HAVA. Nor do the statutes or rules outline performance measures for the remaining elements of the HAVA State Plan.

Florida must comply with this HAVA requirement. The most effective and egalitarian way for Florida to define election reform success of HAVA is to carry out a collaborative process similar
to the HAVA Planning Committee. The participatory process will ensure that Florida will clearly define the goals, the success measures, the timetables, and accountable officials through a public forum consisting of State election officials, local election officials, and interested citizens.

Section 254(a)(12) How will Florida adopt performance goals and measures that will be used by the State to determine its success and the success of local government in carrying out the plan, including—
- Timetables for meeting the elements of the plan
- Descriptions of the criteria the State will use to measure performance
- The process used to develop such criteria
- A description of which official is to be held responsible for ensuring that each performance goal is met?

In the spirit of HAVA and in participatory election reform, the HAVA Planning Committee recommends that the Secretary of State utilize the HAVA Planning Committee for determining its performance measures and goals for successfully carrying out the HAVA State Plan. The composition of the HAVA Planning Committee consists of State and local election officials, along with interested citizens. The overall goals of the HAVA Planning Committee are:

1. To recommend specific success factors, outline timetables, and assign accountability toward meeting the goals of the HAVA State Plan.

2. To continue building public participation and confidence in Florida’s election reform process.

The HAVA Planning Committee should begin work as soon as possible and finish its work no later than the end of 2003. It should conduct its business in the same manner as the HAVA State Plan was developed utilizing locations around the State to encourage public participation. The HAVA Planning Committee suggests that the Secretary of State use a qualified facilitator to assist in this process. The funding to develop the performance goals and measures should come from HAVA Section 101 federal funds.

The HAVA Planning Committee should take each element of the HAVA State Plan and provide specific State and local criteria which are measurable and within HAVA deadlines. The HAVA Planning Committee should define the HAVA State Plan elements and prepare specific goals and measurements to determine success. The HAVA Planning Committee should address the following 13 planning elements:

1. Voting Systems—Absentee ballot issues, Accessibility issues (Not in compliance)
2. Provisional Voting and Information (Not in compliance)
3. Voter Registration System (Not in compliance)
4. Voter Education Programs, Election Official Training, and Poll Worker Training (In compliance)
5. Voting System Guidelines and Process (In compliance)
6. State Trust Fund (In compliance)
7. State Budget (In compliance)
8. Maintenance of Effort (In compliance)
9. Administrative Complaint Process (In compliance)
10. Title One Payments and Activities (In compliance)
11. State HAVA Management (In compliance)
12. Changes to HAVA State Plan (In compliance)
13. HAVA Planning Committee and Procedures (In compliance)

The measurable criteria should provide State and local election officials clear information about what stage, how and who is implementing the HAVA State Plan. Listed below is a sample of how the HAVA Planning Committee might outline and define performance goals and measures. Included in this process would be a description of the major elements, the mandated deadline, goals of the planning element, measurable criteria, and the accountable official.

Element 9. State-Based Administrative Complaint Procedures to Remedy Grievances

A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

Introduction
To receive any requirements payment pursuant to the Help America Vote Act of 2002 (HAVA), the State of Florida must establish and maintain State-based administrative complaint procedures which meet HAVA’s requirements to:

(1) be uniform and nondiscriminatory;
(2) provide that any person who believes that there is or will be a violation of any of HAVA’s Title III requirements may file a complaint;
(3) require the complaint to be in writing, sworn and notarized;
(4) permit complaints to be consolidated;
(5) hold a hearing on the record at the request of the complainant;
(6) provide an appropriate remedy if the State determines that there is a violation of any Title III provision;
(7) if the State determines there is no violation, dismiss the complaint and publish the results of procedures;
(8) make a final determination on a complaint within 90 days after filing unless the complainant consents to a longer period; and,
(9) use alternative dispute resolution procedures to resolve the complaint if the State fails to resolve it within 90 days.

Section 402(a): Has Florida complied with the requirements of HAVA Section 402(a) to establish State-based administrative complaint procedures to remedy grievances?

Yes, and no further actions are required.
Appropriate administrative complaint procedures were included in Chapter 2003-415, Laws of Florida. Language in the legislation tracked HAVA’s language closely. These procedures are similar to administrative procedures in Section 97.023, Florida Statutes, for resolving complaints generated by alleged violations of the National Voter Registration Act of 1993 or a voter registration or removal procedure under the Florida Election Code.

Florida’s legislation established a new Section 97.0535, Florida Statutes, that, in addition to tracking HAVA’s minimum requirements, included the following additional requirements not specified by HAVA:
(1) the Department of State would have sole jurisdiction for these purposes and the procedures would be the sole avenue of redress for alleged Title III violations;
(2) a complaint would have to state the alleged violation and the person or entity responsible for the violation;
(3) the Department of State would be required to inform a complainant in writing if a complaint was legally insufficient;
(4) proceedings would be exempt from Chapter 120, Florida Statutes, (Administrative Procedures Act);
(5) a hearing would be held by a hearing officer whether or not a complainant requested a hearing and specific procedures for a hearing were included in the legislation;
(6) the hearing officer would direct an appropriate remedy that then would be enforced by the Department of State;
(7) mediation would be the alternative dispute resolution method used if a final determination on a complaint was not made within 90 days of filing.
Element 10. Effect of Title I Payments

If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

Introduction
Title I of the Help America Vote Act of 2002 (HAVA) is an “early out” money program for use in two areas—improving election administration and the replacement of punch card and lever voting systems. Each State is guaranteed to receive a minimum of $5 million under this program. The HAVA Planning Committee recommends using Section 101 HAVA funds for 2003-2004 activities and a combination of Section 101 and Section 252 HAVA funds for activities beginning in the 2004-2005 fiscal year and beyond.

Under Title I, Section 101 funds are to be used to improve election administration. Approved use of funds under this section includes:

(A) Complying with the requirements under Title III.
(B) Improving the administration of elections for Federal office.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.
(D) Training election officials, poll workers, and election volunteers.
(E) Developing the HAVA State Plan for requirements payments.
(F) Improving, acquiring, leasing, modifying, or replacing voting systems.
(G) Improving polling place accessibility for voters with disabilities or with limited English.
(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Under Title I, Section 102 funds are to be used to replace punch card and lever voting systems.

The HAVA Planning Committee clearly recognizes its advisory role in election reform and acknowledges the authority of the Florida Legislature to make funding decisions for Florida. The following recommendations are based on the HAVA Planning Committee meetings held to develop the HAVA State Plan.

Section 101. How will Title I payments to Florida be used for activities to improve administration of elections?

The State of Florida will use Title I funds for election reform activities necessary to ensure Florida complies with all HAVA requirements. The following list describes the major areas in which funds may be used.
(A) Complying with the requirements under Title III

The Division of Elections will implement a statewide voter registration system to comply with HAVA Title III. The Division of Elections anticipates using $1 million appropriated from Section 101 funds for Phase One development of the new Statewide Voter Registration system. Expenditures for Phase One will include:

- Consulting fees which will be required for conducting a detailed analysis of connectivity infrastructure available in the 67 supervisor of elections' offices and within all affected offices of the departments of State, Law Enforcement and Highway Safety and Motor Vehicles; working with the counties, the three agencies and the advisory board to create minimum and optimum sets of system requirements; assessing infrastructure needs of all stakeholders to serve the system requirements; conducting "gap" analysis; outlining the physical design of the system; estimating costs and implementation plans for each version for the system to be presented to the 2004 Legislature; and developing and publishing the January 2004 report and recommendations for the 2004 Legislature.
- Purchase hardware and software for project management and system development.
- Expenses incurred by Division of Elections' staff.
- Travel expenses which will involve visiting every supervisor of elections' office and local driver license office.

In addition, Section 101 HAVA funds will be used to create nine full time positions necessary for the design, development and implementation of the Statewide Voter Registration system.

(B) Improving the administration of elections for Federal office.

Upon receipt of Title I monies, it is recommended that the Division of Elections use $250,000 in fiscal year 2003-2004 from Section 101 funds for expenses that include the design and publication of voter registration forms and other election information, translations for all election administration forms and publications, statewide voter education programs and training workshops.

In addition, funds will be required to establish a State-based complaint procedure for anyone who believes that a violation of Title III of the Help America Vote Act has occurred, is occurring or is about to occur. It is estimated that this process will be established at an estimated cost of $100,000. If no Title I funds are remaining, this activity will be funded from Section 252 HAVA funds.
(C) Educating voters concerning voting procedures, voting rights, and voting technology.

Upon receipt of Title I monies, it is recommended that the Florida Division of Elections use approximately $9 million over a three year period for voter education programs.

These funds will be divided among Florida’s 67 counties. To determine the amount each county will receive, the Division of Elections shall divide the total amount of funds appropriated by the total number of registered voters in the State of Florida for the 2002 General Election to establish a funding level per individual voter. Each county shall receive an amount equal to the funding level per individual voter multiplied by the number of registered voters in the county, as certified by the Department of State for the 2002 General Election.

(D) Training election officials, poll workers, and election volunteers.

The HAVA Planning Committee recommends using HAVA funds in the amount of $250,000 for each fiscal year 2003-2004, 2004-2005 and 2005-2006 for poll worker training. These funds are intended to supplement each county’s existing poll worker training budget.

(E) Developing the HAVA State Plan for requirements payments to be submitted under part 1 of subtitle D of Title II.

There are no plans to use Title I funds for the development of Florida’s HAVA State Plan for 2003-2004 fiscal year. As the State of Florida modifies its plans in future years, HAVA funds may be used.

(F) Improving, acquiring, leasing, modifying, or replacing voting systems.

Florida has already replaced its punch card and lever voting systems. It is recommended that Section 102 funds be used to reimburse the State and each eligible county, on a pro rata basis, for punch card and lever machines purchased in 2001-2002 and 2002-2003 fiscal years.

The HAVA Planning Committee also recommends that the State of Florida utilize some HAVA funds to help counties meet the accessibility requirements under Title III by the January 1, 2006 deadline. The estimated amount to comply with this requirement is $11.6 million and the funds would be distributed according to the number of accessible DREs for each county to have one audio ballot per polling...
place. The HAVA Planning Committee estimates that these units will be purchased in the 2004-2005 fiscal year and that Section 252 HAVA funds will be used.

In addition, the HAVA Planning Committee recommends reimbursing counties who have already purchased voting systems that meet the HAVA accessibility for voters with disabilities requirements. The estimated cost for this reimbursement is $17 million and it is anticipated that Section 252 HAVA funds will be used.

(G) Improving polling place accessibility for voters with disabilities or with limited English.

Under Section 261, HAVA states the Secretary of Health and Human Services shall make a payment to eligible States to be used for making polling places accessible to individuals with disabilities and providing information on this accessibility. The State of Florida has applied for available funds under this grant program. It is recommended that these funds be distributed to each county to ensure that individuals with disabilities are provided the same opportunity for access and participation as for other voters.

(H) Establishing toll-free telephone hotlines for voters to access voting information, report voting fraud, or report voting rights violations.

Currently, there are no plans to use HAVA funds for establishing a free voting information hotline. If this type of voting information system is desired, it will be the responsibility of each county and monitored by the Division of Elections.

The Division of Elections has already established and plans to expand a voter fraud hotline for individuals who believe they may have witnessed election fraud.

Section 102. How will payments to Florida be used for the replacement of punch card or lever voting machines?

Under Section 102, the State of Florida is eligible for approximately $11.7 million which it will use as reimbursement to the State and eligible counties for funds previously spent to replace punch card and lever voting systems. Currently, 14 counties have replaced punch card and lever machines with machines that are fully compliant with HAVA.
Element 11. Help America Vote Act of 2002 (HAVA) State Plan
Management

How the State will conduct ongoing management of the plan, except the State may not make any material change in the administration of the plan unless the change—

(A) is developed and published in the Federal Register in accordance with section 255 in the same manner as the State plan;

(B) is subject to public notice and comment in accordance with section 256 in the same manner as the State plan; and

(C) takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).

Introduction
This element of the HAVA State Plan requires Florida to explain how the State of Florida will manage the implementation of the HAVA State Plan and whether it will utilize the same public notice process if any “material change” is made to the administration of the HAVA State Plan.

Section 251(a)(11) How will Florida conduct ongoing management of the HAVA State Plan?

As explained in previous sections of this Plan, the administration of elections in Florida occurs at the State and local levels. The Secretary of State is the Chief Election Officer under Florida law. The Secretary of State as the Chief Election Officer is responsible for the coordination of the State’s responsibilities under HAVA Section 253. The Director of the Division of Elections reports to the Secretary of State and will be responsible for the day-to-day monitoring and managing of Florida’s HAVA State Plan. Through the approval and implementation of this HAVA State Plan, it is expected that the Director will have three new positions dedicated to HAVA program management. The scope of responsibilities will range from federal reporting and grant compliance to assistance with voter education, election official training and updating the HAVA State Plan.

Also at the State level, the Secretary of State will direct the HAVA Planning Committee to update the HAVA State Plan as required in Section 255. Under Florida’s HAVA State Plan, the HAVA Planning Committee will be responsible for conducting its business in an open, public forum and for suggesting revisions and updates to the HAVA State Plan.
At the local level, Florida’s 67 supervisors of elections will be encouraged to play an active role in the successful implementation of the HAVA State Plan. The Division of Elections will continue to work on a regular basis with local supervisors of elections to develop performance goals and measures, new voter registration improvements, new voting systems certification upgrades, statewide voter education programs, election official training, and other activities outlined in Florida’s HAVA State Plan.

Section 254(a)(11) If Florida makes any material change in the administration of the HAVA State Plan, will the change—

(A) be developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

(B) be subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

(C) take effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A)?

The State of Florida understands and agrees to comply with the HAVA requirements related to ongoing management of the HAVA State Plan. No material changes in the administration of the plan will be made unless:

- the material change is developed and published in the Federal Register in accordance with Section 255 in the same manner as the HAVA State Plan;

- the material change is subject to public notice and comment in accordance with Section 256 in the same manner as the HAVA State Plan; and

- the material change takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register in accordance with subparagraph (A).
Element 12. Changes to State Plan for Previous Fiscal Year

In the case of a State with a State plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State plan for the previous fiscal year and of how the State succeeded in carrying out the State plan for such previous fiscal year.

Introduction
This is the State of Florida’s first Help America Vote Act of 2002 (HAVA) State Plan. There are no previous plans to describe changes or successes under the HAVA. The HAVA State Plan will be updated in the next fiscal year and the Secretary of State will utilize the HAVA Planning Committee to fulfill this element of the plan.

Section 254(a)(12) When Florida has a HAVA State Plan for the previous fiscal year, will the State of Florida provide a description of how the plan reflects changes from the HAVA State Plan for the previous fiscal year and how the State succeeded in carrying out the HAVA State Plan for such previous fiscal year?

Yes, and no further actions are required.
Element 13. State Plan Development and HAVA Planning Committee

A description of the committee which participated in the development of the State plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

Introduction
To comply with the requirements of the Help America Vote Act of 2002 (HAVA), the HAVA State Plan must be developed by the chief State election official through a committee of appropriate individuals. After a preliminary plan is developed, it must be published for public inspection and comment. State officials must take public comments into account in preparing the HAVA State Plan submitted to the Federal Elections Commission.

Section 255: Has Florida complied with the requirements of section 255(a) to have the chief State election official develop the HAVA State Plan through a committee of appropriate individuals?

Yes, and no further actions are required.
Florida’s Chief State Election Official, Secretary of State Glenda Hood, has the responsibility under HAVA to develop the HAVA State Plan with the assistance of the statewide HAVA Planning Committee. Section 255(a) of HAVA requires that “The chief State election official shall develop the HAVA State Plan under this subtitle through a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions within the State, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens, appointed for such purpose by the chief State election official.”

Members of the HAVA Planning Committee for the State of Florida, appointed by Secretary of State Hood, are as follows:

Chairman:
Jim Smith of Leon County, former Secretary of State and former Attorney General

Chief Election Officials of the Two Most Populous Jurisdictions Within the State:
Miriam Oliphant, Supervisor of Elections for Broward County
David Leahy, Supervisor of Elections for Miami-Dade County
Other Local Election Officials:
Kurt Browning, Supervisor of Elections for Pasco County
Susan Gill, Supervisor of Elections for Citrus County
Shirley Green Knight, Supervisor of Elections for Gadsden County

Stakeholders/Representatives of Groups of Individuals with Disabilities:
Dave Evans, State Board Member of the National Federation of the Blind
Jim Kracht, Assistant County Attorney for Miami-Dade County and member of the American
Blind Lawyers Association, American Council of the Blind and the Florida Council of
the Blind
Richard LaBelle, Secretary of the Florida Coalition on Disability Rights

Other Stakeholders and Citizens:
Joe Celestin, Mayor of the City of North Miami
Anna Cowin, State Senator from District 20
Jane Gross, President of the Florida League of Women Voters
Lindsay Harrington, State Representative from District 72
Arthur Hernandez, Vice Chairman of the Jacksonville Mayor’s Hispanic American Advisory
Board
Percy Luney, Dean and Professor of Law at Florida A&M University
Reggie McGill, Human Relations Director for the City of Orlando
Isis Segarra, private citizen from Hillsborough County
Lori Stelzer, President of the Florida Association of City Clerks and City Clerk for the City of
Venice
Raiza Tamayo, Regional Director of the United States Hispanic Chamber of Commerce

This HAVA Planning Committee convened four times in public meetings to accomplish its work
– Tallahassee on April 25, West Palm Beach on May 6, Ft. Myers on May 12 and Orlando on
May 15. Press releases were sent to members of the press before each meeting and copies of the
press releases were available for the audience at each meeting. In addition, all meetings were
noticed in the Florida Administrative Weekly. Members of the public and press were welcomed
at the meetings. The HAVA Planning Committee heard public comment at each meeting. It was
assisted by a non-profit, non-partisan organization, the Collins Center for Public Policy, Inc., that
was selected in a public bidding process to serve as staff for the HAVA Planning Committee in
developing the HAVA State Plan, and by the Division of Elections of the Florida Department of
State.

The HAVA Planning Committee operated in an open process with public deliberations,
systematic procedures in accordance with Robert's Rules of Order, and majority vote of
members who were present when votes were taken. Majority quorums were present at all
meetings of the HAVA Planning Committee. The Collins Center, as staff, prepared written
materials for the meetings, made presentations to focus the HAVA Planning Committee on
decisions that needed to be made, took notes of all meetings and reported them publicly on its website at www.collinscenter.org. A formal transcript of each meeting also was made and published on the website along with all agendas and other published materials for meetings of the HAVA Planning Committee. The website of the State Division of Elections also included much of this material.

All meetings were held in accessible facilities and were compliant with the Americans with Disabilities Act. Closed captioning service and signers were available at all meetings. Agendas were printed in Braille as well as Spanish and Creole.

Section 256: Will Florida comply with the requirement of Section 256 to have the HAVA State Plan meet the public notice and comment requirements of HAVA?

Yes, and no further actions are required.

Section 256 of HAVA requires that the HAVA State Plan meet the following public notice and comment requirements:

1. Not later than 30 days prior to the submission of the plan, the State shall make a preliminary version of the plan available for public inspection and comment;
2. The State shall publish notice that the preliminary version of the plan is so available; and
3. The State shall take the public comments made regarding the preliminary version of the plan into account in preparing the plan which will be filed with the Federal Elections Commission.

After the final HAVA State Plan is submitted to the Federal Elections Commission, that Commission shall cause the HAVA State Plan to be published in the Federal Register in accordance with Section 255(b).

These tasks were performed by the Division of Elections and not by the HAVA Planning Committee or its consultants. The work of the HAVA Planning Committee and its consultants was completed when a preliminary version of the HAVA State Plan was prepared, approved by the HAVA Planning Committee, and submitted to the Secretary of State.

After notice was given in the Florida Administrative Weekly, the preliminary version of the HAVA State Plan was posted on the Department of State’s and the Governor’s websites. A link was available on the Department’s website so that public comment could be made electronically. Public comments were also received by U. S. mail. Public comments were received from June 13 through July 13 and those public comments were considered in preparing the final plan.

COMPLAINT
For Alleged Violation of the
Help America Vote Act of 2002
(42 U.S.C. §15512)

Florida Department of State, Division of Elections
Room 316, R.A. Gray Building, 500 South Bronough Street, Tallahassee, Florida 32399-0250
Telephone (850) 245-6200

Pursuant to section 97.028, Florida Statutes, the Department of State has sole jurisdiction to adjudicate alleged violations of Title III of the Help America Vote Act of 2002 (HAVA). Any person who believes that a violation of Title III of HAVA has occurred, is occurring or is about to occur may file a complaint. In order to initiate the complaint process, a sworn, written complaint must be filed with the Department of State. The complaint must specifically state the alleged violation and the person or entity responsible for the violation. A violation of Title III of HAVA is the failure to perform an act required by or the performance of an act prohibited by Title III of HAVA in a federal election.

If you believe that a violation of Title III of the Help America Vote Act of 2002 has occurred, is occurring or is about to occur, please state the specific acts committed by the person or entity named in this complaint:

Form DS DE 18 (4/03)
November 10, 2003

Ms. Penelope Bonsall, Director
Office of Election Administration
Federal Elections Commission
999 E. Street NW
Washington, D.C. 20463

RE: State of Florida request for waiver pursuant to Section 303(d) of the Help America Vote Act of 2002

Dear Ms. Bonsall:

Section 303(a) of the Help America Vote Act of 2002 requires each state to implement a computerized statewide voter registration list by the January 1, 2004, date specified in Section 303(d)(1)(A) of the same statute. Section 303(d)(1)(B) provides for states to request an extension of the aforementioned deadline until January 1, 2006. The purpose of this correspondence is to certify that, for good cause as outlined below, the State of Florida is unable to meet the January 1, 2004, implementation date called for in Section 303(d)(1)(A), and respectfully requests an extension of the deadline as permitted by law until January 1, 2006.

Florida has a tradition of administering voter registration at the county level jurisdiction. Each of Florida's sixty-seven counties has a constitutionally elected officer known as the supervisor of elections who is responsible for maintaining voter registration lists in their respective county. Each supervisor of elections is also responsible for determining the type of information technology appropriate for supporting voter registration activities in their jurisdiction and the manner in which registration records are maintained. The steps required to: (1) assess county-administered voter registration systems; (2) develop methods for consolidating a variety of voter registration lists with individual nuances into a single computerized statewide system; and (3) provide for future coordination of county voter registration activities with the statewide list will require more time than provided by the January 1, 2004, implementation date.

The Florida Department of State is working diligently to implement a statewide voter registration system that will meet all the requirements of Title III. Some of the steps already taken by the State of Florida in order to develop and implement a statewide voter registration system include: hiring a project director; executing agreements with our state Departments of Highway Safety

R. A. Gray Building • 500 South Bronough Street • Tallahassee, Florida 32399-0250
Telephone: (850) 245-6500 • Facsimile: (850) 245-6125 • WWW: http://www.dos.state.fl.us
Motor Vehicles and Law Enforcement that outline data exchange procedures; and creating task
groups comprised of county election officials and Department of State personnel in order to
address technical and procedural issues relating to the creation of the centralized registration
system. Given the steps already taken by the Florida Department of State and the other
departments involved, and the scope of the work remaining to be done, I am confident that the
State of Florida will be successful in having a statewide computerized voter registration system
operational by the January 1, 2006, extended deadline requested herein.

Sincerely,

Glenda E. Hood

Glenda E. Hood
Secretary of State

GEH/eck/pt
Ms. Penelope Bonsall, Director  
Election Assistance Commission  
c/o Office of Election Administration  
999 E. Street, N.W.  
Washington, D.C. 20463  

RE: State of Florida Request for waiver pursuant to Section 303(d) of the Help America Vote Act of 2002  

Dear Ms. Bonsall:

Enclosed is a copy of the November 10, 2003 letter that was submitted by the State of Florida in order to request an extension of the January 1, 2004 deadline for implementing a computerized statewide voter registration list. The letter was sent to the Federal Elections Commission pending appointment of the Elections Assistance Commission.

Although members of the Elections Assistance Commission have been appointed and confirmed, they still don’t have an address. We are resubmitting a copy of the State of Florida’s original request to the new Elections Assistance Commission in care of your office in order to meet the January 1, 2004 deadline for requesting a waiver and extension for implementing the statewide voter registration list.

Sincerely,

Enclosure
January 22, 2004

Ms. Deborah Schilling,
Director of Budget
United States General Services Administration
1800 F Street, NW
Washington, D.C. 20405-0002

Dear Ms. Schilling:

Enclosed are Financial Status Reports regarding HAVA expenditures for the period ending December 31, 2003. A separate form has been prepared for Section 101 and Section 102 funds as requested. These documents were also faxed to your office on January 21, 2004.

If you have any questions or need additional information, please let us know.

Sincerely,

Edward C. Kast
Director, Division of Elections

Standard Form 269A (REV 4-88)

Prescribed by OMB Circulars A-102 and A-110
February 28, 2006

The Honorable Paul S. DeGregorio, Chairman
U.S. Election Assistance Commission
State HAVA Funding Reports
1225 New York Avenue, NW – Suite 1100
Washington, D.C. 20005

Dear Mr. DeGregorio:

Enclosed are Florida’s narrative reports regarding HAVA, Title I, Section 101 and 102 funds for the period from January 1, 2005 through December 31, 2005. A separate SF 269 form is included for Section 101 and Section 102 funds.

Also enclosed is an updated SF 269 covering Title I, Section 101 funds for the period from January 1, 2004 through December 31, 2004. The entry on Line “o - Total Federal funds authorized for this funding period” has been adjusted to include Florida’s portion of Section 101 funds plus Interest accrued on those funds during 2003 and 2004.

If you have any questions or would like additional information, please let us know.

Sincerely,

Dawn K. Roberts, Esq.
Director, Division of Elections

---

021472
As requested by the U. S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State during calendar year 2004 utilizing HAVA Title I funds.

COMPLYING WITH REQUIREMENTS OF TITLE III - $1,623,298

One of the requirements of Title III includes development and implementation of a single statewide voter registration list. In order to begin the development of a system in Florida that meets the criteria outlined in HAVA, the 2003 Florida Legislature appropriated $1 million for Phase One Development of the Florida Voter Registration System (FVRS). Funds were provided to conduct the research and planning required in order to design and develop the system.

The Legislature also authorized establishment of nine full-time positions to assist with developing and implementing the FVRS. Five of the positions are assigned to the Department of State and two each are in the Florida Department of Highway Safety and Motor Vehicles (HSMV) and the Florida Department of Law Enforcement (FDLE).

One of the five positions in the Department of State has been designated as Project Manager. The remaining four positions have been utilized to conduct research and planning for the project that was required prior to initiating the development phase of the system. Positions at HSMV and FDLE are working with the Department of State to determine ways to coordinate databases maintained by those agencies with the Florida Voter Registration System.

The Department of State contracted with a consulting firm to provide project management and quality assurance services for the project. A separate firm was retained to assist with application design and engineering services.

As the project has developed, funds have been expended to purchase software licenses for software programs that will be used to operate the system. Other funds were used to provide training for employees who will be using the software programs.

Other expenditures related to development of the FVRS include travel expenses for project team members who held numerous meetings with Florida's supervisors of elections and their staff as well as vendors of voter registration systems that conduct business in Florida. Project team members also conducted site visits with election officials in other states that utilize centralized voter registration systems.

Development of the statewide voter registration system (FVRS) is described extensively in the HAVA State Plan on pages 26 through 33, page 38 and page 56.

ELECTIONS ADMINISTRATION - $394,436

The Department of State established three positions to provide administrative oversight and coordination for HAVA-related activities. Employees in these positions are responsible for monitoring HAVA expenditures to assure compliance with federal requirements regarding their use. These positions administer several contract programs that provide funds to supervisors of elections for HAVA-related activities including voter education as well as funds utilized to purchase voting systems equipment.

Recommendations regarding establishment of positions associated with HAVA Oversight and Reporting can be found on page 59 in the HAVA State Plan.
Other Title I expenditures include costs associated with printing documents that were provided to supervisors of elections to meet the requirements of HAVA including "Instructions to Voters" posters and "Stamp Out Voter Fraud" posters. Additional publications that were printed and distributed to supervisors of elections include revised "Florida Voter Registration Application" forms, "Florida Registration and Voting Guide" and "A Compilation of Florida Election Laws."

Reference to posters/publications required by HAVA can be found in the State Plan on pages 20 through 24 and on page 60.

The Department of State used Title I funds to contract with an organization to develop two programs that were used by supervisors of elections to assist with providing elections-related information to Florida's citizens. One of the programs included development and distribution of materials that could be used in all counties throughout the state to encourage voter participation in the 2004 elections. The program included instructions and ideas for utilizing the materials. The other program involved developing and conducting a voter awareness and education program regarding the use of Direct Recording Equipment (DRE's).

These programs are included in Florida's HAVA State Plan on page 45.

**VOTER EDUCATION - $2,333,346**

During 2004, Florida distributed $2,333,346 to Florida's 67 county supervisors of elections to assist counties with conducting voter education programs. In order to receive voter education funding, counties were required to submit a detailed voter education plan to the Department of State along with a certified statement from the Board of County Commissioners providing matching county funds in the amount of fifteen percent (15%) to be used exclusively for voter education.

The Department of State recently conducted a survey regarding voter education programs being conducted in each county and prepared a report regarding the various types of voter education activities being utilized throughout the state. Responses to the survey indicated that counties are using voter education funds to disseminate information regarding the elections process through a variety of mediums in order to target as many diverse populations throughout the state as possible. Examples of voter education programs include the following:

- Printing and mailing sample ballots to registered voters
- Publishing sample ballots in local newspapers including those that target specific populations such as minority and college-age voters
- Conducting voting systems demonstrations at various types of locations including malls, businesses, community events, assisted living facilities and schools. Demonstrations included instructions on completing a ballot as well as using the voting systems equipment
- Printing a variety of publications with elections-related information including posters regarding voters rights and responsibilities to display at each polling place
- Conducting voter registration drives in a variety of locations such as malls, schools and businesses

A number of other voter education programs have been successfully implemented in the counties with excellent response from local citizens. It is apparent that counties are being innovative and
resourceful in utilizing voter education funds in order to inform and educate citizens about the elections process.

Florida's voter education program is discussed in detail in the HAVA State Plan on pages 37 through 47 as well as on page 58.

**TRAINING ELECTION OFFICIALS, POLL WORKERS AND ELECTION VOLUNTEERS - $23,331**

The Department of State contracted with a communications consulting firm to develop and prepare a video titled “Conflict Management Skills for Poll Workers.” It was used to help poll workers understand how to handle potentially difficult situations at polling places. The video was distributed to each of the 67 county supervisors of elections to use as part of their poll worker training.

Development of this video was not specifically addressed in the HAVA State Plan, however, it is consistent with the direction outlined in the State Plan for training poll workers found on pages 49 and 50.

**DEVELOPING STATE PLAN - $33,468**

The Department of State contracted with a consulting firm to facilitate revisions and updates to the HAVA State Plan. The firm worked with Department staff to draft proposed revisions to the original plan and to develop goals and performance measures to present to the HAVA State Planning Committee for review, discussion and inclusion in the revised document.

In addition to consultant firm fees, expenditures related to this activity included travel expenses for HAVA State Planning Committee members and Department of State staff who attended the State Planning Committee meetings. The meetings were held in two different geographical locations in Florida in order to provide accessibility to all citizens who were interested in attending and/or participating in the meetings.

Management of the State Plan and State Planning Committee is addressed on page 59 in the HAVA State Plan.

**INTEREST ACCRUED**

During 2004 the Department of State invested Title I, Section 101 funds and accrued $347,160.87 in interest.

Date Report Submitted
February 28, 2006
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State during calendar year 2005 utilizing Help America Vote Act (HAVA) Title I, Section 101 funds.

**VOTER EDUCATION - $3,829,808**

During calendar year 2005 Florida distributed $3,829,808 to the 67 county supervisors of elections to be utilized for voter education purposes. In order to receive the funds each supervisor of elections was required to submit a detailed plan outlining the anticipated uses of the funds. In addition to the plan, each Board of County Commissioners was required to provide fifteen percent matching funds to be used exclusively for voter education purposes.

County supervisors of elections are required to submit a report to the Department of State on an annual basis regarding voter education programs conducted in the counties until the funds distributed by the state are depleted. Based on the latest reports from supervisors of elections, counties continue to employ numerous voter education activities in an effort to involve citizens in the elections process.

These activities include printing and mailing sample ballots to registered voters, conducting voter registration drives at various locations and events throughout the county, disseminating information regarding election dates and related deadlines through a variety of media sources, and conducting demonstrations on the use of voting systems equipment.

Florida’s voter education program is discussed in the HAVA State Plan on pages 37 through 47 and on page 58.

**ELECTION ADMINISTRATION - $303,394**

Florida established three positions in the Department of State to provide administrative oversight and coordination for HAVA-related activities. Employees in these positions are responsible for monitoring HAVA expenditures to ensure compliance with federal requirements. The positions administer several contract programs that provide funds to county supervisors of elections for HAVA-related activities including voter education and voting systems assistance programs. In addition, the positions are responsible for administering grant funds awarded by the U.S. Department of Health and Human Services under the Voting Access for Individuals with Disability (VOTE) grant program.

Recommendations regarding establishment of positions associated with HAVA Oversight and Reporting can be found on page 59 in the HAVA State Plan.

Additional Title I funds were utilized to print several documents that were distributed to county supervisors of elections including a revised voter registration application form. Reference to publications required by HAVA can be found in the HAVA State Plan on pages 20 through 24 and on page 60.

The state contracted with an organization to assist county supervisors of elections with developing and implementing plans to make polling places and voting systems equipment accessible to individuals with disabilities. Reference to polling place accessibility is included in the HAVA State Plan on page 80 and 81.
COMPLYING WITH REQUIREMENTS OF TITLE III - $87,544

One of the requirements of Title III includes development and implementation of a statewide voter registration system. The 2003 Florida Legislature appropriated funds to begin development of a system that would meet the criteria outlined HAVA. The Legislature included authority to establish five positions in the Department of State to assist with developing and implementing the voter registration system. Title I, Section 101 funds were used to fund these positions during the first few months of 2005. The positions were funded with Title II funds during the remainder of 2005.

Reference to these positions can be found in the HAVA State Plan on page 56 and 61.

INTEREST ACCRUED - $250,596.63

During 2005 the Department of State invested Title I, Section 101 funds and accrued $250,596.63 in Interest.
February 28, 2006

The Honorable Paul S. DeGregorio, Chairman  
U.S. Election Assistance Commission  
State HAVA Funding Reports  
1225 New York Avenue, NW – Suite 1100  
Washington, D.C. 20005

Dear Mr. DeGregorio:

Enclosed are Florida’s narrative reports regarding HAVA, Title I, Section 101 and 102 funds for the period from January 1, 2005 through December 31, 2005. A separate SF 269 form is included for Section 101 and Section 102 funds.

Also enclosed is an updated SF 269 covering Title I, Section 101 funds for the period from January 1, 2004 through December 31, 2004. The entry on Line “o - Total Federal funds authorized for this funding period” has been adjusted to include Florida’s portion of Section 101 funds plus Interest accrued on those funds during 2003 and 2004.

If you have any questions or would like additional information, please let us know.

Sincerely,

Sarah Jane Bradshaw

Dawn K. Roberts, Esq.

Date Report Submitted

February 28, 2006

This document is an amended report for Section 102 funds to reflect interest accrued on funds in 2003, 2004 and 2005. The total amounts reported are as follows:

- 2003: $32,220.26
- 2004: $1,049.99
- 2005: $1,175.12
This serves as an amended report regarding Florida's use of Title I, Section 102 funds through December 31, 2005. Florida received Section 102 funds in the amount of $11,581,377. The funds were used to reimburse the state for funding provided to Florida's 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Florida invested Section 102 funds pending transfer of the funds to Florida's Working Capital Fund. Interest has continued to accrue on the initial investment of funds for a total of $34,445.37 through December 31, 2005.

An amended SF269 form is attached to reflect the balance of Section 102 funds.

**Prescribed by OMB Circulars A-102 and A-110**
FLORIDA DEPARTMENT OF STATE
REPORT ON EXPENDITURE OF TITLE I, SECTION 102 FUNDS

This serves as an amended report regarding Florida’s use of Title I, Section 102 funds through December 31, 2005. Florida received Section 102 funds in the amount of $11,581,377. The funds were used to reimburse the state for funding provided to Florida’s 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Florida invested Section 102 funds pending transfer of the funds to Florida’s Working Capital Fund. Interest has continued to accrue on the initial investment of funds for a total of $34,445.37 through December 31, 2005.

An amended SF269 form is attached to reflect the balance of Section 102 funds.
The Honorable Glenda Hood  
The Secretary of State of Florida  
Tallahassee, FL 32399  

Dear Ms. Secretary:

Thank you for your letter, dated January 21, 2004, certifying that your State would not meet the deadline of replacing all punch card and/or lever voting systems by the November 2004 general election, and asking for a waiver of the November 2004 deadline under Section 102(a)(3)(B) of the Help America Vote Act. Your request for a waiver of the deadline is approved, and the State shall ensure that all of the punch card and/or lever voting systems in the qualifying precincts within the State shall be replaced in time for the first election for Federal office held after January 1, 2006.

Your State will still be responsible for reporting to the General Services Administration in the manner outlined in our letter of July 28, 2003. The only change will be the extension of the deadline for replacement of the punch card and/or lever voting systems. If you have any questions or comments, please feel free to contact Stephen J. Kulenguski at (202) 501-4496.

Sincerely,

Deborah J. Schilling  
Director of Budget

cc:  
The Honorable Jeb Bush  
Governor of Florida  
Tallahassee, FL 32399
The Honorable Glenda Hood  
The Secretary of State of Florida  
Tallahassee, FL 32399

Dear Ms. Secretary:

This is to inform you that we have inadvertently sent out an approved waiver request letter, dated February 25, 2004, to your office in reference to the replacement of all punch card/or lever voting systems, under Section 102(a)(3)(B) of the Help America Vote Act. Please disregard that letter. We apologize for any confusion and inconvenience this may have caused you.

If you have any questions, please feel free to contact Stephen J. Kulenguski at (202) 501-4496.

Sincerely,

Deborah J. Schilling  
Director of Budget

cc:  
The Honorable Jeb Bush  
Governor of Florida  
Tallahassee, FL 32399

The Honorable Gracia M. Hillman, Chair
U.S. Election Assistance Commission
State HAVA Funding Report
1225 New York Avenue, NW – Suite 1100
Washington, DC 20005

Dear Chairman Hillman:

Enclosed is Florida’s report regarding the use of HAVA Title II, Section 251 funds for the period from June 23, 2004 through September 30, 2004. Included with the report is Standard Form 269.

If you have any questions or would like additional information, please let us know.

Sincerely,

Dawn K. Roberts, Esq.
Director

DKR/aj

   Date Report Submitted: March 22, 2005

   Previous Edition Usable: 200-488 P.O. 139 (Face)

   Standard Form 269 (Rev. 7-97)

   Prescribed by OMB Circulars A-102 and A-110
The first report regarding expenditures made with Section 251, Title II HAVA funds covers the period from the date the funds were received in Florida through September 30, 2004. Florida received FY 2003 Section 251, Title II HAVA funds on June 23, 2004.

None of the Title II funds were expended during the current reporting period. While the Florida Legislature authorized the use of HAVA Section 251 funds for state Fiscal Year 2004-05, Florida did not begin disbursing the funds until after September 30, 2004.

**Prepared by OMB Circulars A-102 and A-110**
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State utilizing Help America Vote Act (HAVA) Title II, Section 251 funds during the period from October 1, 2004 through September 30, 2005.

VOTING SYSTEMS ASSISTANCE - $11.6 Million

During the current reporting period, Florida distributed $11.6 million to county supervisors of elections to purchase voting equipment that is accessible to individuals with disabilities. Funds were appropriated by the Florida Legislature in order to ensure that all counties had at least one accessible voting system at each polling place by January 1, 2006. Prior to distribution of the funds, counties were required to provide certified statements to the Department of State indicating the number of polling places in use and the number of accessible voting systems owned by the county. There were fifty-one (51) counties that required accessible voting systems in order to have one per polling place by January 1, 2006.

The HAVA State Plan includes references to acquiring accessible voting equipment for individuals with disabilities on pages 13 through 15 and on page 61.

STATEWIDE VOTER REGISTRATION LIST - $11,171,771

Title II funds were utilized to continue development of a statewide voter registration system pursuant to requirements in Title III, Section 303 of the Help America Vote Act. The Florida Voter Registration System (FVRS) is a real-time system that contains the name and voter registration information of all voters in the state. The system allows counties to continue to use their existing systems with modifications to interface with the FVRS.

During the current reporting period, the Department of State issued bids to procure the services of two contractors to assist with implementing the FVRS. One vendor was selected to serve as the Prime Contractor and provide systems integration and software development for the FVRS. A second vendor was selected to provide project management and quality assurance to oversee the development and implementation phases of the FVRS.

In addition to the two primary contractors, the Department began the process of acquiring the necessary hardware and software required to implement the FVRS including back-up systems. Items purchased included servers, switching modules and various software systems needed to operate the system. An uninterruptible power supply (generator) was purchased to provide back-up operation during electrical outages and/or disasters. Other expenses included training provided to Department of State employees to give them the necessary skills to utilize the software being used to operate the system.

Other costs associated with the FVRS during the current reporting period include salaries for eleven positions in the Department of State, two positions at the Florida Department of Highway Safety and Motor Vehicles and two positions at the Florida Department of Law Enforcement.

These positions provide support for the various hardware and software systems being utilized to operate the system, legal expertise, and administration of a new bureau established to provide voter registration services for all of Florida's 67 counties.

Reference to the statewide voter registration system can be found in the HAVA State Plan on pages 26-31, 56-57 and 61.
INTEREST ACCRUED - $3,696,730

During the current reporting period the Department of State invested Title II, Section 251 funds and accrued Interest in the amount of $3,696,730.

STATE MATCHING FUNDS - $385,000

During the current reporting period, Florida spent $385,000 in State Matching funds.
March 29, 2006

The Honorable Paul S. DeGregorio, Chairman
U.S. Election Assistance Commission
State HAVA Funding Reports
1225 New York Avenue, NW – Suite 1100
Washington, D.C. 20005

Dear Mr. DeGregorio:

Enclosed is Florida’s narrative report regarding HAVA, Title II, Section 251 funds for the period from October 1, 2004 through September 30, 2005. Form SF 269 regarding Title II, Section 251 funds is also included.

Also enclosed is an updated Form SF 269 for Title II, Section 251 funds covering the period from the initial receipt of funds in June 2004 through September 30, 2004. The entry on Line “o - Total Federal funds authorized for this funding period” has been adjusted to include Interest accrued on those funds during that time period.

If you have any questions or would like additional information, please let us know.

Sincerely,

Dawn K. Roberts, Esq.
Director, Division of Elections

MESSAGE

ORIGINAL TO FOLLOW BY MAIL.
December 14, 2004

The Honorable Jeb Bush  
Governor  
Office of the Governor  
The Capitol  
400 South Monroe Street  
Tallahassee Florida 32399-0001

Dear Governor Bush:

The U. S. Election Assistance Commission (EAC) is pleased to inform you that the Help America Vote Act of 2002 (HAVA) allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year's requirements payment. EAC received a certification statement from your State on December 7, 2004 declaring your State's eligibility for the requirements payment appropriated in fiscal year 2004.

Accordingly, EAC has notified the U.S. General Services Administration (GSA) that approximately $85,085,258 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use this payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, notwithstanding the Act’s maintenance of effort requirements; and

- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).

- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (“Common Rule”, Administrative Requirements, 53 FR 8087, March 11, 1988)

- A-133 — Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:
http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

---

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
• is developed and published in the *Federal Register* in accordance with Section 255 in the same manner as the State plan;

• is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

• takes effect only after the expiration of the 30-day period which begins on the date the change is published in the *Federal Register*.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with EAC. The amended State plan filed with EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

**Reporting**

Also note that HAVA Section 258 requires your State to submit a report to EAC on the activities conducted with the funds provided during the Federal fiscal year, which runs from October 1 through September 30 of each year. This report must include:

• a list of expenditures made with respect to each category of activities described for the use of funds;

• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  
  o the activities funded to meet HAVA requirements; and
  o how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

**Recordkeeping and Audits**

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes EAC to audit or examine books, documents, papers and records of any
recipient that is deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.

HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the EAC. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the EAC an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Scaries, Jr.

MESSAGE

ORIGINAL TO FOLLOW BY MAIL.
December 14, 2004

The Honorable Glenda Hood
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Dear Secretary Hood:

The U. S. Election Assistance Commission (EAC) is pleased to inform you that the Help America Vote Act of 2002 (HAVA) allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year's requirements payment. EAC received a certification statement from your State on December 7, 2004 declaring your State's eligibility for the requirements payment appropriated in fiscal year 2004.

Accordingly, EAC has notified the U.S. General Services Administration (GSA) that approximately $85,085,258 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use this payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, notwithstanding the Act's maintenance of effort requirements; and

- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).
- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments ("Common Rule", Administrative Requirements, 53 FR 8087, March 11, 1988)
- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:
http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

---

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
• is developed and published in the Federal Register in accordance with Section 255 in the same manner as the State plan;

• is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

• takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with EAC. The amended State plan filed with EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

**Reporting**

Also note that HAVA Section 258 requires your State to submit a report to EAC on the activities conducted with the funds provided during the Federal fiscal year, which runs from October 1 through September 30 of each year. This report must include:

• a list of expenditures made with respect to each category of activities described for the use of funds;

• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  - the activities funded to meet HAVA requirements; and
  - how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

**Recordkeeping and Audits**

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes EAC to audit or examine books, documents, papers and records of any
recipient that is deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.

HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the EAC. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the EAC an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman
November 17, 2004

The Honorable DeForest B. Soaries, Jr., Chairman
Election Assistance Commission
1225 New York Ave. NW
Suite 1100
Washington, DC 20005

Dear Chairman Soaries:

The State of Florida's HAVA Plan was updated in June 2004 and has been published in the Federal Register by the Election Assistance Commission. The Plan meets all of the requirements listed in the Help America Vote Act (HAVA) regarding the conditions that must be met before a state is eligible to receive Title II requirements payments. This includes implementation of uniform, non-discriminatory administrative complaint procedures. In addition, Chapter 2003-415, Laws of Florida, implementing HAVA in Florida was pre-cleared by the Department of Justice on October 16, 2003. Therefore, Florida is requesting the requirements payment for Fiscal Year 2004. In making this request, Florida certifies the following:

"The State of Florida hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

Jeb Bush
Governor

Glenda E. Hood
Secretary of State
Peggy,

The Florida Legislature has appropriated the required matching funds as indicated:

<table>
<thead>
<tr>
<th>FY</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>2003-04</td>
<td>$525,000</td>
</tr>
<tr>
<td>2004-05</td>
<td>$6,103,018</td>
</tr>
</tbody>
</table>

If you have any other questions, please let us know.

Thanks,
Barbara

Subject: 2004 HAVA Requirements Payment

Hi, Barbara:

This is to confirm that, yesterday, EAC received Florida's certification for its 2004 requirements payment. Tomorrow afternoon, I am scheduled to present my recommendation to the EAC subcommittee set up to review requirements payments submissions. After that, a recommendation will be considered by all four EAC Commissioners on a 48-hour tally vote. I'll keep you posted on our progress, once that part of the process is finished.

I noticed that Florida's certification affirms that the State meets all the requirements in Section 253(b). I assume that includes the requirement in 253(b)(5) that the State has appropriated the 5% match. I saw that the 2004 State plan budgets for this match, but it is not clear if the amount has been appropriated. Because many States had to appropriate additional funds for the match when their share of the 2004 funds became larger than expected, this issue is often something on which the subcommittee members focus. If you could confirm that the State has already appropriated the match, in response to this email, it will help me answer questions that arise in tomorrow's subcommittee meeting. Thanks.

March 23, 2004

The Honorable Charlie Crist
Attorney General
State of Florida
The Capitol, PL-01
Tallahassee, Florida 32399-1050

Dear Mr. Attorney General:

This refers to Rule No. 1S-2037 (2003), which prescribes the form of the statewide provisional ballot envelope; and Rule No. 1S-2.038 (2003), which prescribes the complaint form to be used for alleged violations of the Help America Vote Act of 2002, 42 U.S.C. 15301-15545, for the State of Florida, submitted to the Attorney General pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. We received your submissions on February 23, 2004.

The Attorney General does not interpose any objection to the specified changes. However, we note that Section 5 expressly provides that the failure of the Attorney General to object does not bar subsequent litigation to enjoin the enforcement of the changes. In addition, as authorized by Section 5, we reserve the right to reexamine these submissions if additional information that would otherwise require an objection comes to our attention during the remainder of the sixty-day review period. See Procedures for the Administration of Section 5 of the Voting Rights Act (28 C.F.R. 51.41 and 51.43).

Sincerely,

Joseph D. Rich
Chief, Voting Section
The Honorable Chris Nelson  
Secretary of State  
State of South Dakota  
500 East Capitol Avenue, Suite 204  
Pierre, South Dakota 57501-5070

Dear Mr. Secretary:

This refers to certain acts of the South Dakota Legislature and the administrative regulations promulgated by the South Dakota Board of Elections, submitted on behalf of Shannon and Todd Counties pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. Your submissions include the following:

1. Chapter 118, Section 3 (1974) that amends SDCL 12-4-1, which pertains to persons entitled to register;

2. Chapter 71, Section 2 (1999) that amends SDCL 12-4-1.1, which pertains to release documents for convicted felons;

3. Chapter 118, Section 4 (1974); Chapter 105, Section 1 (1976); Chapter 106, Section 1 (1985); Chapter 107, Section 1 (1994); Chapter 166, Section 3 (1997); and Chapter 83, Section 10 (2003) that amend SDCL 12-4-2, which pertains to the county auditor being in charge of voter registration records;

4. The 1994 promulgation of and the 1997 and 2003 amendments to ARSD 5:02:03:12, which pertains to agency voter registration instructions;

5. The 1994 promulgation of and the 1997 and 2003 amendments to ARSD 5:02:03:13, which pertains to voter registration instructions;

6. Chapter 28, Section 4 (1982) that repeals SDCL 12-4-2.1, which pertains to deputy auditors in unorganized counties;
7. Chapter 28, Section 41 (1982) that repeals SDCL 12-4-2.2, which pertains to compensation for deputy auditors in unorganized counties;

8. Chapter 118, Section 5 (1974); Chapter 105, Section 2 (1976); Chapter 94, Section 3 (1978); and Chapter 107 (1983) that amend SDCL 12-4-3, which pertains to office hours for registration;

9. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-4, which pertains to personal applications for voter registration;

10. Chapter 83, Section 13 (2003) that enacts 12-4-4.10, which pertains to the provision of voter registration procedures to overseas voters;

11. Chapter 118, Section 7 (1974); Chapter 94, Section 1 (1978); Chapter 120, Section 1 (1981); Chapter 106, Section 2 (1985); Chapter 107, Section 1 (1985); Chapter 110, Section 1C (1985); Chapter 107, Section 6 (1994); Section 95, Section 4 (1996); and Chapter 40, Section 5 (2002) that amend SDCL 12-4-5, which pertains to the entry of names in the master registration file;

12. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-5.1, which pertains to the time for registration other than by the county auditor or the deputy;

13. Chapter 119, Section 1 (1974) that enacts SDCL 12-4-5.2, which pertains to the notice of registration procedures;

15. Chapter 107, Section 7 (1994) and Chapter 95, Section 5 (1996) that enact and amend SDCL 12-4-5.3, which pertains to the review of a voter registration application by the auditor;

16. The 1994 promulgation of and the 1996 and 2002 amendments to ARSD 5:02:03:14, which pertains to the acknowledgment notice for invalid or incomplete voter registration applications;

17. The 1994 promulgation of and the 1996 and 2002 amendments to ARSD 5:02:03:15, which pertains to the acknowledgment notice for valid voter registration applications;
18. Chapter 83, Section 12 (2003) that enacts SDCL 12-4-5.5, which pertains to the verification of a driver's license or social security information;

19. Chapter 118, Section 8 (1974); Chapter 119, Section 13 (1975); and Chapter 107, Section 2 (1985) that amend SDCL 12-4-6, which pertains to filling out the registration card and receipt;

20. Chapter 78, Section 1 (1997) that enacts SDCL 12-4-6.1, which pertains to the effective date for voter registration;

21. Chapter 70, Section 1 (1973); Chapter 119, Section 15 (1975); Chapter 105, Section 4 (1976); Chapter 120, Section 2 (1981) that amend and repeal SDCL 12-4-7, which pertains to the filing, verification, and return of voter registration cards and receipts;

22. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-7.1, which pertains to duplicate registration;

23. Chapter 119, Section 14 (1975); Chapter 105, Section 5 (1976); Chapter 94, Section 2 (1978); Chapter 107, Section 3 (1985); Chapter 127 (1989); and Chapter 110, Section 2 (1993) that enact and amend SDCL 12-4-7.2, which pertains to the duties of voter registrars;

24. Chapter 118, Section 11 (1974); Chapter 107, Section 14 (1994); and Chapter 40, Section 6 (2002) that enact and amend SDCL 12-4-8.2, which pertains to the true copy to replace a duplicate acknowledgment notice;

25. Chapter 118, Section 12 (1974) and Chapter 105, Section 6 (1976) that amend SDCL 12-4-9, which pertains to the master registration list;

26. Chapter 118, Section 200 (1974) that repeals SDCL 12-4-9.1, which pertains to the presidential voter list;

27. Chapter 118, Section 13 (1974); Chapter 120, Section 5 (1975); Chapter 105, Section 7 (1976); Chapter 107, Section 2 (1992); and Chapter 40, Section 2 (2002) that amend SDCL 12-4-10, which pertains to the precinct registration list;

28. Chapter 81 (1973) that enacts SDCL 12-4-10.1, which pertains to the registration lists furnished to the federal court for jury selection;
October 16, 2003

The Honorable Charlie Crist
Attorney General
State of Florida
The Capitol, PL-01
Tallahassee, Florida  32399-1050

Dear Attorney General Crist:

This refers to Chapter 2003-415, which revises the Florida Election Code to implement provisions of the Help America Vote Act (HAVA), 42 U.S.C. 15301-15544, and eliminates the second primary election for 2004, submitted to the Attorney General pursuant to Section 5 of the Voting Rights Act, 42 U.S.C. 1973c. We received your submission on August 18, 2003.

The Attorney General does not interpose any objection to the specified changes. However, we note that Section 5 expressly provides that the failure of the Attorney General to object does not bar subsequent litigation to enjoin the enforcement of the changes. See the Procedures for the Administration of Section 5 (28 C.F.R. 51.41).

Chapter 2003-415 includes provisions that are enabling in nature. Therefore, the State, and other local jurisdictions are not relieved of their responsibility to seek Section 5 preclearance of any changes affecting voting proposed to be implemented pursuant to this legislation (e.g., the requirement that the Department of State prescribe the form for complaints alleging violation of Title III of HAVA, prescribe the form of the provisional ballot envelope, and adopt detailed rules prescribing additional recount procedures for each certified voting system; the requirement that the Division of Elections promulgate rules regarding automatic machine recounts; and the
requirement that each supervisor of elections create a free access system that allows each person casting a provisional vote to learn if the ballot was counted and, if not, why it was not counted). See 28 C.F.R. 51.15.

Sincerely,

[Signature]

Joseph D. Rich
Chief, Voting Section

June 17, 2004

The Honorable Glenda Hood
Secretary of State
R. A. Gray Building
500 S. Bronough
Tallahassee, Florida 32399-0250

Dear Secretary Hood:

The U. S. Elections Assistance Commission is pleased to inform you that the Help America Vote Act of 2002 ("HAVA") allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the U.S. Election Assistance Commission ("EAC") a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year's requirements payment. The EAC received a certification statement from your State on June 10, 2004 declaring your State’s eligibility for the requirements payment(s) appropriated in fiscal year(s) 2003.

Accordingly, the EAC has notified the U.S. General Services Administration ("GSA") that approximately $47,416,833 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use these payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to the EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, notwithstanding the Act’s maintenance of effort requirements; and
- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).
- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments (“Common Rule”, Administrative Requirements, 53 FR 8087, March 11, 1988)
- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:

http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
is developed and published in the Federal Register in accordance with Section 255 in the same manner as the State plan; is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and takes effect only after the expiration of the 30-day period which begins on the date the change is published in the Federal Register.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with the EAC. The amended State plan filed with the EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

Reporting

Also note that HAVA Section 258 requires your State to submit a report to the EAC on the activities conducted with the funds provided during the federal fiscal year, which runs from October 1 through September 30. This report must include:

- a list of expenditures made with respect to each category of activities described for the use of funds;
- the number and type of articles of voting equipment obtained with the funds; and
- an analysis and description of:
  - the activities funded to meet HAVA requirements; and
  - how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with the EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

Recordkeeping and Audits

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes the EAC to audit or examine books, documents, papers and records of any recipient that are deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.
HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the grant-making office. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the grant-making office an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.

June 17, 2004

The Honorable Jeb Bush
Governor
Office of the Governor
The Capitol
400 South Monroe Street
Tallahassee, Florida 32399-0001

Dear Governor Bush:

The U. S. Elections Assistance Commission is pleased to inform you that the Help America Vote Act of 2002 (“HAVA”) allocation appropriated for your State is now available for disbursement.

HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the U.S. Election Assistance Commission (“EAC”) a statement certifying that the State is in compliance with the conditions set forth in section 253(b) in order to be eligible for a fiscal year’s requirements payment. The EAC received a certification statement from your State on June 10, 2004 declaring your State’s eligibility for the requirements payment(s) appropriated in fiscal year(s) 2003.

Accordingly, the EAC has notified the U.S. General Services Administration (“GSA”) that approximately $47,416,833 should be disbursed to your State. Your State should receive these funds within five business days, provided your State has given GSA the information needed for the electronic transfer.

Use of Funds

In accordance with HAVA Section 251(b), these funds are to be used only to meet the requirements of HAVA Title III, except that your State may use these payment to carry out other activities to improve the administration of elections for Federal office if the State certifies to the EAC that:

- the State has implemented the requirements of Title III; or
- the amount to be expended with respect to such other activities does not exceed an amount equal to the minimum requirements payment amount applicable to the State.
Section 251(c) of the Act also explains that a State may use a requirements payment:

- as a reimbursement for costs incurred in obtaining voting equipment which meets the requirements of section 301 (voting systems standards) if the State obtains the equipment after the regularly scheduled general election for Federal office held in November 2000, not withstanding the Act's maintenance of effort requirements; and
- for any costs for voting equipment which meets the requirements of section 301 that were incurred pursuant to a multi-year contract on or after January 1, 2001, except that the amount that the State is otherwise required to contribute under the maintenance of effort requirements must be increased by the amount of the payment made with respect to such multiyear contract.

Conforming to Applicable Federal Guidelines

Please note that the following Office of Management and Budget guidelines apply to these federal funds:

- A-87 - Cost Principles for State, Local and Indian Tribal Governments (Cost Principles).
- Uniform Administrative Requirements for Grants and Cooperative Agreements to State and Local Governments ("Common Rule", Administrative Requirements, 53 FR 8087, March 11, 1988)
- A-133 – Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).

These guidelines may be found at:

http://www.whitehouse.gov/omb/circulars/index.html

Material Changes to State Plans

Section 254(a)(11) of HAVA prohibits a State from making material change(s) to the State plan unless the change:

---

1 Maintenance of effort is addressed in HAVA section 254(a)(7), which requires the State to describe how it will maintain the expenditures of the State for activities funded by the requirements payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.
is developed and published in the *Federal Register* in accordance with Section 255 in the same manner as the State plan;

- is subject to public notice and comment in accordance with Section 256 in the same manner as the State plan; and

- takes effect only after the expiration of the 30-day period which begins on the date the change is published in the *Federal Register*.

Accordingly, if your State does make any material change(s) to your current State plan for which you are receiving this requirements payment, you must file an amended State plan with the EAC. The amended State plan filed with the EAC may be limited to describing in reasonable detail the changes that have been made between the amended State plan and the State plan currently in effect.

**Reporting**

Also note that HAVA Section 258 requires your State to submit a report to the EAC on the activities conducted with the funds provided during the federal fiscal year, which runs from October 1 through September 30. This report must include:

- a list of expenditures made with respect to each category of activities described for the use of funds;
- the number and type of articles of voting equipment obtained with the funds; and
- an analysis and description of:
  - the activities funded to meet HAVA requirements; and
  - how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with the EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

**Recordkeeping and Audits**

HAVA Title IX requires recipients of payments under the Act to keep records consistent with sound accounting principles to facilitate an effective audit. It authorizes the EAC to audit or examine books, documents, papers and records of any recipient that are deemed pertinent to the payment and stipulates that the provision applies to all recipients of payments under the Act. Such recipients would include local jurisdictions that received funds through the State as a result of the requirements payments.
HAVA also requires that all funds provided under the Act are subject to mandatory audit by the Comptroller General at least once during the lifetime of the program, with the same access to records as the grant-making office. If the Comptroller General determines that an excess payment has been made or the recipient is not in compliance, the recipient must pay the grant-making office an amount that reflects the excess payment or the proportion representing noncompliance.

Assistance

If you have any questions about this matter, please have your staff contact Peggy Sims, EAC Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman
June 3, 2004

The Honorable DeForest B. Soaries, Jr., Chairman
Election Assistance Commission
1225 New York Ave. NW
Suite 1100
Washington, DC 20005

Dear Chairman Soaries:

The State of Florida has reviewed the requirements listed in the Help America Vote Act (HAVA) regarding the conditions that must be met before a state is eligible to receive Title II requirements payments. All of the conditions have been met by the State of Florida. This includes implementation of uniform, non-discriminatory administrative complaint procedures. These procedures are referenced in Florida's State Plan on page 59. In addition, Chapter 2003-415, Laws of Florida, implementing HAVA in Florida was pre-cleared by the Department of Justice on October 16, 2003. Therefore, Florida is requesting the requirements payment for fiscal year 2003. In making this request, Florida certifies the following:

"The State of Florida hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

Jeb Bush
Governor

Glenda E. Hood
Secretary of State

MESSAGE

ORIGINAL TO FOLLOW BY MAIL.
May 6, 2004

The Honorable Glenda Hood
Secretary of State
The Capitol
Plaza Level, Room 2
Tallahassee, Florida 32399-0250

Dear Ms. Hood:

Enclosed, please find a copy of a letter sent by the U.S. Election Assistance Commission (EAC) to the chief executive officer of your State. This letter summarizes provisions for filing statements of certification to receive requirements payments in accordance with the Help America Vote Act of 2002 (HAVA).

As you may know, to receive funds for a fiscal year, HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the EAC a statement certifying that the State is in compliance with the conditions set forth in HAVA Section 253(b). I hope that the enclosed letter helps you in this process.

Should you have any questions or need further clarification as to the contents of the attached letter, please do not hesitate to contact Peggy Sims at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

Enclosure
May 6, 2004

The Honorable Jeb Bush
Governor
The Capitol
400 South Monroe Street
Tallahassee, FL 32399-0001

Dear Governor Bush:

The Help America Vote Act (hereafter “HAVA” or the “Act”) authorizes payments to States, U.S. Territories and the District of Columbia (hereafter “States”) to assist in meeting the “Uniform and Nondiscriminatory Election Technology and Administration Requirements” in Title III of the Act. In order to be eligible for receipt of a requirements payment, a State must file with the U.S. Election Assistance Commission (hereafter “EAC” or “Commission”) a certification statement for the fiscal year, which declares that such State is in compliance with the required conditions set forth in section 253(b) of the Act. Title II requirements payments for Fiscal Years 2003 and 2004 are available at this time.

Timing for Filing a Statement of Certification (Section 253(a) and (d))

To receive funds for a fiscal year, HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b).31 This statement may not be filed until after the expiration of a 45-day period that began on March 24, 2004 – which was the day that all 55 State plans were published in the Federal Register by the Commission. The 45-day period expires on May 8, 2004.

Language for Statement of Certification (Section 253(a))

Recommended language for the certification statement is contained in Section 253(a) of the Act. Thus, the certification statement for a fiscal year may state the following:

"____________________ hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

31 For the purpose of the requirements payments, the chief State election official is the individual designated by the State under section 10 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-8) to be responsible for coordination of the States responsibilities under such Act.
Condition for Receipt of Funds (Section 253(b))

The conditions for receipt of a requirements payment contained in section 253(b) require that a state certify to the Commission that, for the fiscal year(s) in which funds are requested, it:

- has filed a State plan with the EAC covering the fiscal year and which the State certifies:
  - contains each of the elements required to be in the State plan, according to section 254, including how the State will establish a State Election Fund in accordance with section 254(b);32
  - is developed in accordance with section 255, which describes the process of using a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions, other local election officials, stake holders (including representatives of groups of individuals with disabilities), and other citizens to develop the plan; and
  - meets the 30-day public notice and comment requirements of section 256.

- has filed with the EAC a plan for the implementation of the uniform, non-discriminatory administrative complaint procedures required under section 402 (or has included such a plan in the State plan), and has such procedures in place. If the State does not include such an implementation plan in the State plan, the Federal Register publication and the committee development requirements of sections 255(b) and 256 apply to the implementation of the administrative complaint procedure in the same manner as they apply to the State plan.

- is in compliance with each of the following federal laws as they apply to the Act:
  - The Voting Rights Act of 1965;
  - The Voting Accessibility for the Elderly and Handicapped Act;
  - The Uniformed and Overseas Citizens Absentee Voting Act;
  - The National Voter Registration Act of 1993;
  - The Americans with Disabilities Act of 1990; and

- has provided that, to the extent that any portion of the Title II requirements payment is used for activities other than meeting the requirements of Title III:
  - the State’s proposed uses of the requirements payment are not inconsistent with the requirements of Title III; and

32 Section 254(b)(1) and (2) of the Act describes the State Election Fund as a fund that is established in the treasury of the State government, which must be used by the State exclusively to carry out the activities for which the requirements payment (title II, Subtitle D, Part 1) is made to the State, and which consists of:
- amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made;
- the requirements payment to the State;
- such other amounts as may be appropriated under law; and
- interest earned on deposits of the fund.

HAVA section 254(b)(3) provides that, in the case of a State that requires State legislation to establish a State Election Fund, the EAC is required to defer disbursement of the requirements payment to such State until such time as legislation establishing the fund is enacted.
☐ the use of the funds under this paragraph is consistent with the requirements of section 251(b); and

- has appropriated funds for carrying out the activities for which the requirements payment is made in an amount equal to 5 percent of the total amount to be spent for such activities (taking into account the requirements payment and the amount spent by the State) and, in the case of a State that uses a requirements payment as a reimbursement for voting equipment under 251(c)(2), an additional amount equal to the amount of such reimbursement.\(^3\)

Accordingly, prior to submission of a certification statement for a fiscal year(s) to the EAC, the Commission strongly encourages all States to verify compliance with the required conditions set forth in section 253(b). Should the Commission have any concerns that a particular State – which has submitted a certification statement to the EAC – has not met one of the required conditions, the EAC will immediately contact that particular State and/or communicate its concern in writing.

General Services Administration (GSA) Procedures for Payments

GSA, which will disburse the Title II requirements payments to States under the direction of the EAC, requests that the following procedures be used for disbursement and receipt of these payments:

- **Step One – Registration.** State representatives should contact Sharon Pugh (Sharon.Pugh@GSA.gov) or Brad Farris (Brad.Farris@GSA.gov) on (816) 823-3108, as soon as possible, with information on State contact points, including name, address and email address. These contacts may very well be the same personnel that GSA worked with in distributing HAVA Title I funding. GSA will verify this information.

- **Step Two – EFT Setup.** GSA will contact the State representatives to obtain banking information required for an Electronic Funds Transfer (EFT). Again, this may be the same information submitted for HAVA Title I funding. Payments should be made into the Election Fund described in HAVA Section 254(b)(1). All funds will be disbursed via EFT.

- **Step Three – State Certification Statement to EAC** – States will submit required certification information to the EAC, as outlined above, after the completion of the 45-day period for publication of the State plan in the Federal Register.

- **Step Four – Notification to GSA by EAC** – Based upon the certification statement, the EAC will notify GSA that a State is due receipt of its Title II payment for a particular fiscal year (i.e., either FY 2003 funds, FY 2004 funds, or both).

- **Step Five – Disbursement of Title II Funds** – GSA will disburse the Title II funds for a particular fiscal year to the accounts specified by the States, and will notify the States and the EAC of the disbursement in writing.

\(^3\) For purposes of declaring sufficient funds are available for the State to carry out activities to meet Title III requirements, if the requirements payment is to be used as a reimbursement for voting equipment obtained on and after January 1, 2004 through multi-year contracts, the activity is not treated as an activity to meet Title III requirements.
Finally, the Commission has received numerous inquiries regarding the concern that the Title II requirements funds will no longer be available for disbursement to the States after the end of the current fiscal year (i.e., September 30, 2004). However, the Commission points to section 257(b) of the Act, which states in part:

“(b) AVAILABILITY- Any amounts appropriated pursuant to the authority of subsection (a) shall remain available without fiscal year limitation until expended.” (Emphasis added.)

Based upon the above statutory language, the Commission believes Congress’ intent was clear in that the Title II funds remain available to the States until fully disbursed by the EAC.

The Commission looks forward to working closely with all States as we enter into this next phase of HAVA implementation. Should you have any questions or need further clarification as to the contents of this letter, please do not hesitate to contact Peggy Sims at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

The Honorable Sue Cobb  
Secretary of State  
R. A. Gray Building  
500 S. Bronough Street, Room 316  
Tallahassee Florida 32399-0250

Dear Secretary Cobb:

This letter serves as a reminder that reports on funds provided to States under the Help America Vote Act of 2002 (HAVA), Title I, Sections 101 and 102, and Title II, Section 251, are due soon to the U.S. Election Assistance Commission (EAC). Attached is a chart summarizing the due dates for the reports, the CFDA numbers applicable to the funds provided, the coverage dates for each report, and the form and content of the reports.

All reports on the HAVA Title I funds and Title II, Section 251 requirements payments should be submitted to the following address:

State HAVA Funding Reports  
U.S. Election Assistance Commission  
1225 New York Avenue, NW – Suite 1100  
Washington, DC 20005

If you have any questions about this matter, please contact Peggy Sims, Election Research Specialist. You can reach her by email at psims@eac.gov, or by phone at 1-866-747-1471 (toll free) or 202-566-3120.

Sincerely yours,

Paul S. DeGregorio

1 Reports are due if the State has received funds under the HAVA title and section noted, and has not previously reported the expenditure of all such funds (including interest earned and, in the case of Title II, Section 251 payments, the 5% match).
January 26, 2005

The Honorable Glenda Hood  
Secretary of State  
R. A. Gray Building  
500 S. Bronough Street, Room 316  
Tallahassee, Florida 32399-0250

Dear Secretary Hood:

This letter is in response to numerous State inquiries about future reporting responsibilities for funds provided under Title I, Sections 101 and 102, of the Help America Vote Act (HAVA).

In a July 2003 letter, the General Services Administration (GSA) notified your State that separate reports for Section 101 and 102 funds, covering financial activity from the date of GSA's disbursement of the funds to your State through December 31, 2003, were to be filed with GSA by January 21, 2004. GSA noted that States should report using Standard Form 269, with a separate form to be filed for Section 101 and, if applicable, 102 funds received by the State. GSA required each funding recipient to submit verification of actual purchases and expenditures.

The GSA letter also noted that the agency would provide information from these reports to Election Assistance Commission (EAC), once it was up and running, and that reporting dates would be subject to change by EAC. EAC has assumed the responsibility for receiving reports regarding these funds, in accordance with the agency’s assumption of its audit responsibilities under HAVA, Title IX, Section 902.

EAC therefore requests that your State file your next report(s) no later than February 28, 2005 regarding all HAVA Title I funds provided to your State that had not been disbursed as of December 31, 2003 (the closing date of the report to GSA). Separate reports must be filed for the Section 101 and, if applicable, 102 funds that were received by your State; should cover financial activity during the period beginning January 1, 2004 and ending December 31, 2004; and must include the following information:

- a detailed list of expenditures by program, function, or task (including dollar amount) made with respect to each category of activities described for the permissible use of funds in HAVA sections 101(b) and 102(a)(2);
• the number and type of articles of voting equipment obtained with the funds; and

• an analysis and description of:
  o the activities funded to meet HAVA requirements; and
  o how such activities conform to the submitted State plan.

States should submit Standard Form 269 as part of each report. This form may be found at the [http://www.whitehouse.gov/omb/grants/sf269.pdf](http://www.whitehouse.gov/omb/grants/sf269.pdf).

Subsequent reports providing the same information on HAVA Title I expenditures will be due annually on February 28, covering the financial activity for the previous calendar year, until the State has filed final reports indicating that no such funds remain to be disbursed.

All reports on the HAVA Title I funds must be submitted to the following address:

State HAVA Funding Reports  
U.S. Election Assistance Commission  
1225 New York Avenue, NW – Suite 1100  
Washington, DC 20005

If you have any questions about this matter, please contact Peggy Sims, Election Research Specialist, by email at psims@eac.gov or by phone at 1-866-747-1471 (toll free) or 202-566-3120.

Sincerely yours,

Gracia M. Hillman  
Chair
The Honorable Jeb Bush  
Governor of Florida  
Tallahassee, FL 32399  

Dear Governor Bush:

This letter describes the final distribution of funds by the General Services Administration (GSA), in carrying out our responsibilities under Title 1 of Public Law (P.L.) 107-252, the Help America Vote Act (HAVA, "the Act"). The Act tasks GSA with responsibility for disbursing funds to the States, the District of Columbia and the Territories to implement various improvements to the Federal election process, including the replacement of voting equipment. Please see the enclosed letter (Enclosure 1) for background information on the program, original plans for applying for funds, timeline, et cetera.

Payments

Florida applied and certified timely to Sections 101 and 102 of HAVA, Title I. GSA, as described in Enclosure 1, processed an initial payment of $5,000,000.00, which was transferred electronically on 4/23/2003 to the account specified by Edward Kast, Director, Division of Elections. Once all of the State applications were received and verified, GSA determined the final distribution of funds to the States, according to HAVA instructions, and processed the final payments. An additional payment of $21,028,957.00 was made to the same account specified, again by Electronic Funds Transfer (EFT), and GSA verified receipt of the funds to that account on Monday, June 16, 2003. Thus, Florida received a total of $26,028,957.00, consisting of a Section 101 payment of $14,447,580.00, and a Section 102 payment of $11,581,377.00. We will assume that your Chief Election Official and designee for payment of funds is Glenda Hood, Secretary of State, unless you notify us differently.

The Section 101 payment is for one or more of the following purposes, as indicated by Florida's certification of Section 101:

- Complying with the requirements of Title III of the Act;
- Improving the administration of elections for Federal office;
- Educating voters concerning voting procedures, voting rights, and voting technology;
Training election officials, poll workers, and election volunteers;

Developing the State plan for requirements payments to be submitted under Part 1 of Subtitle D of Title I1 (Sections 251-257) of the Act;

Improving, acquiring, leasing, modifying, or replacing voting systems and technology and methods for the casting and counting of votes;

Improving the accessibility and quantity of polling places, including providing physical access for individuals with disabilities, providing non-visual access for individuals with visual impairments, and providing assistance to Native Americans, Alaska Native citizens, and to individuals with limited proficiency in the English language; and/or

Establishing a toll-free telephone hotline that voters may use to report possible voting fraud and voting rights violations, to obtain general election information, and to access detailed automated information on their own voter registration status, specified polling place locations, and other relevant information.

The Section 102 payment is for the following purpose as indicated by Florida’s certification of Section 102, for 3,628 total qualifying precincts, consisting of 3,588 punch card precincts and 40 lever voter system precincts:

- A State is obligated to use the funding (either directly or as a reimbursement for costs incurred on or after January 1, 2001) to replace punch card voting systems or lever voting systems in precincts within that State that used such systems in the November 2000 election (“qualifying precincts”).

- A State that receives funding for this program must ensure that all of the punch card voting systems or lever systems in the qualifying precincts within that State will be replaced in time for the regularly scheduled general election for Federal office to be held in November 2004 (unless a waiver is obtained under Section 102(a)(3)(B)).

- Section 102(a)(3)(B) says that States may request a waiver by certifying to the Administrator of General Services not later than January 1, 2004, that the State will not meet the deadline specified above, for good cause and including in the certification the reasons for the failure to meet such deadline, the State shall ensure that all of the punch card voting systems or lever voting systems in the qualifying precincts within the State will be replaced in time for the first election for Federal office held after January 1, 2006.

- Section 102(d) deals with repayment of funds for failure to meet the deadline, and says that if a State receiving Section 102 funds fails to meet the deadlines stated above, the State shall pay to the Administrator an amount equal to the noncompliant precinct percentage of the amount of the funds provided to the State under the program. This amount will be $3,192.22 per noncompliant precinct.

- The State will continue to comply with current voting laws stated in Section 906; and,

- The replacement voting systems will meet the requirements of Title III, Section 301.
Method of Calculations

The following describes the method of calculations for distribution of the HAVA Title I funds, which was reviewed and cleared with both House and Senate staff, our General Counsel's office, and our Inspector General's office.

**Total Availability.** The total amount available for distribution is $649,500,000, calculated by taking the total $650,000,000 appropriated for this purpose in Public Law 108-7, and subtracting the $500,000 allowed for GSA administrative costs. For initial calculations, this amount is divided evenly between Sections 101 and 102 at $324,750,000 per section.

**Section 101.** Step one of two gives one-half of one percent of $324,750,000 to each State and the District of Columbia ($1,623,750) and one tenth of one percent of the total ($324,750) to Guam, Puerto Rico, the U.S. Virgin Islands and America Samoa. The total distributed under step one is $84,110,250.

The second step allocates funds from the $324,750,000 not allocated in the first step (totaling $240,639,750) based on each State and Territory’s proportionate share of the voting age population as reported in the 2000 Census (total 212,050,630, including Territories). The sum of the funds allocated in the first step and the second step equals $324,750,000.

**Section 102.** First, $4000 was allocated to each State for each precinct that used punch card or lever voting machines in the 2000 election, as certified by the State, totaling $376,312,000. The State totals were then reduced on a pro rata basis to 86.29807 percent of the original total, so that the nationwide total of funds allocated did not exceed $324,750,000.

**Section 103.** Section 103 of the Act guarantees that each State will receive a minimum payment of $5,000,000 and each territory will receive a minimum payment of $1,000,000. If a State were to receive less than $5,000,000 (or a Territory less than $1,000,000) for both programs, based on the calculations described above for Sections 101 and 102, that State’s or Territory’s payment was increased to the minimum. The remaining States’ payments under Sections 101 and 102 were reduced on a pro rata basis, per Section 103(b), so that the total did not exceed the $649,500,000 total availability. The amount of the reduction to the remaining States’ payments was $44,460,348. This required a pro rata reduction of 7.52341 percent to the remaining State’s Sections 101 and 102 payments. After all reductions, the net amount per qualifying precinct for voting machine replacement is $3,192.22.

---

1 GSA’s administrative costs will be substantially less than $500,000, and the amount not used by GSA will be transferred to the Election Assistance Commission when it becomes operational.
Reporting and Conformance

By January 21, 2004, States will provide reports to GSA on actual expenditures as of December 31, 2003. Each funding recipient will be required to submit verification of actual purchases and expenditures. States should report using Standard Form 269 for Sections 101 and 102 categories. A separate form should be used for each section. Information regarding actual funds expended will be reconciled against funding provided. GSA will provide this information to the Election Assistance Commission once it becomes operational, and reporting dates are subject to change by the Commission.

State recipients of these funds are required to conform to the following Office of Management and Budget (OMB) grant guidelines found at http://www.whitehouse.gov/omb/circulars/index.html:

- OMB Circular A-87, Cost Principles for State, Local and Indian Tribal Governments (Cost Principles)
- OMB Circular A-102, Grants and Cooperative Agreements With State and Local Governments (Administrative Requirements)
- OMB Circular A-133, Audits of States, Local Governments, and Non-Profit Organizations (Single Audits, Audit Requirements).
- In addition, Title I funds are subject to the Cash Management Improvement Act (CMIA) that is generally applicable to all Federal grants. State Treasurers/Chief Financial Officers are very familiar with CMIA and should be able to offer guidance on requirements.

The Catalog of Federal Domestic Assistance number assigned to this project is 39.011, Election Reform Payments. Please see the following reference for further information:

Audits

Title IX, Section 902 of Public Law 107-252, states that with respect to any grant or payment made in accordance with this Act by GSA, the Election Assistance Commission must be regarded as the office making the grant or payment, for the purposes of audits.
Assistance

If you have any questions or comments, please feel free to contact me at 202.501.0719, or Stephen Kulenguski at 202.501.4496. Questions about transfers of funds may be addressed to Sharon Pugh or Brad Farris at 816.823.3108 in our regional Finance Center. The GSA Regional Administrator for Florida is Edwin E Fielder, Jr., telephone 404.331.3200. Thank you.

Sincerely,

Deborah J. Schilling
Director of Budget

Re: CERTIFICATION: USE OF HAVA SECTION 102 FUNDS AND REPLACEMENT OF PUNCH CARD AND LEVER MACHINES
CERTIFICATION: USE OF HAVA SECTION 102 FUNDS AND REPLACEMENT OF PUNCH CARD AND LEVER MACHINES

I, the undersigned, having investigated or caused to be investigated each matter, below; certify, affirm and acknowledge that each of the following numbered statements, and any attachments to this certification document, are true and accurately reflect the status, condition and operations of Florida (hereinafter “state”) as they related to the use and status of Help America Vote Act (HAVA) Section 102 Funds and the replacement of punch card or lever machines.

I understand that by certifying the information below, I am making a statement or representation to the U.S. Election Assistance Commission, an independent Federal Agency, necessary for the agency to determine Florida’s required compliance with HAVA Section 102. (42 U.S.C. §15302). Compliance with HAVA Section 102 is required by the state as a result of its accepting Federal funds under that provision. As a condition of receiving 102 funds, the state certified that it would “use the payment... to replace punch card voting systems or lever voting systems (as the case may be) in the qualifying precincts within the state by the deadline prescribed... [regularly scheduled general election for Federal office to be held in November 2004].” (42 U.S.C. §15302(b)).

I further understand that to the extent any of the below (or attached) representations or certifications are found to be materially false, the Federal funds received by the state will be subject to audit and possible recoupment. Further, such false statements may subject the undersigned to criminal prosecution under 18 U.S.C. §1001 or other Federal Statutes.

I. BACKGROUND. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the following statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment A, Background.”

   "Initials: [Signature]

2. Triggering Election. The regularly scheduled general election for Federal Office in November 2004 (triggering the deadline noted in 42 U.S.C. 15302 (a)(3)(A)) for the state was held on November 2, 2004.

   "Initials: [Signature]

3. Funds Received. The State received $11,581,377.00 in Federal Funds pursuant to HAVA section 102.

   "Initials: [Signature]
II. PUNCH CARD OR LEVER MACHINE REPLACEMENT. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the below statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment B, Punch Card or Lever Machine Replacement.”

1. Qualified Precincts. The State had 3,628 total qualified precincts (precincts which used punch card or lever machines to administer the regularly scheduled general election for Federal office held in November of 2000).

Initials: [Signature]

2. Qualified Precincts: No Punch Card or Lever Machine Used. None of the qualifying precincts, noted in statement 1 above, used a lever or punch card machine in an election for Federal office on or after November 2, 2004.

Initials: [Signature]

3. No Punch Card or Lever Machine Used in State. No precinct in the state used a punch card or lever machine for an election for Federal office on or after November 2, 2004.

Initials: [Signature]

4. Replacement Machines. All machines purchased, leased or otherwise procured to replace punch card or lever machines in qualifying precincts meet the requirements of HAVA section 301 (42 U.S.C. §15481) and comply with all other relevant Federal statutory requirements (noted in 42 U.S.C. §15545). This includes the requirement that each polling place have at least one voting system equipped for individuals with disabilities. Please provide (below) a complete list of all voting systems procured, leased or otherwise obtained to replace the state’s punch card or lever machines.

III. HAVA § 102 FUNDS. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify to either response "a" or "b" in statement 1 or statement 2, below, you must line through the statement and attach a signed document explaining why you could not make a certification. The explanation (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled "Attachment C, HAVA §102 Funds."

1. Status of HAVA §102 Funds. Please check the statement below that applies to your state. (Check only one statement).

   (a) The state had none of the $11,581,377 it received pursuant to HAVA §102 remaining in its election fund after November 2, 2004. This means that as of this date, all 102 funds were expended. Funds are expended when finally transferred to another party (manufacturer or vendor) for consideration (voting system).

   (b) The state had only obligated funds remaining in its election fund after November 2, 2004. This means that as of this date, all funds were either expended or obligated. Funds are expended when finally transferred to another party (manufacturer or vendor) for consideration (voting system). Funds are properly obligated when the state has incurred a legally enforceable liability (such as a grant agreement, contract or lease) to another party (such as a local government or contractor) for a specific portion of the 102 funds. If the state had only obligated funds in its election funds after the above date, attach a statement explaining the obligation(s). This statement must clearly explain and state the value of the obligated funds remaining and the nature of the obligation. Documentation regarding the obligation should also be attached and explained (e.g., documents from vendor contracts or agreements with local governments). This explanation and supporting documentation shall be labeled "Attachment D, Obligated Funds."

   Initials: [Signature]

2. Use of HAVA §102 Funds. All HAVA §102 funds expended or obligated by the state were used to replace punch card or lever machines in qualifying precincts per 42 U.S.C. §15302(a)(2).

   Initials: [Signature]

I, by signing my name below, certify, affirm and acknowledge, under penalty of Federal law, that each of the above numbered paragraphs initialed above accurately represent the operations, conditions and practices of Florida as they related to the use and status of HAVA Section 102 Funds and the replacement of punch card or lever machines.

Sue Cobb
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

RE: Certification—HAVA 102 Funding

Dear Secretary Cobb,

The purpose of this letter is to obtain a certification from you, as Florida’s Chief State Election Official, regarding the state’s use of funds provided under section 102 of the Help America Vote Act (HAVA). These funds were granted to the state for the replacement of punch card or lever voting machines (42 U.S.C. §15302). The U.S. Election Assistance Commission (EAC or Commission) is the Federal agency responsible for administering HAVA §102 funds. The regularly scheduled general election for Federal office in November 2004 was held on November 2, 2004. The date of this election represents the deadline for the state’s use of the Federal funds it received pursuant to HAVA section 102. (42 USC §15302(a)(3)) Now that this deadline has passed, the state must demonstrate that the funds it received were used for the purpose and by the deadlines set forth in HAVA (42 U.S.C. §15302 (a) & (b)). A certification document has been enclosed for this purpose. If Florida cannot certify the proper and timely use of the 102 funds, HAVA requires that they are returned to the EAC to be dispersed as requirements payments. (42 U.S.C. §§ 15304 & 15401).

Replacement of Voting Systems. In order to avoid repayment of funds, Florida will be required to certify the total number of qualified precincts\(^5\) which replaced all punch card or lever machines in time for the regularly scheduled general election for Federal office in November 2004 that took place on November 2, 2004. This means that no punch card or lever voting systems were used in the qualified precinct.\(^6\) The replacement systems must (1) not use punch cards or levers, (2) meet the requirements of HAVA section 301 (42 U.S.C. §15481) and (3) comply with all other relevant Federal statutory requirements (noted in 42 U.S.C. §15545). Failure to demonstrate compliance will require repayment. The repayment provisions of HAVA require repayment of funds on a prorated basis. The rate is established by taking the total

\(^{5}\) Those precincts which used punch card or lever machines to administer the regularly scheduled general election for Federal office held in November of 2000.

\(^{6}\) Replaced punch card or lever voting systems may not be transferred for use in a different precinct.
number of qualifying precincts which have fully met the requirements of HAVA, as a function of the total number of qualifying precincts within the State. (See 42 USC §15302(d)).

**Timely Expenditure of Funds.** To avoid repayment, Florida must also show that all HAVA 102 funds received were used for their designated purpose prior to the November 2, 2004 HAVA deadline. This means that all 102 funds were either expended (finally transferred to another party for consideration) and/or obligated in such a way that the state incurred a legally enforceable liability to another party (such as a local government or contractor) for the full value of its 102 funding. Florida must be able to document and certify the status of the 102 funding it received. In the event Florida possesses unobligated 102 funds after the deadline, the state will be required to return either an amount equal to the noncompliant precinct percentage, as discussed above, or the total amount of unobligated 102 funds, whichever is greater.

**Certification.** As Chief State Election Official, we ask that you carefully review the enclosed certification and its instructions. The document shall be filled out by initialing each statement that is true and accurate. If a statement may not be certified as true and accurate it must be lined through and a written and signed explanation attached (see instructions in italics). The certification must be completed and received by the Commission no later than January 15, 2007. Failure to timely file the enclosed certification will result in the Commission’s forwarding of this matter to the EAC’s Office of the Inspector General for action.

Thank you for your attention to this matter. All questions or correspondence should be directed to Edgardo Cortes, Election Assistance Commission, 102 Funds Certification, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005 [(202) 566-3100].

Sincerely,

[Signature]

Executive Director

Enclosure
CERTIFICATION: USE OF HAVA SECTION 102 FUNDS AND REPLACEMENT OF PUNCH CARD AND LEVER MACHINES

I, the undersigned, having investigated or caused to be investigated each matter, below; certify, affirm and acknowledge that each of the following numbered statements, and any attachments to this certification document, are true and accurately reflect the status, condition and operations of Florida (hereinafter “state”) as they related to the use and status of Help America Vote Act (HAVA) Section 102 Funds and the replacement of punch card or lever machines.

I understand that by certifying the information below, I am making a statement or representation to the U.S. Election Assistance Commission, an independent Federal Agency, necessary for the agency to determine Florida’s required compliance with HAVA Section 102. (42 U.S.C. §15302). Compliance with HAVA Section 102 is required by the state as a result of its accepting Federal funds under that provision. As a condition of receiving 102 funds, the state certified that it would “use the payment… to replace punch card voting systems or lever voting systems (as the case may be) in the qualifying precincts within the state by the deadline prescribed… [regularly scheduled general election for Federal office to be held in November 2004].” (42 U.S.C. §15302(b)).

I further understand that to the extent any of the below (or attached) representations or certifications are found to be materially false, the Federal funds received by the state will be subject to audit and possible recoupment. Further, such false statements may subject the undersigned to criminal prosecution under 18 U.S.C. §1001 or other Federal Statutes.

I. BACKGROUND. Read the statements below and initial the items that you certify as true and accurate. If you are not able to certify one or more of the following statements, you must line through the statement at issue and attach a signed explanation identifying it and explaining why it may not be certified. The statement (attachment) should provide all necessary facts and concisely explain the conditions that make certification a problem. The explanation shall be labeled “Attachment A, Background.”

   **Initials:**

2. **Triggering Election.** The regularly scheduled general election for Federal Office in November 2004 (triggering the deadline noted in 42 U.S.C. 15302 (a)(3)(A)) for the state was held on November 2, 2004.

   **Initials:**

3. **Funds Received.** The State received $11,581,377.00 in Federal Funds pursuant to HAVA section 102.

   **Initials:**

Dear Mr. Wilkey:

On behalf of Secretary of State, Sue M. Cobb, the chief elections official for the State of Florida, we hereby submit this certification to the U.S. Elections Assistance Commission that the State of Florida has fully implemented the requirements of Title III of the Help America Vote Act of 2002. Pursuant to section 251(b)(2) of the Title II of the Help America Vote Act of 2002 (HAVA), such certification permits the State to use HAVA requirements funds for other activities to improve the administration of elections for Federal office.

If you have any comments or questions regarding this certification, please do not hesitate to contact us at 850-245-6500.

Sincerely,

Dawn K. Roberts, Director, Division of Elections

Cc: Sue M. Cobb, Secretary of State
    Heidi Hughes, Chief of Staff and General Counsel
    Barbara Leonard, HAVA Funds Coordinator
    Maria Matthews, designated staff attorney for HAVA
Dear Mr. Wilkey:

On behalf of Secretary of State, Sue M. Cobb, the chief elections official for the State of Florida, we hereby submit this certification to the U.S. Elections Assistance Commission regarding our state's intended use of the requirements payments to carry out other activities to improve election administration for Federal office.

Pursuant to section 251(b)(2) of the Title II of the Help America Vote Act of 2002 (HAVA), the State of Florida certifies that it intends to use $4,000,000.00 of the requirements payment for improving election administration. More specifically, these funds will be used to complete major poll worker recruitment and training efforts statewide that primarily begin in June 2006 and end by August 2006, before the primary election scheduled for September 5, 2006. Three million dollars will be distributed to the counties for their recruitment and training activities. The county must provide a 15% match. The remaining one million dollars will be used by the Department of State to develop a statewide poll worker curriculum to be used by all counties to assure uniform poll worker training.

We also certify that the $4,000,000.00 is an amount that does not exceed the amount equal to the total minimum requirements payment amount applicable to Florida under section 252(c) if Title II of HAVA which has been determined to be $11,596,803.00.

If you have any comments or questions regarding this certification, please do not hesitate to contact us at 850-245-6500.

Sincerely,

Dawn K. Roberts, Director, Division of Elections

MEMORANDUM

TO: State HAVA Coordinators

FROM: Edgardo Cortés, Election Research Specialist

SUBJECT: Request for Amended Reports on Help America Vote Act Expenditures from Chief State Election Officials, due January 26, 2007

This is to inform you that the U.S. Election Assistance Commission (EAC) has requested that your Chief State Election Official provide amended (corrected) reports on the use of funds provided to your State under the Help America Vote Act of 2002 (HAVA) Title I and Title II, Section 251. Copies of all letters sent regarding this request are enclosed with this Memorandum. Each letter details the corrections and clarifications required for the Standard Form (SF) 269s and accompanying narratives now on file with the EAC. As your State’s designated HAVA coordinator, we ask your help to ensure that the amended reports are filed by the deadline.

Enclosed in this packet is a color-coded illustration of the SF 269 form to assist you in filling out the form correctly. Two sample narratives are also enclosed that show different, acceptable styles of documenting HAVA activities and expenditures during the reporting period. Please review these models carefully as they are designed to help you meet your State’s reporting obligations. A PDF copy of SF 269 may be found at http://www.whitehouse.gov/omb/grants/sf269.pdf.

All amended reports and narratives are due by January 26, 2007. If your state will not be able to meet this deadline, you need to request an extension in writing and provide a reason for the delay and the expected completion date. The necessary reports or requests for extensions should be mailed to my attention at the address above. Please let me know if you have any questions about this process. You can reach me at ecortes@eac.gov, (202) 566-3126, or (866) 747-1471.

500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Reference: Amended HAVA Reports Title I, Section 102 for Calendar Years 2004 and 2005

Response Due Date: January 26, 2007

Dear Secretary Browning:

The purpose of this letter is to obtain corrected (amended) reports for your state's use of funds under Title I, Section 102 of the Help America Vote Act of 2002 (HAVA) for the Calendar Years (CY) 2004 and 2005. The amended SF 269 reports are essential as the U.S. Election Assistance Commission (EAC) prepares its Annual Report to Congress which will summarize HAVA funds expenditures, as reported by Florida.

Below is an itemization of the information required in your Amended SF 269 report(s) for Title I, Section 102:

- The State's report dated 1/20/04 for the period beginning 6/16/03 to 12/31/03 indicates that it is a FINAL report. However, a seceding report dated 2/28/06 for the period 6/16/03 to 12/31/05 is Amended to show interest on those funds for three years. Please submit Amended reports indicating whether or not the fund has been fully expended or the correct interest on the remainder.

Please review the guidance provided in the color-coded Model SF 269 Long Form and the Model Narratives enclosed for more information about how to prepare the Amended Title I, Section 102 report(s). A blank copy of the auto-fill form can be found at www.whitehouse.gov/omb/grants/sf269.pdf.

There is also a list of Frequently Asked Questions and other information under the Funding for States section on the EAC website at http://www.eac.gov/. Contact Edgardo Cortes by e-mail at ecortes@eac.gov, by phone at 1-866-747-1471 (toll free) or 202-566-3116 (direct) should you have additional questions.
The requested Amended report(s) for Title I, Section 102 must be completed and received by the Commission no later than January 26, 2007. If you fail to respond by that time, EAC will have no choice but to forward this matter to the EAC’s Office of the Inspector General for review and investigation.

Amended reports should be mailed to the Election Assistance Commission, Amended 102 Reports, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005.

Thank you for your attention to this matter.

Sincerely yours,

Thomas R. Wilkey
Executive Director

   Date Report Submitted  
   March 28, 2007  

Previous Edition U#lm7 269-104  
Standard Form 269 (Rev. 7-97)  
Prescribed by OMB Circulars A-102 and A-110  

Line 12, Remarks:

The instructions for completing SF 269 Form, Section 12 include a request for states to report the total Maintenance of Effort appropriated for the next state fiscal year.

Florida does not appropriate funds based on Maintenance of Effort. Although the required Maintenance of Effort is considered during the appropriation process, funds are appropriated at a higher aggregate level. Florida fully anticipates meeting its required Maintenance of Effort level although actual expenditures will not be available until the end of the state’s fiscal year.
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State utilizing Help America Vote Act (HAVA) Title II, Section 251 funds during the period from October 1, 2005 through September 30, 2006.

VOTING SYSTEMS ASSISTANCE – $12,576,798

During the current reporting period, Florida provided funds to sixteen county supervisors of elections to reimburse them for disability-accessible voting systems that had been purchased prior to July 1, 2004. Distribution of funds was based on the same formula used to distribute funds in FY 2004-05 to fifty-one counties that were required to purchase accessible voting systems in order to have one accessible voting system for each polling place by January 1, 2006. In addition to the sixteen counties, an additional eight counties received reimbursement for existing DRE’s for which funding was not previously provided.

In addition to the Section 251 funds used for this purpose, Florida used state matching funds for a portion of the expenditures made to supervisors of elections to assist with accessible voting systems. Please see the section “State Matching Funds” at the end of this report.

The HAVA State Plan includes references to acquiring accessible voting equipment for individuals with disabilities on pages 13 through 15 and on page 61.

STATEWIDE VOTER REGISTRATION LIST - $11,960,615

During the current reporting period, Florida completed development of the statewide voter registration system and moved into the operational phase of the project. The Florida Voter Registration System (FVRS) is a real-time system that contains the name and voter registration information of all voters in the state. The system allows counties to continue to use their existing systems with modifications to interface with the FVRS.

Expenditures for this activity included payments to the vendor that served as Prime Contractor in developing the system as well as the vendor that provided quality assurance and oversight during the developmental phase of the project. Other costs incurred included servers, software and related license fees, network fees to establish the statewide frame relay network for the FVRS, a risk assessment study for the FVRS, training for Department of State employees related to software systems being utilized to operate the FVRS, and costs associated with establishing and operating a bureau to handle voter registration services at the state level for Florida’s 67 counties. The bureau is responsible for processing voter registration applications as well as reviewing and verifying potential matches in the FVRS for felons, persons declared mentally incompetent and deceased persons.

Other expenditures included salaries and related expenses for thirty-three positions associated with operating and maintaining voter registration services provided through the FVRS. These include thirty-one positions in the Department of State and two positions at the Florida Department of Highway Safety and Motor Vehicles. These positions provide support for the various hardware and software systems being utilized to operate the system, legal expertise, and voter registration services for Florida’s counties.
Reference to the statewide voter registration system can be found in the HAVA State Plan on pages 26-31, 56-57 and 61.

**POLL WORKER RECRUITMENT AND TRAINING - $3,000,000**

In March 2006 Florida submitted a certification to the Election Assistance Commission regarding Florida's intention to use a portion of the requirements payment to assist with poll worker recruitment and training efforts. Funds were distributed to Florida's 67 supervisors of elections in order to provide funds statewide to assist with recruiting and training poll workers. Prior to receiving the funds, supervisors of elections were required to submit a plan to the Department of State describing the intended use of the funds. In addition, each county was required to provide 15% matching funds to be used exclusively for activities associated with recruiting and training poll workers.

Reference to poll worker recruitment and training is included in the HAVA State Plan on pages 49-51 and page 61.

**INTEREST ACCRUED - $3,758,921.01**

During the current reporting period the Department of State invested Title II, Section 251 funds and accrued Interest in the amount of $3,758,921.01.

**STATE MATCHING FUNDS - $1,484,094**

During the current reporting period, Florida spent $1,484,094.35 in State Matching funds.

**FEDERAL ELECTION COMMISSION**

**021571**
As requested by the U.S. Election Assistance Commission, listed below is a detailed list of expenditures and a description of the related activities conducted by the Florida Department of State during calendar year 2006 utilizing Help America Vote Act (HAVA) Title I, Section 101 funds.

**VOTER EDUCATION - $1,073,923**

During calendar year 2006, Florida distributed $1,073,923 to the 67 county supervisors of elections to be utilized for voter education purposes. In order to receive the funds each supervisor of elections was required to submit a detailed plan outlining the anticipated uses of the funds. In addition to the plan, each local Board of County Commissioners was required to provide fifteen percent in matching funds to be used exclusively for voter education purposes.

County supervisors of elections are required to submit a report to the Department of State on an annual basis regarding voter education programs conducted in the counties until the funds distributed by the state are depleted. Based on the latest reports from supervisors of elections, counties continue to employ numerous voter education activities in an effort to involve citizens in the elections process.

These activities include printing and mailing sample ballots to registered voters, conducting voter registration drives at various locations and events throughout the county, disseminating information regarding election dates and related deadlines through a variety of media sources, and conducting demonstrations on the use of voting systems equipment.

Florida's voter education program is discussed in the HAVA State Plan on pages 37 through 47 and on page 58.

**ELECTION ADMINISTRATION - $193,434**

Florida established three positions in the Department of State to provide administrative oversight and coordination for HAVA-related activities. Employees in these positions are responsible for monitoring HAVA expenditures to ensure compliance with federal requirements. The positions administer several contract programs that provide funds to county supervisors of elections for HAVA-related activities including voter education, voting systems assistance as well as poll worker recruitment and training programs. In addition, the positions are responsible for administering grant funds awarded by the U.S. Department of Health and Human Services under the Voting Access for Individuals with Disability (VOTE) grant program.

Recommendations regarding establishment of positions associated with HAVA Oversight and Reporting can be found on page 59 in the HAVA State Plan.

**STATE PLAN - $2,991**

The HAVA State Planning Committee held two meetings in order to update the HAVA State Plan. The meetings were held in Pensacola and Miami in an effort to provide an opportunity for participation by citizens in various locations throughout the state. Expenditures included travel expenses for HAVA State Planning Committee members as well as Department of State staff who participated in the meetings.

Reference to managing the State Plan is included on pages 82-83 in the HAVA State Plan.
**TRAINING ELECTION OFFICIALS, POLL WORKERS AND ELECTION VOLUNTEERS – $154,800**

The Florida Division of Elections contracted with a video production company to produce two videos that could be used in conducting training for poll workers. The videos were distributed to Florida's 67 county supervisors of elections to use in poll worker training sessions. One of the videos covered sensitivity issues when dealing with individuals with disabilities and the other video provided conflict management training skills for poll workers.

The Florida Department of State contracted with one of Florida's universities to develop a statewide poll worker curriculum to be used by Florida's 67 county supervisors of elections. The curriculum is intended to provide uniformity in poll worker training efforts throughout the state.

Florida's efforts to assist supervisors of elections in conducting training for poll workers can be found in the HAVA State Plan on pages 49 through 51, pages 58 through 61.

**INTEREST ACCRUED - $185,577.58**

During 2006, the Department of State invested Title I, Section 101 funds and accrued interest in the amount of $185,577.58.

Date Report Submitted: February 20, 2007

Total Interest earned through 12-31-2006 is $36,028.56. Interest accrued in 2006 - $1,583.19
Florida received $11,581,377 from Title I, Section 102 funds. The funds were invested pending transfer to Florida's Working Capital Fund to reimburse the state for funding provided to Florida's 67 counties in FY 2001-02 and FY 2002-03 to purchase voting systems equipment.

Interest on the initial investment has continued to accrue with earnings in the amount of $1,583.19 reported for calendar year 2006.
January 10, 2007

Secretary Kurt Browning
Secretary of State
R. A. Gray Building
500 S. Bronough Street, Room 316
Tallahassee, Florida 32399-0250

Reference: Amended HAVA Reports Title I, Section 102 for Calendar Years 2004 and 2005

Response Due Date: January 26, 2007

Dear Secretary Browning:

The purpose of this letter is to obtain corrected (amended) reports for your state’s use of funds under Title I, Section 102 of the Help America Vote Act of 2002 (HAVA) for the Calendar Years (CY) 2004 and 2005. The amended SF 269 reports are essential as the U.S. Election Assistance Commission (EAC) prepares its Annual Report to Congress which will summarize HAVA funds expenditures, as reported by Florida.

Below is an itemization of the information required in your Amended SF 269 report(s) for Title I, Section 102:

- The State’s report dated 1/20/04 for the period beginning 6/16/03 to 12/31/03 indicates that it is a FINAL report. However, a seceding report dated 2/28/06 for the period 6/16/03 to 12/31/05 is Amended to show interest on those funds for three years. Please submit Amended reports indicating whether or not the fund has been fully expended or the correct interest on the remainder.

Please review the guidance provided in the color-coded Model SF 269 Long Form and the Model Narratives enclosed for more information about how to prepare the Amended Title I, Section 102 report(s). A blank copy of the auto-fill form can be found at www.whitehouse.gov/omb/grants/sf269.pdf.

There is also a list of Frequently Asked Questions and other information under the Funding for States section on the EAC website at http://www.eac.gov/. Contact Edgardo Cortes by e-mail at ecortes@eac.gov, by phone at 1-866-747-1471 (toll free) or 202-566-3116 (direct) should you have additional questions.
The requested Amended report(s) for Title I, Section 102 must be completed and received by the Commission no later than January 26, 2007. If you fail to respond by that time, EAC will have no choice but to forward this matter to the EAC's Office of the Inspector General for review and investigation.

Amended reports should be mailed to the Election Assistance Commission, Amended 102 Reports, 1225 New York Ave., NW, Suite 1100, Washington, D.C. 20005.

Thank you for your attention to this matter.

Sincerely yours,

Thomas R. Wilkey
Executive Director

Enclosures:
  Model SF 269 Long Form
  Model Narratives
Dear Mr. Wilkey:

As requested in your letter of January 10, 2007 enclosed are amended financial reports (SF 269) regarding Florida's use of HAVA Title I, Section 102 funds. If you have any questions or would like additional information, please let us know.

Sincerely,

Amy K. Tuck
Director, Division of Elections

Enclosures
### Financial Status Report (Long Form)

**Title I, Section 102**

1. **Federal Agency and Organizational Element to Which Report is Submitted**
   - U.S. Election Assistance Commission

2. **Federal Grant or Other Identifying Number Assigned by Federal Agency**
   - CFDA #39.011

3. **Recipient Organization (Name and complete address, including ZIP Code)**
   - Florida Department of State
     - 500 South Bronough Street
     - Tallahassee, FL 32399-1350

4. **Employer Identification Number**
   - F593466856

5. **Recipient Account Number or Identifying Number**
   - 0348-0039

6. **Final Report**
   - Yes

7. **Basis**
   - Cash

8. **Funding/Grant Period (See instructions)**
   - From: 6/16/2003
   - To: 12/31/2003

9. **Period Covered by this Report**
   - From: 6/16/2003
   - To: 12/31/2003

10. **Transactions:**
    - a. Total outlays: 11,581,377.00
    - b. Refunds, rebates, etc.: 0.00
    - c. Program income used in accordance with the deduction alternative: 0.00
    - d. Net outlays (Line a, less the sum of lines b and c): 0.00

11. **Recipient’s share of net outlays, consisting of:**
    - a. Third party (in-kind) contributions: 0.00
    - e. Other Federal awards authorized to be used to match this award: 0.00
    - g. Program income used in accordance with the matching or cost sharing alternative: 0.00
    - h. All other recipient outlays not shown on lines a, e or g: 0.00
    - i. Total recipient share of net outlays (Sum of lines a, e, g and h): 0.00

12. **Federal share of net outlays (line d less line i):**
    - j. 0.00

13. **Unobligated balance of Federal funds (Line o minus line n):**
    - p. 32,220.26

14. **Program Income, consisting of:**
    - q. Disbursed program income shown on lines c and/or g above: 0.00
    - s. Undisbursed program income: 0.00

15. **Total program income realized (Sum of lines q, r and s):**
    - t. 0.00

### Type of Rate (Place “X” in appropriate box)

- a. Provisional
- b. Predetermined
- c. Final
- d. Fixed

### Remarks:
- Attach any explanations deemed necessary or information required by Federal sponsoring agency in compliance with governing legislation.

Note: This is an amended report to include interest earned during 2003. Line o includes interest in the amount of $32,220.26.

### Certification:
- I certify to the best of my knowledge and belief that this report is correct and complete and that all outlays and unliquidated obligations are for the purposes set forth in the award documents.

FOIA File
Mr. Michael Montgomery  
Baker & Hostetler LLP  
3200 National City Center  
1900 East 9th Street  
Cleveland, Ohio 44114-3485

Dear Mr. Montgomery:

This letter is in response to your Freedom of Information Act (FOIA) request for: 1) all materials submitted by the Ohio Secretary of State that pertain to Ohio's expenditure of funds allocated under the Help America Vote Act; 2) all communications between the U.S. Election Assistance Commission and the Ohio Secretary of State concerning HAVA-related matters; and 3) any materials setting forth guidelines for spending HAVA funds.

**Responsive records.** The responsive documents regarding items #1 and #2 are attached. The materials requested in item number 3 are available at [www.eac.gov](http://www.eac.gov) by clicking on "EAC Advisories and Guidance," "Funding for States," and "HAVA Funding FAQs."

**Withheld records.** The EAC is withholding documents held by the agency's Office of Inspector General. The Inspector General's office is presently engaged in an audit of the State of Ohio. The audit and report are not yet complete. The documents at issue are pre-decisional and protected from release under Section (b) (5) of FOIA. When the report is complete, it will be available at [www.eac.gov](http://www.eac.gov).

The EAC has decided to waive the processing fees for your request. If you interpret any portion of this response as an adverse action, you may appeal it to the Election Assistance Commission. Your appeal must be in writing and sent to the address noted on the above letterhead. Any appeal submitted, must be postmarked no later than 60 calendar days from the date of this letter. Please include your reasons for reconsideration and attach a copy of this letter.

Sincerely,

Jeannie Layson  
Director of Communications  
U.S. Election Assistance Commission

Re: Freedom of Information Act Request

To Whom It May Concern:

I am writing to make a formal request for materials pursuant to the Freedom of Information Act. In particular, I am interested in receiving the following items:

(1) All materials submitted by the Ohio Secretary of State that pertain to Ohio’s expenditure of funds allocated under the Help America Vote Act ("HAVA").

(2) All communications between the U.S. Election Assistance Commission and the Ohio Secretary of State concerning HAVA-related matters.

(3) Any materials setting forth guidelines for spending HAVA funds.

Thank you in advance for your attention to my request.

Sincerely,

Michael J. Montgomery
Brian:

Thanks for looking into this for me. I am trying to find out if the 2002 FEC standards went into effect prior to the date that HAVA passed or went into effect. If you have the actual effective date of the standards, that would be great. If not, just confirmation that it was in effect at the time HAVA passed is fine.

Ms. Juliet E. Thompson
General Counsel
US Election Assistance Commission
1225 New York Avenue, NW
Suite 1100
Washington, DC 20005

Dear Ms. Thompson:

This response is to acknowledge that I am in receipt of your letter and take exception to your mischaracterizations of inaccuracies in my Directive 2004-31. Upon reviewing my Directive and the US Election Assistance Commission Best Practices Tool Kit issued July 30, 2004, both documents essentially state the same fact: "[t]he state may choose to honor the affirmation of citizenship and age that goes with the signing of the registration form and register a person who did not check the "yes" box." So, based upon the EAC's opinion presented in the "Best Practices Tool Kit," I cannot comprehend your rationale for allowing me to adopt the policy in my Directive but without attributing it to the EAC.

It is quite apparent that after the Commissioners touted the benefits of uniformity in the jurisdictions by following the "Best Practices Tool Kit" as stated at the NASS and NASSED conferences, they were expressing an opinion on the information contained in the document. Even by naming the document, "Best Practices Tool Kit" the Commission expresses an opinion in the purpose by providing the document to the states. At the major annual conference of Election Administrators, NASED, held in August, the attendees, who are state election administrators from all over the country, were given a copy of the "Best Practices Tool Kit" and were asked to use it for the implementation of HAVA. I believe you cannot now accurately state that the Commission has no opinion on the information in the "Best Practices Tool Kit" when we clearly followed the direction of the Commission in using the information as presented. Once you have the opportunity to review the EAC's "Best Practices Tool Kit" you will realize that I am correct in my instruction to the Boards.
If you now choose to have the Department of Justice review the “Best Practices Tool Kit” after having officially distributed it to all jurisdictions, I consider that you were derelict in not doing this before you distributed the information to the states and jurisdictions.

Therefore, it is within my legal purview to administer Directives with regard to processing voter registration applications as applicable to the laws of Ohio and federal law. My Directive stands as originally released on September 7, 2004.

Sincerely,

J. Kenneth Blackwell  
Secretary of State

RE: Invitation to speak at February 23, 2005
Public Hearing on Provisional Voting

Dear Secretary Blackwell:

On February 23, 2005, the United States Election Assistance Commission (EAC) will be conducting a public hearing regarding provisional voting. The hearing will take place in Columbus, Ohio at the Moritz School of Law on February 23, 2005 from 1:00 to 5:00 p.m. This hearing is an information gathering session that is intended to begin the research process for the EAC’s work in developing voluntary guidance on provisional voting. The hearing involves receiving testimony from three panels of speakers. The first panel will include election professionals from the state and local level. The second panel will include representatives of non-government sector organizations that are interested in election reform issues. The third panel will include academicians who have researched the issue of provisional voting.

The Commission would like to invite you to participate on the panel of election professionals. The Commission would ask that you limit your comments to no more than 10 minutes on the experiences in your state regarding the implementation and use of provisional voting during the elections of 2004. If you are able to attend, the Commission would ask that you submit written comments by Wednesday, February 16, 2005. Those comments can be sent via email to testimony@eac.gov.

Thank you for your consideration of this request. We look forward to hearing from you.

Sincerely,

Gracia Hillman
Chair

RE: Invitation to speak at February 23, 2005  
Public Hearing on Provisional Voting

Dear Secretary Blackwell:

We appreciate your consideration of speaking at the public hearing on provisional voting to be held on Wednesday, February 23, 2005 in Columbus, Ohio. We must quickly finalize our arrangements and panelists for this hearing. As such, we would appreciate confirmation that you will or will not be able to speak at this event by 10:00 a.m. on Monday, February 14, 2005. If we have not received confirmation at that point, we will have to select another speaker.

Thank you in advance for your consideration and timely response.

Sincerely,

Gracia Hillman  
Chair

RE: Participation in February 23, 2005
   Public hearing on provisional voting

Dear Secretary Blackwell:

Thank you for participating in the United States Election Assistance Commission's public hearing on provisional voting. Initial responses indicate that the hearing was a great success, providing needed light to an issue that has been a source of confusion for many voters and election administrators alike.

Your testimony regarding the experience of Ohio in implementing provisional voting was insightful and helpful to EAC as it begins its work on provisional voting. We were particularly interested in the effect of litigation on the efforts of the state and local election officials to implement provisional voting.

Again, thank you for your time and assistance in beginning EAC’s research and guidance work on provisional voting.

Sincerely,

Gracia Hillman
Chair
February 14, 2006

The Honorable Ray Martinez
U.S. Election Assistance Commission
1225 New York Avenue, NW
Suite 1100
Washington, DC 20005

Dear Commissioner Martinez:

I am formally requesting the appointment of Mr. Steve Harsman to the EAC Standards Board under section 213 of the Help America Vote Act (HAVA) of 2002. Mr. Harsman will fill the current county level vacancy for Ohio. Michael Sciortino formerly held this position.

Steve is the current Director of the Montgomery County Board of Elections, which is one of Ohio’s largest counties. In his capacity as Director, he will bring added wealth and expertise to the Standards Boards.

If you require additional information regarding my request, please contact Judy Grady, my Director of Elections, at 614-466-2585.

Thank you for your attention in this matter.

Sincerely,

J. Kenneth Blackwell

cc: Steve Harsman, Director, Montgomery County Board of Elections
Attached is the engagement letter for our upcoming audit. If you have any questions please do not hesitate to contact me.

Curtis Crider  
Office of Inspector General, Election Assistance Commission  
Phone - (202) 566-3125  
Fax - (202) 566-3127

Important: This electronic transmission is intended for the use of the individual or entity to which it is addressed. It may contain information that is privileged, confidential, or otherwise protected from disclosure under applicable law.
The Honorable J. Kenneth Blackwell  
Ohio Secretary of State  
180 E. Broad Street  
Columbus, Ohio 43215  

Dear Secretary of State Blackwell:

The Office of Inspector General has scheduled an audit of the administration of Help America Vote Act (HAVA) funds by the State of Ohio. The objectives of the audit are to determine whether Ohio (1) expended HAVA payments in accordance with the Act and related administrative requirements and (2) complied with the HAVA requirements for replacing punch card or lever voting machines, for appropriating a 5 percent match for requirements payments, for establishing an election fund, and for maintaining state expenditures for elections at a level not less than expended in fiscal year 2000. The audit will cover Ohio's expenditure and obligation of HAVA funds from fiscal year 2003 through fiscal year 2006, and will include the following activities:

- Accumulating the financial information reported to the Election Assistance Commission on Standard Forms 269.
- Accounting for salaries.
- Purchasing goods and services
- Accounting for property.
- Charging indirect costs.
- Spending by counties.
- Maintaining the election fund.
- Accounting for interest and program income.
- Sustaining the State's level of expenditures for elections.

In our telephone conversation with Ms. Judy Grady of your office, we agreed to start our audit on or about July 10, 2006. Mr. Joseph Ansnick and Mr. Gary Gunderson will conduct the review. To complete our audit, we anticipate examining the following information:

1. All audit reports and other reviews related to the financial management systems and the HAVA program for the last 2 years.
2. Policies, procedures and regulations for Ohio's management and accounting systems as they relate to the administration of HAVA programs.
3. An organizational chart and a list of all full and part-time employees indicating those employees whose salary is financed with HAVA funds. (If applicable, also identify other employees from the State whose salary is paid in full or in part with HAVA funds).

4. Inventory list of all equipment purchased with HAVA funds.

5. Contract files for major procurements (i.e. voter registration system and election systems).

6. Information regarding what source/supporting documents are maintained in the accounting system for payments made with HAVA funds.

7. List of all sub-grant or other agreements providing HAVA funds to counties or other political subdivisions of the state.

8. County financial reports.

9. Ohio laws that impact the election fund.

10. Description of Ohio's methods of accounting for any income, such as revenue from equipment leases, generated by HAVA programs.

11. Appropriations and expenditure reports for State funds used to maintain the level of expenses for elections at least equal to the amount expended in fiscal year 2000 and to meet the five percent matching requirement for section 251 requirements payments.

12. Information regarding what source/supporting documents are kept for maintenance of effort and matching contributions.

To perform the review, we will need your help with: (1) facilities to accommodate two auditors, (2) access to a telephone, a copier, a printer, and a fax machine, and (3) data lines for our laptop computers.

We appreciate your assistance. If you have any questions regarding this letter, please contact me at (202) 566-3121.

Sincerely,

Roger La Rouche
Acting Inspector General

Dilip,

I will come to Columbus. Will you be ready for me on Monday? I can fly to Columbus Monday morning and return to DC Monday evening. Do you think that will give us enough time to discuss the cash management issue and for me to review the payroll distribution for the resolution of NFR OH-1 and see the inventory lists for the three counties we mentioned? If necessary I can return to DC Tuesday.

Thank you,

Joe Ansnick

Subject: Touch Base with Ohio

I got a call from a Mr. Keith Scott from Ohio. (not sure of his title). He wanted to confirm that the audit team would be arriving on July 10. I told him that the team would be traveling on July 10 and that I was not sure if they would be in the offices on the 10th or 11th. I also told him that you would call today to confirm the date and time of your arrival. Mr. Scott's telephone number is (614) 995-2170.
Hi Peggy,
Our orginal report filed last year for the requirements payments used the CFDA 39.011. Do we need to attach a corrected report to this year’s report? Also, I checked the CFDA website when we received our requirement payments and did not see that CFDA number. There was no mention of it in the award letter either. When did that information become available?
Just curious so I will know how to proceed.
Thanks and have a great weekend!

Hello, HAVA Administrators and Financial Officers:

This is to confirm that a Catalogue of Federal Domestic Assistance (CFDA) number has been assigned to the "requirements payments" distributed by the U.S. Election Assistance Commission (EAC) under Title II of the Help America Vote Act. CFDA numbers reflect the government agency providing the funds and the program under which the monies were distributed. The CFDA numbers assigned thus far to HAVA programs are:

- 39.011 - Title I, sections 101 and 102 - election reform payments [distributed by the General Services Administration (GSA) in 2003].
- 93.618 - Title II, section 291 - grants to State protection and advocacy systems to promote voting access for individuals with disabilities [distributed by HHS in 2003, 2004, and 2005; authorized for distribution in 2006].
- 90.400 - Help America Vote College Program - grants to promote the participation of college students as nonpartisan poll workers [distributed by EAC in 2004; may be distributed in future years].
- 90.401 - Title II, section 251 - "requirements payments" [provided by EAC, beginning in 2004].

Some confusion has been caused by the removal of the HAVA Title I listing from the CFDA website (http://12.46.245.173/cfda/cfda.html). This was done without consulting with EAC. I suspect that the entry was removed by GSA for the following reasons:

- The CFDA number for the Title I funds has a GSA designation;
- No more funds are to be distributed under this program; and
- In accordance with HAVA Section 902(b)(4), EAC is responsible for auditing these funds.

I have discussed the matter with EAC's General Counsel, Julie Thompson. It is our position that, for tracking purposes, States and local jurisdictions should continue to use the GSA number originally assigned to the Title I funds. EAC cannot seek a new number for these funds because HAVA does not authorize EAC to make Title I payments.

I hope this information helps. Let me know if you need further assistance.

Sincerely,

Peggy Sims

Lori:

The requirements payments award notice did not include a CFDA number because we did not have the number at that time. We were told that we did not need one because the payments did not qualify as discretionary grants. Nevertheless, many States called to ask for a number because they use the number to track the funds. Consequently, we began jumping through the hoops necessary to obtain the number. The CFDA number for the requirements payments was confirmed earlier in the same week that I sent the message to you. It is on the web at http://12.46.245.173/pls/portal30/CATALOG.PROGRAM_TEXT_RPT.SHOW?p_arg_names=prog_nbr&p_arg_values=90.401.

Regarding the number you put on the first requirements payments report, I’ll just place a copy of your email in the report folder, for now. Hope all is well with you.

"Grady, Judy" <JGrady@sos.state.oh.us>

Peggy,

I have reviewed the attached pages of excerpts from the Ohio revised State Plan and have added text to item 12 in section XIX. I am fine with the layout and especially fine with saving the taxpayers $8000!! Let me know if you need anything else from me. Thanks for your assistance with our revised plan.

Judy Grady
Director of Election Reform
Ohio Secretary of State

From: psims@eac.gov [mailto:psims@eac.gov]
Judy:

I have to meet with the subcommittee that deals with requirements payments about the upcoming publication of State plans. My first opportunity since March 2 (and last for the next 3 weeks) will be next week. At that time, I can present the draft Federal Register Notice that will accompany the excerpts or your State's plan and another State's plan. Once the two Commissioners on this subcommittee sign off on the notice, it has to be circulated to all four Commissioners for a 48-hour tally vote.

After I receive certification of a tally vote to approve the notice, I can submit the notice and State plans to the Office of Federal Register. After that, it is anyone’s guess as to when the plans will be published. (The quickest we have seen has been one week.) I will send an email to you when I have confirmed the publication date.

In the interim, I need you to review the attached 18 pages of excerpts from Ohio's revised State plan. (If we publish just these and your cover letter instead of the full 51-page revised plan you submitted, we can save the taxpayers almost $8,000.) Have I picked up all of the sections that contained material changes? Do you want to make any adjustments to the format or page breaks?

I would also like to draw your attention to item 12 and the last statement before the Secretary's signature in the excerpted section XIX. Do you really want to leave these as is for publication as part of the revised State plan?

Peggy Sims

*Grady, Judy* <JGrady@sos.state.oh.us>
Per our telephone conservation earlier this week, can you please tell me the status of when you will have Ohio’s revised plan placed in the Federal Register? Please let me know if you need additional information from me. Thank you, I may be reached at 614-466-5515.

Thank you,

Judy Grady

Director of Election Reform

Peggy,

Attached is the Ohio revised state plan and letter from Secretary Blackwell. A hard copy has been sent via Federal Express and should arrive Monday morning. Please call me if you have any questions or concerns. I left the yellow highlight in your copy to show the changes. I can take them off and resend it if you prefer.
Also please advise when the revised plan will appear in the *Federal Register*.

Thanks,

Judy

The Ohio Secretary of State gratefully acknowledges the State Plan Committee for their participation and assistance in the preparation and development of this plan for the strategic implementation of election reforms in the State of Ohio, pursuant to the Help America Vote Act of 2002.

The State Plan Committee

Chairwoman Judy Grady, Director of Election Reform, Office of the Secretary of State (replaces Dana Walch)

Ms. Donna Alvarado, Commissioner, Ohio Commission on Hispanic/Latino Affairs

Ms. Linda Carr, Director of Institutional Initiatives, University of Toledo

Mr. Michael Vu, Director, Cuyahoga County Board of Elections (replaces Tom Coyne)

Mr. Eric Duffy, Director of Field Services, National Federation of the Blind

Ms. Daisy Duncan Foster, Coordinator of Academic Services, University of Dayton

State Rep. Nancy Hollister, P-Marietta

Mr. Larry Long, Executive Director, County Commissioners Association of Ohio

State Sen. Mark Mallory, D-Cincinnati

Mr. Keith Cunningham, Director, Allen County Board of Elections and President, Ohio Association of Election Officials (replaces Jeff Matthews, Stark County Board)

Mr. Matthew Dameschroder, Director, Franklin County Board of Elections (replaces Guy Reese)

Ms. Catherine Turcer, Legislative Director, Ohio Citizen Action

Pastor Aaron Wheeler, Chairman, Ohio Civil Rights Commission

1/12/2005
IV. State of Ohio Elections Systems

Ohio is, pervasively, a punch-card voting state. In total, 69 of Ohio's 88 counties use punch-card voting. Those 69 counties represent 72.5 percent of all the registered voters in Ohio and 74 percent of the 11,756 voting precincts in the state.

Among the 19 counties that use voting devices other than punch-card ballots, two use automatic voting machines, six have electronic voting devices, and 11 use optical scanning equipment.

The table below (that continues on the following pages) shows a county-by-county listing of the types of voting devices in each of Ohio's 88 counties. The table also reflects the number of precincts and registered voters in each of those counties as reflected in the November, 2002 General Election, which we use as base data throughout this report (unless otherwise indicated.)

1/12/2005
Of note, two of Ohio’s largest counties – Cuyahoga and Hamilton counties – currently use punch-card ballot devices, as do two other large urban centers in Ohio, Montgomery and Summit counties. Those four counties, alone, account for nearly 3,600 of Ohio’s 11,756 precincts, and more than 2 million of the state’s 7.1 million registered voters. Another large urban center in Ohio, Lucas County, is a lever-machine county.

NOTE: In 2004, the number of registered voters grew to over 7.9 million and the number of precincts was reduced to 11,360.

In February 2001, the Secretary of State conducted an “Elections Summit.”1 Participants included academics, members of the media, local election officials, legislators, and community groups. The group reported the following:

1. Public confidence in the accuracy of punch card voting systems has been seriously undermined.
2. Boards of elections should upgrade their voting systems to new, more trustworthy technology.
3. Comprehensive voter education is critical to successful election operations.
4. A combination of federal, state, and local dollars may be appropriate to fund these technological improvements.
5. Ohio’s current elections standards, based on a combination of secretary of state directives, advisory opinions and rulings, should be codified by the General Assembly.
6. These goals demand immediate attention, or our state runs the risk of repeating the problems of our nation’s most recent presidential election – and suffering irreparable damage to the most important and basic concepts of democracy.

Subsequent to the Summit, a separate committee met to study Ohio’s election systems. They concluded (by a 6-5 committee vote) that because of the safeguards and procedures in Ohio election law, the punch-card voting method was adequate and there

---

was no overwhelming need for a statewide overhaul, particularly without available funding.

While the Secretary of State notes that punch-card voting is not explicitly prohibited under the Help America Vote Act, other requirements of the Act make it impractical to use punch-card voting as a primary voting device in the state.

In a study of "over" and "under" voting in Ohio, it was clearly demonstrated that punch-card voting was unreliable to the extent votes cast by thousands of Ohioans were not being counted in the final election tabulation.

Over-voting occurs when a voter casts a vote for more than one candidate in an election and thus disqualifies their vote in that election. Under-voting occurs when a voter fails to mark a ballot in a particular race or votes for fewer than the number of candidates to be elected.

The following table tracks the combined under/over vote phenomenon in the 2000 presidential election in Ohio's 88 counties:

</table>
The data shows 29 counties with the highest over/under vote percentage in the 2000 election were all counties that use the punch-card method of voting. The seven counties with the lowest over/under vote percentage in the 2000 election were all counties that did not use punch cards as their primary voting system.

The Ohio challenge in meeting the voter and election reforms envisioned by the Help America Vote Act is obvious. In simplest terms, Ohio is a large and populous state with a diverse mix of urban and rural voters that predominantly relies on punch-card voting as its prevailing voting mode. Modernizing the state's election systems will require widespread change throughout the state and in its most populous counties.

The transition will require a solution that must consider large and small counties, rural and urban areas, and adjustments that will affect an overwhelming majority of Ohio voters. The obvious corollary challenge is selecting a system configuration that meets the needs of all those counties, training election officials and poll workers to use new voting systems, and familiarizing Ohio voters with new voting devices.

While on its face, this appears to be a daunting challenge, we are confident Ohio's State Plan logically anticipates those factors and will meet the guidelines, demands, timetables and expectations of the Help America Vote Act.

\[\text{Deleted: 1}\]

2 Shelby County, a punch-card county, reported no over/under vote in the county’s vote tabulation in the 2000 presidential election cycle. This would appear to be a reporting error.
V. Voter Trends: the Context for Change and Reform

We pause only for a moment in this report to reflect on voter turnout in Ohio. We do so for several reasons, not the least of which is that Ohio contemplates election reform and system modernization to take place in a presidential election year when voter turnout is higher and demand on the election system is greatest.

We also explore voter turnout and trends as context for meeting the most desirable benefit and objective of the Act: to restore public confidence in the election system and, subsequently, increase voter participation. While new, more technologically proficient systems, increased voter registration, accessibility and accuracy are hallmarks of Help America Vote, the more encompassing aim of the Act is to invite more voters into the process to exercise their rights and responsibilities as qualified electors.

In developing the State Plan, we must anticipate that voter participation will increase, voter turnout percentages will climb, and demand on the election system will be greater. We can only gauge those factors based on Ohio's experience in past elections and the historical trends that will serve as a predictor of future trends.

The following table tracks Ohio voter turnout in both gubernatorial elections and presidential elections during the past 24 years.

</table>

The chart shows that during the course of the past six gubernatorial elections, voter turnout has averaged about 55.79 percent. During the past six presidential elections, voter turnout in Ohio has averaged 71.33 percent. Based on this historical data, Ohio can generally anticipate about 1.25 million more voters in a presidential election year than in a gubernatorial election cycle.

Even a modest 5 percent gain in that average means 62,500 more voters.

Subsequently, based on projected population growth and increased voter participation as a result of election reforms and modernization, our State Plan assumes 150,000 new voters during peak presidential elections growing at an annual rate, after initial implementation of new systems and election reforms, of 3 percent per annum.

As a result, our Plan assumes that growth rate and the recommended voting systems design model proposed in this report anticipates that growth and demand on the state's election system in future peak presidential voting years. We use the presidential voting cycle as a base for our plan because that assumes the heaviest potential voter turnout and the busiest times for local boards of elections.
Since 1978, voter participation in the state’s gubernatorial elections has grown from 3 million voters to about 3.3 million voters. Since 1980, voter participation in presidential elections has grown from about 4.3 million voters to about 4.8 million voters. Factoring population growth during those decades, those statistics would imply that voter participation has remained relatively flat and, in all likelihood, is trending lower.

We have a high confidence level that the election reforms of the Help America Vote Act will produce more voter activity and a greater number of voters. Ohio doesn’t view the Act as a final effort to produce greater voter participation, but the beginning of an expanded effort to entice more voters to exercise their rights and responsibilities to participate in the election process.

We believe modernization and reform require us to actively engage in voter education and to continue to evaluate programs that will produce greater participation in the democratic process. We pledge our effort to continue to explore new and innovative programs that will achieve those objectives.

**VIII. Distribution of Resources to Local Governments**

We first explore our proposed distribution of aid to local government under Title I. Under guidelines of the Act, these funds must be used assuming the following criteria:

- These funds may be used as a reimbursement for costs associated with punch-card or lever machine replacement incurred after Jan. 1, 2001.
- There is a presumption states must ensure compliance in time for the November, 2004 Federal Election.
- Within six months after the date of enactment, Ohio must certify that the state will use the money for punch-card/lever machine replacement, the state will comply with federal laws, and the voting system will meet new voting system standards.

We anticipate that no change in state law or new legislation will be required to carry out the activities required for certification.

At the initial writing, the Congressional Research Service (CRS) estimated that full-funding under the Act, for both Title I and Title II receipts, would total $155,251,155. CRS estimates $116,423,155 of that amount represents Title II funding under the Requirements Payments component of the Act. However, as of this revision date, the Congress has not appropriated the full funding as prescribed in Public Law 107-252.

In addition, the state has appropriated $5.8 million in matching funds for Title II payments, as required by the Act, which means total available funds for implementation of the State Plan in Ohio will be approximately $132 million.

All money in Title II is based on the state’s portion of the nation’s voting age population. The most recent estimate is that Ohio’s 8.5 million voting-age population represents 3.97 percent of the nation’s voting age population of 215.1 million.
Because of the prevalence of punch-card voters in Ohio, we are keenly focused on the distribution of funds under Title I and, more precisely, the buy-out program. The Act stipulates the funds will be distributed to states by multiplying the number of qualifying precincts by $4,000. However, based on available federal funds for this purpose and the number of punch-card and lever-machine jurisdictions in the U.S., it now appears that number likely will be about $3,354 per precinct. As previously mentioned, Ohio has 69 counties designated as punch-card counties.

In addition, two Ohio jurisdictions – Hardin and Lucas counties – feature lever voting machines and would be eligible for funding under the guidelines.

In total, under the formula, the 69 punch-card counties and two lever-machine counties in Ohio means the state would be eligible for about $31 million in federal funds under the buyout program.

However, we know $31 million is insufficient for the counties to purchase modern, reliable voting systems capable of meeting requirements of the Act. Subsequently, our budget for voter and election reforms in Ohio presumes the state will require about $24.2 million to establish a centralized voter registration database and related support for voter education and poll worker training. Our plan calls for the remainder of the Title funds to be allocated to Ohio’s 88 counties to help subsidize installation of new systems and implement other required activities under the Act.

Following is the budget we envision for distribution of the $161 million in funds in Ohio to meet requirements of the Help America Vote Act:

<table>

</tr>
</tbody>
</table>
In simplest terms, this allocates Help America Vote funds where the money is needed most: in Ohio counties. While it is the responsibility of the Ohio Secretary of State to monitor performance and ensure implementation of the Act, the execution of the Ohio plan, ultimately, will take place at the county level. On that basis, we believe it prudent to maximize resources for election reform in the counties where election reform will occur.

While much of the focus is on the counties with punch card and lever-machine voting systems, in reality, all 88 Ohio counties will be expected to conduct some form of system modification and upgrade to make the system in Ohio uniform and compliant with the Act. Subsequently, the premise of the Ohio Plan is to look at the voter and election system statewide, based on the distribution of registered voters in each of the 88 counties.

Viewed in that context, the $116 million to be allocated to the counties will be distributed in the following priority order, as federal funds become available:

- Replacement of punch-card and lever-machine voting equipment to the extent that new voting systems would be installed immediately in the 71 affected counties;
- Installation of voting devices compliant with the disability requirements of the Act in all 88 counties;
- Bringing remaining counties into compliance with Section 301 of the Act by funding necessary upgrades and refinements of all other existing systems and equipment.

The Secretary of State reserves the right to distribute the funds to counties based on need and special circumstances.

The Secretary of State defines “need and special circumstances” to mean that it is possible some counties will need less funding and others more funding to meet the compliance standards of the Help America Vote Act. On that basis, the Secretary of State will shift funds as he deems necessary to bring all counties into compliance.

The Secretary of State acknowledges that one county, Mahoning County, took the initiative to convert their voting system to electronic voting after Jan. 1, 2001. Funding consideration will be given to all six Ohio counties using electronic voting equipment to bring those counties into compliance with HAVA.

We think this model provides us with great flexibility to allocate Title I and Title II funds in a way that assures full compliance with the requirements of the Act. Invariably some funds would be shifted away from counties that demonstrate a lesser need and reallocated to counties that demonstrate a greater need. But the allocation method is a fair method that will further assure all counties that adequate funds will be available to fully fund the requirements of the Act at the local level.
The Ohio Secretary of State will establish guidelines as part of the performance measurement for county compliance. When compliant systems are purchased for the counties, the Secretary of State will require transition to new voting systems by all punch-card and lever-machine counties by May 2, 2006. The Secretary of State will provide counties with a list of acceptable vendors to supply the new voting equipment and counties must choose from that approved list by no later than Sept. 1, 2003.

Since the Secretary of State will centralize and oversee this process, the Secretary will ensure compliance with all requirements of the Help America Vote Act. The performance timeline requires the Secretary to establish the list of approved vendors by Aug. 1, 2003, providing county boards of elections with ample time to review the list, choose the vendor and establish transition to the new voting systems.

To ensure uniformity and compliance, the Secretary of State will stipulate design specifications for voting equipment. If a county fails to select a vendor by Sept. 1, 2003, the Secretary of State will designate a vendor for that county and order installation of new voting equipment in that jurisdiction.

Although the Act required the replacement of punch-cards and lever machines by the General Election in 2004, the Secretary of State wanted these new systems in place in Ohio for the Primary Election to ensure a smooth, seamless transition and full operational capability in time for the presidential election. Due to extenuating circumstances, a waiver was granted in December 2003 giving the Secretary of State until the Primary Election in 2006 to replace punch-card and lever machines.

On May 7, 2004, Governor Taft signed into law Substitute House Bill 262. The Act requires all direct recording electronic voting machines used in Ohio to include a voter verified paper audit trail and changes the process for counties to acquire voting systems using funds made available pursuant to the Help America Vote Act (HAVA) of 2002. As the result of this additional legislative requirement, the Secretary of State was forced to revisit the original decision to allow counties to select between Direct Recording Electronic (DRE) and Precinct Count Optical Scan (PCOS) voting systems. A logical analysis of the requirements of both HAVA and SHB262 showed that in order for the state of Ohio to be in compliance with both federal and state law, meeting both time, costs and certification constraints, the Secretary of State must purchase Precinct Count Optical Scan voting systems through existing contracts already approved by the Controlling Board to satisfy HAVA requirements. While this change limits the flexibility previously offered to the counties when selecting between voting systems, the use of Precinct Count Optical Scan voting systems introduces a new opportunity for counties in the form of improved operational processes. Furthermore, the Secretary of State will allow counties to re-select their vendor based upon the additional mandated requirements of Substitute House Bill 262. All counties must submit in writing to the Secretary of State their vendor selection by February 9, 2005.

The Secretary of State has already established a fund account for all federal monies designated for Ohio under the Act and those funds, as applicable, will be disbursed from that account as our plan is implemented. This account is segregated to reflect federal funds designated for county buy-outs, election administration and Requirements payments.
Reports will be generated to show the allocation and distribution of these funds and that report will be forwarded to the Election Assistance Commission along with a performance report to show the state’s progress and performance in implementing provisions of the Act.

X. Voter Education, Election Official and Poll Worker Training

Achieving the mechanical and technological change of the Help America Vote Act of 2002 is only part of the challenge of enacting true modernization and reform of Ohio’s voting system. While devices will enhance the efficiency of Ohio’s voting and election process, voter education and training of election officials and poll workers is critical to full implementation of the reforms to the benefit of Ohio voters.

Earlier in this report, we alluded to research currently being conducted by the Secretary of State’s office to improve poll worker recruitment, training, education and retention. That effort addresses the reality that many of our current poll workers are from a generation that places a premium on voting, elections and the democratic process. Many of our poll workers are senior citizens who very much value freedom and free election processes as a result of their experiences in growing up in the World War II and Korea era.

To these marvelous citizens, voting isn’t just a right it’s an obligation and a precious American birthright that has been paid for with the blood, sweat and tears of those who sacrificed their lives on foreign soil. As these citizen patriots retire from the poll worker ranks in Ohio’s election system, we are looking to the future to determine how best we can recruit the next generation of poll workers who will embrace this important Election Day service with the same degree of commitment, enthusiasm and competence of our older poll workers.

We are mindful of an exciting objective of the Help America Vote Act: to engage high school and college students in the process. Several State Plan Committee members noted the desire to better engage young Ohioans in the election process as both a means to recruit bright, knowledgeable students as poll workers and as an opportunity to make more young people stakeholders in the process.
Obviously, these poll workers must be adequately trained to render assistance to voters in a competent and knowledgeable way, not only in terms of helping them understand and use the new technology that accompanies election reform, but also by applying the laws and addressing the myriad of Election Day issues that invariably arise.

Provisional voting, for example, was a challenge for many of our poll workers during past election cycles as Ohio aggressively implemented new procedures to accommodate provisional voters. Our poll workers have successfully navigated provisional voting and have successfully met the needs of provisional voters.

But to adequately train poll workers, we must first train election officials. The Secretary of State will meet that challenge with a number of programs and initiatives. New training seminars will precede each election in Ohio where election directors and their staff will be given an opportunity to learn about new procedures and changes.

The Secretary of State also will enhance its electronic communication with election officials by providing updates and advisories about changes in state and federal election law. Our goal is to provide this information as soon as we have the information in hand.

Additionally, the Secretary of State will conduct an inventory of current training materials and produce new information and guidelines in both written and video formats. The Secretary also has asked his staff to provide election directors with new materials that can supplement the training of poll workers.

To ensure seamless transition to new voting systems, we are asking system vendors to partner with us in the production of clear, graphically-driven pamphlets and brochures that tell voters how the voting devices work. Earlier we mentioned the use of simulators and internet-based simulation of new voting devices to provide voters with an opportunity to try out the new technology even before they enter the voting booth to cast their official ballot.

We think these enhancements and initiatives will advance our implementation of the Help America Vote Act in Ohio and pave the way for a smooth transition to new voting devices and election processes. Some of our preparation for new election processes in Ohio includes some structural changes. We are asking each county board of elections, for example, to designate a training coordinator who will communicate directly with an election training coordinator in the Secretary of State’s office.

It is our aim for these coordinators to meet frequently throughout the year, exchange information and help us think about ways to improve the election system in Ohio.

After the election, we will gather from all 88 counties a report from these coordinators detailing issues, questions and problems they encountered and how they addressed the situation. From these reports, the Secretary of State will use that data and information to respond to election issues and disseminate that information to election directors so they can make refinements at the local level in subsequent elections.

But to glean a voters-eye view of the process and how we can improve the election system, we will distribute to a selected sample of voters in every county a short survey device that will track their voting experience and give them an opportunity to provide us with feedback on how we can improve the process. The survey will be
distributed to a pre-determined number sample of voters throughout the state as they exit the voting booth.

We think this innovation is important to better understand voter needs and to view our election process through the eyes of the “consumer.” Information we collect from both coordinators and the sample voters will guide us in developing relevant and meaningful training materials for both election officials and poll workers in future elections.

The Secretary of State also will develop a new “get-out-the-vote” program in Ohio that will encourage more voters to participate in the election process. While such programs currently exist in the Secretary of State’s office, personnel will be dedicated to conducting research and learning more about voter behavior in Ohio.

In early 2004, the Secretary of State launched “Your Vote Counts,” a comprehensive voter education program aimed at better preparing voters for the November 2, 2004 election. The goal was to provide all Ohio voters with the information they need to vote so that we can reduce the opportunity for difficulties on Election Day. This effort entails ensuring every voter gets the same consideration.

The program’s Web site, www.YourVoteCountsOhio.org, features educational materials and instructional videos showing how to vote using punch card, optical scan and DRE (electronic) voting machines. Also included in the program printed material and public service messages for television and radio.

In addition, the Secretary of State has made a special effort to reach out to students with his “Xpect More” campaign. The “Xpect More” advertising campaign is aimed at inviting young voters between the age of 18 and 24 into the democratic process. To date, more than 623,000 “Xpect More” brochures have been distributed to students through schools and across Ohio.

In many states, the appeal is often directed at those who are registered to vote, were registered to vote or who have voted in the past. The Secretary of State would like to target potential new first-time voters by coordinating voter recruitment with civics and government teachers in high schools throughout Ohio where there is a captive audience of potential new voters. Additionally, the Secretary would like to initiate research that targets Ohioans who have never voted to learn more about their decision not to participate in the election process and to determine if there are programs and initiatives that can be implemented to address their concerns and entice them to the polls.

Understanding more about voter behavior and non-voter behavior, we believe, is a proactive step we must take to fully embrace the spirit, intent, principles and objectives of the Help America Vote Act. Activities is $2.5 million earmarked for voter education, and $5 million set aside for election official and poll-worker training. We propose making election official and poll-
worker training funds available as state grants to the counties to supplement local activities and initiatives of the county boards of elections.

As counties deliberate equipment and voting systems, we will encourage them to consider appropriation of available residual funds to voter education and poll worker training. In crafting local budgets to achieve the objectives of the Help America Vote Act, we believe counties must give consideration to these initiatives to supplement state efforts for education and training.

In order to qualify for these funds, counties must submit to the Secretary of State a detailed plan that identifies proposed programs and initiatives and how the funds would be used. After each General Election, counties would be required to report on the deployment of these programs and their assessment of the value of the education and training.

XVI. Estimated Timelines for Implementation of the State Plan

Following are key dates and the proposed timetable for implementation of our State Plan:

- **March 18, 2003:** State Plan Advisory Committee named, public input process defined.
- **April 3-4, 2003:** State Plan Advisory Committee conducts public hearings.
- **April 9, 2003:** RFP released for statewide voter registration system.
- **April 17, 2003:** State Plan Advisory Committee reconvenes to review draft State Plan.
- **May 7, 2003:** Competitive bids due for voter registration system.
- **May 13, 2003:** State Plan finalized and published for 30-day review.
- **May 16, 2003:** RFP released for voting system vendors.
- **June 2, 2003:** Secretary of State awards bids for voter registration system.
- **Aug. 1, 2003:** Secretary of State awards bids for election systems. County boards of elections notified of eligible system vendors.
- **Sept. 2, 2003:** County boards of elections must notify Secretary of State which vendor they have chosen for election system improvements.
- **November 21, 2003:** Direct Recording Electronic (DRE) Technical Security Assessment Report prepared by Compuware submitted to Secretary of State.
- **Dec. 1, 2003:** Statewide voter registration system installed and fully operational.
- **Dec. 19, 2003:** Requested a waiver from the Federal Government on deployment of the computerized voter registration system.
- **March 2, 2004:** Primary Election. (Ohio General Assembly considering change of Primary to May, 2004.)
• April 29, 2004: Clinton County first to establish Centralized Voter Registration File processes between the county and the Secretary of State.
• May 7, 2004: Substitute House Bill 262 enacted.
• Nov. 2, 2004: General Election
• November 17, 2004: VVPAT requirements distributed for comments.
• January 3, 2005: VVPAT rules filed with JCARR.
• January 1, 2006: Centralized Statewide Voter Registration File fully implemented.
• May 2, 2006: Replacement of punch-card and lever machine complete.

XVIII. The State Plan Committee: HAVA and Beyond

We reserve this section of the report to capture the comments and thoughts of our State Plan Committee. While many of the committee’s recommendations and much of their input is reflected in preceding sections of the report, it was clear this panel of distinguished Ohioans went beyond merely thinking about minimum requirements of the Help America Vote Act and insisted on expanding their mission to address issues that will produce broad and meaningful election reform in our state.

That kind of visionary thinking is precisely what the Secretary of State had in mind when he impaneled the State Plan Committee.

If there was a universal theme that resonated from the committee’s deliberations, it was consensus that Ohio must aggressively engage the next generation of voters and make young people in our state understand their role as stakeholders in the democratic process. It is insufficient, the panel said, to merely invite high school and college students into the election process. Ohio, the State Plan Committee said, must be proactive in educating young people about the election process and instill a deeper commitment to engendering student participation in the election process.

Linda Carr, Daisy Duncan Foster and Pastor Aaron Wheeler were particularly passionate in their remarks about this issue and said Ohio should be creative in developing new programs and initiatives to bring young voters into the process. The Committee urged the Secretary of State to aggressively seek available funds under Title V and Title VI funding of the Help America Vote Act to accomplish this critical task.
Additionally, some committee members recommended working with the Ohio Department of Education and the Ohio Board of Regents to explore ways to better educate and encourage political participation by high school and college students. Pastor Wheeler suggested Ohio public schools should ponder curriculum requirements that focus exclusively on voting and election processes.

State Rep. Nancy Hollister noted that this report should underscore for Ohioans that implementation of the Help America Vote Act in Ohio signals a “change in the governance of the election system” in the state. HAVA, she said, places more responsibility on the Secretary of State to assure a fair, equitable and inclusive election process in Ohio. “We need to acknowledge that,” she said.

But Rep. Hollister and other committee members said that shift in governance does not minimize the necessary independence, ongoing role or responsibility of counties to execute election policies within the new governing framework created by the Help America Vote Act.

Committee member Jeff Matthews said county boards of elections must be independent to effectively achieve the objectives of the Help America Vote Act, and Ms. Duncan Foster said boards of elections must feel “some ownership of the process.” In that context, it was the consensus of the State Plan Committee that full compliance with the Help America Vote Act requires critical coordination and a strong working relationship between the Secretary of State’s office and local boards of elections.

Election officials Guy Reece and Tom Coyne, along with Mr. Matthews, agreed that innovation doesn’t end with the Help America Vote Act. They said Ohio must constantly be looking for new methods, new procedures and new ideas to keep the election process viable and invite more Ohioans to exercise their right to vote.

Mr. Reece invited future exploration of election innovations being tested in other states such as open voting, early voting, ballot on demand and expanded availability and use of absentee ballots. Catherine Turcer asked that the Secretary of State consider the flexibility of voting devices that would allow for concepts such as instant runoff voting and proportional representation.

Ms. Turcer also recommended the Secretary of State ensure that the RFP for new voting equipment carefully consider the necessity for strong auditing capability that would provide a spot-check feature for pre-testing. Ms. Turcer and Donna Alvarado said alternative language capability also should be included in the RFP in anticipation of changing future demographics in the state.

Ms. Alvarado noted the projected growth of Hispanic populations both nationally and in the State of Ohio. Several committee members agreed that rather than addressing this issue later and incurring cost for conforming equipment, the RFP should anticipate the language requirement and it should be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.
members agreed that rather than addressing this issue later and incurring cost for conforming equipment, the RFP should anticipate the language requirement and it should be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.

She said language requirements also need to be considered in education products produced by vendors and election officials in how to use the new voting equipment, as well as in training of poll workers and election officials. She said alternative language issues need to be considered in creation and execution of the grievance process and procedures.

She suggested the Secretary of State consider alternative language policies that exceed the 5 percent threshold.

While preceding sections of the report address monitoring procedures for implementation of the Help America Vote Act in Ohio, Ms. Alvarado said compliance monitoring should be “futuristic” and focus on outcomes. While measuring accomplishments, she said the state and local jurisdictions also should be forward looking and report, for example, where the state expects to be in the next five years and beyond.

She said monitoring and compliance should address issues such as where Ohio wants to be as a state, how we achieve those objectives, who is responsible for implementing these plans, what the funding sources will be for implementation and what will be different when changes, modifications or new procedures are implemented in the election process.

Rep. Hollister agreed there needs to be periodic evaluation of Ohio’s progress in meeting voting and election reforms. She suggested a need to pause from time to time to reflect on what has been accomplished, what future reforms need to be considered, and what revenues are available to achieve those objectives.

A primary focus in the deliberation of the State Plan Committee was how Ohio could best address disability issues related to implementation of the Help America Vote Act. Eric Duffy said the issue of physical barriers is a real and pressing issue that calls for creative solutions in Ohio. He emphasized that Ohio must consider not only what takes place inside the voting place, but what physical barriers exist that hinder access outside the building.

Pastor Wheeler, chairman of the Ohio Civil Rights Commission, offered the assistance of that agency in working with the Secretary of State in exploring solutions to that issue.

As expected, much of the panel's deliberation was focused on funding and whether the federal allocation to Ohio was adequate to effect the wholesale change in
voting systems in the state. A key voice in that discussion was Larry Long, executive director of the County Commissioners Association of Ohio. Mr. Long noted that there is concern among county commissioners about whether the federal funding anticipated for implementation of the Help America Vote Act is sufficient to purchase the voting equipment needed to make Ohio HAVA compliant. But a comparable concern, he said, is consideration of future maintenance and replacement costs, as well as related cost issues such as storage requirements for the new equipment.

He acknowledged that there might be offsetting costs and efficiencies that could be realized from conversion to electronic voting systems, but he stressed the necessity for full funding of the plan and timely allocation of federal payments to the state to avoid financial burdens on counties already adversely affected by the economy and cuts imposed by the State Legislature.

Rep. Hollister also discussed the funding issue, suggesting the state, at some future date, might consider bonding options to assist in paying for ongoing costs associated with implementation of the Act, as well as making funds available for voter education, system upgrades and youth participation in the election process.

Further, she said that although there appears to be no immediate need for sweeping changes in state election laws, the state should constantly evaluate that need and enact legislative change as required.

Mr. Coyne emphasized the need for the Secretary of State and local boards of elections to fashion voter system reforms in a way that keeps the process from becoming “vendor-driven.” He said county boards need time to assess and evaluate the unique demands in each jurisdiction and recommended the Secretary of State consider meeting the disability requirements of HAVA in time for the 2004 election, but proceed more deliberately on installment of new voting equipment.

In May 2004, Substitute House Bill 262 was enacted into law by Governor Taft which requires all direct recording electronic voting machines used in the State of Ohio to include a voter verified paper audit trail (VVPAT). Substitute House Bill 262 mandates the Secretary of State shall establish by rule standards for the certification of the VVPAT. In addition, the bill created a county electronic voting machine maintenance fund.

**XIX. Summary of the State Plan**

Section 254 of the Help America Vote Act of 2002 lists the required components of the State Plan and this document fulfills those requirements.
This report demonstrates that Ohio, because of its widespread use of punch-card voting, is perhaps challenged more than other states to reform its election methods and modernize its voting systems. The size of the state, ranking seventh among the 50 states in total population, and the mix of rural and urban population makes the transition even more challenging.

Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

Recognizing the enormity of the task confronting Ohio, some members of the State Plan Committee and witnesses who testified before the committee counseled the Secretary of State to invoke waivers that would allow the state to delay its full implementation of the plan until the 2006 election cycle.

The Secretary of State, however, believes Ohio cannot afford to delay its implementation of the plan because every election cycle that passes is another election where voters are potentially disenfranchised and Ohio votes are lost or miscounted. Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

As election officials, if we know voters are disenfranchised and that legitimately cast ballots are being discounted, we have not only a moral obligation to immediately embrace a solution, but a legal obligation to find a remedy and enact measures to prevent that from happening. If even one voter is denied the right to vote, we are obligated, by law, to determine the cause and forge a solution. The evidence is overwhelming that thousands of Ohio voters have been disenfranchised by antiquated voting equipment and that many thousands more have lost confidence in the reliability and accuracy of voting devices currently in use in most of Ohio’s 88 counties.

The Secretary of State has confidence in the election professionals who conduct and administer elections in the State of Ohio, and believes Ohio has the capability to enact reforms that have already taken place in other states.

We are emboldened in our decision to press forward with implementation of this plan based on the experience of Knox and Lake counties in executing successful elections after implementing new systems only weeks before the General Election. The Knox County Board of Elections, which has only four employees, received delivery of new electronic voting devices in October, 1996, a presidential election year, and deployed them in the November General Election.

Lake County issued a request for proposal in April 1999, awarded bids in July of that year, took delivery of a new voting system the following September, and conducted a successful election weeks later in the November General Election.

Under the timetable established in this plan, new voting systems would be installed and operational in time for the Primary Election in 2004, providing local boards of elections with an opportunity to test the new systems before fully engaging them in the 2004 presidential election cycle.
However, we refer to the preceding section of this plan. Full implementation of this plan presumes full funding by the federal government. If the Secretary of State determines that federal funding for implementation of this plan is not forthcoming from the federal government in a timely manner, we will notify the Elections Assistance Commission of our intent to revise this plan and adjust the timetable for implementation.

Since the Federal Government has not appropriated the remaining funding for HAVA, it was necessary for the Secretary of State to modify our state plan and adjust the timetable for implementation. Initially, we had set an aggressive and ambitious full implementation for November 2004. Unfortunately, due to the delays in receiving funding and the establishment of the Elections Assistance Commission, we project full implementation of all HAVA requirements by May 2006.

Boards of Elections should be assured that the Secretary of State will focus all of its available personnel and resources to assist counties in enacting these reforms and meeting the requirements of the Help America Vote Act.

Boards should also be assured the Secretary of State will work with county officials and elections administrators to ensure available resources are distributed as quickly as possible and that cost containment efforts will be undertaken to minimize implementation costs to counties. Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state's punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

We include in this definition of electronic voting devices the option for some counties to choose optical scanning devices that are HAVA compliant. In counties which have invested in this equipment and prefer these optional voting devices, the Secretary of State will consider deployment of this equipment as acceptable if certain modifications are made to ensure compliance with statewide voting standards. These counties, however, would be required to feature at voting locations electronic voting equipment that accommodates the needs of people with disabilities.

Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state's punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

We presume the transition to electronic voting equipment will, at minimum, reduce printing costs in most counties. We believe there are further savings and efficiencies that will be derived from electronic voting that will reduce personnel and labor costs.

The DRE option also will introduce added efficiencies in the election process that will eliminate issues related to "over-votes," recounts and ensuring full voter participation by persons with disabilities. We also believe an electronic-based voting system will enhance training
and education across the spectrum for election officials, voters and poll workers if the
system is sufficiently user-friendly.

Based on the foregoing, following is a summary of the State Plan for Ohio based
on the requirements delineated in Section 254 of Public Law 107-252:

(1) How the State will use the requirement payment to meet the requirements of
Title III, and, if applicable under section 251(a)(2), to carry out other
activities to improve the administration of elections.

Ohio will implement new voting systems and procedures that meet the general
requirements of Title III ensuring the systems have audit capacity, disability access,
and alternative language accessibility, where applicable, and that the systems meet
error rate thresholds established by the Federal Elections Commission.

(2) How the State will distribute and monitor the distribution of the
requirements payment to units of local government or other entities in the
State for carrying out the activities described in paragraph (1).

Ohio anticipated federal funding and state matching funds would be about $161
million. Unfortunately full federal funding was not appropriated and the total federal
funding and state matching funding is approximately $137 million. The Secretary of
State will allocate about $106 million of that amount for installation of new voting
equipment and upgrades of existing voting equipment in Ohio counties, and use the
remaining portion to implement statewide voter registration and establish a
provisional voting hotline. Disbursements in the amount of $5 million will be
available to Ohio’s 88 counties for election official and poll worker training.
Additionally, the Secretary of State will make $5 million available for administration
of a statewide voter education program. The Secretary of State will draft guidelines
and reporting requirements to monitor distribution of these funds and to ensure
county compliance with the Help America Vote Act of 2002.

(3) How the State will provide for programs for voter education, election official
education and training, and poll worker training which will assist the State in
meeting the requirements of title III.

See response to No. 2. Additionally, the Secretary of State, in establishing an
authorized vendor list for deployment of new voting equipment, will require vendors
to include, as part of their bid proposal, fund allocation that includes voter education,
election official education and training, and poll worker training. The Secretary of
State also will implement new programs and procedures to supplement these vendor
requirements and efforts at the county level to address these issues.
(4) How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

See preceding responses. Ohio will replace punch-card voting in the State and require deployment and installation of electronic-based voting devices that meet the requirements of the Act. The request for proposal for new voting equipment will be crafted to presume required features and safeguards that ensure a uniform voting standard and compliance in all Ohio counties with specific requirements of the Act.

(5) How the State will establish a fund described in subsection (b) for the purposes of administering the State's activities under this part, including information on fund management.

Such a fund has already been established by the Secretary of State and will be monitored by both the Secretary of State and the Auditor of State, as Ohio law applies to state auditing requirements and reporting procedures. Fund management procedures include quarterly reports to the Election Assistance Commission to detail receipt and expenditure of funds, and how those funds were used to meet the objectives of the Act.

(6) The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available.

See response to No. 2 and the fund distribution table on page 23 of the State Plan. The Secretary of State believes full implementation of the plan will require all available federal funding and state matching funds to meet the requirements of the Act.

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

(See Section XV. Requirements Payments: Maintenance of Effort.) Attached to this State Plan are budget materials that show the level of spending for election services by the Secretary of State in FY 2000 and projected levels of spending for FY 2004-05. The Secretary certifies that no federal funds for Requirements payments earmarked for voter reforms and system modernization will be used to supplement the state budget for operation and administration of the office.
(8) How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The Secretary of State assumes full responsibility for ensuring compliance with the Act. Specific timetables are included in this plan which requires all punch-card and lever machine counties to install and deploy new voting equipment that meets the uniform standards of the Act by May 2, 2006. The plan also calls for a statewide voter registration system to be in place and fully operational by January 1, 2006. See Section XIV for ongoing performance measurement.

(9) A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

See attached procedure and refer to Section XIII of the State Plan, Administrative Complaint Procedures and Grievances.

(10) If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

See response to No. 2. Ohio will use funds from Title I for antiquated systems buyout and to improve election administration activities and procedures. See the fund distribution table on page 23 of the State Plan and allocation and distribution formula described on page 24.

(11) How the State will conduct ongoing management of the plan.

See Section XIV, Ongoing Performance Measurement. Throughout this State Plan is a description of the management practices and procedures outlined by the Secretary of State to ensure compliance with the Act. Any material change in this plan will result in a resubmission of the Plan in accordance with Sections 255 and 256 of the Act.

(12) In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and how the State succeeded in carrying out the State Plan for such previous fiscal year.
This State Plan represents Ohio's initial submission of a State Plan to the Elections Assistance Commission. The changes reflected in the revised State Plan did not have any financial impact for the previous fiscal year.

(13) A description of the committee which participated in the development of the State Plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

See page 3, The State Plan Committee, and Section VI, How Ohio Developed its State Plan.

This State Plan respectfully submitted to the Elections Assistance Commission, in accordance with U.S. Public Law 107-252, this 16th day of June, 2003.

J. KENNETH BLACKWELL
Secretary of State
Judy:

I have to meet with the subcommittee that deals with requirements payments about the upcoming publication of State plans. My first opportunity since March 2 (and last for the next 3 weeks) will be next week. At that time, I can present the draft Federal Register Notice that will accompany the excerpts or your State's plan and another State's plan. Once the two Commissioners on this subcommittee sign off on the notice, it has to be circulated to all four Commissioners for a 48-hour tally vote.

After I receive certification of a tally vote to approve the notice, I can submit the notice and State plans to the Office of Federal Register. After that, it is anyone's guess as to when the plans will be published. (The quickest we have seen has been one week.) I will send an email to you when I have confirmed the publication date.

In the interim, I need you to review the attached 18 pages of excerpts from Ohio's revised State plan. (If we publish just these and your cover letter instead of the full 51-page revised plan you submitted, we can save the taxpayers almost $8,000.) Have I picked up all of the sections that contained material changes? Do you want to make any adjustments to the format or page breaks?

I would also like to draw your attention to item 12 and the last statement before the Secretary's signature in the excerpted section XIX. Do you really want to leave these as is for publication as part of the revised State plan?

OH State Plan Excerpts.doc

"Grady, Judy" <JGrady@sos.state.oh.us>
Per our telephone conservation earlier this week, can you please tell me the status of when you will have Ohio’s revised plan placed in the Federal Register? Please let me know if you need additional information from me. Thank you, I may be reached at 614-466-5515.

Thank you,

Judy Grady
Director of Election Reform

Subject: Ohio Revised State Plan

Peggy,

Attached is the Ohio revised state plan and letter from Secretary Blackwell. A hard copy has been sent via Federal Express and should arrive Monday morning. Please call me if you have any questions or concerns. I left the yellow highlight in your copy to show the changes. I can take them off and resend it if you prefer.

Also please advise when the revised plan will appear in the Federal Register.

Thanks,

Judy

614-466-5515 Blackwell Ltr to EAC.pdf Final Revised State Plan EAC.doc
The Ohio Secretary of State gratefully acknowledges the State Plan Committee for their participation and assistance in the preparation and development of this plan for the strategic implementation of election reforms in the State of Ohio, pursuant to the Help America Vote Act of 2002.

The State Plan Committee

Chairwoman Judy Grady, Director of Election Reform, Office of the Secretary of State (replaces Dana Walsh)

Ms. Donna Alvarado, Commissioner, Ohio Commission on Hispanic/Latino Affairs

Ms. Lisa Carr, Director of Institutional Initiatives, University of Toledo

Mr. Michael Vu, Director, Cuyahoga County Board of Elections (replaces Tom Coyne)

Mr. Eric Duffy, Director of Field Services, National Federation of the Blind

Ms. Daisy Duncan Foster, Coordinator of Academic Services, University of Dayton

State Rep. Nancy Hollister, R-Marietta

Mr. Larry Long, Executive Director, County Commissioners Association of Ohio

State Sen. Mark Mallory, D-Cincinnati

Mr. Keith Cunningham, Director, Allen County Board of Elections and President, Ohio Association of Election Officials (replaces Jeff Matthews, Stark County Board)

Mr. Matthew Damschroder, Director, Franklin County Board of Elections (replaces Guy Reece)

Ms. Catherine Turner, Legislative Director, Ohio Citizen Action

Pastor Aaron Wheeler, Chairman, Ohio Civil Rights Commission
IV. State of Ohio Elections Systems

Ohio is, pervasively, a punch-card voting state. In total, 69 of Ohio’s 88 counties use punch-card voting. Those 69 counties represent 72.5 percent of all the registered voters in Ohio and 74 percent of the 11,756 voting precincts in the state.

Among the 19 counties that use voting devices other than punch-card ballots, two use automatic voting machines, six have electronic voting devices, and 11 use optical scanning equipment.

The table below (that continues on the following pages) shows a county-by-county listing of the types of voting devices in each of Ohio’s 88 counties. The table also reflects the number of precincts and registered voters in each of those counties as reflected in the November, 2002 General Election, which we use as base data throughout this report (unless otherwise indicated.)

</table>
Of note, two of Ohio’s largest counties – Cuyahoga and Hamilton counties – currently use punch-card ballot devices, as do two other large urban centers in Ohio, Montgomery and Summit counties. Those four counties, alone, account for nearly 3,600 of Ohio’s 11,756 precincts, and more than 2 million of the state’s 7.1 million registered voters. Another large urban center in Ohio, Lucas County, is a lever-machine county.

NOTE: In 2004, the number of registered voters grew to over 7.9 million and the number of precincts was reduced to 11,360.

In February 2001, the Secretary of State conducted an “Elections Summit.” Participants included academics, members of the media, local election officials, legislators, and community groups. The group reported the following:

1. Public confidence in the accuracy of punch card voting systems has been seriously undermined.
2. Boards of elections should upgrade their voting systems to new, more trustworthy technology.
3. Comprehensive voter education is critical to successful election operations.
4. A combination of federal, state, and local dollars may be appropriate to fund these technological improvements.
5. Ohio’s current elections standards, based on a combination of secretary of state directives, advisory opinions and rulings, should be codified by the General Assembly.
6. These goals demand immediate attention, or our state runs the risk of repeating the problems of our nation’s most recent presidential election – and suffering irreparable damage to the most important and basic concepts of democracy.

Subsequent to the Summit, a separate committee met to study Ohio’s election systems. They concluded (by a 6-5 committee vote) that because of the safeguards and procedures in Ohio election law, the punch-card voting method was adequate and there

---

was no overwhelming need for a statewide overhaul, particularly without available funding.

While the Secretary of State notes that punch-card voting is not explicitly prohibited under the Help America Vote Act, other requirements of the Act make it impractical to use punch-card voting as a primary voting device in the state.

In a study of “over” and “under” voting in Ohio, it was clearly demonstrated that punch-card voting was unreliable to the extent votes cast by thousands of Ohioans were not being counted in the final election tabulation.

Over-voting occurs when a voter casts a vote for more than one candidate in an election and thus disqualifies their vote in that election. Under-voting occurs when a voter fails to mark a ballot in a particular race or votes for fewer than the number of candidates to be elected.

The following table tracks the combined under/over vote phenomenon in the 2000 presidential election in Ohio’s 88 counties:

</table>
The data shows 29 counties with the highest over/under vote percentage in the 2000 election were all counties that use the punch-card method of voting. The seven counties with the lowest over/under vote percentage in the 2000 election were all counties that did not use punch cards as their primary voting system.

The Ohio challenge in meeting the voter and election reforms envisioned by the Help America Vote Act is obvious. In simplest terms, Ohio is a large and populous state with a diverse mix of urban and rural voters that predominantly relies on punch-card voting as its prevailing voting mode. Modernizing the state’s election systems will require widespread change throughout the state and in its most populous counties.

The transition will require a solution that must consider large and small counties, rural and urban areas, and adjustments that will affect an overwhelming majority of Ohio voters. The obvious corollary challenge is selecting a system configuration that meets the needs of all those counties, training election officials and poll workers to use new voting systems, and familiarizing Ohio voters with new voting devices.

While on its face, this appears to be a daunting challenge, we are confident Ohio’s State Plan logically anticipates those factors and will meet the guidelines, demands, timetables and expectations of the Help America Vote Act.

2 Shelby County, a punch-card county, reported no over/under vote in the county’s vote tabulation in the 2000 presidential election cycle. This would appear to be a reporting error.

V. Voter Trends: the Context for Change and Reform

We pause only for a moment in this report to reflect on voter turnout in Ohio. We do so for several reasons, not the least of which Ohio contemplates election reform and system modernization to take place in a presidential election year when voter turnout is higher and demand on the election system is greatest.

We also explore voter turnout and trends as context for meeting the most desirable benefit and objective of the Act: to restore public confidence in the election system and, subsequently, increase voter participation. While new, more technologically proficient systems, increased voter registration, accessibility and accuracy are hallmarks of Help America Vote, the more encompassing aim of the Act is to invite more voters into the process to exercise their rights and responsibilities as qualified electors.

In developing the State Plan, we must anticipate that voter participation will increase, voter turnout percentages will climb, and demand on the election system will be greater. We can only gauge those factors based on Ohio’s experience in past elections and the historical trends that will serve as a predictor of future trends.

The following table tracks Ohio voter turnout in both gubernatorial elections and presidential elections during the past 24 years.

<table>
<thead>
<tr>
<th>Gubernatorial Election Years</th>
<th>Presidential Election Years</th>
</tr>
</thead>
<tbody>
<tr>
<td>Year</td>
<td>No. of Electors Voting</td>

</tr>
</tbody>
</table>

The chart shows that during the course of the past six gubernatorial elections, voter turnout has averaged about 55.79 percent. During the past six presidential elections, voter turnout in Ohio has averaged 71.33 percent. Based on this historical data, Ohio can generally anticipate about 1.25 million more voters in a presidential election year than in a gubernatorial election cycle.

Even a modest 5 percent gain in that average means 62,500 more voters.

Subsequently, based on projected population growth and increased voter participation as a result of election reforms and modernization, our State Plan assumes 150,000 new voters during peak presidential elections growing at an annual rate, after initial implementation of new systems and election reforms, of 3 percent per annum.

As a result, our Plan assumes that growth rate and the recommended voting systems design model proposed in this report anticipates that growth and demand on the state’s election system in future peak presidential voting years. We use the presidential voting cycle as a base for our plan because that assumes the heaviest potential voter turnout and the busiest times for local boards of elections.
Since 1978, voter participation in the state’s gubernatorial elections has grown from 3 million voters to about 3.3 million voters. Since 1980, voter participation in presidential elections has grown from about 4.3 million voters to about 4.8 million voters. Factoring population growth during those decades, those statistics would imply that voter participation has remained relatively flat and, in all likelihood, is trending lower.

We have a high confidence level that the election reforms of the Help America Vote Act will produce more voter activity and a greater number of voters. Ohio doesn’t view the Act as a final effort to produce greater voter participation, but the beginning of an expanded effort to entice more voters to exercise their rights and responsibilities to participate in the election process.

We believe modernization and reform require us to actively engage in voter education and to continue to evaluate programs that will produce greater participation in the democratic process. We pledge our effort to continue to explore new and innovative programs that will achieve those objectives.

**VIII. Distribution of Resources to Local Governments**

We first explore our proposed distribution of aid to local government under Title I. Under guidelines of the Act, these funds must be used assuming the following criteria:

- These funds may be used as a reimbursement for costs associated with punch-card or lever machine replacement incurred after Jan. 1, 2001.
- There is a presumption states must ensure compliance in time for the November, 2004 Federal Election.
- Within six months after the date of enactment, Ohio must certify that the state will use the money for punch-card/lever machine replacement, the state will comply with federal laws, and the voting system will meet new voting system standards.

We anticipate that no change in state law or new legislation will be required to carry out the activities required for certification.

At the initial writing, the Congressional Research Service (CRS) estimated that full-funding under the Act, for both Title I and Title II receipts, would total $155,251,155. CRS estimates $116,423,155 of that amount represents Title II funding under the Requirements Payments component of the Act. However, as of this revision date, the Congress has not appropriated the full funding as prescribed in Public Law 107-252.

In addition, the state has appropriated $5.8 million in matching funds for Title II payments, as required by the Act, which means total available funds for implementation of the State Plan in Ohio will be approximately $132 million.

All money in Title II is based on the state’s portion of the nation’s voting age population. The most recent estimate is that Ohio’s 8.5 million voting-age population represents 3.97 percent of the nation’s voting age population of 215.1 million.
Because of the prevalence of punch-card voters in Ohio, we are keenly focused on the distribution of funds under Title I and, more precisely, the buy-out program. The Act stipulates the funds will be distributed to states by multiplying the number of qualifying precincts by $4,000. However, based on available federal funds for this purpose and the number of punch-card and lever-machine jurisdictions in the U.S., it now appears that number likely will be about $3,354 per precinct. As previously mentioned, Ohio has 69 counties designated as punch-card counties.

In addition, two Ohio jurisdictions — Hardin and Lucas counties — feature lever voting machines and would be eligible for funding under the guidelines.

In total, under the formula, the 69 punch-card counties and two lever-machine counties in Ohio means the state would be eligible for about $31 million in federal funds under the buyout program.

However, we know $31 million is insufficient for the counties to purchase modern, reliable voting systems capable of meeting requirements of the Act. Subsequently, our budget for voter and election reforms in Ohio presumes the state will require about $24.2 million to establish a centralized voter registration database and related support for voter education and poll worker training. Our plan calls for the remainder of the Title funds to be allocated to Ohio’s 88 counties to help subsidize installation of new systems and implement other required activities under the Act.

Following is the budget we envision for distribution of the $161 million in funds in Ohio to meet requirements of the Help America Vote Act:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Fund Distribution</th>
<th>Jurisdiction</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voter Registration Database</td>
<td>$5 million</td>
<td>State and Counties</td>
<td>Develop statewide voter registration database</td>
</tr>
<tr>
<td>Voter Education</td>
<td>$5 million</td>
<td>State and Counties</td>
<td>Administered by the State in coordination with the counties</td>
</tr>
<tr>
<td>Poll Worker Training</td>
<td>$5 million</td>
<td>State</td>
<td>To be distributed as grants to counties</td>
</tr>
<tr>
<td>Administrative Expenses</td>
<td>$2 million</td>
<td>State</td>
<td>For state personnel to administer and monitor HAVA implementation</td>
</tr>
<tr>
<td>Provisional Voter Hotline</td>
<td>$250,000</td>
<td>State</td>
<td>To establish a state hotline for provisional voters</td>
</tr>
<tr>
<td>Miscellaneous</td>
<td>$2 million</td>
<td>State</td>
<td>For associated costs of implementing HAVA</td>
</tr>
</tbody>
</table>
In simplest terms, this allocates Help America Vote funds where the money is needed most: in Ohio counties. While it is the responsibility of the Ohio Secretary of State to monitor performance and ensure implementation of the Act, the execution of the Ohio plan, ultimately, will take place at the county level. On that basis, we believe it prudent to maximize resources for election reform in the counties where election reform will occur.

While much of the focus is on the counties with punch card and lever-machine voting systems, in reality, all 88 Ohio counties will be expected to conduct some form of system modification and upgrade to make the system in Ohio uniform and compliant with the Act. Subsequently, the premise of the Ohio Plan is to look at the voter and election system statewide, based on the distribution of registered voters in each of the 88 counties.

Viewed in that context, the $116 million to be allocated to the counties will be distributed in the following priority order, as federal funds become available:

- Replacement of punch-card and lever-machine voting equipment to the extent that new voting systems would be installed immediately in the 71 affected counties;
- Installation of voting devices compliant with the disability requirements of the Act in all 88 counties;
- Bringing remaining counties into compliance with Section 301 of the Act by funding necessary upgrades and refinements of all other existing systems and equipment.

The Secretary of State reserves the right to distribute the funds to counties based on need and special circumstances.

The Secretary of State defines “need and special circumstances” to mean that it is possible some counties will need less funding and others more funding to meet the compliance standards of the Help America Vote Act. On that basis, the Secretary of State will shift funds as he deems necessary to bring all counties into compliance.

The Secretary of State acknowledges that one county, Mahoning County, took the initiative to convert their voting system to electronic voting after Jan. 1, 2001. Funding consideration will be given to all six Ohio counties using electronic voting equipment to bring those counties into compliance with HAVA.

We think this model provides us with great flexibility to allocate Title I and Title II funds in a way that assures full compliance with the requirements of the Act. Invariably some funds would be shifted away from counties that demonstrate a lesser need and reallocated to counties that demonstrate a greater need. But the allocation method is a fair method that will further assure all counties that adequate funds will be available to fully fund the requirements of the Act at the local level.
The Ohio Secretary of State will establish guidelines as part of the performance measurement for county compliance. When compliant systems are purchased for the counties, the Secretary of State will require transition to new voting systems by all punch-card and lever-machine counties by May 2, 2006. The Secretary of State will provide counties with a list of acceptable vendors to supply the new voting equipment and counties must choose from that approved list by no later than Sept. 1, 2003.

Since the Secretary of State will centralize and oversee this process, the Secretary will ensure compliance with all requirements of the Help America Vote Act. The performance timeline requires the Secretary to establish the list of approved vendors by Aug. 1, 2003, providing county boards of elections with ample time to review the list, choose the vendor and establish transition to the new voting systems.

To ensure uniformity and compliance, the Secretary of State will stipulate design specifications for voting equipment. If a county fails to select a vendor by Sept. 1, 2003, the Secretary of State will designate a vendor for that county and order installation of new voting equipment in that jurisdiction.

Although the Act required the replacement of punch-cards and lever machines by the General Election in 2004, the Secretary of State wanted these new systems in place in Ohio for the Primary Election to ensure a smooth, seamless transition and full operational capability in time for the presidential election. Due to extenuating circumstances, a waiver was granted in December 2003 giving the Secretary of State until the Primary Election in 2006 to replace punch-card and lever machines.

On May 7, 2004, Governor Taft signed into law Substitute House Bill 262. The Act requires all direct recording electronic voting machines used in Ohio to include a voter verified paper audit trail and changes the process for counties to acquire voting systems using funds made available pursuant to the Help America Vote Act (HAVA) of 2002. As the result of this additional legislative requirement, the Secretary of State was forced to revisit the original decision to allow counties to select between Direct Recording Electronic (DRE) and Precinct Count Optical Scan (PCOS) voting systems. A logical analysis of the requirements of both HAVA and SHB262 showed that in order for the state of Ohio to be in compliance with both federal and state law, meeting both time, costs and certification constraints, the Secretary of State must purchase Precinct Count Optical Scan voting systems through existing contracts already approved by the Controlling Board to satisfy HAVA requirements. While this change limits the flexibility previously offered to the counties when selecting between voting systems, the use of Precinct Count Optical Scan voting systems introduces a new opportunity for counties in the form of improved operational processes. Furthermore, the Secretary of State will allow counties to re-select their vendor based upon the additional mandated requirements of Substitute House Bill 262. All counties must submit in writing to the Secretary of State their vendor selection by February 9, 2005.

The Secretary of State has already established a fund account for all federal monies designated for Ohio under the Act and those funds, as applicable, will be disbursed from that account as our plan is implemented. This account is segregated to reflect federal funds designated for county buy-outs, election administration and Requirements payments.
Reports will be generated to show the allocation and distribution of these funds and that report will be forwarded to the Election Assistance Commission along with a performance report to show the state’s progress and performance in implementing provisions of the Act.

X. Voter Education, Election Official and Poll Worker Training

Achieving the mechanical and technological change of the Help America Vote Act of 2002 is only part of the challenge of enacting true modernization and reform of Ohio’s voting system. While devices will enhance the efficiency of Ohio’s voting and election process, voter education and training of election officials and poll workers is critical to full implementation of the reforms to the benefit of Ohio voters.

Earlier in this report, we alluded to research currently being conducted by the Secretary of State’s office to improve poll worker recruitment, training, education and retention. That effort addresses the reality that many of our current poll workers are from a generation that places a premium on voting, elections and the democratic process. Many of our poll workers are senior citizens who very much value freedom and free election processes as a result of their experiences in growing up in the World War II and Korea era.

To these marvelous citizens, voting isn’t just a right it’s an obligation and a precious American birthright that has been paid for with the blood, sweat and tears of those who sacrificed their lives on foreign soil. As these citizen patriots retire from the poll worker ranks in Ohio’s election system, we are looking to the future to determine how best we can recruit the next generation of poll workers who will embrace this important Election Day service with the same degree of commitment, enthusiasm and competence of our older poll workers.

We are mindful of an exciting objective of the Help America Vote Act: to engage high school and college students in the election process as both a means to recruit bright, knowledgeable students as poll workers and as an opportunity to make more young people stakeholders in the process.
Obviously, these poll workers must be adequately trained to render assistance to voters in a competent and knowledgeable way, not only in terms of helping them understand and use the new technology that accompanies election reform, but also by applying the laws and addressing the myriad of Election Day issues that invariably arise.

Provisional voting, for example, was a challenge for many of our poll workers during past election cycles as Ohio aggressively implemented new procedures to accommodate provisional voters. Our poll workers have successfully navigated provisional voting and have successfully met the needs of provisional voters.

But to adequately train poll workers, we must first train election officials. The Secretary of State will meet that challenge with a number of programs and initiatives. New training seminars will precede each election in Ohio where election directors and their staff will be given an opportunity to learn about new procedures and changes.

The Secretary of State also will enhance its electronic communication with election officials by providing updates and advisories about changes in state and federal election law. Our goal is to provide this information as soon as we have the information in hand.

Additionally, the Secretary of State will conduct an inventory of current training materials and produce new information and guidelines in both written and video formats. The Secretary also has asked his staff to provide election directors with new materials that can supplement the training of poll workers.

To ensure seamless transition to new voting systems, we are asking system vendors to partner with us in the production of clear, graphically-driven pamphlets and brochures that tell voters how the voting devices work. Earlier we mentioned the use of simulators and internet-based simulation of new voting devices to provide voters with an opportunity to try out the new technology even before they enter the voting booth to cast their official ballot.

We think these enhancements and initiatives will advance our implementation of the Help America Vote Act in Ohio and pave the way for a smooth transition to new voting devices and election processes. Some of our preparation for new election processes in Ohio includes some structural changes. We are asking each county board of elections, for example, to designate a training coordinator who will communicate directly with an election training coordinator in the Secretary of State's office.

It is our aim for these coordinators to meet frequently throughout the year, exchange information and help us think about ways to improve the election system in Ohio.

After the election, we will gather from all 88 counties a report from these coordinators detailing issues, questions and problems they encountered and how they addressed the situation. From these reports, the Secretary of State will use that data and information to respond to election issues and disseminate that information to election directors so they can make refinements at the local level in subsequent elections.

But to glean a voters-eye view of the process and how we can improve the election system, we will distribute to a selected sample of voters in every county a short survey device that will track their voting experience and give them an opportunity to provide us with feedback on how we can improve the process. The survey will be
distributed to a pre-determined number sample of voters throughout the state as they exit the voting booth.

We think this innovation is important to better understand voter needs and to view our election process through the eyes of the “consumer.” Information we collect from both coordinators and the sample voters will guide us in developing relevant and meaningful training materials for both election officials and poll workers in future elections.

The Secretary of State also will develop a new “get-out-the-vote” program in Ohio that will encourage more voters to participate in the election process. While such programs currently exist in the Secretary of State’s office, personnel will be dedicated to conducting research and learning more about voter behavior in Ohio.

In early 2004, the Secretary of State launched “Your Vote Counts,” a comprehensive voter education program aimed at better preparing voters for the November 2, 2004 election. The goal was to provide all Ohio voters with the information they need to vote so that we can reduce the opportunity for difficulties on Election Day. This effort entails ensuring every voter gets the same consideration.

The program’s Web site, www.YourVoteCountsOhio.org, features educational materials and instructional videos showing how to vote using punch card, optical scan and DRE (electronic) voting machines. Also included in the program printed material and public service messages for television and radio.

In addition, the Secretary of State has made a special effort to reach out to students with his “Xpect More” campaign. The “Xpect More” advertising campaign is aimed at inviting young voters between the age of 18 and 24 into the democratic process. To date, more than 623,000 “Xpect More” brochures have been distributed to students through schools and across Ohio.

In many states, the appeal is often directed at those who are registered to vote, were registered to vote or who have voted in the past. The Secretary of State would like to target potential new first-time voters by coordinating voter recruitment with civics and government teachers in high schools throughout Ohio where there is a captive audience of potential new voters. Additionally, the Secretary would like to initiate research that targets Ohioans who have never voted to learn more about their decision not to participate in the election process and to determine if there are programs and initiatives that can be implemented to address their concerns and entice them to the polls.

Understanding more about voter behavior and non-voter behavior, we believe, is a proactive step we must take to fully embrace the spirit, intent, principles and objectives of the Help America Vote Act.

The proposed budget for these activities is $2.5 million earmarked for voter education, and $5 million set aside for election official and poll-worker training. We propose making election official and poll-
worker training funds available as state grants to the counties to supplement local activities and initiatives of the county boards of elections.

As counties deliberate equipment and voting systems, we will encourage them to consider appropriation of available residual funds to voter education and poll worker training. In crafting local budgets to achieve the objectives of the Help America Vote Act, we believe counties must give consideration to these initiatives to supplement state efforts for education and training.

In order to qualify for these funds, counties must submit to the Secretary of State a detailed plan that identifies proposed programs and initiatives and how the funds would be used. After each General Election, counties would be required to report on the deployment of these programs and their assessment of the value of the education and training.

**XVI. Estimated Timelines for Implementation of the State Plan**

Following are key dates and the proposed timetable for implementation of our State Plan:

<table>
<thead>
<tr>
<th>Date</th>
<th>Event Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>March 18, 2003</td>
<td>State Plan Advisory Committee named, public input process defined</td>
</tr>
<tr>
<td>April 3-4, 2003</td>
<td>State Plan Advisory Committee conducts public hearings</td>
</tr>
<tr>
<td>April 9, 2003</td>
<td>RFP released for statewide voter registration system</td>
</tr>
<tr>
<td>April 17, 2003</td>
<td>State Plan Advisory Committee reconvenes to review draft State Plan</td>
</tr>
<tr>
<td>May 7, 2003</td>
<td>Competitive bids due for voter registration system</td>
</tr>
<tr>
<td>May 13, 2003</td>
<td>State Plan finalized and published for 30-day review</td>
</tr>
<tr>
<td>May 16, 2003</td>
<td>RFP released for voting system vendors</td>
</tr>
<tr>
<td>June 2, 2003</td>
<td>Secretary of State awards bids for voter registration system</td>
</tr>
<tr>
<td>Aug. 1, 2003</td>
<td>Secretary of State awards bids for election systems. County boards of elections notified of eligible system vendors.</td>
</tr>
<tr>
<td>Sept. 2, 2003</td>
<td>County boards of elections must notify Secretary of State which vendor they have chosen for election system improvements.</td>
</tr>
<tr>
<td>Dec. 1, 2003</td>
<td>Statewide voter registration system installed and fully operational</td>
</tr>
<tr>
<td>Dec. 19, 2003</td>
<td>Requested a waiver from the Federal Government on deployment of the computerized voter registration system.</td>
</tr>
<tr>
<td>March 2, 2004</td>
<td>Primary Election. (Ohio General Assembly considering change of Primary to May, 2004.)</td>
</tr>
</tbody>
</table>
• April 29, 2004: Clinton County first to establish Centralized Voter Registration File processes between the county and the Secretary of State.
• May 7, 2004: Substitute House Bill 262 enacted.
• August 18, 2004: Diebold Direct Recording Electronic (DRE) Technical Security Re-Assessment Report prepared by Compuware submitted to Secretary of State.
• November 2, 2004: General Election
• November 17, 2004: VVPAT requirements distributed for comments.
• January 3, 2005: VVPAT rules filed with JCARR.
• January 1, 2006: Centralized Statewide Voter Registration File fully implemented.
• May 2, 2006: Replacement of punch-card and lever machine complete.

XVIII. The State Plan Committee: HAVA and Beyond

We reserve this section of the report to capture the comments and thoughts of our State Plan Committee. While many of the committee’s recommendations and much of their input is reflected in preceding sections of the report, it was clear this panel of distinguished Ohioans went beyond merely thinking about minimum requirements of the Help America Vote Act and insisted on expanding their mission to address issues that will produce broad and meaningful election reform in our state.

That kind of visionary thinking is precisely what the Secretary of State had in mind when he impaneled the State Plan Committee.

If there was a universal theme that resonated from the committee’s deliberations, it was consensus that Ohio must aggressively engage the next generation of voters and make young people in our state understand their role as stakeholders in the democratic process. It is insufficient, the panel said, to merely invite high school and college students into the election process. Ohio, the State Plan Committee said, must be proactive in educating young people about the election process and instill a deeper commitment to engendering student participation in the election process.

State Rep. Nancy Hollister noted that this report should underscore for Ohioans that implementation of the Help America Vote Act in Ohio signals a “change in the governance of the election system” in the state. HAVA, she said, places more responsibility on the Secretary of State to assure a fair, equitable and inclusive election process in Ohio.

Linda Carr, Daisy Duncan Foster and Pastor Aaron Wheeler were particularly passionate in their remarks about this issue and said Ohio should be creative in developing new programs and initiatives to bring young voters into the process. The Committee urged the Secretary of State to aggressively seek available funds under Title V and Title VI funding of the Help America Vote Act to accomplish this critical task.
Additionally, some committee members recommended working with the Ohio Department of Education and the Ohio Board of Regents to explore ways to better educate and encourage political participation by high school and college students. Pastor Wheeler suggested Ohio public schools should ponder curriculum requirements that focus exclusively on voting and election processes.

State Rep. Nancy Hollister noted that this report should underscore for Ohioans that implementation of the Help America Vote Act in Ohio signals a "change in the governance of the election system" in the state. HAVA, she said, places more responsibility on the Secretary of State to assure a fair, equitable and inclusive election process in Ohio. "We need to acknowledge that," she said.

But Rep. Hollister and other committee members said that shift in governance does not minimize the necessary independence, ongoing role or responsibility of counties to execute election policies within the new governing framework created by the Help America Vote Act.

Committee member Jeff Matthews said county boards of elections must be independent to effectively achieve the objectives of the Help America Vote Act, and Ms. Duncan Foster said boards of elections must feel "some ownership of the process." In that context, it was the consensus of the State Plan Committee that full compliance with the Help America Vote Act requires critical coordination and a strong working relationship between the Secretary of State's office and local boards of elections.

Election officials Guy Reece and Tom Coyne, along with Mr. Matthews, agreed that innovation doesn't end with the Help America Vote Act. They said Ohio must constantly be looking for new methods, new procedures and new ideas to keep the election process viable and invite more Ohioans to exercise their right to vote.

Ms. Alvarado noted the projected growth of Hispanic populations both nationally and in the State of Ohio. Several committee members agreed that rather than addressing this issue later and incurring cost for conforming equipment, the RFP should anticipate the language requirement and it should be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.
members agreed that rather than addressing this issue later and incurring cost for conforming equipment, the RFP should anticipate the language requirement and it should be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.

She said language requirements also need to be considered in education products produced by vendors and election officials in how to use the new voting equipment, as well as in training of poll workers and election officials. She said alternative language issues need to be considered in creation and execution of the grievance process and procedures.

She suggested the Secretary of State consider alternative language policies that exceed the 5 percent threshold.

While preceding sections of the report address monitoring procedures for implementation of the Help America Vote Act in Ohio, Ms. Alvarado said compliance monitoring should be "futuristic" and focus on outcomes. While measuring accomplishments, she said the state and local jurisdictions also should be forward looking and report, for example, where the state expects to be in the next five years and beyond.

She said monitoring and compliance should address issues such as where Ohio wants to be as a state, how we achieve those objectives, who is responsible for implementing these plans, what the funding sources will be for implementation and what will be different when changes, modifications or new procedures are implemented in the election process.

Rep. Hollister agreed there needs to be periodic evaluation of Ohio’s progress in meeting voting and election reforms. She suggested a need to pause from time to time to reflect on what has been accomplished, what future reforms need to be considered, and what revenues are available to achieve those objectives.

A primary focus in the deliberation of the State Plan Committee was how Ohio could best address disability issues related to implementation of the Help America Vote Act. Eric Duffy said the issue of physical barriers is a real and pressing issue that calls for creative solutions in Ohio. He emphasized that Ohio must consider not only what takes place inside the voting place, but what physical barriers exist that hinder access outside the building.

Pastor Wheeler, chairman of the Ohio Civil Rights Commission, offered the assistance of that agency in working with the Secretary of State in exploring solutions to that issue.

Mr. Long acknowledged that there might be offsetting costs and efficiencies that could be realized from conversion to electronic voting systems, but he stressed the necessity for full funding of the plan and timely allocation of federal payments to the state to avoid financial burdens on counties already adversely affected by the economy and cuts imposed by the State Legislature.

As expected, much of the panel’s deliberation was focused on funding and whether the federal allocation to Ohio was adequate to effect the wholesale change in
voting systems in the state. A key voice in that discussion was Larry Long, executive
director of the County Commissioners Association of Ohio.

Mr. Long noted that there is concern among county commissioners about whether the federal funding anticipated for implementation of the Help America Vote Act is sufficient to purchase the voting equipment needed to make Ohio HAVA compliant. But a comparable concern, he said, is consideration of future maintenance and replacement costs, as well as related cost issues such as storage requirements for the new equipment.

He acknowledged that there might be offsetting costs and efficiencies that could be realized from conversion to electronic voting systems, but he stressed the necessity for full funding of the plan and timely allocation of federal payments to the state to avoid financial burdens on counties already adversely affected by the economy and cuts imposed by the State Legislature.

Rep. Hollister also discussed the funding issue, suggesting the state, at some future date, might consider bonding options to assist in paying for ongoing costs associated with implementation of the Act, as well as making funds available for voter education, system upgrades and youth participation in the election process.

Further, she said that although there appears to be no immediate need for sweeping changes in state election laws, the state should constantly evaluate that need and enact legislative change as required.

Mr. Coyne emphasized the need for the Secretary of State and local boards of elections to fashion voter system reforms in a way that keeps the process from becoming “vendor-driven.” He said county boards need time to assess and evaluate the unique demands in each jurisdiction and recommended the Secretary of State consider meeting the disability requirements of HAVA in time for the 2004 election, but proceed more deliberately on installment of new voting equipment.

In May 2004, Substitute House Bill 262 was enacted into law by Governor Taft which requires all direct recording electronic voting machines used in the State of Ohio to include a voter verified paper audit trail (VVPAT). Substitute House Bill 262 mandates the Secretary of State shall establish by rule standards for the certification of the VVPAT. In addition, the bill created a county electronic voting machine maintenance fund.

XIX. Summary of the State Plan

Section 254 of the Help America Vote Act of 2002 lists the required components of the State Plan and this document fulfills those requirements.
Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

This report demonstrates that Ohio, because of its widespread use of punch-card voting, is perhaps challenged more than other states to reform its election methods and modernize its voting systems. The size of the state, ranking seventh among the 50 states in total population, and the mix of rural and urban population makes the transition even more challenging.

Recognizing the enormity of the task confronting Ohio, some members of the State Plan Committee and witnesses who testified before the committee counseled the Secretary of State to invoke waivers that would allow the state to delay its full implementation of the plan until the 2006 election cycle.

The Secretary of State, however, believes Ohio cannot afford to delay its implementation of the plan because every election cycle that passes is another election where voters are potentially disenfranchised and Ohio votes are lost or miscounted. Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

As election officials, if we know voters are disenfranchised and that legitimately cast ballots are being discounted, we have not only a moral obligation to immediately embrace a solution, but a legal obligation to find a remedy and enact measures to prevent that from happening. If even one voter is denied the right to vote, we are obligated, by law, to determine the cause and forge a solution. The evidence is overwhelming that thousands of Ohio voters have been disenfranchised by antiquated voting equipment and that many thousands more have lost confidence in the reliability and accuracy of voting devices currently in use in most of Ohio’s 88 counties.

The Secretary of State has confidence in the election professionals who conduct and administer elections in the State of Ohio, and believes Ohio has the capability to enact reforms that have already taken place in other states.

We are emboldened in our decision to press forward with implementation of this plan based on the experience of Knox and Lake counties in executing successful elections after implementing new systems only weeks before the General Election. The Knox County Board of Elections, which has only four employees, received delivery of new electronic voting devices in October, 1996, a presidential election year, and deployed them in the November General Election.

Lake County issued a request for proposal in April 1999, awarded bids in July of that year, took delivery of a new voting system the following September, and conducted a successful election weeks later in the November General Election.

Under the timetable established in this plan, new voting systems would be installed and operational in time for the Primary Election in 2004, providing local boards of elections with an opportunity to test the new systems before fully engaging them in the 2004 presidential election cycle.
However, we refer to the preceding section of this plan. Full implementation of this plan presumes full funding by the federal government. If the Secretary of State determines that federal funding for implementation of this plan is not forthcoming from the federal government in a timely manner, we will notify the Elections Assistance Commission of our intent to revise this plan and adjust the timetable for implementation.

Since the Federal Government has not appropriated the remaining funding for HAVA, it was necessary for the Secretary of State to modify our state plan and adjust the timetable for implementation. Initially, we had set an aggressive and ambitious full implementation for November 2004. Unfortunately, due to the delays in receiving funding and the establishment of the Elections Assistance Commission, we project full implementation of all HAVA requirements by May 2006.

Boards of Elections should be assured that the Secretary of State will focus all of its available personnel and resources to assist counties in enacting these reforms and meeting the requirements of the Help America Vote Act. Boards should also be assured the Secretary of State will work with county officials and elections administrators to ensure available resources are distributed as quickly as possible and that cost containment efforts will be undertaken to minimize implementation costs to counties. Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state’s punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

We include in this definition of electronic voting devices the option for some counties to choose optical scanning devices that are HAVA compliant. In counties which have invested in this equipment and prefer these optional voting devices, the Secretary of State will consider deployment of this equipment as acceptable if certain modifications are made to ensure compliance with statewide voting standards. These counties, however, would be required to feature at voting locations electronic voting equipment that accommodates the needs of people with disabilities.

Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state’s punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

We presume the transition to electronic voting equipment will, at minimum, reduce printing costs in most counties. We believe there are further savings and efficiencies that will be derived from electronic voting that will reduce personnel and labor costs.

The DRE option also will introduce added efficiencies in the election process that will eliminate issues related to “over-votes,” recounts and ensuring full voter participation by persons with disabilities. We also believe an electronic-based voting system will enhance training.
and education across the spectrum for election officials, voters and poll workers if the system is sufficiently user-friendly.

Based on the foregoing, following is a summary of the State Plan for Ohio based on the requirements delineated in Section 254 of Public Law 107-252:

(1) How the State will use the requirement payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Ohio will implement new voting systems and procedures that meet the general requirements of Title III ensuring the systems have audit capacity, disability access, and alternative language accessibility, where applicable, and that the systems meet error rate thresholds established by the Federal Elections Commission.

(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1).

Ohio anticipated federal funding and state matching funds would be about $161 million. Unfortunately full federal funding was not appropriated and the total federal funding and state matching funding is approximately $137 million. The Secretary of State will allocate about $106 million of that amount for installation of new voting equipment and upgrades of existing voting equipment in Ohio counties, and use the remaining portion to implement statewide voter registration and establish a provisional voting hotline. Disbursements in the amount of $5 million will be available to Ohio's 88 counties for election official and poll worker training. Additionally, the Secretary of State will make $5 million available for administration of a statewide voter education program. The Secretary of State will draft guidelines and reporting requirements to monitor distribution of these funds and to ensure county compliance with the Help America Vote Act of 2002.

(3) How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.

See response to No. 2. Additionally, the Secretary of State, in establishing an authorized vendor list for deployment of new voting equipment, will require vendors to include, as part of their bid proposal, fund allocation that includes voter education, election official education and training, and poll worker training. The Secretary of State also will implement new programs and procedures to supplement these vendor requirements and efforts at the county level to address these issues.
(4) How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

See preceding responses. Ohio will replace punch-card voting in the State and require deployment and installation of electronic-based voting devices that meet the requirements of the Act. The request for proposal for new voting equipment will be crafted to presume required features and safeguards that ensure a uniform voting standard and compliance in all Ohio counties with specific requirements of the Act.

(5) How the State will establish a fund described in subsection (b) for the purposes of administering the State’s activities under this part, including information on fund management.

Such a fund has already been established by the Secretary of State and will be monitored by both the Secretary of State and the Auditor of State, as Ohio law applies to state auditing requirements and reporting procedures. Fund management procedures include quarterly reports to the Election Assistance Commission to detail receipt and expenditure of funds, and how those funds were used to meet the objectives of the Act.

(6) The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available.

See response to No. 2 and the fund distribution table on page 23 of the State Plan. The Secretary of State believes full implementation of the plan will require all available federal funding and state matching funds to meet the requirements of the Act.

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

(See Section XV. Requirements Payments: Maintenance of Effort.) Attached to this State Plan are budget materials that show the level of spending for election services by the Secretary of State in FY 2000 and projected levels of spending for FY 2004-05. The Secretary certifies that no federal funds for Requirements payments earmarked for voter reforms and system modernization will be used to supplement the state budget for operation and administration of the office.
(8) How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The Secretary of State assumes full responsibility for ensuring compliance with the Act. Specific timetables are included in this plan which requires all punch-card and lever machine counties to install and deploy new voting equipment that meets the uniform standards of the Act by May 2, 2006. The plan also calls for a statewide voter registration system to be in place and fully operational by January 1, 2006. See Section XIV for ongoing performance measurement.

(9) A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

See attached procedure and refer to Section XIII of the State Plan, Administrative Complaint Procedures and Grievances.

(10) If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

See response to No. 2. Ohio will use funds from Title I for antiquated systems buyout and to improve election administration activities and procedures. See the fund distribution table on page 23 of the State Plan and allocation and distribution formula described on page 24.

(11) How the State will conduct ongoing management of the plan.

See Section XIV, Ongoing Performance Measurement. Throughout this State Plan is a description of the management practices and procedures outlined by the Secretary of State to ensure compliance with the Act. Any material change in this plan will result in a resubmission of the Plan in accordance with Sections 255 and 256 of the Act.

(12) In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and how the State succeeded in carrying out the State Plan for such previous fiscal year.

This State Plan represents Ohio's initial submission of a State Plan to the Elections Assistance Commission.
(13) A description of the committee which participated in the development of the State Plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

See page 3, The State Plan Committee, and Section VI, How Ohio Developed its State Plan.

This State Plan respectfully submitted to the Elections Assistance Commission, in accordance with U.S. Public Law 107-252, this 16th day of June, 2003.

J. KENNETH BLACKWELL
Secretary of State
Peggy,

Per our telephone conservation earlier this week, can you please tell me the status of when you will have Ohio's revised plan placed in the *Federal Register*? Please let me know if you need additional information from me. Thank you, I may be reached at 614-466-5515.

Thank you,

Judy Grady

Director of Election Reform

Subject: Ohio Revised State Plan

Peggy,

Attached is the Ohio revised state plan and letter from Secretary Blackwell. A hard copy has been sent via Federal Express and should arrive Monday morning. Please call me if you have any questions or concerns. I left the yellow highlight in your copy to show the changes. I can take them off and resend it if you prefer.

Also please advise when the revised plan will appear in the *Federal Register*.

Thanks,

Judy
February 23, 2005

Dear Election Assistance Commission and Ohio Voters:

In accordance with section 2549(a)(11) of the Help America Vote Act of 2002 (HAVA), I am filing with the U.S. Election Assistance Commission (EAC) for publication in the Federal Register this letter and the following amended text of the Changing the Election Landscape in the State of Ohio, please see pages 25, 33, 41, 45 and 46.

The amended portion of our State Plan reflects the actual funding received to date from the Federal Government and the passage of the General Assembly Substitute House Bill 262, which requires all direct recording electronic voting machines (DRE) used in Ohio to include a voter verified paper audit trail.

Please note that non-material change may be found in other elements of the Ohio State Plan. After consulting with EAC staff, the State of Ohio has elected not to include those changes for publication in the Federal Register as unnecessary under HAVA. Instead, we would direct the EAC and members of the public to the Ohio Secretary of State’s website (www.sos.state.oh.us) to view the complete Ohio State Plan.

On behalf of the State of Ohio, I thank the Commission for its assistance and look forward to our continued collaboration to improve the administration of elections.

Sincerely,

J. Kenneth Blackwell
Changing the Election Landscape in the State of Ohio

A State Plan to implement the Help America Vote Act of 2002 in accordance with Public Law 107-252, §253(b)
Revised January 12, 2005

"The Act appropriately respects the primacy of state and local governments in the administration of elections, while helping to ensure the integrity and efficiency of voting processes in federal elections by providing federal governmental support for that vital endeavor."

PRESIDENT GEORGE W. BUSH
THE WHITE HOUSE
October 29, 2002
June 16, 2003

Dear Election Assistance Commission and Ohio Voters:

I can think of no greater gift we can give future generations than an electoral process that ensures the integrity of their vote and provides them with an election system that is efficient and fair.

At the very least, we need an election system that assures every vote counts and every voice is heard in electing those who will serve in government and decide the many critical issues we face as citizens. No voter should be excluded from the process because of a disability, as no voter should be excluded because of inadequate, outdated and imprecise voting mechanisms.

That's what this report is all about. That's what the Help America Vote Act of 2002 is all about—fair elections and empowering every voter to exercise their obligation, responsibility and privilege to fully engage in the election process.

Democracy, after all, is a fragile system that relies on the voices and participation of all its citizens, not just a chosen few. Every voter and every vote cast strengthens our democracy and enhances the opportunity to choose the best people for the job of leading our government, at all levels, and deciding those issues that affect our local community, state and nation.

My thanks to the State Plan Committee who worked so diligently to help me create this document that will open a new era for the way we vote in Ohio. Truly, we are dramatically changing the election landscape in our state and in our nation. That is a good thing and probably one of the most important contributions we can make to future generations of Ohioans.

In the final analysis, the Help America Vote Act of 2002 is about inclusion more than it is about all the technical change and new administrative processes and procedures called for in this plan. Inclusion is, after all, the thread that binds the fabric of democracy.

Very truly yours,

J. KENNETH BLACKWELL
Ohio Secretary of State
The Ohio Secretary of State gratefully acknowledges the State Plan Committee for their participation and assistance in the preparation and development of this plan for the strategic implementation of election reforms in the State of Ohio, pursuant to the Help America Vote Act of 2002.

The State Plan Committee

Chairwoman Judy Grady, Director of Election Reform, Office of the Secretary of State (replaces Dana Walch)

Ms. Donna Alvarado, Commissioner, Ohio Commission on Hispanic/Latino Affairs

Ms. Linda Carr, Director of Institutional Initiatives, University of Toledo

Mr. Michael Vu, Director, Cuyahoga County Board of Elections (replaces Tom Coyne)

Mr. Eric Duffy, Director of Field Services, National Federation of the Blind

Ms. Daisy Duncan Foster, Coordinator of Academic Services, University of Dayton

State Rep. Nancy Hollister, R-Marietta

Mr. Larry Long, Executive Director, County Commissioners Association of Ohio

State Sen. Mark Mallory, D-Cincinnati

Mr. Keith Cunningham, Director, Allen County Board of Elections and President, Ohio Association of Election Officials (replaces Jeff Matthews, Stark County Board)

Mr. Matthew Damschroder, Director, Franklin County Board of Election (replaces Guy Reece)

Ms. Catherine Turcer, Legislative Director, Ohio Citizen Action

Pastor Aaron Wheeler, Chairman, Ohio Civil Rights Commission

Help America Vote Act of 2002

I. Introduction and Overview

On Oct. 29, 2002, President George Bush signed into law the Help America Vote Act of 2002. The legislation was passed in the U.S. House in late 2001 and was approved by the U.S. Senate the following year.

Much of the law embraces recommendations advanced by the National Commission on Federal Election Reform, a group that included both former Presidents Jimmy Carter and Gerald Ford as its honorary co-chairs. The commission observed that democracy is a precious birthright. But they also noted that each generation must nourish and improve the processes of democracy for its successors.

The Help America Vote Act logically embraces the goals of election reform by expecting all levels of government to provide a democratic process that:

- maintains an accurate list of citizens who are qualified to vote;
- encourages every eligible voter to participate effectively;
- uses equipment that reliably clarifies and registers the voter’s choice;
- handles close elections in a foreseeable and fair way;
- operates with equal effectiveness for every citizen and every community; and
- reflects limited but responsible federal participation.

In Ohio, the Secretary of State and the State Plan Committee used those broad parameters, principles and guidelines as the foundation objective for developing this plan. From that platform, the Secretary and State Plan Committee formulated the Ohio Plan to address the following specific issues to meet and exceed the minimum standards of the Help America Vote Act. In greater detail, this report addresses:

1. How Ohio will use requirement payments, distribute and monitor the allocation of these funds to county governments, and what criteria will be used to determine eligibility for these funds.
2. How Ohio will measure the performance of county governments to ensure they are in compliance with the Act.
3. How Ohio will develop programs to provide voter education, election official and poll worker education and training to meet the standards of the Act.
4. How Ohio will establish voting system guidelines and processes.
5. How Ohio will administer these activities and budget for administrative costs, as well as establishing a budget for overall implementation of the plan based on our best estimate of costs.
6. How Ohio will use the requirement payments without reducing state support for voter and election activities below what the state was spending in November, 2000.
7. How Ohio will establish performance goals and measures for county government.
8. How Ohio will create and develop a uniform administrative complaint procedure.
9. How payments under Title I will be used for punch-card replacement in Ohio and how that will affect and enhance the overall implementation of the plan.
10. How Ohio intends to conduct ongoing oversight and management of election reforms and improvements.

The size and composition of Ohio's population is a challenge to implementation of wholesale election reform in the state, but Ohio also is challenged because of the prevalence of punch-card voting. Nationally, it is estimated that 34.4 percent of the nation's voters cast their ballot on punch-card voting devices. In Ohio, 72 percent of the state's voters use this ballot method.

As the following section of the report suggests, election reform as envisioned by the Help America Vote Act is not a casual undertaking in Ohio. The demographics of the state reveal a broad mix of urban, rural and mid-size communities. Ohio, for example, has eight urban markets that include three large metropolitan cities – Cleveland, Columbus and Cincinnati. Smaller urban centers include Toledo, Youngstown, Dayton, Akron and Steubenville. Each enjoys its own community culture and election traditions.

In addition to these larger urban centers are mid-size communities like Mansfield and Lima, which represent the balance of Ohio's Metropolitan Statistical Areas (MSA's) according to the U.S. Census Bureau. But beyond those 10 communities and the counties they represent are 78 other Ohio counties that reflect a more rural population, including a large portion of Southeast Ohio that is designated as part of the Appalachian region.

The size and composition of Ohio's population is a challenge to implementation of wholesale election reform in the state, but Ohio also is challenged because of the prevalence of punch-card voting. Nationally, it is estimated that 34.4 percent of the nation's voters cast their ballot on punch-card voting devices. In Ohio, 72 percent of the state's voters use this ballot method.
Given that context, we offer the following demographic overview of the State of Ohio to provide the Election Assistance Commission with what we regard to be a valuable foundation perspective for the implementation of election reforms in Ohio.

II. Ohio Demographics

While Ohio remains one of the nation’s leading manufacturing centers, the state, during the past two decades, has made the transition to a more service-industry economy. Nearly 28 percent of Ohio’s 5.4 million employee workforce is now classified as service employees. From 1990 to 2000, the state’s population grew from 10.8 million to 11.3 million.

The state is comprised of 88 counties that occupy nearly 41,000 square miles of land. Ohio is bounded on the south and east by the Ohio River and on the north by Lake Erie. About 11.5 percent of that population is African-American and 1.9 percent is Hispanic/Latino, according to the most recent Census data. In total, Ohio’s minority population is about 16 percent of the total population.

The median age in the state is 36.2 years of age and, like many other states, is trending older. About two-thirds of Ohio residents live in owner-occupied households and about 29 percent live in renter-occupied dwellings.

The state has a wealth of educational institutions with 15 public four-year universities and 62 private colleges and universities. There are 25 two-year colleges in the state. The largest counties, in rank order and based on 2000 Census data, are:

The state’s major employers include such corporate notables as AK Steel, Daimler Chrysler, Delphi Automotive Systems, Ford Motor Co., General Electric Co., General Motors Corp., Goodyear Tire & Rubber Co., Honda Motor Co. Ltd., Kroger, Nationwide Insurance, Procter & Gamble, TRW Inc. and Wendy’s International.

In total, there are about 240,000 active businesses in Ohio, including about 80,000 farms that represent 14.9 million acres.

The state boasts 115 state parks that provide nearly 115,000 acres of recreational space for Ohio residents. There are six airports in the state with scheduled airline service and another 164 commercial airports and 10 commercial heliports. Transportation arteries
in the state include 1,572 miles of interstate highways, 3,918 miles of U.S. highways, and more than 14,000 miles of state highways. The Ohio Turnpike that ribbons through northern Ohio covers 241 miles from the Indiana state line to the Pennsylvania state line.

III. State Political/Governmental Structure

Ohio is governed by five major statewide officeholders including Gov. Bob Taft, Attorney General Jim Petro, State Auditor Betty Montgomery, Secretary of State J. Kenneth Blackwell and Treasurer Joseph Deters. The Ohio General Assembly includes 99 members of the Ohio House of Representatives and 33 members of the Ohio Senate. Since 1992, both statewide officeholders and elected legislators are subject to term limits. Statewide officeholders are limited to two four-year terms. In the Ohio General Assembly, House members are limited to four two-year terms and State Senators are limited by two four-year terms.

Some local government officials also are subject to term limits as a result of local ballot initiatives in some Ohio communities.

The Ohio Supreme Court includes seven justices who are elected statewide. The Supreme Court is not subject to term limits. The Chief Justice of the Ohio Supreme Court is Thomas Moyer.

The local government structure in Ohio includes a mix of city and county elected officials, with most cities and villages in Ohio administered by a mayor/council form of government. Some municipalities have an appointed city manager form of government in which an executive is appointed to administer local municipal affairs.

In Ohio local government, there are “statutory” cities that operate largely on the basis of state statutory law and “charter” cities that may adopt so-called “home rule” guidelines to conduct the affairs of local government.

On the county level, 87 of 88 Ohio counties are governed by a Board of County Commissioners, which oversee county administration. Summit County is the only county in Ohio with a county executive/council form of government. The Summit County Council is comprised of eight district council members and three who are elected at large. Ohio counties also elect county auditors, prosecutors, treasurers, clerks of court, judges and county sheriffs.

The state is represented by 18 elected members of the U.S. House of Representatives and, of course, two U.S. Senators.
IV. State of Ohio Elections Systems

Ohio is, pervasively, a punch-card voting state. In total, 69 of Ohio’s 88 counties use punch-card voting. Those 69 counties represent 72.5 percent of all the registered voters in Ohio and 74 percent of the 11,756 voting precincts in the state.

Among the 19 counties that use voting devices other than punch-card ballots, two use automatic voting machines, six have electronic voting devices, and 11 use optical scanning equipment.

The table below (that continues on the following pages) shows a county-by-county listing of the types of voting devices in each of Ohio’s 88 counties. The table also reflects the number of precincts and registered voters in each of those counties as reflected in the November, 2002 General Election, which we use as base data throughout this report (unless otherwise indicated.)

</table>
Of note, two of Ohio's largest counties – Cuyahoga and Hamilton counties – currently use punch-card ballot devices, as do two other large urban centers in Ohio, Montgomery and Summit counties. Those four counties, alone, account for nearly 3,600 of Ohio's 11,756 precincts, and more than 2 million of the state's 7.1 million registered voters. Another large urban center in Ohio, Lucas County, is a lever-machine county.

NOTE: In 2004, the number of registered voters grew to over 7.9 million and the number of precincts was reduced to 11,360.

In February 2001, the Secretary of State conducted an “Elections Summit.”

Participants included academics, members of the media, local election officials, legislators, and community groups. The group reported the following:

1. Public confidence in the accuracy of punch card voting systems has been seriously undermined.
2. Boards of elections should upgrade their voting systems to new, more trustworthy technology.
3. Comprehensive voter education is critical to successful election operations.
4. A combination of federal, state, and local dollars may be appropriate to fund these technological improvements.
5. Ohio’s current elections standards, based on a combination of secretary of state directives, advisory opinions and rulings, should be codified by the General Assembly.
6. These goals demand immediate attention, or our state runs the risk of repeating the problems of our nation’s most recent presidential election – and suffering irreparable damage to the most important and basic concepts of democracy.

Subsequent to the Summit, a separate committee met to study Ohio’s election systems. They concluded (by a 6-5 committee vote) that because of the safeguards and procedures in Ohio election law, the punch-card voting method was adequate and there

---

was no overwhelming need for a statewide overhaul, particularly without available funding.

While the Secretary of State notes that punch-card voting is not explicitly prohibited under the Help America Vote Act, other requirements of the Act make it impractical to use punch-card voting as a primary voting device in the state.

In a study of "over" and "under" voting in Ohio, it was clearly demonstrated that punch-card voting was unreliable to the extent votes cast by thousands of Ohioans were not being counted in the final election tabulation.

Over-voting occurs when a voter casts a vote for more than one candidate in an election and thus disqualifies their vote in that election. Under-voting occurs when a voter fails to mark a ballot in a particular race or votes for fewer than the number of candidates to be elected.

The following table tracks the combined under/over vote phenomenon in the 2000 presidential election in Ohio's 88 counties:

</table>
The data shows 29 counties with the highest over/under vote percentage in the 2000 election were all counties that use the punch-card method of voting. The seven counties with the lowest over/under vote percentage in the 2000 election were all counties that did not use punch cards as their primary voting system.

The Ohio challenge in meeting the voter and election reforms envisioned by the Help America Vote Act is obvious. In simplest terms, Ohio is a large and populous state with a diverse mix of urban and rural voters that predominantly relies on punch-card voting as its prevailing voting mode. Modernizing the state’s election systems will require widespread change throughout the state and in its most populous counties.

The transition will require a solution that must consider large and small counties, rural and urban areas, and adjustments that will affect an overwhelming majority of Ohio voters. The obvious corollary challenge is selecting a system configuration that meets the needs of all those counties, training election officials and poll workers to use new voting systems, and familiarizing Ohio voters with new voting devices.

While on its face, this appears to be a daunting challenge, we are confident Ohio’s State Plan logically anticipates those factors and will meet the guidelines, demands, timetables and expectations of the Help America Vote Act.

---

2 Shelby County, a punch-card county, reported no over/under vote in the county’s vote tabulation in the 2000 presidential election cycle. This would appear to be a reporting error.
V. Voter Trends: the Context for Change and Reform

We pause only for a moment in this report to reflect on voter turnout in Ohio. We do so for several reasons, not the least of which Ohio contemplates election reform and system modernization to take place in a presidential election year when voter turnout is higher and demand on the election system is greatest.

We also explore voter turnout and trends as context for meeting the most desirable benefit and objective of the Act: to restore public confidence in the election system and, subsequently, increase voter participation. While new, more technologically proficient systems, increased voter registration, accessibility and accuracy are hallmarks of Help America Vote, the more encompassing aim of the Act is to invite more voters into the process to exercise their rights and responsibilities as qualified electors.

In developing the State Plan, we must anticipate that voter participation will increase, voter turnout percentages will climb, and demand on the election system will be greater. We can only gauge those factors based on Ohio's experience in past elections and the historical trends that will serve as a predictor of future trends.

The following table tracks Ohio voter turnout in both gubernatorial elections and presidential elections during the past 24 years.

<table>
<thead>
<tr>
<th>Gubernatorial Election Years</th>
<th>Presidential Election Years</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>2002</td>
<td>3,356,285</td>
</tr>
</tbody>
</table>

The chart shows that during the course of the past six gubernatorial elections, voter turnout has averaged about 55.79 percent. During the past six presidential elections, voter turnout in Ohio has averaged 71.33 percent. Based on this historical data, Ohio can generally anticipate about 1.25 million more voters in a presidential election year than in a gubernatorial election cycle.

Even a modest 5 percent gain in that average means 62,500 more voters. Subsequently, based on projected population growth and increased voter participation as a result of election reforms and modernization, our State Plan assumes 150,000 new voters during peak presidential elections growing at an annual rate, after initial implementation of new systems and election reforms, of 3 percent per annum.

As a result, our Plan assumes that growth rate and the recommended voting systems design model proposed in this report anticipates that growth and demand on the state's election system in future peak presidential voting years. We use the presidential
voting cycle as a base for our plan because that assumes the heaviest potential voter
turnout and the busiest times for local boards of elections.

Since 1978, voter participation in the state's gubernatorial elections has grown
from 3 million voters to about 3.3 million voters. Since 1980, voter participation in
presidential elections has grown from about 4.3 million voters to about 4.8 million voters.
Factoring population growth during those decades, those statistics would imply that voter
participation has remained relatively flat and, in all likelihood, is trending lower.

We have a high confidence level that the election reforms of the Help America
Vote Act will produce more voter activity and a greater number of voters. Ohio doesn't
view the Act as a final effort to produce greater voter participation, but the beginning of
an expanded effort to entice more voters to exercise their rights and responsibilities to
participate in the election process.

We believe modernization and reform require us to actively engage in voter
education and to continue to evaluate programs that will produce greater participation in
the democratic process. We pledge our effort to continue to explore new and innovative
programs that will achieve those objectives.

VI. How Ohio Developed its State Plan

In development of the State Plan, we insisted on inclusion in both creation of the
State Plan Committee and in public input into the process. This report represents a broad
outreach to minorities, senior citizens, people with disabilities, elected officials, election
officials, public interest groups and the public at large.

Our foundation principle in developing this plan was based on the view that such
far-reaching reforms to a system so vital to the most fundamental democratic process in
our state and nation required a fair, open and dynamic process where there is an
opportunity for every voice to be heard. We were proactive in developing a structure to
embrace that principle.

As a first step in our process, we widely publicized hearing dates and created a
web site that invited public comment and input. We invited written testimony from
groups and organizations who wanted to lend their perspective to election reform in Ohio.
Additionally, we actively solicited input from critical stakeholders for our public
hearings, including key representative voices from among groups such as the Urban
League, the League of Women Voters, the Disability Policy Coalition, and the American
Association of Retired Persons (AARP).

Our lead-off witness was Chet Kalis of the House Administration Committee,
who worked closely with U.S. Rep. Bob Ney, R-Ohio, primary sponsor of the Help
America Vote Act of 2002. We asked Mr. Kalis to lay the groundwork for our committee
by providing them with a foundation perspective of the Act, its mission, aims and
objectives.

The State Plan Committee also heard from Doug Lewis, executive director of The
Election Center, a national nonprofit organization serving the elections and voter
registration profession. Mr. Lewis developed and authored the Professional Education
Program for elections/registration officials – named the best continuing education
program in the nation by the National University Continuing Education Association.
Mr. Lewis was able to provide the committee with a national view of election reform and voter registration from the valuable perspective of someone with intricate knowledge of election systems across the nation.

To provide the perspective on Ohio, Dr. Herb Asher, professor emeritus of political science at The Ohio State University, brought election reform home for our State Plan Committee. Few voices are more respected than the voice of Dr. Asher as a knowledgeable expert and commentator about the political and election process in Ohio.

While the State Plan Committee itself included representation from boards of elections, we reached out to three other boards to provide the committee with a strong representative sample of the diverse local election operations in the state. Among those invited to testify were Janet F. Clair, director of the Lake County Board of Elections, Rita Yarman, deputy director of the Knox County Board of Elections, and Terry Burton, deputy director of the Wood County Board of Elections.

The testimony of the three elections officials was particularly valuable to the Committee because Lake and Knox counties are two jurisdictions that recently modernized their election systems. In addition, four other counties – Ross, Pickaway, Mahoning and Franklin counties – currently have electronic-based voting systems. Wood County represents one of the Ohio counties facing an extensive overhaul of its system under the Help America Vote Act.

Dolores Blankenship, advocacy volunteer from AARP, offered the State Plan Committee an incisive look at the election process through the eyes of a senior citizen, and eight witnesses representing the Disability Policy Coalition offered riveting testimony about the Election Day challenges facing voters with disabilities.

The strong presence of people with disabilities in these hearings underscores the importance Ohio attaches to this issue and our resolve to provide physically challenged voters with every opportunity to cast their ballot in a setting that assures their access to the polls and their right to cast a ballot unrestrained by barriers and obstacles that preclude their full participation in the voting process.

Peg Rosenfield, a former state elections official and now a representative of the League of Women Voters of Ohio, provided testimony on behalf of that voter advocacy group, and Ernest Perry of the Columbus Urban League was the voice for that group.

The final witness was Eric Seabrook, chief counsel to the Ohio Secretary of State, who described the administrative complaint procedure envisioned by Secretary of State Blackwell and the potential contracting procedures under review to establish an election system that meets the uniform voting standards of the Help America Vote Act.

The State Plan Committee met in public session on April 3-4 to hear testimony from these witnesses and then reconvened on April 17 for a focused facilitated work session to refine and finalize the State Plan.

We believe the process used to develop the State Plan in Ohio is one of the most aggressive public outreach efforts in the nation. While the aim of the process was to be as inclusive as possible, we think it had the added benefit of educating and informing the committee and citizens of our state about the Help America Vote Act and its far-reaching implications for an improved voting and election system in Ohio.
The open and proactive design of our process signaled to every Ohioan the importance of enacting voter and election reforms in the state, and how that reform was likely to affect their participation in the electoral process.

In addition to the public hearings, the Secretary of State solicited all Ohioans to provide input to the plan by providing written communications with his office or to communicate ideas via the Secretary of State’s website. This communication was provided to members of the State Plan Committee and is attached as part of the State Plan.

**VII. Federal Funding Assumptions of the Act**

The Help America Vote Act of 2002 makes available certain federal funding to help achieve requirements and mandates of the Act. The funding components of the Act are reflected in Title I, Title II, Title IV and Title V. In summary, the federal government has agreed to the following federal funding thresholds for each of the Title sections of the Act:

**Title I – Antiquated Machine Buy-Out**
- $325 million for buying out punch-card and lever voting machines.
- $325 million in payments to states to improve election administration.

**Title II – Election Assistance**

- **Requirement Payments**
  - $3 billion for meeting requirements, poll-worker training, voter education, and improving administration of elections.

- **Access Grants**
  - $100 million for increasing polling place access for voters with disabilities

- **Research Grants**
  - $20 million for research and development to improve voting technology

- **Pilot Program Grants**
  - $10 million for pilot programs to test new voting systems and equipment.

- **Protecting and Advocacy Systems Payments**
  - $40 million for state protection and advocacy systems.

**Title V – Help America Vote College Program**
- $5 million to encourage college students to participate in the political process by volunteering as poll workers.

**Title VI – Help America Vote Foundation**
- $5 million to encourage high school students to participate in the political process by volunteering as poll workers.
Of obvious, primary and immediate importance to the State of Ohio is the Title I funding and the state’s share of Title II monies for Requirement Payments for poll-worker training, voter education, and improving administration of elections, as well as federal funds available for Access Grants to make election sites more accessible to people with disabilities. These three specific funding sources enable Ohio to address what we regard to be the core modernization and reform of its election system.

The buy-out program under Title I has special implications for Ohio because of the prevalent use of punch-card voting in the state. Likewise the $325 million being allocated to states to improve election administration is important because these funds represent resources that will be allocated for development of a centralized voter registration system in the state.

Title I largely represents base funding for Ohio to address the mechanical implementation of the Help America Vote Act. Title II payments represent a source of funding to train, educate and administer the state’s election program once the transition is made from punch-card voting to a more modern mode of voting, and to make poll sites more accessible to people with disabilities. Later in the plan, we discuss allocating a portion of Title II funds to voting system upgrades.

The state will apply for research and pilot program grants. But for now, our focus is to first establish a reliable, accurate and fair election system, conduct the training and education necessary to make that system work, and to ensure accessibility of the disabled and physically challenged citizens of our state. The Secretary of State believes Ohio should be particularly aggressive in seeking available federal funds under Title II for access grants to make Ohio’s polling places more accessible to the disabled.

Of note and as it relates to Title V and Title VI of the Act, the Ohio Secretary of State’s office is currently conducting research related to poll worker issues. A component of that research anticipates a greater role for high school and college students in the electoral process, as well as other initiatives that will enhance the identification, selection, education and training of poll workers.

As this State Plan is being submitted, we anticipate that research will be completed and recommendations forthcoming in the next few months about how Ohio will maximize poll-worker recruitment and training, and ensure the presence of quality, qualified poll workers in every precinct.

Such initiatives underscore our determination to not only meet the minimum requirements of the Help America Vote Act of 2002, but to make Ohio a model state for implementation of these reforms and to lead the nation in development and
implementation of a modern, fair, reliable and accurate election system. As U.S. Rep. Bob Ney led the federal initiative to enact the Help America Vote Act, it was the mandate of our State Plan Committee to formulate a plan that makes Ohio a showcase for election reform.

VIII. Distribution of Resources to Local Governments

We first explore our proposed distribution of aid to local government under Title I. Under guidelines of the Act, these funds must be used assuming the following criteria:

- These funds may be used as a reimbursement for costs associated with punch-card or lever machine replacement incurred after Jan. 1, 2001.
- There is a presumption states must ensure compliance in time for the November, 2004 Federal Election.
- Within six months after the date of enactment, Ohio must certify that the state will use the money for punch-card/lever machine replacement, the state will comply with federal laws, and the voting system will meet new voting system standards.

We anticipate that no change in state law or new legislation will be required to carry out the activities required for certification.

At the initial writing, the Congressional Research Service (CRS) estimated that full-funding under the Act, for both Title I and Title II receipts, would total $155,251,155. CRS estimates $116,423,155 of that amount represents Title II funding under the Requirements Payments component of the Act. However, as of this revision date, the Congress has not appropriated the full funding as prescribed in Public Law 107-252.

In addition, the state has appropriated $5.8 million in matching funds for Title II payments, as required by the Act, which means total available funds for implementation of the State Plan in Ohio will be approximately $132 million.

All money in Title II is based on the state’s portion of the nation’s voting age population. The most recent estimate is that Ohio’s 8.5 million voting-age population represents 3.97 percent of the nation’s voting age population of 215.1 million.

Because of the prevalence of punch-card voters in Ohio, we are keenly focused on the distribution of funds under Title I and, more precisely, the buy-out program. The Act stipulates the funds will be distributed to states by multiplying the number of qualifying precincts by $4,000. However, based on available federal funds for this purpose and the number of punch-card and lever-machine jurisdictions in the U.S., it now appears that number likely will be about $3,354 per precinct. As previously mentioned, Ohio has 69 counties designated as punch-card counties.

In addition, two Ohio jurisdictions – Hardin and Lucas counties – feature lever voting machines and would be eligible for funding under the guidelines.
In total, under the formula, the 69 punch-card counties and two lever-machine counties in Ohio means the state would be eligible for about $31 million in federal funds under the buyout program.

However, we know $31 million is insufficient for the counties to purchase modern, reliable voting systems capable of meeting requirements of the Act. Subsequently, our budget for voter and election reforms in Ohio presumes the state will require about $24.2 million to establish a centralized voter registration database and related support for voter education and poll worker training. Our plan calls for the remainder of the Title funds to be allocated to Ohio’s 88 counties to help subsidize installation of new systems and implement other required activities under the Act.

Following is the budget we envision for distribution of the $161 million in funds in Ohio to meet requirements of the Help America Vote Act:

<table>
<thead>
<tr>
<th>Activity</th>
<th>Fund Distribution</th>
<th>Jurisdiction</th>
<th>Purpose</th>
</tr>
</thead>
<tbody>
<tr>
<td>Voter Registration Database</td>
<td>$5 million</td>
<td>State and Counties</td>
<td>Develop statewide voter registration database</td>
</tr>
<tr>
<td>Voter Education</td>
<td>$5 million</td>
<td>State and Counties</td>
<td>Administered by the State in coordination with the counties</td>
</tr>
<tr>
<td>Poll Worker Training</td>
<td>$5 million</td>
<td>State</td>
<td>To be distributed as grants to counties</td>
</tr>
<tr>
<td>Administrative Expenses</td>
<td>$2 million</td>
<td>State</td>
<td>For state personnel to administer and monitor HAVA implementation</td>
</tr>
<tr>
<td>Provisional Voter Hotline</td>
<td>$250,000</td>
<td>State</td>
<td>To establish a state hotline for provisional voters</td>
</tr>
<tr>
<td>Miscellaneous</td>
<td>$2 million</td>
<td>State</td>
<td>For associated costs of implementing HAVA</td>
</tr>
<tr>
<td>Voting Equipment and other Activities</td>
<td>$116 million</td>
<td>State on behalf of Counties</td>
<td>For new voting equipment and to meet other HAVA requirements</td>
</tr>
</tbody>
</table>

In simplest terms, this allocates Help America Vote funds where the money is needed most: in Ohio counties. While it is the responsibility of the Ohio Secretary of State to monitor performance and ensure implementation of the Act, the execution of the Ohio plan, ultimately, will take place at the county level. On that basis, we believe it
prudent to maximize resources for election reform in the counties where election reform will occur.

While much of the focus is on the counties with punch card and lever-machine voting systems, in reality, all 88 Ohio counties will be expected to conduct some form of system modification and upgrade to make the system in Ohio uniform and compliant with the Act. Subsequently, the premise of the Ohio Plan is to look at the voter and election system statewide, based on the distribution of registered voters in each of the 88 counties.

Viewed in that context, the $116 million to be allocated to the counties will be distributed in the following priority order, as federal funds become available:

- Replacement of punch-card and lever-machine voting equipment to the extent that new voting systems would be installed immediately in the 71 affected counties;
- Installation of voting devices compliant with the disability requirements of the Act in all 88 counties;
- Bringing remaining counties into compliance with Section 301 of the Act by funding necessary upgrades and refinements of all other existing systems and equipment.

The Secretary of State reserves the right to distribute the funds to counties based on need and special circumstances.

The Secretary of State defines “need and special circumstances” to mean that it is possible some counties will need less funding and others more funding to meet the compliance standards of the Help America Vote Act. On that basis, the Secretary of State will shift funds as he deems necessary to bring all counties into compliance.

The Secretary of State acknowledges that one county, Mahoning County, took the initiative to convert their voting system to electronic voting after Jan. 1, 2001. Funding consideration will be given to all six Ohio counties using electronic voting equipment to bring those counties into compliance with HAVA.

We think this model provides us with great flexibility to allocate Title I and Title II funds in a way that assures full compliance with the requirements of the Act. Invariably some funds would be shifted away from counties that demonstrate a lesser need and reallocated to counties that demonstrate a greater need. But the allocation method is a fair method that will further assure all counties that adequate funds will be available to fully fund the requirements of the Act at the local level.

The Ohio Secretary of State will establish guidelines as part of the performance measurement for county compliance. When compliant systems are purchased for the counties, the Secretary of State will require transition to new voting systems by all punch-card and lever-machine counties by May 2, 2006. The Secretary of State will provide counties with a list of acceptable vendors to supply the new voting equipment and counties must choose from that approved list by no later than Sept. 1, 2003.

Since the Secretary of State will centralize and oversee this process, the Secretary will ensure compliance with all requirements of the Help America Vote Act. The performance timeline requires the Secretary to establish the list of approved vendors by
Aug. 1, 2003, providing county boards of elections with ample time to review the list, choose the vendor and establish transition to the new voting systems.

To ensure uniformity and compliance, the Secretary of State will stipulate design specifications for voting equipment. If a county fails to select a vendor by Sept. 1, 2003, the Secretary of State will designate a vendor for that county and order installation of new voting equipment in that jurisdiction.

Although the Act required the replacement of punch-cards and lever machines by the General Election in 2004, the Secretary of State wanted these new systems in place in Ohio for the Primary Election to ensure a smooth, seamless transition and full operational capability in time for the presidential election. Due to extenuating circumstances, a waiver was granted in December 2003 giving the Secretary of State until the Primary Election in 2006 to replace punch-card and lever machines.

On May 7, 2004, Governor Taft signed into law Substitute House Bill 262. The Act requires all direct recording electronic voting machines used in Ohio to include a voter verified paper audit trail and changes the process for counties to acquire voting systems using funds made available pursuant to the Help America Vote Act (HAVA) of 2002. As the result of this additional legislative requirement, the Secretary of State was forced to revisit the original decision to allow counties to select between Direct Recording Electronic (DRE) and Precinct Count Optical Scan (PCOS) voting systems. A logical analysis of the requirements of both HAVA and SHB262 showed that in order for the state of Ohio to be in compliance with both federal and state law, meeting both time, costs and certification constraints, the Secretary of State must purchase Precinct Count Optical Scan voting systems through existing contracts already approved by the Controlling Board to satisfy HAVA requirements. While this change limits the flexibility previously offered to the counties when selecting between voting systems, the use of Precinct Count Optical Scan voting systems introduces a new opportunity for counties in the form of improved operational processes. Furthermore, the Secretary of State will allow counties to re-select their vendor based upon the additional mandated requirements of Substitute House Bill 262. All counties must submit in writing to the Secretary of State their vendor selection by February 9, 2005.

The Secretary of State has already established a fund account for all federal monies designated for Ohio under the Act and those funds, as applicable, will be disbursed from that account as our plan is implemented. This account is segregated to reflect federal funds designated for county buy-outs, election administration and Requirements payments.

Reports will be generated to show the allocation and distribution of these funds and that report will be forwarded to the Election Assistance Commission along with a performance report to show the state’s progress and performance in implementing provisions of the Act.
IX. §301. Meeting the Voting System Standards of the Act

The Help America Vote Act requires “uniform and nondiscriminatory election technology” that meets specific voting system standards. Ohio has opted for a program that specifically addresses the requirements of the Act, but provides counties with some degree of flexibility in choice of vendor and how they implement and develop voting systems to meet the particular needs of their region.

Assurance that the state will meet voting system standards specified in the Act is the responsibility of the Secretary of State, so system specifications will be drafted by the Secretary and the list of available vendors will reflect only those companies that submit bids demonstrating their ability to meet the rigorous and unambiguous system specifications and timelines established by the Secretary.

To ensure compliance with the Act, the Secretary of State will appoint a committee comprised of knowledgeable persons in the Secretary’s office who have the technical capability to review vendor proposals for electronic voting equipment and tabulating devices and the committee will recommend final adoption of a list of approved vendors that meet system specifications. The committee will review standards set by the Standards Board and make recommendations to the Secretary based on tabulating systems meeting the standards set by the Federal Election Commission.

Additionally, the Secretary of State will ask the state’s Board of Voting Machine Examiners to review the recommendations of the committee to ensure the vendors and systems meet not only the requirements of the Act, but are reasonable based on their knowledge of Ohio counties and their voting needs. The Board of Voting Machine Examiners currently provide a valuable service to the Secretary of State in the certification of voting equipment to ensure the equipment meets established certification criteria set by the National Association of State Election Directors.

It is logical this group assist the Secretary in this important endeavor to modernize and reform Ohio’s voting systems.

Providing counties with the ability to choose among a list of qualified vendors preserves the involvement of the counties in the vendor process while maximizing the buying power of the state under a state term contract procedure. The Secretary of State will serve as the primary contractor for voting devices in the State of Ohio, embracing the concept that the ultimate beneficiaries of the contract are the counties.
Ultimately, the responsibility for ensuring compliance with the Help America Vote Act of 2002 falls to the chief elections official in the state. But the Secretary of State recognizes the execution of the Act will take place at the county level.

Each vendor chosen to participate in the selection process must demonstrate a capability to serve the whole of the state and, potentially, all 88 counties. Successful vendors must also certify their ability to provide the volume of equipment required to service the state, and demonstrate the organizational capacity to provide statewide support, training and service to county clients.

Eligible vendors must assure their equipment meets a high threshold of security, accuracy and ease of use. They must also ensure timely delivery of equipment to meet the deadlines established by the Secretary of State for full implementation and operation by Feb. 1, 2004. Finally, the financial viability of the vendor will be a consideration for the awarding of contracts.

The Secretary of State believes training and education are essential to the successful deployment of new voting machine equipment. The best technology available is rendered useless unless vendors can provide adequate training and education to ensure both election officials and voters know how to use the equipment efficiently and effortlessly.

To achieve the education and training objective, some states have earmarked a portion of available money specifically for that purpose. We will request vendors designate how much of their proposal specifically applies to training and education.

Absent a recitation of detailed technical requirements listed in the request for proposal that will be issued by the Secretary of State, the Secretary insists successful bidders must provide a system that, at minimum, accomplishes the following:

General Requirements

- Guarantees voters will be able to verify their ballot before it is cast and counted. This means the system must include features that allow voters to vote, review their ballot choices and decisions, and correct errors or omissions before submitting their vote for final tabulation.

- As part of the review and correction process, if a voter selects more than the permissible number of candidates for a single office, the system will alert the voter of the selection and its impact, or prevent over-voting. Additionally, the system must give the voter an opportunity to correct the ballot before it is processed and counted.

- In addition to providing equipment, hardware and applicable software to accomplish these features, vendors will be required to include, as a supplement to the system, information materials clearly explaining the operations and functions of the voting equipment, the effect of casting multiple votes for one office, and corrective procedures and processes available to voters. The system also must alert voters when they have failed to vote for a candidate or issue. We envision a simple pamphlet or brochure that
will be available to every voter written in clear language with amplifying graphics.

- The system must ensure the privacy of the voter and confidentiality of the ballot.

Audit Capacity

- While the system allows the vote to be counted and tabulated electronically, the system also must be capable of producing a permanent paper record that can be audited manually. The paper record must be produced in such a way as to function as an official record for any potential recount or any question that might arise subsequent to the election.

This issue was addressed by several witnesses and State Plan Committee members during our public hearings. Almost everyone agrees that to ensure public confidence in any voting system, there must be a paper trail that will provide election officials, the public and media with a permanent, retrievable and readily accessible record and history of the election and provide a traceable mechanism to accommodate questions, election-related issues and recounts.

Ms. Rosenfield of the League of Women Voters told the State Plan Committee that an audit capacity in the form of a paper record was critical to reassure the public and the media that an open and fair election was conducted. We agree and this component is essential to any system configuration advanced by all prospective vendors.

Disability Access

- The system must be accessible for individuals with disabilities, including non-visual accessibility for people who are blind or who have visual impairments, ensuring the same standards for privacy and confidentiality afforded to people without disabilities. This means the voting system for people with disabilities must allow them to vote unassisted. At least one voting device must be available at each polling location that includes, at minimum, audio features. Additional features could include keypad functions and enlarged font size. The system must also include features that accommodate people who have limited mobility. That means the device must be of a sufficient weight and size to be transported within the environs of the voting location in those facilities that may not be readily accessible and sufficiently adjustable to match voters’ eye levels.

During the hearings, we heard from several witnesses with first-hand knowledge of disabilities who underscored for us the importance of not only focusing on voting devices, but the accessibility of polling places. Technology, we were told, does not remedy polling locations that are difficult for people with disabilities to navigate or facilities that lack adequate amenities, such as accessible restrooms.
Karla M. Lortz of Delaware, Ohio, reminded us that voting is a basic American right that should not be restricted or diminished because of a disability. She also emphasized the need to train and educate poll workers about persons with disabilities.

But all of those with disabilities who testified stressed the need to be vigilant about the selection of poll and voter sites to ensure they are barrier free and accessible.

Ohio law requires that a polling place is considered accessible if it is free of barriers that would impede ingress and egress of people with disabilities. The law requires the entrance to be level or feature a nonskid ramp of not more than 8 percent gradient. Doors must be a minimum of 32-inches wide (R.C. 3501.29.)

The Secretary of State will require that all election sites and facilities be reviewed for access to ensure these voting locations meet and, if possible, exceed these minimum standards. At the recommendation of committee member Eric Duffy, the Secretary also will convene a committee to study this issue and to make recommendations about how the state can best address the needs of voters with disabilities.

**Alternative Language Accessibility**

- Where applicable and in those precincts where substantial non-English speaking populations exist, voting systems must provide alternative language accessibility pursuant to the requirements of the Voting Rights Act of 1965. This alternative-language accommodation shall be available in any precinct where it is determined that 5 percent or more of the registered voters in any precinct might be non-English speaking voters. Each county board of elections is required, 30 days prior to any election, to assure that alternative language mechanisms are available, as mandated by law.

Based on the current composition of the state’s population, there is no concentration of non-English speaking populations that warrant specific activities in this regard. However, as the composition of the state’s population changes, counties will be required to address this issue as the need arises.

**Error Rates**

- All voting systems in the state must achieve an error rate threshold that complies with error-rate standards established by the Federal Elections Commission (FEC) which are in effect 30 days prior to any election. The Secretary of State will take steps and facilitate measures to require performance of logic and accuracy tests by counties before elections and will require counties to have all system tabulating equipment and programs tested to ensure the correctness of the vote count cast within the error parameters established by the FEC.

**Additional Considerations**
Although we explore this later in our discussion of voter education, we offer two additional vendor considerations for our system specifications. The Secretary of State invites vendors to consider, as part of their proposal, a model or “practice” voting device that simulates the actual voting machine at the polling place. We believe this feature would provide voters with an opportunity to become more familiar with the voting equipment before actually casting their vote.

These so-called simulators, we believe, would provide some voters with a greater comfort level at the polling place if they are provided an opportunity to “practice” on a simulated voting device.

In addition, the Secretary of State will ask vendors to make available software that will enable voters to access such simulators on the Secretary’s website via the internet. This feature would enable voters, at their leisure, prior to Election Day, to learn more about the equipment they will use at the voting place and practice using the equipment and devices on the internet.

While we regard this to be part of our proposed voter education program, we think these innovations would help voters better understand the new technology, ease their apprehension about the use of new voting technology, and speed the voting process at the polling place.

We think these elements would minimize much of the confusion that invariably will accompany the conversion of voting systems in the majority of Ohio counties. As more and more Ohioans enjoy expanded access to the internet and world wide web, cyberspace would seem to be a logical environment to offer these features as an enhancement to Ohio’s voter education program.

**Uniform Definition of Vote**

Ohio law grants broad authority to the Ohio Secretary of State with regard to election rules and regulations. H.B. 5 passed by the Ohio Legislature in the 124th General Assembly gives the Secretary authority to issue directives and these directives have the same weight as law when applied to election-related matters and issues.

We note this authority in the Secretary’s ability to establish a uniform definition of a vote. Currently, Ohio law addresses the definition of a vote for punch-card ballots. Similar legislation was considered for “optical scan” voting devices, but with passage of H.B. 5, the Secretary of State embraced a definition of vote for optical scanning equipment as part of his directives authority.

As is evident, the Secretary of State has the power and authority, via directive, to adjust, modify, revise and refine a uniform definition to meet the state’s needs based on the voting systems adopted in the state. However, the Secretary will consult guidelines.
established by the Federal Election Commission, the Voting Rights Act and all other federal authority in establishing a uniform definition of a vote in Ohio.

We include with the plan, as an attachment, the language that gives the Secretary of State this authority.

X. Voter Education, Election Official and Poll Worker Training

Achieving the mechanical and technological change of the Help America Vote Act of 2002 is only part of the challenge of enacting true modernization and reform of Ohio’s voting system. While devices will enhance the efficiency of Ohio’s voting and election process, voter education and training of election officials and poll workers is critical to full implementation of the reforms to the benefit of Ohio voters.

Earlier in this report, we alluded to research currently being conducted by the Secretary of State’s office to improve poll worker recruitment, training, education and retention. That effort addresses the reality that many of our current poll workers are from a generation that places a premium on voting, elections and the democratic process. Many of our poll workers are senior citizens who very much value freedom and free election processes as a result of their experiences in growing up in the World War II and Korea era.

To these marvelous citizens, voting isn’t just a right it’s an obligation and a precious American birthright that has been paid for with the blood, sweat and tears of those who sacrificed their lives on foreign soil. As these citizen patriots retire from the poll worker ranks in Ohio’s election system, we are looking to the future to determine how best we can recruit the next generation of poll workers who will embrace this important Election Day service with the same degree of commitment, enthusiasm and competence of our older poll workers.

We are mindful of an exciting objective of the Help America Vote Act: to engage high school and college students in the process. Several State Plan Committee members noted the desire to better engage young Ohioans in the election process as both a means to recruit bright, knowledgeable students as poll workers and as an opportunity to make more young people stakeholders in the process.

We are mindful of an exciting objective of the Help America Vote Act: to engage high school and college students in the process. Several State Plan Committee members noted the desire to better engage young Ohioans in the election process as both a means to recruit bright, knowledgeable students as poll workers and as an opportunity to make more young people stakeholders in the process. Our research is exploring that challenge and opportunity to pass the torch to the next generation. But the research is also looking at other creative options to ensure Ohio has a ready, able and competent corps of poll workers.

Obviously, these poll workers must be adequately trained to render assistance to voters in a competent and knowledgeable way, not only in terms of helping them
understand and use the new technology that accompanies election reform, but also by applying the laws and addressing the myriad of Election Day issues that invariably arise.

Provisional voting, for example, was a challenge for many of our poll workers during past election cycles as Ohio aggressively implemented new procedures to accommodate provisional voters. Our poll workers have successfully navigated provisional voting and have successfully met the needs of provisional voters.

But to adequately train poll workers, we must first train election officials. The Secretary of State will meet that challenge with a number of programs and initiatives. New training seminars will precede each election in Ohio where election directors and their staff will be given an opportunity to learn about new procedures and changes.

The Secretary of State also will enhance its electronic communication with election officials by providing updates and advisories about changes in state and federal election law. Our goal is to provide this information as soon as we have the information in hand.

Additionally, the Secretary of State will conduct an inventory of current training materials and produce new information and guidelines in both written and video formats. The Secretary also has asked his staff to provide election directors with new materials that can supplement the training of poll workers.

To ensure seamless transition to new voting systems, we are asking system vendors to partner with us in the production of clear, graphically-driven pamphlets and brochures that tell voters how the voting devices work. Earlier we mentioned the use of simulators and internet-based simulation of new voting devices to provide voters with an opportunity to try out the new technology even before they enter the voting booth to cast their official ballot.

We think these enhancements and initiatives will advance our implementation of the Help America Vote Act in Ohio and pave the way for a smooth transition to new voting devices and election processes. Some of our preparation for new election processes in Ohio includes some structural changes. We are asking each county board of elections, for example, to designate a training coordinator who will communicate directly with an election training coordinator in the Secretary of State's office.

It is our aim for these coordinators to meet frequently throughout the year, exchange information and help us think about ways to improve the election system in Ohio.

After the election, we will gather from all 88 counties a report from these coordinators detailing issues, questions and problems they encountered and how they addressed the situation. From these reports, the Secretary of State will use that data and information to respond to election issues and disseminate that information to election directors so they can make refinements at the local level in subsequent elections.

But to glean a voters-eye view of the process and how we can improve the election system, we will distribute to a selected sample of voters in every county a short survey device that will track their voting experience and give them an opportunity to provide us with feedback on how we can improve the process. The survey will be distributed to a pre-determined number sample of voters throughout the state as they exit the voting booth.
We think this innovation is important to better understand voter needs and to view our election process through the eyes of the “consumer.” Information we collect from both coordinators and the sample voters will guide us in developing relevant and meaningful training materials for both election officials and poll workers in future elections.

The Secretary of State also will develop a new “get-out-the-vote” program in Ohio that will encourage more voters to participate in the election process. While such programs currently exist in the Secretary of State’s office, personnel will be dedicated to conducting research and learning more about voter behavior in Ohio.

In early 2004, the Secretary of State launched “Your Vote Counts,” a comprehensive voter education program aimed at better preparing voters for the November 2, 2004 election. The goal was to provide all Ohio voters with the information they need to vote so that we can reduce the opportunity for difficulties on Election Day. This effort entails ensuring every voter gets the same consideration.

The program’s Web site, www.YourVoteCountsOhio.org, features educational materials and instructional videos showing how to vote using punch card, optical scan and DRE (electronic) voting machines. Also included in the program printed material and public service messages for television and radio.

In addition, the Secretary of State has made a special effort to reach out to students with his “Xpect More” campaign. The “Xpect More” advertising campaign is aimed at inviting young voters between the age of 18 and 24 into the democratic process. To date, more than 623,000 “Xpect More” brochures have been distributed to students through schools and across Ohio.

In many states, the appeal is often directed at those who are registered to vote, were registered to vote or who have voted in the past. The Secretary of State would like to target potential new first-time voters by coordinating voter recruitment with civics and government teachers in high schools throughout Ohio where there is a captive audience of potential new voters. Additionally, the Secretary would like to initiate research that targets Ohioans who have never voted to learn more about their decision not to participate in the election process and to determine if there are programs and initiatives that can be implemented to address their concerns and entice them to the polls.

Understanding more about voter behavior and non-voter behavior, we believe, is a proactive step we must take to fully embrace the spirit, intent, principles and objectives of the Help America Vote Act.

The proposed budget for these activities is $2.5 million earmarked for voter education, and $5 million set aside for election official and poll-worker training. We propose making election official and poll-worker training funds available as state grants to the counties to supplement local activities and initiatives of the county boards of elections.

As counties deliberate equipment and voting systems, we will encourage them to consider appropriation of available residual funds to voter education and poll worker training.
training. In crafting local budgets to achieve the objectives of the Help America Vote Act, we believe counties must give consideration to these initiatives to supplement state efforts for education and training.

In order to qualify for these funds, counties must submit to the Secretary of State a detailed plan that identifies proposed programs and initiatives and how the funds would be used. After each General Election, counties would be required to report on the deployment of these programs and their assessment of the value of the education and training.

XI. §302. Provisional Voting and Voting Information

The critical role of provisional voting in election reform was underscored by a college newspaper in Ohio several years ago that reported only 5.4 percent of registered students at Ohio University actually voted during one election cycle in the late 1990s. Provisional voting makes it possible for many more of those students to engage and participate in the elections process. Provisional voting is a way to ensure every eligible voter who shows up at the polls on Election Day can cast a ballot.

For purposes of our State Plan, suffice that Ohio and the Secretary of State, as a matter of public policy, embraces the concept that every effort should be made at every board of elections in the state to accommodate every voter who, for whatever reason, does not appear on the certified list of registered voters in any jurisdiction of the state.

Ohio's system of provisional voting has been successful and voters who otherwise might have been denied a ballot were given an opportunity in recent elections to cast a provisional ballot, and for local boards of elections to determine if those ballots were valid. We have guidelines and procedures in place to address provisional voting in Ohio and we will continue to refine and expand the scope of provisional voting in the state to comply with the spirit, intent and letter of the law in the Help America Vote Act.

The Act requires provisional voting as a condition for receiving federal funding for election reform and Ohio is poised to meet all such requirements. We anticipate the

3 The (Ohio University) Post, Voters still have time, Oct. 11, 2001.
Federal Election Commission will continue to explore this issue and we will make adjustments to provisional voting regulations in the state as those guidelines and adjustments are released.

The Secretary of State also will review, prior to each election, procedures for the handling and processing of provisional votes to ensure full compliance with state and federal guidelines. To provide fullest utilization of the provisional voting mechanism, every local board of elections will be required to adopt provisional voting policies that are weighted more toward inclusion in the voting process than challenges and exclusion in the ballot process.

For purposes of our State Plan, suffice that Ohio and the Secretary of State, as a matter of public policy, embraces the concept that every effort should be made at every board of elections in the state to accommodate every voter who, for whatever reason, does not appear on the certified list of registered voters in any jurisdiction of the state. Provisional voting is a valuable fail-safe mechanism that is an essential component of election reform in Ohio.

Further, we believe those who cast a provisional ballot should have access to mechanisms and procedures that tell them whether their ballot was counted. Toward that end, our budget presumes establishment of a toll-free hotline that will enable provisional voters, after the election, to learn whether their ballot was counted and to receive an explanation about why it wasn’t counted if, indeed, a determination was made that it was not a valid vote. We have allocated $250,000 in our State Plan budget to create and maintain such a hotline and encourage local boards to prominently display information by whatever means to advise provisional voters of this follow-up option.

Additionally, information will be available at every precinct and voting location to explain provisional voting procedures and who may cast a provisional vote. Such information should also be readily available on the Secretary of State’s website and all county election board websites, where such sites exist.

As part of the National Voter Registration Act, Ohio has endeavored to forge a partnership with other state public agencies in voter registration and it is logical to extend an invitation to these agencies to also educate, advise and alert prospective voters about their provisional voting options in these venues.

Ohio also would expect to partner with the state’s media in making voters aware of the provisional option. We contemplate deployment of a series of public service commercials on local television stations in the days preceding elections advising voters of their options for casting a provisional vote. We think a compelling argument can be made to broadcast outlets around the state that full citizen participation in the election process is public service of the highest order.

XII. §303. Statewide Voter Registration and Registration by Mail

Maintaining a viable voter registration list is an essential ingredient in conducting fair and participatory voting processes. Centralizing registration in a single statewide database is a sensible change that ensures uniformity, consistency and reliability. To
accomplish this task, the Secretary of State will seek one vendor to develop a registration system that must meet the needs of voters and elections officials alike.

The system must be sufficiently functional that all eligible voters can register to vote with ease and simplicity. The system must accommodate both written (mail-in registration and in-person registration) and electronic means for voters to initiate the registration process. Registration sites, locations and opportunities must be varied and plentiful.

It is not sufficient that voters would be required to register only at boards of elections or obtain registration materials only at governmental venues. The successful vendor must anticipate a variety of locations and opportunities for citizens to register in both public and private settings. The system must contemplate a solution for converting current voter registration data now housed in local boards of elections and transferring that data to the centralized database in the Secretary of State's office.

The statewide voter registration system must meet technical demands that will readily allow local boards of elections to seamlessly and effortlessly interface with the state database in a way that assures instant access to all qualified registered voters in their jurisdiction and the state. The system must include sufficient data that provides local election officials with the means to segregate voters by political and geographic boundaries to the extent these officials can create and develop voter lists by precinct and voting location.

The system must include features that permit local elections officials to track the voting history of registered voters, identify those no longer legally registered, and readily accommodate change of address or voting status.

And, finally, the system must anticipate that these records are public records and must be maintained in a way that conforms to state public records law and all other applicable state and federal laws that pertain to voter registration currently in effect.

Our budget presumes a $5 million to $10 million allocation for creation and development of a statewide voter registration system.

Closely akin to the registration issue are voter identification requirements. It was the consensus of both witnesses who testified before the State Plan Committee and the committee itself that the Secretary of State should establish policies that expand rather than restrict the types of instruments used by voters as a means of identification. We believe this is in keeping with the spirit and intent of the Help America Vote Act.

As no voter should be denied an opportunity to cast a provisional ballot in those circumstances where their name might not appear on the voter rolls, neither should a voter be denied an opportunity to vote because of arbitrary and restrictive identification requirements. While it is logical the Secretary of State should work in coordination with agencies such as the Ohio Bureau of Motor Vehicles to validate the identity of new
voters, such identification requirements must, by definition, extend beyond identification devices such as a valid state drivers' license.

As several Ohioans with disabilities testified, many people with disabilities do not have a drivers' license. It is the intention of the Secretary of State to extend identification requirements to include any reasonable means of identification such as utility bills, rent receipts or any legal or quasi-legal instrument that bears the name and address of the prospective voter.

The policy of the Secretary of State is that voter challenges on the basis of identification should be judged on a liberal construction of voter ID rather than a restrictive construction that would deny the voter an opportunity to cast a ballot.

Based on testimony provided by Mr. Perry of the Columbus Urban League, the Secretary of State also would like to more closely examine the issue of restoring voter rights to persons released from incarceration in the state's Department of Rehabilitation and Corrections. There is a widespread perception that these persons, as a result of felony convictions, have forever forfeited their right to participate in the election process. Such is not the case.

Persons who have had their voting rights taken away because of a felony conviction are subject to re-enfranchisement as legal voters to restore their right to vote. As these persons have presumably paid their debt to society as a result of their incarceration, full integration back into society as fully functioning citizens should also presume their eventual re-engagement and participation in the election process.

For these persons, identification also is an issue because drivers' licenses might have expired during their period of incarceration. At minimum, the Secretary of State pledges to educate election officials and poll workers about the rights and processes available to these individuals.

XIII. §402. Administrative Complaint Procedures and Grievances

To fully facilitate implementation of the Help America Vote Act of 2002, Ohio will establish an administrative complaint procedure to address allegations by any citizen who believes their voting rights have been violated under Title III of the Act.

The complaint and grievance procedures developed by the Secretary of State are constructed toward development of a non-adversarial complaint process where the desired outcome is a solution or remedy of the problem, rather than a highly evidentiary process.

The process adopted by the Secretary of State includes an alternative dispute resolution component that invites parties to seek equitable resolution in that venue as well as through a formal hearing process. When a valid complaint or grievance is filed as part
of this process, it is ultimately the state, and more specifically the Secretary of State, that must provide the appropriate remedy.

We attach, as an addendum to this report, the full text of the proposed procedure. Following, in summary, are the relevant elements of the complaint procedure:

- Any Ohio citizen who believes there is a violation of any provision of Title III of the Help America Vote Act may file a complaint.

- All complaints must be in writing, signed, notarized and be sworn under oath.

- The complainant must be identified by name and mailing address, and the complaint must include a description of the violation alleged to have occurred.

- The complaint must be filed with the Secretary of State along with proof of delivery of a copy of the complaint to each respondent.

- In addition to failure to include any of the foregoing, the Secretary of State may reject the complaint if more than 90 days have lapsed since the final certification of the federal election at issue.

- The Secretary of State must establish procedures and schedules addressing when the complaint will be heard and considered.

- The Secretary of State or designated hearing officer must compile and maintain an official record of any proceeding and include submissions and evidence provided.

- Complaints must be heard and determined by the Secretary of State or designated hearing officer, who is required to prepare a report expressing an opinion about whether a violation did occur within 20 days of the filing of such a complaint.

- Any hearings conducted pursuant to the filing of a complaint must be tape recorded.

- Dates, times and locations of hearings must be established and all parties must be given at least five days notice of such hearings.

- All relevant parties, including the complainant and all respondents may appear at the hearing, testify and present evidence. There is no requirement that any complainant, respondent or any other party to the proceeding be represented by an attorney.
• The Secretary of State or a designated hearing officer is required to prepare a transcript of the tape recorded hearing and that transcript is a public record under Ohio’s public records law.

• A final decision must be rendered within 60 days after the complaint is filed.

• If a violation is determined to have occurred, a determination must be issued specifying the appropriate remedy. If a violation is deemed not to have occurred, the complaint must be dismissed.

• The remedy may not include any award of monetary damages, costs or attorney fees, and may not include the invalidation of any election or a determination of the validity of any ballot or vote.

• The decision under this process is final and is not subject to judicial review.

• The complaint and grievance procedure does not preclude any other legal action provided by law.

**XIV. Ongoing Performance Measurement**

As Ohio anticipates successful implementation of reforms and modernization of its election systems and processes to accomplish its objectives under the Help America Vote Act of 2002, we believe performance measurement is an essential and ongoing requirement to ensure a fair and inclusive election system.

Each year, boards of elections throughout Ohio prepare annual budgets anticipating costs and expenses for conducting elections. We recommend that while each board is preparing their budgets that they also take time to review the improvements they have made in their election operations during the past year and report their progress in meeting election reform objectives under the Help America Vote Act.

The Secretary of State will compile these annual reports and submit a summary of initiatives, improvements and progress to the Election Assistance Commission. We think this is a way for all election officials in Ohio to remain vigilant of our obligation to continue measuring our performance in making the election process fair and accessible to all Ohioans.
As stated earlier in this report, we view this opportunity to reform Ohio’s election system not as an end process, but as the beginning of a renewed effort to fully engage our citizens in their most vital civic responsibility in a democratic process. Election reform, after all, is a futile exercise unless citizens view themselves as stakeholders in their local community, their state and the nation.

Our guiding principle in developing this state plan is that voters should willingly and enthusiastically participate in the electoral process, free of obstacles that might inhibit them from participating. To accomplish that, we, as election officials, are obligated to provide them with the best and most modern tools available so they can exercise their right to vote with assurance that every vote and every voter counts and will be counted on Election Day.

No legal voter should be taken for granted and no legal vote should be discounted or, worse, not counted. Every vote cast, every ballot submitted must be treated as if our very system of government and our way of life depends on it, simply because it does. No greater is the obligation of every eligible voter to be an active, knowledgeable and willing participant in the election process, and no greater responsibility as election officials do we have than to ensure those voices are heard and those votes are counted.

XV. Requirements Payments: Maintenance of Effort

As a condition for receiving Requirements payments under the Help America Vote Act, states must maintain expenditures for funded activities “at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November, 2000.”

Attached to the State Plan are budget materials that document state spending on election and election administration through the Secretary of State’s office for Fiscal Year 2000 (July 1, 1999 – June 30, 2000.)

The total amount of $2,739,159.04 million does not include reimbursements to county boards of elections for advertising costs related to state issue ballot advertising. The total budget request of the Secretary of State’s office for FY 2004 and FY 2005 are sufficient to fund continued investment in elections at this annual level.

Additionally, the Secretary of State shall include a HAVA-compliance and funding report as part of future biennial budget requests of the Ohio Legislature to certify HAVA-compliant funding and continue Ohio’s maintenance of effort.

XVI. Estimated Timelines for Implementation of the State Plan

Following are key dates and the proposed timetable for implementation of our State Plan:

- **March 18, 2003:** State Plan Advisory Committee named, public input process defined.
- **April 3-4, 2003:** State Plan Advisory Committee conducts public hearings.
• April 9, 2003: RFP released for statewide voter registration system.
• April 17, 2003: State Plan Advisory Committee reconvenes to review draft State Plan.
• May 7, 2003: Competitive bids due for voter registration system.
• May 13, 2003: State Plan finalized and published for 30-day review.
• May 16, 2003: RFP released for voting system vendors.
• June 2, 2003: Secretary of State awards bids for voter registration system.
• Aug. 1, 2003: Secretary of State awards bids for election systems. County boards of elections notified of eligible system vendors.
• Sept. 2, 2003: County boards of elections must notify Secretary of State which vendor they have chosen for election system improvements.
• November 21, 2003: Direct Recording Electronic (DRE) Technical Security Assessment Report prepared by Compuware submitted to Secretary of State.
• Dec. 1, 2003: Statewide voter registration system installed and fully operational.
• Dec. 19, 2003: Requested a waiver from the Federal Government on deployment of the computerized voter registration system.
• March 2, 2004: Primary Election. (Ohio General Assembly considering change of Primary to May, 2004.)
• April 29, 2004: Clinton County first to establish Centralized Voter Registration File processes between the county and the Secretary of State.
• May 7, 2004: Substitute House Bill 262 enacted.
• August 18, 2004: Diebold Direct Recording Electronic (DRE) Technical Security Re-Assessment Report prepared by Compuware submitted to Secretary of State.
• Nov. 2, 2004: General Election
• November 17, 2004: VVPAT requirements distributed for comments.
• January 3, 2005: VVPAT rules filed with JCARR.
• January 1, 2006: Centralized Statewide Voter Registration File fully implemented.
• May 2, 2006: Replacement of punch-card and lever machine complete.

XVII. Plan Submission Presumes Full Federal Funding

Submission of this plan presumes full and timely federal funding. In order for Ohio to meet the ambitious schedule outlined in this State Plan, it is imperative that federal monies be made available to the state on a schedule that is consistent with implementation of the base components of the plan.

Ohio reserves the right to seek waivers stipulated in the Help America Vote Act that allow us to delay implementation of this plan if federal funding is not forthcoming in a timely manner that will enable us to accomplish the objectives outlined in this report to the Election Assistance Commission.
Proceeding without a guarantee of federal funds would create a financial burden for the State of Ohio and its 88 county jurisdictions. While Ohio is anxious to meet and exceed the standards of the Help America Vote Act, implementation is not possible without the federal guarantees that accompany the Act.

The preponderance of unacceptable voting devices in the state underscore the necessity for reform, but it shows the very real and special challenges Ohio faces in fully complying with the Act and the funding that will be required to reconstruct and reconfigure the voting and election systems in the state.

Our pledge is to implement reforms, as outlined in this State Plan, as federal funds become available.

XVIII. The State Plan Committee: HAVA and Beyond

We reserve this section of the report to capture the comments and thoughts of our State Plan Committee. While many of the committee's recommendations and much of their input is reflected in preceding sections of the report, it was clear this panel of distinguished Ohioans went beyond merely thinking about minimum requirements of the Help America Vote Act and insisted on expanding their mission to address issues that will produce broad and meaningful election reform in our state.

That kind of visionary thinking is precisely what the Secretary of State had in mind when he impaneled the State Plan Committee.

If there was a universal theme that resonated from the committee's deliberations, it was consensus that Ohio must aggressively engage the next generation of voters and make young people in our state understand their role as stakeholders in the democratic process. It is insufficient, the panel said, to merely invite high school and college students into the election process. Ohio, the State Plan Committee said, must be proactive in educating young people about the election process and instill a deeper commitment to engendering student participation in the election process.

Linda Carr, Daisy Duncan Foster and Pastor Aaron Wheeler were particularly passionate in their remarks about this issue and said Ohio should be creative in developing new programs and initiatives to bring young voters into the process. The Committee urged the Secretary of State to aggressively seek available funds under Title V and Title VI funding of the Help America Vote Act to accomplish this critical task.

Additionally, some committee members recommended working with the Ohio Department of Education and the Ohio Board of Regents to explore ways to better educate and encourage political participation by high school and college students. Pastor Wheeler suggested
Ohio public schools should ponder curriculum requirements that focus exclusively on voting and election processes.

State Rep. Nancy Hollister noted that this report should underscore for Ohioans that implementation of the Help America Vote Act in Ohio signals a "change in the governance of the election system" in the state. HAVA, she said, places more responsibility on the Secretary of State to assure a fair, equitable and inclusive election process in Ohio. "We need to acknowledge that," she said.

But Rep. Hollister and other committee members said that shift in governance does not minimize the necessary independence, ongoing role or responsibility of counties to execute election policies within the new governing framework created by the Help America Vote Act.

Committee member Jeff Matthews said county boards of elections must be independent to effectively achieve the objectives of the Help America Vote Act, and Ms. Duncan Foster said boards of elections must feel "some ownership of the process." In that context, it was the consensus of the State Plan Committee that full compliance with the Help America Vote Act requires critical coordination and a strong working relationship between the Secretary of State's office and local boards of elections.

Election officials Guy Reece and Tom Coyne, along with Mr. Matthews, agreed that innovation doesn't end with the Help America Vote Act. They said Ohio must constantly be looking for new methods, new procedures and new ideas to keep the election process viable and invite more Ohioans to exercise their right to vote.

Ms. Turcer also recommended the Secretary of State ensure that the RFP for new voting equipment carefully consider the necessity for strong auditing capability that would provide a spot-check feature for pre-testing. Ms. Turcer and Donna Alvarado said alternative language capability also should be included in the RFP in anticipation of changing future demographics in the state.

Ms. Alvarado noted the projected growth of Hispanic populations both nationally and in the State of Ohio. Several committee members agreed that rather than addressing this issue later and incurring cost for conforming equipment, the RFP should anticipate the language requirement and it should be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.
be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.

She said language requirements also need to be considered in education products produced by vendors and election officials in how to use the new voting equipment, as well as in training of poll workers and election officials. She said alternative language issues need to be considered in creation and execution of the grievance process and procedures.

She suggested the Secretary of State consider alternative language policies that exceed the 5 percent threshold.

While preceding sections of the report address monitoring procedures for implementation of the Help America Vote Act in Ohio, Ms. Alvarado said compliance monitoring should be “futuristic” and focus on outcomes. While measuring accomplishments, she said the state and local jurisdictions also should be forward looking and report, for example, where the state expects to be in the next five years and beyond.

She said monitoring and compliance should address issues such as where Ohio wants to be as a state, how we achieve those objectives, who is responsible for implementing these plans, what the funding sources will be for implementation and what will be different when changes, modifications or new procedures are implemented in the election process.

Rep. Hollister agreed there needs to be periodic evaluation of Ohio’s progress in meeting voting and election reforms. She suggested a need to pause from time to time to reflect on what has been accomplished, what future reforms need to be considered, and what revenues are available to achieve those objectives.

A primary focus in the deliberation of the State Plan Committee was how Ohio could best address disability issues related to implementation of the Help America Vote Act. Eric Duffy said the issue of physical barriers is a real and pressing issue that calls for creative solutions in Ohio. He emphasized that Ohio must consider not only what takes place inside the voting place, but what physical barriers exist that hinder access outside the building.

Pastor Wheeler, chairman of the Ohio Civil Rights Commission, offered the assistance of that agency in working with the Secretary of State in exploring solutions to that issue.

As expected, much of the panel’s deliberation was focused on funding and whether the federal allocation to Ohio was adequate to effect the wholesale change in voting systems in the state. A key voice in that discussion was Larry Long, executive director of the County Commissioners Association of Ohio.
Mr. Long noted that there is concern among county commissioners about whether the federal funding anticipated for implementation of the Help America Vote Act is sufficient to purchase the voting equipment needed to make Ohio HAVA compliant. But a comparable concern, he said, is consideration of future maintenance and replacement costs, as well as related cost issues such as storage requirements for the new equipment.

He acknowledged that there might be offsetting costs and efficiencies that could be realized from conversion to electronic voting systems, but he stressed the necessity for full funding of the plan and timely allocation of federal payments to the state to avoid financial burdens on counties already adversely affected by the economy and cuts imposed by the State Legislature.

Rep. Hollister also discussed the funding issue, suggesting the state, at some future date, might consider bonding options to assist in paying for ongoing costs associated with implementation of the Act, as well as making funds available for voter education, system upgrades and youth participation in the election process.

Further, she said that although there appears to be no immediate need for sweeping changes in state election laws, the state should constantly evaluate that need and enact legislative change as required.

Mr. Coyne emphasized the need for the Secretary of State and local boards of elections to fashion voter system reforms in a way that keeps the process from becoming “vendor-driven.” He said county boards need time to assess and evaluate the unique demands in each jurisdiction and recommended the Secretary of State consider meeting the disability requirements of HAVA in time for the 2004 election, but proceed more deliberately on installation of new voting equipment.

In May 2004, Substitute House Bill 262 was enacted into law by Governor Taft which requires all direct recording electronic voting machines used in the State of Ohio to include a voter verified paper audit trail (VVPAT). Substitute House Bill 262 mandates the Secretary of State shall establish by rule standards for the certification of the VVPAT. In addition, the bill created a county electronic voting machine maintenance fund.

XIX. Summary of the State Plan

Section 254 of the Help America Vote Act of 2002 lists the required components of the State Plan and this document fulfills those requirements.

This report demonstrates that Ohio, because of its widespread use of punch-card voting, is perhaps challenged more than other states to reform its election methods and modernize its voting systems. The size of the state, ranking seventh among the 50 states in total population, and the mix of rural and urban population makes the transition even more challenging.

Recognizing the enormity of the task confronting Ohio, some members of the State Plan Committee and witnesses who testified before the committee counseled the Secretary of State to invoke waivers that would allow the state to delay its full implementation of the plan until the 2006 election cycle.
The Secretary of State, however, believes Ohio cannot afford to delay its implementation of the plan because every election cycle that passes is another election where voters are potentially disenfranchised and Ohio votes are lost or miscounted. Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

As election officials, if we know voters are disenfranchised and that legitimately cast ballots are being discounted, we have not only a moral obligation to immediately embrace a solution, but a legal obligation to find a remedy and enact measures to prevent that from happening. If even one voter is denied the right to vote, we are obligated, by law, to determine the cause and forge a solution. The evidence is overwhelming that thousands of Ohio voters have been disenfranchised by antiquated voting equipment and that many thousands more have lost confidence in the reliability and accuracy of voting devices currently in use in most of Ohio’s 88 counties.

The Secretary of State has confidence in the election professionals who conduct and administer elections in the State of Ohio, and believes Ohio has the capability to enact reforms that have already taken place in other states.

We are emboldened in our decision to press forward with implementation of this plan based on the experience of Knox and Lake counties in executing successful elections after implementing new systems only weeks before the General Election. The Knox County Board of Elections, which has only four employees, received delivery of new electronic voting devices in October, 1996, a presidential election year, and deployed them in the November General Election.

Lake County issued a request for proposal in April 1999, awarded bids in July of that year, took delivery of a new voting system the following September, and conducted a successful election weeks later in the November General Election.

Under the timetable established in this plan, new voting systems would be installed and operational in time for the Primary Election in 2004, providing local boards of elections with an opportunity to test the new systems before fully engaging them in the 2004 presidential election cycle.

However, we refer to the preceding section of this plan. Full implementation of this plan presumes full funding by the federal government. If the Secretary of State determines that federal funding for implementation of this plan is not forthcoming from the federal government in a timely manner, we will notify the Elections Assistance Commission of our intent to revise this plan and adjust the timetable for implementation.

Since the Federal Government has not appropriated the remaining funding for HAVA, it was necessary for the Secretary of State to modify our state plan and adjust the timetable for implementation. Initially, we had set an aggressive and ambitious full implementation for November 2004. Unfortunately, due to the delays in receiving funding and the establishment of the Elections Assistance Commission, we project full implementation of all HAVA requirements by May 2006.

Boards of Elections should be assured that the Secretary of State will focus all of its available personnel and resources to assist counties in enacting these reforms and meeting the requirements of the Help America Vote Act.
Boards should also be assured the Secretary of State will work with county officials and elections administrators to ensure available resources are distributed as quickly as possible and that cost containment efforts will be undertaken to minimize implementation costs to counties. Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state’s punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

We include in this definition of electronic voting devices the option for some counties to choose optical scanning devices that are HAVA compliant. In counties which have invested in this equipment and prefer these optional voting devices, the Secretary of State will consider deployment of this equipment as acceptable if certain modifications are made to ensure compliance with statewide voting standards. These counties, however, would be required to feature at voting locations electronic voting equipment that accommodates the needs of people with disabilities.

We presume the transition to electronic voting equipment will, at minimum, reduce printing costs in most counties. We believe there are further savings and efficiencies that will be derived from electronic voting that will reduce personnel and labor costs.

The DRE option also will introduce added efficiencies in the election process that will eliminate issues related to “over-votes,” recounts and ensuring full voter participation by persons with disabilities. We also believe an electronic-based voting system will enhance training and education across the spectrum for election officials, voters and poll workers if the system is sufficiently user-friendly.

Based on the foregoing, following is a summary of the State Plan for Ohio based on the requirements delineated in Section 254 of Public Law 107-252:

(1) How the State will use the requirement payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Ohio will implement new voting systems and procedures that meet the general requirements of Title III ensuring the systems have audit capacity, disability access, and alternative language accessibility, where applicable, and that the systems meet error rate thresholds established by the Federal Elections Commission.
(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1).

Ohio anticipated federal funding and state matching funds would be about $161 million. Unfortunately, full federal funding was not appropriated and the total federal funding and state matching funding is approximately $137 million. The Secretary of State will allocate about $106 million of that amount for installation of new voting equipment and upgrades of existing voting equipment in Ohio counties, and use the remaining portion to implement statewide voter registration and establish a provisional voting hotline. Disbursements in the amount of $5 million will be available to Ohio’s 88 counties for election official and poll worker training. Additionally, the Secretary of State will make $5 million available for administration of a statewide voter education program. The Secretary of State will draft guidelines and reporting requirements to monitor distribution of these funds and to ensure county compliance with the Help America Vote Act of 2002.

(3) How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.

See response to No. 2. Additionally, the Secretary of State, in establishing an authorized vendor list for deployment of new voting equipment, will require vendors to include, as part of their bid proposal, fund allocation that includes voter education, election official education and training, and poll worker training. The Secretary of State also will implement new programs and procedures to supplement these vendor requirements and efforts at the county level to address these issues.

(4) How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

See preceding responses. Ohio will replace punch-card voting in the State and require deployment and installation of electronic-based voting devices that meet the requirements of the Act. The request for proposal for new voting equipment will be crafted to presume required features and safeguards that ensure a uniform voting standard and compliance in all Ohio counties with specific requirements of the Act.

(5) How the State will establish a fund described in subsection (b) for the purposes of administering the State’s activities under this part, including information on fund management.

Such a fund has already been established by the Secretary of State and will be monitored by both the Secretary of State and the Auditor of State, as Ohio law applies to state auditing requirements and reporting procedures. Fund management procedures include quarterly reports to the Election Assistance Commission to detail
receipt and expenditure of funds, and how those funds were used to meet the objectives of the Act.

(6) The State’s proposed budget for activities under this part, based on the State’s best estimates of the costs of such activities and the amount of funds to be made available.

See response to No. 2 and the fund distribution table on page 23 of the State Plan. The Secretary of State believes full implementation of the plan will require all available federal funding and state matching funds to meet the requirements of the Act.

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

(See Section XV. Requirements Payments: Maintenance of Effort.) Attached to this State Plan are budget materials that show the level of spending for election services by the Secretary of State in FY 2000 and projected levels of spending for FY 2004-05. The Secretary certifies that no federal funds for Requirements payments earmarked for voter reforms and system modernization will be used to supplement the state budget for operation and administration of the office.

(8) How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The Secretary of State assumes full responsibility for ensuring compliance with the Act. Specific timetables are included in this plan which requires all punch-card and lever machine counties to install and deploy new voting equipment that meets the uniform standards of the Act by May 2, 2006. The plan also calls for a statewide voter registration system to be in place and fully operational by January 1, 2006. See Section XIV for ongoing performance measurement.

(9) A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

See attached procedure and refer to Section XIII of the State Plan, Administrative Complaint Procedures and Grievances.
(10) If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

See response to No. 2. Ohio will use funds from Title I for antiquated systems buyout and to improve election administration activities and procedures. See the fund distribution table on page 23 of the State Plan and allocation and distribution formula described on page 24.

(11) How the State will conduct ongoing management of the plan.

See Section XIV, Ongoing Performance Measurement. Throughout this State Plan is a description of the management practices and procedures outlined by the Secretary of State to ensure compliance with the Act. Any material change in this plan will result in a resubmission of the Plan in accordance with Sections 255 and 256 of the Act.

(12) In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and how the State succeeded in carrying out the State Plan for such previous fiscal year.

This State Plan represents Ohio’s initial submission of a State Plan to the Elections Assistance Commission.

(13) A description of the committee which participated in the development of the State Plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

See page 3, The State Plan Committee, and Section VI, How Ohio Developed its State Plan.

This State Plan respectfully submitted to the Elections Assistance Commission, in accordance with U.S. Public Law 107-252, this 16th day of June, 2003.

J. KENNETH BLACKWELL
Secretary of State

Hi, Judy:

Attached is the letter used by Pennsylvania when the State submitted just the materially changed portions of its State plan, along with a description of how the State succeeded in carrying out the State plan submitted the previous year. (The latter was provided to comply with HAVA Section 254(a)(12).) If you want to review examples of comprehensive amended State plans vs. submissions of selected portions of State plans, take a look at the September 30, 2004 issue of the *Federal Register*, in which seven State plans (or portions thereof) were published.

August 13, 2004

Dear Members of the Commission:

In accordance with section 255 of the Help America Vote Act of 2002 (HAVA), I am pleased to file with the Election Assistance Commission (EAC), for publication in the Federal Register, this letter and the following new pages that will comprise Elements 6, 10 and 12 of the State Plan of Commonwealth of Pennsylvania for the 2005 Fiscal Year. These new pages, together with non-substantive changes that we have made, will constitute the Commonwealth of Pennsylvania’s HAVA State Plan for Fiscal Year 2005.

As required by section 254(a)(12) of HAVA, Element 12, as amended, describes the material changes that Pennsylvania has made to the State Plan filed in 2003. Specifically, Element 12 contains descriptions of the amended versions of Elements 6 and 10 and lists the progress that the Commonwealth has made with regard to the State Plan that the Commonwealth filed with the Federal Election Commission on July 31, 2003.

Please note that non-material changes to the Pennsylvania State Plan can be found throughout every element of the Pennsylvania State Plan. After consulting with EAC staff, the Commonwealth has elected not to include those changes for publication in the Federal Register as unnecessary under HAVA. Instead, we would direct the EAC and members of the public to the Pennsylvania Department of State’s HAVA website (www.hava.state.pa.us) to view and copy the complete Pennsylvania State Plan as the Commonwealth has amended it.

The 2004 Amendments to the State Plan of Commonwealth of Pennsylvania were developed in accordance with section 255 of HAVA and the requirements for public notice and comment prescribed by section 256 of HAVA.

On behalf of the Commonwealth of Pennsylvania, I thank the Commission for its assistance. I look forward to our continued collaboration to improve the administration of elections in Pennsylvania.

Very truly yours,

Pedro A. Cortés
Lori:

You’re not a pest! I’ve been trying to get some folks here to focus on the reporting requirements for Title I funds for some time. So far, other issues have taken priority. I’ll try again by forwarding your email. I apologize.

What do you mean by “confirmation of the 253(b) requirements”? That section just lists the requirements the State must meet to certify for requirements payments. Are you asking for confirmation of the reporting requirements that apply to the requirements payments received? If so, we included the following in the letter that went to States receiving requirements payments:

Reporting

Also note that HAVA Section 258 requires your State to submit a report to EAC on the activities conducted with the funds provided during the Federal fiscal year, which runs from October 1 through September 30 of each year. This report must include:

- a list of expenditures made with respect to each category of activities described for the use of funds;
- the number and type of articles of voting equipment obtained with the funds; and
- an analysis and description of:
  - the activities funded to meet HAVA requirements; and
  - how such activities conform to the submitted State plan.

This report is due no later than six months after the end of each fiscal year. Accordingly, you should file your first report with EAC no later than March 30, 2005. States should submit Standard Form 269 as part of this report. This form may be found at the following web site:

http://www.whitehouse.gov/omb/grants/grants_forms.html

Hope you are doing well.

"Jordan, Lori" <LJordan@sos.state.oh.us>
Hi Peggy,

It is the pest from Ohio again. I hope everything is going well for you.

Could you please provide me with the most recent reporting requirements through yearend, including a confirmation of the 253(b) requirements?

I just want to verify since federal fiscal yearend is getting close so I don’t miss a deadline. Since I haven’t received any new info about 101 and 102 I assume you don’t currently have an update. Last year the reporting was through 12-31-03 for 101 and 102. Do you think it will be the same this year or will it go to federal fiscal yearend 9-30-04.

Sorry to bother you on this again but I would really appreciate your clarification on these confusing reporting issues.

Thanks,
Lori Jordan

Subject: Re: Reporting Requirements for HAVA

Hi, Lori:
Hi Peggy,
I am the Finance Grants Manager for the Ohio Secretary of State's Office. While I was reviewing the letter from the U.S. Election Assistance Commission dated June 17, 2004, I am a little confused on the reporting requirements. Here is my question.

The original Title I funds for Section 101 and Section 102 required that we submit a 269 for each section of funds for the period ending 12-31-03 by the due date of 1-21-04 to the GSA. We did so. What are the reporting requirements for the Title I funds Section 101 and Section 102 and what is the ending date for the report?

Does the Section 101 and 102 get reported with the Section 253(b) money? If so, does each section require a separate 269 form? The 269 report along
with the other details described on page 3 of the letter is due no later than March 30, 2005. Since we filed the report 12-31-03 do we use the 1-1-04 starting date or redo the 12-31-03 reports to include the amounts prior to 12-31-03.

Please call me because I know my questions are probably very confusing. I just want to make sure we do everything properly.

Thanks in advance for your assistance in this matter.

SAMPLEGovernor's letter 5-6-04.pdf
May 6, 2004

The Honorable Jim Doyle
Governor
Office of the Governor
State Capitol
115 East
Madison, WI 53702

Dear Governor Doyle:

The Help America Vote Act (hereafter "HAVA" or the "Act") authorizes payments to States, U.S. Territories and the District of Columbia (hereafter "States") to assist in meeting the "Uniform and Nondiscriminatory Election Technology and Administration Requirements" in Title III of the Act. In order to be eligible for receipt of a requirements payment, a State must file with the U.S. Election Assistance Commission (hereafter "EAC" or "Commission") a certification statement for the fiscal year, which declares that such State is in compliance with the required conditions set forth in section 253(b) of the Act. Title II requirements payments for Fiscal Years 2003 and 2004 are available at this time.

Timing for Filing a Statement of Certification (Section 253(a) and (d))

To receive funds for a fiscal year, HAVA requires the chief executive officer of the State, or designee, in consultation with the chief State election official, to file with the EAC a statement certifying that the State is in compliance with the conditions set forth in section 253(b). This statement may not be filed until after the expiration of a 45-day period that began on March 24, 2004 – which was the day that all 55 State plans were published in the Federal Register by the Commission. The 45-day period expires on May 8, 2004.

Language for Statement of Certification (Section 253(a))

Recommended language for the certification statement is contained in Section 253(a) of the Act. Thus, the certification statement for a fiscal year may state the following:

"____________________ hereby certifies that it is in compliance with the requirements referred to in section 253(b) of the Help America Vote Act of 2002."

1 For the purpose of the requirements payments, the chief State election official is the individual designated by the State under section 10 of the National Voter Registration Act of 1993 (42 U.S.C. 1973gg-8) to be responsible for coordination of the States responsibilities under such Act.
Condition for Receipt of Funds (Section 253(b))

The conditions for receipt of a requirements payment contained in section 253(b) require that a state certify to the Commission that, for the fiscal year(s) in which funds are requested, it:

- has filed a State plan with the EAC covering the fiscal year and which the State certifies:
  - contains each of the elements required to be in the State plan, according to section 254, including how the State will establish a State Election Fund in accordance with section 254(b);  \(^2\)
  - is developed in accordance with section 255, which describes the process of using a committee of appropriate individuals, including the chief election officials of the two most populous jurisdictions, other local election officials, stakeholders (including representatives of groups of individuals with disabilities), and other citizens to develop the plan; and
  - meets the 30-day public notice and comment requirements of section 256.

- has filed with the EAC a plan for the implementation of the uniform, non-discriminatory administrative complaint procedures required under section 402 (or has included such a plan in the State plan), and has such procedures in place. If the State does not include such an implementation plan in the State plan, the Federal Register publication and the committee development requirements of sections 255(b) and 256 apply to the implementation of the administrative complaint procedure in the same manner as they apply to the State plan.

- is in compliance with each of the following federal laws as they apply to the Act:
  - The Voting Rights Act of 1965;
  - The Voting Accessibility for the Elderly and Handicapped Act;
  - The Uniformed and Overseas Citizens Absentee Voting Act;
  - The National Voter Registration Act of 1993;
  - The Americans with Disabilities Act of 1990; and

- has provided that, to the extent that any portion of the Title II requirements payment is used for activities other than meeting the requirements of Title III:

---

\(^2\) Section 254(b)(1) and (2) of the Act describes the State Election Fund as a fund that is established in the treasury of the State government, which must be used by the State exclusively to carry out the activities for which the requirements payment (title II, Subtitle D, Part 1) is made to the State, and which consists of:

- amounts appropriated or otherwise made available by the State for carrying out the activities for which the requirements payment is made;
- the requirements payment to the State;
- such other amounts as may be appropriated under law; and
- interest earned on deposits of the fund.

HAVA section 254(b)(3) provides that, in the case of a State that requires State legislation to establish a State Election Fund, the EAC is required to defer disbursement of the requirements payment to such State until such time as legislation establishing the fund is enacted.
the State’s proposed uses of the requirements payment are not inconsistent with the requirements of Title III; and
the use of the funds under this paragraph is consistent with the requirements of section 251(b); and

has appropriated funds for carrying out the activities for which the requirements payment is made in an amount equal to 5 percent of the total amount to be spent for such activities (taking into account the requirements payment and the amount spent by the State) and, in the case of a State that uses a requirements payment as a reimbursement for voting equipment under 251(c)(2), an additional amount equal to the amount of such reimbursement.¹

Accordingly, prior to submission of a certification statement for a fiscal year(s) to the EAC, the Commission strongly encourages all States to verify compliance with the required conditions set forth in section 253(b). Should the Commission have any concerns that a particular State – which has submitted a certification statement to the EAC – has not met one of the required conditions, the EAC will immediately contact that particular State and/or communicate its concern in writing.

General Services Administration (GSA) Procedures for Payments

GSA, which will disburse the Title II requirements payments to States under the direction of the EAC, requests that the following procedures be used for disbursement and receipt of these payments:

- **Step One – Registration.** State representatives should contact Sharon Pugh (Sharon.Pugh@GSA.gov) or Brad Farris (Brad.Farris@GSA.gov) on (816) 823-3108, as soon as possible, with information on State contact points, including name, address and email address. These contacts may very well be the same personnel that GSA worked with in distributing HAVA Title I funding. GSA will verify this information.

- **Step Two – EFT Setup.** GSA will contact the State representatives to obtain banking information required for an Electronic Funds Transfer (EFT). Again, this may be the same information submitted for HAVA Title I funding. Payments should be made into the Election Fund described in HAVA Section 254(b)(1). All funds will be disbursed via EFT.

- **Step Three – State Certification Statement to EAC –** States will submit required certification information to the EAC, as outlined above, after the completion of the 45-day period for publication of the State plan in the Federal Register.

- **Step Four – Notification to GSA by EAC –** Based upon the certification statement, the EAC will notify GSA that a State is due receipt of its Title II payment for a particular fiscal year (i.e., either FY 2003 funds, FY 2004 funds, or both).

¹ For purposes of declaring sufficient funds are available for the State to carry out activities to meet Title III requirements, if the requirements payment is to be used as a reimbursement for voting equipment obtained on and after January 1, 2004 through multi-year contracts, the activity is not treated as an activity to meet Title III requirements.
• **Step Five – Disbursement of Title II Funds** – GSA will disburse the Title II funds for a particular fiscal year to the accounts specified by the States, and will notify the States and the EAC of the disbursement in writing.

Finally, the Commission has received numerous inquiries regarding the concern that the Title II requirements funds will no longer be available for disbursement to the States after the end of the current fiscal year (i.e., September 30, 2004). However, the Commission points to section 257(b) of the Act, which states in part:

“(b) AVAILABILITY- Any amounts appropriated pursuant to the authority of subsection (a) shall remain available without fiscal year limitation until expended.”

(Emphasis added.)

Based upon the above statutory language, the Commission believes Congress' intent was clear in that the Title II funds remain available to the States until fully disbursed by the EAC.

The Commission looks forward to working closely with all States as we enter into this next phase of HAVA implementation. Should you have any questions or need further clarification as to the contents of this letter, please do not hesitate to contact Peggy Sims at 1-866-747-1471 (toll free) or 202-566-3100.

Sincerely yours,

DeForest B. Soaries, Jr.
Chairman

cc: The Honorable Kevin Kennedy, Executive Director, Wisconsin State Elections Board
Peggy,

Attached is the Ohio revised state plan and letter from Secretary Blackwell. A hard copy has been sent via Federal Express and should arrive Monday morning. Please call me if you have any questions or concerns. I left the yellow highlight in your copy to show the changes. I can take them off and resend it if you prefer.

Also please advise when the revised plan will appear in the Federal Register.

Thanks,

Judy

614-466-5515
Changing the Election Landscape in the State of Ohio

A State Plan to implement the Help America Vote Act of 2002 in accordance with Public Law 107-252, §253(b)
Revised January 12, 2005

"The Act appropriately respects the primacy of state and local governments in the administration of elections, while helping to ensure the integrity and efficiency of voting processes in federal elections by providing federal governmental support for that vital endeavor."

PRESIDENT GEORGE W. BUSH
THE WHITE HOUSE,
October 29, 2002
June 16, 2003

Dear Election Assistance Commission and Ohio Voters:

I can think of no greater gift we can give future generations than an electoral process that ensures the integrity of their vote and provides them with an election system that is efficient and fair.

At the very least, we need an election system that assures every vote counts and every voice is heard in electing those who will serve in government and decide the many critical issues we face as citizens. No voter should be excluded from the process because of a disability, as no voter should be excluded because of inadequate, outdated and imprecise voting mechanisms.

That’s what this report is all about. That’s what the Help America Vote Act of 2002 is all about — fair elections and empowering every voter to exercise their obligation, responsibility and privilege to fully engage in the election process.

Democracy, after all, is a fragile system that relies on the voices and participation of all its citizens, not just a chosen few. Every voter and every vote cast strengthens our democracy and enhances the opportunity to choose the best people for the job of leading our government, at all levels, and deciding those issues that affect our local community, state and nation.

My thanks to the State Plan Committee who worked so diligently to help me create this document that will open a new era for the way we vote in Ohio. Truly, we are dramatically changing the election landscape in our state and in our nation. That is a good thing and probably one of the most important contributions we can make to future generations of Ohioans.

In the final analysis, the Help America Vote Act of 2002 is about inclusion more than it is about all the technical change and new administrative processes and procedures called for in this plan. Inclusion is, after all, the thread that binds the fabric of democracy.

Very truly yours,

J. KENNETH BLACKWELL
Ohio Secretary of State
The Ohio Secretary of State gratefully acknowledges the State Plan Committee for their participation and assistance in the preparation and development of this plan for the strategic implementation of election reforms in the State of Ohio, pursuant to the Help America Vote Act of 2002.

The State Plan Committee

Chairwoman Judy Grady, Director of Election Reform, Office of the Secretary of State (replaces Dana Whelch)

Attachments and Addendum
Help America Vote Act of 2002

I. Introduction and Overview

On Oct. 29, 2002, President George Bush signed into law the Help America Vote Act of 2002. The legislation was passed in the U.S. House in late 2001 and was approved by the U.S. Senate the following year.

Much of the law embraces recommendations advanced by the National Commission on Federal Election Reform, a group that included both former Presidents Jimmy Carter and Gerald Ford as its honorary co-chairs. The commission observed that democracy is a precious birthright. But they also noted that each generation must nourish and improve the processes of democracy for its successors.

The Help America Vote Act logically embraces the goals of election reform by expecting all levels of government to provide a democratic process that:

- maintains an accurate list of citizens who are qualified to vote;
- encourages every eligible voter to participate effectively;
- uses equipment that reliably clarifies and registers the voter’s choice;
- handles close elections in a foreseeable and fair way;
- operates with equal effectiveness for every citizen and every community; and
- reflects limited but responsible federal participation.

In Ohio, the Secretary of State and the State Plan Committee used those broad parameters, principles and guidelines as the foundation objective for developing this plan. From that platform, the Secretary and State Plan Committee formulated the Ohio Plan to address the following specific issues to meet and exceed the minimum standards of the Help America Vote Act. In greater detail, this report addresses:

1. How Ohio will use requirement payments, distribute and monitor the allocation of these funds to county governments, and what criteria will be used to determine eligibility for these funds.
2. How Ohio will measure the performance of county governments to ensure they are in compliance with the Act.
3. How Ohio will develop programs to provide voter education, election official and poll worker education and training to meet the standards of the Act.
4. How Ohio will establish voting system guidelines and processes.
5. How Ohio will administer these activities and budget for administrative costs, as well as establishing a budget for overall implementation of the plan based on our best estimate of costs.
6. How Ohio will use the requirement payments without reducing state support for voter and election activities below what the state was spending in November, 2000.
7. How Ohio will establish performance goals and measures for county government.

8. How Ohio will create and develop a uniform administrative complaint procedure.

9. How payments under Title I will be used for punch-card replacement in Ohio and how that will affect and enhance the overall implementation of the plan.

10. How Ohio intends to conduct ongoing oversight and management of election reforms and improvements.

As the following section of the report suggests, election reform as envisioned by the Help America Vote Act is not a casual undertaking in Ohio. The demographics of the state reveal a broad mix of urban, rural and mid-size communities. Ohio, for example, has eight urban markets that include three large metropolitan cities – Cleveland, Columbus and Cincinnati. Smaller urban centers include Toledo, Youngstown, Dayton, Akron and Steubenville. Each enjoys its own community culture and election traditions.

In addition to these larger urban centers are mid-size communities like Mansfield and Lima, which represent the balance of Ohio’s Metropolitan Statistical Areas (MSA’s) according to the U.S. Census Bureau. But beyond those 10 communities and the counties they represent are 78 other Ohio counties that reflect a more rural population, including a large portion of Southeast Ohio that is designated as part of the Appalachian region.

The size and composition of Ohio’s population is a challenge to implementation of wholesale election reform in the state, but Ohio also is challenged because of the prevalence of punch-card voting. Nationally, it is estimated that 34.4 percent of the nation’s voters cast their ballot on punch-card voting devices. In Ohio, 72 percent of the state’s voters use this ballot method.
Given that context, we offer the following demographic overview of the State of Ohio to provide the Election Assistance Commission with what we regard to be a valuable foundation perspective for the implementation of election reforms in Ohio.

II. Ohio Demographics

While Ohio remains one of the nation’s leading manufacturing centers, the state, during the past two decades, has made the transition to a more service-industry economy. Nearly 28 percent of Ohio’s 5.4 million employee workforce is now classified as service employees. From 1990 to 2000, the state’s population grew from 10.8 million to 11.3 million.

The state is comprised of 88 counties that occupy nearly 41,000 square miles of land. Ohio is bounded on the south and east by the Ohio River and on the north by Lake Erie.

About 11.5 percent of that population is African-American and 1.9 percent is Hispanic/Latino, according to the most recent Census data. In total, Ohio’s minority population is about 16 percent of the total population.

The median age in the state is 36.2 years of age and, like many other states, is trending older. About two-thirds of Ohio residents live in owner-occupied households and about 29 percent live in renter-occupied dwellings.

The state has a wealth of educational institutions with 15 public four-year universities and 62 private colleges and universities. There are 25 two-year colleges in the state. The largest counties, in rank order and based on 2000 Census data, are:

The state’s major employers include such corporate notables as AK Steel, Daimler Chrysler, Delphi Automotive Systems, Ford Motor Co., General Electric Co., General Motors Corp., Goodyear Tire & Rubber Co., Honda Motor Co. Ltd., Kroger, Nationwide Insurance, Procter & Gamble, TRW Inc. and Wendy’s International.

In total, there are about 240,000 active businesses in Ohio, including about 80,000 farms that represent 14.9 million acres.

The state boasts 115 state parks that provide nearly 115,000 acres of recreational space for Ohio residents. There are six airports in the state with scheduled airline service and another 164 commercial airports and 10 commercial heliports. Transportation arteries
in the state include 1,572 miles of interstate highways, 3,918 miles of U.S. highways, and more than 14,000 miles of state highways. The Ohio Turnpike that ribbons through northern Ohio covers 241 miles from the Indiana state line to the Pennsylvania state line.

III. State Political/Governmental Structure

Ohio is governed by five major statewide officeholders including Gov. Bob Taft, Attorney General Jim Petro, State Auditor Betty Montgomery, Secretary of State J. Kenneth Blackwell and Treasurer Joseph Deters. The Ohio General Assembly includes 99 members of the Ohio House of Representatives and 33 members of the Ohio Senate.

Since 1992, both statewide officeholders and elected legislators are subject to term limits. Statewide officeholders are limited to two four-year terms. In the Ohio General Assembly, House members are limited to four two-year terms and State Senators are limited by two four-year terms.

Some local government officials also are subject to term limits as a result of local ballot initiatives in some Ohio communities.

The Ohio Supreme Court includes seven justices who are elected statewide. The Supreme Court is not subject to term limits. The Chief Justice of the Ohio Supreme Court is Thomas Moyer.

The local government structure in Ohio includes a mix of city and county elected officials, with most cities and villages in Ohio administered by a mayor/council form of government. Some municipalities have an appointed city manager form of government in which an executive is appointed to administer local municipal affairs.

In Ohio local government, there are "statutory" cities that operate largely on the basis of state statutory law and "charter" cities that may adopt so-called "home rule" guidelines to conduct the affairs of local government.

On the county level, 87 of 88 Ohio counties are governed by a Board of County Commissioners, which oversee county administration. Summit County is the only county in Ohio with a county executive/council form of government. The Summit County Council is comprised of eight district council members and three who are elected at large. Ohio counties also elect county auditors, prosecutors, treasurers, clerks of court, judges and county sheriffs.

The state is represented by 18 elected members of the U.S. House of Representatives and, of course, two U.S. Senators.
IV. State of Ohio Elections Systems

Ohio is, pervasively, a punch-card voting state. In total, 69 of Ohio’s 88 counties use punch-card voting. Those 69 counties represent 72.5 percent of all the registered voters in Ohio and 74 percent of the 11,756 voting precincts in the state.

Among the 19 counties that use voting devices other than punch-card ballots, two use automatic voting machines, six have electronic voting devices, and 11 use optical scanning equipment.

The table below (that continues on the following pages) shows a county-by-county listing of the types of voting devices in each of Ohio’s 88 counties. The table also reflects the number of precincts and registered voters in each of those counties as reflected in the November, 2002 General Election, which we use as base data throughout this report (unless otherwise indicated.)

</table>
Of note, two of Ohio’s largest counties – Cuyahoga and Hamilton counties – currently use punch-card ballot devices, as do two other large urban centers in Ohio, Montgomery and Summit counties. Those four counties, alone, account for nearly 3,600 of Ohio’s 11,756 precincts, and more than 2 million of the state’s 7.1 million registered voters. Another large urban center in Ohio, Lucas County, is a lever-machine county.

NOTE: In 2004, the number of registered voters grew to over 7.9 million and the number of precincts was reduced to 11,360.

In February 2001, the Secretary of State conducted an “Elections Summit.” Participants included academics, members of the media, local election officials, legislators, and community groups. The group reported the following:

1. Public confidence in the accuracy of punch card voting systems has been seriously undermined.
2. Boards of elections should upgrade their voting systems to new, more trustworthy technology.
3. Comprehensive voter education is critical to successful election operations.
4. A combination of federal, state, and local dollars may be appropriate to fund these technological improvements.
5. Ohio’s current elections standards, based on a combination of secretary of state directives, advisory opinions and rulings, should be codified by the General Assembly.
6. These goals demand immediate attention, or our state runs the risk of repeating the problems of our nation’s most recent presidential election – and suffering irreparable damage to the most important and basic concepts of democracy.

Subsequent to the Summit, a separate committee met to study Ohio’s election systems. They concluded (by a 6-5 committee vote) that because of the safeguards and procedures in Ohio election law, the punch-card voting method was adequate and there

was no overwhelming need for a statewide overhaul, particularly without available funding.

While the Secretary of State notes that punch-card voting is not explicitly prohibited under the Help America Vote Act, other requirements of the Act make it impractical to use punch-card voting as a primary voting device in the state.

In a study of "over" and "under" voting in Ohio, it was clearly demonstrated that punch-card voting was unreliable to the extent votes cast by thousands of Ohioans were not being counted in the final election tabulation.

Over-voting occurs when a voter casts a vote for more than one candidate in an election and thus disqualifies their vote in that election. Under-voting occurs when a voter fails to mark a ballot in a particular race or votes for fewer than the number of candidates to be elected.

The following table tracks the combined under/over vote phenomenon in the 2000 presidential election in Ohio's 88 counties:

The data shows 29 counties with the highest over/under vote percentage in the 2000 election were all counties that use the punch-card method of voting. The seven counties with the lowest over/under vote percentage in the 2000 election were all counties that did not use punch cards as their primary voting system.

The Ohio challenge in meeting the voter and election reforms envisioned by the Help America Vote Act is obvious. In simplest terms, Ohio is a large and populous state with a diverse mix of urban and rural voters that predominantly relies on punch-card voting as its prevailing voting mode. Modernizing the state's election systems will require widespread change throughout the state and in its most populous counties.

The transition will require a solution that must consider large and small counties, rural and urban areas, and adjustments that will affect an overwhelming majority of Ohio voters. The obvious corollary challenge is selecting a system configuration that meets the needs of all those counties, training election officials and poll workers to use new voting systems, and familiarizing Ohio voters with new voting devices.

While on its face, this appears to be a daunting challenge, we are confident Ohio's State Plan logically anticipates those factors and will meet the guidelines, demands, timetables and expectations of the Help America Vote Act.

2 Shelby County, a punch-card county, reported no over/under vote in the county's vote tabulation in the 2000 presidential election cycle. This would appear to be a reporting error.
V. Voter Trends: the Context for Change and Reform

We pause only for a moment in this report to reflect on voter turnout in Ohio. We do so for several reasons, not the least of which Ohio contemplates election reform and system modernization to take place in a presidential election year when voter turnout is higher and demand on the election system is greatest.

We also explore voter turnout and trends as context for meeting the most desirable benefit and objective of the Act: to restore public confidence in the election system and, subsequently, increase voter participation. While new, more technologically proficient systems, increased voter registration, accessibility and accuracy are hallmarks of Help America Vote, the more encompassing aim of the Act is to invite more voters into the process to exercise their rights and responsibilities as qualified electors.

In developing the State Plan, we must anticipate that voter participation will increase, voter turnout percentages will climb, and demand on the election system will be greater. We can only gauge those factors based on Ohio’s experience in past elections and the historical trends that will serve as a predictor of future trends.

The following table tracks Ohio voter turnout in both gubernatorial elections and presidential elections during the past 24 years.

</table>

The chart shows that during the course of the past six gubernatorial elections, voter turnout has averaged about 55.79 percent. During the past six presidential elections, voter turnout in Ohio has averaged 71.33 percent. Based on this historical data, Ohio can generally anticipate about 1.25 million more voters in a presidential election year than in a gubernatorial election cycle.

Even a modest 5 percent gain in that average means 62,500 more voters. Subsequently, based on projected population growth and increased voter participation as a result of election reforms and modernization, our State Plan assumes 150,000 new voters during peak presidential elections growing at an annual rate, after initial implementation of new systems and election reforms, of 3 percent per annum.

As a result, our Plan assumes that growth rate and the recommended voting systems design model proposed in this report anticipates that growth and demand on the state’s election system in future peak presidential voting years. We use the presidential
voting cycle as a base for our plan because that assumes the heaviest potential voter turnout and the busiest times for local boards of elections.

Since 1978, voter participation in the state’s gubernatorial elections has grown from 3 million voters to about 3.3 million voters. Since 1980, voter participation in presidential elections has grown from about 4.3 million voters to about 4.8 million voters. Factoring population growth during those decades, those statistics would imply that voter participation has remained relatively flat and, in all likelihood, is trending lower.

We have a high confidence level that the election reforms of the Help America Vote Act will produce more voter activity and a greater number of voters. Ohio doesn’t view the Act as a final effort to produce greater voter participation, but the beginning of an expanded effort to entice more voters to exercise their rights and responsibilities to participate in the election process.

We believe modernization and reform require us to actively engage in voter education and to continue to evaluate programs that will produce greater participation in the democratic process. We pledge our effort to continue to explore new and innovative programs that will achieve those objectives.

VI. How Ohio Developed its State Plan

In development of the State Plan, we insisted on inclusion in both creation of the State Plan Committee and in public input into the process. This report represents a broad outreach to minorities, senior citizens, people with disabilities, elected officials, election officials, public interest groups and the public at large.

Our foundation principle in developing this plan was based on the view that such far-reaching reforms to a system so vital to the most fundamental democratic process in our state and nation required a fair, open and dynamic process where there is an opportunity for every voice to be heard. We were proactive in developing a structure to embrace that principle.

As a first step in our process, we widely publicized hearing dates and created a web site that invited public comment and input. We invited written testimony from groups and organizations who wanted to lend their perspective to election reform in Ohio. Additionally, we actively solicited input from critical stakeholders for our public hearings, including key representative voices from among groups such as the Urban League, the League of Women Voters, the Disability Policy Coalition, and the American Association of Retired Persons (AARP).

Our lead-off witness was Chet Kalis of the House Administration Committee, who worked closely with U.S. Rep. Bob Ney, R-Ohio, primary sponsor of the Help America Vote Act of 2002. We asked Mr. Kalis to lay the groundwork for our committee by providing them with a foundation perspective of the Act, its mission, aims and objectives.

The State Plan Committee also heard from Doug Lewis, executive director of The Election Center, a national nonprofit organization serving the elections and voter registration profession. Mr. Lewis developed and authored the Professional Education Program for elections/registration officials – named the best continuing education program in the nation by the National University Continuing Education Association.
Mr. Lewis was able to provide the committee with a national view of election reform and voter registration from the valuable perspective of someone with intricate knowledge of election systems across the nation.

To provide the perspective on Ohio, Dr. Herb Asher, professor emeritus of political science at The Ohio State University, brought election reform home for our State Plan Committee. Few voices are more respected than the voice of Dr. Asher as a knowledgeable expert and commentator about the political and election process in Ohio.

While the State Plan Committee itself included representation from boards of elections, we reached out to three other boards to provide the committee with a strong representative sample of the diverse local election operations in the state. Among those invited to testify were Janet F. Clair, director of the Lake County Board of Elections, Rita Yarman, deputy director of the Knox County Board of Elections, and Terry Burton, deputy director of the Wood County Board of Elections.

The testimony of the three elections officials was particularly valuable to the Committee because Lake and Knox counties are two jurisdictions that recently modernized their election systems. In addition, four other counties – Ross, Pickaway, Mahoning and Franklin counties – currently have electronic-based voting systems. Wood County represents one of the Ohio counties facing an extensive overhaul of its system under the Help America Vote Act.

Dolores Blankenship, advocacy volunteer from AARP, offered the State Plan Committee an incisive look at the election process through the eyes of a senior citizen, and eight witnesses representing the Disability Policy Coalition offered riveting testimony about the Election Day challenges facing voters with disabilities.

The strong presence of people with disabilities in these hearings underscores the importance Ohio attaches to this issue and our resolve to provide physically challenged voters with every opportunity to cast their ballot in a setting that assures their access to the polls and their right to cast a ballot unrestrained by barriers and obstacles that preclude their full participation in the voting process.

Peg Rosenfield, a former state elections official and now a representative of the League of Women Voters of Ohio, provided testimony on behalf of that voter advocacy group, and Ernest Perry of the Columbus Urban League was the voice for that group.

The final witness was Eric Seabrook, chief counsel to the Ohio Secretary of State, who described the administrative complaint procedure envisioned by Secretary of State Blackwell and the potential contracting procedures under review to establish an election system that meets the uniform voting standards of the Help America Vote Act.

The State Plan Committee met in public session on April 3-4 to hear testimony from these witnesses and then reconvened on April 17 for a focused facilitated work session to refine and finalize the State Plan.

We believe the process used to develop the State Plan in Ohio is one of the most aggressive public outreach efforts in the nation. While the aim of the process was to be as inclusive as possible, we think it had the added benefit of educating and informing the committee and citizens of our state about the Help America Vote Act and its far-reaching implications for an improved voting and election system in Ohio.
The open and proactive design of our process signaled to every Ohioan the importance of enacting voter and election reforms in the state, and how that reform was likely to affect their participation in the electoral process.

In addition to the public hearings, the Secretary of State solicited all Ohioans to provide input to the plan by providing written communications with his office or to communicate ideas via the Secretary of State’s website. This communication was provided to members of the State Plan Committee and is attached as part of the State Plan.

VII. Federal Funding Assumptions of the Act

The Help America Vote Act of 2002 makes available certain federal funding to help achieve requirements and mandates of the Act. The funding components of the Act are reflected in Title I, Title II, Title IV and Title V. In summary, the federal government has agreed to the following federal funding thresholds for each of the Title sections of the Act:

Title I – Antiquated Machine Buy-Out
- $325 million for buying out punch-card and lever voting machines.
- $325 million in payments to states to improve election administration.

Title II – Election Assistance
- Requirement Payments
  - $3 billion for meeting requirements, poll worker training, voter education, and improving administration of elections.
- Access Grants
  - $100 million for increasing polling place access for voters with disabilities
- Research Grants
  - $20 million for research and development to improve voting technology
- Pilot Program Grants
  - $10 million for pilot programs to test new voting systems and equipment.
- Protecting and Advocacy Systems Payments
  - $40 million for state protection and advocacy systems.

Title V – Help America Vote College Program
- $5 million to encourage college students to participate in the political process by volunteering as poll workers.

Title VI – Help America Vote Foundation
- $5 million to encourage high school students to participate in the political process by volunteering as poll workers.
Of obvious, primary and immediate importance to the State of Ohio is the Title I funding and the state's share of Title II monies for Requirement Payments for poll-worker training, voter education, and improving administration of elections, as well as federal funds available for Access Grants to make election sites more accessible to people with disabilities. These three specific funding sources enable Ohio to address what we regard to be the core modernization and reform of its election system.

The buy-out program under Title I has special implications for Ohio because of the prevalent use of punch-card voting in the state. Likewise the $325 million being allocated to states to improve election administration is important because these funds represent resources that will be allocated for development of a centralized voter registration system in the state.

The state will apply for research and pilot program grants. But for now, our focus is to first establish a reliable, accurate and fair election system, conduct the training and education necessary to make that system work, and to ensure accessibility of the disabled and physically challenged citizens of our state. The Secretary of State believes Ohio should be particularly aggressive in seeking available federal funds under Title II for access grants to make Ohio's polling places more accessible to the disabled.

Title I largely represents base funding and pilot program grants. But for now, our focus is to first establish a reliable, accurate and fair election system, conduct the training and education necessary to make that system work, and to ensure accessibility of Ohio's citizens with disabilities. Later in the plan, we discuss allocating a portion of Title II funds to voting system upgrades.

The state will apply for research and pilot program grants. But for now, our focus is to first establish a reliable, accurate and fair election system, conduct the training and education necessary to make that system work, and to ensure accessibility of Ohio's citizens with disabilities. The Secretary of State believes Ohio should be particularly aggressive in seeking available federal funds under Title II for access grants to make Ohio's polling places more accessible.

Of note and as it relates to Title V and Title VI of the Act, the Ohio Secretary of State's office is currently conducting research related to poll worker issues. A component of that research anticipates a greater role for high school and college students in the electoral process, as well as other initiatives that will enhance the identification, selection, education and training of poll workers.

As this State Plan is being submitted, we anticipate that research will be completed and recommendations forthcoming in the next few months about how Ohio will maximize poll-worker recruitment and training, and ensure the presence of quality, qualified poll workers in every precinct.

Such initiatives underscore our determination to not only meet the minimum requirements of the Help America Vote Act of 2002, but to make Ohio a model state for implementation of these reforms and to lead the nation in development and
implementation of a modern, fair, reliable and accurate election system. As U.S. Rep. Bob Ney led the federal initiative to enact the Help America Vote Act, it was the mandate of our State Plan Committee to formulate a plan that makes Ohio a showcase for election reform.

**VIII. Distribution of Resources to Local Governments**

We first explore our proposed distribution of aid to local government under Title I. Under guidelines of the Act, these funds must be used assuming the following criteria:

- These funds may be used as a reimbursement for costs associated with punch-card or lever machine replacement incurred after Jan. 1, 2001.
- There is a presumption states must ensure compliance in time for the November, 2004 Federal Election.
- Within six months after the date of enactment, Ohio must certify that the state will use the money for punch-card/lever machine replacement, the state will comply with federal laws, and the voting system will meet new voting system standards.

We anticipate that no change in state law or new legislation will be required to carry out the activities required for certification.

At the initial writing, the Congressional Research Service (CRS) estimated that full-funding under the Act, for both Title I and Title II receipts, would total $155,251,155. CRS estimates $116,423,155 of that amount represents Title II funding under the Requirements Payments component of the Act. However, as of this revision date, the Congress has not appropriated the full funding as prescribed in Public Law 107-252.

In addition, the state has appropriated $5.8 million in matching funds for Title II payments, as required by the Act, which means total available funds for implementation of the State Plan in Ohio will be approximately $132 million.

All money in Title II is based on the state’s portion of the nation’s voting age population. The most recent estimate is that Ohio’s 8.5 million voting-age population represents 3.97 percent of the nation’s voting age population of 215.1 million.

Because of the prevalence of punch-card voters in Ohio, we are keenly focused on the distribution of funds under Title I and, more precisely, the buy-out program. The Act stipulates the funds will be distributed to states by multiplying the number of qualifying precincts by $4,000. However, based on available federal funds for this purpose and the number of punch-card and lever-machine jurisdictions in the U.S., it now appears that number likely will be about $3,354 per precinct. As previously mentioned, Ohio has 69 counties designated as punch-card counties.

In addition, two Ohio jurisdictions – Hardin and Lucas counties – feature lever voting machines and would be eligible for funding under the guidelines.
In total, under the formula, the 69 punch-card counties and two lever-machine counties in Ohio means the state would be eligible for about $31 million in federal funds under the buyout program.

However, we know $31 million is insufficient for the counties to purchase modern, reliable voting systems capable of meeting requirements of the Act. Subsequently, our budget for voter and election reforms in Ohio presumes the state will require about $24.2 million to establish a centralized voter registration database and related support for voter education and poll worker training. Our plan calls for the remainder of the Title funds to be allocated to Ohio’s 88 counties to help subsidize installation of new systems and implement other required activities under the Act.

Following is the budget we envision for distribution of the $161 million in funds in Ohio to meet requirements of the Help America Vote Act:

<table>

</tbody>
</table>

In simplest terms, this allocates Help America Vote funds where the money is needed most: in Ohio counties. While it is the responsibility of the Ohio Secretary of State to monitor performance and ensure implementation of the Act, the execution of the Ohio plan, ultimately, will take place at the county level. On that basis, we believe it
prudent to maximize resources for election reform in the counties where election reform will occur.

While much of the focus is on the counties with punch card and lever-machine voting systems, in reality, all 88 Ohio counties will be expected to conduct some form of system modification and upgrade to make the system in Ohio uniform and compliant with the Act. Subsequently, the premise of the Ohio Plan is to look at the voter and election system statewide, based on the distribution of registered voters in each of the 88 counties.

Viewed in that context, the $116 million to be allocated to the counties will be distributed in the following priority order, as federal funds become available:

- Replacement of punch-card and lever-machine voting equipment to the extent that new voting systems would be installed immediately in the 71 affected counties;
- Installation of voting devices compliant with the disability requirements of the Act in all 88 counties;
- Bringing remaining counties into compliance with Section 301 of the Act by funding necessary upgrades and refinements of all other existing systems and equipment.

The Secretary of State reserves the right to distribute the funds to counties based on need and special circumstances.

The Secretary of State defines “need and special circumstances” to mean that it is possible some counties will need less funding and others more funding to meet the compliance standards of the Help America Vote Act. On that basis, the Secretary of State will shift funds as he deems necessary to bring all counties into compliance.

The Secretary of State acknowledges that one county, Mahoning County, took the initiative to convert their voting system to electronic voting after Jan. 1, 2001. Funding consideration will be given to all six Ohio counties using electronic voting equipment to bring those counties into compliance with HAVA.

We think this model provides us with great flexibility to allocate Title I and Title II funds in a way that assures full compliance with the requirements of the Act. Invariably some funds would be shifted away from counties that demonstrate a lesser need and reallocated to counties that demonstrate a greater need. But the allocation method is a fair method that will further assure all counties that adequate funds will be available to fully fund the requirements of the Act at the local level.

The Ohio Secretary of State will establish guidelines as part of the performance measurement for county compliance. When compliant systems are purchased for the counties, the Secretary of State will require transition to new voting systems by all punch-card and lever-machine counties by May 2, 2006. The Secretary of State will provide counties with a list of acceptable vendors to supply the new voting equipment and counties must choose from that approved list by no later than Sept. 1, 2003.

Since the Secretary of State will centralize and oversee this process, the Secretary will ensure compliance with all requirements of the Help America Vote Act. The performance timeline requires the Secretary to establish the list of approved vendors by
Aug. 1, 2003, providing county boards of elections with ample time to review the list, choose the vendor and establish transition to the new voting systems.

To ensure uniformity and compliance, the Secretary of State will stipulate design specifications for voting equipment. If a county fails to select a vendor by Sept. 1, 2003, the Secretary of State will designate a vendor for that county and order installation of new voting equipment in that jurisdiction.

Although the Act required the replacement of punch-cards and lever machines by the General Election in 2004, the Secretary of State wanted these new systems in place in Ohio for the Primary Election to ensure a smooth, seamless transition and full operational capability in time for the presidential election. Due to extenuating circumstances, a waiver was granted in December 2003 giving the Secretary of State until the Primary Election in 2006 to replace punch-card and lever machines.

On May 7, 2004, Governor Taft signed into law Substitute House Bill 262. The Act requires all direct-recording electronic voting machines used in Ohio to include a voter-verified paper audit trail and changes the process for counties to acquire voting systems using funds made available pursuant to the Help America Vote Act (HAVA) of 2002. As the result of this additional legislative requirement, the Secretary of State was forced to revisit the original decision to allow counties to select between Direct Recording Electronic (DRE) and Precinct Count Optical Scan (PCOS) voting systems. A logical analysis of the requirements of both HAVA and SB262 showed that in order for the state of Ohio to be in compliance with both federal and state law, meeting both time, costs and certification constraints, the Secretary of State must purchase Precinct Count Optical Scan voting systems through existing contracts already approved by the Controlling Board to satisfy HAVA requirements. While this change limits the flexibility previously offered to the counties when selecting between voting systems, the use of Precinct Count Optical Scan voting systems introduces a new opportunity for counties in the form of improved operational processes. Furthermore, the Secretary of State will allow counties to re-select their vendor based upon the additional mandated requirements of Substitute House Bill 262. All counties must submit in writing to the Secretary of State their vendor selection by February 9, 2005.

The Secretary of State has already established a fund account for all federal monies designated for Ohio under the Act and those funds, as applicable, will be disbursed from that account as our plan is implemented. This account is segregated to reflect federal funds designated for county buy-outs, election administration and Requirements payments.

Reports will be generated to show the allocation and distribution of these funds and that report will be forwarded to the Election Assistance Commission along with a performance report to show the state’s progress and performance in implementing provisions of the Act.
IX. §301. Meeting the Voting System Standards of the Act

The Help America Vote Act requires “uniform and nondiscriminatory election technology” that meets specific voting system standards. Ohio has opted for a program that specifically addresses the requirements of the Act, but provides counties with some degree of flexibility in choice of vendor and how they implement and develop voting systems to meet the particular needs of their region.

Assurance that the state will meet voting system standards specified in the Act is the responsibility of the Secretary of State, so system specifications will be drafted by the Secretary and the list of available vendors will reflect only those companies that submit bids demonstrating their ability to meet the rigorous and unambiguous system specifications and timelines established by the Secretary.

To ensure compliance with the Act, the Secretary of State will arrange for knowledgeable persons in the Secretary’s office who have the technical capability to review vendor proposals for electronic voting equipment and tabulating devices and the committee will recommend final adoption of a list of approved vendors that meet system specifications. The committee will review standards set by the Standards Board and make recommendations to the Secretary based on tabulating systems meeting the standards set by the Federal Election Commission.

Additionally, the Secretary of State will ask the state’s Board of Voting Machine Examiners to review the recommendations of the committee to ensure the vendors and systems meet not only the requirements of the Act, but are reasonable based on their knowledge of Ohio counties and their voting needs. The Board of Voting Machine Examiners currently provide a valuable service to the Secretary of State in the certification of voting equipment to ensure the equipment meets established certification criteria set by the National Association of State Election Directors.

It is logical this group assist the Secretary in this important endeavor to modernize and reform Ohio’s voting systems.

Providing counties with the ability to choose among a list of qualified vendors preserves the involvement of the counties in the vendor process while maximizing the buying power of the state under a state term contract procedure. The Secretary of State will serve as the primary contractor for voting devices in the State of Ohio, embracing the concept that the ultimate beneficiaries of the contract are the counties.
Ultimately, the responsibility for ensuring compliance with the Help America Vote Act of 2002 falls to the chief elections official in the state. But the Secretary of State recognizes the execution of the Act will take place at the county level.

Each vendor chosen to participate in the selection process must demonstrate a capability to serve the whole of the state and, potentially, all 88 counties. Successful vendors must also certify their ability to provide the volume of equipment required to service the state, and demonstrate the organizational capacity to provide statewide support, training and service to county clients.

Eligible vendors must assure their equipment meets a high threshold of security, accuracy and ease of use. They must also ensure timely delivery of equipment to meet the deadlines established by the Secretary of State for full implementation and operation by Feb. 1, 2004. Finally, the financial viability of the vendor will be a consideration for the awarding of contracts.

The Secretary of State believes training and education are essential to the successful deployment of new voting machine equipment. The best technology available is rendered useless unless vendors can provide adequate training and education to ensure both election officials and voters know how to use the equipment efficiently and effortlessly.

To achieve the education and training objective, some states have earmarked a portion of available money specifically for that purpose. We will request vendors designate how much of their proposal specifically applies to training and education.

Absent a recitation of detailed technical requirements listed in the request for proposal that will be issued by the Secretary of State, the Secretary insists successful bidders must provide a system that, at minimum, accomplishes the following:

**General Requirements**

- Guarantees voters will be able to verify their ballot before it is cast and counted. This means the system must include features that allow voters to vote, review their ballot choices and decisions, and correct errors or omissions before submitting their vote for final tabulation.

- As part of the review and correction process, if a voter selects more than the permissible number of candidates for a single office, the system will alert the voter of the selection and its impact, or prevent over-voting. Additionally, the system must give the voter an opportunity to correct the ballot before it is processed and counted.

- In addition to providing equipment, hardware and applicable software to accomplish these features, vendors will be required to include, as a supplement to the system, information materials clearly explaining the operations and functions of the voting equipment, the effect of casting multiple votes for one office, and corrective procedures and processes available to voters. The system also must alert voters when they have failed to vote for a candidate or issue. We envision a simple pamphlet or brochure that
will be available to every voter written in clear language with amplifying graphics.

- The system must ensure the privacy of the voter and confidentiality of the ballot.

Audit Capacity

- While the system allows the vote to be counted and tabulated electronically, the system also must be capable of producing a permanent paper record that can be audited manually. The paper record must be produced in such a way as to function as an official record for any potential recount or any question that might arise subsequent to the election.

This issue was addressed by several witnesses and State Plan Committee members during our public hearings. Almost everyone agrees that to ensure public confidence in any voting system, there must be a paper trail that will provide election officials, the public and media with a permanent, retrievable and readily accessible record and history of the election and provide a traceable mechanism to accommodate questions, election-related issues and recounts.

Ms. Rosenfield of the League of Women Voters told the State Plan Committee that an audit capacity in the form of a paper record was critical to reassure the public and the media that an open and fair election was conducted. We agree and this component is essential to any system configuration advanced by all prospective vendors.

Disability Access

- The system must be accessible for individuals with disabilities, including non-visual accessibility for people who are blind or who have visual impairments, ensuring the same standards for privacy and confidentiality afforded to people without disabilities. This means the voting system for people with disabilities must allow them to vote unassisted. At least one voting device must be available at each polling location that includes, at minimum, audio features. Additional features could include keypad functions and enlarged font size. The system must also include features that accommodate people who have limited mobility. That means the device must be of a sufficient weight and size to be transported within the environs of the voting location in those facilities that may not be readily accessible and sufficiently adjustable to match voters’ eye levels.

During the hearings, we heard from several witnesses with first-hand knowledge of disabilities who underscored for us the importance of not only focusing on voting devices, but the accessibility of polling places. Technology, we were told, does not remedy polling locations that are difficult for people with disabilities to navigate or facilities that lack adequate amenities, such as accessible restrooms.
Karla M. Lortz of Delaware, Ohio, reminded us that voting is a basic American right that should not be restricted or diminished because of a disability. She also emphasized the need to train and educate poll workers about persons with disabilities. But all of those with disabilities who testified stressed the need to be vigilant about the selection of poll and voter sites to ensure they are barrier free and accessible.

Ohio law requires that a polling place is considered accessible if it is free of barriers that would impede ingress and egress of people with disabilities. The law requires the entrance to be level or feature a nonskid ramp of not more than 8 percent gradient. Doors must be a minimum of 32-inches wide (R.C. 3501.29.)

The Secretary of State will require that all election sites and facilities be reviewed for access to ensure these voting locations meet and, if possible, exceed these minimum standards. At the recommendation of committee member Eric Duffy, the Secretary also will convene a committee to study this issue and to make recommendations about how the state can best address the needs of voters with disabilities.

**Alternative Language Accessibility**

- Where applicable and in those precincts where substantial non-English speaking populations exist, voting systems must provide alternative language accessibility pursuant to the requirements of the Voting Rights Act of 1965. This alternative-language accommodation shall be available in any precinct where it is determined that 5 percent or more of the registered voters in any precinct might be non-English speaking voters. Each county board of elections is required, 30 days prior to any election, to assure that alternative language mechanisms are available, as mandated by law.

Based on the current composition of the state’s population, there is no concentration of non-English speaking populations that warrant specific activities in this regard. However, as the composition of the state’s population changes, counties will be required to address this issue as the need arises.

**Error Rates**

- All voting systems in the state must achieve an error rate threshold that complies with error-rate standards established by the Federal Elections Commission (FEC) which are in effect 30 days prior to any election. The Secretary of State will take steps and facilitate measures to require performance of logic and accuracy tests by counties before elections and will require counties to have all system tabulating equipment and programs tested to ensure the correctness of the vote count cast within the error parameters established by the FEC.

**Additional Considerations**
Although we explore this later in our discussion of voter education, we offer two additional vendor considerations for our system specifications. The Secretary of State invites vendors to consider, as part of their proposal, a model or “practice” voting device that simulates the actual voting machine at the polling place. We believe this feature would provide voters with an opportunity to become more familiar with the voting equipment before actually casting their vote.

In addition, the Secretary of State will ask vendors to make available software that would enable voters to access such simulators on the Secretary’s website via the internet. This feature would enable voters, at their leisure, prior to Election Day, to learn more about the equipment they will use at the voting place and practice using the equipment and devices on the internet.

While we regard this to be part of our proposed voter education program, we think these innovations would help voters better understand the new technology, ease their apprehension about the use of new voting technology, and speed the voting process at the polling place.

We think these elements would minimize much of the confusion that invariably will accompany the conversion of voting systems in the majority of Ohio counties. As more and more Ohioans enjoy expanded access to the internet and world wide web, cyberspace would seem to be a logical environment to offer these features as an enhancement to Ohio’s voter education program.

Uniform Definition of Vote

Ohio law grants broad authority to the Ohio Secretary of State with regard to election rules and regulations. H.B. 5 passed by the Ohio Legislature in the 124th General Assembly gives the Secretary authority to issue directives and these directives have the same weight as law when applied to election-related matters and issues.

We note this authority in the Secretary’s ability to establish a uniform definition of a vote. Currently, Ohio law addresses the definition of a vote for punch-card ballots. Similar legislation was considered for “optical scan” voting devices, but with passage of H.B. 5, the Secretary of State embraced a definition of vote for optical scanning equipment as part of his directives authority.

As is evident, the Secretary of State has the power and authority, via directive, to adjust, modify, revise and refine a uniform definition to meet the state’s needs based on the voting systems adopted in the state. However, the Secretary will consult guidelines
established by the Federal Election Commission, the Voting Rights Act and all other federal authority in establishing a uniform definition of a vote in Ohio.

We include with the plan, as an attachment, the language that gives the Secretary of State this authority.

X. Voter Education, Election Official and Poll Worker Training

Achieving the mechanical and technological change of the Help America Vote Act of 2002 is only part of the challenge of enacting true modernization and reform of Ohio’s voting system. While devices will enhance the efficiency of Ohio’s voting and election process, voter education and training of election officials and poll workers is critical to full implementation of the reforms to the benefit of Ohio voters.

Earlier in this report, we alluded to research currently being conducted by the Secretary of State’s office to improve poll worker recruitment, training, education and retention. That effort addresses the reality that many of our current poll workers are from a generation that places a premium on voting, elections and the democratic process. Many of our poll workers are senior citizens who very much value freedom and free election processes as a result of their experiences in growing up in the World War II and Korea era.

To these marvelous citizens, voting isn’t just a right it’s an obligation and a precious American birthright that has been paid for with the blood, sweat and tears of those who sacrificed their lives on foreign soil. As these citizen patriots retire from the poll worker ranks in Ohio’s election system, we are looking to the future to determine how best we can recruit the next generation of poll workers who will embrace this important Election Day service with the same degree of commitment, enthusiasm and competence of our older poll workers.

We are mindful of an exciting objective of the Help America Vote Act: to engage high school and college students in the process. Several State Plan Committee members noted the desire to better engage young Ohioans in the election process as both a means to recruit bright, knowledgeable students as poll workers and as an opportunity to make more young people stakeholders in the process.

We are mindful of an exciting objective of the Help America Vote Act: to engage high school and college students in the process. Several State Plan Committee members noted the desire to better engage young Ohioans in the election process as both a means to recruit bright, knowledgeable students as poll workers and as an opportunity to make more young people stakeholders in the process. Our research is exploring that challenge and opportunity to pass the torch to the next generation. But the research is also looking at other creative options to ensure Ohio has a ready, able and competent corps of poll workers.

 Obviously, these poll workers must be adequately trained to render assistance to voters in a competent and knowledgeable way, not only in terms of helping them...
understand and use the new technology that accompanies election reform, but also by applying the laws and addressing the myriad of Election Day issues that invariably arise.

Provisional voting, for example, was a challenge for many of our poll workers during past election cycles as Ohio aggressively implemented new procedures to accommodate provisional voters. Our poll workers have successfully navigated provisional voting and have successfully met the needs of provisional voters.

But to adequately train poll workers, we must first train election officials. The Secretary of State will meet that challenge with a number of programs and initiatives. New training seminars will precede each election in Ohio where election directors and their staff will be given an opportunity to learn about new procedures and changes.

The Secretary of State also will enhance its electronic communication with election officials by providing updates and advisories about changes in state and federal election law. Our goal is to provide this information as soon as we have the information in hand.

Additionally, the Secretary of State will conduct an inventory of current training materials and produce new information and guidelines in both written and video formats. The Secretary also has asked his staff to provide election directors with new materials that can supplement the training of poll workers.

To ensure seamless transition to new voting systems, we are asking system vendors to partner with us in the production of clear, graphically-driven pamphlets and brochures that tell voters how the voting devices work. Earlier we mentioned the use of simulators and internet-based simulation of new voting devices to provide voters with an opportunity to try out the new technology even before they enter the voting booth to cast their official ballot.

We think these enhancements and initiatives will advance our implementation of the Help America Vote Act in Ohio and pave the way for a smooth transition to new voting devices and election processes. Some of our preparation for new election processes in Ohio includes some structural changes. We are asking each county board of elections, for example, to designate a training coordinator who will communicate directly with an election training coordinator in the Secretary of State’s office.

It is our aim for these coordinators to meet frequently throughout the year, exchange information and help us think about ways to improve the election system in Ohio.

After the election, we will gather from all 88 counties a report from these coordinators detailing issues, questions and problems they encountered and how they addressed the situation. From these reports, the Secretary of State will use that data and information to respond to election issues and disseminate that information to election directors so they can make refinements at the local level in subsequent elections.

But to glean a voters-eye view of the process and how we can improve the election system, we will distribute to a selected sample of voters in every county a short survey device that will track their voting experience and give them an opportunity to provide us with feedback on how we can improve the process. The survey will be distributed to a pre-determined number sample of voters throughout the state as they exit the voting booth.
We think this innovation is important to better understand voter needs and to view our election process through the eyes of the “consumer.” Information we collect from both coordinators and the sample voters will guide us in developing relevant and meaningful training materials for both election officials and poll workers in future elections.

The Secretary of State also will develop a new “get-out-the-vote” program in Ohio that will encourage more voters to participate in the election process. While such programs currently exist in the Secretary of State’s office, personnel will be dedicated to conducting research and learning more about voter behavior in Ohio.

In early 2004, the Secretary of State launched “Your Vote Counts,” a comprehensive voter education program aimed at better preparing voters for the November 2, 2004 election. The goal was to provide all Ohio voters with the information they need to vote so that we can reduce the opportunity for difficulties on Election Day. This effort entails ensuring every voter gets the same consideration.

The program’s Web site, www.YourVoteCountsOhio.org, features educational materials and instructional videos showing how to vote using punch card, optical scan and DRE (electronic) voting machines. Also included in the program printed material and public service messages for television and radio.

In addition, the Secretary of State has made a special effort to reach out to students with his “Xpect More” campaign. The “Xpect More” advertising campaign is aimed at inviting young voters between the age of 18 and 24 into the democratic process. To date, more than 623,000 “Xpect More” brochures have been distributed to students through schools and across Ohio.

In many states, the appeal is often directed at those who are registered to vote, were registered to vote or who have voted in the past. The Secretary of State would like to target potential new first-time voters by coordinating voter recruitment with civic and government teachers in high schools throughout Ohio where there is a captive audience of potential new voters. Additionally, the Secretary would like to initiate research that targets Ohioans who have never voted to learn more about their decision not to participate in the election process and to determine if there are programs and initiatives that can be implemented to address their concerns and entice them to the polls.

Understanding more about voter behavior and non-voter behavior, we believe, is a proactive step we must take to fully embrace the spirit, intent, principles and objectives of the Help America Vote Act.

The proposed budget for these activities is $2.5 million earmarked for voter education, and $5 million set aside for election official and poll-worker training. We propose making election official and poll-worker training funds available as state grants to the counties to supplement local activities and initiatives of the county boards of elections.

As counties deliberate equipment and voting systems, we will encourage them to consider appropriation of available residual funds to voter education and poll worker
training. In crafting local budgets to achieve the objectives of the Help America Vote Act, we believe counties must give consideration to these initiatives to supplement state efforts for education and training.

In order to qualify for these funds, counties must submit to the Secretary of State a detailed plan that identifies proposed programs and initiatives and how the funds would be used. After each General Election, counties would be required to report on the deployment of these programs and their assessment of the value of the education and training.

XI. §302. Provisional Voting and Voting Information

The critical role of provisional voting in election reform was underscored by a college newspaper in Ohio several years ago that reported only 5.4 percent of registered students at Ohio University actually voted during one election cycle in the late 1990s.3

Provisional voting makes it possible for many more of those students to engage and participate in the elections process. Provisional voting is a way to ensure every eligible voter who shows up at the polls on Election Day can cast a ballot.

For purposes of our State Plan, suffice that Ohio and the Secretary of State, as a matter of public policy, embraces the concept that every effort should be made at every board of elections in the state to accommodate every voter who, for whatever reason, does not appear on the certified list of registered voters in any jurisdiction of the state.

The National Voter Registration Act, or so-called "motor voter" law, protects those who changed their residence, but what about those who, for example, were incorrectly purged from the voter registration list?

Ohio is sensitive to this issue and the Secretary of State is committed to making sure every voter and every vote counts. The Secretary understands that no matter what reforms are enacted, human error will always be a factor in voter registration. No voter should be disenfranchised just because someone made a mistake, or the paperwork on a change of address was overlooked, misplaced, incorrectly recorded or just didn’t get entered into the database in time to be reflected on the voter rolls.

Ohio’s system of provisional voting has been successful and voters who otherwise might have been denied a ballot were given an opportunity in recent elections to cast a provisional ballot, and for local boards of elections to determine if those ballots were valid. We have guidelines and procedures in place to address provisional voting in Ohio and we will continue to refine and expand the scope of provisional voting in the state to comply with the spirit, intent and letter of the law in the Help America Vote Act.

The Act requires provisional voting as a condition for receiving federal funding for election reform and Ohio is poised to meet all such requirements. We anticipate the

3 The (Ohio University) Post, Voters still have time, Oct. 11, 2001.
Federal Election Commission will continue to explore this issue and we will make adjustments to provisional voting regulations in the state as those guidelines and adjustments are released.

The Secretary of State also will review, prior to each election, procedures for the handling and processing of provisional votes to ensure full compliance with state and federal guidelines. To provide fullest utilization of the provisional voting mechanism, every local board of elections will be required to adopt provisional voting policies that are weighted more toward inclusion in the voting process than challenges and exclusion in the ballot process.

For purposes of our State Plan, suffice that Ohio and the Secretary of State, as a matter of public policy, embraces the concept that every effort should be made at every board of elections in the state to accommodate every voter who, for whatever reason, does not appear on the certified list of registered voters in any jurisdiction of the state. Provisional voting is a valuable fail-safe mechanism that is an essential component of election reform in Ohio.

Further, we believe those who cast a provisional ballot should have access to mechanisms and procedures that tell them whether their ballot was counted. Toward that end, our budget presumes establishment of a toll-free hotline that will enable provisional voters, after the election, to learn whether their ballot was counted and to receive an explanation about why it wasn’t counted if, indeed, a determination was made that it was not a valid vote. We have allocated $250,000 in our State Plan budget to create and maintain such a hotline and encourage local boards to prominently display information by whatever means to advise provisional voters of this follow-up option.

Additionally, information will be available at every precinct and voting location to explain provisional voting procedures and who may cast a provisional vote. Such information should also be readily available on the Secretary of State’s website and all county election board websites, where such sites exist.

As part of the National Voter Registration Act, Ohio has endeavored to forge a partnership with other state public agencies in voter registration and it is logical to extend an invitation to these agencies to also educate, advise and alert prospective voters about their provisional voting options in these venues.

Ohio also would expect to partner with the state’s media in making voters aware of the provisional option. We contemplate deployment of a series of public service commercials on local television stations in the days preceding elections advising voters of their options for casting a provisional vote. We think a compelling argument can be made to broadcast outlets around the state that full citizen participation in the election process is public service of the highest order.

XII. §303. Statewide Voter Registration and Registration by Mail

Maintaining a viable voter registration list is an essential ingredient in conducting fair and participatory voting processes. Centralizing registration in a single statewide database is a sensible change that ensures uniformity, consistency and reliability. To
accomplish this task, the Secretary of State will seek one vendor to develop a registration system that must meet the needs of voters and elections officials alike.

The system must be sufficiently functional that all eligible voters can register to vote with ease and simplicity. The system must accommodate both written (mail-in registration and in-person registration) and electronic means for voters to initiate the registration process. Registration sites, locations and opportunities must be varied and plentiful.

It is not sufficient that voters would be required to register only at boards of elections or obtain registration materials only at governmental venues. The successful vendor must anticipate a variety of locations and opportunities for citizens to register in both public and private settings. The system must contemplate a solution for converting current voter registration data now housed in local boards of elections and transferring that data to the centralized database in the Secretary of State’s office.

The statewide voter registration system must meet technical demands that will readily allow local boards of elections to seamlessly and effortlessly interface with the state database in a way that assures instant access to all qualified registered voters in their jurisdiction and the state. The system must include sufficient data that provides local election officials with the means to segregate voters by political and geographic boundaries to the extent these officials can create and develop voter lists by precinct and voting location.

The system must include features that permit local elections officials to track the voting history of registered voters, identify those no longer legally registered, and readily accommodate change of address or voting status.

And, finally, the system must anticipate that these records are public records and must be maintained in a way that conforms to state public records law and all other applicable state and federal laws that pertain to voter registration currently in effect.

Our budget presumes a $5 million to $10 million allocation for creation and development of a statewide voter registration system.

Closely akin to the registration issue are voter identification requirements. It was the consensus of both witnesses who testified before the State Plan Committee and the committee itself that the Secretary of State should establish policies that expand rather than restrict the types of instruments used by voters as a means of identification. We believe this is in keeping with the spirit and intent of the Help America Vote Act.

As no voter should be denied an opportunity to cast a provisional ballot in those circumstances where their name might not appear on the voter rolls, neither should a voter be denied an opportunity to vote because of arbitrary and restrictive identification requirements. While it is logical the Secretary of State should work in coordination with agencies such as the Ohio Bureau of Motor Vehicles to validate the identity of new
voters, such identification requirements must, by definition, extend beyond identification
devices such as a valid state drivers' license.

As several Ohioans with disabilities testified, many people with disabilities do not
have a drivers' license. It is the intention of the Secretary of State to extend identification
requirements to include any reasonable means of identification such as utility bills, rent
receipts or any legal or quasi-legal instrument that bears the name and address of the
prospective voter.

The policy of the Secretary of State is that voter challenges on the basis of
identification should be judged on a liberal construction of voter ID rather than a
restrictive construction that would deny the voter an opportunity to cast a ballot.

Based on testimony provided by Mr. Perry of the Columbus Urban League, the
Secretary of State also would like to more closely examine the issue of restoring voter
rights to persons released from incarceration in the state’s Department of Rehabilitation
and Corrections. There is a widespread perception that these persons, as a result of felony
convictions, have forever forfeited their right to participate in the election process. Such
is not the case.

Persons who have had their voting rights taken away because of a felony
conviction are subject to re-enfranchisement as legal voters to restore their right to vote.
As these persons have presumably paid their debt to society as a result of their
incarceration, full integration back into society as fully functioning citizens should also
presume their eventual re-engagement and participation in the election process.

For these persons, identification also is an issue because drivers' licenses might
have expired during their period of incarceration. At minimum, the Secretary of State
pledges to educate election officials and poll workers about the rights and processes
available to these individuals.

XIII. §402. Administrative Complaint
Procedures and Grievances

To fully facilitate implementation of the
Help America Vote Act of 2002, Ohio will
establish an administrative complaint procedure to
address allegations by any citizen who believes
their voting rights have been violated under Title
III of the Act.

The complaint and grievance procedures
developed by the Secretary of State are constructed
toward development of a non-adversarial
complaint process where the desired
outcome is a solution or
remedy of the problem,
rather than a highly
evidentiary process.

The process adopted by the Secretary of State includes an alternative dispute
resolution component that invites parties to seek equitable resolution in that venue as well
as through a formal hearing process. When a valid complaint or grievance is filed as part

1/12/2005

021776
of this process, it is ultimately the state, and more specifically the Secretary of State, that must provide the appropriate remedy.

We attach, as an addendum to this report, the full text of the proposed procedure. Following, in summary, are the relevant elements of the complaint procedure:

- Any Ohio citizen who believes there is a violation of any provision of Title III of the Help America Vote Act may file a complaint.

- All complaints must be in writing, signed, notarized and be sworn under oath.

- The complainant must be identified by name and mailing address, and the complaint must include a description of the violation alleged to have occurred.

- The complaint must be filed with the Secretary of State along with proof of delivery of a copy of the complaint to each respondent.

- In addition to failure to include any of the foregoing, the Secretary of State may reject the complaint if more than 90 days have lapsed since the final certification of the federal election at issue.

- The Secretary of State must establish procedures and schedules addressing when the complaint will be heard and considered.

- The Secretary of State or designated hearing officer must compile and maintain an official record of any proceeding and include submissions and evidence provided.

- Complaints must be heard and determined by the Secretary of State or designated hearing officer, who is required to prepare a report expressing an opinion about whether a violation did occur within 20 days of the filing of such a complaint.

- Any hearings conducted pursuant to the filing of a complaint must be tape recorded.

- Dates, times and locations of hearings must be established and all parties must be given at least five days notice of such hearings.

- All relevant parties, including the complainant and all respondents may appear at the hearing, testify and present evidence. There is no requirement that any complainant, respondent or any other party to the proceeding be represented by an attorney.
The Secretary of State or a designated hearing officer is required to prepare a transcript of the tape recorded hearing and that transcript is a public record under Ohio's public records law.

A final decision must be rendered within 60 days after the complaint is filed.

If a violation is determined to have occurred, a determination must be issued specifying the appropriate remedy. If a violation is deemed not to have occurred, the complaint must be dismissed.

The remedy may not include any award of monetary damages, costs or attorney fees, and may not include the invalidation of any election or a determination of the validity of any ballot or vote.

The decision under this process is final and is not subject to judicial review.

The complaint and grievance procedure does not preclude any other legal action provided by law.

XIV. Ongoing Performance Measurement

As Ohio anticipates successful implementation of reforms and modernization of its election systems and processes to accomplish its objectives under the Help America Vote Act of 2002, we believe performance measurement is an essential and ongoing requirement to ensure a fair and inclusive election system.

Each year, boards of elections throughout Ohio prepare annual budgets anticipating costs and expenses for conducting elections. We recommend that while each board is preparing their budgets that they also take time to review the improvements they have made in their elections operations during the past year and report their progress in meeting election reform objectives under the Help America Vote Act.

The Secretary of State will compile these annual reports and submit a summary of initiatives, improvements and progress to the Election Assistance Commission. We think this is a way for all election officials in Ohio to remain vigilant of our obligation to continue measuring our performance in making the election process fair and accessible to all Ohioans.
As stated earlier in this report, we view this opportunity to reform Ohio’s election system not as an end process, but as the beginning of a renewed effort to fully engage our citizens in their most vital civic responsibility in a democratic process. Election reform, after all, is a futile exercise unless citizens view themselves as stakeholders in their local community, their state and the nation.

Our guiding principle in developing this state plan is that voters should willingly and enthusiastically participate in the electoral process, free of obstacles that might inhibit them from participating. To accomplish that, we, as election officials, are obligated to provide them with the best and most modern tools available so they can exercise their right to vote with assurance that every vote and every voter counts and will be counted on Election Day.

No legal voter should be taken for granted and no legal vote should be discounted or, worse, not counted. Every vote cast, every ballot submitted must be treated as if our very system of government and our way of life depends on it, simply because it does. No greater is the obligation of every eligible voter to be an active, knowledgeable and willing participant in the election process, and no greater responsibility as election officials do we have than to ensure those voices are heard and those votes are counted.

XV. Requirements Payments: Maintenance of Effort

As a condition for receiving Requirements payments under the Help America Vote Act, states must maintain expenditures for funded activities “at a level that is not less than the level of such expenditures maintained by the state for the fiscal year ending prior to November, 2000.”

Attached to the State Plan are budget materials that document state spending on election and election administration through the Secretary of State’s office for Fiscal Year 2000 (July 1, 1999 – June 30, 2000.)

The total amount of $2,739,159.04 million does not include reimbursements to county boards of elections for advertising costs related to state issue ballot advertising. The total budget request of the Secretary of State’s office for FY 2004 and FY 2005 are sufficient to fund continued investment in elections at this annual level.

Additionally, the Secretary of State shall include a HAVA-compliance and funding report as part of future biennial budget requests of the Ohio Legislature to certify HAVA-compliant funding and continue Ohio’s maintenance of effort.

XVI. Estimated Timelines for Implementation of the State Plan

Following are key dates and the proposed timetable for implementation of our State Plan:

- **March 18, 2003**: State Plan Advisory Committee named, public input process defined.
- **April 3-4, 2003**: State Plan Advisory Committee conducts public hearings.
April 9, 2003: RFP released for statewide voter registration system.
April 17, 2003: State Plan Advisory Committee reconvenes to review draft State Plan.
May 7, 2003: Competitive bids due for voter registration system.
May 13, 2003: State Plan finalized and published for 30-day review.
May 16, 2003: RFP released for voting system vendors.
June 2, 2003: Secretary of State awards bids for voter registration system.
Aug. 1, 2003: Secretary of State awards bids for election systems. County boards of elections notified of eligible system vendors.
Sept. 2, 2003: County boards of elections must notify Secretary of State which vendor they have chosen for election system improvements.
Dec. 1, 2003: Statewide voter registration system installed and fully operational.
March 2, 2004: Primary Election. (Ohio General Assembly considering change of Primary to May, 2004.)
April 29, 2004: Clinton County first to establish Centralized Voter Registration File processes between the county and the Secretary of State.
May 7, 2004: Substitute House Bill 262 enacted.
Nov. 2, 2004: General Election
November 17, 2004: VVPAT requirements distributed for comments.
January 3, 2005: VVPAT rules filed with ICARR.
January 1, 2006: Centralized Statewide Voter Registration File fully implemented.
May 2, 2006: Replacement of punch-card and lever machine complete.

XVII. Plan Submission Presumes Full Federal Funding

Submission of this plan presumes full and timely federal funding. In order for Ohio to meet the ambitious schedule outlined in this State Plan, it is imperative that federal monies be made available to the state on a schedule that is consistent with implementation of the base components of the plan.

Ohio reserves the right to seek waivers stipulated in the Help America Vote Act that allow us to delay implementation of this plan if federal funding is not forthcoming in a timely manner that will enable us to accomplish the objectives outlined in this report to the Election Assistance Commission.
Proceeding without a guarantee of federal funds would create a financial burden for the State of Ohio and its 88 county jurisdictions. While Ohio is anxious to meet and exceed the standards of the Help America Vote Act, implementation is not possible without the federal guarantees that accompany the Act.

The preponderance of unacceptable voting devices in the state underscore the necessity for reform, but it shows the very real and special challenges Ohio faces in fully complying with the Act and the funding that will be required to reconstruct and reconfigure the voting and election systems in the state.

Our pledge is to implement reforms, as outlined in this State Plan, as federal funds become available.

**XVIII. The State Plan Committee: HAVA and Beyond**

We reserve this section of the report to capture the comments and thoughts of our State Plan Committee. While many of the committee’s recommendations and much of their input is reflected in preceding sections of the report, it was clear this panel of distinguished Ohioans went beyond merely thinking about minimum requirements of the Help America Vote Act and insisted on expanding their mission to address issues that will produce broad and meaningful election reform in our state.

That kind of visionary thinking is precisely what the Secretary of State had in mind when he impaneled the State Plan Committee.

If there was a universal theme that resonated from the committee’s deliberations, it was consensus that Ohio must aggressively engage the next generation of voters and make young people in our state understand their role as stakeholders in the democratic process. It is insufficient, the panel said, to merely invite high school and college students into the election process. Ohio, the State Plan Committee said, must be proactive in educating young people about the election process and instill a deeper commitment to engendering student participation in the election process.

Linda Carr, Daisy Duncan Foster and Pastor Aaron Wheeler were particularly passionate in their remarks about this issue and said Ohio should be creative in developing new programs and initiatives to bring young voters into the process. The Committee urged the Secretary of State to aggressively seek available funds under Title V and Title VI funding of the Help America Vote Act to accomplish this critical task.

Additionally, some committee members recommended working with the Ohio Department of Education and the Ohio Board of Regents to explore ways to better educate and encourage political participation by high school and college students. Pastor Wheeler suggested...
Ohio public schools should ponder curriculum requirements that focus exclusively on voting and election processes.

State Rep. Nancy Hollister noted that this report should underscore for Ohioans that implementation of the Help America Vote Act in Ohio signals a "change in the governance of the election system" in the state. HAVA, she said, places more responsibility on the Secretary of State to assure a fair, equitable and inclusive election process in Ohio. "We need to acknowledge that," she said.

But Rep. Hollister and other committee members said that shift in governance does not minimize the necessary independence, ongoing role or responsibility of counties to execute election policies within the new governing framework created by the Help America Vote Act.

Committee member Jeff Matthews said county boards of elections must be independent to effectively achieve the objectives of the Help America Vote Act, and Ms. Duncan Foster said boards of elections must feel "some ownership of the process." In that context, it was the consensus of the State Plan Committee that full compliance with the Help America Vote Act requires critical coordination and a strong working relationship between the Secretary of State’s office and local boards of elections.

Election officials Guy Reece and Tom Coyne, along with Mr. Matthews, agreed that innovation doesn’t end with the Help America Vote Act. They said Ohio must constantly be looking for new methods, new procedures and new ideas to keep the election process viable and invite more Ohioans to exercise their right to vote.

Mr. Reece invited future exploration of election innovations being tested in other states such as open voting, early voting, ballot on demand and expanded availability and use of absentee ballots. Catherine Turcer asked that the Secretary of State consider the flexibility of voting devices that would allow for concepts such as instant runoff voting and proportional representation.

Ms. Turcer also recommended the Secretary of State ensure that the RFP for new voting equipment carefully consider the necessity for strong auditing capability that would provide a spot-check feature for pre-testing. Ms. Turcer and Donna Alvarado said alternative language capability also should be included in the RFP in anticipation of changing future demographics in the state.

Ms. Alvarado noted the projected growth of Hispanic populations both nationally and in the State of Ohio. Several committee members agreed that rather than addressing this issue later and incurring cost for conforming equipment, the RFP should anticipate the language requirement and it should be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.
be purchased now while federal funds are available to help Ohio make the transition to new voting equipment.

She said language requirements also need to be considered in education products produced by vendors and election officials in how to use the new voting equipment, as well as in training of poll workers and election officials. She said alternative language issues need to be considered in creation and execution of the grievance process and procedures.

She suggested the Secretary of State consider alternative language policies that exceed the 5 percent threshold.

While preceding sections of the report address monitoring procedures for implementation of the Help America Vote Act in Ohio, Ms. Alvarado said compliance monitoring should be “futuristic” and focus on outcomes. While measuring accomplishments, she said the state and local jurisdictions also should be forward looking and report, for example, where the state expects to be in the next five years and beyond.

She said monitoring and compliance should address issues such as where Ohio wants to be as a state, how we achieve those objectives, who is responsible for implementing these plans, what the funding sources will be for implementation and what will be different when changes, modifications or new procedures are implemented in the election process.

Rep. Hollister agreed there needs to be periodic evaluation of Ohio’s progress in meeting voting and election reforms. She suggested a need to pause from time to time to reflect on what has been accomplished, what future reforms need to be considered, and what revenues are available to achieve those objectives.

A primary focus in the deliberation of the State Plan Committee was how Ohio could best address disability issues related to implementation of the Help America Vote Act. Eric Duffy said the issue of physical barriers is a real and pressing issue that calls for creative solutions in Ohio. He emphasized that Ohio must consider not only what takes place inside the voting place, but what physical barriers exist that hinder access outside the building.

Pastor Wheeler, chairman of the Ohio Civil Rights Commission, offered the assistance of that agency in working with the Secretary of State in exploring solutions to that issue.

As expected, much of the panel’s deliberation was focused on funding and whether the federal allocation to Ohio was adequate to effect the wholesale change in voting systems in the state. A key voice in that discussion was Larry Long, executive director of the County Commissioners Association of Ohio.
Mr. Long noted that there is concern among county commissioners about whether the federal funding anticipated for implementation of the Help America Vote Act is sufficient to purchase the voting equipment needed to make Ohio HAVA compliant. But a comparable concern, he said, is consideration of future maintenance and replacement costs, as well as related cost issues such as storage requirements for the new equipment.

He acknowledged that there might be offsetting costs and efficiencies that could be realized from conversion to electronic voting systems, but he stressed the necessity for full funding of the plan and timely allocation of federal payments to the state to avoid financial burdens on counties already adversely affected by the economy and cuts imposed by the State Legislature.

Rep. Hollister also discussed the funding issue, suggesting the state, at some future date, might consider bonding options to assist in paying for ongoing costs associated with implementation of the Act, as well as making funds available for voter education, system upgrades and youth participation in the election process.

Further, she said that although there appears to be no immediate need for sweeping changes in state election laws, the state should constantly evaluate that need and enact legislative change as required.

Mr. Coyne emphasized the need for the Secretary of State and local boards of elections to fashion voter system reforms in a way that keeps the process from becoming "vendor-driven." He said county boards need time to assess and evaluate the unique demands in each jurisdiction and recommended the Secretary of State consider meeting the disability requirements of HAVA in time for the 2004 election, but proceed more deliberately on installment of new voting equipment.

In May 2004, Substitute House Bill 262 was enacted into law by Governor Taft which requires all direct recording electronic voting machines used in the State of Ohio to include a voter verified paper audit trail (VVPAT). Substitute House Bill 262 mandates the Secretary of State shall establish by rule standards for the certification of the VVPAT. In addition, the bill created a county electronic voting machine maintenance fund.

XIX. Summary of the State Plan

Section 254 of the Help America Vote Act of 2002 lists the required components of the State Plan and this document fulfills those requirements.

This report demonstrates that Ohio, because of its widespread use of punch-card voting, is perhaps challenged more than other states to reform its election methods and modernize its voting systems. The size of the state, ranking seventh among the 50 states in total population, and the mix of rural and urban population makes the transition even more challenging.

Recognizing the enormity of the task confronting Ohio, some members of the State Plan Committee and witnesses who testified before the committee counseled the Secretary of State to invoke waivers that would allow the state to delay its full implementation of the plan until the 2006 election cycle.

Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.
The Secretary of State, however, believes Ohio cannot afford to delay its implementation of the plan because every election cycle that passes is another election where voters are potentially disenfranchised and Ohio votes are lost or miscounted. Ohio, the Secretary of State believes, must be a full participant in the election process and every eligible voter must be afforded the opportunity to be counted as we ponder the critical decisions affecting our local communities, state and nation.

As election officials, if we know voters are disenfranchised and that legitimately cast ballots are being discounted, we have not only a moral obligation to immediately embrace a solution, but a legal obligation to find a remedy and enact measures to prevent that from happening. If even one voter is denied the right to vote, we are obligated, by law, to determine the cause and forge a solution. The evidence is overwhelming that thousands of Ohio voters have been disenfranchised by antiquated voting equipment and that many thousands more have lost confidence in the reliability and accuracy of voting devices currently in use in most of Ohio's 88 counties.

The Secretary of State has confidence in the election professionals who conduct and administer elections in the State of Ohio, and believes Ohio has the capability to enact reforms that have already taken place in other states.

We are emboldened in our decision to press forward with implementation of this plan based on the experience of Knox and Lake counties in executing successful elections after implementing new systems only weeks before the General Election. The Knox County Board of Elections, which has only four employees, received delivery of new electronic voting devices in October, 1996, a presidential election year, and deployed them in the November General Election.

Lake County issued a request for proposal in April 1999, awarded bids in July of that year, took delivery of a new voting system the following September, and conducted a successful election weeks later in the November General Election.

Under the timetable established in this plan, new voting systems would be installed and operational in time for the Primary Election in 2004, providing local boards of elections with an opportunity to test the new systems before fully engaging them in the 2004 presidential election cycle.

However, we refer to the preceding section of this plan. Full implementation of this plan presumes full funding by the federal government. If the Secretary of State determines that federal funding for implementation of this plan is not forthcoming from the federal government in a timely manner, we will notify the Elections Assistance Commission of our intent to revise this plan and adjust the timetable for implementation.

Since the Federal Government has not appropriated the remaining funding for HAVA, it was necessary for the Secretary of State to modify our state plan and adjust the timetable for implementation. Initially, we had set an aggressive and ambitious full implementation for November 2004. Unfortunately, due to the delays in receiving funding and the establishment of the Elections Assistance Commission, we project full implementation of all HAVA requirements by May 2006.

Boards of Elections should be assured that the Secretary of State will focus all of its available personnel and resources to assist counties in enacting these reforms and meeting the requirements of the Help America Vote Act.
Boards should also be assured the Secretary of State will work with county officials and elections administrators to ensure available resources are distributed as quickly as possible and that cost containment efforts will be undertaken to minimize implementation costs to counties. Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state’s punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

We include in this definition of electronic voting devices the option for some counties to choose optical scanning devices that are HAVA compliant. In counties which have invested in this equipment and prefer these optional voting devices, the Secretary of State will consider deployment of this equipment as acceptable if certain modifications are made to ensure compliance with statewide voting standards. These counties, however, would be required to feature at voting locations electronic voting equipment that accommodates the needs of people with disabilities.

Based on our analysis, which was reinforced in the testimony of Doug Lewis of The Election Center, we believe conversion of the state’s punch-card voting system to direct recording electronic (DRE) voting devices will generate certain cost efficiencies we believe will minimize cost and expenses to counties, or at least offset some of the implementation costs.

Based on the foregoing, following is a summary of the State Plan for Ohio based on the requirements delineated in Section 254 of Public Law 107-252:

(1) How the State will use the requirement payment to meet the requirements of Title III, and, if applicable under section 251(a)(2), to carry out other activities to improve the administration of elections.

Ohio will implement new voting systems and procedures that meet the general requirements of Title III ensuring the systems have audit capacity, disability access, and alternative language accessibility, where applicable, and that the systems meet error rate thresholds established by the Federal Elections Commission.
(2) How the State will distribute and monitor the distribution of the requirements payment to units of local government or other entities in the State for carrying out the activities described in paragraph (1).

Ohio anticipated federal funding and state matching funds would be about $161 million. Unfortunately, full federal funding was not appropriated and the total federal funding and state matching funding is approximately $137 million. The Secretary of State will allocate about $106 million of that amount for installation of new voting equipment and upgrades of existing voting equipment in Ohio counties, and use the remaining portion to implement statewide voter registration and establish a provisional voting hotline. Disbursements in the amount of $5 million will be available to Ohio’s 88 counties for election official and poll worker training. Additionally, the Secretary of State will make $5 million available for administration of a statewide voter education program. The Secretary of State will draft guidelines and reporting requirements to monitor distribution of these funds and to ensure county compliance with the Help America Vote Act of 2002.

(3) How the State will provide for programs for voter education, election official education and training, and poll worker training which will assist the State in meeting the requirements of title III.

See response to No. 2. Additionally, the Secretary of State, in establishing an authorized vendor list for deployment of new voting equipment, will require vendors to include, as part of their bid proposal, fund allocation that includes voter education, election official education and training, and poll worker training. The Secretary of State also will implement new programs and procedures to supplement these vendor requirements and efforts at the county level to address these issues.

(4) How the State will adopt voting system guidelines and processes which are consistent with the requirements of section 301.

See preceding responses. Ohio will replace punch-card voting in the State and require deployment and installation of electronic-based voting devices that meet the requirements of the Act. The request for proposal for new voting equipment will be crafted to presume required features and safeguards that ensure a uniform voting standard and compliance in all Ohio counties with specific requirements of the Act.

(5) How the State will establish a fund described in subsection (b) for the purposes of administering the State’s activities under this part, including information on fund management.

Such a fund has already been established by the Secretary of State and will be monitored by both the Secretary of State and the Auditor of State, as Ohio law applies to state auditing requirements and reporting procedures. Fund management procedures include quarterly reports to the Election Assistance Commission to detail
receipt and expenditure of funds, and how those funds were used to meet the objectives of the Act.

(6) The State's proposed budget for activities under this part, based on the State's best estimates of the costs of such activities and the amount of funds to be made available.

See response to No. 2 and the fund distribution table on page 23 of the State Plan. The Secretary of State believes full implementation of the plan will require all available federal funding and state matching funds to meet the requirements of the Act.

(7) How the State, in using the requirements payment, will maintain the expenditures of the State for activities funded by the payment at a level that is not less than the level of such expenditures maintained by the State for the fiscal year ending prior to November 2000.

(See Section XV. Requirements Payments: Maintenance of Effort.) Attached to this State Plan are budget materials that show the level of spending for election services by the Secretary of State in FY 2000 and projected levels of spending for FY 2004-05. The Secretary certifies that no federal funds for Requirements payments earmarked for voter reforms and system modernization will be used to supplement the state budget for operation and administration of the office.

(8) How the State will adopt performance goals and measures that will be used by the State to determine its success and the success of units of local government in the State in carrying out the plan, including timetables for meeting each of the elements of the plan, descriptions of criteria the State will use to measure performance and the process used to develop such criteria, and a description of which official is to be held responsible for ensuring that each performance goal is met.

The Secretary of State assumes full responsibility for ensuring compliance with the Act. Specific timetables are included in this plan which requires all punch-card and lever machine counties to install and deploy new voting equipment that meets the uniform standards of the Act by May 2, 2005. The plan also calls for a statewide voter registration system to be in place and fully operational by January 1, 2006. See Section XIV for ongoing performance measurement.

(9) A description of the uniform, nondiscriminatory State-based administrative complaint procedures in effect under section 402.

See attached procedure and refer to Section XIII of the State Plan, Administrative Complaint Procedures and Grievances.
(10) If the State received any payment under Title I, a description of how such payment will affect the activities proposed to be carried out under the plan, including the amount of funds available for such activities.

See response to No. 2. Ohio will use funds from Title I for antiquated systems buyout and to improve election administration activities and procedures. See the fund distribution table on page 23 of the State Plan and allocation and distribution formula described on page 24.

(11) How the State will conduct ongoing management of the plan.

See Section XIV, Ongoing Performance Measurement. Throughout this State Plan is a description of the management practices and procedures outlined by the Secretary of State to ensure compliance with the Act. Any material change in this plan will result in a resubmission of the Plan in accordance with Sections 255 and 256 of the Act.

(12) In the case of a State with a State Plan in effect under this subtitle during the previous fiscal year, a description of how the plan reflects changes from the State Plan for the previous fiscal year and how the State succeeded in carrying out the State Plan for such previous fiscal year.

This State Plan represents Ohio’s initial submission of a State Plan to the Elections Assistance Commission.

(13) A description of the committee which participated in the development of the State Plan in accordance with section 255 and the procedures followed by the committee under such section and section 256.

See page 3, The State Plan Committee, and Section VI, How Ohio Developed its State Plan.

This State Plan respectfully submitted to the Elections Assistance Commission, in accordance with U.S. Public Law 107-252, this 16th day of June, 2003.

J. KENNETH BLACKWELL
Secretary of State
The State of Ohio
February 23, 2005

Dear Election Assistance Commission and Ohio Voters:

In accordance with section 2549(a)(11) of the Help America Vote Act of 2002 (HAVA), I am filing with the U.S. Election Assistance Commission (EAC) for publication in the Federal Register this letter and the following amended text of the Changing the Election Landscape in the State of Ohio, please see pages 25, 33, 41, 45 and 46.

The amended portion of our State Plan reflects the actual funding received to date from the Federal Government and the passage of the General Assembly Substitute House Bill 262, which requires all direct recording electronic voting machines (DRE) used in Ohio to include a voter verified paper audit trail.

Please note that non-material change may be found in other elements of the Ohio State Plan. After consulting with EAC staff, the State of Ohio has elected not to include those changes for publication in the Federal Register as unnecessary under HAVA. Instead, we would direct the EAC and members of the public to the Ohio Secretary of State’s website (www.sos.state.oh.us) to view the complete Ohio State Plan.

On behalf of the State of Ohio, I thank the Commission for its assistance and look forward to our continued collaboration to improve the administration of elections.

Sincerely,

J. Kenneth Blackwell
HAVA State Plan

January 12, 2005

Dear Ohio Voters:

As Chief Election Officer of the State, I invite you to review our revised HAVA state plan entitled: Changing the Election Landscape in the State of Ohio. The revised state plan reflects the total funding received from the Federal Government, which is significantly lower than originally anticipated, and the additional legislative requirements mandated from Substitute House Bill 262.

A logical analysis of the requirements of both HAVA and SHB 262 showed that in order for the state of Ohio to be in compliance with both federal and state law, meeting both time, cost and certification constraints, I will authorize the purchase of Precinct Count Optical Scan voting equipment systems through existing contracts already approved by the Controlling Board to satisfy HAVA requirements.

If you have written comments on the revised state plan, please forward them to Judy Grady, Director of Election Reform, Office of the Secretary of State, 180 E. Board Street, 15th Floor, Columbus, OH, 43215 or hava@sos.state.oh.us

Very truly yours,

J. KENNETH BLACKWELL
Ohio Secretary of State

2/14/2005
Changing the Election Landscape in the State of Ohio

A State Plan to implement the Help America Vote Act of 2002 in accordance with Public Law 107-252, §253(b)
Revised January 12, 2005

"The Act appropriately respects the primacy of state and local governments in the administration of elections, while helping to ensure the integrity and efficiency of voting processes in federal elections by providing federal governmental support for that vital endeavor."

PRESIDENT GEORGE W. BUSH
THE WHITE HOUSE,
October 29, 2002
June 16, 2003

Dear Election Assistance Commission and Ohio Voters:

I can think of no greater gift we can give future generations than an electoral process that ensures the integrity of their vote and provides them with an election system that is efficient and fair.

At the very least, we need an election system that assures every vote counts and every voice is heard in electing those who will serve in government and decide the many critical issues we face as citizens. No voter should be excluded from the process because of a disability, as no voter should be excluded because of inadequate, outdated and imprecise voting mechanisms.

That’s what this report is all about. That’s what the Help America Vote Act of 2002 is all about – fair elections and empowering every voter to exercise their obligation, responsibility and privilege to fully engage in the election process.

Democracy, after all, is a fragile system that relies on the voices and participation of all its citizens, not just a chosen few. Every voter and every vote cast strengthens our democracy and enhances the opportunity to choose the best people for the job of leading our government, at all levels, and deciding those issues that affect our local community, state and nation.

My thanks to the State Plan Committee who worked so diligently to help me create this document that will open a new era for the way we vote in Ohio. Truly, we are dramatically changing the election landscape in our state and in our nation. That is a good thing and probably one of the most important contributions we can make to future generations of Ohioans.

In the final analysis, the Help America Vote Act of 2002 is about inclusion more than it is about all the technical change and new administrative processes and procedures called for in this plan. Inclusion is, after all, the thread that binds the fabric of democracy.

Very truly yours,

J. KENNETH BLACKWELL
Ohio Secretary of State
The Ohio Secretary of State gratefully acknowledges the State Plan Committee for their participation and assistance in the preparation and development of this plan for the strategic implementation of election reforms in the State of Ohio, pursuant to the Help America Vote Act of 2002.

HELP AMERICA VOTE ACT

The State Plan Committee

Chairwoman Judy Grady, Director of Election Reform, Office of the Secretary of State (replaces Dona Walsh)

Ms. Donna Alvarado, Commissioner, Ohio Commission on Hispanic/Latino Affairs

Ms. Linda Carr, Director of Institutional Initiatives, University of Toledo

Mr. Michael Va, Director, Cuyahoga County Board of Elections (replaces Tom Coyne)

Mr. Eric Duffy, Director of Field Services, National Federation of the Blind

Ms. Daisy Duncan Foster, Coordinator of Academic Services, University of Dayton

State Rep. Nancy Hollister, R-Marietta

Mr. Larry Long, Executive Director, County Commissioners Association of Ohio

State Sen. Mark Mallory, D-Cincinnati

Mr. Keith Cunningham, Director, Allen County Board of Elections and President, Ohio Association of Election Officials (replaces Jeff Matthews, Stark County Board)

Mr. Matthew Damsroder, Director, Franklin County Board of Election (replaces Guy Reese)

Ms. Catherine Turcer, Legislative Director, Ohio Citizen Action

Pastor Aaron Wheeler, Chairman, Ohio Civil Rights Commission

Help America Vote Act of 2002

I. Introduction and Overview

On Oct. 29, 2002, President George Bush signed into law the Help America Vote Act of 2002. The legislation was passed in the U.S. House in late 2001 and was approved by the U.S. Senate the following year.

Much of the law embraces recommendations advanced by the National Commission on Federal Election Reform, a group that included both former Presidents Jimmy Carter and Gerald Ford as its honorary co-chairs. The commission observed that democracy is a precious birthright. But they also noted that each generation must nourish and improve the processes of democracy for its successors.

The Help America Vote Act logically embraces the goals of election reform by expecting all levels of government to provide a democratic process that:

- maintains an accurate list of citizens who are qualified to vote;
- encourages every eligible voter to participate effectively;
- uses equipment that reliably clarifies and registers the voter’s choice;
- handles close elections in a foreseeable and fair way;
- operates with equal effectiveness for every citizen and every community;
